Incorporating Victim Service Providers into the CoC & CES

Questions to Discuss Today

- What is a VSP & why is it important to include domestic violence service providers in your homeless system of care?
- What are the benefits?
- How to connect survivors to housing resources?
What is a Victim Services Provider (VSP)?

HUD defines a victim service provider to mean a private nonprofit organization whose primary mission is to provide direct services to victims of domestic violence. This term includes permanent housing providers—including rapid re-housing, domestic violence programs (shelters and non-residential), domestic violence transitional housing programs, dual domestic violence and sexual assault programs, and related advocacy and supportive services programs.

Many agencies provide domestic violence services but are not victim services providers under HUD’s definition.
Categories 1-4 of the **Homeless definition**.

- **Category 1**: Literally homeless individuals/families
- **Category 2**: Individuals/families who will imminently lose their primary nighttime residence with no subsequent residence, resources or support networks
- **Category 3**: Unaccompanied youth or families with children/youth who meet the homeless definition under other federal statutes
- **Category 4**: Individuals/families fleeing or attempting to flee domestic violence
Category 4

(4) Any individual or family who:

- (i) Is fleeing, or is attempting to flee, domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member, including a child, that has either taken place within the individual's or family's primary nighttime residence or has made the individual or family afraid to return to their primary nighttime residence;

- (ii) Has no other residence; and

- (iii) Lacks the resources or support networks, e.g., family, friends, and faith-based or other social networks, to obtain other permanent housing.

*HUD considers human trafficking, including sex trafficking, to be “other dangerous or life-threatening conditions that relate to violence against the individual or family member”*
CoC are tasked with addressing the needs of all homeless people within their geography and this includes subpopulations like survivors of domestic violence.

So why does it feel so challenging?

Benefits of Partnering

- Housing First
- Equal Access
- Trauma Informed Care
- Disclosure
- Client Choice
- Elevating Survivor Needs
- Improving Participant Outcomes
- Resource Utilization
Tips for Improving Engagement

- Don't do it just once a year
- Leverage each others' strengths
- Learn from each other
- Don't be afraid
Why is there tension when we talk about housing survivors?

A. Scarcity of resources
B. Different definitions of vulnerability
C. Sharing survivor information
D. All of the above
E. None of the above

Creating a Coordinated Entry System where survivors have access to housing resources is challenging.
Coordinated Entry – “Parallel System”

- CES for DV is separate from CES for the general homeless population
- DV and homeless database can be exact copies
- By Name Lists are separate
- Separate access points and assessors
- People may be on both lists based on community resources and communication
- Incorporating survivors on the homeless BNL or homeless on the DV BNL is through the CES Lead or List Manager
Coordinated Entry – “Integrated System”

- One system for all regardless whether they are homeless or survivors
- One database BUT VSPs do not enter data
  - Need a process for VSP to have people added to the system (Usually done by CES Lead or List Manager)
- One By Name List are together
- Access points and assessors are trained to work with survivors
- Policies, protocols in place to protect survivor safety and PII
- Access to same housing resources regardless of whether they are homeless or survivors
A word on data…

- You can have anonymous records or records with unique identifiers in HMIS & have data quality
- It is ok to be ok with some duplication in HMIS or between systems
- VSPs must use a comparable database (if HUD funded)
- VSPs cannot enter PII into HMIS
- ROIs = your new BF
