SENT VIA EMAIL

Gustavo Velasquez, Director State of California Department of Housing & Community Development C/O Land Use and Planning Unit 2020 W El Camino Avenue, Suite 500 Sacramento, CA 95833

Dear Mr. Velasquez:

COUNTY OF LOS ANGELES ADOPTED REVISED HOUSING ELEMENT FOR REVIEW AND CERTIFICATION

Pursuant to section 65585(g) of the Government Code, I am pleased to provide you with a copy of the Revised County of Los Angeles Housing Element (2021-2029), which was adopted by the Los Angeles County Board of Supervisors on May 17, 2022. The adopted Revised Housing Element represents our best effort to demonstrate the existing and future housing needs of the unincorporated areas of Los Angeles County.

The adopted Revised Housing Element reflects the final edits your Department reviewed on April 25, 2022, which were deemed to be in compliance with the statutory requirements. The Department of Regional Planning looks forward to your Department's findings for certification. If you have any questions or need further information, please contact me or Tina Fung at tfung@planning.lacounty.gov, Monday through Thursday from 7:30 a.m. to 6:00 p.m. Our offices are closed on Fridays.

Sincerely,

AMY J. BODEK, AICP

Director of Regional Planning

AJB:CC:TF:AS:el

I. INTRODUCTION

USER GUIDE

Purpose

The Housing Element is one of the required elements of the General Plan. This Sixth Revision to the County of Los Angeles Housing Element complies with the California Government Code, beginning at Section 65583. This Housing Element Update covers the planning period of October 15, 2021 through October 15, 2029.

The Housing Element serves as a policy guide to address the comprehensive housing needs of the unincorporated Los Angeles County. The primary focus of the Housing Element is to ensure decent, safe, sanitary, and affordable housing for current and future residents, including those with special needs. The Housing Element has been updated to also include a focus on equitable development to counter historical residential segregation and environmental injustice in many of the County's underserved neighborhoods and communities.

The Housing Element includes the following actions:

- Determines the existing and projected housing needs.
- Establishes goals, policies, and implementation programs that guide decision-making on housing needs.
- Sets forth implementing actions that encourage the private sector to build and improve housing; ensure that government policies do not serve as unnecessary constraints to housing production, preservation, and improvement; and ensure that government policies counter the historical patterns of segregation and environmental injustice for communities of color.

General Plan Consistency

The State law requires the elements of the General Plan to be consistent. Section 65583(c)(7) of the Government Code requires that a local jurisdiction's housing element describe "the means by which consistency will be achieved with other general plan elements and community goals." The County has established procedures to ensure internal consistency between the Housing Element and other General Plan elements. Developed concurrently with the Sixth Revision Housing Element is an update to the Safety Element in compliance with State law. As other individual elements are updated, the County has a process in place to review the other General Plan elements (including the Housing Element) for internal consistency.

Housing Element policies presented herein are shaped by other existing General Plan policies, with particular focus on hazard avoidance (i.e., fire hazard areas, Hillside Management Areas, flood zones, seismic zones, etc.); resource protection (i.e., Significant Ecological Areas and major recreational areas); avoidance of irritating noise sources; and the cost of providing and maintaining additional infrastructure, such as for water and sewers, to undeveloped areas. Likewise, the County has

developed policies that support planned housing units near transit and near employment centers. Therefore, several elements of the County's General Plan may influence housing development strategies because they govern natural or man-made factors that impact the County's ability to safely and appropriately accommodate housing, or because they provide opportunities to develop housing with readily available access to transit or employment centers. It is with an eye toward these other contributing factors that the County has determined where and how it can accommodate its planned allocation of housing units.

Document Organization

The Housing Element is comprised of the following sections:

Introduction: This section includes a user's guide to the Housing Element and highlights major housing characteristics and trends, major housing constraints, and an executive summary of the Sites Inventory for future residential development.

Housing Strategy: This section contains the seven key strategies that serve as the organizing framework for the Housing Element Goals and Policies and Implementation Programs chapters.

Background: This section contains the Housing Needs Assessment, Constraints Analysis, and Resources Analysis chapters, including a discussion of natural, safety, infrastructure, and market constraints. The analyses in this section provide the basis for the Housing Element goals, policies, and implementation programs.

Appendices: The appendices contain the Sites Inventory, the Sites for Rezoning, Review of Past Accomplishments, Public Participation Efforts, Affirmatively Furthering Fair Housing Analyses, and the List of Affordable Housing Providers (Qualified Entities).

EXECUTIVE SUMMARY

Strategies to Accommodate the RHNA

The County of Los Angeles is required to ensure the availability of residential sites, at adequate densities and appropriate development standards, in the unincorporated Los Angeles County to accommodate its share of the regional housing need--also known as the Regional Housing Needs Allocation (RHNA). Unincorporated Los Angeles County has been assigned a RHNA of 90,052 units for the 2021-2029 Housing Element planning period, which is subdivided by level of affordability as follows:

		Afford	lability		
RHNA 2021-2029	Extremely Low ¹ / Very Low (<50% AMI ²)	Lower (50 - 80% AMI)	Moderate (80 - 120% AMI)	Above Moderate (>120% AMI)	Total
	25,648	13,691	14,180	36,533	90,052

Notes:

- 1. Pursuant to State law, the projected need of extremely low income households can be estimated at 50% of the very low income RHNA. Therefore, the County's projected extremely low income can be estimated at 12,824 units. However, for the purpose of identifying adequate sites for RHNA, no separate accounting of sites for extremely low income households is required.
- 2. AMI = Area Median Income

The County's Housing Element is organized around seven key strategies, within which the County has developed goals and policies. The goals and policies directly relate to the programs developed to address the County's housing needs. The seven key strategies include housing availability and housing affordability; stabilizing housing supply against demand; facilitating construction and maintenance of quality housing to ensure livability of neighborhoods; ensuring housing equity; ensuring sustainability in housing production; and ensuring compliance with local, state, and federal requirements through program implementation and monitoring.

The Sites Inventory (Appendix A) is comprised of vacant and underutilized sites within unincorporated Los Angeles County that are zoned at appropriate densities and development standards to facilitate housing development. The Sites Inventory was developed specifically for the County of Los Angeles, and has built-in features that filter sites based on specific criteria, including access to transit, protection from environmental hazards, and other criteria unique to unincorporated Los Angeles County. Other strategies used within the Sites Inventory analysis to accommodate the County's assigned RHNA of 90,052 units include projected growth of ADUs, specific plan capacity, selected entitled projects, and capacity or planned development on County-owned sites within cities. This accounts for approximately 38 percent of the RHNA. The remaining 62 percent of the RHNA is accommodated by sites to be rezoned to accommodate higher density housing development (Appendix B).

Programs

The Housing Element includes proposed and ongoing programs that reduce regulatory barriers and provide incentives for private development. Programs are categorized into: Short-Term; Medium-Term; Long-Term; and Ongoing programs.

Housing Constraints

Governmental Barriers to Housing Development

In recent years, the County has made significant progress in improving its development review process and procedures, as well as modifying development standards to facilitate residential development. While the land use controls are not considered unreasonable or substantial constraints on development, there remain additional opportunities to remove barriers from the Zoning Code to accommodate the changing housing needs for unincorporated Los Angeles County. Another barrier is the entitlement process itself, which the County has helped to streamline through ordinance amendments, organizational change, technology, and increased efficiencies in case processing. A significant governmental barrier to the production of housing development, however, still remains and is not within the control of the County--compliance with the California Environmental Quality Act (CEQA) can result in lengthy delays to housing production, and the process can also be used by housing opponents to slow or stop residential projects. While CEQA reform is not within the purview of the County, it has proposed several procedural modifications to the review process for environmental documentation that will streamline the process.

Natural, Hazard, and Resource Constraints

Unincorporated Los Angeles County encompasses 2,618.13 square miles; of that area, 86.31%, or 2,259.80 square miles are excluded from the Sites Inventory and the Rezoning Program due to natural, hazard, or resource constraints. These physically hazardous areas include Very High Fire Hazard Severity Zones, and the environmentally sensitive areas include areas containing Western Joshua Trees and other endangered, listed, candidate species or species of concern, and/or areas lacking in basic infrastructure, particularly access to water supplies. Additional areas within unincorporated Los Angeles County are designated within the Coastal Zone, or are designated as national recreation areas or national forests. These designations further constrain the ability to develop housing. Efforts to manage environmentally sensitive habitats and protect lives and property from physical hazards have made development infeasible in many but not all of these areas. For certain areas, the County has previously planned for housing in unincorporated Los Angeles County through County-approved specific plans and area plans and analyzed the potential environmental impacts of such planned housing under the California Environmental Quality Act. The County continues to encourage housing in these designated areas.

Land and Construction Costs

High land costs are one of the major contributing factors to housing prices and rents throughout greater Los Angeles County. The urban areas of unincorporated Los Angeles County are substantially built out, with little or no vacant land available for development. The shortage of developable land further drives up the demand and cost of housing construction. As part of the Sixth Revision of Housing Element, the County has identified underutilized sites for rezoning, which helps mitigate the cost of housing development with the increased economies of scale.

Limited Public Resources for Housing

The Los Angeles County Community Development Authority (LACDA) sponsors the development of affordable and special needs housing in unincorporated Los Angeles County and 48 cities that participate in the Urban County Program. State and federal funding for LACDA has fluctuated in recent years, but generally in a declining trend. The County has developed local sources of funding including a local ballot tax measure known as Measure H and an annual allocation of \$100 million, which is used in conjunction with SB 2 funds (Permanent Local Housing Allocation). However, even with the infusion of local funds, the demand for these financial resources is greater than the available supply, and unincorporated Los Angeles County must compete with the other cities for these funds.

Mortgage Financing

Interest rates on a 30-year mortgage have been low over the past decade, generally below three percent in the past five years. The 2020 median home price for a single-family home in Los Angeles County is \$643,000, having nearly doubled since the Housing Element was last updated in 2014 when Los Angeles County was emerging from a recession. Even with historically low mortgage rates, the approval rates for mortgages among very low income households remain significantly lower than the rates for other income groups, as shown in Table III-34.

Demographic and Housing Statistics for the Unincorporated Los Angeles County

The following is a summary of demographic information and housing statistics. For more detailed information, please refer to the Housing Needs Assessment in Section III.

Demographics

Population: As of 2020, the population was 1,034,689, which accounted for 11 percent of the total population of Los Angeles County.

Race and Ethnicity: According to HUD CHAS data, about 50 percent of the households identify as Hispanic. Approximately 23.7 percent identify as White (non-Hispanic), 11.2 percent identify as Black (non-Hispanic), and 15.1 percent identify as Asian or another ethnicity (non-Hispanic).

Seniors: According to the 2014-2018 ACS, seniors account for 13 percent of the population. Approximately 24 percent of households are headed by seniors. Of the senior-headed households, approximately 78 percent are homeowners and 22 percent are renters.

Persons with Disabilities: Nearly 20 percent of the total population experience a disability. According to the 2014-2018 ACS, 32 percent of persons with a disability are employed compared to 71 percent of persons with no disability.

Homelessness: In 2020, there were an estimated 6,088 people experiencing homelessness in unincorporated Los Angeles County.

Commuting Patterns: Approximately 76 percent of commuters in Los Angeles County, including the unincorporated Los Angeles County, drive 30 minutes or more to get to work. Over 30 percent drive more than an hour.

Housing Characteristics

Housing Supply: Between, 2000 and 2020, the total number of single-family residential units increased 5.1 percent and multifamily residential units increased 11.7 percent.

Housing Stock: A majority of the housing stock is comprised of single-family homes. Multifamily housing accounts for approximately 21 percent of housing units.

Age of Housing: The largest share of housing units were built between 1950 and 1959. Nearly 90 percent of the housing stock was built before 1990, over 30 years of age.

Household Size: Approximately 20 percent of households have five or more people as of 2018.

Overcrowding: "Overcrowded" is defined as 1 to 1.5 persons occupying a room, excluding bathrooms, kitchens, hallways, and porches. Overcrowding is more common among renter-occupied units, at 19.3 percent with over 1 person per room, as compared with owner-occupied units, at 6.8 percent with over 1 person per room.

Housing Cost: The median home price in unincorporated Los Angeles County was \$625,000 in 2018

Rental Cost: About 55 percent of all renter-households paid more than 30 percent of their income on rent.

Homeownership Rate: Nearly 61 percent of unincorporated Los Angeles County households own their homes.

II. HOUSING STRATEGY

GOALS AND POLICIES

Strategy 1: Ensure Housing Availability

The State recognizes that housing availability is an issue of "vital State-wide importance." The County places particular emphasis on providing housing opportunities to extremely low, very low, low, and moderate income households, and those with special needs. Accordingly, the following policies are designed to guide future development toward the production of a diverse housing supply to meet the varied needs of the population as a whole.

Goal 1: A wide range of housing types in sufficient supply to meet the needs of current and future residents, particularly for persons with special needs, including but not limited to: extremely low, very low and low income households, seniors, persons with disabilities (including those with developmental disabilities), large households, female-headed households, people experiencing homelessness and at risk of homelessness, and farmworkers.

Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.

Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.

Policy 1.3: Coordinate with the private sector in the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs. Where appropriate, promote such development through incentives, Development Agreements, specific plans, and/or inclusionary housing requirements.

Policy 1.4: Assist housing developers to identify and consolidate suitable sites for developing housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.

Policy 1.5: Advocate for state legislation and state funding for programs that expand affordable housing opportunities.

Goal 2: Communities with equitable access to employment opportunities, community facilities and services, and amenities.

Policy 2.1: Support the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs near employment, transit, services, and other community amenities and facilities such as parks.

Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.

Strategy 2: Ensure Housing Affordability

To accommodate the housing needs of all economic segments of the population, the County must ensure a housing supply that offers a range of choices. A variety of mechanisms should be explored to enhance affordability.

- **Goal 3:** A housing supply that ranges broadly in costs to enable all households, regardless of income, to secure adequate housing.
- Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout the unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
- Policy 3.2: Incorporate cost-saving technologies into housing design, construction, operation, and maintenance.
- Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
- Policy 3.4: Require future Development Agreements and project-based specific plans to include an affordable housing implementation plan that exceeds the requirements in the County's Inclusionary Housing Ordinance.
- **Goal 4:** A comprehensive system of services and housing that prevents and ends homelessness.
- Policy 4.1: Provide support to individuals and households at risk of becoming homeless, including acutely low, extremely low, very low, and low income households, people transitioning out of incarceration, and transition age youth.
- Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.
- Policy 4.3: Assist people living in interim housing to stabilize their lives and transition into permanent affordable housing.
- **Goal 5:** Opportunities for acutely low, extremely low, very low, low, and moderate income households and those with special needs to attain and maintain affordable and adequate housing.
- Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households can afford housing that meets their needs.

Strategy 3: Stabilize Housing Supply

The conservation of existing housing maintains a healthy and diverse housing supply.

- **Goal 6:** Neighborhoods with a stable supply of housing that is affordable to residents of all income levels and facilitates aging in place.
- Policy 6.1: Conserve existing deed-restricted affordable housing that is at risk of converting to market-rate housing.
- Policy 6.2: Ensure no net loss of affordable housing when new development occurs.
- Policy 6.3: Invest public and private resources to rehabilitate and support long-term affordability of naturally-occurring affordable rental housing.
- Policy 6.4: Ensure that rents remain stable in both market-rate and income-restricted affordable housing.
- **Goal 7:** Protection against residential displacement.
- Policy 7.1: Prioritize funding for affordable housing in areas at higher risk of displacement.
- Policy 7.2: Coordinate anti-displacement efforts across County departments through complementary policies, programs, and data sharing.
- Policy 7.3: Support permanent affordability policies and programs, including community land trusts, to ensure housing affordability in perpetuity.
- Policy 7.4: Implement tenant protections and monitor for efficacy.
- Policy 7.5: Facilitate the replacement of units damaged or destroyed in a disaster, and the health and safety of residents displaced by the disaster.

Strategy 4: Facilitate Construction and Maintenance of Quality Housing to Enhance Livability of Neighborhoods

The preservation and maintenance of existing housing, infrastructure, and facilities will serve to meet the overall goal of creating safe and healthy living environments.

Goal 8: Neighborhoods and housing environments that are livable, healthy, and safe for all residents.

Policy 8.1: Support neighborhood preservation programs, such as graffiti abatement, abandoned or inoperative automobile removal, tree planting, and trash and debris removal.

Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.

Goal 9: An adequate supply of housing preserved and maintained in sound condition.

Policy 9.1: Inspect multifamily rental housing and interim housing on a regular basis to ensure that landlords and operators are maintaining properties.

Policy 9.2: Prioritize disadvantaged communities in the allocation of resources to maintain and improve the conditions of existing housing stock, including but not limited to the provision of financial assistance for senior and/or lower income homeowners to repair, improve, or modernize their homes and to remove health and safety hazards.

Strategy 5: Affirmatively Further Fair Housing and Ensure Equity

The opportunity to obtain adequate housing without discrimination is not only an integral part of creating and maintaining a diverse housing supply, but also an important strategy for equitable development.

Goal 10: Accessibility to adequate housing for all persons without discrimination in accordance with state and federal fair housing laws.

Policy 10.1: Support the distribution of affordable housing, shelters, and transitional housing in geographically and economically diverse locations throughout unincorporated Los Angeles County, and when possible, locate near support services and facilities.

Policy 10.2: Enforce laws against illegal acts of housing discrimination. These include housing discrimination based on race, color, ancestry, national origin, sex, gender identity, religion, sexual orientation, marital status, familial status, age, disability, source of income, or any arbitrary reason excluding persons from housing choice.

Policy 10.3: Promote equal opportunity in housing and community development programs countywide.

Policy 10.4: Encourage housing design to accommodate special needs. Designs may include: units with multiple bedrooms; shared facilities; universal design; visitability; onsite child care; health clinics; or onsite job training services.

Policy 10.5: Ensure consistency with the Anti-Racism, Diversity, and Inclusion Initiative (ARDI) through equitable and sustainable land use policy.

Strategy 6: Ensure Sustainability in Housing Production

To meet state, regional, and local sustainability goals, the County must minimize the negative impacts of housing production on the environment. The Housing Element, however, encourages planned housing in areas covered by a County-approved area plan or specific plan that has been analyzed by the County under the California Environmental Quality Act and that plans for housing, affordable housing, natural resource protection, open space preservation, adequate water supplies, necessary infrastructure, wildfire protection, energy conservation, and other sustainable development features.

Goal 11: Alignment of housing production with state and local sustainability goals in order to protect natural resources, reduce greenhouse gas emissions, and foster climate resilience.

Policy 11.1: Ensure consistency with the Our County Sustainability Plan through equitable and sustainable land use policy.

Policy 11:2: Ensure consistency with the County's Green Building Standards (Title 31) to enhance building design and construction and encourage sustainable construction practices.

Policy 11.3: Support policies and programs that aim to reduce resource consumption, such as solar panel installation, cool roof installation, back-up battery power, and incentivization of housing near transit.

Policy 11.4: Prioritize and concentrate new housing developments in areas intended to reduce environmental impacts and with adequate existing and planned infrastructure, such as road networks and water supply, including any areas covered by a County-approved specific plan or area plan that plans for housing, affordable housing, natural resource protection, open space preservation, adequate water supplies, necessary infrastructure, wildfire protection, energy conservation, and other sustainable development features.

Strategy 7: Ensure Compliance through Program Implementation and Monitoring

Monitoring, enforcement, preservation, and innovation in housing should be established and maintained as an ongoing function of the County government.

Goal 12: Planning for and monitoring the long-term affordability of adequate housing.

Policy 12.1: Ensure collaboration among County departments and other agencies in the delivery of housing and related services.

Policy 12.2: Enforce and enhance the housing affordability monitoring system to ensure compliance with funding program regulations and compliance with local, state, and federal laws.

Policy 12.3: Coordinate across County departments to track entitlements and ensure timely reporting of progress towards meeting affordable housing goals.

Policy 12.4: Collaborate across County departments and partner with community-based organizations in pursuing grant funding for affordable housing, planning, and associated infrastructure.

PROGRAMS AND OBJECTIVES

Table II-2 on the following pages lists a summary of housing programs organized by timeframe. These programs implement the County's housing goals. Specific program guidelines and eligibility requirements are available from the identified lead agencies.

The programs are designed to maintain and increase the supply of housing, especially affordable housing, preserve existing units, and provide equal access to housing opportunities. It is important to note that the majority of the programs are previously adopted, ongoing, regulatory, and funding-based.

Quantified Objectives

Table II-1 summarizes the County's quantified housing objectives for construction, preservation, and financial assistance over the 2021-2029 Housing Element planning period.

Table II-1: Quantified Objectives (number of units)

Program	Extremely Low (30% AMI* and below)	Very Low (50% AMI* and below)	Low (80% AMI* and below)	Moderate (120% AMI* and below)	Above Moderate	Total
RHNA	12,824	12,824	13,691	14,180	36,533	90,052
New Construction Objectives						
Projected ADUs	1	1		2,527	1,073	3,600

Short-Term Programs

Program 1: Marina del Rey Affordable Housing Policy

The 2008 Marina del Rey Affordable Housing Policy will be revised and updated to help ensure compliance with the State Mello Act and to increase affordable housing stock in unincorporated Marina del Rey.

All projects in Marina del Rey undergoing demolition, conversion to a new use, or substantial rehabilitation will be required to replace all existing low and moderate income units. Additionally, newly constructed projects and projects undergoing substantial rehabilitation will be required to provide a set aside of 20 percent of the units for low income housing. The Los Angeles County Development Authority (LACDA) will make Mello Act determinations and work in collaboration with the Department of Regional Planning (DRP) and Department of Beaches and Harbors (DBH) to implement the policy.

Objectives	By December 2022, update the Marina del Rey Affordable Housing Policy. Conduct ongoing implementation of updated replacement and inclusionary housing requirements during the planning period.		
Policies	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population. Policy 6.2: Ensure no net loss of affordable housing when new development occurs.		
Timeframe	December 2022 policy update, ongoing implementation		
Lead Agencies	Los Angeles County Development Authority, Department of Beaches and Harbors, Department of Regional Planning		
Funding Source	N/A		

Program 2: Florence-Firestone Transit Oriented District Specific Plan

The intent of the Florence-Firestone Transit-Oriented District (TOD) Specific Plan is to create a land use and zoning policy tool focused on the Florence-Firestone community that would provide more opportunities for affordable housing, encourage transit-oriented development, promote active transportation, improve access to transit, reduce vehicle miles traveled by cars, and streamline the environmental review of future development projects. The Specific Plan will address land use, zoning, and mobility improvements that support housing density and employment in proximity to the three Metro stations in the community: Slauson, Florence, and Firestone Metro A Line (Blue) Stations. The Specific Plan will also incorporate the Housing Element program to rezone sites listed in Appendix B.

As discussed in Table E-17 (Appendix E), limited economic mobility opportunities and lack of public investment are fair housing issues in Florence-Firestone. To address these fair housing issues, the Specific Plan includes a study (completed in 2020) that analyzes the market potential for transit-oriented development in the Project Area. The study explored land uses most conducive to transit-oriented development, such as office, retail, light industrial, commercial and residential mixed use, and multifamily residential. The study will inform zoning map amendments, the land use policy map, development standards, design guidelines and an economic development strategy for the area. In addition, the Specific Plan will include a capital improvement plan to identify specific infrastructure improvements (i.e., sewer, transportation, waste management, stormwater, public water, and open space) and outline a financing plan. The plan will also recommend physical elements such as enhanced crosswalks and landscaping to improve the overall public realm experience and encourage more active transit uses. A civic art program will additionally promote an overall sense of place and community identity. These strategies will promote a safer transit experience and encourage greater investment for projects to beautify the area.

By February 2022, conduct public hearing before the Regional Planning Commission. By March 2022, conduct public hearing before the Board of Supervisors. By September 2022, adopt the Florence-Firestone Transit-Oriented District (TOD) Specific Plan. By October 2029, achieve increases in living-wage, stable employment and post-secondary
By October 2029, achieve increases in living-wage, stable employment and post-secondary
By October 2029, achieve increases in living-wage, stable employment and post-secondary
credential completion, consistent with goals developed for the County's Anti-Racism, Inclusion and Diversity (ARDI) Initiative (Program 15).
By October 2029, initiate public infrastructure improvements included in the Florence-Firestone Fransit-Oriented District Capital Improvement Plan, including at least one street with safety mprovements.
Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
July 2022; December 2025
Department of Regional Planning; Public Works
Local Early Action Planning Grant, Caltrans Sustainable Communities Grant

Program 3: Climate Action Plan

The County's Climate Action Plan (CAP) is a component of the General Plan that outlines actions to reduce greenhouse gas emissions and adapt to a changing climate. Adopted in 2015 as an implementation program of the General Plan, the current CAP expired in 2020.

This program updates the CAP, which will tie together climate change initiatives and provide a blueprint for deep carbon emission reductions. Nearly 62% of the greenhouse gas emissions within unincorporated Los Angeles County comes from the transportation sector, with the vast majority of transportation emissions coming from passenger vehicles. Another 29% of greenhouse gas emissions is tied to energy use in buildings and facilities, including power plants, business, and homes. Reducing greenhouse gas emissions within unincorporated Los Angeles County will further pro-housing strategies, such as encouraging housing near transit through transit-oriented development programs. The CAP will include a streamlined procedure for environmental clearance for individual housing projects, thereby reducing the time and expense needed for individual environmental clearances. This program will essentially allow qualifying housing projects to rely on the CAP for their greenhouse gas emissions analysis under the California Environmental Quality Act.

Another major component of the CAP is furthering equity by identifying actions to reduce air pollution and improve community health, particularly focusing on areas disproportionately burdened by environmental pollution. Examples of CAP actions to be implemented by 2025 include: building shade structures at major transit stops, prioritizing communities with high heat vulnerability; and creating and implementing an Urban Forest Management Plan that prioritizes tree- and park-poor communities.

Objectives	By June 2022, release an updated draft CAP.
	By September 2022, conduct a hearing on the CAP before the Regional Planning Commission.
	By December 2022, adopt the Climate Action Plan.
	By December 2025, build shade structures at major transit stops in at least five communities with high heat vulnerability.
Policies	Policy 11.1: Ensure consistency with the Our County Sustainability Plan through equitable and sustainable land use policy.
	Policy 11:2: Ensure consistency with the County's Green Building Standards (Title 31) to enhance building design and construction and encourage sustainable construction practices.
	Policy 11.3: Support policies and programs that aim to reduce resource consumption, such as solar panel installation, cool roof installation, back-up battery power, and incentivization of housing near transit.
Timeframe	June 2022; September 2022; December 2022; December 2025
Lead Agency	Department of Regional Planning
Funding Source	Regional Early Action Planning Grant

Program 4: Safety Element Implementation: Reducing Wildfire Risk

The Community Planning Assistance for Wildfire Ordinance proposes amendments to Titles 21 and 22 with the goal of reducing damage from wildfires. The Ordinance will limit new development that increases occupancy in Very High Fire Hazard Severity Zones outside of already built-out communities, and address the provision of adequate defensible space, access, and post-wildfire reconstruction.

The Unified Land Management Plan will reduce wildfire risk and intensity in wildfire prone areas and balance the preservation of biologically diverse habitats. The Countywide Community Wildfire Protection Plan will empower residents in wildfire prone areas to better prepare and protect themselves against wildfire events.

Objectives	By the fourth quarter of 2021, conduct additional outreach about the Community Planning Assistance for Wildfire Ordinance.
	By the first quarter of 2022, conduct Regional Planning Commission public hearing for the Community Planning Assistance for Wildfire Ordinance.
	By the third quarter of 2022, adopt the Community Planning Assistance for Wildfire Ordinance to reduce damage from wildfires.
	By December 2023, complete the Unified Land Management Plan and Countywide Community Wildfire Protection Plan.
Policies	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
	Policy 11.4: Prioritize and concentrate new housing developments in areas intended to reduce environmental impacts and with adequate existing and planned infrastructure, such as road networks and water supply, including any areas covered by a County-approved specific plan or area plan that plans for housing, affordable housing, natural resource protection, open space preservation, adequate water supplies, necessary infrastructure, wildfire protection, energy conservation and other sustainable development features.
Timeframe	Third quarter of 2022, December 2023
Lead Agencies	Department of Regional Planning, Fire Department
Funding Source	Community Planning Assistance for Wildfire Grant; Prop 84

Program 5: Disaster Recovery Ordinance

The proposed ordinance expands existing regulations for temporary housing for residents affected by a disaster. It establishes consistent procedures for the replacement of buildings and residential structures and the reestablishment of uses damaged or destroyed by a disaster. The ordinance will amend Title 22 (Planning and Zoning) to speed disaster recovery efforts in unincorporated Los Angeles County.

Objectives	By Fall 2021, hold a public hearing before the Regional Planning Commission.
	By Spring 2022, hold a public hearing before the Board of Supervisors.
	By Summer 2022, adopt the Disaster Recovery Ordinance.
Policies	Policy 7.5: Facilitate the replacement of units damaged or destroyed in a disaster, and the health and safety of residents displaced by the disaster.
Timeframe	Summer 2022
Responsible Agency	Department of Regional Planning
Funding Source	General Fund

Program 6: Priority of Water and Sewer for Affordable Housing

State law requires that when allocating or planning to allocate available and future water or sewer services designated for residential use, public and private providers shall grant priority for service allocations to proposed developments that include housing units affordable to lower-income households.

Objectives	Upon adoption and certification, provide copies of the Housing Element to all water and sewer districts that are required to provide service to developments within unincorporated Los Angeles County.
Policies	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	December 2022
Lead Agency	Department of Regional Planning
Funding Source	General Fund

Program 7: East San Gabriel Valley Area Plan

The East San Gabriel Valley Planning Area is one of the General Plan's 11 planning areas. There are 24 unincorporated communities in the area, including Avocado Heights, Rowland Heights, Hacienda Heights, Charter Oak, San Jose Hills, Valinda, West Puente Valley, East Irwindale, North Claremont, West Claremont, and Northeast La Verne. These unincorporated communities cover 51.29 square miles and include a population of 242,034. The East San Gabriel Valley Planning Area is comprised of two community plans, two community standards districts, and four equestrian districts. The East San Gabriel Valley Area Plan will act as an umbrella to ensure consistency, as well as identify any General Plan and zone changes that can increase housing opportunities and transit-oriented development. The Area Plan will also incorporate the proposed changes in the Housing Element rezoning program (on sites listed in Appendix B), and will include a Capital Improvement Plan to identify specific infrastructure improvements (i.e., sewer, transportation, waste management, stormwater, public water, and open space) and outline a financing plan.

The Area Plan identifies opportunities for encouraging housing and economic development and improving mobility, which supports the General Plan Implementation Program LU-1 (Planning Areas Framework Program). The Area Plan includes the development of a Mobility Plan, which is a companion effort to articulate a regional mobility vision for the East San Gabriel Valley that promotes safe, healthy, efficient, sustainable, and equitable mobility options. This project will examine current conditions in the East San Gabriel Valley Planning Area, review the projects and plans in the area, identify gaps in the transportation network by each mode of travel, and make recommendations for closing the gaps to create a regional network.

The Area Plan will include land use policy map and zone changes to strategically create job opportunities near transit and promote jobs-housing balance. The Area Plan will also streamline and remove barriers to housing development and reduce greenhouse gas emissions.

Furthermore, the Area Plan will bring a cohesive and updated growth vision for the East San Gabriel Valley Planning Area, which advances the County's priorities to address racial inequity and better serve communities of color. The Land Use Element will address environmental justice issues in communities, such as Avocado Heights and South San Jose Hills, where industrial uses are adjacent to residential uses. The Land Use Element will include strategies for transitioning to cleaner industry and mitigating conflicts between industrial and residential land uses. The Land Use Element will also provide recommendations on transforming single-family zoning and consider the need to provide diverse housing types and affordability levels, as well as identify areas for additional density and zone changes. The Economic Development Element will be supported by a summary memo addressing job creation across the socioeconomic spectrum.

Implementation programs of the East San Gabriel Valley Area Plan will be prioritized in communities using mapping tools such as the Equity Indicators Tool, the County's anti-displacement mapping tool (Program 43), and/or the County's Environmental Justice Screening Method (EJSM), which maps levels of cumulative health risk from sources of pollution. This program will further fair housing with a goal of achieving a 10 percent increase in multifamily housing approvals by 2029 in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

Objectives	By the first quarter of 2022, conduct community outreach.
	By the second quarter of 2022, release draft plan.
	By the fourth quarter of 2022, begin public hearings.
	By the second quarter of 2023, adopt the East San Gabriel Valley Area Plan.
	By October 2029, achieve the goal of permitting at least 1,773 units affordable to lower income households in the East San Gabriel Valley Planning Area, consistent with the quantified objectives of the Sites Inventory and Rezoning Program.
	By October 2029, achieve a 10 percent increase in multifamily housing approvals in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	Second quarter of 2023; October 2029
Lead Agency	Department of Regional Planning
Funding Sources	Local Early Action Planning Grant, Regional Early Action Planning Grant, Caltrans transportation grant via Southern California Association of Governments

Program 8: Metro Area Plan

The Metro Area is one of the County's 11 planning areas. The Metro Area Plan will include updates to three community plans, four TOD specific plans and seven community standards districts, and will serve as the basis for a future Capital Improvement Plan. The Metro Planning Area unincorporated communities cover 21.34 square miles and include 313,764 people.

The Metro Area Plan will act as an umbrella to streamline multiple layers of regulation and ensure consistency within several transit-rich communities. The Metro Area Plan will incorporate the proposed changes in the Housing Element rezoning program on sites listed in Appendix B, as well as identify any other General Plan and zone changes that can increase housing opportunities, jobshousing balance and transit-oriented development within the following unincorporated communities: East Los Angeles, Florence-Firestone (a R/ECAP community), Willowbrook (a R/ECAP community), West Rancho Dominguez, East Rancho Dominguez, Walnut Park, and West Athens-Westmont (a R/ECAP community). The Metro Area Plan supports the General Plan Implementation Programs LU-1 (Planning Areas Framework Program) and LU-2 (Transit Oriented District Program).

The Metro Area Plan will include a Mobility Element, which will coordinate land use and transportation, promote active transportation, and include strategies to reduce vehicle miles traveled and improve air quality in the County's most disadvantaged communities. Furthermore, the Metro Area Plan will bring a cohesive and updated growth vision for the Metro Plan Planning Area, which advances the County's priorities to address racial inequity and better serve communities of color.

Table E-28 (Appendix E) identifies factors that contribute to fair housing issues, such as lack of public investment, economic mobility opportunities, and unaffordable rents and sales prices, that affect the Metro Planning Area. Since the Metro Area Plan anticipates enhancing housing opportunities for a diversity of income levels in areas that have been historically underserved or segregated, strategies to address displacement and gentrification will be prioritized. A gentrification and displacement study will evaluate the applicability of a range of mitigation tools including community land trusts, long-term affordability restrictions, jobs/housing linkage fees, and nonprofit and public ownership of land. The study will also address adjacency between industrial and residential uses. The study will be used to inform community benefits policies in the plan. Potential benefits will broadly include affordable housing, community facilities, public open space, complete street interventions, urban greening, and contributions to a Community Benefits fund.

The plan will also include community-specific economic development strategies to encourage development through incentives or land use policy changes (e.g., value capture) as well as redevelopment or tenanting strategies. The focus of these recommendations will be to increase employment through new commercial opportunities and capture spending currently being lost in the Planning Area. If incentives are adopted, this program will include a proactive outreach effort to property owners and business community stakeholders via fact sheets, letters, and social media to publicize the incentives.

Program implementation will be prioritized using tools including the County's anti-displacement mapping tool (Program 43), the County's Equity Indicators Tool and/or Environmental Justice Screening Method Tool, which are mapping applications developed for the County that highlight locations where equity challenges, such as cumulative health risk from pollution sources, are concentrated, as well as socioeconomic and demographic indicators.

Objectives	By November 2021, complete Phase 1 of outreach. (COMPLETED)
	By January 2022, complete background and technical studies. (IN PROCESS)
	By May 2022, complete the preliminary internal draft Metro Area Plan.
	By May 2022, complete Phase 2 of outreach.
	By June 2022, complete preliminary public review draft Metro Area Plan.
	By October 2022, complete the public hearing draft Metro Area Plan.
	By January 2023, complete Regional Planning Commission public hearings.
	By June 2023, adopt the Metro Area Plan.
	By December 2023, distribute fact sheets, letters, and use social media to notify property owners of economic development incentives.
	By October 2029, achieve increases in living-wage, stable employment and post-secondary credential completion, consistent with goals developed for the County's Anti-Racism, Inclusion and Diversity (ARDI) Initiative (Program 15).
	By October 2029, achieve the goal of permitting at least 2,936 units affordable to lower income households in the Metro Planning Area, consistent with the quantified objectives of the Sites Inventory and Rezoning Program.
	By October 2029, adopt a capital improvement plan to support public infrastructure investments in the Metro Planning Area, and initiate improvements to at least two parks and safety improvements for at least six streets.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	June 2023
Lead Agency	Department of Regional Planning
Funding Source	Regional Early Action Planning Grant

Program 9: Inclusionary Housing Feasibility and Implementation

The County adopted an Inclusionary Housing Ordinance, which became effective in December 2020. The Ordinance established submarket areas within unincorporated Los Angeles County to implement inclusionary requirements based on market feasibility and historic building trends by housing type (rental versus ownership). Because market feasibility and building trends vary across the submarkets, the inclusionary requirements likewise vary between submarkets based on housing type.

This program will monitor building activity and comprehensively update the County's Inclusionary Housing Ordinance feasibility study and submarket area boundaries no less than every five years to support additional affordable housing, while ensuring that the inclusionary housing requirements are financially sustainable and legally defensible. Pursuant to the Board of Supervisors' directives on August 4, 2020, the first update, which will be initiated after one year of the ordinance adoption, will address the feasibility of requiring affordable rental housing on sites that are not subject to Government Code section 65583.2(c) and (h) in the East Los Angeles/Gateway, South Los Angeles, and Antelope Valley submarket areas, and address the feasibility of requiring affordable condominiums on sites that are not subject to Government Code section 65583.2(c) and (h) in the South Los Angeles and Antelope Valley submarket areas. This first update will be followed by a comprehensive update to the feasibility study for all submarket areas, which, according to the Board's directives, will be initiated within two years of ordinance adoption. This program will also explore how the Ordinance can be used to increase deeper levels of affordability, increase rental housing, and multifamily housing in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee. Finally, this program will be coordinated with Program 17: Adequate Sites for RHNA, which will rezone sites to require 20 percent of the units in a housing development to be affordable to lower income households pursuant to Government Code section 65583.2(c) and (h).

Objectives	By the first quarter of 2022, report building permit data and market activity for rental housing construction in the East Los Angeles/Gateway, South Los Angeles, and Antelope Valley submarket areas, and for condominium construction in the South Los Angeles and Antelope Valley submarket areas.
	By the third quarter of 2022, amend the Inclusionary Housing Ordinance to include these submarket areas, if supported by the updated feasibility analysis.
	By the fourth quarter of 2022 initiate a comprehensive update to the feasibility study for all submarket areas.
	By the third quarter of 2023, amend the Inclusionary Housing Ordinance to include additional submarket areas, if supported by the feasibility analysis.
	By October 2029, permit at least 500 units of affordable housing for lower income households through the Ordinance.
Policies	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	Third quarter of 2023 and every five years thereafter; 2029
Lead Agency	Department of Regional Planning
Funding Source	Regional Early Action Planning Grant

Program 10: Comprehensive Residential Design and Development Standards

This program amends the Zoning Code to add objective development and design standards, particularly for multifamily and mixed-use projects. Objective development standards that are uniformly verifiable to a defined benchmark reduces subjective judgment during the review of housing applications. Importantly, this program will be coordinated with Program 29, which will review and update definitions for various housing types, including single room occupancy units (SROs). The County will seek to further fair housing goals through this program by exploring objective design standards that mitigate exposure to pollution and provide green space/parklets in underserved communities.

Taken together, Program 10 and Program 29 will reduce review timelines and provide greater predictability in the review and approval of various housing projects. This will also help the County meet requirements in State law and also provide certainty and efficiency in the review of residential projects.

Objectives	By the fourth quarter of 2021, prepare draft design requirements.
	By the second quarter of 2022, finalize design requirements.
	By the fourth quarter of 2022, conduct Regional Planning Commission and Board of Supervisors public hearings.
	By the first quarter of 2023, update Title 22 to establish new residential design and development standards, particularly for multifamily and mixed-use projects, and definitions for housing types such as SROs.
Policies	Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
Timeframe	First quarter of 2023
Lead Agency	Department of Regional Planning
Funding Source	Local Early Action Planning Grant

Program 11: Residential Parking Program Analysis and Code Update

Parking requirements contribute to the high cost of housing and can be a barrier to sustainable goals, such as development of infill housing. In this program, DRP will study existing parking conditions in residential areas, test out the success of existing parking reduction strategies, and examine the feasibility of alternate parking regulations, such as unbundling parking from housing, covered parking, and parking maximums, with the goal of identifying those which would be most effective for unincorporated communities.

This effort will accelerate the production of housing by creating certainty and efficiencies in the review of housing developments with respect to parking requirements. It will also accelerate the production of housing through savings in construction and development costs for housing developments.

This effort entails the development of a comprehensive parking study for all unincorporated Los Angeles County, as well as best practices in parking regulation. In addition, the effort will produce an ordinance and supporting CEQA documents to update residential parking requirements in the Planning and Zoning Code (Title 22). This program supports General Plan Implementation Program M-1 (Parking Ordinance).

Objectives	By the fourth quarter of 2021, conduct analysis of existing conditions and Phase 1 of community engagement.
	By the second quarter of 2022, complete recommendations and draft ordinance.
	By the third quarter of 2022, conduct Phase 2 of community engagement and Regional Planning Commission public hearing(s).
	By the third quarter of 2023, adopt updated parking requirements in the Zoning Code.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
Timeframe	Third quarter of 2023
Lead Agency	Department of Regional Planning
Funding Source	Local Early Action Planning Grant

Program 12: Multifamily Housing Rehabilitation

Rent-stabilized multifamily buildings are an important source of lower-cost housing in unincorporated Los Angeles County. Older buildings, in particular, may require significant investment for owners to maintain them in good condition. Preserving them can be a cost-effective alternative to new construction and prevent displacement of existing tenants.

The County will study the feasibility of providing loans or grants to help multifamily building owners address code violations and make repairs or upgrades, while keeping rents affordable to lower-income tenants through affordability covenants or County rent subsidies. If found to be feasible, the County may seek to develop a pilot program in communities to be prioritized using mapping tools such as the Equity Indicators Tool, the County's displacement risk mapping tool, and/or the Environmental Justice Screening Method.

Objectives	By December 2023, study the feasibility of creating a multifamily housing rehabilitation program.
	By December 2029, if found to be feasible, establish a multifamily housing rehabilitation pilot program.
Policies	Policy 6.3: Invest public and private resources to rehabilitate and support long-term affordability of naturally-occurring affordable rental housing.
Timeframe	December 2023, December 2029
Lead Agencies	Los Angeles County Development Authority, Department of Public Health (in partnership with Public Works)
Funding Sources	General Fund and other sources

Program 13: Short-Term Rental Registration

By 2023, this program will require Short-Term Rentals (STR) located within unincorporated Los Angeles County (excluding the Coastal Zone) to be registered with the Treasurer and Tax Collector before operating.

The goal of this program is to preserve available housing stock, promote greater levels of long-term renting, and improve quality of life in neighborhoods that contain STRs. By 2025, the STR updates for the Santa Catalina Island, Marina del Rey and Santa Monica Mountains Local Coastal Plans will be presented to the California Coastal Commission for consideration.

Objectives	Complete STR ordinance, present it to the Board of Supervisors for consideration, and implement the STR requirements by December 2023.
	Complete revisions to the Santa Catalina Island, Marina del Rey and Santa Monica Mountains Local Coastal Plans and present them to the California Coastal Commission for consideration by December 2025.
Policies	Policy 6.4: Ensure that rents remain stable in both market-rate and income-restricted affordable housing.
	Policy 7.2: Coordinate anti-displacement efforts across County departments through complementary policies, programs, and data sharing.
Timeframe	December 2023 (Board of Supervisors) and December 2025 (California Coastal Commission)
Lead Agencies	Treasurer and Tax Collector, County Counsel
Funding Sources	Charge a registration fee to recover the costs of program implementation. Collect Transient Occupancy Tax from properties being used for STR activity.

Program 14: General Plan Maintenance Fee

This program will establish a General Plan maintenance fee for certain land use permit types. The fee would be used to fund General Plan implementation programs, including maintenance of the General Plan. The continued maintenance of the General Plan will ensure ongoing consistency with new State laws and local initiatives.

Objectives	By December 2023, establish a General Plan Maintenance Fee to fund General Plan implementation programs.
Policies	Policy 12.1: Ensure collaboration among County departments and other agencies in the delivery of housing and related services.
Timeframe	December 2023
Lead Agency	Department of Regional Planning, Public Works
Funding Source	General Fund

Program 15: Equity Audit of Land Use Plans, Zoning Code, and Infrastructure Planning

In July 2020, the County's Board of Supervisors adopted an anti-racism agenda and established a formal Anti-Racism, Diversity and Inclusion Initiative (ARDI). This broad-based initiative will govern the County's commitment to fighting systemic and systematic racism in all forms, including land use patterns and zoning restrictions affecting communities of color. Each department within the County will be required to develop a department equity action plan to address operational and organizational forms of racism.

In concert with the ARDI Initiative, this program will conduct a comprehensive review of the General Plan, all community-based plans and specific plans, and the Zoning Code from an anti-racist and equity lens. It will seek to remove barriers to equitable housing production, remove racist definitions and terminology, and make proactive changes to promote more inclusive communities and prevent incompatible land uses from affecting communities of color.

Beyond the Zoning Code, LACDA will update the County's standard affordability covenant language to ensure that housing developers conduct local outreach and market new units in the most commonly spoken languages in the community.

Concurrently with these efforts, the County is working to reduce racial disparities in access to physical infrastructure (such as sidewalks, street lighting, urban canopy, water resources, and solid waste infrastructure), and broadband service.

Inequities in infrastructure investments and broadband access are fair housing issues, as they can affect neighborhood quality and housing choice. The COVID-19 pandemic caused many workplaces to become virtual, which increased housing choices and employment opportunities for those who can afford broadband access to work from home. Lack of broadband access also limits the ability for constituents to provide input on County projects. For example, as described in Appendix D, the County's outreach for the Housing Element was conducted largely online due to the pandemic.

Public Works is leading a multi-departmental effort to reduce disparities in infrastructure investments, beginning with the following deliverables by the third quarter of 2022: a compendium of equity-based best practices from infrastructure agencies; goals, metrics, and related actions to achieve equity-based policies; a list of benefits reaped from Public Works investments; definitions of equity, disadvantaged/impacted communities, and community engagement that all Public Works sectors apply; needs-based prioritization methodologies for all possible funding sources, staffing plans, project lists, and grant application processes; a map of all recent and planned County projects in key infrastructure categories, with an overlay of demographic and other equity-based data layers and indices; a report that compares differences in investments by race, socioeconomic status, and incidents of COVID-19 deaths; an assessment of the current process of how Public Works conducts community engagement; an analysis of the current process for fulfilling constituent service requests related to infrastructure and a plan for expanding public access; and an assessment of the feasibility of establishing an additional source of County funds to address infrastructure inequity.

The Chief Executive Office is also leading an effort to advocate for state and federal funding for broadband infrastructure in highly disconnected areas in Los Angeles County, and co-leading the creation of an implementation plan to address the digital divide. The County will produce block-by-

block financial modeling and recommendations on how to close the digital divide in demonstration neighborhoods through a public-private partnership. Neighborhoods will be identified based on existing data related to access to broadband services, prioritized in the highest needs communities, and reflect a diversity of population density.

	-
Objectives	By December 2023, complete equity audit of all land use plans and the Zoning Code. Throughout the planning period, amend land use plans and the Zoning Code to address the findings of the equity audit and to ensure consistency with the ARDI Initiative.
	By October 2029, achieve a 10% increase in multifamily housing approvals in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.
	By the third quarter of 2022, complete equity-based analysis of County infrastructure investments and planning practices, and provide recommendations to immediately close infrastructure gaps in R/ECAPs and at least five other communities that meet the County's program objectives.
	By the first quarter of 2022, complete an implementation plan for closing the digital divide, and provide recommendations to immediately help at least five communities close the digital divide.
Policies	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
	Policy 10.5: Ensure consistency with the Anti-Racism, Diversity, and Inclusion Initiative (ARDI) through equitable and sustainable land use policy.
Timeframe	First quarter of 2022; third quarter of 2022; December 2023; Ongoing
Lead Agency	Department of Regional Planning; CEO-ARDI Initiative; Public Works; Chief Executive Office
Funding Source	General Fund

Program 16: Tenant Opportunity to Purchase Ordinance

Tenant Opportunity to Purchase Act (TOPA) policies aim to prevent renter displacement by providing tenants, tenant groups, community land trusts, and affordable housing developers the first right to purchase single family homes and multi-family residential properties when offered for sale. TOPA policies help tip the scales in favor of families and groups of tenants seeking to become homeowners for the first time and/or seeking to preserve the affordability of their rental property for future generations of tenants. TOPA would slow down the speculative forces produced by corporate and speculative buyers and investors that drive local real estate prices beyond the reach of the average buyer.

On August 10, 2021, the Board of Supervisors directed the Department of Consumer and Business Affairs (DCBA), in collaboration with the Los Angeles County Development Authority (LACDA), DRP, and County Counsel, to work with community-based, mission-driven entities, housing providers, real estate professionals, and other relevant stakeholders to review best practices and lessons learned to develop a report with recommendations for implementation of a TOPA policy in unincorporated Los Angeles County. The recommendations will include a framework for an ordinance, administrative and supportive policies, program process and design, community engagement plan, and identification of costs and funding sources for implementation.

Objectives	By December 2023, adopt a TOPA ordinance for the unincorporated areas.
	By October 2029, support the purchase of at least five properties.
Policies	Policy 6.3: Invest public and private resources to rehabilitate and support long-term affordability of naturally-occurring affordable rental housing.
Timeframe	December 2023; October 2029
Lead Agency	Department of Consumer and Business Affairs
Funding Source	General Fund

Medium-Term Programs

Program 17: Adequate Sites for RHNA

Unincorporated Los Angeles County has an assigned Regional Housing Needs Allocation (RHNA) of 90,052 units for the planning period covered by this Housing Element. Under existing zoning, the County is unable to accommodate the entirety of its RHNA obligation.

As required by State law, the County will rezone sites to meet its RHNA shortfall of 20,750 very low/low-income units, 9,019 moderate-income units, and 26,005 above moderate-income units. As shown in Table III-35: Summary of RHNA Strategies, upon completion of the rezoning, there will also be an overall surplus of 574 units. The sites selected for rezoning are listed in Appendix B.

The County will implement the rezoning through the Florence-Firestone Transit-Oriented District Specific Plan, East San Gabriel Valley Area Plan, and Metro Area Plan by 2023, and through the West San Gabriel Valley Area Plan, South Bay Area Plan, and the Westside Area Plan by 2024. Additional sites listed in Appendix B, including those in the Gateway Planning Area, will also be rezoned by 2024 to meet its remaining RHNA shortfall.

To meet the shortfall of very low/low income units, the County will increase the maximum allowable densities on approximately 276 acres of land. The maximum allowable densities will range from 30 to 150 units per acre, with minimum densities of 20 to 50 units per acre. In order to comply with Government Code sections 65583.2 (h) and (i), rezoned sites will permit exclusively residential uses or require at least two-thirds residential square footage in a mixed-use development (which exceeds the 50 percent requirement in the Government Code). The sites will permit owner-occupied and rental multifamily uses by right for all multifamily and mixed-use developments in which at least 20 percent of the units are affordable to lower income households. As reflected in Appendix B, each site has the capacity to accommodate at least additional 16 units and will be available for development in the planning period where water, sewer, and dry utilities can be provided.

To meet the shortfall of moderate and above moderate income units, the County will increase the maximum allowable densities on approximately 776 acres of land. The maximum allowable densities will range from 18 to 150 units per acre.

A full list of plan category changes is provided in the Resources chapter.

Also, in order to comply with Government Code section 65583.2(c), the program will rezone sites identified to accommodate very low/low income units in the Sites Inventory that are from previous housing elements to require 20 percent of the units in a housing development to be affordable to lower income households. The sites already allow multifamily developments by right, per zoning and the County's By Right Housing Ordinance. This will be coordinated with Program 9: Inclusionary Housing Feasibility and Implementation.

Furthermore, the County will track the Sites Inventory continually throughout the planning period to ensure compliance with the No Net Loss Law, Government Code section 65863.

Objectives	By November 2024, rezone sites to meet the County's RHNA shortfall of 20,750 very low/low income units, 9,019 moderate income units, and 26,005 above moderate income units, and rezone sites identified from previous housing elements to require 20 percent of the units in a housing development to be affordable to lower income households, in compliance with Government Code section 65583 (c) and sections 65583.2(c) and (h). Ongoing tracking throughout the planning period to be in compliance with Government Code
	Section 65863.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
Timeframe	November 2024; Ongoing
Lead Agency	Department of Regional Planning
Funding Source	General Fund, LEAP, REAP and CalTrans Sustainable Communities grants

Program 18: South Bay Area Plan

The South Bay Planning Area is one of the General Plan's 11 planning areas, and comprises of the communities of West Carson, which includes an existing TOD specific plan; Lennox, which is a R/ECAP community; Alondra Park; Westfield; La Rambla; Hawthorne Island; and Del Aire, which houses another TOD.

The South Bay Area Plan will act as an umbrella to ensure consistency, as well as identify any General Plan and zone changes that can increase housing opportunities and transit-oriented development. The Area Plan will also incorporate the proposed changes in the Housing Element rezoning program (on sites listed in Appendix B), and will include a Capital Improvement Plan to identify specific infrastructure improvements (i.e., sewer, transportation, waste management, stormwater, public water, and open space) and outline a financing plan.

The South Bay Planning Area is located in the southwest corner of Los Angeles County. Issues facing the Planning Area include traffic congestion, limited public transportation options, air quality concerns, and a lack of developable land. Also, due to the region's proximity and inclusion of major transportation hubs—LAX and the ports of Long Beach and Los Angeles—goods movement has become an important part of the Planning Area's economy. However, goods movement also creates planning and environmental challenges. While physical infrastructure improvements are needed to ensure that freeways and streets are adequate to serve increased truck volumes, the massive increase in cargo volume has created significant air pollution impacts to neighboring communities. In addition, petroleum refining is a significant source of air pollution in the region. Although manufacturing still plays an important role in the region's economy, certain communities have witnessed a decline in manufacturing/industrial uses in recent years. This creates both brownfield redevelopment potential and land use planning challenges. For instance, in unincorporated West Carson, abandoned industrial sites have been redeveloped into multifamily residential uses, which creates land use incompatibility between the new high-density residential developments and the adjacent active industrial uses. The Planning Area's proximity to LAX, one of the busiest airports in the world, also creates a unique land use planning challenge to the region. Neighboring communities, including unincorporated Lennox and Del Aire, will need to continue their efforts to mitigate the noise impacts generated by aircraft on predominately lower density residential areas.

Implementation programs of the South Bay Area Plan will be prioritized in communities using mapping tools, such as the Equity Indicators Tool, the County's anti-displacement mapping tool (Program 43), and/or the County's Environmental Justice Screening Method (EJSM), which maps levels of cumulative health risk from sources of pollution. This program will further fair housing with a goal of achieving a 10 percent increase in multifamily housing approvals by 2029 in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

Objectives	By November 2024, complete the South Bay Area Plan.
	By October 2029, achieve increases in living-wage, stable employment, and post-secondary credential completion, consistent with goals developed for the County's Anti-Racism, Inclusion and Diversity (ARDI) Initiative (Program 15).
	By October 2029, achieve the goal of permitting at least 739 units affordable to lower income households in the South Bay Planning Area, consistent with the quantified objectives of the Sites Inventory and Rezoning Program.
	By October 2029, achieve a 10 percent increase in multifamily housing approvals in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	November 2024; October 2029
Lead Agency	Department of Regional Planning
Funding Sources	General Fund, Regional Early Action Planning Grant

Program 19: West San Gabriel Valley Area Plan

The West San Gabriel Valley Planning Area is one of the General Plan's 11 planning areas. The West San Gabriel Valley Area Plan will act as an umbrella to ensure consistency, as well as identify any General Plan and zone changes that can increase housing opportunities and transit-oriented development. The Area Plan will also incorporate the proposed changes in the Housing Element rezoning program (on sites listed in Appendix B), and will include a Capital Improvement Plan to identify specific infrastructure improvements (i.e., sewer, transportation, waste management, stormwater, public water, and open space) and outline a financing plan.

The Planning Area is comprised of the communities of La Crescenta-Montrose, South Monrovia Islands, East Pasadena-East San Gabriel, Altadena, Whittier Narrows, Kinneloa Mesa, San Pasqual, and South San Gabriel. These are mature, suburban communities, including some in the foothills of the San Gabriel Mountains. Some of these communities contain environmental resources and others face hazardous constraints.

Implementation programs of the West San Gabriel Valley Area Plan will be prioritized in communities using mapping tools, such as the Equity Indicators Tool, the County's anti-displacement mapping tool (Program 43), and/or the County's Environmental Justice Screening Method (EJSM), which maps levels of cumulative health risk from sources of pollution. This program will further fair housing with a goal of achieving a 10 percent increase in multifamily housing approvals by 2029 in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

Objectives	By November 2024, complete the West San Gabriel Valley Area Plan.
	By October 2029, achieve the goal of permitting at least 811 units affordable to lower income households in the West San Gabriel Valley Planning Area, consistent with the quantified objectives of the Sites Inventory and Rezoning Program.
	By October 2029, achieve a 10 percent increase in multifamily housing approvals in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	November 2024; October 2029
Lead Agency	Department of Regional Planning
Funding Sources	General Fund, Regional Early Action Planning Grant

Program 20: Westside Area Plan

The Westside Planning Area is one of the General Plan's 11 planning areas. The Westside Area Plan will act as an umbrella to ensure consistency, as well as identify any General Plan and zone changes that can increase housing opportunities and transit-oriented development. The Area Plan will also incorporate the proposed changes in the Housing Element rezoning program (on sites listed in Appendix B), and will include a Capital Improvement Plan to identify specific infrastructure improvements (i.e., sewer, transportation, waste management, stormwater, public water, and open space) and outline a financing plan.

The Westside Planning Area covers the communities of Marina del Rey, Franklin Canyon, West Fox Hills, Ladera Heights/View Park-Windsor Hills, and West Los Angeles/Sawtelle VA Center, which is a R/ECAP community. The West Los Angeles/Sawtelle VA Center unincorporated community, with the exception of one privately-owned parcel, is comprised of the United States Department of Veterans Affairs West Los Angeles campus, which provides services to veterans and is being further developed with permanent supportive housing under a master plan.

Significant environmental resources exist in the Planning Area, most notably the Ballona Wetlands, which are threatened by potential sea level rise due to climate change. Marina del Rey faces traffic congestion and housing affordability issues; however, protection of the coastline and fish and wildlife resources is unique to this coastal community. Large portions of the area, including Marina del Rey, are located in a liquefaction zone. Marina del Rey is also in a tsunami hazard zone and is particularly susceptible to the negative impacts of climate change. In addition, most of Ladera Heights / View Park–Windsor Hills is in a Very High Fire Hazard Severity Zone. There is also a fault trace running through this community. The Planning Area also includes a large urban oil field in Baldwin Hills. Traffic congestion is one of the biggest issues facing the Planning Area. Another issue is the relatively high cost of land and housing. The Planning Area is seen as a desirable place to live and do business, but there is little land for new development and costs are high.

Implementation programs of the Westside Area Plan will be prioritized in communities using mapping tools, such as the Equity Indicators Tool, the County's anti-displacement mapping tool (Program 43), and/or the County's Environmental Justice Screening Method (EJSM), which maps levels of cumulative health risk from sources of pollution. This program will further fair housing with a goal of achieving a 10 percent increase in multifamily housing approvals by 2029 in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

	By November 2024, complete the Westside Area Plan.
	By October 2029, achieve increases in living-wage, stable employment and post-secondary credential completion, consistent with goals developed for the County's Anti-Racism, Inclusion and Diversity (ARDI) Initiative (Program 15).
	By October 2029, achieve the goal of permitting at least 868 units affordable to lower income nouseholds in the Westside Planning Area, consistent with the quantified objectives of the Sites Inventory and Rezoning Program.
	By October 2029, achieve a 10 percent increase in multifamily housing approvals in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA. Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial

	and transportation corridors. Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population. Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	November 2024; October 2029
Lead Agency	Department of Regional Planning
Funding Sources	General Fund, Regional Early Action Planning Grant

Program 21: Incentives for Lot Consolidation

The unincorporated County has an assigned Regional Housing Needs Allocation (RHNA) of 90,052 units for the planning period covered by this Housing Element. To accommodate the entirety of its RHNA obligation, the Sites Inventory and the Rezoning Program include many smaller lots along major commercial corridors in older communities and urbanized areas. To encourage the assemblage of smaller lots into larger sites that can be developed more efficiently into multifamily residential and mixed-use development, this program will assess land use tools and other incentives that encourage lot consolidation. Implementation mechanisms may include amendments to Title 22 (Planning and Zoning) to establish incentives for lot consolidation and/or other mechanisms that can be part of a community-based planning effort, such as the Metro Area Plan (Program 8). This program will also include a proactive outreach effort, particularly to the property owners that own at least two smaller, nonvacant, adjacent sites that are included in the Sites Inventory and Rezoning Program.

Objectives	By December 2024, adopt lot consolidation incentives.
	By April 2025, prepare fact sheets, letters, and other materials to notify property owners of the new lot consolidation incentives.
Policies	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 1.4: Assist housing developers to identify and consolidate suitable sites for developing housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
Timeframe	December 2024
Lead Agency	Department of Regional Planning
Funding Source	General Fund, LEAP, REAP and CalTrans Sustainable Communities grants

Program 22: Housing for Acutely Low Income Households Program

This program will advocate for and identify available funding for a pilot project for acutely low income (ALI) households, defined as earning no more than 15% of area median income. The County will adopt amendments to Title 22 (Zoning Code) to include, incentivize, and preserve ALI housing, and will coordinate with the LACDA to implement ALI as part of Program 34.

Objectives	By December 2023, update Title 22 to included, incentivize, and preserve ALI housing. By December 2024, identify available funding sources, and update Title 22 as appropriate.
Policies	Policy 1.5: Advocate for state legislation and state funding for programs that expand affordable housing opportunities.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	December 2023; December 2024
Lead Agencies	Department of Regional Planning, Los Angeles County Development Authority
Funding Source	General Fund

Program 23: Park Access for New Residential Development

As the County plans for more housing in urban areas with existing park deficits, the County will support equitable access to parks for new and current residents and reduce racial disparities for communities of color, particularly in R/ECAP communities.

This study will evaluate the feasibility of establishing a new park impact fee for residential projects that are not subject to the County's Quimby parkland requirements in Title 21 (Subdivisions). The study will take into consideration existing park deficits and explore options to generate additional funding for parks in those areas determined to have a Very High or High level of park need per the Los Angeles Countywide Parks Needs Assessment, with a particular emphasis on R/ECAP communities.

Currently, only residential subdivisions, which are typically entitled as single family communities, are required to comply with the Quimby requirements, which are satisfied through the provision of parkland, payment of in-lieu fees, or a combination of the two. If a new park impact fee for multifamily residential rental projects is found to be feasible, it is anticipated that the fees collected will contribute to enhanced or new park space to support these projects. Funding generated through a new park impact fee program will be prioritized for those areas determined to have a Very High or High level of park need per the Los Angeles Countywide Parks Needs Assessment.

It is anticipated that affordable housing projects (or those portions of market rate projects with inclusionary units) would be exempt from this new park impact fee, if the fee is found to be financially feasible.

Objectives	By December 2024, complete a feasibility study for a new park impact fee. By October 2029, create or improve at least three parks in R/ECAP communities.
Policies	Policy 2.1: Support the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs near employment, transit, services, and other community amenities and facilities such as parks.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
Timeframe	December 2024, October 2029
Lead Agency	Department of Parks and Recreation
Funding Source	General Fund

Program 24: Reasonable Accommodations Ordinance Update and Removal of Zoning Barriers to Fair Housing

This program will evaluate existing reasonable accommodations requirements and processes, and review best practices and case law to amend the Zoning Code. The program would lead to the removal of zoning barriers to fair housing, such as the existing Conditional Use Permit requirement for licensed housing with seven or more individuals.

DRP will develop strategies as needed to align with State law, clarify and simplify the process, promote awareness of reasonable accommodations, and expand applicability.

Objectives	By December 2024, study the need to update the Reasonable Accommodations Ordinance and amend it if necessary; provide updated informational materials to the public.
	By December 2025, remove the Conditional Use Permit requirement for licensed housing with seven or more individuals, as appropriate outside of known hazard areas, and other zoning barriers to fair housing.
Policies	Policy 10.3: Promote equal opportunity in housing and community development programs countywide.
	Policy 10.4: Encourage housing design to accommodate special needs. Designs may include: units with multiple bedrooms; shared facilities; universal design; visitability; onsite child care; health clinics; or onsite job training services.
Timeframe	December 2024, December 2025
Lead Agency	Department of Regional Planning
Funding Source	General Fund/General Plan Maintenance Fee

Program 25: Adaptive Reuse Ordinance

The COVID-19 pandemic and subsequent stay-at-home orders have had a ripple effect on the retail, restaurant, and business sectors, leading to high vacancy rates in many retail, restaurant, and commercial buildings. Additionally, traditional office buildings have experienced higher than normal vacancy rates as office employees have shifted to remote work. This trend is likely to continue as businesses realize the financial savings from remote work and as more employees demand more flexibility in their work environment. Capitalizing on this trend, in 2021 the Board of Supervisors directed the CEO, in coordination with LACDA and DRP, to assemble a list of underutilized commercial real estate properties that may be suitable for interim and permanent affordable housing.

Building on this effort, this program would initiate the Adaptive Reuse Ordinance. By 2024, the County will adopt an Adaptive Reuse Ordinance to facilitate the conversion of underutilized commercial properties for diverse housing opportunities, including interim and permanent affordable housing. The Adaptive Reuse Ordinance will be developed in line with existing anti-displacement and anti-gentrification efforts, and may include incentives to encourage adaptive reuse for special needs populations, including persons with disabilities, large households, or female-headed households. If incentives are adopted, this program will include a proactive outreach effort to property owners via fact sheets, letters, and social media to publicize the incentives.

Objectives	By December 2024, adopt an Adaptive Reuse Ordinance.
	By June 2025, distribute fact sheets, letters, and use social media to notify property owners of incentives for adaptive reuse.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 1.4: Assist housing developers to identify and consolidate suitable sites for developing housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.2: Incorporate cost-saving technologies into housing design, construction, operation, and maintenance.
Timeframe	December 2024
Lead Agencies	Department of Regional Planning, Los Angeles County Development Authority, Public Works
Funding Source	General Fund

Program 26: Accessory Dwelling Unit Construction

The County's Zoning Code was recently updated to comply with State law, and allows the construction of accessory dwelling units (ADUs) through a ministerial review outside hazard zones. The County has dedicated staff resources that exclusively review and approve ADU entitlements and implemented performance measures to track the timely review of ADU applications.

DRP collects data annually on planning entitlements and building permits for ADUs for the Housing Element Annual Progress Report. To support the goal of permitting an average of 450 ADUs annually, DRP will develop preapproved design prototypes for a variety of typical housing sites and other tools to further streamline the approval process. These other tools may include information packets on the entitlement process, a dedicated web page including pre-recorded training videos of the entitlement process, preparation of Frequently Asked Questions (FAQs) for distribution at community meetings, and other engagement tools.

At the planning cycle mid-point, if the County is not on track to achieve this number, DRP will further review and streamline permitting procedures and review and augment existing staffing resources as needed to achieve its goal. Additional incentives may include direct outreach mailings to property owners, technical assistance, and financial assistance.

This program will also explore how the County can use ADUs to increase deeper levels of affordability and increase rental housing in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee. This could be done as a continuation of the County's ADU Pilot Program, with direct outreach mailings to property owners within these areas, along with technical assistance and financial assistance.

Objectives	By December 2025, develop preapproved plans and other public engagement tools to promote ADUs as a housing solution, streamline the ADU approval process, and review and streamline permitting procedures if necessary to achieve an annual average goal of 450 building permits issued for ADUs. If necessary, reassess the County's sites strategy for meeting its RHNA for income categories. Additional incentives may include outreach to property owners, technical assistance, and financial assistance.
	Monitor ADU trends annually through the Housing Element APR. If the County finds that ADU production does not keep pace with the ADU assumptions toward the RHNA, the County shall identify additional sites within six months of submittal of the annual Housing Element APR.
	By December 2026, incentivize the establishment of at least three affordable ADUs in High and Highest Resource Areas.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
	Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
Timeframe	December 2025; December 2026
Lead Agencies	Department of Regional Planning, Public Works
Funding Source	General Fund

Program 27: Lead-Based Paint Settlement Housing Remediation

Just over 50% of the housing units in unincorporated Los Angeles County were built prior to 1950. Older housing units are generally in need of major repairs or rehabilitation. Habitability issues in these housing units are also common, and can create environmental hazards for existing residents.

This program focuses on removing these environmental hazards, including lead paint remediation, by providing interior and exterior paint, window and door replacement, and related repairs in addition. The program prioritizes disadvantaged communities, targeting low-income households residing in homes built prior to 1951.

Separately, the community of East Los Angeles has been impacted for decades by the release of hazardous materials from the nearby (now defunct) Exide Technologies battery recycling plant in blatant disregard for environmental justice issues. The State Department of Toxic Substance Control is working to test and remove contaminated soil from affected properties. The County's Department of Public Health (DPH) is dedicating newly available funds to identify and mitigate lead paint hazards in high risk homes, prioritizing those occupied first by children with elevated blood lead levels, followed by other young children and pregnant women.

. Objectives	By December 2027, remediate 4,000 – 5,000 homes. By December 2029, remediate 180-300 homes (specifically related to Exide Technologies impacts).
Policies	Policy 9.2: Prioritize disadvantaged communities in the allocation of resources to maintain and improve the conditions of existing housing stock, including but not limited to the provision of financial assistance for senior and/or lower income homeowners to repair, improve or modernize their homes and to remove health and safety hazards.
Timeframe	December 2027, December 2029
Lead Agency	Department of Public Health
Funding Source	Settlement from Sherwin-Williams Company, ConAgra Grocery Products Company, and NL Industries, Inc. and Aliso Canyon settlement

Long-Term Programs

Program 28: Missing Middle Program

Understanding that high density residential development may not be financially feasible in all areas of unincorporated Los Angeles County due to high land costs, this program will assess land use tools that encourage the development of low to mid-density housing types, such as bungalow and cottage courts, duplexes, triplexes and fourplexes that are context-sensitive in existing residential neighborhoods. The assessment will study the feasibility of these building typologies in unincorporated Los Angeles County, and if feasible, will recommend by-right implementation mechanisms along with anti-displacement strategies to increase housing opportunities in traditionally low density residential zones, particularly in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

This program will also build on the existing Compact Lot Subdivision Ordinance that allows for single family development on smaller parcel sizes in certain residential zones. Implementation mechanisms may include amendments to Title 22 (Planning and Zoning) to establish missing middle housing in single-family residential zones and/or other mechanisms that can be part of a community-based planning effort.

Objectives	By December 2023, establish missing middle policies in at least five communities. By October 2029, assess the feasibility of land use tools that encourage the development of "missing middle" housing in other existing residential neighborhoods of unincorporated Los Angeles County, and if feasible, pursue the recommended implementation mechanisms, such as a by-right Countywide Zoning Ordinance amendment and/or community-based planning effort.
Policies	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	December 2023; October 2029
Lead Agency	Department of Regional Planning
Funding Source	General Fund

Program 29: Housing Types Definitions Program

The Title 22 (Planning and Zoning) will be updated to promote more housing choice and better reflect the diverse housing needs of unincorporated Los Angeles County.

This program will analyze the potential for reducing or removing the 800-square-foot minimum size for a single-family home; comprehensively review State-licensed and non-licensed housing types for specific populations, and update the housing type definitions in Title 22 for consistency with State law; study the impacts to increasing the limit on room rentals in single family residences; and explore strategies for supporting shared housing solutions. This program will also address the definition of single room occupancy units (SROs), which are a valuable resource for unincorporated Los Angeles County's most vulnerable residents.

The review of housing type definitions, including those for SROs, will include a review of current zoning and permitting restrictions and recommendations for the removal of regulatory barriers preventing construction or rehabilitation of these and other fair housing opportunities in unincorporated Los Angeles County.

Objectives	By October 2029, amend Title 22 (Planning and Zoning) of the Los Angeles County Code to update housing type definitions to include a wider variety of housing choices, and to reduce regulatory barriers through the removal of Conditional Use Permit requirements outside of hazard areas.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	October 2029
Lead Agency	Department of Regional Planning
Funding Source	General Fund

Program 30: Alternative Housing Types and Building Methods Program

This program will investigate opportunities to encourage flexible housing typologies such as co-op housing and micro units, as well as innovative building methods, such as 3D printed houses, and manufactured units to increase opportunities for naturally-occurring affordable housing.

Objectives	By October 2029, identify programs and/or amend County Code as needed to remove barriers to alternative housing types and innovative building methods.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.2: Incorporate cost-saving technologies into housing design, construction, operation, and maintenance.
	Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
Timeframe	October 2029
Lead Agency	Department of Regional Planning, Public Works, Los Angeles County Development Authority
Funding Source	General Fund

Program 31: Title 21 Update Program

This program will comprehensively update Title 21 (Subdivisions) of the Los Angeles County Code to streamline procedures for subdivisions outside of known hazard areas, remove outdated and redundant code provisions, and make the Subdivisions Code more user-friendly. The program will address embedded systemic and systematic barriers to more inclusive neighborhoods by requiring the review of all subdivision applications through an equity lens. The program will also include additional residential standards for smaller lot sizes to encourage a diversity of housing types and incomes, and a more diverse mix of unit sizes to accommodate large households, female headed households, or other households with special needs.

This program will allow various County departments that are involved in the subdivision review process to identify opportunities to clarify code language and provide better service to the public in facilitating housing production and for compliance with the Housing Accountability Act.

Objectives	By October 2029, comprehensively update Title 21.
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.3: Implement land use policies and permitting procedures that help reduce the costs of housing development.
Timeframe	October 2029
Lead Agencies	Department of Regional Planning, Public Works, Fire Department, Department of Parks and Recreation, Department of Public Health
Funding Source	General Fund

Program 32: State Housing Legislation Advocacy

In 2021, DRP actively worked with the Chief Executive Office, County Counsel, and the Board of Supervisors to introduce AB 1043 (Bryant) and AB 634 (Carrillo).

AB 1043 (Bryant) establishes an "acutely low income" housing income definition for the purposes of defining affordable rents. AB 634 (Carrillo) allows the expansion of the length of covenants from 55 years to 99 years to preserve housing at risk of expiration. Both bills encourage a diversity of housing types throughout unincorporated Los Angeles County and promote expanded housing opportunities.

In this program, DRP will continue to work with County Counsel and the Board of Supervisors to advocate for, including sponsorship of, State legislation to support the creation and preservation of affordable housing locally.

Objectives	Continue identifying potential State legislative efforts that will support the creation and preservation of affordable housing locally and work with County Counsel and the Board of Supervisors to advocate at the State level.
Policies	Policy 1.5: Advocate for state legislation and state funding for programs that expand affordable housing opportunities.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	Ongoing yearly through October 2029
:Lead Agencies	Department of Regional Planning, CEO, County Counsel
Funding Source	General Fund

Program 33: Workforce Housing Opportunity Zones

This program will initiate the establishment of a qualifying Workforce Housing Opportunity Zone (WHOZ) as allowed under SB 540 (2017), through a site analysis for unincorporated Los Angeles County. If determined to be feasible, the County will designate a WHOZ in an unincorporated community to further encourage development of mixed income housing. As part of this program, the County will adopt a specific housing development plan and a Programmatic Environmental Impact Report, which will be used to streamline subsequent environmental reviews of individual WHOZ projects.

Objectives	By October 2029, initiate the establishment of a qualifying Workforce Housing Opportunity Zone and amend Title 22 as appropriate to support implementation.
Policies	Policy 1.3: Coordinate with the private sector in the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs. Where appropriate, promote such development through incentives and/or inclusionary housing requirements.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	October 2029
Lead Agency	Department of Regional Planning
Funding Source	General Fund

Program 34: Countywide Affordable Rental Housing Development

This program provides financial and technical assistance to acquire sites, develop affordable rental housing, and acquire and rehabilitate affordable rental housing within specific geographic areas. The funds are made available as low-interest long term loans.

Funds for the program are administered through a Notice of Funding Availability (NOFA) issued by LACDA. A NOFA issuance depends on funding availability. Funding allocations are recommended based on a competitive process between applicants. As an incentive, applications for funds in unincorporated Los Angeles County are awarded additional points and are eligible for larger allocations, regardless of the funding source.

All units developed utilizing these resources are made available to households earning less than 50% AMI. The County will revamp this program in conjunction with Program 22 to incorporate a pilot program addressing acutely low income (ALI) households.

Objectives	By October 2029, assist in the development of 350 acutely low, extremely low and very low income rental housing units in unincorporated Los Angeles County through gap financing, a revolving loan fund, and technical assistance during the planning period.
Policies	Policy 1.3: Coordinate with the private sector in the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs. Where appropriate, promote such development through incentives and/or inclusionary housing requirements.
	Policy 1.4: Assist housing developers to identify and consolidate suitable sites for developing housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population.
Timeframe	October 2029
Lead Agency	Los Angeles County Development Authority
Funding Sources	HOME, CDBG, Tax Exempt Multi-Family Revenue Bond, County General Funds, County Affordable Housing Trust Fund, and other sources

Program 35: Section 8 Rental Assistance

LACDA provides various rental assistance programs for income-eligible households, and eligible homeless families and individuals. These include:

Housing Choice Voucher (HCV) Program: This program provides rental assistance to low-income households with a housing cost burden, or who are at risk of becoming homeless or being displaced. Voucher recipients rent housing from private owners and pay a portion of their income toward rent (usually up to 30% of their income). Through annual contribution contracts with local or state Public Housing Agencies, the federal funds are used to subsidize the difference in monthly payments directly to the owner. LACDA proactively notifies voucher holders about source of income protection under the California Fair Employment and Housing Act via the agency's Tenant Talk newsletter.

Veterans Affairs Supportive Housing (VASH) Program: This program provides rental assistance to homeless veterans and their families in combination with case management and clinical services through the Department of Veterans Affairs at Veterans Affairs Medical Center supportive service sites.

Mainstream Program: This program provides rental assistance for households that include a nonelderly person(s) with disabilities, which is defined as any family that includes a person with disabilities who is 18 - 61 years old at the time of the initial Housing Assistance Payment contract.

Non-Elderly Disabled (NED) Voucher Program: This program provides rental assistance to households with non-elderly families whose head, spouse or co-head (under the age of 62) are disabled.

Moderate Rehabilitation Program: This project-based rental assistance to very low-income families (families with incomes below 50% AMI) and low-income families (families with incomes below 80% AMI). Assistance is limited to properties previously rehabilitated pursuant to a housing assistance payments (HAP) contract and a Public Housing Agency (PHA).

Housing Opportunities for Persons with HIV/AIDS (HOPWA): This program provides rental assistance to families and individuals afflicted with HIV/AIDS. Assistance under this program is provided for one year. After the one-year term, all HOPWA participants in good standing are allowed to transition to the regular Housing Choice Voucher Program.

Family Unification (FUP): FUP is a program under which Housing Choice Vouchers are provided to two different populations:

- 1. Families for whom the lack of adequate housing is a primary factor in:
 - The imminent placement of family's child or children in out-of-home care, or
 - The delay in the discharge of the child or children to the family from out-of-home care.

There is no time limit of FUP family vouchers.

2. For a period not to exceed 36 months, otherwise eligible youths have attained at least 18 years and not more than 24 years of age and who have left foster care, or will leave foster care

within 90 days, in accordance with a transition place described in section 475(5)(H) of the Social Security Act, and is homeless or is at risk of becoming homeless at age 16 or older.

FUP vouchers used by youth are limited, by statute, to 36 months of housing assistance.

Project-Based Voucher (PBV) Program: This program is administered by LACDA and the housing assistance is tied directly to a unit in an approved building. This program provides rental assistance to families, elderly families, disabled families, chronically homeless families, special needs families and transition aged youth.

Objectives	By 2029, to be 100% leased up based on the allocations for each of the following housing assistance programs:
	HCV Program: Allocation: 20,600 Currently Assisted: 19, 472
	VASH Program: Allocation: 3,192 Currently Assisted: 1,753
	Mainstream Program: Allocation: 203 Currently Assisted: 46
	NED Program: Allocation: 100 Currently Assisted: 74
	Mod Rehab Program: Allocation: 16 Currently Assisted: 15
	HOPWA Program: Allocation: 34 Currently Assisted: 31
	FUP Program: Allocation: 385 Currently Assisted: 323
	PBV Program: Allocation: 1,425 Currently Assisted: 1,293
Policy	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.
Timeframe	October 2029
Lead Agency	Los Angeles County Development Authority
Funding Source	HUD Funding

Program 36: Family Self-Sufficiency Program

Family Self-Sufficiency (FSS) is a HUD program designed to help public housing residents, Housing Choice Voucher participants, and residents of multifamily assisted housing to increase their earnings and build assets and financial capability. The FSS program is a five-year voluntary program that provides services ranging from case management and referrals to supportive services such as:

- Child Care
- Job Preparation
- Credit Counseling
- Mentoring
- Education
- Money Management
- Home Ownership
- Transportation
- Vocational Training

Objectives	By October 2029, assist 465 program participants in the incorporated and unincorporated areas to achieve self-sufficiency. 432 mandatory slots 373 current FSS participants
Policies	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that
Timeframe	October 2029
Lead Agency	Los Angeles County Development Authority
Funding Source	HUD FSS Project Grant

Program 37: Preservation of At-Risk Housing

For the period 2021-2030, a total of 505 units with existing covenants for low income households are at risk of converting to market-rate housing. The County will work to preserve these at-risk units. LACDA will annually track the status of projects at risk of converting to market rate utilizing its anti-displacement and preservation database systems. Please refer to Program 42, which has been developed to support the preservation of at-risk housing units. LACDA will consider acquisition of at-risk projects, leverage extension of affordability covenants through refinancing or restructuring of limited partnerships, or deploy other anti-displacement strategies.

Other preservation activities include engaging non-profit organizations to devise strategies to preserve at-risk housing projects, such as community land trusts and other measures to ensure long-term or permanent affordability; pursuing state and federal funding to assist in preserving at-risk housing; proactively reaching out to non-profits and landlords to provide notification of expiring units to tenants; and engaging tenants in the effort to preserve at-risk units, in addition to identifying affordable housing options. Furthermore, the County will expand criteria of preservation projects eligible to receive capital funds and operating subsidies through Notices of Funding Availability.

Naturally occurring affordable rental units are also at risk of converting to market-rate housing. The County recently adopted an Affordable Housing Preservation Ordinance (AHPO) to prevent the loss of these rental units through demolition or conversion. The strategies contained in the AHPO include required notification of planned condo conversions to affordable housing developers and a "no net loss" policy requiring one-for-one replacement of affordable units. The AHPO also facilitates the ongoing operation of existing mobilehome parks within unincorporated Los Angeles County.

Objectives	By 2022, preserve 74 at-risk units; in 2023 preserve 44 at-risk units; by 2024 preserve 96 at-risk units; in 2025, preserve 37 at-risk units; in 2026, preserve 101 at-risk units; in 2028 preserve 43 at-risk units; in 2029 preserve 110 at-risk units.
Policies	Policy 6.1: Conserve existing deed-restricted affordable housing that is at risk of converting to market-rate housing.
Timeframe	October 2029
Lead Agency	Los Angeles County Development Authority
Funding Source	LACDA Preservation budget

Program 38: Pilot Community Land Trust Program

Building on the initial year of this pilot, the program will facilitate acquisitions of housing by community land trusts (CLTs) and nonprofit organizations to create long-term affordable housing. The formation of a community land trust, housing cooperative, or other similar models is also a part of the Our County Sustainability Plan to support wealth-generating activities in disinvested neighborhoods.

The program will continue to identify and help secured tax-defaulted properties and other (non taxdefaulted) qualifying properties for disposition to community land trusts. \$14 million was allocated in FY20-21 to acquire and rehabilitate five properties, one in each Supervisorial District. Properties with household incomes ranging from 30-80% AMI and in areas at risk of displacement were prioritized. Once the requirement to acquire one property per Supervisorial District was satisfied, Supervisorial Districts 1 and 2 were prioritized for additional properties, as these districts have higher concentrations of displacement risk. As of October 2021, 32 units have been preserved with an additional seven units in the pipeline. The program will require affordable housing covenants of 99 years to ensure the long term affordability of these units. Allocation of resources from the County toward this program can potentially leverage State resources through \$500 million allocated in 2021 for a five-year Foreclosure Intervention and Housing Preservation Program, to implement SB 1079 through AB 140. Deeper affordability can also be facilitated by incorporating project-based rental subsidies into the program. Pending the outcome of the pilot program and further Board direction, the County will provide funding to acquire and rehabilitate at least five properties in partnership with CLTs, and evaluate the program to consider establishing a permanent program and funding source, with an emphasis on developging CLTs in R/ECAP communities. To the extent feasible, the program should fund the acquisition of at least two of the five properties in R/ECAP communities.

Objectives	By October 2029, the County will provide funding to acquire and rehabilitate at least five properties in partnership with CLTs, with at least two of the properties in R/ECAP communities, and evaluate the program to consider establishing a permanent program and funding source, with an emphasis on developing CLTs in R/ECAP communities.
Policies	Policy 7.3: Support permanent affordability policies and programs, including community land trusts, to ensure housing affordability in perpetuity.
	Policy 11.1: Ensure consistency with the Our County Sustainability Plan through equitable and sustainable land use policy.
Timeframe	October 2029
Lead Agencies	Chief Executive Office, Los Angeles County Development Authority
Funding Source	Affordable Housing Programs Budget

Program 39: Performance Tracking

The County uses an enterprise permit tracking system to coordinate most types of land development, entitlement and permitting functions and reviews for housing projects, including subdivisions, as they move from entitlement application submittal to final building permit. The system also tracks income affordability levels, construction of accessory dwelling units, and the use of incentives (such as density bonus incentives) for affordable housing projects to support reporting in the Housing Element Annual Progress Report. The County processes permits through its online portal.

This program will establish specific performance metrics and monitor case processing times for various housing application types, including accessory dwelling units, County-sponsored affordable housing projects, and large-scale subdivision housing projects. The County will use the data on a continuous basis to improve its permitting system across departments, predict trends, allocate appropriate financial and staffing resources, and communicate accurate information to the public about project processing times.

Objectives	By 2021, begin tracking existing case processing times for housing entitlements by case type, including ministerial, discretionary, and subdivision projects.
	By 2022, complete a system-wide review for departments engaged in the land development, entitlement and permitting functions to analyze existing business practices, and recommend improvements from a technical and business management perspective.
	By 2023, establish performance metrics for case processing and resubmittals for housing entitlements by case type and monitor annually through 2029.
	Annually thereafter through 2029, review system and business enhancements, including necessary staffing resources, through to annual budget process to ensure maximum efficiencies in achieving industry standard turnaround times for case processing.
Policies	Policy 12.3: Coordinate across County departments to track entitlements and ensure timely reporting of progress towards meeting affordable housing goals.
Timeframe	Ongoing through October 2029
Lead Agencies	CEO, Department of Regional Planning, Public Works, Fire, Parks
Funding Source	General Fund

Program 40: Systematic Code Enforcement

Enforcement of health, safety, and building codes is a key strategy in the preservation of quality rental housing stock in unincorporated Los Angeles County. Responsibility for code enforcement is shared by multiple County departments, yet gaps in existing inspection programs remain. Most are complaint-based and/or only address housing of five or more units. Habitability in rental housing units in unincorporated Los Angeles County would be better served if there was a centralized, systematic, and proactive code enforcement program to address habitability issues. Without regular inspections of all units, it is difficult to truly understand the baseline conditions of the housing stock in unincorporated Los Angeles County. It is also difficult to monitor change over time and identify areas to target for non-compliance. There is a need to provide a mechanism to address habitability issues without requiring tenants or neighbors to file a complaint, and to provide strategies to increase access for inspectors.

Objectives	By October 2029, establish systematic code enforcement program to address habitability issues, and quantify the number of housing units in need of rehabilitation and replacement.
Policies	Policy 9.1: Inspect multifamily rental housing and interim housing on a regular basis to ensure that landlords and operators are maintaining properties.
Timeframe	October 2029
Lead Agencies	Department of Public Health, Public Works, LACDA, DCBA
Funding Source	General Fund

Program 41: Development of County-Owned Sites

In the Housing Element Annual Progress Reports for CY 2019 and CY 2020, the County reported entitling a total of 536 affordable units on three County-owned sites within a city. In recent years, the use of County-owned sites has been an integral part of the County's affordable housing strategy. The Sites Inventory assumes a total of 8,290 units, including 3,878 units for extremely low/very low income households, 3,613 units for low income households, 642 units for moderate income households to be built on County-owned sites located in cities during the planning period.

For the selected sites, the County has a right to develop per sovereign immunity pursuant to Section 53090 and 53091 of the California Government Code and disregards the local zoning regulations for these projects, and is the permitting authority in terms of the approval of a project and issuing building permits. Furthermore, these sites are reported to the Department of Finance as part of the County's housing stock. To ensure consistency with the Housing Element, RFPs should be run through DRP. To support the goal of constructing on County-owned sites during the planning period, the County is committed to expand its outreach efforts and develop site-specific incentives, such as assistance with land acquisition and expedited permitting, to garner greater interest from developers.

Objectives	By October 2029, build 8,290 units on County-owned land in cities.
	Policy 1.1: Identify and maintain an adequate inventory of sites to accommodate the County's RHNA.
	Policy 1.3: Coordinate with the private sector in the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs. Where appropriate, promote such development through incentives, Development Agreements, specific plans, and/or inclusionary housing requirements.
Policies	Policy 1.4: Assist housing developers to identify and consolidate suitable sites for developing housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.
	Policy 2.1: Support the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs near employment, transit, services, and other community amenities and facilities such as parks.
Timeframe	October 2029
Lead Agency	Department of Regional Planning, CEO, Los Angeles County Development Authority, Public Works
Funding Source	General Fund

Ongoing Programs

Program 42: Preservation Database

The County's Preservation Database will offer a comprehensive overview of projects that have received financing from LACDA and its predecessor agencies. This inventory will allow the County to pursue proactive strategies to maintain affordability in properties at risk of converting to market-rate rents. Additionally, the database will include other County data sources that will assess the loss of affordable housing stock. This Program will be managed in conjunction with Program 37 to support the preservation of at-risk units.

Objectives	Track and assess preservation risk early on and implement preventative measures to curb displacement and loss of affordable housing, particularly in R/ECAPs and other communities at risk of displacement.
Policies	Policy 6.1: Conserve existing deed-restricted affordable housing that is at risk of converting to market-rate housing.
Timeframe	Ongoing
Lead Agency	Los Angeles County Development Authority
Funding Source	LACDA Preservation budget

Program 43: Anti-Displacement Mapping Tool and Displacement Risk Study

The Displacement Risk Study and accompanying interactive anti-displacement mapping tool offer the County a robust index of vulnerability to economic displacement. In addition to supplementing preservation efforts offered by the Preservation Database (Program 42), the Displacement Risk Study provides a methodology for understanding where displacement pressures threaten residential stability for vulnerable communities. This information is expected to help prioritize areas for affordable housing programs and initiatives.

The methodology informs the anti-displacement mapping tool, named TRACT (Tracking Regional Affordability and Challenges to Tenancy), uses multiple sources of data, relies on multiple geographic scales, and provides automated updates to ensure the most current information is available. The TRACT mapping tool is expected to assist in identifying sites for possible acquisitions to both preserve existing naturally occurring affordable housing, but also to remove properties from a speculative market. It is also expected to inform the anti-displacement policies in area and specific plans, and to guide siting of off-site affordable units in the County's Inclusionary Housing Ordinance (which allows construction of affordable units off-site in areas with known displacement risk).

The TRACT tool uses demographic and Assessor property data to assess the risk of residential instability, examine spatial and economic conditions that render an area or parcel attractive for redevelopment, which in turn increases displacement risk, and evaluates evidence of neighborhood change that may indicate ongoing displacement and gentrification risk.

Objectives	By the fourth quarter of 2021, complete the Displacement Risk Study and make TRACT available to County departments.
	By July 2028, assess displacement and gentrification risk in all R/ECAPs and at least five other communities at risk of displacement by July 2028.
	By July 2029, produce data-informed policy recommendations to help prevent displacement in R/ECAPs and at least five other communities at risk of displacement.
Policies	Policy 7.1: Prioritize funding for affordable housing in areas at higher risk of displacement. Policy 7.2: Coordinate anti-displacement efforts across County departments through complementary policies, programs, and data sharing.
Timeframe	Ongoing;July 2028; July 2029
Lead Agency	Los Angeles County Development Authority
Funding Source	LACDA Preservation budget

Program 44: Emergency Preservation and Tenant Assistance Fund

The Emergency Preservation and Tenant Assistance Fund (EPTAF) provides short-term tenant assistance for units with expiring affordability. Under the program guidelines, the EPTAF focuses on the preservation of units in developments with an expiring loan agreement or affordability covenant originated by LACDA or the County. Additionally, it is intended to target developments that demonstrate an inability to leverage traditional financing or tenant assistance mechanisms, such as tax credits or project-based vouchers, to extend the affordability term of current affordable units. The goal is to support long-term affordability by providing temporary rental assistance to prevent the economic displacement of existing tenants, while the LACDA negotiates with the property owner to develop a long-term plan to extend affordability or to provide replacement of the existing units. The rental assistance covers the difference between affordable, or below market rent levels and market rent, both of which must be approved by LACDA.

Objectives	30-80 households annually
Policies	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.
	Policy 7.2: Coordinate anti-displacement efforts across County departments through complementary policies, programs, and data sharing.
Timeframe	Ongoing
Lead Agencies	Los Angeles County Development Authority, Chief Executive Office
Funding Source	LACDA Preservation budget

Program 45: Rent Stabilization and Mobilehome Rent Stabilization Ordinances

The Department of Consumer and Business Affairs (DCBA) enforces the County's Rent Stabilization and Mobilehome Rent Stabilization ordinances, which became effective in 2020. In addition to limiting annual rent increases for covered units, these ordinances provide protections to tenants, landlords, mobilehome park owners, and mobilehome owners throughout unincorporated Los Angeles County. For example, the Rent Stabilization Ordinance requires relocation assistance when landlords in conventional rental housing are performing certain types of repairs or are evicting tenants for certain just cause reasons. The Rental Housing Oversight Commission was established to hear appeals to determinations made by DCBA regarding potential violations of the ordinances.

At the direction of the Board, these ordinances will be strengthened along with the County's capacity to address gaps in tenant protections for non-rent-stabilized units, enforcement of anti-harassment provisions, relocation assistance, and other emerging issues, including opportunities to further support R/ECAP communities and other communities at risk of displacement.

	Stabilize rents for eligible properties located within unincorporated Los Angeles County. Extend eviction protections to tenants in unincorporated Los Angeles County.
Objectives	Create a rent registry system.
	By October 2029, strengthen tenant protections, enhance capacity for enforcement, and expand assistance for non-rent-stabilized units in R/ECAPs and at least five other communities at risk of displacement.
Policies	Policy 6.4: Ensure that rents remain stable in both market-rate and income-restricted affordable housing.
	Policy 7.4: Implement tenant protections and monitor for efficacy.
Timeframe	Ongoing; 2029
Lead Agency	Department of Consumer and Business Affairs
Funding Source	Consumer protection settlement funds, rental registration fee revenue

Program 46: Stay Housed L.A. County

Stay Housed L.A. County is the County's branded program for eviction prevention and defense services. The program delivers five types of services: public information and awareness; direct tenant outreach and education in vulnerable communities; free legal services to income eligible households; short-term rental assistance to income eligible households; and referrals to wraparound and supportive services to help maintain housing stability. The program is targeted to the County's most vulnerable tenants in the unincorporated communities of East Los Angeles, Walnut Park, East Rancho Dominguez, Florence-Firestone (R/ECAP community), Lennox (R/ECAP community), Rancho Dominguez, West Athens-Westmont (R/ECAP community), Topanga Canyon, West Chatsworth, Los Nietos, unincorporated Whittier, Hi Vista, Lakeview, Redman, Roosevelt, Altadena, and Wilsona Gardens. Limited-scope and full-scope legal representation and short-term rental assistance are available to very low income households (50% AMI). A program evaluation by the University of Southern California underway in 2021 will provide insights on the success of the program to date at achieving desired outcomes, and on the future programmatic and funding needs of the program. Future consideration should be given on applicability of the program for the R/ECAP community of Willowbrook and other communities at risk of displacement. To date, the program has served 280,000 tenants with educational resources; 10,000 tenants with legal counsel; and 500 tenants with representation in court.

	By December 2022, expand services, particularly to the R/ECAP community of Willowbrook and other communities at risk of displacement.
	By October 2029, assist 560,000 tenants with educational resources, 20,000 tenants with legal counsel, and 1000 tenants with representation in court.
Objectives	Provide free eviction prevention and defense services to low-income tenants throughout all of Los Angeles County
	Prevent homelessness
	Stabilize rental housing for low-income tenants
Policies	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.
	Policy 7.4: Implement tenant protections and monitor for efficacy.
Timeframe	Ongoing; 2022; 2029
Lead Agency	Department of Consumer and Business Affairs
Funding Sources	Measure H, County General Fund, Permanent Local Housing Allocation/SB 2

Program 47: Affirmatively Furthering Fair Housing Program

The County contracts with service providers to provide and coordinate fair housing services for residents to promote justice and equality in housing. The service providers are required to conduct outreach and education activities, distribute literature, and publicize the availability of fair housing services through various media. The service providers also record and investigate inquiries and complaints from residents, and conduct testing and enforcement activities. As part of this program, the County will also explore adding protections from denial of housing based on eviction history, credit, rent or utility debt, or criminal history.

Objectives	Annually allocate funding to support fair housing and tenant/landlord services during the planning period.
	Track cases by participating city and unincorporated community to better assess fair housing issues locally, and target outreach activities accordingly.
	Provide training to County staff on fair housing laws and responsibilities.
	Explore opportunities to expand fair housing protections, including those based on eviction history, credit, rent or utility debt, or criminal history.
Policies	Policy 10.2: Enforce laws against illegal acts of housing discrimination. These include housing discrimination based on race, color, ancestry, national origin, sex, gender identity, religion, sexual orientation, marital status, familial status, age, disability, source of income, or any arbitrary reason excluding persons from housing choice.
	Policy 10.3: Promote equal opportunity in housing and community development programs countywide.
Timeframe	Ongoing
Lead Agency	Los Angeles County Development Authority (Housing Rights Center)
Funding Sources	CDBG, General Fund

Program 48: Best Practices for Accessible Housing

Developing and managing an accessible housing stock is an important consideration for affordable housing. Best practices are needed to ensure that accessible and affordable housing units are developed and managed to provide the most benefit to persons with disabilities. While all newly constructed residential buildings must comply with the California Building Code in regard to building accessibility, this program focuses on the requirements and incentives related to the adaptability and accessibility of residential units within affordable housing developments that receive financing assistance from the County.

Although accessible units have long been required in publicly-assisted affordable housing, the County hopes to improve upon best practices to ensure compliance with all applicable regulations and fair housing requirements, while also taking steps to help match the accessible units with income-eligible persons or households that are seeking such housing.

Objectives	Take active steps to ensure compliance with accessibility design standards as required by the California Building Code, ADA Requirements, and Uniform Federal Accessibility Standards (UFAS).
	In accordance with HUD regulations related to accessibility, expand design requirements for new construction for affordable and special needs multifamily housing projects that receive financing assistance from the NOFA application process to require a minimum of 10% of total project units to be accessible for persons with mobility disabilities and a minimum of 4% of total units to be accessible to persons with hearing or visual disabilities, and to make such units available in the same range of sizes and amenities as other units in the building.
	Continue to support the inclusion of preferences for persons with disabilities having notice and opportunity to lease accessible/adaptable and visual/hearing impaired units funded with public funds, especially federal HOME funds.
	Continue ongoing research, review, and updates of best practices and requirements for leasing and management of accessible/adaptable units, in accordance with state and federal fair housing laws.
	Improve housing inventory and registration of accessible units on the Los Angeles County Housing Resource Center web site.
Policies	Policy 10.4: Encourage housing design to accommodate special needs. Designs may include: units with multiple bedrooms; shared facilities; universal design; visitability; onsite child care; health clinics; or onsite job training services.
Timeframe	Ongoing
Lead Agency	Los Angeles County Development Authority
Funding Sources	HOME, CDBG, HUD Section 8 Funding

Program 49: Affordable Housing and Sustainable Communities

Administered by the Strategic Growth Council and implemented by the Department of Housing and Community Development, the AHSC Program funds land use, housing, transportation, and preservation projects to support infill and compact developments that reduce greenhouse gas emissions. The County convenes a multi-disciplinary committee from various departments to vet potential projects in qualifying areas and submits applications for AHSC grants to fund affordable housing development and community infrastructure improvements. The County should continue to support sites located in R/ECAP or other communities at risk of displacement.

Objectives	Submit at least one AHSC application annually in a R/ECAP or other communities at risk of displacement.
Policies	Policy 2.1: Support the development of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs near employment, transit, services, and other community amenities and facilities such as parks.
	Policy 2.2: Encourage multifamily residential and mixed use developments along major commercial and transportation corridors.
	Policy 8.2: Maintain adequate neighborhood infrastructure, community facilities, and services as a means of sustaining the overall livability of neighborhoods and protecting the health, safety, and welfare of the community.
	Policy 11.1: Ensure consistency with the Our County Sustainability Plan through equitable and sustainable land use policy.
Timeframe	Ongoing
Responsible Agency	Chief Executive Office
Funding Source	Greenhouse Gas Reduction Fund

Program 50: Affordable Housing Programs Budget

The Affordable Housing Budget Unit allocates \$100 million annually in local funding annually to producing new, or preserving existing, affordable housing for very and extremely low-income or homeless households, including workforce housing and permanent supportive housing. The program also supports rental assistance, Rapid Re-Housing, shared housing, move-in assistance, and other related services.

Objectives	Annually dedicate a minimum of 75% of Affordable Housing Budget Unit funds to producing new, or preserving existing, affordable housing for very and extremely low-income or homeless households, including workforce housing and permanent supportive housing. Dedicate remaining funds to supporting rental assistance, Rapid-Re-Housing, shared housing, move-in assistance, and other related services.
Policies	Policy 3.1: Promote mixed-income neighborhoods and a diversity of housing types throughout unincorporated Los Angeles County to increase housing choices for all economic segments of the population. Policy 4.1: Provide support to individuals and households at risk of becoming homeless, including
	acutely low, extremely low, very low and low income households, people transitioning out of incarceration, and transition age youth.
Timeframe	Ongoing
Lead Agency	Chief Executive Office
Funding Source	Ongoing Net County Cost, and One-Time Funding (Redevelopment Deferral Payments and Redevelopment Asset Sales)

Program 51: Public Housing Modernization Program

The County owns and/or operates 2,962 units of HUD-subsidized conventional public housing throughout unincorporated Los Angeles County and in the cities of Santa Clarita, West Hollywood, Santa Monica, La Puente, and Compton. Among the 2,962 public housing units, 1,945 are located within unincorporated Los Angeles County.

Modernization activities include replacing roofs; regrading and landscaping sites; replacing windows; remodeling kitchens and bathrooms; replacing ranges, range hoods, and refrigerators; replacing gas, electricity lines, heating systems, interior and exteriors doors, drapes, and carpets; making apartments comply with the Americans with Disabilities Act (ADA); constructing community centers; and painting building exteriors.

Objective	Continue to improve and modernize the public housing units during the planning period.
Policies	Policy 9.2: Prioritize disadvantaged communities in the allocation of resources to maintain and improve the conditions of existing housing stock, including but not limited to the provision of financial assistance for senior and/or lower income homeowners to repair, improve or modernize their homes and to remove health and safety hazards.
Timeframe	Ongoing
Lead Agency	Los Angeles County Development Authority
Funding Sources	HUD Capital Fund Grant Program, Federal Emergency Grants, State Disaster Funds

Program 52: Rapid Re-Housing and Shallow Subsidy Programs

These programs are designed to move people experiencing homelessness into permanent housing while they stabilize their lives (with the goal for them to take over their lease independently); and to assist them in maintaining housing stability in market rate, shared, or affordable housing.

The County's Rapid Re-Housing Program provides temporary rental assistance coupled with intensive case management services to help people experiencing homelessness access housing quickly. Other services are provided as needed, including assistance with a security deposit, furniture, damage mitigation, unit location, and tenancy retention.

The Shallow Subsidy Program provides a rental subsidy consisting of 35% of monthly rent, not to exceed \$300 for individuals and \$700 for households, for up to five years for populations that need additional assistance beyond Rapid Re-Housing.

Objectives	Rapid Re-Housing - serve approximately 4,300 people through the Los Angeles Homeless Services Authority and 250 people through the Department of Health Services annually.					
Policies	Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.					
	Policy 4.3: Assist people living in interim housing to stabilize their lives and transition in permanent affordable housing.					
	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.					
Timeframe	Ongoing					
Lead Agencies	Los Angeles Homeless Services Authority, Department of Health Services					
Funding Sources	Local: County Measure H, County department budgets (Probation AB109) State: HEAP, HHAP Federal: ESG, CoC Program					

Program 53: Safe Parking

The County administers a safe parking program to provide a legal, safe place for vehicle dwellers to spend the night and access resources. While onsite, vehicle occupants are provided hot meals, hygiene services, and case management services with the goal of connecting occupants to housing.

Objectives	Facilitate the continued operation of three safe parking sites in unincorporated Los Angeles County. By 2029, develop one or more additional safe parking sites in unincorporated Los Angeles County.
Policies	Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.
Timeframe	Ongoing; 2029
Lead Agency	Los Angeles Homeless Services Authority
Funding Sources	State: HEAP Funding Local: County Measure H funds, City of Los Angeles HEAP funding, City of Los Angeles General Funds

Program 54: Services for People Experiencing Homelessness and Homelessness Prevention

In 2016, the Los Angeles County Board of Supervisors approved the Homeless Initiative, which included 47 strategies to address the homelessness crisis. The following year, County voters approved Measure H, a sales tax increase which yields an estimated \$355 million annually to provide a robust local funding source for the Homeless Initiative.

The Homeless Initiative expanded the variety of services provided to people experiencing homelessness and people at risk of homelessness.

Access Centers and Access Points: LAHSA provides these places for people to access the homeless services system and begin the process of connection to housing resources, receive referrals to services and resources to meet basic needs.

Addressing Native American Homelessness: The Los Angeles City/County Native American Indian Commission (LANAIC) was formed in the fall of 2018 to better understand Native American homelessness through the lens of community members with lived experience and providers that serve them. The roadmap and objectives for this effort were developed by listening to and prioritizing community voices. WDACS oversees ongoing efforts, which include community engagement, connecting CBOs to the system of care, forming partnerships with other academic, advocacy, urban Indian organizations, and continually exploring ways to provide culturally supportive housing.

Employment Programs: WDACS oversees programs to assist people experiencing homelessness and those at risk of homelessness in connecting to stable employment opportunities. All three are contingent on the annual Measure H funding process.

<u>HireUP</u> is a career pathway training program that provides individuals experiencing homelessness within Los Angeles County an opportunity for training and high road employment opportunities in the construction, hospitality, and civil service sectors. The program targets those individuals enrolled in Rapid Re-Housing, as they typically tend to be at the latter end of their journey through the homeless services system and on the pathway to self-sufficiency, thus exhibiting higher indices of long-term success in employment.

Los Angeles: Regional Initiative for Social Enterprises (LA:RISE) is an innovative and collaborative partnership that unites the County's Workforce Development systems with employment Social Enterprises (SEs) to assist those impacted by homelessness into the workforce. In the LA:RISE model, Social Enterprises provide people experiencing or formerly experiencing homelessness and those at risk of homelessness with an average of 300 hours of Transitional Subsidized Employment (TSE) paired with wrap-around support and Barrier Removal Services. Simultaneously, the America's Job Centers of California (AJCCs) work closely with the SE to provide a continuum of workforce development services to assist the participant into unsubsidized employment.

Regional Homeless Opportunity for Meaningful Employment (HOME) program is being conducted by five of the seven Workforce Development Boards (WDBs) in Los Angeles County: Southeast Los Angeles County (SELACO), Pacific Gateway, Foothill, Verdugo, and South Bay WIB (SBWIB). Regional HOME combines transitional subsidized employment paired with employment services provided by the AJCCs to assist those who are currently or formerly homeless, or at risk

of homelessness, obtain unsubsidized employment. The WDBs provide wrap-around services and soft skills training to participants throughout the duration of the program.

Hygiene Services: This LAHSA program connects people experiencing homelessness with hygiene services to meet their basic needs and prevent public health problems. The program includes mobile showers and laundry services.

Intensive Case Management Services: DHS meets with participants monthly wherever they are currently located to assist with housing placement, provide wrap-around supportive services, and connect participants to medical and behavioral health care. The Full Service Partnership (FSP) team from DMH provide mental health, case management, and housing retention services to clients who are formerly homeless and living in PSH in order to assist them with retaining housing.

Prevention and Problem-Solving Programs: LAHSA oversees efforts to prevent people from entering the homeless system and provide rapid resolution for people who have recently entered the system, including legal services, counseling, and one-time financial assistance. These programs serve up to 3,000 households through problem-solving, 2,000 through prevention, and up to 800 through legal services annually.

Property-Related Tenancy Services: DHS provides tenancy retention services for clients, including liaising with landlords on behalf of the client, assisting with any maintenance issues, ensuring clients understand their lease, and generally advocating for the client in order to maintain their housing.

Street Outreach: LAHSA, DHS, and DMH provide street outreach programs to connect people experiencing homelessness to housing and services while also assisting people to meet their basic needs including nutrition, medical care, and hygiene. DHS operates 62 Multidisciplinary Street-Based Engagement Teams (MDTs) and eight Public Space Engagement Teams (PSEs), with the goal of developing relationships with people over time. MDTs and PSEs place 10-15% of the individuals they interact with in interim or permanent housing. DMH operates field-based teams, called Homeless Outreach and Mobile Engagement (HOME), to provide outreach, engagement and treatment for individuals who have severe mental illness and exhibit significant impairment.

Objectives	Connect people experiencing homelessness with services needed to stabilize their lives, connect with housing and maintain housing. Develop culturally sensitive and appropriate practices for connecting with people experiencing homelessness. Improve health for vulnerable populations by connecting clients with medical and behavioral health care.	
Policies	Policy 4.1: Provide support to individuals and households at risk of becoming homeless, including acutely low, extremely low, very low and low income households, people transitioning out of incarceration, and transition age youth.	
	Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.	
Timeframe	Ongoing	
Lead Agencies	Los Angeles Homeless Services Authority, Department of Health Services, Department of Mental Health, Department of Workforce Development, Aging and Community Services	
Funding Sources	Federal: PATH grant, SAMHSA Block Grant	
	State: HEAP, HHAP, Medi-Cal, MHSA, Whole Person Care	
	Local: County general funds, County department budgets (CEO Homeless Initiative; Department of Health Services; Department of Mental Health; Office of Diversion and Reentry), Measure H funds, Supervisorial District funding, City of Los Angeles General Funds and Council District funding	

Program 55: Supportive Housing Programs

Continuum of Care Program: The Los Angeles Homeless Services Authority (LAHSA) serves as the lead agency for the Los Angeles City and County Continuum of Care (CoC), overseeing permanent supportive housing (PSH) and with comprehensive services for homeless families and individuals with a disability. Eligible applicants for these programs are local governments, Public Housing Agencies (PHAs), and nonprofit organizations. A critical element of CoC housing programs is the provision of ongoing supportive services by partnering with community-based organizations (CBOs). Funding is allocated annually through a competitive Notice of Funding Availability released by the U.S. Department of Housing and Urban Development.

Continuum of Care Rental Assistance Program:

The LACDA receives funding for 1,881 rental assistance certificates and partners with 19 CBOs for referrals and ongoing supportive services. CBOs are required to provide 25% match funding. Utilization of the certificates by the CBOs is monitored annually via an Annual Performance Report which is then submitted to HUD. Rental assistance is provided through three type of certificates:

- <u>Tenant-Based Rental Assistance (TBRA):</u> This assistance stays with the program participant
 who chooses a rental unit in the private market and has the option to move to a different
 unit once the lease has expired.
- <u>Sponsor-Based Rental Assistance (SBRA):</u> The assistance stays with the CBO who may house a participant in a unit owned by the CBO or enter into a master lease with a private landlord.
- <u>Project-Based Rental Assistance (PBRA):</u> The assistance stays with the CBO-owned unit. When a tenant moves out of the unit, they lose their assistance, and the CBO will refer a new applicant for the program to occupy the unit.

Other Permanent Supportive Housing: DHS and DMH provide rental subsidies and other assistance to assist clients with transitioning from homelessness to permanent supportive housing while supporting clients with medical or behavioral health issues. DMH also invests in the capital development of PSH for individuals who are homeless and have a serious mental illness in partnership with LACDA and through No Place Like Home funding.

Objectives	Apply for funding on an annual basis to fulfill the goals and objectives of the CoC during the planning period by rapidly housing people experiencing homelessness and individuals with a disability. Support people with medical and behavioral health issues to transition into supportive housing and retain housing.			
Policies	Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.			
	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.			
Timeframe	Ongoing			
Lead Agencies	Los Angeles Homeless Services Authority, Los Angeles County Development Authority, Department of Health Services, Department of Mental Health			
Funding Sources	Federal: HUD (Continuum of Care program, McKinney-Vento Homeless Assistance Act as Amended by the HEARTH Act of 2009); PATH grant State: MHSA, including No Place Like Home grants, sales tax realignment Local: Measure H, Measure HHH			

Program 56: Temporary Housing Programs

Adult Protective Services (APS) Temporary Emergency Shelter: Operated by WDACS, this program provides short-term housing to APS clients who are 60+ years of age and who are the victims of actual or potential abuse, neglect, or exploitation. The shelters provide a temporary safe environment until either the dangers at home can be resolved or other long-term care solutions are secured. Currently, this program is implemented through two shelters.

Crisis and Bridge Housing: Crisis and bridge housing provide shelter with a range of available case management services through over 10,000 LAHSA-administered beds annually.

Interim Housing: DHS and DMH provide immediate shelter and supportive services for people experiencing homelessness with medical issues or serious mental health issues.

Transitional Housing: This program is temporary housing for up to 36 months for people experiencing homelessness. Services include 24-hour access to bed/unit, meals, residential support, crisis intervention, and problem solving. The goal is to provide temporary housing and active case management while fostering a transition to permanent housing. Service linkages include: mental and physical health, mainstream benefits, education and/or employment supports, life skills, and transition planning.

Winter Shelter Program for Homeless (WSP): LAHSA uses Emergency Solutions Grant funds to operate 846 WSP sites, with a total of 1,518 shelter beds throughout Los Angeles County. This program is instituted yearly during the coldest and wettest months. It is funded by the City of Los Angeles and the County, and supported by the California National Guard, which provides shelter sites at several armories. Non-profit homeless service agencies contracted by the Los Angeles Homeless Services Authority manage each program site. The sites offer persons experiencing homelessness with temporary overnight shelter, meals, and help with connecting to supportive services and stable housing. The majority of people served are either chronically homeless or have high service needs, and do not typically access other supportive services.

Objective	Crisis and bridge housing: 10,000 beds annually (LAHSA) Interim housing: maintain 3,860 beds (DHS) Winter shelter: annually operate 846 sites, providing 1,518 beds (LAHSA)			
Policy	Policy 4.1: Provide support to individuals and households at risk of becoming homeless including acutely low, extremely low, very low and low income households, people transitioning out of incarceration, and transition age youth.			
	Policy 4.2: Connect people experiencing unsheltered homelessness with services to ensure health and safety, and transition them out of homelessness as soon as possible.			
Timeframe	Ongoing			
Lead Agencies	Los Angeles Homeless Services Authority, Department of Health Services, Department of Mental Health, Department of Workforce Development, Aging and Community Services			
Funding Sources	Federal: Emergency Solutions Grant (ESG), HUD (Continuum of Care program)			
	State: Board of State and Community Corrections, HEAP, HHAP, Housing and Disability Advocacy Program, MHSA, Whole Person Care			
	Local: County General Funds, County department budgets (Department of Health Services; Office of Diversion and Reentry (DHS); Probation Department), County Supervisorial District funds, Measure H, City of Los Angeles general fund			

Program 57: Homebuyer Assistance

The County helps strengthen neighborhoods and empower families by supporting low and moderate income first-time homebuyers. The County offers financial assistance with down payment assistance loans, including closing cost assistance, federal income tax credits, and below market-rate loan programs. The following programs are offered by the County:

Home Ownership Program (HOP): HOP is designed to meet the needs of low-income households with the necessary down payment assistance. This program provides a Second Trust Deed loan at zero percent interest with all payments deferred until sale or transfer of title or if the home is no longer owner occupied. The HOP loan provides a second mortgage loan for first-time homebuyers with an amount of assistance up to \$75,000, or 20 percent of the purchase price, whichever is less. Eligible properties are single-family homes, townhomes, and condominiums with a maximum purchase price of \$520,000. Eligible locations are in unincorporated Los Angeles County and participating cities.

Mortgage Credit Certificate Program (MCC): The MCC Program offers first-time homebuyers a federal income tax credit. This credit reduces the amount of federal taxes the holder of the certificate will pay. It can also help first-time homebuyers qualify for a loan by allowing a lender to reduce the housing expense ratio by the amount of tax savings. The qualified homebuyer who is awarded an MCC may take an annual credit against their federal income taxes paid on the homebuyer's mortgage. The credit is subtracted dollar-for-dollar from the federal income taxes. The qualified buyer is awarded a tax credit of up to 20 percent of the annual interest paid on the buyer's mortgage.

Southern California Home Financing Authority (SCHFA): SCHFA is a joint powers authority between Los Angeles and Orange counties formed in June 1988 to provide first mortgage loans for low and moderate income first-time homebuyers. This program offers a 30-year fixed interest rate loan and a grant in the amount of four percent of the first mortgage loan amount for down payment and closing costs assistance.

This program will also, whenever possible, prioritize these affordable homeownership opportunities in High or Highest Resource areas as determined by the California Tax Credit Allocation Committee.

Objectives	HOP – 54 HOP loans funded annually MCC – 120 MCC tax credits issued annually SCHFA – 2 loans funded annually	
Policies	Policy 5.1: Provide financial assistance and services to ensure that acutely low, extremely low, very low, low, and moderate income households and those with special needs can afford housing that meets their needs.	
Timeframe	Ongoing	
Lead Agency	Los Angeles County Development Authority	
Funding Sources	HOP (HOME Funds), MCC (federal income tax credits), SCHFA (mortgage revenue bonds)	

Program 58: Ownership Housing Rehabilitation Assistance

Housing rehabilitation is a cost-effective way to preserve the existing stock of affordable housing and, where focused in targeted areas, can also serve to stimulate neighborhood revitalization efforts. LACDA offers the following programs to aid in housing rehabilitation by homeowners:

Single-Family Home Improvement Program: This program is designed to assist low income qualified owners to repair electrical, plumbing, heating, and roofing systems, and eliminate minor code violations. The maximum loan amount is \$30,000.

Residential Sound Insulation Program: This program provides grants to eligible property owners to insulate homes from aircraft noise caused by the Los Angeles International Airport. To be eligible for the grants, the property must be located within designated areas of the unincorporated communities of Lennox, Del Aire, and West Athens-Westmont. Sound insulation improvements may include the replacement of windows and exterior doors; and the addition of vents, electrical panel upgrades, and a heating ventilation and air conditioning system. This is a grant program with no cost to the property owners for sound insulation work.

Handyworker Program: This program provides grants for minor home repairs and rehabilitation services to eligible low income households. The program provides handyworker services to eligible homeowners within the unincorporated areas of the First, Fourth and Fifth Supervisorial Districts. The Handyworker Grant Program is funded through the Community Development Block Grant program and administered by the Housing Investment and Finance Division. The maximum grant amount allowable under the Handyworker Grant Program is \$5,000. Services include minor plumbing repairs, garbage disposal replacement, window screen repairs, smoke alarm repair and installation, and water heater straps.

Objectives	Single-Family Home Improvement – 40 households annually (currently suspended due to COVID) Residential Sound Insulation – 1,100 households Handyworker – 50 households annually (currently suspended due to COVID)
Policies	Policy 9.2: Prioritize disadvantaged communities in the allocation of resources to maintain and improve the conditions of existing housing stock, including but not limited to the provision of financial assistance for senior and/or lower income homeowners to repair, improve or modernize their homes and to remove health and safety hazards.
Timeframe	Ongoing
Lead Agency	Los Angeles County Development Authority
Funding Sources	Federal Aviation Administration and Los Angeles World Airport, CDBG

Program 59: Childhood Lead Poisoning Prevention Program

This program encourages parents to have their children's blood lead level tested. The program investigates cases of childhood lead poisoning, determines if lead based paint in the child's home or environment is the source of the lead, and requires remediation of the source to prevent further poisoning.

Objectives	Conduct environmental investigations at the homes of lead-poisoned children. Educate owners, contractors, government agencies, and the public about lead hazards. Respond to complaints of unsafe lead work at properties built before 1978 that may contain lead paint.
Policies	Policy 9.2: Prioritize disadvantaged communities in the allocation of resources to maintain and improve the conditions of existing housing stock, including but not limited to the provision of financial assistance for senior and/or lower income homeowners to repair, improve or modernize their homes and to remove health and safety hazards.
Timeframe	Ongoing
Lead Agency	Department of Public Health
Funding Source	California Department of Public Health, Childhood Lead Poisoning Prevention Branch

Program 60: Historic Preservation Program

The County of Los Angeles is one of seven California counties designated as a Certified Local Government under the National Historic Preservation Act of 1966. The County's Historic Preservation Program is comprised of the Historic Preservation Ordinance (HPO), which establishes criteria and procedures for the designation, preservation, and maintenance of landmarks and historic districts; and the Mills Act Historical Property Contract Program (MA Program), which provides property tax relief to owners of historic properties who are willing to restore and maintain their properties.

HPO supports long-term affordability of housing in rent-stabilized buildings that are County landmarks or contributors of County historic districts by ensuring that those buildings are not demolished. The MA Program encourages the preservation of qualified historic properties, which may contain rent-stabilized units, by providing funding for the maintenance, rehabilitation, and restoration of the properties.

DRP recently completed a survey of historic resources associated with the African-American community of Sun Village, located in the unincorporated Antelope Valley. This project supports the County's multi-faceted efforts to form a more equitable society by identifying cultural, historic, and social contributions of the County's diverse communities.

Objectives	Develop and adopt the Historic Preservation Ordinance, and promote the Mills Act Historical Property Contract Program to property owners through efforts such as mailing informational materials to property owners of designated historic properties or within historic districts; the dissemination of brochures, presentations, and web postings on the DRP web site; and by offering technical assistance to property owners.	
Policies	Policy 6.3: Invest public and private resources to rehabilitate and support long-term affordability of naturally-occurring affordable rental housing.	
Timeframe	Ongoing

Program 61: Annual Zoning Code Technical Update

In 2019, DRP established an annual program to make updates to Title 22 (Planning and Zoning) to ensure consistent implementation of local ordinances and compliance with frequently-changing State laws. This annual "tune up" allows DRP to identify opportunities to clarify language and provide better service to the public in facilitating housing production.

In conjunction with the County's Anti-Racism, Diversity and Inclusion (ARDI) Initiative, the annual tune up will also provide the mechanism for DRP to review Title 22 through an equity lens.

Objectives	By 2023, update the Farmworker Housing Ordinance to <u>be in compliance with the State Health and Safety Code Section 17021.5.</u> Annually update Title 22 to ensure consistent implementation and compliance with new State laws.			
Policies	Policy 1.2: Remove regulatory barriers that constrain the provision and preservation of housing for acutely low, extremely low, very low, low, and moderate income households and those with special needs.			
Timeframe	Ongoing			
Lead Agency	Department of Regional Planning			
Funding Source	General Fund			

III. BACKGROUND

HOUSING NEEDS ASSESSMENT

This housing needs assessment determines the existing housing inventory and market trends that can be used to inform housing policies for unincorporated Los Angeles County. The analysis of existing conditions includes a review of population, employment, households, and housing characteristics. Additionally, the housing needs assessment addresses special circumstances, such as populations with special needs and limitations on resources.¹

Data Limitations

Unincorporated Los Angeles County is a complex geography for the purpose of compiling socioeconomic data. The Census Bureau does not recognize unincorporated Los Angeles County as a single entity. To obtain specific data for unincorporated Los Angeles County, the methodology often involves subtracting data for cities from the county level data. With American Community Survey (ACS) data being sample data with margins of error, this process may be appropriate for small county jurisdictions, but becomes a complex and highly inaccurate method for a jurisdiction as large as unincorporated Los Angeles County. Furthermore, much of the housing data is sourced from HUD's Comprehensive Housing Affordability Strategy (CHAS). CHAS data is available only for cities that are entitlement jurisdictions with a population 50,000 or more, or collectively for "Urban County" jurisdictions that are comprised of unincorporated areas and cities with less than a population of 50,000. This Needs Assessment relies on data provided by SCAG in the Pre-Approved Local Housing Data, and is supplemented with other data that may be available at the Urban County level.

County Overview

Almost 65 percent of the land area in Los Angeles County, or about 2,600 square miles, is unincorporated (see **Figure III-2**). With a population of nearly 10 million people, Los Angeles County is the most populous county in the United States. Roughly 11 percent of Los Angeles County's total population, or approximately 1,034,689 people, live in more than 125 unincorporated communities.

Unincorporated Los Angeles County Population Growth Trends: 2000-2020

The majority of Los Angeles County's growth occurred in the post-war years, and growth has slowed in the decades since 1960. Despite the declining growth rate, unincorporated Los Angeles County added 48,639 new residents between 2000 and 2020 (**Figure III-1**). During this period, unincorporated Los Angeles County had an annual growth rate of 0.2 percent, compared to 0.7 percent in the Southern California Association of Governments (SCAG) region.

_

This section utilizes various data sources, including sample data and projections; therefore, depending on the source, some data totals may differ slightly.

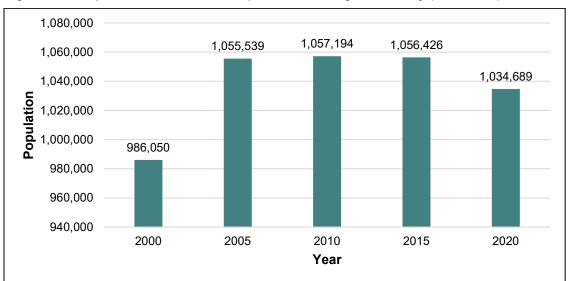

Figure III-1: Population Trend - Unincorporated Los Angeles County (2000-2020)

Figure III-2: Unincorporated Los Angeles County

Projections

Population Projections

SCAG includes a reasonable growth forecast for local jurisdictions as reported in the 2020 Regional Transportation Plan/Sustainable Communities Strategy. ² According to SCAG, by 2045, the population in unincorporated Los Angeles County is expected to increase by 22 percent (**Figure III-3**).

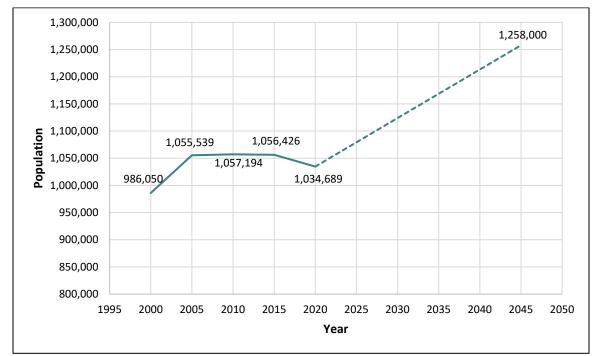

Figure III-3: Population Projections - Unincorporated Los Angeles County (2000-2045)

Source: CA DOF E-5 Population and Housing Unit Estimates; SCAG 2020 RTP/SCS: Demographics and Growth Forecast.

Household Projections: 2016-2045

According to SCAG, from 2016 to 2045, the number of households in unincorporated Los Angeles County is projected to grow by approximately 42 percent.

Employment Projections

According to SCAG, employment in unincorporated Los Angeles County is expected to grow by 19% from 2016 to 2045. While sector-specific projections for unincorporated Los Angeles County are not available, the State Employment Development Department (EDD) projects growth in some higher paying sectors in Los Angeles County as a whole by 2026, including educational and health services, professional and business services, and trade, transportation and utilities (**Figure III-4**). These sectors

Southern California Association of Governments (SCAG). 2020. Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). https://scag.ca.gov/sites/main/files/file-attachments/0903fconnectsocal_demographics-and-growth-forecast.pdf?1606001579. Accessed July 2021.

have the potential for higher wages, which can contribute to the overall strengthening of the economy, although they may require higher educational attainment. Attracting new target industries, the need for more workforce development, and the lack of higher paying jobs continue to be concerns for economic development.

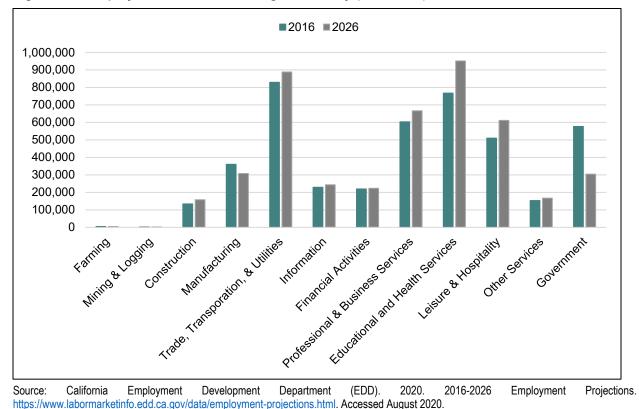

Figure III-4: Employment Trends - Los Angeles County (2016-2026)

Population Characteristics

Assessing the profile of a community can indicate the current and projected needs for housing types. Typically, a community with more households, larger households, and households with children need and/or desire larger units and ownership units. Communities that have a higher percentage of single people or younger people, on the other hand, typically need and/or desire smaller, rental units. Communities with a higher percentage of seniors typically need and/or desire smaller, accessible, and affordable units.

In general, the population trends of unincorporated Los Angeles County reflect those of Los Angeles County as a whole. **Figure III-5** compares the population profile of Los Angeles County with California and the rest of the country.

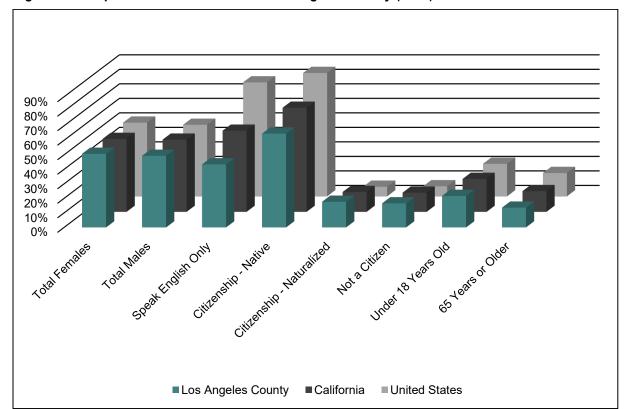

Figure III-5: Population Characteristics - Los Angeles County (2018)

Source: ACS 2014-2018, Tables B05001, S0101, S1601.

Age of Residents

The age of the population is useful for determining the types of housing that will be required during the Housing Element planning period. Younger people living alone (between 20 and 34) and seniors over 65 typically need and/or desire apartments, condominiums, and smaller, more affordable housing units, while the population between 35 and 65 years makes up the majority of the market for single family houses and condominiums.

According to the 2014-2018 American Community Survey (ACS), residents under the age of 18 make up 23.7 percent of the population in unincorporated Los Angeles County. Seniors (65 years and older) make up 13 percent of the population and represent the smallest percentage of the population. The 25 to 29 years age group accounts for the highest percentage of residents (**Figure III-6**). The large population of younger people creates a demand for smaller, more affordable housing, while the middle-aged population will continue to demand more variety in housing choices.

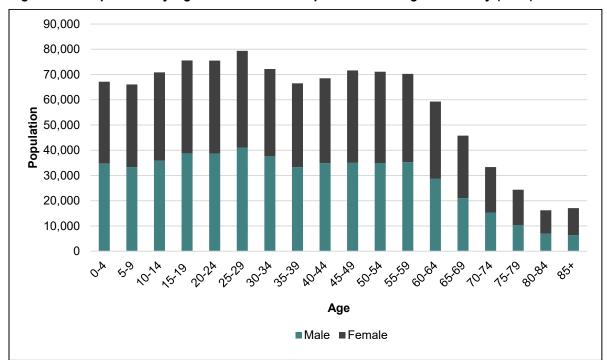

Figure III-6: Population by Age and Sex - Unincorporated Los Angeles County (2018)

Source: ACS 2014-2018 (5-year estimates).

Race and Ethnicity of Residents

Race and ethnicity can potentially reflect cultural preferences regarding housing needs. For example, certain cultures may be accustomed to living with extended family members and need larger units. Therefore, planning for communities with high concentrations of certain racial/ethnic groups should consider the unique housing needs of these groups.

Table III-1 shows that 50 percent of the households in unincorporated Los Angeles County identify as Hispanic. Approximately 23.7 percent identify as White (non-Hispanic), 11.2 percent identify as Black (non-Hispanic), and 15.1 percent identify as Asian or another ethnicity (non-Hispanic).

Table III-1: Households by Race and Ethnicity - Unincorporated Los Angeles County (2016)

Race/Ethnicity	Households	Percent
White, non-Hispanic	62,761	23.73%
Black, non-Hispanic	29,705	11.23%
Asian and other, non-Hispanic	39,807	15.05%
Hispanic	132,210	49.99%
Total	264,483	100%

Source: HUD CHAS 2012-2016.

Persons with Special Needs

In addition to affordability and access issues that affect all populations in unincorporated Los Angeles County, those with special needs face greater challenges in finding available housing. Special needs groups include seniors, farmworkers, female-headed households, large households, people experiencing homelessness, and persons with disabilities. An analysis of these special needs populations is provided in the following sections. For a discussion on special needs resources, please see the section "Resources for Special Needs Housing."

Seniors

The Census defines the elderly, or seniors, as the population 65 years and older. As a general population group, seniors are at a disadvantage for housing. This is due to an increased likelihood of being on fixed or low incomes, having disabilities, or having different living preferences than families or younger, single people.

According to the 2014-2018 ACS, seniors account for 13 percent of the population of unincorporated Los Angeles County. Approximately 24 percent of unincorporated Los Angeles County households are headed by seniors. Of the senior-headed households, approximately 78 percent are homeowners and 22 percent are renters, as shown in **Figure III-7**.

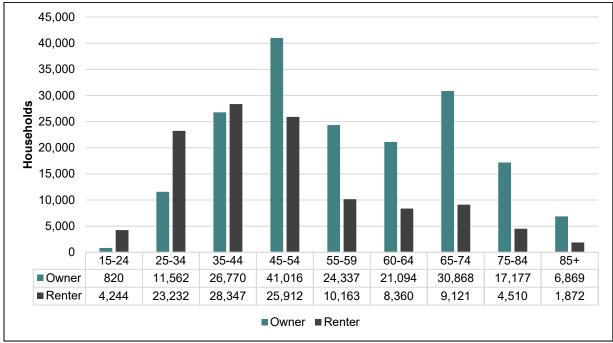

Figure III-7: Housing Tenure by Age - Unincorporated Los Angeles County (2018)

Source: ACS 2014-2018 (5-year estimates).

Elderly (senior) households are defined as households consisting of two or more persons over 61 years. **Table III-2** shows that 28.4 percent of elderly households in unincorporated Los Angeles County earn less than 30 percent of the surrounding area median income, and 46.5 percent of elderly households earn less than 50 percent of the surrounding area median income.

Table III-2: Elderly Households by Income and Tenure - Unincorporated Los Angeles County

Income Category	Owner	Renter	Total	Percent of Total Elderly Households
<30% HAMFI	8,439	7,775	16,214	28.40%
30-50% HAMFI	7,687	2,638	10,325	18.10%
50-80% HAMFI	8,017	2,290	10,307	18.00%
80-100% HAMFI	3,669	781	4,450	7.80%
>100% HAMFI	13,773	2,054	15,827	27.70%
Total	41,585	15,538	57,123	100%

Note: HAMFI refers to Housing and Urban Development Area Median Family Income.

Source: HUD CHAS 2012-2016.

According to the DOF, a substantial increase in the number of seniors will occur by 2050. The senior population in Los Angeles County in 2050 is projected to be nearly twice as large as in 2019.³ Similar trends are expected in unincorporated Los Angeles County. As the number of seniors and life expectancies increase, the demand for a variety of senior housing options will also increase.

In addition to traditional facilities that offer independent living units, it is likely that the demand for intermediate care and assisted living will also increase, as well as the demand for facilities offering a full range of living arrangements. The Housing Element addresses the needs of seniors through various programs, such as the Density Bonus Ordinance, which provides regulatory incentives for senior citizen housing developments.

Persons with Disabilities

Persons with disabilities often have different preferences and accessibility needs when choosing housing. Additionally, as many persons with disabilities do not have the means of earning a living, their options may be narrowed by income. Ambulatory, independent living, and cognitive disabilities are the most commonly occurring disabilities in unincorporated Los Angeles County. As shown in **Figure III-8**, 55,471 residents in unincorporated Los Angeles County experience an ambulatory disability, 41,977 experience an independent living disability, and 37,363 experience a cognitive disability. Seniors typically have higher disability rates compared to other age groups. A Nearly 20 percent of the total population experience a disability; however, calculating disability as a percentage of total population may not be accurate because some disability types are not recorded for children below a certain age.

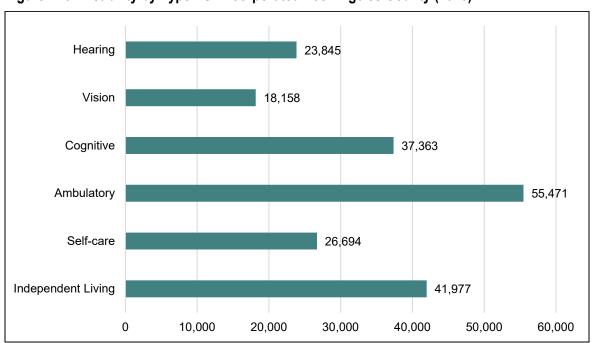

Figure III-8: Disability by Type - Unincorporated Los Angeles County (2018)

Note: Disability types are only recorded for populations above a certain age.

Source: ACS 2014-2018 (5-year estimates).

Of the population with a disability, 62 percent are not part of the labor force. According to the 2014-2018 ACS, 32 percent of persons with a disability in unincorporated Los Angeles County are employed compared to 71 percent of persons with no disability (**Table III-3**).

Table III-3: Disability by Employment Status - Unincorporated Los Angeles County (2018)

Employment Status	With a Disability	Percent	No Disability	Percent
Employed	15,449	32%	434,671	71%
Unemployed	2,759	6%	32,615	5%
Not in Labor Force	29,925	62%	141,915	23%
Total	48,133	100%	609,201	100%

Source: ACS 2014-2018 (5-year estimates).

In addition to the problems associated with fixed or low incomes, many seniors are faced with various disabilities. As shown in **Figure III-9**, 21.7 percent of seniors in unincorporated Los Angeles County experience an ambulatory disability. Ambulatory disabilities are the most commonly occurring disability among seniors in unincorporated Los Angeles County, followed by independent living (i.e., people with selfcare limitations), and hearing disabilities.

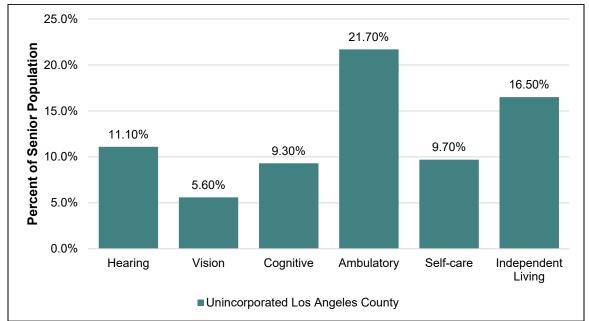

Figure III-9: Disability by Type - Seniors (65 and over)

Source: ACS 2014-2018 (5-year estimates).

Persons with disabilities face unique problems in obtaining affordable and adequate housing. State and federal laws require that all new multifamily construction be accessible to persons with disabilities, but older units built prior to 1989 are rarely accessible to persons with disabilities. Furthermore, once a regular unit is completed, modifications are expensive and not always feasible. Older units, particularly in older multifamily structures, are expensive to retrofit for persons with disabilities because space is rarely available for elevator shafts, ramps, wider doorways, etc. This population needs low-cost, conveniently located housing that is adapted for disability access. In some cases, they may also require supportive services.

Developmental Disabilities

According to Section 4512 of the Welfare and Institutions Code, a developmental disability means:

"a disability that originates before an individual attains age 18 years, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual, which includes mental retardation, cerebral palsy, epilepsy, and autism. This term also includes disabling conditions found to be closely related to mental retardation or to require treatment similar to that required for individuals with mental retardation, but shall not include other handicapping conditions that are solely physical in nature."

The State Department of Developmental Services (DDS) provides community-based services to over 330,000 persons with developmental disabilities and their families through a statewide system of 21 regional centers. The regional centers are private, non-profit organizations that contract with the State to offer a wide range of services. The developmental centers and the two locked facilities are state-owned and operated.

Los Angeles County is served by the following seven regional centers that provide point of entry services and ongoing support for persons with developmental disabilities.

- Eastern Los Angeles Regional Center
 Areas Served: Eastern Los Angeles County, including the communities of Alhambra and Whittier
- Frank D. Lanterman Regional Center
 Areas Served: Central, Glendale, Hollywood-Wilshire, and Pasadena Health Districts.
- Harbor Regional Center
 Areas Served: Bellflower, Harbor, Long Beach, and Torrance Health Districts
- North Los Angeles County Regional Center Areas Served: East Valley, San Fernando, and West Valley Health Districts
- San Gabriel/Pomona Regional Center
 Areas Served: Foothill, El Monte, and Pomona Health Districts
- South Central Los Angeles Regional Center
 Area Served: Compton, San Antonio, South Los Angeles, Southeast Los Angeles, and Southwest Los Angeles Health Districts
- Westside Regional Center
 Areas Served: Inglewood and Santa Monica West Health Districts.

As shown in **Table III-4**, 47,507 persons in unincorporated Los Angeles County experience a developmental disability. Developmental disabilities are more common among children (0 to 17 years old). In unincorporated Los Angeles County, 18,760 persons under the age of 18 experience a developmental disability, compared to 9,987 persons 18 years and older. Most residents with a developmental disability reside in the home of a parent, family member, or quardian.

Table III-4: Developmental Disabilities - Unincorporated Los Angeles County (2019)

Employment Status	With a Disability	Disabled Persons
	Home of Parent/Family/Guardian	15,608
	Independent/Supported Living	1,027
Dy Docidonae	Community Care Facility	1,016
By Residence	Intermediate Care Facility	349
	Foster/Family Home	601
	Other	159

By Age	18+ Years	9,987
Total		47,507

Note: Totals may not match as counts below 11 individuals are unavailable and some entries were not matched to a ZIP code necessitating approximation.

Source: CA DDS consumer count by CA ZIP, age group and residence type for the end of June 2019. Data available in 161/197 SCAG jurisdictions.

Persons with developmental disabilities can live and work independently or with support within a conventional housing environment. One important principle, which is derived from the Americans with Disabilities Act (ADA) and the Supreme Court decision in *Olmstead vs. Zimring*, and which applies to housing for persons with disabilities, is that of integration and full inclusion. County efforts to provide housing for persons with disabilities will take into account the need to provide a continuum of housing types for persons with disabilities that provides them with opportunities to live in the most integrated setting, and not in segregated housing or communities. Housing opportunities include market-rate and affordable housing (single family and multifamily) without supports; shared housing; housing with individualized supports, such as supported living services or independent living services; supported housing with services available through the housing provider on- or off-site; group housing; and licensed housing for individuals with greater service needs.

The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the considerations that are important in serving this special needs group. Incorporating "barrier-free" design in all new multifamily housing (as required by state and federal fair housing laws) is especially important in providing the widest range of choices for persons with developmental disabilities.

Resources for Persons with Disabilities

The County addresses the housing needs of persons with disabilities by allowing a variety of housing types. For example, the Zoning Code considers licensed adult residential homes (serving six or fewer persons on a 24-hours-a-day basis) as a residential use that is permitted in all residential zones. Licensed adult residential homes for more than six persons are conditionally permitted in most residential and commercial zones. In addition, the Zoning Code also allows for small family homes for six or fewer children with mental, developmental, or physical disabilities and who require special care and supervision as a result of such disabilities. Furthermore, in November 2011, the Board of Supervisors adopted the Reasonable Accommodations Ordinance, which creates an administrative procedure for persons with disabilities to request reasonable accommodations from land use and zoning standards or procedures, when those standards or procedures serve as barriers to equal housing access, pursuant to state and federal fair housing laws and the State Housing Element Law.

The County offers a home improvement program, which targets assisting persons with disabilities. Additionally, LACDA's NOFA/RFP process encourages applicants to incorporate supportive services for special needs groups into their projects. Rating criteria within the RFP process award additional points for the incorporation of special needs housing and associated supportive services.

Female-Headed Households

Single parent households, particularly female-headed households, often experience difficulty in finding adequate housing due to the lack of affordable housing. They may also have additional needs for day care, health care, and other services that can augment their ability to support their household. Many female-headed households are one-wage-earner households, and therefore tend to have lower incomes, which places them at a disadvantage for housing. Data to estimate the number of female-headed households with incomes below the poverty level for unincorporated Los Angeles County is not available.

In Los Angeles County, single parent households account for approximately 22 percent of all households. Approximately 16.7 percent of households in unincorporated Los Angeles County are female-headed, and 7.3 percent of households in unincorporated Los Angeles County are female-headed with children (**Figure III-10**). In the previous housing element cycle, single parent households accounted for 25% of households. While this may appear like the number of single parent households have been reduced, it is more likely due to limitations inherent in the data related to margins of error. The County's Ownership Housing Rehabilitation Assistance Program, Family Self-Sufficiency Program, and other programs, including those related to the preservation, construction, and rehabilitation of affordable housing target the needs of single parent households.

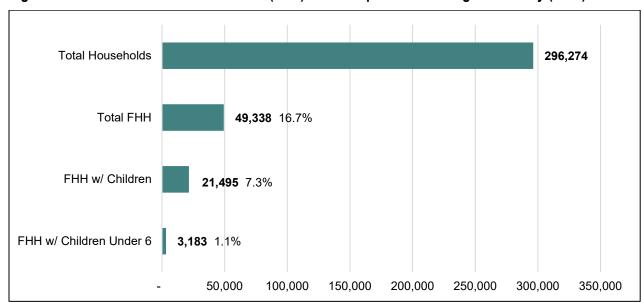

Figure III-10: Female Headed Households (FHH) - Unincorporated Los Angeles County (2018)

Source: ACS 2014-2018 (5-year estimates).

Large Households

Large households are generally identified as those having five or more people. They are characterized as a special needs group because they may include one or more families sharing housing, especially extended families, and can indicate a lack of affordable housing and increased overcrowding. Due to a limited supply of adequately sized units to accommodate large households, large households experience more difficulty securing adequately sized and affordable housing. When larger units are available, they generally cost significantly more than smaller units. Large households can also put a physical strain on the housing stock, which results from the greater wear-and-tear that more inhabitants can have on a unit. **Figure III-11** shows that over 20 percent of the households in unincorporated Los Angeles County have five or more people. A larger percentage of renter-occupied households have five or more people compared to owner-occupied households.

⁵ ACS 2014-2018, Table DP02.

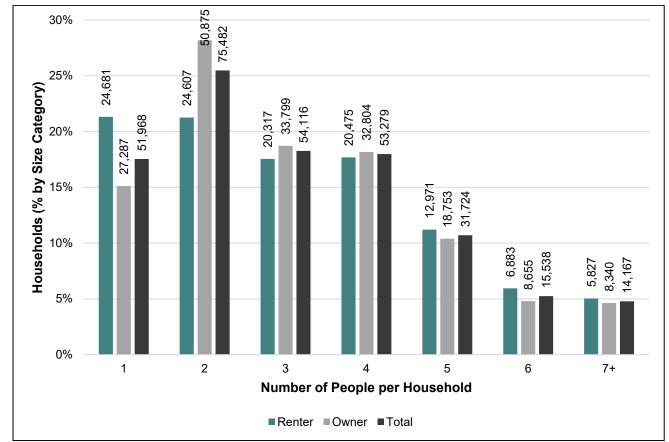

Figure III-11: Large Households - Unincorporated Los Angeles County (2018)

Source: ACS 2014-2018 (5-year estimates).

The lack of supply, compounded with the low incomes of large households, results in many large households living in overcrowded conditions. According to HUD,⁶ 11,738 renter-occupied large households and 16,614 owner-occupied large households have an AMI of 80% or less, and are housing cost burdened. Among the renter-occupied large households, 5,926 extremely low income and 4,255 very low income households are housing cost burdened in excess of 30%. Among owner-occupied large households, 3,927 extremely low income and 2,654 very low income households are housing cost burdened in excess of 30%. Furthermore, 4,998 renter-occupied and 1,185 owner-occupied, households are housing cost burdened in excess of 50%

Due to the varied nature of development in unincorporated Los Angeles County and the way bedroom count data is collected, there is a data gap in estimating the number of dwelling units with three or more bedrooms. However, the number of housing cost burdened large households speaks to the need for more affordable larger units. As with other special needs groups, large households would benefit from innovative multifamily housing development near jobs and public transit with childcare facilities and opportunities for recreation.

⁶ https://www.huduser.gov/portal/datasets/cp/CHAS/bg_chas.html

Farmworkers

Los Angeles County has seen a significant decrease in agricultural workers. State EDD data shows that between 2000 and 2016, the number of farmworkers countywide decreased by nearly 50 percent, from 7,700 to 3,910 farmworkers. As shown in **Table III-5**, the USDA estimates there are 1,241 farmworkers in unincorporated Los Angeles County. Of those, 315 are seasonal workers (those who work less than 200 days/year), 402 are year-round farmworkers living off-farm, and 546 are year-round farmworkers living on-farm. Existing farmworkers in Southern California are usually able to work year-round, but their earnings are typically in the extremely low-income household category. Farmworkers typically move from farm to farm to find work, which points to the need for migrant farmworker housing.

To address the housing needs of farmworkers, the County established the Farmworker Housing Ordinance in 2010. It allows farmworker housing in all zones where agricultural uses are permitted (exclusive of environmentally sensitive and/or hazard areas) with no special or added layer of administrative review. Agricultural practices no longer account for a significant sector of Los Angeles County's economy, and as more agricultural land is converted for non-agricultural uses, this sector will continue to decline.

Table III-5: Farmworkers by Occupation - Unincorporated Los Angeles County (2017)

Category	Number of Employees
Total Farmworkers	1,241
Seasonal Farmworkers	315
Year-round Farmworkers living off-farm	402
Year-round Farmworkers living on-farm	546

Estimated figures do not sum. Source: https://www.nass.usda.gov/AgCensus/

People Experiencing Homelessness

In 2020, there were an estimated 6,088 people experiencing homelessness in unincorporated Los Angeles County. **Figure III-12** shows a majority of those experiencing homelessness are unsheltered (85 percent) and 15 percent are sheltered.

⁷ DOF. 2020. Projections. http://www.dof.ca.gov/Forecasting/Demographics/Projections/. Accessed August 2020.

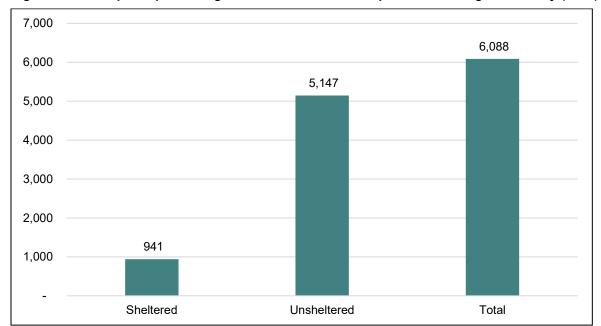

Figure III-12: People Experiencing Homelessness - Unincorporated Los Angeles County (2020)

Source: Los Angeles Homeless Services Authority (LAHSA) Greater Los Angeles Homeless Count - Unincorporated Areas, 2020.

"Chronic homelessness" describes those who have experienced homelessness for over a year and have a disabling condition. These individuals often have the most severe disabilities, including mental disabilities and substance abuse issues. People experiencing homelessness move across local jurisdictions countywide to obtain food resources, safer temporary accommodations, and other services and resources to meet their immediate needs. While there is a data gap in demographic information for people experiencing homelessness unique to unincorporated Los Angeles County, the County is tackling the problem on a countywide basis. On February 9, 2016, the Board of Supervisors approved an unprecedented action plan as part of the County's Homeless Initiative to prevent and combat homelessness, and to create an ambitious, but achievable path forward. In March 2017, voters approved Measure H, which is a ¼ percent increase to the County's sales tax to provide an ongoing revenue stream – an estimated \$355 million per year for ten years — to fund services, rental subsidies, and housing to combat homelessness. For more information on shelters, interim housing, and supportive housing, please refer to the Zoning and Subdivision Code section of the Housing Constraints Chapter.

Employment Characteristics

Los Angeles County hosts a diverse economy, but its composition has changed substantially over the past several decades and continues to transition. Although Los Angeles County is still one of the largest manufacturing centers in the United States, since the 1970s, the manufacturing industry has declined steadily and substantially. The education and social services sector accounts for the highest number of employees in unincorporated Los Angeles County, followed by manufacturing and professional services (**Figure III-13**).

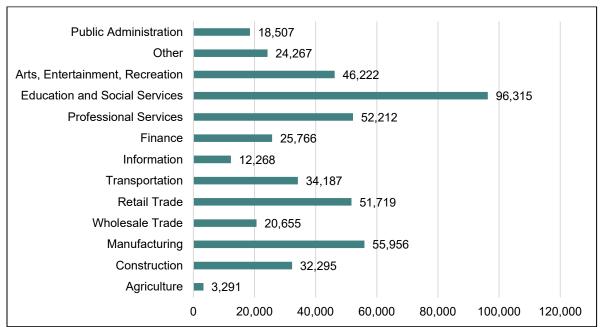

Figure III-13: Employment by Industry - Unincorporated Los Angeles County (2018)

Source: ACS 2014-2018 (5-year estimates using groupings of 2-digit NAICS codes).

The employment base in Los Angeles County has continued to shift since 2000. The most substantial losses were in manufacturing, which lost nearly 240,000 jobs between 2000 and 2010. Since 2010, the number of employed in the manufacturing industry has decreased further from 379,200 to 339,200 employed countywide. Between 2010 and 2019, the employment in the data processing industry more than doubled countywide. Non-store retailer, health practitioner, and courier/messenger sectors also saw large job increases. Apparel manufacturing, book/news stores, and mining/logging industries saw the highest rate of job loss between 2010 and 2019. As shown in **Figure III-14**, unincorporated Los Angeles County employs a slightly higher proportion of residents in the production sector and natural resources sector than the region.

EDD. 2020. Industry Employment – Official Monthly Estimates (CES). https://www.labormarketinfo.edd.ca.gov/cgi/dataanalysis/AreaSelection.asp?tableName=Ces. Accessed August 2020.

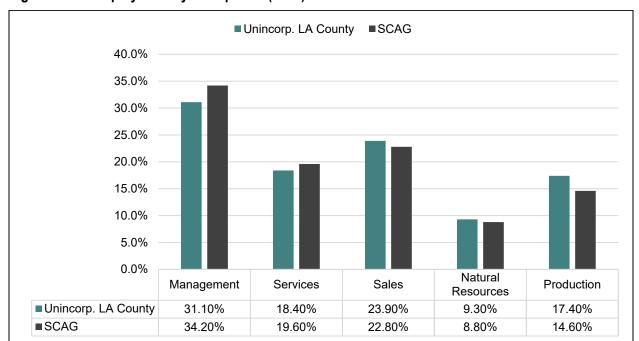

Figure III-14: Employment by Occupation (2018)

Source: ACS 2014-2018 (5-year estimates using groupings of SOC codes).

Commuting Patterns

Ideally, housing should be located within a short distance of employment to alleviate congestion on roadways. However, residents throughout Los Angeles County commute long distances to get to work. **Figure III-15** and **Figure III-16** show that approximately 76 percent of commuters in Los Angeles County drive 30 minutes or more to get to work. Over 30 percent drive more than an hour.

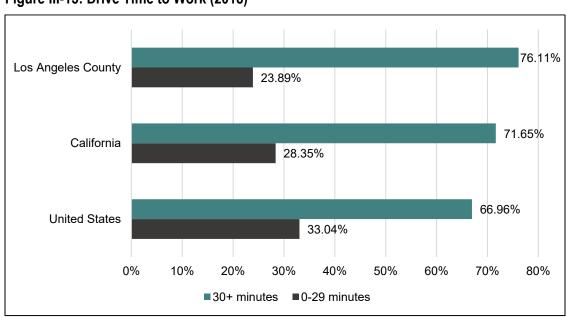

Figure III-15: Drive Time to Work (2018)

Source: ACS 2014-2018, Table B08135.

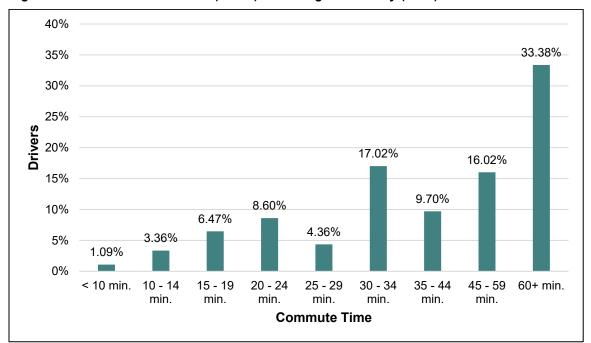

Figure III-16: Drive Time to Work (Detail) - Los Angeles County (2018)

Source: ACS 2014-2018, Table B08135.

The transportation modes to get to work in unincorporated Los Angeles County heavily favor automobile trips. In Los Angeles County, 80 percent of trips to work are made by automobile, with 74 percent of commuters driving alone and 9.5 percent carpooling. The remaining 16.6 percent of non-automobile trips to work are made using alternative transportation, such as transit, biking, walking, or telecommuting. Due to the COVID-19 pandemic, the County will likely experience a significant increase in telecommuters during the 2021-2029 Housing Element planning period.

Figure III-17 shows that most Americans drive to work alone. However, California has a higher rate of telecommuters and Los Angeles County has a higher rate of public transit use. Notably, Los Angeles County has a higher rate of commuters who carpool compared to the rest of California and the country.

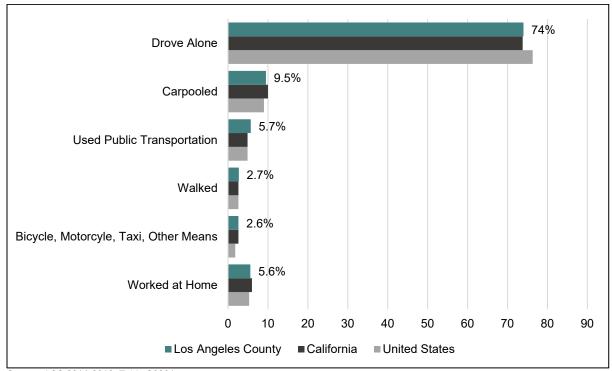

Figure III-17: Methods of Commuting (2018)

Source: ACS 2014-2018, Table S0801.

Household Characteristics

Existing Households

There are approximately 296,274 households in unincorporated Los Angeles County, which is a decrease of 3,084 households since 2010. Between 2010 and 2018, the number of households in unincorporated Los Angeles County decreased by approximately one percent. The decrease is likely a result of annexations rather than actual decrease in the number of households.

Household Size and Composition

The size of a household determines the type of housing unit that is needed. As shown in **Table III-6**, in unincorporated Los Angeles County, the most common household size is the two-person household, which accounts for 25.5 percent of all households. Households of three or more make up about 57 percent of all households in unincorporated Los Angeles County.

The presence of large households in unincorporated Los Angeles County is significant to the Housing Element. HCD defines a large household to be a household of five or more people. Over 20 percent of the households in unincorporated Los Angeles County need a housing unit with at least three bedrooms that can accommodate a large household (**Table III-6**).

Southern California Association of Governments (SCAG). 2020. Local Housing Data for Unincorporated Los Angeles County.

Table III-6: Households by Household Size - Unincorporated Los Angeles County (2018)

Household Size	Renter	Renter Percent	Owner	Owner Percent	Total	Total Percent

Source: ACS 2014-2018 (5-year estimates).

The composition of households also determines the type of housing that is needed. As shown in **Table III-7**, families account for 67 percent of households countywide, with nearly one-quarter headed by single parents. Fifteen percent of households are single-parent, female-headed.

Table III-7: Households by Household Type - Los Angeles County (2018)

Household Type	Percent
Family households (families)	66.80%
With own children of the householder under 18 years	28.80%
Male householder, no wife present, family	6.80%
Female householder, no husband present, family	15.00%
Nonfamily households	33.20%
Householder living alone	25.60%

Note: Percentages reflect entire County.

Source: ACS 2014-2018, Table DP02 (5-year estimates).

Household Income

Area Median Income (AMI) is an important indicator of a household's access to housing. While above moderate income households have more discretionary income to spend on housing, low and moderate income households are more limited to the range of housing that they can afford. As shown in **Figure III-18**, the largest segment of households spend over 50 percent of their income on housing. Approximately 55 percent of renter households spend 30 percent or more of gross income on housing and 30 percent spend 50 percent or more on housing. Lower income households tend to pay a larger percentage of their income in rent compared to median or high income earners (**Figure III-19** and **Table III-8**). For low income households especially, spending 30 to 50 percent of income on housing costs is a tremendous financial burden. Lower income households tend to have less savings as their safety net. Any unexpected loss of employment or income or additional expenses would render these households at risk of becoming homeless. As evidenced by the impacts of the current COVID-19 crisis, the risk of eviction is imminent among many lower income renter households.

Housing Supply

Housing Units Added

In unincorporated Los Angeles County, between, 2000 and 2020, single family residential units increased by 11,564 units (5.1 percent), multifamily residential units increased by 6,742 units (11.7 percent), and mobilehome units decreased by 406 units (**Figure III-20**). As shown in **Figure III-21**, vacancy rates for rental and for-sale properties in unincorporated Los Angeles County are comparable to rates in the SCAG region. However, unincorporated Los Angeles County experienced a higher rate of vacancy for "Other" types of housing (45.5 percent) compared to the SCAG region (27.7 percent). Housing units are classified as "Other" vacant when it does not fit into any year-round vacant category. "Other" vacant housing units may include units not for sale or rent, units being used for storage, units being repaired or renovated, units being held for settlement of an estate, etc.

Figure III-20: New Housing - Unincorporated Los Angeles County (2000-2020)

Source: CA DOF E-5 Population and Housing Unit Estimates.

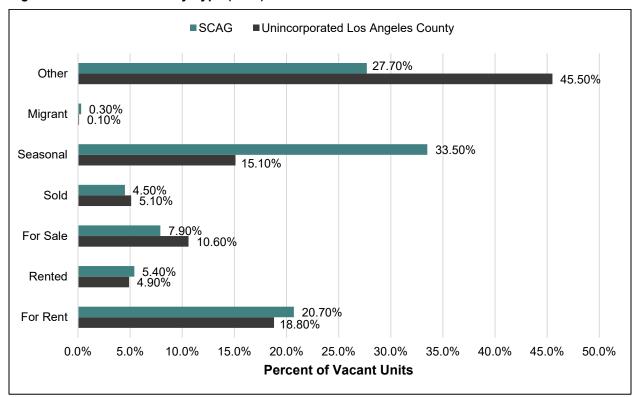

Figure III-21: Vacant Units by Type (2018)

Source: ACS 2014-2018 (5-year estimates).

Types of Housing

As shown in **Table III-9**, a majority (75.8%) of the housing stock in unincorporated Los Angeles County are single family homes. Multifamily housing accounts for approximately 20.8 percent of housing units in unincorporated Los Angeles County, with mobilehomes making up the remainder (3.4%) of housing units. The lack of housing diversity is a common theme found throughout many communities in unincorporated Los Angeles County.

Table III-9: Housing Type - Unincorporated Los Angeles County (2020)

Housing Type	Units	Percent
Single Family, detached	218,735	70.30%
Single Family, attached	17,430	5.60%
Multifamily, 2-4 units	17,999	5.80%
Multifamily, 5+ units	46,535	15.00%
Mobilehomes	10,505	3.40%
Total	311,204	100%

Source: CA DOF E-5 Population and Housing Unit Estimates.

In addition to the type of housing, the size of the unit has implications on affordability and access. As shown in **Table III-10**, in general, renter-occupied units typically have higher rates of crowding. This makes rental units more likely to be affordable, but they may not be ideally sized for larger households. Owner-occupied units are less likely to have rooms with more than one person, which is appropriate for larger households. However, these units tend to be less affordable.

Table III-10: Crowding by Extent and Tenure - Unincorporated Los Angeles County (2018)

	Owner-Occupied	Percent of Total Households	Renter-Occupied	Percent of Total Households
1.0+ per room	12,363	6.80%	22,334	19.30%
1.5+ per room	3,627	2.00%	9,048	7.80%

Source: ACS 2014-2018 (5-year estimates).

The lack of housing choices for low income households is largely a function of the residential marketplace. In general, single family homes are desired by most owner-occupied households and can command higher profit for developers. This market trend inherently overlooks disadvantaged or low income households.

Substandard Housing

Table III-11 shows approximately two percent of households in unincorporated Los Angeles County have no telephone service, 0.4 percent lack plumbing facilities, and one percent lack complete kitchen facilities.

The Los Angeles County Department of Public Health, Environmental Health Division, conducts regular studies and inspections on the degree of substandard housing in unincorporated Los Angeles County. Apartments and condominiums with five or more units are regularly inspected; however, single family homes are only inspected if a complaint is issued for that property. The Environmental Health Division issues code violations for substandard properties. When issued citations, building owners are regularly referred to LACDA when applicable programs can provide rehabilitation assistance.

Table III-11: Substandard Housing - Unincorporated Los Angeles County (2018)

Substandard Housing Factor	Units	Percent of Total Units
No Telephone Services Available	5,942	2.01%
Lacking Plumbing Facilities	1,146	0.39%
Lacking Complete Kitchen Facilities	3,013	1.02%

Source: ACS 2014-2018 (5-year estimates).

In order to understand the habitability needs of rental housing units in unincorporated Los Angeles County, the County gathered data from the existing code enforcement programs and conducted a rental housing habitability survey. LACDA, DRP, DPH, and DPW each provided data on inspections and violations cited in FY 2017-2018.

LACDA conducted 8,639 Housing Quality Standards (HQS) inspections on 4,824 rental housing units in unincorporated Los Angeles County and found violations across 1,818 units. The majority of violations were minor deficiencies. DPH conducted inspections of 15,000 rental units and identified violations in 685 units. DRP inspected 145 units and 118 units were found to have violations, mainly from unpermitted units.

The Code Enforcement Workgroup (comprising of LACDA, DRP, DPH, and DPW) also conducted a rental housing habitability survey of renters residing in cities and unincorporated Los Angeles County from July 2, 2019 to August 2, 2019. The workgroup received 618 responses, of which 70 rented in unincorporated Los Angeles County. About 40% of respondents living in unincorporated Los Angeles County stated they had experienced uninhabitable, unsanitary, or unsafe conditions in their home within the previous two years. Of that 40%, 66% indicated that the conditions were never resolved.

Habitability in rental housing units in unincorporated Los Angeles County would be better served if there was a centralized, systematic, and proactive code enforcement program to address habitability issues. The snapshot of data the workgroup collected primarily demonstrates violations where someone filed a complaint. Without regular inspections of all units, it is difficult to truly understand the baseline conditions of the housing stock in unincorporated Los Angeles County. As such, the number of housing units in need of rehabilitation and replacement cannot be quantified. It is also difficult to monitor change over time and identify areas to target for non-compliance. Additionally, the workgroup recognizes the need to provide a mechanism to address habitability issues without requiring tenants or neighbors to file a complaint, and to provide strategies to increase access for inspectors. This will be addressed in Program 40: Systematic Code Enforcement.

Estimate of the Number of Housing Units Needing Rehabilitation and Replacement

To estimate of the number of housing units that may need rehabilitation or replacement in unincorporated Los Angeles County, a variety of housing and demographic characteristics were considered. One consideration is that more than 90% of all the housing units in unincorporated Los Angeles County are more than 30 years old. This is the age when significant repairs and rehabilitation are usually needed. Another consideration is that younger homeowners living in older homes who have not yet built a nest egg and elderly homeowners who may be living on a fixed income are more likely to defer maintenance and put off repairs. Another consideration is that single-parent households face additional expenses and responsibilities that may cause minor repairs to go unnoticed until they become a major distressing expense. Furthermore, another consideration is that large households and over-crowded households put additional stresses on structures and systems that were not designed to accommodate large capacities.

There are some aspects we cannot know, for example, the quality of construction of each unit or when it was last updated or remodeled. However, we can determine the financial circumstances of individual householders by looking at Overpayment. Overpayment is when a household spends more than 30% of its income on housing costs and is generally recognized as an indicator that housing is not affordable. Households in Overpayment would likely have less money available for basic necessities, repairs, or emergencies. While homeowners benefit from owning an asset, renters have less housing security when large financial expenses are incurred. Households with these characteristics that are also in Overpayment are more likely to live in a unit that needs rehabilitation or replacement. For owner occupied housing, it is estimated that 13,885 single family units and 4,433 multifamily units are likely to be in need of rehabilitation or replacement. For renter households, it is

likely that 12,522 single family units and 3,998 multifamily units are in need of rehabilitation or replacement.

While these estimates may appear precise, it is important to note that they are informational. There were data limitations that resulted in some unavoidable overcounting. Additionally, this analysis does not account for households not in overpayment and with or without these characteristics that may be living in a unit that needs rehabilitation or replacement. Even with these limitations, this analysis further supports the need for more affordable housing options in unincorporated Los Angeles County.

Age of Housing Stock

The age of the housing stock is commonly used by state and federal programs to estimate rehabilitation needs. Typically, most homes begin to require major repairs or rehabilitation at 30 or 40 years of age. Features, such as electrical capacity, plumbing, kitchen features, and roofs usually need updating if no prior replacement has occurred.

Rehabilitation, maintenance, and replacement could become critical issues in unincorporated Los Angeles County within the Housing Element planning period. **Figure III-22** depicts the age of the housing stock in unincorporated Los Angeles County. The largest share of housing units in unincorporated Los Angeles County were built between 1950 and 1959. Nearly 90 percent of the housing stock in unincorporated Los Angeles County was built before 1990. The County may need to address the preservation of aging housing units susceptible to deterioration in the near future.

Source: ACS 2014-2018 (5-year estimates).

Housing Supply and Demand Indicators

Tenure

According to the 2010 Census, 60.9 percent of households in unincorporated Los Angeles County own their homes. Historically, Los Angeles County has had the lowest homeownership rate in California, and within the country. This is in part due to its large transitory and immigrant populations, but also due to the lack of affordable housing options.

Overcrowding

"Overcrowded" is defined as 1 to 1.5 persons occupying a room, excluding bathrooms, kitchens, hallways, and porches. "Severely overcrowded" is defined as more than 1.5 persons occupying a room. Overcrowding usually results from a lack of appropriate housing, either in affordability or adequacy in size. Overcrowding is more common among renter-occupied units, at 19.3 percent with over 1 person per room, as compared with owner-occupied units, at 6.8 percent with over 1 person per room (**Table III-10**).

Overpayment

According to the 2010 Census, many low income households in Los Angeles County pay a high percentage of their income toward rent, which indicates a lack of affordable housing. Households that pay more than 30 percent of their income on rent or mortgage payments have less money to spend for other necessities and emergencies. This can be a financially precarious situation for many, especially for renters who do not have any of the security afforded by homeownership, and can easily fall into homelessness if an unexpected financial hardship were to occur.

Income directly affects a household's access to housing, as shown in **Table III-12**. Households with lower incomes are more likely to rent than own a home.

Table III-12: Extremely Low Income Households by Tenure - Unincorporated Los Angeles County (2016)

Tenure	Total Households	Extremely Low Income	Share of Extremely Low Income
Renter-Occupied	108,935	34,798	31.9%
Owner-Occupied	155,635	17,049	11.0%
Total	264,570	51,847	19.6%

Source: HUD CHAS 2012-2016. HAMFI refers to Housing Urban Development Area Median Family Income.

Housing Cost

According to Corelogic, the median home price in Los Angeles County in 2020 was \$643,000, compared to \$618,000 in 2019 (four-percent increase). 10

Corelogic. 2020. California Home Sale Activity by City. https://www.corelogic.com/downloadable-docs/dq-news/dq-news-monthly-charts/ca-home-sale-activity-by-city-june-2020.pdf. Accessed August 2020.

Housing affordability emerged as a common theme from stakeholders during the Housing Element outreach process. Stakeholders indicate that contributing factors to housing affordability include the lack of housing diversity, lack of developable land, a lengthy entitlement process, and disproportionate fees/permitting costs.

Rental Cost

The foreclosure crisis and economic recession in past years have resulted in high foreclosures and job losses throughout unincorporated Los Angeles County that have created impacts that are still felt today. This has created a higher demand for affordable housing and, in particular, rental housing. The shortage of affordable housing has increased rents and further reduced housing choices for the region's low income households. As a result, rental cost is one of the largest expenses for households in unincorporated Los Angeles County.

Over half of all renter-households in unincorporated Los Angeles County pay more than 30 percent of their income on rent (**Figure III-18**). As shown in **Figure III-23** and **Table III-13**, 55 percent of renter-households in unincorporated Los Angeles County make less than \$50,000 a year. A household earning \$50,000 a year needs to spend over 30 percent of their income to afford a fair market rent two-bedroom apartment in Los Angeles County. ¹¹

Extremely Low Income Housing Needs

Most households and individuals receiving public assistance, such as social security or disability insurance, are considered extremely low income households. A household supported by a worker earning minimum wage is also considered an extremely low income household. For extremely low income households, the largest share of their income is directed toward housing costs, making continued affordability uncertain.

Housing extremely low income households (below 30% of area median income) can be especially challenging. In unincorporated Los Angeles County, 19.6% (51,887) of all households are extremely low income households. Of those households, 31.9% (34,798) are renter-occupied households and 11% (17,049) owner-occupied households. Approximately 3,220 extremely low income renter-occupied households and approximately 255 extremely low income owner-occupied households are severely overcrowded. There is a need for larger units with three or more bedrooms for extremely low income households. Limitations on data available for unincorporated Los Angeles County do not support projecting the number of extremely low income households into the future; however, their housing needs are expected to remain critical.

The primary resources available to extremely low income households are affordable housing projects that are deed restricted for lower income use. Another key resource is the Housing Choice Vouchers (HCV) program that requires 70% of the new vouchers be allocated to extremely low income households. Given the amount of subsidies required to provide affordable housing for this group, the lack of funding is the most significant challenge in service residents at this income level.

Note: Single family residences, condos, and new homes are included in the median home price calculation.

Affordable Housing Inventory

Affordable Housing Developments

LACDA uses a variety of funding sources to facilitate the development of affordable housing. Oftentimes, multiple layers of funding sources are required for the development of affordable housing. As shown in **Table III-14**, there are a total of 2,609 units deed-restricted as rental housing for low income households in unincorporated Los Angeles County. However, there may be additional deed-restricted units that are not included that are not publicly subsidized and therefore do not appear in inventories monitored by HUD, HCD, or the County.

Affordable Rental Housing at Risk of Converting to Market-Rate

The State Housing Element Law requires that local jurisdictions evaluate the potential conversion of deed-restricted housing for low income households into market-rate housing within the next 10 years. As shown in **Table III-14**, 72 affordable units are at very high risk of converting to market-rate, 142 affordable units are at high risk of converting to market-rate, and 291 affordable units are at moderate risk of converting to market-rate.

Table III-14: Assisted Rental Units at Risk of Conversion

Risk Level	Definition	Low-income units	Percent
Very High	Affordability expires in less than a year	72	2.8%
High	Affordability expires between one and five years	142	5.4%
Moderate	Affordability expires between five and ten years	291	7.4%
Low	Affordability expires in ten or more years	2,104	84.4%
Total		2,609	100%

Source: Los Angeles County Department of Regional Planning, July 2021.

Privately-funded units are typically the most at risk, as these units do not receive ongoing public assistance and therefore would potentially realize the biggest increase in rents when converted to market-rate housing. HOME-funded projects are often developed by non-profit organizations. Projects owned by non-profit organizations are more likely to remain as affordable housing even after the affordability controls expire. The publicly subsidized affordable rental housing inventory in unincorporated Los Angeles County is shown in **Table III-15**. This inventory does not include other affordable housing projects that are not publicly subsidized. Among the projects in Table III-15, 505 affordable units within 14 projects are potentially at risk of converting to market-rate housing.

Preservation Options

Table III-16 estimates the rent subsidies required to preserve the affordability of the 505 at-risk units. Based on the estimates and assumptions shown in this table, approximately \$3.6 million in rent subsidies would be required annually. Assuming a 40-year duration of affordability, the total subsidy is about \$200 million.

Table III-16: Rent Subsidies Required

Total At-Risk Affordable Units	505
Estimated Monthly Rent Assuming 50% Lower and 50% Very Low Income	\$735,785
Estimated Monthly Fair Market Rent	\$1,039,290
Monthly Subsidies Required	\$303,505
Annual Subsidies Required	\$3,642,060
20-Year Subsidies Required	\$88,492,479
40-Year Subsidies Required	\$219,987,647

To receive credits for RHNA, at-risk units preserved must extend affordability covenant for 40 years.

Source: HUD Fair Market Rent Documentation System, 2020; LACDA Utility Allowance Schedule, 2020; VTA 2020.

Through a variety of funding sources, tenant-based rent subsidies, such as Section 8 vouchers, could be used to preserve the affordability of at-risk housing. Another preservation option for at-risk units is to transfer the ownership to a non-profit organization or purchase similar units by a non-profit organization. The cost of transferring ownership depends on a number of factors, including market conditions, occupancy rate, and physical conditions of the building and units.

The rent subsidies analysis in **Table III-16** assumes the following:

- Half of the at-risk units are affordable to very low income households and half to lower income households.
- All at-risk units are assumed to be two-bedroom, three person units.
- The monthly affordable rental cost limits are based on the 2020 Los Angeles County Income and Affordable Rent/Housing Cost Limits.

The level of subsidy required to preserve the at-risk units is estimated to equal the 2020 FY HUD Los Angeles County fair market rent for a two-bedroom unit, which is \$2,058, minus the housing costs affordable to very low and lower income households.

Replacement Options

Replacement as a strategy to preserve or replenish the affordable housing inventory requires financial resources, as well as non-profit developer participation, and the availability of vacant/underutilized properties or existing properties that can be purchased at a reasonable price.

²⁰⁻ and 40-year of subsidies required estimated on the future values of the current annual subsidies required with a 2% inflation annually.

The cost of developing new housing depends on a variety of factors, such as density, size of units, location and related land costs, and type of construction. Assuming an average development cost of \$339,014 per unit for multifamily rental housing, the replacement of 505 at-risk units (worst-case scenario) would require approximately \$171.2 million. ¹² This cost does not include the ongoing rent subsidies that may still be required.

Resources available to preserve and replace at-risk housing units, including financial and administrative (non-profit participation) resources, are presented in the Resources section of this document.

-

Economic and Planning Systems, Inc. (EPS). Los Angeles County Affordable Housing Replacement Fee Study, June 2020.

Note: Cost of replacement was assumed to be the average cost of all submarkets in the County.

HOUSING CONSTRAINTS

Government Constraints

The intent of land use controls, such as those contained in the General Plan, and the Zoning Code and Subdivisions Code, is to promote the orderly development, and the public health, safety, and welfare, of unincorporated Los Angeles County. Overly-restrictive standards and procedures in the General Plan and the Zoning Code and Subdivisions Code can add to the cost of housing. The land use controls that apply to unincorporated Los Angeles County are not considered unreasonable or substantial constraints on development. The County's regulations are generally comparable to land use controls utilized in other similar local jurisdictions throughout California.

General Plan

The General Plan provides goals and policies to achieve countywide planning objectives for unincorporated Los Angeles County, and establishes the Planning Areas Framework as the foundation of future community-based plans. The purpose of the Planning Areas Framework is to distinguish areas that are geographically, environmentally, and culturally distinct within unincorporated Los Angeles County, and to accommodate a more focused level of planning than is provided in the General Plan. This structure allows these areas to be planned with consideration of their special characteristics. The Planning Areas Framework divides Los Angeles County into 11 areas. Implementing the Planning Areas Framework entails the preparation or update of a plan for each of the 11 areas. All community-based plans are components of, and must be consistent with the General Plan goals and policies; further, planned housing identified in County-approved area plans, community-based plans, and specific plans are consistent with the General Plan and this Housing Element. The following is a list of community-based plans and specific plans:

- Area Plans: Area plans allow for comprehensive, detailed, and focused planning for unincorporated communities within a geographically, environmentally, and culturally distinct area, as well as planning in coordination with adjacent cities. Area plans provide opportunities to update smaller-scale existing community-based plans (e.g., community plans, neighborhood plans, and coastal land use plans), as well as implementation tools, such as specific plans. The County will prepare additional area plans for the East San Gabriel Valley Planning Area and the Metro Planning Area, as discussed in the Programs and Objectives section.
- Antelope Valley Area Plan (adopted 2015)
- Santa Clarita Valley Area Plan (adopted 2012)
- Santa Monica Mountains North Area Plan (adopted 2000; amended 2021)

Community or Neighborhood Plans: Community or neighborhood plans cover smaller geographic areas and provide neighborhood-level planning within unincorporated communities.

Altadena Community Plan (adopted 1986)

- East Los Angeles Community Plan (adopted 1988)
- Florence-Firestone Community Plan (adopted 2019)
- Hacienda Heights Community Plan (adopted 2011)
- Rowland Heights Community Plan (adopted 1981)
- Twin Lakes Community Plan (adopted 1991)
- Walnut Park Neighborhood Plan (adopted 1987)
- West Athens-Westmont Community Plan (adopted 1990)

Local Coastal Programs: The California Coastal Commission determines the final approval of projects within the Coastal Zones, unless a local jurisdiction completes a certified local coastal program (LCP). An LCP is comprised of a land use plan and a local implementation plan.

- Marina del Rey LCP (certified)
 - o Marina del Rey Land Use Plan (adopted 1996; amended 2012)
 - Marina del Rey Specific Plan (adopted 2012)
- Santa Catalina Island LCP (certified)
 - Santa Catalina Island Local Coastal Plan (adopted 1983)
 - Santa Catalina Island Specific Plan (adopted 1989)
- Santa Monica Mountains Local Coastal Plan (certified)
 - Santa Monica Mountains Land Use Plan (adopted 2014; amended 2018)
 - Santa Monica Mountains Local Implementation Program (adopted 2014; amended 2018)

Specific Plans: In addition to the specific plans mentioned as part of LCPs, specific plans are used as a General Plan implementation tool for large-scale planning projects, as well as for areas with particular natural and fiscal constraints, or opportunities. Specific plans allow the County to assemble land uses and implementation programs tailored to the unique characteristics of a specific site. Because any adopted specific plan must be consistent with the County General Plan, all projects found to be consistent with a specific plan are deemed consistent with the General Plan.

The County will prepare an additional Transit Oriented District specific plan for Florence-Firestone, as discussed in the Programs and Objectives section.

- Connect Southwest LA: a TOD Specific Plan for West Athens-Westmont (adopted 2020)
- East LA 3rd Street Specific Plan (adopted 2014, amended 2020)

- La Viña Specific Plan (Altadena) (adopted 1989)
- Newhall Ranch Specific Plan (Santa Clarita Valley) (adopted 2003) please see the Resources Chapter for more information about the current build out of this project.
- Northlake Specific Plan (adopted 1993)
- West Carson TOD Specific Plan (adopted 2019)
- Willowbrook TOD Specific Plan (adopted 2018)
- NBC Universal Evolution Plan: Universal Studios Specific Plan (adopted 2013)

The General Plan, community-based plans, and specific plans are available on the Department of Regional Planning's web site at https://planning.lacounty.gov.

Zoning and Subdivision Codes

The Zoning Code (Title 22 of the Los Angeles County Code) contains regulations that ensure that land uses are situated properly in relation to each other, such as restrictions on the use, height, and bulk of buildings, and requirements for setbacks and parking. **Table III-17** lists the base zones that permit residential uses. The Subdivisions Code (Title 21 of the Los Angeles County Code) is concerned with the division of any unit or units of improved or unimproved land for the purpose of sale, lease, or financing. Generally, the Subdivisions Code allows the County to address public safety and other concerns by regulating the internal design of streets, lots, public utilities, and other similar infrastructure in each new subdivision. Titles 21 and 22 are available online at https://library.municode.com/ca/los_angeles_county/codes/code_of_ordinances.

New housing development has been prohibited in industrial zones in unincorporated Los Angeles County since 1960. The Zoning Code allows existing legally built residences in manufacturing zones to continue as lawful nonconforming uses, with limitations on whether and when additions or reconstruction may occur. A significant number of residential uses still exist in the industrial zones in many urban parts of unincorporated Los Angeles County.

Development Standards

This section summarizes the basic development standards in the Zoning Code for typical developments in unincorporated Los Angeles County. However, specific plans, community standards districts (CSDs), and setback districts serve to override the regular standards in specific locations.

Community standards districts (CSDs) are established as supplemental districts to provide a means of implementing special development standards contained in adopted neighborhood, community, area, specific, or local coastal plans within unincorporated Los Angeles County, or to provide a means of addressing special problems that are unique to geographic areas within unincorporated Los Angeles County. There are 26 established CSDs.

Setback districts are established to develop properties with minimum building setbacks in designated yards. Front yard setback districts are established for the following areas: City Terrace; Walnut Park; Southwest; Eastside; Altadena; East Pasadena; Whittier Downs; and Southwest Puente.

Minimum Lot Sizes

The minimum lot size (i.e., required area) in the zones that permit residential uses is generally 5,000 square feet. However, there are areas with larger lot size requirements. Large-lot zoning is primarily located in rural, suburban, hillside, or environmentally sensitive areas. **Table III-18** summarizes minimum lot sizes in the base zones. The Compact Lot Subdivision Ordinance allows the creation of subdivisions that accommodate fee-simple, single family residential lots less than 5,000 square feet in size in Zones R-2, R-3, and R-4.

Table III-18: Minimum Lot Sizes

Zone	Minimum Lot Size (square feet)	
A-1 Light Agriculture	5,000	
A-2 Heavy Agriculture	10,000	
R-A Residential Agriculture	5,000	
R-1 Single-Family Residence	5,000	
R-2 Two-Family Residence	5,000 or 1,200 in a compact lot subdivision	
R-3 Limited Density Multiple Residence	5,000 or 1,200 in a compact lot subdivision	
R-4 Medium Density Multiple Residence	5,000 or 1,200 in a compact lot subdivision

C-MJ Major Commercial	No Minimum Area Required	
C-R Commercial Recreation	5 Acres	
C-RU Rural Commercial	1 Acre	
CPD Commercial Planned Development	5,000	

Source: Los Angeles County Zoning Code

Floor Area

The Zoning Code requires single family residences to have a floor area of not less than 800 square feet, exclusive of any appurtenant structures, with the exception of single family residences on compact lots, which must have a floor area of not less than 575 square feet.

Maximum Height Limit

The maximum height for residential development is generally 35 feet, with the exception of residential developments in Zones R-4, C-3 and C-M, which do not specify a maximum height limit, but permit buildings with total floor area that does not exceed 13 times the buildable area on one parcel of land. Projects within Zone MXD have a height limit of 65 feet, but with lot consolidation incentives can potentially be up to 80 feet.

Parking

The County's parking requirements are similar to most communities in Southern California. **Table III-19** summarizes the general parking requirements in the Zoning Code.

A minor parking deviation procedure is available to allow reductions in the required parking. Upon request by the applicant, the Department may consider minor deviations of the required parking of less than 30 percent. The Parking Permit procedure is also available to allow parking reductions of up to 50 percent, as well as greater design flexibility, such as compact parking spaces for apartment houses. Furthermore, through the Density Bonus Ordinance, projects can receive parking reductions and modifications to parking requirements. The County's four TOD specific plans include reduced minimum parking standards for multifamily uses, and three of the plans also include parking maximums. The County will study reforming parking standards comprehensively through the Parking Program, as discussed in the Programs and Objectives section.

Table III-19: Parking Requirements

Use	Parking Requirements Per Unit			
Housing developments for senior	0.5 standard space per dwelling unit and 1			
citizens and persons with disabilities	standard space for guests per 8 dwelling units			
Single-Family Residence	2 covered spaces			
Single-Family Residence on Compact Lot	1 covered or uncovered standard parking space per unit for studio or one-bedroom units less that 750 SF in size. 1 covered or uncovered standard parking space and 1 covered or uncovered compact parking space per unit for all other units.			
Two-Family Residence	3 covered spaces and 1 uncovered space			
Apartment				
Bachelor	1 covered space			
Efficiency or One Bedroom	1.5 covered spaces			
Two or More Bedrooms	1.5 covered spaces and 0.5 uncovered space			
Guest Parking	For apartment complex with more than 10 units, 1 guest parking per 4 units.			
Accessory Dwelling Unit				
Accessory Dwelling Unit	1 uncovered space for ADUs within a Very High Fire Hazard Severity Zone that do not meet the criteria for parking exemptions under State law; outside of a Very High Fire Hazard Severity Zone, no spaces required			
Junior Accessory Dwelling Unit	No space required			
Other Housing				
Joint Live/Work	2 uncovered standard spaces per joint live and work unit.			
Farm Worker Housing	Spaces for each dwelling unit in the number required and subject to the same conditions as specified for "Residential uses" and where farmworker housing consists of group living quarters, such as barracks or a bunkhouse, 1 space per 3 beds			
Adult Residential Uses	1 space per staff member on the largest shift and 1 space per vehicle directly used for the business			
Group Homes for Children	1 space per staff member on the largest shift and 1 space per vehicle directly used for the business			

Source: Los Angeles County Zoning Code.

Setbacks

Setbacks contribute to the health and safety of the built environment. However, as setback requirements determine the buildable area on a lot, they may serve to constrain the number of housing units that can be achieved. Generally, the Zoning Code allows for flexibility with respect to narrow and shallow lots. Furthermore, in some cases, accessory dwelling units are not subject to the setback requirements (**Table III-20**).

Table III-20: Setback Requirements in Base Zones

Zone	Front	Interior Side	Corner Side	Rear
A-1 Light Agricultural	20 feet	5 feet or 10% of average width of narrow lot, but not less than 3 feet.	10 feet on reversed corner lot; 5 feet on other corner lots.	15 feet or 20% of average depth of shallow lot, but not less than 10 feet.

---	--

Note: An ADU is permitted if the property is within a zone where a single-family residence (SFR) or multifamily residence (MFR) is allowed; or, a legal SFR or MFR exists on the property; or, an SFR is proposed to be built concurrently with the ADU; or, a discretionary review application is required (Oak Trees, Shared Wells, etc.), but it may restrict the ADU. An ADU is not permitted if the property is not zoned to allow an SFR or MFR; or, property is located in a Very High Fire Hazard Severity Zone (VHFHSZ) and does not have two means of access to a highway.

Compact Lot Subdivisions are permitted in zones R-2, R-3, and R-4; subject to a Conditional Use Permit.

Housing Types

It is important to meet the diversity of housing needs, particularly for persons with special needs, through a variety of housing types. The following analysis reviews the Zoning Code to evaluate potential constraints to developing housing, including housing for persons with special needs. **Table III-21** and **Table III-22** summarize the required permits for various housing types in base zones that allow residential uses in unincorporated Los Angeles County.

P = Permitted, SPR = Ministerial Site Plan Review, C = Conditional Use Permit, MC = Minor Conditional Use Permit, X = Not Permitted Note: The Zoning Code contains provisions for a wider range of specific uses, including room and boards and other lodging options. Source: Los Angeles County Zoning Code.

Accessory Dwelling Units (ADUs)

An ADU, also known as a granny flat or second unit, is a dwelling unit with a full kitchen and bathroom, permitted as an accessory use to a single family or multifamily residential building wherever such developments are permitted. A JADU is a dwelling unit with independent exterior access that is no more than 500 square feet in size and contained entirely within a single family residence.

The County's ADU Ordinance establishes development standards and case processing procedures for ADUs and Junior ADUs (JADUs) pursuant to State law. Provisions include, but are not limited to:

- ADUs permitted on properties in all zones where single family or multifamily residential uses are permitted;
- JADUs permitted on properties with existing or proposed single family residences;
- Limited restrictions on ADU size and height;
- No off-street replacement parking requirements;
- Reduced setbacks for ADUs; and
- Maximum ADU and JADU application review time of 60 days.

In order to promote public health and safety in fire-prone areas, the County's ADU Ordinance prohibits the construction of new ADUs and the conversion of existing spaces to ADUs within Very High Fire Hazard Severity Zones (VHFHSZs) with substandard roads and limited access. Specifically, if a lot is located in a VHFHSZ and a Hillside Management Area (HMA), the Ordinance requires at least two distinct means of access not overlapping with each other, as measured from the lot frontage to the point of intersection with a highway, and each means of access must contain pavement of at least 24 feet in width, exclusive of sidewalks. For lots that are located in a VHFHSZ and not an HMA, the two distinct means of access may include unpaved roads of at least 24 feet in width maintained by Public Works. The Ordinance also allows ADUs and JADUs on lots with a single means of access if such lots front onto a highway and vehicles enter directly from the highway.

Adult Residential Facilities

Adult residential facilities for six or fewer people are permitted where single family homes are permitted. Facilities serving more than six persons are conditionally permitted in all residential zones and most commercial zones, including mixed use zones. Adult residential facility means any facility that provides 24-hour-a-day nonmedical care and supervision to adults, as defined and licensed under the State law.

Apartment Houses and Townhouses

Apartment houses and townhouses are permitted ministerially in Zones R-3, R-4, R-5, and MXD. They are also permitted ministerially in Zones R-2, C-H, C-1, C-2, C-3 and C-MJ if the project site is located outside of environmentally sensitive and hazardous areas and served by public infrastructure. While a Conditional Use Permit is required otherwise, not many sites zoned for apartment houses and townhouses are located in environmentally sensitive and hazardous areas and areas not served by public infrastructure. For example, the sites zoned R-2 that are subject to a Conditional Use Permit account for only 12.8% of the total sites zoned R-2. Additionally, apartment houses are permitted ministerially in Zones R-2, C-H, C-1, C-2, C-3, C-M, and C-MJ if the project meets the requirements of AB 2162, or if the project is an existing hotel, motel or youth hostel that is converting to transitional housing. Townhouses are also permitted conditionally in Zones A-1, A-2, R-R, R-A,R-1 and C-M, and apartment houses are permitted conditionally in Zone C-M. Conditional Use Permits are not required for projects that are eligible for SB 35 streamlining provisions.

Caretaker Units

Caretaker units are conditionally allowed in most agricultural and commercial zones. The Zoning Code defines "caretaker" as a person residing on the premises of an employer and who is receiving meaningful compensation to assume the primary responsibility for the necessary repair, maintenance, supervision or security of the real or personal property of the employer, which is located on the same or contiguous lots or parcels of land.

Group Homes for Children

Pursuant to State law, small group homes for six or fewer children are permitted as a single family home. Larger homes (for more than six children) are conditionally permitted in all residential and some commercial zones. The Zoning Code defines children's group homes as facilities that provide 24-hour nonmedical care and supervision to children in a structured environment, with services

provided at least in part by staff employed by the licensee, as defined and licensed under the regulations of the State.

Domestic Violence Shelters

Domestic violence shelters are permitted through a Ministerial Site Plan Review in most residential and commercial zones, as well as industrial zones. Domestic violence shelter means any facility consisting of one or more buildings or structures in which specialized services are provided, including but not limited to the temporary provision of housing and food to the victims of domestic violence, as provided in Division 9, Part 6, Chapter 5 of the California Welfare and Institutions Code.

Farmworker Housing

The Farmworker Housing Ordinance ensures that the County's provisions for farmworker housing are consistent with State law, clarifies and codifies the requirements of the Employee Housing Act, and aims to streamline the land use permitting process for those interested in providing housing for farmworkers. The Farmworker Housing Ordinance includes definitions for farmworker dwelling units, which house five to six farmworkers, and which are permitted in the same zones as single family residences. In order to be consistent with the State Health and Safety Code Section 17021.5, Program 61: Annual Zoning Code Update will amend this provision to instead allow up to six farmworkers in farmworker dwelling units. The Farmworker Housing Ordinance also defines farmworker housing complexes, which are group living quarters that allow a maximum of 36 beds or a maximum of 12 dwelling units for farmworkers and their households, and which are permitted in the same zones as agricultural uses. However, farmworker housing is not permitted industrial zones, Airport Influence Areas, and environmentally sensitive areas. Furthermore, farmworker complexes are not permitted within Very High Fire Hazard Severity Zones.

It is important to note that a number of factors—such as the decline of the agricultural industry, and the financial and administrative challenges of providing farmworker housing—suggest that without additional resources, farmworker housing is not likely to occur with significant frequency.

Foster Family Homes

Foster family homes are permitted where single family residences are permitted. Foster family homes are any residential care facility providing 24-hour care for six or fewer foster children, which is the residence of the foster parent or parents, including their family, in whose care the foster children have been placed, as defined and licensed under the regulations of the County Code.

Homeless Shelters

The Zoning Code allows emergency shelters, including Low Barrier Navigation Centers, in all residential zones except Zones R-A and R-1, all commercial, mixed use, and rural zones, and Zones M-1, M-1.5 and M-2 through a Ministerial Site Plan Review (by right) process. Emergency shelters are also allowed in Zones A-1 and A-2 outside of environmentally sensitive and natural hazard areas and proximate to transit. Additionally, emergency shelters are conditionally permitted in Zone M-2.5. These areas are appropriate for homeless shelter facilities because they are primarily located in established communities with access to public transportation. Homeless shelters are a service use, which provide temporary accommodations for up to six months per individual.

The Interim and Supportive Housing Ordinance, which aligns the Zoning Code with AB 139 and AB 101, allows the following:

- Accessory Overnight Safe Parking: Overnight use of existing parking spaces in a parking lot by persons living in vehicles.
- Accessory Shelter: An emergency shelter that serves as an ancillary use to the principal use on the same lot.

Furthermore, the Ordinance requires one parking space per employee during peak shift for emergency shelters, but does not require more parking than other residential or commercial uses in the same zone, as shown in Table III-19 and in Section 22.112.070 of Title 22 for commercial uses. The Ordinance also includes options for waivers of development standards, such as parking, if the requirement would render the shelter development infeasible, in compliance with State law.

Adequate Capacity: According to the 2020 Point-in-Time Count by LAHSA, which is the most recent due to the COVID-19 pandemic, unincorporated Los Angeles County have a homeless population of 6,088 persons, including 941 sheltered and 5,147 unsheltered homeless persons. Emergency shelters, including Low Barrier Navigation Centers, are permitted by-right in a number of zones (see Table III-21and Table III-22), including all zones that allow mixed use and non-residential zones that permit multifamily uses. In assessing the adequacy of sites available for emergency shelters, the County used the following criteria in identifying potential sites for shelter development:

- Minimum lot size: 10,000 square feet
- Access to transportation: within 0.5 mile of transit
- Availability of infrastructure: able to be served with public water, sewer, and dry utilities
- Environmentally sensitive or naturally constrained areas: located outside of areas with moderate or severe natural resources, hazards and constraints, as shown in the General Plan Hazard, Environmental, and Resource Constraints Model.

To narrow down the sites by realistic development potential, only parcels that are not developed with residential uses or newer nonresidential uses (within last 15 years), and with no pending development projects within the last three years, were considered for the shelter capacity analysis. Furthermore, cemeteries, parks, landfills, military uses, gas stations, and other uses that are unlikely to be redeveloped were excluded from the inventory of potential sites. Based on these criteria, a total of 6,814 acres (3,826 parcels) may be considered suitable shelter sites. The Zoning Code does not establish a maximum bed limit or density per shelter. Therefore, this inventory of potential sites is adequate to accommodate the County's 5,147 unsheltered homeless persons.

Countywide, between 2017 and 2020, 75,694 people experiencing homelessness were sheltered in interim housing through Measure H and other public resources. In unincorporated Los Angeles County, there are a total of 636 beds on 19 interim housing sites, and a total of 172 beds on two sites in the pipeline. In addition, there are a total of 213 beds on three Project Homekey sites, and a total of 447 beds on 9 winter shelter sites.

Countywide, between 2017 and 2020, 58,999 people experiencing homelessness were permanently housed through Measure H and other public resources. In unincorporated Los Angeles County, there are a total of 758 supportive housing units on 26 sites, with a total of 1,045 units on 21 sites in the pipeline.

According to LAHSA, from 2021 Housing Inventory Count, the average point in time occupancy rate for shelters is 61%, although this is not accounting for a number of sites being in different states of decompression during the pandemic. Also, from October 2019-September 2020, 7% of exits from emergency shelter and 44% of exits from transitional housing were into permanent housing.

Joint Live and Work Units

A joint live and work unit is a dwelling unit comprised of both living space and work space, where either a residential use or a commercial use can be the primary use, and in which at least one resident of the living space is responsible for the commercial activity performed in the work space. Joint live and work units are permitted ministerially in Zone MXD. They are also permitted ministerially in Zones C-H, C-1, C-2, C-3, and C-MJ if the project site is located outside of environmentally sensitive and hazardous areas and served by public infrastructure (otherwise a Conditional Use Permit is required). Joint live and work units are permitted ministerially in the rural zones on lots that meet similar locational criteria. Joint live and work units are also permitted conditionally in Zone C-M.

Mixed Use Development

Mixed use developments allow the combination of residential and commercial uses on the same site. Mixed use developments are permitted ministerially in Zones MXD and MXD-RU. They are also permitted ministerially in Zones C-H, C-1, C-2, C-3, and C-MJ if the project site is located outside of environmentally sensitive and hazardous areas and served by public infrastructure (otherwise a Conditional Use Permit is required). Mixed use developments are also permitted conditionally in Zone C-M.

Mobilehomes and Manufactured Homes

As used in the Zoning Code, a mobilehome is as defined in section 18008, or a manufactured home as defined in section 18007, of the California Health and Safety Code. A mobilehome comprised of one dwelling unit manufactured and certified under the National Mobilehome Construction and Safety Standards Act of 1974 (1974 Mobilehome Act) on a permanent foundation system approved by the Public Works, or a manufactured home constructed on or after June 15, 1976, may be used as a single family dwelling. Manufactured homes can also be used as an accessory dwelling unit.

Mobilehome Parks

A mobilehome park is as defined in the Health and Safety Code. Mobilehome parks are conditionally permitted in most residential zones, all agricultural and rural zones, and most commercial zones. In addition, existing legal nonconforming mobilehome parks are conditionally permitted in Zones M-1 and M-2.

Residential Care Facilities

Residential care facilities for six or fewer persons are permitted by-right in all zones where single family residences are permitted. Residential care facilities for more than seven persons are conditionally permitted in all residential zones.

Single Family Residences

Single family residences are permitted in all residential zones, all agricultural zones, Zone MXD, Zone MXD-RU (Rural Mixed Use), and Zone CPD. Such uses are also conditionally permitted in commercial zones, except Zone C-MJ.

Single Family Residences on Compact Lots

The Compact Lot Subdivision Ordinance conditionally permits the creation of smaller fee-simple, single family residential lots in Zones R-2, R-3, and R-4 if the project site meets certain locational criteria, such as outside of a VHFHSZ and in an area served by public water and sewer systems. The single family residential lots, or compact lots, created through the Ordinance may be as small as 1,200 square feet in size, and the single family residences may be as small as 575 square feet in size. The Ordinance also establishes new development standards for single family residences on compact lots, allowing greater flexibility in creating more usable spaces within the single family residences and better design. These development standards include setbacks, private usable open space, landscaping, tree planting, and parking, including the allowance of a separate parking-only lot where some or all required parking spaces are provided.

Single Room Occupancy (SRO)

The Zoning Code does not contain specific provisions for SRO units. However, when the SRO housing is operated as group quarters, it is permitted or conditionally permitted as residential facilities. If the SRO housing is operated as apartments, it is permitted or conditionally permitted as apartments.

Small Family Homes

"Small family home for children" means any residential facility in the licensee's family residence providing 24-hour-a-day care for six or fewer children with mental, developmental, or physical disabilities and who require special care and supervision as a result of such disabilities, as defined and licensed under the regulations of the State. This use is permitted by-right in all residential and most commercial zones.

Two-Family Residences

Two-family residences are permitted ministerially in Zones R-2, R-3, and R-4. They are permitted ministerially in Zone MXD if they are developed as part of a mixed use development. They are also permitted ministerially in Zones C-H, C-1, C-2, and C-3 if the project site is located outside of environmentally sensitive and hazardous areas and served by public infrastructure (otherwise a Conditional Use Permit is required). Two-family residences are also permitted conditionally in Zone C-M.

<u>Transitional and Supportive Housing</u>

Transitional housing and supportive housing are defined in the Zoning Code. In general, transitional housing provides stay from six months to two years, and includes a service component to help residents gain independent living skills and transition into permanent housing. Supportive housing is typically referred to as permanent housing with a service component.

The Interim and Supportive Housing Ordinance streamlines the approval of housing for people experiencing homelessness (shelters, transitional housing, and supportive housing) through a ministerial review process. Aligned with State law, transitional and supportive housing is reviewed subject only to those restrictions that apply to the same dwelling types in the same zone. For example, a supportive housing project in a single family home will be reviewed as a single family home, while a supportive housing project in an apartment house is reviewed as an apartment house.

Community Standards Districts (CSDs)

Specific standards may be established in a CSD to respond to the unique characteristics or circumstances of a community. A CSD is a zoning overlay that consists of design, development, and performance standards that address the needs and support the characteristics that are unique to that community/neighborhood.

Most CSDs have more restrictive development standards which, in some cases, could only be modified through a discretionary review process. However, a majority of these restrictive regulations apply to single family residences and are intended to preserve neighborhood characteristics. For example, both the Altadena and the East Pasadena-San Gabriel CSDs have more restrictive regulations on setbacks, lot coverage, floor area, and height in order to deter "mansionization" in older, established urban areas.

Some CSDs include building step-backs for multifamily and/or commercial zones when adjacent to single family or residential zones, such as in the East Pasadena-San Gabriel and the La Crescenta-Montrose CSDs, while other CSDs include stories or height limitations for multifamily and commercial zones, including the Rowland Heights, South San Gabriel, Walnut Park, and Willowbrook CSDs. It is important to note that the Density Bonus Ordinance, Inclusionary Housing Ordinance, and some provisions of the Accessory Dwelling Unit Ordinance, which facilitate the development of affordable housing, supersede the provisions of CSDs. Furthermore, recent changes to State law per SB 330 prohibit the reduction of residential development potential in urbanized Census Designated Places. There are also CSDs that provide incentives for multifamily and mixed use developments, such as the East Los Angeles CSD, which includes density bonuses for lot consolidation and infill development in multifamily zones, and the Florence-Firestone CSD, which includes procedural and other incentives for residential uses and mixed use development in commercial zones.

Local Processing and Permit Procedures

Type Reviews

The Zoning Code establishes four Type Reviews. Each Type Review prescribes a set of specific administrative procedures used for processing permits and reviews, and identifies the Review Authority and the Appeal Body. While the Review Authority is the decision maker for an application, the Appeal Body is the decision maker for an appeal of a decision by the Review Authority. Most

permits and reviews required by the Zoning Code are assigned to one of the four Type Reviews. **Table III-23** identifies the four Type Reviews, their general application processing characteristics, and their Review Authorities and Appeal Bodies:

Table III-23: Type Review Characteristics

	Ministerial/ Discretionary	Noticing Required	Posting Required	Review Authority	Public Hearing Required	Subject to Appeal	Appeal Body
Type I Review	Ministerial	No	No	Director	No	No	N/A
Type II Review	Discretionary	Yes	No	Hearing Officer	Yes	Yes	Regional Planning Commission
Type III Review	Discretionary	Yes	Yes	Regional Planning Commission/ Hearing Officer	Yes	Yes	Board of Supervisors/ Regional Planning Commission
Type IV Review	Discretionary	Yes	Yes	Board of Supervisors	Yes	No	N/A

Permits and Reviews Required by the Zoning Code

Table III-24 identifies some of the permits and reviews that are typically required for housing developments, and the Type Review used to process the application:

Affordable Housing Prioritization

Expediting the approval of projects with affordable and/or market-rate senior citizen housing units is a County priority. The County created the Housing Permit to implement the density bonuses, incentives, waivers of development standards, and parking reductions in the County's Density Bonus and Inclusionary Housing ordinances. The Housing Permit also provides the mechanism for monitoring of long-term rental affordability covenants and equity share for for-sale affordable units.

There are two types of housing permits. The Administrative Housing Permit is ministerial and applies to most projects. Due to its unique processing procedures, the Administrative Housing Permit is not assigned a Type Review. For projects requesting incentives and waivers that do not meet specified findings in State law, a Discretionary Housing Permit is required. A Discretionary Housing Permit is a Type III Review.

Table III-24 shows the typical approval timeframes for Housing Permits. In addition to a Housing Permit, a separate permit or review is required for the requested use or other entitlement, as shown in Tables 3.10-3.12. When two or more applications are filed on a property, all applications may be reviewed concurrently by the Review Authority.

Table III-24: Housing Permits

Permit	Typical Timeframe
Administrative Housing Permit (Ministerial)	When no other discretionary permit is required, 90 days (for 150 units or fewer) or 180 days (more than 150 units)
Discretionary Housing Permit	8-12 months

The County further expedites affordable housing through the following:

- The By-Right Housing Ordinance and Interim and Supportive Housing Ordinance provide more options for ministerial review of multifamily uses, including transitional and supportive housing;
- A designated team of affordable housing case planners, who serve as a single point of contact for all applicants considering providing affordable units; and
- Exemptions or reductions to planning and zoning filing fees for projects containing incomerestricted units, depending on the number of income-restricted units in the project.

These measures are discussed in more detail later in this section under "Streamlining Efforts."

The County's Density Bonus Ordinance also provides additional bonuses and benefits beyond what is provided in the State Density Bonus Law, and is described in more detail later in this section under "Incentives"

SB 330 Procedures

To comply with SB 330, the Department of Regional Planning has established the following procedures:

- Preliminary applications;
- Zoning permit applications updated with replacement housing requirements;
- Staff reports with a "hearing" count; and
- Staff reports for residential projects that describe the applicability of SB 330, including the required findings for the denial of a project.

Other Permits and Reviews Required by the Zoning Code

Table III-25 identifies some of the other permits and reviews that are typically required for housing developments, and the Type Review used to process the application:

Table III-25: Permits and Reviews and the Assigned Type Review

Permit or Review	Permit or Review Description	Type Review	Typical Timeframe ^{1,2}
Ministerial Site Plan Review	This is a staff-level procedure for most permitted uses in the Zoning Code.	Type I Review	4-6 weeks
Lot Line Adjustment	This permit is required to adjust the lot line between two or more existing adjacent lots, where the land taken from one lot is added to an adjacent lot and where a greater number of lots than originally existed are not thereby created.	Type I Review	6-8 weeks
Minor Conditional Use Permit	This permit is established to regulate uses and development that, by their nature, are limited in scope and impacts, and may be appropriate in the applicable zone and require additional consideration to ensure proper integration with the surrounding community.	Type II Review	6-8 months
Yard Modifications	This permit is required to modify or reduce the required setbacks. If the modification request is on yards contiguous to a limited secondary highway, the application shall not be approved unless a written concurrence of Public Works has been received.	Type II Review	6-8 months
Conditional Use Permit	This permit is established to regulate uses and development that may be appropriate in the applicable zone and require additional consideration to ensure proper integration with the surrounding community.	Type III Review	8-12 months
Parking Permits	This permit is established to provide an alternative to parking requirements in the event that a particular use does not have the need for such requirements.	Type III Review	8-12 months
Variances	The variance is established to permit modification of development standards as they apply to particular uses when practical difficulties, unnecessary hardships, or results inconsistent with the general purposes of the Zoning Code.	Type III Review	8-12 months
Development Agreements	A Development Agreement is a negotiated contract between the County and a private developer that, among other things, secures land use and zoning regulations for the duration of the agreement. A Development Agreement provides assurance to an applicant that a development project may proceed in accordance with existing policies, rules and regulations, and conditions of approval in effect at the time the agreement is adopted. The agreement in turn allows the County to negotiate a wider range of public benefits, including but not limited to, affordable housing, civic art, open space, or other amenities not authorized or required by current ordinances.	Type IV Review	1+ years
Plan Amendments	A plan amendment is required to initiate an amendment to the General Plan. While the Plan Amendment process established by State law and the Zoning Code enables the General Plan map designations and/or written policy statements to be amended, most development applications that seek a plan amendment involve amending the General Plan map designations, particularly the land use policy map designations.	Type IV Review	1-2 years
Zone Changes	A zone change is required to initiate a change of zone classification on a lot from one zone to another zone.	Type IV Review	1-2 years

When two or more applications are filed on a property, all applications may be reviewed concurrently by the Review Authority.
 Development in Coastal Zones and Significant Ecological Areas may require additional time. CEQA compliance may also add six months to three years to a discretionary process.

There are some other permits and reviews that are not assigned to one of the Type Reviews mentioned above due to their unique processing procedures. **Table III-26** identifies some of these other permits and reviews that may be required for housing developments.

Table III-26: Permits and Reviews with Unique Processing Procedures

Permit or Review	Review Authority	Description of Permit/Review	Typical Timeframe ¹
Coastal Development Permits	Director Hearing Officer	A review to ensure that any development, public or private, within the Coastal Zone conforms to the policies, provisions, and programs of the LCP.	2+ years
Los Angeles County Mills Act Program	Director	An incentive for owners of qualified historical properties to preserve, restore, and rehabilitate the historic character of such properties.	2-5 months
Requests for Reasonable Accommodations	Director	A request from any individual with a disability, someone acting on their behalf, or a provider or developer of housing for individuals with disabilities, desiring to obtain a Reasonable Accommodation.	6 weeks
Oak Tree Permits	Director	An application to encroach upon, remove, or relocate not more than one oak tree is ministerial. Otherwise, a public hearing before a Hearing Officer is required.	3-6 months (Administrative) or 6-8 months (Discretionary)
Minor Parking Deviations	Director	A request for a parking reduction of less than 30%.	3 months

¹Timeframe does not include additional time that may be required for CEQA compliance.

Land Divisions

In addition to the permits and reviews required by the Zoning Code, the Subdivision Code also requires a tentative parcel or tract map and a final map for all divisions of land in accordance with the Subdivision Map Act. **Table III-27** identifies some of the permits and reviews that may be required for land divisions.

Table III-27: Permits and Reviews Required for Land Divisions

Permit or Review	Review Authority	Description of Permit/Review	Typical Timeframe ¹
Tentative Tract Maps	Regional Planning Commission/ Hearing Officer	A tentative tract map is required for the subdivision of more than four lots or units. It is submitted to the advisory agency and approved in accordance with the provisions of the Subdivision Map Act and Title 21. If the tentative tract map is approved and no appeal is filed, a final map must be recorded to complete the subdivision.	1.5+ years
Tentative Parcel Maps	Regional Planning Commission/ Hearing Officer	A tentative parcel map is required for the subdivision of four or fewer lots or units. Once the tentative parcel map is approved and no appeal is filed, either a final map or a parcel map waiver may be processed to complete the subdivision. However, since improvements are often required, most projects are not eligible to obtain a parcel map waiver, and the applicant must have a final map recorded to complete the subdivision.	1.5+ years

¹Timeframe does not include additional time that may be required for CEQA compliance.

Advisory Body

Depending on the project and the required permit or review, an Advisory Body may be involved in the review process. An Advisory Body may include:

- A Review Authority that provides a recommendation to another Review Authority;
- Other County departments and experts in relevant subject areas that provide comments and recommendations to the Review Authority. Such bodies include, but are not limited to the Subdivision Committee, Significant Ecological Area Technical Advisory Committee, Environmental Review Board, and the Fire, Public Works, Parks and Recreation, and Public Health Departments; or
- Any federal, State, County, or local agency.

Hearing Examiner

Hearing Examiners are appointed Regional Planning staff members who conduct public meetings in the community to receive testimony for Draft EIRs for the Regional Planning Commission, as needed.

Application and Review Procedures

The general procedures described as follows apply to the following types of applications: General Plan amendments, tentative tract map, tentative parcel map, Conditional Use Permits, zone changes, variances, Development Agreements, Coastal Development Permits, Discretionary Housing Permits, and Parking Permits.

- Applicants generally start the permitting process by obtaining zoning and application information. The County offers the interdepartmental "One-Stop" for counseling on proposed projects.
- Applicants submit the completed application and documentation package to DRP, or submit the
 materials online via the EPIC-LA portal. A planner reviews the materials to ensure completeness
 and collects the appropriate fees. All projects subject to a discretionary review require an initial
 study/environmental assessment in accordance with the California Environmental Quality Act.
- The Hearing Officer or RPC conducts the public hearing upon completion of the requirements. The staff sends the applicant and other interested parties legal notification of the public hearing.

Conditional Use Permits for Residential Uses-Findings

It is uncommon for CUPs to be required to establish residential uses in urban infill areas. Generally, CUPs are required where the project requires grading, and/or is located on a hillside, SEA, and subject to seismic, geologic, fire and flood constraints.

The Department provides applicants with detailed checklists and application materials, and conducts one-stop meetings. For projects located in sensitive areas, the one-stop meeting includes the participation of a County biologist, as needed, and can include the review of

objective guidelines to ensure certainty and clarity in the process. Applicants may be required to prepare a biological constraints map and detailed grading and slope plans for staff to assess the compatibility of the proposed project with the following findings:

- The proposed use will be consistent with the General Plan.
- The requested use will not:
 - Adversely affect the health, peace, comfort, or welfare of persons residing or working in the surrounding area;
 - Be materially detrimental to the use, enjoyment, or valuation of property of other persons located in the vicinity of the site; and
 - Jeopardize, endanger, or otherwise constitute a menace to the public health, safety, or general welfare.
- The proposed site is adequate in size and shape to accommodate the yards, walls, fences, parking and loading facilities, landscaping, and other development features prescribed in <u>Title 22</u>, or as is otherwise required to integrate the use with the surrounding area.

When a project is located in an HMA and requires a Hillside Management CUP, DRP staff must make additional findings related to site design, impacts to scenic views and ridgelines, and sensitive hillside design standards.

When a project is located in an SEA and requires a Sensitive Ecological Area CUP, DRP staff must make additional findings on the preservation of natural open space, minimization of impacts to wildlife movement, and preservation of water courses.

Streamlining Efforts

In January 2019, the County adopted the Technical Update to Title 22 (Zoning Code). The code amendment to Title 22 reorganized, clarified, and simplified the code language, consolidated identical or similar standards or procedures, deleted obsolete or redundant code provisions, and streamlined administrative and case processing procedures.

In order to reduce time and money spent by property owners and developments and in turn accelerate housing production, the following housing ordinances were recently adopted by the Board of Supervisors to streamline the approval of certain housing developments through a ministerial review process:

- The By-Right Housing Ordinance exempts developments of up to four units in two or more buildings (i.e., in the form of multiple detached units and/or duplexes) from the discretionary lease project subdivision process in Zones R-2 and R-3, provided that the lot does not exceed 15,000 square feet in size, and the project meets certain locational criteria. The Ordinance also allows various multifamily housing types, such as apartment houses and townhouses byright in Zones R-2, C-H, C-1, C-2, C-3, and C-MJ where certain locational criteria are met, subject to the approval of a Ministerial Site Plan Review; and
- The Interim and Supportive Housing Ordinance streamlines the approval of housing for people experiencing homelessness (shelters, transitional housing, and supportive housing) through a ministerial review process. Specifically, the Ordinance streamlines the development of shelters by expanding where they are allowed by-right, revising development standards,

exempting ministerial applications for shelters from planning fees and imposing a timeline for review. The ordinance also expands where permanent of conversion of hotels, motels and youth hostels to transitional housing or shelter; and allows temporary conversion of hotels, motels and youth hostels to transitional housing and shelters in certain zones by-right without correction of any nonconforming condition. Lastly, the Ordinance codifies the supportive housing streamlining of AB 2162.

These ordinances are in compliance with the definition of "by right" in Government Code section 65583.2 (i) by not requiring a Conditional Use Permit or other discretionary County review or approval that would constitute a "project" as defined in CEQA.

Knowledge of the County's process for project approval is an important step in avoiding costly delays. To assist applicants, the Department of Regional Planning's website is regularly updated to provide information on planning and zoning, planning entitlement application forms and instructions, and fees. The EPIC-LA online application system and virtual counseling also reduce the need for applicants to travel to obtain information or apply in person.

Virtual Counseling

Since the start of the COVID-19 pandemic, the Department of Regional Planning has encouraged applicants to schedule virtual appointments using Zoom to discuss proposed development or zoning and planning inquiries with staff. Once Regional Planning offices are reopened to the public, appointment offerings will be expanded to include both virtual and in-person appointments. Types of virtual counseling appointments include:

- Zoning and Planning Discussion Counseling regarding a proposed development or projectspecific questions for sites in a special district area, including Specific Plan, Significant Ecological Area, Hillside Management Area, community standards district, and/or equestrian district
- Case Intake/Online Application Issues Assistance with the online application submittal process
- Certificate of Compliance / Lot Line Adjustment Discussion Assistance with Certificates of Compliance or proposed Lot Line Adjustments
- Zoning Enforcement Violation Discussion Assistance regarding zoning code violations as a result of referrals by Zoning Enforcement staff

One-Stop Meetings

The Department of Regional Planning coordinates monthly "one-stop" meetings to provide feedback on projects before applicants submit a complete application. County agencies, such as Public Works, Fire Department, Public Health Department, the Development Authority, and the Department of Regional Planning provide written comments on draft plans and application materials to prevent delays and further streamline the review process. A representative from every agency attends the

meeting and reviews comments with the applicant, provides a timeline for review and information on fees.

EPIC-LA e-Reviews

The Department of Regional Planning initiates the e-Reviews process with multiple County agencies after a complete application is received. County staff review files digitally and provide comments and necessary clearances electronically. Applicants can track their application status and submit revisions electronically.

Affordable Housing Planners

The Department of Regional Planning has designated a team of planners to serve as a single point of contact for all applicants considering providing affordable units. The planners review all affordable housing projects and counsel applicants on the County's Density Bonus and Inclusionary Housing ordinances, incentives, and waivers. The team serves as a liaison to the Los Angeles County Development Authority, which drafts the land use covenants and monitors the affordable units for the life of the project.

Development Fees

While most development fees are one-time fees, some entitlements, such as plan amendments, require an initial deposit upon application submittal. Supplemental deposits are required when the actual cost of processing the case exceeds the amount of the initial deposit. As the application fees for certain types of entitlements can vary, applicants may not be able to estimate the actual application cost prior to filing. **Table III-28** presents application fees for common fixed planning entitlements.

Unlike most fixed planning entitlement fees, application fees for tentative maps vary depending on the number of proposed lots, as well as the availability of public water and sewer service at the project location. Tentative maps also require an initial deposit and supplemental deposits when the actual cost of processing the case exceeds the amount of the initial deposit.

Other fees for plan check or other review conducted by the Building and Safety Division of Public Works are based on the size of the development. Grading and landscaping permit fees are based on the volume of material handled and area to be landscaped, respectively.

The County offers exemptions or reductions to planning and zoning filing fees for projects containing income-restricted units, depending on the number of income-restricted units in the project. The County also exempts shelters and mobilehome parks from planning and zoning filing fees. In compliance with AB 1483, all planning and zoning fees are listed on the Department of Regional Planning web site at the following link: https://planning.lacounty.gov/fees.

Table III-28: Planning Entitlement Application Fees (Partial List)

Application	Fee
Plan Amendment	\$3,000 Initial Deposit
Zone Change	\$15,217 Plus \$262 if referred to Fire Department
Tentative Tract Map	\$24,957, including \$5,000 initial deposit
Tentative Parcel Map	Dependent on number of lots proposed
Environmental Assessment (CEQA) (Initial Review)	\$374
Environmental Assessment (CEQA) (Negative Declaration)	\$3,800
EIR (Initial Deposit)	\$10,000 Major EIR, \$5,000 Minor EIR
Site Plan Review (Residential)	\$917
Site Plan Review (Residential in Hillside Areas)	\$1,181
Conditional Use Permit	\$10,215
Conditional Use Permit (Significant Ecological Areas)	\$19,731
Conditional Use Permit (Significant Ecological Areas - Coastal)	\$22,342
Housing Permit	\$1,201 - \$4,159
Coastal Development Permit	\$1,732 - \$13,669
Oak Tree Permit	\$1,271 - \$11,486
Parking Permit	\$10,215
Zoning Conformance Review	\$559
Variance	\$10,215

Source: County of Los Angeles Department of Regional Planning Filing Fees, March 1, 2021.

Impact Fees

Impact fees, which are typically assessed on a per-unit basis, are often required to fund the cost of infrastructure and other public facilities that serve new housing developments. One major impact fee is the Quimby fee. Pursuant to the Quimby Act, the County requires dedication of land or the payment of fees in lieu thereof, or a combination of both, for park or recreational purposes as a condition to the approval of a tentative map or parcel map, subject to certain conditions.

The Subdivision Code requires park fees if any portion of the local park space obligation for a residential subdivision is not satisfied by the existing local park space. Park fees are assessed as a condition prior to the final approval of the subdivision. This requirement applies only to residential subdivisions and only where there are not enough parks and open space in surrounding areas. In areas that do not have enough land set aside for parks and recreation, this obligation may increase the cost of developing housing, but is necessary to meet recreational needs and is a cost borne statewide.

School fees, which are calculated on a per-square-foot basis, can represent one of the largest impact fees for housing developments. The County does not have the ability to amend school fees, which are established by the State. Furthermore, water connection fees are another common impact fee, which can vary as they are controlled by individual water service providers throughout Los Angeles County.

There are a number of other impact fees required by the County. For example, the Bridge and Major Construction Fee Districts (B&T) were established by the County to finance specific highway and bridge improvements in unincorporated Los Angeles County. New developments within these districts are levied a fee in proportion to the benefit they will receive from the improvements. The County has established the Eastside (Route 126), Westside, Bouquet Canyon, Lyons Avenue/McBean, Valencia and Castaic B&T Districts in the Santa Clarita Valley, and the Lost Hills/Las Virgenes B&T District in the Parkway Calabasas area.

A drainage fee is required to address increased storm run-off resulting from new developments in the Antelope Valley, per the Antelope Valley Comprehensive Plan of Flood Control. The drainage fee may be increased or decreased, depending on the review of the Construction Cost Index and the type and amount of development being constructed within the Antelope Valley Drainage Area.

Fee Comparison, by Size of Development

Table III-29 presents a summary of estimated development and entitlement fees by type (single family subdivisions and multifamily condominium, versus multifamily rental) and size of project. **Table III-30** presents the typical building permit fees by type of unit (single family subdivision versus multifamily). Fees for a multifamily housing development are less than the fees for a single family housing development.

Table III-29: Estimated Land Development and Entitlement Fees by Type and Size of Development

Fees	5 Lots	20 Lots	50+ Lots
Single Family Subdivision and Multifamily Condominium Fees			
Land Development – Public Works Fees	\$45,440.00	\$100,950.00	\$138,800.00
Entitlement Fees – Regional Planning	\$41,119.00	\$42,649.00	\$49,239.00
Entitlement Fees – Parks and Recreation	\$10,405.84	\$41,623.36	\$104,058.40
Total Standard Subdivision Fees	\$96,964.84	\$186,222.36	\$292,097.40
Total Standard Subdivision Fees – Per Lot	\$19,392.97	\$9,311.12	\$5,841.95
Multifamily Rental Housing Fees		20 Units	
Entitlement Fees – Regional Planning		\$3,341.00	

Table III-30: Estimated Building Permit Fees by Type of Unit

Cinala Family Cultdivision Hausing Face	Unit Size		
Single Family Subdivision Housing Fees	2,000 sq. ft.	2,500 sq. ft.	3,000 sq. ft.
Public Work Fees	19558.90	22543.90	25531.90
Sanitation District Fees	5500.00	5500.00	5500.00
Fire Department Fees	2371.00	2478.00	2478.00
Law Enforcement Facility Fee	467.00	467.00	467.00
Library Fees	969.00	969.00	969.00
School Fees	7580.00	9475.00	11370.00
Total Building Permit Fees	38,816.90	43,910.90	48,793.90
Multifornilla Hausian Face	Project Size		
Multifamily Housing Fees	5 Units	20 Units	40 Units
Public Work Fees	\$24,958.90	\$72,756.90	\$130,327.90
Sanitation District Fees	\$16,500.00	\$66,000.00	\$132,000.00
Fire Department Fees	\$2,662.00	\$2,662.00	\$2,662.00
Law Enforcement Facility Fee	\$1,685.00	\$6,740.00	\$13,480.00
Library Fees	\$4,845.00	\$19,380.00	\$38,760.00
School Fees	\$18,950.00	\$75,800.00	\$151,600.00
Total Building Permit Fees	\$72,262.90	\$246,000.90	\$471,491.90
Total Building Permit Fees – Per Unit	\$14,452.58	\$12,300.05	\$11,787.30

A substantial portion of the unincorporated "islands" located on the Westside, in central Los Angeles, and the San Gabriel Valley are highly urbanized. Typically, the existing facilities in these urban areas, including streets, sewers, electrical and water services, schools, and fire stations, require no additional mitigation measures, such as impact fees. As a result, the cost of land development is usually less in these areas than in undeveloped "urban expansion" or rural portions of unincorporated Los Angeles County. However, the Quimby fee is an exception and tends to be higher in urban areas because it is tied to the cost of land, which is higher in urban areas.

Areas with existing facilities within urban unincorporated Los Angeles County, including streets, sewers, electrical and water services, schools, and fire stations, require no additional mitigation measures, such as impact fees. However, while properties in urban areas may have lower onsite and offsite improvement costs, they typically command high land costs on a per-square-foot basis due to the permitted densities and the availability of infrastructure. In contrast, properties in the undeveloped rural areas typically require payment of substantial development fees to provide infrastructure, services, and facilities, although the land costs may be lower.

Fees in Proportion to Total Development Cost Per Unit

The County compared the total per-unit fees in Tables III-29 and III-30 to per-unit development costs that were assumed in the County's inclusionary housing feasibility studies from 2020 (for multifamily rental projects) and from 2018 (for single-family). Given the wide range of land costs across unincorporated Los Angeles County real estate submarkets, the proportion of fees to development costs per unit also varies widely. The fees represent a lower proportion of the total development cost

in areas with higher land costs, such as Coastal South Los Angeles and the San Gabriel Valley, and a higher proportion of the total development cost in areas with lower land costs, such as the Antelope Valley.

- For multifamily rental projects, the proportion of fees per unit to total development cost per unit ranges from 3 percent in Coastal South Los Angeles to 6 percent in the Antelope Valley.
- For single-family homes, the proportion of fees per unit to total development cost per unit ranges from 4 percent in the San Gabriel Valley to 14 percent in the Antelope Valley.

Per-unit fees for multifamily developments in unincorporated Los Angeles County are among the lowest when compared to those for other local jurisdictions in California, as cited in a 2018 study by the Terner Center for Housing Innovation at UC Berkeley. Per-unit fees for single-family homes in unincorporated Los Angeles County are in the middle of the range. ¹³

The County recognizes the impact of such fees on affordable housing development. However, the provision of necessary infrastructure and public facilities is critical to ensure that residents of affordable housing have equal opportunity for quality housing in a suitable living environment. To mitigate the financial impacts of such fees, the County uses HOME and Community Development Block Grant (CDBG) funds to help offset the cost of development for affordable housing.

Public Art Fee

On September 15, 2021, the Board of Supervisors adopted the Public Art in Private Development Ordinance, which requires eligible development projects to fund one percent of the total building valuation toward public art, facilities, conservation, and artistic and cultural services and programs. The fee applies to residential, mixed-use, commercial, and industrial development projects and any repair, addition, or alteration of such projects in unincorporated Los Angeles County with a building valuation of \$750,000 or greater.

Developers can provide the public art contributions on site, within a five-mile radius of the project, or through an in-lieu fee. Exemptions to the requirement include projects of less than 30 dwelling units; income-restricted affordable units; market-rate density bonus units; senior citizen housing developments and mobilehome parks for senior citizens; and emergency, accessory emergency, and domestic violence shelters. The Ordinance also exempts alterations and upgrades that do not change the use, size, or occupancy load of the building(s), or that are required to comply with regulations, such as seismic safety mandates or the Americans with Disabilities Act. This new fee will contribute to the overall goal of creating healthy living environments.

On- and Off- Site Improvements

According to the Subdivision Code, improvements are not required as a condition of project approval for minor land divisions (parcel maps--four or less lots), if the existing systems and

Terner Center for Housing Innovation. 2018. "It All Adds Up: The Cost of Housing Development Fees in Seven California Cities."

https://ternercenter.berkeley.edu/wp-content/uploads/pdfs/Development Fees Report Final 2.pdf

improvements have been deemed adequate to serve adjacent developed parcels, unless such improvements are necessary to serve the project or to be consistent with the General Plan. In addition, no improvements are required when all lots shown on a parcel map of a minor land division have a gross area of five acres or more and are within a single family residential or agricultural zone.

In existing urban areas where development has already occurred and for minor land divisions, there are likely to be very few site improvement requirements. In such cases, the costs of on and offsite improvements do not serve as constraints on development. However, in new major subdivisions, the need to provide infrastructure may increase the cost of new housing. Lower land prices in some parts of unincorporated Los Angeles County, such as the Santa Clarita Valley and Antelope Valley, can help offset some of the costs. In addition, the County often provides incentives to affordable housing developers in the form of reduced parking requirements, filing fees, and others.

In general, the following improvements are required of all major subdivisions:

Street Right-of-Way Width Requirements

Developers must provide a minimum of 24 feet of offsite pavement to the subdivision. The following are required street right-of-way widths for various types of streets in major subdivisions, as defined by the Subdivision Code:

Cul-de-sacs (up to 700 feet): 58 feet

Cul-de-sacs (more than 700 feet in length): 60 feet

Local streets: 60 feet

Collector streets: 64 feet

Limited secondary highways: 64 feet and 80 feet for future streets

Parkways: 80 feet (minimum)

Secondary highways: 80 feet

Major highways: 100 feet

Expressways: 180 feet

• For industrial/commercial collector streets:

o Cul-de-sacs (up to 500 feet) 66 feet

Collector streets 84 feet

Sidewalk Requirements

In general, where lots in a subdivision are smaller than 15,000 square feet, developers are required to install sidewalks of no less than five feet wide:

On both sides of entrance and collector streets.

On both sides of loop, interior, and cul-de-sac streets.

- Along one side of service roads adjacent to abutting lots.
- Along highways shown on the County's Highway Plan where no service road is provided.
- Along highways shown on the Highway Plan where necessary to provide for the safety and convenience of pedestrians.

Streetlighting Requirements

Streetlights are required in most major subdivisions where lots are less than 40,000 square feet in size. In the Rural Outdoor Lighting Districts, less street lighting is required than in the urban areas.

Curbs and Gutters

Curbs and gutters are required in subdivisions with lots less than 20,000 square feet in size.

Water and Sewer Connections

Water systems are not required if lots are at least five acres in size, even in major subdivisions, well water may be used instead. If lot sizes are at least one acre in size, septic systems are deemed adequate in providing sewer services.

<u>Circulation Improvements</u>

Developers are required to provide onsite improvements in the form of direct dedications needed for access and circulation for the development. In designated Bridge and Thoroughfare Districts, developers may also be required to pay an impact fee to offset the cost of constructing bridges over waterways, railways, freeways, and canyons, and/or constructing major thoroughfares. Mitigation measures are only required if level of service falls below level B.

Rural Communities Requirements and Waivers

In rural areas where subdivisions contain lots larger than 20,000 square feet in size, there are no requirements for curbs, gutters, and sidewalks. Street lighting may or may not be required and is determined on a case-by-case basis.

Other General Exemptions

Requirements for improvements may be waived for subdivisions with lots larger than 20 acres and some with lots larger than 10 acres in size.

Inclusionary Housing

The County's Inclusionary Housing Ordinance applies in the following unincorporated submarket areas (**Figure III-24**): Antelope Valley; Coastal South Los Angeles; East Los Angeles/Gateway; San Gabriel Valley; Santa Clarita Valley; and South Los Angeles. Inclusionary requirements apply to all housing developments, excluding mobilehome parks, and including projects to substantially rehabilitate and convert an existing commercial building to residential uses, or the substantial rehabilitation of an existing multifamily dwelling that would result in a net increase in available dwelling units, that meet all of the following:

- Has at least five or more baseline dwelling units;
- Is located in a submarket area, with the following exceptions:
 - Rental projects or condominium projects located in the South Los Angeles or Antelope Valley submarket areas; or
 - Rental projects located in the East Los Angeles/Gateway submarket area; and
- Is not located within an area subject to an affordable housing requirement pursuant to a Development Agreement, specific plan, or local policy.

Table III-31 summarizes the County's inclusionary housing requirements for rental and for-sale projects. In developing the Inclusionary Housing Ordinance, the County conducted a study to test the market feasibility for each submarket area and by type and set-aside of affordable units. To ensure consistency with long-term economic trends, the County will evaluate the appropriateness of the affordable housing set asides required at least every five years.

To facilitate middle income for-sale housing, projects are eligible for one incentive and one waiver or reduction of a development standard provided the project is not eligible for such under the County's Density Bonus Ordinance. On a case-by-case basis, a developer may request an adjustment or waiver of the inclusionary requirements, subject to the approval of the Director of Regional Planning.

Flexible Alternatives: Rather than building the units as part of the primary project, developers may choose to provide the affordable housing units off-site, if the off-site location is in the unincorporated areas and one of the following:

- Within one-quarter mile of the principal project;
- Within a Highest, High, or Moderate Resource Area, as determined by the State Tax Credit
 Allocation Committee and State Department of Housing and Community Development.
 Where the principal project is also located in an area designated as Highest, High, or
 Moderate Resource, the off-site parcel shall be located in an area with the same or higher
 resource designation as the principal project;
- Located within two miles of the principal project and in an area with known displacement risk based on evidence to the satisfaction of the Department; or
- Developed as part of a community land trust.

Off-site affordable set-aside units must be entitled and permitted prior to or concurrently with the units in the principal project.

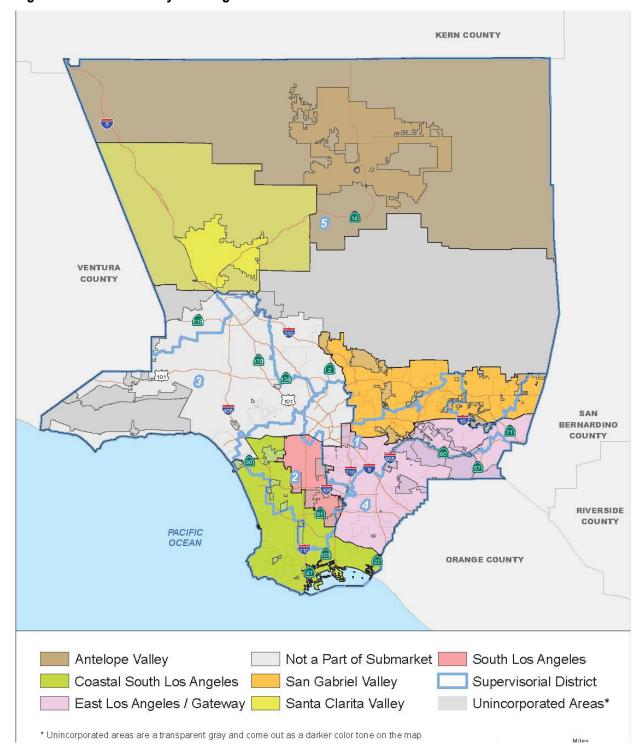

Figure III-24: Inclusionary Housing Submarket Areas

Table III-31: Inclusionary Housing Requirements

Rental Projects	Affordability ¹	Set-Aside	Set-Aside (Small Project) ²
Option 1	Average Affordability ³ of 40% AMI or Less	10%	5%
Option 2	Average Affordability ³ of 65% AMI or Less	15%	7%
Option 3	80% AMI or Less	20%	10%

Notes:

- 1. Units shall be set aside for extremely low, very low, or lower income households.
- 2. Projects with less than 15 baseline dwelling units.
- 3. Calculations for the average affordability shall comply with the Zoning Code.

For-Sale Projects	Affordability ¹	Set-Aside	Set-Aside (Small Project) ²
Coastal South Los Angeles South Los Angeles (excluding condominiums) East Los Angeles/Gateway	Average affordability ³ of 135%	20%	10%
San Gabriel Valley	AMI or Less	15%	7%
Santa Clarita Valley Antelope Valley (excluding condominiums)		5%	

Notes:

- 1. Units shall be set aside for moderate or middle income households.
- 2. Projects with less than 15 baseline dwelling units.
- 3. Calculations for the average affordability shall comply with the Zoning Ordinance.

Affordable Housing Replacement

The County's Affordable Housing Preservation Ordinance requires one-for-one replacement of affordable units that existed on a site where new residential development is proposed, and is in compliance with SB 330 and AB 1397 (Government Code Section 65583.2(g)(3)). Modeled on existing "no net loss" requirements in State Density Bonus Law and Government Code 66300, the Ordinance requires replacement of dwelling units that are proposed to be or have been demolished or vacated, if they are or were any of the following within five years prior to application submittal:

- Subject to a recorded covenant that restricts rents to levels affordable to moderate, lower, very low or extremely low income households;
- Rent-stabilized pursuant to County or State law; or
- Occupied by lower, very low, or extremely low income tenants, including mobilehome owners renting spaces in a mobilehome park.
- Withdrawn from rent or lease in accordance with Chapter 12.75 (commencing with section 7060) of the California Government Code within the 10 years prior to application submittal.

The replacement requirement applies to the following project types:

- New construction of any principal building;
- A change in the number of dwelling units; or

Legalization of an existing unpermitted dwelling unit.

The following project types are not required to replace affordable housing:

- New construction or legalization of accessory dwelling units or junior accessory dwelling units:
- Addition of mobilehome spaces or mobilehomes in a mobilehome park;
- A project in a Very High Fire Hazard Severity Zone, as depicted in the General Plan; or
- A project that is located within an area subject to an affordable housing replacement requirement, pursuant to a Development Agreement, specific plan, or local policy.

Certain project types may pay the Affordable Housing Replacement Fee instead of providing a replacement unit within the proposed project. The fee ranges from \$144 - \$346 per square foot of housing that previously existed on the site, or \$129,470 to \$318,914 per unit, depending on the location of the proposed project.

Labor Requirements

The County implements labor requirements for housing construction that are mandated by federal, state and local policies. Projects seeking streamlined ministerial review under Government Code section 65913.4 are subject to prevailing wage requirements pursuant to the State Prevailing Wage Law if they are more than 10 units or receiving public funds (in the case of condominiums, low income housing tax credits). Projects of 75 or more units (or 50 or more units for projects approved on or after January 1, 2022) that are not 100% affordable to lower or very low income households must also use a skilled and trained workforce in order to be eligible for streamlined ministerial review under Government Code section 65913.4.

The County's Local and Targeted Worker Hire Policy was adopted by the Board of Supervisors in October 2016 to ensure that local workers have employment opportunities on projects within their own communities. For affordable housing projects and mixed-use affordable housing projects that include County-funded facilities receiving funds administered by LACDA, and LACDA projects with a project budget greater than \$2.5 million, there shall be a best effort hiring goal of at least 30% qualified local residents and 10% Targeted Workers of California construction labor hours performed.

Incentives

To mitigate the impacts of government policies, rules, and regulations on the development and improvement of affordable housing, the County offers a number of regulatory incentives.

Density Bonuses

The County's Density Bonus Ordinance offers deeper affordability, a simplified process for incentives and waivers, and bonuses that are above and beyond the requirements of the State Density Bonus Law. The Ordinance offers density bonuses and waivers or modifications to development standards for senior citizen housing developments and housing developments (minimum size five units) that set aside a portion of the units for lower and moderate income households. In addition, the

Ordinance offers incentives for housing developments that set aside a portion of the units for lower and moderate income households (see **Table III-32**).

Table III-32: Density Bonus Ordinance-Density Bonus Sliding Scale

Income Group	Minimum Set- Aside of Affordable Units	Base Bonus	Maximum Bonus for 100% Affordable Projects ²
Extremely Low Income	5%	25%	120%
Very Low Income	5%	20%	100%
Lower Income	10%	20%	80%
Moderate Income (common interest developments only)	10%	5%	60%
Senior Citizen Housing Development ¹	100%	20%	
Land Donation (very low income projects only)	10%	15%	

¹ Affordability is not a requirement for senior housing developments to qualify for a density bonus and waivers or modifications to development standards. Source: Los Angeles County Zoning Code.

Typical parking reductions are identified in **Table III-33**. Specifically, housing located within proximity to transit can receive further reductions in parking requirements.

Table III-33: Density Bonus Ordinance-Parking Reductions

Affordability and Project Type	Proximity to Transit	Number of Parking Spaces	
100% rental housing affordable to lower or very low income households			
Senior citizen housing development	With paratransit or within ½ mile of a fixed bus	0.5 space per unit	
Special needs housing development	route	No parking required	
Supportive housing development	-	No parking required	
Other 100% rental housing affordable to lower or very low income households		0.5 space per unit	
At least 11% very low income housing set aside		0.5 space per bedroom	
At least 20% lower income housing set aside	Within ½ mile of a major transit stop	0.5 space per bedroom	
Extremely low income units		No parking required for extremely low income units only	
All other projects subject to Chapter 22.120	-	0-1 bedroom: 1 space per dwelling unit 2-3 bedrooms: 2 spaces per dwelling unit 4 or more bedrooms: 2.5 spaces per dwelling unit	

The County's sliding scale also reflects AB 1763 (Chiu), which provides an enhanced density bonus by-right for eligible one hundred percent affordable housing developments.

Transit Oriented Districts

Transit Oriented Districts (TODs) are areas where the County encourages infill development, and pedestrian-friendly and community-serving uses near transit stops. The goal is to encourage walking, bicycling, and transit use. To achieve these goals, the General Plan established 11 TODs to create and apply unique development standards and case processing procedures to geographic areas within an approximately 1/2 mile radius around Metro transit stations in unincorporated Los Angeles County.

All TODs will be implemented by TOD specific plans, with standards, regulations, and infrastructure plans that tailor to the unique characteristics and needs of each community, and address issues such as access and connectivity, pedestrian improvements, and safety. Four TOD specific plans have been established to date. The goals of the TOD specific plans are to: 1) increase walking, bicycling, and transit ridership, and reduce vehicle miles traveled; 2) facilitate compact, mixed use development; 3) increase economic activity; 4) facilitate the public investment of infrastructure improvements; and 5) streamline the environmental review process for future infill development projects.

The TOD specific plans offer a range of residential densities. High density residential zones and mixed use zones provide residential densities up to 50 to 70 units per acre in specific areas. TOD specific plans also contain parking reductions for multifamily uses. If a TOD designated area does not have an adopted specific plan, the Zoning Code and General Plan applies. Through the Metro Area Plan and the Florence-Firestone TOD Specific Plan, which are Housing Element implementation programs, the TOD specific plans will be updated for consistency with the General Plan.

- Florence-Firestone TOD
- Del Amo TOD
- Aviation/LAX TOD
- Hawthorne Station TOD
- Vermont Station TOD (Connect Southwest LA TOD Specific Plan adopted in 2020)
- Willowbrook TOD (Specific Plan adopted in 2018)
- Sierra Madre Villa TOD
- East Los Angeles/3rd Street TOD (Specific Plan adopted in 2014)
- West Carson TOD (Specific Plan adopted in 2019)

Housing for Persons with Disabilities

Land Use Controls

The Lanterman Development Disabilities Service Act (Sections 5115 and 5116) of the California Welfare and Institutions Code declares that persons with mental and physical disabilities are entitled to live in normal residential surroundings. The use of property for the care of six or fewer persons with disabilities is a residential use for the purposes of zoning. A state-authorized or certified family care home, foster home, or group home serving six or fewer persons with disabilities or dependent and neglected children on a 24-hours-a-day basis is considered a residential use that is permitted in all residential zones.

As demonstrated in **Table III-17** and as discussed previously, the Zoning Code complies with the Lanterman Act and permits small residential care facilities (including adult and senior residential facilities, as well as small family homes) in all residential zones and most commercial zones. Facilities for more than six persons are conditionally permitted in most residential and commercial zones. As the Conditional Use Permit is a barrier to housing for people with disabilities, the Housing Element implementation program addresses the allowance of licensed housing with more than six persons by right.

The Interim and Supportive Housing Ordinance includes many housing types and facilities that are mandated by the State to be permitted by-right in residential zones, such as transitional housing, supportive housing, and residential care facilities.

Building Code

The Building Code is based on the current California Building Code. The Building Code is considered to have the minimum standards for protecting public health, safety and welfare. It is important to also note that Section 104.2.7 and 104.2.8 of the Los Angeles County Code allows considerations for applications, on a case-by-case basis, for the use of any alternate material, appliance, installation, device, arrangement, design or method of construction not specifically prescribed by the Code. This section also provides is a procedure in place to address the needs of persons with disabilities.

Removing Governmental Constraints

The County completed the Technical Update to the Zoning Code in January 2019. The update amended the definition of "family" as one or more persons living together as a single housekeeping unit in a dwelling unit. This term does not include institutional group living situations, such as dormitories, fraternities, sororities, monasteries, convents, or residential care facilities, nor does it include such commercial group living arrangements as boarding houses, hotels, or motels. This definition is inclusive and does not constrain housing options for persons with disabilities.

The Technical Update also included a simplified definition of "disability" – a condition that renders an individual unable to engage in normal activities by reason of a medically determinable physical or mental impairment that can be expected to last for a continuous period for not less than 12 months.

Reasonable Accommodations

In November 2011, the Board of Supervisors adopted the Reasonable Accommodations Ordinance, which creates an administrative procedure for persons with disabilities to request reasonable accommodations from land use and zoning standards or procedures, when those standards or procedures serve as barriers to equal housing access, pursuant to state and federal fair housing laws. The Ordinance applies to all of unincorporated Los Angeles County. The sole intent of the Ordinance is to implement state and federal laws on reasonable accommodations to ensure that individuals with disabilities have an equal opportunity to use and enjoy housing. The Ordinance does this by allowing an accommodation or accommodations with respect to certain County regulations, policies, procedures, and standards if the accommodation or accommodations are both reasonable and necessary to provide such equal opportunity. The Ordinance includes definitions, procedures for reviewing reasonable accommodations requests that are consistent with state and federal fair housing laws, and time limits for County review of reasonable accommodations requests. There is no fee charged for reasonable accommodations requests. All reasonable accommodations are determined on a case-by-case basis.

The Ordinance follows a series of state and federal laws that have been enacted over the past several decades to prohibit housing discrimination against individuals with disabilities. Both the Federal Fair Housing Amendments Act of 1988 (FHAA) and the California Fair Employment and Housing Act (FEHA) define discrimination as, among other things, a refusal to make reasonable accommodations in rules, policies, practices, or services, when these accommodations may be necessary to afford an individual with a disability equal opportunity to use and enjoy a dwelling. Subsequent legislation expands upon the intent of the fair housing laws. The Housing Element Law requires local housing elements to include programs that "provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities."

State and federal law dictate the findings for a reasonable accommodation procedure. Because reasonable accommodation is based upon the specific needs of an individual, the procedure differs from other procedures to waive or modify zoning or land use standards. The findings in the Ordinance relate to the necessity of the accommodation, and the reasonableness of the request, which are consistent with state and federal laws and do not constitute a constraint to housing for persons with disabilities. For necessity, the Director determines that the accommodation is intended for a person(s) who has a disability as defined in the law and verified by an appropriate third party. Secondly, the applicant establishes that, but for the accommodation, the applicant likely would be denied an equal opportunity to use or enjoy housing. In another finding, the Director may determine that a request is reasonable, and grant the requested accommodation, unless the Director finds that granting the request would be an undue financial or administrative burden to the County or would result in a fundamental alteration to the County's land use and zoning programs. More specifically, the following findings are made:

- The requested accommodation is intended to be used by an individual with a disability who resides or will reside on the property;
- The requested accommodation is necessary to afford an individual with a disability equal opportunity to use and enjoy a residential use;

- The requested accommodation will not impose an undue financial or administrative burden on the County; and
- The requested accommodation will not require a fundamental alteration in the nature of the land use and zoning programs of the County.

The Ordinance also includes procedures for notifying the applicant, as well as nearby property owners, of the decision for the reasonable accommodation request. To accommodate applicants, the applicant may choose to authorize the County to notify the property owners on the applicant's behalf. The applicant and theoretically any stakeholder can appeal the decision. This appeal is subject to an administrative process that narrowly focuses on the findings enumerated in the Ordinance. Furthermore, the Ordinance outlines procedures for concurrent review and enforcement procedures, which are necessary from an implementation standpoint.

In the implementation of the Ordinance, the County has taken affirmative steps to ensure the privacy of information, and to ensure that the process to request reasonable accommodations is accessible and interactive. The application requirements for reasonable accommodations are limited to information that is needed to review the request, and are typical of all land use and zoning applications. Furthermore, the application and information materials developed for reasonable accommodations requests are designed to facilitate the process in a clear and informative way.

As a Housing Element implementation program, the County will update reasonable accommodations requirements, incentives, and processes as needed to align with State law. The program will clarify and simplify the process and investigate expanding applicability.

Constraints to Housing in the Coastal Zone

The unincorporated areas within the Coastal Zone include a portion of the Santa Monica Mountains, Marina del Rey, and Santa Catalina Island (excluding the City of Avalon). The State law (Mello Act) requires that new housing development within the Coastal Zone provide housing opportunities for low and moderate income households, where feasible. Furthermore, the law requires the replacement of housing for low and moderate income households that are demolished or converted into other uses.

Under the State Coastal Act, projects within the Coastal Zone are subject to final approval by the California Coastal Commission (CCC), unless a local jurisdiction has a local coastal program (LCP) that is certified by the CCC. An LCP is comprised of a land use plan and a local implementation program. All unincorporated communities within the Coastal Zone are covered by certified LCPs.

Coastal Zone Residential Development Since 1982

- Single-family Residences 778 units
- Duplexes 4 units
- 3 or more units (Multifamily) 364 units
- Condo units 77 units

Affordable housing opportunities within the Coastal Zone are focused in Marina del Rey. The Marina del Rey LUP provides for 225 affordable units to be built and reserved for senior citizens. The total number of low and moderate income housing units provided in Marina del Rey exceeds the 225

units projected, and serve both seniors and low and moderate income households. At this time, 260 affordable units exist in Marina Del Rey and one large project undergoing a substantial renovation, Mariners Village, with 981 units will provide 20% affordable units (196 units), nearly doubling the amount of affordable units in Marina del Rey.

The Marina del Rey Affordable Housing Policy requires that all new residential projects provide a minimum 15% set aside of affordable units (very low, low, and moderate income) based on the net new incremental units to be constructed. Any converted or demolished residential units that are occupied by very low, low, and moderate income households must be replaced like-for-like. Of the 260 existing affordable units, 59 units are required replacement units. The current policy does not address standards that would apply to the renovation of an existing residential building.

However, the Board of Supervisors has made a motion instructing various County departments to propose an amendment to the current policy and redefine "substantial rehabilitation" to include major projects and ensure affordable units are required. The motion also instructs County departments to propose an amendment to increase the percentage of affordable units from the current 15% to 20%, applicable to both new construction and substantial rehabilitation. For more information on Marina del Rey, please refer to Program 1: Marina del Rey Affordable Housing Policy and the Specific Plan section of the Resources Chapter.

The physical terrain of the Santa Monica Mountains and Santa Catalina Island make the development of housing generally difficult. The County has determined that the restrictions posed by steep slopes, infrastructure constraints, such as limited water, sewer, and roadways, numerous natural hazards, and exorbitant land costs, make it infeasible to provide low or moderate income housing in certain parts of the Santa Monica Mountains. The Santa Catalina Island LUP makes provisions for the development of employee housing (primarily for low and moderate income housing) in conjunction with the future development at Two Harbors and other sites. The LUP requires the replacement of any demolished employee housing units near the City of Avalon. No employee housing has been demolished within the Santa Catalina Island Coastal Zone.

NATURAL AND SAFETY CONSTRAINTS

Unincorporated Los Angeles County consists of a highly diverse topography, with a variety of natural hazards and invaluable natural resources that may constrain the development of affordable housing. Areas with natural constraints and resources described in this section are classified in the General Plan as Special Management Areas, as depicted in the General Plan Hazard, Environmental and Resource Constraints Map (**Figure III-25**). In general, the terrain in unincorporated Los Angeles County can be described as 25% mountainous; 15% coastal plains; and 60% hills, valleys, or deserts. The County has previously analyzed and planned for housing in certain unincorporated areas through County-approved specific plans and area plans and analyzed the potential environmental impacts of such planned housing under the California Environmental Quality Act.

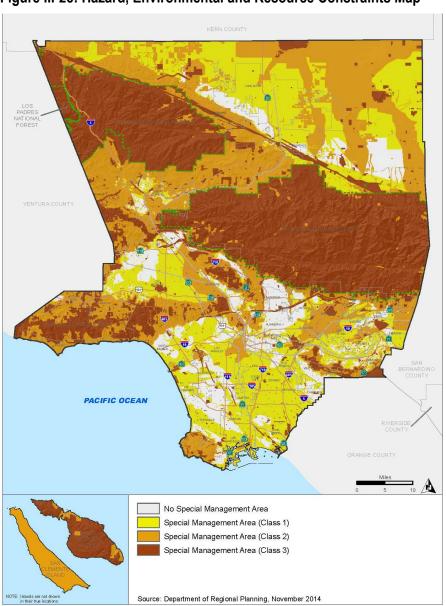

Figure III-25: Hazard, Environmental and Resource Constraints Map

Hillsides

The topography in the mountainous portions of unincorporated Los Angeles County serves as a constraint to housing development. In the mountainous areas, the topography is generally rugged with deep V-sloped canyons, which are not conducive to any kind of development.

Hillsides exist in both urbanized and rural parts of unincorporated Los Angeles County, ranging from the hills of the San Jose Hills and Acton/Agua Dulce areas, to the steep hillsides of the San Gabriel Mountains, Santa Monica Mountains, and Ladera Heights-View Park-Windsor Hills. Development on such terrain necessitates severe grading and land modifications, which significantly add to the cost of housing development. Development restrictions apply to all hillsides, but the principal areas are the Santa Clarita Valley, Santa Monica Mountains, and the foothills of the San Gabriel Valley. Allowable development density and standards in these areas are governed by the Hillside Management Area Ordinance. In addition, the Building Code includes requirements for houses built on steep hillside slopes to mitigate potential seismic hazards.

Fire Hazards

Many parts of unincorporated Los Angeles County are susceptible to wildfires because of hilly terrain, dry weather conditions, and the nature of the plant cover. The principal vegetative cover of upper mountain areas consists of various species of brush and shrubs, known as chaparral. Chaparral is extremely flammable and extensive burns to this mountain vegetation frequently occur during dry weather accompanied by high winds. The intensity of development, the size of the potentially affected population, and the difficulties of containment result in high and extreme fire risks in many of the unincorporated areas. To reduce the risk, new housing developments in Very High Fire Hazard Severity Zones are required to comply with certain regulations related to design and mitigation. Included in the Housing Element programs is the Safety Element Implementation: Reducing Wildfire Risk Program, which includes a review of subdivision regulations and consideration of new strategies for development criteria, such as integrating wildfire mitigation measures and home risk reduction strategies.

Flooding and Mudflows

In hillside areas, large-scale fires can eliminate a significant amount of native vegetation that would normally prevent erosion, thereby making nearby housing developments vulnerable to mudflows and landslides.

The Federal Emergency Management Agency (FEMA) and Public Works have identified a number of areas in the County exposed to 100-year floods and the mudflow hazards associated with heavy rainfall. In an effort to protect such areas from these hazards, the County maintains a rigorous development review process that imposes appropriate development and building standards, including engineering and grading, and mitigation measures on both new and remodeled structures. Public Works is also active in maintaining multi-use flood control and water conservation facilities.

Seismic Hazards

Within unincorporated Los Angeles County, there are over 50 active and potentially active fault segments, and an undetermined number of buried faults, which are potentially capable of producing damaging earthquakes.

In 1990, the State legislature passed the Seismic Hazards Mapping Act, which requires the State Division of Mines and Geology (DMG) to prepare new Seismic Hazard Zone Maps showing areas where liquefaction or earthquake-induced landslides have historically occurred or where there is a high potential for such occurrences. The purpose of the maps is to help reduce and, where feasible, mitigate earthquake hazards in new construction. The County is required to use the maps in the regulatory process to mitigate the potential danger and high costs of such events.

Housing developments within seismic hazard zones may require a special geotechnical review before project approval. Construction is allowed in these areas; however, stricter standards may be requested as part of the geotechnical review and approval process.

National Pollutant Discharge Elimination System (NPDES) Requirements

The municipal storm water NPDES permit issued to the County and 85 cities by the Los Angeles Regional Water Quality Control Board on November 8, 2012 required the development and implementation of a program addressing storm water pollution issues in development projects. Public Works began implementing this program on December 8, 2012. All development projects that require discretionary approval and fall into certain types of development as determined by Public Works are required to submit a drainage concept and storm water quality plan.

A residential development equal to one acre or greater of disturbed area and adding more than 10,000 square feet of impervious area must comply with special NPDES requirements. Complying with these NPDES requirements increases the costs of creating plans and implementing mitigation measures in residential development.

Significant Ecological Areas (SEAs) and Sensitive Environmental Resource Areas (SERAs)

In addition to the environmental constraints posed by fire, floods, and earthquakes, the protection of ecological resources and sensitive habitat areas also presents constraints to housing development.

In areas designated as containing biological resources that are ecologically significant (SEA), the County has created a special development review process to ensure compatibility between the development and the SEA. An adequate biotic analysis of the SEA and affected portions must accompany applications, including zoning, land division, building, and grading permit requests and be reviewed by the Significant Ecological Area Technical Advisory Committee (SEATAC) in addition to review by the Regional Planning Commission.

Housing development in a SERA is prohibited by the State Coastal Act. Under the Coastal Act, SERAs are designated areas in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and are sensitive to human activities

and developments. In the Santa Monica Mountains Coastal Zone, SERA types include unique riparian areas, streams, woodlands, grasslands, savannas, and wetlands.

Any unmapped areas that meet these criteria and that are identified through the biotic review process or other means, and any areas that contain plants or animal species listed by either the federal or state government as endangered, threatened, proposed endangered or threatened, or species of concern are designated as SERAs.

Oak Tree Protection

Part one of the Oak Woodlands Conservation Management Plan and the Oak Tree Ordinance has been adopted to protect oak trees. Enacted in 1982, the Ordinance prevents oaks of a certain diameter from being cut down, removed, or transplanted without the issuance of an Oak Tree Permit. The Ordinance also establishes a minimum replacement requirement of two oak trees for each tree that is cut down. The oak tree provision may substantially add to the cost of housing development since it requires additional arborist reports and possible mitigation measures, and may increase case processing time.

INFRASTRUCTURE CONSTRAINTS

Adequate infrastructure and public services are necessary to accommodate future housing development. Existing and projected deficiencies in infrastructure and public services in unincorporated Los Angeles County are primarily a result of growth and development pressures, although increased consumption by existing customers is also a factor. The following sections discuss the availability of fire protection, water, sewer, dry utilities, streets, educational facilities, and library services to accommodate new development in unincorporated Los Angeles County. In addition, the sections discuss the air quality, safety, and noise impacts that some infrastructure, such as freeways and airports, can have on future housing development.

It is important to note the difference between development in existing urban areas, where infrastructure is already in place, and development in rural areas, which require an extension of infrastructure and public services. The rural areas consist mainly of portions of the Antelope Valley, Santa Clarita Valley, and Santa Monica Mountains. The County has previously analyzed and planned for housing in certain portions of these unincorporated rural areas through County-approved specific plans and area plans and analyzed the potential environmental impacts of such planned housing under the California Environmental Quality Act; housing continues to be encouraged in these areas.

Fire Protection

The Fire Department is organized into nine divisions throughout unincorporated Los Angeles County. In the rural areas, developers are required to pay fees to meet the need for increased fire services. As of 2021, Fire Department fees can add between \$2,500 and \$3,000 to the cost of development.

Water

Los Angeles County is served by a mix of local and imported water supplies, delivered through a system of aqueducts, reservoirs, and groundwater basins. Between 30% and 40% of the water supply comes from local sources, with the remainder imported from outside of Los Angeles County. Local water sources are largely groundwater resources, surface water from mountain runoff, and recycled water. Eight major groundwater basins provide about one-third of the unincorporated areas' overall water demand, except during times of drought.

A major issue in unincorporated Los Angeles County is that most of the groundwater basins never fully recharge because the rate of water extraction is much higher than the rate of replenishment. This issue is particularly severe in south Los Angeles County and the Antelope Valley, where urbanization continues to increase impervious surfaces. Another significant problem is that local groundwater basins are increasingly impacted by man-made and naturally occurring contaminants that infiltrate the groundwater basins and degrade the potable water supplies.

Most of the imported water utilized in unincorporated Los Angeles County is provided by state water contractors, such as Metropolitan Water District (MWD), Castaic Lake Water Agency, Antelope Valley-East Kern Water Agency, Littlerock Creek Irrigation District, and Palmdale Water District. These agencies have exclusive rights to purchase surface water conveyed through the State Water Project (SWP) aqueduct from the California State Department of Water Resources. The reliability of imported

water is subject to global climatic changes, water restrictions, and annual snow and precipitation levels in the watersheds that are tributary to the Sacramento-San Joaquin Delta (Delta). The SWP pumps water from the Delta, and environmental conditions within the Delta can have a significant effect on water deliveries to the SWP. To manage existing and future water supplies, the County coordinates with state agencies and local water districts to operate a complex system that conserves, manages, and efficiently utilizes existing water resources. Some examples of water conservation efforts are the expansion and reuse of recycled water, development of water banking systems, extensive rebate programs, and source water protection projects and programs. The Greater Los Angeles County Region Integrated Regional Water Management Plan for the Los Angeles Basin, the Antelope Valley, and the Upper Santa Clara River was approved in 2014 and amended in 2018.

Sewer Services

Public Works maintains over 4,600 miles of sanitary sewers, 153 pumping stations, and four wastewater treatment plants. To ensure that the demands from new development will be met, the County requires developers to install new sewer pipes to serve the development and connect to the County's system.

Sewer systems in certain parts of unincorporated Los Angeles County are aging and require upgrades. Historically, the County does not plan for sewer infrastructure needs through long-range capital improvement planning, and instead addresses sewer infrastructure incrementally. However, the General Plan has a program for developing area plans with capital improvement plans for unincorporated Los Angeles County.

Dry Utilities

For gas and electric energy, unincorporated areas are served by SoCal Gas and SoCal Edison. In addition, in 2017, the Board of Supervisors approved the creation of a joint powers authority to implement a community choice energy program for Los Angeles County. That program, known as the Clean Power Alliance, began operating in 2018 and now serves 32 jurisdictions across Los Angeles and Ventura counties representing 3 million residents. The Clean Power Alliance offers three tiers of electric service (Lean Energy at 36% renewable, Clean Energy at 50% renewable, and 100% Renewable). Residents and businesses in unincorporated Los Angeles County are receiving 50% renewable energy, plus an additional 20% of GHG-free power from hydroelectric sources.

The County promotes equitable access to internet services through the Board-directed Digital Divide Regional Strategic Plan. The Strategic Plan will identify any gaps in the availability of broadband access, capacity, and services and accelerate solutions for any underserved areas.

Streets

In urban residential neighborhoods, new development can overburden aging infrastructure that is not meant to handle the additional demands that higher density developments can generate. In rural areas, developers may need to build new streets to ensure adequate access to the housing developments and/or implement traffic engineering measures to mitigate project impacts to an

acceptable level. In the cases where housing developments may generate 50 or more peak hour trips, the developer is required to establish a Congestion Management Program.

Educational Facilities

In most instances, increases in the number of households with school-aged children have created significant overcrowding in public schools within the school districts serving unincorporated Los Angeles County. Many public schools, especially elementary schools, are currently operating in excess of or near their capacity, which necessitates the construction of new classroom facilities to mitigate additional school overcrowding. School fees are established by state legislation and are beyond the control of most local governments.

Libraries

The County has established a developer fee program for library facilities. This program establishes a fee structure to mitigate the impact of new residential development projects on library facilities in unincorporated Los Angeles County served by the County of Los Angeles Public Library system. The applicant or its successor in interest is required to pay the library facilities mitigation fee at the time a building permit is issued for each new residential unit. There are seven library planning areas. As of 2020, the library fee is \$969 per dwelling unit. The fee is adjusted annually based on the Consumer Price Index and is updated periodically to ensure that it continues to meet the cost requirements to construct new and enhance existing library facilities. The program also allows the provision of substitute consideration in lieu of the library facilities mitigation fee.

Major Sources of Air Pollution/Housing Next to Freeways

Where and how land is developed can impact air quality, as well as the impact of air quality on public health. People who live near major sources of air pollution are at a greater health risk. CARB advises distancing requirements for sources of air pollution, including freeways, distribution centers, ports, rail yards, refineries, chrome platers, dry cleaners that use perchloroethylene, and gasoline dispensing facilities. Studies indicate that residing near sources of traffic pollution is associated with adverse health effects, such as the exacerbation of asthma, onset of childhood asthma, non-asthma respiratory symptoms, impaired lung function, reduced lung development during childhood, and cardiovascular morbidity and mortality. These associations are diminished with distance from the pollution source. Given the association between traffic pollution and health, the Los Angeles County Department of Public Health recommends that residences be sited at least 500 feet from freeways, in particular. Also, LACDA requires that residential units, play areas, community rooms, gardens, patios, and other areas where residents may reasonably be expected to congregate be sited at least 500 feet away from freeways as part of its funding requirements for new affordable housing development and affordable housing rehabilitation.

While siting residences further from a pollution source reduces these adverse health impacts, it also reduces the potential for housing development. In particular, the location of major transit lines on or adjacent to freeways in Los Angeles County presents a challenge to siting transit-oriented development. The policies that prohibit and discourage housing near freeways adversely affect affordable housing development by limiting potential sites for affordable housing. In addition, these

policies limit affordable housing opportunities by reducing the number of sites that qualify for funding. This issue may potentially be addressed through a number of alternative approaches, including the application of design or other appropriate mitigation measures when siting residences near freeways.

Airport Influence Areas

The Airport Influence Areas are established to ensure compatibility between uses surrounding the County's airports. The Los Angeles County Airport Land Use Commission (ALUC) is unique within the State, as the Regional Planning Commission for the County functions as the ALUC when dealing with airport-related land use decisions, as authorized by Public Utilities Code (PUC) §21670.2. In Airport Influence Areas, proposed General Plan and specific plan amendments, developments, and change of use applications that are enumerated in the PUC, are subject to review pursuant to the applicable airport land use compatibility plan and review procedures adopted by the Los Angeles County ALUC. There are 15 airports in the County. Three are located in unincorporated Los Angeles County (Catalina Airport, Agua Dulce Airport, and Fox Airfield), and three others include unincorporated land within their Airport Influence Areas (LAX, Brackett Field Airport, and Palmdale Regional Airport/Plant 42). Depending on the airport land use compatibility plan, Airport Influence Areas may align with the 60 or 65 CNEL noise contours and runway protection and inner safety zones of airports, which are defined by flight patterns and the type and size of airports, or they may span between two to three miles outward from an airport. Housing development projects of five or more dwelling units located within runaway approach and transitional zones of an airport, or housing development projects of 40 dwelling units or more located elsewhere within the Airport Influence Area, are major land use actions that may be subject to ALUC review, whether or not they are consistent with the General Plan, if concerns of compatibility with an airport may be apparent. Requirements for ALUC review may increase case processing time. In addition, noise and safety issues involved with airport operations, including landings and take-offs, serve as constraints where housing may be placed in proximity to an airport.

MARKET CONSTRAINTS

Various market-driven factors contribute to the cost of housing. The most evident are the costs associated with construction, land, and financing.

Land Costs

High land costs appear to be one of the major contributing factors to housing prices and rents in unincorporated Los Angeles County. Developable portions of unincorporated Los Angeles County are substantially built out, with little vacant land available for development of any kind. The shortage of developable land further drives up the demand and cost of housing construction.

Much of the hillsides and nearly all the valley areas south of the San Gabriel Mountains are densely populated and have been converted into urban and suburban uses. Nearly all of the vacant land remaining in unincorporated Los Angeles County is mountainous and within physically hazardous areas, naturally constrained areas, and/or lacking in basic sewer/water infrastructure. In terms of providing affordable housing, the high cost of development in these types of terrain and under such

conditions renders affordable housing infeasible within the majority of the vacant land in unincorporated Los Angeles County. This constraint is evident in land costs, which are as low as \$5 per square foot in the largely rural Antelope Valley, to as high as \$115 per square foot in urban Coastal South Los Angeles.—¹⁴ To address this problem, the County increased residential densities on existing, flatter urban land near transit stations through the General Plan. The General Plan offers opportunities for affordable housing development, with greater access to transit and jobs. Furthermore, as part of the Sixth Revision of Housing Element, the County is proposing to rezone additional land to accommodate higher-density residential development. Nonetheless, the high cost of land in unincorporated Los Angeles County makes developing affordable housing costly. The Inclusionary Housing Ordinance would help mitigate the constraint of high land cost for affordable housing development as it requires on-site construction of the affordable units except under limited conditions.

Construction Costs and Financing

The cost of construction materials (such as timber, steel, and fuel) represents another important market constraint. However, such costs often fluctuate according to national policies and global economic conditions. For instance, the COVID-19 pandemic has caused shortages of construction materials. Construction costs are rising due to lumber and steel price inflation. Shortening duration of project could lower construction costs. In addition, the length of time between receiving planning entitlements for a housing development and submittal of an application for building permits may potentially hinder housing construction. A review of rental multifamily projects built in the past three years shows that approximately 44 percent of projects submitted an application for building plan check process during planning entitlements. By allowing developers to start the building plan check process during planning review, the overall project duration is shortened, which in turn, helps accelerate housing production. Also, of the projects that submitted an application for building permits after receiving planning entitlements, 44 percent submitted an application for building permits within three months of planning entitlements, and 50 percent submitted an application for building permits between four and six months after receiving planning entitlements.

Construction costs do not usually result in favoring development in one geographic area over another. However, other factors contribute to variation in the cost of construction. In unincorporated Los Angeles County, construction costs for multifamily projects range from \$120 per square foot in the rural Antelope Valley to \$155 per square foot in urban Coastal South Los Angeles. In urban areas where land is less available and more expensive, higher-density projects often construct subterranean or podium parking at up to \$25,500 per space, compared to surface parking (\$5,000 per space). The County's Density Bonus Ordinance provides parking reductions for projects that include affordable housing set-asides. The Residential Parking Analysis and Code Update Program will examine the feasibility of alternate parking regulations, such as unbundling parking from housing and parking maximums, to reduce housing construction costs.

_

Accessing debt is a challenge to affordable housing developments due to the difficulty in layering various funding sources. Low Income Housing Tax Credits (LIHTC) has become a critical source of capital for affordable housing developments; however, it is competitive. Also, a competitive funding application usually scores higher if site control is secured, and yet many nonprofit developers lack the financial capacity to compete for available land in the open market.

To obtain debt capital from conventional lenders, affordable housing developers are usually required to obtain supplemental funds from grants or secondary financing. The County utilizes a variety of funding sources to provide supplemental financing for affordable housing development, including the Home Investment Partnership Program (HOME), Community Development Block Grant (CDBG), and Affordable Housing and Sustainable Communities (AHSC) grant. In 2016, the County has committed \$100 million a year in local funds for affordable housing.

Mortgage Financing

The Home Mortgage Disclosure Act (HMDA) requires the disclosure of mortgage lending activities by financial institutions. According to the HMDA data compiled by the Federal Financial Institutions Examination Council (FFIEC), close to 350,000 households applied for mortgage financing in Los Angeles County in 2019 (**Table III-34**).

In 2019, the majority of the applicants for mortgage financing were above moderate income households. The approval rates among very low and low income households were significantly lower than the rates for other income groups.

Table III-34: Disposition of Mortgage Applications by Applicant Income

Income Level	TOTAL	% Total	*Originated	% Approved but not Accepted	% Denied	**Other
Very Low (50% AMI)	20,842	6%	40%	3%	33%	24%
Low (80% AMI)	26,363	8%	45%	3%	32%	21%
Median (100% AMI)	12,688	4%	50%	3%	26%	21%
Moderate (120% AMI)	45,639	13%	57%	3%	20%	20%
Above Moderate (>120% AMI)	242,486	70%	63%	3%	14%	19%
TOTAL	348,018	100%	59%	3%	18%	20%

Notes:

Site Constraints and Market Preferences

In addition to the costs associated with construction, land, and financing, other factors, such as site constraints and market preferences, may affect the scope of a project. For instance, applicants may propose to develop housing at a lower density due to topographic features or other site conditions. In other cases, applicants may choose to develop a site at densities below the maximum allowable due to market-driven preferences. The following are examples of site constraints and market preferences:

^{*} Originated applications are those approved by the lenders and brought by the applicants.

^{** &}quot;Other" includes applications that were withdrawn by the applicants and those closed by the lenders due to incomplete information. Source: HMDA data for 2019, FFIEC. (HMDA data for 2020 will not be available until fall of 2021.)

- Oak Trees: Oak trees are protected by the Oak Tree Ordinance, which requires a discretionary permit for the encroachment, removal, or relocation of more than one oak tree. To avoid the additional cost and time and the uncertainty due to the discretionary review process, an applicant may design a project to ensure that new structures, grading, underground utilities, footings for new fences and landscaping are at least 15 feet from the trunk and five feet from the canopy/dripline of any oak tree onsite or on a neighboring property. This may limit the buildable area of the site, which in turn, reduces the number of units in the project.
- Hillside Management Areas and Significant Ecological Areas: If a site is partially located within a Hillside Management Area (HMA) or a Significant Ecological Area (SEA), an applicant may design a project to minimize grading and disturbance of biological resources in the HMA or SEA, as excessive grading and disturbance are subject to a Conditional Use Permit. Reducing the overall footprint of the project could also reduce the number of units in the project.
- Narrow Lots and Irregular Lot Shape: Larger and flatter areas of a site are often reserved to
 accommodate required driveway, fire lane, and turn around radius. On narrow lots with less
 street frontages, this could be a site planning challenge and result in less units in a
 development. Similarly, irregular lot shape may also significantly impact the placement of
 buildings, vehicular access, and parking, and lower the number of units in the development.
- Septic Setbacks and Percolation: A site may have challenging topography and insufficient distances to meet drainage and percolation requirements for onsite wastewater treatment systems.
- Public Easements and Dedications: A site may have existing flood control district basins, utility easements, road and alley dedications, and restricted use areas, which limit the overall buildable area.
- Parking and Amenities Preferences: Applicants may purposefully elect to build at lower densities to provide more onsite parking than required to meet market demands. Some applicants may choose to provide open space, recreational opportunities, and onsite amenities to meet the needs of future residents in lieu of providing more residential units.
- Costs and Construction Types: Budgetary constraints may dictate the construction type and limit the number of stories or materials utilized, which may also limit the number of units provided onsite.

As an effort to address site constraints and ensure certainty in the planning process, the Department conducts one-stop pre-application meetings with representatives from other County Departments including Fire, Public Health, and Public Works. During consultation, County staff provides guidance on site layout and configuration given the topographic features and other site conditions, so that

RESOURCES

Regional Housing Needs Allocation (RHNA)

State law requires that all local jurisdictions accommodate a share of the region's projected housing needs, or the Regional Housing Needs Allocation (RHNA), for the planning period. Compliance with this requirement is measured by the local jurisdiction's ability to provide adequate land to accommodate the RHNA. State law mandates that local jurisdictions provide sufficient land to accommodate a variety of housing opportunities for all economic segments of the community.

The Southern California Association of Governments (SCAG), as the regional planning agency, is responsible for allocating the RHNA to each local jurisdiction within its six-county region. For the Sixth Revision of the Housing Element, the County has been allocated a RHNA of 90,052 units for unincorporated Los Angeles County, which is broken down as follows:

- Extremely Low/Very Low Income (up to 50 percent of Area Median Income [AMI]): 25,648 units (28.5 percent)
- Low Income (up to 80 percent of AMI): 13,691 units (15.2 percent)
- Moderate Income (up to 120 percent of AMI): 14,180 units (15.7 percent)
- Above Moderate Income (more than 120 percent of AMI): 36,533 units (40.6 percent)

Given its magnitude, the County must pursue multiple strategies to accommodate the RHNA (see **Table III-35**).

Table III-35: Summary of RHNA Strategies

	Extremely Low/Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
RHNA	25,648 ¹	13,691	14,180	36,533	90,052
Projected ADUs	0	0	2,527	1,073	3,600
Select Entitled Projects	111	551	26	4,010	4,698
Specific Plans	156	185	553	5,087	5,981
County-Owned Sites in Cities	3,878	3,613	642	157	8,290
Sites Inventory ²	5,110	4,985	1,413	201	11,709
Shortfall without Rezoning	-16,393	-4,357	-9,019	-26,005	-55,774
Rezoning	16,526	4,480	9,250	26,092	56,348
Surplus after Rezoning	133	123	231	87	574
Pending Projects ³	234	199	2,528	8,966	11,927

Notes:

- 1. The County has a RHNA of 25,648 very low-income units. Pursuant to State law (AB 2634), 50% of the very low-income units are assumed to be extremely low income. Therefore, the County's RHNA of 25,648 very low-income units may be divided into 12,824 extremely low-income units and 12,824 very low-income units. However, for the purposes of identifying adequate sites for the RHNA, the State law does not mandate the separate accounting of units for extremely low-income households.
- 2. For sites that are identified in the Sites Inventory to meet the low income and very low income RHNA, it is assumed that 50% of the net development potential of a site counts toward the low income RHNA, and 50% of the net development potential counts toward the very low income RHNA. In the event that the total net development potential of a site yields an odd number, it is assumed that there is one more very low income unit.
- 3. Pending projects are development proposals that are under review by the Department of Regional Planning for entitlements. Units proposed in these projects are included for reference purposes only and do not count toward the RHNA.

Figure III-26 is a map of the County's RHNA capacity under the strategies listed in **Table III-35** (other than projected ADUs).

Figure III-26: RHNA Capacity

Accessory Dwelling Units (ADUs)

State laws passed since 2017 have substantially relaxed the development standards and procedures for the construction of Accessory Dwelling Units (ADUs). As a result, the County has seen significant increases in ADUs in unincorporated Los Angeles County.

- 2019: 932 ADUs approved/592 permitted
- 2020: 1,102 ADUs approved/395 permitted
- 2021 (as of September 15): 798 ADUs approved/400 permitted

The County assumes an average of 450 ADUs permitted annually for the duration of the 2021-2029 Housing Element planning period, for a total of 3,600 ADUs. According to the SCAG Regional Accessory Dwelling Unit Affordability Analysis, 70.2 percent of all ADUs in unincorporated Los Angeles County can be considered affordable to very low, low, and moderate income households (**Table III-35**). As a strategy to accommodate the RHNA, the County applies the 70.2 percent (2,527 ADUs) toward the moderate income RHNA, with the remaining 1,073 ADUs applied to the above moderate income RHNA.

One example of how the County has promoted ADUs is as a strategy to combat homelessness. Initiated in October 2017, the County of Los Angeles ADU Pilot Program introduced the County to a new, non-traditional partner in its efforts to combat homelessness: the homeowner. The County of Los Angeles ADU Pilot Program is noteworthy as one of the first (alongside Multnomah County, OR) and few municipal programs in the country to use ADUs as a strategy to combat homelessness. In combination with other subsidy and incentive programs, such as Section 8 and the County's Homeless Incentive Program for landlords, ADUs can provide permanent affordable housing for people experiencing homelessness.

The scope of the ADU Pilot Program includes streamlining the permitting process for ADUs, providing technical assistance to homeowners, providing incentives for developing ADUs in exchange for leasing the ADU to families/individuals experiencing homelessness, and promoting the development of ADUs as an important source of rental and naturally occurring affordable housing in unincorporated Los Angeles County. It is a collaboration between the Chief Executive Office Homeless Initiative, Arts and Culture, Public Works, Regional Planning, and the Los Angeles County Development Authority, and consists of the following components:

- ADU Ordinance and coordinated implementation between County partners;
- Part of the Solution: YES to ADU design competition and exhibition; and
- Financial incentives and technical assistance to five homeowners to develop ADUs for tenants with homeless vouchers.

The County supported a total of five homeowners with forgivable loans and technical assistance to construct a new or convert an existing ADU. The final ADU in the pilot program is scheduled for completion in March 2022.

More recently, in February 2020, the County set aside \$1,500,000 to continue to support the development of ADUs. LACDA worked with Public Works to identify approximate ADU permitting costs, explored project scope and contracting options, and produced first drafts of Homeowner Affordability Agreements including a Deed of Trust, Loan Agreement, and Promissory Note (Homeowner Affordability Agreements) between participating homeowners and the LACDA. In addition, in May 2021, the Board of Supervisors initiated a program for standardized plans for ADUs and fee waivers for low income homeowners.

Building off of these efforts, the County will continue to explore incentives, and technical and financial assistance throughout the planning period to facilitate the production of ADUs.

Select Entitled Projects

The RHNA planning period begins on July 1, 2021 (different from the Housing Element planning period, which begins on October 15, 2021). All housing units permitted on or after July 1, 2021 can be credited toward the sixth cycle RHNA. These are entitled, but not permitted projects (i.e., no building permits have been issued). **Table III-36** lists residential developments that have been entitled for eight or more units, including both subdivision and non-subdivision projects, as of July 1, 2021. Units that are listed as affordable to extremely low/very low, low, and moderate income households are income-restricted, subject to affordability covenants. LACDA is responsible for the monitoring of long-term rental affordability covenants and equity sharing for for-sale affordable units.

All subdivision projects listed in **Table III-36** have received the approval of a vesting tentative map, as defined in Section 66424.5 of the Subdivision Map Act. A vesting tentative map is a significant milestone, with much of the uncertainty regarding the project removed, as the vesting tentative map is the last discretionary approval required, and the number of units, lot sizes and lot dimensions, and other required improvements have been determined.

Submitting a tentative map is costly. The applicant must hire consultants, such as a licensed land surveyor or registered civil engineer, to prepare a tentative map and to create a salable project. It is typical for a subdivision project to take at least 1.5 years from application submittal to receive a tentative map approval. Some larger subdivision projects could take over 10 years to get to this milestone. Once the tentative map is approved, the applicant is required to record a final map within two years, unless a time extension is approved. Given the resources invested to get to this significant milestone in the development process, applicants are committed to working toward the recordation of the final map or actively requesting a time extension before the tentative map expires. A tentative map approval is therefore a legitimate indicator of the likelihood of the units being built in the RHNA planning period.

Specific Plans

A specific plan is a tool to systematically implement the General Plan within an identified project area. Specific plans are used to ensure that multiple property owners and developers adhere to a common plan or coordinate multiple phases of a long-term development. The RHNA planning period begins on July 1, 2021 (slightly different from the Housing Element planning period, which begins on October 15, 2021). All housing units permitted on or after July 1, 2021 can be credited toward the sixth cycle RHNA. The affordability of these units is based on Development Agreements, affordability covenants, product types, and market prices. The following describes the capacity for specific plan areas, which are part of the Sites Inventory. **Table III-37** lists the anticipated number of units to be built within the 2021-2029 planning period.

Newhall Ranch Specific Plan

The Newhall Ranch Specific Plan was adopted in 2003 and encompasses 11,963 acres in the unincorporated Santa Clarita Valley. The Specific Plan provides for numerous integrated mixed-use villages that will provide 21,308 residential units, mixed-use development including residential units, commercial and industrial uses, numerous parks, trails and open space including over 5,000 acres of permanent open space, a new library, sites set aside for schools and several fire stations. Build out is expected to occur over 25 years, and began in earnest in 2017. The total value of the public improvements, as estimated in 2019, was \$1.2 billion.

The Newhall Ranch Specific Plan includes numerous policy goals and objectives that align with, and are consistent with, the General Plan. These goals and objectives include: 1) establish land uses and development regulations that permit a wide range of housing densities, types, styles, selling prices, and tenancy (for sale and rental); 2) arrange land uses to reduce vehicle miles traveled and energy consumption; 3) design villages in which a variety of higher intensity residential and nonresidential land uses are located in proximity to each other and to major road corridors and transit stops; 4) design a mobility system that includes alternatives to automobile use.

A variety of housing types is planned, including Estate Residential, Low Density, Medium Density, Low-Medium Density, High Density, and Mixed Use. Lot sizes will vary depending on the housing type. As an example, within the low-medium density housing type, typical lot sizes will range from

4,500 sq. ft. to 5,500 sq. ft. The Newhall Ranch Specific Plan includes an Affordable Housing Program, which required approximately 10% of all units to be set aside for affordable housing units. In 2010, the Newhall Ranch Affordable Housing Implementation Plan was developed, consistent with the Specific Plan. The current estimated affordable housing mix includes a total of 2,200 affordable units, broken out into the following income categories:

- 1,210 units for households with incomes at or below 120% AMI
- 220 units for households with incomes at or below 80% AMI
- 330 units for households with incomes at or below 65% AMI
- 440 units for households with incomes at or below 50% AMI. A minimum of 44 of these units will be reserved for seniors 55 years of age or older.

The Affordable Housing Implementation Plan also requires the delivery of affordable units concurrent with the delivery of market rate residential units. These units will be provided in a variety of residential units (for-sale and rental) and will be disbursed throughout the Specific Plan area. The affordable units will be similar in size, have the same number of bedrooms as the market-rate units, and will be constructed at a rate that is consistent with the overall development of the Specific Plan.

Within the Newhall Ranch Specific Plan area, two neighborhoods have been approved or are under construction:

<u>Landmark Village</u> (TR53108) is an approved 291-acre project within the "Riverwood" village of the Specific Plan. It is planned for 1,444 residential units, of which approximately 301 will be affordable. This project also comprised of 1,033,000 square feet of mixed-use – commercial/retail/residential uses, 45 acres of open space, including a 16-acre community park, trail system, and an elementary school. This development is satisfying its Quimby obligation by providing a 9.87-acre public community park and 9.06 acres of private parks.

Mission Village (TR061105) is another approved 1,252-acre project within "The Mesas" village of the Specific Plan. It is comprised of 4,055 residential units, of which approximately 373 units (including 73 ADUs) will be affordable. This project is also comprised of 224,100 square feet of commercial/mixed-uses, 1,331,000 square feet of office uses, a school, fire station, public library, open space, public and private recreational facilities, trails and road improvements. Off-site improvements include the Commerce Drive Bridge, Magic Mountain Parkway, and Westridge Parkway extensions. This development is satisfying its Quimby obligation by providing 25 acres of public parkland (a 20 acre community park and a 5 acre neighborhood park), 14.4 acres of private parkland, trails, and a 21.3 acre river corridor.

Within Mission Village, there are eight separate phases. Final Tract Maps have been recorded for three phases (phase 1A, 1B and 2A); a fourth Tract Map (phase 3B) is expected to record by the end of 2021. The remaining four Final Tract Maps are expected to record in six month increments through July 2024. With the recordation of the Final Tract Maps, Mission Village is fully under construction, and absent the issuance of future building permits, no further action or approvals by the County are required.

In 2021, the County issued building permits for 338 units, which are applied toward the RHNA for the 2014-2021 planning period. The County expects to issue the following permits over the next five years:

Milestone	Permits (Projected)
By July 2022	1,000
By July 2023	1,000
By July 2024	1,000
By July 2025	500
By July 2026	217

Marina del Rey Specific Plan

Marina del Rey is located in the Coastal Zone and is required to incorporate affordable housing, where feasible, per the State Mello Act and the County Marina del Rey Affordable Housing Policy. Unincorporated Marina del Rey is County-owned and operated by the Department of Beaches and Harbors, and property is offered through long-term leases. The Marina del Rey Specific Plan was recertified as part of the County Local Coastal Program (LCP) by the California Coastal Commission on February 8, 2012.

There are a total of 6,769 rental units in Marina del Rey, of which 456 units are affordable (196 are in the pipeline and 260 are existing):

- Admiralty Apartments: 204 units/15 VLI units
- AMLI Residential: 585 units/47 VLI units
- Avalon Marina Bay Apartments: 205 units
- Breakwater Apartments: 224 units
- Capri Apartments: 99 units/10 LI units
- Dolphin Apartments: 332 units
- Espirit Marina del Rey Apartments: 437 units/35 VLI units
- Marina 41 Apartments: 623 units
- Marina City Club Apartments: 101 units

- Marina Harbor Apartment Homes: 966 units/18 Ll units
- Mariner's Village: 981 units/196 ELI units (added with renovation/lease extension)
- Neptune Marina Apartments: 526 units/19 VLI units, 32, LI units, 30 MI
- Oakwood Garden Apartments: 597 units
- The Shores Marina del Rey: 544 units/17 VLI units, 37 MI units
- Villa del Mar: 196 units
- Waves Marina del Rey Apartments: 149 units

For the 2021-2029 Housing Element planning period, the remaining capacity of the Specific Plan is 706 units (of which 106 units are affordable), 114 senior accommodation units, and 15 congregate care units. Per the Marina del Rey Affordable Housing Policy, 5 percent of the units are set aside for very low income households, 5 percent for low income households, and 5 percent for moderate income households. As a strategy to accommodate the RHNA, the 114 senior accommodation units are identified as moderate income. Due to housing type, the 15 congregate care units are not counted toward the RHNA.

The 706 unit potential is located in Development Zones (I, II, III) in the Land Use Plan, which is a component of the LCP, as follows: 355 units remaining in DZ # I, 96 units remaining in DZ #2, and 255 units in DZ #3. The 114 senior accommodation units are located on Lot 147.

The most recent project, Neptune Marina, was completed in 2020. While there are currently no open applications for residential development projections in Marina del Rey, there are projects in the preplanning stages for several locations throughout the Specific Plan area.

For more information on Marina del Rey, please refer to Program 1: Marina del Rey Affordable Housing Policy and the Constraints to Housing in the Coastal Zones section.

Table III-37: Specific Plan Capacity for 2021-2029 Housing Element Planning Period

	Extremely Low/Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total

Total	156	185	553	5,087	5,981

County-Owned Sites in Cities

While the County has land use jurisdiction in unincorporated Los Angeles County, it also owns land in cities within Los Angeles County (see **Table III-38**). Through interjurisdictional partnerships, the County has used these sites to increase opportunities for interim and permanent housing. As a strategy to accommodate the RHNA, the County includes the capacity or planned development on County-owned sites in cities, where the County is the authority to approve planning entitlements and issue building permits pursuant to the County's sovereign immunity, as established by California Government Code §53090 and 53091. Zoning and land use regulations for cities do not apply to these sites.

Capacity and Planned Development

Sites listed in **Table III-38** are at various stages of the development planning process. On some of the sites, the County is conducting feasibility studies and other analyses to evaluate development options. On others, projects are further along in the planning process, with an Exclusive Negotiating Agreement executed between the County and the developer or with a planning entitlement approved. For sites that are at the earliest stage of the planning process undergoing preliminary studies and other evaluations, the capacity is estimated based on various factors, such as:

- The maximum allowable density (150 du/ac) pursuant to the County's MU land use designation where highest density multifamily residences are allowed (for reference only);
- Topographic features, lot dimensions, and other site conditions;
- Any existing or future easements, such as fire lane and turn-around radius that may limit the buildable area; and
- Existing residential developments on other County-owned sites of similar size and dimensions.

On these sites, it is assumed that 50 percent of the net development potential of a site counts toward the low income RHNA, and 50 percent of the net development potential counts toward the extremely low/very low income RHNA.

Units that are listed as affordable to extremely low/very low, low, and moderate income households are income-restricted, subject to affordability covenants. LACDA is responsible for the monitoring of long-term rental affordability covenants and equity sharing for for-sale affordable units.

Assumptions in Sites Inventory and Rezoning Program

In the Sites Inventory and the Rezoning Program, certain assumptions were used to determine the development potential on a site. For a more detailed description of the County's methodology and assumptions, refer to Appendix G.

Density Bonus in Inclusionary Housing Ordinance Rental Submarket Areas

In the Sites Inventory and the Rezoning Program, a 27.5 percent density bonus was applied on 85 percent of the sites that are within one of the three Inclusionary Housing Ordinance rental submarket areas (Coastal South Los Angeles, San Gabriel Valley, and Santa Clarita Valley).

Pursuant to the Density Bonus Ordinance, a project must have a minimum of five baseline (pre-bonus) units in order to be eligible for a density bonus. In the Sites Inventory, sites selected for the lower income RHNA are at least 0.5 acres in size with a default density of 30 du/ac or more. These sites yield at least 15 units per site. In the Rezoning Program, sites selected for the lower income RHNA must yield at least 16 additional units per site. Therefore, sites selected to accommodate the lower income RHNA in the Sites Inventory and the Rezoning Program would meet the minimum baseline (pre-bonus) unit threshold and be eligible for a density bonus if an affordable housing set-aside is provided pursuant to the Density Bonus Ordinance. A density bonus was only applied on sites in the three submarket areas where inclusionary housing is mandatory in rental developments, since the likelihood of developers taking advantage of the density bonus is much higher in those submarket areas.

As shown in **Table III-31**, there are three inclusionary housing set-aside options for rental developments in the three submarket areas. Applicants may request the following density bonus under each inclusionary housing set-aside option pursuant to the Density Bonus Ordinance:

- Under Option 1, a five percent set-aside at 30% AMI and a five percent set-aside at 50% AMI yield a 32.5 percent density bonus.
- Under Option 2, a 7.5 percent set-aside at 50% AMI and a 7.5 percent set-aside at 80% AMI yield a 27.5 percent density bonus.

Under Option 3, a 20 percent set-aside at 80% AMI yields a 35 percent density bonus.

A density bonus of 27.5 percent is the minimum that a rental development that is subject to the Inclusionary Housing Ordinance could request out of the three options. Moreover, as of December 10, 2020, when the County's Inclusionary Housing Ordinance became effective, 85 percent of the rental housing projects that are subject to the Inclusionary Housing Ordinance and eligible for a density bonus requested to be reviewed under the Density Bonus Ordinance. Therefore, a 27.5 percent density bonus was applied on 85 percent of the sites that are in the three rental submarket areas when determining development potential.

Because the Inclusionary Housing Ordinance aligns with and facilitates the use of the Density Bonus Ordinance, which offers bonuses and other benefits that are above and beyond the requirements of the State Density Bonus Law, the Density Bonus Ordinance will continue to be an effective tool to help offset the cost of development for affordable housing, especially for for-profit private developers who are required to provide affordable units without any public funding. The number of eligible projects requesting a density bonus is expected to increase as the County continues to implement the Inclusionary Housing Ordinance.

Realistic Capacity in Sites Inventory and Rezoning Program

Unless otherwise specified, an 80 percent factor was applied to account for realistic capacity on each site in the Sites Inventory and the Rezoning Program. A review of projects built in the past three years indicates that on average, multifamily residential developments in unincorporated Los Angeles County achieve approximately 80 percent of the maximum allowable density. **Table III-39** is a comparison between the number of units in selected multifamily developments built in the past three years and the maximum number of units allowed pursuant to the applicable land use and zoning regulations at the time of entitlement approval.

Table III-39: Selected Built Multifamily Residential Developments and Maximum Allowable Units

APN	Community	Project Description	Number of Units Built	Maximum Allowable Units	Development Capacity
5807019033	La Crescenta- Montrose	Triplex	3	5	60.00%
7344007042- 7344007081	West Carson	Mixed income condos with 1 unit at 120% AMI and 3 units at 160% AMI	40	77	51.95%
5804003015	La Crescenta- Montrose	Apartment	6	6	100.00%
5807006058	La Crescenta- Montrose	Apartment	5	6	83.33%
5379035009	East Pasadena-East San Gabriel	Apartment	8	8	100.00%
5807004016	La Crescenta- Montrose	Apartment	9	9	100.00%
5807016082-	La Crescenta-	Condos	16	17	94.12%

Table III-39: Selected Built Multifamily Residential Developments and Maximum Allowable Units

APN	Community	Project Description	Number of Units Built	Maximum Allowable Units	Development Capacity
5807016097	Montrose				
5807004014	La Crescenta- Montrose	Apartment	8	9	88.89%
8215022057- 8215022071, 8215022073- 8215022078	Hacienda Heights	Condos	21	3 1¹	67.74%1
8465002029	La Puente	HOME-funded mixed income senior affordable apartment	54	107	50.47%
6021016046- 6021016047	Florence- Firestone	Apartment	9	9	100%
8571001015- 8571001029	South Monrovia Island	Condos	15	24	62.50%
6060011034	West Athens- Westmont	100% low-income senior affordable apartment	74	21 ²	352.38% ²
6021015018	Florence- Firestone	100% mixed income (very low and low income) affordable apartment with 22 units for special needs	44	33 ³	133.33%³
6149014048	Willowbrook	100% very-low income apartment	61	87	70.11%
6342023017	East Los Angeles	Apartment	4	4	100%

Project included a Plan Amendment request to change the allowable density from 9 du/ac (H9) to 18 du/ac (H18). Only 12 units were allowed under the old H9 land use designation.
 Project requested a density bonus to increase the maximum allowable density from 17 du/ac to 58 du/ac.
 Project requested a 35% density bonus.

Likelihood of Residential Development on Sites Designated Commercial or Mixed Use

The Sites Inventory and the Rezoning Program include sites that are designated or proposed to be designated commercial or mixed use. Per zoning and per the By-Right Housing Ordinance, multifamily housing is allowed through a ministerial review process on these non-residentially designated sites. Residential development standards for these sites are also comparable to standards in the residential zones. Moreover, the commercial real estate market is in the midst of a steep downturn, and this nationwide trend has been intensified by the COVID-19 crisis, as many workers are working remotely and not going to their offices, consumers are making purchases online and not in stores, not eating at restaurants, and not staying in hotels because they are not traveling. As the pandemic has led to high vacancy rates in many commercial buildings, these underutilized sites and buildings are likely to be redeveloped and repurposed into housing. If there are mixed use projects, per zoning, at least two-thirds of the square footage of a mixed use project must be designated for residential use. As the County continues to work on programs such as the Adaptive Reuse Ordinance (Program 25) to facilitate the conversion of underutilized commercial spaces and buildings into housing, the likelihood of residential development on these sites will become even higher in the near future.

Reliance on Nonvacant Sites to Accommodate the Lower Income RHNA

Pursuant to Government Code section 65583.2(g)(2), if a jurisdiction relies on nonvacant sites to accommodate 50 percent or more of its RHNA for lower income households, the existing uses on the nonvacant sites are presumed to impede additional residential development, unless findings based on substantial evidence indicate that the the existing uses will likely be discontinued during the planning period, and the nonvacant sites are suitable for lower-income housing developments. **Table III-40** shows the percentage of the County's lower income RHNA that is on nonvacant sites.

Table III-40: Percentage of Lower Income RHNA Accommodated on Nonvacant Sites

Lower Income RHNA Strategies	Number of Units
Selected Entitled Projects	662
Specific Plans	341
County-Owned Sites in Cities	7,491
Sites Inventory (Vacant Sites)	648
Rezoning (Vacant Sites)	574
Total Capacity (Not Related to Nonvacant Sites)	9,716
Lower Income RHNA	39,339
Lower Income RHNA on Nonvacant Sites ¹	39,339 - 9,716 = 29,623
Percentage of Lower Income RHNA on Nonvacant sites	29,623/39,339 = 75.30%

Note:

Since over 50 percent of the Lower Income RHNA is accommodated on nonvacant sites, additional analyses, as further described below and in Appendix G, were conducted to assess the suitability of the nonvacant sites in the Sites Inventory and the Rezoning Program.

^{1.} This does not include the surplus units for very low/low income housing created by additional rezoning.

Suitability of Nonvacant Sites for Lower-Income Housing Developments

In general, the nonvacant sites identified in the Sites Inventory and the Rezoning Program are currently occupied by the following uses:

- Churches:
- Commercial retail and neighborhood services;
- Offices:
- Restaurants;
- Auto-related uses, such as auto repair, car rental and dealership;
- Residential uses, such as single-family residences or other multi-family residences;
- Surface parking lots; and
- Motels and hotels.

These nonvacant sites are considered underutilized and likely to be redeveloped into multifamily housing due to one or more of the following reasons:

- Existing buildings are aging and/or not in good condition;
- The lot coverage of existing buildings is low (i.e., a large portion of a site is not covered by buildings);
- Sites with existing residential uses are not built at the maximum allowable density;
- Land value is higher than improvement value;
- Site is in proximity to existing multifamily, commercial, and mixed use developments;
- Site is in proximity to transit corridors, services, and amenities;
- Site is in proximity to other recently entitled or built multifamily residential developments; and
- Site has access to existing public water and sewer systems, and dry utilities.

Furthermore, the likelihood of multifamily development on these nonvacant sites will become higher in the near future as the County continues to work on various programs to incentivize infill housing development on underutilized sites. For instance, parking reduction strategies and alternative parking regulations under Program 11: Residential Parking Program Analysis and Code Update could incentivize the conversion of underutilized commercial sites with excessive surface parking into high-density mixed use development as less on-site parking will be required. Program 21: Incentives for Lot Consolidation will also encourage the assemblage of smaller lots, including those that are along

major commercial corridors in older, urbanized areas into larger lots that can be developed more efficiently into high density multifamily residential or mixed-use projects.

The following case studies illustrate the suitability of nonvacant sites for lower-income housing developments.

Nonvacant Sites for Lower-Income Housing Development - Case Studies

Case studies #1-6 feature nonvacant sites from the Sites Inventory, and case studies #7-9 feature nonvacant sites from the Rezoning Program. They meet all of the locational criteria identified in their respective site selection methodology. They are located in urban areas and are geographically representative of unincorporated Los Angeles County's diverse communities. Income restricted projects are generally organized into three size categories – Small (20 units and fewer), Medium (50 units and fewer), and Large (60 units and greater). A review of previously entitled income restricted projects from the last three years indicates that the majority of projects are 60 units or greater, located near major transit stops, with land to improvement values of 2.00 or greater.

Case Study #1 - Church in West Covina, APN: 8743001013

The subject property is a 1,500 sq. ft. church built in the 1980s on a 0.53 acre site, with storage containers and mostly unimproved surface parking lot. The site is zoned commercial, which allows for multifamily uses with a ministerial review and is surrounded by single-family and lower density multifamily uses. The site is an ideal candidate for a "small" income restricted project because it would yield 15 residential units. The site is underutilized, located on a corner lot with adequate connections to sewer, water, and improved public roads. The land value to improvement value ratio is 2.28; therefore, an applicant may be motivated to redevelop the site.

Case Study #2 – Low-Rise Motel in Del Aire, APN: 4140005037

The subject property is a 24 bedroom low-rise motel built in 1964 on a 0.74 acre site with a surface parking lot. The site is zoned Mixed Use, which would yield 74 units and be considered a "large" size income restricted project. The site could potentially qualify for a density bonus depending on the number of affordable units provided onsite. The site is underutilized as the current layout of the motel does not maximize the allowed height, reduced setbacks, or parking reductions granted by the Mixed Use Zone. The site is a corner lot accessible via three frontages ideal for fire truck and emergency personnel access. The site is within 0.5 mile of the Aviation Station Metro C Line (Green) and would qualify for additional parking reductions. Lastly, the land value to improvement value ratio is 2.28; therefore, an applicant may be motivated to redevelop the site.

Case Study #3 – Restaurant in Florence-Firestone, APN: 6009029060

The subject property is a vacant 5,000 sq. ft. restaurant built in 1923 on a 0.58 acre site with a 60-car surface parking lot abutting a Metro Line A (Blue) Station. The site is zoned Mixed Use and would yield 46 units with potential for a large density bonus and reduced parking. The only building is located in the middle of the lot, perpendicular to the main public road without direct connection to pedestrians. Instead, there are two curb cuts for vehicle access, splitting the lot into two underutilized sections. However, the site is ideal for residential development because there are existing sewer and

water services, including a fire hydrant immediately in front of the property. Additionally, the property has 262 linear feet of street frontage, which can accommodate separate access for residential and commercial uses. Lastly, the land value to improvement value ratio is 4.25; therefore, an applicant may be motivated to redevelop the site.

Case Study #4 - Office Building in East Pasadena-East San Gabriel, APN: 5379030049

The subject property consists of a 12,726 sq. ft. multi-tenant office building constructed in 1980 on a 0.61 acre site. The existing use includes a large surface parking lot in the rear covering about half of the parcel. The site is zoned for Commercial, which would yield 21 dwelling units. The existing building is oriented to the main public road (Rosemead Blvd), abutting a mix of commercial and residential uses, including a medical office building, a restaurant, and multifamily and single family residences. South of the site about 250 feet (south of the intersection of Rosemead Blvd and Fairview Ave), there are clusters of existing apartment complexes and condo developments on both sides of Rosemead Blvd. While the site is about 265 feet deep and a fire lane would likely be required, the site has 100 linear feet of street frontage, which is sufficient to accommodate the fire lane without taking up too much of the buildable area for the residential units.

Case Study #5 – Auto Repair in East Los Angeles, APN: 5236006026

The subject property consists of an auto repair shop with a 1,540 sq. ft. building constructed in 1963 on 0.52 acres and surface parking. The current Commercial zone would yield 14 dwelling units. It is adjacent to and surrounded by mostly residential uses, sitting directly across from a new 71-unit supportive housing development and a 42-unit affordable housing mixed-use development that is under construction. The site is less than 200 feet from a major bus route along Whittier Blvd., also making it eligible for parking reductions.

Case Study #6 - Residential Use in East Pasadena-East San Gabriel, APN: 5382003033

The subject property consists of a 5-unit multifamily residential development constructed in 1955 on a 0.64 acre site. The site is developed into five separate buildings, underutilizing the lot's full potential. The site could be redesigned to construct additional units and take advantage of the maximum allowed height of 35 feet. The existing Multifamily zone would yield a total of 14 dwelling units, making it a candidate for a "small" income restricted project. The lot is accessible from the main road (Duarte Road), is already connected to utilities, and is surrounded by existing residential uses. In addition, there is a nearby major bus route within 400 ft. walking distance of the site on Rosemead Blvd, making it eligible for parking reductions.

Case Study #7 – Boat and Recreation Vehicle Storage in Ladera Heights/View Park, APN: 4004001029

The subject property consists of a 600 sq. ft. office and retail building built in 1941 on a 6,500 sq. ft. lot. The majority of the lot is outside storage for boats and recreational vehicles and is inconsistent with the commercial uses along Slauson Boulevard. The proposed rezoning from Commercial to Mixed Use could potentially yield 25 residential units for lower income households. The site is a corner lot accessible from a rear alley or directly from West Slauson Boulevard. The current storage use may be more adequate in a suburban or even rural setting. The Mixed Use Zone would encourage a mix of neighborhood serving commercial uses and residences at this site.

Case Study #8 – Banquet Hall in West Athens, APN: 6056004028

The subject property is a two story 8,400 sq. ft. vacant banquet hall built in 1931. The structure is in significant disrepair and was originally used as a light manufacturing textiles sewing warehouse. The use is no longer in operation and is inconsistent with the current residential and commercial uses along Vermont Avenue. The proposed rezoning from Commercial to Mixed Use would yield an estimated 23 residential units for lower income households and would qualify for reduced parking. The site is accessible via an existing rear alley and directly from Vermont Avenue. Vermont Avenue is over 200 feet wide and runs the Metro Rapid Bus (Line 754), which is the second busiest transit line in the Los Angeles basin. The line connects to the Metro Light Rail Line (C), and the proposed zoning would encourage a mix of land uses that can better meet market demands near transit.

Case Study #9 – Parking Lot in East Los Angeles, APN: 6341040001

The subject property is a two story private parking lot on a 10,000 sq. ft. lot. The site is on the same intersection as the proposed Atlantic Boulevard and Whittier Boulevard Metro Station (Eastside Transit Corridor Extension). The proposed rezoning from Commercial to Mixed Use would yield an estimated 30 units for lower income households and qualify for a parking reduction, given the proximity to a major transit stop. The site is accessible via two streets and if developed, would support continuity of commercial and residential uses along Whittier Boulevard, which is a major thoroughfare. In its current location, the parking lot does not enhance the pedestrian experience, or encourage a mix of uses near public transit. However, other larger parking lots are located approximately one block north from pedestrian-oriented and commercial uses. Those lots may still serve transit riders who wish to park and take transit or shop along Whittier Boulevard.

Table III-41 includes 24 recently entitled or constructed housing developments between 2015 and 2021 that are comparable and representative of the case studies. The average distance from a case study site to a recently entitled or constructed development is 1.1 miles, with the maximum being less than 3 miles. Most of these entitled or constructed developments are located in the same submarket area identified in the Inclusionary Housing Ordinance as the comparable case study sites, depicting the feasibility for redevelopment under similar market conditions. An exception to this is Case Study #7; however, all three comparable housing developments are located less than a mile from the case study site. As such, the case study site and the three entitled or constructed developments share similar market conditions due to their proximity.

The previous uses on the recently entitled or constructed project sites generally align with the existing uses on the case study sites, ranging from low-density residential to commercial and industrial uses including retail, restaurant, surface parking, motel, auto sales, auto body/repair, and warehouse uses. This supports the assumption that a wide range of existing uses and buildings may be altered, repurposed or demolished for housing redevelopment given the right market conditions and development opportunity. As the County continues to remove constraints and create incentives through various programs – such as increasing the allowable density through area planning (Programs 7, 8, 18, 19 and 20) and removing regulatory barriers to the conversion of underutilized commercial properties (Program 25) and to innovative building methods (Program 30), developers

will be incentivized to address housing demands and propose new housing on sites that might otherwise seem less desirable based on land value and other considerations.

Most of the recently entitled or constructed project sites are less than 1 acre in size, with just one site being slightly over one acre and three sites being approximately two acres in size. The average size of the project sites is 0.70 acres. The average number of units entitled and/or constructed is 50 units, ranging from 5 units on a 0.44-acre site to 192 units on a 0.77-acre site. The proposed density ranges from approximately 11 units per acre to 249 units per acre. For sites with previous residential-only uses, the average number of new units entitled or constructed is 23 units, compared to an average of 2.36 units on parcels that previously contained low density residential uses.

Given the wide range of previous uses, proposed densities and proposed/constructed number of units, it is important to note that these recently entitled or constructed projects should not be used to indicate the maximum extent of redevelopment potential, but instead support a snapshot of likely circumstances. Nonetheless, these recently entitled or constructed projects are reflective of the assumptions or factors considered during the site selection process for the Sites Inventory and the Rezoning Program. For example, as shown in **Table III-41**, the land to improvement ratio before the redevelopment ranges from 0.38 to 99, with the majority of the ratios greater than 1.0. This means that in most cases, the land was more valuable than the previously existing buildings or improvements. However, the wide range of the ratios also supports DRP's methodology to not rely solely on the land to improvement ratio to assess the suitability and development potential of a nonvacant site. Instead, it is more appropriate to incorporate the land to improvement ratio as one of factors in both the guiding questions for the parcel-by-parcel assessment for the Sites Inventory (Part I of Appendix G) and the scoring system to prioritize parcels for rezoning (Table G-1). Also, all but two of the recently entitled or constructed project sites were previously developed with either non-residential buildings 20 years or older or residential buildings 50 years or older – the respective ages of building that were used as thresholds in the analysis of sites to be rezoned for the lower income RHNA (Table G-3). The two exceptions include a used car dealership in a 14-year old building and a 29-year old duplex, indicating that the age of building thresholds used in the rezoning site selection are more conservative. Finally, assuming that the proposed number of units is the maximum number of units permitted by each site's land use designation, all recently entitled or constructed project sites with previous residential uses in Table III-41 would meet the number of units increased threshold in the analysis for rezoning for the lower income RHNA (Table G-3). Among these sites, the smallest increase is shown in two projects, with the number of entitled or constructed units being 2.5 times the number of units previously on-site in each case. This is comparable to the threshold used in the rezoning analysis, which is that the maximum number of units permitted by the proposed land use designation in the Rezoning Program for the lower income RHNA must be at least twice the existing number of units.

Table III-41: List of Recently Entitled or Constructed Housing Developments, 2015-2021

Note:

^{1.} While the site of Case Study #7 is located in the Coastal South Los Angeles submarket area, it is at the border of the submarket area boundary and across the street from the South Los Angeles submarket area where the comparable housing developments are located.

Substantial Increase in Allowable Units and FAR on Nonvacant Sites

Developers are more likely to redevelop a nonvacant site if there is a substantial increase in the development capacity of the site compared to the existing use. As shown in Appendix B, approximately 25 percent of all nonvacant sites selected to be rezoned for the lower income RHNA have an existing residential use. Of these sites, the maximum number of units permitted by the proposed land use designation ranges from 2 to 48 times the existing number of units. On average, the maximum number of units permitted by the proposed land use designation is 16 times the existing number of units.

Also, most nonvacant sites with an existing non-residential use that have been selected to be rezoned for the lower income RHNA are proposed to be redesignated from CG (General Commercial) to MU (Mixed Use). Both the maximum allowable density and the maximum allowable FAR (for mixed use development) will triple as the maximum allowable density will increase from 50 units per net acre to 150 units per net acre, and the maximum FAR will increase from 1.0 to 3.0. For the majority of these sites, which are currently developed with one- to two-story commercial buildings, the increase is substantial and will incentivize housing development during the planning period.

Sites Inventory – Lower Income RHNA

The County has a total very low/low income RHNA of 39,339 units. The County is required to identify the availability of residential sites at adequate densities and appropriate development standards in unincorporated Los Angeles County to accommodate the RHNA. Specifically, State law (AB 2348) establishes a default density of 30 units per acre or more as a threshold for facilitating very low/low income housing development. Pursuant to State law (AB 1397), sites smaller than 0.5 acres or larger than 10 acres are presumed to be infeasible for very low/low income housing development, unless there is evidence that the site is adequate to accommodate very low/low income housing, or there is potential for consolidation of smaller lots and other planning tools are available to help develop larger properties. For the purpose of the Sites Inventory, contiguous lots are assumed to have the potential for consolidation if the lots are under same ownership.

In order to identify the vacant and non-vacant (underutilized) sites that allow multifamily and mixed use residential developments by right, various factors were considered.

Vacant and Non-Vacant Sites (0.5 acres - 10 acres)

The County utilized the Assessor's records and other GIS data to identify vacant and non-vacant properties that are zoned for multifamily and mixed-use development at densities of 30 units per acre or more. A parcel-by-parcel review resulted in a list of sites with potential for development during the 2021-2029 Housing Element planning period. The following adjustments were made to the Sites Inventory to account for development trends and realistic potential:

- The following sites were excluded:
 - Sites that are located in the Special Management Area (SMA) Class II or III of the General Plan Hazard, Environmental, and Resource Constraints Model. SMA Class II

and III include various moderate and severe hazard, environmental, and resource constraints on development, including but not limited to:

- FEMA 100-year Flood Zone;
- Significant Ecological Areas;
- Sensitive Environmental Resource Areas;
- Active Fault Trace;
- Seismically Induced Landslide Zone;
- Hillside Management Areas with 50 percent or greater slope; and
- Agricultural Resource Areas;
- Sites in the Coastal Zone;
- Sites in a Moderate, High, or Very High Fire Hazard Severity Zone;
- Sites that are developed with condominiums;
- Sites with pending or recently approved entitlements for a non-residential development; and
- Sites with recently issued building permits.
- Factors such as existing land use, age of existing structures, the value of the land compared to the value of the improvement, and ownership patterns were considered.
- The net development potential was estimated on sites with no pending applications for residential developments:
 - The number of base maximum allowable units was calculated based on the General Plan land use designation.
 - A 27.5 percent density bonus was applied on 85 percent of the lots that are within one of the three Inclusionary Housing Ordinance rental submarket areas (Coastal South Los Angeles, San Gabriel Valley, and Santa Clarita Valley).
 - The number of existing units was then subtracted from the maximum allowable units (including the density bonus units if applicable) on non-vacant sites.
 - An 80 percent factor was applied to account for realistic capacity (see **Table III-39** for more information about this factor).
 - Another surplus/buffer factor was applied to account for No Net Loss (SB 166) and yield the net development potential:

- A 65 percent factor was applied on lots designated CG or MU (or an equivalent land use designation in an Area or Community Plan) where mixed use developments are allowed.
- An 80 percent factor was applied on lots designated H30 or above (or an equivalent land use designation in an Area or Community Plan) where only residential developments are allowed.

Vacant and Non-Vacant Sites (< 0.5 acres)

The County-owned parking lot on Ditman Avenue in East Los Angeles (APN 5232014900) is the only site that is less than 0.5 acres in the Sites Inventory. Please see **Table III-42** for more information on publicly-owned sites included in the Sites Inventory.

Other Publicly-Owned Sites with Pending Projects

Table III-42 shows the publicly-owned sites that are included in the Sites Inventory. The net development potential on these sites is based on the number of units proposed in the pending projects, which are neither entitled nor permitted. For sites that are County-owned, the County has sovereign immunity, as established by California Government Code sections 53090 and 53091. Zoning and land use regulations therefore do not apply to these sites.

Table III-42: Low Income RHNA – Publicly-Owned Sites with Pending Projects

Project	APN(s)	Site Size	Owner	Net Development Potential (Units)	Additional Notes on Sites < 0.5 acres or > 10 acres
Parking lot on Ditman Avenue	5232014900	0.31 acres	County of Los Angeles	50	The net development potential is estimated based on prior County projects on lots of similar size.

Willowbrook Joint Development at former Lincoln Elementary school site and adjacent County-owned parcel	6149012901, 6149014900, 6149014903, 6149014906	12.84 acres	Compton Unified School District and County of Los Angeles	252	An Exclusive Negotiating Agreement (ENA) was executed by and among the Compton Unified School District (CUSD), the Los Angeles County Development Authority (LACDA) and the Developer, who was procured through an RFP issued in November 2019. The Developer has proposed a mixed- use project that includes approximately 585 or more residential units that are a mix of approximately 252 affordable housing units, 70 workforce and market rate housing units, 263 residential student housing dormitory units for the nearby medical school, and up to 110,000 square feet of general commercial space. For the purpose of the ASI, the 252 units are identified as lower income, and the 70 units are identified as above moderate income.
			Total	1,521	

Summary of Sites Inventory

Based on this analysis, the County identified about 712 acres of non-vacant sites and 27 acres of vacant sites that are zoned for residential and mixed use. These sites can accommodate 10,095 units at densities of 30 or more units per acre, suitable for very low and low income housing development. Residential-only developments are permitted by right on sites that are designated for commercial or mixed uses. Also, per zoning, at least two-thirds of the square footage of a mixed use project must be designated for residential use. Appendix A includes a list of sites selected to accommodate the very low/low income RHNA. **Table III-43** summarizes the net development potential and the total acreage of these sites by General Plan land use designation.

Table III-43: Very Low/Low Income RHNA - Sites Inventory by General Plan Land Use Designation

Land Use Designation ¹	Maximum Allowable Density	Acres	Net Development Potential (Units)
Nonvacant			
C (Rowland Heights Community Plan)	50 du/net ac	72.08	1,900

Notes

^{1.} Unless otherwise indicated, land use designations shown in this table are from the Los Angeles County General Plan 2035.

^{2.} While the "P" (Public and Semi-Public) land use category does not specify maximum allowable density, the federally-owned site, known as the West Los Angeles Veterans Affairs (West LA VA) Campus, is subject to neither the County's zoning regulations nor the County's General Plan land use policies. The net development potential is based on the 2016 Draft Master Plan for West LA VA Campus.

^{3.} While, the "RP" (Residential Parking) land use category in the East Los Angeles Community Plan does not specify maximum allowable density, the net development potential is based on a pending proposal (County project) on the County-owned parking lot.

^{4.} The net development potential is based on a pending proposal on a County-owned parking lot rather than the allowable density specified in the First Street (FS) Transect Zone of the East Los Angeles Third Street Specific Plan.

^{5.} Equivalent to 50 du/net ac.

^{6.} The net development potential is based on the allowable density specified in the Third Street (TOD) Transect Zone of the East Los Angeles Third Street Specific Plan.

Prior Housing Elements

The Sites Inventory includes 138 nonvacant sites from the Fifth Revision of the Housing Element and 12 vacant sites from the Fourth Revision and Fifth Revision of the Housing Element that count toward the very low/low income RHNA. These sites meet the requirement pursuant to Government Code section 65583.2 (c), as they permit multifamily residential uses at the beginning of the planning period at a default density (30 units per acre or more) by right per zoning and per the By-Right Housing Ordinance. The statute shall also be met by Program 17: Adequate Sites for RHNA by rezoning these sites to require 20 percent of the units in a housing development to be affordable to lower income households. This will be coordinated with Program 9: Inclusionary Housing Feasibility and Implementation.

For the past two housing element cycles, the County did not make sufficient progress toward meeting its RHNA in terms of building activities. Approximately 10 percent of the County's very low/low income RHNA was constructed during the fifth housing element cycle, and approximately 1.4 percent of the County's very low/low income RHNA was constructed during the fourth housing element cycle. However, in recent years, the County has pursued various strategies to facilitate housing development, particularly affordable housing and multifamily projects. In the past three years, the County adopted seven housing ordinances – Density Bonus Update, Inclusionary Housing, Compact Lot Subdivisions, Accessory Dwelling Unit (Update), By-Right Housing, Interim and Supportive Housing, and Affordable Housing Preservation. Together, these ordinances streamline the entitlement process, incentivize the development of various housing types, and encourage the development and preservation of affordable housing. In this housing element cycle, the County is committed to further remove or mitigate constraints to housing development through various programs, including the Rezoning Program, since adequate sites are not available to fully accommodate the County's lower income RHNA under current land use policy.

Sites Inventory - Moderate Income and Above Moderate Income RHNA

Sites that accommodate the moderate income RHNA are located within the South Los Angeles and Antelope Valley submarket areas that are identified in the County's Inclusionary Housing Ordinance. The analyses in the Inclusionary Housing Feasibility Study indicate that market-rate rental and forsale housing within these submarket areas are generally affordable to moderate income households. ¹⁶ With the exception of one underutilized site less than 0.5 acres located in the South Los Angeles submarket area, all other sites identified for the moderate income RHNA are vacant. The underutilized small site is designated Mixed Use (MU) with the maximum allowable density of 150 du/ac, and has a net development potential of at least 16 units. All other sites accommodating the moderate income RHNA are designated for densities of up to 18 du/ac (H18). All sites are outside of Very High Fire Hazard Severity Zones.

Included in the Sites Inventory are sites that are 0.5 to 10 acres. For vacant sites in the South Los Angeles submarket area, the Sites Inventory assumes the development of one single family home per

H9-designated parcel or the maximum allowable density, with an 80 percent factor, per H18-designated parcel. For vacant sites in the Antelope Valley submarket area, the Sites Inventory assumes the development of one single family home per parcel.

Also included in the Sites Inventory are sites that are 5,000 sq. ft. to 0.5 acres. 5,000 sq. ft. is used as a threshold for site selection since the minimum lot size (i.e., required area) in the zones that permit residential uses is generally 5,000 sq. ft. For vacant sites less than 0.5 acres in the South Los Angeles submarket area, the Sites Inventory assumes the development of one single family home per H9-designated parcel or one duplex per H18-designated parcel. For vacant sites less than 0.5 acre in the Antelope Valley submarket area, the Sites Inventory assumes the development of one single family home per parcel.

In addition, based on the Willowbrook Joint Development project proposal at the former Lincoln Elementary School site and the adjacent County-owned parcel (see Table III-38), there will be 70 workforce and market rate housing units, which, for the purpose of the Sites Inventory, count toward the above moderate income RHNA.

The Sites Inventory includes one site in the unincorporated community of Valinda, which is located in the East Los Angeles/Gateway submarket area to accommodate the above moderate income RHNA. The 2.79-acre site, which was previously used as a church, has recently been acquired by a private developer. The net development potential was calculated based on the H9 (9 du/ac) land use designation. The site is outside of a Very High Fire Hazard Severity Zone.

Lastly, the Sites Inventory includes three underutilized sites less than 0.5 acres located in the San Gabriel Valley submarket area to accommodate the above moderate income RHNA. These underutilized small sites are designated Mixed Use (MU) with the maximum allowable density of 150 du/ac, and have a net development potential of at least 16 units per site. These sites are outside of Very High Fire Hazard Severity Zones.

Appendix A includes a list of sites selected to accommodate the moderate and above moderate-income RHNA. **Table III-44** summarizes the net development potential and the total acreage of these sites by General Plan land use designation.

Table III-44: Moderate and Above Moderate Income RHNA - Sites Inventory by General Plan Land Use Designation

Submarket Area	Site Size	Land Use Designation ¹	Maximum Allowable Density	Acres	Moderate Income Net Development Potential (Units)	Above Moderate Income Net Development Potential (Units)
Antelope Valley	0.5 to 10 acres	H18	18 du/net ac	22.54	9	0

Total				1,202.23	1,413	201

Notes:

Rezoning - Very Low/Low Income RHNA

In selecting the sites for rezoning for the County's very low/low income RHNA, various factors were considered:

- The following sites were excluded:
 - Sites that are in the Sites Inventory;
 - Sites that are designated Mixed Use (MU 50-150 du/net ac) in the General Plan, as MU is the land use designation that allows the highest density in the General Plan Land Use Legend;
 - Sites that are designated Residential 9 (H9 0-9 du/net ac) in the General Plan (or an equivalent land use designation in an Area or Community Plan), or any other land use designations that allow less than 9 du/net ac;
 - Sites in the Santa Clarita Valley or the Antelope Valley;
 - Sites that are located in the Special Management Area (SMA) Class II or III of the General Plan's Hazard, Environmental and Resource Constraints Model. SMA Class II and III include various moderate and severe hazard, natural and resource constraints on development, including but not limited to the following:
 - FEMA 100-year Flood Zone;
 - Significant Ecological Areas;
 - Sensitive Environmental Resource Areas;
 - Active Fault Trace;
 - Seismically Induced Landslide Zone; and
 - Agricultural Resource Areas;

^{1.} Unless otherwise indicated, land use designations shown in this table are from the Los Angeles County General Plan 2035.

^{2.} Based on project proposal at the former Lincoln Elementary School site and adjacent County-owned parcel (Willowbrook Joint Development). See Table III-39 for more information.

- Sites in the Coastal Zone:
- Sites in a Moderate, High, or Very High Fire Hazard Severity Zone;
- Sites that front on a private street;
- Sites in a Hillside Management Area;
- o Sites in the 65 or above dB CNEL noise contour of an Airport Influence Area;
- Sites in an area covered by a specific plan; and
- Sites that are not within a water or a sewer district boundary, or with access to dry utilities.
- A weighting/scoring method was used to prioritize sites for rezoning based on the following factors:
 - Proximity to existing multifamily, commercial, and mixed use developments;
 - Proximity to transit corridors, services, and amenities;
 - Access to existing public water and sewer systems, and dry utilities;
 - Land value-to-improvement value ratio;
 - Development potential if the site is located in a special land use regulatory district (e.g., community standards district) with development standards that are different from the Countywide development standards;
 - Access to resources and opportunities based on the California Tax Credit Allocation Committee Opportunity Area Map;
 - Environmental Justice Screening Method (EJSM) score. The EJSM is an environmental justice mapping application and scoring system developed for Los Angeles County;
 - o Proximity to freeways or railways; and
 - Proximity to a High Quality Transit Area or a transit center.
- The net development potential ¹⁷ was estimated per site (with the assumption that contiguous lots have the potential for consolidation if they are under the same ownership), and only sites with a net development potential of at least 16 units were then selected:

¹⁷ Some sites are assumed to accommodate mixed-income housing development with very low-income units and above moderate-income units. See Part IV of Appendix G for details.

- The number of base maximum allowable units was calculated based on the proposed General Plan land use designation.
- A 27.5 percent density bonus was applied on 85 percent of the lots that are within one of the three Inclusionary Housing Ordinance rental submarket areas (Coastal South Los Angeles, San Gabriel Valley, and Santa Clarita Valley).
- The number of existing units was then subtracted from the maximum allowable units (including density bonus units, if applicable) on nonvacant sites.
- An 80 percent factor to account for realistic capacity was applied to yield the net development potential (see **Table III-39** for more information about this factor).
- Among the nonvacant sites that were prioritized for rezoning based on the composite score and have a net development potential of at least 16 units, only those that meet the following were included:
 - If the existing use is residential:
 - The site is not developed with condominiums or planned unit developments;
 and
 - The existing residential building(s) are at least 50 years old, and the maximum allowable number of units based on the proposed General Plan land use designation is at least twice the existing number of units.
 - If the existing use is non-residential, the existing non-residential building(s) are at least 20 years old.
 - The site has no pending entitlement or entitlement approved in the last three years.
 - The site has no building permit issued for a new or refurbished building in the last three years.
 - Contamination is not known to be present on the site based on various databases such as the Cortese List, Envirostor, Geotracker, and the Resource Conservation and Recovery Act.
 - The site is not developed with uses such as cemeteries, parks, landfills, military uses, hospitals, schools, pumping facilities, water tanks and other utility-related uses, which are highly unlikely to be terminated in the next eight years.

Summary of Rezoning Capacity

The rezoning of sites can potentially create 21,006 units for very low/low income housing. Once rezoned, these sites will meet the requirement pursuant to Government Code section 65583.2 (h), as they will permit 16 additional units per site by right at a minimum density of 20 units per acre. These sites also meet the requirement pursuant to Government Code section 65583.2 (c)(3)(B)(iv), as they

will permit a default density of 30 units per acre or more. The statute shall also be met by Program 17: Adequate Sites for RHNA by rezoning these sites to require 20 percent of the units in a housing development to be affordable to lower income households. This will be coordinated with Program 9: Inclusionary Housing Feasibility and Implementation.

Appendix B includes a list of sites selected to be rezoned to accommodate the very low/low income RHNA. **Table III-45** summarizes the net development potential and the total acreage of these sites by proposed General Plan land use designation.

Table III-45: Very Low/Low Income RHNA - Rezoning Capacity

Existing Land Use Designation ¹	Proposed Land Use Designation ¹	Proposed Maximum Allowable Density	Acres ²	Net Development Potential (Units)

Total			276.03 ²	21,006

Table III-45: Very Low/Low Income RHNA - Rezoning Capacity

Notes:

- 1. Unless otherwise indicated, land use designations shown in this table are from the Los Angeles County General Plan 2035.
- 2. The acreage also includes sites totaling 199.16 acres that are assumed to accommodate mixed-income housing development with both very low-income units and above moderate-income units.
- 3. While the land use category remains unchanged (H30, which allows a maximum density of 30 du/net acre), the sites included in the rezoning program are zoned A-1 (Light Agricultural), which does not allow multifamily residences. The rezoning program will correct the inconsistency between zoning and the land use policy.

Sites Designated for Commercial or Mixed Uses

Pursuant to Government Code section 65583.2(h), at least 50 percent of the shortfall of the very low/low income RHNA must be accommodated on sites designated exclusively for residential uses in the Rezoning Program, except that 50 percent or more of the shortfall may be accommodated on sites designated for mixed uses if those sites allow 100 percent residential use and require that residential use to occupy 50 percent of the total floor area of a mixed use project. The County has a shortfall of 20,750 very low/low income RHNA -- about 2.4 percent of this shortfall is accommodated on sites designated exclusively for residential uses. Most of the shortfall is accommodated on sites designated for commercial (CG) or mixed uses (MU), where residential-only developments are permitted by right. Also, per zoning, at least two-thirds of the square footage of a mixed use project must be designated for residential use, which goes beyond the state mandate.

Rezoning – Moderate Income and Above Moderate Income RHNA

To maintain cohesive and compatible land use patterns, sites located adjacent to sites to be rezoned for the very low/low income RHNA will also be rezoned – most of which count toward the moderate or above moderate income RHNA. Sites that will be rezoned to accommodate the moderate income RHNA are located within the South Los Angeles submarket area, as identified in the County's Inclusionary Housing Ordinance. The remainder of the sites accommodate the above moderate income RHNA. Note that only sites that are at least 5,000 sq. ft. are considered for the purpose of determining rezoning capacity, as the minimum lot size (i.e., required area) in the zones that permit residential uses is generally 5,000 sq. ft.

Also included in the rezoning program are sites that are at least 5,000 sq. ft. located in the unincorporated communities of South Whittier-Sunshine Acres and West Whittier-Los Nietos. While the existing land use categories H18 (18 du/ac), H30 (30 du/ac), and H50 (50 du/ac) allow multifamily residential uses, these sites are currently zoned A-1, R-1, and R-A, none of which allow multifamily residential uses by-right. The rezoning program will correct the zoning to align with the land use policy. These sites accommodate the above moderate income RHNA.

^{18 &}lt;a href="https://planning.lacounty.gov/assets/upl/project/housing_la_ahap_appendixE.pdf">https://planning.lacounty.gov/assets/upl/project/housing_la_ahap_appendixE.pdf https://planning.lacounty.gov/assets/upl/project/iho_supplemental-analysis.pdf

In addition, the Rezoning Program includes sites that are proposed to be redesignated from H9 (9 du/ac) to H18 (18 du/ac), or from H18 (18 du/ac) to H30 (30 du/ac) in the Florence-Firestone Transit Oriented District Specific Plan (Program 2), which is currently in development. For the purposes of this Housing Element, only sites that are at least 5,000 sq. ft. with no pending or recently approved entitlements or permits are considered. As they are located within the South Los Angeles submarket area as identified in the County's Inclusionary Housing Ordinance, these sites accommodate the moderate income RHNA.

Summary of Rezoning Capacity

The rezoning of sites can potentially create 9,250 units for moderate income housing and 26,092 units for above moderate income housing. Appendix B includes a list of sites selected to be rezoned to accommodate the moderate and above moderate income RHNA. **Table III-46** summarizes the net development potential and the total acreage of these sites by proposed General Plan land use designation.

Table III-46: Moderate- and Above Moderate-Income RHNA - Rezoning Capacity

Submarket Area	Existing Land Use Designation ¹	Proposed Land Use Designation ¹	Proposed Maximum Allowable Density	Acres ²	Moderate Income Net Development Potential (Units)	Above Moderate Income Net Development Potential (Units)

	P (East Los Angeles Community Plan)	MU	150 du/net ac	0.66	0	40
Total				775.68 ²	9,250	26,092

Notes:

- 1. Unless otherwise indicated, land use designations shown in this table are from the Los Angeles County General Plan 2035.
- 2. The acreage also includes sites totaling 199.16 acres that are assumed to accommodate mixed-income housing development with both very low-income units and above moderate-income units.
- 3. While the land use category remains unchanged (H18, which allows a maximum density of 18 du/net acre), the sites included in the rezoning program are zoned R-1 (Single-Family Residence) or A-1 (Light Agricultural), and neither zone allows multifamily residences by right. The rezoning program will correct the inconsistency between zoning and the land use policy.
- 4. While the land use category remains unchanged (H30, which allows a maximum density of 30 du/net acre), the sites included in the rezoning program are zoned R-A (Residential Agricultural), which does not allow multifamily residences by right. The rezoning program will correct the inconsistency between zoning and the land use policy.
- 5. While the land use category remains unchanged (H50, which allows a maximum density of 50 du/net acre), the sites included in the rezoning program are zoned R-A (Residential Agricultural), which does not allow multifamily residences by right. The rezoning program will correct the inconsistency between zoning and the land use policy.

Surplus and No Net Loss

As shown in **Table III-35**, once completed, the Rezoning Program will yield an overall surplus of 574 units. This is needed to meet the "no net loss" requirement pursuant to Government Code section 65863(c)(1), or in other words, enough capacity to meet the RHNA at each income level throughout the planning period. In the event that the surplus is not sufficient to address the "no net loss" requirement, the County will include a list of additional sites rezoned to accommodate the shortfall in the Housing Element Annual Progress Report pursuant to Government Code section 65400(a)(2)(G).

Pending Projects-Reference Only

Table III-47 shows a list of select proposed pending projects of 200+ units for reference only. The units are not counted toward the RHNA, and inclusion in the Housing Element does not guarantee approval of the project.

Table III-47: Select Pending Projects

Select Projects	Extremely Low/Very Low	Low	Moderate	Above Moderate	Total
Centennial Specific Plan (Antelope Valley)	120	120	1,760	0	2,000

Tapia TR072126 (Santa Clarita Valley)	0	0	0	405	405
Northlake Specific Plan (Santa Clarita Valley)	79	79	157	1,980	2,295
Total	234	199	2,528	8,966	11,927

Availability of Infrastructure and Services

Developers cannot receive building permits to initiate construction without demonstrating water availability, and either sewer availability or the ability to accommodate septic systems. As a condition to the projects being approved by the Regional Planning Commission, developers must annex into existing sewer/water districts or ensure the extension of sewer/water lines to the project. In the urban areas and near other developments, water and sewer may extend to the selected vacant lot. However, in rural areas, such as the Antelope Valley, Santa Clarita Valley, and the Santa Monica Mountains, developers of vacant lots may have to make a larger infrastructure investment in order to bring services to the lots from a significant distance. In the case of single-family homes in rural areas, septic systems and wells can be used to demonstrate availability. In general, unincorporated Los Angeles County has access to dry utilities, and these do not present a barrier to housing development.

Developers of large master planned projects are responsible for installing infrastructure and services to serve the anticipated households. For high density residential and mixed use areas, water will be supplied by existing water service providers that serve the urban areas. Infrastructure improvements and upgrades may be needed to accommodate the increased demand. In selecting sites to be rezoned, the County excluded areas that are not within existing water and sewer districts, or that do not have access to dry utilities.

Mixed use development is expected to occur as infill development in commercial zones that are already served by infrastructure and facilities. Mixed use development is considered less intensive than commercial-only development and therefore, it can be inferred that adequate infrastructure for mixed use development is already in place to serve the identified sites.

In addition, as mixed use development is expected to occur as infill development throughout the commercial zones in areas that are already served by infrastructure and facilities, and such development are less intensive than commercial-only development, there is adequate infrastructure to serve the identified sites.

Regarding sewer and wastewater management, a review of the 2005-2010 Municipal Service Review (MSR) for the Los Angeles County Sanitation Districts indicates that wastewater treatment facilities are operating with sufficient infrastructure to support projected growth. Completed and planned expansions, in addition to preventative maintenance, will accommodate wastewater needs for regional growth expectations; however, some landfills are near capacity. The Sanitation Districts facilities and systems plans are prepared with consideration of population growth and development trends. Capital improvement and service expansion analyses start with SCAG's most recent RTP growth projections and are adjusted with community-level and on-the-ground data. In addition, the General Plan includes an implementation program to develop capital improvement plans (CIPs) in conjunction with an area plan.

Financial Resources

Service Areas

Various housing and community development funds are available to the County. Each funding program is subject to specific regulations and is available to different geographic areas.

Los Angeles County

Los Angeles County is comprised of 88 cities and unincorporated areas, which covers a land area of 4,086 square miles, including the islands of San Clemente and Santa Catalina. According to the 2020 California Department of Finance (DOF) estimates, the population was 10,172,951. All of the cities in varying degrees contract with the County to provide municipal services, including the administration of housing programs.

Unincorporated Los Angeles County

Almost 65 percent of the land area of Los Angeles County is unincorporated. According to the 2020 DOF estimate, more than one million residents were living in unincorporated Los Angeles County. The County of Los Angeles Board of Supervisors (Board) is the governing body and County departments and agencies provide municipal services, including all housing programs.

Los Angeles Urban County

The Los Angeles Urban County is comprised of unincorporated Los Angeles County and 48 participating cities, as shown in **Table III-48**. **Table III-49** summarizes the service areas covered by each funding program.

Table III-48: Los Angeles Urban County Participating Cities

Funding Sources

The following financial resources are available to the County for new construction and rehabilitation of affordable housing, as well as the preservation of housing units that are at risk of converting to market-rate housing.

Affordable Housing and Sustainable Communities

The State's Affordable Housing and Sustainable Communities (AHSC) program, initiated in 2014, provides affordable housing loans and capital grants for the creation of affordable housing in conjunction with transportation improvements. The goal of AHSC is to reduce greenhouse gas emissions (GHGs) and vehicle miles traveled (VMT), and increase access to housing and employment. The program prioritizes funding for communities impacted by pollution and at least 50 percent of all AHSC funding must benefit disadvantaged communities, as defined by the CalEnviroscreen 3.0 Tool.

Since 2018, the County's AHSC Team has provided technical assistance to eligible affordable housing developers with projects in unincorporated Los Angeles County and on County-owned land. AHSC candidates partner with County staff, Enterprise Community Partners, and transit agencies, such as METRO or LADOT, to prepare competitive applications. The County's interdepartmental team

includes the Chief Executive Office, Chief Sustainability Office, Los Angeles County Development Authority, Parks and Recreation, Public Health, Public Works, and Regional Planning.

Since 2018, the California Strategic Growth Council has awarded \$100 million dollars to six project sites plus related transit upgrades in unincorporated Los Angeles County to deliver 670 affordable units.

No Place Like Home

On July 1, 2016, Governor Brown signed SB 1206, the No Place Like Home (NPLH) Act of 2018, which dedicated up to \$2 billion in bond proceeds to invest in the development of permanent supportive housing for persons who are in need of mental health services and are experiencing homelessness, chronic homelessness, or who are at risk of chronic homelessness

The Los Angeles County Development Authority (LACDA) will function as the lead in requesting funding from HCD, releasing the Notice of Funding Availability (NOFA), loan underwriting, and asset management. The Department of Mental Health will provide supportive services to the tenants in the NPLH-funded units, monitor the provision of services, and approve eligible tenants.

LACDA and the Los Angeles County Department of Mental Health (DMH) are recommending a total of 60 projects for funding under the No Place Like Home (NPLH) Program NOFA 2019-1. A total of \$207 million in NPLH funds was advertised, but approximately \$432 million in project funding was requested.

During the most recent round of applications in 2019, \$44 million were allocated to nine (9) projects in unincorporated Los Angeles County, all of which have been entitled by the Department of Regional Planning or are in the process of obtaining approval.

Affordable Housing Programs Budget Unit

In October 2015, the Board adopted a motion that created a new Affordable Housing Programs Budget Unit (Budget Unit) within the General Fund. The 2015 motion directed that a minimum of 75 percent of the Budget Unit be dedicated to producing new, or preserving existing, affordable housing for very and extremely low-income or homeless households, including workforce housing and permanent supportive housing. The motion further directed that any remaining funds be reserved to support rental assistance, rapid re-housing, shared housing, move-in assistance, and other related services. Pursuant to a subsequent motion in 2017, the Chief Executive Office (CEO) is responsible for making recommendations to the Board regarding expenditures from the Budget Unit. In FY 2016-17 and FY 2017-18, the Budget Unit was used exclusively for purposes related to the LACDA's Notice of Funding Availability (NOFA) process and housing strategies associated with the County Homeless Initiative. In FY 2018-19, the CEO expanded the use of the Budget Unit to include strategies that included the implementation of a coordinated approach to housing preservation. With the public health and economic crises created by COVID-19, for FY 2020-21, the CEO recommended prioritizing funding for emergency rental assistance/eviction defense due to COVID-19 impacts, LACDA's NOFA, the Office of Diversion and Reentry's Permanent Supportive Housing Program, and the County's Affordable Housing Acquisition Fund. As the County plans ahead, the CEO will continue to work with relevant departments to monitor the economic impacts resulting from COVID-19 to meet the most pressing needs of County residents, while balancing planning efforts to develop a comprehensive program that addresses the affordable housing crisis.

SB2/LEAP Grants

In 2017, Governor Brown signed a 15-bill housing package aimed at addressing the State's housing shortage and high housing costs. Specifically, it included the Building Homes and Jobs Act (SB 2, 2017), which establishes a \$75 recording fee on real estate documents to increase the supply of affordable homes in California. Because the number of real estate transactions recorded in each county will vary from year to year, the revenues collected will fluctuate.

The first year of SB 2 funds are available as planning grants to local jurisdictions. The County received \$625,000 for planning efforts to facilitate housing production. For the second year and onward, 70 percent of the funding will be allocated to local governments for affordable housing purposes. A large portion of year two allocations will be distributed using the same formula used to allocate federal Community Development Block Grants (CDBG). SB2 PLHA funds can be used to:

- Increase the supply of housing for households at or below 60 percent of AMI
- Increase assistance to affordable owner-occupied workforce housing
- Assist persons experiencing or at risk of homelessness
- Facilitate housing affordability, particularly for lower and moderate income households
- Promote projects and programs to meet the local government's unmet share of regional housing needs allocation

Annual allocations will fluctuate depending on the real estate activities in previous years.

Community Development Block Grant (CDBG)

The federal CDBG program, which was initiated by the Housing and Community Development Act of 1974, has provided eligible metropolitan cities and urban counties (called "entitlement communities") with annual direct grants for revitalizing neighborhoods, expanding affordable housing and economic opportunities, and/or improving community facilities and services--principally to benefit low income persons (up to 80% AMI). CDBG projects must fulfill at least one of the following three criteria: 1) benefits low income persons; 2) prevents or eliminates slums or blight; or 3) meets other urgent community development needs.

In the Los Angeles Urban County, CDBG funds are used for supportive services, site acquisition, site improvements, and infrastructure and neighborhood improvements in conjunction with LACDA-sponsored housing developments. For fiscal year (FY) 2021-22, the CDBG allocation for the Los Angeles Urban County was \$22,420,821.

County of Los Angeles Homeless Prevention Initiative (HPI) and Measure H

In 2006, the Board approved a \$100 million Homeless Prevention Initiative (HPI) to prevent and reduce homelessness in Los Angeles County. The HPI funds are administered by the LACDA on

behalf of Supervisorial Districts and provide capital and operating subsidies to projects that serve homeless or at risk of homelessness populations. Furthermore, in March 2017, voters in Los Angeles County passed Measure H, the landmark ¼ percent increase to the County's sales tax to provide an ongoing revenue stream – an estimated \$355 million per year for ten years — to fund services, rental subsidies and housing. It is designed to fund a comprehensive regional approach encompassing 21 interconnected strategies in six areas to combat homelessness:

- Prevent homelessness
- Subsidize housing
- Increase income
- Provide case management and services
- Create a coordinated system
- Increase affordable/homeless housing

As of September 2020, Measure H-funded programs have served approximately 80,000 individuals, including approximately 48,700 persons who were sheltered in interim housing, 26,100 persons who were permanently housed, and approximately 5,100 persons who were prevented from becoming homeless.

Department of Mental Health Housing Trust Fund

The Los Angeles County Department of Mental Health (DMH) offers onsite or scattered site supportive services and/or operating subsidies for affordable permanent housing projects for individuals with mental illness through the Housing Trust Fund program, which comes from DMH's Community Services and Supports Plan (CSS) to implement the Mental Health Services Act. The operating subsidies are restricted to project-based permanent housing projects. These services and subsidies are intended to provide leverage for other local, state, and federal financial resources for developing permanent affordable supportive housing for all age groups, including youth and households, transition age youth, adults, and older adults.

Emergency Solutions Grant (ESG)

The ESG program, which was initiated by the Stewart B. McKinney Homeless Assistance Act of 1989, is designed to improve the quality of existing emergency shelters, make available additional emergency shelters, help meet the cost of operating emergency shelters, and provide essential social services to homeless individuals. The ESG program ensures that the homeless have access to safe and sanitary shelter, and to supportive services and other kinds of necessary assistance. The program is also intended to reduce homelessness through the funding of preventive programs and activities.

On December 17, 1993, the City of Los Angeles and County of Los Angeles entered into a joint powers agreement to create the Los Angeles Homeless Services Authority (LAHSA) to provide coordinated homeless services. Programs initially assigned to LAHSA by the City and County include the ESG program and the Cold/Wet Weather Emergency Shelter Program, which is funded in part by

CDBG funds, as well as other homeless services programs. For FY 2021-2022, the ESG allocation for the Los Angeles Urban County was \$1,873,395.

HOME Investment Partnerships (HOME)

The HOME program, which was initiated by Cranston-Gonzales National Affordable Housing Act (NAHA) of 1990, is the largest federal block grant to state and local governments that is designed exclusively to create affordable housing for low income households (up to 80% AMI). HOME funds are awarded annually as formula grants to participating jurisdictions. The program's flexibility allows grantees to use HOME funds for grants, direct loans, loan guarantees or other forms of credit enhancement, or rental assistance or security deposit.

HOME funds are used throughout the Los Angeles Urban County for short-term and long-term "gap" financing, for both construction loans and permanent loans. HOME funds are also used in support of housing developments undertaken or proposed by Community Housing Development Organizations (CHDOs), and by other non-profit housing developers. For FY 2021-2022, the HOME allocation for the Los Angeles Urban County was \$8,998,893.

Housing Opportunities for People with AIDS (HOPWA)

The federal HOPWA program helps low income people with AIDS and their households by providing funds for securing housing that can serve as a basis for health care and other services. HOPWA also funds the following activities that serve people at any income level: 1) housing information; 2) community outreach; and 3) education.

As the amendments made to NAHA in 1992 state that the largest city in the eligible metropolitan statistical area (MSA) is responsible for the HOPWA program, the City of Los Angeles is a designated recipient of HOPWA funds on behalf of Los Angeles County.

HUD Comprehensive Grant Program (CGP)

The federal CGP is the primary source of modernization funds for physical improvements to public housing units and for improvements to the management and operational practices for existing public housing projects for large public housing authorities (PHAs). Through CGP, HUD makes funds available to help PHAs correct physical and management deficiencies and keep units in the housing stock safe and desirable places to live.

The CGP gives larger PHAs, such as the LACDA, discretion for planning specific improvements, and facilitates long-term planning by providing funds annually on a formula basis. Funds are given as project grants, based on the backlog and accrual of modernization needs.

HUD Section 8 Housing Choice Voucher Program

The Section 8 Housing Choice Voucher program increases affordable housing choices for very low income households by allowing households to choose privately-owned rental housing. The PHA generally pays the landlord the difference between 30% of household income and the PHA-determined payment standard, which is approximately 80 to 100% of the fair market rent (FMR). The rent must be reasonable. The household may choose a unit with a higher rent than the FMR and pay the landlord the difference, or choose a lower cost unit and keep the difference.

Mortgage Credit Certificates (MCC) Program

The MCC Program offers first-time homebuyers with a federal income tax credit. This credit reduces the amount of federal taxes that the holder of the certificate pays. It can also help first-time homebuyers qualify for loans by allowing lenders to reduce the housing expense ratio by the amount of tax savings.

Qualified homebuyers that are awarded MCCs may take an annual credit against their federal income taxes paid on the homebuyer's mortgage. The credit is subtracted dollar-for-dollar from the recipient's federal income taxes. The qualified buyer is awarded a tax credit of up to 15% and the remaining 85% is taken as a deduction from the income.

Supportive Housing Program (SHP)

The 1989 Stewart B. McKinney Homeless Assistance Act authorized the establishment of the SHP to help develop housing and related supportive services for people moving from homelessness to independent living. Program funds help people experiencing homelessness live in a stable place, increase their skills or income, and gain more control over the decisions that affect their lives. HUD awards these funds annually on a competitive basis.

Administrative Resources

The following agencies and organizations form the delivery system of affordable housing and related services in unincorporated Los Angeles County, including new construction and acquisition/rehabilitation of affordable housing, preservation of affordable housing that are at risk of converting to market-rate housing, as well as short-and long-term rental assistance and operating subsidies for low income households with housing challenges.

County of Los Angeles Chief Executive Office

Homeless Initiative

To combat the County's homelessness crisis, the Board launched the Los Angeles County Homeless Initiative (HI) within the Chief Executive Office (CEO) in 2015. In 2016, through a collaborative process with community and government partners, the Board approved 47 initial strategies that reach across government and community boundaries, and allocated \$100 million to this countywide effort. With the passage of Measure H in 2017, the Board approved four additional strategies. Each strategy has designated lead and partnering organizations that work together to develop detailed implementation plans, evaluation plans, and budgets. The Chief Executive Office – Homeless Initiative (CEO – HI) provides oversight and hands-on guidance to deploy the infusion of Measure H funds for 21 of these strategies and maximize the alignment and effectiveness of this unprecedented commitment.

Anti-Racist, Diversity, and Inclusion Initiative (ARDI)

On July 21, 2020, the Board of Supervisors adopted a comprehensive anti-racist agenda that will guide, govern, and increase the County's ongoing commitment to fighting racism in all its dimensions, especially racism that systemically and systematically affects Black residents. The ARDI builds off of previous efforts, focuses on workforce training, reviews national effective practices, and carries out the Board-directed anti-racism agenda. The

ARDI is tasked with evaluating practices, operations, and programs through a lens of racial equity in order to more effectively promote and support policies that prioritize physical and mental health, housing, employment, public safety, and justice in an equitable way for Black residents.

Department of Consumer and Business Affairs

The Los Angeles County Department of Consumer & Business Affairs (DCBA) serves consumers, businesses and communities through education, advocacy, and complaint resolution with the end goal to create a fair marketplace for all. The DCBA operates and oversees specialized programs such as the Office of Immigrant Affairs, Self-help Legal Access Centers, the Office of Cannabis Management and Military Consumer Protection. In addition, the DCBA established the Rental Housing Oversight Commission, Small Business Commission, and the Advisory Commission to advice and support the Los Angeles County Board of Supervisors.

Due to the COVID-19 public health crisis, DCBA has overseen the Los Angeles County Temporary Eviction Moratorium, effective March 4,2020, through June 30, 2021 unless repealed or extended by the Board, places a Countywide ban on evictions for residential and commercial, including mobilehome space renters. Under the County's Moratorium, tenants may not be evicted for COVID-19 related nonpayment of rent, as well as no-fault reasons, denying entry to a landlord, nuisance, or unauthorized occupants or pets – if related to COVID-19.

The DCBA also oversees the implementation of the Rent and Mobilehome Stabilization Ordinance (RSO) which standardizes rent increases and extends eviction protections in unincorporated Los Angeles County. As part of the RSO, DCBA will establish a rental unit registry program to track all qualified units long-term.

County of Los Angeles Department of Regional Planning (DRP)

DRP performs all land use planning functions for unincorporated Los Angeles County. Its responsibilities include long-range planning, land development counseling, development project/case intake and processing, environmental review, and zoning enforcement.

DRP is the lead agency in the preparation and amendments of the General Plan, including the Housing Element. DRP also implements and facilitates amendments to Title 21 (Subdivisions) and Title 22 (Planning and Zoning) of the Los Angeles County Code including the recently adopted housing ordinances such as: Inclusionary Housing Ordinance, By-Right Housing Ordinance, Affordable Housing Preservation Ordinance, and the Interim and Supportive Housing Ordinance.

Los Angeles County Development Authority (LACDA)

LACDA serves as the County's affordable housing and community development agency. It represents the consolidation of the Community Development Commission and the Housing Authority of the County of Los Angeles. LACDA's wide-ranging programs benefit residents and business owners in unincorporated Los Angeles County and in participating cities. LACDA monitors and enforces the duration of affordability and/or age restrictions of income- and/or age- restricted units through covenants. Also, LACDA ensures that the supportive services identified covenant are rendered in supportive housing developments.

LACDA maintains the Los Angeles County Housing Resource Center web site (http://housing.lacounty.gov), which provides information on affordable, special needs, and emergency housing resources. Specifically, the Resource Center offers the following:

- Rental listings by community (including information on income restriction, acceptance of Section 8 vouchers, accessibility, etc.);
- Calculation of affordable housing cost by household size, income, and unit size requirements;
- Shelter listings; and
- Other resources, such as links to information on funding resources, advocacy and non-profit groups, state and federal programs and regulations, and other housing organizations.

Los Angeles Homeless Services Authority (LAHSA)

LAHSA is a Joint Powers Authority established in 1993 as an independent agency by the City and the County of Los Angeles. LAHSA is the lead agency in the Los Angeles Continuum of Care and coordinates and manages various federal, state, local funds for programs providing shelter, housing, and services to homeless persons in the City and County of Los Angeles.

Through LAHSA, funding, program design, outcomes assessment, and technical assistance are provided to over 100 non-profit partner agencies that operate within the City and County to assist the homeless. LAHSA's partner agencies provide a continuum of programs ranging from outreach, access centers, emergency shelters, safe havens, transitional and permanent housing, and prevention along with the necessary supportive services.

Affordable Housing Providers

The County works with a number of non-profit and for-profit housing providers to expand affordable housing opportunities, including new construction, acquisition/rehabilitation, and preservation of affordable housing. See Appendix F for a list of qualified entities.

Resources for Special Needs Housing

Los Angeles County Development Authority (LACDA)

LACDA develops and administers housing programs that serve a wide range of individuals and households earning below 80% of AMI, with the majority of rental housing programs targeted to income ranges from 25% - 60% of AMI. Allocation of resources among different special needs

populations are primarily decided by the Board of Supervisors. These special needs populations include, but are not limited to persons with disabilities, such as mental illness; seniors; veterans; homeless; and families.

Accessibility requirements are incorporated into all types of housing financed by the LACDA. County-funded developers of affordable and special needs housing are required to meet Americans with Disabilities Act (ADA) and California Building Code requirements for accessible units. If federal funds are involved, they are also required to construct Uniform Federal Accessibility Standards (UFAS) compliant units. LACDA reviews building plans, inspects completed units, and requires Certified Accessibility Specialist certifications. The units must remain complaint for 55 years and are monitored on an ongoing basis.

For housing notice of funding availability (NOFAs), LACDA uses the term "Special Needs," which incorporates categories as determined by funding source or County Board policy decisions. The NOFA process competitively and transparently rates the projects that serve the desired populations and also leverage the best use of County funds. Accessibility, adaptability, fair housing, affirmative marketing, and reasonable accommodations are incorporated into all LACDA funded rental projects as a matter of compliance with HUD, ADA, and local building codes.

In addition, LACDA requires all new housing projects (all of which have fully accessible units) to list their properties on the Los Angeles County Housing Resource Center web site. The web site, established in 2007, provides a way for landlords to advertise accessible units, and allows tenants to search for affordable and accessible units online or phone toll free.

County of Los Angeles Department of Health Services Housing For Health

The Los Angeles County Department of Health Services (DHS) Housing for Health (HFH) division provides housing and supportive services to homeless clients with physical and/or behavioral health conditions, high utilizers of County services, and other vulnerable populations. Permanent supportive housing, which is the foundation of HFH approach, includes decent, safe, and affordable housing linked to a flexible array of supportive services. These on-site or roving, field-based supportive services with access to medical and behavioral health care are integral to achieving housing stability, improved health status, and greater levels of independence and economic security.

In February 2014, HFH launched the Flexible Housing Subsidy Pool (FHSP), a new and innovative way to provide rental subsidies operated by the non-profit partner, Brilliant Corners, and is designed to provide rental subsidies in a variety of housing settings, including project-based and scattered site housing. The FHSP was designed so that other funders, including other County departments, would be able to add funds to serve clients that they prioritize for housing. Funding for the FHSP currently comes from DHS, the Department of Mental Health, the Probation Department, the Sherriff's Department, the CEO's Homeless Initiative (including a significant amount of Measure H and Homeless Prevention Initiative funding), LA Care, Whole Person Care, the Department of Public and Social Services, the California Department of Social Services and from the Board.

In addition, HFH also administers the Housing and Jobs Collaborative (HJC), which is a rapid rehousing program that connects individuals experiencing homelessness to affordable permanent housing through a tailored package of services that includes flexible term rental subsidies, case

management and employment services. HJC is client-centered and employs a "whatever it takes approach" to assist clients in their transition from homelessness to permanent housing.

County of Los Angeles Department of Health Services – Office of Diversion and Reentry

DHS Office of Diversion and Reentry (ODR) was created by the Board in September 2015 to develop and implement county-wide criminal justice diversion for persons with mental and/or substance use disorders and to provide reentry support services. ODR is another division within DHS that focuses on permanent supportive housing and Enriched Residential Care for their clients. The goals of ODR include reducing the number of mentally ill inmates in the Los Angeles County Jails, reducing recidivism, and improving the health outcomes of justice-involved populations who have the most serious underlying health needs. ODR leverages HFH's infrastructure to provide permanent supportive housing to individuals exiting the criminal justice system.

County of Los Angeles Department of Mental Health

The Los Angeles County Department of Mental Health (DMH) Countywide Housing, Employment and Education Resource Development (CHEERD) Division provides a range of housing services and resources for homeless consumers that includes housing subsidies through the Section 8 Housing Choice Voucher Program and Shelter Plus Care Program; financial assistance for rental assistance, household goods and eviction prevention through the Countywide Housing Assistance Program; and temporary shelter through the Specialized Shelter Bed Program. In addition, the CHEERD Division provides capital development funding and operating subsidies from resources such as Mental Health Service Act (MHSA), the Mental Health Housing Program Funds (MHHP), Special Needs Housing Program (SNHP) and Federal Housing Subsidy Unit Program for the creation of new permanent supportive housing throughout Los Angeles County. Through partnerships with developers, on-site service providers and property management companies, DMH is increasing the amount of affordable housing available to individuals with mental illness and their families.

Reasonable Accommodations Ordinance

The Reasonable Accommodations Ordinance is a procedure in the Zoning Code for persons with disabilities to request reasonable accommodations from land use and zoning standards or procedures, when those standards or procedures are a barrier to equal housing access, pursuant to state and federal fair housing laws. As part of the Housing Element Implementation Program, by 2029, DRP will study the need to update the Reasonable Accommodations Ordinance and amend it if necessary.

Opportunities for Energy Conservation

Green Building Construction and Operations

In 2010, in response to the mandates set forth in CALGreen (2010 California Green Building Standards Code), the Board of Supervisors adopted the Los Angeles County Green Building Standards Code (Title 31), which is updated every three years.

The County also encourages the use of sustainable construction materials and energy-efficient equipment, as well as the installation of energy-efficient appliances and fixtures in affordable housing developments. As part of the Notice of Funding Availability issued by LACDA, the County

encourages sustainable development and green building practices. Applications that incorporate sustainable development and energy conservation measures receive higher scores, and therefore have better chances for being funded.

Climate Action Plan

The Los Angeles County Community Climate Action Plan (CCAP), adopted in 2015, specifies the County's goals for greenhouse gas (GHG) emission reductions within unincorporated Los Angeles County. The update to the CAP, which is included as a Housing Element program, will identify actions to reduce greenhouse gas emissions and adapt to a changing climate, including transit-oriented development and other pro-housing strategies. Completing the update to the CAP will also create a streamlined procedure for environmental clearance for individual projects.

Southern California Regional Energy Network (SoCalRen)

The County Internal Services Department (ISD) manages a portfolio of energy efficiency programs that support communities, local governments, commercial businesses and residential and multifamily property owners. Through annual funding provided by the California Public Utilities Commission (PUC), ISD also administers the Southern California Regional Energy Network (SoCalREN) that supports energy efficiency programs and has held secured funding guaranteed until 2025. Despite the challenges posed by the COVID-19 pandemic, the SoCalREN was able to achieve over 11 million in kWh electricity savings and over 200,000 therms of natural gas savings. In addition, SoCalREN has launched a program that helps tackle homelessness for at-risk foster youth, training them to enter the green job workforce as entry level applicants. In 2020, the SoCalREN also launched its Multifamily Financing Loan Loss Reserve to assist multifamily property owners in the implementation of their energy efficiency projects so that they may reduce their operating expenses and reduce their energy usage.

REVISED COUNTY OF LOS ANGELES HOUSING ELEMENT (2021-2029) APPENDICES

APPENDIX C: REVIEW OF PAST ACCOMPLISHMENTS

PROGRESS TOWARD MEETING THE REGIONAL HOUSING NEEDS ALLOCATION (RHNA)

The County's RHNA was reduced from 30,145 to 27,440, due to RHNA transfers for annexations. As of December 31, 2020, 7,116 units were constructed, representing about 26% of the County's RHNA for the planning period (**Table C-1**). The County achieved about 10% of the very low and low income RHNA, and less than 1% of the moderate income RHNA.

Table C-1: Progress Toward RHNA

	Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
RHNA	7,404	4,281	4,930	10,825	27,440
Units Constructed	734	457	19	5,906	7,116
Remaining	6,670	3,824	4,911	4,919	20,324
% Completed	10%	11%	<1%	55%	26%

Source: 2020 Housing Element Annual Progress Report.

PROGRESS TOWARD IMPLEMENTING PROGRAMS AND OBJECTIVES

When updating the Housing Element, state law requires that the local jurisdiction review its previous Housing Element in order to evaluate:

- The appropriateness of the housing goals, objectives, and policies in contributing to the attainment of the state housing goal.
- The effectiveness of the Housing Element in the attainment of the community's housing goals and objectives.
- The progress in implementing the Housing Element.

A program-by-program review of the County's accomplishments under the previous Housing Element is presented in **Table C-2**. Based on current state law, housing programs must contain measurable goals, specific timelines, and active participation of the County.

EFFECTIVENESS IN ADDRESSING SPECIAL NEEDS

The County adopted the Interim and Supportive Housing Ordinance in 2021, which addresses the provision of different types of special needs housing. Most of these special needs housing types are permitted by right in residential and most mixed-use zones. The adoption of the Interim and Supportive Housing Ordinance substantially expanded the opportunities for special needs housing and streamlined the approval process.

Regarding the construction of housing for persons with special needs, through the First 5 LA Notice of Funding Availability (NOFA) process, the Los Angeles County Development Authority (LACDA) funded five projects that incorporate supportive services: Beverly Hills Terrace, Cedar Ridge Apartments, Marv's Place Apartments, Vermont Manzanita, and Whittier Place. LACDA's NOFA process also provided incentives for universal design features to promote accessibility, and required projects to include federal Low Income Housing Tax Credit financing.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)			
Housing Availa	Housing Availability				
1. Adequate Sites for Regional	Facilitate the development of a variety of housing types by providing a supply of land that is adequate to accommodate	The County has made a Potential Housing Sites application open to the public. The application includes the adequate sites inventory from the 2014-2021 Housing Element.			
Housing Needs	30,145 units (ongoing).Maintain an inventory of sites and make it	The following community-based plans are currently being updated and/or created:			
	available to interested developers	East San Gabriel Valley Area Plan			
	(ongoing).	Metro Area Plan			
		Santa Monica Mountains North Area Plan			
		Department of Regional Planning (DRP) has been working with the County CEO to coordinate the transfer of RHNA in annexations. During the planning period, the County transferred a total of 2,705 units as follows: 2,659 units to the City of Santa Clarita, 40 units to the City of Glendora, and 6 units to the City of Palmdale.			
		Continued Appropriateness			
		The 2021-2029 Housing Element includes an updated program to reflect the 6th cycle RHNA and the County's strategy for meeting the RHNA of 90,052 units. The updated Housing Element includes programs to monitor for no net loss (SB 166) and ADU trends.			
2. General Plan Update	Maintain an inventory of sites and make it available to interested developers (by 2014).	The Los Angeles County Board of Supervisors (Board) adopted the updated General Plan on October 6, 2015. The Adequate Sites Inventory is available to the public on the County's Potential Housing Sites application. ¹			

¹ The County's Potential Housing Sites application is available at: http://lacounty.maps.arcgis.com/apps/webappviewer/index.html?id=75fba821076b4df48f0e00fe701b6841. Accessed July 2020.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		Continued Appropriateness
		The comprehensive update of the General Plan was completed in 2015. No comprehensive update of the General Plan is anticipated during 2021-2029 Housing Element planning period.
3. Zoning Ordinance Update Program	 Mitigate possible constraints on low- to moderate -income and special needs housing development caused by County rules and regulations. Amend the Zoning Ordinance through the Technical Update (by 2015). Amend the Zoning Ordinance through the Zoning Ordinance Update Program (ZOUP) and other programs (by 2016). 	The Zoning Ordinance Update Program, now the Technical Update to Title 22, was adopted January 2019. The ordinance amended Title 22 to reorganize, clarify and simplify code language, consolidate identical or similar standards or procedures, delete obsolete or redundant code provisions, and streamline administrative and case processing procedures. In 2019, the Board adopted the Density Bonus Ordinance Update (see Program 4, Density Bonus Ordinance). Continued Appropriateness DRP is committed to updating the Zoning Code annually through "Tune-Ups" to incorporate new state laws and for cleanup purposes.
4. Density Bonus Ordinance	Continue to promote the County Density Bonus Program to developers through the dissemination of brochures, presentations, and web postings on the DRP website and by offering technical assistance to the public (ongoing).	On October 15, 2019, the Board adopted the Density Bonus Ordinance Update, which implements the State Density Bonus Law. The ordinance promotes affordable and senior housing and restructures related provisions for ease of use. The County developed materials to coordinate the implementation of density bonuses with overlapping policies such as SB 35, AB 2162, and AB 2222. Staff continues to promote the Density Bonus Ordinance through a webpage, bilingual fact sheets and flow charts, and offers technical assistance and consultation to the public. Continued Appropriateness This program has been completed. The County's Density Bonus Ordinance will be updated as needed to reflect updates to the State Density Bonus Law. A new program - Housing for Deeply Low Income Households - may require future updates
5. Infill Sites Utilization Program	Promote the County Infill Sites Utilization Program and offer technical assistance to the public, as funds become available, in conjunction with the Density Bonus Ordinance (by 2014, ongoing).	to the Density Bonus Ordinance. The Infill Sites Utilization Program was amended in early 2009 to incorporate the use of Federal Neighborhood Stabilization (NSP) Funds for the acquisition and rehabilitation of foreclosed one to four unit properties. As of 2019, the program provided for the acquisition and rehabilitation of 19 homes reserved as affordable rentals for households earning less than 50% of the Area Median Income (AMI). Continued Appropriateness This program has concluded and is not included in the 2021-2029 Housing Element.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
6. Transit- Oriented Districts Program	Complete Willowbrook Transit Oriented District (TOD) Specific Plan (by 2016). Establish all TOD Specific Plans (by 2021). Eleven TODs will be located along the Metro Blue Line, Green Line, Gold Line, Gold Line Extension, and near the Metro Silver Line.	East LA 3rd Street Specific Plan The East LA 3rd Street Specific Plan was adopted on November 12, 2014. The Specific Plan guides development surrounding the Metro Gold Line Stations and improves adjacent neighborhoods. This Specific Plan was amended in February 2020. The amendment provided minor technical changes to promote ease of use. Willowbrook TOD Specific Plan The Willowbrook TOD Specific Plan was adopted by the Board on September 18, 2018. The Willowbrook TOD Specific Plan aims to facilitate residential and employment-generating development in the Rosa Parks/Imperial Metro Station area. The Specific Plan includes the recommendations of the Martin Luther King, Jr. Medical Campus Master Plan and other planning efforts in Willowbrook. West Carson TOD Specific Plan The West Carson TOD Specific Plan was adopted by the Board on October 1, 2019. The West Carson TOD Specific Plan aims to facilitate residential and employment-generating development in the Carson Metro Bus Station area. This Specific Plan is facilitated in conjunction with the Harbor-UCLA Hospital Master Plan. Connect Southwest LA: A TOD Specific Plan for West Athens- Westmont This Connect Southwest LA TOD Specific Plan was adopted on May 12, 2020. Connect Southwest LA guides development in the area between the Metro Green Line Vermont/Athens Station and Los Angeles Southwest College. Florence-Firestone TOD Specific Plan The Florence-Firestone TOD Specific Plan The Florence-Firestone TOD Specific Plan General Plan, the Florence-Firestone Community Plan, Metro West Santa Ana Branch TOD Strategic Implementation Plan, the SCAG RTP/SCS, and California Transportation Plan, Metro West Santa Ana Branch TOD Strategic Implementation Plan, the SCAG Rtpopropriateness The County will continue to use the TOD as a tool to facilitate housing development. These TOD Specific Plans will be updated as part of the Metro Area Plan, which is included as an implementation program in the 2021-2029 Housing Element.
7. Second Unit Ordinance	Promote the Second Unit Ordinance through the Department of Regional Planning website and brochures at public counters to increase affordable rental options in the County (by 2014).	The Accessory Dwelling Unit Ordinance, adopted in 2019, was updated to be consistent with State laws enacted in January 2020. The ordinance update was adopted in October 2020. The County continues to implement the State law and promote

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		ADUs through a number of initiatives, such as the Homeless Initiative ADU Pilot Program.
		Continued Appropriateness
		As required by State law (AB 671), the 2021-2029 Housing Element includes a program to incentivize ADUs.
8. Small Lot Subdivisions Ordinance	Establish a Small Lot Subdivisions Ordinance to promote affordable homeownership through the allowance of smaller, fee-simple lots in areas zoned for two-family and multifamily housing where infill development is	On June 9, 2020, the Board adopted the Compact Lot Subdivision Ordinance. The Compact Lot Subdivision Ordinance establishes provisions for fee-simple, single-family residential lots that are less than 5,000 square feet in the multi-family residential zones.
	encouraged (by 2016).	Continued Appropriateness
		The County will continue to implement the Compact Lot Subdivision Ordinance. However routine implementation of this ordinance is not included in the 2021-2029 Housing Element as a specific housing program.
9. Air Quality and Housing	Improve health conditions to the greatest extent while providing an adequate housing supply. The following measures will be implemented during the planning period: Collaborate with appropriate private and public agencies to address air quality and housing development issues (ongoing), Consider the effectiveness of approaches, such as mitigation and design, and other alternatives to policies to prohibit or not fund housing within 500 feet of a freeway (by 2016),	The Los Angeles County Development Authority (LACDA) does not fund residential development, including housing, play areas, community rooms, and community gardens, within 500 feet of a freeway. All projects that receive funding through LACDA's annual notice of funding are required to comply with these provisions. Continued Appropriateness The Our County Sustainability Plan, adopted by the Board of Supervisors in 2019, includes Action 1 with DRP as the lead agency: Limit siting of new sensitive uses, such as playgrounds, daycare centers, schools, residences, or medical facilities, at least 500 feet from freeways. The 2021-2029 Housing Element is consistent with the Our County
	Revise County policies to reflect identified best practices (ongoing).	Sustainability Plan with Policy 11.1.
Housing Afford	ability	
10. First 5 LA Supportive Housing for Homeless Families Fund	 Provide services to families with young children who are homeless or at risk of homelessness. Serve 60 children with new housing development. Serve 400-500 children over a two-year period through rental assistance (ongoing). 	In 2012, LACDA awarded five projects through the First 5 LA Notice of Funding Availability (NOFA). NOFA funded projects are: Beverly Hills Terrace, Cedar Ridge Apartments, Marv's Place Apartments, Vermont Manzanita, and Whittier Place. Beverly Hills Terrace, the final project in the First 5 LA Project, was completed in January 2018. Supportive services continue to be provided for the First 5 LA Project households. Continued Appropriateness This program no longer exists as a funding source. Services are still provided at all projects that resulted from this funding source. This program is not included in the 2021-2029
11. Countywide Affordable	Assist in the development of 350 extremely low and very low income rental housing units in the unincorporated areas through gap	Housing Element. LACDA has provided funding for a total of 1,143 units through the NOFA Round 25A. In 2019, No Place Like Home was issued and funded 58 housing developments and 4,251 units.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
Rental Housing Development	financing, a revolving loan fund, and technical assistance during the planning period (ongoing).	As of 2019, LACDA received NOFA applications for a total of 2,722 units. Additionally, LACDA received a total of 55 applications through NOFA 26A, issued in 2020, for a total of 4,100 units; awards are anticipated to be given to a portion of the NOFA 26A applicants in 2021.
		Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
12. Priority of Water and Sewer for	Upon adoption and certification, provide copies of the Housing Element, including information on sites used to meet the RHNA,	DRP distributed copies of the Housing Element to all water and sewer districts that provide services to the unincorporated areas in 2014.
Affordable	to all water and sewer districts that may be	Continued Appropriateness
Housing	required to provide service to developments within the unincorporated areas (by 2014).	This program has been updated and is included in the 2021-2029 Housing Element.
13. Homebuyer	Assist 1,050 low- and moderate-income first-time homebuyers in the unincorporated area	The County provided assistance through the following programs during the planning period:
Assistance	and 43 affordable units through AHOP during the planning period (ongoing).	HOP – 284 assistance loans were funded with a value of \$13,807,239.
	Home Ownership Program (HOP) – 200 households	 MCC – 674 MCCs were issues with a value of \$212,335,943.
	Mortgage Credit Certificate Program (MCC) – 250 households	SCHFA – 164 loans were allocated.
 Southern Ca Authority (S0 Affordable H Opportunitie 		AHOP – 35 affordable units were sold.
	Authority (SCHFA) – 600 households	The County also issued 65 loans through the SCHFA funded First Home Program in 2017.
	Opportunities Program (AHOP) – 43 affordable units	Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
14. Section 8 Provide rental assistance to 4,000 extremely low- and very low-income households and	LACDA's Housing Assistance Program monitors an allocation of 26,882 vouchers, which includes:	
Assistance	homeless individuals and families in the unincorporated areas during the planning	20,600 Housing Choice Vouchers
	period (ongoing).	1,425 Project Based Vouchers (PBV)
	Housing Choice Voucher – 3,800 households	3,192Veterans Affairs Supportive Housing (VASH) vouchers
	Homeless Set Aside Program – 70 homeless individuals or families	34 Housing Opportunities for People with AIDS (HOPWA) vouchers
	Housing Opportunities for Persons with AIDS – 30 homeless persons with	203 Mainstream vouchers
		100 Non-Elderly Disabled (NED) voucher
	HIV/AIDS	385 Family Unification program (FUP) vouchers
		16 Moderate Rehabilitation (MR) project-based vouchers.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element. This program will include expanded outreach efforts to educate the public regarding California's Source of Income protection (SB 329), requiring landlords to accept public assistance (including HCVs) as a legitimate income source for rent payments.
15. Family Self- Sufficiency Program	Assist 100 Section 8 recipients and public housing residents in the unincorporated areas to achieve self-sufficiency and homeownership during the planning period.	LACDA's Family Self-Sufficiency (FSS) program assists 315 HCV program participants and 58 Public Housing program residents for a total of 373 families enrolled in the FSS program. Out of the 373 families participating in FSS, there are 241 families with escrow accounts.
	 Annually apply to foundations, corporations, and public and private organizations for funds to provide additional supportive services during the planning period (ongoing). 	The FSS program has a partnership with America's Job Center of California (AJCC). During 2020, 58 participants were referred to the AJCC. Out of those 58, 6 were in training, 5 have networked via networking webinars and the remaining participants were receiving ongoing job leads and resumé coaching.
		Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
16. Housing Relocation for	During the planning period, continue to provide one-time-only assistance to	During this planning period, CalWORKs housing relocation data was not available. Further updates are not available.
CalWORKs Participants	CalWORKs participants to ensure their success in obtaining/maintaining employment	Continued Appropriateness
Program	(ongoing).	This is not a housing program and is not included in the 2021-2029 Housing Element.
17. Shelter Plus Care – Supportive Housing Program	Annually apply for funding to develop and expand the Continuum of Care strategy for homeless persons using Shelter Plus Care (S + C) – Supportive Housing Program (SHP) during the planning period (ongoing).	LACDA's Continuum of Care program received nearly \$100 million in renewal funding for existing Continuum of Care projects during the planning period. Over \$17 million was allocated towards expansion projects. In FY 2019, LACDA received \$32,320,453 in renewal funding to support existing Continuum of Care projects. LACDA applied for \$32,320,453 in renewal funding for FY 2020 to support this program.
		Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
18. Green	Provide grants to low-income homeowners in	The Green Grant Program was discontinued in 2014.
Grant Program	Grant Program unincorporated East Los Angeles for energy efficiency upgrades. Implementation funds	Continued Appropriateness
	will be annually allocated based on CDBG funding availability (ongoing).	This program is not included in the 2021-2029 Housing Element.
19. Winter Shelter Program for Homeless (WSP)	Annually operate the 19 WSP sites (1,491 beds) throughout Los Angeles County (ongoing).	Of the 1,518 total beds, the County funded 846 WSP beds through the Emergency Solutions Grant Administration (ESG) and General Funds. In 2017, the County extended the program from 90 days to 120 days, extending from December to March. Bed capacity was expanded during extreme weather

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		conditions. The Los Angeles Homeless Services Authority (LAHSA) received funding from County Measure H, City General Funds, Continuum of Care (CoC), Community Development Block Grant (CDBG), ESG, the County Department of Public Social Services (DPSS), and the Independent Living Program. The increased funding allowed for a total of 4,518 total beds, and for all publicly funded shelters to move to 24-hour operation.
		Continued Appropriateness
		This program has been updated and is incorporated into a new comprehensive homelessness program the 2021-2029 Housing Element.
Neighborhood a	and Housing Preservation	
20. Ownership Housing Rehabilitation Assistance	Assist 3,365 low-income households in the unincorporated areas during the planning period (ongoing). Single-Family Rehabilitation Loan Program – 125 households Single-Family Home Improvement Program – 1,500 households Residential Sound Insulation Program– 1,500 households Handyworker Program – 240 households	The following number of loans/grants were completed during the planning period: Single-Family Rehabilitation Loan Program – 115 households Single-Family Home Improvement Program – 612 households Residential Sound Insulation Program – 2,869 households Handyworker Program – 24 households However, the Single-Family Home Loans and Handyworker Grant program were suspended in 2020 due to the COVID-19 pandemic. Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
21. Public Housing Modernization Program	Continue to improve and modernize the 1,945 public housing units in the unincorporated areas during the planning period (ongoing).	Modernization of existing public housing is an ongoing activity of the Housing Authority. The public housing stock was constantly undergoing modernization and rehabilitation during the planning period. Continued Appropriateness
		This program has been updated and is included in the 2021-2029 Housing Element.
22. Preservation of At-Risk Housing	For the 2014-2024 period, 582 housing units for low-income households are at risk of converting to market rate. The following measures aim to preserve the at-risk units (ongoing): • Annually update the status of at-risk housing projects, • Discuss preservation options with at-risk project owners,	The Preservation Unit (LACDA) and the County Department of Consumer and Business Affairs are implementing the Rent Stabilization and Mobilehome Rent Stabilization Ordinances, which were adopted in 2019. In addition, the County established the Emergency Preservation and Tenant Assistance Fund (EPTAF), assisting 82 low-income families to remain at their rental properties. Another 144 units with expiring affordability were preserved as affordable with CalHFA refinancing. LACDA plans to establish a Preservation Database to keep track of County programs that have expiring commitments to improve the preservation of affordable housing and work with the private builders to keep the housing

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
	 Contact non-profit housing organizations about preserving the at-risk projects (by 2014), Pursue funding from State and federal programs, Allocate Section 8 Housing Choice Vouchers for households displaced due to the Section 8 project-based rental assistance expiration, Provide notification of expiring units and engage tenants in the effort to preserve at-risk units. 	at bond rates. LACDA has also completed a Displacement Study to prioritize the allocation of resources to areas where displacement is likely to occur. Continued Appropriateness These housing preservation and tenant protection programs are included in the 2021-2029 Housing Element.
23. Foreclosed Property Tracking System	 The following measures seek to maintain an active GIS mapping database of properties entering the foreclosure process (ongoing): Develop a foreclosure database for mapping, tracking, and monitoring properties in foreclosure (by 2014), Coordinate with County departments to detect foreclosures throughout the planning period, Use the information to inform community-based planning efforts and place-based programs and strategies. 	In 2014, Public Works established a mapping program for properties in the unincorporated areas that have a Notice of Default or Notice of Trustee Sale filed. ² No updates have been made since 2014. Continued Appropriateness This program is not included in the 2021-2029 Housing Element. However, in the event that there is an increase in foreclosures, the County may reinstate the tracking system.
Equal Housing	Opportunity	
24. Fair Housing Program	 Annually allocate funding to support fair housing and tenant/landlord services during the planning period. Provide training to County staff on fair housing laws and responsibilities (ongoing). 	Fair housing and tenant services are ongoing. During the planning period, the County assisted 10,573 clients directly. An average of over 245,000 client contacts were made annually. The County distributed an average of over 15,000 pieces of education material per year. In first six months of 2020, the Housing Rights Center counseled 341 clients, opened 24 cases, and referred two cases in unincorporated Los Angeles County. The County's five-year Consolidated Plan includes provisions for additional fair housing. LACDA will use \$500,000 in nonfederal County funds to execute an agreement with the Housing Rights Center at the start of the 2020 fiscal year. This agreement will provide expanded fair housing services, including education, outreach, investigation, training of testers, testing and legal consultation. The services will include outreach to residents and landlords to educate them on source of income protections.

² PW's Land Records Viewer is available at: https://pw.lacounty.gov/sur/landrecords/index.cfm?docType=TM. Accessed July 2020.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		Continued Appropriateness
		This program has been expanded to include relevant actions outlined in the Regional Analysis of Impediments to Fair Housing Choice.
25. Best Practices for Accessible Housing	 Ensure compliance with accessibility design standards as required by the California Building Code, ADA Requirements, and Uniform Federal Accessibility Standards (UFAS). Expand design requirements for or new construction for affordable and special needs multi-family housing projects funded by NOFA requiring: 5% of dwelling units to be accessible for persons with mobility disabilities; and 2% of units to be accessible to persons with hearing or visual disabilities. Allow and support the inclusion of preferences for persons with disabilities having notice and opportunity to lease accessible/adaptable and visual/hearing impaired units funded with public funds (by end of 2014). Complete ongoing research, review, and update best practices and requirements for leasing and management of accessible/adaptable units, in accordance with state and federal fair housing laws (by end of 2014). Update NOFAs to require and encourage universal design principles, and, where appropriate, award extra points for projects that exceed minimum standards for accessibility (by end of 2014). Improve housing inventory and registration of accessible units on the Los Angeles County Housing Resource Center website (ongoing). 	In 2014, LACDA established measures to ensure funded projects complied with applicable regulations regarding accessible units, including ADA 201, CDC Chapter 11B, and Section 504 UFAs-compliant units for federally funded projects. NOFA provided incentives for universal design features to promote accessibility and required projects to include federal Low Income Housing Tax Credit financing. This effectively doubled the minimum percentage of accessible units because the state TCAC requires 10% of units to be accessible for persons with mobility impairments, and 4% of the units to be accessible to people with sensory impairments. The TCAC requirements continue to be used and meet current ADA standards for projects received funding from the 2018 NOFA process. All projects are subject to design review for compliance and are required to obtain a CASP certification. LACDA continued its practice of requiring that 10% mobility units and 4% sensory units meet current ADA standards for accessibility for projects that received funding under the 2018 Notice of Funding Availability process. Projects underwent design review for compliance with accessibility requirements, and all projects are required to obtain CASp certification of accessible units and project features. LACDA staff hold preliminary pre-leasing meetings at the start of construction as well as pre-leasing meetings held 90 days prior to lease-up in order to review affirmative marketing, signage requirements, tenant selection, and waiting list policies for the accessible units. Projects are required to register accessible units on the Los Angeles County Housing Resource Center website in advance of the application process. In addition, the LACDA continued to participate in a Cooperation Agreement with the City of Los Angeles Housing and Community Investment Department to maintain a City of Los Angeles partner page that would also be used to register accessible units must be registered on the Los Angeles County Housing Resource Center (LAC-HRC) website prior to t
		ZUZ9 HOUSING Element.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
26. Homeowner Fraud Prevention	Continue to provide fraud prevention counseling services to low- and moderate-income homeowners during the planning period.	There are no recent updates to the Homeowner Fraud Prevention program. The Department of Consumer and Business Affairs continues to provide ongoing fraud prevention counseling services to low- and moderate-income homeowners. Continued Appropriateness This is not included in the 2021-2029 Housing Element.
27. Reasonable Accommodatio ns Ordinance	 Review reasonable accommodation practices and application forms to eliminate any barriers for individuals seeking accommodations and increase public awareness of the Reasonable Accommodations Ordinance (by 2014). Clarify the definition of "individual with a disability" and remove outdated application requirements in the Reasonable Accommodations Ordinance through the Technical Update of the Zoning Code (by 2015). Consider amendments to the notification and appeals provisions of the Ordinance to ensure the protection of the privacy rights of persons with disabilities through the Zoning Ordinance Update Program (by 2016). 	The Board adopted the Technical Update to the Zoning Code in January 2019. The Technical Update includes a simplified definition of "individual with a disability." Continued Appropriateness This program has been updated and is included in the 2021-2029 Housing Element.
28. CEQA Streamlining	 Design planning documents within urbanized areas near employment and transit to allow development with a streamlined environmental review, to the extent possible (ongoing). Develop tools to facilitate the use of applicable exemptions and streamlining provisions for infill projects and affordable housing projects in CEQA (by 2014). 	In 2016, DRP revised and used the CEQA Streamlining Guidelines to determine whether projects are eligible for CEQA exemptions or streamlining. In 2018, DRP developed resources to understand the CEQA exemptions and streamlining provisions for affordable housing and infill projects. DRP also developed GIS layers of environmental data to assist the staff review of CEQA exemptions related to flood hazards, farmlands, wetlands, fire hazards zones, sensitive habitat areas, etc. Continued Appropriateness This routine staff function is not included in the 2021-2029 Housing Element as a separate program.
29. Coordination and Implementation	Create and implement a streamlined entitlements procedure for all stages of the development process to expedite the development of affordable housing (by 2018).	The County established a working group dedicated to supporting projects for the Affordable Housing and Sustainable Communities Program. This group focuses on streamlining interdepartmental coordination around affordable housing and consists of staff from LACDA, DRP, Chief Sustainability Office, Department of Public Health, Chief Executive Office, Department of Parks and Recreation, and Public Works. Housing Data Tracking Table The County developed a housing data tracking tool utilizing EPIC-LA to capture the number of market rate and affordable residential units that are entitled and constructed every year.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
		The County will now more easily track the number of projects that utilize the County's Density Bonus Ordinance (DBO) and the additional units created by the DBO, as well as the number of new homeless/emergency shelter beds and family shelters that are approved every year. One-Stop Meetings DRP coordinates monthly "one-stop" meetings to provide feedback on projects before applicants submit a complete application. County agencies, such as Public Works, Fire Department, Department of Public Health, LACDA, and DRP provide written comments on draft plans and application materials to prevent delays and further streamline the review process. A representative from every agency attends the meetings, discusses comments with the applicant, provides a timeline for review, and provides information on fees. EPIC-LA e-Reviews DRP initiates the e-Reviews process with multiple County agencies after a complete application is received. County staff review the same digital file and provide comments and necessary clearances electronically. Applicants see the progress and submit revisions electronically. Affordable Housing Case Planners DRP designated a team of planners to serve as a single point of contact for all applicants providing affordable units. The planners review all affordable housing projects and counsel any applicant on the County's DBO. The team implemented AB 2162, SB 35 and AB 1763 to increase affordable and permanent supportive housing production countywide. Housing Policy Section A team of planners specializing in housing policy completed the By-Right Housing Ordinance, Interim and Supportive Housing Ordinance, Affordable Housing Preservation Ordinance, Inclusionary Housing Ordinance, Accessory Dwelling Unit Ordinance Update, Density Bonus Ordinance Update, and Compact Lot Subdivision Ordinance. The Housing Policy Section supports the Department's compliance with State laws by issuing informational memos, advising case planners, and creating implementation materials for staff and the public, such as applica
30. Housing Element Annual Progress Report	Prepare an annual report for submittal to HCD by April 1 during the planning period.	Housing Element annual progress reports were prepared annually throughout the planning period. Continued Appropriateness This routine staff function is not included in the 2021-2029 Housing Element as a separate program.
31. Monitoring Housing Issues	Ongoing efforts during the planning period will include, but are not limited to: • Attending housing and legislative review conferences.	Various County departments and agencies continue to coordinate and provide input on proposed housing legislation and implementation, as well as to pursue opportunities for affordable housing.

Table C-2: Review of 2014 Housing Element Programs

Program	Timeframe and Objectives	Progress/Status (Quantify if possible)
	 Attending training workshops. Consulting with housing professionals through the Development Advisory Group, etc. Working with the State to enhance and refine state mandated housing policies, including but not limited to the Mello Act, Affordable Housing Cost and Income Limits, the Density Bonus Law, and the Housing Element Law. Participating in regional planning efforts coordinated by the Southern California Association of Governments (SCAG). Interfacing with other County agencies and the public. 	Ongoing efforts include, but are not limited to: attending housing and legislative review conferences; attending training workshops; consulting with housing professionals; working with the State to enhance and refine state mandated housing policies; participating in regional planning efforts coordinated by SCAG; and interfacing with other County agencies and the public. County staff also worked with the CEO to coordinate legislative responses. Continued Appropriateness This routine staff function is not included in the 2021-2029 Housing Element as a separate program.

APPENDIX D: PUBLIC PARTICIPATION

The County implemented an engagement strategy tailored to the constraints set by the COVID-19 pandemic. This section summarizes outreach activities conducted as of November 18, 2021. Additional outreach will be conducted through Board of Supervisors adoption of the Housing Element, and will be summarized in the certified Housing Element.

The engagement featured 45 online workshops, stakeholder and community meetings that reached 813 attendees. County staff provided background on housing needs in the unincorporated areas, and how the Housing Element addresses those needs. Staff also explained the County's rezoning methodology and presented the interactive Story Map of proposed rezoning in communities.

County staff engaged all socio-economic segments of the community through flyers, emails, social media, a dedicated Housing Element website, an interactive Story Map, and a survey. The County received input from individuals and stakeholder groups with a wide range of experience and backgrounds. Stakeholder groups included community members, community serving organizations, developers, and housing advocates. Eight email blasts were sent to a mailing list that has grown to over 1,200 people, and the online survey produced a total of 349 responses.

In addition, County staff held nine public discussions on the Housing Element Update with representatives from the Board of Supervisors from September 2019 to October 2021, and provided seven updates to the Regional Planning Commission from July 2019 to April 2021. The Regional Planning Commission public hearing was held on September 1, 2021, and the Board of Supervisors public hearing was held on November 2, 2021.

MEETINGS AND COMMENTS RECEIVED

Housing Element Update meetings included nine countywide workshops hosted by DRP, 25 community group meetings, and 11 issue-focused stakeholder meetings.

The first workshop (July 30, 2020) introduced the Housing Element. The second and fourth workshops (September 22, 2020) were geared toward housing advocates, and the third workshop (January 23, 2021) provided additional information about the proposed Rezoning Program and also served as a scoping meeting for the Housing Element Update Environmental Impact Report.

Subsequent workshops were devoted to the "Big Ideas" of the Housing Element. These workshops provided background on the housing affordability crisis in the State and County. For these presentations, an artist created images to illustrate examples of how the crisis impacts the everyday lives of County residents (and how the Housing Element provides solutions).

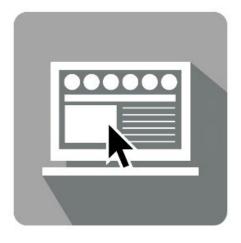

At community group meetings, County staff made presentations on the basic requirements of the Housing Element, presented the components of the County's Housing Element as well as the rezoning Story Map, and introduced the CEQA process.

Key feedback gathered during the series of workshops is provided in **Table D-1**, which includes comments from meetings and surveys, and how they are addressed by policies and programs.

A full list of stakeholder groups engaged in the Housing Element Update is provided in **Table D-2** (Entities and Groups Engaged in the Preparation of the Housing Element). The list includes community groups, housing advocates, and building industry representatives.

Community feedback highlighted the high cost of housing. Issues that stemmed from this include increased homelessness, overcrowding, and high rents. Other comments focused on providing specialized housing for people experiencing homelessness. People living in rural areas expressed concerns over protecting environmentally sensitive land and avoiding urbanization. Residents of built-up suburban areas suggested rezoning underutilized commercial areas. Some community members sought housing that would support a vibrant commercial street, while another key concern was increased traffic, overdevelopment, and potential exposure to pollution caused by more density. Stakeholders asked if parking structures would be considered for conversion into housing, and if building standards could be strategically adjusted to make it easier to build multifamily housing. Other comments called for alignment with the Climate Action Plan greenhouse gas emission reduction goals. Participants suggested a streamlined, interagency (i.e., Regional Planning, Fire, and Public Works) approach to promoting housing development. Other recommendations included a labor standards and/or a community wealth policy in the Housing Element Update that would require family supporting wages, and skills training and job access to community members for future housing construction projects.

County staff also collected surveys and/or provided informational materials at 33 Parks After Dark events; at the annual community meeting convened by the LACDA (held virtually in 2020); and the 2020 Homeless Initiative Conference.

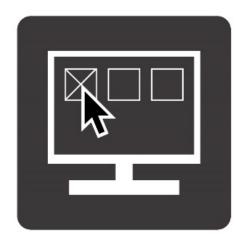

WEB SITE AND STORY MAP

County's Housing Element Update site web (https://planning.lacounty.gov/housing) served as the clearinghouse for information. Visitors to the web site could find contact information for DRP's Housing Policy section, obtain general information about the Housing Element and project timeline, as well as review draft materials. DRP posted a preliminary draft of the Housing Element Update on June 7, 2021, and a public hearing draft on July 30, 2021, and provided the public with the opportunity to submit their comments on the Draft Housing Element via email. DRP posted revised public

hearing drafts on its web site on August 19 and August 26, 2021. The revised public hearing drafts for the Board of Supervisors hearing were posted online on October 13 and October 27, 2021.

The Housing Element web site includes an interactive Story Map to present the Rezoning Program. The Story Map combines text, maps, and illustrations, and can be read in English or Spanish. The Story Map provides background about the purpose and regulatory context of the Housing Element, as well as the County's rezoning methodology. The Story Map illustrates the County's natural constraints and rezoning prioritization criteria.

SURVEY

County staff also gathered community input via an anonymous online housing survey. The survey was available in English and Spanish and could be completed on a computer or mobile device. The survey questions were related to existing and future housing needs and how the County should meet those needs.

Respondents were provided opportunities for unrestricted feedback. The survey results reflected a variety of participant perspectives, including those of homeowners, tenants, and advocates, including for people with disabilities, dispersed over a large geographic area. Most respondents indicated that they live, work, or own property in the unincorporated areas. The survey

reached people across Los Angeles County, from areas characterized by dense multifamily housing near transit and freeways, to rural and semi-rural areas.

While the vast majority of respondents live in single-family homes, others live in apartments, townhomes, and condominiums. A few respondents selected accessory dwelling unit, senior housing, mobilehome park, RV, supportive housing, indicated that they were experiencing homelessness, or selected "other" living situations.

In response to the question "What types of housing would you like to see more of in your community?" the top three responses were single-family homes, followed by supportive housing and senior citizen housing. Mobilehome parks received the fewest number of responses.

When asked "What should the County do to address the housing crisis in the unincorporated areas?" the most frequently selected response was to help residents with housing costs, followed by protecting owners and renters from fraud, displacement, and discrimination, and helping people locate available housing.

The survey contained policy goals to which respondents could indicate their level of support or opposition. The most-supported policy goal was that housing should be livable and well-designed, and contribute to the quality of neighborhoods. The policy goal that received the highest level of "do not support" responses was "The unincorporated areas should have a variety of housing types, such as single family houses, apartments, townhouses, fourplexes, etc."

The freeform survey responses reflected a wide range of experiences and perspectives. Some respondents did not support higher-density housing in their community due to concerns over community character, natural hazards, traffic, infrastructure, impact on services and/or crime. Others expressed a desire to build more housing on their own properties, such as ADUs and tiny homes, or more flexibility in building alternative housing types, such as shared housing. Other respondents wanted more affordable housing built, including supportive housing and housing for people with disabilities. Some respondents advocated for equal housing opportunities and enforcement of tenant protections, as well as financial assistance to help with housing costs. A copy of the survey is provided following **Table D-2**.

The following section identifies the goals, policies, and programs in the Housing Element, or existing ordinances, that address the public comments received.

SUMMARY OF COMMENTS RECEIVED

The general themes of public comments received are summarized. This summary does not attempt to reconcile the differences in opinions.

Table D-1: Summary of Comments and Housing Element Response

Comments

New development should provide strong community benefits, such as affordable space for local community-serving small businesses, access to green space and parklets, and a strong pipeline of good jobs such as local and targeted hire programs.

Ongoing Efforts and Housing Element Programs

standards that mitigate exposure to pollution and provide green space/parklets in underserved communities.

The County implements labor requirements for housing construction that are mandated by federal, State and local policies. Projects seeking streamlined ministerial review under Government Code section 65913.4 are subject to prevailing wage requirements pursuant to the State Prevailing Wage Law if they are more than 10 units or receiving public funds (in the case of condominiums, low income housing tax credits). Projects of 75 or more units (or 50 or more units for projects approved on or after January 1, 2022) that are not 100% affordable to lower or very low income households must also use a skilled and trained workforce in order to be eligible for streamlined ministerial review under Government Code section 65913.4.

The County's Local and Targeted Worker Hire Policy was adopted by the Board of Supervisors in October 2016 to ensure that local workers have employment opportunities on projects within their own communities. For affordable housing projects and mixed-use affordable housing projects that include County-funded facilities receiving funds administered by LACDA, and LACDA projects with a project budget greater than \$2.5 million, there shall be a best effort hiring goal of at least 30% qualified local residents and 10% Targeted Workers of California construction labor hours performed.

Cost of Housing

- High cost of housing; issues stemming from this concern include increased homelessness, overcrowding, and high rents.
- Homeownership not affordable.
- Housing for acutely low income households should be prioritized for short term implementation.
- Missing middle housing.

The County's Inclusionary Housing Ordinance requires that 5-20% of new units are affordable to extremely low, very low, or lower income tenants or middle-income home buyers. The number of affordable units that are required depends on the size of the project, whether it is rental or for-sale units, and the level of affordability provided. The County is updating its inclusionary feasibility study in an effort to include more communities. In addition, the County will enhance the existing inclusionary requirements in conjunction with Adequate Sites for RHNA program.

The Compact Lot Subdivision Ordinance establishes provisions for compact lot subdivisions in multifamily residential zones. This allows for subdivisions to create "compact lots" that are less than the typical

Comments	Ongoing Efforts and Housing Element Programs
 a database of tenant complaints and adequately documenting when tenants are being threatened with harassment. The County must expand StayHoused LA and adopt a codified right to counsel for tenants in eviction proceedings as a program in the Housing Element. The County should enact an annual cap on demolition and condo conversions of RSO units. 	
Fair Housing	
 Strengthen tenant protections against discrimination, including discrimination based on source of income, eviction history, credit, rent or utility debt, or criminal history. The County should ensure that housing developers conduct local outreach and market new units in the most commonly spoken languages in the community. 	The Affirmatively Furthering Fair Housing Program outlines the County's multiple efforts to promote equal access to housing. The program has been revised to explore adding protections for eviction history, credit, rent or utility debt, or criminal history. The Equity Audit of Land Use Plans, Zoning Code and Infrastructure Planning program has been revised to include that LACDA will update the County's standard affordability covenant language to ensure that housing developers conduct local outreach and market new units in the most commonly spoken languages in the community.
Governmental Constraints	
 Building standards could be strategically adjusted to make it easier to build multifamily housing. Onus is on the architect and developer to navigate approvals from multiple agencies. Online one-stop digital plan submittal is a basic need for both private and non-profit developers. County's entitlement process for housing 	The Compact Lot Subdivision Ordinance establishes provisions for compact lot subdivisions in multifamily residential zones. This allows for subdivisions to create "compact lots" that are less than the typical minimum area of 5,000 square feet and minimum lot width of 50 feet. The By-Right Housing Ordinance encourages infill development in urbanized areas by allowing multifamily housing by-right in commercial zones where appropriate (such as outside of Hillside Management Areas).

HOUSING ELEMENT SURVEY (ENGLISH AND SPANISH)

A copy of the survey is provided on the following pages.

Housing Element Update Survey

The County of Los Angeles is currently updating the Housing Element of the General Plan. The County's Housing Element serves as a policy guide to address housing needs for the unincorporated areas of Los Angeles County. The primary focus of the Housing Element is to ensure decent, safe, sanitary, and affordable housing for current and future residents of the unincorporated areas, including those with special needs. Your voice is important in this process. We invite you to help inform the Housing Element Update by answering the following questions.

1. Where do you live? (ZIP code)
The value must be a number
2. Do you live, work, or own property in an unincorporated community of Los Angeles County?
An unincorporated community is an area that is not within the City of Los Angeles or any other city.
Yes, I live, work, or own property in an unincorporated community of Los Angeles County
O No, I do not live, work, or own property in an unincorporated community of Los Angeles County
○ I don't know

5/5/2021

. If you live, work, or own property in an unincorporated community of Los Angeles County, which community(ies)? Please explain below.	

4. What type of housing do you live in?				
○ Apartment				
Condominium				
Single-family home				
Townhome				
O Fourplex/triplex				
O Duplex				
Senior citizen housing				
Mobilehome park				
○ Vehicle/RV				
Supportive housing				
Interim/transitional housing (for example, shelter)				
Accessory dwelling unit (ADU)				
Experiencing homelessness (unsheltered)				
Other				

5/5/2021

Vhat types of housing would you like to see more of in your community? Choose all hat apply.
Apartments
Condominiums
Single-family homes
Townhomes
Fourplexes/triplexes
Duplexes
Senior citizen housing
Mobilehome parks
Supportive housing
Interim/transitional housing (for example, shelters)
Accessory dwelling units (ADUs)
Other

6. What should the County do to address the housing crisis in the unincorporated areas? Choose your top three policy areas.
Allocate more money to build housing
Remove red tape to help housing get built faster
Help people locate available housing
Help residents with housing costs
Encourage more housing next to transit and jobs
Encourage innovation in housing design and development
Protect owners and renters from fraud, displacement, and discrimination
Other

7. The County will identify several goals to address housing needs in unincorporated areas. Please indicate your level of support for the following goals:

	Support	Somewhat support	Do not support
The unincorporated areas should have a variety of housing types, such as single family houses, apartments, townhouses, fourplexes, etc.	0	0	0
The unincorporated areas should have housing to accommodate all incomes and special needs.	0	0	0
Housing should be livable and well-designed, and contribute to the quality of neighborhoods.	0	0	0
Preserving existing housing, particularly affordable housing, is just as important as building new housing.	0	0	0
Housing should be accessible to people with disabilities without discrimination.	0	0	0

Encuesta Para la Actualización del Capítulo de Vivienda

El Condado de Los Ángeles está actualizando el Capítulo de Vivienda del Plan General. El Capítulo de Vivienda sirve como una guía de políticas para abordar la necesidad de vivienda para las áreas no incorporadas del Condado de Los Ángeles. El Capítulo de Vivienda del Condado se centra principalmente en asegurar vivienda decente, segura, sana y asequible para los residentes actuales y futuros de las áreas no incorporadas, incluso los con necesidades especiales. Su voz es importante en este proceso. Le invitamos a que nos ayude formar la actualización del Capítulo de Vivienda con sus respuestas a las siguientes preguntas.

1.	. ¿Dónde vive? (código postal)
	El valor debe ser un número.
2.	. ¿Vive, trabaja, o es dueño/a de propiedad en una comunidad no incorporada del Condado de Los Ángeles?
	Una comunidad no incorporada es un área que no está dentro de la Ciudad de Los Ángeles ni otra ciudad
	Sí, yo vivo, trabajo, o soy dueño/a de propiedad en una comunidad no incorporada del Condado de Los Ángeles
	No, no vivo, trabajo, ni soy dueño/a de propiedad en una comunidad no incorporada del Condado de Los Ángeles
	○ No sé

5/5/2021

. Si vive, trabaja Condado de L	a, o es dueño/a .os Ángeles, po		rporada del

4. ¿En qué tipo de vivienda vive usted?
Apartamento (de 5 o más unidades de vivienda)
Condominio
Casa unifamiliar
Casa adjunta
4-plex/triplex
O Duplex
O Vivienda para personas de la tercera edad
Comunidad de casas móviles
Vehículo/ Vehículos Recreacionales
Vivienda con servicios de apoyo
Vivienda interina/temporal (por ejemplo, refugio)
Vivienda secundaria a la residencia principal (ADU)
Sin hogar (sin refugio)
0
Otras

5/5/2021

APPENDIX E: AFFIRMATIVELY FURTHERING FAIR HOUSING

ASSESSMENT OF FAIR HOUSING (AFH)

In 2017, Assembly Bill 686 (AB 686) introduced an obligation to affirmatively further fair housing (AFFH) into California state law. AB 686 defined "affirmatively further fair housing" to mean "taking meaningful actions, in addition to combat discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity" for persons of color, persons with disabilities, and other protected classes. The Bill added an assessment of fair housing to the Housing Element, which includes the following components:

- A summary of fair housing issues and assessment of the jurisdiction's fair housing enforcement and outreach capacity;
- An analysis of segregation patterns and disparities in access to opportunities;
- · An assessment of contributing factors;
- An identification of fair housing priorities and goals; and
- Strategies and actions to implement those priorities and goals.

The AFFH rule was originally a federal requirement applicable to entitlement jurisdictions (with populations over 50,000) that can receive HUD Community Planning and Development (CPD) funds directly from HUD. Before the 2016 federal rule was repealed in 2019, entitlement jurisdictions were required to prepare an Assessment of Fair Housing (AFH) or Analysis of Impediments to Fair Housing Choice (AI). AB 686 states that jurisdictions can incorporate findings from either report into the Housing Element.

Data Availability

For the purpose of HUD CPD funds (CDBG, HOME, and ESG),³ the County of Los Angeles functions as the lead agency to receive these funds on behalf of 48 small cities (with population less than 50,000) and the unincorporated areas. Collectively, this geography is known as the Urban County. Much of the data provided by HUD for the purpose of housing and community development, disproportionate needs, and the AFFH analysis is based on this collective Urban County geography. Separate data for just the unincorporated areas is not available without extensive manipulation, which tends to exaggerate the margins of error. For the Housing Element Needs Assessment, the County utilized the complex methodology (subtracting 88 cities from the County level data) to generate estimates on demographic and housing characteristics for unincorporated Los Angeles County. This methodology can introduce larger margins of errors and the resultant estimates are used as points of reference only. Using the general estimates for this detailed assessment of fair housing may not be appropriate.

Similarly, LACDA contracts with the Housing Rights Center (HRC) for fair housing outreach and enforcement services. Currently, HRC's contracted scope of services does not include reporting fair housing records by geographic area (separating records for individual cities and the unincorporated areas). The lack of specific fair housing records by geographic area makes it difficult for the County to understand the nature and extent of housing discrimination and to tailor appropriate resources. This Housing Element includes an action to request a change in the scope of fair housing services in future years.

Assessment of Fair Housing Issues

This section summarizes the 2018 Analysis of Impediments to Fair Housing Choice (AI) prepared by the Los Angeles County Development Authority (LACDA) for the Urban County, and supplements it with additional data as available and appropriate.

Fair Housing Enforcement and Outreach

Los Angeles County is subject to state and federal laws related to fair housing. Federal fair housing laws, including the Federal Fair Housing Act of 1968 (FHA) and the Fair Housing Amendments Act of 1988 (FHAA), protect residents from discrimination on the basis of race, color, religion, national origin, sex/gender, handicap/disability, and familial status. The County complies with the California Fair Employment and Housing Act (FEHA), prohibiting discrimination based on marital status, ancestry, source of income, sexual orientation, and arbitrary discrimination in addition to the groups protected under federal fair housing legislation.

Unincorporated Los Angeles County is part of the Urban County program, which contracts with the Housing Rights Center (HRC) for fair housing services. In FY 2019-2020, HRC received 2,038 calls for general housing inquiries and 356 calls related to fair housing inquiries. Among the 356 inquiries, fair housing issues relating to disabilities (physical and mental) represented the majority (82 percent) of the protected classifications. Trailing distantly behind was source of income at 5 percent of the inquiries.

The HCD AFFH Data Viewer provides HUD Office of Fair Housing and Equal Opportunity cases at the County level. **Table E-1** compares FHEO cases in Los Angeles County in 2010 and 2020. The total number of cases have decreased significantly since 2010. In 2010 and 2020, cases with a disability bias were the most common. Cases with a disability bias represented 66 percent of all cases in 2020, compared to only 36 percent in 2010. The proportion of cases with a racial or familial status bias has decreased over the last 10 years.

Table E-1: Los Angeles County FHEO Cases (2010-2020)

	2010 Cases Percent		2020		
			Cases	Percent	
with a Racial Bias	80	27%	27	21%	
with a Disability Bias	106	36%	86	66%	
with a Familial Status Bias	58	20%	9	7%	
Total Cases	291	100%	130	100%	

Source: HCD AFFH Data Viewer (HUD FHEO 2010-2020), 2021.

³ Community Development Block Grants (CDBG); HOME investment Partnership (HOME); and Emergency Solutions Grants (ESG).

During FY 2019-2020, 83 fair cases were opened, with the majority being reconciled or withdrawn. Two cases were referred to litigation and three cases were referred to the Department of Fair Employment and Housing (DFEH). Among the 83 cases opened, physical disability (47 percent), mental disability (22 percent), and source of income (19 percent) represented the majority of the protected classes.

Annually, HRC conducts outreach and education throughout the Los Angeles Urban County. Typical activities include Public Service Announcements/media/advertisements; community presentations; literature distribution; and management trainings.

Fair Housing Considerations for Housing Element Update Outreach

The County's outreach strategy incorporated fair housing considerations. Six outreach meetings were focused on communities with R/ECAPs. Residents in communities with R/ECAPs raised concerns over balancing the need for affordable housing with issues, such as parking and traffic. Other feedback included support for streamlining ADUs. The Metro Area Plan, Westside Area Plan, Accessory Dwelling Unit Construction Program, Comprehensive Residential Design and Development Standards Program, and Residential Parking Program Analysis and Code Update address these specific concerns.

As described in Appendix D, the County reached out to residents of urban, suburban, and rural communities. The County held five workshops, one for each Supervisorial District, to present the "Big Ideas" of the Housing Element. These workshops provided background on the housing affordability crisis in the State and County and how the Housing Element can address the crisis. The County presented the Housing Element at community-specific meetings in all seven Planning Areas with units in the Sites Inventory and Rezoning Program. This includes ten community-specific meetings in the Metro Planning Area, covering the neighborhoods of East Los Angeles, West Rancho Dominguez, Walnut Park, and Florence-Firestone, where there are numerous challenges to fair housing. In addition, staff engaged fair housing advocates with two Countywide focus group meetings and additional follow-up meetings, as well as a tabling event at the 2020 conference of the Los Angeles County of Los Angeles Homeless Initiative. A list of groups reached during Housing Element Update outreach is provided in Appendix D (**Table D-2**).

The County's outreach program was designed to also engage Spanish speakers. County staff translated the Housing Element informational flyer, survey, and Rezoning Program interactive Story Map, presented bilingual slides at outreach meetings, provided a dedicated phone line for Spanish-language inquiries, and made interpretation available at workshops and meetings. A preliminary survey for unincorporated areas residents was also translated into Spanish and Mandarin.

Furthermore, advocates for people with disabilities were also engaged in the Housing Element, attending outreach meetings and helping with survey distribution.

Integration and Segregation

Race and Ethnicity

HUD tracks racial or ethnic dissimilarity⁴ trends for Urban County programs. Dissimilarity indices show the extent of distribution between two groups, in this case racial/ethnic groups, across census tracts. The following shows how HUD views various levels of the index:

- <40: Low Segregation
- 40-54: Moderate Segregation
- >55: High Segregation

The indices for the Los Angeles Urban County and Los Angeles County region from 1990 to 2020 are shown in **Table E-2**. Dissimilarity between non-White and White communities in the Los Angeles Urban County and throughout the Los Angeles County region has worsened since 1990. For both Los Angeles Urban County jurisdictions and the entire county, dissimilarity between Black and White communities has improved, while dissimilarity between Hispanic/White and Asian or Pacific Islander/White communities has worsened. Based on HUD's index, segregation between Asian or Pacific Islander/White Los Angeles Urban County communities is moderate, while segregation between non-White/White, Black/White, and Hispanic/White Los Angeles Urban County communities is high.

Table E-2: Racial or Ethnic Dissimilarity Trends

	1990	2000	2010	2020
Los Angeles Urban County				
Non-White/White	53.33	53.62	53.85	55.87
Black/White	68.29	63.51	60.24	64.21
Hispanic/White	62.81	64.99	64.38	65.12
Asian or Pacific Islander/White	41.58	48.57	49.62	52.79
Los Angeles County Region				
Non-White/White	55.32	55.50	54.64	56.94
Black/White	72.75	68.12	65.22	68.85
Hispanic/White	60.12	62.44	62.15	63.49
Asian or Pacific Islander/White	43.46	46.02	45.77	49.78

Source: HUD AFFH Data, 2020.

Ethnic and racial composition of a region is useful in analyzing housing demand and any related fair housing concerns, as it tends to demonstrate a relationship with other characteristics such as household size, locational preferences, and mobility. According to the 2012-2016 ACS, approximately 76 percent of the households (or 81 percent of the population) in the unincorporated areas belong to a non-White group. **Figure E-1: Racial/Ethnic Majority by Census Tract** shows the geographic concentrations of various groups. For example, San Gabriel Valley (east and west) continues to expand as a subregion that attracts significant numbers of Asian residents. The availability

⁴ Index of dissimilarity is a demographic measure of the evenness with which two groups are distributed across a geographic area. It is the most commonly used and accepted method of measuring segregation.

of different Asian-focused services – such as grocery stores and restaurants – has resulted in a subregion that is primarily Asian. While Hispanic residents have concentrated in several locations (Palmdale, Gateway, and San Gabriel Valley), Hispanic and Asian residents also tend to live in neighboring communities in the San Gabriel Valley. The South Los Angeles area continues its historical trend as an area with a high concentration of Black residents. However, in recent decades, many Black residents have moved out of Los Angeles County and into Riverside and San Bernardino counties in search of more affordable housing.

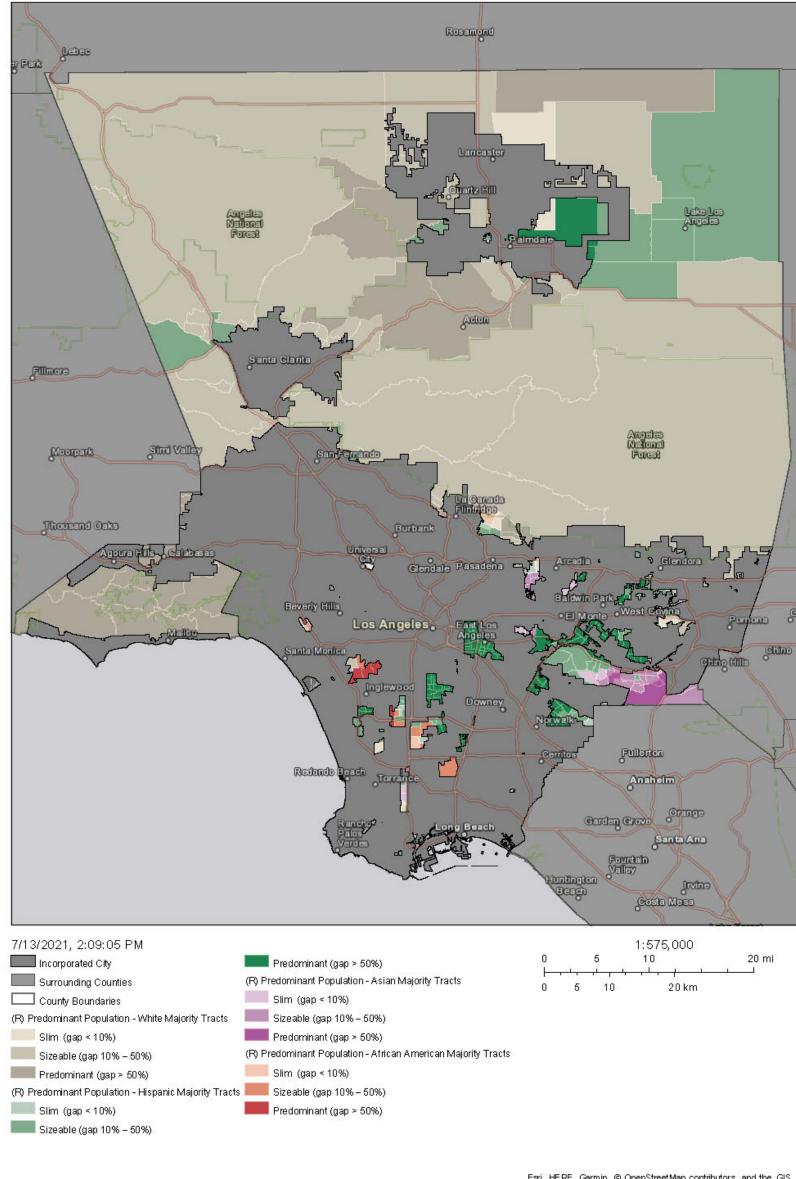

Figure E-1: Racial/Ethnic Majority by Census Tract

Esri, HERE, Garmin, @ OpenStreetMap contributors, and the GIS user community
Esri, HERE, Garmin, USGS, EPA, NPS

CA HCD

Figure E-2 combines the concentration of all non-White populations in 2018. Communities where racial/ethnic minorities are the predominant population are generally located in the southern, southeastern, and northeastern areas of Los Angeles County. Many of these areas have Hispanic/Latino predominant populations. Unincorporated areas in the south central areas are predominantly Black, and southeastern areas are predominantly Asian. According to the HCD AFFH Data Viewer, since 2010, a majority of unincorporated Los Angeles County

communities have seen increases in racial/ethnic minority populations. The following unincorporated areas have the largest non-White majority populations:

- Lennox, Florence-Firestone, Walnut Park, Willowbrook, East Rancho Dominguez, East Los Angeles, West Whittier-Los Nietos, South Whittier-Sunshine Acres, Avocado Heights, West Puente Valley, Valinda, South San Jose Hills, and northeastern communities in the Antelope Valley have Hispanic majority populations.
- View Park, Windsor Hills, and West Athens-Westmont have African American majority populations.
- Hacienda Heights and Rowland Heights have Asian majority populations.

The history and characteristics of the racially/ethnically concentrated unincorporated communities, including East Los Angeles, Ladera Heights, View Park/Windsor Hills, Rowland Heights, Altadena, Sun Village, Florence-Firestone, and Willowbrook are described below.

East Los Angeles (Metro Planning Area)

In the 1920's, the population of immigrants from Mexico increased in East Los Angeles due to employment opportunities. The area's proximity to commerce and industry near downtown Los Angeles made it a convenient place to live and raise a family. The Chicano activism movement began in East Los Angeles during the late sixties and early seventies because of discrimination by neighboring communities. East Los Angeles has retained its character over the last 60 years and is studied and documented as a long-standing Mexican American community. The Los Angeles Times "Mapping L.A." survey found East Los Angeles to be the least ethnically diverse community in Los Angeles County. Over 97 percent of the residents are of Hispanic origin with 87 percent speaking Spanish as a first language. As shown in **Figure E-1**, the population of East Los Angeles today continues to be prominently Hispanic. East Los Angeles offers the services, amenities, and social ties that are important to Hispanic residents, particularly recent immigrants. In 2010, most block groups in this area were comprised of fewer than 60 percent racial/ethnic minorities. The non-White population has significantly increased since; more than 80 percent of the population in these block groups now belong to a racial/ethnic minority population.

Ladera Heights, View Park/Windsor Hills (Westside Planning Area)

African Americans were prevented from purchasing property or living in the area until racially restrictive covenants were invalidated in 1948. Today, approximately 73 percent of residents in Ladera Heights and View Park/Windsor Hills are African American. Ladera Heights and View Park/Windsor Hills are part of a band of neighborhoods that comprise one of the largest, wealthiest, most educated geographically contiguous historically black communities in the western United States. Ladera Heights and View Park/Windsor Hills are recognized as the wealthiest black communities in the country, and countless African American celebrities and sports personalities have called the area home. While the population today remains largely African American, there is a demographic shift underway of new residents due to the area's convenient proximity to well-paying jobs and recreational amenities in nearby beach communities and the Los Angeles basin. Block groups in this area have had higher concentrations of racial/ethnic minority populations since 2010. In 2010, between 40 and 80 percent of the population in most block groups belonged to a racial or ethnic minority group. In comparison, more than 80 percent of the population in most block groups were non-White in 2018.

Rowland Heights (East San Gabriel Valley Planning Area)

Rowland Heights was known as "Little Taipei" in the late 20th century following an influx of immigrants from Taiwan. Rowland Heights and neighboring communities, such as Hacienda Heights, have also attracted upper-class immigrants from China and South Korea. Rowland Heights grew significantly during the 1990s, becoming one of the cultural centers for the Chinese diaspora in Los Angeles County. In recent years, many Chinese immigrants have purchased homes and started small businesses in the area. The San Gabriel Valley Planning Area has seen significant increases in racial/ethnic minority populations since 2010. In 2010, many block groups in the area had non-White populations of less than 60 percent. Currently, a majority of block groups in this region have racial/ethnic minority populations exceeding 80 percent.

Altadena (West San Gabriel Valley Planning Area)

Altadena was subdivided in the late 19th century and envisioned to become a rural suburb for millionaires north of Pasadena. The area known as "Altadena Meadows" was exempt from redlining and thrived to become one of first middle-class African American neighborhoods in the area. Altadena managed to maintain its unique rural character as well as the blending of residents from all income levels. In the 1960s, following lawsuits surrounding the desegregation of Pasadena public schools and displacement of African Americans by the routing of two major freeways in the area, and redevelopment in Pasadena, much of the white population in moved out of Altadena to newer suburbs. By 1975, half of the white population had left and were replaced by people of color. Today, approximately 25 percent of the population in Altadena is African American. In addition, in recent years, Altadena is experiencing somewhat of a different trend. Altadena has become a more affordable alternative to Pasadena. Many younger families of different races (Asian, Hispanic, and White) have moved into Altadena, purchasing and renovating older homes in the neighborhood.

Sun Village (Antelope Valley Planning Area)

Due to redlining restrictions in the City of Palmdale and neighboring communities, African Americans had few options to purchase land in the Antelope Valley. The community of Sun Village was established by an African American lawyer from Chicago, who purchased the land in 1939. Sun Village was reputed to be underdeveloped though there were services including a post office, businesses, and various civic organizations. The resiliency of Sun Village is a source of pride for its residents who are determined that the history of the community be included in any future narrative. Today, almost 60 percent of the population remains African American and the community operates its own chamber of commerce and town council. The centerpiece of the community is Jackie Robinson Park. It was developed by the County on land donated by the Sun Village Women's Club and was dedicated in-person by Jackie Robinson. Boosters raise funds throughout the year to support after-school programs including homework tutoring, sports, music, marching, and cheerleading.

Florence-Firestone (Metro Planning Area)

In the 19th century, the Southern Pacific Railroad and the Pacific Electric Red Cars had stops along Florence and Graham streets giving the area its name: Florence-Graham. In more recent years it was rebranded by the County to Florence-Firestone—a reference to its main east/west boulevards. Florence-Firestone was and remains today a common starting point for new arrivals to Los Angeles. Its proximity to downtown and jobs in the manufacturing core as well as public transit make it a convenient place to live. Beginning with European immigrants in the early 20th century and then African Americans relocating from the South for a better quality of life, by the late 20th century, immigrants from Central and South America began arriving. Today, 91 percent of residents in Florence-Firestone are of Hispanic origin and 87 percent are Spanish-speaking. Modest homes on small lots with an eclectic array of small businesses serve the local population.

Willowbrook (Metro Planning Area)

Just prior to the turn of the 20th century, the unincorporated community of Willowbrook grew up around a stop along the newly opened Pacific Red Car line. The first library in the Los Angeles County Public Library system was established in Willowbrook in 1903. The Pacific Electric Red Cars gave the subdivisions of large, rural lots efficient access to downtown Los Angeles and the ports at Long Beach. Following the ban on segregation and red lining in the late 40's, African Americans began moving into Willowbrook for the opportunity to keep livestock and the ability to grow large farm gardens. According to long-time residents, over the decades, cycles of promises made and not kept have resulted in displacement and caused a deep distrust in government and other outside forces. In recent years, Willowbrook has seen the start of a renaissance. Billions of dollars of public investment have resulted in massive public transportation infrastructure improvements, a new hospital and revitalized public health campus, and a new public library. There are also new green spaces including the County's first "green alley" and a beloved community vegetable garden with more in the works. Hundreds of housing units are being constructed and will be made available to existing residents in need of affordable housing. Sustained and continuing investments will be needed to fully regain the trust of local residents.

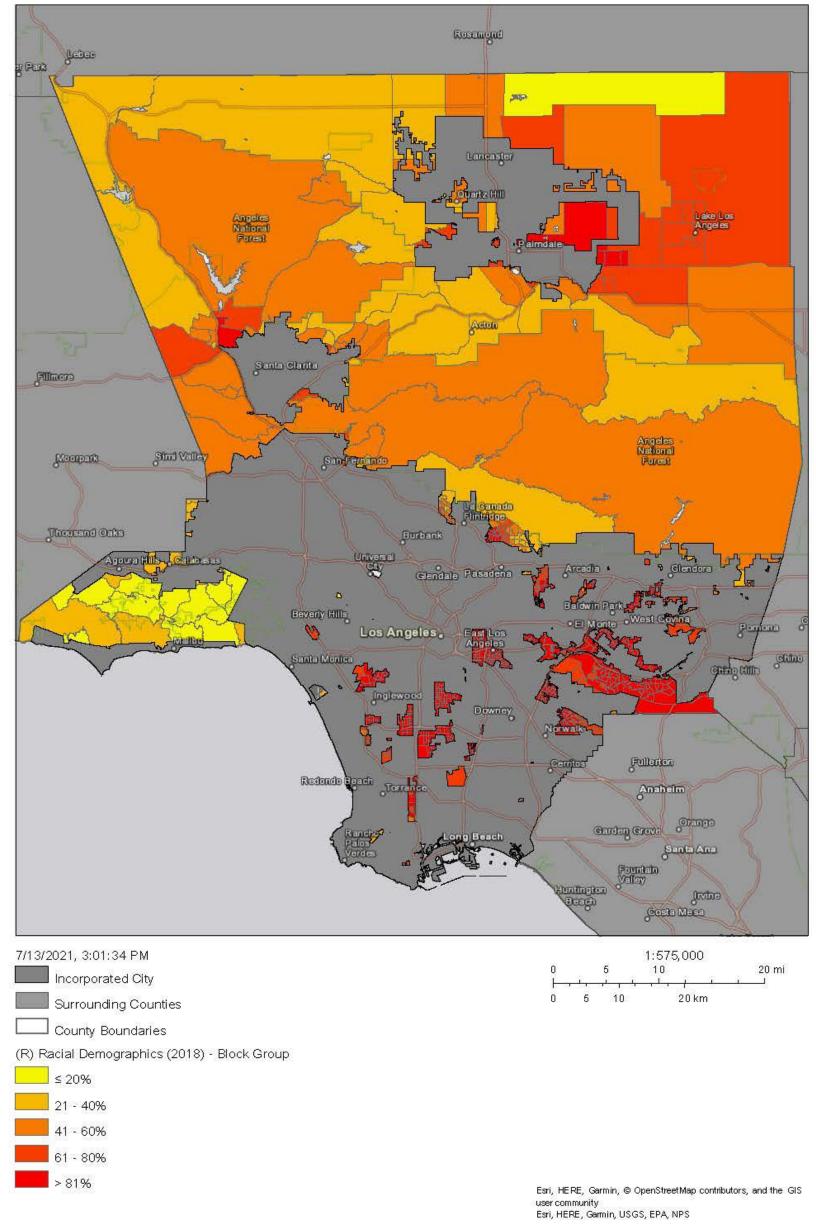

Figure E-2: People of Color Concentrations by Block Group

Disability

According to the 2014-2018 ACS, nearly 10 percent of Los Angeles County residents experience a disability. The 2018 Al included a survey in which over a third of respondents with a disability experienced difficulty getting around their neighborhood or housing complex, and approximately 10 percent of respondents indicated their homes had problems limiting accessibility. Discrimination complaints related to physical disability (47 percent) and mental disability (22 percent) were the most common.

Census tracts with a high number of persons with disabilities are generally not concentrated in specific areas of Los Angeles County. Unincorporated areas with larger populations of persons with disabilities are located in northeastern Santa Clarita Valley and West Los Angeles (Sawtelle VA)⁵. The percentage of persons with disabilities by census tract are shown in **Figure E-3**: **Population of Persons with Disabilities by Census Tract**.

_

⁵ The West Los Angeles (Sawtelle VA) unincorporated community, with the exception of one privately-owned parcel, is comprised of the United States Department of Veterans Affairs West Los Angeles campus, which provides services to veterans and is being further developed with permanent supportive housing under a master plan.

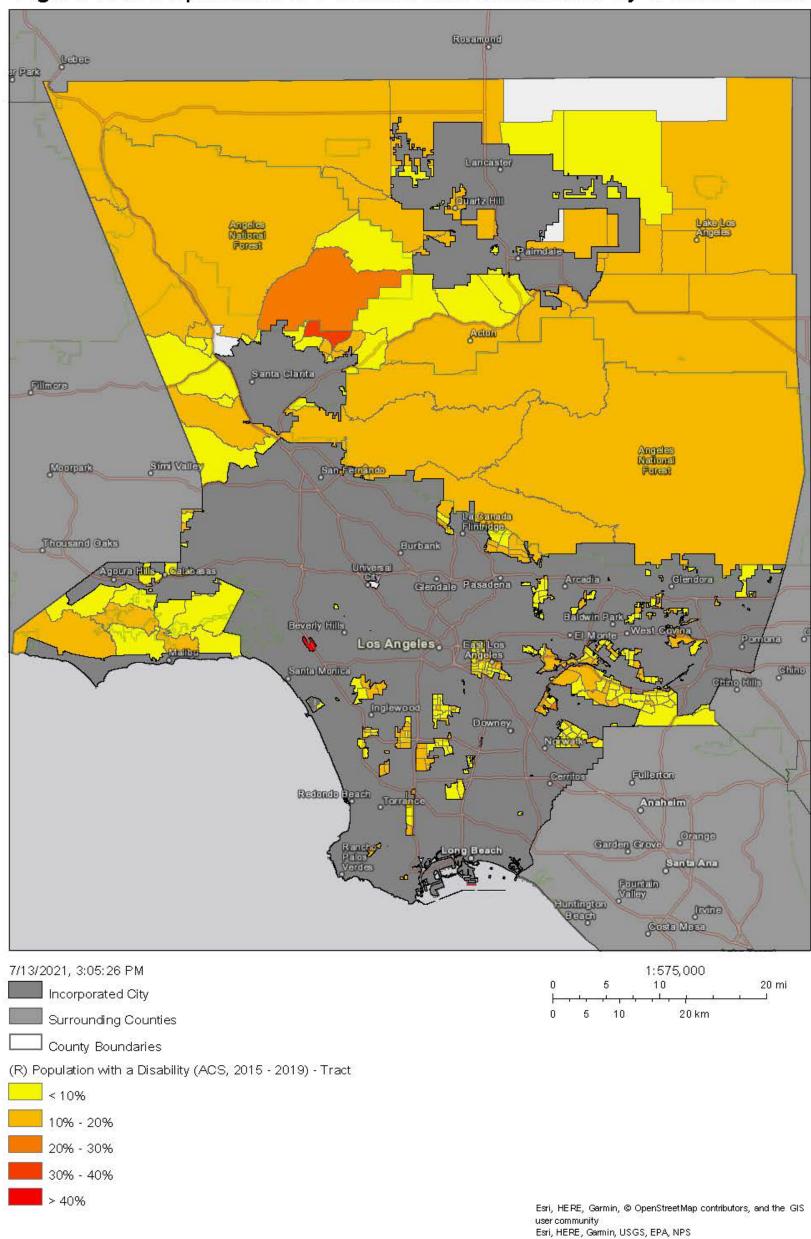

Figure E-3: Population of Persons with Disabilities by Census Tract

CA HCD

Familial Status

Familial status refers to the presence of children under the age of 18, whether the child is biologically related to the head of household, and the marital status of the head of households. Families with children may face housing discrimination by landlords who fear that children will cause property damage. Some landlords may have cultural biases against children of the opposite sex sharing a bedroom. Differential treatment, such as limiting the number of children in a complex or confining children to a specific location, is also a fair housing concern. Approximately 28.8 percent of households in Los Angeles County are families with children. As shown in **Figure E-4**, children in married couple families are concentrated in Ladera Heights-View Park, Del Aire, Alondra Park, and Westfield; communities in the eastern county including Whittier, La Habra Heights Island, and South Diamond Bar; the San Gabriel foothill communities; the Santa Clarita Valley and the Antelope Valley.

Female-headed households with children require special consideration and assistance because of their greater need for affordable housing and accessible day care, health care, and other supportive services. Children in female-headed households are most concentrated in some eastern Antelope Valley communities (**Figure E-5**).

Figure E-4: Children in Married Couple Households by Census Tract

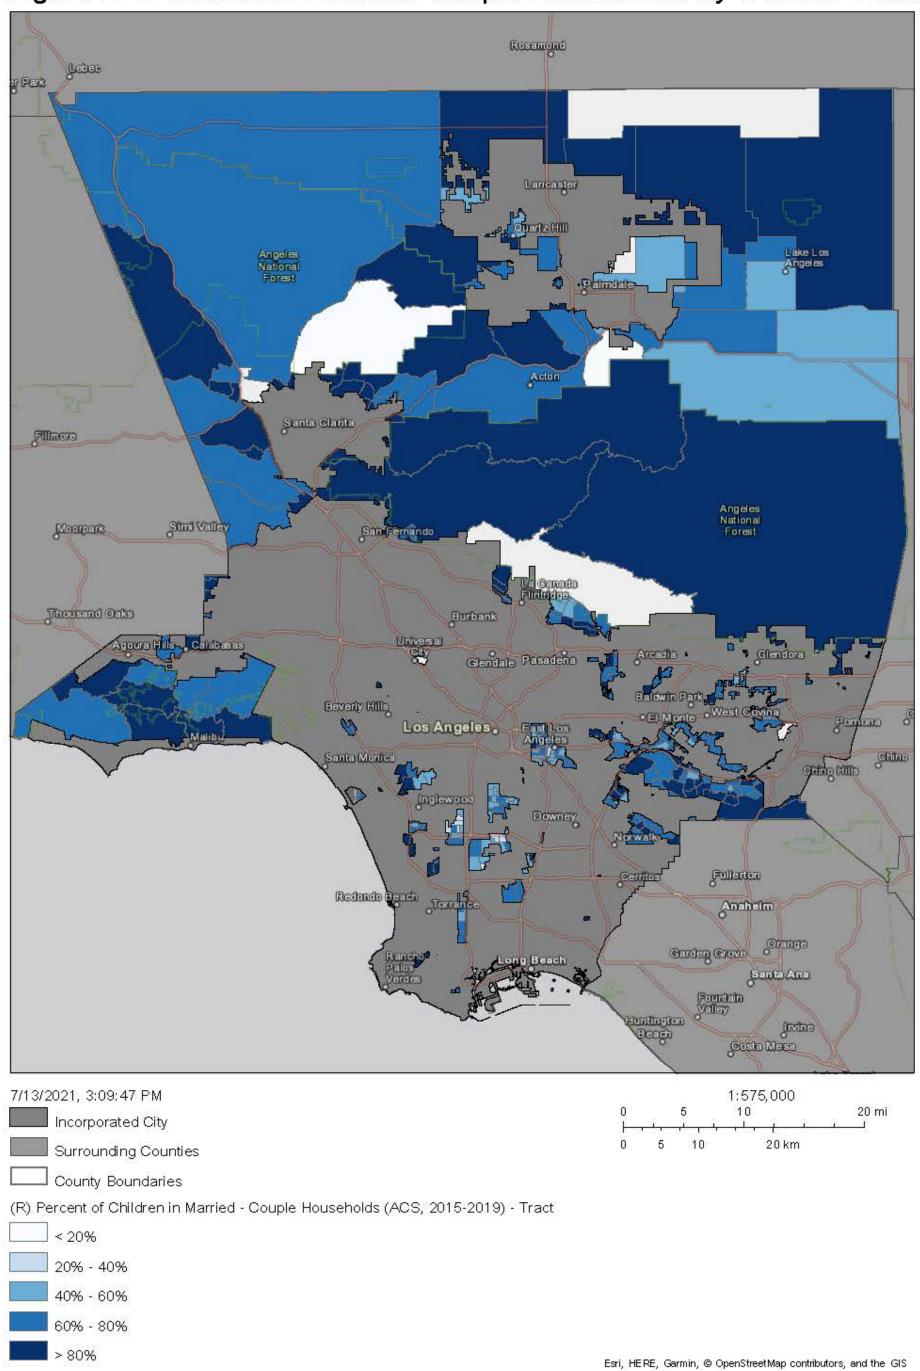

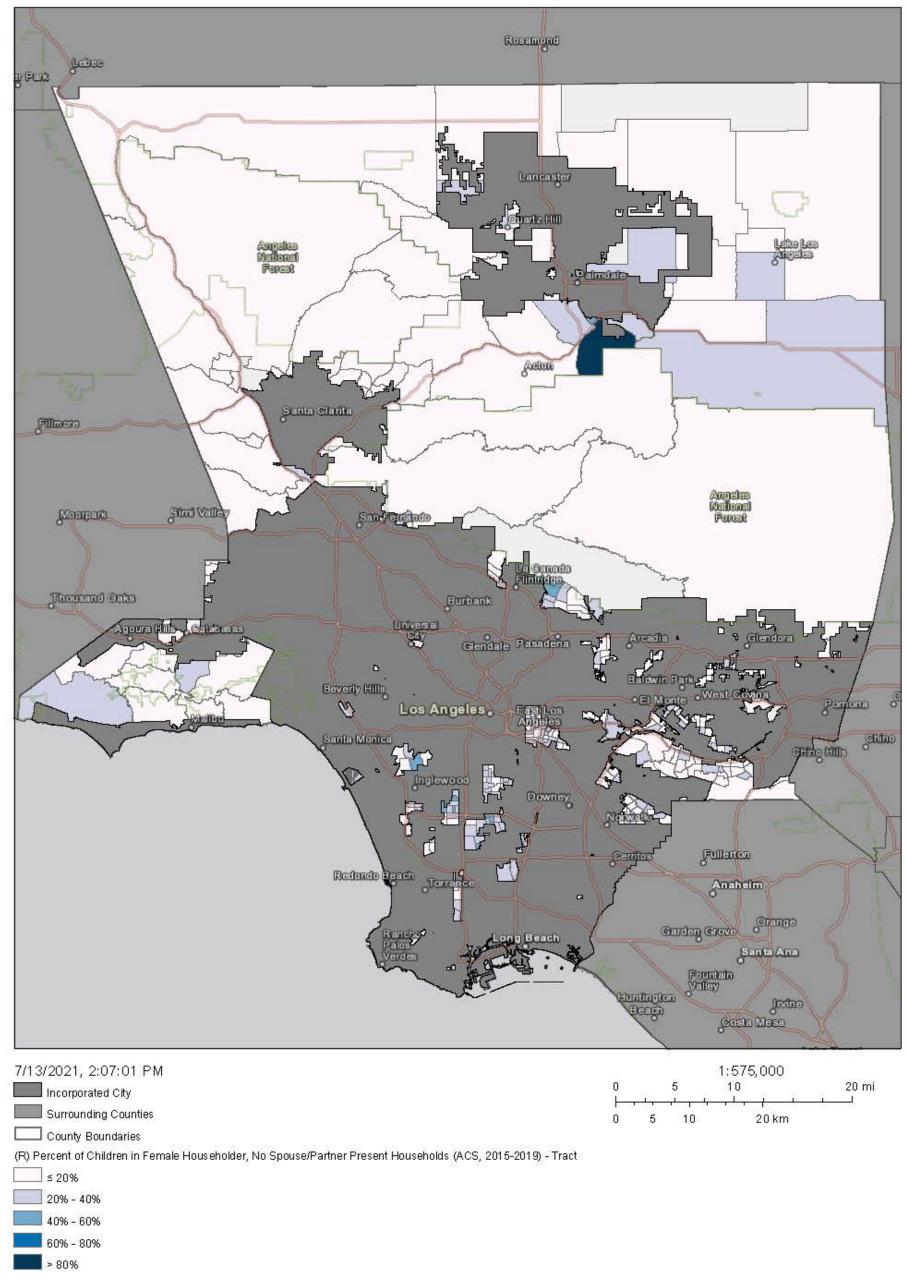

Figure E-5: Children in Female-Headed Households by Census Tract

Esri, HERE, Garmin, USGS, EPA, NPS

Income

HUD's 2010-2014 CHAS data shown in **Table E-3** shows that approximately 44 percent of Los Angeles Urban County households earn 80 percent or less than the County Area Median Income and are considered lower income. The median household income for the unincorporated areas is \$54,200 compared to \$61,015 countywide, according to the California Department of Finance.

Table E-3: Income Distribution – Los Angeles Urban County

Income Category	Households	Percent
<30% AMI	112,925	14.5%
31-50% AMI	99,257	12.8%
51-80% AMI	128,523	16.5%
81-100% AMI	72,758	9.4%
>100% AMI	363,881	46.8%
Total	777,344	100.0%

Source: LACDA 2018-2023 Consolidated Plan, HUD CHAS data (2010-2014 ACS).

Figure E-6 shows the percentage of persons below the federal poverty line by census tract. West Los Angeles (Sawtelle VA) has the highest population of residents below the federal poverty line (>40 percent) in the unincorporated areas. Approximately 30 to 40 percent of residents in Kagel/Lopez Canyons, northeastern Antelope Valley, West Athens-Westmont, Florence-Firestone, and Walnut Park are below the federal poverty level.

Figure E-7 shows the Lower and Moderate Income (LMI) areas in Los Angeles County by census tract. HUD defines a LMI area as a census tract or census block group where over 51 percent of the population belongs to the lower or moderate income categories. The following unincorporated areas have LMI populations that exceed 50 percent:

- West Los Angeles (Sawtelle VA)
- Lennox
- Del Aire
- West Athens-Westmont
- Florence-Firestone
- Walnut Park
- West Rancho Dominguez
- Willowbrook
- East Rancho Dominguez

- East Los Angeles
- West Puente Valley
- Valinda
- South San Jose Hills
- East Irwindale
- Covina Islands
- East Azuza
- Some Antelope Valley communities
- Some Santa Clarita Valley communities

Racially or Ethnically Concentrated Areas

Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs)

In an effort to identify racially/ethnically concentrated areas of poverty (R/ECAPs), HUD has identified census tracts with a majority non-White population (greater than 50 percent) with a poverty rate that exceeds 40 percent or is three times the average census tract poverty rate for the metro/micro area, whichever threshold is lower. There are five unincorporated areas with R/ECAP census tracts as shown in **Table E-4** and **Figure E-8**: West Athens-Westmont, Florence-Firestone, Lennox, West Los Angeles (Sawtelle VA), and Willowbrook. As presented in **Table E-5(A)**, the Hispanic/Latino population makes up the majority in the West Athens-Westmont, Florence-Firestone, Lennox, and Willowbrook R/ECAPs. In the West Los Angeles (Sawtelle VA) R/ECAP, 36.8 percent of the population is White, 26.5 percent of the population is Hispanic or Latino, and 22.4 percent of the population is Black or African American.

As shown in **Table E-5(B)**, In the West Athens-Westmont tract, the population of residents of a race not listed ("some other race"), Black or African American, and Hispanic or Latino populations experience poverty at the highest rates. In the Florence-Firestone tract, there are only two Asian residents, both of which are below the poverty level. The majority of American Indians and Whites in the Lennox R/ECAP are below the poverty level. The poverty rates for all racial/ethnic groups in tract 06037600100 (West Athens-Westmont) for which information was available have gone down since the 2008-2012 ACS. The Asian population in the Florence-Firestone R/ECAP, the White population in the Lennox R/ECAP, and the Asian population in the Willowbrook R/ECAP saw the highest increases in the poverty rate between 2012 and 2019. It is important to note that the Asian populations in the Florence-Firestone R/ECAP and Willowbrook R/ECAP are small. As stated previously, as of 2019, the Florence-Firestone tract has an Asian population of only two residents, and the Willowbrook tract has an Asian population of 257 residents representing approximately 3 percent of the total tract population.

Table E-4: R/ECAPs – Unincorporated Los Angeles County

Figure E-8: Racially/Ethnically Concentrated Areas of Poverty (R/ECAP)

Racially or Ethnically Concentrated Areas of Affluence

While R/ECAPs have long been the focus of fair housing policies, racially concentrated areas of affluence (RCAAs) must also be analyzed. A HUD Policy Paper defines racially concentrated areas of affluence as affluent, White communities.⁶ According to this report, Whites are the most racially segregated group in the United States and "in the same way neighborhood disadvantage is associated with concentrated poverty and high concentrations of people of color, conversely, distinct advantages are associated with residence in affluent, White communities." Based on their research, RCAAs are defined as census tracts where 1) 80 percent or more of the population is White, and 2) the median household income is \$125,000 or greater (slightly more than double the national median household income in 2016).

Table E-6 shows the median household income by race or ethnicity in Los Angeles County using 2015-2019 and 2006-2010 and 2015-2019 ACS estimates. The median household income in Los Angeles County is \$68,044, an increase of 22.7 percent since 2010. Non-Hispanic White, Asian, Native Hawaiian and other Pacific Islander, and two or more race households all have median incomes exceeding the countywide average. Conversely, Black, American Indian and Alaska Native, and Hispanic households and households of a race not listed ("some other race") have median incomes lower than \$68,044. Since the 2006-2010 ACS, households of two or more races have seen the most significant increase in median income (+31.8 percent), while the median income for Black or African American households increased only 16 percent.

Table E-6: Median Household Income by Race/Ethnicity

	Median Household Income (2019)	Median Household Income (2010)	Percent Change (2010-2019)
White	\$75,422	\$61,839	22.0%
Black or African American	\$48,823	\$42,071	16.0%
American Indian and Alaska Native	\$58,970	\$47,396	24.4%
Asian	\$80,046	\$64,367	24.4%
Native Hawaiian and Other Pacific Islander	\$71,502	\$60,367	18.4%
Some other race	\$53,331	\$43,346	23.0%
Two or more races	\$73,880	\$56,047	31.8%
Hispanic or Latino origin (of any race)	\$56,076	\$44,989	24.6%
White alone, not Hispanic or Latino	\$88,038	\$71,768	22.7%
All Households	\$68,044	\$55,476	22.7%

Source: 2006-2010 and 2015-2019 ACS (5-Year Estimates).

Figure E-9 shows census tracts with predominantly White populations and **Figure E-10** shows median income by census block group. The Santa Monica Mountains North Area and Coastal Zone, Altadena, some communities in northeastern Santa Clarita Valley, and some communities in southwestern Antelope Valley have both predominantly White populations and median incomes exceeding \$125,000.

Access to Opportunities

To assist in this analysis, the Department of Housing and Community Development (HCD) and the California Tax Credit Allocation Committee (TCAC) convened the California Fair Housing Task Force to "provide research, evidence-based policy recommendations, and other strategic recommendations to HCD and other related state agencies/departments to further the fair housing goals (as defined by HCD)." The Task Force created Opportunity Maps to identify resource levels across the state "to accompany new policies aimed at increasing access to high opportunity areas for families with children in housing financed with 9 percent Low Income Housing Tax Credits (LIHTCs)." These maps show composite scores of three domains made up of a set of indicators, as shown in **Table E-7**.

Table E-7: Domains and List of Indicators for Opportunity Maps

	• • •			
	Poverty			
Economic	Adult education			
	Employment			
	Job proximity			
	Median home value			
Education	Math proficiency			
	Reading proficiency

	of population under federal poverty line			
	Racial segregation: Census tracts with location			
	quotient higher than 1.25 for Blacks, Hispanics,			
	Asians, or all people of color in comparison to			
	the County			

Source: California Fair Housing Task Force, Methodology for the 2021 TCAC/HCD Opportunity Maps, December 2020.

Based on the aforementioned composite score, census tracts are categorized as Highest Resource, High Resource, Moderate Resource (Rapidly Changing), Moderate Resource, Low Resource, or areas of High Segregation and Poverty. **Figure E-11** shows the composite scores for Los Angeles County census tracts and **Figure E-12** shows areas of high segregation and poverty alone. Unincorporated areas along the western County boundary and along the southern border of the Angeles National Forest are primarily High and Highest Resource areas. East Los Angeles, West Athens-Westmont, Willowbrook, West Rancho Dominguez, Rancho Dominguez, East Rancho Dominguez, Hawthorne Island, La Rambla, Florence-Firestone, South San Gabriel, Avocado Heights, West Puente Valley, Valinda, South San Jose Hills, Covina Islands and eastern communities in the Antelope Valley are designated as Moderate or Low Resource. West Athens-Westmont, Willowbrook, West Rancho Dominguez, Walnut Park, Florence-Firestone, East Los Angeles, and some eastern communities in the Antelope Valley encompass one or more High Segregation and Poverty census tracts.

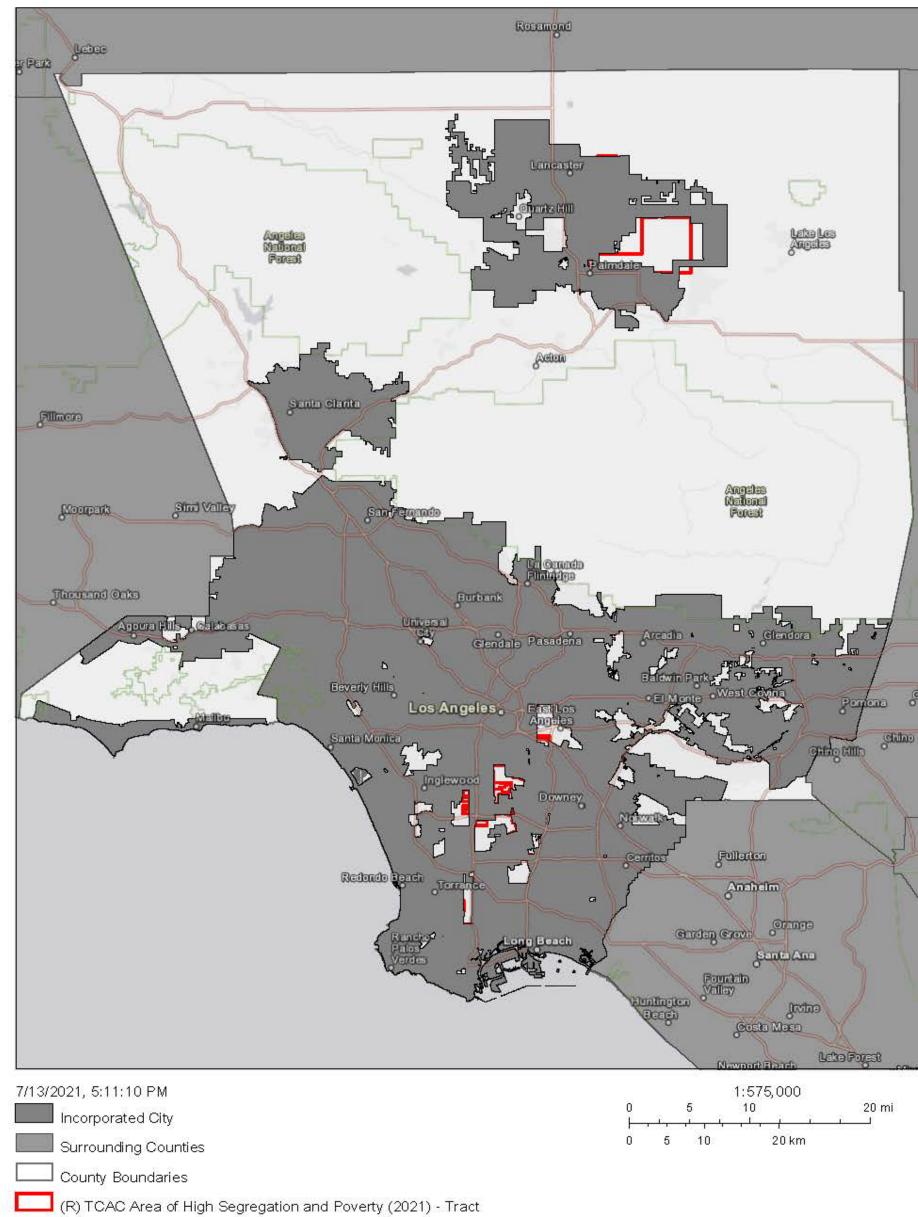

The following analysis breaks down TCAC domain scores by census tract. Of the five unincorporated areas with R/ECAP census tracts, all have lower economic scores, three have lower education scores, and four have lower environmental scores. These areas also have higher concentrations of people of color, persons with disabilities, children in female-headed households, or LMI populations.

CA HCD

Figure E-12: TCAC Opportunity Scores – High Segregation and Poverty

Economic Opportunity

As discussed in **Table E-7**, the Fair Housing Task Force calculates economic scores based on poverty, adult education, employment, job proximity, and median home values. According to the 2021 Task Force maps presented in **Figure E-13**, there are multiple unincorporated areas with very low economic score (<0.25). Several of these communities, including West Los Angeles (Sawtelle VA), Lennox, Florence-Firestone, West Athens-Westmont, East Los Angeles, and some communities in eastern Antelope Valley, are also areas with larger populations of people of color, persons with disabilities, children in female-headed households, or LMI populations (see **Figure E-1** through **Figure E-7**).

Educational Opportunity

The Fair Housing Task Force determines education scores based on math and reading proficiency, high school graduation rates, and student poverty rates (**Table E-7**). Areas with lower education scores, shown in **Figure E-14**, are generally concentrated in View Park-Windsor Hills, East Los Angeles, West Athens-Westmont, Willowbrook, West Rancho Dominguez, La Rambla, Florence-Firestone, Covina Islands, South San Jose Hills, Walnut Islands, some communities in northern Santa Clarita Valley, some communities in eastern Antelope Valley and parts of the western Santa Monica Mountains.

Environmental Health

Environmental health scores are determined by the Fair Housing Task Force based on CalEnviroScreen 3.0 pollution indicators and values. Figure E-15 shows environmental health scores by census tract for Los Angeles County. Several of the tracts with lower economic and education scores also score lower in environmental health. West Los Angeles (Sawtelle VA), Florence-Firestone, West Carson, Rancho Dominguez, East Los Angeles, Willowbrook, West Rancho Dominguez, South San Gabriel, Avocado Heights, North Whittier, Hacienda Heights, West San Dimas, Walnut Islands, West Puente Valley, and some communities in northern Santa Clarita Valley all scored the lowest in environmental health. As discussed in the *Economic and Employment Opportunities* section of this analysis, several of these census tracts also have higher concentrations of people of color, persons with disabilities, children in female-headed households, and LMI populations.

Transportation

Availability of efficient, affordable transportation can be used to measure fair housing and access to opportunities.⁷ As part of the Connect SoCal 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS), SCAG developed a mapping tool for High Quality Transit Areas (HQTA). SCAG defines HQTAs as areas within one-half mile from a major transit stop and a high-quality transit corridor.⁸ Several areas in Los Angeles County, including unincorporated areas, include HQTAs. However, there are no HQTAs in the unincorporated areas in the northern, western, and eastern sections of Los Angeles County (**Figure E-16**).

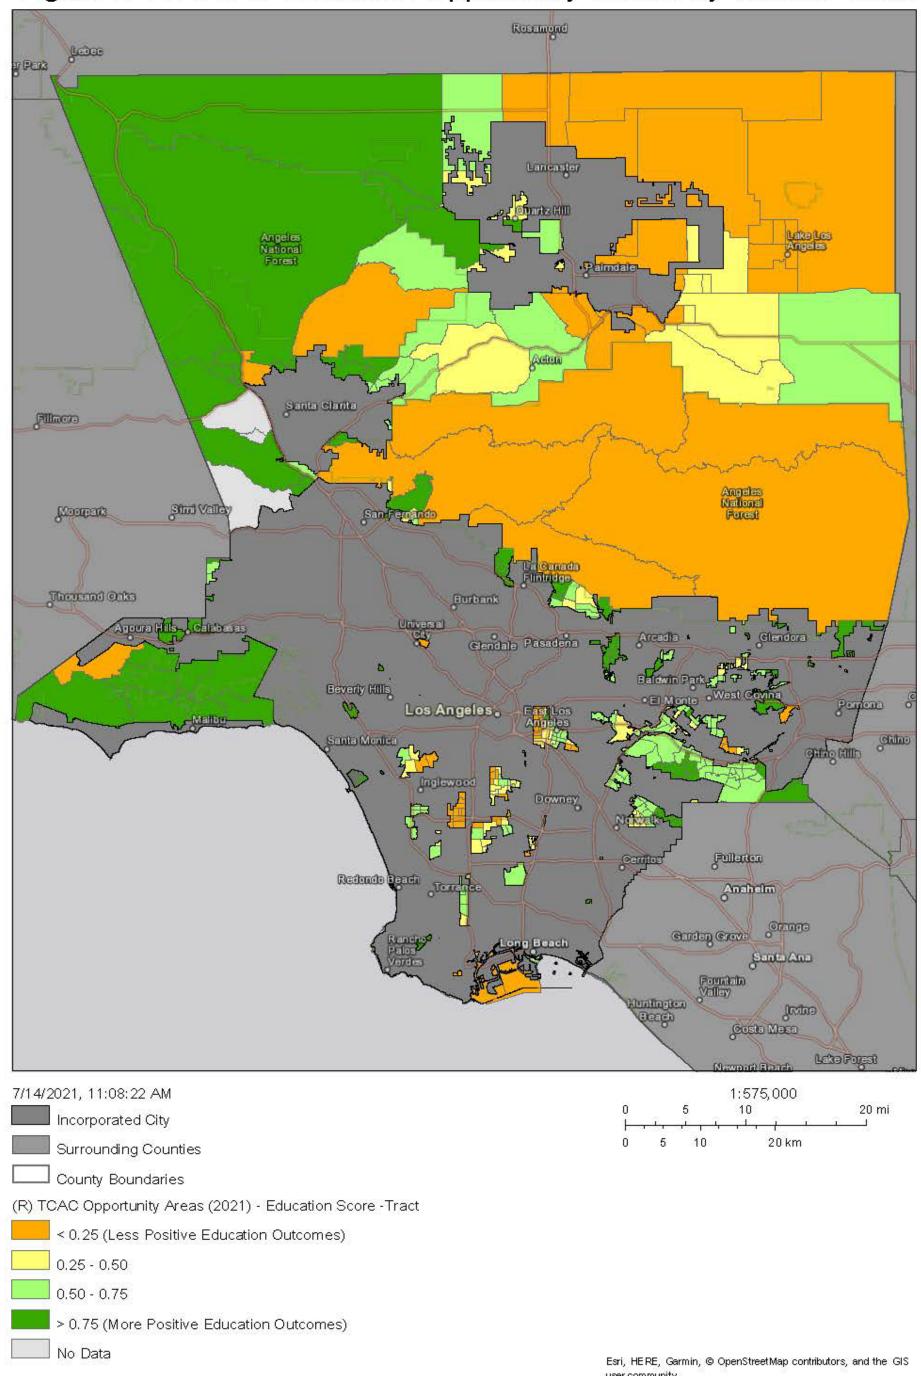

Transportation need can be measured using HUD's jobs proximity index. The job proximity index measures accessibility to jobs based on the location of residential developments and employment centers. West Athens-Westmont, Willowbrook, La Rambla, Florence-Firestone, East Rancho Dominguez, Cerritos Islands, Valinda, Covina Islands and northeastern Antelope Valley communities also have the lowest job proximity indices (**Figure E-17**). Portions of South Whittier-Sunshine Acres, West Puente Valley, East Irwindale, and Charter Oak; and Covina Islands, Valinda, and northern Santa Clarita Valley are also the farthest from employment opportunities.

TransForm. 2019. Pricing Roads, Advancing Equity: A Report and Toolkit to Help Communities Advance a More Equitable and Affordable Transportation System.

Major transit stop: A site containing an existing rail or bus rapid transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods (CA Public Resource Code Section 21064.3). It also includes major transit stops that are included in the applicable regional transportation.

High-quality transit corridor: A corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

Disproportionate Housing Needs

Cost Burden

Housing problems for Los Angeles Urban County jurisdictions were analyzed in LACDA's 2018-2023 Consolidated Plan based on 2010-2014 HUD CHAS data. **Table E-8** shows the housing problems for the Los Angeles Urban County, including cost burden, by race and ethnicity. The following conditions are considered housing problems:

- Substandard Housing (incomplete plumbing or kitchen facilities)
- Overcrowding (more than 1 person per room)
- Cost burden (housing costs greater than 30 percent)

Housing problems were most common in Hispanic (60.5 percent) and Pacific Islander (54.3 percent) households. White non-Hispanic households had the lowest proportion of households with housing problems. Cost burden was most common among Black households (49.7 percent) and Hispanic households (49.7 percent). In comparison, only 48.2 percent of all households experienced a housing problem and 42.9 percent of all households spent more than 30 percent of their income on housing.

Table E-8: Housing Problems by Race and Ethnicity – Los Angeles Urban County

Race or Ethnicity	Cost B	Burden	With 1 or Mo Prob	Total	
,	Total	Percent	Total	Percent	Households
White, non-Hispanic	111,080	36.6%	115,881	38.2%	303,548
Black/African American, non-Hispanic	23,485	49.7%	24,770	52.4%	47,276
Asian, non-Hispanic	57,595	41.4%	63,378	45.6%	139,127
American Indian/Alaska Native, non-Hispanic	682	37.1%	778	42.4%	1,837
Pacific Islander, non-Hispanic	585	43.9%	724	54.3%	1,334
Other, non-Hispanic	6,362	43.2%	6,597	44.8%	14,716
Hispanic	133,999	49.7%	162,961	60.5%	269,559
Total	333,788	42.9%	375,089	48.2%	777,397

Source: LACDA 2018-2023 Consolidated Plan, HUD CHAS data (2010-2014 ACS).

Table E-9 shows cost burden by tenure for the unincorporated areas. Nearly the same proportion of owners with a mortgage and renters experienced a cost burden. However, renters experienced severe cost burden at a higher rate. Only 37.7 percent of renters had no cost burden, compared to 53.7 percent of owners with a mortgage, and 85 percent of owners without a mortgage. **Figures E-18 (A)** through **(D)** compare overpayment by tenure over time using the 2010-2014 ACS and 2015-2019 ACS. Increases in cost burden can be used as an indicator for urban displacement (see *Displacement* section below).

Two census tracts in the Santa Monica Mountains saw increases in cost burdened homeowners. However, overpayment has generally decreased for homeowners since the 2010-2014 ACS. Some communities in northwestern Santa Clarita Valley, some communities in southwestern Antelope Valley, West Athens-Westmont, and Florence-Firestone saw a reduction in overpayment amongst homeowners. East Los Angeles and Hacienda Heights also had fewer overpaying homeowners.

The proportion of overpaying renter households in the unincorporated areas varied. Many of the census tracts in northern Santa Clarita Valley and the Antelope Valley saw an increase in overpaying renter households. Cost burden amongst renter households in West Los Angeles (Sawtelle VA), Kagel/Lopez Canyons worsened since the 2010-2014 ACS, while several census tracts in West Rancho Dominguez, Ladera Heights, Alondra Park, and West Athens-Westmont had fewer cost burdened renter households.

Table E-9: Cost Burden by Tenure – Unincorporated Los Angeles County

Tenure	Total Households	No Cost Burden	Cost Burden	Severe Cost Burden	Not Computed
Owners with Mortgage	134,662	53.7%	25.6%	20.0%	0.7%
Owners without Mortgage	48,906	85.0%	6.8%	6.6%	1.6%
Renters	120,415	37.7%	25.9%	30.2%	6.1%
Total	303,983	52.4%	22.7%	21.9%	3.0%

Figure E-18: (D) Overpayment – Renters (2015-2019)

Overcrowding

As shown in **Table E-8**, nearly 50 percent of the residents of the Los Angeles Urban County experienced a housing problem, such as cost burden, incomplete kitchen or plumbing facilities, or overcrowding. As shown in **Table E-10**, approximately 8 percent of households in the unincorporated areas are overcrowded, including 4.4 percent severely overcrowded households. Overcrowding in the unincorporated areas was more common than throughout Los Angeles Urban County jurisdictions. Overcrowding was also more common in the unincorporated areas than in Los Angeles County, with a smaller proportion that was severely overcrowded.

Figure E-19(A) and **Figure E-19(B)** show concentrations of overcrowded and severely overcrowded households by census tract. Census tracts within Lennox, West Athens-Westmont, West Rancho Dominguez, Willowbrook, East Rancho Dominguez, Florence-Firestone, Walnut Park, East Los Angeles, North Whittier, South Whittier-Sunshine Acres, Avocado Heights, South San Jose Hills, East Irwindale, and Covina Islands have higher (>20 percent) concentrations of overcrowded households. East Los Angeles and Florence-Firestone also have higher concentrations of severely overcrowded households.

Table E-10: Overcrowding

Jurisdiction	> 1 Person	per Room	> 1.5 Persor	Total	
Jurisdiction	Number	Percent	Number	Percent	Households
Unincorporated Areas	24,365	8.0%	13,315	4.4%	303,983
Los Angeles Urban County	47,711	6.1%	25,067	3.2%	782,957
Los Angeles County	228,909	7.0%	157,484	4.8%	3,281,845

Source: LACDA 2018-2023 Consolidated Plan, 2016-2020 ACS (5-Year Estimates).

Substandard Housing

Incomplete plumbing or kitchen facilities can be used to measure substandard housing conditions. In the unincorporated areas, only 0.4 percent of households lacked complete plumbing facilities, which is the same percentage countywide (**Table E-11**). Compared to Los Angeles Urban County jurisdictions and Los Angeles County, the unincorporated areas had the smallest proportion of households lacking kitchen facilities.

Table E-11: Substandard Housing Conditions

Jurisdiction		nplete Plumbing cilities	Lacking Complete	Total	
	Number	Percent	Number	Percent	Households
Unincorporated Areas	1,111	0.4%	2,766	0.9%	303,983
Los Angeles Urban County	2,578	0.3%	8,898	1.1%	782,957
Los Angeles County	14,568	0.4%	50,923	1.6%	3,281,845

Source: LACDA 2018-2023 Consolidated Plan, 2016-2020 ACS (5-Year Estimates).

The County gathered data from the existing code enforcement programs and conducted a rental housing habitability survey. LACDA, DRP, DPH, and PW provided data on inspections and violations. For FY 2017-2018, LACDA conducted 8,639 Housing Quality Standards (HQS) inspections on 4,824 rental housing units in the unincorporated areas and found violations across 1,818 units. The majority of violations were minor deficiencies. DPH conducted inspections of 15,000 rental units and identified violations in 685 units. DRP inspected 145 units and 118 units were found to have violations, mainly from unpermitted units.

The Code Enforcement Workgroup (comprised of LACDA, DRP, DPH, and PW) also conducted a rental housing habitability survey of renters residing in cities and the unincorporated areas from July 2, 2019 to August 2, 2019. The Workgroup received 618 responses, of which 70 rented in the unincorporated areas. About 40 percent of respondents living in the unincorporated areas stated they had experienced uninhabitable, unsanitary, or unsafe conditions in their home within the previous two years. Of that 40 percent, 66 percent indicated that the conditions were never resolved.

Displacement Risk

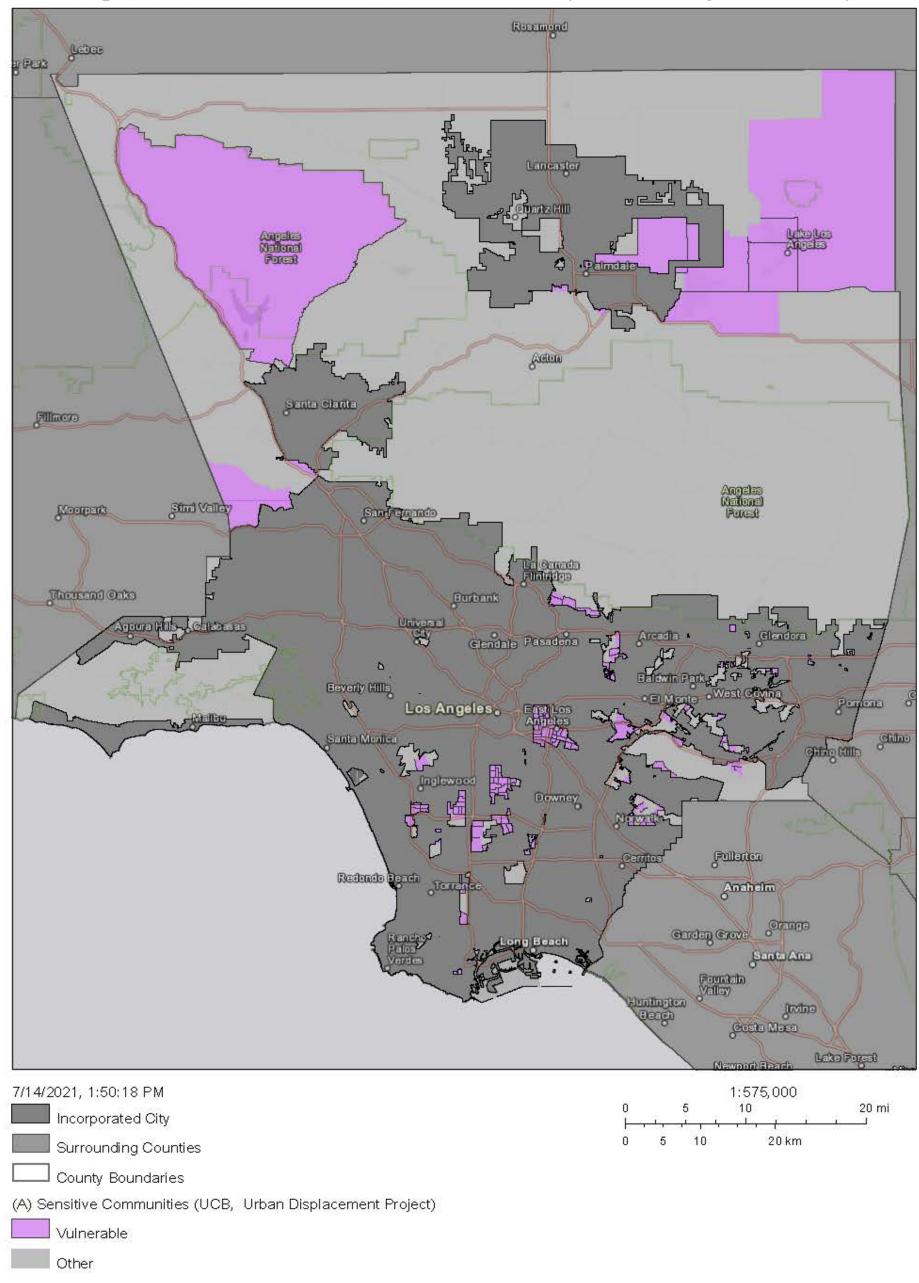

HCD defines sensitive communities as "communities [that] currently have populations vulnerable to displacement in the event of increased development or drastic shifts in housing cost." The following characteristics define a vulnerable community:

- The share of very low income residents is above 20 percent; and
- The census tract meets two of the following criteria:
 - Share of renters is above 40 percent,
 - o Share of people of color is above 50 percent,
 - Share of very low income households (50 percent AMI or below) that are severely rent burdened households is above the county median,
 - The census tract or areas in close proximity have been experiencing displacement pressures (percent change in rent above county median for rent increases), or
 - o Difference between census tract median rent and median rent for surrounding census tracts above median for all census tracts in the county (rent gap).

Figure E-20 shows the sensitive communities in Los Angeles County. Urban displacement often disproportionately impacts sensitive communities, such as people of color, LMI populations, and persons with disabilities. The following are unincorporated areas at risk of displacement, with relevant factors:

- Lennox/Del Aire: One R/ECAP census tract in Lennox. These areas also have higher concentrations of people of color and LMI households.
- West Athens-Westmont: Two R/ECAP census tracts in West Athens-Westmont. The census tracts in this area have larger percentages
 of people of color and LMI households.
- Florence-Firestone/Walnut Park: There is one R/ECAP census tract in Florence-Firestone. These areas have higher concentrations of people of color and LMI households.
- Willowbrook/West Rancho Dominguez/East Rancho Dominguez: These areas have higher concentrations of people of color and LMI households. There is one R/ECAP census tract in Willowbrook.
- Northeast Antelope Valley: This area contains census tracts with higher concentrations of people of color and LMI households.
- East Los Angeles: This area contains census tracts with higher concentrations of people of color and LMI households.
- South Whittier/West Whittier-Los Nietos: These areas contain census tracts with higher concentrations of people of color and LMI households.
- South San Gabriel/East San Pasadena-East San Gabriel: These areas contain census tracts with higher concentrations of people of color and LMI households.
- Rowland Heights/Hacienda Heights: These areas contain census tracts with higher concentrations of people of color and LMI households.
- Windsor Hills: This area contains census tracts with higher concentrations of people of color.
- West Carson: This area contains census tracts with higher concentrations of people of color.
- Altadena: This area contains census tracts with higher concentrations of people of color.

Lending Practices

As shown in **Table E-12**, between 2010 and 2015, the loan denial rate for all racial/ethnic groups unincorporated Los Angeles County decreased. As of 2015, the denial rate among Black, American Indian, and Hispanic applicants exceeds the 13.8 percent denial rate countywide. In addition to racial disparities in denial rates, females are also denied at a slightly higher rate (14.4 percent) than males (13.2 percent), according to the 2015 data included in the County AI.

Table E-12: Loan Types and Denial Rates by Race/Ethnicity

Type or Race/Ethnicity	2010	2015
Home Purchase	118,553	100,713
Home Improvement	9,990	17,598

Summary of Fair Housing Issues

Table E-13, below, summarizes the fair housing issues identified in the 2018 Regional Analysis of Fair Housing. Fair housing issues were most prevalent in the following unincorporated areas:

- Antelope Valley (northeastern)
- East Los Angeles
- Florence-Firestone
- Lennox
- West Athens-Westmont
- Willowbrook

Table E-13: Summary of Fair Housing Issues

Fair Housing Issue	Summary
Enforcement and Outreach	 In FY 2019-2020, 83 fair housing cases were opened; 47 percent related to physical disability, 22 percent related to mental disability, and 19 percent related to source of income. HRC conducts outreach and education throughout the Los Angeles Urban County annually. LACDA has committed to complying with the Fair Housing Act and related regulations.
Integration and Segregation	LAODA has committed to complying with the rail flousing Act and related regulations.
Race/Ethnicity	 76 percent of households and 81 percent of the population is part of a non-White group. Dissimilarity between White and non-White communities has worsened. Non-White/White, Black/White and Hispanic/White communities remain highly segregated as of 2020. Rowland Heights, Hacienda Heights, East Los Angeles, West Puente Valley, Walnut Park, West Whittier, South Whittier, View Park, Windsor Hills, and communities in northeastern Antelope Valley have high concentrations of people of color.
Disability	 Nearly 10 percent of Los Angeles County residents experience a disability. Discrimination complaints related to physical disability (47 percent) and mental disability (22 percent) were the most common. Census tracts with a high number of residents with disabilities are generally not concentrated in one area; West Los Angeles (Sawtelle VA) and northeastern Santa Clarita Valley have the highest concentration of persons with disabilities.
Familial Status	 Tracts with larger populations of children in married couple households are located in West Athens-Westmont, Lennox, and East Los Angeles. Larger populations of children in female-headed households are more concentrated in West-Athens Westmont, Lennox, Florence-Firestone and eastern Antelope Valley areas.
Income	 Approximately 44 percent of households in the Los Angeles Urban County are lower income. LMI populations are concentrated in Lennox, West Athens-Westmont, Florence-Firestone, Willowbrook, West Los Angeles (Sawtelle VA), East Los Angeles, West Puente Valley, some northeastern communities in the Antelope Valley, and some northeastern communities in the Santa Clarita Valley.
Racially or Ethnically Concen	trated Areas of Poverty
Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs)	 R/ECAPs are located in the following unincorporated communities: West Athens-Westmont, Florence-Firestone, Lennox, West Los Angeles (Sawtelle VA), and Willowbrook.
Racially or Ethnically Concentrated Areas of Affluence (RCAAs)	 Unincorporated census tracts in the Santa Monica Mountains, Altadena, some communities in northeastern Santa Clarita Valley, and some communities in southwestern Antelope Valley have higher concentrations of non-Hispanic White populations and median incomes exceeding \$125,000.
Access to Opportunities	
Economic	 The following unincorporated communities contain tracts with very low economic scores (<0.25): West Los Angeles (Sawtelle VA), Lennox, Florence-Firestone, West Athens-Westmont, East Los Angeles, and some communities in eastern Antelope Valley. Census tracts in the unincorporated areas with very low economic scores are generally dispersed throughout Los Angeles County.

Table E-13: Summary of Fair Housing Issues

Fair Housing Issue	Summary
Education	The following unincorporated areas contain census tracts with very low education scores (<0.25): View Park, Windsor Hills, East Los Angeles, West Athens-Westmont, Willowbrook, West Rancho Dominguez, Florence-Firestone, Sylmar Island, Kagel/Lopez Canyons, some communities in northern Santa Clarita Valley, some eastern communities in eastern Antelope Valley, Covina Islands, South Jose Hills, and parts of the Santa Monica Mountains.
Environmental	 The following unincorporated communities contain tracts with very low environmental health scores (<0.25): West Los Angeles (Sawtelle VA), Florence-Firestone, West Carson, Rancho Dominguez, East Los Angeles, Willowbrook, West Rancho Dominguez, South San Gabriel, Avocado Heights, North Whittier, Hacienda Heights, West San Dimas, Walnut Islands, Sylmar Island, Kagel/Lopez Canyons, and some communities in northern Santa Clarita Valley. Census tracts in the unincorporated areas with very low environmental health scores
Transportation	 are most concentrated are generally dispersed throughout Los Angeles County. Outside of the northern and western County, which do not have unincorporated communities in HQTAs, there are several unincorporated communities that fall within HQTAs.
Disproportionate Housing Ne	eds
Cost Burden	 Approximately 48.2 percent of households in the Los Angeles Urban County have one or more housing problems, including 42.9 percent that are cost burdened. All racial and ethnic groups in the Los Angeles Urban County experience cost burden at a higher rate than non-Hispanic White residents (36.6 percent cost burdened); Black and Hispanic households have the highest rate of cost burden (both 49.7 percent). 13.3 percent of owners without a mortgage are cost burdened or severely cost burdened, compared to 45.6 percent of owners with a mortgage, and 56.1 percent of renters. Overpayment has generally decreased for homeowners in the unincorporated areas since the 2010-2014 ACS. Overpayment among renter households has fluctuated throughout Los Angeles County. Increases in overpaying renter households are generally not concentrated in one area.
Overcrowding	 Approximately 8 percent of the households in the unincorporated areas are overcrowded, including 4.4 percent severely overcrowded. Overcrowding is more common in the unincorporated areas than in the Los Angeles Urban County (6.1 percent overcrowded) and Los Angeles County (7 percent overcrowded). Overcrowded households are most concentrated in unincorporated tracts in West Athens-Westmont, Florence-Firestone, Lennox, East Los Angeles, and North Whittier.
Substandard Housing	 Approximately 0.4 percent of the households in the unincorporated areas lack complete plumbing facilities and 0.9 percent lack complete kitchen facilities. Lack of complete plumbing facilities is comparable to the Los Angeles Urban County and Los Angeles County (0.3 percent and 0.4 percent, respectively); fewer households in the unincorporated areas lack complete kitchen facilities compared to the Los Angeles Urban County (1.1 percent) and Los Angeles County (1.6 percent).
Displacement Risk	The following unincorporated areas have higher concentrations of census tracts that are considered sensitive communities: West Athens-Westmont, View Park, Windsor Hills, East Los Angeles, Altadena, East Pasadena, East San Gabriel, South San Gabriel, northern Santa Clarita Valley communities, and eastern Antelope Valley communities.

The 2018 Al identified the following impediments to fair housing choice in the Los Angeles Urban County. Discussions exclusively pertinent to the unincorporated areas are not available. However, the unincorporated areas comprise of about 43 percent of the population of the Los Angeles Urban County. The following impediments are considered "high priority." The following are high priority issues relevant to the unincorporated areas:

- 1. Barriers to mobility and lack of accessible housing in a range of unit sizes. The 2018 Al included a survey in which over a third of respondents with a disability experienced difficulty getting around their neighborhood or housing complex, and approximately 10 percent of respondents indicated that their homes had problems limiting accessibility. According to the 2014-2018 ACS, nearly 10 percent of Los Angeles County residents experience a disability. The 2017-2018 Resident Survey included in the 2018 AI found that, countywide, the rated need for housing for persons with disabilities was 3.28 out of 4.
- 2. Lack of affordable housing in a range of sizes and land use/planning decisions restricting affordable housing. Approximately 74 percent of large family households in Los Angeles County experienced a housing problem, such as cost burden or overcrowding, according to the 2018 Al. Over 20 percent of all households in Los Angeles County have 5 or more persons. In the Los Angeles Urban County, 43 percent of households pay more than 30 percent of their income in rent. Affordable housing projects were found to be disproportionately located in or adjacent to R/ECAPs.
- 3. Lack of sufficient publicly supported housing for persons with HIV/AIDS. The 2018 AI reported that approximately 60,000 residents in Los Angeles County live with HIV/AIDS. The Hispanic population was found to be disproportionately affected.
- 4. Significant disparities in the proportion of members of protected classes experiencing substandard housing when compared to the total population. People of color, people with disabilities, families with children, and other protected classes face housing problems at higher rates than the total population. Black and Hispanic households were more likely to experience a housing problem, including cost burden, countywide.
- 5. Noise pollution due to plane traffic from Los Angeles International Airport. The 2018 Al estimates that 8,424 dwelling units are impacted by noise from LAX. Some unincorporated communities, including Marina del Rey, Lennox, and Del Aire, are located in the proximity of LAX; therefore, some unincorporated areas residents may be exposed to excessive noise generated by air traffic.
- Poor land use and zoning situating sources of pollution and environmental hazards near housing. R/ECAPs in the Los Angeles Urban County tend to have higher levels of toxic emissions and environmental hazards.
- 7. Lack of information on affordable housing and lack of knowledge of Fair Housing, Section 504 and ADA laws. Access to information about affordable housing was found to be limited countywide. Nearly 40 percent of Fair Housing Survey respondents reported that they were not aware of their right to request reasonable accommodations. The County does include information about housing discrimination and retaliation, including where to file discrimination complaints, on its website.
- 8. Increasing measures of segregation; lack of opportunities for residents to obtain housing

- in higher opportunity areas; lack of resources and services for working families (e.g., helping find housing for people of color). There are five unincorporated areas with R/ECAP census tracts. As described in the *Access to Opportunities* section, communities with lower economic, education, and jobs proximity indices often also have high concentrations of people of color, children in female-headed households, and LMI populations. The 2018 AI reported that higher income households tend to have more knowledge about housing and other services than lower income households.
- 9. **Discrimination in private rental and homes sales market, including the private accessible rental markets.** According to the 2019 Home Mortgage Disclosure Act (HMDA) data provided by Lending Patterns for Los Angeles County, White, non-Hispanic residents were approved for housing loans at a rate of 64.5 percent, while non-White residents were approved at a rate of 60.7 percent. American Indian/Alaska Native residents were approved at the lowest rate (47.2 percent) and Asian residents were approved at the highest rate (67 percent). Black/African American residents and Hispanic residents were approved at a rate of 53.4 percent and 58.6 percent, respectively. Disability discrimination complaints were the most common in Los Angeles County according to HUD Fair Housing Complaint data.
- 10. **Public safety concerns and juvenile crime activity.** Approximately 37 percent of Fair Housing Survey respondents living in R/ECAPs reported that they felt unsafe in their neighborhood at night and approximately 20 percent of all Los Angeles Urban County survey respondents reported feeling unsafe in their neighborhood at night. There are five unincorporated areas with R/ECAPs census tracts. Juvenile crime activity was found to be most prevalent in lower income communities countywide.
- 11. **Increase independence for the elderly or families with disabilities.** Similar to statewide trends, the population in the unincorporated areas has aged in recent years. Between 2000 and 2018, the 55-64 age group in the unincorporated areas grew from 7.2 percent to 12.1 percent. Conversely, the 5-20 age group declined from 26.8 percent in 2000 to 20.4 percent in 2018. Nearly 20 percent of unincorporated areas residents experienced a disability.
- 12. **People with disabilities becoming homeless; enhance programs to help at-risk homeless population.** The 2018 Al reported that over 15 percent of the homeless population in Los Angeles County had a physical disability and more than 3 percent had a developmental disability. According to the 2020 LAHSA Homeless Count, there are approximately 66,436 homeless persons living in Los Angeles County, which is an increase of 13 percent since 2019. Within the unincorporated areas, the homeless population increased 7.8 percent from 5,646 persons in 2019 to 6,088 persons in 2020.
- 13. **Illegal dumping Proximity to environmental hazards, especially in communities of color.** Low income households and Latino, Black, NHOPI, and Native American households are most likely to live in areas with high pollution levels according to the 2018 AI.
- 14. **Disconnect in matching people with disabilities with the right housing resources.** In addition to the 40 percent of survey respondents that reported they were unaware of their right to request reasonable accommodations, 11 percent were in need of one.
- 15. **Disparities in job readiness and educational achievement.** As shown in **Figure E-14**, areas with lower education index scores often overlap with areas with higher concentrations of people of color, children in female-headed households, or LMI populations.

SITES INVENTORY AND REZONING

The County has been allocated a Regional Housing Needs Allocation (RHNA) of 90,052 units:

- 25,648 very low income units
- 13,691 low income units
- 14,180 moderate income units
- 36,533 above moderate income units

The County must identify adequate sites for accommodating the RHNA for all income groups. Typically, sites that are zoned for higher density multifamily housing are considered adequate to facilitate lower income housing. Based on the County's current land use policies and development regulations, the County would not be able to accommodate its RHNA without rezoning.

For the purpose of land use planning, the unincorporated areas are divided into General Plan Planning Areas (PAs):

- Antelope Valley
- Coastal Islands
- East San Gabriel Valley
- Gateway
- Metro
- San Fernando Valley
- Santa Clarita Vallev
- Santa Monica Mountains
- South Bay
- West San Gabriel Valley
- Westside

To identify adequate sites and also appropriate sites for rezoning, the County undertook an extensive process to objectively identify feasible sites for accommodating the RHNA. The criteria are described in detail in the Resources section of the Housing Element and Appendix G. From a fair housing perspective, the concern focuses on the overconcentration of lower income housing in areas already with disproportionate housing issues, high environmental burden, and limited access to resources and opportunities. This section evaluates the distribution of lower, moderate, and above moderate income units (adequate sites and rezone sites) across the PAs.

Due to the naturally constrained areas, such as biologically sensitive areas and Very High Fire Hazard Severity Zones, no lower income sites are identified for the Antelope Valley, Coastal Islands, San Fernando Valley, and Santa Monica Mountains planning areas. These planning areas have between 84.6 – 100 percent of their unincorporated land within a naturally a hazardous area or an area with natural resources, as shown in **Figure E-21**.9

⁹ While nearly all of the Santa Clarita Valley Planning Area is also naturally constrained, the areas outside the constraints have existing suburban and urban development with sites adequate to accommodate housing for lower income households, as shown in Table III-41 of the Housing Element.

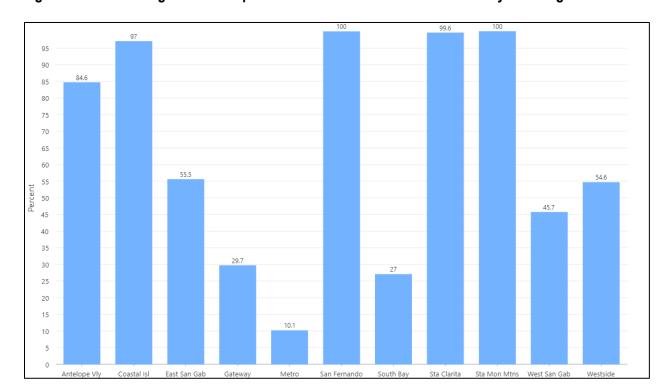

Figure E-21: Percentage of Unincorporated Areas with Natural Constraints by Planning Area

Affirmatively Furthering Fair Housing Through Site Selection

Sites that are outside of the naturally constrained areas were prioritized for rezoning based on additional locational criteria and other factors. Specifically, as described in Appendix G, various criteria and weights were established and totaled to create a cumulative weight score to identify clusters of sites that are ideal for rezoning. To avoid overconcentration of lower income housing in areas with existing disproportionate housing issues, high environmental impact burden, and limited access to resources and opportunities, scores were given to or deducted from each parcel under two categories: Environmental Justice and Economic Mobility.

Environmental Justice

To encourage the equitable distribution of housing throughout unincorporated Los Angeles County, the Environmental Justice Screening Method (EJSM), which was developed by the County in partnership with the University of Southern California and Occidental College, was incorporated into the cumulative weight scoring system as one of the key determining factors. The EJSM illustrates cumulative health risks by identifying areas that are disproportionately burdened by and vulnerable to multiple types of pollution. Sites located in areas that are less burdened by and vulnerable to multiple types of pollution and health risks were given a higher score under this category.

Economic Mobility

To meet the goal of encouraging access to economic opportunity and to prevent further segregation and concentration of poverty, sites located in areas with more resources and opportunities in terms of educational attainment, employment, and economic mobility as identified on the California Tax Credit Allocation Committee (TCAC) Opportunity Map were given a higher score under this category.

It is important to note that in the cumulative weight scoring system, the maximum points given under each of these two categories were higher than the maximum points given under any other category. This demonstrates the County's deliberate effort to affirmatively further fair housing through the Sites Inventory and the Rezoning Program.

California Tax Credit Allocation Committee Composite Score Map

TCAC Opportunity Map categorizations for RHNA units by Planning Area are presented in **Table E-14**. The Opportunity Map for unincorporated Los Angeles County areas and RHNA units are shown in **Figure E-22**. As discussed previously, the Metro PA has the highest concentrations of low resource tracts and areas of high segregation and poverty.

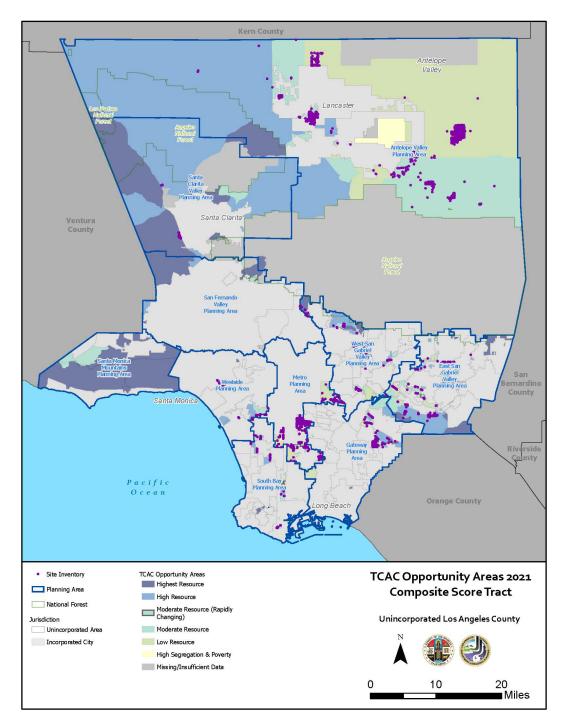

Overall, the majority (77.2 percent) of lower income units are in census tracts that are considered highest, high, and moderate resource areas, including moderate resource (rapidly changing). The Metro PA has the largest number of lower income units. Within the Metro Planning Area, more than half (54 percent) of the lower income units are located in moderate resource and moderate (rapidly changing) tracts, 33.5 percent are in low resource tracts, and 12.5 percent are in areas of high segregation and poverty. There are no lower income units in areas of high segregation and poverty in other Planning Areas. Approximately 50 percent of moderate income units are in moderate resource tracts, including moderate resource (rapidly changing), and 42 percent are in low resource tracts. A larger proportion of moderate income units are in high segregation and poverty areas compared to lower income units. Above moderate income units are generally dispersed amongst high resource tracts (30.9 percent), moderate resource tracts (40 percent), and low resource tracts (21.4 percent). There are 412 above moderate income RHNA units in areas of high segregation and poverty. Sites inventories and TCAC Opportunity Maps by Planning Area are included in **Figure E-23** through **Figure E-30**.

Figure E-22: Distribution of RHNA Units (Sites Inventory and Rezoning) by TCAC Category

The following figures show TCAC Opportunity Maps and Sites Inventory by Planning Area. All Planning Areas have low resource tracts in the Sites Inventory areas except for the Santa Clarita Valley Planning Area shown in **Figure E-27** and the West San Gabriel Valley Planning Area shown in **Figure E-29**. The Antelope Valley Planning Area (**Figure E-23**) and Metro Planning Area (**Figure E-26**) have high segregation and poverty tracts in the Sites Inventory area. The Sites inventory areas by Planning Area contain the following Opportunity Map tract types:

- Antelope Valley Planning Area high segregation and poverty, low, moderate, and high resource tracts
- East San Gabriel Valley Planning Area low, moderate, high, and highest resource tracts
- Gateway Planning Area low, moderate, high, and highest resource tracts
- Metro Planning Area high segregation and poverty, low, moderate, and moderate (rapidly changing) resource tracts
- Santa Clarita Valley Planning Area –high and highest resource tracts
- South Bay Planning Area low, moderate, and high resource tracts
- West San Gabriel Valley Planning Area moderate, high, and highest resource tracts
- Westside Planning Area low, moderate, high, and highest resource tracts

Figure E-30: Sites Inventory/Rezoning and TCAC Opportunity Map – Westside Planning Area

Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs)

As shown in **Table E-4**, only six census tracts in the unincorporated areas are defined as R/ECAPs. ¹⁰ Four R/ECAPs are located in the Metro Planning Area, one in the South Bay Planning Area, and one in the Westside Planning Area. **Figure E-31** shows the location of sites used to meet the lower income RHNA and unincorporated Los Angeles County R/ECAPs. As discussed previously, R/ECAPs are located in unincorporated Los Angeles County communities of West Athens-Westmont (two R/ECAPs), Florence-Firestone, Lennox, Willowbrook, and Sawtelle VA Center.

Table E-15 presents this distribution of units used to meet the County's 2021-2029 RHNA by R/ECAP designation and Planning Area. Approximately 7.2 percent of lower income RHNA units are located in a R/ECAP, including 8.7 percent of lower income units in the Metro Planning Area, 6.7 percent of lower income units in the South Bay Planning Area, and 29.7 percent of lower income units in the Westside Planning Area. A smaller proportion of moderate income units (3.1 percent) are in R/ECAP tracts compared to lower income units. There are 2.2 percent of above moderate income RHNA units in R/ECAP tracts. Although a larger proportion of lower income units are located within R/ECAP communities compared to moderate and above moderate income units, a majority of all RHNA units, regardless of income level, are not in R/ECAP tracts. RHNA sites strategies and R/ECAPs in the Metro, South Bay, and Westside Planning Areas are detailed below.

Table E-15: Distribution of RHNA Units (Sites Inventory and Rezoning) by R/ECAP Designation

Figure E-31: Distribution of RHNA Units (Sites Inventory and Rezoning) by R/ECAP Designation

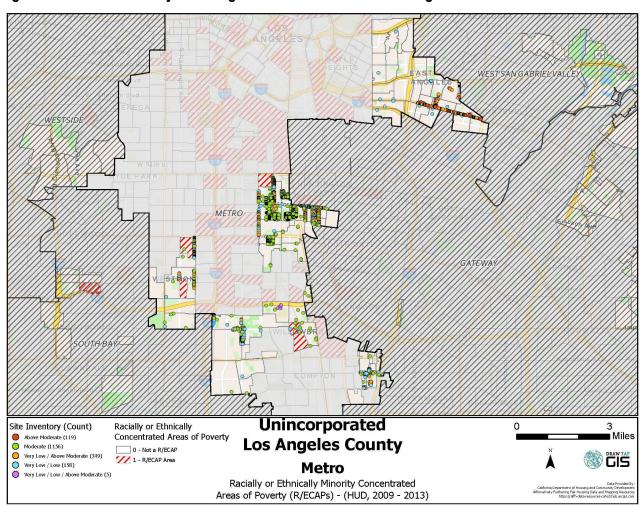

Metro Planning Area

Sites selected to meet the 2021-2029 RHNA and R/ECAPs in the Metro Planning Area are shown in **Figure E-32**. There are four R/ECAPs in the Metro Planning Area, in the unincorporated communities of West Athens-Westmont (two R/ECAPs), Florence-Firestone, and Willowbrook. All R/ECAPs are in the southern Metro Planning Area. Approximately 5.8 percent of RHNA units in the Metro Planning Area are in R/ECAPs, including 8.7 percent of lower income units and 3.5 percent of moderate income units (**Table E-16**).

Table E-16: Sites Inventory/Rezoning and R/ECAPs – Metro Planning Area

RHNA Units	Total Units	Units in R/ECAP	Percent in R/ECAP
Lower Income	11,742	1,018	8.7%
Moderate Income	9,384	330	3.5%
Above Moderate Income	6,300	249	4.0%
Total	27,426	1,597	5.8%

Figure E-32: Sites Inventory/Rezoning and R/ECAPs – Metro Planning Area

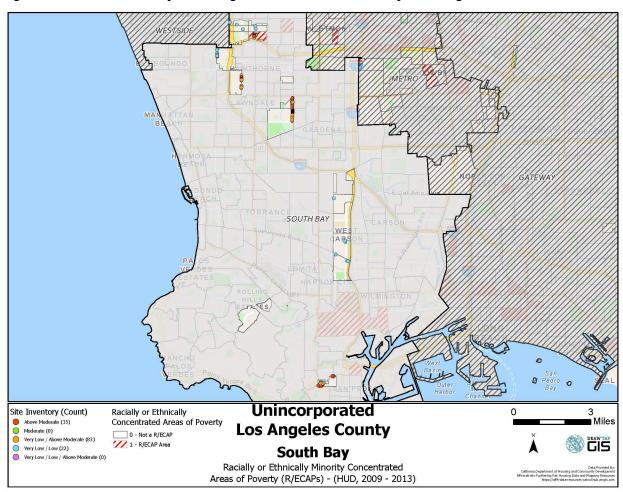

South Bay Planning Area

Sites selected to meet the 2021-2029 RHNA and R/ECAPs in the South Bay Planning Area are shown in **Figure E-33**. There is one R/ECAP the South Bay Planning Area in the unincorporated community of Lennox. The R/ECAP is in the northern portion of the South Bay Planning Area adjacent to the Westside and Metro Planning Areas. Approximately 7.7 percent of RHNA units in the South Bay Planning Area are in the R/ECAP, including 6.7 percent of lower income units (**Table E-17**).

Table E-17: Sites Inventory/Rezoning and R/ECAPs – South Bay Planning Area

RHNA Units	Total Units	Units in R/ECAP	Percent in R/ECAP
Lower Income	2,954	198	6.7%
Above Moderate Income	3,801	319	8.4%
Total	6,755	517	7.7%

Figure E-33: Sites Inventory/Rezoning and R/ECAPs - South Bay Planning Area

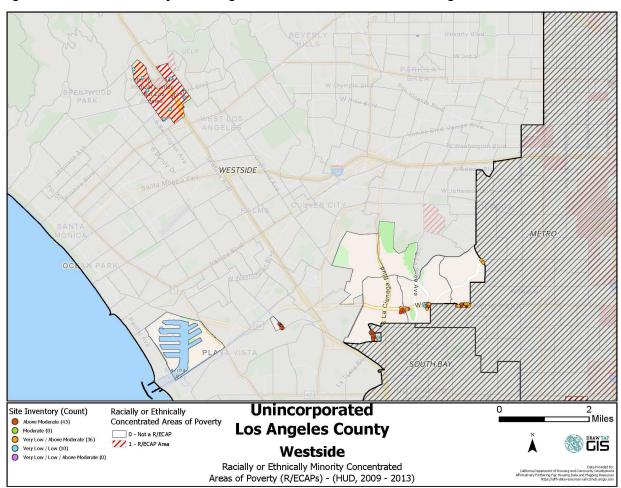

Westside Planning Area

Sites selected to meet the 2021-2029 RHNA and R/ECAPs in the Westside Planning Area are shown in **Figure E-34**. There is one R/ECAP in the Westside Planning Area in the unincorporated community of West Los Angeles/Sawtelle VA Center. The R/ECAP is in the central portion of the Westside Planning Area. Approximately 17 percent of RHNA units in the Westside Planning Area are in the R/ECAP, including 29.7 percent of lower income units. There are no above moderate income units in the R/ECAP (**Table E-18**).

Table E-18: Sites Inventory/Rezoning and R/ECAPs – Westside Planning Area

RHNA Units	Total Units	Units in R/ECAP	Percent in R/ECAP
Lower Income	3,470	1,032	29.7%
Above Moderate Income	2,534	0	0.0%
Total	6,004	1,032	17.2%

Figure E-34: Sites Inventory/Rezoning and R/ECAPs – Westside Planning Area

Low and Moderate Income Area¹¹

By nature of the objective criteria for selecting nonvacant sites with potential for redevelopment over the next eight years, the RHNA sites in the Sites Inventory and the Rezoning Program are more likely to be located in areas with higher rates of marginally operating uses or underutilized properties. These are generally lower-cost areas with low and moderate income households. The distribution of sites by Low and Moderate Income (LMI) population and Planning Area is presented in **Figure E-35** and **Table E-19**.

Overall, about 68 percent of the RHNA units are located in Low and Moderate Income Areas, including 63.5 percent of lower income units, 89.6 percent of moderate income units, and 63.4 percent of above moderate income units. The Metro, (91.6 percent), Gateway (79.1 percent), South Bay (73.9 percent), and Antelope Valley (70.6 percent) Planning Areas have the highest concentration of RHNA units in LMI areas. Although a majority of lower income units are in LMI areas, where more than 50 percent of the population is low or moderate income, sites selected for lower income units are not disproportionately located in low income areas in comparison to moderate and above moderate income sites. As shown in **Figure E-35**, much of unincorporated Los Angeles County has higher concentrations of LMI households.

Figure E-35: Distribution of RHNA Units (Sites Inventory and Rezoning) by HUD Low/Moderate Income Area

Antelope Valley Planning Area

Sites in the Sites Inventory and the Rezoning Program and the HUD LMI Areas in the Antelope Valley Planning Area are shown in **Figure E-36**. In general, the eastern side of the Planning Area has greater concentrations of LMI households than the western side. As discussed previously, most of northeastern corner of the Antelope Valley Planning Area is also categorized as low resource by the Fair Housing Task Force. All units in the Antelope Valley Planning Area are moderate income units. Of the 1,279 moderate income RHNA units, 30.3 percent are in tracts with LMI populations between 50 and 75 percent, and 40.3 percent are in tracts with LMI populations exceeding 75 percent.

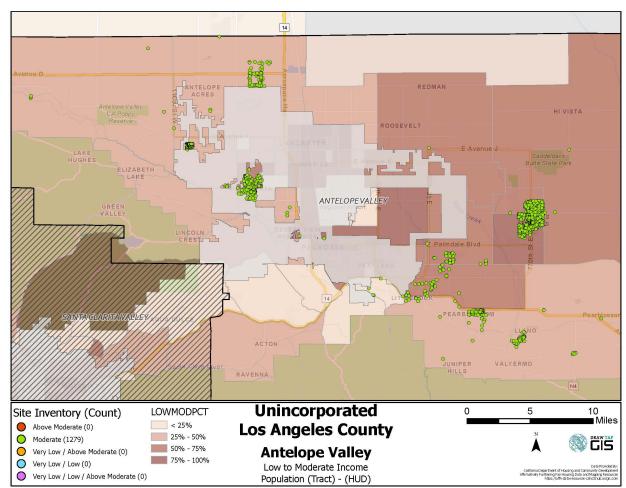

Figure E-36: Sites Inventory/Rezoning and LMI Areas – Antelope Valley Planning Area

Gateway Planning Area

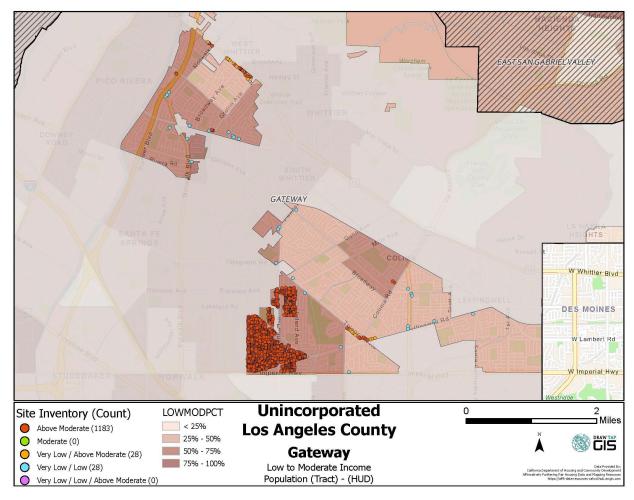

Sites in the Sites Inventory and the Rezoning Program and the HUD LMI Areas in the Gateway Planning Area are shown in **Figure E-37**. LMI populations in the Gateway Planning Area are most concentrated in the northeastern corner where sites have been identified to meet the RHNA. Lower and above moderate income units have been identified in the Gateway Planning Area to meet the RHNA.

Approximately 41 percent of units are in tracts where 75 to 100 percent of the population is LMI, including 17.7 percent of lower income units and 47.5 percent of above moderate units (**Table E-20**).

Table E-20: Sites Inventory/Rezoning and LMI Areas – Gateway Planning Area

Total	1.2%	19.7%	38.0%	41.2%	6,671

Figure E-37: Sites Inventory/Rezoning and LMI Areas – Gateway Planning Area

Metro Planning Area

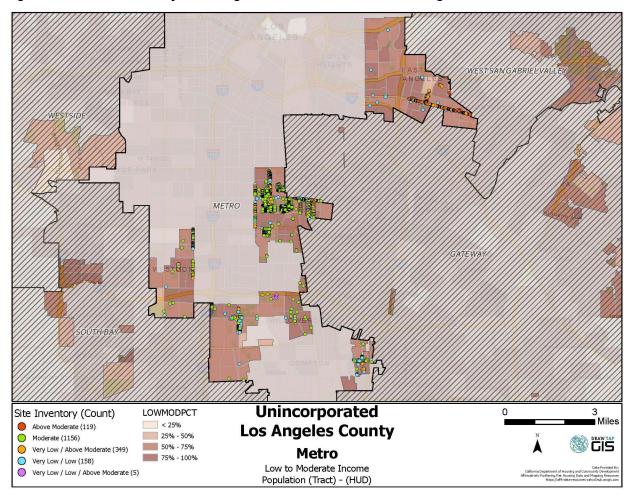

Sites in the Sites Inventory and the Rezoning Program and the HUD LMI Areas in the Metro Planning Area are shown in **Figure E-38**. Most unincorporated areas in the Metro Planning Area have concentrations of LMI households. Lower, moderate, and above moderate income units have been identified in the Metro Planning Area to meet the RHNA. Approximately 58.8 percent of units are in

tracts where 75 to 100 percent of the population is LMI, including 57.5 percent of lower income units, 65 percent of moderate income units, and 53.5 percent of above moderate units (**Table E-21**).

Total	0.0%	8.5%	32.8%	58.8%	27,426

Figure E-38: Sites Inventory/Rezoning and LMI Areas – Metro Planning Area

South Bay Planning Area

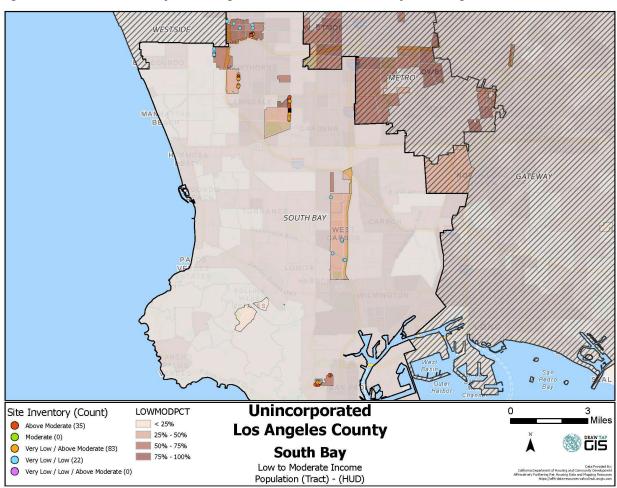

Sites in the Sites Inventory and the Rezoning Program and the HUD LMI Areas in the South Bay Planning Area are shown in **Figure E-39**. Northern unincorporated areas in the South Bay Planning Area generally

have higher concentrations of LMI households. Lower and above moderate income units have been identified in the South Bay Planning Area to meet the RHNA. Approximately 16.2 percent of units are in tracts where 75 to 100 percent of the population is LMI and 57.7 percent are in tracts where 50 to 75 percent of the population is LMI (**Table E-22**).

Figure E-39: Sites Inventory/Rezoning and LMI Areas - South Bay Planning Area

Environmental Health (CalEnviroScreen Score)

CalEnviroScreen 4.0 scores percentiles based on exposures (i.e., ozone, toxic releases, traffic, etc.), environmental effects (i.e., cleanup sites), sensitive populations, and socioeconomic factors. Lower scores indicate better environmental health. Tracts in the 80th percentile, for example, are exposed to worse environmental conditions than 80 percent of tracts in the region. The distribution of RHNA units by CalEnviroScreen score is shown in **Table E-23** and **Figure E-40**.

Overall, nearly half of the RHNA units are located in tracts in the 81st percentile or higher. A smaller proportion of lower income units are located in these tracts (43.9 percent) compared to 88 percent of moderate income units. Approximately 12.4 percent of units scored are in tracts in the 40th percentile or lower, including 15.7 percent of lower income units, 6.2 percent of moderate income units, and 11.1 percent of above moderate income units.

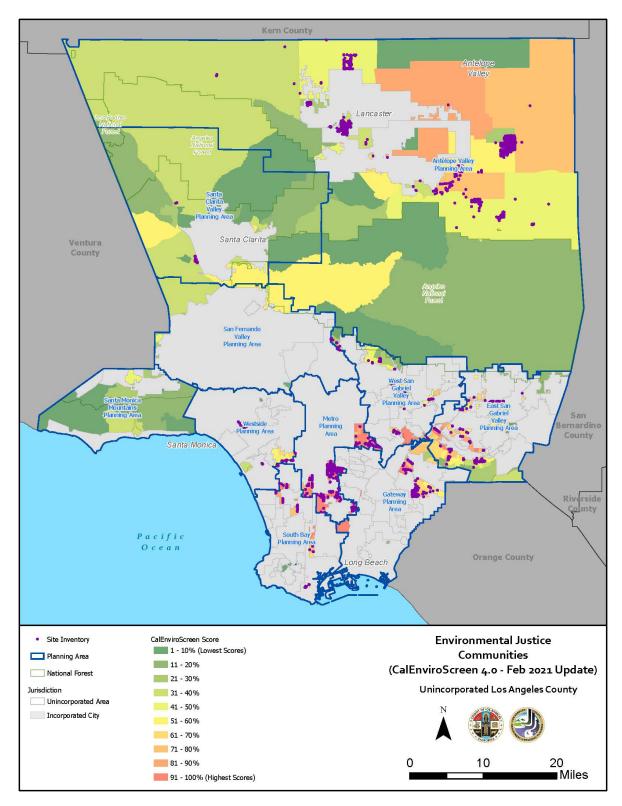

The Gateway, Metro, and South Bay Planning Areas have the highest concentration of RHNA units in the 81st percentile or higher (see **Figures E-41**, **E-42**, and **E-43**). Approximately 64.7 percent of units in the Gateway Planning Area, 87 percent of units in the Metro Planning Area, and 45.8 percent of units in the South Bay Planning Area are in the 81st percentile or higher. In comparison, only 12.9 percent of units in the East San Gabriel Valley Planning Area, 3.7 percent of units in the West San Gabriel Planning Area, and 0.2 percent of units in the Antelope Valley Planning Area scored in the same range. There are no units in Westside or Santa Clarita Valley Planning Areas in tracts in the 81st percentile or above.

Integration and Segregation/Disproportionate Needs

Concentration of People of Color

Concentrations of people of color are shown in **Figure E-2** and **Figure E-44**. As discussed previously, most of unincorporated Los Angeles County has high concentrations of racial/ethnic minority populations.

There are no RHNA units located in block groups where people of color make up less 20 percent of the population. A majority of RHNA units are in block groups where more than 80 percent of the population is people of color, including 72.5 percent of lower income units, 88.3 percent of moderate income units, and 69.5 percent of above moderate income units.

The Metro and East San Gabriel Valley Planning Areas have the highest numbers of lower income RHNA sites. These are areas with historically high concentrations of people of color. The Sites Inventory and concentration of people of color by Planning Areas are shown in **Table E-24.**

Familial Status

Most census tracts with RHNA units have moderately high concentrations of children in married couple households and low concentrations of children in female-headed households, not unlike the general distribution of families throughout the unincorporated areas. The distribution of RHNA units by percent of children in married couple households is shown in **Table E-25** and **Figure E-53**. **Table E-26** and **Figure E-54** show the distribution of RHNA units and percent of children in female-headed households.

There are no RHNA units in tracts where less than 20 percent of children live in married couple households. Most above moderate units (83 percent) are in tracts where a majority of children, 60 percent or more, live in married couple households, compared to just under 65.8 percent of lower income units and 25.1 percent of moderate income. There are no RHNA units in tracts where more than 60 percent of children live in single-parent female-headed households. Almost all units are in tracts where fewer than 40 percent of children live in female-headed households.

Westside and Metro are the only Planning Areas with sites in tracts where more than 40 percent of children live in female-headed households. Approximately 10.7 percent of units in the Westside Planning Area and 1.2 percent of units in the Metro Planning Area have 40 to 60 percent of children living in female-headed households. The sites distribution and concentration of children in female-headed households for the Metro and Westside Planning Areas are shown in **Table E-26** and **Figures E-55** and **E-56**.

Figure E-55: Sites Inventory/Rezoning and Children in Female-Headed Households – Metro Planning Area

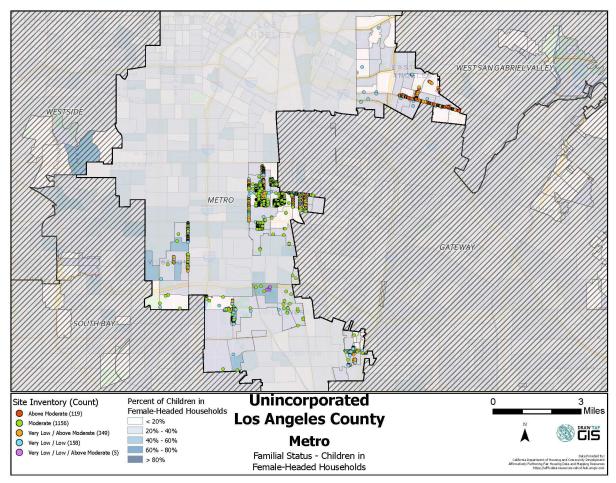

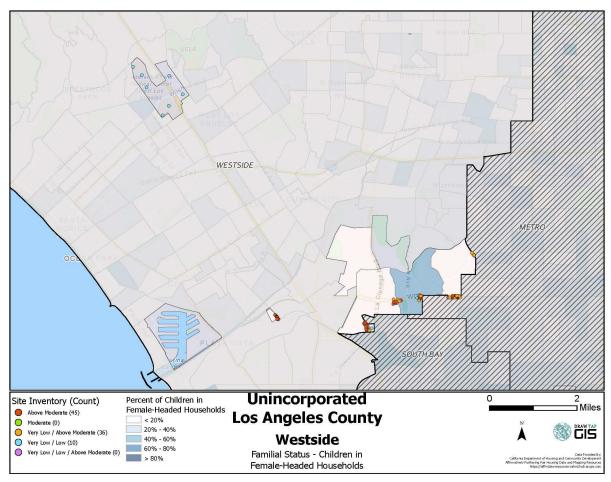

Figure E-56: Sites Inventory/Rezoning and Children in Female-Headed Households – Westside Planning Area

Persons with Disabilities

As discussed previously, the distribution of persons with disabilities is fairly consistent throughout the unincorporated areas. The construction of new units, especially multifamily units, has the potential to expand accessible housing opportunities for persons with disabilities. Multifamily housing new construction is subject to the accessibility requirements of ADA and the California Building Codes. The distribution of RHNA units by disability status is shown in **Table E-27** and **Figure E-57**.

All moderate and above moderate units used to meet the 2021-2029 RHNA are in tracts with a population of persons with disabilities smaller than 20 percent. There are no units in tracts where the population of persons experiencing disabilities exceeds 60 percent. Only 3.4 percent of lower income units are in tracts with a population of persons with disabilities between 20 and 60 percent. The remaining 96.5 lower income units are in tracts where less than 20 percent of the population experiences a disability.

Gateway and Westside are the only Planning Areas with lower income units in tracts with a population of persons with disabilities exceeding 20 percent. Approximately 3.2 percent of lower income units in the Gateway Planning Area are in tracts where persons with disabilities make up 20 to 40 percent of the population, and 29.7 percent of lower income units in the Westside Planning Area are in tracts where persons with disabilities make up 40 to 60 percent of the population. Populations of persons with disabilities and the Sites Inventory are shown in **Table E-27** and **Figures E-58** and **E-59** for the Gateway and Westside Planning Areas.

Table E-27: Distribution of RHNA Units (Sites Inventory and Rezoning) by Disability Status

IDENTIFICATION AND PRIORITIZATION OF CONTRIBUTING FACTORS

To address the fair housing issues identified in this analysis, the County has identified the following contributing factors to prioritize through the actions presented in Section 4, *Priorities, Goals, and Actions*, below:

- Presence of a R/ECAP As shown in Figure E-8, there are six R/ECAP census tracts located in the unincorporated areas. To mitigate the presence of R/ECAPs, the County will focus on the concentration of affordable housing units and Housing Choice Voucher holders, the limitations of economic mobility opportunities, and lack of public investment.
- Displacement of residents due to economic pressures Sensitive communities at risk of
 displacement as shown in Figure E-20. The County will address unaffordable rents and sales
 prices, the shortage of subsidized housing units, the concentration of poverty in low resource
 areas, costs of repairs or rehabilitation, dominance of single-family housing, and discriminatory
 lending practices to reduce displacement risk among unincorporated area households.
- **Disproportionate access to services** Access to services, including economic, education, and transportation opportunities, are discussed in the *Access to Opportunities* section. To address some of the issues identified in this analysis, the County will focus on expanding the supply of housing units that are accessible to public transit and high-quality school systems.
- **Substandard housing conditions** As discussed, substandard housing conditions, including aging housing and housing in need of repair, often disproportionately affect lower income households. To mitigate substandard housing issues for all unincorporated area residents, the County will address the aging housing stock, cost of repairs, and code enforcement.

These contributing factors and supplementary actions are further described in the following section.

PRIORITIES, GOALS, AND ACTIONS

To affirmatively further fair housing, the County will engage in a range of activities:

Table E-28: AFFH Strategies

Fair Housing Issue	Contributing Factors	Relevant Programs

APPENDIX G: SITES INVENTORY AND REZONING METHODOLOGY

Introduction

The following is not an exhaustive list of all the GIS analyses that were completed for the Housing Element Update. This was a very complex project that analyzed over 200,000 parcels, with unincorporated Los Angeles County's complex geography of disconnected unincorporated communities. There were some changes in methodology as staff went through the process and went deeper into this analysis. As much as possible, the main processes were automated using GIS models due to the iterative nature of this project, along with the changing of variables and incorporating updated information. Web mapping applications were also used to facilitate quality control and editing among many Department of Regional Planning (DRP) staff, and to share the results with stakeholders.

Part I – Preliminary Assessment and the Development of the Sites Inventory

In August 2019, as the first step for site identification for the Sites Inventory and the Rezoning Program, DRP's GIS staff compiled a list of candidate parcels that meet all of the following criteria. While some of these criteria were directly from the State law (e.g., sites in the inventory should be between 0.5 acres and 10 acres in size), other criteria were used to exclude areas that are, in general, not suitable for housing development – particularly higher-density multi-family projects (e.g., open space areas). Some specific plan areas were excluded and the planned units within the specific plan areas were reported separately outside of the Sites Inventory.

Criteria

- All unincorporated parcels ≥ 0.5 acre and ≤ 10 acres
- Remove the following specific plans: Catalina, La Vina, Marina del Rey, Newhall Ranch, Northlake, Universal, Centennial
- Remove the following communities with a local coastal plan/in a Coastal Zone: Santa Monica Mountains LCP, Pepperdine University, Santa Catalina Island, Marina del Rey, and Ballona Wetlands
- Remove the following Land Use categories from the Antelope Valley Area Plan and General Plan communities:
 - o OS-C: Open Space Conservation
 - OS-PR: Open Space Parks and Recreation
 - OS-NF: Open Space National Forest
 - OS-BLM: Open Space Bureau of Land Management

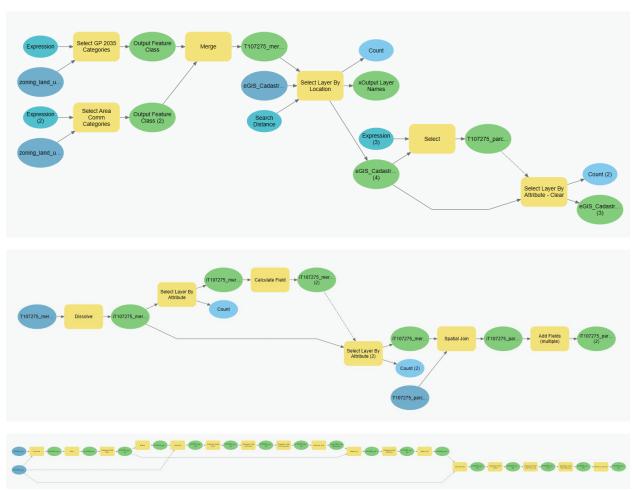

- W: Water
- MR: Mineral Resources
- o ML: Military Land
- MU-R: Mixed Use Rural (applicable to Antelope Valley only)
- o CR: Rural Commercial
- o IH: Heavy Industrial
- o IL: Light Industrial
- RL: Rural Lands (at all densities)
- Remove the following Land Use categories from the remaining Area/Community Plan communities:
 - East Los Angeles Community Plan
 - CR: Commercial Residential
 - I: Industrial
 - OS: Open Space
 - o Altadena Community Plan
 - E: Estate / Equestrian
 - N: Non-Urban
 - Hacienda Heights Community Plan
 - IL: Light Industrial
 - OS-PR: Open Space Parks and Recreation
 - RL: Rural Lands (at all densities)
 - Rowland Heights Community Plan
 - I: Industrial
 - O: Open Space
 - N1 & N2: Non-Urban
 - Santa Clarita Valley Area Plan
 - OS-C: Open Space Conservation
 - OS-PR: Open Space Parks and Recreation
 - OS-NF: Open Space National Forest
 - OS-W: Open Space Bureau of Land Management
 - MU-R: Mixed Use Rural (applicable to Antelope Valley only)
 - IL: Light Industrial
 - IO: Industrial Office
 - RL: Rural Lands (at all densities)
 - Santa Monica Mountains North Area Plan
 - N20, N10, N5: Mountain Lands
 - o Twin Lakes Community Plan
 - RC: Rural Communities
 - West Athens-Westmont Community Plan
 - CR: Commercial Recreation
 - OS.1: Recreation / Open Space
- For the remaining filtered parcels, the following Assessor data should be included:
 - APN Assessor Parcel Number

- Address Situs & Mailing
- Owner name Include Owner Full Name
- Assessor Land Use Include Description & Type
- Assessor Land Use Code
- Number of Existing Units Units 1, 2, 3, 4, & 5; NULL values converted to zeros
- Assessor Land Value (LV)
- Assessor Improvement Value (IV)
- Land to Improvement Ratio (LV_IV_Ratio) field added. As a formula, LV_IV_Ratio = LV/IV. If the land is more valuable than the improvement, the number would be greater than 1.
- Parcel Size
- Building Year 1, 2, 3, 4, & 5; NULL values converted to zeros
- The following information was appended as it relates to various overlays that need to be coded into the layer. In parentheses are how the values were calculated.
 - o Previous Housing Element Adequate Sites Inventory (Y/N) 2008 & 2014
 - CSD Name ("Not Within" value calculated for parcels outside CSDs; otherwise calculated with the CSD name)
 - Very High Fire Hazard Severity Zones (Entirely Within / Partially Within / Not Within)
 - o Significant Ecological Area (Entirely Within / Partially Within / Not Within) Hillside Management Area (slope > 25%) (Entirely Within / Partially Within / Not Within) − Calculated with features ≥ 500 sq ft
 - o Agricultural Resource Area (ARA) (Entirely Within / Partially Within / Not Within)
 - Airport Influence Area (Entirely Within / Partially Within / Not Within)
 Environmental Justice Screening Method (overall score
 - Tax Credit Allocation Committee (TCAC) Opportunity Areas (Highest, High, Moderate, Low, High Segregation & Poverty)
 - Transit Oriented Districts (3rd St; W Carson; Willowbrook; Connect SW; or otherwise Not Within)
 - Ratio of LV to IV Nulls converted to zeros (see above under From Assessor Attributes)
 - o FEMA Flood, 100 year & 500 year (Entirely Within / Partially Within / Not Within)
 - Liquefaction (Entirely Within / Partially Within / Not Within)
 - Landslide (Entirely Within / Partially Within / Not Within)
 - Alquist-Priolo Zones (Entirely Within / Partially Within / Not Within)
 - o Fault Trace (Lines) Fault name, or "N/A"
 - Fault Zone (Line) Fault zone name, or "N/A"
- Lastly, the remaining Land Use Policy, Zoning, and the TOD Specific Plan categories were included in the analysis. Multiple fields were added for those cases where there was more than one category per parcel and they record the area covered by each category, as well as the relative percentage.

GIS Modeling

For all the criteria listed above, GIS Models were developed using ModelBuilder in ArcGIS Pro. **Figure G-1** below is a sample screenshot of a few of these models. Throughout the project various models were developed so that the multiple processes could be re-run with different parameters entered in, if necessary.

Figure G-1: Sample GIS Model

The output GIS layer was exported into three datasets of sites based on parcel size, land use, and Assessor information: 1) potential vacant sites to be included in the Sites Inventory; 2) potential underutilized sites to be included in the Sites Inventory; and 3) potential sites to be included in the Rezoning Program. These datasets were organized into a series of spreadsheets, which was used as reference by DRP planners during the first round of review of sites.

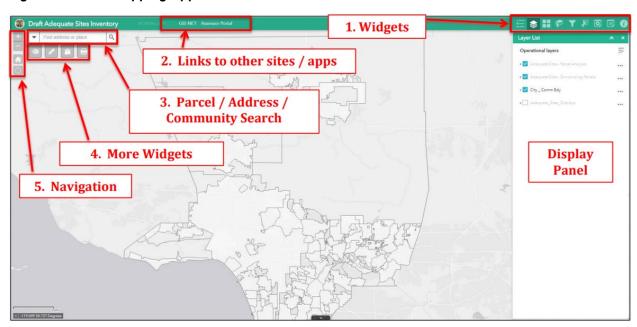

Web Mapping Application

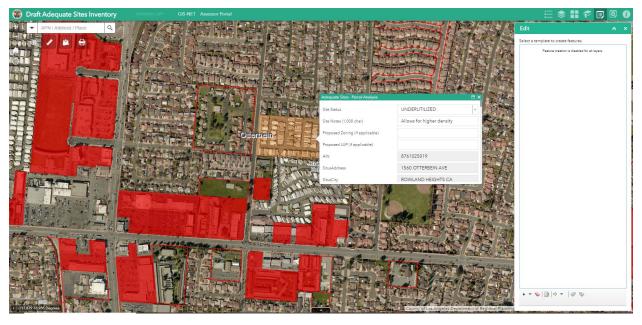

ArcGIS Enterprise was utilized for publishing various apps throughout this project. The advantage of using this platform was that DRP staff could access a mapping application and edit data without

needing any kind of ArcGIS Online login credentials. The other advantage was that it was on the County of Los Angeles network and sensitive information (such as Assessor Parcel ownership) could be displayed.

A web mapping application (**Figure G-2**) was developed for the first round of parcel review by the DRP planners. Planners had the ability to make their edits to the GIS layer directly with their recommendation on a candidate site, which greatly streamlined the review process.

Figure G-2: Web Mapping Application

Preliminary Assessment by the Volunteer Planners

Once the GIS team compiled the first lists of parcels and generated a GIS layer of the candidate sites on the web mapping application, about 30 volunteer planners from various sections in DRP were enlisted to evaluate over 24,000 parcels to further determine housing development suitability and availability. The advantage of this approach was that various planning staff had expertise in different areas based on their experiences in community plan development, permit processing, and/or code enforcement.

To facilitate the parcel-by-parcel assessment by the volunteer planners, several training sessions were conducted on how to enter the staff recommendation and additional notes in the web mapping application. The volunteer planners were also instructed to use various tools to conduct their research, including EnerGov, which is a permit management and tracking system used by various County agencies, and GIS-NET, which is DRP's main web mapping application that has over 200 spatial layers relevant to various zoning information, planning workflows, and other historical images and aerial photos. Moreover, guiding questions were distributed to all volunteer planners to ensure that a consistent set of factors were considered.

Guiding Questions

The guiding questions were organized by three different categories: 1) a vacant site to be included in the Sites Inventory; 2) an underutilized site to be included in the Sites Inventory; and 3) a potential site to be included in the Rezoning Program. It is important to note that none of the guiding questions was meant to be used as a single determining factor. Rather, the volunteer planners were instructed to use these questions as their guide when conducting research and analysis, and tailor their recommendations based on their individual local knowledge of the communities through their work in community plan development, permit processing, and/or code enforcement.

Vacant Site to be Included in the Sites Inventory

The sites included on this list have been screened based on size, General Plan land use (30 du/ac or more), and Assessor data. Your task is to 1) verify whether the parcel is vacant; and 2) verify whether the parcel is developable and therefore, you recommend it to be included in the Sites Inventory.

Steps:

- 1. Review the parcel.
 - a. Is it vacant?
 - i. Check ortho/aerial photos.
 - ii. Check to see if there is a recent approval or pending case for the parcel.
 - iii. If there is a structure(s) on the parcel, check to see if it is legally established.
 - b. Is it developable?
 - i. Is the parcel located within a special management area or subject to additional regulations that will limit development?
 - ii. Is the parcel supported by water, sewer, and dry utilities (electric, gas, telecommunications, television, cable)?

- c. If necessary, use any other information and/or do a site visit to make your determination. Document this in the Notes section in the mapping application and save any files (e.g., copies of approved or pending plans, building permits, or photographs you took during site visit) in the appropriate folder.
- 2. In the mapping application, go to Smart Editor, and select VACANT, N/A, or FLAG. VACANT: Yes, this parcel is vacant and developable, and I recommend that it be included in the Sites Inventory.

N/A: No, this parcel is not vacant and/or not developable, and I do not recommend that it be included in the Sites Inventory. If the parcel has an approval for a non-residential use, please indicate in the Notes section.

- If the parcel is not vacant, please include a description of the legally established existing use in the Notes section. If you think the parcel meets the criteria of an "underutilized" parcel [See READ ME UNDERUTILIZED], select FLAG instead.
- If the parcel is not vacant, and there are no legally established uses on the site, select FLAG instead.
- If the parcel has a pending case for residential or non-residential use, or anything else, select FLAG instead.
- If the parcel has an approval for a residential use, select FLAG instead.

FLAG: Not sure; needs further review; parcel is "underutilized; no legally established uses;" pending case; residential approval.

3. After making your selection (VACANT, N/A, or FLAG) in the drop-down list, add to the Notes section. Use this section to provide an explanation for your recommendation, and to add any other information that you think would be useful.

Underutilized Site to be Included in the Sites Inventory

The sites included on this list have been screened based on size, General Plan land use (30 du/ac or more), and Assessor data. Your task is to 1) verify the existing use on the parcel; 2) verify whether the parcel is underutilized; and 3) verify whether the parcel is likely to be developed into a multifamily residential use in the next 10 years and therefore, you recommend it to be included in the Sites Inventory.

Steps:

- 1. Review the parcel.
 - a. What is the existing use?
 - i. Verify the existing use. Start with the Assessor's land use description.
 - ii. Check to see if the use(s) is legally established. Check building permit data, planning approvals.
 - iii. Check to see if there is a recent approval or pending case for the parcel.
 - b. Is it underutilized? Consider these criteria for underutilized parcels.
 - i. If residential, is the existing density less than the maximum allowable density permitted by the General Plan?

- ii. If residential, are the buildings more than 30 years old? If commercial, are the buildings more than 15 years old?
- iii. Is the land to improvement ratio for the parcel greater than 1.0, which indicates that the land is more valuable than the structures on the site?
- c. Is it likely to be developed into a multifamily residential use in the next 10 years?
 - i. Is the parcel surrounded by existing multifamily residential uses?
 - ii. Are there nearby (same block, same neighborhood, etc.) parcels that have recently (around last five years) been (re)developed into a multifamily residential use? What about recent approvals? Pending cases?
 - iii. Is the parcel located within a special management area or subject to additional regulations that will limit development?
 - iv. Is the site supported by water, sewer, and dry utilities (electric, gas, telecommunications, television, cable)?
- d. If necessary, use any other information and/or do a site visit to make your determination. Document this in the Notes section in the mapping application, and save any files (e.g., copies of approved or pending plans, building permits, or photographs you took during site visit) in the appropriate folder.
- 2. In the mapping application, go to Smart Editor, and select UNDERUTILIZED, N/A, or FLAG. UNDERUTILIZED: Yes, this parcel is underutilized and likely to be redeveloped with multifamily residential uses in the next 10 years, and I recommend that it be included in the Sites Inventory. N/A: No, this parcel is not underutilized and/or not likely to be redeveloped with multifamily residential uses in the next 10 years, and I do not recommend that it be included in the Sites Inventory. If the parcel has an approval for a non-residential use, please indicate in the Notes section.
 - If the parcel is vacant], select FLAG instead.
 - If there are no legally established uses on the site, select FLAG instead.
 - If you think the parcel is likely to be redeveloped into a non-residential use, select FLAG instead.
 - If the parcel has a pending case for residential or non-residential use, or anything else, select FLAG instead.
 - If the parcel has an approval for a residential use, select FLAG instead.

FLAG: Not sure; needs further review; parcel is vacant; no legally established uses; pending case; residential approval.

3. After making your selection (UNDERUTILIZED, N/A, or FLAG) in the drop-down list, add to the Notes section. Use this section to provide an explanation for your recommendation, and to add any other information that you think would be useful.

Potential Site to be Included in the Rezoning Program

The sites included on this list have been screened based on size, General Plan land use, and Assessor data. Your task is to 1) verify the existing use on the parcel; 2) research the land use designation and zoning history for the parcel; 3) determine the appropriateness of redesignating the parcel to H30, H50,

H100, H150, MU, CG, or CM; 4) determine the appropriateness of also rezoning the parcel; and 5) identify additional sites for redesignating/rezoning to avoid "spot designating/zoning."

The list of parcels identified through this task will be further refined by the Housing Policy Section staff, using additional criteria to determine if the site is developable and meets the requirements of the State Housing Element Law.

Steps:

- 1. Review the parcel.
 - a. What is the existing use?
 - i. Verify the existing use. Start with the Assessor's land use description.
 - ii. Check to see if the use(s) is legally established. Check building permit data, planning approvals.
 - iii. Check to see if there is a recent approval or pending case for the parcel.
 - b. What is the history of the parcel?
 - i. Check GIS-NET for the past land use designation and zoning.
 - ii. Was the parcel ever the subject of a project-based plan amendment or zone change?
 - iii. Was the parcel part of a recent comprehensive planning or rezoning effort?
 - c. Is it appropriate to redesignate the parcel to H30, H50, H100, H150, MU, CG, or CM? If so, which one?
 - i. Is the parcel surrounded by existing multifamily residential uses?
 - ii. Are there nearby (same block, same neighborhood, etc.) parcels that have recently (around last five years) been (re)developed into a multifamily residential use? What about recent approvals? Pending cases?
 - iii. Is the parcel located within a special management area ¹² or subject to additional regulations that will limit development?
 - iv. Is the site supported by water, sewer, and dry utilities (electric, gas, telecommunications, television, cable)?
 - d. Is it necessary to also rezone the parcel?
 - i. Is the zoning inconsistent with the new land use designation?
 - ii. Is the zoning consistent but not well aligned with the new land use designation?
 - e. If necessary, use any other information and/or do a site visit to make your determination. Document this in the Notes section in the mapping application, and save any files (e.g., copies of approved or pending plans, building permits, or photographs you took during site visit) in the appropriate folder.
- 2. In the mapping application, go to Smart Editor, and select REZONING, N/A, or FLAG.

¹² See County of Los Angeles General Plan 2035 for more information on special management areas.
Land use Element: https://planning.lacounty.gov/assets/upl/project/gp final-general-plan-ch6.pdf
Appendix C – Land Use Element Resources: https://planning.lacounty.gov/assets/upl/project/gp final-general-plan-appendices.pdf
Figure C.1 – Hazard, Environmental and Resource Constraints Map:
https://planning.lacounty.gov/assets/upl/project/gp 2035 2021-FIG C-1 Hazard Environmental Constraints.pdf

REZONING: Yes, I recommend that this parcel be redesignated to H30, H50, H100, H150, MU, CG, or CM; and/or yes, I recommend that this parcel be rezoned.

N/A: No, I do not recommend redesignating/rezoning this parcel.

FLAG: Not sure; needs further review; pending case; recent approval.

- 3. After making your selection (REZONING, N/A, or FLAG) in the GIS Web App, add to the Notes section. Use this section to provide an explanation for your recommendation, including your recommended land use designation change and/or zone change, and to add any other information that you think would be useful.
- 4. Review surrounding parcels and identify additional candidates for land use and zone changes. Be surgical. For each parcel, please consider the following:
 - a. Is it necessary to redesignate the parcel to H30, H50, H100, H150, MU, CG, or CM to avoid spot designating/zoning?
 - i. Is the parcel surrounded by existing multifamily residential uses?
 - ii. Are there nearby (same block, same neighborhood, etc.) parcels that have recently (around last five years) been (re)developed into a multifamily residential use? What about recent approvals? Pending cases?
 - iii. Is the parcel located within a special management area or subject to additional regulations that will limit development?
 - iv. Is the site supported by water, sewer, and dry utilities (electric, gas, telecommunications, television, cable)?
 - b. Is it necessary to also rezone the parcel?
 - i. Is the zoning inconsistent with the new land use designation?
 - ii. Is the zoning consistent but not well aligned with the new land use designation?
 - c. What is the existing use?
 - i. Verify the existing use. Start with the Assessor's land use description.
 - ii. Check to see if the use(s) is legally established. Check building permit data, planning approvals.
 - iii. Check to see if there is a recent approval or pending case for the parcel.
 - d. What is the history of the parcel?
 - i. Check GIS-NET for past land use designation and zoning.
 - ii. Was the parcel ever the subject of a project-based plan amendment or zone change?
 - iii. Was the parcel part of a recent comprehensive planning or rezoning effort?
 - e. If necessary, use any other information and/or do a site visit to make your determination. Document this in the Notes section in the mapping application, and save any files (e.g., copies of approved or pending plans, building permits, or photographs you took during site visit) in the appropriate folder.
- 5. In the mapping application, click on a parcel, or use the Batch Attribute Editor to select multiple parcels, and select REZONING or FLAG.

REZONING: I recommend that this parcel be redesignated to H30, H50, H100, H150, MU, CG, or CM; and/or I recommend that this parcel be rezoned.

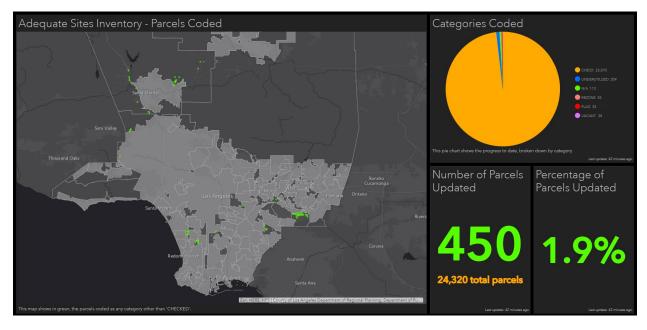

FLAG: I think this parcel should be redesignated to H30, H50, H100, H150, MU, CG, or CM; and/or I think this parcel should be rezoned, but I believe it needs further review. Or, I think this parcel should be redesignated to H30, H50, H100, H150, MU, CG, or CM; and/or I think this parcel should be rezoned, but there is a pending case or a recent approval that needs to be considered.

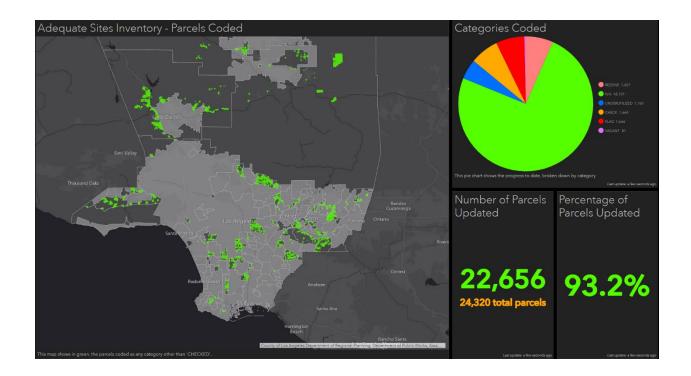

6. After making your selection (REZONING, N/A, or FLAG) in the drop-down list, add to the Notes section. Use this section to provide an explanation for your recommendation, and any other information that you think would be useful.

Dashboard

As the volunteer planners were making their edits, a dashboard was developed so that DRP staff could see, in real time, the progress being made during the first round of parcel review. The screenshots in **Figure G-3** below indicate the percentage of categories coded and how far along overall staff was in making the edits.

Figure G-3: Web Mapping Application Dashboard

Sites Inventory: Further Refinement

In general, the Sites Inventory includes vacant and underutilized sites that were reviewed and manually selected by the volunteer planners to accommodate the Lower Income RHNA, as these sites all allow at least 30 units per acre pursuant to Government Code section 65583.2 (c)(3)(B)(iv). DRP staff then further reviewed the recommendations by the volunteer planners and determined to only include sites that meet all of the following for the Lower Income RHNA:

- The site is not in a Special Management Area (SMA) Class II or III of the General Plan Hazard, Environmental, and Resource Constraints Model. SMA Class II and III include various moderate and severe hazard, environmental, and resource constraints on development, including, but not limited to:
 - FEMA 100-year Flood Zone;
 - Significant Ecological Areas;
 - Sensitive Environmental Resource Areas;
 - Active Fault Trace;
 - Seismically Induced Landslide Zone;
 - Hillside Management Areas with 50 percent or greater slope;

¹³ See Appendix C of the General Plan for more information on the Hazard, Environmental, and Resources Constraints Model: https://planning.lacounty.gov/assets/upl/project/gp_final-general-plan-appendices.pdf

- o Agricultural Resource Areas; and
- The site is not in a Moderate, High, or Very High Fire Hazard Severity Zone.

In addition, DRP staff selected additional sites that allow less than 30 units per acre (mostly vacant) to accommodate the Moderate and Above Moderate Income RHNA. All of these sites are at least 5,000 sq. ft. in size since the minimum lot size (i.e., required area) in the zones that permit residential uses is generally 5,000 sq. ft. Sites selected to accommodate the Moderate Income RHNA are located within the South Los Angeles or Antelope Valley submarket area, as identified in the Inclusionary Housing Ordinance. The analyses in the Inclusionary Housing Feasibility Study indicate that market-rate rental and for-sale housing within these submarket areas are generally affordable to moderate income households. More information on the Sites Inventory for the Moderate and Above Moderate Income RHNA can be found in the Resources section of the Housing Element.

Part II – Selecting Sites for Rezoning

During the preliminary assessment by the volunteer planners, it was found that parcels less than 0.5 acres in size should also be considered as part of the rezoning site selection because there were not enough sites recommended by the volunteer planners for rezoning from the initial list of parcels between 0.5 acres and 10 acres in size. Also, additional lot consolidation incentives could also be added as part of the Rezoning Program or as a separate Housing Element implementation program (i.e., Program 21: Incentives for Lot Consolidation), making sites that are less than 0.5 acres in size more likely to be redeveloped into housing in the near future.

In July 2020, the GIS team was tasked to compile a list of parcels less than 0.5 acres in size using the same locational criteria that were used to generate the initial list of parcels for the preliminary assessment.

GIS Modeling

The GIS models that were built for the initial list of parcels between 0.5 acres and 10 acres in size were utilized again for the list of parcels less than 0.5 acres in size. Some modifications were made to some inputs and outputs; but ultimately, the final GIS layer for parcels less than 0.5 acres was generated. Over 192,000 parcels were generated from this output.

Rezoning: New Methodology for Site Selection

Once the preliminary assessment was completed by the volunteer planners and the Sites Inventory was refined by DRP staff, a new methodology was developed to identify potential sites for rezoning among 1) the newly added less-than-half-acre parcels, and 2) parcels that were not selected for the Sites Inventory. Specifically, this new methodology comprised of two components: 1) a scoring system to identify clusters of parcels that were ranked as the most ideal for rezoning, and 2) a set of criteria

https://planning.lacounty.gov/assets/upl/project/housing_la_ahap_appendixE.pdf https://planning.lacounty.gov/assets/upl/project/iho_supplemental-analysis.pdf

to evaluate the availability of individual parcels for housing development within those clusters and to determine whether the individual parcels can count toward the Lower Income RHNA shortfall.

Scoring System

As shown in **Table G-1**, scores were established under seven categories: parcel location/proximity, infrastructure, natural constraints, development potential, economic mobility, environmental justice, and transportation. All but one of the categories (infrastructure) included a set of scores established on a relative scale, comparing the level of significance or preferability under each category. Scores in most of these categories were established on a scale of 1 to 10. For example, under the transportation category, sites within a quarter mile of a High Quality Transit Area (HQTA) were given eight points, compared to sites outside of the quarter-mile distance but within a half-mile radius, which received seven points as they were slightly less preferable for rezoning because they are not as close to an HQTA. However, these are both less preferable than sites within a Transit Oriented District (TOD). The establishment of the TODs was a major land use strategy in the General Plan, ¹⁵ and sites in the TODs received the highest score possible (10 points) in the transportation category as there are or will be "built-in" incentives for higher-density housing development in the TOD specific plans (e.g., Program 2: Florence-Firestone Transit Oriented District Specific Plan). There are also several zoning and CEQA incentives available through State law for projects located near transit.

Similarly, under the parcel location/proximity category, sites in Transit Centers (9 points), Neighborhood Centers (10 points), and Corridors (10 points) were given higher scores since these areas were identified in the General Plan as opportunity areas with housing and infill development opportunities, and future community-based planning efforts, such as Programs 7, 18, 19, and 20 (the area plans), will further study and develop additional incentives to encourage higher-density housing development in these opportunity areas. ¹⁶ On the other hand, sites located in the Industrial Flex Districts identified by the General Plan had 10 points deducted under this category, since these are existing industrial areas where, despite the current mix of industrial and non-industrial uses, housing development is unlikely to occur in the near future.

Also, in order to affirmatively further fair housing through the rezoning effort, the scale under the economic mobility and environmental justice categories were adjusted, with 15 points being the highest possible score under each of these categories instead of 10 points. Specifically, to meet the goal of encouraging access to opportunity and to prevent further segregation and concentration of poverty, sites located in areas with the most resources and opportunities in terms of educational attainment, employment, and economic mobility as identified by the California Tax Credit Allocation Committee (TCAC) received the highest score (15 points) under the economic mobility category. Similarly, under the environmental justice category, sites located in areas that are least burdened by pollution received the highest score (15 points). For this category, the scoring system incorporated data from the Environmental Justice Screening Method (EJSM) tool, which is a mapping application developed by the County in partnership with University of Southern California and Occidental

_

¹⁵ https://planning.lacounty.gov/tod/

¹⁶ See General Plan Chapter 5: Planning Areas Framework for more information on the opportunity area types in various planning areas: https://planning.lacounty.gov/assets/upl/project/gp_final-general-plan-ch5.pdf

College.¹⁷ EJSM illustrates cumulative health risks by identifying areas that are disproportionately burdened by and vulnerable to multiple types of pollution. Sites with the highest EJSM score are the most vulnerable to pollution, and thus received no points under this category. In addition, points were deducted on sites that are within 500 feet of a freeway or railway.

Table G-1: Scoring System, Rezoning Suitability

Category	Scores
Parcel Location/Proximity	
Sites are scored based on proximity to uses and/or amenities that support he lot consolidation potential. Sites within industrial areas also have points ded	
Within, or partially within, a Neighborhood Center (per General Plan)	10
Within, or partially within, a Corridor (per General Plan)	10
Within, or partially within, a Transit Center (per General Plan), which is not currently a Transit Oriented District	9
Within ½ mile of parcels designated by the General Plan for multifamily, commercial, or mixed-use (H30+)	7
Within ½ mile of existing multi-family residential uses	5
Within an Economic Opportunity Area	5
Parcel adjacent to lots with same owner	2
Within, or partially within, an Industrial Flex District	-10
Infrastructure	
Sites within a water and/or sewer district receive additional points.	
Served by public water, sewer, or utilities	6
Natural Constraints	
Sites are scored based on whether they are within a Special Management A has Hazard or Environmental Constraints as identified in the General Plan (from lowest to highest in Classes 1 - 3).	
No SMA	10
SMA Class 1	8
SMA Class 2	-8
SMA Class 3	-10
Development Potential	
Sites get a higher score where there is more development potential.	
Fronts a highway or public street, or is not landlocked	9
Land to Improvement Ratio is greater than 1, which indicates that the land is more valuable than the structures on-site	8
Within a Community Standards District (CSD) with less restrictive development standards	3
Within a Community Standards District (CSD) with more restrictive development standards	-1
Economic Mobility	
Sites get a higher score if located in areas with more resources and opportuned educational attainment, employment, and economic mobility.	unities in terms of
TCAC High or Highest Resource Area	15

¹⁷ https://planning.lacounty.gov/greenzones/ejsm

Category	Scores	
TCAC Moderate Resource Area	10	
TCAC Low Resource Area or High Segregation and Poverty	0	
Missing/Insufficient Data	0	
Environmental Justice		
Sites get a higher score if located in areas that are less burdened by pollution	on.	
EJSM Score 0-4	15	
EJSM Score 5-9	10	
EJSM Score 10-14	5	
EJSM Score 15+	0	
Within 500 ft of a freeway	-4	
Within 500 ft of a railway	-3	
Transportation		
Sites get a higher score if in proximity to transit.		
Within a TOD	10	
Within ¼ mile of existing or planned HQTA (not within a TOD or Transit Center)	8	
Outside ¼ mile but within ½ mile of existing or planned HQTA (not within a TOD or Transit Center)	7	

Under each category, points were added or deducted on each candidate parcel. Points from the categories were then combined to generate the total score, which was used to rank a parcel's suitability for rezoning. Since 59 was both the average and the median total score, only areas with a significant clustering of parcels with a total score greater than 59 were considered more suitable for rezoning and selected for further review. The screenshots below (**Figure G-4**) illustrate how these total scores reveal higher scoring clusters. The image on the left shows all the data, whereas the image on the right shows all parcels with a total score greater than 59:

Proposed Land Use Designation and Zoning

Once the clusters of parcels with a total score greater than 59 were identified, the next step was to assign a proposed land use designation on these parcels. This step was critical in the rezoning site selection process as the maximum density allowed by the proposed land use designation would be used to calculate the net development potential on a candidate site. The net development potential would then be used as one of the criteria to determine whether the site, once rezoned, could count toward the Lower Income RHNA, since Government Code section 65583.2(h) requires that each site selected for rezoning to accommodate the Lower Income RHNA shortfall must have the capacity to accommodate a minimum of 16 additional units. The proposed land use designation also dictates whether the candidate site would count toward the Lower Income RHNA shortfall, since Government Code section 65583.2 (c)(3)(B)(iv) allows the County of Los Angeles to use 30 units per acre as a proxy for lower income affordability, and Government Code section 65583.2(h) requires that sites rezoned for the Lower Income RHNA shortfall must allow a minimum of 20 units per acre. In general, if a candidate site was considered ideal for rezoning due to its relatively higher total score, but did not meet one of these criteria pertaining to the net development potential or the allowable density as specified in the Government Code, the site would then be used to accommodate the Moderate or Above Moderate Income RHNA shortfall depending on the Inclusionary Housing submarket area. Additional criteria and thresholds were also used to determine the suitability of a candidate site for the Lower Income RHNA shortfall, which are explained in greater detail in the next section.

In most cases, it was assumed that if rezoned, the proposed land use designation would be one category above the existing land use designation according to the General Plan Land Use Legend. For example, if a parcel is currently designated H18 (0-18 du/ac), the proposed land use designation would be H30 (20-30 du/ac). The net development potential was then estimated per parcel based on the maximum allowable density under the proposed land use designation, with density bonus (if applicable) and discounting factor added as described in the Resources section of the Housing Element. In determining the net development potential, contiguous parcels under the same ownership were assumed to have the potential for consolidation.

Once the proposed land use designation was selected, a corresponding zone was then identified for each rezoning candidate parcel as shown in **Table G-2** below:

Table G-2: Proposed Land Use Designation and Corresponding Zones

Proposed Land Use Designation	Proposed Zoning (If Applicable)
	R-2 – Two-Family Residence
	RLM-1 – Residential Low-Medium 1 (Pending Florence
H18 – Residential 18 (0-18 dwelling units/acre)	Firestone TOD Specific Plan)
	R-3 – Limited Density Multiple Residence
	RLM-2 – Residential Low-Medium 2 (Pending Florence
H30 – Residential 30 (20-30 dwelling units/acre)	Firestone TOD Specific Plan)

Proposed Land Use Designation	Proposed Zoning (If Applicable)
H50 – Residential 50 (20-50 dwelling units/acre)	R-4 – Medium Density Multiple Residence
H100 – Residential 100 (50-100 dwelling units/acre)	R-5 – High Density Multiple Residence
CG – General Commercial (20-50 dwelling units/acre)	C-1 – Restricted Business C-2 – Neighborhood Commercial C-3 – General Commercial C-H – Commercial Highway
MU – Mixed Use (50-150 dwelling units/acre)	MXD – Mixed Use Development

Lower Income RHNA Eligibility Analysis

Clusters of parcels that were identified as ideal for possible rezoning with a total score greater than 59 were further filtered down in order to identify sites that meet the additional criteria for the Lower Income RHNA shortfall. Two sets of filters were developed for this analysis: 1) site location and 2) site condition.

First Set of Filters – Site Location

A potential rezoning site for the Lower Income RHNA shortfall must meet <u>all</u> of the following:

- Is not currently designated Mixed Use (MU 50-150 du/net ac) in the General Plan, as MU is the land use designation that allows the highest density in the General Plan Land Use Legend;
- Is not currently designated Residential 9 (H9 0-9 du/net ac) in the General Plan (or an equivalent land use designation in an Area or Community Plan), or any other land use designations that allow less than 9 units per net acre;
- Is not in the Santa Clarita Valley or the Antelope Valley;
- Is not in a Special Management Area (SMA) Class II or III of the General Plan Hazard, Environmental, and Resource Constraints Model;
- Is not in a Coastal Zone;
- Is not in a Moderate, High, or Very High Fire Hazard Severity Zone;
- Fronts on a public right-of-way;
- Is not in a Hillside Management Area;
- Is not in the 65 or above dB CNEL noise contour of an Airport Influence Area;

- Is not in an area covered by a specific plan; and
- Is within a water or a sewer district boundary, or with access to dry utilities.

Second Set of Filters – Site Condition

A potential rezoning site that meets all the criteria would then be checked against the second set of filters focusing on the suitability of individual parcels within a potential rezoning cluster. Only parcels that meet <u>all</u> applicable thresholds in **Table G-3** were selected for rezoning to accommodate the Lower Income RHNA shortfall:

Table G-3: Site Condition Analysis, Lower Income RHNA Eligibility for Rezoning

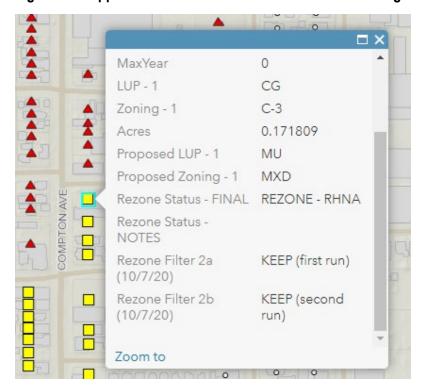

Threshold	Reason			
For All Sites				
Site must have the capacity to accommodate a minimum of 16 additional units.	As required by Government Code section 65583.2(h).			
Site is not currently developed with one of the following uses: cemetery, park, landfill, military-related use, pumping facility, sewage treatment, substation, other utility-related use, water tank, hospital, school, or gas station.	These sites either have uses that are unlikely to be discontinued or require extensive clean-up due to the existing uses. These sites are, therefore, unlikely to be redeveloped into housing in the near future.			
Site does not have an active, open or pending status in one of these databases: the Cortese List, Envirostor, Geotracker, and the Resource Conservation and Recovery Act.	These sites likely require extensive clean-up due to known contamination and are unlikely to be redeveloped into housing in the near future.			
For Sites with Non-Residential Uses (Existing or Propo	sed)			
Existing building(s) must be at least 20 years old. For sites with multiple buildings built during different times, use the most recent "year built" from the Assessor's data as the filter.	Discussions with market economists indicate that non-residential buildings, especially retail spaces that age (20+ years) are outdated and hard to remodel to meet modern demands.			
Site must not have a pending or recently approved planning entitlement (since July 2018) for a non-residential use.	Sites with a pending or recently approved planning entitlement for a non-residential use are unlikely to be redeveloped into housing in the near future.			
Site must not have a recently issued building permit (since July 2018) for a new or refurbished structure for a non-residential use.	Sites with a recently issued building permit for a non-residential building are unlikely to be redeveloped into housing in the near future.			
For Sites with Residential Uses (Existing or Proposed)				
Site is not currently developed with condominiums or PUDs (planned unit development). Filter out sites with the suffix "C" or "D" in the Assessor Use Code.	Condo properties or PUDs involve multiple owners and future housing redevelopments are unlikely due to the common ownership.			
Existing building(s) must be at least 50 years old. For sites with multiple buildings built during different times, use the most recent "year built" from the Assessor's data as the filter.	Residential buildings over 30 years old usually require major systems upgrades, and the sites are therefore more likely to be redeveloped. In neighborhoods with older, but well-maintained buildings, using the 50-year mark as the threshold is more appropriate.			
The maximum number of units permitted by the proposed land use designation must be at least twice the existing number of units.	In most cases, housing developers are less likely to redevelop a site with existing residential uses unless there will be a substantial increase in the unit counts.			

Threshold	Reason
Site must not have a pending or recently approved planning entitlement (since July 2018) for a residential use.	Some sites with an entitled but not yet permitted housing project are already included as part of the RHNA strategy – see the Select Entitled Projects section in the Housing Element for more details. Also, it is more conservative to assume that developers that have recently obtained or will soon obtain planning entitlements for their proposals will likely pursue their projects as planned without further modifications, even if the proposed land use designation may allow more units than what they are currently proposing/entitled to.
Site must not have a recently issued building permit (since July 2018) for a new or refurbished structure for a residential use.	It is more conservative to assume that developers that have recently obtained a building permit for their proposals will likely pursue their housing projects as permitted without further modifications, even if the proposed land use designation may allow more units than what they are permitted. Also, some of these projects are currently under construction or recently obtained the certificate of occupancy, making the sites unlikely to be redeveloped into another new housing project.

GIS Modeling

The GIS model ran the data layers through these two sets of filters in order to identify sites that could be considered for the Lower Income RHNA, as shown in **Figure G-5**.

Figure G-5: Application of Filters for Lower Income RHNA Eligibility (Rezoning)

Web Mapping Application and Quality Control

Once the two sets of filters were run, the candidate parcels were published as layers in ArcGIS Enterprise and added to a newly created web mapping application. This mapping application was used by the DRP staff to conduct quality control and finalize the Rezoning Program. For example, in reviewing a potential rezoning cluster, if a parcel that was already in the Sites Inventory was found within the cluster, the site would then be removed from the Sites Inventory and checked against the two sets of filters used on the rezoning candidate sites for the Lower Income RHNA eligibility analysis described above. If the site meets all criteria in the first set of filters (site location), but did not meet all applicable criteria in the second set of filters (site condition), in most cases, the site would then be included in the Rezoning Program for the Moderate or Above Moderate Income RHNA – as long as it is at least 5,000 sq. ft. in size, since 5,000 sq. ft. is generally the minimum lot size (i.e., required area) in the zones that permit residential uses. Also, similar to the site selection process for the Sites Inventory, only sites that are within the South Los Angeles submarket area, as identified in the Inclusionary Housing Ordinance, were selected to be rezoned for the Moderate Income RHNA.

A detailed tutorial was created by DRP staff to edit one or many sites at a time and code them appropriately. Samples from that tutorial are shown in **Figure G-6** below:

Selecting Features When you open the tool, you will see a panel that shows the different shapes you can create to select either the points or polygons (depending on which layer you're editing). Click on any of the four available drawing shapes on the bottom and in the map you will be prompted with basic instructions on what to do (as shown below). **Edit ASI** Use one of the tools below to create a selected set of features to update. If the row is highlighted, the maximum number of records has been Press and hold to draw a shape exceeded. features Layer Name Adequate_Sites_Inventory 1

Figure G-6: Tutorial for Editing Adequate Sites Inventory and Rezoning Sites

Methodology Note

It should be noted that the steps outlined in this Part were not necessarily a linear process. There were some slight changes in methodology as data layers were produced and used by DRP staff in the web mapping application. For example, there were originally more categories in the scoring system, but ultimately, it was decided that some of these categories should be used as filters on the rezoning candidate sites for the Lower Income RHNA eligibility analysis because these factors were less about whether an area is ideal for rezoning, but rather, whether a parcel is likely to be redeveloped into housing in the near future. These refinements required the GIS models to be re-run and the data layers to be re-published for the mapping application. This is typical of most large-scale GIS analyses, which is why the models were so valuable as it allowed for this flexibility of change. Furthermore, other refinements during this stage of the rezoning site selection process, particularly for sites that would accommodate the Moderate and Above Moderate Income RHNA, included components that were outside of the steps described in this Part. For example, there are sites in the unincorporated communities of South Whittier-Sunshine Acres and West Whittier-Los Nietos where the existing land use categories allow multifamily residential uses, yet these sites are currently zoned A-1, R-1, and R-A, none of which allow multifamily residential uses by-right. The rezoning program will correct the zoning

to align with the land use policy, and these sites were included in the rezoning program to accommodate the Above Moderate Income RHNA.

Part III – Outreach and Refinement of the Rezoning Program to Address Public Comments

DRP conducted a series of outreach meetings and constructed a GIS Story Map to facilitate the review of the proposed rezoning program. The Story Map promoted transparency with the draft data and helped to explain the site selection process in a user-friendly way. This approach also generated community-specific feedback that required further modifications to the data.

Story Map

Using ESRI's latest Story Map serves as a great communication device to stakeholders. It is a multimedia mapping application which allows the presenter to illustrate a very complex project or process using images, infographics, short captions, videos, static maps and interactive maps to communicate the findings and recommendations. In this Story Map, the Housing Element Update process was explained through maps and imagery using plain language, along with interactive maps that allowed the user to zoom in to an area of interest, or an address, and get specific information about where Rezoning is occurring in their community. The screenshots in **Figures G-7** through **G-10** below illustrate some key features of the Story Map. Additionally, a Spanish language version was created.

Housing types

We need a wide range of housing types and sizes to meet the needs of current and future residents

Single Family Home Accessory Dwelling Unit (ADU)

Apartment building (ADU)

Attached townhomes Mixed use Mobilehome

Figure G-7: Story Map Image, Housing Types

Figure G-8: Story Map Image, RHNA Information

The foundation for the Housing Element is the Regional Housing Needs Allocation (RHNA), in which the State estimates each region's housing needs for the upcoming eight years. State law requires each city and county to plan for the estimated number of homes for its current and future residents through land use and zoning regulations. These regulations include the number of homes per acre that are allowed on a parcel, and the allowable housing types (such as single-family homes, apartments and townhouses).

The RHNA for the unincorporated areas for 2021-2029 is approximately 90,000 homes, which is the largest number the County has ever had. *Neither property owners nor the County are required to build these housing units.*

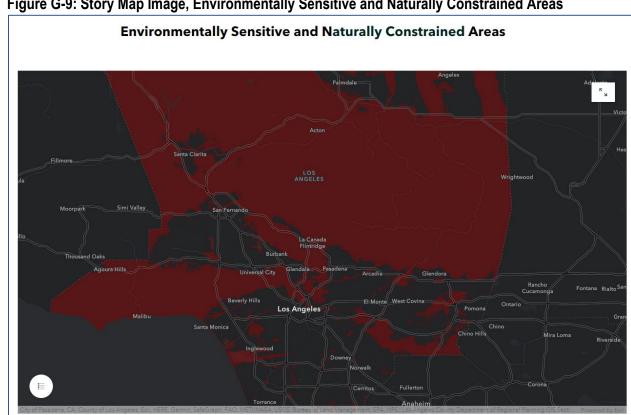

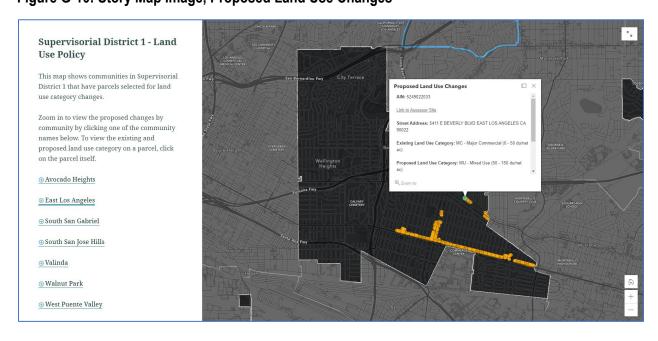

Figure G-9: Story Map Image, Environmentally Sensitive and Naturally Constrained Areas

Figure G-10: Story Map Image, Proposed Land Use Changes

Feedback and Ad Hoc Analyses

One of the results of the outreach, and, specifically, the Story Map was some additional modifications and refinements to the proposed land use policy and zoning maps. Stakeholder comments were accommodated with some additional analyses and updates to the Sites Inventory and Rezoning GIS layers. In some cases, community members recommended alternative sites to be included in the Rezoning Program, even though these sites might not have a high score to be considered ideal for rezoning. Because community members have more up-to-date local knowledge about their own neighborhoods, this kind of public feedbacks helped improve the overall quality of the Rezoning Program. DRP staff communicated these changes with the GIS team to make these changes and republish the online layers when necessary.

Part IV – Final Adjustments of the Rezoning Program for the Moderate and Above Moderate RHNA

Once the Sites Inventory and the Rezoning Program were finalized following the steps and methodology described, it was found that together with the other RHNA strategies – namely, projected accessory dwelling units (ADUs) development, entitled residential projects, anticipated number of units in specific plan areas, and County-owned sites in cities – there was a surplus of extremely low/very low- and low-income units, but a shortfall of moderate- and above moderate-income units. To ensure that there would be no deficit under each income category after the Rezoning Program is completed, adjustments were made to reassign the level of affordability on some rezoning sites. While Government Code section 65583.2(c)(3) allows the County to use 30 units per acre as a proxy for lower income affordability, sites allowing this density once rezoned could instead be used to accommodate the Moderate or Above Moderate Income RHNA. As such, DRP developed a new methodology to reassign the level of affordability on certain sites in the Rezoning Program based on two considerations:

- As it is more financially feasible for larger projects to provide affordable units, the reassignment
 of units from the lower income categories (very low and low income) to the higher income
 categories (moderate and above moderate) should start with the smallest sites in the Rezoning
 Program; and
- 2. Only sites located in the South Los Angeles submarket area as identified in the Inclusionary Housing Ordinance can count toward the Moderate Income RHNA.

Table G-4 shows the adjusted unit counts for each income category.

Table G-4: Shortfall and Surplus, Before and After Rezoning

	Extremely Low/Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
Shortfall without Rezoning	-16,393	-4,357	-9,019	-26,005	-55,774
Rezoning	16,526	4,480	9,250	26,092	56,348
Surplus after Rezoning	133	123	231	87	574

Please Start Here, Instructions in Cell A2, Table in A3:B15

Form Fields

Site Inventory Forms must be submitted to HCD for a housing element or amendment adopted on or after January 1, 2021. The following form is to be used for satisfying this requirement. To submit the form, complete the Excel spreadsheet and submit to HCD at sitesinventory@hcd.ca.gov. Please send the Excel workbook, not a scanned or PDF copy of the tables.
