Source: Alameda County, Assessor Parcel Data, 2021; City of Oakland, 2022

These sites are located in a diverse array of locations throughout the city within various zoning districts and densities for potential residential development. A number of these sites have the potential to accommodate residential development – the 2023-2031 Oakland Housing Sites Inventory includes 115 publicly-owned parcels which have either been declared surplus or have plans to be declared surplus in the near future, including some that have already undergone solicitation for affordable housing proposals. Action 3.3.1 and 3.3.4 in the HAP facilitate development on these surplus sites and also will be eligible for CEQA tiering. In accordance with AB 1486 and AB 1255, the City continues to work with local agencies to determine whether there is surplus or excess land that is not necessary for the agency's use and may be identified as "surplus" for reporting to the State HCD and California Department of General Services (DGS) with the intention of connecting developers to potential lands available for housing development affordable to lower-income households. See Table E-7 below for a listing of declared surplus sites in Oakland.

UTILITY AND SERVICE SYSTEMS

Consistent with State law and guidance from the State HCD, all sites included in the Inventory to meet the RHNA have been screened to ensure they have sufficient access to existing or planned water, sewer, and other dry utilities. The capacity of utility and service systems is discussed further in Appendix F. There is sufficient existing and planned capacity to accommodate the regional housing need.

State law requires an analysis of governmental and non-governmental constraints to Oakland meeting its housing needs. Governmental constraints can include zoning regulations, development standards, fees, and processing and permitting times, among others. Non-governmental constraints can include infrastructure, environmental, and market challenges. This appendix provides an assessment of these constraints as required by law and provides context on relevant local efforts to remove governmental constraints. The Housing Action Plan contained in Chapter 4 provides strategies the City will take to remove identified constraints.

Governmental constraints on affordable housing construction include a lack of local and State funding to support the development of affordable housing, a lack of clarity on permit streamlining processes, higher costs for all housing developments due to a lack of City staff capacity. Both market-rate and affordable housing also face constraints from development standards and green building standards. Non-governmental constraints on housing development include environmental constraints such as risk of seismic activity, infrastructure needs for infill housing, and the high cost of land, materials, and labor in Oakland.

F.1 Governmental Constraints

While government regulations are intended to guide development in a community and ensure quality housing, they may also contribute to delays or increased development costs with negative impacts on housing affordability and availability. The following section assesses constraints imposed by governmental regulation on residential development, including those imposed by the current General Plan, specific plans, and the Municipal Code. Feedback received during community outreach highlighted the following controversial issues as governmental constraints impacting the development of housing:

- A lack of local and State funding to support the development of affordable housing. During outreach, community members expressed frustration with a perceived lack of political appetite to spend local money on affordable housing;
- A lack of clarity on available permit streamlining processes as well as how affordable housing is prioritized;
- The lack of City staff capacity as a major cost driver for all housing developments, including affordable and market-rate projects; and
- An abundance of concessions for market-rate projects and community perception that these concessions have led to an overall reduction in regulatory incentives and tools to encourage affordable housing development.

Funding for Affordable Housing Development

Sources of funding for affordable housing development, including those at the local, State, and federal levels, are severely limited. Recent State efforts to increase the availability of funding, including the $1.75 billion California Housing Accelerator fund and expanded Homekey funding, will provide only limited support for affordable housing development over the upcoming planning cycle. Moreover, popular funding mechanisms, such the California Tax Credit Allocation Committee's (TCAC) competitive tax credit applications, disadvantage cities like Oakland, where the majority of area is considered "low resource."

Funding at the local level is also very limited due to restrictions on the City's ability to raise tax revenues and budgeting decisions made by the City Council. According to a SPUR research brief, California's Proposition 13 has a major impact on Oakland's ability to collect revenue that could be used towards affordable housing development.[1] A key finding of the brief states that "Oakland misses out on $400 million in Prop. 13 residential taxes every year, equivalent to what it spends on four city departments combined" – including over $33 million for Housing and Community Development at minimum. According to SPUR, the uncollectible taxes are more than ten times the amount the City has currently budgeted for helping people experiencing homelessness, seven times more than it spends to protect tenants and create affordable housing, and more than five times the City's spending on programs and services for children in the City.

Local budget decisions also affect the availability of funding for affordable housing. Oakland has no major source of local revenue dedicated exclusively to affordable housing besides the Jobs Housing and Affordable Housing impact fees. This is different from other communities like San Jose, where 100% of the real estate transfer tax is dedicated to addressing housing and homelessness challenges. At present, the only ongoing local investment in the construction of affordable housing in Oakland comes from development impact fees and federal block grants.

During outreach, affordable housing developers noted that they are continually challenged by a lack of federal, State and local funding, as well as competition from market-rate developers to secure highly valuable land for development. In response to high land prices and increasing land values, the City approved Bond Measure KK in 2016 to fund affordable housing projects, including the 1-4 Unit Acquisition and Rehabilitation Program, which provides loans for acquisition-related and rehabilitation costs associated with developing, protecting and preserving long-term affordable housing throughout the city. Additional KK funds were allocated for site acquisition for multifamily affordable development. However, all KK funds will have been disbursed by 2023. Measure U, a bond measure approved by Oakland voters in November 2022 , will be able to assist in funding the same kind of affordable housing investments as Measure KK, but will be inadequate to meet Oakland's funding shortfall to meet RHNA goals. Additional funding and acquisition strategies are

provided in the Housing Action Plan, actions 2.2.2, 3.1.1., 3.3.1, 3.3.4, 3.3.6, 3.3.10, 3.3.13, 3.3.14, and 3.3.18.

LAND USE POLICIES AND REGULATIONS

General Plan

The City of Oakland last performed a comprehensive update to its General Plan in 1998 and is in the process of updating it again to reflect emerging opportunities, challenges, and approaches. As the General Plan Update is prepared in parallel with this Housing Element, its policy direction and shared goals will inform the assessment of constraints in this chapter.

The Land Use and Transportation Element (LUTE) of the General Plan sets forth the City's policies for guiding local land use and development. The LUTE outlines the vision for Oakland, establishing an agenda to encourage sustainable economic development, ensure and build on the transportation network, increase residential and commercial development in downtown, reclaim the waterfront for open space and mixed uses, and protect existing neighborhoods while concentrating new development in key areas. These policies, together with the zoning regulations, establish the amount and distribution of land allocated for different uses within the city. Table F-1 shows General Plan residential land use designations along with their descriptions from the City's Planning Code. These designations support a variety of housing types, ranging from large estate lot residential developments to multifamily high-rise apartments. Generally, the LUTE provides significant flexibility on zoning and density. However, the document was originally adopted in 1998 and will be revised during Phase II of the General Plan update (i.e., by July 2025) to address changing conditions in Oakland. Table F-2 below summarizes the extent to which different housing types are permitted in the city. While multifamily development is permitted on about 9.8 percent of Oakland's land, single-family and two-family developments are permitted on about 43.4 percent and 17.8 percent of the city's land, respectively. About half the city is available for residential development, while much of the remaining acreage is designated open space, rights-of-way, and environmentally constrained areas. See Figure F-1 for the distribution of residential zones in Oakland.

Table F-1: General Plan Residential Land Use Designations, 2022

General Plan Residential Zone	*Residential Zoning Designation*	*Description*
Hillside Residential	RH-1, RH-2, RH-3, RH-4	The intent of the Hillside Residential (RH) Zones is to create, maintain, and enhance residential areas that are primarily characterized by detached, single unit structures on hillside lots.
Detached Unit Residential	RD-1, RD-2	The intent of the Detached Unit Residential (RD) Zones is to create, maintain, and enhance residential areas primarily characterized by detached, single-unit structures.
Mixed Housing Type	RM-1, RM-2, RM-3, RM-4	The intent of the Mixed Housing Type Residential (RM) Zones is to create, maintain, and enhance residential areas typically located near the City's major arterials and characterized by a mix of single-family homes, townhouses, small multi-unit buildings, and neighborhood businesses where appropriate.
Urban Residential	RU-1, RU-2, RU-3, RU-4, RU-5	The intent of the Urban Residential (RU) Zones is to create, maintain, and enhance areas of the City that are appropriate for multi-unit, mid-rise or high-rise residential structures in locations with good access to transportation and other services.
High-Rise Apartment Residential	R-80	The intent of the High-Rise Apartment Residential (R-80) Zone is to create, preserve, and enhance areas for high-rise apartment living at high densities in desirable settings, and is typically appropriate to areas near major shopping and community centers and rapid transit stations.

Table F-2 Summary of Development Permitted, 2022

Project Type	*Base Zones*[1]	*Total Acreage*	*Percent of Total City Acreage*[2]
Multifamily Housing[3]	RM-4, RU-1 to RU-5, R-80, HBX-1 to -3, CN-1 to -4, CC-1 to -2, C-40, C-45, CBD-R/-P/-C/-X, S-2, S-15, S-15W, D-WS, D-OTN, D-BV-2, D-BV-3, D-BV-4, D-KP-1 to -3, D-CE-3 and -4, D-LM-1 to -5, D-CO-1 to -2, D-OK-3	4,881.9	9.8%
Single-Family Housing[4]	RH-1 to -4, RD-1 to -2, RM-1 to -4, RU-1 to RU-3, R-80, HBX-1 to HBX-3, C-40, C-45, S-2, D-WS, D-OTN, D-KP-1 to -3, D-CE-3, D-OK-1 to -2	21,665.9	43.4%
Two-Family Housing[5]	RM-2 to RM-4, RU-1 to RU-5, R-80, HBX-1 to -3, CN-1 to -4, CC-1 to -2, C-40, C-45, CBD-R, S-2, D-WS, D-OTN, D-BV-4, D-KP-1 to -3, D-CE-3, D-LM-1 to -5, D-CO-1 to -2, D-OK-3	8,903.1	17.8%

1. The D-OK zoning district has not yet been implemented.
2. Zoning district acreage across project types is not mutually exclusive, and percentages should not be summed.
3. Multifamily housing requires a conditional use permit in RM-2, RM-3, D-BV-1, and D-CO-4 Zones.
4. Single-family housing requires a conditional use permit in S-15 and D-OK-3 Zones.
5. Two-family housing requires a conditional use permit in RD-2, RM-1, S-15, S-15W and D-CO-4 Zones.

A sample of variance/zoning concessions identified in staff reports between 2019 and 2021 is provided in Table F-3 below. Requests for variances were generally minor, with about one-third of the sample pertaining to setbacks for single-family dwellings, another two for driveway and paving separation, and one variance for group open space for a multifamily (10-unit) building. The two parking variance requests were for a single-family dwelling and a four-unit building.

Table F-3: Sample of Variance/Zoning Concessions, 2019-2021

Year	*Case Number*	*Requested Variance*
2019	PLN19184	Minor Variance for live/work units for 12-unit building
	PLN19044	Minor Variance for group open space for 10-unit building
	PLN18280	Minor Variance for setbacks and group open space for eight-unit building
	PLN16302	Minor Variance for setbacks and parking in mixed-use building
	PLN15197-R02	Minor Variance for driveway separation in nine-unit building
	PLN18420	Minor Variance for group open space in three-lot mini-lot development
2020	PLN19289	Minor Variance for parking in four-unit building
2021	PLN20088	Minor Variance for setbacks in single-family dwelling
	PLN20117	Minor Variance for setbacks in single-family dwelling
	PLN20127	Minor Variance for setbacks in single-family dwelling
	PLN21005	Minor Variance for paving in setback of single-family dwelling
	PLN21174	Minor Variance for parking in mixed-use building
	PUD06101-PUDF012	Minor Variance for setbacks in single-family dwelling

Chart F-1 below provides an overview of building permit approval rates compared to the 2015-2023 Regional Housing Needs Allocation (RHNA) for jurisdictions within Alameda County.[2] This provides a proxy for the comparative impact of land use regulations in Oakland and neighboring jurisdictions. Oakland is permitting at about the same rate as peer cities – the City has exceeded its above-moderate-income goal but has fallen short on its moderate- and lower-income goals. Oakland has one of the highest very-low-income building permit approval rates and one of the lowest moderate-income building permit approval rates among peer cities, including the five largest cities in Alameda County and neighboring Emeryville. The lag in affordable housing production is due largely to a lack of local and State funding to meet Oakland's affordable housing needs, as well as the length and complexity of permit processing. During outreach, stakeholders also pointed to an abundance of concessions for

[2] Note that permitting rates do not include building permits approved in 2021 in the cities of San Leandro, Hayward, and Berkeley. At the time of this draft (May 2022), these cities had not submitted their 2021 Annual Progress Reports (APRs) to State HCD.

market-rate projects, which stakeholders conclude has led to an overall reduction in regulatory incentives and tools to encourage affordable housing development.

Planning Code

The type, location, density, and scale of residential development in Oakland is regulated through the City's Planning Code, which is Title 17 of the Oakland Municipal Code. Zoning regulations serve to implement the General Plan and are designed to protect and promote the health, safety, and general welfare of residents. Zoning policies, which generally separate land into broad categories of use, such as residential, commercial, and industrial, thus have intense implications on social, environmental, and racial equity within a city. In the early 1900s, cities employed racial zoning, designating neighborhoods only for members of certain racial groups. The Supreme Court declared racialized zoning as unconstitutional in 1917, but jurisdictions found ways to use economic zoning to accomplish racial segregation, with the help of the federal government. In 1921, President Harding's Advisory Committee on Zoning created a manual describing why every municipality should have a zoning ordinance and published a model zoning ordinance.[3] While not explicitly stated, it was clear that "the

[3] Maantay, J, "Zoning, Equity, and Public Health," American Journal of Public Health, 91, no. 7 (2001).

creation of racially homogenous neighborhoods [w]as the reason why zoning should become such an important priority for cities."[4]

Oakland's Planning Code includes five zoning districts that are focused on prioritizing residential uses over most other uses. Most of Oakland's residential land is currently zoned to maintain single-family development, which limits the capacity for residential development, especially affordable housing development. However, the City is undertaking significant efforts to amend its zoning code to expand the variety of housing types permitted in single-family zones, including duplexes, triplexes, and fourplexes. This effort is detailed in the Housing Action Plan and runs parallel with recent State efforts to increase permitted capacity in single-family zones through SB 9. While certain land use regulations are in need of reform—including parking standards and open space requirements, highlighted below—Oakland's land use regulations in general do not unduly constrain housing development, as evidenced by the minor concessions requested in Table F-3. However, additional actions are necessary to incentivize further development of moderate- and lower-income housing.

Permitted uses range from one-family dwellings with accessory dwelling units in the RH and RD zones to two-family dwellings, multifamily dwellings, and rooming house residential facilities in RM, RU, and R-80 zones. As shown in Table F-4, residential uses are permitted by-right and do not require a conditional use permit (CUP). Various types of special needs housing may be permitted by-right, require a CUP, or be subject to certain limitations as noted in Tables F-4 through F-6 and discussed further below. The Housing Action Plan, Chapter 4 of the Housing Element, includes several actions under Policy 4.3 that are intended to reduce constraints on the production of these various special needs housing types, including emergency shelters, permanent supportive housing, employee housing, and smaller units such as rooming units.

Except for those projects determined exempt from design review as set forth in Section 17.136.025 of the Planning Code, residential projects must be approved pursuant to the design review process. This is discussed further in the Permits and Processing Procedures section of this Appendix. Action 3.4.8 moves design review toward more ministerial approvals by implementing objective design standards.

There are also 16 zoning districts included in the Planning Code that allow various types of residential uses along with commercial, industrial, agricultural, public, or open space uses. Within these zoning districts, some forms of residential development are permitted by-right, without being developed in conjunction with a commercial use on the same property. Table F-5 and Table F-6 summarize permitted and conditionally permitted residential uses for these zoning districts.

Many zoning district boundaries cut through parcels instead of following property lines, especially along International Boulevard. This can make development challenging, as overlapping zones lead to conflicting permitted land uses and development standards for

[4] Rothstein, R, The Color of Law: a Forgotten History of how our Government Segregated America, 1 st ed. (New York: Liveright Publishing Corporation, 2017), 51.

new construction. Action 3.4.6 corrects these divisions. Further, while not necessarily a constraint, it should be noted that the Planning Code separates permitted facility and activity types.

Development Standards

Oakland regulates the location, density, and scale of residential development primarily through development standards contained in the Planning Code. The Planning Code regulates the size of residential structures through requirements for minimum lot size, setbacks, and height limits. A development application must comply with all uniformly applied development standards, typically imposed as Standard Conditions of Approval, including those development applications "deemed approved" under the State Permit Streamlining Act. Most residential projects are also subject to design review, which is discussed further in the Permits and Processing Procedures section below. A summary of the structural residential development standards for the residential and non-residential zoning districts is provided in Table F-7 and Table F-8 below. An analysis of the impact of individual key development standards and their cumulative effect is provided in the subsections below.

Development standards will be impacted by recent State law, including SB9 – which went into effect on January 1, 2022. Some of the key changes in SB9 include permitting landowners to build two residential units on one lot in a single-family zone ministerially, requiring that the minimum size of residential units must be 800 feet, and permitting an urban lot split ministerially.[5] Notably, while the bill establishes minimum housing unit sizes, it does not impose maximums. No setback can be required for a structure constructed in the same location and to the same dimensions as an existing structure. For all other new construction, the minimum side and rear setbacks are four feet. As part of its missing middle housing strategy (Action 3.2.1), the City intends to eliminate single-family zoning except in the Very High Fire Hazard Severity Zones. As part of the zoning code amendments that would be made, reduction of minimum lot size and reduced setbacks will also be included.

[5] The City hosts more information on the SB 9 permitting process at https://www.oaklandca.gov/resources/sb-9-two-unit-residential-duplexes-lot-subdivision.

Residential Density

Seven residential zoning districts—RU-1, RU-2, RU-3, RU-4, RU-5, and R-80, as well as RM-4 on parcels larger than 4,000 square feet—permit residential densities that exceed 30 dwelling units per acre (du/ac), as do a number of commercial, combining, and district zones. Permitted density within a zone also depends on the height area, discussed below. As noted in Table F-8 above, this include zones within the following districts: Neighborhood Commercial, Community Commercial, Community Thoroughfare Commercial, Community Shopping Commercial, Central Business District, Housing and Business Mix Commercial, Civic Center Commercial, Transit-Oriented Development Commercial, Wood Street District (D-WS-2, -3, -4, -7, and -8), Broadway Valdez District Commercial, Central Estuary District (D-CE-3 and -4), Lake Merritt Station Area District and the Coliseum Area District (D-CO-1 and -2). Most of these zones also permit multifamily development by right—excluding HBX-4, CR-1, D-BV-1, and D-CO-4—as noted in Tables F-4 through F-6 above.

The City permits significant residential densities throughout Oakland, although higher resource areas tend to be lower density. In March 2021, the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes. The intent of the resolution, which passed unanimously, is to end a historic pattern of exclusionary zoning. Actions the City will take to increase permitted densities are included in the Housing Action Plan. While the City does not currently have minimum densities, this has not historically affected realistic capacity—according to a 2021 study of housing built on designated 5th cycle RHNA inventory sites, permitted projects in Oakland exceeded "realistic" capacity estimates by 300 percent.[6]

Floor Area Ratio (FAR)

FAR only applies to non-residential buildings, with a few exceptions. According to the City's Planning Code, the maximum FAR is 0.25 to 0.55 for one- and two-family dwellings in the RH Zone, depending on lot size. The RD and RM Zones include similar maximum FAR requirements, but those requirements only apply to lots that have a footprint slope of greater than twenty percent. Lots with less than 5,000 square feet in area may have dwellings with at least 2,000 square feet, regardless of FAR listed. The RU Urban Residential Zones do not have FAR regulations for residential development. However, nonresidential maximum FAR is 2.0 to 4.0 for the RU-4 and RU-5 Zones, depending on height area. For mixed use projects in the D-LM Lake Merritt Station Area District, D-BV Broadway Valdez District, and CBD Central Business District Zones, the total lot area shall be used as a basis for computing both the maximum non-residential FAR and the maximum residential density.

For the CN Neighborhood Center, CC Community Commercial, and S-15 Transit-Oriented Development Commercial Zones, no portion of lot area used to meet the residential density

[6] Siddharth Kapur, et al. UCLA Lewis Center for Regional Policy Studies. What Gets Built on Sites that Cities "Make Available" for Housing? Evidence and Implications for California's Housing Element Law. August 2021. Accessed at https://escholarship.org/content/qt6786z5j9/qt6786z5j9_noSplash_e70697e42e10371d566b599594a50e06.pdf?t=qyg5hv on June 28, 2022.

requirements shall be used for computing the maximum non-residential FAR unless the total non-residential FAR on the lot is less than 3,000 square feet. In the proposed Zoning Code Amendments, the City will be looking at allowing double counting of the FAR and density in all Residential and Commercial Zones.

The R-80 High-Rise Apartment Residential Zone regulations permit a maximum FAR of 3.5 for both residential and non-residential facilities, with additional increases allowed upon the granting of a conditional use permit. These ratio ranges are relatively similar to Oakland's peer jurisdictions. The City of Berkeley does not have maximum FARs prescribed to residential districts but does have maximum FAR standards in its commercial zones. Berkeley has a FAR of up to 3.0 in its Neighborhood Commercial (C-N) District and up to 6.0 in its Downtown District. The City of Emeryville has maximum FAR values ranging from 0.5 to 3.0. However, some areas may reach a maximum of up to 6.0 with a density bonus. The City of Richmond prescribes maximum FARs between 0.5 to 5.0 in commercial mixed-use zones. Generally, Oakland's FAR requirements are comparable to these other jurisdictions and have not posed a significant constraint to residential development.

Building Height

Permitted building heights depend on the zoning district and the City's height area maps. Height areas are intended to promote cohesive development patterns in high density neighborhoods, including in downtown, near the Lake Merritt BART station, and in the Broadway Valdez Specific Plan District. Allowable building heights and densities along corridors in Oakland need to better align with Building Code construction types to ensure development feasibility by increasing heights to allow for the maximum height under wood frame construction (as an example, there are some areas where current height limits may be shy of 5 feet to allow a full top story under Type 3/Type 5 construction, therefore limiting the development potential). This misalignment can create uncertainty in the development process and poses a constraint. The City will revise permitted building heights as part of the Housing Action Plan (Action 3.4.1).

Setbacks

In zones primarily intended for single-family development, the minimum front setback ranges from 20 to 25 feet, the minimum side setback ranges from four to six feet (up to 20 feet in the D-OK districts), and the minimum rear setback ranges from 15 to 35 feet. In mixed-use and multifamily zoning districts front and rear setbacks range from zero to 15 feet, and side setbacks range from zero to 10 feet (in some districts, like R-80, no setbacks are required). These requirements are fairly similar to other jurisdictions, although some minimum rear setbacks are greater than in peer cities. However, setback requirements were not identified as a constraint to development during public outreach. For comparison, a summary of required setbacks in neighboring cities is provided in Table F-9 below.

As Oakland seeks to encourage more missing middle development within traditionally single-family zones, setback requirements that have not historically been a constraint could impede higher density development. For example, in the RD zones, adherence to existing front, side, and rear setbacks could reduce the buildable area on a smaller, 4,000-square-foot lot with 40

feet of frontage to 1,800 square feet. Similarly, adherence to existing front, side, and rear setbacks on a 4,000-square-foot parcel with 40 feet of frontage in the RM zones would result in a buildable area of 2,240 square feet. A fourplex in a traditional two-unit ground floor, two-unit second floor layout would ordinarily require 1,600 square feet of buildable area, so these setback requirements alone would not act as a constraint. Nonetheless, because the site may have additional constraints, and because the City seeks to encourage increases in density that would not necessary require demolition of existing structures, the City is including in its Housing Action Plan proposals to reduce setback requirements, with particular focus on reducing existing rear setback requirements (Action 3.4.1 and 3.4.7).

Table F-9: Summary of Minimum Setbacks by Jurisdiction

	Single-Family Setbacks (ft.)			*Multifamily Setbacks (ft.)*		
Jurisdiction	*Front*	*Side*	*Rear*	*Front*	*Side*	*Rear*
Oakland	20-25	4-6[1]	15-35	0-15	0-10	0-15
Richmond	20-25	5-10	20-25	10	5-10	20
Berkeley	20	4-15	20	15-20	4-15	15-21
Emeryville[2]	-	-	-	5-10	3	15

1. Up to 20 feet in D-OK zones
2. Setbacks are only required in the RH, RMH, and RM zoning districts.

Source: City of Oakland, Planning Code, 2022; City of Richmond, Municipal Code, 2022; City of Berkeley, Municipal Code, 2022; City of Emeryville, Municipal Code, 2022

Minimum Lot Size

Minimum lot sizes for residential districts range from 4,000 square feet for multifamily development to between 4,000 and 43,560 square feet for single-family development. In commercial and other zoning districts, minimum lot sizes are typically 4,000 square feet, but can reach as high as 10,000 square feet in some districts. For comparison, the City of Berkeley requires a minimum lot size of between 5,000 to 25,000 square feet in single-family zones, 5,000 square feet in multifamily and other zones, and no minimums in limited commercial districts. Similarly, the City of Richmond requires a minimum of between 3,750 and 11,000 square feet for single-family zones, 5,000 square feet for multifamily zones, and between 5,000 and 10,000 square feet in other zones (up to 20 acres in open space development). The City of Emeryville does not require minimum lot areas except in the RM Medium Density Residential zone, which requires 2,500 square feet. Generally, Oakland's minimum lot size standards are comparable to these jurisdictions and have not historically posed a significant constraint to development but could impede the development of missing middle housing that the City is currently seeking to encourage. Action 3.4.1 and 3.4.7 reduce minimum lot sizes to facilitate subdivision of existing lots.

Ground Floor Commercial

A number of zoning districts either require or allow active commercial uses on the ground floor. In the case where ground floor commercial is required, this can limit residential

capacity in a given project. A summary of ground floor commercial regulations by zoning district is provided below:

- **Urban Residential.** Completely residential projects are permitted in all zones. In the RU-4 and RU-5 Zones, commercial uses are also permitted, but may only be located either on the ground floor of a corner parcel or in an existing non-residential facility built prior to 2011, and are typically permitted up to 5,000 square feet.

- **Neighborhood Center Commercial.** The CN-1 and CN-2 Zones do not permit new ground floor residential facilities (except for incidental pedestrian entrances), while CN-3 permits ground floor only on interior lots with a CUP and not on corner lots.

- **Community Commercial.** The CC-1 and CC-2 Zones require a CUP for residential uses on the ground floor, although buildings not located within 20 feet of the principal street frontage and incidental pedestrian entrances that lead to one of these activities elsewhere in a building are exempted from the CUP requirement. Further, in CC-1, multifamily ground floor development is only permitted if a majority of floor area is devoted to commercial activities.

- **Central Business District.** In the CBD-P and CBD-C Zones, residential activities may not be located within 30 feet of the front lot line on the ground floor of the principal building with the exception of incidental pedestrian entrances that lead to one of these activities elsewhere in the building. There are no restrictions on ground floor residential in the CBD-R and CBD-X Zones.

- **Broadway Valdez District Commercial**. In the D-BV-2 Zone, residential uses are not permitted if located on the ground floor of a building and within 50 feet of any street-abutting property line; incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this restriction. In the D-BV-3 Zone, residential uses located on the ground floor of a building and within 60 feet from any street-abutting property line facing Broadway, 27th Street, or Piedmont Avenue are only permitted with a CUP; incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this requirement. In the D-BV-4 Zone, residential uses are prohibited if located on the ground floor of a building and within 60 feet from any street-abutting property line facing Broadway; incidental pedestrian entrances that lead to one of these activities in stories above the ground floor are exempt from this restriction.

- **Central Estuary District.** Completely residential projects are permitted in all zones. Some ground-floor commercial uses are permitted in the D-CE-3 through D-CE-6 Zones.

- **Lake Merritt Station Area District.** In D-LM-1 through D-LM-4 Zones, residential uses may not be located within 30 feet of the front lot line on the ground floor of an existing principal building fronting a Commercial Corridor or within 30 feet of the front lot line on the ground floor of a new principal building fronting a Transitional Commercial Corridor, as defined in Section 17.101G.010.C, with the exception of

incidental pedestrian entrances that lead to one of these activities elsewhere in the building.

While these requirements are intended to foster thriving commercial centers and corridors to increase access to amenities and opportunity, they do restrict the capacity of residential development projects. Further, especially as the transition of retail and commercial businesses away from brick-and-mortar storefronts has been accelerated by the COVID-19 pandemic, increasing numbers of ground floor storefronts remain vacant in Oakland. To address prolonged ground floor vacancies, the City will increase the allowance for residential development on the ground floor in these buildings as part of the Housing Action Plan (see Action 3.8.2).

Open Space

Oakland's open space requirements—especially for group or common open space—are higher than in other cities of similar density and size. Minimum usable open space requirements differ by zoning district in Oakland. For example, Housing and Business Mix Commercial (HBX) zones require a minimum of 100 to 200 square feet of usable open space per dwelling unit. The Lake Merritt Station Area District (D-LM) zones require 75 square feet per unit. Primarily residential areas, like the Urban Residential (RU) zones, require 100 to 150 square feet of group useable open space per unit. However, each one square foot of private usable open space is considered equivalent to two square feet of required group usable open space and may be so substituted. These open space requirements do not apply to Downtown. In comparison, the City of Berkeley's C-DMU Downtown Mixed-Use District requires a minimum of 40 square feet of usable open space per dwelling unit. San Diego requires 36 to 48 square feet per unit. Oakland also limits the amount of the common space that can be on rooftops, while many other jurisdictions do not have such limitation. So as to not hinder construction, these standards could be adjusted to be more in line with the standards of peer jurisdictions. Actions the City will take to address these constraints are provided in the Housing Action Plan (see Action 3.4.1 and 3.4.4).

Courtyard Requirements

Per Section 17.108.120 of the Planning Code, courtyards are required for lots that contain residential facilities with two or more dwelling units, except for a single-family home with an ADU. Courtyard requirements were not identified as a significant constraint to development during outreach. Courtyards must meet minimum depths between exterior walls, listed below:

- Legally Required Living Room Windows in Either or Both Walls. If either or both such opposite walls contain any legally required window of any living room in a Residential Facility, a court shall be provided between such walls with a minimum horizontal depth equal to 16 feet, plus four feet for each story above the level of the aforementioned court, but shall nor be required to exceed 40 feet.

- Other Legally Required Windows in Both Walls. If both such opposite walls contain legally required windows of any habitable rooms, other than living rooms, in a

Residential Facility, a court shall be provided between such walls with a minimum horizontal depth of 10 feet.

Parking Requirements

In California, the cost of providing structured parking can add between $36,000 to $38,000 per housing unit to the overall costs of a multifamily housing development project (or about 8.0 percent of per unit costs).[7] Parking-related requirements and costs can significantly impact and constrain multifamily housing development, particularly those providing affordable units. Market demand or financial lenders often mandates the provision of parking in multifamily housing development. Further, for built-out cities like Oakland, the reliance on infill development and underground parking may lead to higher costs than in cities with more open land.

Recent State law has reduced minimum parking requirements for projects near transit. For instance, AB 2923 allows BART to enable transit-oriented development (TOD) through land-use zoning on BART-owned property in collaboration with local jurisdictions. Baseline zoning standards from the bill include no minimum number of vehicle parking spaces is enforced in these TOD areas. For properties undergoing the SB9 process, local agencies may not impose parking requirements when a parcel is located within one-half mile walking distance of either a high-quality transit corridor or a major transit stop. Changes in accessory dwelling unit (ADU) regulations, Density Bonus parking waivers, and SB 35 streamlined approvals have led to further parking reductions in Oakland.

The City's parking requirements for residential uses—provided in Section 17.116.060 of the Planning Code—vary by residential facility type. Lower density zones require as much as two spaces per unit, while higher density zones require one space or less per unit. Chapter 17.94 of the Planning Code details Residential Parking Combining (S-12) Zone regulations. This combining zone is intended to ensure that adequate off-street parking is provided for high density residential neighborhoods and adjacent commercial areas. Oakland parking requirements are provided in Tables F-10 and F-11 below.

[7] Carolina Reid, Adrian Napolitano, and Beatriz Stambuck-Torres, "The Costs of Affordable Housing Production: Insights from California's 9% Low-Income Housing Tax Credit Program" *The Terner Center for Housing Innovation at University of California*, March 2020.

Table F-10: Residential Off-Street Parking Requirements, 2022

Residential Facility Type	*Zone*	*Total Required Parking*
One-Family Dwelling	RH Zones, except when combined with the S-12 Zone.	Two (2) spaces for each dwelling unit; however, when combined with the S-11 Zone, the requirement is one (1) space per bedroom with a minimum of two (2) spaces per dwelling unit and a maximum requirement of four (4) spaces per dwelling unit.
	CBD, S-2, and D-LM Zones, except when combined with the S-12 Zone.	No spaces required.
	S-15 and D-CO Zones, except when combined with the S-12 Zone.	One-half space for dwelling unit.
	Any other zone, except when combined with the S-12 Zone.	One space for each dwelling unit.
	Any zone combined with the S-12 Zone.	Basic requirement – one off-street parking space shall be provided for each three habitable rooms in a residential facility. See Section 17.94.040 for additional details.
One-Family Dwelling with Secondary Unit	CBD, S-2, and D-LM Zones, except when combined with the S-11 or S-12 Zone.	No additional space required for the Secondary Unit.
	Any other zone, except when combined with the S-11 or S-12 Zone.	One space for the Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
	Any zone combined with the S-11 Zone.	One space for each bedroom in the Secondary Unit, up to a maximum requirement of two spaces per Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
	Any zone combined with the S-12 Zone.	One space for each bedroom in the Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
Two-Family Dwelling.	CBD, S-2, and D-LM Zones, except when combined with the S-12 Zone.	No spaces required.

Multifamily Dwelling	D-BV-1, D-BV-2, S-15, and D-CO Zones, except when combined with the S-12 Zone.	One-half space for each dwelling unit.
	D-BV-3 and D-BV-4 Zones, except when combined with the S-12 Zone.	Three-quarters space for each dwelling unit.
	Any other zone, except when combined with the S-12 Zone.	One space for each dwelling unit.
	Any zone combined with the S-12 Zone.	Basic requirement – one off-street parking space shall be provided for each three habitable rooms in a residential facility. See Section 17.94.040 for additional details.
Rooming House	CBD, S-2, D-LM, D-BV-1, and D-BV-2 Zones.	No spaces required for Rooming Units.
	All other zones	One space for each two Rooming Units.
Micro-Living Quarters	D-BV-1 and D-BV-2 Zones. (Micro-Living Quarters are not permitted in any other zone.)	No spaces required.
Mobile Home	CBD, S-2, and D-LM Zones	No spaces required.
	All other zones.	One space for each dwelling unit plus one additional space for each four dwelling units.

Source: City of Oakland, Planning Code Section 17.116.060, 2022

Table F-11: Residential Maximum Off-Street Parking Requirements, 2022

Residential Facility Type	*Zone*	*Maximum Number of Parking Spaces*
One-Family Dwelling. One-Family Dwelling with Secondary Unit. Two-Family Dwelling. Multifamily Dwelling. Mobile Home.	CBD, S-15, D-LM, and D-CO Zones.	One and one-quarter parking spaces per dwelling unit.
	All other zones	No maximum parking requirement.
Rooming House	CBD, S-15, D-LM, and D-CO Zones.	One and one-quarter parking spaces per each two rooming units.
	All other zones.	No maximum parking requirement.

Source: City of Oakland, Planning Code Section 17.116.060, 2022

Parking regulations in the city are higher relative to some adjacent cities. For example, the City of Emeryville has no parking minimums for any use (including residential). Emeryville also has *maximum* parking regulations, which caps parking provided to be no more than 10 percent of the estimated demand – which is provided in the City's Municipal Code. The City of Berkeley recently approved an ordinance that eliminates parking requirements for residential properties citywide, with the exception of hillside properties, and placed a maximum of the number of off-street parking units allowed for new projects in transit-rich areas. Although Oakland undertook efforts to reduce its parking standards for residential and commercial buildings in 2016—with no required parking and a cap on maximum parking in areas close to major transit hubs such as downtown or near BART stations—additional efforts are needed to reduce parking requirements citywide. The City of Oakland will reduce its parking requirements to remove a constraint to development following adoption of the Housing Element, as further discussed in the Housing Action Plan (See Action 3.4.4).

Combining Zone Standards

Combining zones are overlay districts which may be appended to existing base zones. Combining zones are typically used when local conditions, including environmental or other conditions, generate a need for more specific regulations. The standards of the combining zone are supplementary to that of the base zone when applied. The impact of combining zones on residential use is summarized in Table F-12 below.

Cumulative Effect of Development Standards

As described above, a 2021 study of housing built on designated 5th cycle RHNA inventory sites, permitted projects in Oakland exceeded "realistic" capacity estimates by 300 percent.[8] As shown in Appendix C: Sites Inventory, tables C-4 and C-5, pipeline projects with planning and building permits have average densities of 115 percent and 150 percent of allowable density, respectively. Many of these projects utilize the State and City density bonus to achieve these higher densities. Thus, Oakland's development standards do not present a constraint to achieving maximum densities when considered cumulatively. Combined with actions to revise zoning standards, building heights, setbacks, lot coverage, open space requirements, parking requirements, and other individual constraints as listed above, Oakland's future development standards should reduce any potential constraints even further.

Evidence and Implications for California's Housing Element Law. August 2021. Accessed at https://escholarship.org/content/qt6786z5j9/qt6786z5j9_noSplash_e70697e42e10371d566b599594a50e06.pdf?t=qyg5hv on June 28, 2022.

Table F-12: Summary of Combining Zone Standards, 2022

Combining Zone	*Applicable Base Zones*	*Impact on Residential Use*
S-4 Design Review	Any other zone	Requires design review process for all new construction or alteration, unless exempt.
S-7 Preservation	Any other zone	Requires additional design review criteria to structures with special character, mostly applicable to older neighborhoods.
S-9 Fire Safety	Any other zone	Protects uses in Very High Fire Hazard Severity Zones, and prohibits accessory dwelling units not entirely within an existing structure.
S-10 Scenic Route	Any other zone	Enhances areas along scenic routes, and includes additional design review criteria, subdivision restrictions, height restrictions on downslope lots, and conditional use permit restrictions.
S-11 Site Development and Design Review	Any other zone	Applicable to areas subject to the North Oakland Hill Area Specific Plan, and includes additional residential siting requirements, design review criteria, and limitations on residential density.
S-12 Residential Parking	Any zone in which Residential Facilities are permitted or conditionally permitted	Ensures adequate off-street parking in high-density residential neighborhoods, including additional off- and on-street parking requirements.
S-15 Transit-Oriented Development Commercial Zone Regulations	Provided in Table F-5	Provided in Table F-8.
S-17 Downtown Residential Open Space	Any zone within the General Plan-designated Central Business District	Provides open space and landscaping standards for downtown residential development.
S-19 Health and Safety Protection	HBX, D-CE-3, D-CE-4, CIX-1, CIX-1A, CIX-1B, CIX-1C, CIX-1D, CIX-2	Related to the storage and use of hazardous materials.
S-20 Historic Preservation District	Any other zone	Provisions are similar to S-7, but applies to larger areas (i.e., historic districts). S-20 includes additional design review standards, and provides more expeditious review procedures than S-7.

Specific Plans

Oakland has embarked on a series of area plans for creating sustainable and vibrant neighborhoods. Through the use of specific plans, the City can guide development at a neighborhood scale and meet local community needs. This section summarizes recent specific plans with potential for residential development. Permitted residential densities are described in Table F-7 and Table F-8 above. The success of specific plan areas in meeting their residential development goals is provided in Appendix A.

Central Estuary Area Plan (2013)

The City adopted the Central Estuary Area Plan (CEAP) in April 2013 to guide future development of the Central Estuary area, which is encompassed by 19th Avenue to the north, 54th Avenue to the south, I-880 to the east, and the Oakland Estuary to the west. Certain portions of the Plan Area have been designated to accommodate multifamily and mixed-use residential development. As of adoption, the CEAP anticipated an additional development potential of 391 residential units and 31 live/work units. Projects completed within the Plan Area include the 41-unit Phoenix Commons senior housing project in 2016 and the 41-unit market-rate 3030 Chapman apartment building in 2018. More recent entitled and permitted projects include warehouse and industrial conversions to residential uses, a six-unit condominium project, and accessory dwelling units.

The CEAP is implemented in the Planning Code through the D-CE Central Estuary District Zones, provided in Chapter 17.101E of the Oakland Planning Code. The D-CE District Zones include the following:

- **D-CE-1 (Embarcadero Cove).** The D-CE-1 zone is intended to create, maintain, and enhance the marine, office and other commercial uses in the Central Estuary area.
- **D-CE-2 (High Street Retail).** The D-CE-2 zone is intended to create, maintain, and enhance areas of the Central Estuary with a wide range of commercial uses with direct street frontage and access to the freeway.
- **D-CE-3 (Jingletown/Elmwood).** The D-CE3 zone is intended to provide development standards for areas of the Central Estuary that have a mix of industrial, heavy commercial and residential development. This zone is intended to promote housing with a strong presence of commercial and industrial activities.
- **D-CE-4 (Mixed Use Triangle).** The D-CE-4 zone is intended to create, maintain and enhance areas of the Central Estuary that have a mix of industrial and heavy commercial activities. Higher density residential development is also appropriate in this zone.
- **D-CE-5 (Food Industry Cluster, High Street Warehouse Wedge, Tidewater South).** The D-CE-5 zone is intended to create, preserve, and enhance areas of the Central Estuary that are appropriate for a wide variety of heavy commercial and

industrial establishments. Uses with greater off-site impacts may be permitted provided they meet specific performance standards.

- **D-CE-6 (Con Agra, Owens Brockway, Tidewater North).** The D-CE-6 zone is intended to create, preserve and enhance areas of the Central Estuary that are appropriate for a wide variety of businesses and related commercial and industrial establishments that may have the potential to generate off-site impacts such as noise, light/ glare, odor, and traffic. This zone allows heavy industrial and manufacturing uses, transportation facilities, warehousing and distribution, and similar related supporting uses. Uses that may inhibit such uses, or the expansion thereof, are prohibited. This district is applied to areas with good freeway, rail, seaport, and/or airport access.

Lake Merritt Station Area Plan (2014)

The Lake Merritt Station Area Plan (LMSAP) was adopted by the City as a specific plan in December 2014. The approximately 315-acre Planning Area covers the area around the Lake Merritt BART station in Downtown Oakland. The LMSAP projects that there is capacity for 4,900 additional housing units through 2035. All of the opportunity sites identified in the LMSAP have access to necessary infrastructure to support development. Therefore, the opportunity sites could accommodate a range of income levels depending on availability of adequate financial subsidies to make possible the development of units for very-low- and low-income households. Further, the LMSAP provides a target that 15 percent of new units built in the Planning Area be affordable for low- and moderate-income households.

The LMSAP is implemented in the Planning Code through the D-LM Lake Merritt Station Area District Zones, provided in Chapter 17.101G. The D-LM Zones include the following:

- **D-LM-1 Lake Merritt Station Area District Mixed - 1 Residential Zone.** The intent of the D-LM-1 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for high-density residential development with compatible Commercial Activities.

- **D-LM-2 Lake Merritt Station Area District Pedestrian - 2 Commercial Zone.** The intent of the D-LM-2 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District for ground-level, pedestrian-oriented, active storefront uses. Upper story spaces are intended to be available for a wide range of Office and Residential Activities.

- **D-LM-3 Lake Merritt Station Area District General - 3 Commercial Zone.** The intent of the D-LM-3 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for a wide range of ground-floor Commercial Activities. Upper-story spaces are intended to be available for a wide range of Residential, Office, or other Commercial Activities.

- **D-LM-4 Lake Merritt Station Area District Mixed - 4 Commercial Zone.** The intent of the D-LM-4 Zone is to designate areas of the Lake Merritt Station Area Plan District

appropriate for a wide range of Residential, Commercial, and compatible Light Industrial Activities.

- **D-LM-5 Lake Merritt Station Area District - 5 Institutional Zone.** The intent of the D-LM-5 Zone is to create, preserve, and enhance areas devoted primarily to major public and quasi-public facilities and auxiliary uses.

Broadway Valdez District Specific Plan (2014)

The City adopted the Broadway Valdez District Specific Plan (BVDSP) in June 2014. The BVDSP provides a framework for development in the approximately 95-acre area along Oakland's Broadway corridor between Grand Avenue and I-580. Amendments to the Planning Code include the development of new zoning regulations for the Broadway Valdez District (D-BV) that are tailored to address specific conditions in the district and achieve the vision set forth in the BVDSP. D-BV zones establish retail and mixed-use commercial zones in the Plan Area and emphasize transit-oriented development. In addition, proposed height areas allow for greater densities, particularly at retail and mixed-use boulevard zones.

The BVDSP projected 1,800 new housing units through 2035. Sites were identified for mixed-use or purely residential uses to accommodate over 30 units per acre; with maximum residential density ranging from 90 to 450 square feet of lot area required per dwelling unit. The Environmental Impact Report (EIR) for the BVDSP allowed for flexibility and a mix and match of uses as long as the total car trip allocation was not exceeded. As of spring of 2022, the plan area has a total of approximately 4,100 residential units that have applied for planning permits, approved for planning permits, applied for building permits, have had a building permit issued, or completed construction. Of those 4,100 residential units, approximately 2,200 units have been completed so far. That still leaves approximately 1,900 units in the pipeline of approval and construction. All of the sites have access to necessary infrastructure to support development. A good portion of the opportunity sites identified in the BVDSP have been developed, but there are additional sites in the pipeline as well as sites without submitted plans that could accommodate a range of income levels depending on availability of adequate financial subsidies to make possible the development of units for very-low- and low-income households. The BVDSP aims to encourage 15 percent of all new housing units in the Plan Area to be affordable including both units in mixed-income developments and units in 100 percent affordable housing developments. A few of the newer projects have included some affordable units as part of their project while others have paid Affordable Housing Impact Fees to go into the Affordable Housing Trust Fund to help fund affordable housing development. Affordable Housing Impact Fees were adopted after the adoption of the BVDSP project, so a number of projects were underway before the Affordable Housing Impact Fees went into effect in September 2016.

Coliseum Area Specific Plan (2015)

The City adopted the Coliseum Area Specific Plan (CASP) in April 2015. The CASP, consisting of approximately 800 acres along I-880 and Hegenberger Road, seeks to transform the underutilized land around the Oakland-Alameda County Coliseum and Arena into a world-class sports, entertainment, and science and technology district that boasts a dynamic and

active urban setting with retail, entertainment, arts, culture, and live and work uses. The CASP amended the maximum residential density and non-residential FAR in the "Community Commercial" and "Regional Commercial" LUTE designations. The CASP allows for development of up to 5,750 housing units by 2035.

The CASP implemented new zoning districts, which include the following:

- **Coliseum District-1 (D-CO-1).** This zone replaces the Transit Oriented Development zone (S-15) mapped around the Coliseum BART station. The D-CO-1 Zone is intended to create, preserve and enhance areas devoted primarily to serve multiple nodes of transportation and to feature high-density residential, commercial, and mixed-use developments, to encourage a balance of pedestrian-oriented activities, transit opportunities, and concentrated development; and encourage a safe and pleasant pedestrian environment near transit stations by allowing a mixture of residential, civic, commercial, and light industrial activities. The new D-CO-1 zone limits the building height in this area to 159 feet unless Federal Aviation Administration (FAA) review and CUP review allows taller building heights. The new D-CO-1 zone applies to all properties east of the Union Pacific Railroad (UPRR) railroad tracks that are within the Coliseum Specific Plan Area.

- **Coliseum District-2 (D-CO-2).** This zone replaces the Regional Commercial-1 (CR-1) zone that applied to the majority of the Coliseum District. The new D-CO-2 zone specifically permits and encourages development of regional-drawing centers of activity, such as new sports and entertainment venues, residential, retail, restaurants, and other activity-generating uses, as well as a broad spectrum of employment activities. The new D-CO-2 zone clarifies that any building height over 159 feet will require FAA review and City CUP approval.

West Oakland Specific Plan (2014)

The West Oakland Specific Plan (WOSP) was adopted by the City in 2014, and comprises approximately 1,900 acres. The WOSP focuses on clarifying the industrial/residential interface, emphasizing commercial use along important corridors, and clarifying housing and business mix boundaries and urban open space uses. Such zoning changes include the adoption of the Commercial Industrial Mix (CIX-1A) business enhancement zone, Commercial Industrial Mix (CIX-1B) low intensity business zone, Commercial Industrial Mix (CIX-1C) high intensity business zone, Commercial Industrial Mix (CIX-1D) retail commercial mix zone, and Housing and Business Mix (HBX-4) zone, as well as mapping of commercial overlay zones near the West Oakland BART station along the 5th Street and Chester Street frontage area, and adopting zoning and height area maps.

Buildout of the West Oakland Opportunity Areas is expected to result in 4,286 to 5,267 new housing units by 2035. Areas with residential potential include along the 7th Street and San Pablo Avenue corridors (more than 1,400 housing units), the envisioned 24-acre mixed-use Transit Oriented Development at the West Oakland BART station (between 1,325 to 2,308

housing units), and approximately 1,520 housing units elsewhere within residential and housing and business mix areas.

The Downtown Oakland Specific Plan (Public Review Draft Plan, 2019)

In August 2019, the City published a public review draft of the Downtown Oakland Specific Plan (DOSP), which envisions new zoning regulations that can be introduced to more closely align with community goals and feasible development potential. The Plan Area encompasses approximately 930 acres, with a potential for 29,100 new housing units by 2040, of which 4,365 to 7,275 will be affordable units. Key issues related to housing that the zoning update will address include:

- **Establish development hierarchy based on land use character and intensity maps.** The Land Use Character Map and Intensity Map establishes a clear development hierarchy for downtown, depicting nodes and corridors of activity and intensity, as well as transitions to areas of preservation and less intensity. New development downtown should be consistent with the overall community vision established by this Plan.

- **Unlock bonus development potential in exchange for needed community benefits.** The Plan will ensure that downtown's continued growth and revitalization provides community benefits to local residents and the broader community. As part of the planning effort, the City is studying how "upzoning" areas of downtown would affect land value and, to what extent and through what approaches, this value creation may provide funding for pre-defined community benefits based on Plan goals. A zoning incentive program can apply to development projects of any size, with clearly identified benefits to be provided in exchange for increases in building intensity. The increased intensity allowed can be in the form of increased height, FAR, and/or density (to encourage micro-units and other affordable-by-design residential unit types).

- **Study intensity in General Plan.** The updated zoning regulations for downtown may also include an increase in the FAR and density permitted under the General Plan, particularly for portions of the plan area where an increase in intensity is desired, to be consistent with the proposed new bonus provisions. Increasing the maximum FAR and density in select downtown locations will not only capture value and contribute to community benefits, but it can also add intensity to the downtown without requiring lot aggregation, which often results in overly large building footprints and bulky podiums.

- **Include update to Jack London area zoning.** The zoning for the Jack London area dates to the 1960s and is inconsistent with the General Plan. The area was not included in recent 2009 and 2011 citywide zoning updates. Implementation of the Downtown Plan will make the zoning for the Jack London district consistent with the community vision to create an iconic waterfront that is a regional and local amenity with dining, living, entertainment, and civic uses.

- **Streamline approvals, create predictable outcomes.** A goal for the downtown zoning amendments should be to streamline the project approvals process and offer predictability for developers and the community. This can be done by clearly defining the desired urban form and maximum intensity of future development, including identified community benefits that should be provided in exchange for any bonus intensity.

- **Designate office opportunity sites.** Estimates of Downtown Oakland's potential capture of additional office space demand over the next 20 years vary from 10 million to 20 million square feet of space, and significantly more over additional time. Office Priority Sites are identified near BART stations within the Mixed-use Downtown Core Character area. Zoning updates for these identified Office Priority Sites can require new mixed-use development that has a designated percentage of gross floor area to be dedicated to commercial office space.

Density Bonus

The State Density Bonus Law requires local governments to provide a density increase over the otherwise maximum allowable residential density, along with other incentives for the production of below market-rate housing units, when builders agree to construct housing developments with units affordable to lower- or moderate-income households. Historically, developers infrequently sought density bonuses in Oakland due to the fairly high residential densities permitted in the City. However, the City has seen an uptick in recent years as a means of builders receiving not only a bonus in allowable density, but also relaxation of various development standards that may otherwise preclude construction or increase costs.

Density bonus standards in Oakland are contained in Chapter 17.107 of the Planning Code. The Density Bonus Ordinance was updated in April 2014, and amended again in April 2022, to remain consistent with State law. Prior to this most recent revision, Oakland implemented its local density bonus program in the manner required to ensure consistency with State law. Oakland anticipates that the State Density Bonus Law will continue to be revised by the State legislature in future years. As a result, Chapter 17.107 provides that any provision of the State Density Bonus Law, California Government Code Sections 65915 through 65918, but not included in Chapter 17.107 shall nonetheless be considered valid and applicable to density bonus projects in the City of Oakland. Oakland's density bonus ordinance provides for density bonuses to both for-sale and rental housing development projects that include deed-restricted moderate income units, while state law applies to moderate-income units only in for-sale housing developments.

Recent changes to State Density Bonus Law have significantly expanded incentives for 100 percent affordable, special needs and mixed-income projects located near transit. For example, Assembly Bills 2345 (2020) and 1763 (2019) aim to greatly facilitate affordable housing production, especially 100 percent affordable housing development production. The City of Oakland has implemented the provisions of these amendments at the time that they went into effect and have incorporated those amendments into the latest revision to Chapter 17.107.

In addition to implementing the California Density Bonus law, Oakland has available additional local density bonuses, including a Senior Housing Density Bonus and a Planned Unit Development (PUD) bonus.[9] The City of Oakland Senior Housing Density Bonus, Oakland Planning Code Section 17.106.060, provides for an increase of 75 percent more senior housing units than otherwise permitted by zoning if a conditional use permit is approved. An applicant may choose whether to seek the Oakland Senior Housing Density Bonus or to utilize the State Density Bonus for senior citizen housing developments, but cannot combine the two. In addition, the City of Oakland's flexible Planned Unit Development procedures offer varying special bonuses for worthwhile projects, some of which include increases in overall density. When a project seeks both a Planned Unit Development and State Density Bonus, the Planned Unit Development bonus is calculated first, up to the General Plan maximum density, and then the State Density bonus is calculated from this new allowed number of units.

According to Annual Progress Reports (APRs) submitted to HCD, 10 projects were permitted between 2018 and 2021 that used density bonus provisions to provide affordable housing. The total capacity of these projects is 1,526 units, including 176 very low-income units, 105 low-income units and 64 moderate-income units. In addition, over the same period, eight density bonus projects were completed with 245 very low-income units, 19 low-income units and 315 market-rate units. For comparison, there were about 169 market-rate projects (excluding single-family homes and ADUs) during this period – meaning 5.9 percent of these projects utilized a density bonus. About 1,526 units were provided in these 169 projects, of which 345 units are provided for lower- and moderate-income households (22.6 percent). Waivers and concessions requested by density bonus projects include reductions in parking requirements, increases in allowable building heights, reductions in usable open space requirements, and eliminating a required loading berth.

On- and Off-Site Improvements

The Oakland Municipal Code requires several on- and off-site improvements for new development, depending on the zone. Site improvements may include those related to streets, sidewalks, water and sewage, landscaping, recreation amenities, and any other public improvements found necessary to mitigate the impacts of new development. Additional site improvements may be required in the City's specific plan areas. Since Oakland is mostly built out, housing in the city is largely located on already subdivided lots. Depending on the potential transportation impacts and the location of redevelopment, off-site infrastructure improvements may be required to satisfy California Environmental Quality Act (CEQA) requirements. Off-site improvements may include transit boarding islands, transit shelters,

[9] A PUD is a large, integrated development adhering to a comprehensive plan and located on land equaling 60,000 or more square feet in size. Certain uses may be permitted in addition to those otherwise allowed in the underlying zone, certain of the other regulations applying in said zone may be waived or modified, and the normally required design review process may also be waived for developments at the time of initial granting of a PUD permit. The PUD density bonus permits an increase of density by up to 33 percent (except in the RH and RD-1 zones) if the development contains detached buildings each containing only one living unit; townhouse or similar single-family semi-detached or attached buildings each containing only one living unit; buildings each containing two living units and; buildings each containing more than two living units.

curb extensions, bike facilities, or pedestrian lighting. Table F-13 summarizes the City's current complete street design standards.

Table F-13: Complete Streets Design Standards, 2022

Street	*Width of Right-of-Way (ft.)*	*Visibility Measured Along the Centerline (ft.)*	*Minimum Radii of Curvature on Centerline of Streets (ft.)*	*Tangent length between all reversed curves (ft.)*
Arterial	80	300	500	150
Collector	60	200	300	150
Local	40	100	100	50
Blind	50	-	-	-
Alley	26	-	-	-

Source: Oakland Municipal Code, Chapter 16.16 Design Standards, 2022

Per the City's Standard Conditions of Approval, all land use projects that generate more than 50 net new a.m. or p.m. peak hour vehicle trips must prepare a Transportation and Parking Demand Management (TDM) Plan as early as feasible in the planning process. Mandatory strategies that must be incorporated into a TDM plan based on a project location or other characteristics are provided in Table F-14 below.[10]

[10] City of Oakland Transportation Impact Review Guidelines (TIRG) are available on the City's website: https://cao-94612.s3.amazonaws.com/documents/oak063581.pdf

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
Bus boarding bulbs or islands	• A bus boarding bulb or island does not already exist and a bus stop is located along the project frontage; and/or • A bus stop along the project frontage serves a route with 15 minutes or better peak hour service and has a shared bus-bike lane curb
Bus shelter	• A stop with no shelter is located within the project frontage, or • The project is located within 0.10 miles of a flag stop with 25 or more boardings per day
Concrete bus pad	• A bus stop is located along the project frontage and a concrete bus pad does not already exist
Curb extensions or bulb-outs	• Identified as an improvement within site analysis
Implementation of a corridor-level bikeway improvement	• A buffered Class II or Class IV bikeway facility is in a local or county adopted plan within 0.10 miles of the project location; and • The project would generate 500 or more daily bicycle trips
Implementation of a corridor-level transit capital improvement	• A high-quality transit facility is in a local or county adopted plan within 0.25 miles of the project location; and • The project would generate 400 or more peak period transit trips
Installation of amenities such as lighting; pedestrian-oriented green infrastructure, trees, or other greening landscape; and trash receptacles per the Pedestrian Master Plan and any applicable streetscape plan.	• Always required
Installation of safety improvements identified in the Pedestrian Master Plan (such as crosswalk striping, curb ramps, count down signals, bulb outs, etc.)	• When improvements are identified in the Pedestrian Master Plan along project frontage or at an adjacent intersection
In-street bicycle corral	• A project includes more than 10,000 square feet of ground floor retail, is located along a Tier 1 bikeway, and on-street vehicle parking is provided along the project frontages.
Intersection improvements[2]	• Identified as an improvement within site analysis

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
New sidewalk, curb ramps, curb and gutter meeting current City and ADA standards	• Always required
No monthly permits and establish minimum price floor for public parking[3]	• If proposed parking ratio exceeds 1:1000 sf (commercial)
Parking garage is designed with retrofit capability	• Optional if proposed parking ratio exceeds 1:1.25 (residential) or 1:1000 sf (commercial)
Parking space reserved for car share	• A project is located within downtown. One car share space preserved for buildings between 50 – 200 units, then one car share space per 200 units.
Paving, lane striping or restriping (vehicle and bicycle), and signs to midpoint of street section	• Typically required
Pedestrian crossing improvements, pedestrian-supportive signal changes[4]	• Identified as an improvement within site analysis • Identified as an improvement within operations analysis
Real-time transit information system	• A project frontage block includes a bus stop or BART station and is along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better
Relocating bus stops to far side	• A project is located within 0.10 mile of any active bus stop that is currently near-side
Signal upgrades[5]	• Project size exceeds 100 residential units, 80,000 sf of retail, or 100,000 sf of commercial; and • Project frontage abuts an intersection with signal infrastructure older than 15 years
Transit queue jumps	• Identified as a needed improvement within operations analysis of a project with frontage along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better
Trenching and placement of conduit for providing traffic signal interconnect	• Project size exceeds 100 units, 80,000 sf of retail, or 100,000 sf of commercial; and

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
	• Project frontage block is identified for signal interconnect improvements as part of a planned ITS improvement; and • A major transit improvement is identified within operations analysis requiring traffic signal interconnect
Unbundled parking	• If proposed parking ratio exceeds 1:1.25 (residential)

1. AC Transit must be consulted for any transit related elements.

2. Including but not limited to visibility improvements, shortening corner radii, pedestrian safety islands, accounting for pedestrian desire lines.

3. May also provide a cash incentive or transit pass alternative to a free parking space in commercial properties.

4. Including but not limited to reducing signal cycle lengths to less than 90 seconds to avoid pedestrian crossings against the signal, providing a leading pedestrian interval, provide a “scramble” signal phase where appropriate.

5. Including typical traffic lights, pedestrian signals, bike actuated signals, transit only signals.

Source: City of Oakland, Transportation Impact Review Guidelines, 2017

While on- and off-site improvements increase the costs of development, they are required to mitigate the impact of new development on the City's infrastructure and are largely unavoidable. However, the City attempts to mitigate the impact on affordable housing through the use of regulatory incentives, funding assistance, and other strategies. Further, Oakland's requirements were not identified as a significant constraint during outreach with affordable housing developers.

Building Codes and Enforcement

Oakland adopts the California Model Building Codes (CMBC) established by the California Building Standards Commission (CBSC) through Title 24 of the California Code of Regulations, which was last updated in 2022. The CMBC establish the minimum requirements to safeguard the public health, safety and general welfare through structural strength, means of egress facilities, stability, access to persons with disabilities, sanitation, adequate lighting and ventilation and energy conservation; safety to life and property from fire and other hazards attributed to the built environment; and to provide safety to fire fighters and emergency responders during emergency operations. Local jurisdictions are required to enforce the CMBC but may also enact more stringent amendments to the CMBC based on climatic, geological, or topographical conditions. Oakland's modifications to the CMBC are generally for the purpose of protecting health and safety in areas subject to natural hazards. Local amendments that may increase development costs are largely related to fire risks, habitability issues, topography, and seismic risks. These amendments do not substantially differ from those of other cities within Alameda County and thus are not considered to act as a constraint on the development of housing.[11] While requirements may lead to increased costs of construction, reducing building code requirements may lead to long-term health and safety risks, particularly in a seismically active area like Oakland.

The City's Planning & Building Department reviews all new construction and improvements to existing structures in Oakland. Building services performed include field inspections, plan reviews, and permit issuance in person or electronically. Planning & Building allows users to apply for selected permits, check on the status of permits, research property records, and print permits or inspection cards via the Online Permit Center. The Green Building Code, or CALGreen, applies to most new residential construction (including affordable housing construction). Both single-family and multifamily units must meet CALGreen mandatory measures for residential new construction, as do Category 2 ADUs. Depending on the project, Oakland's green building requirements may also apply.[12]

When applying for building permits, applicants may be required to undergo the Plan Check process. During Plan Check, City engineers review development plans for compliance with applicable codes and regulations. This can include compliance with applicable local, State and federal laws to ensure access for disabled persons. Plans may need to be submitted to the Fire

[11] The latest local amendments, including standard findings, are available at the following link: https://oakland.legistar.com/LegislationDetail.aspx?ID=4212920&GUID=C9824F8B-AF8B-44CE-B43A-BC83BFC2FD34

[12] https://www.oaklandca.gov/topics/green-building

Prevention Bureau for initial review, or may be routed for concurrent review during the Building Plan Check process.

Upon issuance of a building permit, the following inspections are typically required – pre-construction, pre-pour/foundation stage, framing stage, rough-in/frame stage, insulation, drywall/lath/gas test, and final. A final inspection is called in when all related permits have an approved rough-in inspection. To increase predictability during the construction process, the City provides resources on its website of what is typically required.[13]

Code Enforcement Services carries out the City's enforcement program to address violations of the Oakland Municipal Codes, City ordinances, and land use regulations. Code Enforcement Services uses progressive enforcement to follow up on complaints – property owners are notified through the U.S. Postal Services. When a violation is verified by a Building Inspector a Notice of Violation is issued that includes a list of violations and corrections that must be made. The property owner has 30 days to correct the violation. Residents are able to file a complaint via the Accela Citizen Access Portal. Code enforcement efforts are also linked to housing rehabilitation efforts – if an inspection results in an Order to Abate – Habitability or a if a property is a Substandard Public Nuisance a Compliance Plan may be required. Compliance Plans are agreements with the property owner/agent/buyer to rehabilitate the property, correct housing violations, and pay fee assessments in an agreed timeline. The Investor-Owned Residential Property Registration, Inspection & Rehabilitation Program also ensures the regular inspection and maintenance of properties with a default or foreclosure history that have non-owner occupant buyers.

Efforts to comply with State Health and Safety Code Section 17980, related to the abatement of substandard buildings, are contained in Section 15.08.110 of the Oakland Municipal Code and require notice to residential tenants of buildings deemed substandard. Further, under the Code Compliance Relocation Program, residential tenants who are displaced due to actions taken to address violations of City of Oakland building codes may be eligible for relocation benefits from the property owner, pursuant to Oakland Municipal Code Section 15.60.

PROVISION FOR A VARIETY OF HOUSING TYPES

The Housing Element must identify adequate sites that are available for the development of housing types for all economic segments of the population, including those populations with special needs. This section summarizes the extent to which various housing types are permitted in the city, as well as any constraints that may be contained in City regulations.

Accessory Dwelling Units (ADUs)

Accessory Dwelling Units (ADUs)—formerly known as secondary or granny units—are attached or detached units that provide complete independent living facilities for one or more

[13] See Building Bureau resources at the following links: https://cao-94612.s3.amazonaws.com/documents/What-to-expect-during-your-City-of-Oakland-Building-Inspection-4.2021.pdf and https://cao-94612.s3.amazonaws.com/documents/Overview-of-Planning-and-Building-Inspection-Types.pdf

persons and are located on a lot with a proposed or existing primary residence. An ADU must include permanent provisions for living, sleeping, cooking, and sanitation, located on the same lot as a single-family or multifamily structure. By their nature, ADUs tend to cost less to construct because they do not involve the purchase of land. The California legislature has found that ADUs often provide housing for family members, students, the elderly, in-home health care providers, the disabled, and others, at below market prices within existing neighborhoods. As noted by the Terner Center for Housing Innovation and the Center for Community Innovation, in higher-wealth areas, ADU construction is providing new housing supply with access to existing resources, and in lower-income areas, new ADUs are helping to reduce overcrowding, provide new rental income, and build home equity.[14] Several pieces of recent State legislation modified regulations for ADUs with the intent and effect of encouraging their construction. Some of the key changes included prohibiting standards related to lot coverage standards, lot size, FARs, or open space that may impede the development of ADUs, reducing review time for permit applications, and reducing regulations related to parking, height, setbacks, and unit size.

In Oakland, ADUs are regulated by Section 17.103.080 of the Planning Code. New regulations for ADUs were adopted by the City Council in January 2022 to meet the State law requirements. The Planning Code differentiates between a Category One and Category Two ADU. Category One units are those that are located entirely within a One-Family Residential Facility or detached accessory structure and involve no expansion of the existing building envelope. Category Two units are those that a) are not entirely within the building envelope of a One-Family Residential Facility or detached accessory structure; and b) involve either construction of a new structure, or an exterior addition to an existing structure. In addition, Multifamily Category One ADUs are conversions of existing non-habitable space within an existing multifamily building; Multifamily Category Two ADUs are newly constructed detached ADUs or conversions of an existing detached accessory structure; and Multifamily Category Three ADUs are interior or attached to the primary structure. All ADUs are subject to ministerial approval and regulations related to occupancy, sale of unit, parking configuration, fire sprinklers, and compliance with building and fire codes. The relevant standards for ADUs are shown in Table F-15.

The City's Planning Code also lays out requirements for junior accessory dwelling units (JADU) and meets the State law for them. According to State law, JADUs involve the conversion of space within the building envelope of an existing or proposed single-family dwelling, resulting in a living unit of not more than 500 square feet, requiring owner-occupancy in the JADU or primary dwelling unit. In comparison to the 1,000 square foot maximum for Category Two ADUs that are detached in Oakland, both the City of Berkeley and the City of Emeryville permits a 1,200 square foot maximum for detached ADUs. Oakland does allow for a 1,200 square foot for Category Two ADU that is attached or a Category One ADU as well as for a Category Two ADU Oakland has a height limit of 20 feet, which is greater than the minimum 16-foot height limit that the State requires. Housing Action Plan policies 3.2.5

[14] Karen Chapple, David Garcia, Eric Valchuis, and Julian Tucker. "Reaching California's ADU Potential: Progress to Date and the Need for ADU Finance." *The Terner Center for Housing Innovation at University of California*, August 2020

reduce constraints to the development of ADUs, and 3.2.6 commits the City to monitoring affordability of permitted ADUs.

Table F-15: ADU Development Standards, 2022

Standards	*One-Family ADU Category One*	*One-Family ADU Category Two*
Maximum Size	Conversion of Attached Structures: 50% of floor area of primary residence or 850 sf., whichever is greater, but shall not exceed 1,200 sf. Interior Conversion: size is limited by the existing building envelope, but shall not exceed 1,200sf.	For detached: 850 sf. for studio or 1-bedroom. 1,000 sf. for 2-bedroom or more For attached: Whichever is greater: 850 sf. for studio or 1- bedroom, and 1,000 sf. For a 2-bedroom or more; or 50% of floor area of primary residence, but shall not exceed 1,200 sf.
Parking for ADU	None required if located: a) within ½-mile walking distance of public transit; b) on any lot within a City of Oakland Area of Primary Importance (API) or Secondary Importance (ASI), as defined in the General Plan's Historic Preservation Element; c) in areas where parking permits are required but not offered to occupants of ADUs; or d) where there is a carshare vehicle within one block of the ADU. Otherwise: One (1) space per ADU, which can be tandem	None required if located: a) within ½-mile walking distance of public transit; b) on any lot within a City of Oakland Area of Primary Importance (API) or Secondary Importance (ASI), as defined in the General Plan's Historic Preservation Element; c) in areas where parking permits are required but not offered to occupants of ADUs; or d) where there is a carshare vehicle within one block of the ADU. Otherwise: One (1) space per ADU, which can be tandem
Side and Rear Setbacks	-	4 feet or the regularly required setback, whichever is less, but in no case shall the setback be less than 3 feet from the side or rear lot line;

Source: Oakland Planning Code, Section 17.103.080 Accessory Dwelling Units in conjunction with One-Family, Two-Family, and Multifamily Dwelling Residential Facilities, 2022

Live-Work Units

Live-work units are properties that combine residential and non-residential uses in either commercial or residentially zoned areas. There are numerous types of live-work units that are permitted in the city as outlined in Table F-16. The City makes a distinction between live/work and work/live units. They define live/work units as those that accommodate both residential and non-residential activities, while work/live units are primarily non-residential with an accessory residential area. These units are generally permitted within the commercial districts and must meet certain criteria. Live/work units are also permitted in

HBX and D-CE zoning districts, and work/live units are permitted, under limited circumstances, in industrial zones.

All live-work units are subject to Building Code requirements which may be costly to update and have a significant effect on the function and layout of these units, particularly in terms of Americans with Disabilities Act (ADA) access and bathroom configuration.

For comparison, the City of Berkeley permits live-work units by right in all commercial districts except C-SA and C-W, which require a use permit or an administrative use permit. Live-work units are not permitted in all residential districts. In the City of Emeryville, live-work units in residential zones are subject to on-premises sales and work is restricted to occupants. In a residential zone, no live-work building may be converted to wholly nonresidential uses; however, it may be converted to wholly residential uses. In a nonresidential zone, any live-work building may be converted to wholly nonresidential uses which are permitted in that zone. Action 3.2.2. updates development standards, building codes, and land use regulations to promote artist housing, including joint living and working quarters (JLWQs) in areas where appropriate under the General Plan.

Table F-16: Live-Work Units, 2022

Type	*Description*	*Permitted Zones*
JLWQ	Joint Living and Working Quarters (JLWQs) are live/work units resulting from the conversion of part or all of a building that was originally constructed for commercial or industrial activities.	Zones that permit or conditionally permit residential dwelling units.
Residentially Oriented JLWQ	Residentially Oriented JLWQs are live/work units resulting from the conversion of part or all of a building that is both: 1) originally constructed for nonresidential activities, and 2) at least ten years old.	Within the area bounded by Highway 980/Brush Street, the Estuary shoreline, the Lake Merritt/Estuary channel, the western shore of Lake Merritt, and 27th Street. Unlike standard JLWQs, Residentially Oriented JLWQs can only be in the Downtown and Jack London Square area.
HBX Work/Live and Live/Work Units	HBX work/live and live/work units are nonresidential facilities that can be established within an existing building, an expansion of an existing building, or a new building.	Housing and Business Mix (HBX) Zones
D-CE Work/Live and Live/Work Units	D-CE work/live and live/work units are nonresidential facilities that can be established within an existing building, an expansion of an existing building, or a new building.	Central Estuary District (D-CE) -3, -4, and -5 Zones

Table F-16: Live-Work Units, 2022

Type	*Description*	*Permitted Zones*
Industrial Work/Live Units	Work/live units established as part of a new building or the conversion of an existing building if the site is within 300 feet of a Residential Zone.	CIX, IO, and IG Zones. Industrial work/live units are not permitted in the IG or IO Zones, except the legalization of existing units that house artists are conditionally permitted anywhere in the CIX, IG, and IO Zones.
Work/Live Units in Additions and New Buildings	Live/work and work/live units in a newly constructed building or expansion of an existing building.	CIX, IO, IG, HBX, D-CE Zones

Manufactured Housing and Mobile Home Parks

Manufactured homes, also referred to as factory-built homes or modular homes, consist of a residential building or dwelling unit which is either wholly or partially constructed or assembled off-site. Manufactured housing is typically constructed off-site and installed on a foundation, which is significantly less costly than the construction of individual single-family homes on site.

Mobile home parks were previously permitted in the Mobile Home Combining (S-6) Zone. This zone was intended to create, preserve, and enhance areas containing attractive mobile home parks, and is typically appropriate to a variety of living environments with good access to major thoroughfares.

The Oakland Construction Innovation and Expanded Housing Options Ordinance (No. 13666), passed into law in November 2021, aimed to address the city's increasing cost of building housing, while increasing housing options and affordability to residents. The ordinance updated the City's zoning regulations to:

- Allow residential occupancy of recreational vehicles (RVs) and tiny homes on wheels ("Vehicular Residential Facilities") on private property subject to certain health and safety standards;
- Allow mobile homes and manufactured homes in all zoning districts where residential uses are permitted;
- Establish density and open space regulations for efficiency dwelling units; and
- Establish height regulations for modular construction.
- In addition, the Ordinance amended the Oakland Building Code to allow light straw-clay construction.

Housing for Persons with Disabilities

California Government Code 65583 requires jurisdictions to analyze potential and actual constraints that could affect the development, maintenance, and improvement of housing for persons with disabilities. Further, the Lanterman Developmental Disabilities Services Act and Community Care Facilities Act states that mentally, physically, developmentally disabled persons and children and adults who require supervised care are entitled to live in normal residential settings. To that end, State law requires that licensed family care homes, foster homes, and group homes serving six or fewer persons be treated like single-family homes and be allowed by right in all residential zones. In addition, both the Federal Fair Housing Act and the California Fair Employment and Housing Act place an affirmative duty on jurisdictions to make reasonable accommodations in their zoning and other land use regulations as necessary to afford disabled persons an equal opportunity to use and enjoy a dwelling. The following sections provide a summary of the relevant portions of Oakland's Zoning Code that address these requirements, as well as any potential constraints.

In Section 17.09.040 of the Oakland Planning Code, a family is defined as "one person, or a group of people living together as a single housekeeping unit, together with any incidental domestic servants and temporary nonpaying guests."

Reasonable Accommodation

While the City's Planning & Building Department implements the reasonable accommodation requirements in the California Building Code, Chapter 17.131 further outlines reasonable accommodations policy and procedures in the City's Planning Code. The intent of this chapter is to provide flexibility in the application of the Planning Code for individuals with a disability when flexibility is necessary to eliminate barriers to housing opportunities. The chapter facilitates compliance with federal and State fair housing laws and promotes housing opportunities for residents of Oakland.

The reasonable accommodation procedure is a ministerial process. The Planning Director, or his or her designee, shall have the authority to consider and act on requests for reasonable accommodation and shall make reasonable accommodations in rules, policies, practices, or services when those accommodations may be necessary to afford persons with disabilities equal opportunities to use and enjoy the dwelling. "Category A" Requests are requests for accommodation from development regulations not specified as a "Category B" request, including but not limited to, setbacks, building height limits and parking regulations in the Planning Code, or for any additions to Residential Facilities which meet the definition of a "Small Project," as defined in Section 17.136.030(B), shall be considered "Category A" requests. A proposal will qualify for "Category A" Request if it meets each of the provisions set forth below.

- The proposal is limited to one or more of the types of work listed as "Category A" request in 17.131.040(B)(1); and
- The accommodation is necessary to afford people with disabilities an equal opportunity to use and enjoy the dwelling.

"Category B" Requests are requests for accommodation from residential density regulations in the Planning Code; distance separation requirements in the Planning Code; land use activities not permitted by the Planning Code; any additions to Residential Facilities which meet the definition of "Regular design review" as defined in Section 17.136.040(A); and any other accommodations request, under the discretion of the Planning Director, shall be considered "Category B" requests. A proposal will qualify for "Category B" Request if it meets each of the provisions set forth below.

- That the housing, which is the subject of the request for reasonable accommodation, will be used by people with disabilities protected under fair housing laws;
- That the accommodation is necessary to afford people with disabilities an equal opportunity to use and enjoy the dwelling;
- That the requested accommodation will not require a fundamental alteration to zoning laws, rules, policies, practices and procedures; and
- That the requested accommodation will not impose an undue financial or administrative burden on the City.

Residential Care Facilities

Residential care facilities include facilities that require a State license or are State-licensed for seven or more residents which provide twenty-four hour primarily nonmedical care and supervision as defined in the City's Planning Code. Occupancy of living accommodations by six or fewer residents are excluded and are treated as single-family dwellings. Currently, residential care facilities are permitted in residential zones if located in single family dwellings, but require conditional use permits if located in any other residential facility type. Additionally, this also includes requirements that they be located no closer than 300 feet from any other facility, and require parking demand generation and noise not be substantially greater than normally generated by surrounding residential activities. Residential care facilities are permitted in non-residential zones if they are located in single family dwellings, but require conditional use permits if located in any other residential facility type and/or when located on the ground floor of a street fronting building., though Incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this Conditional Use Permit requirement. Currently, residential care facilities in CC zones are also required to comply with each of the following additional criteria:

1. That the proposal will not detract from the character desired for the area;
2. That the proposal will not impair a generally continuous wall of building facades;
3. That the proposal will not weaken the concentration and continuity of retail facilities at ground level, and will not impair the retention or creation of an important shopping frontage;

4. That the proposal will not interfere with the movement of people along an important pedestrian street; and

5. That the proposal will conform in all significant respects with any applicable district plan which has been adopted by the City Council.

Residential care facilities require one parking space for each three employees on site during the shift that has maximum staffing, and one space for each facility vehicle. Where more than two spaces are required, additional spaces beyond two may be provided in tandem.

While the City has not denied permits for residential care facilities in the past few years, the City will amend the Zoning Code to allow residential care facilities by-right in all residential facility types; allow residential care facilities by-right in the ground floor in non-residential zones; add standard conditions of approval (in place of conditional use permits); and add an exemption to the overconcentration restriction that allows residential care facilities for foster family homes and the elderly within 300 feet of another residential care facility to align with State licensing overconcentration requirements in California Health and Safety Code Section 1520. 5 (see Action 3.7.8).

Housing for Persons Experiencing Homelessness

Persons experiencing homelessness are identified as a special needs group and may require specialized forms of housing, including emergency shelters, transitional and supportive housing, low barrier navigation centers, and single room occupancy (SRO) units. The City also has 85 Project Homekey-funded sites. The following sections summarize City requirements for the various forms of housing that can meet the needs of the population experiencing homelessness.

Emergency Shelters

Emergency shelters include the provision of short-term housing, with or without a fee, to individuals and families who are homeless and who may require special services. According to 2020 Homeless Management Information System (HMIS) data, the Oakland, Berkeley/Alameda County Continuum of Care contains 2,032 total year-round beds, including 1,383 emergency shelter beds.

Emergency shelter for homeless individuals and families is permitted by right, without discretionary action, in eight areas throughout the City, subject to objective development and location standards, which are codified in the Oakland Planning Code Section 17.103. These areas are displayed in Figure F-2 below, and described in further detail below along with the HCD/TCAC Opportunity Area designation. Analysis of the currently designated areas for by right approval of emergency shelters shows that high-resource areas are underrepresented, and no higher resource areas overlap with the by right designated areas. To redress this, the Housing Action Plan (Chapter 4) includes actions under Policy 4.3 to provide greater opportunities for emergency shelters, including by providing for by right approval throughout the city when located on properties with religious institutions and similar community assembly civic activities (see Action 4.3.6).

- Segment 1 – the portion of Martin Luther King Jr. Way between 51st Street and the City of Oakland City Limits (Moderate and High Resource). This includes approximately 20 acres of land with parcels sizes averaging approximately 0.3 acres but ranging between 2,000 square feet to 7 acres. These parcels predominantly have existing uses. Portions of Segment 1 have public transportation through the Ashby and MacArthur BART Stations, and the entirety of the corridor is served by AC Transit. Segment 1 is designated in the Oakland General Plan for Mixed Use Residential, Urban Residential, and Neighborhood Commercial uses.

- Segment 2- the portion of San Pablo Boulevard between 53rd Street and the City of Oakland City Limits (Moderate Resource). This includes approximately 42 acres of land with parcel sizes averaging approximately 0.2 acres. City records have identified at least 11 vacant lots within Segment 2. Segment 2 is well served by public transportation through AC Transit lines 72, 72M, and 72R. Segment 2 is designated in the Oakland General Plan for Community Commercial and Neighborhood Commercial uses.

- Segment 3 – the portion of the area surrounding Webster Street bounded by 29th Street to the south, the I-580 overpass to the north, Elm Street to the west, and Webster Street to the east (Low Resource). This includes approximately 36 acres of land with parcel sizes averaging 0.4 acres. City records have identified at least 3 vacant lots within Segment 3. Segment 3 is well served by public transportation on Telegraph Avenue and Broadway provided by AC Transit. Segment 3 is designated in the Oakland General Plan for Institutional Uses and is zoned S-1 (Medical Center).

- Segment 4 – the portion of San Pablo Boulevard lying between Grand Avenue and I-580 (Low Resource). This includes approximately 34 acres of land with parcel sizes averaging 0.2 acres. City records have identified at least 33 vacant lots within Segment 4. Segment 4 is well served by public transportation through AC Transit lines 72, 72M, and 72R. Segment 4 is designated in the Oakland General Plan for Urban Residential and Community Commercial uses.

- Segment 5 – the area surrounding Third Street bounded by Martin Luther King Jr. Way to the east, Fifth Street to the north, Embarcadero West to the south, and Union Street to the west (mid of Low, Moderate, and High Resource). This includes approximately 80 acres of land with parcel sizes averaging 0.6 acres. City records have identified at least 19 vacant lots within Segment 5. Portions of Segment 5 is served by public transportation through the West Oakland BART station. Segment 5 is predominantly designated under the General Plan for Business Mix uses.

- Segment 6 – the portion of E. 12th Street between 14th Avenue and 23rd Avenue (High Segregation & Poverty). This includes approximately 37 acres of land with parcel sizes averaging 0.4 acres. City records have identified at least 14 vacant lots within Segment 6. Segment 6 is well served by public transportation through the AC Transit Tempo Bus Rapid Transit line. Segment 6 is predominantly designated under the General Plan for Business Mix uses.

- Segment 7 – the portion of MacArthur Boulevard between Fruitvale Avenue and High Street (Low and Moderate Resource). This includes approximately 68 acres of land with parcel sizes averaging 0.2 acres. City records have identified at least 121 vacant lots within Segment 7. Segment 7 is well served by multiple AC Transit lines, including the 54 line providing connections to Fruitvale BART. Segment 7 is designated in the Oakland General Plan for Neighborhood Commercial and Urban Residential uses.

- Segment 8 – the area of Coliseum Way bounded by San Leandro Street to the north, I-880 to the south, 66th Avenue to the east, and High Street to the west (Low Resource). This includes approximately 227 acres of land with parcel sizes averaging 1.1 acres. City records have identified at least 34 vacant lots within Segment 8. Portions of Segment 8 have limited public transportation options, either by walking to AC Transit options along San Leandro Street or by walking to the Coliseum BART station. Segment 8 is designated in the Oakland General Plan for General Industry and Transportation and Business Mix uses.

The City of Oakland has declared a local shelter crisis. For the duration of that declared emergency, emergency shelters are permitted by right with no discretionary approvals, including design review, on all properties owned or leased by the City that are designated by the City Administrator for use as temporary emergency housing sites. See Oakland Planning Code Section 17.07.060 for further details on implementation.

Additionally, emergency shelters are conditionally permitted in high-density residential zones and several commercial zones. Conditionally permitting alternative housing in all high-density residential zones and most commercial zones further increases housing opportunities and the feasibility of accommodating affordable housing in Oakland. Historically, the CUP process and conditions imposed have not created significant constraints to locating residential uses for special need groups in residential or commercial zones; rather it is the absence of a dependable source of funds for the social services agencies who provide these services which constrains the housing from being built. But in order to limit the possibilities that the permitting process would act as a constraint, the Housing Action Plan (Chapter 4) includes actions under Policy 4.3 to reduce this from a major conditional use permit requirement to a minor conditional use permit requirement, which means the permit would be issued at the staff level and appealable only to the Planning Commission.

Development of shelter facilities is further facilitated by a relaxation of parking standards well below those required for ordinary residential facilities, in recognition of the fact that most homeless persons do not have vehicles and thus a requirement for parking would be an unnecessary constraint. The City requires one parking space for each three employees on site during the shift that has maximum staffing, plus one space for each facility vehicle, consistent with requirements in AB 139.

Transitional, Supportive, and Semi-Transient Housing

The Oakland Planning Code defines transitional, supportive, and semi-transient housing as follows:

- **Transitional Housing:** includes housing configured as rental housing developments, but operated under program requirements that call for the termination of assistance and recirculation of the assisted unit to another eligible program recipient at some predetermined future point in time, which shall be no less than six (6) months from beginning of assistance. As noted in Tables F-4 through F-6, transitional housing is permitted as a use distinct from other permanent residential types and is permitted differently than other residential uses in some zoning districts. This will be corrected as part of the Housing Action Plan (Action 4.3.3).

- **Supportive Housing:** includes housing with (a) no limit on length of stay; (b) that is linked to an onsite or offsite service that assist the supportive housing resident in retaining the housing, improving his or her health status, and maximizing his or her ability to live and, when possible, work in the community; and (c) that is occupied by a target population (as defined in subdivision (g) of Government Code Section 65582). As noted in Tables F-4 through F-6, supportive housing is permitted as a use distinct from other permanent residential types and is permitted differently than other residential uses in some zoning districts. This will be corrected as part of the Housing Action Plan. Supportive housing is required under state law to be a use by right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses, if the proposed housing development satisfies the requirements listed in Government Code Section 65651. To date, the City of Oakland has received two development application utilizing this provision but anticipates receiving more in the future. At the time of publication of this document, one of the two applications—PLN22172—has been determined eligible for streamlining and now has an approved entitlement for 40 lower income supportive housing units; the other—PLN22168—is assigned and undergoing review. The Housing Action Plan will include an action to redefine Supportive Housing to clarify that projects that meet the requirements of Government Code Section 65651 will be permitted by right without discretionary review (Action 4.3.3).

- **Semi-Transient Housing:** include the occupancy of living accommodations partly on a 30 days or longer basis and partly for a shorter time period, but with less than 30 percent of the living units under the same ownership or management on the same lot being occupied on a less-than-thirty-days basis; but exclude institutional living arrangements involving the provision of a special kind of care or forced residence, such as in nursing homes, orphanages, asylums, and prisons.

Low Barrier Navigation Centers

Recent State law, including AB 101, requires that low barrier navigation centers for persons experiencing homelessness be allowed by right and without any discretionary approval within the local jurisdiction. Currently, the City does not provide a definition for "low barrier navigation centers" nor does it provide specific regulations for the development of these facilities. The City will address this as part of the Housing Action Plan (see Action 4.3.5: Provide development standards for Low Barrier Navigation Centers).

Figure F-2: Approved Locations for Permitting Emergency Shelters By-Right, 2022

Source: City of Oakland, 2022

Single Room Occupancy (SRO)

Single-room occupancy units (SROs)—called Residential Hotels in the Oakland Planning Code—are defined in accordance with California Health and Safety Code Section 50519, and refer to any building built before 1960 containing six or more rooming units, intended or designed to be used, or which are used, rented, or hired out, to be occupied, or which are occupied, for sleeping purposes by guests, which is also the primary residence of those guests, and where the entrances to the individual units are generally accessed via a shared lobby area.

SROs are an essential component of the city's supply of naturally occurring affordable housing, as they are a flexible and easily accessible form of housing that provides very-low-, and extremely-low-income residents the ability to remain in Oakland and avoid homelessness. To that end, on December 4, 2018, the Oakland City Council adopted new Planning Code Chapter 17.153, which regulates the conversion, demolition, rehabilitation, and sale of Residential Hotels to protect this important type of housing. The purpose of the chapter is to benefit the general public by minimizing the adverse impact on the housing supply and on displaced very-low- and extremely-low-income, elderly, and disabled persons, which results from the loss of SRO units as a naturally occurring affordable housing option. The ordinance has established a process for identifying and preparing a registry of known existing Residential Hotel Units, and regulates the demolition, conversion and rehabilitation of Residential Hotel Units.

The City has been able to successfully implement the ordinance following adoption. The Planning Bureau has largely gone through the process of confirming the status of individual properties as residential hotels, and has flagged all properties in the Accela permitting system. If the Planning & Building Department receives an application for renovations or other projects pertaining to these properties, the application is routed to appropriate Planning staff. Staff can then review the residential hotel certificate of status for the property and compare it to the proposal to see if it proposes any amenity rehabilitation that is prohibited under the ordinance, or whether it would require a CUP meeting the requirements under Planning Code Chapter 17.153 to provide equivalent low-income housing. There have not been any CUPs issued or sought under Chapter 17.153, which means that residential hotels have been successfully preserved in their status quo. There have been some applications for amenity rehabilitation, often in buildings that have been vacant for 10 or more years.

Efficiency Dwelling Units and Rooming Units

Efficiency Dwelling Units are defined in the Oakland Planning Code as studio units, with kitchens, under 400 square feet. Rooming units are defined as units without kitchens, such as those commonly found in SROs. Both are a smaller unit formats, which typically cost less to build and are likely to be provided at a lower cost.

Efficiency dwelling units can be constructed in all zoning districts in which multifamily housing is permitted as either part of, or the entirety of, multifamily developments. Efficiency

units can be constructed at higher density, often at twice the density, than otherwise provided for larger format dwelling units.

As with efficiency dwelling units, rooming units are permitted to be constructed at densities significantly higher, often twice as dense, than the density provided for larger format dwelling units. However, rooming units are only permitted as part of rooming house facilities, a separate residential facility designation. Rooming units currently cannot be included in multifamily dwelling residential facilities. As shown in Table F-4, rooming house facilities are permitted and conditionally permitted in a wide variety of zoning districts similar to multifamily dwelling facilities. But in contrast to multifamily dwelling facilities, rooming houses are not permitted in RM, RU-1, S-15, D-WS, D-CO, D-OK zoning districts and are conditionally permitted rather than permitted in RU-2, RU-3, S-15W, zoning districts. The Housing Action Plan includes an action (Action 3.7.6) that would expand districts in which rooming house facilities may be constructed in order to reduce constraints on construction of rooming units, and additionally proposes actions to address an unaddressed need for "intentional community" housing types.

Farmworker and Employee Housing

Farmworkers, people whose primary income comes from permanent or seasonal agricultural labor, are considered to have special housing needs due to their limited income and unstable nature of employment. As discussed in Appendix B, farming is not a major industry in Oakland with only 0.5 percent of Oakland's labor force employed in the "agriculture, forestry, fishing and hunting" industry in 2019. The city is located in a highly urbanized area with no working farms within or adjacent to city limits. Oakland's stock of affordable housing is available to any farmworkers that may reside in the city. Since all affordable housing units are available to farmworkers in Oakland, it is not necessary for the City to establish a specific program or funding for farmworker housing.

Farm and agricultural employee housing is a type of employee housing under the Employee Housing Act, California Health and Safety Code Sections 17000 et seq. Section 17021.5 of the Employee Housing Act requires that any employee housing providing accommodations for six or fewer employees shall be deemed a single-family structure with a residential land use designation, and not be subject to any conditional use permit, zoning variance, or other zoning clearance that is not required of a family dwelling of the same type in the same zone. The Oakland Planning Code's definitions of "family" and "dwelling unit" in Section 17.09.040 do not restrict households to related members of a family or place a limitation on size of a household, but it does not explicitly state that this employee housing type would be treated the same as a single-family structure. The Housing Action Plan (Chapter 4) contains a program to amend the zoning code definitions to provide greater clarity that employee housing for six or fewer employees is treated the same as a single-family structure. The program will also include amendments to ensure the City of Oakland complies with Section 17021.6 of the Employee Housing Act, which require employee housing consisting of no more than 36 beds in a group quarters or 12 units designed for use by a single family or household to be deemed an agricultural land use.

PERMITS AND PROCESSING PROCEDURES

Residential Permit Processing

Housing development can be constrained by long permit processing timelines, which can create uncertainty, increase overall project costs, and ultimately make a project infeasible. A ministerial approval provides the shortest timeline, while a discretionary approval, particularly those with review in front of several adjudicatory bodies, can significantly add to the time required. The necessary approval process depends on several factors, including the applicable zoning district, the project type, size, and complexity, and the degree to which the project is seeking modifications to the applicable development standards such as through variances, conditional use permits, rezoning, or general plan amendments. This section explores the typical process for a development application in Oakland, including when discretionary approval is required.

The City of Oakland administers the permit process through the Planning and Building Department. Basic steps that are typically required in the approval process include the following:

- **Pre-Application Meeting.** Proposals that involve multiple permit approvals or complex design considerations is typically initiated through a voluntary pre-application review process. The Pre-Application meeting involves the review of preliminary plans and photographs of a proposed project. At this time, staff will evaluate the proposal, review compliance with the General Plan and Planning Code, determine appropriate applications and fees, offer comments on the proposal to meet the General Plan objectives and Planning Code development standards, identify related non-planning issues, and describe the permit process and timeline.

- **Application for Development Review.** The Basic Application for Development Review is an application form filed to accompany all zoning permit applications, and is submitted along with site plans and/or other data to the Planning and Building Department. Significant discretionary actions are the subject of a public hearing before one of several hearing bodies, depending on the specific action.

- **Supplemental Planning Forms.** Most project applications require supplemental forms including findings for Conditional Use Permits (CUPs), design review, and variances.

- **Environmental Review.** Pursuant to the California Environmental Quality Act, projects are required to undergo environmental review to identify significant environmental impacts. Infill development consistent with the General Plan and zoning requirements may be exempt from such review. Depending on project size, environmental review typically takes between 6 and 9 months for projects consistent with the Oakland General Plan and between 12 and 36 months for more complex projects.

The time required to process an application depends primarily on the permit type, size, and complexity of the project and the number of approvals required. Typical timelines for common applications, as well as the relevant approval body, are provided below in Table F-17.

Permit applications for affordable housing developments, as with other multifamily projects, are "deemed complete" within 30 days of submittal. Generally, the City streamlines processes for the issuance of zoning and building permits for affordable housing projects. The City prioritizes affordable housing development during the entitlement process, and actively works with affordable housing developments to ensure that projects can smoothly go through the entire approval process. However, there is limited staff capacity to review projects which can increase the time required for permit approval. Affordable housing developers have emphasized the need for permit streamlining, approving projects by right, reducing permitting costs, and facilitating development on smaller sites.

Table F-17: Application Processing Times, 2022

Application Type	*Approval Body*	*Typical Processing Time*[1]
Residential Design Review	Director of City Planning	9 months
Tentative Parcel Map	Director of City Planning	9-12 months
Parcel Map	City Engineer	5-9 months
Tentative Subdivision Map	Planning Commission	12 months
Major Conditional Use Permit	Planning Commission	9-12 months
Minor Conditional Use Permit	Director of City Planning	9 months
Planned Unit Development	Planning Commission	2 years
Development Agreement	Planning Commission & City Council	3 years
Variance—Major	Planning Commission	9-12 months
Variance—Minor	Director of City Planning	9 months
General Plan Amendment	Planning Commission & City Council	2-3 years
Rezone	Planning Commission & City Council	2-3 years

1. Does not include appeals.

Source: City of Oakland, 2022

Depending on project type and applicable zoning, a project application may be subject to discretionary review. As noted in Table F-4, single-family dwellings are permitted by right in almost every residential zoning district. Two-family dwellings require a CUP in the RD-2 and RM-1 districts, while multifamily dwellings require a CUP in the RM-2 and RM-3 districts. The most common forms of discretionary review and the general ministerial review process are described in further detail below.

Ministerial Review

Projects subject to ministerial review are permitted by right, meaning development approvals require little or no personal judgement by a public official and are granted through

reference to objective standards. Although there are a variety of zoning districts in Oakland that permit multifamily development without a conditional use permit, most residential developments are subject to design review – a discretionary process discussed further below. Projects that are currently subject to by-right review that is not subject to CEQA are limited to ADUs, affordable housing and supportive housing streamlining projects (SB 35 and AB 2162), and SB 9 lot splits. Efforts to expand by-right procedures, including for Low Barrier Navigation Centers and affordable developments, are provided in the Housing Action Plan.

Affordable housing developments under Government Code Section 65913.4, commonly referred to as an SB 35 project, are subject to streamlined, ministerial approval. The City processed its first SB 35 affordable housing application in 2018. The City maintains and regularly updates an SB 35 streamlining checklist on its website.[15] Prior to submitting an application for streamlined ministerial approval under SB 35, an applicant must first submit a notice of intent pre-application to the City, which commences the tribal scoping consultation process in accordance with AB 168. Only when the tribal scoping consultation is completed may an applicant submit an application for streamlined ministerial approval. Approvals must be completed within 90 days of submittal (for proposed projects involving 150 or fewer units) or 180 days of submittal (for proposed projects containing more than 150 housing units). As ministerial approvals, these projects are not subject to CEQA under CEQA Guidelines Section 15268.

Design Review

On December 19, 2006, the Oakland City Council adopted design review-related amendments to the Oakland Planning Code (Title 17). The design review framework reduces the number of different review procedures and uniformly applies those procedures citywide. Design review is intended to address the compatibility of new construction and additions with surrounding development and preserve the architectural quality of Oakland's housing stock. There are two types of residential design review processes – regular design review and small project design review (SPDR). Historic properties and landmarks may be subject to additional regulations. Applications for design review are processed concurrently with other planning permits.

Regular design review is required for the construction of all new dwelling units, except for accessory dwelling units (ADUs), projects streamlined under state law such as SB 35 and AB 2162, and those deemed exempt pursuant to Oakland Planning Code Section 17.136.025. Regular design review is a full review process that involves notification to all owners of property within 300 feet of the proposed project. The decision on a regular design review application can be appealed to the City Planning Commission or its Residential Appeals Committee. Projects are reviewed against a set of adopted residential design criteria as well as special design review findings of the individual zoning districts.

Regular design review applicants may submit for pre-application review, and may be requested to do so if the project is of a larger scale or involves a significant policy issue. As

[15] https://cao-94612.s3.amazonaws.com/documents/2021-New-Construction-NOFA-SB-35-Streamlining-Checklist-PDF.pdf

noted in Table F-17, residential design review is considered by the Director of City Planning. Residential design review approval may be granted only if the proposal conforms to all of the following general design review criteria, as well as to any and all other applicable design review criteria:

1. That the proposed design will create a building or set of buildings that are well related to the surrounding area in their setting, scale, bulk, height, materials, and textures;

2. That the proposed design will protect, preserve, or enhance desirable neighborhood characteristics;

3. That the proposed design will be sensitive to the topography and landscape;

4. That, if situated on a hill, the design and massing of the proposed building relates to the grade of the hill; and

5. That the proposed design conforms in all significant respects with the Oakland General Plan and with any applicable design review guidelines or criteria, district plan, or development control map which have been adopted by the Planning Commission or City Council.

Application of these design review criteria can impact project cost and timing, and lead to applicant uncertainty about the project review process. As a result, the design review criteria can act as a constraint on housing construction. When evaluating projects for compliance with these criteria, Planning staff utilizes published design guidelines that include both objective and subjective criteria. Applicants are also often required to include photographs of adjacent properties to document the neighborhood context. Relying on both the design guidelines and an analysis of neighborhood context, Planning staff may request design changes to the project to meet the design review criteria. Addressing these comments can extend the approval process by requiring additional rounds of review and revisions to the project to meet the design review criteria. Depending on the project's context and an applicant's resources to make requested revisions, the design review process can add anywhere from weeks, to several months, to a year to the review process. For more complex projects, review of a project's compliance with the design review criteria is provided both at the staff level and through input from members of the Oakland Planning Commission Design Review Committee and other applicable boards. This might result in several rounds of revision and review, resulting in additional impacts to project cost and timing. To address this constraint, the Housing Action Plan proposes Action 3.4.7, the creation and implementation of objective design standards available to all housing development projects. Projects utilizing objective design standards will not be required to independently make findings of compliance with the regular design review criteria.

SPDR applies to all additions citywide of more than 10 percent, but not more than 1,000 square feet or 100 percent of the total floor area or footprint on site, whichever is less. There are three tracks for SPDR approval – based on whether a proposal involves a local register property and the size of an upper-story addition. SPDR was designed to have a quicker turnaround time than other types of zoning permits, including regular design review. A final

decision on an application is usually made at the zoning counter, unless the proposal involves an upper-story addition of more than 250 square feet. For SPDR proposals involving an upper-story addition of more than 250 square feet, applicants are required to provide public notice of the project by displaying a large notice poster at the project site and by mailing notice along with a copy of the plans to all adjacent neighbors and properties directly across the street. There is no appeal of the SPDR decision, and approval shall be granted to applications that meet the following criteria:

1. That for Nonresidential Facilities and the nonresidential portions of Mixed-Use Development projects, the proposed design conforms with the adopted checklist criteria for nonresidential facilities, as may be amended;

2. That for Residential Facilities with one or two primary dwelling units and the residential portions of Mixed-Use Development projects with one or two primary dwelling units, the proposed design conforms with the adopted checklist criteria for facilities with one to two primary dwelling units, as may be amended;

3. That for Residential Facilities with three or more living units and the residential portions of Mixed-Use Development projects with three or more dwelling units, the proposed design conforms with the adopted checklist criteria for facilities with three or more living units, as may be amended; and

4. That for Local Register Properties, the proposed project will not substantially impair the visual, architectural, or historic value of the affected site or facility.

Projects that involve designated historic properties are reviewed by the Landmarks Preservation Advisory Board. Design review of these properties is conducted concurrently with one of the design review procedures described above.

Design review can increase the approval timeline of a project significantly, especially when approval criteria are subjective. In Oakland, case by case design review of single-family homes and single-family home additions can create a bottleneck in the permitting process and diverts resources from other planning efforts. Further, State law requires that jurisdictions review new multifamily and residential mixed-use developments ministerially against objective standards. The City has already started a process to develop new procedures, regulations, and objective design and development standards to streamline the approval of housing. These standards will have a particular focus on much-needed affordable housing projects in transit-rich areas. This effort is described further as part of the Housing Action Plan.

Historic Preservation

Oakland has a program for officially designating select landmarks and preservation districts, based on a set of a graduated system of ratings, designation programs, regulations, and incentives proportioned to each property's importance as established in the Historic Preservation Element. Landmarks and preservation districts—also referred to as S-7 and S-20 Zones—are nominated by owners, the City, or the public and are designated after public

hearings by the Landmarks Board, Planning Commission, and City Council. Since the program began in 1973, about 140 individual landmarks have been designated, out of nearly 100,000 buildings in Oakland. There are currently nine designated preservation districts containing about 1,500 buildings. They include Preservation Park, Old Oakland-Victorian Row, and the Bellevue-Staten Apartment District along Lake Merritt in Adams Point, and Sheffield Village. Also included are Oak Center Historic District and 7th Street Commercial District in West Oakland.

The Landmarks Preservation Advisory Board or its staff reviews changes to any designated properties. The Board also advises on projects involving other historic properties. Design review for any modifications to these structures is conducted concurrently with the regular project review but may need to take into account the Board's monthly meeting schedule. A project that respects the historic character of the resource (e.g., by following the Secretary of the Interior's Standards for Rehabilitation) will have a faster and smoother review process. Design review fees are waived for Designated Historic Properties.

CEQA requires review of impacts on major historic resources. Demolition of a CEQA-level historic resource requires the preparation of an environmental impact review document. The City's requirements are consistent with State law. Many housing development projects use federal funds and require Section 106/National Historical Preservation Act review to avoid adverse effects on historic resources.

Conditional Use Permits (CUPs)

The Planning Code allows two types of uses in each zoning district: permitted and conditional uses. CUPs help ensure the proper integration of uses and neighborhood compatibility and give the City flexibility if special conditions of approval are required. An application for a major CUP is considered by the Planning Commission at a noticed public hearing, while a minor CUP is subject to approval by the Director of City Planning. Minor CUP decisions can be appealed to the Planning Commission, while major CUP decisions can be appealed to the City Council. For a major CUP, the Commission decides whether the proposal is consistent with general use permit criteria, and has the authority to grant or deny the application. In order to grant a use permit, pursuant to Planning Code Section 17.134.050, the Planning Commission must make the following findings:

- That the location, size, design, and operating characteristics of the proposed development will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding neighborhood, with consideration to be given to harmony in scale, bulk, coverage, and density; to the availability of civic facilities and utilities; to harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and the capacity of surrounding streets; and to any other relevant impact of the development;

- That the location, design, and site planning of the proposed development will provide a convenient and functional living, working, shopping, or civic environment, and will be as attractive as the nature of the use and its location and setting warrant;

- That the proposed development will enhance the successful operation of the surrounding area in its basic community functions, or will provide an essential service to the community or region;

- That the proposal conforms to all applicable regular design review criteria set forth in the regular design review procedure at Section 17.136.050;

- That the proposal conforms in all significant respects with the Oakland General Plan and with any other applicable guidelines or criteria, district plan or development control map which has been adopted by the Planning Commission or City Council; and

- For proposals involving a One- or Two-Family Residential Facility: If the CUP concerns a regulation governing maximum height, minimum yards, maximum lot coverage, or maximum FAR, the proposal also conforms with at least one of the following additional criteria:

  - The proposal when viewed in its entirety will not adversely impact abutting residences to the side, rear, or directly across the street with respect to solar access, view blockage and privacy to a degree greater than that which would be possible if the residence were built according to the applicable regulation, and, for CUPs that allow height increases, the proposal provides detailing, articulation or other design treatments that mitigate any bulk created by the additional height; or
  - At least sixty percent (60%) of the lots in the immediate context are already developed and the proposal would not exceed the corresponding as-built condition on these lots, and, for CUPs that allow height increases, the proposal provides detailing, articulation or other design treatments that mitigate any bulk created by the additional height. The immediate context shall consist of the five (5) closest lots on each side of the project site plus the ten (10) closest lots on the opposite side of the street (see illustration I-4b); however, the Director of City Planning may make an alternative determination of immediate context based on specific site conditions. Such determination shall be in writing and included as part of any decision on any CUP.

As noted previously, most residential projects do not require a CUP in residential zoning districts. The requirement of a CUP for multifamily dwellings in the RM-2 and RM-3 districts, both of which permit small multifamily developments, is an identified constraint. The criteria for approval of a CUP in these districts is relatively subjective, which may especially prove a hinderance to affordable housing projects. Further, a CUP in the RM-3 district may only be granted upon determination that the proposal conforms to additional criteria involving impacts on the adjoining property and surrounding neighborhood, which include privacy, safety, and residential amenity considerations. The current CUP requirements for density in the RD and RM residential zoning districts pose a constraints for new housing development, and will be eliminated as part of the proposed code amendments.

Planned Unit Development (PUD)

The planned unit development (PUD) procedure encourages design flexibility and offers varying special bonuses for worthwhile projects. This process is used to review a large

integrated development that is appropriately designed for a single tract of land or contiguous parcels when there is one common owner.

PUDs require a development plan, which is considered for approval by the Planning Commission at a noticed public hearing. Commission findings are based on requirements set forth in Planning Code Section 17.140.080 and PUD regulations established in Planning Code Chapter 17.142. Applicants can appeal a Commission decision to the City Council within 10 calendar days. The PUD process applies to all rezone proposals, changes to the text of the Subdivision Ordinance, revisions to development control maps, or proposals affecting designated landmark or landmark sites.

Development Agreement

An application for a Development Agreement is heard by the City Planning Commission at a noticed public hearing. The Commission forwards its recommendations to the City Council. The City Council reviews the recommendation of the Planning Commission and may approve or disapprove the proposed Development Agreement or approve it with changes and/or conditions. The decision of the Council is final.

Environmental Review

Discretionary review of development projects, including residential development projects, are subject to CEQA. In general, CEQA requires the City to consider the potential environmental impacts of a development before approving the project. The process is intended to inform decisionmakers and the public about potential environmental impacts of proposed activities, and to identify ways to avoid or reduce those impacts. Projects that are required to prepare a comprehensive environmental evaluation, known as an Environmental Impact Report (EIR), experience a prolonged approval time. Further, the potential for appeals of project under CEQA, and even CEQA lawsuits, create additional uncertainty for residential projects.

To the greatest extent possible, Oakland utilizes applicable categorical exemptions and streamlining provisions of CEQA for infill development projects that are consistent with existing land use general plan standards. Oakland has developed several specific plans, described above, and have prepared environmental impact reports for those plans that can be relied upon for residential projects that are proposed within the specific plan area. Categorical exemptions are available for the classes of projects generally considered not to have potential for impacts on the environment and are provided in CEQA Guidelines Sections 15300-15333. However, categorical exemptions are not available for projects when the project is located in a particularly sensitive environment, the cumulative impact of successive projects of the same time in the same place over time is significant, the project is located on a hazardous waste site, the project may cause a substantial adverse change in the significance of a historical resource, or where there is a reasonable possibility that the project will have significant effects on the environment due to other unusual circumstances.

Building Permits

The time between entitlement and applying for a building permit generally depends on the size of a project. Typically, this timeline is six months for a one- to four-unit project, nine

months for a five- to 99-unit project, and one year for a project over 100 units. A review of residential projects that received planning approvals between January 2018 and January 2022 shows that building permits for those projects were approved on average about 279 days after receiving the planning approval. Multifamily and single-family projects had similar timelines – 286 days and 260 days, respectively. Affordable projects had significantly longer timelines compared to market-rate projects (941 days and 251 days, respectively), which reflects both the length of time required to secure financing and the complexity associated with the generally higher-density nature of such projects in Oakland.

As discussed above, there are multiple steps involved in the building permit approval process, including Plan Check and Fire Prevention Bureau review. Review times vary depending on the complexity of the project. Developers can check their permit status on the City's Online Permit Center.[16] Average permit processing turnaround times are provided in Table F-18 below.

[16] https://aca-prod.accela.com/OAKLAND/Default.aspx

Table F-18: Average Permit Processing Turnaround Times, 2022

Permit/Review Type	*Typical Processing Time*
Planning and Zoning Counter Review[1]	2 weeks
Over the Counter (OTC) Permits[2]	2-3 weeks
Permits with assigned Plan Check	Up to 8 weeks
Windows, Kitchen/Bath Remodels[3]	Up to 5 days for review
Mechanical, Electrical, or Plumbing Permits (MEPs)	Up to 5 days for review
Solar Energy Systems	Up to 10 days for review
ADUs with assigned Plan Check	Up to 3 weeks for creation and submittal review
Final Plan Check[4]	5-7 weeks
Issuance of Permit[5]	Up to 5 days

1. Processing times apply to the creation and review for most application types (DRX, ZC, DET, DS).
2. OTC Permits that require Plan Check take up to 7 weeks.
3. No wall change, water heater replacement, and no Plan Check required (requires no appointments).
4. After Plan Check approval.
5. Once payment is received, final plan check is completed, signed declarations have been returned, and fire and construction and recycling is completed.

Consistency with the Housing Accountability Act

The California Housing Accountability Act was enacted in 1982 with the goal of "meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects." The Act has been amended in recent years with the goal of clarifying its requirements, achieving broader compliance and imposing greater consequences for noncompliance. Among the new requirements is that the City review completed housing applications for consistency with applicable objective development standards within 30 days after an application for a discretionary action has been deemed complete if the proposed project has less than 150 units, or within 60 days if the project has more than 150 units. If the City does not provide an applicant with written documentation explaining how the project is inconsistent with objective standards, then the project is deemed consistent with that requirement. The City has incorporated this practice into its project review.

Consistency with the Housing Crisis Act

The Housing Crisis Act of 2019 amended existing State planning and zoning laws with the objectives of increasing housing production of housing, preserving existing units, and protecting current tenants. Oakland has taken a number of steps to implement SB 330. First, Oakland Planning has created a Vesting Preliminary Application form to implement the Vesting Preliminary Application process, a State-mandated application process available to all housing development projects intended to provide certainty to an applicant by locking in the development requirements, standards, and fees applicable to a project at the time a Vesting Preliminary Application is submitted. Second, Oakland Planning has updated its Basic

Application for Development Review to require that applicants include information regarding existing tenants and protected units at the site proposed for development and to include supporting documentation. Satisfaction of the replacement unit and obligations is implemented through City of Oakland Standard Conditions of Approval in a manner substantially similar to the condition imposed on density bonus projects. Finally, Planning has created a standard operating procedure bulletin providing staff with background on the additional requirements newly created under the Housing Crisis Act to ensure consistency in implementation.

Typical Residential Densities

Pursuant to State law, jurisdictions must assess requests to develop housing at lower than anticipated densities. Based on the survey of recently approved projects between 2018 and 2021 included in Appendix C, most projects in Oakland develop near or above the maximum permitted density. On average, projects that received a building permit during this period developed at 92.7 percent of permitted density by zone and building height area. Further, projects that received planning approvals but have not yet developed were approved to develop at 215.9 percent of permitted density by zone and building height area – largely due to the use of density bonus provisions.

PERMIT AND DEVELOPMENT FEES

The City of Oakland and other public agencies charge a number of planning, building, and engineering fees to cover the cost of processing development requests and providing public facilities and services to new development. Payment of these fees can have an impact on the cost of housing, particularly affordable housing. Fees are limited by State law, which requires that "a public agency may not charge applicants a fee that exceeds the amount reasonably necessary" to provide basic permit processing services (California Government Code Sec. 65943 (e)).

Typical Fees

On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. Fees for water and sewer services are charged by the East Bay Municipal Utility District (EBMUD). Although the City has no direct responsibility for the fees or services provided, Oakland does work with EBMUD on its development review processes to ensure that fees are reasonable, are related to the impacts created by new development, and that new development can be served by EBMUD.

Three example developments are used in Table F-19 to illustrate the total cost of fees for planning, building and infrastructure. The market value for these developments is derived from the applicable Zillow Home Value Index (ZHVI) as discussed in Appendix B, and all units are assumed to be market rate. These example developments are defined as follows:

- Single-family: One 1,850 square-foot, three-bedroom, two-bath, and two-story home with one parking space and an assumed market value of $966,329.

- Small Multifamily: A five-unit, 4,250 square-foot, and two-story development with two parking spaces and an assumed total market value of $2,867,505; each unit is assumed to be an 850 square-foot, one-bedroom, and one-bath dwelling unit with an assumed market value of $573,501.

- Large Multifamily: A 40-unit, 34,000 square-foot, and five-story development with 22 parking spaces and an assumed total market value of $22,940,040; each unit is assumed to be an 850 square-foot, one-bedroom, and one-bath dwelling unit with an assumed market value of $573,501.

Table F-19 below summarizes the major local costs that a developer would have to bear in undertaking a new residential development in Oakland. It should be noted that this is not a comprehensive list of all fees, but rather a reflection of fees that are typically required.

Depending on the Impact Fee Zone, typical fees for a single-family project would be between $95,927 to $114,881 including utility service charges. Typical fees (including utilities) for a large multifamily project would be between $2,319,365 to $2,782,685, or $57,984 to $69,567 per unit. For a small multifamily project, these fees would be between $345,033 to $402,948, or $69,007 to $80,590 per unit.

Table F-19: Typical Permit and Development Fees, 2022

Fee Type	*Single-Family*[1]	*Small Multifamily*[1]	*Large Multifamily*[1]
Building Plan Check, Permit, and Inspection Fees			
Inspection Fee	$7,582	$19,406	$144,260
Plan Check Routed	$9,477	$24,257	$180,325
General Plan Update	$5,798	$17,205	$137,640
SMIP	$271	$803	$6,423
Process Coordination	$227	$582	$4,328
Zoning Conditions	$1,855	$6,890	$17,640
Zoning Inspections	$1,180	$3,251	$10,000
Site Plan Review; Parking Review; Site Monitoring	$1,645	$1,645	$1,915
Certificate of Occupancy	$762	$762	$762
Address Fee	$53	$53	$53
Bedroom Tax (OA -08721)	$300	$500	$4,000
Application Fee	$76	$76	$76
Field Check	$218	$218	$218
CBSC	$38	$114	$917
Plumbing Inspections	$1,137	$2,911	$21,639
Electrical Inspections	$1,137	$2,911	$21,639
Mechanical Inspections	$1,137	$2,911	$21,639
Infrastructure, Impact, and District Fees			
City Impact Fee—Records Management & Technology Enhancement 14.75%	$5,965	$15,021	$105,048
City Impact Fee—Affordable Housing[2]	$8,424 – $24,219	$63,180 – $115,830	$505,440 – $926,640
City Impact Fee—Capital Improvement[2]	$1,053 – $4,212	$1,315 – $6,580	$10,520 – $52,640
City Impact Fee—Transportation	$1,053	$3,950	$31,600
City Impact Fee—School Tax (School Tax 97% + School Tax City 3%)	$6,438	$17,340	$118,320
City Sewer Laterals—New Building Connection including tap inspection	$1,043	$1,043	$1,043

EBMUD—Installation Fee[3]	$14,898	$74,490	$595,920
EBMUD—System Capacity Charge[3]	$21,250	$73,900	$295,600
EBMUD—Wastewater Capacity Fee[3]	$2,850	$10,000	$80,000
EBMUD—Account Fee[3]	$60	$300	$2,400
Total Project Fees	**$95,927 – $114,881**	**$345,033 – $402,948**	**$2,319,365 – $2,782,685**
Total Fees per Unit	**$95,927 – $114,881**	**$69,007 – $80,690**	**$57,583 – $69,166**

1. Fees are rounded to the nearest dollar.

2. Total fees depend on which Impact Fee Zone the project is located in.

3. Assumes a paved 1-1/2" lateral, calculated for Principal Region 1. One meter per unit, and fees are per unit.

Source: City of Oakland, Master Fee Schedule and Fee Estimator with Impact Fees, January 2022; EBMUD, Water and Wastewater System Schedules of Rates and Charges, Capacity Charges and Other Fees, July 2021

Assessment of City Fees

See Table F-20 for a comparison of typical planning and impact fees between Oakland and other Bay Area cities, including Berkeley, Emeryville, Richmond, San Francisco, and San Jose.[17] The project types assessed are equivalent to those assumed for Table F-19 above. Utilities and environmental review costs are not considered in this comparison. It should be noted that the estimates provided in Table F-20 do not provide a comprehensive overview of all fees but rather a comparison of typical fees.

Table F-20: Bay Area Residential Fees, 2021

City	*Typical Single-Family*		*Typical Small Multifamily*		*Typical Large Multifamily*	
	Total Project	*Fees per Unit*	*Total Project*	*Fees per Unit*	*Total Project*	*Fees per Unit*
Oakland[1]	$64,782	$64,782	$210,453	$21,045	$1,570,564	$39,264
Berkeley[2]	$85,078	$85,078	$531,787	$53,179	$2,663,761	$66,594
Emeryville[3]	$38,766	$38,766	$459,138	$45,914	$2,191,520	$54,788
Richmond[4]	$79,474	$79,474	$246,449	$24,645	$1,702,559	$42,564
San Francisco[5]	$32,122	$32,122	$268,271	$26,827	$2,983,884	$74,597
San Jose[6]	$67,291	$67,291	$257,428	$25,743	$2,487,047	$62,176

1. Does not include utilities (i.e., EBMUD and sewer fees) and assumes the average fee across the three Impact Zones.
2. Includes the following fees: Permit Fee, Plan Check Fee, Fire Plan Check Fee, Title 24 Disabled Access Fee, Title 24 Energy Compliance Fee, Community Planning Fee, Sustainable Development Fee, Technology Enhancement Fee, Building Standards Fee, Strong Motion Instrumentation Fee, Filing Fee, Affordable Housing Mitigation Fee.
3. Includes the following fees: Building Permit, General Plan Maintenance, Technology Fee, Plan Check, Energy Conservation, Electrical/Plumbing/Mechanical Permits, SMIP, School Fees, CBSC Fees, Impact Fees (Affordable Housing, Park and Recreation Facility, and Transportation Facility).
4. Includes the following fees: Inclusionary Housing Fee (In-Lieu Fee), Park Land Dedication Fee, STMP Fee, CBSC Fee, SMIP Fee, Public Art Fee, Residential Rental Dwelling Unit Inspection and Maintenance Fee, Code Compliance Inspection Fee, Building Permit Fees – Filing, Building Permit Tech Fee, Building Permit, Comprehensive Planning Fee, Plan Check, Electrical Permit Fees, Plumbing Permit Fees, Mechanical Permit Fees.
5. Includes the following fees: Building Permit Planning Review, Preliminary Project Assessment, Pre-Application Meeting, Transportation Demand Management (TDM) Program, Inclusionary Affordable Housing Fee, Child Care Fee, School Impact Fee, Transportation Sustainability Fee (TSF).
6. Includes the following fees: Residential Site or Planned Development Permit or Amendment, Planning Permit Conformance, Zoning and Use Conformance, Plot Plan Review, Single-Family House Permits, Building Permit Fees, Electrical/Plumbing/Mechanical Permit Fees, Commercial/Residential/Mobile Home Park Construction Tax, Building

[17] Comparison fees are based on Oakland's July 2021 Master Fee Schedule—which differs from estimates provided in Table F-19—to provide a more accurate comparison across jurisdictions.

and Structure Construction Tax, Residential Construction Tax, Construction Tax, SMIPA, BSARF, Inclusionary Housing Ordinance (IHO).

Source: City of Oakland, Master Fee Schedule and Fee Estimator with Impact Fees, July 2021; City of Berkeley, Building Permit Fee Estimator, 2022 and Affordable Housing Mitigation Fee Ordinance, October 2020; City of Emeryville, Master Fee Schedule, July 2021 and Development Impact Fees, FY 2020-2021; City of Richmond, Master Fee Schedule, July 2020; City of San Francisco, Development Impact Fee Register, December 2021 and Planning Department Fee Schedule, August 2021; City of San Jose, Planning Application Filing Fee Schedule, August 2021, Building and Structure Permits Fee Schedule, August 2021, and Inclusionary Housing Ordinance Schedule of Fees, April 2021

Oakland fees are comparable to those of neighboring jurisdictions, and for typical small and large multifamily development, the lowest of the neighboring or larger regional cities, as shown Table F-20. In Oakland, ADUs and affordable housing projects are exempt from Affordable Housing Impact Fees and the Capital Improvements Impact Fee, while ADUs are also exempt from the Transportation Impact Fee. The City provides financial assistance to affordable housing projects by paying fees from one or more housing fund sources, such as Community Development Block Grant (CDBG) funds or HOME program funds. Permit and other development fees are eligible costs that can be funded through these sources.

Cumulative Analysis

A number of the City's land use policies and regulations currently present barriers to developing housing units affordable to people with lower incomes. As described above, Oakland's residential land is currently zoned to maintain single-family development. Housing Action Plan action 3.2.1 encourage "missing middle" housing types and zoning standards for two, three, and four units on parcels in these single family zones. Action 3.4.1 revises development standards to allow for increased height and densities in transit-proximate and resource-rich areas, and Action 3.4.3 revises conditional use permit requirements to permit multi-unit buildings by-right in RD and RM zones. Other revised standards, such as parking (action 3.4.4), open space (action 3.4.5) further reduce constraints.

See Appendix J for more information on these zoning actions. It is expected that these changes will help address land use policy and regulation constraints that currently limit affordable housing production and promote more integrated neighborhoods.

TRANSPARENCY IN DEVELOPMENT REGULATIONS

Under State Government Code Section 65940.1, the City is obligated to provide transparency in publicizing land use controls and fees. The City's website provides a variety of resources to assist interested parties in navigating the development process. Planning and building permit fees, including the Master Fee Schedule, as well as project requirements are posted under the Planning and Building Department's webpage.[18] This page also provides access to other zoning and City plan requirements, design guidelines, forms and codes, and impact fee reports. Contact information, including a phone number and email address, is also provided at the bottom of the page.

[18] https://www.oaklandca.gov/topics/planning-and-building-permit-fees

The City actively solicits input and feedback on ways to improve planning, land use and zoning practices from practitioners and stakeholders. This has been very effective in the past, and the City will continue to engage in such outreach.

F.2 Non-Governmental Constraints

Fundamentally, the City is only one of many actors involved in the development of housing with limited control. While the City plans for sites and provides programs, the actual production, availability, and cost of housing in Oakland is significantly impacted by non-governmental factors, many of which are common to other similar cities in the Bay Area, including the high cost of construction and greater difficulties of producing housing through redevelopment in an already-developed, central city such as Oakland.

ENVIRONMENTAL CONSTRAINTS

The most noteworthy environmental constraints in Oakland include the following:

- **Geology/seismicity.** The Hayward Fault, located at the base of the hills on the eastern edge of the City, has a 31.0 percent chance of producing a major earthquake within the next 30 years and would cause significant damage.[19] The Fault Zone is along the hills and does not include significant development sites and is thus not a major constraint to housing. In the event of an earthquake, soil liquefaction is also a major concern in Oakland. The flat-land areas of Oakland are at the highest risk of liquefaction.

- **Sea-level rise.** Low-lying coastal residential areas, the Port of Oakland, the former Oakland Army Base, and a variety of low-lying areas near the Coliseum, Oakland International Airport, and Interstate 880 are most at risk of coastal flooding. According to the Bay Conservation and Development Commission, Oakland is expected to experience 12 to 24 inches of sea level rise by 2050 and 36 to 66 inches of sea level rise by the year 2100. Almost all areas that would be subject to sea level rise are zoned for industrial rather than residential use; thus sea level rise is not a significant constraint for housing.

- **Hydrology and flooding.** The combination of higher tides due to sea level rise and larger storms with Oakland's aging stormwater drainage systems may lead to significant increases in both coastal and urban flooding and flood damage. Low-lying areas, such as the Coliseum, West Oakland, and Jack London neighborhoods, are particularly vulnerable to coastal (Bay) and urban floods. However, the vast majority of land located within the Federal Emergency Management Agency's (FEMA) 100-year flood zone does not permit residential uses; thus flooding is not a significant constraint for housing.

[19] *Resilient Oakland Playbook,* October 10, 2016. See report at https://cao-94612.s3.amazonaws.com/documents/OAK061006.pdf

- **Air and noise quality.** Through Community Air Risk Evaluation (CARE) Program, the Bay Area Air Quality Management District (BAAQMD) identified East and West Oakland as communities disproportionately impacted by air pollution in the Bay Area. Residential areas adjacent to industrial areas or major highways tend to experience worse air quality impacts. Title 24 and City regulations require air filtering and other methods to promote indoor air quality in new construction, and development adjacent to freeways would also require noise insulation to ensure indoor noise levels in compliance with the State Building Code. While these are not constraints to development, they do result in increased development costs. Poor air and noise quality also results in lower appeal to some potential buyers or renters. While not necessarily a development constraint, poor air and noise quality have significant severe health disparities in existing Environmental Justice (EJ) neighborhoods, which is explored further in the EJ Element and Safety Element.

- **Wildfire.** Wildfire hazards are particularly acute in the Oakland Hills, and the Oakland Hills Firestorm of 1991 was the most destructive fire in California history. Oakland is at extreme risk for future wildfires due to the increased frequency of droughts and higher heats caused by climate change. Virtually the entirety of the Oakland Hills has been designated as a Very High Fire Hazard Severity Zone (VHFSV). Due to the danger posed by wildfires, including blocked evacuation routes, the hills are generally not a suitable location for higher density housing.

- **Airport hazards.** Land adjacent to the Oakland International Airport is governed by the development restrictions laid out in the Oakland International Airport Land Use Compatibility Plan (ALUCP). Residential development criteria depends upon the applicable Safety Zone, and the maximum community noise equivalent level (CNEL) considered acceptable for new residential uses in the vicinity of the airport is anything less than 65 CNEL. Further, any proposed development taller than 200 feet is subject to review pursuant to the ALUCP. No sites included in the 2023-2031 Housing Sites Inventory are located within an Airport Safety Zone.

- **Hazardous materials.** As a dense urban center with long-established industrial areas in West and East Oakland, and extensive freeway and rail networks, Oakland faces the risk of a transportation-related or other hazardous materials incident, such as a fire, explosion, spill or accidental gas release. While hazardous material incidents can happen anywhere, certain areas of the City are particularly vulnerable to these hazards, particularly residents near industrial zones and along interstate highways. Sites, especially those where formerly industrial or other uses (such as gas stations) may have caused ground contamination, would require expensive mitigation efforts prior to development.

The City proactively addresses problems associated with environmental hazards, including providing assistance in financing and cleanup activities to interested developers. The City's 2021-2026 Local Hazard Mitigation Plan (LHMP) both assessed the risks to the City and people of Oakland from both natural and human-caused hazards, and provided an implementation plan to reduce those risks. The City's Safety Element is also being updated in

parallel with the Housing Element to ensure that environmental conditions are fully reflected in planning for housing, and ensuring public health and safety.

INFRASTRUCTURE CONSTRAINTS

Water and Sewer Services

EBMUD provides water services for Alameda and Contra Costa counties, and charges fees for water and sewer services. According to EBMUD's 2020 Water Shortage Contingency Plan (WSCP), under base condition assumptions, EBMUD can meet customer demand (including residential demand) out to 2050 during normal years and single dry years; however, during multi-year droughts, even with customer demand reduction measures in place, EBMUD will need to obtain supplemental supplies to meet customer demands. Growth projections in EBMUD's future water demand reflects residential need projections provided by the Association of Bay Area Governments (ABAG), Plan Bay Area, and local land use agencies.

Oakland Public Work's Bureau of Design and Construction and Bureau of Maintenance and Internal Services owns and operates over 934 miles of sewer mains, 28,554 sewer structures, and 11 pump stations. Most of the system is more than 50 years old, and some parts are as old as 100 years. Oakland does not own or operate wastewater treatment facilities. Wastewater from homes and businesses is collected through the City's sewer collection system and flows into EBMUD's interceptor system, where it is conveyed to their treatment plant.

The development of the City's Sanitary Sewer Master Plan is currently underway, which seeks to repair aged sanitary sewer infrastructures (mainly pipes and maintenance holes) and to reduce stormwater intrusion and sanitary sewer overflows to protect public health. The master plan will provide technical guidance to both the sanitary sewer rehabilitation capital improvement program (CIP) and the sanitary sewer operation and maintenance program (O&M) in compliance with the 2014 Consent Decree for the next 17 years. The master plan project incorporates equity factors into the prioritization plan, applies risk-based analytical approach while mitigating inflow/infiltration issues effectively and efficiently, and updates the sewer hydraulic model from large to small diameter pipes.

The draft Housing Element was provided to EBMUD on May 12th, 2022 to solicit input and coordinate efforts prior to adoption per HCD guidance. In accordance with Section 65589.7 of the California Government Code, the adopted Housing Element will also be delivered to EBMUD. Per the 2020 Urban Water Management Plan (UWMP), EBMUD's Board of Directors approved Policy 3.07 which ensures that priority for new water service connections during restrictive periods is given to proposed developments within EBMUD's existing service area that include housing units affordable to lower-income households in accordance with California Government Code 65589.7. Policy 3.07 also states that EBMUD will not deny an application for services to a proposed development that includes affordable housing unless certain specific conditions are met which could include a water shortage emergency condition, or if EBMUD is subject to a compliance order by the Department of Public Health that prohibits new water connections. Based on the requirement to provide priority to developments that include housing units affordable to lower-income households, Policy 3.07 assures that the portion of overall water demands for lower-income households can be met.

Under typical conditions, there is sufficient water and sewer capacity to meet Oakland's future housing needs.

Dry Utilities

Oakland, as well as the entire nine-county Bay Area, is served by the Pacific Gas and Electric Company (PG&E), an investor-owned utility company that provides electricity and natural gas supplies and services throughout a vast service area in Northern California. East Bay Community Energy (EBCE) is a community-governed, local power supplier that provides low-carbon electricity to Oakland residents and businesses under Alameda County's community choice energy (CCE) program at rates that are lower or comparable to PG&E's rates. EBCE's standard electricity product that has a higher renewable energy content than PG&E at rates marginally lower than PG&E's base offering. It also provides a 100 percent renewable product at a rate equivalent to PG&E's base offering. Further, internet connections in the city are provided by Comcast.

MARKET CONSTRAINTS

Land Costs

Market prices for land are high in the desirable, high-cost San Francisco Bay Area. As evidenced in Appendix B, housing costs have continued to dramatically increase since recovering from the 2008 financial crisis. The desirability and acceptability of locations in Oakland and other inner cities has increased within the region. Demand is increasing for housing close to employment centers such as Oakland and San Francisco and is likely to continue to be relatively strong given the demand for locations near urban centers. Additionally, Oakland's urban character and comparatively lower costs have made the city an increasingly desirable alternative to higher-cost areas nearby, particularly to San Francisco across the bay – Oakland has the second fastest population increase (behind Bakersfield) of the 12 most populous California cities between 2010 and 2021.[20] Finally, there are efforts by ABAG to encourage infill development in cities such as Oakland.

It is important to note that there are significant variations in the price of land within Oakland. The city has some of the highest residential land values in the Bay region (such as in older desirable neighborhoods such as Rockridge and the Oakland hills with views of San Francisco Bay) and some of the lowest as well (such as in older, working-class neighborhoods in the vicinity of the I-880 freeway and older industrial areas).

Land acquisition cost estimates for the development of affordable housing in Oakland are available from recent California Tax Credit Allocation Committee (TCAC) project tax credit applications. Estimates include projects that applied for a tax credit between 2017 and 2020, and are provided in Table F-21. Overall, land acquisition costs for new construction are about $40 per square foot. This remains similar to estimates from the City's previous Housing Element, which estimated costs between $13 to $47 per square foot (2014 values). While new construction land costs have remained stable across the period, the per square foot costs for

[20] Based on California Department of Finance E-5 Population and Housing Estimates, 2010-2021.

acquisition and rehabilitation projects has continued to increase. During the period, land/acquisition costs accounted for about 27.5 percent of total project costs for all project types.

Table F-21: Land Costs for Affordable Housing Projects in Oakland, 2017-2020

Project Year	*Average Total Land/Acquisition Cost*[1]		*Average Land/Acquisition Cost Per Sq. Ft.*	
	Acquisition & Rehab	*New Construction*	*Acquisition & Rehab*	*New Construction*
2017	$16,438,358	$928,967	$291	$20
2018	$31,136,874	$2,910,464	$343	$38
2019	$55,317,500	$2,654,171	$536	$71
2020	$32,895,737	$1,695,021	$577	$25
Total	**$31,870,897**	**$2,121,702**	**$415**	**$40**

1. Land/acquisition costs include project costs related to land costs or value, demolition, legal, land lease rent prepayment, existing improvements value, and off-site improvements.

Source: California Tax Credit Allocation Committee, Project Staff Reports 2017-2020; Dyett & Bhatia, 2022

If land costs remain at current levels or continue to increase, the City can do little to directly affect the cost of land other than continue to provide opportunities for increased residential densities, housing on underutilized sites and locations with potential for mixed-use development, and housing on infill properties. Regardless, these measures will not lead to actual construction if the higher construction costs associated with more dense and taller development is not recoverable in the form of higher rents or sale prices.

Costs for Urban Infill

Oakland does not have large, vacant, unconstrained parcels, and must rely on infill development strategies to accommodate its ABAG-assigned regional housing allocation. There are a variety of uncertainties, difficulties, and additional costs associated with development of these types of sites that pose constraints for new housing development. Some of these include:

- **Redevelopment Difficulty and Costs.** The total cost of "land" for developing infill sites or redeveloping under-used sites includes not only land acquisition, but also additional costs of demolishing existing structures and site clean-up. Costs for relocating existing uses and/or compensating existing users are also frequently a required expense in the calculation of the total cost of land development in Oakland. Thus, total "land" costs for urban infill development are generally greater than the land/site acquisition costs alone.

- **Parcel Sizes and Achievable Densities.** Oakland has only a few moderate-sized commercial sites that could be repurposed to housing or mixed-use development. Notably, Oakland lacks any large suburban-size malls. The corridor with some of the largest commercial sites—the former "auto-row" along Broadway has been significantly redeveloped with housing over the past decade, with several developments achieving over 100 units per acre densities. Other corridors—such as San Pablo Avenue, International Boulevard, and Macarthur Boulevard—have

generally smaller parcels, and lot consolidation would be needed to achieve high densities.

Construction Costs

The costs of constructing housing in the Bay Area are high. Construction costs can be separated into "hard" and "soft" costs. Hard costs include construction line items such as labor, demolition, building materials and installed components. Soft costs include items such as architectural and engineering, planning approvals and permits, taxes and insurance, financing and carrying costs, and marketing costs. The hard construction costs typically represent about 50 to 60 percent of total development costs. Thus, they have a significant effect on development feasibility. Land and soft costs can represent another 40 to 50 percent of the total cost of building housing.

Construction costs for higher-rise concrete and steel-frame multifamily buildings are higher than for wood-frame construction. In fact, the higher costs for steel- and concrete-frame construction are a significant factor limiting the feasibility of high-density housing development in Oakland. This continues to be the case for Oakland as concrete- and steel-frame buildings are only being built in Oakland at locations that can attract the highest housing prices and rents (such as on the shores of Lake Merritt, Jack London District, and the Broadway Valdez area, north of downtown). There are also a few examples of concrete- and steel-frame construction for more affordable, higher density senior housing. For all types of construction, structured or underground parking would result in still higher construction costs.

The Incentive Program Feasibility Study[21] prepared for the Downtown Oakland Specific Plan in July 2020 provides estimates of more recent market-rate construction costs. Building construction costs range from $290 to $400 per gross square foot, not including parking construction costs of about $60,000 per space. Table F-22 summarizes development cost assumptions as identified in the Study. For the Study, eight mixed-use development prototypes were selected and a "static" (i.e., stabilized year) pro forma financial feasibility model was prepared for each. A description of each prototype is as follows:

- Prototype 1: Base zoning office high-rise upzoned to a higher density office high-rise
- Prototype 2: Base zoning residential high-rise upzoned to higher density residential
- Prototype 3: Base zoning residential mid-rise upzoned to residential high-rise
- Prototype 4: Base zoning residential low-rise upzoned to residential high-rise
- Prototype 5: Base zoning residential mid-rise upzoned to higher density residential midrise

[21] *Downtown Oakland Specific Plan: Incentive Program Feasibility Study,* July 10, 2020. See report at https://www.oaklandca.gov/documents/zoning-incentive-feasibility-study

- Prototype 6: Base zoning low-rise office upzoned to residential high-rise
- Prototype 7: Base zoning low-rise office upzoned to residential high-rise
- Prototype 8: Base zoning low-rise office upzoned to residential high-rise

Table F-22: Downtown Oakland Specific Plan Development Cost Assumptions, 2020

Prototype No.	*Neighborhood*	*Assumed Construction Type[1,2]*	*Building Cost (per gross sq. ft.)[2]*
Prototype 1	Uptown Office	Type I	$370
Prototype 2	Uptown Residential	Type I	$400
Prototype 3	KONO Residential	Type III	$320
Prototype 4	Jack London Residential	Type V	$290
Prototype 5	KONO Residential	Type III	$350
Prototype 6	Jack London "Office" to Res.	Type III	$320
Prototype 7	Jack London "Office" to Res.	Type III	$320
Prototype 8	Victory Court "Office" to Res.	Type III	$320

Estimated construction costs for affordable housing in Oakland are available from recent TCAC project tax credit applications. Estimates include projects that applied for a tax credit between 2017 and 2020, and are provided in Table F-23. Overall, construction costs for affordable projects are about $340 per square foot. On average, construction costs accounted for about 42.9 percent of total project costs during the period.

Table F-23: Construction Costs for Affordable Housing Projects in Oakland, 2017-2020

Project Year	*Average Total Construction Cost[1]*	*Average Construction Cost Per Sq. Ft.*
2017	$14,804,026	$261
2018	$32,503,149	$362
2019	$20,405,105	$439
2020	$27,351,394	$295
Total	**$24,830,103**	**$340**

1. Includes new construction and rehab projects.

Source: California Tax Credit Allocation Committee, Project Staff Reports, 2017-2020

The construction costs and total costs of developing housing in Oakland, while not different from those in other Bay Area communities, present serious constraints to the availability of housing, particularly housing affordable to lower-income households. Even with the adoption of an Affordable Housing Impact Fee, it remains difficult to raise enough funding to build affordable housing, especially housing for extremely-low-income households. To address these constraints, there are several housing programs in Oakland to support affordable housing development, including loans and grants to developers of low- and moderate-income housing. See Appendix E for a discussion of available housing resources.

Labor Costs

As noted above, labor costs are a portion of the hard costs of construction. Market factors resulting in high construction costs are further compounded for affordable housing providers because they must pay "prevailing wages." The City imposes additional Contract Compliance requirements beyond prevailing wages as well. For instance, construction contracts greater than $100,000 must achieve 50 percent participation in the Local and Small Local Business Enterprise Program (S/LBE), which increases project costs. Generally, the cost of labor in Oakland remains high and can often constitute a significant portion of total project costs. Rising labor costs may make certain housing developments—both market rate and affordable—not feasible in the city.

A shortage of labor can significantly increase construction costs, as it increases both labor costs and the time necessary to complete the development of a project. The 2015-2019 American Community Survey (ACS) estimates that there are 13,630 persons employed in the construction industry in Oakland, representing 6.0 percent of the labor force that year. This was higher than the county (5.3 percent) and wider Bay Area (5.6 percent). In Oakland, this also represents an increase from 5.6 percent in 2014, per the 2010-2014 ACS.

The California Employment Development Department (EDD) estimates that the annual average unemployment rate in 2020 for Oakland was 10.5 percent, while it was 8.8 percent for the large Oakland-Hayward-Berkeley Metropolitan Division (MD). These unusually high employment rates were caused by the COVID-19 health emergency and economic crisis. Table F-24 below shows that while these rates approach those seen in 2010 following the 2008 financial collapse, they have since returned to pre-COVID levels. As employment rates have largely recovered, this indicates that labor is generally available in the city and metropolitan region.

Table F-24: Unemployment Rates, 2010-2021

Jurisdiction	*2010*	*2015*	*2020*	*October 2021*
Oakland	13.6%	5.9%	10.5%	6.1%
Oakland-Hayward-Berkeley Metropolitan Division	11.2%	4.9%	8.8%	5.1%

Availability of Financing

The availability and cost of financing influence housing supply, including both financing for real estate development and financing for homeownership. This section discusses potential obstacles to financing real estate development and ownership in the city during the planning period. A discussion of inequities in lending practices is provided in Appendix D.

Financing for Real Estate Development

As discussed previously, Oakland has approved about 16,789 building permits during the 2015 to 2021 period. While this exceeded the 5th cycle RHNA of 14,765 units, this is due to the approval of above-moderate-income projects; lower- and moderate-income projects have not kept pace with regional need. The City still faces a remaining need of 5,126 units at the lower- and moderate-income levels. This illustrates that while the development feasibility of market-rate projects—including higher-density projects—remains high, it is limited for affordable housing projects.

The City's efforts in the last two decades to revitalize and invest in the central city, especially through specific plans, have spurred increased interest in residential investment by large-scale institutional lenders. As noted in the previous Housing Element, market factors and conditions—including dramatic demand for Bay Area housing and a lack of urban developable land options in proximity to San Francisco and Silicon Valley—have increased the acceptability of Oakland neighborhoods that have formerly been passed over for residential development. Oakland rents are showing dramatic increases and there is a high demand for housing as evidenced in Appendix B. This indicates a strong likelihood of future residential investment in the city especially given its strategic location near job centers and transit. However, rising interest rates adversely impact the economic feasibility of construction.

Financing for Homeownership

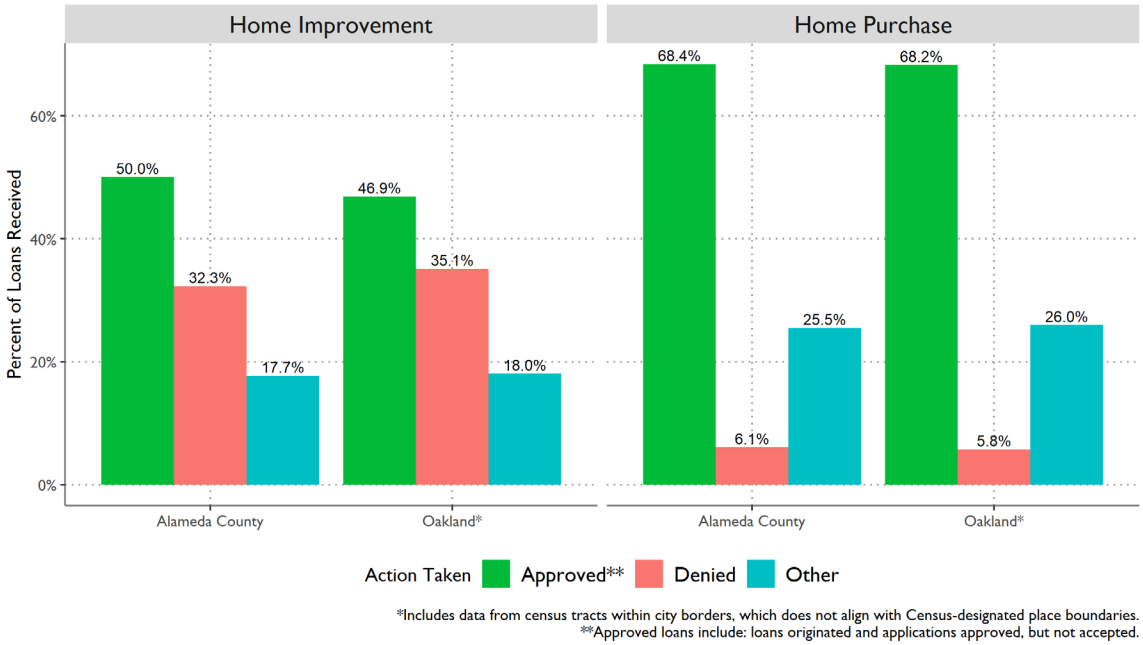
The cost of borrowing money to buy a home is another factor affecting the cost of housing and overall housing affordability. The higher the interest rate and other financing costs charged for borrowing money to purchase a home, the higher the total cost of the home and the higher the household income required to pay that cost. With increased interest rates, the amount of public subsidy required to provide affordable homeownership opportunities to median-income households also increases.

At the national level, interest rates have remained relatively low since 2015 and experienced a significant decline during the COVID-19 pandemic. However, rates have started to increase over the course of 2021. See Chart F-2 for the change in 30-year fixed rate mortgages since 2015. As of January 2022, according to Freddie Mac, higher inflation, promising economic growth, and a tight labor market indicates that mortgage rates will continue to increase. The

impact of higher rates on purchase demand remains modest so far given the current first-time homebuyer growth.

Despite relatively low interest rates, financing costs are still significant and many households have difficulty purchasing a home. To address these costs, Oakland has several first-time homebuyer programs, though some are currently suspended due to a lack of funds. The City also hosts HUD-certified first-time homebuyer workshops. Additional discussion of resources and opportunities related to homeownership is provided in Appendix E.

Chart F-2: National 30-Year Fixed Rate Mortgages, 2015-2021



Source: Freddie Mac, Historical Weekly Mortgage Rates Data, 2015-2021

Under the Home Mortgage Disclosure Act (HMDA), lending institutions are required to disclose information on the disposition of loan applications. During 2020, a total of 6,822 home purchase loan applications were submitted in Oakland and 393 were denied, about 5.8 percent. This is slightly lower than the county, which experienced a 6.1 percent denial rate during the same year, see Chart F-3.

Home improvement loans have generally lower approval rates than home purchase loans within the city and the county. While denial rates for improvement loans are higher in Oakland than in the county, home purchase loan denial rates are slightly lower. This may indicate a gap between those households wanting to improve their homes and those who were able to obtain conventional financing to complete those improvements. This indicates a

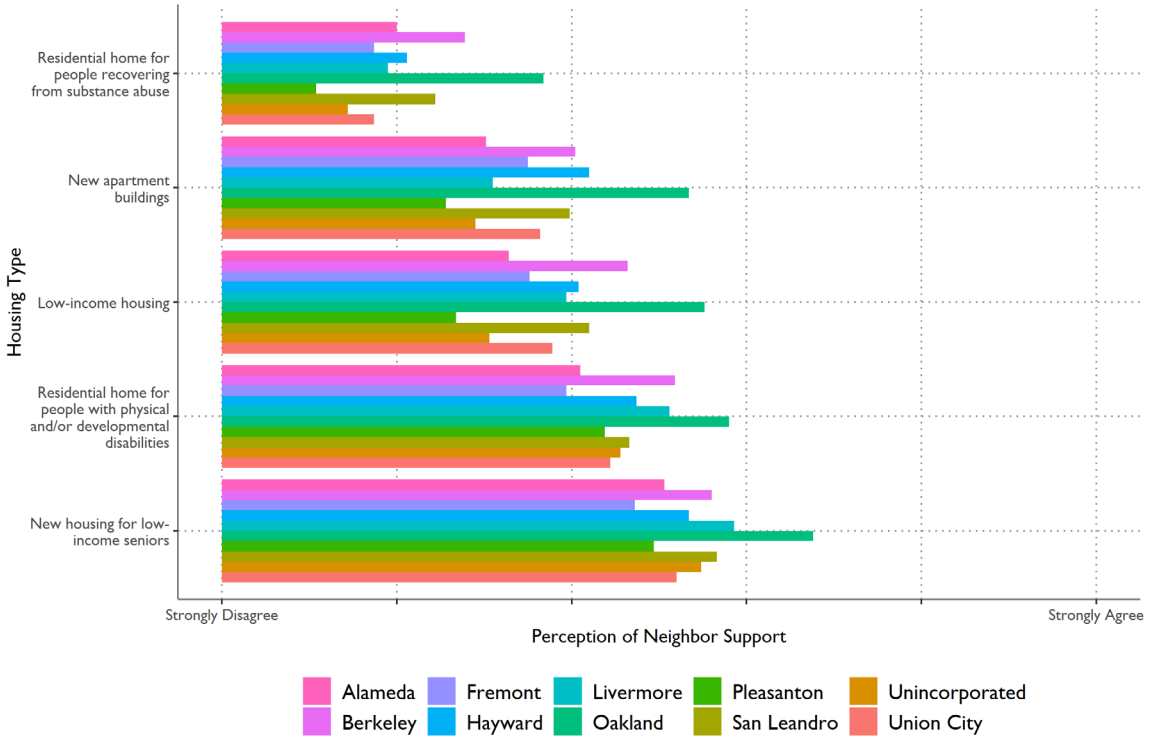
need for the City to continue to offer financial assistance and rehabilitation programs to households that may not qualify for a conventional home improvement loan.

Chart F-3: Oakland and Alameda County Loan Applications, 2020

Source: HMDA, 2020

Other Economic Constraints

Oakland is part of the San Francisco Bay Area regional economy, which is prone to occasional recessions and contractions. Given large income disparities and the City's revenue structure, these economic crises have a tendency to impact the most vulnerable residents while simultaneously reducing City resources to serve those residents. The city and region are also vulnerable to shocks related to international trade, travel, tourism, logistics, and manufacturing. Following the 2008 financial crisis, the City's discretionary revenues were reduced by nearly 12.0 percent, while the demands for City services dramatically increased.



Similarly, the economic crisis caused by the COVID-19 pandemic is likely to have a lasting impact on available City resources and housing needs throughout Oakland. Among other things, future building patterns and preferences may be impacted, which could increase costs of development. While the City has little control over broader economic conditions, it does provide resources to Oakland residents to prevent and/or mitigate some of the worst impacts of the pandemic. Available resources are provided in Appendix E.

NEIGHBORHOOD SENTIMENT

While neighborhood concerns and opposition to higher-density developments and to affordable housing developments may hamper efforts to construct new housing, Oakland is one of the most pro-housing and pro-affordable housing communities in the Bay Area. In the community workshops conducted for the Housing Element update—where hundreds of

residents participated—participants were almost unanimously pro-housing. Further, according to the 2020-2024 Regional Analysis of Impediments to Fair Housing Choice (AI), Oakland has the highest perceived neighbor support for all affordable housing projects. See Chart F-4 below for the perceived neighbor support of different types of affordable housing, based on responses to the 2019 Alameda County Regional Housing Survey (3,296 total responses).[22] In Oakland and the county overall, support for low-income senior housing is the highest and support for supportive housing for those recovering from substance abuse is the lowest.

Chart F-4: Perceived Neighbor Support for Affordable Housing, 2020

Source: County of Alameda, Regional Analysis of Impediments to Fair Housing Choice, February 2020

The City actively works with developers and provides information on affordable housing for use at public meetings. The City encourages local non-profit organizations, affordable housing proponents, the business community, the real estate industry and other policy makers to join in efforts to advocate for the provisions of affordable housing in communities

[22] The Regional Housing Survey prompted respondents to rank their agreement with five statements from strongly disagree (0) to strongly agree (5). The questions included the following: "My neighbors would be supportive of locating low-income housing in my neighborhood," "My neighbors would be supportive of locating new apartment buildings in my neighborhood," "My neighbors would be supportive of locating new housing for low-income seniors in my neighborhood," "My neighbors would be supportive of locating a residential home for people recovering from substance abuse in my neighborhood," and "My neighbors would be supportive of locating a residential home for people with physical and/or developmental disabilities in my neighborhood."

throughout Oakland and the Bay Area. Public comments received as part of Specific Planning efforts have generally been supportive of more housing affordable to Oakland residents, given the rising costs of rent in the City. Additionally, the completion and occupancy of several attractive and affordable housing developments, and the rebuilding and rehabilitation of older public housing projects, continue to improve the quality, image, and acceptability of affordable housing in Oakland. Successful, new low-income housing developments now enhance many Oakland neighborhoods and blend unnoticed into others. The update to the General Plan will continue to encourage higher-density affordable housing in areas with ample access to opportunity.

State law requires an analysis of governmental and non-governmental constraints to Oakland meeting its housing needs. Governmental constraints can include zoning regulations, development standards, fees, and processing and permitting times, among others. Non-governmental constraints can include infrastructure, environmental, and market challenges. This appendix provides an assessment of these constraints as required by law and provides context on relevant local efforts to remove governmental constraints. The Housing Action Plan contained in Chapter 4 provides strategies the City will take to remove identified constraints.

Governmental constraints on affordable housing construction include a lack of local and State funding to support the development of affordable housing, a lack of clarity on permit streamlining processes, higher costs for all housing developments due to a lack of City staff capacity. Both market-rate and affordable housing also face constraints from development standards and green building standards. Non-governmental constraints on housing development include environmental constraints such as risk of seismic activity, infrastructure needs for infill housing, and the high cost of land, materials, and labor in Oakland.

F.1 Governmental Constraints

While government regulations are intended to guide development in a community and ensure quality housing, they may also contribute to delays or increased development costs with negative impacts on housing affordability and availability. The following section assesses constraints imposed by governmental regulation on residential development, including those imposed by the current General Plan, specific plans, and the Municipal Code. Feedback received during community outreach highlighted the following controversial issues as governmental constraints impacting the development of housing:

- A lack of local and State funding to support the development of affordable housing. During outreach, community members expressed frustration with a perceived lack of political appetite to spend local money on affordable housing;
- A lack of clarity on available permit streamlining processes as well as how affordable housing is prioritized;
- The lack of City staff capacity as a major cost driver for all housing developments, including affordable and market-rate projects; and
- An abundance of concessions for market-rate projects and community perception that these concessions have led to an overall reduction in regulatory incentives and tools to encourage affordable housing development.

Funding for Affordable Housing Development

Sources of funding for affordable housing development, including those at the local, State, and federal levels, are severely limited. Recent State efforts to increase the availability of funding, including the $1.75 billion California Housing Accelerator fund and expanded Homekey funding,

will provide only limited support for affordable housing development over the upcoming planning cycle. Moreover, popular funding mechanisms, such the California Tax Credit Allocation Committee's (TCAC) competitive tax credit applications, disadvantage cities like Oakland, where the majority of area is considered "low resource."

Funding at the local level is also very limited due to restrictions on the City's ability to raise tax revenues and budgeting decisions made by the City Council. According to a SPUR research brief, California's Proposition 13 has a major impact on Oakland's ability to collect revenue that could be used towards affordable housing development.[1] A key finding of the brief states that "Oakland misses out on $400 million in Prop. 13 residential taxes every year, equivalent to what it spends on four city departments combined" – including over $33 million for Housing and Community Development at minimum. According to SPUR, the uncollectible taxes are more than ten times the amount the City has currently budgeted for helping people experiencing homelessness, seven times more than it spends to protect tenants and create affordable housing, and more than five times the City's spending on programs and services for children in the City.

Local budget decisions also affect the availability of funding for affordable housing. Oakland has no major source of local revenue dedicated exclusively to affordable housing besides the Jobs Housing and Affordable Housing impact fees. This is different from other communities like San Jose, where 100% of the real estate transfer tax is dedicated to addressing housing and homelessness challenges. At present, the only ongoing local investment in the construction of affordable housing in Oakland comes from development impact fees and federal block grants.

During outreach, affordable housing developers noted that they are continually challenged by a lack of federal, State and local funding, as well as competition from market-rate developers to secure highly valuable land for development. In response to high land prices and increasing land values, the City approved Bond Measure KK in 2016 to fund affordable housing projects, including the 1-4 Unit Acquisition and Rehabilitation Program, which provides loans for acquisition-related and rehabilitation costs associated with developing, protecting and preserving long-term affordable housing throughout the city. Additional KK funds were allocated for site acquisition for multifamily affordable development. However, all KK funds will have been disbursed by 2023. Measure U, a bond measure approved by Oakland voters in November 2022 , will be able to assist in funding the same kind of affordable housing investments as Measure KK, but will be inadequate to meet Oakland's funding shortfall to meet RHNA goals. Additional funding and acquisition strategies are provided in the Housing Action Plan, actions 2.2.2, 3.1.1., 3.3.1, 3.3.4, 3.3.6, 3.3.10, 3.3.13, 3.3.14, and 3.3.18.

LAND USE POLICIES AND REGULATIONS

General Plan

The City of Oakland last performed a comprehensive update to its General Plan in 1998 and is in the process of updating it again to reflect emerging opportunities, challenges, and approaches. As

[1] Jacob Denney, Phil Levin, and Susannah Parsons. "Burdens and Benefits: Investigating Prop. 13's unequal impacts in Oakland." *SPUR*, February 2022. Available at https://www.spur.org/sites/default/files/2022-02/SPUR_Burdens_and_Benefits.pdf

the General Plan Update is prepared in parallel with this Housing Element, its policy direction and shared goals will inform the assessment of constraints in this chapter.

The Land Use and Transportation Element (LUTE) of the General Plan sets forth the City's policies for guiding local land use and development. The LUTE outlines the vision for Oakland, establishing an agenda to encourage sustainable economic development, ensure and build on the transportation network, increase residential and commercial development in downtown, reclaim the waterfront for open space and mixed uses, and protect existing neighborhoods while concentrating new development in key areas. These policies, together with the zoning regulations, establish the amount and distribution of land allocated for different uses within the city. Table F-1 shows General Plan residential land use designations along with their descriptions from the City's Planning Code. These designations support a variety of housing types, ranging from large estate lot residential developments to multifamily high-rise apartments. Generally, the LUTE provides significant flexibility on zoning and density. However, the document was originally adopted in 1998 and will be revised during Phase II of the General Plan update (i.e., by July 2025) to address changing conditions in Oakland. Table F-2 below summarizes the extent to which different housing types are permitted in the city. While multifamily development is permitted on about 9.8 percent of Oakland's land, single-family and two-family developments are permitted on about 43.4 percent and 17.8 percent of the city's land, respectively. About half the city is available for residential development, while much of the remaining acreage is designated open space, rights-of-way, and environmentally constrained areas. See Figure F-1 for the distribution of residential zones in Oakland.

Table F-1: General Plan Residential Land Use Designations, 2022

General Plan Residential Zone	*Residential Zoning Designation*	*Description*
Hillside Residential	RH-1, RH-2, RH-3, RH-4	The intent of the Hillside Residential (RH) Zones is to create, maintain, and enhance residential areas that are primarily characterized by detached, single unit structures on hillside lots.
Detached Unit Residential	RD-1, RD-2	The intent of the Detached Unit Residential (RD) Zones is to create, maintain, and enhance residential areas primarily characterized by detached, single-unit structures.
Mixed Housing Type	RM-1, RM-2, RM-3, RM-4	The intent of the Mixed Housing Type Residential (RM) Zones is to create, maintain, and enhance residential areas typically located near the City's major arterials and characterized by a mix of single-family homes, townhouses, small multi-unit buildings, and neighborhood businesses where appropriate.
Urban Residential	RU-1, RU-2, RU-3, RU-4, RU-5	The intent of the Urban Residential (RU) Zones is to create, maintain, and enhance areas of the City that are appropriate for multi-unit, mid-rise or high-rise residential structures in locations with good access to transportation and other services.
High-Rise Apartment Residential	R-80	The intent of the High-Rise Apartment Residential (R-80) Zone is to create, preserve, and enhance areas for high-rise apartment living at high densities in desirable settings, and is typically appropriate to areas near major shopping and community centers and rapid transit stations.

Table F-2 Summary of Development Permitted, 2022

Project Type	*Base Zones*[1]	*Total Acreage*	*Percent of Total City Acreage*[2]
Multifamily Housing[3]	RM-4, RU-1 to RU-5, R-80, HBX-1 to -3, CN-1 to -4, CC-1 to -2, C-40, C-45, CBD-R/-P/-C/-X, S-2, S-15, S-15W, D-WS, D-OTN, D-BV-2, D-BV-3, D-BV-4, D-KP-1 to -3, D-CE-3 and -4, D-LM-1 to -5, D-CO-1 to -2, D-OK-3	4,881.9	9.8%
Single-Family Housing[4]	RH-1 to -4, RD-1 to -2, RM-1 to -4, RU-1 to RU-3, R-80, HBX-1 to HBX-3, C-40, C-45, S-2, D-WS, D-OTN, D-KP-1 to -3, D-CE-3, D-OK-1 to -2	21,665.9	43.4%
Two-Family Housing[5]	RM-2 to RM-4, RU-1 to RU-5, R-80, HBX-1 to -3, CN-1 to -4, CC-1 to -2, C-40, C-45, CBD-R, S-2, D-WS, D-OTN, D-BV-4, D-KP-1 to -3, D-CE-3, D-LM-1 to -5, D-CO-1 to -2, D-OK-3	8,903.1	17.8%

1. The D-OK zoning district has not yet been implemented.
2. Zoning district acreage across project types is not mutually exclusive, and percentages should not be summed.
3. Multifamily housing requires a conditional use permit in RM-2, RM-3, D-BV-1, and D-CO-4 Zones.
4. Single-family housing requires a conditional use permit in S-15 and D-OK-3 Zones.
5. Two-family housing requires a conditional use permit in RD-2, RM-1, S-15, S-15W and D-CO-4 Zones.

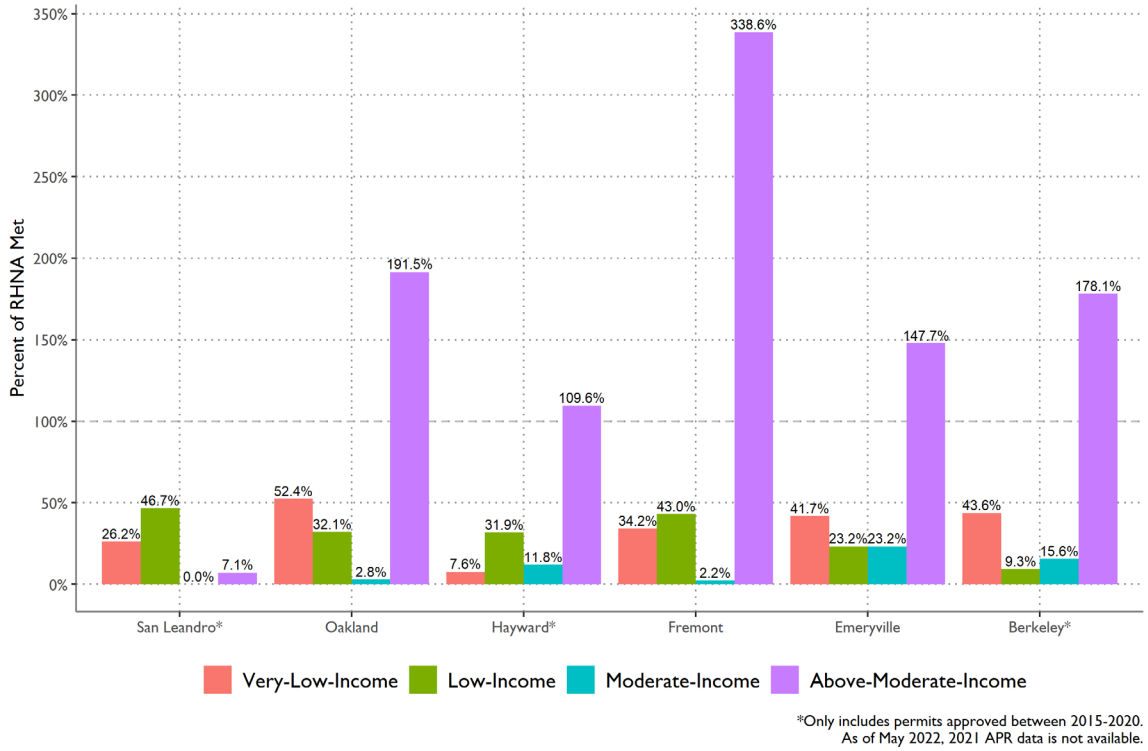
A sample of variance/zoning concessions identified in staff reports between 2019 and 2021 is provided in Table F-3 below. Requests for variances were generally minor, with about one-third of the sample pertaining to setbacks for single-family dwellings, another two for driveway and paving separation, and one variance for group open space for a multifamily (10-unit) building. The two parking variance requests were for a single-family dwelling and a four-unit building.

Table F-3: Sample of Variance/Zoning Concessions, 2019-2021



Year	*Case Number*	*Requested Variance*
2019	PLN19184	Minor Variance for live/work units for 12-unit building
	PLN19044	Minor Variance for group open space for 10-unit building
	PLN18280	Minor Variance for setbacks and group open space for eight-unit building
	PLN16302	Minor Variance for setbacks and parking in mixed-use building
	PLN15197-R02	Minor Variance for driveway separation in nine-unit building
	PLN18420	Minor Variance for group open space in three-lot mini-lot development
2020	PLN19289	Minor Variance for parking in four-unit building
2021	PLN20088	Minor Variance for setbacks in single-family dwelling
	PLN20117	Minor Variance for setbacks in single-family dwelling
	PLN20127	Minor Variance for setbacks in single-family dwelling
	PLN21005	Minor Variance for paving in setback of single-family dwelling
	PLN21174	Minor Variance for parking in mixed-use building
	PUD06101-PUDF012	Minor Variance for setbacks in single-family dwelling

Chart F-1 below provides an overview of building permit approval rates compared to the 2015-2023 Regional Housing Needs Allocation (RHNA) for jurisdictions within Alameda County.[2] This provides a proxy for the comparative impact of land use regulations in Oakland and neighboring jurisdictions. Oakland is permitting at about the same rate as peer cities – the City has exceeded its above-moderate-income goal but has fallen short on its moderate- and lower-income goals. Oakland has one of the highest very-low-income building permit approval rates and one of the lowest moderate-income building permit approval rates among peer cities, including the five largest cities in Alameda County and neighboring Emeryville. The lag in affordable housing production is due largely to a lack of local and State funding to meet Oakland's affordable housing needs, as well as the length and complexity of permit processing. During outreach, stakeholders also pointed to an abundance of concessions for market-rate projects, which stakeholders conclude has led to an overall reduction in regulatory incentives and tools to encourage affordable housing development.

[2] Note that permitting rates do not include building permits approved in 2021 in the cities of San Leandro, Hayward, and Berkeley. At the time of this draft (May 2022), these cities had not submitted their 2021 Annual Progress Reports (APRs) to State HCD.

Planning Code

The type, location, density, and scale of residential development in Oakland is regulated through the City's Planning Code, which is Title 17 of the Oakland Municipal Code. Zoning regulations serve to implement the General Plan and are designed to protect and promote the health, safety, and general welfare of residents. Zoning policies, which generally separate land into broad categories of use, such as residential, commercial, and industrial, thus have intense implications on social, environmental, and racial equity within a city. In the early 1900s, cities employed racial zoning, designating neighborhoods only for members of certain racial groups. The Supreme Court declared racialized zoning as unconstitutional in 1917, but jurisdictions found ways to use economic zoning to accomplish racial segregation, with the help of the federal government. In 1921, President Harding's Advisory Committee on Zoning created a manual describing why every municipality should have a zoning ordinance and published a model zoning ordinance.[3] While not explicitly stated, it was clear that "the creation of racially homogenous neighborhoods [w]as the reason why zoning should become such an important priority for cities."[4]

[4] Rothstein, R, The Color of Law: a Forgotten History of how our Government Segregated America, 1 st ed. (New York: Liveright Publishing Corporation, 2017), 51.

Oakland's Planning Code includes five zoning districts that are focused on prioritizing residential uses over most other uses. Most of Oakland's residential land is currently zoned to maintain single-family development, which limits the capacity for residential development, especially affordable housing development. However, the City is undertaking significant efforts to amend its zoning code to expand the variety of housing types permitted in single-family zones, including duplexes, triplexes, and fourplexes. This effort is detailed in the Housing Action Plan and runs parallel with recent State efforts to increase permitted capacity in single-family zones through SB 9. While certain land use regulations are in need of reform—including parking standards and open space requirements, highlighted below—Oakland's land use regulations in general do not unduly constrain housing development, as evidenced by the minor concessions requested in Table F-3. However, additional actions are necessary to incentivize further development of moderate- and lower-income housing.

Permitted uses range from one-family dwellings with accessory dwelling units in the RH and RD zones to two-family dwellings, multifamily dwellings, and rooming house residential facilities in RM, RU, and R-80 zones. As shown in Table F-4, residential uses are permitted by-right and do not require a conditional use permit (CUP). Various types of special needs housing may be permitted by-right, require a CUP, or be subject to certain limitations as noted in Tables F-4 through F-6 and discussed further below. The Housing Action Plan, Chapter 4 of the Housing Element, includes several actions under Policy 4.3 that are intended to reduce constraints on the production of these various special needs housing types, including emergency shelters, permanent supportive housing, employee housing, and smaller units such as rooming units.

Except for those projects determined exempt from design review as set forth in Section 17.136.025 of the Planning Code, residential projects must be approved pursuant to the design review process. This is discussed further in the Permits and Processing Procedures section of this Appendix. Action 3.4.8 moves design review toward more ministerial approvals by implementing objective design standards.

There are also 16 zoning districts included in the Planning Code that allow various types of residential uses along with commercial, industrial, agricultural, public, or open space uses. Within these zoning districts, some forms of residential development are permitted by-right, without being developed in conjunction with a commercial use on the same property. Table F-5 and Table F-6 summarize permitted and conditionally permitted residential uses for these zoning districts.

Many zoning district boundaries cut through parcels instead of following property lines, especially along International Boulevard. This can make development challenging, as overlapping zones lead to conflicting permitted land uses and development standards for new construction. Action 3.4.6 corrects these divisions. Further, while not necessarily a constraint, it should be noted that the Planning Code separates permitted facility and activity types.

Development Standards

Oakland regulates the location, density, and scale of residential development primarily through development standards contained in the Planning Code. The Planning Code regulates the size of residential structures through requirements for minimum lot size, setbacks, and height limits. A development application must comply with all uniformly applied development standards, typically imposed as Standard Conditions of Approval, including those development applications "deemed approved" under the State Permit Streamlining Act. Most residential projects are also subject to design review, which is discussed further in the Permits and Processing Procedures section below. A summary of the structural residential development standards for the residential and non-residential zoning districts is provided in Table F-7 and Table F-8 below. An analysis of the impact of individual key development standards and their cumulative effect is provided in the subsections below.

Development standards will be impacted by recent State law, including SB9 – which went into effect on January 1, 2022. Some of the key changes in SB9 include permitting landowners to build two residential units on one lot in a single-family zone ministerially, requiring that the minimum size of residential units must be 800 feet, and permitting an urban lot split ministerially.[5] Notably, while the bill establishes minimum housing unit sizes, it does not impose maximums. No setback can be required for a structure constructed in the same location and to the same dimensions as an existing structure. For all other new construction, the minimum side and rear setbacks are four feet. As part of its missing middle housing strategy (Action 3.2.1), the City intends to eliminate single-family zoning except in the Very High Fire Hazard Severity Zones. As part of the zoning code amendments that would be made, reduction of minimum lot size and reduced setbacks will also be included.

[5] The City hosts more information on the SB 9 permitting process at https://www.oaklandca.gov/resources/sb-9-two-unit-residential-duplexes-lot-subdivision.

Table F-7: Residential Development Standards in Residential Zoning Districts, 2022

Zone	*Maximum Density*		*Maximum Height (ft)*[1]			*Minimum Setback (ft)*[2]				*Minimum Lot Size (sq. ft)*
	Permitted Density	*Conditionally Permitted Density*	*Wall Primary Building*	*Pitched Roof Primary*	*Accessory Structures*	*Front*	*Rear*	*Interior Side*	*Street Side*	
Hillside Residential										
RH-1	1 primary unit per lot	N/A	25	30	15	25	35	6/15%	6	43,560
RH-2			25	30	15	25	35	6/15%	6	25,000

Residential Density

Seven residential zoning districts—RU-1, RU-2, RU-3, RU-4, RU-5, and R-80, as well as RM-4 on parcels larger than 4,000 square feet—permit residential densities that exceed 30 dwelling units per acre (du/ac), as do a number of commercial, combining, and district zones. Permitted density within a zone also depends on the height area, discussed below. As noted in Table F-8 above, this include zones within the following districts: Neighborhood Commercial, Community Commercial, Community Thoroughfare Commercial, Community Shopping Commercial, Central Business District, Housing and Business Mix Commercial, Civic Center Commercial, Transit-Oriented Development Commercial, Wood Street District (D-WS-2, -3, -4, -7, and -8), Broadway Valdez District Commercial, Central Estuary District (D-CE-3 and -4), Lake Merritt Station Area District and the Coliseum Area District (D-CO-1 and -2). Most of these zones also permit multifamily development by right—excluding HBX-4, CR-1, D-BV-1, and D-CO-4—as noted in Tables F-4 through F-6 above.

The City permits significant residential densities throughout Oakland, although higher resource areas tend to be lower density. In March 2021, the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes. The intent of the resolution, which passed unanimously, is to end a historic pattern of exclusionary zoning. Actions the City will take to increase permitted densities are included in the Housing Action Plan. While the City does not currently have minimum densities, this has not historically affected realistic capacity—according to a 2021 study of housing built on designated 5th cycle RHNA inventory sites, permitted projects in Oakland exceeded "realistic" capacity estimates by 300 percent.[6]

Floor Area Ratio (FAR)

FAR only applies to non-residential buildings, with a few exceptions. According to the City's Planning Code, the maximum FAR is 0.25 to 0.55 for one- and two-family dwellings in the RH Zone, depending on lot size. The RD and RM Zones include similar maximum FAR requirements, but those requirements only apply to lots that have a footprint slope of greater than twenty percent. Lots with less than 5,000 square feet in area may have dwellings with at least 2,000 square feet, regardless of FAR listed. The RU Urban Residential Zones do not have FAR regulations for residential development. However, nonresidential maximum FAR is 2.0 to 4.0 for the RU-4 and RU-5 Zones, depending on height area. For mixed use projects in the D-LM Lake Merritt Station Area District, D-BV Broadway Valdez District, and CBD Central Business District Zones, the total lot area shall be used as a basis for computing both the maximum non-residential FAR and the maximum residential density.

For the CN Neighborhood Center, CC Community Commercial, and S-15 Transit-Oriented Development Commercial Zones, no portion of lot area used to meet the residential density requirements shall be used for computing the maximum non-residential FAR unless the total non-

[6] Siddharth Kapur, et al. UCLA Lewis Center for Regional Policy Studies. What Gets Built on Sites that Cities "Make Available" for Housing? Evidence and Implications for California's Housing Element Law. August 2021. residential FAR on the lot is less than 3,000 square feet. In the proposed Zoning Code Amendments, the City will be looking at allowing double counting of the FAR and density in all Residential and Commercial Zones.

The R-80 High-Rise Apartment Residential Zone regulations permit a maximum FAR of 3.5 for both residential and non-residential facilities, with additional increases allowed upon the granting of a conditional use permit. These ratio ranges are relatively similar to Oakland's peer jurisdictions. The City of Berkeley does not have maximum FARs prescribed to residential districts but does have maximum FAR standards in its commercial zones. Berkeley has a FAR of up to 3.0 in its Neighborhood Commercial (C-N) District and up to 6.0 in its Downtown District. The City of Emeryville has maximum FAR values ranging from 0.5 to 3.0. However, some areas may reach a maximum of up to 6.0 with a density bonus. The City of Richmond prescribes maximum FARs between 0.5 to 5.0 in commercial mixed-use zones. Generally, Oakland's FAR requirements are comparable to these other jurisdictions and have not posed a significant constraint to residential development.

Building Height

Permitted building heights depend on the zoning district and the City's height area maps. Height areas are intended to promote cohesive development patterns in high density neighborhoods, including in downtown, near the Lake Merritt BART station, and in the Broadway Valdez Specific Plan District. Allowable building heights and densities along corridors in Oakland need to better align with Building Code construction types to ensure development feasibility by increasing heights to allow for the maximum height under wood frame construction (as an example, there are some areas where current height limits may be shy of 5 feet to allow a full top story under Type 3/Type 5 construction, therefore limiting the development potential). This misalignment can create uncertainty in the development process and poses a constraint. The City will revise permitted building heights as part of the Housing Action Plan (Action 3.4.1).

Setbacks

In zones primarily intended for single-family development, the minimum front setback ranges from 20 to 25 feet, the minimum side setback ranges from four to six feet (up to 20 feet in the D-OK districts), and the minimum rear setback ranges from 15 to 35 feet. In mixed-use and multifamily zoning districts front and rear setbacks range from zero to 15 feet, and side setbacks range from zero to 10 feet (in some districts, like R-80, no setbacks are required). These requirements are fairly similar to other jurisdictions, although some minimum rear setbacks are greater than in peer cities. However, setback requirements were not identified as a constraint to development during public outreach. For comparison, a summary of required setbacks in neighboring cities is provided in Table F-9 below.

As Oakland seeks to encourage more missing middle development within traditionally single-family zones, setback requirements that have not historically been a constraint could impede higher density development. For example, in the RD zones, adherence to existing front, side, and rear setbacks could reduce the buildable area on a smaller, 4,000-square-foot lot with 40 feet of frontage to 1,800 square feet. Similarly, adherence to existing front, side, and rear setbacks on a 4,000-square-foot parcel with 40 feet of frontage in the RM zones would result in a buildable area of 2,240 square

feet. A fourplex in a traditional two-unit ground floor, two-unit second floor layout would ordinarily require 1,600 square feet of buildable area, so these setback requirements alone would not act as a constraint. Nonetheless, because the site may have additional constraints, and because the City seeks to encourage increases in density that would not necessary require demolition of existing structures, the City is including in its Housing Action Plan proposals to reduce setback requirements, with particular focus on reducing existing rear setback requirements (Action 3.4.1 and 3.4.7).

Table F-9: Summary of Minimum Setbacks by Jurisdiction

	Single-Family Setbacks (ft.)			*Multifamily Setbacks (ft.)*		
Jurisdiction	*Front*	*Side*	*Rear*	*Front*	*Side*	*Rear*
Oakland	20-25	4-6[1]	15-35	0-15	0-10	0-15
Richmond	20-25	5-10	20-25	10	5-10	20
Berkeley	20	4-15	20	15-20	4-15	15-21
Emeryville[2]	-	-	-	5-10	3	15

1. Up to 20 feet in D-OK zones
2. Setbacks are only required in the RH, RMH, and RM zoning districts.

Source: City of Oakland, Planning Code, 2022; City of Richmond, Municipal Code, 2022; City of Berkeley, Municipal Code, 2022; City of Emeryville, Municipal Code, 2022

Minimum Lot Size

Minimum lot sizes for residential districts range from 4,000 square feet for multifamily development to between 4,000 and 43,560 square feet for single-family development. In commercial and other zoning districts, minimum lot sizes are typically 4,000 square feet, but can reach as high as 10,000 square feet in some districts. For comparison, the City of Berkeley requires a minimum lot size of between 5,000 to 25,000 square feet in single-family zones, 5,000 square feet in multifamily and other zones, and no minimums in limited commercial districts. Similarly, the City of Richmond requires a minimum of between 3,750 and 11,000 square feet for single-family zones, 5,000 square feet for multifamily zones, and between 5,000 and 10,000 square feet in other zones (up to 20 acres in open space development). The City of Emeryville does not require minimum lot areas except in the RM Medium Density Residential zone, which requires 2,500 square feet. Generally, Oakland's minimum lot size standards are comparable to these jurisdictions and have not historically posed a significant constraint to development but could impede the development of missing middle housing that the City is currently seeking to encourage. Action 3.4.1 and 3.4.7 reduce minimum lot sizes to facilitate subdivision of existing lots.

Ground Floor Commercial

A number of zoning districts either require or allow active commercial uses on the ground floor. In the case where ground floor commercial is required, this can limit residential capacity in a given project. A summary of ground floor commercial regulations by zoning district is provided below:

- **Urban Residential.** Completely residential projects are permitted in all zones. In the RU-4 and RU-5 Zones, commercial uses are also permitted, but may only be located either on

the ground floor of a corner parcel or in an existing non-residential facility built prior to 2011, and are typically permitted up to 5,000 square feet.

- **Neighborhood Center Commercial.** The CN-1 and CN-2 Zones do not permit new ground floor residential facilities (except for incidental pedestrian entrances), while CN-3 permits ground floor only on interior lots with a CUP and not on corner lots.

- **Community Commercial.** The CC-1 and CC-2 Zones require a CUP for residential uses on the ground floor, although buildings not located within 20 feet of the principal street frontage and incidental pedestrian entrances that lead to one of these activities elsewhere in a building are exempted from the CUP requirement. Further, in CC-1, multifamily ground floor development is only permitted if a majority of floor area is devoted to commercial activities.

- **Central Business District.** In the CBD-P and CBD-C Zones, residential activities may not be located within 30 feet of the front lot line on the ground floor of the principal building with the exception of incidental pedestrian entrances that lead to one of these activities elsewhere in the building. There are no restrictions on ground floor residential in the CBD-R and CBD-X Zones.

- **Broadway Valdez District Commercial**. In the D-BV-2 Zone, residential uses are not permitted if located on the ground floor of a building and within 50 feet of any street-abutting property line; incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this restriction. In the D-BV-3 Zone, residential uses located on the ground floor of a building and within 60 feet from any street-abutting property line facing Broadway, 27th Street, or Piedmont Avenue are only permitted with a CUP; incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this requirement. In the D-BV-4 Zone, residential uses are prohibited if located on the ground floor of a building and within 60 feet from any street-abutting property line facing Broadway; incidental pedestrian entrances that lead to one of these activities in stories above the ground floor are exempt from this restriction.

- **Central Estuary District.** Completely residential projects are permitted in all zones. Some ground-floor commercial uses are permitted in the D-CE-3 through D-CE-6 Zones.

- **Lake Merritt Station Area District.** In D-LM-1 through D-LM-4 Zones, residential uses may not be located within 30 feet of the front lot line on the ground floor of an existing principal building fronting a Commercial Corridor or within 30 feet of the front lot line on the ground floor of a new principal building fronting a Transitional Commercial Corridor, as defined in Section 17.101G.010.C, with the exception of incidental pedestrian entrances that lead to one of these activities elsewhere in the building.

While these requirements are intended to foster thriving commercial centers and corridors to increase access to amenities and opportunity, they do restrict the capacity of residential development projects. Further, especially as the transition of retail and commercial businesses away from brick-and-mortar storefronts has been accelerated by the COVID-19 pandemic, increasing

numbers of ground floor storefronts remain vacant in Oakland. To address prolonged ground floor vacancies, the City will increase the allowance for residential development on the ground floor in these buildings as part of the Housing Action Plan (see Action 3.8.2).

Open Space

Oakland's open space requirements—especially for group or common open space—are higher than in other cities of similar density and size. Minimum usable open space requirements differ by zoning district in Oakland. For example, Housing and Business Mix Commercial (HBX) zones require a minimum of 100 to 200 square feet of usable open space per dwelling unit. The Lake Merritt Station Area District (D-LM) zones require 75 square feet per unit. Primarily residential areas, like the Urban Residential (RU) zones, require 100 to 150 square feet of group useable open space per unit. However, each one square foot of private usable open space is considered equivalent to two square feet of required group usable open space and may be so substituted. These open space requirements do not apply to Downtown. In comparison, the City of Berkeley's C-DMU Downtown Mixed-Use District requires a minimum of 40 square feet of usable open space per dwelling unit. San Diego requires 36 to 48 square feet per unit. Oakland also limits the amount of the common space that can be on rooftops, while many other jurisdictions do not have such limitation. So as to not hinder construction, these standards could be adjusted to be more in line with the standards of peer jurisdictions. Actions the City will take to address these constraints are provided in the Housing Action Plan (see Action 3.4.1 and 3.4.4).

Courtyard Requirements

Per Section 17.108.120 of the Planning Code, courtyards are required for lots that contain residential facilities with two or more dwelling units, except for a single-family home with an ADU. Courtyard requirements were not identified as a significant constraint to development during outreach. Courtyards must meet minimum depths between exterior walls, listed below:

- Legally Required Living Room Windows in Either or Both Walls. If either or both such opposite walls contain any legally required window of any living room in a Residential Facility, a court shall be provided between such walls with a minimum horizontal depth equal to 16 feet, plus four feet for each story above the level of the aforementioned court, but shall nor be required to exceed 40 feet.

- Other Legally Required Windows in Both Walls. If both such opposite walls contain legally required windows of any habitable rooms, other than living rooms, in a Residential Facility, a court shall be provided between such walls with a minimum horizontal depth of 10 feet.

Parking Requirements

In California, the cost of providing structured parking can add between $36,000 to $38,000 per housing unit to the overall costs of a multifamily housing development project (or about 8.0 percent

of per unit costs).[7] Parking-related requirements and costs can significantly impact and constrain multifamily housing development, particularly those providing affordable units. Market demand or financial lenders often mandates the provision of parking in multifamily housing development. Further, for built-out cities like Oakland, the reliance on infill development and underground parking may lead to higher costs than in cities with more open land.

Recent State law has reduced minimum parking requirements for projects near transit. For instance, AB 2923 allows BART to enable transit-oriented development (TOD) through land-use zoning on BART-owned property in collaboration with local jurisdictions. Baseline zoning standards from the bill include no minimum number of vehicle parking spaces is enforced in these TOD areas. For properties undergoing the SB9 process, local agencies may not impose parking requirements when a parcel is located within one-half mile walking distance of either a high-quality transit corridor or a major transit stop. Changes in accessory dwelling unit (ADU) regulations, Density Bonus parking waivers, and SB 35 streamlined approvals have led to further parking reductions in Oakland.

The City's parking requirements for residential uses—provided in Section 17.116.060 of the Planning Code—vary by residential facility type. Lower density zones require as much as two spaces per unit, while higher density zones require one space or less per unit. Chapter 17.94 of the Planning Code details Residential Parking Combining (S-12) Zone regulations. This combining zone is intended to ensure that adequate off-street parking is provided for high density residential neighborhoods and adjacent commercial areas. Oakland parking requirements are provided in Tables F-10 and F-11 below.

[7] Carolina Reid, Adrian Napolitano, and Beatriz Stambuck-Torres, "The Costs of Affordable Housing Production: Insights from California's 9% Low-Income Housing Tax Credit Program" *The Terner Center for Housing Innovation at University of California*, March 2020.

Table F-10: Residential Off-Street Parking Requirements, 2022

Residential Facility Type	*Zone*	*Total Required Parking*
One-Family Dwelling	RH Zones, except when combined with the S-12 Zone.	Two (2) spaces for each dwelling unit; however, when combined with the S-11 Zone, the requirement is one (1) space per bedroom with a minimum of two (2) spaces per dwelling unit and a maximum requirement of four (4) spaces per dwelling unit.
	CBD, S-2, and D-LM Zones, except when combined with the S-12 Zone.	No spaces required.
	S-15 and D-CO Zones, except when combined with the S-12 Zone.	One-half space for dwelling unit.
	Any other zone, except when combined with the S-12 Zone.	One space for each dwelling unit.
	Any zone combined with the S-12 Zone.	Basic requirement – one off-street parking space shall be provided for each three habitable rooms in a residential facility. See Section 17.94.040 for additional details.
One-Family Dwelling with Secondary Unit	CBD, S-2, and D-LM Zones, except when combined with the S-11 or S-12 Zone.	No additional space required for the Secondary Unit.
	Any other zone, except when combined with the S-11 or S-12 Zone.	One space for the Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
	Any zone combined with the S-11 Zone.	One space for each bedroom in the Secondary Unit, up to a maximum requirement of two spaces per Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
	Any zone combined with the S-12 Zone.	One space for each bedroom in the Secondary Unit, except that no parking shall be required if located as specified in Section 17.103.080.
Two-Family Dwelling.	CBD, S-2, and D-LM Zones, except when combined with the S-12 Zone.	No spaces required.

Multifamily Dwelling	D-BV-1, D-BV-2, S-15, and D-CO Zones, except when combined with the S-12 Zone.	One-half space for each dwelling unit.
	D-BV-3 and D-BV-4 Zones, except when combined with the S-12 Zone.	Three-quarters space for each dwelling unit.
	Any other zone, except when combined with the S-12 Zone.	One space for each dwelling unit.
	Any zone combined with the S-12 Zone.	Basic requirement – one off-street parking space shall be provided for each three habitable rooms in a residential facility. See Section 17.94.040 for additional details.
Rooming House	CBD, S-2, D-LM, D-BV-1, and D-BV-2 Zones.	No spaces required for Rooming Units.
	All other zones	One space for each two Rooming Units.
Micro-Living Quarters	D-BV-1 and D-BV-2 Zones. (Micro-Living Quarters are not permitted in any other zone.)	No spaces required.
Mobile Home	CBD, S-2, and D-LM Zones	No spaces required.
	All other zones.	One space for each dwelling unit plus one additional space for each four dwelling units.

Source: City of Oakland, Planning Code Section 17.116.060, 2022

Table F-11: Residential Maximum Off-Street Parking Requirements, 2022

Residential Facility Type	*Zone*	*Maximum Number of Parking Spaces*
One-Family Dwelling. One-Family Dwelling with Secondary Unit. Two-Family Dwelling. Multifamily Dwelling. Mobile Home.	CBD, S-15, D-LM, and D-CO Zones.	One and one-quarter parking spaces per dwelling unit.
	All other zones	No maximum parking requirement.
Rooming House	CBD, S-15, D-LM, and D-CO Zones.	One and one-quarter parking spaces per each two rooming units.
	All other zones.	No maximum parking requirement.

Source: City of Oakland, Planning Code Section 17.116.060, 2022

Parking regulations in the city are higher relative to some adjacent cities. For example, the City of Emeryville has no parking minimums for any use (including residential). Emeryville also has *maximum* parking regulations, which caps parking provided to be no more than 10 percent of the estimated demand – which is provided in the City's Municipal Code. The City of Berkeley recently approved an ordinance that eliminates parking requirements for residential properties citywide, with the exception of hillside properties, and placed a maximum of the number of off-street parking units allowed for new projects in transit-rich areas. Although Oakland undertook efforts to reduce its parking standards for residential and commercial buildings in 2016—with no required parking and a cap on maximum parking in areas close to major transit hubs such as downtown or near BART stations—additional efforts are needed to reduce parking requirements citywide. The City of Oakland will reduce its parking requirements to remove a constraint to development following adoption of the Housing Element, as further discussed in the Housing Action Plan (See Action 3.4.4).

Combining Zone Standards

Combining zones are overlay districts which may be appended to existing base zones. Combining zones are typically used when local conditions, including environmental or other conditions, generate a need for more specific regulations. The standards of the combining zone are supplementary to that of the base zone when applied. The impact of combining zones on residential use is summarized in Table F-12 below.

Cumulative Effect of Development Standards

As described above, a 2021 study of housing built on designated 5th cycle RHNA inventory sites, permitted projects in Oakland exceeded "realistic" capacity estimates by 300 percent.[8] As shown in Appendix C: Sites Inventory, tables C-4 and C-5, pipeline projects with planning and building permits have average densities of 115 percent and 150 percent of allowable density, respectively. Many of these projects utilize the State and City density bonus to achieve these higher densities. Thus, Oakland's development standards do not present a constraint to achieving maximum densities when considered cumulatively. Combined with actions to revise zoning standards, building heights, setbacks, lot coverage, open space requirements, parking requirements, and other individual constraints as listed above, Oakland's future development standards should reduce any potential constraints even further.

[8] Siddharth Kapur, et al. UCLA Lewis Center for Regional Policy Studies. What Gets Built on Sites that Cities "Make Available" for Housing? Evidence and Implications for California's Housing Element Law. August 2021. Accessed at https://escholarship.org/content/qt6786z5j9/qt6786z5j9_noSplash_e70697e42e10371d566b599594a50e06.pdf?t=qyg5hv on June 28, 2022.

Table F-12: Summary of Combining Zone Standards, 2022

Combining Zone	*Applicable Base Zones*	*Impact on Residential Use*
S-4 Design Review	Any other zone	Requires design review process for all new construction or alteration, unless exempt.
S-7 Preservation	Any other zone	Requires additional design review criteria to structures with special character, mostly applicable to older neighborhoods.
S-9 Fire Safety	Any other zone	Protects uses in Very High Fire Hazard Severity Zones, and prohibits accessory dwelling units not entirely within an existing structure.
S-10 Scenic Route	Any other zone	Enhances areas along scenic routes, and includes additional design review criteria, subdivision restrictions, height restrictions on downslope lots, and conditional use permit restrictions.
S-11 Site Development and Design Review	Any other zone	Applicable to areas subject to the North Oakland Hill Area Specific Plan, and includes additional residential siting requirements, design review criteria, and limitations on residential density.
S-12 Residential Parking	Any zone in which Residential Facilities are permitted or conditionally permitted	Ensures adequate off-street parking in high-density residential neighborhoods, including additional off- and on-street parking requirements.
S-15 Transit-Oriented Development Commercial Zone Regulations	Provided in Table F-5	Provided in Table F-8.
S-17 Downtown Residential Open Space	Any zone within the General Plan-designated Central Business District	Provides open space and landscaping standards for downtown residential development.
S-19 Health and Safety Protection	HBX, D-CE-3, D-CE-4, CIX-1, CIX-1A, CIX-1B, CIX-1C, CIX-1D, CIX-2	Related to the storage and use of hazardous materials.
S-20 Historic Preservation District	Any other zone	Provisions are similar to S-7, but applies to larger areas (i.e., historic districts). S-20 includes additional design review standards, and provides more expeditious review procedures than S-7.

Specific Plans

Oakland has embarked on a series of area plans for creating sustainable and vibrant neighborhoods. Through the use of specific plans, the City can guide development at a neighborhood scale and meet local community needs. This section summarizes recent specific plans with potential for residential development. Permitted residential densities are described in Table F-7 and Table F-8 above. The success of specific plan areas in meeting their residential development goals is provided in Appendix A.

Central Estuary Area Plan (2013)

The City adopted the Central Estuary Area Plan (CEAP) in April 2013 to guide future development of the Central Estuary area, which is encompassed by 19th Avenue to the north, 54th Avenue to the south, I-880 to the east, and the Oakland Estuary to the west. Certain portions of the Plan Area have been designated to accommodate multifamily and mixed-use residential development. As of adoption, the CEAP anticipated an additional development potential of 391 residential units and 31 live/work units. Projects completed within the Plan Area include the 41-unit Phoenix Commons senior housing project in 2016 and the 41-unit market-rate 3030 Chapman apartment building in 2018. More recent entitled and permitted projects include warehouse and industrial conversions to residential uses, a six-unit condominium project, and accessory dwelling units.

The CEAP is implemented in the Planning Code through the D-CE Central Estuary District Zones, provided in Chapter 17.101E of the Oakland Planning Code. The D-CE District Zones include the following:

- **D-CE-1 (Embarcadero Cove).** The D-CE-1 zone is intended to create, maintain, and enhance the marine, office and other commercial uses in the Central Estuary area.
- **D-CE-2 (High Street Retail).** The D-CE-2 zone is intended to create, maintain, and enhance areas of the Central Estuary with a wide range of commercial uses with direct street frontage and access to the freeway.
- **D-CE-3 (Jingletown/Elmwood).** The D-CE3 zone is intended to provide development standards for areas of the Central Estuary that have a mix of industrial, heavy commercial and residential development. This zone is intended to promote housing with a strong presence of commercial and industrial activities.
- **D-CE-4 (Mixed Use Triangle).** The D-CE-4 zone is intended to create, maintain and enhance areas of the Central Estuary that have a mix of industrial and heavy commercial activities. Higher density residential development is also appropriate in this zone.
- **D-CE-5 (Food Industry Cluster, High Street Warehouse Wedge, Tidewater South).** The D-CE-5 zone is intended to create, preserve, and enhance areas of the Central Estuary that are appropriate for a wide variety of heavy commercial and industrial establishments. Uses with greater off-site impacts may be permitted provided they meet specific performance standards.

- **D-CE-6 (Con Agra, Owens Brockway, Tidewater North).** The D-CE-6 zone is intended to create, preserve and enhance areas of the Central Estuary that are appropriate for a wide variety of businesses and related commercial and industrial establishments that may have the potential to generate off-site impacts such as noise, light/ glare, odor, and traffic. This zone allows heavy industrial and manufacturing uses, transportation facilities, warehousing and distribution, and similar related supporting uses. Uses that may inhibit such uses, or the expansion thereof, are prohibited. This district is applied to areas with good freeway, rail, seaport, and/or airport access.

Lake Merritt Station Area Plan (2014)

The Lake Merritt Station Area Plan (LMSAP) was adopted by the City as a specific plan in December 2014. The approximately 315-acre Planning Area covers the area around the Lake Merritt BART station in Downtown Oakland. The LMSAP projects that there is capacity for 4,900 additional housing units through 2035. All of the opportunity sites identified in the LMSAP have access to necessary infrastructure to support development. Therefore, the opportunity sites could accommodate a range of income levels depending on availability of adequate financial subsidies to make possible the development of units for very-low- and low-income households. Further, the LMSAP provides a target that 15 percent of new units built in the Planning Area be affordable for low- and moderate-income households.

The LMSAP is implemented in the Planning Code through the D-LM Lake Merritt Station Area District Zones, provided in Chapter 17.101G. The D-LM Zones include the following:

- **D-LM-1 Lake Merritt Station Area District Mixed - 1 Residential Zone.** The intent of the D-LM-1 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for high-density residential development with compatible Commercial Activities.

- **D-LM-2 Lake Merritt Station Area District Pedestrian - 2 Commercial Zone.** The intent of the D-LM-2 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District for ground-level, pedestrian-oriented, active storefront uses. Upper story spaces are intended to be available for a wide range of Office and Residential Activities.

- **D-LM-3 Lake Merritt Station Area District General - 3 Commercial Zone.** The intent of the D-LM-3 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for a wide range of ground-floor Commercial Activities. Upper-story spaces are intended to be available for a wide range of Residential, Office, or other Commercial Activities.

- **D-LM-4 Lake Merritt Station Area District Mixed - 4 Commercial Zone.** The intent of the D-LM-4 Zone is to designate areas of the Lake Merritt Station Area Plan District appropriate for a wide range of Residential, Commercial, and compatible Light Industrial Activities.

- **D-LM-5 Lake Merritt Station Area District - 5 Institutional Zone.** The intent of the D-LM-5 Zone is to create, preserve, and enhance areas devoted primarily to major public and quasi-public facilities and auxiliary uses.

Broadway Valdez District Specific Plan (2014)

The City adopted the Broadway Valdez District Specific Plan (BVDSP) in June 2014. The BVDSP provides a framework for development in the approximately 95-acre area along Oakland's Broadway corridor between Grand Avenue and I-580. Amendments to the Planning Code include the development of new zoning regulations for the Broadway Valdez District (D-BV) that are tailored to address specific conditions in the district and achieve the vision set forth in the BVDSP. D-BV zones establish retail and mixed-use commercial zones in the Plan Area and emphasize transit-oriented development. In addition, proposed height areas allow for greater densities, particularly at retail and mixed-use boulevard zones.

The BVDSP projected 1,800 new housing units through 2035. Sites were identified for mixed-use or purely residential uses to accommodate over 30 units per acre; with maximum residential density ranging from 90 to 450 square feet of lot area required per dwelling unit. The Environmental Impact Report (EIR) for the BVDSP allowed for flexibility and a mix and match of uses as long as the total car trip allocation was not exceeded. As of spring of 2022, the plan area has a total of approximately 4,100 residential units that have applied for planning permits, approved for planning permits, applied for building permits, have had a building permit issued, or completed construction. Of those 4,100 residential units, approximately 2,200 units have been completed so far. That still leaves approximately 1,900 units in the pipeline of approval and construction. All of the sites have access to necessary infrastructure to support development. A good portion of the opportunity sites identified in the BVDSP have been developed, but there are additional sites in the pipeline as well as sites without submitted plans that could accommodate a range of income levels depending on availability of adequate financial subsidies to make possible the development of units for very-low- and low-income households. The BVDSP aims to encourage 15 percent of all new housing units in the Plan Area to be affordable including both units in mixed-income developments and units in 100 percent affordable housing developments. A few of the newer projects have included some affordable units as part of their project while others have paid Affordable Housing Impact Fees to go into the Affordable Housing Trust Fund to help fund affordable housing development. Affordable Housing Impact Fees were adopted after the adoption of the BVDSP project, so a number of projects were underway before the Affordable Housing Impact Fees went into effect in September 2016.

Coliseum Area Specific Plan (2015)

The City adopted the Coliseum Area Specific Plan (CASP) in April 2015. The CASP, consisting of approximately 800 acres along I-880 and Hegenberger Road, seeks to transform the underutilized land around the Oakland-Alameda County Coliseum and Arena into a world-class sports, entertainment, and science and technology district that boasts a dynamic and active urban setting with retail, entertainment, arts, culture, and live and work uses. The CASP amended the maximum residential density and non-residential FAR in the "Community Commercial" and "Regional Commercial" LUTE designations. The CASP allows for development of up to 5,750 housing units by 2035.

The CASP implemented new zoning districts, which include the following:

- **Coliseum District-1 (D-CO-1).** This zone replaces the Transit Oriented Development zone (S-15) mapped around the Coliseum BART station. The D-CO-1 Zone is intended to create, preserve and enhance areas devoted primarily to serve multiple nodes of transportation and to feature high-density residential, commercial, and mixed-use developments, to encourage a balance of pedestrian-oriented activities, transit opportunities, and concentrated development; and encourage a safe and pleasant pedestrian environment near transit stations by allowing a mixture of residential, civic, commercial, and light industrial activities. The new D-CO-1 zone limits the building height in this area to 159 feet unless Federal Aviation Administration (FAA) review and CUP review allows taller building heights. The new D-CO-1 zone applies to all properties east of the Union Pacific Railroad (UPRR) railroad tracks that are within the Coliseum Specific Plan Area.

- **Coliseum District-2 (D-CO-2).** This zone replaces the Regional Commercial-1 (CR-1) zone that applied to the majority of the Coliseum District. The new D-CO-2 zone specifically permits and encourages development of regional-drawing centers of activity, such as new sports and entertainment venues, residential, retail, restaurants, and other activity-generating uses, as well as a broad spectrum of employment activities. The new D-CO-2 zone clarifies that any building height over 159 feet will require FAA review and City CUP approval.

West Oakland Specific Plan (2014)

The West Oakland Specific Plan (WOSP) was adopted by the City in 2014, and comprises approximately 1,900 acres. The WOSP focuses on clarifying the industrial/residential interface, emphasizing commercial use along important corridors, and clarifying housing and business mix boundaries and urban open space uses. Such zoning changes include the adoption of the Commercial Industrial Mix (CIX-1A) business enhancement zone, Commercial Industrial Mix (CIX-1B) low intensity business zone, Commercial Industrial Mix (CIX-1C) high intensity business zone, Commercial Industrial Mix (CIX-1D) retail commercial mix zone, and Housing and Business Mix (HBX-4) zone, as well as mapping of commercial overlay zones near the West Oakland BART station along the 5th Street and Chester Street frontage area, and adopting zoning and height area maps.

Buildout of the West Oakland Opportunity Areas is expected to result in 4,286 to 5,267 new housing units by 2035. Areas with residential potential include along the 7th Street and San Pablo Avenue corridors (more than 1,400 housing units), the envisioned 24-acre mixed-use Transit Oriented Development at the West Oakland BART station (between 1,325 to 2,308 housing units), and approximately 1,520 housing units elsewhere within residential and housing and business mix areas.

The Downtown Oakland Specific Plan (Public Review Draft Plan, 2019)

In August 2019, the City published a public review draft of the Downtown Oakland Specific Plan (DOSP), which envisions new zoning regulations that can be introduced to more closely align with

community goals and feasible development potential. The Plan Area encompasses approximately 930 acres, with a potential for 29,100 new housing units by 2040, of which 4,365 to 7,275 will be affordable units. Key issues related to housing that the zoning update will address include:

- **Establish development hierarchy based on land use character and intensity maps.** The Land Use Character Map and Intensity Map establishes a clear development hierarchy for downtown, depicting nodes and corridors of activity and intensity, as well as transitions to areas of preservation and less intensity. New development downtown should be consistent with the overall community vision established by this Plan.

- **Unlock bonus development potential in exchange for needed community benefits.** The Plan will ensure that downtown's continued growth and revitalization provides community benefits to local residents and the broader community. As part of the planning effort, the City is studying how "upzoning" areas of downtown would affect land value and, to what extent and through what approaches, this value creation may provide funding for pre-defined community benefits based on Plan goals. A zoning incentive program can apply to development projects of any size, with clearly identified benefits to be provided in exchange for increases in building intensity. The increased intensity allowed can be in the form of increased height, FAR, and/or density (to encourage micro-units and other affordable-by-design residential unit types).

- **Study intensity in General Plan.** The updated zoning regulations for downtown may also include an increase in the FAR and density permitted under the General Plan, particularly for portions of the plan area where an increase in intensity is desired, to be consistent with the proposed new bonus provisions. Increasing the maximum FAR and density in select downtown locations will not only capture value and contribute to community benefits, but it can also add intensity to the downtown without requiring lot aggregation, which often results in overly large building footprints and bulky podiums.

- **Include update to Jack London area zoning.** The zoning for the Jack London area dates to the 1960s and is inconsistent with the General Plan. The area was not included in recent 2009 and 2011 citywide zoning updates. Implementation of the Downtown Plan will make the zoning for the Jack London district consistent with the community vision to create an iconic waterfront that is a regional and local amenity with dining, living, entertainment, and civic uses.

- **Streamline approvals, create predictable outcomes.** A goal for the downtown zoning amendments should be to streamline the project approvals process and offer predictability for developers and the community. This can be done by clearly defining the desired urban form and maximum intensity of future development, including identified community benefits that should be provided in exchange for any bonus intensity.

- **Designate office opportunity sites.** Estimates of Downtown Oakland's potential capture of additional office space demand over the next 20 years vary from 10 million to 20 million square feet of space, and significantly more over additional time. Office Priority Sites are identified near BART stations within the Mixed-use Downtown Core Character area. Zoning updates for these identified Office Priority Sites can require new mixed-use

development that has a designated percentage of gross floor area to be dedicated to commercial office space.

Density Bonus

The State Density Bonus Law requires local governments to provide a density increase over the otherwise maximum allowable residential density, along with other incentives for the production of below market-rate housing units, when builders agree to construct housing developments with units affordable to lower- or moderate-income households. Historically, developers infrequently sought density bonuses in Oakland due to the fairly high residential densities permitted in the City. However, the City has seen an uptick in recent years as a means of builders receiving not only a bonus in allowable density, but also relaxation of various development standards that may otherwise preclude construction or increase costs.

Density bonus standards in Oakland are contained in Chapter 17.107 of the Planning Code. The Density Bonus Ordinance was updated in April 2014, and amended again in April 2022, to remain consistent with State law. Prior to this most recent revision, Oakland implemented its local density bonus program in the manner required to ensure consistency with State law. Oakland anticipates that the State Density Bonus Law will continue to be revised by the State legislature in future years. As a result, Chapter 17.107 provides that any provision of the State Density Bonus Law, California Government Code Sections 65915 through 65918, but not included in Chapter 17.107 shall nonetheless be considered valid and applicable to density bonus projects in the City of Oakland. Oakland's density bonus ordinance provides for density bonuses to both for-sale and rental housing development projects that include deed-restricted moderate income units, while state law applies to moderate-income units only in for-sale housing developments.

Recent changes to State Density Bonus Law have significantly expanded incentives for 100 percent affordable, special needs and mixed-income projects located near transit. For example, Assembly Bills 2345 (2020) and 1763 (2019) aim to greatly facilitate affordable housing production, especially 100 percent affordable housing development production. The City of Oakland has implemented the provisions of these amendments at the time that they went into effect and have incorporated those amendments into the latest revision to Chapter 17.107.

In addition to implementing the California Density Bonus law, Oakland has available additional local density bonuses, including a Senior Housing Density Bonus and a Planned Unit Development (PUD) bonus.[9] The City of Oakland Senior Housing Density Bonus, Oakland Planning Code Section 17.106.060, provides for an increase of 75 percent more senior housing units than otherwise permitted by zoning if a conditional use permit is approved. An applicant may choose whether to seek the Oakland Senior Housing Density Bonus or to utilize the State Density Bonus for senior citizen housing developments, but cannot combine the two. In addition, the City of Oakland's

[9] A PUD is a large, integrated development adhering to a comprehensive plan and located on land equaling 60,000 or more square feet in size. Certain uses may be permitted in addition to those otherwise allowed in the underlying zone, certain of the other regulations applying in said zone may be waived or modified, and the normally required design review process may also be waived for developments at the time of initial granting of a PUD permit. The PUD density bonus permits an increase of density by up to 33 percent (except in the RH and RD-1 zones) if the development contains detached buildings each containing only one living unit; townhouse or similar single-family semi-detached or attached buildings each containing only one living unit; buildings each containing two living units and; buildings each containing more than two living units.

flexible Planned Unit Development procedures offer varying special bonuses for worthwhile projects, some of which include increases in overall density. When a project seeks both a Planned Unit Development and State Density Bonus, the Planned Unit Development bonus is calculated first, up to the General Plan maximum density, and then the State Density bonus is calculated from this new allowed number of units.

According to Annual Progress Reports (APRs) submitted to HCD, 10 projects were permitted between 2018 and 2021 that used density bonus provisions to provide affordable housing. The total capacity of these projects is 1,526 units, including 176 very low-income units, 105 low-income units and 64 moderate-income units. In addition, over the same period, eight density bonus projects were completed with 245 very low-income units, 19 low-income units and 315 market-rate units. For comparison, there were about 169 market-rate projects (excluding single-family homes and ADUs) during this period – meaning 5.9 percent of these projects utilized a density bonus. About 1,526 units were provided in these 169 projects, of which 345 units are provided for lower- and moderate-income households (22.6 percent). Waivers and concessions requested by density bonus projects include reductions in parking requirements, increases in allowable building heights, reductions in usable open space requirements, and eliminating a required loading berth.

On- and Off-Site Improvements

The Oakland Municipal Code requires several on- and off-site improvements for new development, depending on the zone. Site improvements may include those related to streets, sidewalks, water and sewage, landscaping, recreation amenities, and any other public improvements found necessary to mitigate the impacts of new development. Additional site improvements may be required in the City's specific plan areas. Since Oakland is mostly built out, housing in the city is largely located on already subdivided lots. Depending on the potential transportation impacts and the location of redevelopment, off-site infrastructure improvements may be required to satisfy California Environmental Quality Act (CEQA) requirements. Off-site improvements may include transit boarding islands, transit shelters, curb extensions, bike facilities, or pedestrian lighting. Table F-13 summarizes the City's current complete street design standards.

Table F-13: Complete Streets Design Standards, 2022

Street	*Width of Right-of-Way (ft.)*	*Visibility Measured Along the Centerline (ft.)*	*Minimum Radii of Curvature on Centerline of Streets (ft.)*	*Tangent length between all reversed curves (ft.)*
Arterial	80	300	500	150
Collector	60	200	300	150
Local	40	100	100	50
Blind	50	-	-	-
Alley	26	-	-	-

Source: Oakland Municipal Code, Chapter 16.16 Design Standards, 2022

Per the City's Standard Conditions of Approval, all land use projects that generate more than 50 net new a.m. or p.m. peak hour vehicle trips must prepare a Transportation and Parking Demand Management (TDM) Plan as early as feasible in the planning process. Mandatory strategies that must be incorporated into a TDM plan based on a project location or other characteristics are provided in Table F-14 below.[10]

[10] City of Oakland Transportation Impact Review Guidelines (TIRG) are available on the City's website: https://cao-94612.s3.amazonaws.com/documents/oak063581.pdf

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
Bus boarding bulbs or islands	• A bus boarding bulb or island does not already exist and a bus stop is located along the project frontage; and/or • A bus stop along the project frontage serves a route with 15 minutes or better peak hour service and has a shared bus-bike lane curb
Bus shelter	• A stop with no shelter is located within the project frontage, or • The project is located within 0.10 miles of a flag stop with 25 or more boardings per day
Concrete bus pad	• A bus stop is located along the project frontage and a concrete bus pad does not already exist
Curb extensions or bulb-outs	• Identified as an improvement within site analysis
Implementation of a corridor-level bikeway improvement	• A buffered Class II or Class IV bikeway facility is in a local or county adopted plan within 0.10 miles of the project location; and • The project would generate 500 or more daily bicycle trips
Implementation of a corridor-level transit capital improvement	• A high-quality transit facility is in a local or county adopted plan within 0.25 miles of the project location; and • The project would generate 400 or more peak period transit trips
Installation of amenities such as lighting; pedestrian-oriented green infrastructure, trees, or other greening landscape; and trash receptacles per the Pedestrian Master Plan and any applicable streetscape plan.	• Always required
Installation of safety improvements identified in the Pedestrian Master Plan (such as crosswalk striping, curb ramps, count down signals, bulb outs, etc.)	• When improvements are identified in the Pedestrian Master Plan along project frontage or at an adjacent intersection
In-street bicycle corral	• A project includes more than 10,000 square feet of ground floor retail, is located along a Tier 1 bikeway, and on-street vehicle parking is provided along the project frontages.
Intersection improvements[2]	• Identified as an improvement within site analysis

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
New sidewalk, curb ramps, curb and gutter meeting current City and ADA standards	• Always required
No monthly permits and establish minimum price floor for public parking[3]	• If proposed parking ratio exceeds 1:1000 sf (commercial)
Parking garage is designed with retrofit capability	• Optional if proposed parking ratio exceeds 1:1.25 (residential) or 1:1000 sf (commercial)
Parking space reserved for car share	• A project is located within downtown. One car share space preserved for buildings between 50 – 200 units, then one car share space per 200 units.
Paving, lane striping or restriping (vehicle and bicycle), and signs to midpoint of street section	• Typically required
Pedestrian crossing improvements, pedestrian-supportive signal changes[4]	• Identified as an improvement within site analysis • Identified as an improvement within operations analysis
Real-time transit information system	• A project frontage block includes a bus stop or BART station and is along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better
Relocating bus stops to far side	• A project is located within 0.10 mile of any active bus stop that is currently near-side
Signal upgrades[5]	• Project size exceeds 100 residential units, 80,000 sf of retail, or 100,000 sf of commercial; and • Project frontage abuts an intersection with signal infrastructure older than 15 years
Transit queue jumps	• Identified as a needed improvement within operations analysis of a project with frontage along a Tier 1 transit route with 2 or more routes or peak period frequency of 15 minutes or better
Trenching and placement of conduit for providing traffic signal interconnect	• Project size exceeds 100 units, 80,000 sf of retail, or 100,000 sf of commercial; and

Table F-14: Required/Mandatory TDM Strategies[1]

Improvement	*Required by Code or When…*
	• Project frontage block is identified for signal interconnect improvements as part of a planned ITS improvement; and • A major transit improvement is identified within operations analysis requiring traffic signal interconnect
Unbundled parking	• If proposed parking ratio exceeds 1:1.25 (residential)

1. AC Transit must be consulted for any transit related elements.

2. Including but not limited to visibility improvements, shortening corner radii, pedestrian safety islands, accounting for pedestrian desire lines.

3. May also provide a cash incentive or transit pass alternative to a free parking space in commercial properties.

4. Including but not limited to reducing signal cycle lengths to less than 90 seconds to avoid pedestrian crossings against the signal, providing a leading pedestrian interval, provide a “scramble” signal phase where appropriate.

5. Including typical traffic lights, pedestrian signals, bike actuated signals, transit only signals.

Source: City of Oakland, Transportation Impact Review Guidelines, 2017

While on- and off-site improvements increase the costs of development, they are required to mitigate the impact of new development on the City's infrastructure and are largely unavoidable. However, the City attempts to mitigate the impact on affordable housing through the use of regulatory incentives, funding assistance, and other strategies. Further, Oakland's requirements were not identified as a significant constraint during outreach with affordable housing developers.

Building Codes and Enforcement

Oakland adopts the California Model Building Codes (CMBC) established by the California Building Standards Commission (CBSC) through Title 24 of the California Code of Regulations, which was last updated in 2022. The CMBC establish the minimum requirements to safeguard the public health, safety and general welfare through structural strength, means of egress facilities, stability, access to persons with disabilities, sanitation, adequate lighting and ventilation and energy conservation; safety to life and property from fire and other hazards attributed to the built environment; and to provide safety to fire fighters and emergency responders during emergency operations. Local jurisdictions are required to enforce the CMBC but may also enact more stringent amendments to the CMBC based on climatic, geological, or topographical conditions. Oakland's modifications to the CMBC are generally for the purpose of protecting health and safety in areas subject to natural hazards. Local amendments that may increase development costs are largely related to fire risks, habitability issues, topography, and seismic risks. These amendments do not substantially differ from those of other cities within Alameda County and thus are not considered to act as a constraint on the development of housing.[11] While requirements may lead to increased costs of construction, reducing building code requirements may lead to long-term health and safety risks, particularly in a seismically active area like Oakland.

The City's Planning & Building Department reviews all new construction and improvements to existing structures in Oakland. Building services performed include field inspections, plan reviews, and permit issuance in person or electronically. Planning & Building allows users to apply for selected permits, check on the status of permits, research property records, and print permits or inspection cards via the Online Permit Center. The Green Building Code, or CALGreen, applies to most new residential construction (including affordable housing construction). Both single-family and multifamily units must meet CALGreen mandatory measures for residential new construction, as do Category 2 ADUs. Depending on the project, Oakland's green building requirements may also apply.[12]

When applying for building permits, applicants may be required to undergo the Plan Check process. During Plan Check, City engineers review development plans for compliance with applicable codes and regulations. This can include compliance with applicable local, State and federal laws to ensure access for disabled persons. Plans may need to be submitted to the Fire

[11] The latest local amendments, including standard findings, are available at the following link: https://oakland.legistar.com/LegislationDetail.aspx?ID=4212920&GUID=C9824F8B-AF8B-44CE-B43A-BC83BFC2FD34

[12] https://www.oaklandca.gov/topics/green-building

Prevention Bureau for initial review, or may be routed for concurrent review during the Building Plan Check process.

Upon issuance of a building permit, the following inspections are typically required – pre-construction, pre-pour/foundation stage, framing stage, rough-in/frame stage, insulation, drywall/lath/gas test, and final. A final inspection is called in when all related permits have an approved rough-in inspection. To increase predictability during the construction process, the City provides resources on its website of what is typically required.[13]

Code Enforcement Services carries out the City's enforcement program to address violations of the Oakland Municipal Codes, City ordinances, and land use regulations. Code Enforcement Services uses progressive enforcement to follow up on complaints – property owners are notified through the U.S. Postal Services. When a violation is verified by a Building Inspector a Notice of Violation is issued that includes a list of violations and corrections that must be made. The property owner has 30 days to correct the violation. Residents are able to file a complaint via the Accela Citizen Access Portal. Code enforcement efforts are also linked to housing rehabilitation efforts – if an inspection results in an Order to Abate – Habitability or a if a property is a Substandard Public Nuisance a Compliance Plan may be required. Compliance Plans are agreements with the property owner/agent/buyer to rehabilitate the property, correct housing violations, and pay fee assessments in an agreed timeline. The Investor-Owned Residential Property Registration, Inspection & Rehabilitation Program also ensures the regular inspection and maintenance of properties with a default or foreclosure history that have non-owner occupant buyers.

Efforts to comply with State Health and Safety Code Section 17980, related to the abatement of substandard buildings, are contained in Section 15.08.110 of the Oakland Municipal Code and require notice to residential tenants of buildings deemed substandard. Further, under the Code Compliance Relocation Program, residential tenants who are displaced due to actions taken to address violations of City of Oakland building codes may be eligible for relocation benefits from the property owner, pursuant to Oakland Municipal Code Section 15.60.

PROVISION FOR A VARIETY OF HOUSING TYPES

The Housing Element must identify adequate sites that are available for the development of housing types for all economic segments of the population, including those populations with special needs. This section summarizes the extent to which various housing types are permitted in the city, as well as any constraints that may be contained in City regulations.

Accessory Dwelling Units (ADUs)

Accessory Dwelling Units (ADUs)—formerly known as secondary or granny units—are attached or detached units that provide complete independent living facilities for one or more persons and are located on a lot with a proposed or existing primary residence. An ADU must include permanent provisions for living, sleeping, cooking, and sanitation, located on the same lot as a

[13] See Building Bureau resources at the following links: https://cao-94612.s3.amazonaws.com/documents/What-to-expect-during-your-City-of-Oakland-Building-Inspection-4.2021.pdf and https://cao-94612.s3.amazonaws.com/documents/Overview-of-Planning-and-Building-Inspection-Types.pdf

single-family or multifamily structure. By their nature, ADUs tend to cost less to construct because they do not involve the purchase of land. The California legislature has found that ADUs often provide housing for family members, students, the elderly, in-home health care providers, the disabled, and others, at below market prices within existing neighborhoods. As noted by the Terner Center for Housing Innovation and the Center for Community Innovation, in higher-wealth areas, ADU construction is providing new housing supply with access to existing resources, and in lower-income areas, new ADUs are helping to reduce overcrowding, provide new rental income, and build home equity.[14] Several pieces of recent State legislation modified regulations for ADUs with the intent and effect of encouraging their construction. Some of the key changes included prohibiting standards related to lot coverage standards, lot size, FARs, or open space that may impede the development of ADUs, reducing review time for permit applications, and reducing regulations related to parking, height, setbacks, and unit size.

In Oakland, ADUs are regulated by Section 17.103.080 of the Planning Code. New regulations for ADUs were adopted by the City Council in January 2022 to meet the State law requirements. The Planning Code differentiates between a Category One and Category Two ADU. Category One units are those that are located entirely within a One-Family Residential Facility or detached accessory structure and involve no expansion of the existing building envelope. Category Two units are those that a) are not entirely within the building envelope of a One-Family Residential Facility or detached accessory structure; and b) involve either construction of a new structure, or an exterior addition to an existing structure. In addition, Multifamily Category One ADUs are conversions of existing non-habitable space within an existing multifamily building; Multifamily Category Two ADUs are newly constructed detached ADUs or conversions of an existing detached accessory structure; and Multifamily Category Three ADUs are interior or attached to the primary structure. All ADUs are subject to ministerial approval and regulations related to occupancy, sale of unit, parking configuration, fire sprinklers, and compliance with building and fire codes. The relevant standards for ADUs are shown in Table F-15.

The City's Planning Code also lays out requirements for junior accessory dwelling units (JADU) and meets the State law for them. According to State law, JADUs involve the conversion of space within the building envelope of an existing or proposed single-family dwelling, resulting in a living unit of not more than 500 square feet, requiring owner-occupancy in the JADU or primary dwelling unit. In comparison to the 1,000 square foot maximum for Category Two ADUs that are detached in Oakland, both the City of Berkeley and the City of Emeryville permits a 1,200 square foot maximum for detached ADUs. Oakland does allow for a 1,200 square foot for Category Two ADU that is attached or a Category One ADU as well as for a Category Two ADU Oakland has a height limit of 20 feet, which is greater than the minimum 16-foot height limit that the State requires. Housing Action Plan policies 3.2.5 reduce constraints to the development of ADUs, and 3.2.6 commits the City to monitoring affordability of permitted ADUs.

Live-Work Units

Live-work units are properties that combine residential and non-residential uses in either commercial or residentially zoned areas. There are numerous types of live-work units that are permitted in the city as outlined in Table F-16. The City makes a distinction between live/work and work/live units. They define live/work units as those that accommodate both residential and non-residential activities, while work/live units are primarily non-residential with an accessory residential area. These units are generally permitted within the commercial districts and must meet certain criteria. Live/work units are also permitted in HBX and D-CE zoning districts, and work/live units are permitted, under limited circumstances, in industrial zones.

All live-work units are subject to Building Code requirements which may be costly to update and have a significant effect on the function and layout of these units, particularly in terms of Americans with Disabilities Act (ADA) access and bathroom configuration.

For comparison, the City of Berkeley permits live-work units by right in all commercial districts except C-SA and C-W, which require a use permit or an administrative use permit. Live-work units are not permitted in all residential districts. In the City of Emeryville, live-work units in residential zones are subject to on-premises sales and work is restricted to occupants. In a residential zone, no live-work building may be converted to wholly nonresidential uses; however, it may be converted to wholly residential uses. In a nonresidential zone, any live-work building may be converted to wholly nonresidential uses which are permitted in that zone. Action 3.2.2. updates development standards, building codes, and land use regulations to promote artist housing, including joint living and working quarters (JLWQs) in areas where appropriate under the General Plan.

Table F-16: Live-Work Units, 2022

Type	*Description*	*Permitted Zones*
JLWQ	Joint Living and Working Quarters (JLWQs) are live/work units resulting from the conversion of part or all of a building that was originally constructed for commercial or industrial activities.	Zones that permit or conditionally permit residential dwelling units.
Residentially Oriented JLWQ	Residentially Oriented JLWQs are live/work units resulting from the conversion of part or all of a building that is both: 1) originally constructed for nonresidential activities, and 2) at least ten years old.	Within the area bounded by Highway 980/Brush Street, the Estuary shoreline, the Lake Merritt/Estuary channel, the western shore of Lake Merritt, and 27th Street. Unlike standard JLWQs, Residentially Oriented JLWQs can only be in the Downtown and Jack London Square area.
HBX Work/Live and Live/Work Units	HBX work/live and live/work units are nonresidential facilities that can be established within an existing building, an expansion of an existing building, or a new building.	Housing and Business Mix (HBX) Zones
D-CE Work/Live and Live/Work Units	D-CE work/live and live/work units are nonresidential facilities that can be established within an existing building, an expansion of an existing building, or a new building.	Central Estuary District (D-CE) -3, -4, and -5 Zones
Industrial Work/Live Units	Work/live units established as part of a new building or the conversion of an existing building if the site is within 300 feet of a Residential Zone.	CIX, IO, and IG Zones. Industrial work/live units are not permitted in the IG or IO Zones, except the legalization of existing units that house artists are conditionally permitted anywhere in the CIX, IG, and IO Zones.
Work/Live Units in Additions and	Live/work and work/live units in a newly constructed building or expansion of an	CIX, IO, IG, HBX, D-CE Zones

Manufactured Housing and Mobile Home Parks

Manufactured homes, also referred to as factory-built homes or modular homes, consist of a residential building or dwelling unit which is either wholly or partially constructed or assembled off-site. Manufactured housing is typically constructed off-site and installed on a foundation, which is significantly less costly than the construction of individual single-family homes on site.

Mobile home parks were previously permitted in the Mobile Home Combining (S-6) Zone. This zone was intended to create, preserve, and enhance areas containing attractive mobile home parks, and is typically appropriate to a variety of living environments with good access to major thoroughfares.

The Oakland Construction Innovation and Expanded Housing Options Ordinance (No. 13666), passed into law in November 2021, aimed to address the city's increasing cost of building housing, while increasing housing options and affordability to residents. The ordinance updated the City's zoning regulations to:

- Allow residential occupancy of recreational vehicles (RVs) and tiny homes on wheels ("Vehicular Residential Facilities") on private property subject to certain health and safety standards;
- Allow mobile homes and manufactured homes in all zoning districts where residential uses are permitted;
- Establish density and open space regulations for efficiency dwelling units; and
- Establish height regulations for modular construction.
- In addition, the Ordinance amended the Oakland Building Code to allow light straw-clay construction.

Housing for Persons with Disabilities

California Government Code 65583 requires jurisdictions to analyze potential and actual constraints that could affect the development, maintenance, and improvement of housing for persons with disabilities. Further, the Lanterman Developmental Disabilities Services Act and Community Care Facilities Act states that mentally, physically, developmentally disabled persons and children and adults who require supervised care are entitled to live in normal residential settings. To that end, State law requires that licensed family care homes, foster homes, and group homes serving six or fewer persons be treated like single-family homes and be allowed by right in all residential zones. In addition, both the Federal Fair Housing Act and the California Fair Employment and Housing Act place an affirmative duty on jurisdictions to make reasonable

accommodations in their zoning and other land use regulations as necessary to afford disabled persons an equal opportunity to use and enjoy a dwelling. The following sections provide a summary of the relevant portions of Oakland's Zoning Code that address these requirements, as well as any potential constraints.

In Section 17.09.040 of the Oakland Planning Code, a family is defined as "one person, or a group of people living together as a single housekeeping unit, together with any incidental domestic servants and temporary nonpaying guests."

Reasonable Accommodation

While the City's Planning & Building Department implements the reasonable accommodation requirements in the California Building Code, Chapter 17.131 further outlines reasonable accommodations policy and procedures in the City's Planning Code. The intent of this chapter is to provide flexibility in the application of the Planning Code for individuals with a disability when flexibility is necessary to eliminate barriers to housing opportunities. The chapter facilitates compliance with federal and State fair housing laws and promotes housing opportunities for residents of Oakland.

The reasonable accommodation procedure is a ministerial process. The Planning Director, or his or her designee, shall have the authority to consider and act on requests for reasonable accommodation and shall make reasonable accommodations in rules, policies, practices, or services when those accommodations may be necessary to afford persons with disabilities equal opportunities to use and enjoy the dwelling. "Category A" Requests are requests for accommodation from development regulations not specified as a "Category B" request, including but not limited to, setbacks, building height limits and parking regulations in the Planning Code, or for any additions to Residential Facilities which meet the definition of a "Small Project," as defined in Section 17.136.030(B), shall be considered "Category A" requests. A proposal will qualify for "Category A" Request if it meets each of the provisions set forth below.

- The proposal is limited to one or more of the types of work listed as "Category A" request in 17.131.040(B)(1); and

- The accommodation is necessary to afford people with disabilities an equal opportunity to use and enjoy the dwelling.

"Category B" Requests are requests for accommodation from residential density regulations in the Planning Code; distance separation requirements in the Planning Code; land use activities not permitted by the Planning Code; any additions to Residential Facilities which meet the definition of "Regular design review" as defined in Section 17.136.040(A); and any other accommodations request, under the discretion of the Planning Director, shall be considered "Category B" requests. A proposal will qualify for "Category B" Request if it meets each of the provisions set forth below.

- That the housing, which is the subject of the request for reasonable accommodation, will be used by people with disabilities protected under fair housing laws;

- That the accommodation is necessary to afford people with disabilities an equal opportunity to use and enjoy the dwelling;

- That the requested accommodation will not require a fundamental alteration to zoning laws, rules, policies, practices and procedures; and

- That the requested accommodation will not impose an undue financial or administrative burden on the City.

Residential Care Facilities

Residential care facilities include facilities that require a State license or are State-licensed for seven or more residents which provide twenty-four hour primarily nonmedical care and supervision as defined in the City's Planning Code. Occupancy of living accommodations by six or fewer residents are excluded and are treated as single-family dwellings. Currently, residential care facilities are permitted in residential zones if located in single family dwellings, but require conditional use permits if located in any other residential facility type. Additionally, this also includes requirements that they be located no closer than 300 feet from any other facility, and require parking demand generation and noise not be substantially greater than normally generated by surrounding residential activities. Residential care facilities are permitted in non-residential zones if they are located in single family dwellings, but require conditional use permits if located in any other residential facility type and/or when located on the ground floor of a street fronting building., though Incidental pedestrian entrances that lead to one of these activities elsewhere in the building are exempted from this Conditional Use Permit requirement. Currently, residential care facilities in CC zones are also required to comply with each of the following additional criteria:

1. That the proposal will not detract from the character desired for the area;

2. That the proposal will not impair a generally continuous wall of building facades;

3. That the proposal will not weaken the concentration and continuity of retail facilities at ground level, and will not impair the retention or creation of an important shopping frontage;

4. That the proposal will not interfere with the movement of people along an important pedestrian street; and

5. That the proposal will conform in all significant respects with any applicable district plan which has been adopted by the City Council.

Residential care facilities require one parking space for each three employees on site during the shift that has maximum staffing, and one space for each facility vehicle. Where more than two spaces are required, additional spaces beyond two may be provided in tandem.

While the City has not denied permits for residential care facilities in the past few years, the City will amend the Zoning Code to allow residential care facilities by-right in all residential facility types; allow residential care facilities by-right in the ground floor in non-residential zones; add standard conditions of approval (in place of conditional use permits); and add an exemption to the

overconcentration restriction that allows residential care facilities for foster family homes and the elderly within 300 feet of another residential care facility to align with State licensing overconcentration requirements in California Health and Safety Code Section 1520. 5 (see Action 3.7.8).

Housing for Persons Experiencing Homelessness

Persons experiencing homelessness are identified as a special needs group and may require specialized forms of housing, including emergency shelters, transitional and supportive housing, low barrier navigation centers, and single room occupancy (SRO) units. The City also has 85 Project Homekey-funded sites. The following sections summarize City requirements for the various forms of housing that can meet the needs of the population experiencing homelessness.

Emergency Shelters

Emergency shelters include the provision of short-term housing, with or without a fee, to individuals and families who are homeless and who may require special services. According to 2020 Homeless Management Information System (HMIS) data, the Oakland, Berkeley/Alameda County Continuum of Care contains 2,032 total year-round beds, including 1,383 emergency shelter beds.

Emergency shelter for homeless individuals and families is permitted by right, without discretionary action, in eight areas throughout the City, subject to objective development and location standards, which are codified in the Oakland Planning Code Section 17.103. These areas are displayed in Figure F-2 below, and described in further detail below along with the HCD/TCAC Opportunity Area designation. Analysis of the currently designated areas for by right approval of emergency shelters shows that high-resource areas are underrepresented, and no higher resource areas overlap with the by right designated areas. To redress this, the Housing Action Plan (Chapter 4) includes actions under Policy 4.3 to provide greater opportunities for emergency shelters, including by providing for by right approval throughout the city when located on properties with religious institutions and similar community assembly civic activities (see Action 4.3.6).

- Segment 1 – the portion of Martin Luther King Jr. Way between 51st Street and the City of Oakland City Limits (Moderate and High Resource). This includes approximately 20 acres of land with parcels sizes averaging approximately 0.3 acres but ranging between 2,000 square feet to 7 acres. These parcels predominantly have existing uses. Portions of Segment 1 have public transportation through the Ashby and MacArthur BART Stations, and the entirety of the corridor is served by AC Transit. Segment 1 is designated in the Oakland General Plan for Mixed Use Residential, Urban Residential, and Neighborhood Commercial uses.

- Segment 2- the portion of San Pablo Boulevard between 53rd Street and the City of Oakland City Limits (Moderate Resource). This includes approximately 42 acres of land with parcel sizes averaging approximately 0.2 acres. City records have identified at least 11 vacant lots within Segment 2. Segment 2 is well served by public transportation through AC Transit lines 72, 72M, and 72R. Segment 2 is designated in the Oakland General Plan for Community Commercial and Neighborhood Commercial uses.

- Segment 3 – the portion of the area surrounding Webster Street bounded by 29th Street to the south, the I-580 overpass to the north, Elm Street to the west, and Webster Street to the east (Low Resource). This includes approximately 36 acres of land with parcel sizes averaging 0.4 acres. City records have identified at least 3 vacant lots within Segment 3. Segment 3 is well served by public transportation on Telegraph Avenue and Broadway provided by AC Transit. Segment 3 is designated in the Oakland General Plan for Institutional Uses and is zoned S-1 (Medical Center).

- Segment 4 – the portion of San Pablo Boulevard lying between Grand Avenue and I-580 (Low Resource). This includes approximately 34 acres of land with parcel sizes averaging 0.2 acres. City records have identified at least 33 vacant lots within Segment 4. Segment 4 is well served by public transportation through AC Transit lines 72, 72M, and 72R. Segment 4 is designated in the Oakland General Plan for Urban Residential and Community Commercial uses.

- Segment 5 – the area surrounding Third Street bounded by Martin Luther King Jr. Way to the east, Fifth Street to the north, Embarcadero West to the south, and Union Street to the west (mid of Low, Moderate, and High Resource). This includes approximately 80 acres of land with parcel sizes averaging 0.6 acres. City records have identified at least 19 vacant lots within Segment 5. Portions of Segment 5 is served by public transportation through the West Oakland BART station. Segment 5 is predominantly designated under the General Plan for Business Mix uses.

- Segment 6 – the portion of E. 12th Street between 14th Avenue and 23rd Avenue (High Segregation & Poverty). This includes approximately 37 acres of land with parcel sizes averaging 0.4 acres. City records have identified at least 14 vacant lots within Segment 6. Segment 6 is well served by public transportation through the AC Transit Tempo Bus Rapid Transit line. Segment 6 is predominantly designated under the General Plan for Business Mix uses.

- Segment 7 – the portion of MacArthur Boulevard between Fruitvale Avenue and High Street (Low and Moderate Resource). This includes approximately 68 acres of land with parcel sizes averaging 0.2 acres. City records have identified at least 121 vacant lots within Segment 7. Segment 7 is well served by multiple AC Transit lines, including the 54 line providing connections to Fruitvale BART. Segment 7 is designated in the Oakland General Plan for Neighborhood Commercial and Urban Residential uses.

- Segment 8 – the area of Coliseum Way bounded by San Leandro Street to the north, I-880 to the south, 66th Avenue to the east, and High Street to the west (Low Resource). This includes approximately 227 acres of land with parcel sizes averaging 1.1 acres. City records have identified at least 34 vacant lots within Segment 8. Portions of Segment 8 have limited public transportation options, either by walking to AC Transit options along San Leandro Street or by walking to the Coliseum BART station. Segment 8 is designated in the Oakland General Plan for General Industry and Transportation and Business Mix uses.

The City of Oakland has declared a local shelter crisis. For the duration of that declared emergency, emergency shelters are permitted by right with no discretionary approvals, including design review,

on all properties owned or leased by the City that are designated by the City Administrator for use as temporary emergency housing sites. See Oakland Planning Code Section 17.07.060 for further details on implementation.

Additionally, emergency shelters are conditionally permitted in high-density residential zones and several commercial zones. Conditionally permitting alternative housing in all high-density residential zones and most commercial zones further increases housing opportunities and the feasibility of accommodating affordable housing in Oakland. Historically, the CUP process and conditions imposed have not created significant constraints to locating residential uses for special need groups in residential or commercial zones; rather it is the absence of a dependable source of funds for the social services agencies who provide these services which constrains the housing from being built. But in order to limit the possibilities that the permitting process would act as a constraint, the Housing Action Plan (Chapter 4) includes actions under Policy 4.3 to reduce this from a major conditional use permit requirement to a minor conditional use permit requirement, which means the permit would be issued at the staff level and appealable only to the Planning Commission.

Development of shelter facilities is further facilitated by a relaxation of parking standards well below those required for ordinary residential facilities, in recognition of the fact that most homeless persons do not have vehicles and thus a requirement for parking would be an unnecessary constraint. The City requires one parking space for each three employees on site during the shift that has maximum staffing, plus one space for each facility vehicle, consistent with requirements in AB 139.

Transitional, Supportive, and Semi-Transient Housing

The Oakland Planning Code defines transitional, supportive, and semi-transient housing as follows:

- **Transitional Housing:** includes housing configured as rental housing developments, but operated under program requirements that call for the termination of assistance and recirculation of the assisted unit to another eligible program recipient at some predetermined future point in time, which shall be no less than six (6) months from beginning of assistance. As noted in Tables F-4 through F-6, transitional housing is permitted as a use distinct from other permanent residential types and is permitted differently than other residential uses in some zoning districts. This will be corrected as part of the Housing Action Plan (Action 4.3.3).

- **Supportive Housing:** includes housing with (a) no limit on length of stay; (b) that is linked to an onsite or offsite service that assist the supportive housing resident in retaining the housing, improving his or her health status, and maximizing his or her ability to live and, when possible, work in the community; and (c) that is occupied by a target population (as defined in subdivision (g) of Government Code Section 65582). As noted in Tables F-4 through F-6, supportive housing is permitted as a use distinct from other permanent residential types and is permitted differently than other residential uses in some zoning districts. This will be corrected as part of the Housing Action Plan. Supportive housing is required under state law to be a use by right in zones where multifamily and mixed uses

are permitted, including nonresidential zones permitting multifamily uses, if the proposed housing development satisfies the requirements listed in Government Code Section 65651. To date, the City of Oakland has received two development application utilizing this provision but anticipates receiving more in the future. At the time of publication of this document, one of the two applications—PLN22172—has been determined eligible for streamlining and now has an approved entitlement for 40 lower income supportive housing units; the other—PLN22168—is assigned and undergoing review. The Housing Action Plan will include an action to redefine Supportive Housing to clarify that projects that meet the requirements of Government Code Section 65651 will be permitted by right without discretionary review (Action 4.3.3).

- **Semi-Transient Housing:** include the occupancy of living accommodations partly on a 30 days or longer basis and partly for a shorter time period, but with less than 30 percent of the living units under the same ownership or management on the same lot being occupied on a less-than-thirty-days basis; but exclude institutional living arrangements involving the provision of a special kind of care or forced residence, such as in nursing homes, orphanages, asylums, and prisons.

Low Barrier Navigation Centers

Recent State law, including AB 101, requires that low barrier navigation centers for persons experiencing homelessness be allowed by right and without any discretionary approval within the local jurisdiction. Currently, the City does not provide a definition for "low barrier navigation centers" nor does it provide specific regulations for the development of these facilities. The City will address this as part of the Housing Action Plan (see Action 4.3.5: Provide development standards for Low Barrier Navigation Centers).

Figure F-2: Approved Locations for Permitting Emergency Shelters By-Right, 2022

Source: City of Oakland, 2022

Single Room Occupancy (SRO)

Single-room occupancy units (SROs)—called Residential Hotels in the Oakland Planning Code—are defined in accordance with California Health and Safety Code Section 50519, and refer to any building built before 1960 containing six or more rooming units, intended or designed to be used, or which are used, rented, or hired out, to be occupied, or which are occupied, for sleeping purposes by guests, which is also the primary residence of those guests, and where the entrances to the individual units are generally accessed via a shared lobby area.

SROs are an essential component of the city's supply of naturally occurring affordable housing, as they are a flexible and easily accessible form of housing that provides very-low-, and extremely-low-income residents the ability to remain in Oakland and avoid homelessness. To that end, on December 4, 2018, the Oakland City Council adopted new Planning Code Chapter 17.153, which regulates the conversion, demolition, rehabilitation, and sale of Residential Hotels to protect this important type of housing. The purpose of the chapter is to benefit the general public by minimizing the adverse impact on the housing supply and on displaced very-low- and extremely-low-income, elderly, and disabled persons, which results from the loss of SRO units as a naturally occurring affordable housing option. The ordinance has established a process for identifying and preparing a registry of known existing Residential Hotel Units, and regulates the demolition, conversion and rehabilitation of Residential Hotel Units.

The City has been able to successfully implement the ordinance following adoption. The Planning Bureau has largely gone through the process of confirming the status of individual properties as residential hotels, and has flagged all properties in the Accela permitting system. If the Planning & Building Department receives an application for renovations or other projects pertaining to these properties, the application is routed to appropriate Planning staff. Staff can then review the residential hotel certificate of status for the property and compare it to the proposal to see if it proposes any amenity rehabilitation that is prohibited under the ordinance, or whether it would require a CUP meeting the requirements under Planning Code Chapter 17.153 to provide equivalent low-income housing. There have not been any CUPs issued or sought under Chapter 17.153, which means that residential hotels have been successfully preserved in their status quo. There have been some applications for amenity rehabilitation, often in buildings that have been vacant for 10 or more years.

Efficiency Dwelling Units and Rooming Units

Efficiency Dwelling Units are defined in the Oakland Planning Code as studio units, with kitchens, under 400 square feet. Rooming units are defined as units without kitchens, such as those commonly found in SROs. Both are a smaller unit formats, which typically cost less to build and are likely to be provided at a lower cost.

Efficiency dwelling units can be constructed in all zoning districts in which multifamily housing is permitted as either part of, or the entirety of, multifamily developments. Efficiency units can be constructed at higher density, often at twice the density, than otherwise provided for larger format dwelling units.

As with efficiency dwelling units, rooming units are permitted to be constructed at densities significantly higher, often twice as dense, than the density provided for larger format dwelling units. However, rooming units are only permitted as part of rooming house facilities, a separate residential facility designation. Rooming units currently cannot be included in multifamily dwelling residential facilities. As shown in Table F-4, rooming house facilities are permitted and conditionally permitted in a wide variety of zoning districts similar to multifamily dwelling facilities. But in contrast to multifamily dwelling facilities, rooming houses are not permitted in RM, RU-1, S-15, D-WS, D-CO, D-OK zoning districts and are conditionally permitted rather than permitted in RU-2, RU-3, S-15W, zoning districts. The Housing Action Plan includes an action (Action 3.7.6) that would expand districts in which rooming house facilities may be constructed in order to reduce constraints on construction of rooming units, and additionally proposes actions to address an unaddressed need for "intentional community" housing types.

Farmworker and Employee Housing

Farmworkers, people whose primary income comes from permanent or seasonal agricultural labor, are considered to have special housing needs due to their limited income and unstable nature of employment. As discussed in Appendix B, farming is not a major industry in Oakland with only 0.5 percent of Oakland's labor force employed in the "agriculture, forestry, fishing and hunting" industry in 2019. The city is located in a highly urbanized area with no working farms within or adjacent to city limits. Oakland's stock of affordable housing is available to any farmworkers that may reside in the city. Since all affordable housing units are available to farmworkers in Oakland, it is not necessary for the City to establish a specific program or funding for farmworker housing.

Farm and agricultural employee housing is a type of employee housing under the Employee Housing Act, California Health and Safety Code Sections 17000 et seq. Section 17021.5 of the Employee Housing Act requires that any employee housing providing accommodations for six or fewer employees shall be deemed a single-family structure with a residential land use designation, and not be subject to any conditional use permit, zoning variance, or other zoning clearance that is not required of a family dwelling of the same type in the same zone. The Oakland Planning Code's definitions of "family" and "dwelling unit" in Section 17.09.040 do not restrict households to related members of a family or place a limitation on size of a household, but it does not explicitly state that this employee housing type would be treated the same as a single-family structure. The Housing Action Plan (Chapter 4) contains a program to amend the zoning code definitions to provide greater clarity that employee housing for six or fewer employees is treated the same as a single-family structure. The program will also include amendments to ensure the City of Oakland complies with Section 17021.6 of the Employee Housing Act, which require employee housing consisting of no more than 36 beds in a group quarters or 12 units designed for use by a single family or household to be deemed an agricultural land use.

PERMITS AND PROCESSING PROCEDURES

Residential Permit Processing

Housing development can be constrained by long permit processing timelines, which can create uncertainty, increase overall project costs, and ultimately make a project infeasible. A ministerial approval provides the shortest timeline, while a discretionary approval, particularly those with review in front of several adjudicatory bodies, can significantly add to the time required. The

necessary approval process depends on several factors, including the applicable zoning district, the project type, size, and complexity, and the degree to which the project is seeking modifications to the applicable development standards such as through variances, conditional use permits, rezoning, or general plan amendments. This section explores the typical process for a development application in Oakland, including when discretionary approval is required.

The City of Oakland administers the permit process through the Planning and Building Department. Basic steps that are typically required in the approval process include the following:

- **Pre-Application Meeting.** Proposals that involve multiple permit approvals or complex design considerations is typically initiated through a voluntary pre-application review process. The Pre-Application meeting involves the review of preliminary plans and photographs of a proposed project. At this time, staff will evaluate the proposal, review compliance with the General Plan and Planning Code, determine appropriate applications and fees, offer comments on the proposal to meet the General Plan objectives and Planning Code development standards, identify related non-planning issues, and describe the permit process and timeline.

- **Application for Development Review.** The Basic Application for Development Review is an application form filed to accompany all zoning permit applications, and is submitted along with site plans and/or other data to the Planning and Building Department. Significant discretionary actions are the subject of a public hearing before one of several hearing bodies, depending on the specific action.

- **Supplemental Planning Forms.** Most project applications require supplemental forms including findings for Conditional Use Permits (CUPs), design review, and variances.

- **Environmental Review.** Pursuant to the California Environmental Quality Act, projects are required to undergo environmental review to identify significant environmental impacts. Infill development consistent with the General Plan and zoning requirements may be exempt from such review. Depending on project size, environmental review typically takes between 6 and 9 months for projects consistent with the Oakland General Plan and between 12 and 36 months for more complex projects.

The time required to process an application depends primarily on the permit type, size, and complexity of the project and the number of approvals required. Typical timelines for common applications, as well as the relevant approval body, are provided below in Table F-17.

Permit applications for affordable housing developments, as with other multifamily projects, are "deemed complete" within 30 days of submittal. Generally, the City streamlines processes for the issuance of zoning and building permits for affordable housing projects. The City prioritizes affordable housing development during the entitlement process, and actively works with affordable housing developments to ensure that projects can smoothly go through the entire approval process. However, there is limited staff capacity to review projects which can increase the time required for permit approval. Affordable housing developers have emphasized the need for permit streamlining, approving projects by right, reducing permitting costs, and facilitating development on smaller sites.

Table F-17: Application Processing Times, 2022

Application Type	*Approval Body*	*Typical Processing Time[1]*
Residential Design Review	Director of City Planning	9 months
Tentative Parcel Map	Director of City Planning	9-12 months
Parcel Map	City Engineer	5-9 months
Tentative Subdivision Map	Planning Commission	12 months
Major Conditional Use Permit	Planning Commission	9-12 months
Minor Conditional Use Permit	Director of City Planning	9 months
Planned Unit Development	Planning Commission	2 years
Development Agreement	Planning Commission & City Council	3 years
Variance—Major	Planning Commission	9-12 months
Variance—Minor	Director of City Planning	9 months
General Plan Amendment	Planning Commission & City Council	2-3 years
Rezone	Planning Commission & City Council	2-3 years

1. Does not include appeals.

Source: City of Oakland, 2022

Depending on project type and applicable zoning, a project application may be subject to discretionary review. As noted in Table F-4, single-family dwellings are permitted by right in almost every residential zoning district. Two-family dwellings require a CUP in the RD-2 and RM-1 districts, while multifamily dwellings require a CUP in the RM-2 and RM-3 districts. The most common forms of discretionary review and the general ministerial review process are described in further detail below.

Ministerial Review

Projects subject to ministerial review are permitted by right, meaning development approvals require little or no personal judgement by a public official and are granted through reference to objective standards. Although there are a variety of zoning districts in Oakland that permit multifamily development without a conditional use permit, most residential developments are subject to design review – a discretionary process discussed further below. Projects that are currently subject to by-right review that is not subject to CEQA are limited to ADUs, affordable housing and supportive housing streamlining projects (SB 35 and AB 2162), and SB 9 lot splits. Efforts to expand by-right procedures, including for Low Barrier Navigation Centers and affordable developments, are provided in the Housing Action Plan.

Affordable housing developments under Government Code Section 65913.4, commonly referred to as an SB 35 project, are subject to streamlined, ministerial approval. The City processed its first SB 35 affordable housing application in 2018. The City maintains and regularly updates an SB 35

streamlining checklist on its website.[15] Prior to submitting an application for streamlined ministerial approval under SB 35, an applicant must first submit a notice of intent pre-application to the City, which commences the tribal scoping consultation process in accordance with AB 168. Only when the tribal scoping consultation is completed may an applicant submit an application for streamlined ministerial approval. Approvals must be completed within 90 days of submittal (for proposed projects involving 150 or fewer units) or 180 days of submittal (for proposed projects containing more than 150 housing units). As ministerial approvals, these projects are not subject to CEQA under CEQA Guidelines Section 15268.

Design Review

On December 19, 2006, the Oakland City Council adopted design review-related amendments to the Oakland Planning Code (Title 17). The design review framework reduces the number of different review procedures and uniformly applies those procedures citywide. Design review is intended to address the compatibility of new construction and additions with surrounding development and preserve the architectural quality of Oakland's housing stock. There are two types of residential design review processes – regular design review and small project design review (SPDR). Historic properties and landmarks may be subject to additional regulations. Applications for design review are processed concurrently with other planning permits.

Regular design review is required for the construction of all new dwelling units, except for accessory dwelling units (ADUs), projects streamlined under state law such as SB 35 and AB 2162, and those deemed exempt pursuant to Oakland Planning Code Section 17.136.025. Regular design review is a full review process that involves notification to all owners of property within 300 feet of the proposed project. The decision on a regular design review application can be appealed to the City Planning Commission or its Residential Appeals Committee. Projects are reviewed against a set of adopted residential design criteria as well as special design review findings of the individual zoning districts.

Regular design review applicants may submit for pre-application review, and may be requested to do so if the project is of a larger scale or involves a significant policy issue. As noted in Table F-17, residential design review is considered by the Director of City Planning. Residential design review approval may be granted only if the proposal conforms to all of the following general design review criteria, as well as to any and all other applicable design review criteria:

1. That the proposed design will create a building or set of buildings that are well related to the surrounding area in their setting, scale, bulk, height, materials, and textures;

2. That the proposed design will protect, preserve, or enhance desirable neighborhood characteristics;

3. That the proposed design will be sensitive to the topography and landscape;

[15] https://cao-94612.s3.amazonaws.com/documents/2021-New-Construction-NOFA-SB-35-Streamlining-Checklist-PDF.pdf

4. That, if situated on a hill, the design and massing of the proposed building relates to the grade of the hill; and

5. That the proposed design conforms in all significant respects with the Oakland General Plan and with any applicable design review guidelines or criteria, district plan, or development control map which have been adopted by the Planning Commission or City Council.

Application of these design review criteria can impact project cost and timing, and lead to applicant uncertainty about the project review process. As a result, the design review criteria can act as a constraint on housing construction. When evaluating projects for compliance with these criteria, Planning staff utilizes published design guidelines that include both objective and subjective criteria. Applicants are also often required to include photographs of adjacent properties to document the neighborhood context. Relying on both the design guidelines and an analysis of neighborhood context, Planning staff may request design changes to the project to meet the design review criteria. Addressing these comments can extend the approval process by requiring additional rounds of review and revisions to the project to meet the design review criteria. Depending on the project's context and an applicant's resources to make requested revisions, the design review process can add anywhere from weeks, to several months, to a year to the review process. For more complex projects, review of a project's compliance with the design review criteria is provided both at the staff level and through input from members of the Oakland Planning Commission Design Review Committee and other applicable boards. This might result in several rounds of revision and review, resulting in additional impacts to project cost and timing. To address this constraint, the Housing Action Plan proposes Action 3.4.7, the creation and implementation of objective design standards available to all housing development projects. Projects utilizing objective design standards will not be required to independently make findings of compliance with the regular design review criteria.

SPDR applies to all additions citywide of more than 10 percent, but not more than 1,000 square feet or 100 percent of the total floor area or footprint on site, whichever is less. There are three tracks for SPDR approval – based on whether a proposal involves a local register property and the size of an upper-story addition. SPDR was designed to have a quicker turnaround time than other types of zoning permits, including regular design review. A final decision on an application is usually made at the zoning counter, unless the proposal involves an upper-story addition of more than 250 square feet. For SPDR proposals involving an upper-story addition of more than 250 square feet, applicants are required to provide public notice of the project by displaying a large notice poster at the project site and by mailing notice along with a copy of the plans to all adjacent neighbors and properties directly across the street. There is no appeal of the SPDR decision, and approval shall be granted to applications that meet the following criteria:

1. That for Nonresidential Facilities and the nonresidential portions of Mixed-Use Development projects, the proposed design conforms with the adopted checklist criteria for nonresidential facilities, as may be amended;

2. That for Residential Facilities with one or two primary dwelling units and the residential portions of Mixed-Use Development projects with one or two primary dwelling units, the

proposed design conforms with the adopted checklist criteria for facilities with one to two primary dwelling units, as may be amended;

3. That for Residential Facilities with three or more living units and the residential portions of Mixed-Use Development projects with three or more dwelling units, the proposed design conforms with the adopted checklist criteria for facilities with three or more living units, as may be amended; and

4. That for Local Register Properties, the proposed project will not substantially impair the visual, architectural, or historic value of the affected site or facility.

Projects that involve designated historic properties are reviewed by the Landmarks Preservation Advisory Board. Design review of these properties is conducted concurrently with one of the design review procedures described above.

Design review can increase the approval timeline of a project significantly, especially when approval criteria are subjective. In Oakland, case by case design review of single-family homes and single-family home additions can create a bottleneck in the permitting process and diverts resources from other planning efforts. Further, State law requires that jurisdictions review new multifamily and residential mixed-use developments ministerially against objective standards. The City has already started a process to develop new procedures, regulations, and objective design and development standards to streamline the approval of housing. These standards will have a particular focus on much-needed affordable housing projects in transit-rich areas. This effort is described further as part of the Housing Action Plan.

Historic Preservation

Oakland has a program for officially designating select landmarks and preservation districts, based on a set of a graduated system of ratings, designation programs, regulations, and incentives proportioned to each property's importance as established in the Historic Preservation Element. Landmarks and preservation districts—also referred to as S-7 and S-20 Zones—are nominated by owners, the City, or the public and are designated after public hearings by the Landmarks Board, Planning Commission, and City Council. Since the program began in 1973, about 140 individual landmarks have been designated, out of nearly 100,000 buildings in Oakland. There are currently nine designated preservation districts containing about 1,500 buildings. They include Preservation Park, Old Oakland-Victorian Row, and the Bellevue-Staten Apartment District along Lake Merritt in Adams Point, and Sheffield Village. Also included are Oak Center Historic District and 7th Street Commercial District in West Oakland.

The Landmarks Preservation Advisory Board or its staff reviews changes to any designated properties. The Board also advises on projects involving other historic properties. Design review for any modifications to these structures is conducted concurrently with the regular project review but may need to take into account the Board's monthly meeting schedule. A project that respects the historic character of the resource (e.g., by following the Secretary of the Interior's Standards for Rehabilitation) will have a faster and smoother review process. Design review fees are waived for Designated Historic Properties.

CEQA requires review of impacts on major historic resources. Demolition of a CEQA-level historic resource requires the preparation of an environmental impact review document. The City's requirements are consistent with State law. Many housing development projects use federal funds and require Section 106/National Historical Preservation Act review to avoid adverse effects on historic resources.

Conditional Use Permits (CUPs)

The Planning Code allows two types of uses in each zoning district: permitted and conditional uses. CUPs help ensure the proper integration of uses and neighborhood compatibility and give the City flexibility if special conditions of approval are required. An application for a major CUP is considered by the Planning Commission at a noticed public hearing, while a minor CUP is subject to approval by the Director of City Planning. Minor CUP decisions can be appealed to the Planning Commission, while major CUP decisions can be appealed to the City Council. For a major CUP, the Commission decides whether the proposal is consistent with general use permit criteria, and has the authority to grant or deny the application. In order to grant a use permit, pursuant to Planning Code Section 17.134.050, the Planning Commission must make the following findings:

- That the location, size, design, and operating characteristics of the proposed development will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding neighborhood, with consideration to be given to harmony in scale, bulk, coverage, and density; to the availability of civic facilities and utilities; to harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and the capacity of surrounding streets; and to any other relevant impact of the development;

- That the location, design, and site planning of the proposed development will provide a convenient and functional living, working, shopping, or civic environment, and will be as attractive as the nature of the use and its location and setting warrant;

- That the proposed development will enhance the successful operation of the surrounding area in its basic community functions, or will provide an essential service to the community or region;

- That the proposal conforms to all applicable regular design review criteria set forth in the regular design review procedure at Section 17.136.050;

- That the proposal conforms in all significant respects with the Oakland General Plan and with any other applicable guidelines or criteria, district plan or development control map which has been adopted by the Planning Commission or City Council; and

- For proposals involving a One- or Two-Family Residential Facility: If the CUP concerns a regulation governing maximum height, minimum yards, maximum lot coverage, or maximum FAR, the proposal also conforms with at least one of the following additional criteria:

  – The proposal when viewed in its entirety will not adversely impact abutting residences to the side, rear, or directly across the street with respect to solar access, view blockage

and privacy to a degree greater than that which would be possible if the residence were built according to the applicable regulation, and, for CUPs that allow height increases, the proposal provides detailing, articulation or other design treatments that mitigate any bulk created by the additional height; or

– At least sixty percent (60%) of the lots in the immediate context are already developed and the proposal would not exceed the corresponding as-built condition on these lots, and, for CUPs that allow height increases, the proposal provides detailing, articulation or other design treatments that mitigate any bulk created by the additional height. The immediate context shall consist of the five (5) closest lots on each side of the project site plus the ten (10) closest lots on the opposite side of the street (see illustration I-4b); however, the Director of City Planning may make an alternative determination of immediate context based on specific site conditions. Such determination shall be in writing and included as part of any decision on any CUP.

As noted previously, most residential projects do not require a CUP in residential zoning districts. The requirement of a CUP for multifamily dwellings in the RM-2 and RM-3 districts, both of which permit small multifamily developments, is an identified constraint. The criteria for approval of a CUP in these districts is relatively subjective, which may especially prove a hinderance to affordable housing projects. Further, a CUP in the RM-3 district may only be granted upon determination that the proposal conforms to additional criteria involving impacts on the adjoining property and surrounding neighborhood, which include privacy, safety, and residential amenity considerations. The current CUP requirements for density in the RD and RM residential zoning districts pose a constraints for new housing development, and will be eliminated as part of the proposed code amendments.

Planned Unit Development (PUD)

The planned unit development (PUD) procedure encourages design flexibility and offers varying special bonuses for worthwhile projects. This process is used to review a large integrated development that is appropriately designed for a single tract of land or contiguous parcels when there is one common owner.

PUDs require a development plan, which is considered for approval by the Planning Commission at a noticed public hearing. Commission findings are based on requirements set forth in Planning Code Section 17.140.080 and PUD regulations established in Planning Code Chapter 17.142. Applicants can appeal a Commission decision to the City Council within 10 calendar days. The PUD process applies to all rezone proposals, changes to the text of the Subdivision Ordinance, revisions to development control maps, or proposals affecting designated landmark or landmark sites.

Development Agreement

An application for a Development Agreement is heard by the City Planning Commission at a noticed public hearing. The Commission forwards its recommendations to the City Council. The City Council reviews the recommendation of the Planning Commission and may approve or disapprove the proposed Development Agreement or approve it with changes and/or conditions. The decision of the Council is final.

Environmental Review

Discretionary review of development projects, including residential development projects, are subject to CEQA. In general, CEQA requires the City to consider the potential environmental impacts of a development before approving the project. The process is intended to inform decisionmakers and the public about potential environmental impacts of proposed activities, and to identify ways to avoid or reduce those impacts. Projects that are required to prepare a comprehensive environmental evaluation, known as an Environmental Impact Report (EIR), experience a prolonged approval time. Further, the potential for appeals of project under CEQA, and even CEQA lawsuits, create additional uncertainty for residential projects.

To the greatest extent possible, Oakland utilizes applicable categorical exemptions and streamlining provisions of CEQA for infill development projects that are consistent with existing land use general plan standards. Oakland has developed several specific plans, described above, and have prepared environmental impact reports for those plans that can be relied upon for residential projects that are proposed within the specific plan area. Categorical exemptions are available for the classes of projects generally considered not to have potential for impacts on the environment and are provided in CEQA Guidelines Sections 15300-15333. However, categorical exemptions are not available for projects when the project is located in a particularly sensitive environment, the cumulative impact of successive projects of the same time in the same place over time is significant, the project is located on a hazardous waste site, the project may cause a substantial adverse change in the significance of a historical resource, or where there is a reasonable possibility that the project will have significant effects on the environment due to other unusual circumstances.

Building Permits

The time between entitlement and applying for a building permit generally depends on the size of a project. Typically, this timeline is six months for a one- to four-unit project, nine months for a five- to 99-unit project, and one year for a project over 100 units. A review of residential projects that received planning approvals between January 2018 and January 2022 shows that building permits for those projects were approved on average about 279 days after receiving the planning approval. Multifamily and single-family projects had similar timelines – 286 days and 260 days, respectively. Affordable projects had significantly longer timelines compared to market-rate projects (941 days and 251 days, respectively), which reflects both the length of time required to secure financing and the complexity associated with the generally higher-density nature of such projects in Oakland.

As discussed above, there are multiple steps involved in the building permit approval process, including Plan Check and Fire Prevention Bureau review. Review times vary depending on the complexity of the project. Developers can check their permit status on the City's Online Permit Center.[16] Average permit processing turnaround times are provided in Table F-18 below.

[16] https://aca-prod.accela.com/OAKLAND/Default.aspx

Table F-18: Average Permit Processing Turnaround Times, 2022

Permit/Review Type	*Typical Processing Time*
Planning and Zoning Counter Review[1]	2 weeks
Over the Counter (OTC) Permits[2]	2-3 weeks
Permits with assigned Plan Check	Up to 8 weeks
Windows, Kitchen/Bath Remodels[3]	Up to 5 days for review
Mechanical, Electrical, or Plumbing Permits (MEPs)	Up to 5 days for review
Solar Energy Systems	Up to 10 days for review
ADUs with assigned Plan Check	Up to 3 weeks for creation and submittal review
Final Plan Check[4]	5-7 weeks
Issuance of Permit[5]	Up to 5 days

1. Processing times apply to the creation and review for most application types (DRX, ZC, DET, DS).
2. OTC Permits that require Plan Check take up to 7 weeks.
3. No wall change, water heater replacement, and no Plan Check required (requires no appointments).
4. After Plan Check approval.
5. Once payment is received, final plan check is completed, signed declarations have been returned, and fire and construction and recycling is completed.

Consistency with the Housing Accountability Act

The California Housing Accountability Act was enacted in 1982 with the goal of "meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects." The Act has been amended in recent years with the goal of clarifying its requirements, achieving broader compliance and imposing greater consequences for noncompliance. Among the new requirements is that the City review completed housing applications for consistency with applicable objective development standards within 30 days after an application for a discretionary action has been deemed complete if the proposed project has less than 150 units, or within 60 days if the project has more than 150 units. If the City does not provide an applicant with written documentation explaining how the project is inconsistent with objective standards, then the project is deemed consistent with that requirement. The City has incorporated this practice into its project review.

Consistency with the Housing Crisis Act

The Housing Crisis Act of 2019 amended existing State planning and zoning laws with the objectives of increasing housing production of housing, preserving existing units, and protecting current tenants. Oakland has taken a number of steps to implement SB 330. First, Oakland Planning has created a Vesting Preliminary Application form to implement the Vesting Preliminary Application process, a State-mandated application process available to all housing development projects intended to provide certainty to an applicant by locking in the development requirements, standards, and fees applicable to a project at the time a Vesting Preliminary Application is submitted. Second, Oakland Planning has updated its Basic Application for Development Review to require that applicants include information regarding existing tenants and protected units at the

site proposed for development and to include supporting documentation. Satisfaction of the replacement unit and obligations is implemented through City of Oakland Standard Conditions of Approval in a manner substantially similar to the condition imposed on density bonus projects. Finally, Planning has created a standard operating procedure bulletin providing staff with background on the additional requirements newly created under the Housing Crisis Act to ensure consistency in implementation.

Typical Residential Densities

Pursuant to State law, jurisdictions must assess requests to develop housing at lower than anticipated densities. Based on the survey of recently approved projects between 2018 and 2021 included in Appendix C, most projects in Oakland develop near or above the maximum permitted density. On average, projects that received a building permit during this period developed at 92.7 percent of permitted density by zone and building height area. Further, projects that received planning approvals but have not yet developed were approved to develop at 215.9 percent of permitted density by zone and building height area – largely due to the use of density bonus provisions.

PERMIT AND DEVELOPMENT FEES

The City of Oakland and other public agencies charge a number of planning, building, and engineering fees to cover the cost of processing development requests and providing public facilities and services to new development. Payment of these fees can have an impact on the cost of housing, particularly affordable housing. Fees are limited by State law, which requires that "a public agency may not charge applicants a fee that exceeds the amount reasonably necessary" to provide basic permit processing services (California Government Code Sec. 65943 (e)).

Typical Fees

On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. Fees for water and sewer services are charged by the East Bay Municipal Utility District (EBMUD). Although the City has no direct responsibility for the fees or services provided, Oakland does work with EBMUD on its development review processes to ensure that fees are reasonable, are related to the impacts created by new development, and that new development can be served by EBMUD.

Three example developments are used in Table F-19 to illustrate the total cost of fees for planning, building and infrastructure. The market value for these developments is derived from the applicable Zillow Home Value Index (ZHVI) as discussed in Appendix B, and all units are assumed to be market rate. These example developments are defined as follows:

- Single-family: One 1,850 square-foot, three-bedroom, two-bath, and two-story home with one parking space and an assumed market value of $966,329.

- Small Multifamily: A five-unit, 4,250 square-foot, and two-story development with two parking spaces and an assumed total market value of $2,867,505; each unit is assumed to

be an 850 square-foot, one-bedroom, and one-bath dwelling unit with an assumed market value of $573,501.

- Large Multifamily: A 40-unit, 34,000 square-foot, and five-story development with 22 parking spaces and an assumed total market value of $22,940,040; each unit is assumed to be an 850 square-foot, one-bedroom, and one-bath dwelling unit with an assumed market value of $573,501.

Table F-19 below summarizes the major local costs that a developer would have to bear in undertaking a new residential development in Oakland. It should be noted that this is not a comprehensive list of all fees, but rather a reflection of fees that are typically required.

Depending on the Impact Fee Zone, typical fees for a single-family project would be between $95,927 to $114,881 including utility service charges. Typical fees (including utilities) for a large multifamily project would be between $2,319,365 to $2,782,685, or $57,984 to $69,567 per unit. For a small multifamily project, these fees would be between $345,033 to $402,948, or $69,007 to $80,590 per unit.

Table F-19: Typical Permit and Development Fees, 2022

Fee Type	*Single-Family*[1]	*Small Multifamily*[1]	*Large Multifamily*[1]
Building Plan Check, Permit, and Inspection Fees			
Inspection Fee	$7,582	$19,406	$144,260
Plan Check Routed	$9,477	$24,257	$180,325
General Plan Update	$5,798	$17,205	$137,640
SMIP	$271	$803	$6,423
Process Coordination	$227	$582	$4,328
Zoning Conditions	$1,855	$6,890	$17,640
Zoning Inspections	$1,180	$3,251	$10,000
Site Plan Review; Parking Review; Site Monitoring	$1,645	$1,645	$1,915
Certificate of Occupancy	$762	$762	$762
Address Fee	$53	$53	$53
Bedroom Tax (OA -08721)	$300	$500	$4,000
Application Fee	$76	$76	$76
Field Check	$218	$218	$218
CBSC	$38	$114	$917
Plumbing Inspections	$1,137	$2,911	$21,639
Electrical Inspections	$1,137	$2,911	$21,639
Mechanical Inspections	$1,137	$2,911	$21,639
Infrastructure, Impact, and District Fees			
City Impact Fee—Records Management & Technology Enhancement 14.75%	$5,965	$15,021	$105,048
City Impact Fee—Affordable Housing[2]	$8,424 – $24,219	$63,180 – $115,830	$505,440 – $926,640
City Impact Fee—Capital Improvement[2]	$1,053 – $4,212	$1,315 – $6,580	$10,520 – $52,640
City Impact Fee—Transportation	$1,053	$3,950	$31,600
City Impact Fee—School Tax (School Tax 97% + School Tax City 3%)	$6,438	$17,340	$118,320
City Sewer Laterals—New Building Connection including tap inspection	$1,043	$1,043	$1,043

EBMUD—Installation Fee[3]	$14,898	$74,490	$595,920
EBMUD—System Capacity Charge[3]	$21,250	$73,900	$295,600
EBMUD—Wastewater Capacity Fee[3]	$2,850	$10,000	$80,000
EBMUD—Account Fee[3]	$60	$300	$2,400
Total Project Fees	**$95,927 – $114,881**	**$345,033 – $402,948**	**$2,319,365 – $2,782,685**
Total Fees per Unit	**$95,927 – $114,881**	**$69,007 – $80,690**	**$57,583 – $69,166**

1. Fees are rounded to the nearest dollar.

2. Total fees depend on which Impact Fee Zone the project is located in.

3. Assumes a paved 1-1/2" lateral, calculated for Principal Region 1. One meter per unit, and fees are per unit.

Source: City of Oakland, Master Fee Schedule and Fee Estimator with Impact Fees, January 2022; EBMUD, Water and Wastewater System Schedules of Rates and Charges, Capacity Charges and Other Fees, July 2021

Assessment of City Fees

See Table F-20 for a comparison of typical planning and impact fees between Oakland and other Bay Area cities, including Berkeley, Emeryville, Richmond, San Francisco, and San Jose.[17] The project types assessed are equivalent to those assumed for Table F-19 above. Utilities and environmental review costs are not considered in this comparison. It should be noted that the estimates provided in Table F-20 do not provide a comprehensive overview of all fees but rather a comparison of typical fees.

Table F-20: Bay Area Residential Fees, 2021

City	*Typical Single-Family*		*Typical Small Multifamily*		*Typical Large Multifamily*	
	Total Project	*Fees per Unit*	*Total Project*	*Fees per Unit*	*Total Project*	*Fees per Unit*
Oakland[1]	$64,782	$64,782	$210,453	$21,045	$1,570,564	$39,264
Berkeley[2]	$85,078	$85,078	$531,787	$53,179	$2,663,761	$66,594
Emeryville[3]	$38,766	$38,766	$459,138	$45,914	$2,191,520	$54,788
Richmond[4]	$79,474	$79,474	$246,449	$24,645	$1,702,559	$42,564
San Francisco[5]	$32,122	$32,122	$268,271	$26,827	$2,983,884	$74,597
San Jose[6]	$67,291	$67,291	$257,428	$25,743	$2,487,047	$62,176

1. Does not include utilities (i.e., EBMUD and sewer fees) and assumes the average fee across the three Impact Zones.
2. Includes the following fees: Permit Fee, Plan Check Fee, Fire Plan Check Fee, Title 24 Disabled Access Fee, Title 24 Energy Compliance Fee, Community Planning Fee, Sustainable Development Fee, Technology Enhancement Fee, Building Standards Fee, Strong Motion Instrumentation Fee, Filing Fee, Affordable Housing Mitigation Fee.
3. Includes the following fees: Building Permit, General Plan Maintenance, Technology Fee, Plan Check, Energy Conservation, Electrical/Plumbing/Mechanical Permits, SMIP, School Fees, CBSC Fees, Impact Fees (Affordable Housing, Park and Recreation Facility, and Transportation Facility).
4. Includes the following fees: Inclusionary Housing Fee (In-Lieu Fee), Park Land Dedication Fee, STMP Fee, CBSC Fee, SMIP Fee, Public Art Fee, Residential Rental Dwelling Unit Inspection and Maintenance Fee, Code Compliance Inspection Fee, Building Permit Fees – Filing, Building Permit Tech Fee, Building Permit, Comprehensive Planning Fee, Plan Check, Electrical Permit Fees, Plumbing Permit Fees, Mechanical Permit Fees.
5. Includes the following fees: Building Permit Planning Review, Preliminary Project Assessment, Pre-Application Meeting, Transportation Demand Management (TDM) Program, Inclusionary Affordable Housing Fee, Child Care Fee, School Impact Fee, Transportation Sustainability Fee (TSF).
6. Includes the following fees: Residential Site or Planned Development Permit or Amendment, Planning Permit Conformance, Zoning and Use Conformance, Plot Plan Review, Single-Family House Permits, Building Permit Fees, Electrical/Plumbing/Mechanical Permit Fees, Commercial/Residential/Mobile Home Park Construction Tax, Building

[17] Comparison fees are based on Oakland's July 2021 Master Fee Schedule—which differs from estimates provided in Table F-19—to provide a more accurate comparison across jurisdictions.

and Structure Construction Tax, Residential Construction Tax, Construction Tax, SMIPA, BSARF, Inclusionary Housing Ordinance (IHO).

Source: City of Oakland, Master Fee Schedule and Fee Estimator with Impact Fees, July 2021; City of Berkeley, Building Permit Fee Estimator, 2022 and Affordable Housing Mitigation Fee Ordinance, October 2020; City of Emeryville, Master Fee Schedule, July 2021 and Development Impact Fees, FY 2020-2021; City of Richmond, Master Fee Schedule, July 2020; City of San Francisco, Development Impact Fee Register, December 2021 and Planning Department Fee Schedule, August 2021; City of San Jose, Planning Application Filing Fee Schedule, August 2021, Building and Structure Permits Fee Schedule, August 2021, and Inclusionary Housing Ordinance Schedule of Fees, April 2021

Oakland fees are comparable to those of neighboring jurisdictions, and for typical small and large multifamily development, the lowest of the neighboring or larger regional cities, as shown Table F-20. In Oakland, ADUs and affordable housing projects are exempt from Affordable Housing Impact Fees and the Capital Improvements Impact Fee, while ADUs are also exempt from the Transportation Impact Fee. The City provides financial assistance to affordable housing projects by paying fees from one or more housing fund sources, such as Community Development Block Grant (CDBG) funds or HOME program funds. Permit and other development fees are eligible costs that can be funded through these sources.

Cumulative Analysis

A number of the City's land use policies and regulations currently present barriers to developing housing units affordable to people with lower incomes. As described above, Oakland's residential land is currently zoned to maintain single-family development. Housing Action Plan action 3.2.1 encourage "missing middle" housing types and zoning standards for two, three, and four units on parcels in these single family zones. Action 3.4.1 revises development standards to allow for increased height and densities in transit-proximate and resource-rich areas, and Action 3.4.3 revises conditional use permit requirements to permit multi-unit buildings by-right in RD and RM zones. Other revised standards, such as parking (action 3.4.4), open space (action 3.4.5) further reduce constraints.

See Appendix J for more information on these zoning actions. It is expected that these changes will help address land use policy and regulation constraints that currently limit affordable housing production and promote more integrated neighborhoods.

TRANSPARENCY IN DEVELOPMENT REGULATIONS

Under State Government Code Section 65940.1, the City is obligated to provide transparency in publicizing land use controls and fees. The City's website provides a variety of resources to assist interested parties in navigating the development process. Planning and building permit fees, including the Master Fee Schedule, as well as project requirements are posted under the Planning and Building Department's webpage.[18] This page also provides access to other zoning and City plan requirements, design guidelines, forms and codes, and impact fee reports. Contact information, including a phone number and email address, is also provided at the bottom of the page.

The City actively solicits input and feedback on ways to improve planning, land use and zoning practices from practitioners and stakeholders. This has been very effective in the past, and the City will continue to engage in such outreach.

[18] https://www.oaklandca.gov/topics/planning-and-building-permit-fees

F.2 Non-Governmental Constraints

Fundamentally, the City is only one of many actors involved in the development of housing with limited control. While the City plans for sites and provides programs, the actual production, availability, and cost of housing in Oakland is significantly impacted by non-governmental factors, many of which are common to other similar cities in the Bay Area, including the high cost of construction and greater difficulties of producing housing through redevelopment in an already-developed, central city such as Oakland.

ENVIRONMENTAL CONSTRAINTS

The most noteworthy environmental constraints in Oakland include the following:

- **Geology/seismicity.** The Hayward Fault, located at the base of the hills on the eastern edge of the City, has a 31.0 percent chance of producing a major earthquake within the next 30 years and would cause significant damage.[19] The Fault Zone is along the hills and does not include significant development sites and is thus not a major constraint to housing. In the event of an earthquake, soil liquefaction is also a major concern in Oakland. The flat-land areas of Oakland are at the highest risk of liquefaction.

- **Sea-level rise.** Low-lying coastal residential areas, the Port of Oakland, the former Oakland Army Base, and a variety of low-lying areas near the Coliseum, Oakland International Airport, and Interstate 880 are most at risk of coastal flooding. According to the Bay Conservation and Development Commission, Oakland is expected to experience 12 to 24 inches of sea level rise by 2050 and 36 to 66 inches of sea level rise by the year 2100. Almost all areas that would be subject to sea level rise are zoned for industrial rather than residential use; thus sea level rise is not a significant constraint for housing.

- **Hydrology and flooding.** The combination of higher tides due to sea level rise and larger storms with Oakland's aging stormwater drainage systems may lead to significant increases in both coastal and urban flooding and flood damage. Low-lying areas, such as the Coliseum, West Oakland, and Jack London neighborhoods, are particularly vulnerable to coastal (Bay) and urban floods. However, the vast majority of land located within the Federal Emergency Management Agency's (FEMA) 100-year flood zone does not permit residential uses; thus flooding is not a significant constraint for housing.

- **Air and noise quality.** Through Community Air Risk Evaluation (CARE) Program, the Bay Area Air Quality Management District (BAAQMD) identified East and West Oakland as communities disproportionately impacted by air pollution in the Bay Area. Residential areas adjacent to industrial areas or major highways tend to experience worse air quality impacts. Title 24 and City regulations require air filtering and other methods to promote indoor air quality in new construction, and development adjacent to freeways would also require noise insulation to ensure indoor noise levels in compliance with the State Building

[19] *Resilient Oakland Playbook,* October 10, 2016. See report at https://cao-94612.s3.amazonaws.com/documents/OAK061006.pdf

Code. While these are not constraints to development, they do result in increased development costs. Poor air and noise quality also results in lower appeal to some potential buyers or renters. While not necessarily a development constraint, poor air and noise quality have significant severe health disparities in existing Environmental Justice (EJ) neighborhoods, which is explored further in the EJ Element and Safety Element.

- **Wildfire.** Wildfire hazards are particularly acute in the Oakland Hills, and the Oakland Hills Firestorm of 1991 was the most destructive fire in California history. Oakland is at extreme risk for future wildfires due to the increased frequency of droughts and higher heats caused by climate change. Virtually the entirety of the Oakland Hills has been designated as a Very High Fire Hazard Severity Zone (VHFSV). Due to the danger posed by wildfires, including blocked evacuation routes, the hills are generally not a suitable location for higher density housing.

- **Airport hazards.** Land adjacent to the Oakland International Airport is governed by the development restrictions laid out in the Oakland International Airport Land Use Compatibility Plan (ALUCP). Residential development criteria depends upon the applicable Safety Zone, and the maximum community noise equivalent level (CNEL) considered acceptable for new residential uses in the vicinity of the airport is anything less than 65 CNEL. Further, any proposed development taller than 200 feet is subject to review pursuant to the ALUCP. No sites included in the 2023-2031 Housing Sites Inventory are located within an Airport Safety Zone.

- **Hazardous materials.** As a dense urban center with long-established industrial areas in West and East Oakland, and extensive freeway and rail networks, Oakland faces the risk of a transportation-related or other hazardous materials incident, such as a fire, explosion, spill or accidental gas release. While hazardous material incidents can happen anywhere, certain areas of the City are particularly vulnerable to these hazards, particularly residents near industrial zones and along interstate highways. Sites, especially those where formerly industrial or other uses (such as gas stations) may have caused ground contamination, would require expensive mitigation efforts prior to development.

The City proactively addresses problems associated with environmental hazards, including providing assistance in financing and cleanup activities to interested developers. The City's 2021-2026 Local Hazard Mitigation Plan (LHMP) both assessed the risks to the City and people of Oakland from both natural and human-caused hazards, and provided an implementation plan to reduce those risks. The City's Safety Element is also being updated in parallel with the Housing Element to ensure that environmental conditions are fully reflected in planning for housing, and ensuring public health and safety.

INFRASTRUCTURE CONSTRAINTS

Water and Sewer Services

EBMUD provides water services for Alameda and Contra Costa counties, and charges fees for water and sewer services. According to EBMUD's 2020 Water Shortage Contingency Plan (WSCP), under base condition assumptions, EBMUD can meet customer demand (including residential demand)

out to 2050 during normal years and single dry years; however, during multi-year droughts, even with customer demand reduction measures in place, EBMUD will need to obtain supplemental supplies to meet customer demands. Growth projections in EBMUD's future water demand reflects residential need projections provided by the Association of Bay Area Governments (ABAG), Plan Bay Area, and local land use agencies.

Oakland Public Work's Bureau of Design and Construction and Bureau of Maintenance and Internal Services owns and operates over 934 miles of sewer mains, 28,554 sewer structures, and 11 pump stations. Most of the system is more than 50 years old, and some parts are as old as 100 years. Oakland does not own or operate wastewater treatment facilities. Wastewater from homes and businesses is collected through the City's sewer collection system and flows into EBMUD's interceptor system, where it is conveyed to their treatment plant.

The development of the City's Sanitary Sewer Master Plan is currently underway, which seeks to repair aged sanitary sewer infrastructures (mainly pipes and maintenance holes) and to reduce stormwater intrusion and sanitary sewer overflows to protect public health. The master plan will provide technical guidance to both the sanitary sewer rehabilitation capital improvement program (CIP) and the sanitary sewer operation and maintenance program (O&M) in compliance with the 2014 Consent Decree for the next 17 years. The master plan project incorporates equity factors into the prioritization plan, applies risk-based analytical approach while mitigating inflow/infiltration issues effectively and efficiently, and updates the sewer hydraulic model from large to small diameter pipes.

The draft Housing Element was provided to EBMUD on May 12th, 2022 to solicit input and coordinate efforts prior to adoption per HCD guidance. In accordance with Section 65589.7 of the California Government Code, the adopted Housing Element will also be delivered to EBMUD. Per the 2020 Urban Water Management Plan (UWMP), EBMUD's Board of Directors approved Policy 3.07 which ensures that priority for new water service connections during restrictive periods is given to proposed developments within EBMUD's existing service area that include housing units affordable to lower-income households in accordance with California Government Code 65589.7. Policy 3.07 also states that EBMUD will not deny an application for services to a proposed development that includes affordable housing unless certain specific conditions are met which could include a water shortage emergency condition, or if EBMUD is subject to a compliance order by the Department of Public Health that prohibits new water connections. Based on the requirement to provide priority to developments that include housing units affordable to lower-income households, Policy 3.07 assures that the portion of overall water demands for lower-income households can be met.

Under typical conditions, there is sufficient water and sewer capacity to meet Oakland's future housing needs.

Dry Utilities

Oakland, as well as the entire nine-county Bay Area, is served by the Pacific Gas and Electric Company (PG&E), an investor-owned utility company that provides electricity and natural gas supplies and services throughout a vast service area in Northern California. East Bay Community Energy (EBCE) is a community-governed, local power supplier that provides low-carbon electricity

to Oakland residents and businesses under Alameda County's community choice energy (CCE) program at rates that are lower or comparable to PG&E's rates. EBCE's standard electricity product that has a higher renewable energy content than PG&E at rates marginally lower than PG&E's base offering. It also provides a 100 percent renewable product at a rate equivalent to PG&E's base offering. Further, internet connections in the city are provided by Comcast.

MARKET CONSTRAINTS

Land Costs

Market prices for land are high in the desirable, high-cost San Francisco Bay Area. As evidenced in Appendix B, housing costs have continued to dramatically increase since recovering from the 2008 financial crisis. The desirability and acceptability of locations in Oakland and other inner cities has increased within the region. Demand is increasing for housing close to employment centers such as Oakland and San Francisco and is likely to continue to be relatively strong given the demand for locations near urban centers. Additionally, Oakland's urban character and comparatively lower costs have made the city an increasingly desirable alternative to higher-cost areas nearby, particularly to San Francisco across the bay – Oakland has the second fastest population increase (behind Bakersfield) of the 12 most populous California cities between 2010 and 2021.[20] Finally, there are efforts by ABAG to encourage infill development in cities such as Oakland.

It is important to note that there are significant variations in the price of land within Oakland. The city has some of the highest residential land values in the Bay region (such as in older desirable neighborhoods such as Rockridge and the Oakland hills with views of San Francisco Bay) and some of the lowest as well (such as in older, working-class neighborhoods in the vicinity of the I-880 freeway and older industrial areas).

Land acquisition cost estimates for the development of affordable housing in Oakland are available from recent California Tax Credit Allocation Committee (TCAC) project tax credit applications. Estimates include projects that applied for a tax credit between 2017 and 2020, and are provided in Table F-21. Overall, land acquisition costs for new construction are about $40 per square foot. This remains similar to estimates from the City's previous Housing Element, which estimated costs between $13 to $47 per square foot (2014 values). While new construction land costs have remained stable across the period, the per square foot costs for acquisition and rehabilitation projects has continued to increase. During the period, land/acquisition costs accounted for about 27.5 percent of total project costs for all project types.

[20] Based on California Department of Finance E-5 Population and Housing Estimates, 2010-2021.

Table F-21: Land Costs for Affordable Housing Projects in Oakland, 2017-2020

Project Year	*Average Total Land/Acquisition Cost*[1]		*Average Land/Acquisition Cost Per Sq. Ft.*	
	Acquisition & Rehab	*New Construction*	*Acquisition & Rehab*	*New Construction*
2017	$16,438,358	$928,967	$291	$20
2018	$31,136,874	$2,910,464	$343	$38
2019	$55,317,500	$2,654,171	$536	$71
2020	$32,895,737	$1,695,021	$577	$25
Total	**$31,870,897**	**$2,121,702**	**$415**	**$40**

1. Land/acquisition costs include project costs related to land costs or value, demolition, legal, land lease rent prepayment, existing improvements value, and off-site improvements.

Source: California Tax Credit Allocation Committee, Project Staff Reports 2017-2020; Dyett & Bhatia, 2022

If land costs remain at current levels or continue to increase, the City can do little to directly affect the cost of land other than continue to provide opportunities for increased residential densities, housing on underutilized sites and locations with potential for mixed-use development, and housing on infill properties. Regardless, these measures will not lead to actual construction if the higher construction costs associated with more dense and taller development is not recoverable in the form of higher rents or sale prices.

Costs for Urban Infill

Oakland does not have large, vacant, unconstrained parcels, and must rely on infill development strategies to accommodate its ABAG-assigned regional housing allocation. There are a variety of uncertainties, difficulties, and additional costs associated with development of these types of sites that pose constraints for new housing development. Some of these include:

- **Redevelopment Difficulty and Costs.** The total cost of "land" for developing infill sites or redeveloping under-used sites includes not only land acquisition, but also additional costs of demolishing existing structures and site clean-up. Costs for relocating existing uses and/or compensating existing users are also frequently a required expense in the calculation of the total cost of land development in Oakland. Thus, total "land" costs for urban infill development are generally greater than the land/site acquisition costs alone.

- **Parcel Sizes and Achievable Densities.** Oakland has only a few moderate-sized commercial sites that could be repurposed to housing or mixed-use development. Notably, Oakland lacks any large suburban-size malls. The corridor with some of the largest commercial sites—the former "auto-row" along Broadway has been significantly redeveloped with housing over the past decade, with several developments achieving over 100 units per acre densities. Other corridors—such as San Pablo Avenue, International Boulevard, and Macarthur Boulevard—have generally smaller parcels, and lot consolidation would be needed to achieve high densities.

Construction Costs

The costs of constructing housing in the Bay Area are high. Construction costs can be separated into "hard" and "soft" costs. Hard costs include construction line items such as labor, demolition, building materials and installed components. Soft costs include items such as architectural and engineering, planning approvals and permits, taxes and insurance, financing and carrying costs, and marketing costs. The hard construction costs typically represent about 50 to 60 percent of total development costs. Thus, they have a significant effect on development feasibility. Land and soft costs can represent another 40 to 50 percent of the total cost of building housing.

Construction costs for higher-rise concrete and steel-frame multifamily buildings are higher than for wood-frame construction. In fact, the higher costs for steel- and concrete-frame construction are a significant factor limiting the feasibility of high-density housing development in Oakland. This continues to be the case for Oakland as concrete- and steel-frame buildings are only being built in Oakland at locations that can attract the highest housing prices and rents (such as on the shores of Lake Merritt, Jack London District, and the Broadway Valdez area, north of downtown). There are also a few examples of concrete- and steel-frame construction for more affordable, higher density senior housing. For all types of construction, structured or underground parking would result in still higher construction costs.

The Incentive Program Feasibility Study[21] prepared for the Downtown Oakland Specific Plan in July 2020 provides estimates of more recent market-rate construction costs. Building construction costs range from $290 to $400 per gross square foot, not including parking construction costs of about $60,000 per space. Table F-22 summarizes development cost assumptions as identified in the Study. For the Study, eight mixed-use development prototypes were selected and a "static" (i.e., stabilized year) pro forma financial feasibility model was prepared for each. A description of each prototype is as follows:

- Prototype 1: Base zoning office high-rise upzoned to a higher density office high-rise
- Prototype 2: Base zoning residential high-rise upzoned to higher density residential
- Prototype 3: Base zoning residential mid-rise upzoned to residential high-rise
- Prototype 4: Base zoning residential low-rise upzoned to residential high-rise
- Prototype 5: Base zoning residential mid-rise upzoned to higher density residential midrise
- Prototype 6: Base zoning low-rise office upzoned to residential high-rise
- Prototype 7: Base zoning low-rise office upzoned to residential high-rise
- Prototype 8: Base zoning low-rise office upzoned to residential high-rise

[21] *Downtown Oakland Specific Plan: Incentive Program Feasibility Study,* July 10, 2020. See report at https://www.oaklandca.gov/documents/zoning-incentive-feasibility-study

Table F-22: Downtown Oakland Specific Plan Development Cost Assumptions, 2020

Prototype No.	*Neighborhood*	*Assumed Construction Type[1,2]*	*Building Cost (per gross sq. ft.)[2]*
Prototype 1	Uptown Office	Type I	$370
Prototype 2	Uptown Residential	Type I	$400
Prototype 3	KONO Residential	Type III	$320
Prototype 4	Jack London Residential	Type V	$290
Prototype 5	KONO Residential	Type III	$350
Prototype 6	Jack London "Office" to Res.	Type III	$320
Prototype 7	Jack London "Office" to Res.	Type III	$320
Prototype 8	Victory Court "Office" to Res.	Type III	$320

1. Type I – Fire resistive (concrete and steel structure); Type III – Ordinary (Brick-and-joist structure); Type V – Wood-framed
2. Estimates derived from Base Zoning scenario.

Source: Economic & Planning Systems, Inc., Downtown Oakland Specific Plan: Incentive Program Feasibility Study, July 2020

Estimated construction costs for affordable housing in Oakland are available from recent TCAC project tax credit applications. Estimates include projects that applied for a tax credit between 2017 and 2020, and are provided in Table F-23. Overall, construction costs for affordable projects are about $340 per square foot. On average, construction costs accounted for about 42.9 percent of total project costs during the period.

Table F-23: Construction Costs for Affordable Housing Projects in Oakland, 2017-2020

Project Year	*Average Total Construction Cost[1]*	*Average Construction Cost Per Sq. Ft.*
2017	$14,804,026	$261
2018	$32,503,149	$362
2019	$20,405,105	$439
2020	$27,351,394	$295
Total	**$24,830,103**	**$340**

1. Includes new construction and rehab projects.

Source: California Tax Credit Allocation Committee, Project Staff Reports, 2017-2020

The construction costs and total costs of developing housing in Oakland, while not different from those in other Bay Area communities, present serious constraints to the availability of housing, particularly housing affordable to lower-income households. Even with the adoption of an Affordable Housing Impact Fee, it remains difficult to raise enough funding to build affordable housing, especially housing for extremely-low-income households. To address these constraints, there are several housing programs in Oakland to support affordable housing development, including loans and grants to developers of low- and moderate-income housing. See Appendix E for a discussion of available housing resources.

Labor Costs

As noted above, labor costs are a portion of the hard costs of construction. Market factors resulting in high construction costs are further compounded for affordable housing providers because they must pay "prevailing wages." The City imposes additional Contract Compliance requirements beyond prevailing wages as well. For instance, construction contracts greater than $100,000 must achieve 50 percent participation in the Local and Small Local Business Enterprise Program (S/LBE), which increases project costs. Generally, the cost of labor in Oakland remains high and can often constitute a significant portion of total project costs. Rising labor costs may make certain housing developments—both market rate and affordable—not feasible in the city.

A shortage of labor can significantly increase construction costs, as it increases both labor costs and the time necessary to complete the development of a project. The 2015-2019 American Community Survey (ACS) estimates that there are 13,630 persons employed in the construction industry in Oakland, representing 6.0 percent of the labor force that year. This was higher than the county (5.3 percent) and wider Bay Area (5.6 percent). In Oakland, this also represents an increase from 5.6 percent in 2014, per the 2010-2014 ACS.

The California Employment Development Department (EDD) estimates that the annual average unemployment rate in 2020 for Oakland was 10.5 percent, while it was 8.8 percent for the large Oakland-Hayward-Berkeley Metropolitan Division (MD). These unusually high employment rates were caused by the COVID-19 health emergency and economic crisis. Table F-24 below shows that while these rates approach those seen in 2010 following the 2008 financial collapse, they have since returned to pre-COVID levels. As employment rates have largely recovered, this indicates that labor is generally available in the city and metropolitan region.

Table F-24: Unemployment Rates, 2010-2021

Jurisdiction	*2010*	*2015*	*2020*	*October 2021*
Oakland	13.6%	5.9%	10.5%	6.1%
Oakland-Hayward-Berkeley Metropolitan Division	11.2%	4.9%	8.8%	5.1%

Source: California Employment Development Department, Local Area Unemployment Statistics, Annual Average 2010-2020 and October 2021

Availability of Financing

The availability and cost of financing influence housing supply, including both financing for real estate development and financing for homeownership. This section discusses potential obstacles to

financing real estate development and ownership in the city during the planning period. A discussion of inequities in lending practices is provided in Appendix D.

Financing for Real Estate Development

As discussed previously, Oakland has approved about 16,789 building permits during the 2015 to 2021 period. While this exceeded the 5th cycle RHNA of 14,765 units, this is due to the approval of above-moderate-income projects; lower- and moderate-income projects have not kept pace with regional need. The City still faces a remaining need of 5,126 units at the lower- and moderate-income levels. This illustrates that while the development feasibility of market-rate projects—including higher-density projects—remains high, it is limited for affordable housing projects.

The City's efforts in the last two decades to revitalize and invest in the central city, especially through specific plans, have spurred increased interest in residential investment by large-scale institutional lenders. As noted in the previous Housing Element, market factors and conditions—including dramatic demand for Bay Area housing and a lack of urban developable land options in proximity to San Francisco and Silicon Valley—have increased the acceptability of Oakland neighborhoods that have formerly been passed over for residential development. Oakland rents are showing dramatic increases and there is a high demand for housing as evidenced in Appendix B. This indicates a strong likelihood of future residential investment in the city especially given its strategic location near job centers and transit. However, rising interest rates adversely impact the economic feasibility of construction.

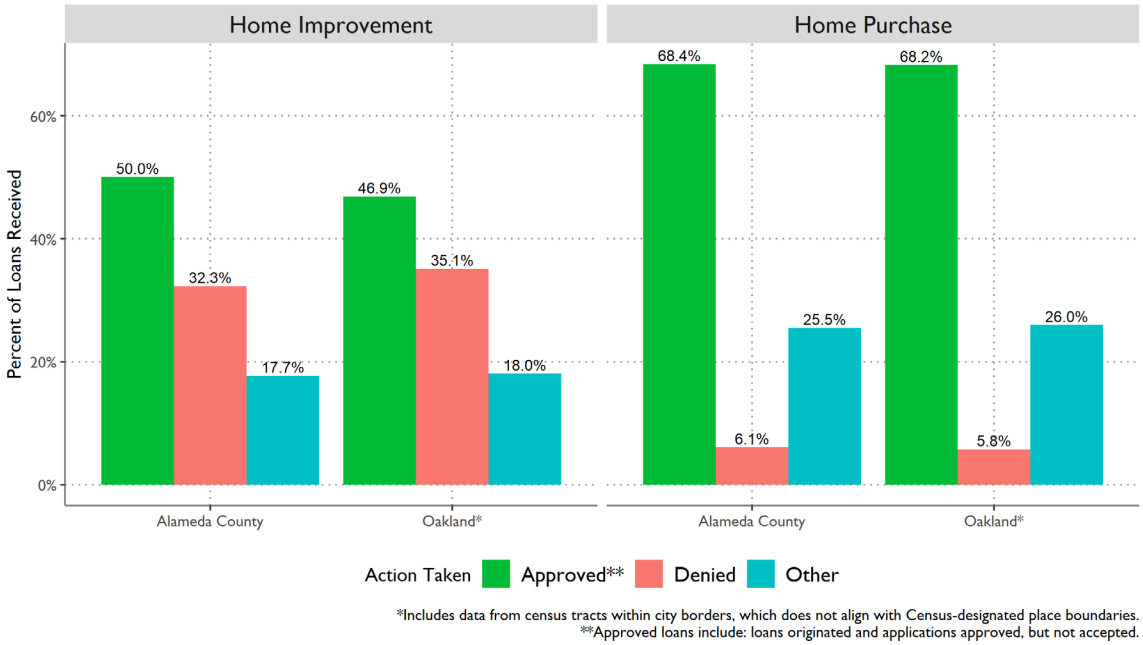
Financing for Homeownership

The cost of borrowing money to buy a home is another factor affecting the cost of housing and overall housing affordability. The higher the interest rate and other financing costs charged for borrowing money to purchase a home, the higher the total cost of the home and the higher the household income required to pay that cost. With increased interest rates, the amount of public subsidy required to provide affordable homeownership opportunities to median-income households also increases.

At the national level, interest rates have remained relatively low since 2015 and experienced a significant decline during the COVID-19 pandemic. However, rates have started to increase over the course of 2021. See Chart F-2 for the change in 30-year fixed rate mortgages since 2015. As of January 2022, according to Freddie Mac, higher inflation, promising economic growth, and a tight labor market indicates that mortgage rates will continue to increase. The impact of higher rates on purchase demand remains modest so far given the current first-time homebuyer growth.

Despite relatively low interest rates, financing costs are still significant and many households have difficulty purchasing a home. To address these costs, Oakland has several first-time homebuyer programs, though some are currently suspended due to a lack of funds. The City also hosts HUD-certified first-time homebuyer workshops. Additional discussion of resources and opportunities related to homeownership is provided in Appendix E.

Chart F-2: National 30-Year Fixed Rate Mortgages, 2015-2021



Source: Freddie Mac, Historical Weekly Mortgage Rates Data, 2015-2021

Under the Home Mortgage Disclosure Act (HMDA), lending institutions are required to disclose information on the disposition of loan applications. During 2020, a total of 6,822 home purchase loan applications were submitted in Oakland and 393 were denied, about 5.8 percent. This is slightly lower than the county, which experienced a 6.1 percent denial rate during the same year, see Chart F-3.

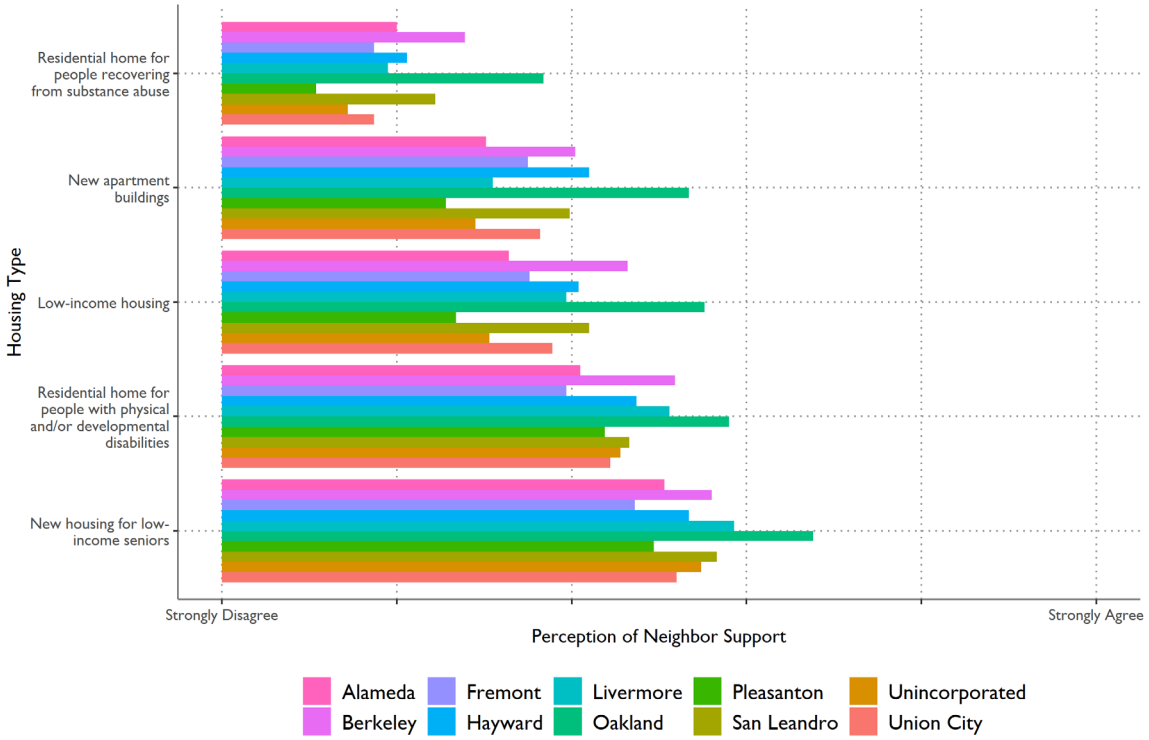
Home improvement loans have generally lower approval rates than home purchase loans within the city and the county. While denial rates for improvement loans are higher in Oakland than in the county, home purchase loan denial rates are slightly lower. This may indicate a gap between those households wanting to improve their homes and those who were able to obtain conventional financing to complete those improvements. This indicates a need for the City to continue to offer financial assistance and rehabilitation programs to households that may not qualify for a conventional home improvement loan.

Chart F-3: Oakland and Alameda County Loan Applications, 2020

Source: HMDA, 2020

Other Economic Constraints

Oakland is part of the San Francisco Bay Area regional economy, which is prone to occasional recessions and contractions. Given large income disparities and the City's revenue structure, these economic crises have a tendency to impact the most vulnerable residents while simultaneously reducing City resources to serve those residents. The city and region are also vulnerable to shocks related to international trade, travel, tourism, logistics, and manufacturing. Following the 2008 financial crisis, the City's discretionary revenues were reduced by nearly 12.0 percent, while the demands for City services dramatically increased.



Similarly, the economic crisis caused by the COVID-19 pandemic is likely to have a lasting impact on available City resources and housing needs throughout Oakland. Among other things, future building patterns and preferences may be impacted, which could increase costs of development. While the City has little control over broader economic conditions, it does provide resources to Oakland residents to prevent and/or mitigate some of the worst impacts of the pandemic. Available resources are provided in Appendix E.

NEIGHBORHOOD SENTIMENT

While neighborhood concerns and opposition to higher-density developments and to affordable housing developments may hamper efforts to construct new housing, Oakland is one of the most pro-housing and pro-affordable housing communities in the Bay Area. In the community workshops conducted for the Housing Element update—where hundreds of residents participated—participants were almost unanimously pro-housing. Further, according to the 2020-2024 Regional Analysis of Impediments to Fair Housing Choice (AI), Oakland has the highest perceived neighbor support for all affordable housing projects. See Chart F-4 below for the

perceived neighbor support of different types of affordable housing, based on responses to the 2019 Alameda County Regional Housing Survey (3,296 total responses).[22] In Oakland and the county overall, support for low-income senior housing is the highest and support for supportive housing for those recovering from substance abuse is the lowest.

Chart F-4: Perceived Neighbor Support for Affordable Housing, 2020

Source: County of Alameda, Regional Analysis of Impediments to Fair Housing Choice, February 2020

The City actively works with developers and provides information on affordable housing for use at public meetings. The City encourages local non-profit organizations, affordable housing proponents, the business community, the real estate industry and other policy makers to join in efforts to advocate for the provisions of affordable housing in communities throughout Oakland and the Bay Area. Public comments received as part of Specific Planning efforts have generally been supportive of more housing affordable to Oakland residents, given the rising costs of rent in the City. Additionally, the completion and occupancy of several attractive and affordable housing developments, and the rebuilding and rehabilitation of older public housing projects, continue to

[22] The Regional Housing Survey prompted respondents to rank their agreement with five statements from strongly disagree (0) to strongly agree (5). The questions included the following: "My neighbors would be supportive of locating low-income housing in my neighborhood," "My neighbors would be supportive of locating new apartment buildings in my neighborhood," "My neighbors would be supportive of locating new housing for low-income seniors in my neighborhood," "My neighbors would be supportive of locating a residential home for people recovering from substance abuse in my neighborhood," and "My neighbors would be supportive of locating a residential home for people with physical and/or developmental disabilities in my neighborhood."

improve the quality, image, and acceptability of affordable housing in Oakland. Successful, new low-income housing developments now enhance many Oakland neighborhoods and blend unnoticed into others. The update to the General Plan will continue to encourage higher-density affordable housing in areas with ample access to opportunity.

State law (Government Code Section 65583[a][7]) requires Housing Elements to contain an analysis of opportunities for residential energy conservation. According to the California Department of Housing and Community Development (State HCD), the energy conservation section of a Housing Element must inventory and analyze the opportunities to encourage energy saving features, energy saving materials, and energy efficient systems and design for residential development.

Residential energy conservation presents an opportunity to improve health, contribute to climate change mitigation and sustainability, and reduce the cost of living by reducing energy consumption. Statewide green building standards regulate energy efficiency and conservation as a part of building permit issuance and is updated every three years to ensure the integration of the latest research and technology. While electrification is one of the primary ways to reduce the environmental impact of a building and improve energy performance, residential buildings in Oakland face a range of difficulties when pursuing electrification including lack of electrical panel or service capacity, and the extensive renovations and remediations that the retrofitting for electrification might trigger.

Residents and property owners in Oakland have access to a variety of resources to assist with and incentivize residential energy conservation including local and state financing programs, and local resources such as solar rebates and incentives, and assistance with conversions of gas stoves to induction cooktops. Low-income Oakland utility customers who qualify can also take advantage of State and Federal Energy Bill assistance and energy efficiency programs. The State of California is pursuing aggressive policies to support efficient electrification, including resources for homeowners and renters, contractor training, and a broad outreach campaign.

G.1 Introduction

Energy conservation can lower utility bills, increase long-term housing affordability, and contribute to climate change mitigation and sustainability. Residential energy is used primarily for lighting, cooking, appliances, heating water, and cooling and heating buildings. Energy use in most California buildings happens in two forms: electricity (primarily for lighting, electronics, and plug-in appliances) and methane gas (often referred to as "natural gas," primarily used for space and water heating, cooking, and clothes drying).

The science of energy systems, climate change, and indoor air quality has grown rapidly in recent years. Once thought to be a "clean-burning" and "bridge" fuel, methane gas is a short-lived climate pollutant 84 times stronger than carbon dioxide in exacerbating the global greenhouse effect (known as "global warming potential"). Methane gas is a major contributor to poor health outcomes: Children who live in homes with gas stoves are 40 percent more likely to develop asthma. A 2022 study by PSE Healthy Energy, an Oakland-based think tank, found that gas stoves emit 0.8–1.3 percent of the gas they use as direct, unburned methane – three-quarters of which occurs when the stoves are off.[1] As a flammable and explosive gas, methane also contributes an additional risk factor to homes and buildings in an area prone to earthquakes. As a result, in the last 10 years, the City's primary building energy focus has shifted from energy efficiency and conservation to electrification: the replacement of all gas systems and appliances with efficient, all-electric alternatives.

[1] Level, Eric D. et al. "Methane and NO_X Emissions from Natural Gas Stoves, Cooktops, and Ovens in Residential Homes." *Environmental Science & Technology*, 2022. DOI: 10.1021/acs.est.1c04707

In July 2020, by adopting the 2030 Equitable Climate Action Plan (ECAP), Oakland City Council committed to eliminating methane gas use in building systems and appliances by 2040. Later that same year, the City effectively prohibited any new construction from including gas systems or appliances. Per the ECAP, City staff are developing a policy Roadmap to identify specific strategies to removing gas from all existing buildings by the target date. The Building Electrification Policy Roadmap will outline strategies to ensure that the electrification transition prioritizes resilience and health, and avoids exacerbating housing displacement. Implementing these strategies will require coordination among the City's Housing and Community Development Department, Economic and Workforce Development Department, Planning & Building Department, Dept of Race and Equity, and City Administrator's Office.

Costs are another critical aspect of energy use and the electrification transition. Given the high cost of living in the Bay Area and the ongoing housing crisis, energy insecurity is a serious threat for many households. For many who are housing-insecure, high energy costs can lead to displacement. Electricity is currently cheaper than gas, but rates for both are rising, with gas rates rising faster and at greater risk for price spikes from market disruptions as California makes progress in reducing gas usage across the state.

Energy efficiency and conservation can lessen both the upfront and lifetime costs of electrification, and reduce the amount of onsite renewable energy needed to offset usage costs. Sealing the building envelope and HVAC ducts; insulating walls, floors, and attics; and installing efficient heating/cooling systems and appliances all contribute to the energy efficiency of a residence. Done properly, these measures can also alleviate other public health threats, such as mold. Incorporating passive heating, cooling, and lighting (for instance, maximizing windows on the south-facing side of the building to capture light and heat) into the design of a residence can also contribute to reduced energy use. Urban environments can be more sustainable than suburban or rural environments because many people live in multifamily buildings or townhomes, which are generally smaller spaces with shared walls, thereby limiting demands on heating and cooling spaces. Furthermore, constructing housing in urban and infill areas conserves transportation energy by making it easier for residents to use public transit, walk, or bike instead of driving. The urban forest is another often-overlooked yet important component of building energy efficiency. Urban trees help shade buildings in the summer heat, maximize sunlight reaching buildings in the winter, and mitigate the urban heat island effect in dense communities. Maximizing and protecting the urban forest in accordance with Oakland’s forthcoming 50-year Urban Forest Master Plan is thus another critical strategy to reduce building energy use and increase energy security.

The goal of the ECAP is to equitably reduce GHG emissions 60 percent relative to 2005 levels by 2030, on a path to carbon neutrality by 2045. The building sector is the second largest contributor to GHG emissions in Oakland, at just over one quarter of Oakland’s emissions, behind transportation (66.0 percent). Reducing building emissions rapidly will therefore be important to achieving Oakland’s climate targets.

G.2 Framework for Electrifying Buildings and Conserving Energy Resources

CALIFORNIA BUILDING ENERGY EFFICIENCY STANDARDS

Title 24, Part 6, of the California Code of Regulations (Building Energy Efficiency Standards for Residential Development), sets California's building standards for energy efficiency and supersedes any local regulations. These regulations respond to California's energy crisis, and each city and county must enforce these standards as part of its review of building plans and issuance of building permits. The standards, prepared by the California Energy Commission, were established in 1978 in response to a State legislative mandate to reduce California's energy consumption. The standards are updated every three years to incorporate new energy efficiency technologies and methods. Local jurisdictions are allowed to exceed Title 24 requirements where cost effectiveness and need are demonstrated, such as for local climatic or geological considerations, through Reach Codes.

The 2022 Energy Code will go into effect on January 1, 2023. Some of the new measures include:

- Establishing energy budgets based on efficient heat pumps in single-family homes, multifamily homes, and businesses to encourage builders to opt for electric heat pumps instead of gas-powered HVAC units;
- Requiring battery storage equivalent to a percentage of onsite solar-generated electricity in high-rise commercial and multifamily buildings;
- Increasing minimum kitchen range ventilation requirements; and
- Ensuring new single-family homes are electric-ready by:
    - Requiring installation of 240-volt circuits to accommodate electric clothes dryers, water and space heating, and cooking/ovens
    - Providing electric panel, branch circuits, and transfer switch for battery storage of electricity
    - Requiring installation of circuits and panels that can easily convert from gas to electricity for major appliances in the future

Since January 1, 2020, all new single-family homes, multifamily homes up to three stories high, and commercial businesses have been required to include solar panels. Beginning in 2023, all newly constructed multifamily dwellings will require both solar panels and photovoltaic battery storage. This mandate also applies to major renovations. These changes help to ensure that operating all-electric buildings will be cost-effective compared to mixed-fuel buildings.

The California Building Code also includes CALGreen, a set of green building regulations to ensure more sustainable building practices through pollution reduction, resource conservation, and energy efficiency. There are statewide mandatory measures, as well as more stringent voluntary measures that local jurisdictions may adopt.

CHALLENGES OF ELECTRIFICATION

In new construction, in addition to the environmental benefits, avoiding gas infrastructure reduces construction costs. Electrifying existing buildings is more challenging, due to often-outdated or insufficient infrastructure and the need for potentially invasive retrofits. Many older buildings have little or no insulation, inadequate windows, leaky ducts, and other inefficiencies that must be remedied in order to avoid oversized heating and air conditioning systems. Homes often lack the electric service and panel capacity to accommodate all-electric systems. Most of Oakland is served by overhead electrical distribution wires and smaller transformers, so electrifying large multifamily buildings or whole neighborhoods can trigger expensive transformer upgrades. Finally, Oakland's oldest homes often have a host of challenges that frustrate efficient renovations, such as lathe-and-plaster walls and knob-and-tube wiring. These challenges make renovations for electrification cost-prohibitive for many. Conflicting priorities among electrification and mold, lead, or asbestos remediation, seismic upgrades, or other health and safety renovations that are most needed in low-income and older housing further complicate existing building electrification.

Given these challenges, the ECAP obligates the City to pursue building electrification through an iterative process:

- As of July 2020, all major retrofits to City facilities must be all-electric.
- As of December 2020, all new construction must be all-electric.
- By July 2023, the City will produce a policy Roadmap for electrifying all existing buildings by 2040.
- By 2023, major renovations will be prohibited from connecting to natural gas infrastructure.
- By 2040, all existing buildings must become energy-efficient and convert to all-electric power.

Oakland has shown commitment to its energy targets in the past. The City's 2020 Energy and Climate Action Plan was adopted in 2012, with a target of reducing GHG emissions 36 percent by 2020. Preliminary data indicate that Oakland had reduced its emissions 26 percent as of 2019.

The Building Electrification Policy Roadmap will include detailed considerations and social supports to maximize local economic benefits and avoid displacement from the electrification transition. Most importantly, this will require a focus on holistic electrification – an approach rooted in building science that maximizes overall comfort, lighting needs, and energy efficiency, rather than simply exchanging gas appliances for equivalent electric units. Without significant supports in the form of contractor training, rebates, incentives, and integrating programs across multiple disciplines, electrification could result in low-income residents and building owners being disproportionately burdened with high energy costs, as well as missed opportunities to improve Oakland's older housing stock.

EAST BAY COMMUNITY ENERGY

East Bay Community Energy (EBCE) formed as a Joint Powers Authority in 2016. In 2018, Oakland switched from Pacific Gas and Electric (PG&E) to EBCE as its default electricity provider to maximize its renewable energy supply while securing lower energy rates. As of 2020, EBCE's standard Bright Choice energy portfolio was at least 54 percent carbon-free, and the utility has committed to being

100 percent renewable by 2030. Customers who opt to pay more per month can receive 100 percent renewable energy by opting into EBCE's Renewable 100 rate. By 2030, EBCE's basic electricity mix will be 100 percent renewable. As EBCE generates more revenue and grows as a company, it will be able to invest in more renewable energy and thus lower the cost of providing renewable energy to customers. This surpasses the California Statewide mandate (SB100) of carbon-free electricity by 2045.[2] Due to EBCE's efforts, Oakland's transition away from methane gas to all-electric buildings will eliminate a potent GHG and major public health and safety threat, and contribute to a clean energy cycle that supports regional green jobs.

G.3 Energy Efficiency and Conservation Programs

This section describes local, State, and federal energy efficiency, savings, and financing programs that Oakland residents and property owners can utilize.

LOCAL AND REGIONAL FINANCING PROGRAMS

These programs offered by the City or region assist residents and property owners with financing or provide professional guidance for energy efficiency projects.

- Property Assessed Clean Energy (PACE) Financing provides financing for clean energy projects, such as water/energy efficiency projects, solar, or electric vehicle charger installation. A variety of providers offer this service in Oakland, such as Ygrene, HERO and AllianceNRG. Qualification is based on property equity. Financing is repaid via the property owner's tax bill.
- Rising Sun Center for Opportunity's Green House Call program sends trained youth Energy Specialists to residences to find opportunities to save energy or water and install appropriate hardware (such as faucet aerators) for free. This is available to owners and renters who have not used this service within the last five years.
- BayREN's Home+ program offers rebates for energy-efficiency home upgrades, such as duct sealing, insulation, high efficiency furnaces and air conditioners, and high efficiency water heaters.

  Bay REN's Home Energy Adviser is a free program that provides homeowners with the assistance of a certified energy efficiency professional. These professionals help homeowners review energy efficiency options, find qualified participating contractors, navigate project installation and financing, and maximize rebates from all sources.

EAST BAY COMMUNITY ENERGY RESOURCES

Resources provided by EBCE include the following programs:

- Community Solar Discount Program (coming soon) will offer discounted community solar access to customers residing in disadvantaged neighborhoods.

[2] Carbon-free electricity is not the same as renewable. While both types create zero carbon dioxide emissions, carbon-free energy portfolios also include non-renewable energy sources, such as nuclear and hydroelectric, the latter of which can destroy wildlife habitats.

- EBCE's Resilient Home Program offers pre-negotiated pricing and a $500 rebate when customers install home solar and battery backup systems.
- EBCE offers a rebate for switching from gas to induction stoves, and also provides an induction cooktop lending program for Oaklanders to try the cooking technology at home for free.

STATE AND FEDERAL ENERGY BILL ASSISTANCE AND ENERGY EFFICIENCY PROGRAMS

Low-income Oakland utility customers who qualify can take advantage of these programs to assist with energy bills or energy efficiency regardless of whether their energy provider is PG&E or EBCE:

- CARE provides a 35 percent discount on electric bills and 20 percent discount on gas bills.
- Relief for Energy Assistance for Community Help (REACH) provides a one-time credit up to $300 on a past-due energy bill balance.
- Low-Income Home Energy Assistance Program (LiHEAP) is a federally funded program that assists low-income households pay their energy bills and offers free weatherization assistance, such as attic insulation, caulking, and faucet aerators, as well as weatherization-related repairs.
- FERA provides an 18% energy bill discount.
- Medical Baseline offers customers who need extra energy to assist with a medical condition an additional allotment of electricity each month at the lowest price available.
- Energy Savings Assistance Program offers free weatherization services, such as insulation and caulking, as well as upgrades to more efficient appliances.
- Disadvantaged Communities – Single Family Solar Homes (DAC-SASH) provides free rooftop solar installations to homeowners.

STATE ELECTRIFICATION PROGRAMS

California is pursuing aggressive policies to support efficient electrification, including resources for homeowners and renters, contractor training, and a broad outreach campaign:

- Switch Is On is a statewide marketing and outreach campaign to promote electrification. An online portal explains the benefits of electrification and shares resources for finding contractors. The program also provides marketing across the state in multiple languages.
- Technology and Equipment for Clean Heating (TECH) program is an initiative to advance the market for low-emission space and water heating equipment for new and existing residential buildings. The $30 million program provides financial incentives, statewide marketing and outreach, and contractor engagement.
- Building Initiative for Low-Emissions Development (BUILD) is a $20 million program that provides financial and other incentives for zero- and near-zero emissions development and

construction of new single-family and multifamily homes, with at least 30 percent of funds reserved for low-income residences.

State law (Government Code Section 65583[a][7]) requires Housing Elements to contain an analysis of opportunities for residential energy conservation. According to the California Department of Housing and Community Development (State HCD), the energy conservation section of a Housing Element must inventory and analyze the opportunities to encourage energy saving features, energy saving materials, and energy efficient systems and design for residential development.

Residential energy conservation presents an opportunity to improve health, contribute to climate change mitigation and sustainability, and reduce the cost of living by reducing energy consumption. Statewide green building standards regulate energy efficiency and conservation as a part of building permit issuance and is updated every three years to ensure the integration of the latest research and technology. While electrification is one of the primary ways to reduce the environmental impact of a building and improve energy performance, residential buildings in Oakland face a range of difficulties when pursuing electrification including lack of electrical panel or service capacity, and the extensive renovations and remediations that the retrofitting for electrification might trigger.

Residents and property owners in Oakland have access to a variety of resources to assist with and incentivize residential energy conservation including local and state financing programs, and local resources such as solar rebates and incentives, and assistance with conversions of gas stoves to induction cooktops. Low-income Oakland utility customers who qualify can also take advantage of State and Federal Energy Bill assistance and energy efficiency programs. The State of California is pursuing aggressive policies to support efficient electrification, including resources for homeowners and renters, contractor training, and a broad outreach campaign.

G.1 Introduction

Energy conservation can lower utility bills, increase long-term housing affordability, and contribute to climate change mitigation and sustainability. Residential energy is used primarily for lighting, cooking, appliances, heating water, and cooling and heating buildings. Energy use in most California buildings happens in two forms: electricity (primarily for lighting, electronics, and plug-in appliances) and methane gas (often referred to as "natural gas," primarily used for space and water heating, cooking, and clothes drying).

The science of energy systems, climate change, and indoor air quality has grown rapidly in recent years. Once thought to be a "clean-burning" and "bridge" fuel, methane gas is a short-lived climate pollutant 84 times stronger than carbon dioxide in exacerbating the global greenhouse effect (known as "global warming potential"). Methane gas is a major contributor to poor health outcomes: Children who live in homes with gas stoves are 40 percent more likely to develop asthma. A 2022 study by PSE Healthy Energy, an Oakland-based think tank, found that gas stoves emit 0.8–1.3 percent of the gas they use as direct, unburned methane – three-quarters of which occurs when the stoves are off.[1] As a flammable and explosive gas, methane also

[1] Level, Eric D. et al. "Methane and NO_X Emissions from Natural Gas Stoves, Cooktops, and Ovens in Residential Homes." *Environmental Science & Technology*, 2022. DOI: 10.1021/acs.est.1c04707

contributes an additional risk factor to homes and buildings in an area prone to earthquakes. As a result, in the last 10 years, the City's primary building energy focus has shifted from energy efficiency and conservation to electrification: the replacement of all gas systems and appliances with efficient, all-electric alternatives.

In July 2020, by adopting the 2030 Equitable Climate Action Plan (ECAP), Oakland City Council committed to eliminating methane gas use in building systems and appliances by 2040. Later that same year, the City effectively prohibited any new construction from including gas systems or appliances. Per the ECAP, City staff are developing a policy Roadmap to identify specific strategies to removing gas from all existing buildings by the target date. The Building Electrification Policy Roadmap will outline strategies to ensure that the electrification transition prioritizes resilience and health, and avoids exacerbating housing displacement. Implementing these strategies will require coordination among the City's Housing and Community Development Department, Economic and Workforce Development Department, Planning & Building Department, Dept of Race and Equity, and City Administrator's Office.

Costs are another critical aspect of energy use and the electrification transition. Given the high cost of living in the Bay Area and the ongoing housing crisis, energy insecurity is a serious threat for many households. For many who are housing-insecure, high energy costs can lead to displacement. Electricity is currently cheaper than gas, but rates for both are rising, with gas rates rising faster and at greater risk for price spikes from market disruptions as California makes progress in reducing gas usage across the state.

Energy efficiency and conservation can lessen both the upfront and lifetime costs of electrification, and reduce the amount of onsite renewable energy needed to offset usage costs. Sealing the building envelope and HVAC ducts; insulating walls, floors, and attics; and installing efficient heating/cooling systems and appliances all contribute to the energy efficiency of a residence. Done properly, these measures can also alleviate other public health threats, such as mold. Incorporating passive heating, cooling, and lighting (for instance, maximizing windows on the south-facing side of the building to capture light and heat) into the design of a residence can also contribute to reduced energy use. Urban environments can be more sustainable than suburban or rural environments because many people live in multifamily buildings or townhomes, which are generally smaller spaces with shared walls, thereby limiting demands on heating and cooling spaces. Furthermore, constructing housing in urban and infill areas conserves transportation energy by making it easier for residents to use public transit, walk, or bike instead of driving. The urban forest is another often-overlooked yet important component of building energy efficiency. Urban trees help shade buildings in the summer heat, maximize sunlight reaching buildings in the winter, and mitigate the urban heat island effect in dense communities. Maximizing and protecting the urban forest in accordance with Oakland's forthcoming 50-year Urban Forest Master Plan is thus another critical strategy to reduce building energy use and increase energy security.

The goal of the ECAP is to equitably reduce GHG emissions 60 percent relative to 2005 levels by 2030, on a path to carbon neutrality by 2045. The building sector is the second largest contributor to GHG emissions in Oakland, at just over one quarter of Oakland's emissions, behind transportation (66.0 percent). Reducing building emissions rapidly will therefore be important to achieving Oakland's climate targets.

G.2 Framework for Electrifying Buildings and Conserving Energy Resources

CALIFORNIA BUILDING ENERGY EFFICIENCY STANDARDS

Title 24, Part 6, of the California Code of Regulations (Building Energy Efficiency Standards for Residential Development), sets California's building standards for energy efficiency and supersedes any local regulations. These regulations respond to California's energy crisis, and each city and county must enforce these standards as part of its review of building plans and issuance of building permits. The standards, prepared by the California Energy Commission, were established in 1978 in response to a State legislative mandate to reduce California's energy consumption. The standards are updated every three years to incorporate new energy efficiency technologies and methods. Local jurisdictions are allowed to exceed Title 24 requirements where cost effectiveness and need are demonstrated, such as for local climatic or geological considerations, through Reach Codes.

The 2022 Energy Code will go into effect on January 1, 2023. Some of the new measures include:

- Establishing energy budgets based on efficient heat pumps in single-family homes, multifamily homes, and businesses to encourage builders to opt for electric heat pumps instead of gas-powered HVAC units;
- Requiring battery storage equivalent to a percentage of onsite solar-generated electricity in high-rise commercial and multifamily buildings;
- Increasing minimum kitchen range ventilation requirements; and
- Ensuring new single-family homes are electric-ready by:
    - Requiring installation of 240-volt circuits to accommodate electric clothes dryers, water and space heating, and cooking/ovens
    - Providing electric panel, branch circuits, and transfer switch for battery storage of electricity
    - Requiring installation of circuits and panels that can easily convert from gas to electricity for major appliances in the future

Since January 1, 2020, all new single-family homes, multifamily homes up to three stories high, and commercial businesses have been required to include solar panels. Beginning in 2023, all newly constructed multifamily dwellings will require both solar panels and photovoltaic battery storage. This mandate also applies to major renovations. These changes help to ensure that operating all-electric buildings will be cost-effective compared to mixed-fuel buildings.

The California Building Code also includes CALGreen, a set of green building regulations to ensure more sustainable building practices through pollution reduction, resource conservation, and energy efficiency.

There are statewide mandatory measures, as well as more stringent voluntary measures that local jurisdictions may adopt.

CHALLENGES OF ELECTRIFICATION

In new construction, in addition to the environmental benefits, avoiding gas infrastructure reduces construction costs. Electrifying existing buildings is more challenging, due to often-outdated or insufficient infrastructure and the need for potentially invasive retrofits. Many older buildings have little or no insulation, inadequate windows, leaky ducts, and other inefficiencies that must be remedied in order to avoid oversized heating and air conditioning systems. Homes often lack the electric service and panel capacity to accommodate all-electric systems. Most of Oakland is served by overhead electrical distribution wires and smaller transformers, so electrifying large multifamily buildings or whole neighborhoods can trigger expensive transformer upgrades. Finally, Oakland's oldest homes often have a host of challenges that frustrate efficient renovations, such as lathe-and-plaster walls and knob-and-tube wiring. These challenges make renovations for electrification cost-prohibitive for many. Conflicting priorities among electrification and mold, lead, or asbestos remediation, seismic upgrades, or other health and safety renovations that are most needed in low-income and older housing further complicate existing building electrification.

Given these challenges, the ECAP obligates the City to pursue building electrification through an iterative process:

- As of July 2020, all major retrofits to City facilities must be all-electric.
- As of December 2020, all new construction must be all-electric.
- By July 2023, the City will produce a policy Roadmap for electrifying all existing buildings by 2040.
- By 2023, major renovations will be prohibited from connecting to natural gas infrastructure.
- By 2040, all existing buildings must become energy-efficient and convert to all-electric power.

Oakland has shown commitment to its energy targets in the past. The City's 2020 Energy and Climate Action Plan was adopted in 2012, with a target of reducing GHG emissions 36 percent by 2020. Preliminary data indicate that Oakland had reduced its emissions 26 percent as of 2019.

The Building Electrification Policy Roadmap will include detailed considerations and social supports to maximize local economic benefits and avoid displacement from the electrification transition. Most importantly, this will require a focus on holistic electrification – an approach rooted in building science that maximizes overall comfort, lighting needs, and energy efficiency, rather than simply exchanging gas appliances for equivalent electric units. Without significant supports in the form of contractor training, rebates, incentives, and integrating programs across multiple disciplines, electrification could result in low-income residents and building owners being disproportionately burdened with high energy costs, as well as missed opportunities to improve Oakland's older housing stock.

EAST BAY COMMUNITY ENERGY

East Bay Community Energy (EBCE) formed as a Joint Powers Authority in 2016. In 2018, Oakland switched from Pacific Gas and Electric (PG&E) to EBCE as its default electricity provider to maximize its renewable energy supply while securing lower energy rates. As of 2020, EBCE's standard Bright Choice energy portfolio was at least 54 percent carbon-free, and the utility has committed to being 100 percent renewable by 2030. Customers who opt to pay more per month can receive 100 percent renewable energy by opting into EBCE's Renewable 100 rate. By 2030, EBCE's basic electricity mix will be 100 percent renewable. As EBCE generates more revenue and grows as a company, it will be able to invest in more renewable energy and thus lower the cost of providing renewable energy to customers. This surpasses the California Statewide mandate (SB100) of carbon-free electricity by 2045.[2] Due to EBCE's efforts, Oakland's transition away from methane gas to all-electric buildings will eliminate a potent GHG and major public health and safety threat, and contribute to a clean energy cycle that supports regional green jobs.

G.3 Energy Efficiency and Conservation Programs

This section describes local, State, and federal energy efficiency, savings, and financing programs that Oakland residents and property owners can utilize.

LOCAL AND REGIONAL FINANCING PROGRAMS

These programs offered by the City or region assist residents and property owners with financing or provide professional guidance for energy efficiency projects.

- Property Assessed Clean Energy (PACE) Financing provides financing for clean energy projects, such as water/energy efficiency projects, solar, or electric vehicle charger installation. A variety of providers offer this service in Oakland, such as Ygrene, HERO and AllianceNRG. Qualification is based on property equity. Financing is repaid via the property owner's tax bill.
- Rising Sun Center for Opportunity's Green House Call program sends trained youth Energy Specialists to residences to find opportunities to save energy or water and install appropriate hardware (such as faucet aerators) for free. This is available to owners and renters who have not used this service within the last five years.
- BayREN's Home+ program offers rebates for energy-efficiency home upgrades, such as duct sealing, insulation, high efficiency furnaces and air conditioners, and high efficiency water heaters.

  Bay REN's Home Energy Adviser is a free program that provides homeowners with the assistance of a certified energy efficiency professional. These professionals help homeowners review energy

[2] Carbon-free electricity is not the same as renewable. While both types create zero carbon dioxide emissions, carbon-free energy portfolios also include non-renewable energy sources, such as nuclear and hydroelectric, the latter of which can destroy wildlife habitats.

efficiency options, find qualified participating contractors, navigate project installation and financing, and maximize rebates from all sources.

EAST BAY COMMUNITY ENERGY RESOURCES

Resources provided by EBCE include the following programs:

- Community Solar Discount Program (coming soon) will offer discounted community solar access to customers residing in disadvantaged neighborhoods.
- EBCE's Resilient Home Program offers pre-negotiated pricing and a $500 rebate when customers install home solar and battery backup systems.
- EBCE offers a rebate for switching from gas to induction stoves, and also provides an induction cooktop lending program for Oaklanders to try the cooking technology at home for free.

STATE AND FEDERAL ENERGY BILL ASSISTANCE AND ENERGY EFFICIENCY PROGRAMS

Low-income Oakland utility customers who qualify can take advantage of these programs to assist with energy bills or energy efficiency regardless of whether their energy provider is PG&E or EBCE:

- CARE provides a 35 percent discount on electric bills and 20 percent discount on gas bills.
- Relief for Energy Assistance for Community Help (REACH) provides a one-time credit up to $300 on a past-due energy bill balance.
- Low-Income Home Energy Assistance Program (LiHEAP) is a federally funded program that assists low-income households pay their energy bills and offers free weatherization assistance, such as attic insulation, caulking, and faucet aerators, as well as weatherization-related repairs.
- FERA provides an 18% energy bill discount.
- Medical Baseline offers customers who need extra energy to assist with a medical condition an additional allotment of electricity each month at the lowest price available.
- Energy Savings Assistance Program offers free weatherization services, such as insulation and caulking, as well as upgrades to more efficient appliances.
- Disadvantaged Communities – Single Family Solar Homes (DAC-SASH) provides free rooftop solar installations to homeowners.

STATE ELECTRIFICATION PROGRAMS

California is pursuing aggressive policies to support efficient electrification, including resources for homeowners and renters, contractor training, and a broad outreach campaign:

- Switch Is On is a statewide marketing and outreach campaign to promote electrification. An online portal explains the benefits of electrification and shares resources for finding contractors. The program also provides marketing across the state in multiple languages.
- Technology and Equipment for Clean Heating (TECH) program is an initiative to advance the market for low-emission space and water heating equipment for new and existing residential buildings. The $30 million program provides financial incentives, statewide marketing and outreach, and contractor engagement.
- Building Initiative for Low-Emissions Development (BUILD) is a $20 million program that provides financial and other incentives for zero- and near-zero emissions development and construction of new single-family and multifamily homes, with at least 30 percent of funds reserved for low-income residences.

Appendix H: Glossary

Accessible Housing: The construction or modification of housing to enable independent living for individuals with disabilities.

Accessory Dwelling Unit (ADU): A self-contained living unit, either attached to or detached from, and in addition to, the primary residential unit on a single lot. Sometimes known as "granny flat" or "second unit."

Acre: A unit of land measure equal to 43,560 square feet. Net acreage refers to the portion of a site exclusive of existing or planned public or private road rights-of-way.

Access to Opportunity: Geographic access to goods, resources, and services (including employment, education, and transportation) that offer individuals, particularly low-income households and individuals, the best chance at economic advancement, high educational attainment, and good physical and mental health. Low-income communities and communities of color often have disproportionate access to opportunity. Access to opportunity is generally expressed as "high resource" or "low resource."

Affirmatively Further Fair Housing (AFFH): A State-mandated requirement for government agencies and grantees to take meaningful actions to explicitly address, combat, and relieve disparities resulting from past patterns of segregation to strengthen fair access to housing and more inclusive communities.

Affordable Housing: Under State and federal statutes, housing which costs no more than 30 percent of gross household income. Housing costs include rent or mortgage payments, utilities, taxes, insurance, homeowner association fees, and related costs.

Age in Place: The ability to live in one's own home and community safely, independently, and comfortably, regardless of age, income, or ability level.

Area Median Income (AMI): the midpoint of a region's income distribution – half of families in a region earn more than the median and half earn less than the median. For housing policy, income thresholds set relative to the area median income—such as 50% of the area median income—identify households eligible to live in income-restricted housing units and the affordability of housing units to low-income households. The AMI for Oakland, as of 2021, was $125,600.

Assisted Housing: Housing that has received subsidies (such as low interest loans, density bonuses, direct financial assistance, etc.) by federal, State, or local housing programs in exchange for restrictions requiring a certain number of housing units to be affordable to very-low-, low-, and moderate-income households.

Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC): The Association of Bay Area Governments (ABAG) is part regional planning

agency and part local government service provider, while the Metropolitan Transportation Commission (MTC) acts as the transportation planning, financing and coordinating agency for the nine-county San Francisco Bay Area. ABAG and MTC continue to share joint responsibility for Plan Bay Area, now with a single staff, serving both the ABAG Executive Board and the MTC Commission. The latest iteration of the plan—Plan Bay Area 2050—was jointly adopted in October 2021. ABAG is also responsible for developing the Regional Housing Needs Assessment (RHNA) Methodology to distribute regional housing need – the ABAG Executive Board adopted the final RHNA plan on December 16, 2021.

At-Risk Housing: Assisted rental housing that is at risk of losing its status as housing affordable for extremely-low-, very-low-, low-, and moderate-income residents due to the expiration of federal, State or local agreements.

California Department of Housing and Community Development (State HCD): The State Department responsible for administering State-sponsored housing programs and for reviewing housing elements to determine compliance with State housing law.

Census: The official United States decennial enumeration of the population conducted by the federal government.

Collective Ownership Models: Ownership by a group for the benefit of members of that group. Examples of collective ownership models include housing cooperatives or "co-ops," and community land trusts.

Community Development Block Grant (CDBG): A grant program administered by the U.S. Department of Housing and Urban Development (HUD) on a formula basis for entitlement communities and by the State Department of Housing and Community Development (HCD) for non-entitled jurisdictions. This grant allots money to cities and counties for housing rehabilitation and community development, including public facilities and economic development.

Complete Neighborhood: A neighborhood that promotes livability and safety for residents of all ages, incomes, and cultural backgrounds with characteristics such as: a mix of housing types and housing affordability; one or more nodes or districts of vibrant commercial or civic activity that provide identity for the neighborhood; neighborhood services and facilities including schools, parks, retail (e.g., grocery store, drug store), restaurants and cafes, and community centers or other public meeting hall; employment opportunities.

Condominium: A building or group of buildings in which units are owned individually, but the structure, common areas and facilities are owned by all owners on a proportional, undivided basis.

Continuum of Care: A community plan to organize and deliver housing and services to meet the specific needs of people who are homeless as they move to stable housing and maximum self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness.

Covenant: A property title agreement which places resale or rental restrictions on a housing unit.

Density: The number of dwelling units per unit of land. Density usually is expressed “per acre,” (e.g., a development with 100 units located on 20 acres has density of 5.0 units per acre).

Density Bonus: The allowance of additional residential units beyond the maximum for which the parcel is otherwise permitted usually in exchange for the provision or preservation of affordable housing units at the same site or at another location.

Development Impact Fees: Fees required by City code, ordinance, resolution or other City law to be paid as a condition of, or prerequisite to, issuance of a building permit for the development of residential uses, as those fees may be amended from time to time.

Displacement: Occurs when certain groups of individuals or households (often low-income) are forced to move from neighborhoods as a result of rising housing costs and neighborhood conditions associated with new investments in those neighborhoods.

Diversity: The practice or quality of including or involving people from a range of different social and ethnic backgrounds and of different genders, sexual orientations, etc.

Dwelling Unit: "Dwelling unit" means a room or suite of rooms including only one kitchen, except as otherwise provided in Section 17.102.270, and designed or occupied as separate living quarters for one person or family; or, where the facility occupied is a One-Family Dwelling, such family and not more than three (3) boarders, roomers, or lodgers where access to all rooms occupied by such boarders, roomers, or lodgers is had through the main entrance of the dwelling unit (Oakland Planning Code Chapter 17.09).

Older Adult Household: Senior households are one- or two- member (family or nonfamily) households in which the head or spouse is age 65 or older.

Energy Conservation: Reducing the consumption of energy through using less of an energy service. This can be achieved either by using energy more efficiently or by reducing the amount of service used.

Emergency Shelter: Emergency shelter is defined as housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay. (See Government Code, § 65582, subd. (d) and Health and Safety Code, § 50801, subd. (e).)

Fair Market Rent (FMR): Fair Market Rents (FMRs) are freely set rental rates defined by HUD as the median gross rents charged for available standard units in a county or metropolitan area. Fair Market Rents are used for the Section 8 Rental Program and other HUD programs.

First-Time Home Buyer: Defined by HUD as an individual or family who has not owned a home during the three- year period preceding the HUD-assisted purchase of a home. Jurisdictions may adopt local definitions for first-time home buyer programs which differ from non-federally funded programs.

Floor Area Ratio (FAR): The ratio of gross building area (GBA) of development divided by the total net lot area (NLA). For example, a one-story building covering its entire lot would have a FAR of 1.0. A two-story building covering half its lot would also have an FAR of 1.0. The formula for calculating FAR is GBA/NLA = FAR.

General Plan: The General Plan is a legal document, adopted by the legislative body of a City or County, setting forth policies regarding long-term development. California law requires the preparation of seven elements or chapters in the General Plan: Land Use, Housing,

Circulation, Conservation, Open Space, Noise, and Safety. Additional elements are permitted to address local needs.

Gentrification: The process by which higher income households displace lower income residents of a neighborhood, changing the essential character of that neighborhood.

Group Quarters: A facility which houses groups of unrelated persons not living in households (U.S. Census definition). Examples of group quarters include institutions, dormitories, shelters, military quarters, assisted living facilities and other quarters, including single-room occupancy (SRO) housing, where 10 or more unrelated individuals are housed.

High Resource Area(s): Area(s) identified by HCD and the Tax Credit Allocation Committee's Opportunity Area Mapping Tool that offer low-income children and adults the best chance at economic advancement, high educational attainment, and good physical and mental health.

HOME Program: The HOME Investment Partnership Act, Title II of the National Affordable Housing Act of 1990. HOME is a federal program administered by HUD which provides formula grants to States and localities to fund activities that build, buy, and/or rehabilitate affordable housing for rent or home ownership or provide direct rental assistance to low-income people.

Homelessness: As defined in the HEARTH act, homeless means: (1) an individual or family who lacks a fixed, regular, and adequate nighttime residence, such as those living in an emergency shelter, transitional housing, or places not meant for habitation; (2) an individual or family who will imminently lose their primary nighttime residence (within 14 days), provided that no subsequent housing has been identified and the individual/family lacks support networks or resources needed to obtain housing; (3) unaccompanied youth under 25 years of age, or families with children and youth, who qualify under other Federal statutes, such as the Runaway and Homeless Youth Act, have not had a lease or ownership interest in a housing unit in the last 60 or more days, have had two or more moves in the last 60 days, and who are likely to continue to be unstably housed; (4) an individual or family who is fleeing or attempting to flee domestic violence, has no other residence, and lacks the resources or support networks to obtain other permanent housing.

Household: The U.S. Census Bureau defines a household as all persons living in a housing unit whether or not they are related. A single person living in an apartment as well as a family living in a house is considered a household.

Household does not include individuals living in dormitories, prisons, convalescent homes, or other group quarters.

Household Income: The total income of all the persons living in a household. Household income is commonly grouped into income categories based upon household size, and income, relative to the regional median family income. The following categories are used in the Housing Element:

- *Extremely Low:* Households earning less than 30 percent of County median family income;
- *Very low:* Households earning less than 50 percent of County median family income;
- *Low:* Households earning 51 percent to 80 percent of the County median family

income;

- *Moderate:* Households earning 81 percent to 120 percent of County median family income; and
- *Above- Moderate:* Households earning above 120 percent of County median family income.

Housing Choice Voucher Program (formerly Section 8 vouchers): A tenant-based rental assistance program that subsidizes a family's rent in a privately owned house or apartment. The program is administered by local public housing authorities. Assistance payments are based on 30 percent of household annual income. Households with incomes of 50 percent or below the area median income are eligible to participate in the program.

Housing First: A homeless assistance approach or policy that prioritizes providing permanent housing to people experiencing homelessness as quickly as possible, and other supportive services afterward.

Housing Problems: Defined by HUD as a household which: (1) occupies a unit with physical defects (lacks complete kitchen or bathroom); (2) meets the definition of overcrowded; or (3) spends more than 30 percent of income on housing cost.

Housing Subsidy: Housing subsidies refer to government assistance aimed at reducing housing sales or rent prices to more affordable levels. Two general types of housing subsidy exist. Where a housing subsidy is linked to a particular house or apartment, housing subsidy is "project" or "unit" based. In Section 8 rental assistance programs the subsidy is provided to the family (called "tenant-based") who can then use the assistance to find suitable housing in the housing unit of their choice.

Housing Unit: A room or group of rooms used by one or more individuals living separately from others in the structure, with direct access to the outside or to a public hall and containing separate toilet and kitchen facilities.

Inclusion: This is an active state of being valued, respected and supported. Inclusion focuses on the needs of every individual and ensures the right conditions are in place for each person to achieve his or her full potential. An inclusive environment ensures equitable access to resources and opportunities for all. It also enables individuals and groups to feel safe, respected, engaged, motivated, and valued for who they are and for their contributions toward organizational and societal goals.

Inclusive Economic Development Investment(s): Investments that expand economic opportunities that benefit underserved and underrepresented communities, thereby reducing social, racial, health, and economic disparities in these communities. Through public and private actions that are responsive to community need and build on resident assets, these investments foster small business growth, increase quality jobs, stabilize people in safe and affordable homes, prepare residents of all ages to fill jobs, improve neighborhoods, and increase household wealth.

Infill: The process of developing vacant or under-utilized parcels within existing developed areas.

Junior Accessory Dwelling Unit (JADU): An additional, independent living unit created through the conversion of an existing legally permitted bedroom in a single-family dwelling.

(See definition of Accessory Dwelling Unit). A Junior Accessory Dwelling Unit must be no more than 500 square feet and must be converted from existing space.

Large Household: A household with five or more members.

Low Barrier Navigation Center(s): A "Housing First", low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. For emergency shelters, creating a "low barrier" environment means removing as many pre- conditions to entry as possible and responding to the needs and concerns of people seeking shelter.

Manufactured Housing: Housing that is constructed of manufactured components, assembled partly at the site rather than totally at the site. Also referred to as modular housing.

Market-Rate Housing: Housing which is available on the open market without any subsidy. The price for housing is determined by the market forces of supply and demand and varies by location.

Median Income: The annual income for each household size within a region which is defined annually by HUD. Half of the households in the region have incomes above the median and half have incomes below the median.

Missing Middle: Small-scale multifamily housing that can range from duplexes to townhouses to smaller apartment buildings that are compatible with walkable neighborhoods.

Mobile Home: A structure, transportable in one or more sections, which is at least 8 feet in width and 32 feet in length, is built on a permanent chassis and designed to be used as a dwelling unit when connected to the required utilities, either with or without a permanent foundation.

Mortgage Revenue Bond: A state, county or city program providing financing for the development of housing through the sale of tax-exempt bonds.

Older Adult: (Another word for "senior" or "elderly" person). The Census Bureau defines an older adult or senior as a person who is 65 years or older, and this definition is used in the Housing Element document unless otherwise noted. For persons of social security eligibility, a senior is defined as a person age 62 and older. Other age limits may be used for eligibility for housing assistance or retired communities.

Overcrowding: As defined by the U.S. Census, a household with greater than 1.01 persons per room, excluding bathrooms, kitchens, hallways, and porches. Severe overcrowding is defined as households with greater than 1.51 persons per room.

Overpayment: The extent to which gross housing costs, including utility costs, exceed 30 percent of gross household income, based on data published by the U.S. Census Bureau. Severe overpayment exists if gross housing costs exceed 50 percent of gross income.

Parcel: The basic unit of land entitlement. A designated area of land established by plat, subdivision, or otherwise legally defined and permitted to be used, or built upon.

Place-Based Strategy: Place-based strategies are actions that encourage community preservation and revitalization and should address increasing quality of life. Areas include, but are not limited to, housing, transportation, infrastructure, parks, recreation, education programs,

etc. City programs establishing place-based strategies must target a geographic area of the City.

Plan Bay Area: Plan Bay Area is the joint responsibility of ABAG-MTC. The most recent version of the Plan, Plan Bay Area 2050, is a long-range plan charting the course for the future of the nine-county San Francisco Bay Area. Plan Bay Area 2050 focuses on four key elements — housing, the economy, transportation and the environment — and identifies a path to make the Bay Area more equitable for all residents and more resilient in the face of unexpected challenges. The Plan was adopted by ABAG-MTC on October 21, 2021.

Public Housing: A project-based low-rent housing program operated by independent local public housing authorities. A low-income family applies to the local public housing authority in the area in which they want to live.

Racial Equity: A core value in which race does not affect life outcomes. Regardless of one's identity, equity is when all people have just treatment, access to opportunities necessary to satisfy their essential needs, advance their well- being and achieve their full potential while identifying and eliminating barriers that have prevented the full participation of some groups.

Redlining: A discriminatory practice in which services or goods by federal government agencies were denied or restricted in certain areas of a community, often based on race or ethnicity.

Reasonable Accommodations: Amendments to a City's standard procedures for processing permits or application in order to enable people with disabilities to participate fully in the process.

Regional Housing Needs Plan: A quantification by a Council of Government or by the State Department of Housing and Community Development of existing and projected housing need, by household income group, for all localities within a region.

Regional Housing Needs Allocation (RHNA): Each city and county in the Regional Housing Needs Plan receives a Regional Housing Needs Allocation (RHNA) of a total number of housing units that it must plan through their General Plan Housing Elements within a specified time period (January 31, 2023, to January 31, 2031 for this Housing Element period). Allocations are also distributed within four economic income categories; these four categories must add up to the total overall number a jurisdiction is allocated. The City's total RHNA from the 2023-2031 Housing Element is 26,251 housing units distributed in the following way: 6,511 should be affordable to extremely-low- and very-low- income households, 3,750 to low-income households, 4,457 to moderate-income households, and 11,533 to above moderate-income households.

Rehabilitation: The upgrading of a building previously in a dilapidated or substandard condition for human habitation or use.

Residential Energy: The total energy used in residential buildings, including heating, cooling, and "plug load" from appliances, lights, and electrical devices.

Service Needs: The particular services required by special populations, typically including needs such as transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services preventing premature

institutionalization and assisting individuals to continue living independently.

Single Room Occupancy (SRO): An SRO is a cluster of residential units of a smaller size than normally found in multiple dwellings within a residential hotel, motel, or facility providing sleeping or living facilities in which sanitary facilities may be provided within the unit and/or shared, and kitchen or cooking facilities may be provided within the unit or shared within the housing project.

Special Needs Groups: Those segments of the population which have a more difficult time finding decent affordable housing due to special circumstances. Under California Housing Element statutes, these special needs groups include older adults, people with disabilities, large families with five or more members, female-headed households, farmworkers, extremely low- income households, and the homeless. A jurisdiction may also choose to consider additional special needs groups in the Housing Element, such as students, military households, other groups present in their community.

Subdivision: The division of a lot, tract or parcel of land in accordance with the Subdivision Map Act (California Government Code Section 66410 et seq.).

Substandard Housing: Housing which does not meet the minimum standards in the State Housing Code. Jurisdictions may adopt more stringent local definitions of substandard housing. Substandard units which are structurally sound and for which the cost of rehabilitation is economically warranted are considered suitable for rehabilitation. Substandard units which are structurally unsound and for which the cost of rehabilitation is considered infeasible are considered in need of replacement.

Supportive Housing: Housing with a supporting environment, such as group homes or Single Room Occupancy (SRO) housing and other housing that includes a supportive service component such as those defined below.

Supportive Services: Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.

California Tax Credit Allocation Committee (TCAC): TCAC allocates federal and state tax credits to the developers of affordable rental housing projects. TCAC verifies that the developers have met all the requirements of the Low Income Housing Tax Credit program and ensures the continued affordability and habitability of the developments for the succeeding 55 years.

Tenant-Based Rental Assistance: A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.

Transitional Housing: Transitional housing is temporary (often six months to two years) housing for a homeless individual or family who is transitioning to permanent housing. Transitional housing often includes a supportive services component (e.g., job skills training, rehabilitation counseling) to allow individuals to gain necessary life skills in support of independent living.

Underutilized Site: Non-vacant sites that have structures or other site improvements, but are capable of being redeveloped with residential uses at a higher density under the zoning

and General Plan land use designations. Examples include sites with vacant or abandoned buildings, surface parking lots in the Central City, and large sites that are only partially-developed.

Universal Design: The design of buildings, products, and environments that make them accessible and safe to all people regardless of age, size, ability, or disability.

U.S. Department of Housing and Urban Development (HUD): The cabinet level department of the federal government responsible for housing, housing assistance, and urban development at the national level. Housing programs administered through HUD include Community Development Block Grant (CDBG), HOME and Housing Choice Vouchers, among others.

Vacant Site: A vacant site is a site without any houses, offices, buildings, or other significant improvements on it. Improvements are generally defined as development of the land (such as a paved parking lot, or income production improvements such as crops, high voltage power lines, etc.) or structures on a property that are permanent and add significantly to the value of the property.

Workforce Housing: housing that is affordable to households earning between 60 and 120 percent of area median income (AMI). Workforce housing targets middle-income families and workers including teachers, health care workers, retail clerks, young professionals, and more.

Zoning: Local codes regulating the use and development of property. A zoning ordinance divides the city or county into land use districts or "zones", represented on zoning maps, and specifies the allowable uses within each of those zones. It also establishes development standards for each zone, such as minimum lot size, maximum height of structures, building setbacks, and yard size.

Zoning Ordinance: Known as the "Oakland Planning Code," its purpose is to protect and promote the public health, safety, comfort, convenience, prosperity, and general welfare of Oakland in conformance with the City's General Plan. (Oakland Planning Code 17.07.030)

Appendix H: Glossary

Accessible Housing: The construction or modification of housing to enable independent living for individuals with disabilities.

Accessory Dwelling Unit (ADU): A self-contained living unit, either attached to or detached from, and in addition to, the primary residential unit on a single lot. Sometimes known as "granny flat" or "second unit."

Acre: A unit of land measure equal to 43,560 square feet. Net acreage refers to the portion of a site exclusive of existing or planned public or private road rights-of-way.

Access to Opportunity: Geographic access to goods, resources, and services (including employment, education, and transportation) that offer individuals, particularly low-income households and individuals, the best chance at economic advancement, high educational attainment, and good physical and mental health. Low-income communities and communities of color often have disproportionate access to opportunity. Access to opportunity is generally expressed as "high resource" or "low resource."

Affirmatively Further Fair Housing (AFFH): A State-mandated requirement for government agencies and grantees to take meaningful actions to explicitly address, combat, and relieve disparities resulting from past patterns of segregation to strengthen fair access to housing and more inclusive communities.

Affordable Housing: Under State and federal statutes, housing which costs no more than 30 percent of gross household income. Housing costs include rent or mortgage payments, utilities, taxes, insurance, homeowner association fees, and related costs.

Age in Place: The ability to live in one's own home and community safely, independently, and comfortably, regardless of age, income, or ability level.

Area Median Income (AMI): the midpoint of a region's income distribution – half of families in a region earn more than the median and half earn less than the median. For housing policy, income thresholds set relative to the area median income—such as 50% of the area median income—identify households eligible to live in income-restricted housing units and the affordability of housing units to low-income households. The AMI for Oakland, as of 2021, was $125,600.

Assisted Housing: Housing that has received subsidies (such as low interest loans, density bonuses, direct financial assistance, etc.) by federal, State, or local housing programs in exchange for restrictions requiring a certain number of housing units to be affordable to very-low-, low-, and moderate-income households.

Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC): The Association of Bay Area Governments (ABAG) is part regional planning agency and part

local government service provider, while the Metropolitan Transportation Commission (MTC) acts as the transportation planning, financing and coordinating agency for the nine-county San Francisco Bay Area. ABAG and MTC continue to share joint responsibility for Plan Bay Area, now with a single staff, serving both the ABAG Executive Board and the MTC Commission. The latest iteration of the plan—Plan Bay Area 2050—was jointly adopted in October 2021. ABAG is also responsible for developing the Regional Housing Needs Assessment (RHNA) Methodology to distribute regional housing need – the ABAG Executive Board adopted the final RHNA plan on December 16, 2021.

At-Risk Housing: Assisted rental housing that is at risk of losing its status as housing affordable for extremely-low-, very-low-, low-, and moderate-income residents due to the expiration of federal, State or local agreements.

California Department of Housing and Community Development (State HCD): The State Department responsible for administering State-sponsored housing programs and for reviewing housing elements to determine compliance with State housing law.

Census: The official United States decennial enumeration of the population conducted by the federal government.

Collective Ownership Models: Ownership by a group for the benefit of members of that group. Examples of collective ownership models include housing cooperatives or "co-ops," and community land trusts.

Community Development Block Grant (CDBG): A grant program administered by the U.S. Department of Housing and Urban Development (HUD) on a formula basis for entitlement communities and by the State Department of Housing and Community Development (HCD) for non-entitled jurisdictions. This grant allots money to cities and counties for housing rehabilitation and community development, including public facilities and economic development.

Complete Neighborhood: A neighborhood that promotes livability and safety for residents of all ages, incomes, and cultural backgrounds with characteristics such as: a mix of housing types and housing affordability; one or more nodes or districts of vibrant commercial or civic activity that provide identity for the neighborhood; neighborhood services and facilities including schools, parks, retail (e.g., grocery store, drug store), restaurants and cafes, and community centers or other public meeting hall; employment opportunities.

Condominium: A building or group of buildings in which units are owned individually, but the structure, common areas and facilities are owned by all owners on a proportional, undivided basis.

Continuum of Care: A community plan to organize and deliver housing and services to meet the specific needs of people who are homeless as they move to stable housing and maximum self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness.

Covenant: A property title agreement which places resale or rental restrictions on a housing unit.

Density: The number of dwelling units per unit of land. Density usually is expressed “per acre,” (e.g., a development with 100 units located on 20 acres has density of 5.0 units per acre).

Density Bonus: The allowance of additional residential units beyond the maximum for which the parcel is otherwise permitted usually in exchange for the provision or preservation of affordable housing units at the same site or at another location.

Development Impact Fees: Fees required by City code, ordinance, resolution or other City law to be paid as a condition of, or prerequisite to, issuance of a building permit for the development of residential uses, as those fees may be amended from time to time.

Displacement: Occurs when certain groups of individuals or households (often low-income) are forced to move from neighborhoods as a result of rising housing costs and neighborhood conditions associated with new investments in those neighborhoods.

Diversity: The practice or quality of including or involving people from a range of different social and ethnic backgrounds and of different genders, sexual orientations, etc.

Dwelling Unit: "Dwelling unit" means a room or suite of rooms including only one kitchen, except as otherwise provided in Section 17.102.270, and designed or occupied as separate living quarters for one person or family; or, where the facility occupied is a One-Family Dwelling, such family and not more than three (3) boarders, roomers, or lodgers where access to all rooms occupied by such boarders, roomers, or lodgers is had through the main entrance of the dwelling unit (Oakland Planning Code Chapter 17.09).

Older Adult Household: Senior households are one- or two- member (family or nonfamily) households in which the head or spouse is age 65 or older.

Energy Conservation: Reducing the consumption of energy through using less of an energy service. This can be achieved either by using energy more efficiently or by reducing the amount of service used.

Emergency Shelter: Emergency shelter is defined as housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay. (See Government Code, § 65582, subd. (d) and Health and Safety Code, § 50801, subd. (e).)

Fair Market Rent (FMR): Fair Market Rents (FMRs) are freely set rental rates defined by HUD as the median gross rents charged for available standard units in a county or metropolitan area. Fair Market Rents are used for the Section 8 Rental Program and other HUD programs.

First-Time Home Buyer: Defined by HUD as an individual or family who has not owned a home during the three- year period preceding the HUD-assisted purchase of a home. Jurisdictions may adopt local definitions for first-time home buyer programs which differ from non-federally funded programs.

Floor Area Ratio (FAR): The ratio of gross building area (GBA) of development divided by the total net lot area (NLA). For example, a one-story building covering its entire lot would have a FAR of 1.0. A two-story building covering half its lot would also have an FAR of 1.0. The formula for calculating FAR is GBA/NLA = FAR.

General Plan: The General Plan is a legal document, adopted by the legislative body of a City or County, setting forth policies regarding long-term development. California law requires the preparation of seven elements or chapters in the General Plan: Land Use, Housing, Circulation, Conservation, Open Space, Noise, and Safety. Additional elements are permitted to address local needs.

Gentrification: The process by which higher income households displace lower income residents of a neighborhood, changing the essential character of that neighborhood.

Group Quarters: A facility which houses groups of unrelated persons not living in households (U.S. Census definition). Examples of group quarters include institutions, dormitories, shelters, military quarters, assisted living facilities and other quarters, including single-room occupancy (SRO) housing, where 10 or more unrelated individuals are housed.

High Resource Area(s): Area(s) identified by HCD and the Tax Credit Allocation Committee's Opportunity Area Mapping Tool that offer low-income children and adults the best chance at economic advancement, high educational attainment, and good physical and mental health.

HOME Program: The HOME Investment Partnership Act, Title II of the National Affordable Housing Act of 1990. HOME is a federal program administered by HUD which provides formula grants to States and localities to fund activities that build, buy, and/or rehabilitate affordable housing for rent or home ownership or provide direct rental assistance to low-income people.

Homelessness: As defined in the HEARTH act, homeless means: (1) an individual or family who lacks a fixed, regular, and adequate nighttime residence, such as those living in an emergency shelter, transitional housing, or places not meant for habitation; (2) an individual or family who will imminently lose their primary nighttime residence (within 14 days), provided that no subsequent housing has been identified and the individual/family lacks support networks or resources needed to obtain housing; (3) unaccompanied youth under 25 years of age, or families with children and youth, who qualify under other Federal statutes, such as the Runaway and Homeless Youth Act, have not had a lease or ownership interest in a housing unit in the last 60 or more days, have had two or more moves in the last 60 days, and who are likely to continue to be unstably housed; (4) an individual or family who is fleeing or attempting to flee domestic violence, has no other residence, and lacks the resources or support networks to obtain other permanent housing.

Household: The U.S. Census Bureau defines a household as all persons living in a housing unit whether or not they are related. A single person living in an apartment as well as a family living in a house is considered a household.

Household does not include individuals living in dormitories, prisons, convalescent homes, or other group quarters.

Household Income: The total income of all the persons living in a household. Household income is commonly grouped into income categories based upon household size, and income, relative to the regional median family income. The following categories are used in the Housing Element:

- *Extremely Low:* Households earning less than 30 percent of County median family income;
- *Very low:* Households earning less than 50 percent of County median family income;
- *Low:* Households earning 51 percent to 80 percent of the County median family income;
- *Moderate:* Households earning 81 percent to 120 percent of County median family income; and
- *Above- Moderate:* Households earning above 120 percent of County median family income.

Housing Choice Voucher Program (formerly Section 8 vouchers): A tenant-based rental assistance program that subsidizes a family's rent in a privately owned house or apartment. The program is administered by local public housing authorities. Assistance payments are based on 30 percent of household annual income. Households with incomes of 50 percent or below the area median

income are eligible to participate in the program.

Housing First: A homeless assistance approach or policy that prioritizes providing permanent housing to people experiencing homelessness as quickly as possible, and other supportive services afterward.

Housing Problems: Defined by HUD as a household which: (1) occupies a unit with physical defects (lacks complete kitchen or bathroom); (2) meets the definition of overcrowded; or (3) spends more than 30 percent of income on housing cost.

Housing Subsidy: Housing subsidies refer to government assistance aimed at reducing housing sales or rent prices to more affordable levels. Two general types of housing subsidy exist. Where a housing subsidy is linked to a particular house or apartment, housing subsidy is "project" or "unit" based. In Section 8 rental assistance programs the subsidy is provided to the family (called "tenant-based") who can then use the assistance to find suitable housing in the housing unit of their choice.

Housing Unit: A room or group of rooms used by one or more individuals living separately from others in the structure, with direct access to the outside or to a public hall and containing separate toilet and kitchen facilities.

Inclusion: This is an active state of being valued, respected and supported. Inclusion focuses on the needs of every individual and ensures the right conditions are in place for each person to achieve his or her full potential. An inclusive environment ensures equitable access to resources and opportunities for all. It also enables individuals and groups to feel safe, respected, engaged, motivated, and valued for who they are and for their contributions toward organizational and societal goals.

Inclusive Economic Development Investment(s): Investments that expand economic opportunities that benefit underserved and underrepresented communities, thereby reducing social, racial, health, and economic disparities in these communities. Through public and private actions that are responsive to community need and build on resident assets, these investments foster small business growth, increase quality jobs, stabilize people in safe and affordable homes, prepare residents of all ages to fill jobs, improve neighborhoods, and increase household wealth.

Infill: The process of developing vacant or under-utilized parcels within existing developed areas.

Junior Accessory Dwelling Unit (JADU): An additional, independent living unit created through the conversion of an existing legally permitted bedroom in a single-family dwelling. (See definition of Accessory Dwelling Unit). A Junior Accessory Dwelling Unit must be no more than 500 square feet and must be converted from existing space.

Large Household: A household with five or more members.

Low Barrier Navigation Center(s): A "Housing First", low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. For emergency shelters, creating a "low barrier" environment means removing as many pre- conditions to entry as possible and responding to the needs and concerns of people seeking shelter.

Manufactured Housing: Housing that is constructed of manufactured components, assembled partly at the site rather than totally at the site. Also referred to as modular housing.

Market-Rate Housing: Housing which is available on the open market without any subsidy. The price for housing is determined by the market forces of supply and demand and varies by location.

Median Income: The annual income for each household size within a region which is defined annually by HUD. Half of the households in the region have incomes above the median and half have incomes below the median.

Missing Middle: Small-scale multifamily housing that can range from duplexes to townhouses to smaller apartment buildings that are compatible with walkable neighborhoods.

Mobile Home: A structure, transportable in one or more sections, which is at least 8 feet in width and 32 feet in length, is built on a permanent chassis and designed to be used as a dwelling unit when connected to the required utilities, either with or without a permanent foundation.

Mortgage Revenue Bond: A state, county or city program providing financing for the development of housing through the sale of tax-exempt bonds.

Older Adult: (Another word for "senior" or "elderly" person). The Census Bureau defines an older adult or senior as a person who is 65 years or older, and this definition is used in the Housing Element document unless otherwise noted. For persons of social security eligibility, a senior is defined as a person age 62 and older. Other age limits may be used for eligibility for housing assistance or retired communities.

Overcrowding: As defined by the U.S. Census, a household with greater than 1.01 persons per room, excluding bathrooms, kitchens, hallways, and porches. Severe overcrowding is defined as households with greater than 1.51 persons per room.

Overpayment: The extent to which gross housing costs, including utility costs, exceed 30 percent of gross household income, based on data published by the U.S. Census Bureau. Severe overpayment exists if gross housing costs exceed 50 percent of gross income.

Parcel: The basic unit of land entitlement. A designated area of land established by plat, subdivision, or otherwise legally defined and permitted to be used, or built upon.

Place-Based Strategy: Place-based strategies are actions that encourage community preservation and revitalization and should address increasing quality of life. Areas include, but are not limited to, housing, transportation, infrastructure, parks, recreation, education programs, etc. City programs establishing place-based strategies must target a geographic area of the City.

Plan Bay Area: Plan Bay Area is the joint responsibility of ABAG-MTC. The most recent version of the Plan, Plan Bay Area 2050, is a long-range plan charting the course for the future of the nine-county San Francisco Bay Area. Plan Bay Area 2050 focuses on four key elements — housing, the economy, transportation and the environment — and identifies a path to make the Bay Area more equitable for all residents and more resilient in the face of unexpected challenges. The Plan was adopted by ABAG-MTC on October 21, 2021.

Public Housing: A project-based low-rent housing program operated by independent local public housing authorities. A low-income family applies to the local public housing authority in the area in which they want to live.

Racial Equity: A core value in which race does not affect life outcomes. Regardless of one's identity, equity is when all people have just treatment, access to opportunities necessary to satisfy their

essential needs, advance their well- being and achieve their full potential while identifying and eliminating barriers that have prevented the full participation of some groups.

Redlining: A discriminatory practice in which services or goods by federal government agencies were denied or restricted in certain areas of a community, often based on race or ethnicity.

Reasonable Accommodations: Amendments to a City's standard procedures for processing permits or application in order to enable people with disabilities to participate fully in the process.

Regional Housing Needs Plan: A quantification by a Council of Government or by the State Department of Housing and Community Development of existing and projected housing need, by household income group, for all localities within a region.

Regional Housing Needs Allocation (RHNA): Each city and county in the Regional Housing Needs Plan receives a Regional Housing Needs Allocation (RHNA) of a total number of housing units that it must plan through their General Plan Housing Elements within a specified time period (January 31, 2023, to January 31, 2031 for this Housing Element period). Allocations are also distributed within four economic income categories; these four categories must add up to the total overall number a jurisdiction is allocated. The City's total RHNA from the 2023-2031 Housing Element is 26,251 housing units distributed in the following way: 6,511 should be affordable to extremely-low- and very-low- income households, 3,750 to low-income households, 4,457 to moderate-income households, and 11,533 to above moderate-income households.

Rehabilitation: The upgrading of a building previously in a dilapidated or substandard condition for human habitation or use.

Residential Energy: The total energy used in residential buildings, including heating, cooling, and "plug load" from appliances, lights, and electrical devices.

Service Needs: The particular services required by special populations, typically including needs such as transportation, personal care, housekeeping, counseling, meals, case management, personal emergency response, and other services preventing premature institutionalization and assisting individuals to continue living independently.

Single Room Occupancy (SRO): An SRO is a cluster of residential units of a smaller size than normally found in multiple dwellings within a residential hotel, motel, or facility providing sleeping or living facilities in which sanitary facilities may be provided within the unit and/or shared, and kitchen or cooking facilities may be provided within the unit or shared within the housing project.

Special Needs Groups: Those segments of the population which have a more difficult time finding decent affordable housing due to special circumstances. Under California Housing Element statutes, these special needs groups include older adults, people with disabilities, large families with five or more members, female-headed households, farmworkers, extremely low- income households, and the homeless. A jurisdiction may also choose to consider additional special needs groups in the Housing Element, such as students, military households, other groups present in their community.

Subdivision: The division of a lot, tract or parcel of land in accordance with the Subdivision Map Act (California Government Code Section 66410 et seq.).

Substandard Housing: Housing which does not meet the minimum standards in the State Housing Code. Jurisdictions may adopt more stringent local definitions of substandard housing. Substandard units which are structurally sound and for which the cost of rehabilitation is economically

warranted are considered suitable for rehabilitation. Substandard units which are structurally unsound and for which the cost of rehabilitation is considered infeasible are considered in need of replacement.

Supportive Housing: Housing with a supporting environment, such as group homes or Single Room Occupancy (SRO) housing and other housing that includes a supportive service component such as those defined below.

Supportive Services: Services provided to residents of supportive housing for the purpose of facilitating the independence of residents. Some examples are case management, medical or psychological counseling and supervision, child care, transportation, and job training.

California Tax Credit Allocation Committee (TCAC): TCAC allocates federal and state tax credits to the developers of affordable rental housing projects. TCAC verifies that the developers have met all the requirements of the Low Income Housing Tax Credit program and ensures the continued affordability and habitability of the developments for the succeeding 55 years.

Tenant-Based Rental Assistance: A form of rental assistance in which the assisted tenant may move from a dwelling unit with a right to continued assistance. The assistance is provided for the tenant, not for the project.

Transitional Housing: Transitional housing is temporary (often six months to two years) housing for a homeless individual or family who is transitioning to permanent housing. Transitional housing often includes a supportive services component (e.g., job skills training, rehabilitation counseling) to allow individuals to gain necessary life skills in support of independent living.

Underutilized Site: Non-vacant sites that have structures or other site improvements, but are capable of being redeveloped with residential uses at a higher density under the zoning and General Plan land use designations. Examples include sites with vacant or abandoned buildings, surface parking lots in the Central City, and large sites that are only partially-developed.

Universal Design: The design of buildings, products, and environments that make them accessible and safe to all people regardless of age, size, ability, or disability.

U.S. Department of Housing and Urban Development (HUD): The cabinet level department of the federal government responsible for housing, housing assistance, and urban development at the national level. Housing programs administered through HUD include Community Development Block Grant (CDBG), HOME and Housing Choice Vouchers, among others.

Vacant Site: A vacant site is a site without any houses, offices, buildings, or other significant improvements on it. Improvements are generally defined as development of the land (such as a paved parking lot, or income production improvements such as crops, high voltage power lines, etc.) or structures on a property that are permanent and add significantly to the value of the property.

Workforce Housing: housing that is affordable to households earning between 60 and 120 percent of area median income (AMI). Workforce housing targets middle-income families and workers including teachers, health care workers, retail clerks, young professionals, and more.

Zoning: Local codes regulating the use and development of property. A zoning ordinance divides the city or county into land use districts or "zones", represented on zoning maps, and specifies the allowable uses within each of those zones. It also establishes development standards for each zone, such as minimum lot size, maximum height of structures, building setbacks, and yard size.

Zoning Ordinance: Known as the "Oakland Planning Code," its purpose is to protect and promote the public health, safety, comfort, convenience, prosperity, and general welfare of Oakland in conformance with the City's General Plan. (Oakland Planning Code 17.07.030)

Oakland Housing Element
Housing Sites: Stakeholders Discussion Summary

February 2, 2022 9:00 AM – 10:30 PM

Held via Zoom

Participating Organizations:

- YIMBY Law
- Housing Action Coalition
- Bay Area Rapid Transit
- Nonprofit Housing Association of Northern California
- East Bay Housing Organization
- California Housing Partnership
- MidPen Housing
- Ellis Partners
- LISC Bay Area
- Public Interest Law Project
- Bay Area Community Services

Meeting facilitated by Alison Moore and Rajeev Bhatia of Dyett & Bhatia

POTENTIAL VIABLE SITES

Stakeholders provided examples of sites that may be viable for inclusion in the housing sites inventory, including:

- 40th Street and Martin Luther King Jr. Near the MacArthur BART station. Temporary homeless/navigation center
- Potential along Lakeshore Avenue just south of the I-580
- Closed Oakland Unified School District sites
- Sites owned by faith-based organizations interested in upzoning and development. There are three faith-based organizations actively looking to add housing
- Sites in the Rockridge area that can be upzoned (especially near BART)
- Sites identified along International Boulevard as part of the Oakland Sustainable Neighborhoods Initiative process

- Peralta Village in West Oakland – drastically underutilized; upgrade and add more housing

COMMUNITY ENGAGEMENT ON SITES

- Stakeholders provided ideas for community engagement on viable sites, and shared work they have done to solicit feedback on potential sites. Ideas included sending a flyer or survey to all property owners in Oakland to solicit development interest and reaching out to other public agencies for surplus land
- One stakeholder works with faith-based organizations through Alameda County and sees this as an avenue for community empowerment, as well as an opportunity to locate development in high resource areas
- Another stakeholder has sent a form to members of their organization to get feedback on specific sites with development potential

SITE SELECTION CONSIDERATIONS

- Locating sites within a quarter mile of transit, including bus lines, was identified as a priority by one stakeholder
- Stakeholders also mentioned identifying sites for lower-income housing in gentrifying or at-risk of gentrifying neighborhoods, as well as determining if lower-income sites will be competitive for State funding or tax credit scoring
- The City should use HCD's site inventory form (available via ABAG-MTC's HESS Tool) when publishing drafts of the sites inventory
- The City should maintain a reserve list of sites or capacity buffer to meet State no net loss requirements
- When computing site capacity, the City should emphasize minimum or likely capacity of sites to remain in compliance with those requirements

FAIR HOUSING CONSIDERATIONS

- Stakeholders indicated that site selection should be guided by the City's mandate to affirmatively further fair housing
- The draft assessment of fair housing prepared for the Housing Element should be made available for public and stakeholder input as soon as possible

GENERAL BARRIERS TO DEVELOPMENT

- Stakeholders discussed why sites identified for the 5th cycle RHNA have not developed with housing. Barriers to approval, neighborhood opposition, and the availability of financing were described
- Affordable developers also get outcompeted by private developers for sites due to lack of funding for site acquisition

- One stakeholder suggested the City should consider a set-aside fund for site acquisition that affordable developers can use. This could be a revolving fund
- One stakeholder noted that housing development around the Lake Merritt BART Station requires the development of other amenities in order to make housing development feasible
- Stakeholders also noted that traditional sources of funding are largely depleted

CITY CONSTRAINTS ON DEVELOPMENT

- Stakeholders noted that the City needs to increase opportunities for affordable housing. Some stakeholders noted that City departments often have conflicting priorities or do not agree, especially regarding transportation. It is also difficult to get early feedback on proposals from staff
- While the planning application process was identified as generally smooth, other steps in approval can make it difficult, especially for smaller projects
- One stakeholder suggested the City appoint a "housing czar" or process coordinator to facilitate the approval process
- Appeals process is politicized. Things that are settled—e.g., plans in areas that already have EIRs—still get appealed. Stakeholder suggested that EIR appeals should go to a non-elected body instead of the City Council
- Other stakeholders emphasized the need for by-right approvals, permit streamlining, and entitlement reform to reduce costs, increase competitiveness for State funding, and unlock development potential on smaller sites
- City requires payment of most permit fees upfront rather than at issuance of permit or project completion. This can make development infeasible for non-profits or smaller developers – they can't have $1 million just tied up while the project goes through approval process

Zoning and Development Standards

- Stakeholders remarked that upzoning in various Oakland neighborhoods could increase residential capacity and flexibility, particularly on smaller sites
- Single-family neighborhoods in North and East Oakland were identified as areas that could particularly benefit from such actions
- Stakeholders emphasized flexibility in zoning, including allowing increased density and removing ground floor retail requirements
- One stakeholder remarked that BART sites should maintain sufficient parking requirements for commuters
- Stakeholders suggested the use of various zoning overlays to incentivize development, including both a mixed-use overlay and an affordable housing overlay.
  - Density bonuses for affordable housing were also identified as an important tool

OPPORTUNITIES FOR AFFORDABLE HOUSING DEVELOPMENT

- Stakeholders discussed the ideal density range for affordable development - one stakeholder noted it was between 40 to 50 dwelling units per acre, while another indicated that it was between 60 to 80 dwelling units per acre
- While one stakeholder suggested a maximum building height of less than 85 feet on smaller sites to incentive private developers to use density bonuses and add affordable units and work their way to 85 feet, another remarked this approach would result in neighborhood meddling and could potentially trigger additional EIR review, and would not count towards the RHNA
- One stakeholder remarked that their organization prefers sites that offer economies of scale, while another indicated that smaller sites my be useful in providing ownership opportunities for moderate-income households
- One stakeholder encouraged the City to incentivize "affordability by design"

Oakland Housing Element Discussion Group Meeting #2: Production, Preservation, and Protections

March 10, 2022 1:30 PM – 3:00 PM

Held via Zoom

Participating Organizations:

- East Bay Housing Organization
- East Bay Permanent Real Estate Cooperative
- Greenbelt Alliance
- Housing Action Coalition
- A Diamond in the Ruff
- California YIMBY
- East Bay for Everyone
- Sustainable Economies Law Center
- Community Housing Development Corporation
- Jobs and Housing Coalition
- East Bay Asian Local Development Corporation
- United Seniors of Oakland and Alameda County
- City of Refuge/United Church of Christ
- Bay Area Housing Advocacy Coalition

Meeting facilitated by Alison Moore and Rajeev Bhatia of Dyett & Bhatia

DEVELOPMENT PATTERNS AND ECONOMIC PRESSURES

- High development costs—particularly labor, land, and construction costs—were noted as significant barriers. One participant noted that some local labor practices, which are in the City's control, limit competition and drive up costs.
- Participants remarked that new housing does not cause displacement, since displacement is already happening. Displacement pressure emanate from the greater economic landscape, and the availability of new housing becomes a self-reinforcing cycle. They pointed to the Broadway Valdez area as an example of this.
- Participants discussed the opportunities of developing on large and small lots. High density development is more feasible on large lots like in the Broadway Valdez area, or on larger brownfield sites and industrial land. However, these sites tend to be in or near lower-income neighborhoods. The City should encourage development patterns with smaller lot sizing or lot consolidation to take development pressures off low-income neighborhoods. The City should make lot mergers easier and ease building code impacts (especially in neighborhoods like Rockridge and Temescal).

- One participant remarked the due to large economic pressures, the City's existing tools (including tenant protections) cannot match affordability needs – which can only be met by generally increasing housing supply. They also advocated for increased supply in higher-income neighborhoods to reduce the pressure on lower-income neighborhoods.
- One participant noted the affordability crisis is not just supply and demand issue, as the presence of vacant units—especially market rate units—demonstrates. They also remarked that the baseline market is friendly to luxury apartments that are treated as investments, and advocated a vacant unit tax and not just a vacant land tax.

STAFF CAPACITY

- The lack of staff capacity is a major cost driver for all housing developments, including affordable and market rate projects.
- Participants noted there is a lack of clarity at the staff level on permit streamlining processes as well as how affordable housing is prioritized. Navigating State streamlining law is a long process, and participants appreciated the City's standard procedures and hoped the City will continue to refine and expedite the process. Participants noted that moving towards ministerial approval would help increase staff capacity.
- Participants explained that all housing projects (including market rate and affordable) are challenged by costs and permit timing, and get stuck at every level of the process. One participant noted they had trouble working with the City to increase density on their affordable supportive housing project.

FUNDING FOR AFFORDABLE HOUSING

- Some participants noted that local funding and budget priorities do not reflect Oakland's commitment to housing, even though the city bears a disproportionate impact of the housing crisis in the Bay Area. One participant noted that while the City is a good partner in securing State funding, there is a lack of political appetite to spend local money on affordable housing,
- One participant suggested fees be assessed entirely upfront. One participant also suggested deferring building permit fees for affordable projects to permit issuance.
- One affordable housing developer noted that their units skew towards the lower end of the income spectrum, but it is difficult to operate without subsidies and a constrained housing voucher supply (which is slow-moving on the federal level).

UNMET HOUSING NEEDS

- Oakland has diverse housing needs, including large family and very- and extremely-low-income housing. Larger units tend to be more expensive and move slowly, as large families will often prefer to "double up" in smaller and cheaper units instead. Participants also noted an unmet need for very- and extremely-low-income housing (below 50 percent area

median income) compared to low-income housing (60 percent to 80 percent area median income).

- The City needs to encourage more moderate-income or "missing middle" housing. One participant encouraged the City to focus on policy tools that do not require additional funding, which should be focused on deeply affordable housing. There is a particular need for missing middle housing for elderly and disabled residents, who are unable to downsize due to a lack of supply. Condo conversions further impact the available supply. Additional supply of this housing type could lead to decreased displacement pressures.
- Participants generally agreed that the City should encourage more two- to four-unit development (i.e., missing middle), and were in support of the City Council's directive to revisit single-family zoning.
- There is a need for supportive services and transitional housing, which is currently overlooked. Workforce development and other training should be included to ensure people can stay in affordable housing.
- Residential development on church developments runs into major zoning issues – the City should increase flexibility for this type of development.
- The City has a history of segregating affordable housing projects, and misses opportunities to provide lower-income housing in high resource neighborhoods (e.g., Oak Knoll). Going forward the City needs to be proactive about not missing these opportunities.
- One participant noted that an earlier draft Downton Oakland Specific Plan had affordable housing goals that did not match the reality of Oakland's Black population's housing needs. The City should be realistic when setting goals and policies.

ZONING AND REGULATORY STRATEGIES

- The City gives too many concessions to market rate projects, and the cumulative effect is decreased regulatory incentives and tools to encourage affordable housing.
- The City should increase densities without totally changing a neighborhood's character.
- Participants supported City Council's directive to revisit single-family zoning and allow two- to four-unit developments.
- Several participants advocated for an "affordable housing overlay", which will help the City be competitive for TCAC, LIHTC, and other funding sources. The City should also develop right sized zoning in high resource areas to also remain competitive. Matching TCAC scoring helps developers hit deeper affordability levels while reducing the strain on the City. One participant also proposed a small lot overlay on transit corridors for workforce housing.
- Overlay for small lots so they can be zoning compliant and/or be able to develop additional housing was mentioned.
- One participant remarked that the City should be more flexible in its definitions of a household, including co-living situations. The current definition can obscure the actual

economic status of a unit's residents (e.g., a unit with multiple lower-income families is considered one higher-income "household").

CREATING AFFORDABILITY STRATEGIES

- The City should encourage the conversion of hotels and motels to long term affordable housing.
- The City needs to move forward with its public lands policy, and include a process for developers to acquire vacant parcels (which was done previously). One participant also suggested increased flexibility in a public lands NOFA, including higher cap and reduced need for City Council votes. This will remove administrative burden and can help expedite a restock of the public lands portfolio.
- The City should encourage affordability by design for different levels of affordability.
- Larger market rate and non-profit developers can move through the market easier than smaller ones can due to their increased resources. Participants want to see a way for smaller affordable developers to move through the landscape without adding costs. One participant noted this will be especially important for single-family owners who want to upgrade to two to four unit projects, but will get caught up in the permitting process. The City needs to streamline the process now for when these projects come online.

MAINTAINING AFFORDABILITY STRATEGIES

- One participant noted that restricted affordable housing and non-restricted affordable housing (or "naturally-occurring affordable housing") call for different programs.
- There is a trend of conversion from non-restricted affordable housing to market rate (e.g., condo conversions in northwest and central east Oakland). Rent controlled units are also not permanently affordable and can be demolished. Participants expressed interest in strategies like social housing, TOPA/COPA, community land trusts, and housing co-operatives to reduce conversions and maintain permanent affordability.
- One participant urged the City to advocate for the repeal of Costa-Hawkins vacancy decontrol provisions and keep owners from taking advantage of artificial scarcity to drive up housing costs.

ANTI-DISPLACEMENT AND TENANT PROTECTIONS

- One participant indicated the desire to slow gentrification and displacement. They want the City to help to drive housing costs down so the working poor can afford permanent housing without being forced into dense projects. Reduced housing costs will help decrease displacement pressures and increase housing choice.
- City has good laws compared to other cities (e.g., rent control, just cause, tenant protections, etc.), but effectiveness depends on legal counsel. The City should provide

funding to legal assistance and provide a legal right to council (see Measure F in San Francisco).

- The City should better incorporate SB330 protections against demolitions, especially because of the State legislation's sunset provision. Participants noted there is generally a lack of developer awareness about replacement provisions and indicated a need for education in the development community. Participants also suggested the City adopt a stronger demolition ordinance and add replacement provisions to the permit approval checklist. Participants also encouraged Planning and Building to coordinate with Oakland HCD about replacement units and right to return on development projects.

Oakland Housing Element Discussion Group Meeting #3: Draft Review

Wednesday, June 8 10:00 – 11:30am

Held via Zoom

Participating Organizations:

- Oakland Housing and Community Development (HCD)
- Parent Voices Oakland
- East Oakland Collective
- Alameda County Public Health Department, Health Equity Policy, and Planning
- Homeless Action Center (HAC)
- California YIMBY (Yes In My Backyard)
- Ellis Partners
- YIMBY (Yes In My Backyard) Law
- West Oakland Environmental Indicators Project (WOEIP)
- Oakland Starting Smart and Strong
- UC Berkeley Goldman School
- East Bay YIMBY (Yes In My Backyard)
- SPUR San Francisco Planning and Urban Research)
- Transport Oakland
- California Renters and Legal Advocacy Fund (CaRLA)
- Eden Housing
- Housing Action Coalition
- East Bay Housing Organizations
- Emerald New Deal
- A Diamond in the Ruff Incorporated

Meeting facilitated by Alison Moore and Rajeev Bhatia of Dyett & Bhatia

DISCUSSION SUMMARY

Many participants were generally supportive of the Housing Action Plan, but key issues emerged around zoning and affordability, accountability and compliance, environmental justice and air quality, distribution of housing sites by area and income level, resource allocation, and public availability of housing element information.

Affordability was top of mind: One childcare focused participant requested low and very low-income housing include housing geared towards retaining specific groups such as early childhood educators and childcare givers. After housing childcare is the biggest expense for families, so childcare and housing should be considered in tandem, and it was suggested that co-locating childcare facilities with new development could lessen this burden. Several participants echoed a desire to see the affordable housing overlay expanded from 4 to 6 units, which would allow state density bonus to come into effect, and that a baseline affordability standard be implemented for all new development.

Several participants mentioned a need for stronger compliance measures to hold developers accountable. Participants mentioned that fees are often too low to provide meaningful incentives for developers to follow through with affordable housing agreements and remarked that developers have consistently violated current zoning rules and not being held to their proposals once approved. Participants suggested fees be raised to encourage developers to take affordability requirements more seriously.

Another key theme emerged around environmental justice and housing quality. A participant from the UC Berkeley Goldman school encouraged planners to consider collaboration with County inspection offices to regulate indoor air quality for Oakland households, particularly those with children and those in low-income areas. Many participants echoed the need for greater consideration of air quality issues when determining affordable housing sites and urged planners to consider locating affordable housing away from freeways. One participant urged the city to include existing housing near freeways, Oakland Ports and other heavy duty trucking concentrations under its definition of contaminated sites and help building owners retrofit air filtration to reduce exposure of residents to transport related emissions

Participants desired more clarity and summary analysis of the table to demonstrate the relationship more clearly between the geographic distribution of affordable housing and resources available in proposed neighborhoods. Participant commented that affordable housing is often located in the lowest-resource neighborhood, suggesting that planners consider upzoning all transit corridors, with additional emphasis on Rockridge BART. Another participant raised the concern that the AFFH analysis be made a part of the site selection and action plan, and not just analysis.

Some logistical concerns were also raised regarding the public availability of items such as up zoning & overlay maps, which ideally would be provided in advance, indicate areas that are being considered for rezoning, and coded according to income and racial discrimination considerations. Additionally, participants requested tools to allow the public to monitor impact fees collection and use, as well as an executive summary and clear table containing new policies. Many participants commented on the need for better prioritization to ensure most needed HE action items were addressed in a timely manner, reiterating the need to translate analysis into action.

DETAILED DISCUSSION NOTES:

Affordable Housing Overlay

- Participant remarked that "Oakland's RHNA increase is actually a lower percentage than the region as a whole."
- Childcare-focused participant suggested that low and very low-income housing include housing that is geared towards retaining specific groups such as early childhood educators and childcare giver, also co-locating childcare facilities with new develop. Additionally, participant urged planners to consider providing childcare support for unhoused people.
  - Children and their families should be key stakeholders in HE; after housing childcare is the biggest expense for families, so childcare and housing should be thought of in conjunction.
- Several participants urged that planners please consider ALL of AC Transit's Rapid corridors, not just the BRT line, when considering up zoning opportunities.
- A participant commented that the City of Oakland has been too accommodating to developers and has been building too much above-moderate housing. Low-income housing is determined based on property values of the surrounding neighborhood, and there needs to be a clear standard how affordable housing is determined.
- One participant remarked, "from attending some housing projects, I would say homeowners do block housing projects that have between 15-40% BMR (below-market-rate) housing w/MR (market-rate). It's hard to get that diversification, and thus we get mostly >95% BMR or MR buildings we see today."
- Participants supported development in Rockridge, given that it's the only BART station in Oakland that doesn't have TOD, it's the whitest census tract in Oakland. Suggested flatiron site that Oakland hasn't wanted to rezone is a worthwhile site to up zone for affordable housing despite its small size.
  - Other participants echoed support for up zoning the flatiron parcel and upzoning in Rockridge in general.
- Several participants support a move towards ministerial approval
- Historic resources deserve fair housing analysis because historic housing is often located in wealthier neighborhoods. These comments were echoed by several participants.
- One participant mentioned that they "would love to see housing overlay expanded from 4 to 6 units, which would allow state density bonus to come into effect." These comments were echoed by several participants.
- Participant is concerned with city requiring compliance for AFFH requires fair housing analysis and that the analysis be made a part of the site selection and action plan, and not just analysis. There needs to be a better connection between analysis and action plan, encourages staff to read memo by ABAG about how SoCal cities got rejected by HCD.

  - Thinks its problematic that sites were determined in advance to fit where sites were already zoned properly.
  - Thinks zoning should be identified as a constraint, and that exclusionary areas should have been identified in advance and then re-zoned.
- One participant remarked about the "H overlay" - allowing approval by-right for affordable housing should be citywide anywhere that the project is consistent with zoning, including density bonus

Accountability, Compliance, and Enforcement

- Participant commented that identifying affordable housing sites is only a first step, and suggested that without meaningful accountability measures and quantifiable financial repercussions for non-compliance, the site inventory would not be effective.
- One participant questioned "Who do we target, and how do we penalize them when lower income needs are not met?" with regards to non-compliant developers.
- Participant urged increased penalties associated with non-compliance on housing developers, stating that "developers are not building housing for people who live in Oakland but for people who are moving to Oakland".
    - Participant requests planners establish a baseline affordability requirement for all new development.
    - Participant commented that "with all the new buildings being built that impact fee account should at least be 300 million by now."
- Several participants remarked that current developers have already been violating existing zoning rules and not being held to their proposals once approved.
- Participant commented that developers are looking to waive fees, but affordable housing advocates would like to raise fees on developers to fund affordable housing.

Environmental Justice and Air Quality

- Participant from UC Berkeley Goldman School suggested adding provision in the HE to coordinate with county inspection offices for households (particularly with children) to regulate indoor air quality. Participant also expressed support for provision in HE (G2) getting gas out buildings.
  - This participant also suggested financing green bonds and social bonds, and mentioned a sustainable finance program at the university. These bonds have the potential to lower permitting costs for the issuer and can lower costs for developer.
- Participant from UC Berkeley Goldman School also commented, "I am pleased to see parts of the Element devoted to remediation of environmental contaminated sites.

  - Participant urged the city to consider that housing located near freeways, Oakland Ports and other heavy duty trucking concentrations to be included in definition of a contaminated sites.
  - Participant also urged planners to help building owners in those locations retrofit air filtration to reduce exposure of residents to transport related emissions.
- Participant strongly seconds the previous comments, and addition to commenting, "We should not be putting housing next to freeways and we need to have a fund to in the GP to retrofit existing near road housing exposures."
- One participant mentioned, "I'd be careful about exclusively putting housing next to freeways, as noise & car pollution on minority communities is a concern. I do love the alternative mentioned— up zoning opportunities near **all** transit corridors."
- Participant suggested that health of housing is not identified, nor is equity. Census tract name of neighborhood is not identified in Housing Element Appendix C, Table C-21.
  - Affordable housing above Upper Broadway or MacArthur freeway is not being discussed. EJ and housing health is not being adequately discussed.
  - There should be policy and changes and language in HE regarding environmental justice
- Participant echoed the need for plans for investments for opportunity in low-income neighborhoods. Need to improve the air in West Oakland, because air pollution is one of the most challenging parts of living in West Oakland.
  - Other participants agree that the poor air and no green space is a disadvantage to improvements.

Planning Timeline and Resource Allocation

- Participant commented, "I'd love to see city take a stance on what strategies are going to come first given how busy city staff are. Actions in HE are fantastic, but there are too many of them to deal with immediately so city should identify which actions come first and which come last."
- The participant remarked that "study, evaluate, consider" are not viable action-oriented terms according to the HCD. The participant mentioned that the study has proposed inclusionary housing, but the city council has never actually considered it.
- City Council was promised by staff that a 5 year study would be done by the end of 2021, but the annual impact fee report still has not been presented to city council and has not involved public input.
  - The nexus study and feasibility fee study are being done with no public participation. There should be a specific plan that planning and building codes are updated to comply with SB9 and SB 330 especially the demolition protection.
- Participant echoed need for established timelines for implementing affordable housing and remarked that it shouldn't take that long given how easy the policy is to pass.

Public Availability of Housing Element Information

- There is a push and pull between locating housing where communities need to be supported versus the level of resources located in the community. Most affordable housing is in lowest resource neighborhoods.
  - Many participants requested table detailing affordable housing locations versus resource allocation and distribution.
- Participant suggested the city have a published methodology for when to count new market housing as Moderate Income, like San Jose does.
- Participant expressed support for up zoning around transit corridors, and suggested circulating maps illustrating these plans ahead of time to allow for public comment by affordable housing developers. Participant requested platform for public to monitor impact fee account.
- Oakland online housing portal was not user friendly for affordable housing developer
- The way that zoning code is written in the city breaks everything down into small pieces, which makes it difficult for affordable developers to utilize density bonus. Other cities don't have standards broken down into so many small parts and encouraged Oakland to consolidate zoning code into more straightforward and broader groupings.
- Maps should be coded according to income and racial discrimination consideration. Investing in lower income areas need to go beyond housing, there needs to be broader neighborhood improvements strategies.
  - The participant suggested that planning staff put out a map about what is being considered for rezoning.
- Participant questioned if there is a way for the public to track who paid impact fees and see what is being collected as well as where and how are those funds are being used.
  - Participants echo the need for improved transparency in this process.
- Please ensure that the next draft includes an Executive Summary and a clear table on NEW policies.

Oakland 2045 Housing Element Workshop #1 Report

Oakland's Housing Element and Housing Locations

FEBRUARY 10, 2022

Prepared for

The City of Oakland

Project Background and Meeting Objectives

The City of Oakland is preparing a comprehensive update of its Housing Element, which is part of Oakland's General Plan that will serve as a blueprint for housing the City's residents at all economic levels, including low income and households with special needs, from 2023 through 2031. The Housing Element, one of seven State-required general plan elements, was last updated in 2015 and is now being updated to reflect more recent housing opportunities, challenges, and approaches that have emerged in the community.

This first Housing Element workshop is part of Phase 1 of the General Plan update. The purpose of this workshop is to provide an overview of the General Plan and Housing Element update process and gather community input on potential housing locations. This short report summarizes the key themes and ideas that emerged during the workshop. Detailed notes are located in the appendices.

Workshop Location and Format

The workshop took place on Thursday, February 10, 2022 from 6:00 to 8:00 pm online via a Zoom meeting. The workshop was held in an online format due to public health concerns from the ongoing Covid-19 pandemic; this gave community members flexibility to attend the meeting from any location and drop in and out at any time. Approximately 90 community members attended the workshop.

The planning team gave a short presentation during the workshop that gave an overview of the format of the workshop, the General Plan and Housing Element update process, and included a Q&A portion for participant questions. During the presentation, participants had the opportunity to answer the following survey questions about themselves:

- What brings you to this workshop?
- What neighborhood do you live, work, or have a business in?
- What do you love about the neighborhood?

See Appendix A for participant responses to the survey questions.

After the presentation, participants then proceeded to one of 11 Zoom breakout rooms for small group discussion. Attendees were not required to participate in breakout room discussion and were allowed to spend as much or as little time in their small group discussion breakout room as they wished.

Breakout Group Discussions

The bulk of the meeting was spent in 11 small group discussions where community members had the opportunity to brainstorm together on potential housing sites. For the discussions, three to five participants were sent into Zoom breakout rooms with a facilitator from the

planning team to brainstorm on potential housing sites and considering the following questions:

1. What are the housing issues you care about in Oakland?
2. What do you see as some of the opportunities for planning new housing in Oakland? (examples: specific areas in Oakland, on large parking lots, around BART stops, upzoning neighborhoods, in shopping centers?)
3. What do you think some of the issues or challenges will be in these areas?
4. What type of housing does Oakland need more of? Where do you think it should go? Why?

Unique discussions from each group, key takeaways, and common themes are described below. For more detailed notes from each group facilitator, see Appendix B.

KEY TAKEAWAYS

During the workshop, the planning team heard a wide variety of opinions on all topics.

- There was unanimous or near unanimous support for more housing in the community. Housing affordability was a key priority for all groups as well as the consideration of equity in all decisions related to housing. Most groups were pro-housing and particularly advocated for housing unhoused individuals and focusing on developing housing for extremely-low income and very low-income groups, with additional support for workforce housing.
- Most groups shared a desire for transit-oriented development near BART stops and housing development that considers proximity to amenities such as bus lines, grocery stores, green spaces, and neighborhood organizations.
- All groups discussed potential locations for housing sites. The most common general locations mentioned include underutilized parking lots, vacant lots, blighted commercial sites, major commercial corridors, in old office buildings, and greater densities in Temescal, Rockridge, Trestle Glen, Montclair, and West Oakland.
- Other specific locations identified as potential housing sites include along San Pablo Avenue, in the Coliseum area, at Howard Terminal, Eastmont Mall, the intersection of Broadway and Pleasant Valley Avenue, 51st and Broadway Avenue, and the DaVita Dialysis site.
- Several groups advocated for consideration to ensure that historical patterns of segregation are not perpetuated but rather resolved when choosing housing sites. Affordable housing should be distributed throughout the entire city. Environmental justice, safety, and gentrification concerns should also be considered when deciding where housing should be located.
- Many participants shared potential housing policies and programs to better help the city become a more affordable and equitable place to live. The most common tools cited include upzoning low density areas, banning land speculation, eliminating impact fees, inclusionary housing requirements, rezoning areas to permit residential development, streamlining the permitting and funding process for housing development and ADUs, establishing incentives for developers, and developing

supportive programs for marginalized groups to find, purchase, and remain in their homes.

- Groups had mixed opinions on whether to develop greater housing densities in the Oakland Hills. While some advocated for higher densities and the elimination of single-family zoning due to equity concerns, others believed that greater densities should not be permitted due to high fire hazard zones. Other housing constraints included proximity to polluting areas.
- Several groups stressed the importance of "going to where people are" to receive input and requested more visible information about upcoming opportunities to engage in the process.

BREAKOUT GROUP SUMMARIES

Group 1

- Group 1 primarily advocated for housing equity and providing affordable housing for systemically marginalized groups. The group was concerned about perpetuating the zoning system's racist and exclusionary history. Participants mentioned how affordable housing developments are likely to be in high crime and high pollution areas with limited access to neighborhood amenities.
- Participants brainstormed a number of policy changes to address the housing issues they identified in Oakland. Such proposals include developing additional extremely low-income housing units, developing affordable housing throughout the city in safe areas and near amenities, banning land speculation, upzoning the Oakland hills, and eliminating impact fees.
- Potential housing sites identified by Group 1 include underutilized parking lots in the city, Howard Terminal, and greater densities in the Oakland hills.

Group 2

- Group 2 was in favor of further expanding community engagement and education on the Housing Element and affordable housing topics to increase accessibility to those interested in getting involved. Policies participants brainstormed include requiring on-site inclusionary housing, considering barriers to affordable housing, and identifying equity patterns throughout the city's districts to better address systemic issues.
- Potential sites identified by Group 2 for affordable housing include City-owned properties and properties owned by the Oakland Community Land Trust.

Group 3

- Group 3 advocated for affordable and middle-income housing, historic preservation, and housing equity. Participants mentioned several potential housing policy solutions that include rezoning areas for residential development, converting nonresidential and office buildings to housing, promoting live-work units, streamlining the permitting and funding process, and developing initiatives for marginalized groups to buy homes.

- Potential housing sites discussed among Group 3 include in vacant lots, dilapidated commercial sites, along major commercial corridors, ADUs in single-family homes, and in old office buildings.

Group 4

- Group 4 was pro-housing, advocating for affordable and transit-accessible housing, overcoming patterns of segregation, higher density housing, and ending gentrification. Potential housing policies mentioned include upzoning areas of the city, building transit-oriented development, and limiting how long developers can sit on empty properties.
- Potential housing sites mentioned include Eastmont Mall, mid-rise buildings in neighborhoods like Temescal, and the vacant lot at Broadway and Pleasant Valley Avenue.

Group 5

- Group 5 prioritized affordable housing for very low-income households, effective programs to shelter and support homeless residents, dense housing to support transit, and supporting Black homeowners. Housing policies discussed include transit-oriented development, upzoning near transit, increasing height limits, removing parking minimums, implementing parking maximums, and passing anti-speculation laws.
- Potential housing sites mentioned include along transit corridors and vacant lots owned by the City, County, and land trust.

Group 6

- Group 6 supported more affordable housing development, particularly in less affordable areas and in proximity to transit and amenities. Potential housing policies mentioned include progressive vacant land taxes, affordable housing overlay zones, incentivizing affordable housing development, reducing parking requirements, and implementing eminent domain for unused property.
- Potential housing sites mentioned include vacant homes on San Pablo Avenue and the lot on the corner of Broadway and Pleasant Valley Avenue. Areas to avoid include high fire hazard zones and near the shoreline.

Group 7

- Group 7 emphasized promoting housing choice, including location and type for both renters and owners. Policy ideas and solutions include inclusionary zoning, streamlining modular housing, promoting workforce housing, and converting vacant ground floor commercial to residential.
- Group 7 also supported developing around transit stops, adding more ADUs and lot splits, and adding higher densities in Trestle Glen and Montclair while also being cognizant of climate considerations.

Group 8

- Group 8 advocated for housing where people actually live and need housing, preserving housing at risk of conversion, and on-site including housing building requirements.
- Potential housing sites identified by the group include along San Pablo Avenue, in the Coliseum area, anywhere near transit, and on smaller lots.
- There was a difference of opinion on housing in the hills – some believing that should absolutely not be allowed due to fire concerns – while some others believing that single-family zoning needs to be eliminated from entire the city because of equity considerations.

Group 9

- Group 9 supported added more affordable housing near transit throughout the city as well as more supportive senior housing, multigenerational housing, workforce housing, and ADA compliant housing. They highlighted the importance of environmental justice considerations, housing the unhoused before developing for other income groups, ensuring vacant lots do not sit vacant, and affordable housing continues for future generations to remain in the city.
- Potential housing sites identified include near transit, higher densities in Rockridge, near parks and green spaces, and in old or unused building and parking lots near city hall.

Group 10

- Group 10 advocated for prioritizing equity in all housing decisions, adding higher densities in commercial areas, incentivizing low and very low income housing development, pausing market rate development until Oaklanders have homes, and taking advantage of vacancies to house the unhoused.
- Potential housing locations identified include higher densities downtown and in west Oakland, more housing in Montclair and Rockridge, and higher densities along San Pablo Avenue.

Group 11

- Group 11 expressed interest in incorporation climate resilience into housing development, prioritizing housing equity, transit-oriented development, having housing typologies that fit with community character, and housing the unhoused. Potential solutions discussed include incentivizing developers, expediting and streamlining the ADU processes, and developing near amenities.
- Possible housing sites identified include a vacant parcel on 51st and Broadway Avenue, the DaVita Dialysis site in Rockridge, near Rockridge Bart, along Bart and bus transit lines, on blighted sites, and higher densities in west Oakland.

Appendix A: Mentimeter Poll Results

Question 1: What brings you to this workshop?

- To learn more
- To learn
- housing
- Curious what people are interested in talking about with the housing element
- I want to support more dense housing in Oakland, especially near transit.
- I'm an Oakland resident and urban planner looking to make Oakland accessible to all!
- The fate of Oakland, housing, development, and particularly for those not wealthy.
- Interested in future of housing- we need more affordable housing options across all neighborhoods of Oakland!
- Interesting in helping contribute to the housing plan for Oakland.
- We're oakland residents and appreciate the chance to learn about the housing element!
- Member of the Deeply Rooted Collaborative
- I am a Political and Community Organizer with Save The Bay! We're interested in ensuring that climate resilience is incorporated in the General Plan Update and the Housing Element.
- I am part of the Deeply Rooted group
- I want to ensure that Oakland dedicate adequate resources to support very low and extremely low income residence in accessing housing
- New Oakland resident, work in architecture / urbanism, committed to supporting more affordable housing in the Bay Area
- learn more about the housing element
- Hear about solutions to get more housing and make it more available and affordable for people
- oakland resident who cares about their community and wants to make sure this process and it's outcomes are equitable
- Looking to get involved , have voices heard, & provide input in planning
- To better understand the housing element and provide input based on what I experience as a resident of Oakland
- Board Member of Rockridge Community Planning Council
- Curiosity, and to learn
- Oakland's housing situation is a CRISIS. I hope this Housing Element can take that seriously and make transformative changes.
- I'm hoping to see more housing built in Oakland! Particularly in my North Oakland neighborhood (San Pablo Ave) where there is lots of vacant land.
- learn about community concerns regarding housing in Oakland
- Strong interest in Oakland providing adequate housing across all economic bands. Affordable for people in each band
- Want to make sure Oakland uses this housing element update opportunity to end exclusionary zoning, allow for more housing density citywide (especially in wealthy neighborhoods and near transit), and expand demolition and displacement protections

- I’m concerned that people especially African Americans are priced out of the housing market.
- Equity concerns. Also wondering if your community outreach team consists of any people born and raised in Oakland. Outsiders are always "representing" Oaklanders.
- I have lived in Oakland for 40 years. It breaks my heart that it is becoming a place that only the wealthy can live. I am saddened that the Black population has decreased. Let's support social housing!
- I’m here to point out the impossibility of true community engagement and the predictable cookie cutter housing element that will result.
- urban planner from the Bay Area. Interesting in learning what Oakland is working on for the General Plan and Housing.
- Create more housing
- My primary concerns are equity—woefully inadequate affordable housing and continued displacement—and the need for dense housing near jobs and well served by goodnfrequent public transportation, bike lanes, and walkability to daily needs.
- We need responsible and effective affordable housing programs.
- Interest in developing a housing element that affirmatively furthers fair housing, breaks down past patterns of segregation and disparate housing opportunities, and improves on the City's past performance in producing affordable housing
- I care about housing!
- I want more homes to be built in Oakland so that the cost for housing goes down.
- I'm concerned that the timeline does not allow for quality engagement with our community.
- I am concerned about the housing crisis in Oakland.
- Interest in housing
- I work for the Oakland Fire Department and want to stay engaged in our community and hear outstanding Public Safety concerns.
- An interest in providing housing for Oakland residents at all income levels. I care about creating change while not forcing radical change on any Oakland neighborhoods.
- As a representative of the Rockridge Community Planning Council, a neighborhood organization focused on community development. Here to listen and learn.
- Making sure that Oakland does it’s part to create the new homes we need to help solve our housing shortage that is driving our displacement and affordability crises
- Ensuring that fair housing and equity are an integral foundation of the ENTIRE housing element process. For the city to address that for the past 5 years, the City has built 9.5 market rate homes for every 1 unit of affordable.
- The #1 thing Oakland residents want is affordable housing and yet this City has not prioritized affordable housing and nor met our statewide goals for years.
- Express importance of mixed income housing in areas that are densely populated areas that are predominantly low income.
- I am a 3rd-generation Oaklander and my whole family lives here. It's become too expensive to live here and we need to make sure there's housing for everyone.
- This is important
- I'm with East Bay for Everyone: https://eastbayforeveryone.org/wp-content/uploads/2022/02/2022-02-09-oakland-housing-element-priniciples.pdf

- I want to speak in favor of building, building up, and building densely (to encourage future walkability and transit). I believe all neighborhoods are worth investment, to support new housing of all types in income and physical types.

Question 2: What neighborhood do you live, work, or have a business in?

- mosswood
- Old_Oakland Grand_lake Downtown
- Downtown
- Bushrod
- Rockridge
- Mosswood Temescal
- Concord Contra_Costa_County
- Prescott Work_from_home Work_for_a_company
- Harrioak
- Downtown
- Downtown
- Dogtown West_Oakland
- D2
- Maxwell_Park
- temescal work_in_fruitvale
- san_antonio_neighborhood
- Rockridge
- Oakland
- Piedmont_Ave Downtown
- West_Oakland SF
- Grand_Lake
- Uptown

- Walnut_Creek
- East_oakland
- Grand_lake
- Old_Oakland Citywide
- Santa_Fe Jingletown
- Longfellow
- North_Oakland Fairview_Park
- Adams_Point
- west_oakland
- Bayview_Hunterspoint
- Rockridge
- Rockridge
- Clinton Downtown
- Dimond Laurel Lake_Merritt
- Rockridge
- Fruitvale Fruitvale Fruitvale
- bushrod
- I_live_in_Oaklands_Distri I_work_in_Oakland No_business

- north_oakland
- Old_Oakland
- Skyline
- Chinatown
- Golden_Gate
- Waverly
- Fruitvale East_Oakland
- East_Oakland D6
- Alameda
- Rockridge

Question 3: What do you love about the neighborhood?

- lots of things
- The people! I just want more of them.
- Walkable, friendly neighbors.
- I have been here for 42 years. Not enough space.
- Weather and history
- Family oriented
- my neighbors!!
- I love how central everything is, as well as the proximity to transit options
- Culture
- Accessibility to restaurants, goods, services, transit and walkability
- i love that downtown is close to chinatown, has lots of stores and restaurants, close to lake merrit
- Friendly
- I love the diversity of businesses around here.
- I love our street trees and our park! We have lots of wonderful urban green spaces.
- Proximity to important spots
- I love my neighbors but so many are at risk are displacement.
- Mixture of housing and neighborhood business district.
- Takes more than 250 characters. I have lived here 42 years.
- "Walkability!
- Lots of great social resources within walking distance."
- Walkability, quick easy access to transportation, close retail
- People and the lake
- Great sense of community
- I love the colors and flavors of fruitvale, it makes me really sad that there is not more investment and effort from the city of oakland in bettering the area
- Walkable, location
- Everyone seems to have the best interests of oakland at heart
- Children playing in Frank H. Ogawa Plaza
- I used to love my neighborhood until unfriendly gentrifiers moved in.
- Walkability to schools and shops
- The people.
- Rockridge also has a high degree of activism and also recognizes need for greater population diversity.

- its one of the last places in SF that still has it's diversity. I hope Oakland can keep from gentrification.
- It's accessibility, shopping, and community spirit.
- There is a fair amount of housing for renters.
- Walkability & retail corridor
- The community! I want more neighbors!!
- It's a livable community, for people like me...
- Beautiful neighborhood—Street trees, gardens. I can walk to food stores, etc. I love my neighbors, from lots of backgrounds.
- It is walkable and has ground floor retail that is alive and well
- Location location
- I love the shops that are within walking distance
- The peole
- Vibrant BIPOC communities
- Diverse cultures and food options available.
- Approachable neighbors.
- It's diversity, it's right in the middle of everything, it feels like Oakland.
- Friends and neighbors.
- Many resources. Minimal need for car. Diverse. Close to nature
- The melting pot of cultures and food and good weather.
- Diversity
- walkable, good transit, great restaurants
- Short answers are the problem. Elicit granular, detailed stories for better results.
- good grocery stores
- Neighbors know each other.
- Walkability and vibrancy
- My neighbors
- I love Alameda's proximity to Oakland. We are ONE city as far as I'm concerned.
- Walkability, access to transit, parks, mixed use.

Appendix B: Breakout Group Facilitator Notes

Group 1 Facilitator – Laura Kaminski

Participant 1- Main concern is equity and climate.

Participant 2 – main concern is Housing Equity in neighborhoods.

Participant 3- worked with the City on the Housing Element in 1998, should start with discussing how our existing system on zoning is based on racism. Worked on the last General Plan as City staff and worried we will repeat what was done in the past.

Participant 4– I live in affordable housing, I know what it is like living in affordable housing. Important to where you are putting affordable housing, I live near pollution, noise in China town, near pollution from the Port. A lot of affordable housing is built in areas near freeways and pollution. Once you are living in affordable housing no one wants to listen to you and

your concerns. This area has become extremely violent, there was a shooting on I-880 right across from my balcony. We don't need more market rate housing, we need extremely low housing. Most of the people who are homeless need extremely low housing.

Participant 5- We have existing systemic policies, we need serious policy change. We need serious discussions. 174% of housing was built for market for market rate, it is a policy decision of what housing is being built.

Participant 4– Should put of lot of thought into where you move people 55 and older and people with mental disabilities. Where I live, we don't have grocery stores, have predatory people that rob people. We had tough sheds moved in next to us, had increase in crime overall, not just from homeless people, but unfortunately some homeless people have problems with drugs and this can create crime. We need to care about who is living in affordable housing and what there needs are and provide safe housing.

Participant 1- Affordable housing, it should be more dispersed throughout the city. Should look at parking lots. The A's are not going to have affordable housing. Need more resources for family housing when growing up.

Participant 3, we need some radical policy changes. We need to ban land speculation. As long as we are beholden to developers. They are scooping up housing and flipping for huge cost. We should replace Planning & Building with other Departments. We are so looking at the minutia of housing, we cannot get through the permit process because we don't know how to play the game. Let's make a system based on safety. We don't need to know how far the kitchen is from the basement. Zoning was created to separate certain people, redlining. We repeat redlining. Oakland hills is the most segregated. Every house over 6,000 square feet needs to take in 6 more families. Our politicians are taking money from developers.

Participant 5, Howard Terminal, greater percentage of affordable housing and it needs to be on site. Howard Terminal is going to go through with nothing of value. Have to change policies. No more building market rate housing without a certain percentage of affordable.

Zoning needs to upzone in all of the hills areas.

Iris - should eliminate Impact Fees only do onsite. The process is so onerous for the average person or small developer trying to build affordable housing. The City should have staff to assist with all of the rules. Should have staff to assist the public with ADUs. Concerned that this Housing Element will be a cookie cutter process and that the consultant D&B will not have the creative ideas.

Participant 1– how can we continue to build market rate when we have not met the numbers for affordable?

Participant 2– we have to generate tax dollars as well.

Participant 3– we should spend less money on police and more on paying for the City.

Participant 1– The City is proposing business tax changes and increasing money from the Port.

Participant 4– Why are we supporting corporations that are not paying living wages?

Participant 1– Companies are buying up single-family homes and then letting them get dilapidated and then flip them. Can the city enforce the codes to not allow for this?

What makes housing more expensive in the first place.

Participant 2– I have a family member that is making 6 figures and can't afford to buy a home.

It is extremely difficult to get into any area of the City, housing is going for at least $500,000.

Participant 1– At least they used to look at comparables for how housing is priced in real estate, how does housing get to be priced at this high of a price? We should be addressing what has gotten us to this place.

Participant 2– there are a lot of people who work in Silicon Valley that are moving here and driving the price up. They are taking these properties over. They can't afford the housing in Silicon Valley so they are coming to Oakland.

Chat:

19:12:25 From Participant to Everyone:

that is the argument they are currently making

19:13:46 From Participant to Everyone:

yes

19:24:48 From Participant to Everyone:

how about a policy that says single family homes can only be purchased by people who will reside in them?

19:25:26 From Participant to Everyone:

@ Participant + 1

19:26:21 From Participant 3 to Everyone:

Get rid of any restrictions on the number of people who can be in a unit

19:26:24 From Participant 2 to Everyone:

Sounds good, but if they can't afford to do so, it leads us back to those who can or these large corporations

19:26:47 From Participant 3 to Everyone:

Eliminate parking requirements

19:30:07 From Participant 3 to Everyone:

Allow people to create cooperative living arrangements without city requirements- allow people to create their own agreements, trust collectives to be responsible adults

19:32:22 From Participant to Everyone:

Same for "affordable housing", allow housing to flourish without 20 pages of requirements. Ask for a confirmation that the housing is remaining that every year. Have the land be deed restricted.

Group 2 Facilitator – Lakshmi Rajagopalan

Introductions
#1 - oakland resident, D2, urban planner, need more engagement/education around housing
#2- piedmont ave, searching for new housing in Oakland - which is proving to be very difficult
#3 -unity council (deeply rooted) - timescale/fruitvale area, lack of investment
#4 - issues with housing development esp. Affordable housing
#5 – did not engage at all

Engagement and Education
Education on what affordable housing means (critically low/low income)
Engagement - education is a key
Translating into easy-to understand language, in multiple languages
Being transparent as possible - with these timelines, how are we listening to the community?
Accessibility - meeting in the box situation - printable - cultural centers/community centers
Capacity building/educational piece of housing - housing element - enable the community
Time/capacity building/educational exercises

Sites:
consider City owned properties and properties owned by Land trust properties - developers.
Buy back properties owned by these developers using eminent domain

Policies
Require on-site inclusionary housing (or if they are paying into the impact fee fund, there needs to be accountability on what those monies are used for - how that money is used)
Consider barriers to developing affordable housing - there are several (example: https://oaklandside.org/2021/10/20/nonprofit-run-by-homeless-people-says-it-was-unfairly-taxed-for-trying-to-build-housing/)

Equity
Look at Redistricting mapping to identify equity patterns
How will the policies be evaluated to fix more systemic issues? Policies should also address unhoused.

Group 3 Facilitator – Audrey Lieberworth

Introductions:

- Participant 1 – North Oakland, Rockridge, cares about affordable housing
- Participant 2 – architectural urban designer, lives in Mosswood neighborhood, interested in affordable housing/extremely affordable housing, infill/redevelopment, finding perfect sites to do those sites on
- Participant 3 – West Oakland, lived in Oakland for 7 years, interested in social, economic, environmental, and racial justice. Also interested in affordable and missing middle housing. We're putting too much pressure on affordable housing and missing middle housing could help with this.
- Participant 4 – lives in clinton neighborhood, city planner, advocate for historic preservation (works with Oakland Heritage Alliance). Housing Element is an opportunity to use historic buildings as housing resources/naturally affordable housing. Harder to build new than rely upon historic building stock.

Question 2: What do you see as some of the opportunities for planning new housing in Oakland? (Examples: specific areas in Oakland, on large parking lots, around BART stops, upzoning neighborhoods, in shopping centers)

Participant 1

- Sites that are not currently used for housing. Some rezoning may have to be done, particularly if there are reluctant land owners
- The Ridge site – property owner does not seem interested in developing for housing; some encouragement through rezoning may be needed
- Vacant sites – look at zoning on those sites. Be aggressive where it makes sense to build housing
- Build affordable, with an emphasis on a higher percentage of lower income housing

Participant 4

- Look at existing buildings as potential housing resources, esp historic buildings. Existing nonresidential and older office buildings that might become obsolescent should be converted to housing. Including live/work, esp in industrial areas. CA Historic Building Code can help facilitate this process

- Existing single family homes – there may be provisions for ADUs, but these may also present opportunities beyond ADUs to add more units (I.e. missing middle) with an emphasis on affordable units

Participant 2

- Look at vacant sites and office buildings that could be redeveloped. Look at commercial corridors like Broadway and Telegraph – are there vacant sites, dilapidated commercial sites? There are commercial spaces with large parking lots along these corridors. We should densify these sites along the corridors.

Participant 3

- Hard to pencil out projects given that labor and material costs are high.
- There is a need for more workforce development programs / incubator programs for small contractors. Historically there have been barriers for Black and Brown communities to obtain apprenticeships to make their way into the construction trades – remove those barriers
- Time is money – streamlining the permitting process is ideal because delays mean projects cannot pencil out. State legislation allows some projects to be fast-tracked. Also a need for streamlining design approval process to minimize NIMBYism
- Need to define a clear permitting process for developers
- Provide opportunities to encourage Black and Brown property ownership in Oakland. Look at tenant cooperative in Brooklyn Basin. Develop initiatives to buy homes in Oakland – provide opportunities for Black and Brown communities that stay in their neighborhood to merge lots and create a larger multifamily complex, or build smaller, missing middle housing on a single family lot

Question 3: What do you think some of the issues or challenges will be in these areas?

Participant 1

- Major challenges for affordable housing are obtaining subsidies. More money coming through the State now, but Oakland needs to build up its funds/subsidies. Should be part of the Housing Element – think about how to raise funds from different sources for really substantial affordable housing. Raise local funds. Use conditions on other kinds of new developments (I.e., higher impact fees) to raise local funds

Participant 3

- Affordable housing developers talk about the gymnastics they have to perform to combine the tax credits and funding sources, which is particularly challenging for smaller developers with fewer staff and resources. Can we streamline the funding and administrative process to make development of affordable housing (esp for smaller affordable developers) more feasible?

Participant 4

- CA Historical Building Code – can address code issues that can inhibit rehabilitation of older buildings. Oakland should try to be more proactive around using that Code and should expand the number of eligible buildings (model – City of Alameda)
- Shortages of staff at City inhibits ability to process applications. Could bring in consultant planners to accelerate projects, offer overtime to existing staff

Participant 2

- Identifying funding sources

Question 4: What type of housing does Oakland need more of? Where do you think it should go? Why?

Participant 4

- According to the existing RHNA performance, City has been good at building market rate, but falling short on affordable. This is the area that needs most attention

Participant 2

- Need more affordable housing – esp VLI and ELI.
- Should be equitably spread out across different neighborhoods

Participant 1

- Integrate housing all across Oakland at all income levels, but financial feasibility of these projects is difficult
- For new housing, there should be higher percentage requirements to build low income housing on site, even though it makes it more difficult for projects to pencil out. Would like to see 30 or 40% required on site, but may not be feasible
- Real difficulty is identifying funds to subsidize projects

Participant 4

- Most developers pay in-lieu fee instead of providing on site affordable units. Oakland should take a closer look at actually requiring the units on site as part of these projects

Participant 3

- Oakland's inclusionary housing requirement is too low

Participant 2

- Is there oversight and transparency for distribution of affordable housing funds?

Participant 4

- City or land trusts with assistance from City could bid on foreclosed properties to acquire that land
- Relocate/move older, existing buildings in the way of new developments. There are existing policies in the housing element to facilitate this, but the challenge is to find locations to move those buildings to. Can they be moved to vacant City-owned land? If the building is in good condition, moving a building is a good way to preserve existing housing. If you move a historic building it does not need to be brought up to Code, which saves money. With house moving, the main expenses are moving it off the existing foundation and the utility wiring

Participant 3

- Current Code is really geared toward sustainability to address the climate crisis. Moving non upgraded housing would contribute to greenhouse gas emissions. Maybe there could be some middle ground
- At meetings to discuss housing projects (ex. Howard terminal), they hear a lot about parking. Not willing to move downtown because there isn't any parking available to them. Should be larger discussions about what it means to live without a car. Building housing close to transit (like BART) is not sufficient to meet needs
- Potential to create a new building typology for a community garage, not like a surface parking lot. Perhaps a tower of parking located within a five minute walk of a group of housing site

Participant 4

- Some streets are very wide. Could introduce angled parking on wider streets instead of parallel parking to accommodate more parking, esp in San Antonio neighborhood
- House moving is a great way to implement resource conservation because all of the materials are already in the house, don't need to dispose

Group 4 Facilitator – Daniel Findley

Participants

Participant 1 EBHO. Cares about low-income affordable housing, transit-accessible, designated bike lanes, and walking areas. Clean streets and sidewalks.

Participant 2: EBHO. Production of housing, meeting AFFH requirements such that we overcome patterns of segregation. More emphasis on affordable housing programs.

Participant 3: lives in Bushrod, very pro housing and more of all housing types. Housing needs to be easier to build. Favors higher density housing.

Participant 4: Represents Upper Broadway Advocates which focuses on the vacant lot at Broadway/Pleasant Valley. Favors changing zoning in commercial districts to allow for

higher density housing such that housing is a "preferred use." Supports the idea of affordable housing in high-rise buildings.

Participant 5: Co-chair, on tenant's union. Lives downtown. Not sure if more housing is the solution. Lots of empty lots, empty units. Root of the problem is that developers sit on empty properties. Important to her is ending gentrification and reducing the construction of luxury housing. Would like to see Henry J. Kaiser building transformed into housing and sites near Mosswood Park if new housing is to be built.

- What are the housing issues you care about in Oakland?

  These are discussed in the participant profiles above.

- What do you see as some of the opportunities for planning new housing in Oakland? *(examples: specific areas in Oakland, on large parking lots, around BART stops, upzoning neighborhoods, in shopping centers?)*

  BART is doing a good job except @ Rockridge. Eastmont Mall could be one site where underutilized parking areas could be identified for housing.

  Participant 3: in favor of by-right zoning and setting the rules to enable this. "Requesting a zoning change takes forever."

  Christina: would be in favor of changing zoning to accommodate housing (affordable). Thinks downtown Oakland is turning into SF with gentrification.

  Participant 3: wants enough housing even for tech professionals.

  Participant 4: lives in an ADU-few people care about ADUs because people are more concerned about large buildings and their impacts.

  Participant 2: Oakland has exceeded housing goals but only at the top income level. Would like Oakland to consider mid-rise buildings in neighborhoods like Temescal. By-right approval for 100% affordable. Mixed-income buildings don't pose a huge challenge (okay for financing) but is more in favor of mixed-income neighborhoods. Need more government support for rental subsidy.

  Participant 5Beach: even subsidized housing is too expensive for someone earning $1,300/month and on SS.

  Participant 2: to get state subsidies, there needs to be local match

- What do you think some of the issues or challenges will be in these areas?

  We moved into the final question but some of the challenges were teased out in the participants' responses to the first two questions such as affordability, impact of large buildings, ensuring rental subsidies so people can stay in their units.

- What type of housing does Oakland need more of? Where do you think it should go? Why?

Participant 1: Senior housing, TAY housing are interesting ideas.

Participant 3: advocates for homeless housing. City should be planning for homeless housing.

Participant 2: Larger units for larger families. City needs a housing needs assessment that assess pay burden (families that overpay for their unit)

Participant 5: social housing with assurance that families can remain in their unit.

Summary Points:

- Revise the zoning to accommodate housing, upzoning is a smart approach and legislate by-right approvals for 100% affordable. Build housing near transit, set the rules to accommodate more housing production.
- Not sure if housing is the solution. Lots of empty lots and empty units. Root of the problem is that developers sit on empty properties.
- Publish the needs and fair housing assessment on the website so the public can see it.

Group 5 Facilitator – Khalilha Haynes

A. What are the housing issues you care about in Oakland?

1. Prioritizing affordable housing (AH) for very low- and low-income households. there is no strategy for AH, so Oakland is losing people of color.
2. Investment priority for areas of the RHNA that have not been met.
3. Creating an effective and responsible AH strategy, with rental assistance for renters and down payment assistance for people to purchase homes.
4. Effective programs to shelter & support homeless residents.
5. City of Oakland becoming a nicer place to live, with less focus on cars, dense housing to support transit an address the homelessness crisis.
6. The homelessness crisis is exploding, and City needs to "go big" make a large investment in AH. How can we explain allowing people to live in tents under the freeway, on sidewalks, and in RVs?
7. Creating a program to support first-time Black homeowners and keep Black properties in Black hands.

B. What do you see as some of the opportunities for planning new housing in Oakland?

1. Building housing near transit, e.g. BART stations, transit corridors (esp. rapid bus lines).
2. Placing market rate housing in communities that were historically exclusionary and areas "post-gentrification."
3. Upzoning, esp. near transit
    i. Upzoning needs to be done equitably, especially in areas like Fruitvale and deep East Oakland, where upzoning would increase land values,

lead to speculation, gentrification, and displacement of current Black and Brown working-class communities.
    ii. Consider Emeryville as a model for maintaining Black population by building apartments everywhere.
4. Converting single family lots to multi-family lots.
    i. Consider San Francisco as an example.
5. Increasing height limits, removing parking minimums, implementing parking maximums.
6. Moms for Housing site has sat vacant for the last two years, despite being bought by a land trust a few years ago. There are homeless encampments just a few blocks away. Why has this not been opened to house people?
7. Public land for public good. Using public land would dramatically cut the cost of housing.
8. Establishing accountability measures and performance metrics for City's AH policies.

C. What do you think some of the issues or challenges will be in these areas?

1. Decreasing cost of housing to make it more reasonable and affordable to build housing.
2. Creating strategies so that AH does not compete with market rate housing.
3. Passing anti-speculation laws.
    i. E.g. Homes in North Oakland Flats are being bought up by for-profit companies, not nonprofits or Oaklanders.
4. Entitlement process is extremely onerous, for companies and individuals.
5. Using vacant land owned by the City and County. Taxing vacant public land – the County has so much public land that they aren't being taxed for, but private landowners are being taxed.
    i. City needs to publish a full list of all its available public parcels.
6. Need effective ways to build both market rate and affordable housing – using market rate to pay for AH won't get us enough AH.
7. Impact fee paid by developers that do not build AH is way too low. They need to pay more. Oakland devalues its land in order to entice developers, like a "low-budget prostitute."
    i. The implementation of impact fees originally was staggered (West, then Central, then East), giving developers time to buy up land in Central and East Oakland.
8. Lack of city, state, and federal funds, especially after the closure of redevelopment agencies.

Group 6 Facilitator – Alison Moore

Participants:

- Resident of Rockridge
- Resident of San Pablo Ave/Broadway
- Two members of East Bay Housing Organization

Key points:

- Surveying/ pressuring church groups and landowners how sitting on land- eminent domain? Vacant land tax- progressive.

Potential ideas: Affordable housing overlay, urban land trusts, adjusting parking requirements

- Challenges: Funding, costs of land.
- No gos: Fire hazard zones, Sea level rise and industrial land use- cancer clusters.
- Gos: Proximity to transit
- Housing types: Finding places for people that are homeless to afford to live.

Raw notes:

- More affordable housing in general is needed, with an equity lens.
- Some of the less affordable areas like Rockridge have some of highest land costs in Oakland.
    - Even if upzoning happened in these areas, it would only be a few parcels that would be viable.
    - Landowners in college and rockridge, not much incentive. One of major buildings there- dryers building, got redone 20, 30 years ago, was just bought by east bay jewish community center. May provide some housing there.
- Concentration of transit and grocery stores could support so much more housing than there is. Either side of Rockridge north or south or BART. They do well as it is, no incentive to go higher. Could there be an incentive? Trader joes is 1 story, but land office business.
- Affordable zoning overlay- market rate one zoning, affordable another. College avenue- 3 stories max, if you're building affordable you can get six.
- There is a need for deeply affordable housing. In the past 6 years, for every 9 market rate units, one unit of affordable housing is produced.
- Desire to see this housing element approached with an eye toward more stringent state laws- Cities must be held accountable. There are tools to implement equity and fair housing from the start, even beyond AFFH.
- Essential missing element is money- there is not a lot of money to fund affordable housing, especially since redevelopment agencies went away. The importance of finding those streams can't be understated.
    - When you're identifying sites, try and evaluate how competitive those would be for funding.
- When conversion occurs, landowners could make partial donation of property value to a land trust. way to get a benefit, land trust gets land at reduce costs.
- Lots of vacant lots that are paved or grassy, or unused parking lots, and a handful of homes that are vacant on San Pablo Ave. All owned by one somewhat active religious institution. Feels totally unfair to have wonderful neighborhood and land that isn't being used because someone isn't paying property tax on it. Complex when someone owns it, especially when they are exempt form property tax. But participant would like to see something happening on land
    - Stamford and san pablo. Yoga ashram owns 20-30 parcels, massive vacant lots. Headquarters in upstate new York. No control over those decisions.

Person with power is not really thinking about it. Eminent domain not as expensive.

- Unhoused individuals are being forced into the streets because of rent increases.
- Holding land for investment is wrong. What can we do about that? Vacant property tax, is pretty minimal. One option could be a progressive vacancy tax- the longer a parcel is vacant the larger the tax is. This will be on the San Francisco ballot this year.
    - Corner of Broadway and pleasant valley- A shopping center is no longer a viable option because of online retail. Problem was that property owner (corporation) doesn't want housing. The master lease that governs site prohibits housing- right now the zoning is general commercial. Why not rezone as residential? Could build mixed use with major housing component.

    - Eminent domain recommended as strategy for unused property.
- Synergy with transit and housing. AC transit and BART. Don't need to build as much parking downtown. In case of BART, where they have the land. Investing in transit with ridership and housing.
- Stagnancy has a cyclical effect- not a lot of businesses, not a lot of places to build housing, business don't want to open.
- Survey churches to determine extent of ownership
- Reducing parking requirements- Perception that parking requirements were down to half a space already.
    - Participants noted that some lenders wont provide money if you don't provide parking.
    - Support for parking maximums, and lowering minimums. Let market decide.
- Shared parking- some examples of this in El Cerrito del Norte
- Do not want to add housing in the following areas:
    - High fire zones
    - Near the shoreline. Also consider how housing can help reduce greenhouse gases, such as higher density and energy efficiency. Adaptive reuse is the most efficient.

Group 7 Facilitator – Matt Alvarez-Nissen

KEY TAKEAWAYS

- Identified need to improve the general outreach process – including making sure the community has enough context to understand the Housing Element process and is able to select appropriate sites.
- Housing locations – the City should locate affordable housing in higher-resource neighborhoods and near transit. Participants identified capacity for additional residential development in Trestle Glen, Montclair, North Oakland and the Hills. While we should keep fire risk in mind, additional development is possible through strategic planning. The City should also spread density around the city, and not exacerbate patterns of segregation. The City should not include grocery stores as sites, especially in food deserts.

- Housing choice – The City should promote housing choice, including both the location of available housing and the type of housing. This includes both rental and ownership units, ADUs, modular housing, etc.
- The City should work to increase the proportion of affordable housing to market rate housing in new development (including in any new Coliseum area development), and make sure not to redevelop on existing subsidized or rent-controlled housing.
- Policy ideas and solutions – Increase strength of the housing preservation program, inclusionary zoning, value capture of resale, transparent community benefits process, streamlining for modular housing (especially on small sites), promoting workforce housing, and allowing the conversion of vacant ground floor commercial to residential.

Detailed NOTES by Question

Participants were asked Question #1 as part of the initial round robin, and Question #2 to prompt group discussion. Questions #3 and #4 were also presented, but the discussion turned towards a more general conversation about housing priorities. The answers to Question #1 are provided and the answers to Questions #2, #3, and #4 are grouped together below.

Question #1 – What are the housing issues you care about in Oakland?

- Deeply affordable housing in Oakland and the region
- Quality design
- More equitable access to transit, especially in higher resource areas (e.g., Rockridge)
- Development of housing in diverse areas (e.g., Adams Point)
- Do not center density in one place (like it is in East Oakland)
- Climate smart housing (i.e., do not develop in areas prone to wildfire, flooding, etc.)
- Do not locate affordable housing in existing low-income neighborhoods

Question #2 – What do you see as some of the opportunities for planning new housing in Oakland?

Question #3 – What do you think some of the issues or challenges will be in these areas?

Question #4 – What type of housing does Oakland need more of? Where do you think it should go? Why?

- Conversion of vacant ground floor commercial to residential use.
- Permit higher mid-range densities to target missing middle housing, and prioritize the flatland (although might not be relevant with SB9 provisions).
- Develop around transit, including AC Transit stops.
- Spread density throughout the city.
- Do not exacerbate patterns of segregation.
- Do not include existing rent-controlled or subsidized housing in the inventory, don't want to encourage redevelopment of those buildings.
- Staff should provide more context on what makes a good site for housing.
- The proportion of affordable housing to market rate housing in new developments is not balanced – minute amounts of affordable housing with large amounts of market rate, especially on large projects. One participant expressed a desire to see this balance in any new Coliseum area development.

- Compare Coliseum area development to Brooklyn Basin development, interested in affordable housing balance and aesthetics of the development.
- Strategies to promote more affordable housing include community-based agreements, but this process is often not transparent and does not involve the community. Hard to negotiate for the community given limited time. Participants expressed a desire for a more transparent process and to hold developers accountable to proposals that actually benefit the community, especially on public land.
- Issues with the impact fee process – hard for the public to determine the total amount of impact fees collected and where the money goes.
- More workforce housing.
- Modular housing on smaller lots, allow for more flexibility in this process – including permit streamlining. Historically difficult for cities to build modular housing, but this can be a more financially viable way to build quality housing. It's also more cost effective and produces lower rents – affordable by design.
- The City should consider value capture from home resales as a potential program. This could be a good source to provide more subsidies for lower-income units in new developments.
- The City should increase funding to and strengthen the housing preservation program, which is similar to San Francisco's small sites program, to retain rent-controlled units. It is cheaper to maintain existing affordable housing than to develop new low-income housing with significant State and federal subsidy.
- Trestle Glen and Montclair, and areas northeast of the I-580 could be higher density (although there are slope and fire hazards to consider). These are higher resource neighborhoods and would be good for affordable housing.
- Participants emphasized locating affordable housing in higher resource areas outside of high fire hazard zones, where possible. However, some participants argued that it is possible to develop more in some of these areas given thoughtful strategic planning efforts – there are ways to mitigate the risk, including ensuring adequate fire fighting resources. One participant cautioned against located too much housing in areas with small and windy streets, since this poses an evacuation risk and may put vulnerable populations at even greater risk. One participant referenced recent State law (AB2911) and State building codes that would help facilitate development with good site management, design, and planning. One participant noted that there are also environmentalist concerns about development in the hills, but there is still lots of land up there where people could live.
- Housing choice is a priority – the City should create options for people to live in the hills if they want. People should also be able to choose single-family units, affordable rental units, affordable condominiums, etc. One participant noted that more condos should be built, and that a lot of rental apartments have been built but not ownership units. Another participant agreed – lots of new development is rent only, and buying options are typically restricted to single-family.
- One participant was in favor of the City promoting more ADUs and SB9 lot splits, but wanted to make sure that these are long-term rentals and not available on AirBNB.
- One participant highlighted the prevalence of food deserts in Oakland, and noted that when considering redevelopment of commercial sites the City should confirm that the site is not the only grocery store in a neighborhood.

- One participant was frustrated that the City released the RFP so late, and that the outreach process was doing things out of order. They noted it is preemptive to discuss sites without fair housing analysis, or other context building. Other participants agreed that the General Plan website is light on information, and should include things like a map of City-owned parcels and AFFH maps.

Group 8 Facilitator – Rajeev Bhatia

Housing Sites

San Pablo Avenue could be a great place for more (deeply) affordable or mixed-income housing. Broadway and Telegraph have gotten attention in the past, and San Pablo Avenue has not had the same attention.

Look at smaller sites, don't ignore them. A's stadium area, anywhere where transit is or is planned for.

Fire Captain. Has worked for Oakland Fire for over two decades, and can't afford to be in Oakland. Many police and fire personnel are eager to live in Oakland but are unable to afford to do so. Living too far from the City is not great in case of emergency need. Need to think about providing workforce housing, not just income-restricted. Castro Valley had Emergency Living Response Zone that prioritized police and fire personnel in case of need.

Difference of opinion on housing in the hills – some believing that should absolutely not be allowed – even one fallen tree on a one-way-out only area can cause devastating loss of life -- while some others believing that single-family zoning needs to be eliminated from entire city because of equity considerations (while case-by-case exemptions based on actual studies may be ok).

City also needs to promote NOAH (Naturally Occurring Affordable Housing). E.g.. City had program for small developments (five units or less), that could be resurrected.

Housing in Resource Rich vs. Non-Resource Rich Areas
While appreciate desire for adding housing in areas of opportunity, several members of the group wanted to see housing in areas where people actually live and need housing, even if these are lower-income/resourced areas, for cultural identity, because they have ties in the neighborhoods.

Preservation
Preservation of housing at risk of conversion was key for many people in our group. Need to extend affordability covenants. Developers of these, non-profits need funds. City should tap into infrastructure and other funds available from federal and State governments.

Inclusionary Housing

On-site inclusionary housing building requirement, rather than just paying fee, because that can take many years to develop when we need housing now. Money collected by City also loses value over time. Decisions on how to spend money collected also become political. BMR requirement also needs to be increased.

Group 9 Facilitator – Lauren Pepe

KEY THEMES

- Affordable housing should be built all over Oakland and not just in lower-income neighborhoods
- Affordable housing near transit is key- being next to BART station opens up far more opportunities than being two miles away - but ensure anti-displacement protections are in place for those who already live there
- We need more senior supportive housing, multigenerational housing, workforce housing, ADA compliant housing
- Homegrown solutions such as community land trusts should be seen as real solutions and we should remove barriers to these solutions; some homegrown solutions (such as Homefulness) have run into a lot of issues with the city
- Issue: Affordable housing is built but people who can pay market rate get it
- We must ensure:
    - Affordable housing is not built near pollution sites
    - Housing for the unhoused before anything else
    - Vacant units or land do not sit vacant
    - That affordable housing exists not only now but also in the future so that future generations can remain in Oakland
- We must recognize housing is a human right and not commodity

FULL CONVERSATION ORGANIZED INTO QUESTIONS/TOPICS (WITH CHAT TRANSCIPT INTEGRATED)

Introduction and Housing Issues of Concern

Participant 1, worked in affordable housing, lives in District 7: Create affordable housing all over Oakland and not just areas where the lowest income residents reside. TOD is important (clients take 3 or 4 buses to get downtown) and equitable transit should exist. Other issues of concern: homelessness – everyone should be housed, deeply affordable housing, workforce housing.

Participant 2, works with Unity Council, grew up in deep east Oakland and now works/lives in Fruitvale: Going from two miles away from transit to next to BART is like night and day in terms of access to amenities. Concerned about: homelessness, affordable housing for her staff, ensuring her children will be able to grow up in Oakland (she doesn't want to move to suburbs like her relatives).

Participant 3, third-generation Oaklander: Wants to see Oakland remain diverse, vibrant city and not turn into mini SF. Alarmed by how expensive it's become but believes there is enough room and we need more housing for all income levels. Oakland needs better transit; BART is great if you are next to it but if not, it's like it doesn't exist. Was able to buy housing after thinking she would have to leave; wants to see this opportunity to own in Oakland for her nephew. Was renter whole life and knows how difficult that can be; protections for renters can be improved. Wants to see more investments across the city like the Waverly development program in her neighborhood.

Participant 4, lives near Coliseum and works in Chinatown organizing for low-income immigrants: We need deeply affordable housing and more of it. Affordable housing waitlist practices might be unfair. The growing unhoused community is of great concern. We need more workforce housing (educators, grocery store workers, etc). Lumping all these types of housing together as moderate housing doesn't work because people who can afford to pay more get these units. How do we keep housing currently affordable as affordable and ensure maintenance over time (habitability is big issue in low-income communities)? Concerned about housing sites being near industrial pollution sites or near freeways/off-ramps. Believes that as long as housing is treated as commodity it wont actually be protected. Need to treat it as a human right. Most of flatlands in flood zone is a concern; we aren't doing enough for mitigation. What are we doing about ensuring safe places to shelter in? Resilience hubs must be built near homes especially for unhoused folks. Concerned that a lot of the announcements going out about the Housing Workshops were not multilingual; hopes language interpretation of meeting is being recorded.

Participant 5, lives in Grand Lake. Concerned about affordable housing being equitably distributed (and not just in East Oakland) and located near transportation hubs, grocery stores and offices. She works in accessibility for seniors in East Oakland. It takes so long for them to get anywhere - ensure senior housing is near transit. Also believes we need more middle-income housing.

Participant 6is a mother of four and has done crazy things to maintain housing. She seconds the issues already mentioned. Housing is human right and no one should have to do what she's done. Unhoused neighbors are all around and it's shameful that luxury units are going up while so many units sit vacant. Churches are closing because their parishioners have been displaced. She's showing up to this meeting reluctantly and doesn't think [the Housing Element outreach process] has hope with the quick timeline that has been established.

Where to locate housing?

- Near transit. Areas dense with transit must be dense with housing. Rockridge has blocked density but it's a place where we need higher density housing.
- Create affordable and middle-class housing throughout the city instead of allowing the current segregation to persist.
- Old/unused buildings and parking lots near city hall and maybe OUSD buildings/lots.
- Near parks and green spaces

Issues/Challenges

- Critical to have housing by transit but that causes gentrification. The only folks who are able to remain are in protected housing. Other folks are harassed by landlords until they leave and they lose good housing near transit. Need strong anti-displacement protections and outreach processes.
- In District 6, many large lots were zoned for affordable housing and supposed to be developed but didn't and property owner is absent. Multiple lots like that are creating blight in community. Developers bought them and didn't do anything.
- Support businesses during construction to ensure they remain open.
- Cost of housing (especially with materials prices increasing). Casa Arabella (affordable development) cost $60 million for 92 units.
- Make sure design of new housing matches existing aesthetic of community.
- When places are upzoned the cost of land increases greatly so building new units is hard to afford.
- Unhoused communities have needed to be resourceful; how can those areas where they live allow them to stay and be improved upon? Many of those areas don't seem very safe and near polluting sources, but how can we not continue to displace the displaced?
- The state has to work with other financing options to house the unhoused besides tax credits.

- New development also takes a long time. We've had a lot of community members fight for affordable housing in an otherwise market rate site, and by the time the buildings are open for occupancy those community members have been pushed out and don't get to enjoy the benefits of what they won.

Solutions/Places to Improve

- Take community land trusts seriously. Need more accountability in city departments that are supposed to be supporting residents, such as having enough inspectors who follow through and make reports.

- Need consequences for leaving properties vacant so that there's not unused housing stock.

- We need to embrace community-driven and homegrown solutions, de-commodify housing, and recognize the value of a family having dignity. Homefulness (non-profit) built on vacant sites that they purchased and have run into multiple fines from the City.

- We need a solid inclusionary housing policy.

- Update the impact fee policy.

What types of housing to build?

- Multi-generational or family sized housing

- ADA-compliant housing

- Supportive senior housing

Group 10 Facilitator – Helen Pierson

Introductions

- Participant 1 – part of YIMBY groups, wants to address the general unaffordability of housing in Oakland
- Participant 2 – The city is experiencing a homelessness crisis and should pause development of market rate housing until the crisis is addressed, the city needs housing for teachers, more housing in the hills, and housing for the unhoused is a major priority
- Participant 3 – promoting affordable housing is very important, rockridge resident, house homeless individuals, re-introduce SROs in areas like downtown, 'gentle density'
- Participant 4– pause on market rate housing, housing in Jack london area
- Question on Racial equity impact analysis – will such an analysis be conducted before the sites are chosen?

Housing Location

- Most new higher density housing so far is in the downtown and west Oakland areas, we need more housing in other neighborhoods like north Oakland
- We should have more housing in the Montclair area, and housing above the markets in rockridge
- Higher density housing could work in rockridge near bart but it should be well designed and compatible with the neighborhood
- The hills are not a good candidate for higher density housing because of the fire risk – remember the '91 fire
- Could be more high density housing along san pablo – access to transit (bus service) and shops etc
- Incorporate existing analysis on equity and justice to decide where housing should go – anti-displacement project, which areas are vulnerable to displacement

Challenges

- Fire danger – density limits in fire prone areas
- Nimbys will pose a challenge but smart design guidelines could help win people over to housing in their area
- Walkability and charm are important for new high density housing

Housing Types

- Focus higher density housing along commercial avenues
- End exclusionary zoning to allow four-plexes in single family neighborhoods
- Multifamily housing needed
- Family-friendly housing and housing accessible to working families
- Can the city put policies in place to ensure that existing units don't stay vacant

Report Back

- Incorporating data analysis on equity issues
- Focusing higher density in commercial areas
- Incentivizing low and very low housing
- Pause market rate development until unhoused oaklanders have homes
- Housing for more unhoused individuals and take advantage of vacancies

Group 11 Facilitator – Clare Kucera

- **What are the housing issues you care about in Oakland?**
    - Incorporating climate resilience, affirmatively furthering fair housing, housing equity
    - Concerns about why the City exceeded its RHNA allocation for housing for above moderate income units, but not for lower income groups
    - How can we better incentivize developers create affordable units?
    - Unhoused population
    - Expedited and streamlined system for ADUs, how to reduce costs for property owners who maybe want to add on an ADU

- **What do you see as some of the opportunities for planning new housing in Oakland? *(examples: specific areas in Oakland, on large parking lots, around BART stops, upzoning neighborhoods, in shopping centers?)***
    - 51st and Broadway vacant parcel – housing affordability
    - DaVita Dialysis Site in Rockridge
    - Rockridge Bart
    - Along transit lines – bus too or just bart?
    - Blighted sites that could be redeveloped or utilized in some way
    - West Oakland can be a much denser area of the city, Mandela Parkway
    - What is built needs to serve lower income levels

- **What do you think some of the issues or challenges will be in these areas?**
    - NIMBY views, no housing no change sentiments
    - Preventing displacement/gentrification

- **What type of housing does Oakland need more of? Where do you think it should go? Why?**
    - Having housing typologies that coincide well community character – for example lofts in the industrial areas of west oakland
    - Dense transit-oriented development, having folks closer to amenities that are accessible by transit

Appendix C: Main Room Chat Transcript

118:04:24 From Iris Starr to Everyone:

What is the agenda for this meeting? When do we get to talk?

18:04:46 From Cathy Leonard to Everyone:

Will the recording be shared with the participants?

18:05:12 From Liana Molina to Everyone:

And the mtg notes? ^^

18:06:28 From *Laura Kaminski to Everyone:

We will post a recording of the meeting on the website

18:06:39 From Cathy Leonard to Everyone:

Thanks Laura.

18:06:56 From *Laura Kaminski to Everyone:

Notes will also be posted on the website

18:07:05 From Liana Molina to Everyone:

Great, thanks!

18:07:05 From Iris Starr to Everyone:

What is the schedule for the update, I.e, what are the milestones and when? Where is this posted and can it be posted here?

18:07:35 From Iris Starr to Everyone:

When do you expect this to go to Planning Commission for approval, and then to Council?

18:08:03 From Naomi Schiff to Everyone:

Sorry I have to leave at 6 pm but please keep me in the mix. How can I provide written comments?

18:08:32 From Liana Molina to Everyone:

Probably good for those translators to share w community members who can't be here?

18:08:46 From Liana Molina to Everyone:

*to take notes

18:09:13 From Iris Starr to Everyone:

Lots of echos

18:09:17 From Hazel O'Neil, D&B to Everyone:

Si necesita traducción en español, envíe un mensaje a Hazel

18:09:31 From Hazel O'Neil, D&B to Everyone:

如需翻译，请留言 Hazel

18:09:48 From Iris Starr to Everyone:

We need interpretation, we don't know who is coming

18:10:41 From *Laura Kaminski to Everyone:

We will go over the high level schedule and update the website with more details as the schedule progresses and as more meeting dates get added.

18:10:53 From Liana Molina to Everyone:

I tried to voice my comment in the comments- about talking tri-lingual notes in English, Spanish, and Cantonese.

18:10:55 From Kelsey Hubbard to Everyone:

interpretation streams can be recorded if the consultant team logs onto them and records on the back end

18:11:09 From *Diana Perez, City of Oakland to Everyone:

The schedule for the General Plan Update will be covered during the presentation. It is also posted on the City's website: https://www.oaklandca.gov/topics/general-plan-update

18:11:12 From Rabi'a Keeble to Everyone:

the power point is not entirely visible and partially cut off, can some fix that? Thanks

18:11:16 From *William Gilchrist to Everyone:

Might be good for anyone not speaking to mute their microphone so we have minimum echo and noise. But remember to restore your microphone when you speak!

18:11:33 From Liana Molina to Everyone:

(Notes in all 3 languages for community members who can't be present.)

18:11:47 From Hazel O'Neil, D&B to Everyone:

One note to all attendants - there is closed captioning available for those who desire it. You can turn on closed captioning by clicking on the "CC" live transcript button at the bottom of your screen and selecting "show subtitles" (or "hide subtitles")

18:13:42 From *Laura Kaminski to Everyone:

We can translate the notes in all 3 languages

18:13:48 From *Laura Kaminski to Everyone:

After the meeting

18:14:26 From Rabi'a Keeble to Everyone:

Please fix the powerpoint, reduce the size so it all fits on the screen

18:14:27 From Kelsey Hubbard to Everyone:

great to hear notes will be translated, the meeting should also be recorded in the various languages as well. this is possible with zoom.

18:14:33 From Iris Starr to Everyone:

The schedule does not provide adequate public involvement! “a draft must be submitted to the California Department of Housing and Community Development by June 2022” The public has no additional time to opine, except at the Planning Commission and City Council where the decisions are already made.

18:15:03 From Naomi Schiff to Everyone:

Will all be on Thursdays? Need to schedule in advance. . .

18:16:26 From Iris Starr to Everyone:

Naomi: Ha ha “all”

18:16:42 From Hazel O'Neil, D&B to Everyone:

Https://bit.ly/oaksites

18:17:30 From Randy O'Connor to Everyone:

A need to act on housing, to provide more, and overcome the various hurdles that always prevent it from happening.

18:17:51 From Iris Starr to Everyone:

I’m here to point out the impossibility of true community engagement and the predictable cookie cutter housing element that will result.

18:17:53 From Robin Walker to Everyone:

I retired from affordable housing. Over 25 years of experience.

18:18:06 From Tiffany Rose Lacsado to Everyone:

Member of the Deeply Rooted Collaborative - The Unity Council

18:18:10 From Phoenix Armenta to Everyone:

I want to see Oakland develop a housing first model, where housing the unhoused in the #1 priority and everything else is deprioritized until we have everyone housed.

18:18:29 From Naomi Schiff to Everyone:

Pretty awkward managing to listen to y'all and try to type into a survey simultaneously.

18:18:31 From Liana Molina to Everyone:

I'm here to advocate for more low and extremely low income housing in oakland as one part of the solution to the housing and homelessness crisis in our city.

18:18:51 From Janelle Orsi to Everyone:

Curious if the city departments are able to engage with community members that are outside of their general sphere.

18:19:19 From Stuart Flashman to Everyone:

I am concerned about equitable housing and other elements. (I am a land use attorney)

18:19:23 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

We need more ELI housing in Oakland. We also need to have reasonable placement of occupants

18:19:30 From Phyllis Horneman to Everyone:

I am here as a small housing provider-a grand name for people who have an ADU. I am here because what we have been doing for affordable housing just isn't working.

18:19:44 From Karla Guerra to Everyone:

Karla Guerra, Policy & Advocacy Manager at The Unity Council. Advocate for affordable housing & housing access.

18:19:57 From Stuart Flashman to Everyone:

BTW, Menti doesn't appear to be working.

18:20:00 From Phyllis Horneman to Everyone:

Longfellow

18:20:01 From Allison Bakke to Everyone:

Waverly

18:20:01 From Stuart Flashman to Everyone:

Rockridge

18:20:12 From Christopher Buckley to Everyone:

Clinton

18:20:12 From Phoenix Armenta to Everyone:

Clinton

18:20:12 From Joshua Hawn to Everyone:

I live in Alameda (should be Oakland)

18:20:14 From Rabi'a Keeble to Everyone:

I am in the Chinatown zip code or JL

18:20:17 From Cathy Leonard to Everyone:

Santa Fe

18:20:18 From madlynn johnson to Everyone:

member East Bay Housing Organizarion

18:20:18 From Iris Starr to Everyone:

I work in east oakland

18:20:19 From Irma Bodden to Everyone:

Concord

18:20:21 From Chia Hamilton to Everyone:

north oakland

18:20:24 From Stuart Flashman to Everyone:

Diversity

18:20:26 From Allison Bakke to Everyone:

People, culture.

18:20:26 From Liana Molina to Everyone:

I'm in D7/ deep east

18:20:29 From Jamaica Sowell to Everyone:

EO

18:20:29 From Karla Guerra to Everyone:

Love the community

18:20:30 From Janelle Orsi to Everyone:

diversity

18:20:33 From Chia Hamilton to Everyone:

diversity

18:20:36 From Rabi'a Keeble to Everyone:

A reduction of noise, response from the police be reasonable

18:20:37 From Karla Guerra to Everyone:

Sanctuary city

18:20:42 From Iris Starr to Everyone:

Are you going to ask we do not like, regarding housing???

18:20:43 From Phoenix Armenta to Everyone:

Definitely the people, the culture

18:20:57 From madlynn johnson to Everyone:

Live in Bancroft Senior Housing

18:20:57 From Naomi Schiff to Everyone:

Pretty hard to do creative writing and listen to you at the same time.

18:21:14 From Chia Hamilton to Everyone:

walkability

18:21:29 From Liana Molina to Everyone:

I love our natural landscape- the redwoods!

18:21:33 From Jeffrey Levin to Everyone:

Jeff Levin with East Bay Housing Organizations. Want to see a housing element that affirmatively furthers fair housing and improves on the City's past ratio of only 1 affordable unit for every 9 market rate units.

18:21:36 From Cathy Leonard to Everyone:

I used to love my neighborhood until it became crowded with traffic and unfriendly neighbors.

18:21:50 From Reisa Jaffe to Everyone:

Please put a link to the website where we sign up to get on the mailing list for notifications of future meetings in the chat.

18:22:09 From Stuart Flashman to Everyone:

My browser says menti's server has stopped responding

18:22:13 From madlynn johnson to Everyone:

Have family here

18:22:17 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Sign up link - https://www.oaklandca.gov/topics/general-plan-update

18:22:17 From Naomi Schiff to Everyone:

Please provide a way to send in comments.

18:22:19 From *Khalilha Haynes, City of Oakland to Everyone:

Here is a link to the website, where you may sign up for updates: https://www.oaklandca.gov/topics/general-plan-update

18:22:29 From Liana Molina to Everyone:

Love Oakland's legacy of resistance to injustice

18:22:36 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Please send in your comments to generalplan@oaklandca.gov

18:22:53 From Naomi Schiff to Everyone:

Thank you! Will that go to the housing people?

18:23:36 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

The comments will come to staff working on the General Plan Update

18:23:43 From Stuart Flashman to Everyone:

It's shameful how low moderate income housing was!

18:23:58 From Ann Harvey to Everyone:

Does Oakland's extremely low and low income and moderate income allocation increase to add what we were short during the last period?

18:24:00 From Chris Norman to Everyone:

Why did we not meet the low, very low, and extremely low goals?

18:24:04 From Chris Norman to Everyone:

Would love an explanation

18:24:14 From Brandon Harami to Everyone:

Not enough funding

18:24:19 From Christopher Buckley to Everyone:

I'm here to advocate adaptive reuse of older buildings, especially historic buildings for affordable housing, including use of the California Historical Building Code, which can significantly reduce rehabilitation costs. and therefore help promote affordability.

18:24:36 From Phoenix Armenta to Everyone:

Given that we have an abundance of Above Moderate Income Units, Does it make sense that we create a policy to limit Market Rate Development until the other buckets can catch up?

18:24:37 From Cathy Leonard to Everyone:

Unbelievable that most of the housing was for the well to do.

18:24:39 From Naomi Schiff to Everyone:

Photo shows market rate housing at Broadway/Grand.

18:24:55 From Cathy Leonard to Everyone:

Remember, Oakland was traditionally a blue collar town and affordable.

18:25:14 From Naomi Schiff to Everyone:

Let's not destroy naturally affordable housing as we build expensive housing.

18:25:30 From Stuart Flashman to Everyone:

Market rate is the only kind thast doesn't need a subsidy. There's not the public money to provide subsidies.

18:25:31 From Iris Starr to Everyone:

The City creates barriers to affordable housing, especially housing developed by the people who know what they need.

18:25:45 From Reisa Jaffe to Everyone:

We need social housing! We need Oakland to be a place that's affordable for people making minimum wage.

18:25:53 From Chia Hamilton to Everyone:

cathy, thinking that was following jerry brown's plan. don't recall him talking about housing all groups. I could be rong, though

18:26:07 From Joshua Hawn to Everyone:

We shouldn't rely on property owners, in my opinion.

18:26:28 From Tuan Ngo to Everyone:

We need responsible and accountable housing with performance metrics.

18:26:30 From Iris Starr to Everyone:

NO HOUSING SPECULATION

18:26:45 From Reisa Jaffe to Everyone:

Iris agree with tha.

18:26:53 From Cathy Leonard to Everyone:

@Chia, Jerry Brown was only concerned about market rate housing. That's one reason I did not vote for him.

18:27:09 From Stuart Flashman to Everyone:

Need to bump up the vacant property tax

18:27:12 From *Alison Moore, D&B to Waiting Room Participants:

https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/inventory-of-land-suitable.shtml

18:27:24 From Joshua Hawn to Everyone:

Re: speculation. Land value tax fixes this.

18:27:25 From Hazel O'Neil, D&B to Everyone:

https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/inventory-of-land-suitable.shtml

18:28:00 From Rabi'a Keeble to Everyone:

I think that affordable housing is being built without regard to pollution and other hazards. Ask me.

18:28:25 From Iris Starr to Everyone:

Proximity to pollution…. So where is the environmental justice element?? Why is it separate?

18:28:46 From Jeffrey Levin to Everyone:

How about a map that shows the percentage White by census tract. That would be far more revealing

18:29:05 From Tuan Ngo to Everyone:

The state rent cap legislation (AB1482) has a definition of outside, speculative real estate investors. Protect local residents and target speculators using the legal definition of outside speculators in AB1482.

18:29:06 From Iris Starr to Everyone:

Yes @jefflevin

18:29:31 From Chris Norman to Everyone:

I agree with @jeff Levin. Would love to see that at your next session.

18:29:42 From PATRICIA TOSCANO to Everyone:

City of Oakland employees and Oakland school teachers can not afford a home where they work. Instead we are pushed out and not given the opportunity to be a vital part of the community where we work.

18:29:48 From Iris Starr to Everyone:

Housing concentration type…well, look at the hills

18:29:49 From Joshua Hawn to Everyone:

Close I-880 between Adeline and San Lorenzo.

18:30:20 From Iris Starr to Everyone:

BAN LAND SPECULATION

18:30:36 From Joshua Hawn to Everyone:

Tax Land (speculation)

18:30:36 From Cathy Leonard to Everyone:

Public Land for Oaklanders, not developers.

18:30:36 From Naomi Schiff to Everyone:

Too bad not much affordable going on at Oak Knoll.

18:30:37 From Reisa Jaffe to Everyone:

The definition of affordable has been stretched such that the result is still inequity. That's why we need social housing.

18:30:39 From Kelsey Hubbard to Everyone:

anti-eviction mapping project recently released this. https://www.pmpress.org/index.php?l=product_detail&p=1140

18:30:42 From Kelsey Hubbard to Everyone:

worth checking out

18:30:53 From Joshua Hawn to Everyone:

+1 to social housing

18:30:56 From Bobbi Lopez to Everyone:

@ Iris, yes!! Speculation is the issue.

18:30:59 From Cathy Leonard to Everyone:

Yes Reisa.

18:31:07 From Naomi Schiff to Everyone:

Note historic house at lower right.

18:31:17 From Bobbi Lopez to Everyone:

And +1 Reisa

18:31:19 From Cathy Leonard to Everyone:

Affordable housing is unaffordable.

18:31:22 From Renata Robles to Everyone:

LOL "historic"

18:31:46 From Tuan Ngo to Everyone:

Equity Study to make to ensure just and responsible housing.

18:31:49 From Joshua Hawn to Everyone:

Historic means “typical craftsman bungalow” apparently

18:32:12 From Phoenix Armenta to Everyone:

I would like to know what this process can actually do. Are we setting new policy? Is this Housing Element a must do or a suggestion to elected as to how to proceed? Where does this fall in the City power structure?

18:32:18 From Cathy Leonard to Everyone:

Oakland needs DEEPLY affordable housing. Let's be real.

18:32:22 From Jeffrey Levin to Everyone:

No reuse of existing residential without 1 for 1 replacement of all affordable housing units that are removed

18:32:43 From Iris Starr to Everyone:

Abolish planning and building regulations that are not strictly about Safety as we eliminate land grabs

18:32:45 From Renata Robles to Everyone:

@Tuan - check out AFFH guidelines, which are intended to address equity and segregation issues through the Housing Element

18:32:57 From Joshua Hawn to Everyone:

@ Phoenix, this is a process required by State Law

18:33:11 From Jeffrey Levin to Everyone:

The State considers the Housing Element to be a contract with the City about what it WILL do.

18:33:17 From Renata Robles to Everyone:

@Jeffrey - State law (SB330) requires "no net loss provisions" to replace any units demolished

18:33:22 From Naomi Schiff to Everyone:

What will the link be to reach the location map?

18:33:26 From Tuan Ngo to Everyone:

Thanks Renata.

18:33:32 From Bobbi Lopez to Everyone:

Yes @Cathy, this Mayor has only prioritized market rate housing which is why Oakland met it's goal by 174% for market rate, but only 26% of what it was supposed to build for low income. It has not been a policy priority for her.

18:33:34 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

We will publish the map online tomorrow

18:33:46 From Jeffrey Levin to Everyone:

+1 Renata Robles

18:33:51 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

it will be available on the General Plan Update website tomorrow

18:33:59 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

https://www.oaklandca.gov/topics/general-plan-update

18:34:04 From Joshua Hawn to Everyone:

When can we annex Alameda?

18:34:09 From Randy O'Connor to Everyone:

This looks great, excited to engage with it.

18:34:23 From Cathy Leonard to Everyone:

Joshua, and Piedmont, ha.

18:34:36 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

We are also noting down the questions and will respond in an FAQ

18:34:36 From Joshua Hawn to Everyone:

Yep Can't forget about annexing Piedmont.

18:34:39 From Chia Hamilton to Everyone:

please enlrge the slides

18:34:42 From Zac Bowling to Everyone:

I agree with @josh hawn. Please annex alameda and Piedmont

18:34:53 From Naomi Schiff to Everyone:

DOSP is not released/approved?

18:34:57 From Iris Starr to Everyone:

We should be tracking the "small" project list and doing all we can to get those developed. Eliminate City permit blocks

18:35:16 From Joshua Hawn to Everyone:

I hope staff will be taking a serious look at likelihood of redevelopment in the next 8 years

18:35:31 From Renata Robles to Everyone:

@Bobbi - the Housing Element is an opportunity to create new standards/requirements for development to promote more affordable housing. This is usually done through the "programs" included, which are the implementation measures that align with the document's goals.

18:35:31 From Randy O'Connor to Everyone:

Can we see locations other users tag or only locations you tag?

18:35:35 From Kelsey Hubbard to Everyone:

10 days does not seem like enough to authentically gather this input

18:35:39 From Kelsey Hubbard to Everyone:

seems performative

18:35:41 From Tiffany Rose Lacsado to Everyone:

Why only 10 days?

18:35:46 From Zac Bowling to Everyone:

Should Howard terminal be a given on this tool?

18:35:52 From Iris Starr to Everyone:

Who knows where libby lives? Let’s drop a pin for a high rise there

18:35:53 From Cathy Leonard to Everyone:

Will public lands be considered for deeply affordable housing?

18:35:58 From Jeffrey Levin to Everyone:

1 very low or low income unit produced for every 9 above moderate income unit. Makes no sense in a City where half the population (and much more than half of all renters) are very low or low income.

18:36:12 From Alex Schafran to Everyone:

I will echo the fact that ten days is not even close to enough

18:36:13 From Renata Robles to Everyone:

@Joshua - the state has been very seriously analyzing other jurisdiction's submissions to make sure the proposed opportunity sites are not fillers that won't be redeveloped in the planning period

18:36:17 From Iris Starr to Everyone:

Yes, @jeffreylevin

18:36:24 From Zac Bowling to Everyone:

Can we fill the estuary and add housing there?

18:36:41 From Joshua Hawn to Everyone:

Excelent idea, Zac. Make Alameda a peninsula again.

18:36:48 From Preeti S to Everyone:

Yes, 10 days seems VERY short. This is a lot for anyone to comb through.

18:36:56 From Stuart Flashman to Everyone:

Will everyone who signed up for this get an email with a link to the map?

18:37:16 From Cathy Leonard to Everyone:

If you really want community input, the 10 day deadline should be extended.

18:37:19 From Kelsey Hubbard to Everyone:

what about vacant building sites?

18:37:26 From Kelsey Hubbard to Everyone:

can we add a layer on the map of city owned sites?

18:37:37 From Joanna Winter, City of Oakland to Everyone:

@Naomi The DOSP (Downtown Oakland Specific Plan)'s implementing zoning amendments have been underway for the past year+, and will be released soon for public review. An update will be out about it next week.

18:37:38 From Zac Bowling to Everyone:

Does the city have a list of opportunities sites they are considering yet?

18:37:47 From Chia Hamilton to Everyone:

What about sites with buildings that have been empty for years & years & years?

18:37:59 From Iris Starr to Everyone:

Can we use the 1 billion in infrastructure money and the ballpark site for housing? Why or why not, if we are serious about housing

18:38:00 From Joshua Hawn to Everyone:

Reisa, look out for a new bill coming soon from Asm. Alex Lee

18:38:00 From Renata Robles to Everyone:

The Housing Element is an unfunded mandate form the state for the city to plan for housing without any funding or support for implementation or subsidy to develop meaningfully affordable housing

18:38:04 From Stuart Flashman to Everyone:

could someone define social housing?

18:38:20 From Bobbi Lopez to Everyone:

@Renata, of course. One thing the City administration could do is actually implement the public lands policy passed by the city council back in 2018. Making public lands available for affordable housing development/social housing would have made a difference the last four years…

18:38:26 From gina bugiada to Everyone:

Will you define “social housing” so we can all be on the same page?

18:38:28 From Iris Starr to Everyone:

@renata, right!

18:38:40 From Naomi Schiff to Everyone:

We should review the requirements for density bonuses and raise the number of units required for expanding buildings greatly.

18:38:41 From Reisa Jaffe to Everyone:

Policy - no more market rate housing to be built while we have people sleeping on the streets

18:38:42 From Ronnie Spitzer to Everyone:

10 days is too short for community input

18:38:52 From Tuan Ngo to Everyone:

Yes, please define social housing. Public Housing Projects haven't been responsible our effective.

18:38:55 From Liana Molina to Everyone:

My question wasn't really clarified: are you seeking sites for the construction of new development?

18:39:17 From Jamaica Sowell to Everyone:

@Reisa +1

18:39:22 From Iris Starr to Everyone:

Yes, @reisa! No more market until we house our people

18:39:23 From Leonora Sea to Everyone:

It won't be possible to reach everyone who would want to provide input in only 10 days.

18:39:26 From Naomi Schiff to Everyone:

Are you including adaptive reuse projects for older buildings that could be converted for housing?

18:39:54 From Renata Robles to Everyone:

@Liana - opportunity sites are locations likely to be redeveloped for housing in the next 8 years. These do not need to be vacant sites, but it's easier to justify to the state if they are vacant. Identifying a property as an opportunity site is not a mandate to be redeveloped.

18:39:58 From Naomi Schiff to Everyone:

Include the City Hall parking lot that was closed, on Clay Street, as a site for aff. housing.

18:40:06 From Bobbi Lopez to Everyone:

Doesn't the city have a list of surplus sites?

18:40:07 From Jeffrey Levin to Everyone:

It feels like you are asking us to advance solutions before we have had a discussion about the structural and systemic roots of the problem

18:40:12 From Iris Starr to Everyone:

Maybe Loren's house in addition to Libby's

18:40:36 From Jamaica Sowell to Everyone:

@Jeffrey +1 yes!

18:40:46 From Tuan Ngo to Everyone:

More housing around public transportation.

18:40:49 From Iris Starr to Everyone:

@Jeffrey +1

18:40:52 From Jack Nagle to Everyone:

For RHNA, can City count long-term extension of affordability covenants on units whose affordability is expiring soon? Maintaining such long-term affordability might be an effective strategy.

18:40:52 From Bobbi Lopez to Everyone:

@Jeffrey +2!! 👏🏾

18:40:54 From Renata Robles to Everyone:

Context is also important as likelihood for redevelopment is dependent on project feasibility for a developer to propose housing

18:41:12 From Phoenix Armenta to Everyone:

Where can we access the previous Housing Element should we want to read it?

18:41:23 From Iris Starr to Everyone:

We are in the weeds, we are all taking the bait

18:41:23 From Naomi Schiff to Everyone:

Are you going to include in the map sites with historic status, including adaptive reuse possibilities?

18:41:33 From Renata Robles to Everyone:

Previous housing element: https://www.oaklandca.gov/resources/read-the-2015-2023-housing-element

18:41:40 From Rabi'a Keeble to Everyone:

When looking at sites the city should include church properties where churches are willing to use their property to build affordable housing

18:41:42 From Preeti S to Everyone:

Shouldn't the city already have a list of surplus sites?

18:41:43 From Jeffrey Levin to Everyone:

@Jack Nagle - while the housing element has to address preservation of existing affordable housing, that does not count toward the RHNA, which needs to be a net increase in housing

18:41:50 From Stuart Flashman to Everyone:

Land cost is a major constraint on where affordable housing can go.

18:42:02 From Renata Robles to Everyone:

Land cost as well as parcel size!

18:42:05 From Randy O'Connor to Everyone:

+1 to Zac!

18:42:06 From Tiffany Rose Lacsado to Everyone:

Who do we talk to if we need tech support with the maps

18:42:46 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

You can email generalplan@oaklandca.gov and we can help you with it

18:43:08 From *Diana Perez, City of Oakland to Everyone:

The 2015-2023 Housing Element (the most recently adopted Housing Element) is available online: https://www.oaklandca.gov/resources/read-the-2015-2023-housing-element

18:43:13 From Janelle Orsi to Everyone:

I’m disappointed the City scheduled the next workshop for Feb 17, but it appears the City hasn’t yet emailed people on the update list? That’s short notice. It makes it hard for

people to show up and give input. It sounds like a lot of people here will have good input on the Housing Programs. I hope folks show up: https://www.oaklandca.gov/events/general-plan-update-housing-workshop-2

18:43:14 From Kelsey Hubbard to Everyone:

shouldn't the initial assessment be done by the consultant team? the starting place should have been capacity building so that the community can understand what a housing element is

18:43:20 From Naomi Schiff to Everyone:

Can you provide a list of attendees at this meeting?

18:43:33 From *Audrey Lieberworth, City of Oakland to Everyone:

@Preeti - yes, we have a list of surplus sites owned by the City of Oakland, the State, Alameda County, Oakland Unified School District, and other local agencies

18:43:35 From Stuart Flashman to Everyone:

Look at urban land trusts as an option for affordability.

18:43:39 From Jeffrey Levin to Everyone:

Is the City seriously considering rezoning single family and low density areas in high opportunity neighborhoods?

18:43:46 From Sid Kapur to Everyone:

+1 to Jeffrey's question

18:43:54 From Preeti S to Everyone:

Thanks for clarifying @Audrey

18:43:55 From Chris Norman to Everyone:

I didn't realize the purpose of today's meeting was to discuss potential sites - it would be great to post a list of meeting objectives for all future meetings so we can decide when to attend.

18:43:56 From Iris Starr to Everyone:

This is so frustrating! Asking us to review a done deal of the sites. How have they been chosen? Environmental Justice criteria? Safety?

18:44:10 From Naomi Schiff to Everyone:

Who is picking these sites?

18:44:13 From Preeti S to Everyone:

+1 to Chris for meeting agenda

18:44:17 From christina Beach to Everyone:

How is " affordable" housing defined? What is the maximum income level to be considered affordable?

18:44:19 From Phyllis Horneman to Everyone:

I am sorry but I am going to have to leave the planning session for 45 minutes or so.

18:44:22 From PATRICIA TOSCANO to Everyone:

What exactly is considered affordable housing? To live comfortably afford a one bedroom in Oakland you need to have least an annual income of $77,360 at least $37.19 per hour according to NLIHC. Where does that leave families, teachers and low earning city of Oakland workers

18:44:31 From Renata Robles to Everyone:

Can staff please update the HEU website to have more meaningful information? The "events" page doesn't show any of these workshops, including the one we are in currently. The timeline is vague.

18:44:33 From *Laura Kaminski to Everyone:

These are just initial sites, we are seeking feedback for additional sites.

18:44:42 From Iris Starr to Everyone:

@chris + 1, no agents are posted, just meeting dates

18:44:51 From Kelsey Hubbard to Everyone:

exactly!!!! this question speaks to the need for capacity building. the consultant team is moving way too fast and doing performative engagement

18:45:05 From Tiffany Rose Lacsado to Everyone:

So basically if there are vacant blighted sites in our neighborhoods with absent property owners we can add those to the list for your consideration?

18:45:08 From Kelsey Hubbard to Everyone:

this is a check the box meeting

18:45:18 From Renata Robles to Everyone:

Cities must review every project for conformance with the Housing Element and General Plan. The GP is the constitution for the City and can actually enact change!! Stay involved.

18:45:25 From Naomi Schiff to Everyone:

The question is, how will you incorporate the feedback?

18:45:44 From Rabi'a Keeble to Everyone:

@Naomi....good point

18:45:44 From Tiffany Rose Lacsado to Everyone:

Can we also add OUSD vacant (and blighted) public lands?

18:45:46 From Iris Starr to Everyone:

@kelsey Hubbard + 1,000,000 check the box.

18:46:13 From Renata Robles to Everyone:

@Tiffany - if you or anyone wants to get into the weeds on what makes a good opportunity site, the state has specific guidelines https://www.hcd.ca.gov/community-development/housing-element/docs/sites_inventory_memo_final06102020.pdf

18:46:13 From Reisa Jaffe to Everyone:

+1 to Naomi's question

18:46:16 From Tuan Ngo to Everyone:

How does Oakland plan to protect minority owned properties and keep black homes in black hands?

18:46:45 From Robin Walker to Everyone:

Howard Terminal's affordable housing proposal is not in compliance. No deeply affordable. 50%,80% and 120% only.

18:47:03 From Kelsey Hubbard to Everyone:

I propose allowing more time for public comment rather than 40 minutes of break out group discussions..... there is nothing to talk about at this point. we need to understand more about the HE and what it does

18:47:21 From Naomi Schiff to Everyone:

That's a good suggestion Kelsey.

18:47:31 From Joshua Hawn to Everyone:

By "deeply affordable" do you mean "extremely low income"? (Less than 30% of Area median income?)

18:47:31 From Phoenix Armenta to Everyone:

Can we include in this Housing Element a plan for returning displaced Oakland residents back to Oakland?

18:47:31 From Jeffrey Levin to Everyone:

How is the City planning to meet the "no net loss" requirement? If you build market rate housing on sites listed as available for affordable housing, you will have to identify additional affordable housing sites. Are you planning to identify more than the bare minimum to meet RHNA?

18:47:33 From christina Beach to Everyone:

How did Oakland meet the standards determined in the last General Plan? How do we hold policy makers responsible for implementing the plan? where is the accountability?

18:47:47 From Leonora Sea to Everyone:

+1 to Kelsey Hubbard's most recent comment.

18:47:48 From Preeti S to Everyone:

+1 @Kelsey

We need more in-depth background information. This feels a little thin...

18:47:55 From Renata Robles to Everyone:

The City needs to submit their HE to the state for review. Bay Area jurisdictions need to have their HE's certified by the state by Jan 31 2023. Sounds far away but the state has given guidance that they need 180 days for review.

18:48:01 From Iris Starr to Everyone:

We are doing this because we must, so we are just going to rehash what we have. Couldn't provide the housing last time, policy was insufficient and discriminated against poor people, the politicians just look the other way.

18:48:10 From Christine Hernandez to Everyone:

+1 @Kelsey

18:48:36 From Naomi Schiff to Everyone:

I have to leave. Please advocate for affordable housing.

18:48:43 From Reisa Jaffe to Everyone:

+2 to Kelsey's suggestion

18:48:45 From Iris Starr to Everyone:

What will happen with the "notes"?

18:48:53 From Hazel O'Neil, D&B to Everyone:

1. What are the housing issues you care about in Oakland?

2. What do you see as some of the opportunities for planning new housing in Oakland? (examples: specific areas in Oakland, on large parking lots, around BART stops, upzoning neighborhoods, in shopping centers?)

3. What do you think some of the issues or challenges will be in these areas?

4. What type of housing does Oakland need more of? Where do you think it should go? Why?

18:48:55 From Kelsey Hubbard to Everyone:

can we not move to breakout rooms and add more time to public comment?????

18:49:08 From Cathy Leonard to Everyone:

Can you post the Chat on the website?

18:49:14 From Kelsey Hubbard to Everyone:

40 minutes of breakout rooms is wasting time, we don't know what we need to talk about. we need more information on the HE

18:49:18 From Jamaica Sowell to Everyone:

^^yes

18:49:18 From Tiffany Rose Lacsado to Everyone:

@renata Thank you! I need the Cliff Notes version 😊

18:49:29 From Phyllis Horneman to Everyone:

Be back somewhat later.

18:49:35 From Jamaica Sowell to Everyone:

@Kelsey +1

18:50:10 From Renata Robles to Everyone:

I got you Tiffany - here's the Cliff Notes: https://lafayette.granicus.com/MetaViewer.php?view_id=&clip_id=5918&meta_id=146586

18:56:24 From Caleb M to Everyone:

No mic

18:56:42 From Caleb M to Everyone:

But I will write. Skip me for now

18:57:34 From Caleb M to Everyone:

Ensure we go large with our efforts and actions in addressing the housing crisis

19:00:25 From Liana Molina to Everyone:

To elaborate on your questions re: the hills, to meet our RHNA goals, Market Rate housing should be zoned into areas that are affluent and high resource areas as to not further gentrify the flatlands

19:01:15 From Sid Kapur to Everyone:

College Ave in Rockridge would be a great place for midrise housing

19:01:25 From Sid Kapur to Everyone:

and upper Broadway and Piedmont Ave

19:03:07 From Phoenix Armenta to Everyone:

The Dimond and Laurel District??\

19:03:19 From Phoenix Armenta to Everyone:

NIMBY's

19:10:16 From Sid Kapur to Everyone:

Neighborhoods identified as high opportunity and undergoing exclusion in the TCAC/gentrification maps could be a great place to focus on. As well as neighborhoods close to BART or high-frequency bus lines

19:18:52 From Liana Molina to Everyone:

My name is liana Molina, you can reach me at oaklandbafca@gmail.com or 510-593-3633

19:19:11 From Liana Molina to Everyone:

I had questions about the relationship between the housing element and the general plan update

19:23:57 From *Helen Pierson, D&B to Everyone:

FYI a summary of the topics addressed at the next three workshops:

- Workshop 2 on the 17th will cover needs/housing trends in Oakland, and people's ideas
- Workshop 3 will focus on anti-displacement and tenant protections.
- Workshop 4 will be when we ask the public to weigh in on the full draft Housing Element

19:28:20 From *Helen Pierson, D&B to Everyone:

And a bit more information on community outreach: stakeholder meetings, and then theres lots of pop up outreach conducted by community partners, an equity working group, community hub events, visioning workshops, town halls, survey - these events and opportunities will cover both the housing element and the GP update.

19:29:25 From Liana Molina to Everyone:

Another question I have is whether we are relying entirely upon private and non profit entities for the production and preservation of affordable / below market rate housing? What resources is the city able to leverage with regard to maximizing production, preservation and protection of BMR units?

Oakland 2045: Housing Element Workshop #2 Report

Oakland's Housing Element and Housing Programs

FEBRUARY 17, 2022

Prepared for

The City of Oakland

Appendix B: Zoom Chat **22**

Project Background and Meeting Objectives

The City of Oakland is preparing a comprehensive update of its Housing Element, which is a component of Oakland's General Plan that will serve as a blueprint for housing the City's residents at all economic levels—including low-income residents and households with special needs—from 2023 through 2031. The Housing Element, one of seven State-required general plan elements, was last updated in 2015 and is now being updated to reflect more recent housing opportunities, challenges, and approaches that have emerged in the community, as well as comply with new State laws.

The second Housing Element workshop was part of Phase 1 of the General Plan update. The purpose of this workshop was to provide information about the General Plan and Housing Element update process and gather community input on potential housing programs. This short report summarizes the key themes and ideas that emerged during the workshop. Detailed discussion notes are located in the appendices.

Workshop Location and Format

The workshop took place on Thursday, February 17, 2022 from 6:00 to 8:00 pm online via Zoom meeting. The workshop was held in an online format due to public health concerns from the ongoing Covid-19 pandemic; this gave community members flexibility to attend the meeting from any location and drop in and out at any time. Approximately 80 community members attended the workshop. The workshop was simultaneously translated into Cantonese and Spanish.

The planning team gave a short presentation during the workshop that included an overview of the workshop format, as well as the General Plan and Housing Element update process; a recap of the first Housing Element workshop held on February 10, 2022; and a summary of how the Housing Element can be used to incentivize affordable housing and create more inclusive neighborhoods. The presentation concluded with a Q&A session for participant questions and comments.

After the presentation, participants then proceeded to one of six Zoom breakout rooms for small group discussion. Attendees were not required to participate in breakout room discussion and were allowed to spend as much or as little time in their small group discussion breakout room as they wished.

Breakout Group Discussions

The second half of the meeting was spent in six small group discussions where community members had the opportunity to brainstorm together on potential programs to be included in the Housing Element. For the discussions, six to eight participants were sent into Zoom breakout rooms with one to two facilitators from the planning team. The group conversations were structured around the following questions:

1. **What housing issues are important to you?**

2. **What are your thoughts on programs and actions to build more housing, including impacts (pros and cons) of:**

    a. Raising heights and densities to allow for more housing

    b. Restrictions on amount of parking to reduce housing costs

    c. Allowing different housing options in single family neighborhoods

    d. Ways to pay for affordable housing

Unique discussions from each group, key takeaways, and common themes are described below. For more detailed notes from each group facilitator, see Appendix A.

KEY TAKEAWAYS

During the workshop, the planning team heard a wide range of opinions on all topics.

- **Homelessness.** Homelessness was a key housing issue among nearly all participants. Groups discussed a wide variety of strategies to house the unhoused community, including more flexible building types, temporary units, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including balancing the speed at which housing is built with the need to ensure that new housing is high-quality and habitable, partnering with community groups that work with unhoused communities, and creating housing options that include wrap-around services.
- **Types of Housing.** Participants generally were supportive of new housing at every income level, though there were differing opinions on whether market rate housing was an appropriate funding mechanism for affordable housing. Many participants' expressed that funding and constructing "deeply affordable housing" for vulnerable populations such as the unhoused and low-income residents should be the Housing Element's top priority. Many participants also wanted to ensure that new housing does not exacerbate ongoing displacement of low-income residents and residents of color. Participants were generally supportive of allowing more types of housing in currently single-family areas, and some were already active in organizations that help homeowners add additional units to their properties. Many participants were interested in affordable housing solutions that allow residents/owners to build equity, such as community land trusts and sweat equity approaches (i.e., Habitat for Humanity).
- **Simplifying the Development Process.** Participants in every group expressed desire to see the current development/permitting process streamlined, particularly for low-income and non-profit builders. Zoning, environmental review/CEQA, existing City and State policies (i.e., rent control), parking requirements, and land

costs were all listed as constraints to housing development. Some participants suggested financial incentives for homeowners as a strategy to increase infill development in existing neighborhoods; it should be noted that the City has already streamlined the additional dwelling unit (ADU) permit process pursuant to State law, but the process could be further simplified, or additional incentives could be developed. Other participants suggested that the City create a designated office within the Planning Department that handles affordable housing permits or works with low-income builders.

- **Affordable Housing Impact Fee.** Many participants wanted the planning team to look at the City's existing affordable housing impact fee to assess whether it has been an effective strategy to provide affordable housing, or if changes should be made to ensure that the policy is working as intended. Many participants wanted to see higher inclusionary requirements, and several participants wanted to see the policy modified to get rid of the impact fee all together, replacing the fee with more stringent on-site affordable housing requirements.
- **Transportation.** Many participants were interested in planning for transportation improvements along with new housing. Group discussions about transportation ranged from desire to see new transit-oriented development; desire to see new mixed-use development that allow people to walk to daily needs; incorporating active transportation improvements such as bike lanes; and transit improvements such as a shuttle system to enable more frequent connections within Oakland to key destinations and BART from neighborhoods; and the pros and cons of reducing parking requirements in new residential developments.
- **Inclusive Community Engagement.** Participants across groups stressed the importance of including all Oaklanders, including members of vulnerable communities, in the planning process. Participants noted the need for the City to be sensitive to trauma that some residents face due to housing affordability and accessibility, as well as take the time to build in accountability and trust in the planning process.

BREAKOUT GROUP SUMMARIES

Group 1

- Group 1's discussion focused on incentivizing homeowners to add ADUs to their property. Suggested strategies included rezoning and enforcing density changes; ensuring that new affordable housing is habitable; and pursuing funding sources, including State and federal programs, that will not only finance new housing construction but also invest in local workers/communities.
- Group members expressed desire to see climate resilient housing that is co-located with transit and allows residents to walk to daily needs.
- Group 1 also discussed the City's existing inclusionary housing impact fees and vacant land taxes; some members wanted to update these policies so that private builders

are required to build affordable units in their projects (rather than pay a fee), and tax vacant rental units so that apartments do not sit empty.

Group 2

- Group 2 was in consensus that housing the unhoused is a top priority. The discussion focused on financing strategies for affordable housing – the group expressed that strategies such as community land trusts and Measure KK are great, but the financing process for both these sources should be more straightforward and have a shorter timeline. Suggestions included creating a separate affordable housing department within the Planning Department, and continuing to allow high-rate homes to generate transfer tax funds.
- Group 2 also discussed the intended and unintended consequences of upzoning built-out neighborhoods like Rockridge – how can the Housing Element create more housing opportunities without displacing existing tenants? Group members expressed that improving access to legal counseling for tenants and strengthening enforcement of negligent or abusive landlords is critical.

Group 3

- Group 3 participants were interested in promoting both affordable housing rental and ownership opportunities, given that ownership models allow residents to have a stake in the community and help to reduce displacement pressures. The group discussed innovative methods of supporting and financing affordable housing, including community land trusts and sweat equity approaches (like Habitat for Humanity). Participants noted the importance of allowing homeowners to build equity through these approaches, as well as the need to create tools (such as affordable housing overlays and density bonuses, both of which would incentivize affordable development and disincentivize market-rate) that let non-profit developers compete for sites against for-profit developers.
- Housing options for unhoused people was a priority. Participants noted the importance of wrap-around services and allowing more flexible building types and solutions like temporary units, RVs, tiny homes, manufactured housing, and safe parking zones.

Group 4

- Group 4 discussed how the Housing Element could help address growing wealth inequality by creating mixed-income neighborhoods, adding housing in exclusionary high-income neighborhoods, meeting low- and moderate-income RHNA targets so that Oakland does not lose its middle class, and preventing speculation/subsequent gentrification.
- Group 4 was very supportive of transit-oriented development but wanted to ensure that this type of housing would be affordable and not spur gentrification (particularly in areas where there is BART access, such as Fruitvale), perhaps by requiring higher

amounts of affordable units in areas that are susceptible to displacement than in areas that have undergone advanced gentrification or are exclusive.

- Some participants in Group 4 wanted to see inclusionary and impact fees increased, and for the planning team to look at opportunities for converting underutilized commercial areas and empty lots into housing. Group members also suggested a separate City department for nonprofit-led building projects.

Group 5

- Group 5's discussion primarily centered around strategies to make the housing production process as easy as possible, "cutting red tape" or reducing bureaucratic obstacles where feasible. Suggestions included streamlining the development and permitting process through zoning changes (i.e., form-based codes, simplified CEQA compliance, more staffing at the Planning Department to reduce permit approval times, gleaning lessons from Singapore and Switzerland's social housing models, and allowing more creative housing solutions such as shared housing.
- Group 5 also discussed the need for more housing for special needs groups such as older adults/seniors, unhoused people, and families.

Group 6

- Group 6 had a range of priorities, including planning for housing at all affordability levels; building in accountability measures to ensure that RHNA targets are met for all income levels, given that the City did not meet its low- or moderate-income targets in the last Housing Element cycle; supporting low-income/grassroots builders, such as POOR magazine (an association of currently and formerly unhoused individuals and allies); focusing new housing on infill sites; and providing more/better-funded services for people experiencing homelessness.
- Other discussion topics included balancing the production of new housing with tenant protections; rethinking how the City taxes vacant land and properties; ensuring that planning efforts for housing, transportation, and environmental justice are cohesive and synergistic; and incorporating more opportunities for community-led planning throughout the Housing Element update process.

Appendix A: Breakout Group Facilitator Notes

GROUP 1 FACILITATORS – ALISON MOORE AND LAKSHMI RAJAGOPALAN

Key Takeaways

- Important strategies include ADU incentives for homeowners (will look into and email the group)
- Other strategies will include study of rezoning citywide, adding in the hills, and enforcement of density changes.
- Private sector paying for development, vacancy tax for rental units.
- Supportive senate bills like SB35 and SB330
- Look at project laborer agreements as and local hire way to keep money in the City.
- Future is vertical- land is limited.
- Housing habitability and dense, affordable, climate resilient housing is a concern.
- Ways to be transparent and inclusive of groups that may be interested in attending stakeholder meetings, as everyone is a stakeholder

Participant 1- 20 year employee of the city, planning public works and transportation. Know a lot about zoning and policy, and how we've mistreated people. We need radical changes and won't let it go.

Participant 2- works for city attorney's office, advises code enforcement, tenant attorney before. Listening in to hear the community. Concern: people are trying to build housing for unhoused community quickly, sometimes without permits, concerns about reducing habitability standards that tenant orgs have worked to put in place. All landlords have tendency to fall to lowest floor for habitability.

Participant 3 - community organizer at save the day- interested in advocating for dense, affordable, and climate resilient housing throughout this process. From climate resiliency standpoint.

Participant 4- new to this conversation- Oakland resident, born and raised. Curious to learn more about incentives to homeowners that have space on their lots that would be open to building an additional unit and ADU.

Participant 5- wanted to clarify- unions don't provide modular construction- many are, a cheaper form of construction. Is getting better. Being constructed within san Francisco- high demand for it, that they are expanding.

What are some of the programs or actions the city can take to build more housing?

Participant 4- curious about the presentation where they mentioned lower than average density levels in east Oakland. Are any incentives made available to property owners who live in that area, who might be willing to have additional units go into their homes, or even ADUs?

Staff- the city adopted ADU regulations, and has streamlined process at the counter, so it should not take as long as a multifamily building.

Participant 4: Older people with larger lots may not necessarily have money to do that on their own. Are there ADU incentives?

Participant 1: people need to be forced to build, especially those in the Hills. Also have to look at rezoning entire areas of the city- as part of phase 2 process, including rezoning or upzoning to allow for missing middle housing. Anywhere from 2-10 units. Looking at this throughout the City. Should look at residential hillside zones as part of this.

Participant 2: new construction is not rent controlled under state law, many people are advocating for getting state to rescind Costa Hawkins law that prohibits new construction from being rent controlled. ADUs are only part of the answer, if they aren't newly constructed, they wont be under rent control.

Participant 5: The future is vertical- they are not making any more land. Look at how major cities have developed, like in Europe or Asia. The City has already increased density bonus initiatives using new state laws- allowing more height, reducing or eliminating parking.

New requirement where BART properties have new height/density requirements. Also increased heights or densities in specific plan areas.

Any pros and cons to increased height?

Participant 5: As you get more dense, more traffic and congestion- need to improve transportation and infrastructure around it. Also needs to be more local retail, so people can walk to the grocery store, without having to use a vehicle, more bike lanes. Blocking sun, park spaces.

Staff- Council has directed staff to look at fourplexes or middle housing in single family neighborhoods and more flexible ADU requirements. Is there anything else that should be included?

Participant 1: One of the main policies that need to be included in the element- enforcement of these density changes. If we're going to say missing middle needs to go in, do study of every parcel that can accommodate. Say here's your opportunity. Enforcement of policy. Means staff. Need staff to adopt radical ideas. Push an uphill battle against market forces.

Participant 3 :Save the Bay- climate resilience, as it relates to housing. Organization advocates for transit oriented housing, and urban green infrastructure.

How will these projects be financed? Implementing affordable housing impact fee, home funds to cover permitting cost, make city owned land available for affordable housing, huge gap. What are some other ways that you may know of.

Participant 5: Senate bills that talk about that, SB35 and SB330. Limits how much city council can push affordable housing forward. SNOFA, programs through HUD, just have to be utilized.

SB35 requires skills and training. Helps with funding. Also looking at local hire policies, with PLA (project laborer agreement), money back into city itself. Keeping local money within the city itself.

Participant 1: So much leakage going outside of Oakland. A lot of public based support- paying for whatever the state decides to give us, making our case. Housing people cobbling 9 different loan sources. Things to be done about that. One is we need to demand private sector kick in- they benefit from growth. Impact fee that they can pay and get off without having to build is ridiculous- need to double or triple, build many more units. Need to have inclusionary zoning so they are buying units.

Way to ban land grabs- Moms for housing, took a house that has been vacant for years in west Oakland and made it habitable. Company that had done speculative investment fought that. Get more money for it.

Existing vacant land tax that is regressive. Applies to single family homes and condos, but doesn't apply to rental units. Building that as multiple units- doesn't apply to, something that SF is looking at, but haven't seen it proposed for Oakland, and thought it was an interesting idea. Pushing people to put units back on the market. If we have vacancy tax, also need cap on sales price. Force people into selling, and then that will be selling just a bit earlier than they would otherwise.

Other groups to consider and reach out to?

Participant 1: Can't know who we need to reach out to. Don't' know how they're being noticed. Want to know more about groups. Community organizations that are missing, have the option to add those.

Group 2 Facilitator – Lauren Pepe

Key Themes

- Better financing for affordable housing: Need more options and the financing needs to be more straightforward with shorter timeline
- Community Land Trust process and Measure KK funding mechanism are great but can be streamlined and improved
- If we up-zone built-out neighborhoods like Rockridge, how do we protect existing tenants from their existing dwellings being converted into higher-density buildings?

Ideas to explore in next workshop

- Vacancy tax- but does Oakland have property registry?
- Landlords who violate laws or leave property in disrepair should be held accountable
- Get rid of evictors, agents of landlords, who benefit from eviction mill

- Make sure residents have legal tools to defend themselves
- Yearly rental increase cap of 2% might prevent landlords who push residents out to get better rate

Other things to consider

- City makes a lot of money from transfer tax when properties are sold so higher-rate homes are in its best interest
- Create separate dept for affordable housing with different rules/regulations/resources to truly service for people trying to create solutions for themselves

More details/Rest of the notes

Participants and Their Top Issues:

Participant 1: Housing the unhoused, displaced, and low-income first

Participant 2: Homelessness

Participant 3: Equity in housing

Participant 4: Ensuring more types of housing at different income levels in high-resource neighborhoods (like Rockridge)

Stacking different tax credits for affordable housing can be a cumbersome process; for market rate in contrast, you just get a loan. Perhaps bank financing or investment funds for affordable housing?

Participant lives in land trust and received measure KK funding. Challenges: difficult to navigate requirements that come with funding; secured property by making former owner accountable- reported issues- slow process; $40,000 in fees related to landlord neglect will come out funding; program needs to be streamlined and reevaluated; residents eligible for tax abatement only if all residents meet certain income requirement.

Rockridge seems like an ideal place to build more housing, but issues:

- High cost of land so likely means market rate
- Few opportunity sites
- Business district needs to be supported
- Protect existing tenants- can't use existing buildings to rebuild
- Splitting lots is not something all property owners have time/money/knowledge to do
- Not many duplexes even though it is zoned for that

Ensure affordable housing not built near freeways and other environments that are unhealthy; types of businesses contribute negatively to environment as well (such as smog check businesses)

GROUP 3 FACILITATORS – MATT ALVAREZ-NISSEN AND RAJEEV BHATIA

Key Takeaways

- Participants were interested in promoting affordable housing, including both rental as well as ownership. Ownership models allow residents to have a stake in the community and helps to reduce displacement pressures.
- Housing options for unhoused people was a priority. Participants noted the importance of wrap-around services, and allowing more flexible building types and solutions like temporary units, RVs, tiny homes, manufactured housing, and safe parking zones.
- Innovative methods of supporting and financing affordable housing were discussed, including community land trusts and sweat equity approaches (like Habitat for Humanity). Participants noted the importance of allowing homeowners to build equity through these approaches.
- Participants emphasized the need to create tools that let non-profit developers compete for sites against for-profit developers – tools including affordable housing overlays and density bonuses, both of which would incentivize affordable development and disincentivize market-rate.
- A need for affordable housing near transit was also discussed, however it was noted that transit is not sufficient enough in the city (especially to support reduced parking requirements). One suggestion was to implement a shuttle system similar to Emeryville's.

Detailed Notes by Question

Participants were asked Question #1 as part of the initial round robin, and then prompted on some of the key issues discussed. The rest of the conversation focused on Question #2. Questions #3 through #5 are provided for context.

Question #1 – What housing issues are important to you?

- More affordability
- Affordable homeownership is possible (community land trusts, Habitat for Humanity, etc.), City focuses too much on affordable rental. Ownership will help reduce displacement pressures.
- Pay attention to the unhoused population
- RHNA process is important to get more housing built, wants to see more housing at every income level

Affordable Housing?

- Trying to promote affordable housing in Rockridge, but land costs make it very difficult
- Land trusts are a good approach, since they keep land costs down. They have worked in East and West Oakland. Participants support land trusts is there is true equity for those involved – without equity that carries on after a resident has left this is deceptive.
  - Completed homes can be purchased and placed into the trust, or vacant land can be converted. The trust is owned by a non-profit organization with a board of directors to represent the community. Land is taken out of the equation, and future changes in cost are based only on improvements (not the cost of land).
  - Discussion returned towards land trusts at the end of the group – one participant noted that the return on investment in land trusts way outpaces what a resident would have been able to acquire as a renter.
  - One participant pointed to TOPA in Berkeley, which provides no equity for tenants. They would hate to see the same thing in Oakland, which would create two classes of people considered homeowners.
  - One participant noted that if there is a TOPA or land trust in Oakland it needs to be more than rental, and needs to have some equity (although it may have to be limited equity).

Unhoused Population?

- Participants are here looking for solutions
- Need for wrap-around solutions for homeless housing. Some people are fine with just housing, but other people need longer-term help.
- City is in the process of allowing more types of temporary units, like RVs, tiny homes, etc. on property that was previously excluded.
- City should look at manufactured housing to see if there are any barriers in City regulation.
- Some concerns about union opposition to this building type.
- Need to increase the number of units that can be developed quickly, even if temporary. There are immediate housing needs to be met. The city still needs to build more permanent buildings, but it takes a long time to get this done. Need to facilitate temporary housing in the short run, and treat people like human beings until the permanent housing gets built.
- Safe parking zones for those living in their cars.

Question #2 – What are your thoughts on programs and actions to build more housing, including impacts (pros and cons) of: Raising heights and densities to allow for more housing

, Restrictions on amount of parking to reduce housing costs, Allowing different housing options in single family neighborhoods, Ways to pay for affordable housing

- Even with higher densities and taller buildings, land costs in Oakland are so high that it often does not help make developments more affordable.
- If the non-profit sector is competing with the for-profit sector for land, the for-profit developers can always put up more money. Need to think of ways to keep the non-profit sector in the game and disincentivize for-profit developers. This applies to all parcels on the market, not just surplus public land.
  - An affordable housing overlay provides one approach. It is legal, and will make development less attractive for for-profit developers.
- The City should try to disincentivize people who buy units are investments and do not occupy them.
  - San Francisco is considering this, and Vancouver has a vacancy tax. Oakland has a vacancy tax currently, but it only applies to vacant land. The City should consider taxing vacant housing as well. In San Francisco's proposal the tax would increase year by year (although single-family residences and condos would be exempt).
- Increased density bonus incentives, even beyond what the State allows, should be considered. More bonus and more incentives for affordable housing are needed. This is similar to the affordable housing overlay, but it does not increase the basic value of the property. With a density bonus it only makes it more cost effective to build affordable housing units, not a market-rate development.
- Participants discussed the school district properties to be closed or consolidated, and that these should be considered for housing. It is unfortunate that they are closing, but the City needs to think about how to capitalize on that opportunity. A discussion of the State Surplus Land Act and its requirements also took place.
- Density and parking reductions – Oakland would need much better and more frequent transit to successfully reduce parking.
- One participant brought up Emeryville as an example of a city zoned entirely for medium density with a higher required minimum affordable percentage. Upzoning everything with higher affordable requirements is one potential approach.
  - The group discussed the history of Emeryville's development, including the need to reuse previously industrial land. Their experience with parking requirements has been very positive.
  - One participant discussed the Emeryville Go-Round, which goes everywhere in the city and takes residents directly to BART. If Oakland has something similar it would be great – although the city would need several shuttles going to most of the BART stations throughout Oakland.

- Plans for a road diet on Martin Luther King Way, potential for a bus only lane. However, infrequent service is also a major issue. Transit was disrupted by COVID, but it was bad before that too.
- One participant remarked that Oakland is not building enough housing at all income levels. Another participant disagreed and said there is enough higher-income housing.
- One participant said SB9 and SB10 were good steps in the right direction, and was disappointed that SB50 did not pass.

Zoom Chat

19:10:48 From Hope Williams to Everyone:

Hi all! I can only stay for a few minutes. Thank you!

19:18:19 From Hope Williams to Everyone:

A typical community land trust is a nonprofit run by a board, staff, and community members. The community land trust balances the interest of its residents, the broader community, and the public interest to promote wealth building, retention of public resources, and solutions for community needs.

19:19:31 From Hope Williams to Everyone:

hope@theselc.org

19:20:04 From Stuart Flashman to Everyone:

Thanks, Hope.

19:20:51 From Hope Williams to Everyone:

The thing with CLTs is that they are wildly underfunded

19:21:08 From Hope Williams to Everyone:

Small Sites Program in SF is a tale of caution and also hope

GROUP 4 FACILITATOR – LAURA KAMINSKI

- Participant 1-I lived near the lake, very concerned about the unhoused people and definitely interested in housing different levels. Taxing businesses. Parallel financing plan.
- Participant 2, work at Sustainable Economies Law Center. Realize how planning laws and building codes get in th way of the process. Concerned will have a Housing element on a tight timeline.

- Participant 3, had no fault eviction in san Francisco. Want to look at racial impacts. Want to also meet low and moderate income housing so have middle class. Strategies of how to keep our black community here and stop gentrification.
- Participant 4 lives in Rockridge, lived in Chicago. I am here in the YIMBY movement. Grew up in California as a NIMBY to save land, but now realize can build up. Mixed income is very important. I work in educational video games, we are building all of this technology, pushing on all of this front and we are losing all this part of people who don't have access to technology. How are we supporting the low income. We are separating the bottom and the top and Oakland's segregation is increasing, this is scary to me.
- Participant 5, live in Oakland for 3 years and a volunteer for YIMBY, want more housing in areas that have been exclusionary in the past and are by BART Stations.
- Participant 6 for assembly member Bonta, want to hear what the community is saying.

Participant 3 – upzone Rockridge and Montclair. We want transit-oriented development, we should have affordable housing near transit so they can get around. If at Fruitvale adding more density, how do you not have a speculative market, had that in the Mission in San Francisco.

Participant 4 – prevention of development made it harder to be there.

Participant 5 – focusing development along the wealthier neighborhoods.

Participant 3 – increasing inclusionary and impact fees, using underutilized commercial for housing. Big problem is church and empty lot properties that are not being used.

Participant 2 – heard we don't have control over this and that, market forces. One of biggest problems is people buying up land and houses. City should look at its ability to manage absentee ownership. Oakland has more power to control the market and access to funds. Transfer taxes for expensive housing. Last year there was a bill that increasing the penalties for a City not meeting the deadlines for the Housing Element. When we think of what can we do ourselves, Homefulness, we should be rolling out the red carpet for them. City creates these barriers.

Participant 3 – very creative use of development services fund in San Francisco. Jamie Samabatu in San Francisco to check on how they are doing that. Waiving of permit fees. Landlord's gets charged a fee for an annual inspection, can be more flexible many for use of that money

Participant 1 - Can developers be required to pay into an anti-displacement fund to pay for legal services for tenants. Also look at increasing impact fees.

Zoom Chat

19:20:11 From *Laura Kaminski to Everyone:

What housing issues are important to you?

19:20:37 From *Laura Kaminski to Everyone:

What are your thoughts on programs and actions to build more housing, including impacts (pros and cons)

19:21:11 From *Laura Kaminski to Everyone:

Raising heights and densities to allow for more housing

19:21:34 From *Laura Kaminski to Everyone:

Restrictions on amount of parking to reduce housing costs

19:21:53 From *Laura Kaminski to Everyone:

Allowing different housing options in single-family neighborhoods

19:22:23 From Bobbi Barbara Lopez to Everyone:

But if you give a developer a break, there needs to be a value capture-more density, more affordability. The problem is up zoning without affordability in low income neighborhoods leads to displacement of Black and Brown folks.

19:22:31 From *Laura Kaminski to Everyone:

What other things do you think will make a difference in Oakland's ability to encourage more housing, especially affordable housing?

19:25:57 From Bobbi Barbara Lopez to Everyone:

You develop, but with more affordability requirements

19:26:05 From Bobbi Barbara Lopez to Everyone:

Treat different areas differently.

19:26:14 From Bobbi Barbara Lopez to Everyone:

https://www.urbandisplacement.org/maps/sf-bay-area-gentrification-and-displacement/

19:26:50 From Bobbi Barbara Lopez to Everyone:

I think looking at the Urban Displacement Project mapping and thinking of zoning that way.

19:27:27 From Bobbi Barbara Lopez to Everyone:

Higher affordability in areas "susceptible to displacement," while lower requirements in areas that are in advanced gentrification or exclusive…

19:30:29 From Bobbi Barbara Lopez to Everyone:

Also allowing church/religious property to become housing

19:30:41 From Bobbi Barbara Lopez to Everyone:

We have a massive empty lot near my house.

19:33:06 From Bobbi Barbara Lopez to Everyone:

TOPA!!!

19:34:13 From Bobbi Barbara Lopez to Everyone:

Or even an EIFD would be legislative.

19:34:21 From Bobbi Barbara Lopez to Everyone:

Not even a need to do a Go Bond.

19:46:24 From Janelle Orsi to Everyone:

Can we create a totally separate Planning & Building department just for grassroots and nonprofit-led building projects? It could have totally different funding, different staff with training about the particular needs of such projects, and trauma-informed training to be sensitive to the needs of people with housing insecurity.

19:46:54 From Bobbi Barbara Lopez to Everyone:

Jamie Sanbonmatsu

19:47:19 From Sid Kapur to Everyone:

I have to leave a bit early. Thanks Laura for moderating, this was a really interesting conversation!

19:49:31 From Bobbi Barbara Lopez to Everyone:

Could you do a two tier fee system? One for projects of at least 50% affordable, one for less than 50% market?

GROUP 5 FACILITATORS – DIANA PEREZ AND ALICIA PARKER

- Participant 1 – Lives in assisted living, skilled nursing facility. I would love for all seniors in Oakland to have the support she has, regardless of income. Affordable housing development issues. Wealth of knowledge in the community to help advise the City. Commission on aging. Financing is very complex – someone
- Participant 2 – salvation army. Housing homeless families. Developer + finding contractor for putting up housing; raise money. The very important need to put housing as inexpensively as possible. We take care of people on the streets. Without regular builders who are incorporating low-income housing in their buildings + CEQA is an issue.
- Participant 3 – Oakland Heritage Alliance. Advocate for reusing existing buildings. Converting existing buildings that are underutilized. More cost effective to use existing building – Historical building code can.
- Participant 4 – Dimond District. Raising two boys. People living on the streets – why do we allow them. People are being pushed into homelessness. I want the city to build more homes. Diamond is commercial corridor, well-served by transit – allow zoning changes for.
- Participant 5 – Oakland needs to build housing at all income levels. I don't agree with some of the comments on restricting market rate. I think this puts pressure on displacement. Concerned about supply of family housing, concerned for people starting families and careers being able to stay in Oakland.
- Participant 6 – D1 resident. As a city we build abundant, dense, inclusive housing. Getting to interact with people from different backgrounds, our planning and regulations makes it hard to interact with people – Oakland had one of the lowest rent increases. City has been making some good changes. A lot of underutilized land. Most of Longfellow is single-family homes. To the extent that we can get the city to encourage

What are your thoughts on programs and actions to build more housing, including impacts (pros and cons) of:

Issue: Development process is too long. Streamline permitting and entitlement for new housing production. Time cost money for developers. Where can you cut the bureaucracy?

Does the state require streamlining? Where is Oakland in that process?

CEQA: The rounds of community input where lawsuits can be brought against projects // CEQA.

Broadway Valdez – this seems like a successful strategy --- new housing is going up, some preservation. Up zoning brought new production. Are there other specific areas in the city to increase density.

When Prop 13 went up taxes dried up – CEQA used to be a big source of lawsuits.

Participant 4 – very frustrated with CEQA. Supports SB 9—lot splits for single-family homes. Areas near transit need higher density. Apply parking limits/max. near transit areas.

Housing impact fee needs to be looked at closely. It's unclear where the money went.

Zoning: Limiting number of units based on lot size – in some areas some of these limits should be eliminated. Form-based standards (whatever fits in envelope). ADUS: we are not keeping up with the state. Making a broader use – going beyond state's min. requirements. City's mobile home rules are too restrictive – allow them in private property (cost effective/short-term housing strategy). House boats- is the housing looking at possibility of looking at some of these strategies? Be cautious about upzoning, because it's difficult to downzone. Be targeted with upzoning (form based code)

A lot of decions are made at the city – move to hyper local approval – zoning change could be made by block – incensitve people to paritciapte in these meetings. The burden of proving no harm is on person

Participant 4 – Social housing is not going to be the solution; Singapore and Switserland -- lease on house. People can save money. Mixed income social housing; following Singapore and switserland. Planning department needs more money; they don't have the time to look through all applications. Over one-month over due for pre-approval.

Current zoning rule that limits the number of kitchens – one way the city defines a regular housing unit – get rid of this to encourage shared housing or other innovative housing types.

Participant 3 – Some cities will contract out permit processing to consultants, to process applications very quickly. Another possibility to allow overtime plan checking.

- Some strategies included x, y, and z.
  - Form-Based codes and standards to increase the number of housing units that can be built on a lot.
  - Making sure that we're building the type of housing needed for families.
  - Building more housing around transit corridors.
  - Making it as inexpensive as possible to build housing – cutting red tape wherever possible.
  - Getting rid of the one-kitchen rule to allow for more creative housing solutions – such as shared housing.
  - Preserving existing affordable units, and also converting vacant buildings.
- Issues and concerns included x, y, and z.
  - Making sure that seniors at all income levels have access to safe, affordable and supportive housing options.
  - Housing the unhoused.

  - The cost of building affordable housing and how long it takes to entitle and permit housing.
- Other ideas for promoting affordable housing included x, y, z
  - Affordable Housing Zoning Overlay – areas of the city where streamlining affordable housing would be possible.
- Strategies to prevent displacement included x, y, z.
  - Looking at Singapore and Switzerland to see how they are implementing a social housing model; and bringing lessons learn for a social housing approach in Oakland.
  - Being very careful with up-zoning to prevent displacement due to increased land values.
  - Going beyond the state's incentives for ADUs – making sure,
- Other topics of importance include x, y, z.
  - Taking a close look at the impact fee – re-thinking whether this is an effective strategy to provide affordable housing.

GROUP 6 FACILITATOR – DANIEL FINDLEY

Participant 1:
- Policies to this point have been a failure- is wary of these discussions
- "ludicrous policies" set by the City e.g., city required Poor Magazine to build parking spaces for which there is no use which delayed move in for tenants.
- Conversations that she's had with the city acknowledged that some policies don't make sense. Takeaway message: "nice to talk to the community but the bottom line is these meetings and processes are inaccessible. Not much faith until I see that the city has approved policies that support low-income builders (like Poor Magazine)
- All conversations seem to be limited to market rate builders. City should impose fees on developers who can afford it, not on organizations like POOR.
- Oakland Homeless Advisory Committee seems useless.
- A solution is prioritizing construction of housing for low-income builders and building a supportive infrastructure for this. Improve the communication between Planning & Building departments

Participant 2 (city employee and Challenge Grant Fellow)
- City has never been able to create space for the unhoused and black and brown communities.
- What is the usefulness of the Housing Element?

- Staff should consider having a housing professional share the actions needed to build housing such that the unhoused are housed and people can remain in their housing. As we're building new housing, ensure that we're maintaining tenant protections
- Increase the advocacy efforts on behalf of the city
- Re-think how city taxes vacant land and properties

Participant 3
- The General Plan Update process is fragmented. Housing and transportation are intertwined. Environmental justice is intertwined with Housing and transportation.

Participant 4
- Generally, aligns with group feedback. Need to focus on infill and is surprised to see vacant and underutilized areas.
- Appreciates advocacy done for housing
- Housing at all affordability levels

Participant 5
- Resident of Eastlake. Why did Oakland miss the mark of housing goals? Do we have a sense of why Oakland missed the mark and what are the accountability measures to not miss the mark moving forward.

Participant 6
- Have there been any considerations of adding community partners that support groups that work for the unhoused? City should consider a resource fair for residents who need education on their options for offload their properties

Participant 7 (East Bay Housing Organizations)
- Housing goals are simply goals; Alameda County can dictate use of its own funds.
- Sees discrepancies of homelessness between SL and Oakland.
- Need a census of how much housing is needed and the services that people need.
- Need for triage of homeless individuals so that we understand the reasons for homelessness. *Homeless aren't living, but simply existing*
- Would rather see public sites such as OPD and County Jail become potential sites for housing

Appendix B: Zoom Chat

18:09:04 From WILLIE E STEVENS to Everyone:

I don't have that icode

18:10:17 From POOR Magazine to Everyone:

I don’t see public comment ?

18:12:20 From Ms. Omowale Fowles to Everyone:

I do not see the language

18:12:21 From Bridget Cervelli to Everyone:

I think public comment is the q&a section in the middle of the agenda- don’t know, just guessing

18:12:50 From *Rajeev Bhatia, Dyett & Bhatia to Everyone:

If you’re joining late, please select language from globe icon on your screen (on the bottom right). You have to select English as well.

18:12:53 From Casey Farmer to Everyone:

Can these slides (and the ones from the last workshop) please be posted or sent to attendees?

18:12:54 From Hazel O'Neil, Dyett & Bhatia to Everyone:

There is a globe icon labelled “interpretation” next to the reactions icon at the bottom of zoom screens

18:13:17 From Khalilha Haynes to Everyone:

Please check the bottom of the screen next to live transcript for interepretation.

18:14:11 From Khalilha Haynes to Hazel O'Neil, Dyett & Bhatia(Direct Message):

hi, could you make me a co-host please

18:14:15 From Gary Barg to Everyone:

What exactly is ‘environmental justice”?

18:14:35 From Iris Starr to Everyone:

How can Environmental Justice be “optionally” integrated??? It s/b a baseline contribution to the Plan, also with the infrastructure study going on

18:15:19 From *Laura Kaminski to Everyone:

It can ether be a stand alone element or integrated into all of the elements

18:15:36 From *Laura Kaminski to Everyone:

That is what State Law states

18:15:41 From *Diana Perez, City of Oakland to Everyone:

@Gary Low-income communities and communities of color often bear a disproportionate burden of pollution and associated health risks. Environmental justice seeks to correct this inequity by reducing the pollution experienced by these communities and ensuring their input is considered in decisions that affect them. "Environmental justice" is defined in California law as the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation, and enforcement of environmental laws, regulations, and policies.

18:16:05 From Iris Starr to Everyone:

Yes, so why isn't it definitely integrated?

18:16:16 From Gary Barg to Everyone:

Thanks for the definition!

18:16:17 From Iris Starr to Everyone:

It must be

18:16:35 From Sangeeta Sarkar to Everyone:

What is the timeline for the Equity Working Group?

18:16:45 From *Khalilha Haynes, City of Oakland to Everyone:

The EJ Element is a part of the General Plan.

18:16:58 From Iris Starr to Everyone:

It's hard to take this slide seriously. Is this a Housing Element Party?

18:17:24 From Mattie Scott to Everyone:

Mattie Scott, Vice-Chair of the Commission on Aging: Why is youth engagement included but no senior engagement?

18:17:58 From Hope Williams to Everyone:

Just curious. How many pop-ups events?

18:18:49 From *Khalilha Haynes, City of Oakland to Everyone:

Seniors are a part of our targeted outreach.

18:18:59 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

The Equity Working Group (EWG) recruitment just closed last week. The EWG meetings will be structured around key general plan milestones

18:19:07 From Iris Starr to Everyone:

Clearly staff intends to separate the Housing and Environmental Justice Elements even though it is imperative that they be developed together.

18:19:37 From Sangeeta Sarkar to Everyone:

Thank you Lakshmi!

18:19:43 From *Rajeev Bhatia, Dyett & Bhatia to Everyone:

Thank you for your questions and comments here. Please also note that will be opportunity for live questions and answers right after the presentation.

18:20:03 From Mattie Scott to Everyone:

We'd b interested in hearing more about how you are targeting seniors, and we are happy to help. Have you used the Senior Centers for reaching seniors?

18:20:42 From Liana Molina to Everyone:

May someone on the team pls drop the link where we can access these meeting notes, slide decks and materials? Thanks!

18:21:07 From Hope Williams to Everyone:

Sorry to do a throwback. 44% declined to comment. That's a lot!

18:21:09 From *Khalilha Haynes, City of Oakland to Everyone:

https://www.oaklandca.gov/topics/meetings-and-events#past-events-and-meeting

18:21:09 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

https://www.oaklandca.gov/topics/general-plan-update#community-events-and-public-meetings

18:21:10 From Iris Starr to Everyone:

Rajeev, call on POOR Magazine

18:22:02 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

We will be reaching out to senior centers. Thank you for your input.

18:22:11 From Iris Starr to Everyone:

No where am I seeing mention of talking to unhoused people, or asking them what they need and know.

18:24:11 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

The Deeply Rooted Collaborative engagement also includes reaching out to unhoused people

18:25:13 From Janelle Orsi to Everyone:

That's a lot of housing for rich people.

18:25:14 From Christopher Norman to Everyone:

It is unacceptable that we did not meet any targets for moderate, low, and very-low income housing. That *needs* to be the focus for this housing element update.

18:25:29 From Christine Hernandez to Everyone:

^^^^^^^

18:25:41 From Iris Starr to Everyone:

Who is the DRC reaching to, exactly?

18:25:43 From Hazel O'Neil, Dyett & Bhatia to *Lakshmi Rajagopalan, City of Oakland(Direct Message):

Ok

18:26:06 From Christine Hernandez to Everyone:

It is unacceptable that we did not meet any targets for moderate, low, and very-low income housing. That *needs* to be the focus for this housing element update.

18:26:09 From Iris Starr to Everyone:

^^^ Chris Norman and Janelle Orsi

18:26:25 From Raul Maldonado to Everyone:

Can you go back to the last slide, on the graph for RHNA

18:26:45 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

working class communities, communities of color, unhoused folks, formerly incarcerated folks, youth, undocumented folks, and folks who are experiencing environmental injustices.

18:26:58 From Iris Starr to Everyone:

CN - and we have a 66% increase in Unhoused!!!

18:27:15 From Bradley Cleveland to Everyone:

You identify housing sites in this element. Shouldn't the mitigate the problem: "Competition over limited sites," because sites aren't limited?

18:27:54 From Liana Molina to Everyone:

Please email registrants the slide decks from these mtgs when you have a chance.

18:27:57 From Megan Nguyen to Everyone:

The prioritization of affordable housing is particularly important in light of the CIty consistently exceeding its RHNA targets for market rate housing while falling far short of its affordable housing goals, as evidenced by a ratio of 9.5 market-rate units for every 1 affordable unit

18:28:17 From Christopher Norman to Everyone:

Not only did we not meet the RHNA goals, but we desperately failed to meet the needs of residents who need housing most. I understand that there are financing challenges, but this is where we need to advocate at the state and federal levels for more funds.

18:28:22 From *Laura Kaminski to Everyone:

We can post the slides on the website

18:28:22 From Janelle Orsi to Everyone:

In our experience, obstructive city policy and bureaucracy has been a big barrier to community groups building housing for themselves, which is why some of are here and waiting to know if the City is ready to look at adopting radically different approaches to supporting housing needs. (I work for Sustainable Economies Law Center which provides legal support to local land and housing projects)

18:28:44 From POOR Magazine to Everyone:

All the things the City said it did for outreach is what we do EVERY week in

18:28:48 From Christine Hernandez to Everyone:

The homeless population has jumped by 63% since 2017 in Oakland, where the median house sales price is about $750,000. There are about 4,000 homeless people — many of them living in at least 140 encampments of tents and RVs.

18:28:48 From POOR Magazine to Everyone:

Sliding

18:28:50 From Iris Starr to Everyone:

Stop supporting market rate housing in any way until our unhoused people are living in adequate homes.

18:28:54 From Bobbi Barbara Lopez to Everyone:

Fell short of meeting its affordable housing by a tremendous amount. Oakland met 174% of its market rate, but only 22% met for affordable housing-only 1,506 units of the state goal of 5,443 it was supposed to create for working people according to your own reports. I don't see the political will to do so from this administration. It won't even implement it's 2018 public lands policy.

18:29:09 From Christopher Norman to Everyone:

*** As mentioned at the last community meeting, we need a study to determine whether impact fees or inclusionary zoning will result in more affordable and deeply affordable units actually being built.

18:29:21 From POOR Magazine to Everyone:

SLIDING SALE CAFE in deep east Huchuin - oakland

18:29:26 From Bridget Cervelli to Everyone:

Housing unhoused people whose lives are in danger every day should be priority #1 period.

18:30:01 From Iris Starr to Everyone:

And 4000 vacant units available in the City. Most owned by speculators.

18:30:49 From POOR Magazine to Everyone:

Homefulness is DEEPLY Rooted Outreach and homeless peoples solution to homelessness- 82nd and MacArthur

18:30:54 From Iris Starr to Everyone:

4000 unhoused, 4000 units available if we make policy changes to help Oaklanders

18:31:00 From Janelle Orsi to Everyone:

In the last Housing Element, the City said it would take 131 Actions to meet housing needs. We're making a slideshow to learn about them here: https://bit.ly/3uY1ReJ

18:31:40 From Christopher Norman to Everyone:

While we need to increase density to meet the need, any upzoning or development *MUST* come with additional tenant protections to ensure current residents are not displaced.

18:31:55 From Preeti S to Everyone:

Does the Housing element provide guidance on how much affordable housing is needed in the city? And will this then translate into some kind of affordability requirement policy update by the city?

18:32:01 From Phyllis Horneman to Everyone:

Where can I get information on the 4000 vacant units?

18:32:09 From Christine Hernandez to Everyone:

The City of Oakland didn't fail to plan… so why did the City of Oakland plan to fail… our Black, Brown, Native and low income communities and why should we trust you now. THIS PROCESS DOESN"T ALLOW FOR REAL COMMUNITY ENGAGEMENT!!

18:32:34 From Christine Hernandez to Everyone:

Yes! I want the list of vacant units!!!!!!!!!

18:32:49 From Sean Golden to Everyone:

Has Oakland opted into SB10?

18:33:10 From Hope Williams to Everyone:

I was already worried about SB 9 and 10. It feels like it puts the onus on the tenants to organize to secure affordable housing.

18:33:31 From Iris Starr to Everyone:

The policies in the existing element have largely not been implemented! The past 5 years' "accomplishments" have done little to change people's circumstances.

There was a noted 47% increase in homelessness in a two-year period during this "time of change", totaling over 4,000 people. The dramatic increase, per the report, "demanded a refocus on strategies, resource allocation, and timing."

18:34:34 From Phyllis Horneman to Everyone:

Reducing parking means transit has to be good enough to make this work

18:34:47 From POOR Magazine to Everyone:

We were blocked from opening at Homefulness - even tho its right down the street from a "transit" center - and we have heard that other places are being approved without Parking

18:35:11 From Iris Starr to Everyone:

The Planners and Housing Department people have failed Oakland. We see what has resulted from existing work:

Dramatically increased homelessness and encampments

131 "actions" with virtually no results (not meeting the numbers for affordable housing and instead prioritizing market rate/corporations)

Failure to engage the community and listen.

Not asking the people who are suffering.

Dismissive and sabotaging of local community participation

Not listening, representing profiteers

Obstructing solutions brought by people who know what they need

18:35:11 From Bridget Cervelli to Everyone:

Here is a blueprint of how City policies functioned to sabotage the construction of FREE housing (Homefulness) by POOR Magazine, an organization of poor and unhoused community members in East Oakland: https://docs.google.com/document/d/196wyCPc6A63n-Rj2v44NiWmAwzDcjY-tbTK8f9irlTI/edit?usp=sharing

18:35:13 From Janelle Orsi to Everyone:

We've learned that so many of these incentives and opportunities are practically impossible for grassroots groups to take advantage of in building housing.

18:35:44 From Bridget Cervelli to Everyone:

^^And the city does nothing to let low income builders know they are even available

18:36:15 From Janelle Orsi to Everyone:

Homefulness was obstructed from letting unhoused people move into their units because of parking requirements: “Maybe you shouldn’t be building this project…” Is the City of Oakland Really Doing All They Can To Create Affordable Housing? https://www.poormagazine.org/node/6164

18:36:20 From Sid Kapur to Everyone:

Can you go back to the parking slide? It went back kind of fast

18:36:25 From Sid Kapur to Everyone:

went by*

18:36:27 From Preeti S to Everyone:

Oakland needs to increase its minimum affordability requirements for housing projects and not allow market-rate developers to get away with paying in-lieu fees instead.

18:36:38 From *Khalilha Haynes, City of Oakland to Everyone:

Hi all, we're monitoring all the questions in the chat and are responding to all questions for clarification. Some questions require a deeper answer and will be answered in a follow-up FAQ.

18:36:39 From *Diana Perez, City of Oakland to Everyone:

Thank you for all your excellent questions! Any question we're not able to answer today, we will answering through a Q&A after the meeting.

18:36:46 From Christine Hernandez to Everyone:

The City can get out of the way when we create our solutions. They can support instead of sabotage.

18:37:06 From Raul Maldonado to Everyone:

Love that <3

18:37:20 From Bridget Cervelli to Everyone:

Here is a blueprint of how City policies functioned to sabotage the construction of FREE housing (Homefulness) by POOR Magazine, an organization of poor and unhoused community members in East Oakland:

https://docs.google.com/document/d/196wyCPc6A63n-Rj2v44NiWmAwzDcjY-tbTK8f9irlTI/edit?usp=sharing

18:39:18 From Christine Hernandez to Everyone:

All the while the City paves the way for developers who are pricing us all out!!

18:40:15 From Janelle Orsi to Everyone:

When we take a closer look at the 131 Actions the City said it would take, they are such weak and ineffective actions. Things that sound good have not turned out to be helpful in practice: https://bit.ly/3uY1ReJ

18:40:25 From Iris Starr to Everyone:

Let people talk, answer/justify later

18:41:01 From Iris Starr to Everyone:

When we take a closer look at the 131 Actions the City said it would take, they are such weak and ineffective actions. Things that sound good have not turned out to be helpful in practice: https://bit.ly/3uY1ReJ

18:41:56 From Christine Hernandez to Everyone:

We need a department specifically for these projects. The developers run the building and planning department. It was designed by them for them.

18:42:08 From Iris Starr to Everyone:

Bill, regulations do not need to be “reviewed” they need to be changed!

18:42:32 From POOR Magazine to Everyone:

we have

18:43:17 From POOR Magazine to Everyone:

We have Homefulness #2 and no-one is making this easier for us poor houseless and indigenous peoples build ur own solutions

18:43:22 From Christine Hernandez to Everyone:

131 Flavors of Failure!

18:43:29 From Hope Williams to Everyone:

Super educational! Thank you, Janelle. Slides laying out the Housing Element https://bit.ly/3uY1ReJ

18:43:47 From Hope Williams to Everyone:

So unfortunate that none of these have come to fruition. 😕

18:43:55 From Janelle Orsi to Everyone:

The City really needs to use its power to SHAPE those market realities.

18:44:10 From Iris Starr to Everyone:

Yes, Christine, for developers, by developers, with the collusion of the City. They get special treatment, common folks get blocked and dismissed

18:45:55 From POOR Magazine to Everyone:

WE r exhausted = from getting ready fpr permits gangsters visit tomorrow - we may not be able to stay in for breakout rooms

18:45:58 From Bobbi Barbara Lopez to Everyone:

It's unfortunately to hear what is still happening to Homefulness. I wish we could use some of Fund 2415 to waive permits for groups like these. I don't think lands trusts and groups like hopefulness should pay for permits, frankly. Other cities like SF are more expansive in their use of Development Services Fund.

18:46:35 From Christine Hernandez to Everyone:

++++++

18:46:52 From Christine Hernandez to Everyone:

++++++

18:47:04 From POOR Magazine to Everyone:

thankUUUU @christine and Bobbi and Bridget!!!!

18:47:47 From Janelle Orsi to Everyone:

Thank you, Bobbi. On that note, Homefulness worked with Rebecca Kaplan to write legislation to exempt such projects from building permit fees, but the City said it wasn't possible. It stalled out.

18:47:51 From Stuart Flashman to Everyone:

We need to DISincentivize market rate projects!

18:48:05 From Janelle Orsi to Everyone:

Bridget, thank you so much for saying all this.

18:48:29 From Iris Starr to Everyone:

Wow, bring it Bridget!

18:48:49 From Hope Williams to Everyone:

Bridget, powerful!

18:48:57 From POOR Magazine to Everyone:

City of oakland has made this building opening possible and instead is putting down concrete barricades to make people not be able to park or sleep

18:50:13 From Hope Williams to Everyone:

Thank you, Dustin!!!

18:52:15 From Iris Starr to Everyone:

YES!!! Chris Norman, spot on, where is Housing Dept???

18:52:46 From Hope Williams to Everyone:

I can't unmute

18:52:53 From Christopher Norman to Everyone:

Not meaning to call out the housing department, moreso to ask how these departments are working together

18:53:03 From Christopher Norman to Everyone:

and would love a response, if possible

18:53:56 From Hope Williams to Everyone:

+1 Christine

18:53:57 From *Laura Kaminski to Everyone:

We are working regularly with the Housing Department on the Housing Element

18:54:09 From Christopher Norman to Everyone:

Would love to hear how!

18:55:06 From POOR Magazine to Everyone:

thank u christine

18:55:12 From Hope Williams to Everyone:

Thank you Christine!

18:55:43 From Christopher Norman to Everyone:

They are the ones administering affordable housing funds and policies in the City, so it seems like they should have a much bigger presence in this process. I'd love to hear from them.

18:55:53 From Janelle Orsi to Everyone:

I think this is HCD Strategic Action Plan, and it made me very sad: https://drive.google.com/file/d/1DoQF6HRNAo5cose8OB0UOzOZdVs9oyGf/view?usp=sharing

18:56:02 From Bridget Cervelli to Everyone:

And just because these meetings are largely inaccessible to our prolific community of unhoused organizers does not mean that their needs for life-saving shelter shouldn't be priority #1

18:56:08 From Iris Starr to Everyone:

Submit the same old element to the State now and start over with an inclusive real community process.

18:56:35 From Raul Maldonado to Everyone:

I may have to jump off the call soon. If I cannot attend, is there an email I can provide feedback for this workshop #2.

18:56:43 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

generalplan@oaklandca.gov

18:56:44 From Raul Maldonado to Everyone:

Also, enjoyed the raised hands & questions

18:56:45 From Janelle Orsi to Everyone:

The slideshow about HCD's Strategic Action Plan feels less like a plan and more like the City throwing up its hands. Look at the last two slides: https://drive.google.com/file/d/1G2Tb9LMsINDVtU2Da18scG_Fxtfo3blU/view?usp=sharing

18:57:17 From Bridget Cervelli to Everyone:

We need access janelle^^

18:57:21 From Iris Starr to Everyone:

The had director has been there over a year now…

18:58:16 From Janelle Orsi to Everyone:

The HCD slideshow again: https://drive.google.com/file/d/1G2Tb9LMsINDVtU2Da18scG_Fxtfo3blU/view?usp=sharing

18:58:21 From Iris Starr to Everyone:

The HCD Director I mean

18:58:30 From Christine Hernandez to Everyone:

++++++

18:58:30 From Bradley Cleveland to Everyone:

Thank you Bobbi.

18:59:04 From Christine Hernandez to Everyone:

Thank you Bobbi.

18:59:42 From Janelle Orsi to Everyone:

Here's the HCD Strategic Action Plan again. Don't have the public link handy at the moment: https://drive.google.com/file/d/1DoQF6HRNAo5cose8OB0UOzOZdVs9oyGf/view?usp=sharing

18:59:43 From Christopher Norman to Everyone:

@Janelle - what you highlighted in the HCD strategic action plan (2nd to last page) shows what the issue is - it says we need over $450 million to meet our current housing goals. This question about financing is what we need to be discussing.

18:59:50 From *Audrey Lieberworth to Everyone:

EIFD = Enhanced Infrastructure Financing Districts

18:59:52 From Caleb Smith to Everyone:

Good evening, this is Caleb Smith with the City of Oakland Housing Department- as mentioned, I am observing tonight. We look forward to continuing to partner with Planning and to attending future meetings to hear all this valuable community input.

18:59:55 From Bobbi Barbara Lopez to Everyone:

100% Affordable housing or even a mixed income prioritizing affordable housing EIFD would be a great start.

18:59:59 From Stuart Flashman to Everyone:

Impact fees are a joke!!

19:00:25 From POOR Magazine to Everyone:

Impact fees are

19:00:30 From POOR Magazine to Everyone:

Wrong

19:00:35 From Iris Starr to Everyone:

Yes they are, Stuart, so developers need to build housing not pay to escape it

19:00:36 From Janelle Orsi to Everyone:

^Christopher, exactly. It says we need $450M to meet the last Housing Element's goals, and the "punchline" slide just says: we need more money.

19:00:39 From Hope Williams to Everyone:

Special request going forward : Please don't use diffusive language by repeating the same sound bites. It's demoralizing.

19:00:43 From Bridget Cervelli to Everyone:

Where are you implementing community input? Where are you allowing the unhoused community to create policy? Enough of pretending that the people creating housing policy in oakland have any idea of what is needed and how to implement it effectively. Lives are lost in the City's translation of community input.

19:01:05 From Janelle Orsi to Everyone:

Meanwhile, the City is looking to build this $500M police administration building: https://skarc.com/projects/oakland-police-administration-building/

19:01:24 From POOR Magazine to Everyone:

what we need is requirement of every luxury or moderate rate housing to go to offset poor people housing

19:01:51 From Stuart Flashman to Everyone:

We need to require a MINIMUM of 20% affordable in any project.

19:01:53 From Alexis Oviedo to Everyone:

I believe they are looking to develop the existing OPD admin building into housing units

19:02:27 From Iris Starr to Everyone:

There is money and property held by corporations. That is what we need.

19:02:52 From POOR Magazine to Everyone:

But Bill the City has money for Concrete barricades and sweeps

19:03:18 From Bridget Cervelli to Everyone:

POOR Magazine organizers have policies ready to go that should be implemented and have support of City Council

19:03:34 From Stuart Flashman to Everyone:

Repurposing for market rate is waste.

19:03:43 From Bradley Cleveland to Everyone:

Unions aren't the problem

19:04:01 From Raul Maldonado to Everyone:

I have to jump off, but I am for diverse dense housing development in all regions in Oakland, but especially in affluent areas that had hard time for development. Moreover, mixed housing projects with >=20% affordable housing would be great. 🙂 Sending more details via email. Thanks!

19:04:05 From POOR Magazine to Everyone:

SPEND the millions of dollars spent on poLicing of houseless people and creating barriers to sleep spent on creation of housing

19:04:07 From Iris Starr to Everyone:

And plenty of money being spent for the A's stadium (1Billion for infrastructure

19:04:15 From Bobbi Barbara Lopez to Everyone:

City should take a "support" position on SB 6, which allows for underutilized commercial and parking lots for housing!

19:04:17 From Raul Maldonado to Everyone:

Love the comments & views being expressed

19:05:07 From POOR Magazine to Everyone:

We charge NO RENT - at Homefulness - this is a poor and houseless people solution and we know why we become houseless

19:05:26 From Iris Starr to Everyone:

Unions and corporations support many of our politicians

19:05:35 From Dustin Parciasepe to Everyone:

factoryOs is a local union modular shop manufacturer. Many projects in SF are being constructed with union modular.

19:06:26 From Bradley Cleveland to Everyone:

Thanks, Dustin

19:06:35 From POOR Magazine to Everyone:

Most of the houseless people in oakland are disabled elders

19:07:51 From POOR Magazine to Everyone:

We have input from seniors /elders in Homefuness and we have to go cuz we have to keep building we hope this wants a waste of time

19:08:41 From Christine Hernandez to Everyone:

Where do I get that list of vacant properties?

19:08:51 From Bradley Cleveland to Everyone:

I need to sign off. Thanks so much for dialogue

19:09:30 From Bridget Cervelli to Everyone:

Please don't make us share our experiences for nothing, this is exhausting

19:09:30 From Iris Starr to Everyone:

And is there a list of tenants and landlords?

19:52:38 From Daphine Lamb-Perrilliat to Everyone:

Great meeting.. Thank you very informative.

19:52:42 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

All community event information including meeting presentations and summaries are posted here:https://www.oaklandca.gov/topics/meetings-and-events

19:53:18 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Translated notes in Spanish and Chinese will be post as soon as the english notes are translated and the video as well.

19:53:31 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

*video recordings will be posted as well

19:54:27 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Please register for the general plan update mailing list: https://www.oaklandca.gov/topics/general-plan-update#general-plan-e-mail-updates

19:54:58 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Information around community events: https://www.oaklandca.gov/topics/meetings-and-events

19:55:33 From Janelle Orsi to Everyone:

Am I recalling right that the City or D&B was going to create a more interactive website for the general plan website? Like a forum where people can submit comments and be in conversation with each other?

19:56:04 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Yes, City Staff are working on options to do that

19:56:43 From *Rajeev Bhatia, Dyett & Bhatia to Everyone:

Our group also discussed taxes on vacant units and prevent housing speculation

19:57:12 From Janelle Orsi to Everyone:

Specifically, could a City pause the Housing Element process for a year and do a Truth & Reconciliation focused on the harms of the Oakland Housing situation?

19:57:32 From Janelle Orsi to Everyone:

^The Truth & Reconciliation process was Tiny Gray-Garcia's idea

19:58:16 From Iris Starr to Everyone:

I just heard that there are "Stakeholder meetings" that do not include most of us that are not professional. They are targeted to Large developers and non-profits like EBHO. As a result of this meeting they plan to invite POOR Magazine. This is very, very bad. The system is set up to hear from influential insiders who are doing what they've always done. This must change, @Bill. Everyone needs to be included in these meetings. I have not seen one developer here. We should not be treated differently as "community" (many of which are not included in DRC's outreach)

19:59:27 From Bridget Cervelli to Everyone:

Community are the actual stakeholders, ridiculous to let the profiteers set the rules

19:59:48 From *Rajeev Bhatia, Dyett & Bhatia to Everyone:

In response to the question: The state-mandated deadline for Housing Element is critical, otherwise the City can lose funding and land use control. The deadline can only be extended by the State. Even the State Department of Housing and Community Development (HCD) does not have the power to extend deadlines.

20:00:38 From Bridget Cervelli to Everyone:

Not just ridiculous to consider insiders as prioritized stakeholders, incredibly harmful and dangerous for actual stakeholders-community

20:01:17 From Christine Hernandez to Everyone:

+rental property registry

20:01:21 From Sean Golden to Everyone:

Regarding the vacancy tax, I think Oakland has had one in effect since 2020? https://www.oaklandca.gov/topics/vacantpropertytax

20:01:24 From Iris Starr to Everyone:

@Rajeev and @Bill - submit a minimal eport as a placeholder that keeps money flowing. Commit to a real housing element process

20:01:41 From Janelle Orsi to Everyone:

+ owner registry so we can find out who is behind the corporations and real estate investment trust that are grabbing up the land

20:02:17 From Stuart Flashman to Everyone:

Oakland's vacancy tax is pretty minimal - not much of a threat to speculators.

20:02:18 From Iris Starr to Everyone:

@Sean, I think that is a vacant PROPERTY tax, not vacant units

20:02:37 From Stuart Flashman to Everyone:

It also goes to vacant units.

20:02:52 From *Rajeev Bhatia, Dyett & Bhatia to Everyone:

We not only need to adopt the Housing Element, but have that be robust enough to be certified by the State.

20:03:09 From Stuart Flashman to Everyone:

I know - a neighbor got dinged for an apartment her son was occupying.

20:03:15 From Alex Campbell to Everyone:

The tax does apply to vacant units but iirc is very difficult to enforce + a flat fee vs. progressive taxation

20:03:29 From Iris Starr to Everyone:

@Rajeev: Resubmit what you have with an update for 26,000 units

20:03:39 From Christine Hernandez to Everyone:

+++++

20:03:57 From Christine Hernandez to Everyone:

Ban Land Grabs!!!!

20:04:52 From Iris Starr to Everyone:

@rajeev, I know this may hurt your contract, but it is the RIGHT thing to do for Oakland

20:04:52 From Janelle Orsi to Everyone:

+1 to Ban Land Grabs

20:05:46 From Alex Campbell to Everyone:

Project Background and Meeting Objectives **3**

Workshop Location and Format **3**

Breakout Group Discussions **4**

Appendix A: Breakout Group Facilitator Notes **9**

Appendix B: Zoom Polls **22**

Appendix C: Zoom Chat **23**

Project Background and Meeting Objectives

The City of Oakland is preparing a comprehensive update of its Housing Element, which is a component of Oakland's General Plan that will serve as a blueprint for housing the City's residents at all economic levels—including low-income residents and households with special needs—from 2023 through 2031. The Housing Element, one of seven State-required general plan elements, was last updated in 2015 and is now being updated to reflect more recent housing opportunities, challenges, and approaches that have emerged in the community, as well as comply with new State laws.

The third Housing Element workshop was part of Phase 1 of the General Plan update. The purpose of this workshop was to provide information about the General Plan and Housing Element update process and gather community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. This short report summarizes the key themes and ideas that emerged during the workshop. Detailed discussion notes are located in the appendices.

Workshop Location and Format

The workshop took place on Saturday, March 12, 2022 from 10:00am to 12:00 pm online via Zoom meeting. The workshop was held in an online format due to public health concerns from the ongoing Covid-19 pandemic; this gave community members flexibility to attend the meeting from any location and drop in and out at any time. Approximately 40 community members attended the workshop. The workshop was simultaneously translated into Cantonese and Spanish.

The planning team gave a short presentation during the workshop that included an overview of the General Plan and Housing Element update process; an update on community outreach to date; definitions of gentrification, displacement, and affordable housing preservation; and staff from the City's Housing & Community Development (HCD) department shared a summary of current programs that focus on housing preservation, tenant protection, and neighborhood stabilization. The presentation concluded with a Q&A session for participant questions and comments.

During the presentation, attendees were asked to participate in three Zoom polls. The first poll asked whether participants had attended a prior Housing Element workshop; about half, or fifty percent, responded that they had attended one of the prior two workshops. The second poll asked participants if they had heard of any current City programs that were covered in the presentation, including Project Homekey, the First-Time Homebuyer Program, Funding for Housing Preservation, the Rent Adjustment Program (RAP), and Housing Counseling. More than half of the responding participants indicated that they were familiar with Project Homekey, the First-time Homebuyer Program, and the Rental Adjustment Program (RAP). Fifteen percent of respondents had not heard of any of the programs listed. The third poll asked which of those programs participants were most interested in learning more about. In this order, respondents were most interested in learning about the First-Time

Homebuyer Program, Funding for Housing Preservation, RAP, Project Homekey, and then Housing Counseling. Again, 15 percent of respondents were not interested in learning more about any of those programs. Zoom poll results are presented in Appendix B.

After the presentation, participants then proceeded to one of six Zoom breakout rooms for small group discussion. Attendees were not required to participate in breakout room discussion and were allowed to spend as much or as little time in their small group discussion breakout room as they wished.

Breakout Group Discussions

The second half of the meeting was spent in six small group discussions where community members had the opportunity to brainstorm together on potential programs to be included in the Housing Element. For the discussions, six to eight participants were sent into Zoom breakout rooms with one to two facilitators from the planning team. The group conversations were structured around the following questions:

1. **What are the housing issues you care about in Oakland?**
2. **How can Oakland add more housing while protecting tenants from displacement?**
3. **Have you heard of these City programs? What programs do you think are working well? Where are the gaps?**
4. **With limited resources available, how should the City target and prioritize these resources for new or expanded programs that meet the greatest community needs?**
5. **What other strategies and programs should be adopted as part of the Housing Element to protect tenants and keep people in their homes?**
6. **What did we not ask that you'd like to talk about? What else should we be asking?**

Unique discussions from each group, key takeaways, and common themes are described below. For more detailed notes from each group facilitator, see Appendix A.

KEY TAKEAWAYS

During the workshop, the planning team heard a wide range of opinions on all topics.

- **Affordable Housing Production.** Participants in every group felt that building new affordable and deeply affordable housing options is a key strategy to prevent displacement. Many group conversations focused on potential sites, funding, and policies to add new affordable, deeply affordable, and mixed/middle-income housing

throughout the City. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, changing the zoning to increase density in primarily single-family areas like Rockridge, supporting homeowners in the construction of additional dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and reducing the amount of discretionary review required for new housing projects.

- **Homelessness.** Homelessness was a key housing issue among nearly all participants. Many groups stressed that the City needs to prioritize housing the unhoused immediately and treat the situation as a state of emergency. The most common suggestion for addressing the situation was for the City to build or fund the construction of deeply affordable housing intended for people currently experiencing homelessness. Many participants were interested in including wraparound services such as healthcare, counseling, and case management within new deeply affordable housing. Other suggestions included engaging with the City's unhoused populations to identify their concerns, and providing unhoused people with housing vouchers and incentivizing landlords to accept those vouchers.
- **Public Education.** Participants generally were supportive of Oakland's existing housing programs, such as the Rental Adjustment Program (RAP), first time homebuyer program, and housing counseling. However, many participants stressed the need for the City to better publicize the availability of these programs, perhaps through increased community outreach. Many participants were not aware, for example, of HCD's housing counseling or the details of the City's Covid-related tenant protections. Some participants mentioned that many of the housing programs are advertised primarily on the internet, which makes them difficult to access for tenants who do not have internet access.
- **Measuring Impacts and Success.** In response to the question, "how should the City prioritize its limited resources to forward housing affordability," participants across groups stressed the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals in the most cost-efficient manner possible.
- **Tenant Preference and Right to Return.** Participants in all groups shared personal perspectives on displacement that has already occurred due to rising housing costs over the last two decades. Housing in Oakland is increasingly out of reach for moderate- and low-income levels. Many participants expressed interest in programs such as a right to return policy or preference programs that give Oakland residents who have been impacted by displacement priority for City housing funding, or allow users of housing vouchers to choose to stay in their neighborhoods as prices increase.

BREAKOUT GROUP SUMMARIES

Group 1

- Group 1 expressed interest in increasing affordable home ownership opportunities and strengthening the ability of communities to get involved and carry out the implementation of neighborhood level planning projects.
- Group members had differing opinions about zoning as a tool to preserve housing affordability. Some felt that the City should prioritize allowing increased density in areas that are currently zoned as single family residential and approving more projects by right. Other group members felt that zoning could only do so much, and the greatest constraints to preserving housing affordability are the high cost of land and labor to build new housing units.
- Group 1 also discussed examples of neighborhood preference programs that could be a good model for Oakland to stabilize residents at risk of eviction and displacement.

Group 2

- Group 2 discussed how gentrification and displacement has changed the character of the City by making it difficult for blue collar workers to find affordable housing choices in what was formerly a working class city. The group agreed that providing housing for the unhoused should be the City's top priority.
- Participants provided a number of potential policy approaches, including building affordable housing on public land, a right to return, a workforce housing overlay, and a market rate moratorium. Participants had mixed opinions on a moratorium of new market rate residential development. Some saw it as a means to refocus resources and energy on affordable housing, while others saw development at all income levels as a means to increase affordability overall. Participants emphasized that a right of return policy would need to be enforced and provide actually affordable housing.

Group 3

- Group 3 participants discussed the City's existing programs. Many group members felt that HCD's housing counseling is an effective tool to protect residents from eviction. Participants were also in support of the first-time homebuyer program and RAP. The group discussed the importance of closing the digital divide so that vulnerable tenants who do not have internet access can still access City resources. The group was also interested in strengthening the enforcement of existing tenant protections. Group members expressed desire to develop tangible metrics to monitor and target existing resources for various housing programs. New program suggestions included property maintenance support, rental assistance, TOPA tenant ownership programs, and increasing the City's inclusionary housing requirements.
- Other discussion topics included disincentivizing speculation, adding zoning flexibility for schools and other institutions to build housing more easily on their land, exploring an inclusionary housing policy, and building new affordable housing on City-owned/surplus land. The group also discussed development, redevelopment,

and speculation. Many group members felt that building new affordable housing was the best way to stabilize low- and moderate-income renters.

Group 4

- Group 4 discussed homelessness, including one person sharing from personal experience about homelessness as the culmination of other systemic problems such as the 2008 economic/foreclosure crisis, a lack of new affordable units to keep pace with rising housing cost in previous decades, and a lack of options for people experiencing homelessness in the interim period before they are able to re-enter housing.
- Group 4 suggested expanding and exploring new options for outreach to make tenants aware of existing housing programs. Group members expressed desire for mortgage assistance, down payment, and rental assistance programs that are available for very-low, low- and moderate-income levels. The group was also interested in exploring community land trusts, pursuing data-informed solutions to make the best use of limited resources, and increasing collaboration among City agencies and departments.

Group 5

- Group 5's discussion primarily centered around homelessness. Group members were very interested in pairing supportive housing and services such as access to transit, quality food, and mental health care. The group felt that it was important to engage unhoused populations in discussions about services and housing. Some group members expressed desire for the City to move away from investing in shelter systems, stating that shelter systems are a band-aid approach to a deeper problem, and instead invest in long-term resources such as deeply affordable housing. Group members were generally distrustful of tiny homes as a solution for homelessness, with some expressing concern about the quality and safety of tiny homes.
- Group members discussed the need for housing policies to address segregation, as displacement, housing affordability, and segregation are related issues.
- Group 5 discussed potential sites for new affordable housing. Some group members suggested partnering with the Oakland Unified School District and other public agencies to identify public sites for affordable housing. Other group members suggested investing in new housing along transit corridors.

Group 6

- Group 6 agreed that the City should prioritize housing the unhoused, and also was in consensus that more housing options are needed that are affordable to middle income earners. Group members expressed that providing more mixed-income housing and affordable housing within high opportunity neighborhoods would help to decrease segregation and allow struggling working class and middle income families to stay in their communities. Some group members had heard of Oakland's rent adjustment

program and had good experiences with it, though the group expressed desire for the City to better publicize and fund its existing programs.

- Other discussion topics included ensuring that ADU tenants/landlords are aware of tenant protection policy in place, supporting local property owners (rather than large outside companies), and ensuring that the City is measuring success and impact of its current programs.

Appendix A: Breakout Group Facilitator Notes

GROUP 1 FACILITATOR – DIANA PEREZ

- Participant 1: Career in planning and design. Placemaking – people feel at home, not just housed.

- Participant 2: Rockridge and Temescal. Concerned about loss of affordable and historic buildings. Large developments are higher rent not affordable.

  - Finding ways to use properties that don't change character.

- Participant 3: Trained as an architect and planner – interest in housing is broad, has been involved in many affordable housing projects. There could be more of an emphasis on neighborhood planning, creative solutions. Homeownership solutions of all kinds get underserved. Help low-income people stabilize and build equity.

- Participant 4 – worked in affordable housing development with EBHO, works with D&B but here as a participant. Strong believer in non-profit housing development. Best way to preserve housing over the long-term.

- Participant 5 – D3 Uptown neighborhood. Experienced eviction and pressures of gentrification. Lift up affordable housing, and preserve communities – preference to existing tenants to keep cultui

- Participant 6 – exploring land trust model to create permanent affordability. Our policies are counterproductive. Our policy making has become political --- and it's not a good way to solve problems. It's good to say --- continue in-depth work to create policy work.

- We need affordable rental and affordable homeownership, 90% of the affordable housing development resources are being targeted to rental housing production in the pipeline. Do more to include renters and involve them in the process, this is one of the benefits of neighborhood-level planning. Economics have changed so radically.

- Participant 1: Community planning-neighborhood planning. Birmingham – has a neighborhood participation program. Every square inch of the city belongs to an association. Neighborhood association allows you to always be ready --- the community is always ready to engage for anything—specific plan, project. It's a well-oiled machine for engagement. The more we can get communities to stay connected over implementation --- ownership – then leads to political push for elected officials who will implement. Public-private partnerships can – More ongoing, congealed community framework for us to implement the policies and keep up with the plan --- no matter what it is, things will change – association can be the champion.

- Participant 6 – our zoning will need revisiting. How can we increase housing in the way that still preserves the character of our neighborhood? Condo conversion – could

there be an opening here; with preference for existing tenants. Keep community conversations going – these are so healthy, and so needed. Large for profit entities have their place.

- Participant 5 – zoning changes are something we really need to pay attention to. Large amount zoned for single family—get rid of it to determine if some areas can have greater density, since we have this huge need to build more housing. In previous --- up-zoning the hills does have fire hazard – okay. For future sessions, I am seeing a lot of comments on how people can be heard. A lot of the problems can be solved at the state-level. There is a piece of education at this meeting, to help – where buttons can get pressed. About politics – The political is personal, I understand the need to look at data to inform our decisions – we met market rate allocations, but not ELI or VLI --- it is a political choice to make sure that we're actually preserving and creating deeply affordable housing.

- Zoning – There has been many changes to zoning in Oakland, but changes in zoning will not create housing. Price of land and cost of labor. Shortage of staff and aging infrastructure are a problem in Oakland. The site is still vacant – the site was properly zone and had support from neighborhood and nothing happen. Another example: abandoned gas station – numerous proposals for developing senior housing – neighbors opposed it --- everything stalled, until SB35 – the project is moving forward. The City has got to change regulations to allow City to approve projects by-right.

- Amnesty program for illegal/unwarranted units – to prevent the Ghostship tragedy. Increase housing in a way that is – great way to build relationships for housing "In it together" – grassroots. Not up to code, non-conforming.

- Participant 1: Design review requirement for all residential properties; in New Orleans we have districts were we have to come to associations --- the extent to which we do design review here --- we need to take a hard look at regulations to reduce – get housing into the market place – have integrity of the process.

CHAT NOTES

11:18:52 From Christopher Norman to Everyone:

Feel free to review these slides on a Berkeley preference policy: https://www.cityofberkeley.info/uploadedFiles/Planning_and_Development/Level_3_-_Commissions/Commission_for_Planning/Item%2010_Community%20Preference%20Policies030619.pdf

11:22:24 From Christopher Norman to Everyone:

An example of San Francisco's preference policy: https://sfmohcd.org/certificate-preference

11:36:59 From Jim Bergdoll to Everyone:

Regarding zoning for housing, rather than up zoning everywhere which raises the price of the land and therefore prices for housing, a new trend is to establish Affordable Housing Overlay zoning which allows Affordable projects higher density and therefore can compete better in acquiring the land.

GROUP 2 FACILITATORS – MATT ALVAREZ-NISSEN, CALEB SMITH, DANIEL FINDLEY

Key Takeaways

- Gentrification and displacement has changed the city. It is difficult to find affordable housing, which restricts housing choice – especially for blue collar workers.
- The City needs to prioritize housing the unhoused and provide deeply affordable housing. Some participants emphasized building housing at all income levels, while others disagreed and emphasized the need for affordable housing.
- Some participants believed that there is a lack of political will to address affordable housing needs.
- Participants provided a number of potential policy approaches, including building affordable housing on public land, a right to return, a workforce housing overlay, and a market rate moratorium. Participants had mixed opinions on a moratorium of new market rate residential development. Some saw it as a means to refocus resources and energy on affordable housing, while others saw development at all income levels as a means to increase affordability overall. Participants emphasized that a right of return policy would need to be enforced and provide actually affordable housing.
- Generally, there is a desire to know more about the Housing Element process, and what can and cannot be accomplished through it. This includes any limitations imposed by State law.

Detailed Notes by Question

Participants were asked Question #1 as part of the initial round robin. Questions #2 and #3 were asked during group discussion. The group did not have time to react to Questions #4 through #6, although there is considerable overlap between the answers given in Questions #1 through #3 and the subject matter of Questions #4 through #6.

Question #1 – What are the housing issues you care about in Oakland?

- Neighborhood has changed due to gentrification, but not for the better. Oakland is/was a blue collar town, but can no longer afford to live there.
- Priority is to house the unhoused. Homelessness is a state of emergency that needs to be addressed immediately – the City needs to get people off the streets and into secure housing.
- Focus on where the housing will be located.

Question #2 – How can Oakland add more housing while protecting tenants from displacement?

- Build housing on public land. There is a lot of City-owned land that is not being used.
- Populations at risk that could benefit from additional affordable housing include the thousands of people who live on the streets, including those who are disabled or elderly.
- Another need group is people who work in nonprofits, are self-employed, are blue collar workers, etc. They are being pushed out of the city, and new housing is geared towards people who do not even live in Oakland yet – this is not fair.
  - Some people move here for work or temporarily and vote on policies that harm Black and brown Oaklanders – but not all new residents.
- Is Oakland going beyond what's required in terms of displacement analysis and outreach?
- The City should streamline, upzone, etc. to develop more housing at all income levels – more construction overall will decrease costs.
- If residential units are demolished or displaced during development, the developer can offer replacement units to residents to return (policy is already in place).
- Problem with right of return is that the units offered are often way above what the original resident was paying prior to demolition – especially if that resident had lived there for a while with low rent. They cannot afford to come back. Seen on their block – it's not feasible.
  - If a rent controlled unit is demolished, the developer needs to offer a replacement unit back at an affordable rate.
  - Need to update policy at the City level – density bonus provisions also require offering a unit back at lower prices.
  - It is important that tenants have a real right to return
- Can no longer afford to rent in the city.
- Unpermitted construction nearby, and the City does not act.
- Lives in a rent controlled unit, but wants to move to other neighborhoods. Restricted in their housing options because down payments are expensive, and one-bedroom apartments are just too expensive.
- The City should think more radically about how to change things. Lots of policies are focused on homeowners and the rights of capital.
- Moratorium on market rate housing until affordable housing development reaches needed levels.
  - Encourage ways to build more housing at all income levels. Discourages a moratorium on market rate housing – new supply of any time of housing will help alleviate things.

  - The City is way over the mark on market rate housing per the Mayor's projections on housing development, and way under the percentage of affordable housing. Need to stop building market rate altogether. Building market rate to decrease prices reminds them of "trickle down" economics, which is a theory that does not work. Need to up the ante on building deeply affordable housing.
  - How would a moratorium help keep people in Oakland?
    - Would increase emphasis on affordable housing.
    - Put resources currently going towards building market rate housing to affordable housing.
  - City should think of creative ways to build housing to bring rents back down. If wages do not rise, Oakland needs places with rents that are $600. The City needs people who work lower-wage jobs (e.g., service jobs).
- Yearning for an educational component on how the Housing Element works, something like a video.
- City should consider a workforce housing overlay.
- Previously able to move to different neighborhoods in Oakland and treasures the opportunity to live in different segments of the city. Each part of the city has so much to offer, and it's great to be able to live around the city.

Question #3 – Have you heard of these City programs? What programs do you think are working well? Where are the gaps?

- Project Homekey, same as the statewide program?
- The City has said it has no money for affordable housing, but just committed to the Howard Terminal project. There is a lack of political will.
- The City does not subsidize market rate housing, market rate housing helps develop affordable.
  - The City does subsidize market rate. Impact fees are too low – the developer would rather pay the fees than provide housing. The City needs to put more resources towards affordable housing
- Want to know about State law, and what can and cannot be done in the Housing Element. Lack of understanding about what is allowed, how do we get to a common understanding of what can happen? What happens when the City reaches its RHNA goal for market rate?

GROUP 3 FACILITATORS – ALISON MOORE

Summary of Issues:

Programs/Needs:

- Rental assistance

- Housing counseling: keeping people from getting evicted. Proving cost effective.
- Building resilience and digital divide- huge issue in housing
- Redevelopment- cant build our way out of this crisis. Need for Housing with supportive services.
- Accountability for various housing programs- desire for tangible metrics to better target resources.
- How do we disincentivize speculation- driving up a lot of the costs in Oakland.

Housing production of affordable and deeply affordable as a key part of reducing pressures.

- Surplus land- city must build affordable housing on land, how do we allow flexibility for institutions like schools to add housing on their land?
- Zoning as a hindrance to additional housing, and challenges to funding more housing.
- Exploration of an inclusionary housing policy.

Detailed notes:

- Participant 1- Still a chain link fence that says no trespassing on the Moms for Housing site. Land trust bought that home 2 years ago. Encampments still there- someone moved into land downstairs. Fife said if there is one vacant home, there shouldn't be anyone living on the streets. Home was sold to Oakland land trust and remodeling costs. Half of it is still vacant. ToPA model- sell homes to land trust. Desire for more metrics and accountability- a program that's helped 20 people a year shouldn't be considered effective.
- Participant 2- active in upper Broadway/Rockridge area- interested in how Oakland will respond to multiple challenges, including access to money, legal challenges. While there is great intention in this group, coordination and making people aware of programs is going to be incredibly important.
- Participant 3- Oakland resident D3, incredible increase in price and reduction in affordability in past 16 years. Not hearing any serious discussion of how we reverse that. If we're going to keep tripling the prices of housing, that's going to get worse. Don't hear acknowledgement that where we are is intentional. Cities throughout the bay area have intentionally caused this, and policies continue to cause this, it takes radical change to change that.
- Participant 4- Concerned about issues and challenges in terms of trying to prevent displacement. Living here for 30 years, and have seen prices rise. More and more people getting forced out of area. Some people are being bought out, people are willing to pay higher prices. Same things happen with rental units- new owners can set the new rents. Prices go up and up for rental units. Enforcement- a lot of good programs, but how do we enforce them?
- Participant 5- wrap around with services**.** A lot of need in terms of building resilience. That people have access to resources. Sad that infrastructure bill that Biden put

forward with digital broadband infrastructure didn't pass. Leveling playing field for services is increasingly difficult when not everybody has access to the internet. Even physically [within neighborhoods], there need to be places where people could access services online.

- People need support for how to maintain a property. Lack of maintenance where property deteriorates where its uninhabitable.
- Rental Assistance: Most people are not able to purchase their homes. TOPA and OPA promise that tenant opportunities can buy, but many are are not in position to buy. First time homeowner approaches are helpful, tax breaks, revolving loans, credit counseling.
- Inclusionary policy. Building housing- all we're seeing is building large market rate apartment complexes. Rents around these areas go up; this is happening in north Oakland.
- What's needed is an inclusionary requirement- a certain amount of affordable units, not just in-lieu fees, because they don't affect damage caused by gentrification. Need to build affordable.
- Places that are gentrifying are where housing crisis is escalating. The way to get new affordable units built them is to require them in areas with higher land costs. Equity of where we're building affordable housing. public land for public good.
- City owned land: city owned land that goes to auction- too many restrictions on production, there's no production to quantity we need. What if we have more flexibility- allow impact fee, but target city owned land in higher well-to-do neighborhoods?
- D1- Have recently built homes to house homeless residents. When we have city-owned property, surplus land act applies, prioritize land to impact affordable housing.
- City doesn't own any land around Rockridge. School districts own parcels that are underutilized, but separate from the city- would be great if there were analogous law passed by legislature for what's been done for BART, but for schools.
- The City is coordinating with school district as much as possible, because they do have a lot of land adjacent to some of the City's, and in impactful locations. Exploring how we zone to allow that flexibility. Surplus land act doesn't apply to schools in the same way.
- Zoning- if city wanted to do as much as possible to increase housing supply, easiest way to do that is repeal zoning code in its entirety. City is constraining supply. Rather simple- get rid of entirety of zoning code. Acknowledge that this would upset a lot of housing secure residents if their values were not doubling/tripling.
- Counterpoint: If you get rid of zoning and allow people to build whatever they want, you will get more housing built, but other things too, like industrial near residential. North Oakland- demand for housing is so high, even if you dropped all the zoning requirements, still wouldn't get any affordable.

- We need to be talking about how we pay for more affordable housing. Increasing income tax, etc.
- What we're offering to address homelessness- offer a range of housing types so its not full permanent supportive housing-lighter touch. Agree on digital divide. Use some of relief funds to support infrastructure. What happens with what the city is offering
- Housing condition issue- tenants should reach out to housing counselors.

GROUP 4 FACILITATORS – CLARE KUCERA AND KHALILHA HAYNES

What are the housing issues you care about in Oakland?

- Homeless resident, saw how homelessness was escalating, no attainable housing solutions being put forth. What are people supposed to do in the interim period before they get housed? Why hasn't a lot more been done when these solutions?
- Concerns that there isn't enough will to resolve homelessness issues; homelessness is result of other systemic marginalization problems; e.g. 2008 economic crisis, misguided decision making, not insisting that affordable housing is built

How can Oakland add more housing while protecting tenants from displacement?

- Interested in mortgage assistance programs – lack of funding; money has routinely been directed to other programs; even though there is some state funding for 80% ami or below
- Hope to fund 120% ami, helping folks in the extremely-low-income and middle-income housing
- Down payment assistance
- Build or buy some of these flex small sites, not waste money on bureaucratic processes
- Land trust to buy up properties that can be rent controlled
- Nonpayment of rent is the majority of evictions; rental assistance programs

With limited resources available, how should the City target and prioritize these resources for new or expanded programs that meet the greatest community needs?

- How data is used – what does your data tell you; make data-informed decisions
- Data collection – one of the top reasons for eviction is nonpayment rate, city can take a look at rental assistance for the problems that people are facing in the midst of the pandemic and continue programs post pandemic
- How readily available and accessible is that information that you shared just now?
- Increasing outreach activities to make sure tenants are aware of programs that can assist them.

- Engage the Oakland housing authority a little more, have more collaboration between agencies, more info about what section 8 housing vouchers can do – something that can be used to help folks purchase homes

Chat:

11:07:13 From Kimberly King to Everyone:

https://www.outthinkthebox.net/projects/docs/092921_CityOfOakland_RFQ_EcoSan+.pdf

11:10:23 From Nic Ming to Everyone:

@Kiran, who is it that redirects the funding for that program to other programs? is it the mayor, the council, the dept?

11:11:14 From Kimberly King to Everyone:

I also put forth this offering to BACS (Bay Area Community Services) who received the lion's share of the $1.6bil from the state. Jaimie Almanza, Exec. Dir. paid me for 8 hours to locate the tax delinquent/defaulted structures/vacant lots, with the aims of housing AT least 500 persons, to start; permanently and temporarily. She ONLY housed ~26 persons last year and awarded woman of the Year by CA State Senator Nancy Skinner. What's wrong with this picture?!

11:18:14 From Kimberly King to Everyone:

There was a recent report addressing housing challenges programs and (lack of) effectiveness of some directives. https://belonging.berkeley.edu/unpacking-housing-crisis "He also charts the path toward not only solving these crises, but addressing our nation's widening economic inequality and the perennial problem of structural racism."

11:23:01 From Kimberly King to Everyone:

But if you're homeless, one is essentially on one's own. The city is failing abysmally in getting folks off the street, because stakeholder engagement with ALL parties has a great deal to be desired and stakeholders on the streets are RARELY heard.

11:24:21 From *Khalilha Haynes, City of Oakland to Everyone:

in many cases, direct cash assistance is usually the best way to keep people in their homes (i'm saying this from my experience as a planning consultant, not as a City worker)

11:26:02 From Kimberly King to Everyone:

But if people aren't kept housed, it's too late. If one is too abled bodied, there is very little help; $192/mo in food stamps and Medical. The vouchers is a problem too. I encourage ya'll to listen to the video of from the belonging Berkeley report

11:29:20 From *Khalilha Haynes, City of Oakland to Everyone:

@Nic - do you have suggestions about outreach strategies? unfortunately, the city does not have a tik tok

11:31:34 From Nic Ming to Everyone:

https://www.newamerica.org/future-land-housing/events/introducing-the-foreclosure-and-eviction-analysis-tool-feat/?utm_medium=email&utm_campaign=FLH%20Follow%20Up%20for%2032%20FEAT%20Release%20Event&utm_content=FLH%20Follow%20Up%20for%2032%20FEAT%20Release%20Event+CID_116ab3658718bab1207adf8778196b3d&utm_source=Campaign%20Monitor%20Newsletters&utm_term=Introducing%20FEAT%20the%20Foreclosure%20and%20Eviction%20Analysis%20Tool

11:33:53 From Kimberly King to Everyone:

This conversation sounds like curbside communities aren't important as part of the conversation and up to their own creative resources. Nic has it right.

11:35:01 From Kimberly King to Everyone:

If one has a voucher, it's RARE one can even locate a landlord who will accept a voucher, whereby they often expire.

11:36:10 From Kimberly King to Everyone:

Thank you.

11:36:27 From *Clare Kucera, Dyett & Bhatia to Everyone:

generalplan@oaklandca.gov

11:39:51 From Nic Ming to Everyone:

Outreach Strategies suggestions:
1) have housing protection awareness/reminders/tips at the start or every council related session
2) Broad sharing across other City housing and homelessness services involved departments and division
3) Digitize training -

GROUP 5 FACILITATORS – LAKSHMI RAJAGOPALAN AND RAJEEV BHATIA

- #1 D1 area - from central valley - Section 8 to be in high resource area. Part of East Bay YIMBY. Dense and diverse housing in high resource areas for moderate income and affordable income

- #2 D4 - 30 yrs - aware of housing and homeless issues. Where new housing is going to go. Learn about process. Impact on existing neighborhoods - displacement - renter, more than owner occupied housing. Look at investing along transit corridor, effectiveness and cost of these programs and how can we improve them for the GPU
- #3 - 6 years, live in market rate housing - concerned about unhoused folks, potential criminalization of people living of the streets, center needs of disabled residents/people with disabilities, how can we make sure the good programs can reach. HUD inspector general - does not have reasonable accommodation policies. How can the city look into improving the needs of black and brown people with disabilities?
- #4 - Bay area native, 6 yrs, homelessness and level of unhoused in D2, listening and learning
- #5 - D1 resident. Rockridge area - 1990. Like to support actionable items to bring affordable housing to rockridge. Lack of diversity now - unaffordable. Outreach should include NCPCs, neighborhood groups
- #6 - 50 years - Board of Oakland Heritage Alliance. Increase in homelessness - severe impacts - unhoused people move into structurally unsound structures and are subject to dangers to life due to fires. - experience with Eden Housing - wraparound services for unhoused in addition to housing.
- #7 - D3 resident - housing unhoused people. Difference between LA and Oakland - safety concerns in encampments and untenable conditions - need to address. Need more outreach for housing programs that the city provides and accountability for the programs.

Comments:

- Housing unhoused people, services for unhoused, improved safety
- In-lieu fee vs. requiring housing on site - in-lieu fees are low and not economically feasible for developers in affordable housing.
- Funding - how is funding being used? Measure effectiveness.
- Support affordable housing with support resources such as access to transit accessibility quality food access, mental health services.
- Work with OUSD, other public agency partners to identify public sites for affordable housing
- Engage unhoused populations in the discussions
- Need additional investment in deeply affordable housing - what constitutes deeply affordable with respect to income levels - between 30 - 50% AMI
- Move away from investing in shelter systems - band aid approach esp. with the pandemic to provide housing with support services. - invest in long term resources.
  - Voucher program to unhoused, incentivizing landlords to accept vouchers.

  - Diverse **dense Housing production, *along* with a voucher system**
- Policies should address increased segregation - interrelated issues

Chat

11:26:54 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

https://www.oaklandca.gov/news/2022/city-of-oakland-awarded-more-than-200-million-to-build-500-deeply-affordable-housing-units

11:27:12 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Over 200 million to build 500 deeply affordable housing units

11:28:02 From Raul Maldonado to Everyone:

IMO: Tiny homes are a short term fix to permanent housing. See LA tiny homes density and their deterioration due to rainy weather conditions

11:28:24 From Raul Maldonado to Everyone:

*density being 1 story small units :(

11:30:21 From Erica Dunkle to Everyone:

+1 Allie, I agree

11:31:05 From Erica Dunkle to Everyone:

agree with that as well, Allie

11:32:12 From George Naylor to Everyone:

Agree tiny homes are a short term solution - we need short and long term solutions to make housing work for all.

11:33:31 From Erica Dunkle to Everyone:

I love all your points, Allie!!

11:34:01 From Raul Maldonado to Everyone:

My family is on section 8 back home(Modesto). Costs is going up for that, and exposure to being defunded by govt.

That's why I believe in diverse dense Housing production, *along* with a voucher system

11:34:33 From Erica Dunkle to Everyone:

+1 Raul

11:34:35 From Raul Maldonado to Everyone:

A sole voucher system isn't effective. I wish though:(

11:35:36 From Raul Maldonado to Everyone:

Nice 👏

11:37:34 From Raul Maldonado to Everyone:

Great point Ronnie, on transit and accessibility

11:39:00 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

@erica, our engagement includes reaching out to unhoused

11:40:32 From Erica Dunkle to Everyone:

Would love to see leadership by unhoused as well

GROUP 6 FACILITATOR – SHANNON BOWMAN

1. Housing Issues:
    a. Housing homeless population and addressing poor living conditions
    b. Rental assistance programs
    c. Housing for lower-income residents
    d. The "Missing Middle" - housing for middle-income folks
    e. Creating more housing
    f. Addressing consequences of redlining, gentrification and how a resident's future is linked to their zip code
    g. More mixed-income housing and affordable housing that is located in neighborhoods of opportunity

h. Ensuring we are examining measures of success, and measuring outcomes/effectiveness of programs

2. Tenant Protections:

    a. Ensure homeowners are aware of tenant protections in their ADUs

    b. Need for small local landlords, provide resources to smaller property owners and incentivize them instead of larger, outside property owners/managers

    c. Addressing the "Missing Middle," struggling working class and middle income families who should be able to stay in their communities

    d. Rent control

3. Programs:

    a. (Heard of a few programs, need more from all of them).

    b. Good experience with RAP

4. Prioritize:

    a. Housing for middle income/working class

    b. Financial programs/housing for the unhoused, and more than just short-term/temporary housing for the homeless

    c. Rental assistance programs. Issue with First Time Homebuyer Program is that homes are so expensive these days, it's difficult for the average person to have a down payment/reasonable housing costs.

    d. Instead of just prioritizing resources, how about introducing a parcel tax for existing homeowners, so they contribute funds to affordable housing programs?

    e. How are we monitoring the effectiveness of our programs?

Appendix B: Zoom Polls

1. Have you attended a previous Housing Element workshop? (Single Choice)

100% answered

Yes 47%

No 53%

2. Which of these programs have you heard of? (Multiple Choice)

100% answered

Project Homekey 59%

First-Time Homebuyer Program 56%

Funding for Housing Preservation 37%

Rent Adjustment Program (RAP) 52%

Housing Counseling 19%

None of these 15%

3. Which of these programs are you most interested in? (Multiple Choice)

100% answered

Project Homekey 37%

First-Time Homebuyer Program 52%

Funding for Housing Preservation 48%

Rent Adjustment Program (RAP) 44%

Housing Counseling 30%

Something Else 11%

None of these 15%

Appendix C: Zoom Chat

10:06:16 From Christopher Norman to Everyone:

Morning!

10:06:27 From Mattie Scott to Everyone:

The language globe icon has disappeared from my screen.

10:06:33 From Phyllis Horneman to Everyone:

Good morning

10:07:03 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

We will turn it on once the interpretations are done in Spanish

10:07:13 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

on how to use the tool

10:07:15 From Mattie Scott to Everyone:

Got it. Thanks.

10:09:24 From *Hazel O'Neil, Dyett & Bhatia to Everyone:

In your meeting/webinar controls, click Interpretation.

Select the language that you would like to hear.

10:09:26 From *Hazel O'Neil, Dyett & Bhatia to Everyone:

En los controles de la reunión o el seminario web, haga clic en Interpretación.

Haga clic en el idioma que desee escuchar.

10:09:30 From Cantonese Interpreter - Weikuen Tang to Everyone:

需要廣東話傳譯的請選 Chinese 中文。

10:09:56 From *Alison Moore, Dyett & Bhatia to Everyone:

https://cao-94612.s3.amazonaws.com/documents/Oakland-Housing-Resources_v1-1.pdf resource document

10:17:16 From Cathy Leonard to Everyone:

There are still many impacted folks in North Oakland. Why is no community engagement showing in North Oakland on your map? Impacted communities are still being forced and gentrified out of North Oakland.

10:17:59 From *Laura Kaminski, City of Oakland to Everyone:

We are still in the community engagement process, this is ongoing.

10:18:19 From Cathy Leonard to Everyone:

Thank you Laura.

10:18:53 From George Naylor to Everyone:

Also in Deep East Oakland near the Coliseum and 98th Avenue- please include those communities as the process moves forward.

10:19:58 From *Hazel O'Neil, Dyett & Bhatia to Everyone:

For new participants -

按一下您想要聽的語言:中文 (Chinese)。

10:20:15 From *Laura Kaminski, City of Oakland to Everyone:

If there are neighborhood meetings that you would like us to speak at, please let us know as well.

10:20:44 From *Hazel O'Neil, Dyett & Bhatia to *Alison Moore, Dyett & Bhatia(Direct Message):

Screenshot polls!

10:20:59 From Cathy Leonard to Everyone:

North Oakland homes on my Santa Fe block are now being sold for over $1.5m. A house in the Golden Gate sold two weeks ago for $2.5m!! Flippers are destroying the character of our neighborhoods.

10:22:30 From Ronnie Spitzer to Everyone:

Have you contacted neighborhood groups and NCPCs for their input?

10:23:29 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

@Ronnie, we are in the process of reaching out to neighborhood groups and NCPCs - We are still in the community engagement process, this is ongoing.

10:24:29 From Cathy Leonard to Everyone:

Gentrification also brings people to our neighborhoods who call the police on Black people for walking down streets 3-4 generations of their family have lived on.

10:27:11 From Cathy Leonard to Everyone:

I find in North Oakland the housing stock does not appeal to flippers and new neighbors who completely remodel these homes.

10:28:04 From Cathy Leonard to Everyone:

Isolation from friends, family, their family churches, etc.

10:28:10 From Ronnie Spitzer to Everyone:

Cathy, I wish that was true.

10:28:24 From Kiran Shenoy to Everyone:

Is there outreach planned to minority homeowners and housing providers that have owned property in Oakland for multiple generations?

10:28:36 From Cathy Leonard to Everyone:

Ronnie, you wish what was true?

10:29:01 From Ronnie Spitzer to Everyone:

I wish there were no flippers buying property in North Oakland.

10:29:02 From *Diana Perez, City of Oakland to Everyone:

** Looking for legal services for low-income tenants or homeowners, covid/medical assistance, tax preparation assistance, or other services? Please see this list of resources

collected by the General Plan Update team & share with your friends, neighbors, and family: https://cao-94612.s3.amazonaws.com/documents/Oakland-Housing-Resources_v1-1.pdf

Are we missing a helpful community resource? Please let us know: generalplan@oaklandca.gov

10:29:29 From Kimberly King to Everyone:

RE: Healthy food access. Is Oakland and Alameda County so adverse to urban agriculture? Repurposing tax defaulted/delinquent lots that can also provide fair & affordable housing opportunities in rent to own (in 3-5 years) tiny dwellings for the farm stewards? https://www.outthinkthebox.net/projects/homesteady.html

10:30:41 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

@Kiran, We are conducting outreach to affordable housing providers and organizations. Please let us know if there are organizations/providers we should reach out to

10:32:16 From Cantonese Interpreter - Weikuen Tang to *Hazel O'Neil, Dyett & Bhatia(Direct Message):

Can presenter slow down somewhat ?

10:32:58 From Kimberly King to Everyone:

But do land trusts include opportunities to grow food, too? I have yet to see this offering embraced in Oakland and Alameda County. Why?

10:33:16 From Kiran Shenoy to Everyone:

@lakshmi I will be in touch. Thank you.

10:33:45 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Please send your feedback/suggestions to generalplan@oaklandca.gov

10:34:24 From *Shannon Bowman, City of Oakland to *Hazel O'Neil, Dyett & Bhatia(Direct Message):

Hi Hazel, I lost my connection for a moment. Want to make sure I'm set up for hosting a breakout room later (you may need to add me as a co-host again) thanks!

10:35:39 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Community Events and Public Meetings - All information about upcoming and past events - meeting summaries, video etc. are here: https://www.oaklandca.gov/topics/meetings-and-events

10:36:29 From Kiran Shenoy to Everyone:

There needs to be far more funding directed at the First-Time Homebuyer Program or Oakland MAP. The program has not had funding for some time now and revolving funds have routinely been directed to other programs https://www.oaklandca.gov/topics/first-time-homebuyer-mortgage-assistance-program-map

10:36:47 From Kimberly King to Everyone:

I have sent my urban agriculture and tiny dwelling suggestions as far back as the first general plan brainstorming events years ago, and to city council since 2014, only to historically, and habitually fall on deaf ears. I am under the distinct impression the will never be any political will for this opportunity—especially because fortifying food security via urban farms is embraced, in cities like Baltimore, MD. https://farmalliancebaltimore.org/

10:37:57 From Cathy Leonard to Everyone:

Why no just cause protection against evictions for most apartments built later? I still see folks in new housing being forced out.

10:38:37 From *Diana Perez, City of Oakland to Everyone:

@Kimberly. We want to explore innovative solutions to build healthy communities. The ideas and questions you raise around healthy food access are relevant to both the Housing Element and the Environmental Justice element. These are the type of ideas and questions we're looking to explore with you during the small-group discussions.

10:38:54 From Kimberly King to Everyone:

Unless land trusts are earmarked to support urban agriculture, zoning is changed, etc. and not just for small garden plots, it’s futile and probably best I leave until there is political wil.

10:40:21 From Colin Piethe to Everyone:

Does the City have the ability to zone land exclusively for affordable housing or CLTs? How do we protect our housing development from the whims of the free market?

10:41:46 From *Diana Perez, City of Oakland to Everyone:

@Kimberly The General Plan Update will include the adoption of an Environmental Justice element, which will address healthy food access. We'd love to continue hearing your ideas about increasing access to healthy food and affordable housing.

10:42:21 From Jim Bergdoll to Everyone:

Newer apartments cannot have rent control because of State Costa Hawkins Act. The Legislature needs to be pressured to amend these limitations. Get involved via East Bay Housing Organizations (EBHO.org) or other housing advocacy groups.

10:42:49 From *Laura Kaminski, City of Oakland to Everyone:

We cannot mandate 100% affordable housing on private land. The City does have requirement for either paying affordable housing impact fees or providing a certain percentage of affordable housing on site. There also is the option of having Inclusionary Zoning that also mandates a certain percentage of affordable units per develvelopment.

10:42:58 From Cathy Leonard to Everyone:

Thanks @Jim Bergdoll. Yes, now I remember the Costa Hawkins Act.

10:43:58 From Colin Piethe to Everyone:

Thanks Laura. Why not start a program to buy back that land and preserve for affordable housing?

10:44:33 From Cathy Leonard to Everyone:

@Laura Kaminski, can the City mandate affordable housing on some City owned public lands?

10:44:35 From Jim Bergdoll to Everyone:

Also call the Governor's office and complain.

10:45:17 From Kimberly King to Everyone:

Yes Tuan on the unhoused. As a matter of fact my RFQ for tiny dwellings on wheels supported by urban agriculture was provisionally accepted by the City of Oakland Housing Department, altho the funds run out in July 2022!! What's troubling is I have engaged them on this front only to be dismissed, habitually and historically.

10:45:57 From Cathy Leonard to Everyone:

Thanks Tuan.

10:45:57 From *Diana Perez, City of Oakland to Everyone:

@Colin Those are great policy ideas to explore further. Thank you for raising them. These and other ideas can be discussed further during the small-group discussions.

10:46:39 From *Diana Perez, City of Oakland to Everyone:

Thank you for being here Donna!

10:46:46 From Christina Borowski to Everyone:

Thanks, Tuan & Mattie.

10:47:51 From Kimberly King to Everyone:

I also understand from a direct conversation with Joe DeVries years ago when he was Asst. City Manager spent $650K/annum on encampment evictions from the millions provided by the state, instead of embracing offerings like mine or investing in land trusts.

10:47:55 From *Laura Kaminski, City of Oakland to Everyone:

On City owned land property is listed first for groups to purchase for affordable housing first before the land can be offered for other purposes. The City can make any policy that it chooses with its' publicly owned land

10:48:42 From *Diana Perez, City of Oakland to Everyone:

A reminder to all: Chat comments will be part of the meeting notes & posted online. Please continue to share your ideas to keep Oaklanders housed and prevent displacement.

10:49:05 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

RAP@oaklandca.gov - for housing questions

10:49:26 From Allie Cannington to Everyone:

Yes I support adoption of right to counsel

10:49:41 From Christopher Norman to Everyone:

Right to Counsel support would be extraordinary for tenants in the coming months

10:49:53 From Cathy Leonard to Everyone:

Thanks @Laura Kaminski, as you are probably aware we need "deeply" affordable housing as well as "affordable" housing.

10:50:15 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Rent Adjustment Program - https://www.oaklandca.gov/topics/rent-adjustment-program

10:50:30 From Christopher Norman to Everyone:

It would be great to have community education around the fact that tenants cannot be evicted due to covid-related challenges once the moratorium ends

10:50:33 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Housing Counseling - https://www.oaklandca.gov/services/contact-housing-counselor

10:50:35 From Christopher Norman to Everyone:

greater education*

10:50:47 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

510-238-3721, RAP@oaklandca.gov

10:51:06 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Thank you Chanee

10:52:15 From Kimberly King to Everyone:

How about affordable and fair housing? https://belonging.berkeley.edu/unpacking-housing-crisis

10:52:48 From DONNA GRIGGSMURPHY to Everyone:

Housing with supportive services

10:52:56 From Nic Ming to Everyone:

it's important to note that people may not even know that tenants are protected... how readily available/accessible in this information? major education and awareness campaigns seem desperately needed

10:52:58 From DONNA GRIGGSMURPHY to Everyone:

Yes indeed

10:53:16 From George Naylor to Everyone:

In terms of the variety of programs discussed, putting the narrative in a table might be helpful for lay people to understand. For any program, need to establish a measure of effectiveness, long-term v. short-term benefit, units preserved/built versus $ invested and if the funding streams and sources are sustainable.

10:55:50 From Cathy Leonard to Everyone:

Just advertised in my neighborhood: "Sunny North Oakland Craftsman available for 1-year lease beginning August 1Open concept, fully remodeled, light-filled single-family house2 bedrooms/1 bath with a garden, 800 sq ftFurnished preferred, including upright

piano tuned annuallyIdeal for a couple or a family with 1-2 children$3500 per month. Water, garbage, and high-speed Internet included."

10:56:50 From *Alison Moore, Dyett & Bhatia to Everyone:

https://www.oaklandca.gov/topics/meetings-and-events#past-events-and-meetings

10:56:52 From *Shannon Bowman, City of Oakland to *Hazel O'Neil, Dyett & Bhatia(Direct Message):

Hi Hazel, I lost my connection for a moment. Want to make sure I'm set up for hosting a breakout room later (you may need to add me as a co-host again) thanks!

10:57:00 From *Diana Perez, City of Oakland to Everyone:

@Nic and @Christopher When you envision a successful educational campaign to share information about tenant rights & services. What does that campaign look like? How can we be sure the information is reaching families and households most at need?

10:57:02 From Raul Maldonado to Everyone:

Thanks!

10:57:13 From Christopher Norman to Everyone:

Would be happy to discuss in a breakout room!

10:57:17 From *Shannon Bowman, City of Oakland to Shannon Bowman(Direct Message):

Thanks!

10:57:27 From *Laura Kaminski, City of Oakland to Everyone:

And we can still accept your input on those sites as well

10:57:52 From *Diana Perez, City of Oakland to Everyone:

@Christopher, thanks!

10:59:16 From Christopher Norman to Everyone:

In order for more people to benefit from programs like the first-time homebuyer program, we need to support the City (and City Council) in identifying additional funding that could allow these opportunities to become more accessible.

11:00:36 From *Diana Perez, City of Oakland to Everyone:

Looking for legal services for low-income tenants or homeowners, covid/medical assistance, tax preparation assistance, or other services? Please see this list of resources collected by the General Plan Update team & share with your friends, neighbors, and family: https://cao-94612.s3.amazonaws.com/documents/Oakland-Housing-Resources_v1-1.pdf

11:00:54 From *Hazel O'Neil, Dyett & Bhatia to Everyone:

1. What are the housing issues you care about in Oakland?

2. How can Oakland add more housing while protecting tenants from displacement?

3. Have you heard of these City programs? What programs do you think are working well? Where are the gaps?

4. With limited resources available, how should the City target and prioritize these resources for new or expanded programs that meet the greatest community needs?

5. What other strategies and programs should be adopted as part of the Housing Element to protect tenants and keep people in their homes?

6. What did we not ask that you'd like to talk about? What else should we be asking?

11:01:21 From Christopher Norman to Everyone:

I also wanted to highlight this report from SPUR that speaks specifically to the negative effects of CA's Prop 13 on Oakland. Per their analysis, Prop 13 costs the City over $400 million that could be used for its departments, such as over $33 million for the housing department. See page 16 for more

11:01:21 From Christopher Norman to Everyone:

https://www.spur.org/sites/default/files/2022-02/SPUR_Burdens_and_Benefits.pdf

11:02:10 From Cantonese Interpreter - Weikuen Tang to Everyone:

現在開始分組房間討論，請需要廣東話傳譯服務的參加者利用舉手功能讓我們知道你需要幫忙

11:10:23 From Nic Ming to Everyone:

@Kiran, who is it that redirects the funding for that program to other programs? is it the mayor, the council, the dept?

11:41:05 From Chris White to Everyone:

Thanks Cathy and Phoenix, great comments.

11:41:40 From Cathy Leonard to Everyone:

Chris, perhaps I can let you know what District you live in? Wh is your councilperson?

11:41:44 From Phyllis Horneman to Everyone:

Speaking of speculators, assembly bill proposing 25% tax on flipping.

11:42:15 From Raymon Sutedjo-The to Everyone:

Prop 13 is incredibly unfair. One household can quite literally pay 10x the amount of property tax that their neighbor does. https://twitter.com/nextdoorsv/status/1502361966374916097

11:42:26 From Cathy Leonard to Everyone:

Thanks @Phylis, do you know the bill number?

11:45:20 From Phyllis Horneman to Everyone:

didn't write it down before the call, sorry.

11:45:39 From *Matt Alvarez-Nissen, Dyett & Bhatia to Everyone:

We also touched on a workforce housing overlay, forgot the mention!

11:46:16 From *Matt Alvarez-Nissen, Dyett & Bhatia to Everyone:

And the need to provide comprehensive education about what a Housing Element can and cannot do.

11:46:18 From Raul Maldonado to Everyone:

Moratorium on new MR housing may be a bad idea, and worsens displacement. Example of that could have been Mission District, SF

11:46:20 From Raul Maldonado to Everyone:

https://sfist.com/2016/08/08/campos_revives_controversial_missio/

11:47:09 From Cathy Leonard to Everyone:

MR housing is already displacing people. I can see it worsening with more MR housing.

11:47:09 From Raul Maldonado to Everyone:

Campos is currently an AD 17 (SF) candidate. He still doesn't believe in "supply side housing "

11:47:50 From Raul Maldonado to Everyone:

That's why we need dense and diverse housing, particularly prioritizing affordable goals, compared to the last Housing Cycle (HE #2 mentioned)

11:48:26 From Raul Maldonado to Everyone:

I missed HE #1 unfortunately:/

11:49:50 From Stuart Flashman to Everyone:

Ironically, providing affordable housing and housing for currently unhoused doesn't come cheap.

11:50:12 From Raymon Sutedjo-The to Everyone:

New housing today will become old housing down the line and increase supply. Blocking new housing makes the existing housing stock more expensive and even more so in the future.

11:50:54 From Brian Stanke to Everyone:

Hundreds of thousands of new Market rate housing is the only solution. But building enough to reduce prices… would reduce prices. So there will be a lot of talk but prices will keep going up, because that is want most people really want.

11:50:54 From Raul Maldonado to Everyone:

+1 to the above. That's "filtering" in housing, as time goes on

11:51:13 From *Diana Perez, City of Oakland to Everyone:

Our group also raised an Affordable Housing Overlay, which allows Affordable projects higher density and therefore can compete better in acquiring the land.

11:51:19 From Stuart Flashman to Everyone:

Need an excess profit tax to deter speculation and keep housing prices from continuing to escalate.

11:51:30 From Raul Maldonado to Everyone:

I wouldn't say it's the only solution. A combination of diverse housing, including missing middle housing, is needed

11:51:38 From Raul Maldonado to Everyone:

*it being MR only

11:51:49 From Cathy Leonard to Everyone:

@Stuart Flashman, so what is the answer? The number of unhoused are increasing. We need the County, State, and Feds to step up more. Look at all the money this country is spending on other countries, that money should be spent to take care of our own first.

11:52:08 From *Lakshmi Rajagopalan, City of Oakland to Everyone:

Also look at investing in long term resources - provide housing with support services - mental health, access to transit, quality food and move away from band-aid solutions - shelters/congregate setting esp. in a pandemic

11:52:35 From *Alison Moore, Dyett & Bhatia to Everyone:

English https://bit.ly/oakfeedback3

Español https://bit.ly/oakfeedback3esp

广东话 https://bit.ly/oakfeedback3canton

11:52:42 From Cathy Leonard to Everyone:

The trickle down theory is just that a theory, it never worked.

11:52:50 From Stuart Flashman to Everyone:

We need to be willing to tax ourselves to keep from becoming a 3rd world country.

11:52:53 From Raul Maldonado to Everyone:

Trickle down is for money

11:52:59 From Raul Maldonado to Everyone:

Filtering is for housing

11:53:16 From Raul Maldonado to Everyone:

People confuse the terms and properties of it.

11:53:19 From *Diana Perez, City of Oakland to Everyone:

We also had a great suggestion to incorporate more community education during these workshops -- to help us all learn more about how to implement some solutions.

11:53:37 From DONNA GRIGGSMURPHY to Everyone:

Thank you

11:53:43 From Raul Maldonado to Everyone:

Thanks y'all ❤️❤️

11:53:50 From *Christina Mun, Oakland HCD to Everyone:

Thanks everyone for a really great discussion

11:53:51 From Raul Maldonado to Everyone:

Have a good weekend

11:53:53 From *Shannon Bowman, City of Oakland to Everyone:

I meant to also add a comment from our group to consider a parcel tax to increase revenue

11:53:56 From Christopher Norman to Everyone:

I think it's particularly important to educate the public on *how* to engage and advocate - via City Council, the Planning Commission, State agencies, etc. That could help us determine where to put our attention and efforts to get more resources for Oakland

11:54:06 From Erica Dunkle to Everyone:

Thank you!

11:54:07 From DONNA GRIGGSMURPHY to Everyone:

Donna.Griggsmurphy HumanGood

11:54:15 From Christina Borowski to Everyone:

Thank you!

Oakland 2045: Housing Element Workshop #4 Report

Oakland's Housing Element and Housing Programs

JUNE 13, 2022

Prepared for

The City of Oakland

Appendix B: Zoom Poll Results 9
Appendix C: Zoom Chat 9

Project Background and Meeting Objectives

The City of Oakland is preparing a comprehensive update of its Housing Element, which is a component of Oakland's General Plan that will serve as a blueprint for housing the City's residents at all economic levels—including low-income residents and households with special needs—from 2023 through 2031. The Housing Element, one of seven State-required general plan elements, was last updated in 2015 and is now being updated to reflect more recent housing opportunities, challenges, and approaches that have emerged in the community, as well as comply with new State laws.

The fourth Housing Element workshop was part of Phase 1 of the General Plan update. The purpose of this workshop was to provide information about the General Plan and Housing Element update process and gather community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. This short report summarizes the key themes and ideas that emerged during the workshop. Detailed discussion notes can be found in the appendices.

Workshop Location and Format

The workshop took place on Thursday, June 9, 2022 from 6:00 pm to 8 pm online via Zoom meeting. The workshop was held in an online format due to public health concerns from the ongoing Covid-19 pandemic; this gave community members flexibility to attend the meeting from any location and drop in and out at any time. Approximately 20 community members attended the workshop. The workshop was simultaneously translated into Cantonese and Spanish.

The planning team gave a short presentation during the workshop that included an overview of the General Plan and Housing Element update process; an update on community outreach to date; definitions of gentrification, displacement, and affordable housing preservation; and staff from the City's Housing & Community Development (HCD) department shared a summary of current programs that focus on housing preservation, tenant protection, and neighborhood stabilization. The presentation concluded with a Q&A session for participant questions and comments.

During the presentation, attendees were asked to participate in one Zoom poll. The poll asked which Housing Action Plan Goal participants were most interested in discussing. 80% of chose Goal 3: Expand Affordable Housing Opportunities, 65% of participants chose Goal 1: Protect Oakland Residents from Displacement and Prevent Homelessness, and 50% chose Goal 2: Preserve and Improve Existing Affordable Housing Stock in addition to Goal 5: Promote Neighborhood Stability and Health. 20 out of 26 community members participated in this poll (76%). The complete results of the zoom poll results are presented in Appendix B.

After the presentation, a group discussion and Q&A with planning staff was initiated. Attendees were not required to participate in discussion, and some participated in a listening capacity exclusively.

Group Q&A Discussion

The second half of the meeting was spent in group discussion. Community members had the opportunity to share general input on the draft Housing Element or ask clarifying questions. Community members were also encouraged to give specific input on the sites inventory methodology, and thoughts on actions where interest has been raised. For the discussions, participants were able to ask questions to facilitating members of the planning team. Much of the discussion was oriented around the group Q&A, and group conversations were structured around the following questions:

1. **Overall:**
   - Generally, do you see anything that's missing in the draft Housing Element?
   - Is there anything in the draft Housing Element that needs to be changed or refined?
   - What actions would make the biggest difference? What should the City prioritize?
2. **Specific:**
   - Sites:
     - How do you feel about this approach to identifying sites?
     - Do you have any concerns about how sites were identified?
     - Do you have any other ideas on how the City can find more sites in higher resource areas, given State-mandated site requirements?
   - Actions:
     - What challenges or opportunities do you see with actions described?
     - Are there any concerns? How could they be strengthened?
     - What did we not ask that you'd like to talk about? What else should we be asking?

A summary of the Q&A discussion and common themes are described below. For more detailed notes, see Appendix A.

Q&A SUMMARY AND KEY THEMES

Due to the Q&A based format of the discussion, much of the conversation took shape around clarifying questions participants had regarding specific details of the Housing Element. Participants focused on several key topics including: the affordable housing overlay and site inventory, the relationship between zoning and racial justice and equity. Participants were also interested in specific sections of the housing element regarding vacancy taxes, and TOPA (Tenant Opportunity to Purchase Act) policy, and offered suggestions related to the site inventory interactive mapping tools available on the City of Oakland Website.

The affordable housing overlay and site inventory were key topics of discussion. Participants echoed the need for affordable housing sites around transit areas, but there were additional concerns about housing located near transit zones and associated environmental and equity concerns (freeway and other transit related pollution). Participants were also concerned about how the affordable housing overlay might affect the timeline of rezoning. Concerns were expressed about the potential obstruction of affordable housing projects due regulatory hurdles. Participants were concerned that improperly zoned projects would require a lengthy HE amendment if not included in the overlay. Participants proposed a more expansive overlay to

cover broader swathes of the city. Participants questioned if the overlay would take the form of one uniform district or if it would differ by area, suggesting it could be more effective if policies differed according to regional context. Additionally, participants expressed concern that ADUs will not be affordable to very low and low-income residents in high land-cost areas.

Participants were particularly concerned about the Housing Element's relationship to racial justice and equity. Much of the discussion focused on how construction of new affordable units in sites would serve low-income people and address patterns of racial segregation. Participants commented that rezoning should have been necessary prior to the establishment a site inventory (not after) to address historic racial and income disparities. Participants also suggested that if low-income housing was going to be established in low-income and racially concentrated areas, there should also be placed-based strategies to create opportunity in those areas. Several participants echoed the need to ensure that rezoning could open exclusionary areas to affordable housing. Participants identified the Rockridge area as a region of Oakland that has historically excluded low-income and minority residents and suggested that the affordability overlay have a more targeted approach to increase affordability and encourage desegregation in Rockridge and other similarly exclusive areas of Oakland.

In terms of specific policies and features of the Housing Element, participants discussed TOPA (Tenant Opportunity to Purchase Act) and expressed support for its inclusion in the housing element. It was suggested that "adjusting the first-time homebuyer income limits to include higher income ranges can also contribute to greater homeownership vs renting." Additionally, several participants had questions and comments regarding vacancy taxes in Oakland. Many participants commented on high vacancy rates visible in new luxury developments in Oakland, and several participants inquired about the process of incorporating new vacancy taxes into law and the role of the housing element in establishing new vacancy taxes.

Several had comments and suggestions regarding the interactive site inventory map on the City of Oakland website: Participants requested more detailed maps at the neighborhood and site-specific scale to determine the feasibility of each site more clearly for affordable housing development. One participant commented that she did not see activity in the site inventory in neighborhoods where her non-profit was interested in developing affordable housing. Several participants echoed the need for interactive map layers relating to racial and income disparities, which were described as necessary for an effectively identifying strategies for reducing racial segregation in Oakland through the site inventory.

Appendix A: Detailed Q&A Notes

Affordability Overlay and Rezoning

- Participant wanted to clarify what planning staff meant with regards to expanding affordable housing opportunities. The participant suggested that planners seemed focused on expanding for ELI (extremely low-income), and wanted to know if planning staff were also focused on the other two below market categories.
- Participant wanted to better understand the current state of the affordable housing overlay. The participant questioned "Is there one, or is the question about whether you start one at all?"
- Participant questioned, "Would it be crazy to apply the housing overlay to the whole city? Why exclude certain areas?"
  - Another participant commented in response that it might not make sense in the very high fire risk areas.
  - Participant commented in response, "I get the worry about risks in the hills, but that might create an unintentional modern redline if we're still letting rich people build new housing there…"
- One participant mentioned that they didn't see much activity in the maps in areas where the participant had interest in developing affordable housing in deep East Oakland.
  - Participant commented that they had observed areas zoned commercial are good for housing development. This person's non-profit organization wants to develop affordable senior housing (not 100%)
  - Zoning around coliseum is mostly commercial but participants organization would like to develop housing in this area due to its suitability. Some of the areas don't have ideal environmental conditions but there are people living on the street in those areas right now.
  - Participant wants to have conversations about how the overlay can help their non-profit organization develop affordable property along this corridor because they haven't been able to get it rezoned.
- Participant commented, "Commenting on overlay district, is it one uniform district or is it tailored to each district where it is applied? For example would it be different for Rockridge?"
- Participant expressed their concern that the housing element seems to inform where the housing overlay is placed. The participant remarked that if the overlay is placed based on data/spreadsheets and set for the next 8 years, there will be some projects that won't make it into the housing element.
  - Participant expressed concern that the previously mentioned timeline and standards make it difficult to change and rezone down the road. The participant suggested in response to this problem that it would be better to make the overlay broader so that it applies all over Oakland.

Site Inventory

- Participant commented, "There was an informal poll done within Rockridge of what should go on the vacant Broadway/Pleasant Valley site. High density affordable housing was by far the most popular option. The big problem of building affordable housing in Rockridge isn't community

opposition, it's very high land costs. I think community land trust may be a way to provide some permanently affordable units for existing housing."

- Participant questioned, "For sites listed in the inventory that needs to be rezoned, does the city have a sense of timeline on when it would pursue a zoning change of those sites?"
- Participant expressed skepticism about affordability of multiple units or ADUs in areas with high land costs.
  - Participant commented that the City's site inventory identifies 90% of anticipated ADUs will be affordable to very low and low income. Participants wanted to know what evidence there is that ADUs will serve these income levels.
- Participant identified that they were disabled wanted to clarify what low, moderate-income housing, and how to find good housing for people with disabilities
- Participant commented, "Questions about choosing the opportunity sites; one is about the DaVita Dialysis site, and much of it an empty space parking lot, DaVita is for-profit unlike normal medical center. We had done a study about feasibility and affordability and the two sites mentioned were identified as some of the most feasible for affordable housing."
  - Participant remarked, "If there's a history of housing being built on parking lots, that can be used to demonstrate that the "existing use" is not a constraint"
- Participant commented, "At the beginning of the presentation y'all asked for input about the site inventory. I don't really understand what the inventory impacts, is that linked to the housing element?"
- Participant commented that fire zones shouldn't be the only climate threat factored into the site inventory. The participant also proposed considering that Oakland's flat lands may be much more impacted by extreme heat, high urban pollution, as well as trapped smoke from wildfires. The participant commented that "One of the housing + EJ considerations for where and how to build."

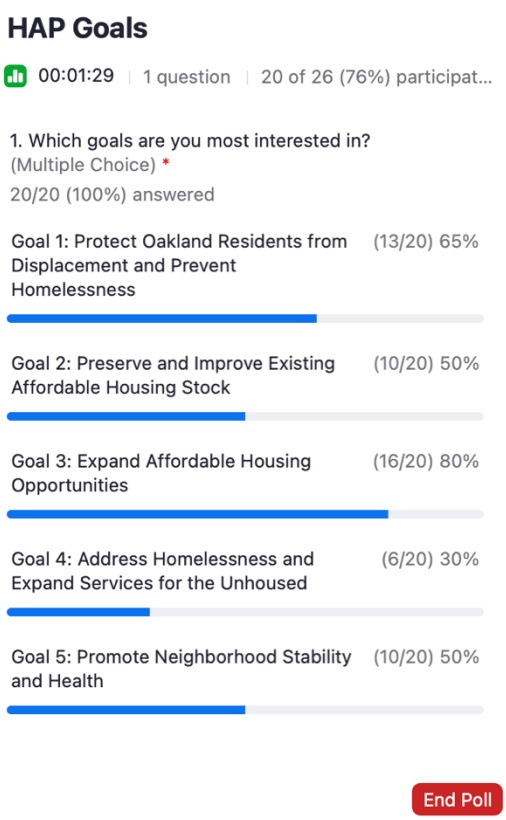
Racial Segregation and Equity

- Participant questioned, "What zoning density does the City anticipate for sites rezoned for "missing middle"? The participant also wanted to know if the expansion of this housing type would serve low income and address patterns of racial segregation.
- Participant commented, "The fair housing assessment in appendix D did not consider the existing zoning pattern and did not account for historic discrimination pre-existing in this zoning pattern. The city should have re-zoned first."
  - If the city is only going to locate affordable housing in low-income neighborhoods, there also must be place based strategy to improve neighborhoods.
- Participant suggested, "You need to have a program to open up exclusionary areas to affordable housing."
- Participant commented, "There is no analysis of how zoning in places like Rockridge have contributed to racial discrimination, and that's a glaring problem."

Vacancy Taxes

- Participant commented "I'm not sure where this falls with the Housing Action Plan goals or the site identification on the previous slide," and suggested that "we need to talk about all of the new luxury apartment towers sitting 50%+ empty, because of ridiculous rent."

- Participant questioned, "What is the status of the occupancy tax for luxury apartment towers, which have had high vacancy rates for several months/years? It is infuriating to walk around downtown Oakland and see half-empty buildings with rent starting at $3k for studio apartments."
- Participant commented, "State law does not allow vacant existing units to be counted toward meeting future needs for purposes of the site inventory, though a program to put those units into use could certainly be included."
- Participant commented that she didn't see an analysis of existing vacancies and apartments as potential sites for affordable housing. The participant remarked that in downtown Oakland there are many vacant apartments even though people are houseless in direct proximity to empty buildings.



Tenant Option to Purchase (TOPA)

- Participant commented, "Adjusting the first-time homebuyer income limits to include higher income ranges can also contribute to greater homeownership vs renting, and as a result contribute to more stable and healthier communities/neighborhoods in Oakland."
- Participant wanted to discuss more the vacancy program. Participant questioned "is a house used as an air bnb a vacant home?"
- Participant remarked, "If TOPA is in the housing element, a better vacancy tax should be too!"
- Participant questioned, "TOPA is a policy that has to be passed by city council, so why can't vacant property tax also get passed?"
- Participant remarked, "Setting a target date to 2026 seems very far out there and urges the city to put TOPA consideration in general election in 2024. City council doesn't have draft in front of it yet."

Interactive Maps and Specific Clarifications

- Participant requested, "Please give us some maps that are at the neighborhood scale, and would also like the maps to have racial and income overlays. How is the site inventory going to result in reduce racial segregation? "
  - Participant commented, "The state has a wealth of resources about AFFH and different map layers containing information about racial discrimination which should be added."
- Participant commented, "Left-field question - Would the city consider allowing single stair apartments? Is that at all within the space of the housing element?"
- Participant wanted to know why housing is planned in a toxic & polluted area. The participant questioned "How can the city, county stop planning this way?"
- Participant mentioned that apartments in US require two exits, which results in either very large or very small housing. Could city modify this requirement?

Appendix B: Zoom Poll Results

Appendix C: Zoom Chat

10:02:53 From Alison Moore (Dyett & Bhatia) to Lakshmi Rajagopalan, City of Oakland(Direct Message):

I think we can start, just let people trickle in

10:04:16 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

Sorry, too many people stopping by my cube today

10:04:25 From Matt Weber to Everyone:

Matt Weber - Ellis Partners

10:04:29 From Keith Diggs to Everyone:

Keith Diggs (Yes In My Back Yard / YIMBY Law)

10:04:30 From Nicole Merino Tsui to Everyone:

Morning all! Nicole Merino Tsui, WOEIP

10:04:30 From Darbi Howard, East Oakland Collective to Everyone:

Darbi Howard, East Oakland Collective

10:04:33 From Trisha Barua, she/they to Everyone:

Good morning! Trisha Barua, Policy Analyst, Oakland Starting Smart and Strong

10:04:36 From David Wooley, UC Berkeley Goldman School to Everyone:

David Wooley, UC Berkeley Goldman School

10:04:36 From Rajeev Bhatia, Dyett & Bhatia to Everyone:

Rajeev Bhatia, Dyett & Bhatia

10:04:37 From Raul Maldonado to Everyone:

Raul Maldonado - East Bay YIMBY Colead

10:04:38 From Nora (she/her/ella) to Everyone:

Nora Martinez (she/her/ella)- Parent Voices Oakland (PVO)

10:04:40 From Lakshmi Rajagopalan, City of Oakland to Everyone:

Please add your name in the chatbox with your organization

10:04:43 From Aaron Eckhouse (California YIMBY) to Everyone:

hello! I'm Aaron Eckhouse (he/him), with California YIMBY & also East Bay for Everyone

10:04:46 From Sarah Karlinsky, SPUR (she/her) to Everyone:

HI Everyone, this is Sarah Karlinsky, SPUR

10:04:49 From Warren Logan to Everyone:

Warren Logan, Transport Oakland

10:04:50 From Courtney Welch to Everyone:

Courtney Welch, CaRLA

10:04:54 From Susie Criscimagna to Everyone:

Susie Criscimagna, with Eden Housing

10:04:59 From Lakshmi Rajagopalan, City of Oakland to Everyone:

https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element

10:05:09 From Nico Nagle (he/him) - HAC to Everyone:

Nico Nagle, Housing Action Coalition

10:05:26 From Jeff Levin, EBHO to Everyone:

Good morning - Jeff Levin, Policy Director with East Bay Housing Organizations

10:06:20 From Charles Reed to Everyone:

Charles Reed WOEIP/Emerald New Deal

10:06:23 From MarÃa DomÃnguez ACPHD Health Equity (she/ella) to Everyone:

Good morning, buenos dÃas. MarÃa D. DomÃnguez, local policy coordinator with the Alameda County Public Health Department- Health Equity, Policy and Planning (HEPP) team.

10:06:31 From Tracey Nails-Bell to Everyone:

Tracey Nails-Bell, Housing service provider for A Diamond in the Ruff Incorporated

10:07:05 From Lakshmi Rajagopalan, City of Oakland to Everyone:

Please mute yourself if you are not speaking

10:07:06 From Laura Kaminski, City of Oakland to Everyone:

Laura Kaminski, Strategic Planning Manager, City of Oakland

10:07:29 From Beth Altshuler Munoz to Everyone:

Beth Altshuler Munoz, Consultant to the West Oakland Community Action Plan AB 617 Process (BAAQMD & WOEIP)

10:08:41 From Beth Altshuler Munoz to Everyone:

Will you be sharing the slides?

10:08:54 From Lakshmi Rajagopalan, City of Oakland to Everyone:

Beth, we can share the slides after this meeting

10:09:02 From Beth Altshuler Munoz to Everyone:

thanks Lakshmi!

10:11:27 From Jeff Levin, EBHO to Everyone:

Oakland's RHNA increase is actually a lower percentage than the region as a whole.

10:11:35 From Charles Reed to Everyone:

Despite the increase how do we assure that the disenfranchised needs are met.

10:12:28 From Lakshmi Rajagopalan, City of Oakland to Everyone:

If you just joined, please add your name in the chat with your organization

10:12:49 From Lakshmi Rajagopalan, City of Oakland to Everyone:

The draft housing element is available here: https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element

10:13:09 From Charles Reed to Everyone:

Who do we target, and how do we penalize them when lower income needs are not met?

10:13:48 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

try to wrap the presentation by 10.25

10:15:11 From Lakshmi Rajagopalan, City of Oakland to Everyone:

An overview presentation summarizing the draft Housing Element is also available on the City Website - https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element#draft-housing-element-resources

10:17:47 From Sarah Karlinsky, SPUR (she/her) to Everyone:

Are the state-mandates on site size for low income housing, or for all housing that can count towards RHNA requirements?

10:18:28 From Aaron Eckhouse (California YIMBY) to Everyone:

Sarah, I believe they are specific to Lower Income sites, but cities can also use small sites for their Lower Income Inventory if they can point to a track record of development on similar sites

10:18:55 From Sarah Karlinsky, SPUR (she/her) to Everyone:

Thnx

10:19:27 From Charles Reed to Everyone:

Identifying sites is a first step, but it means nothing without meaningful accountability measures with quantifiable financial repercussions for non compliance.

10:19:46 From Audrey Lieberworth, City of Oakland to Everyone:

Here is a link to an interactive map of the draft sites inventory (from Table C-25, Appendix C): https://oakgis.maps.arcgis.com/apps/mapviewer/index.html?webmap=6e5a81ace7ce4a9b906da42f75b4ddd4

10:22:13 From Lakshmi Rajagopalan, City of Oakland to Everyone:

@sarah the guidance is for affordable housing for sites between 0.5 and 10 acres. For sites less than 0.5 ac and larger than 10 ac, we have to demonstrate a track record like Aaron mentions

10:22:35 From Sarah Karlinsky, SPUR (she/her) to Everyone:

Thank you.

10:23:16 From Lakshmi Rajagopalan, City of Oakland to Everyone:

The guidance from the State is here: https://www.hcd.ca.gov/community-development/housing-element/docs/sites_inventory_memo_final06102020.pdf

10:26:43 From Lakshmi Rajagopalan, City of Oakland to Everyone:

RD, RM zones

10:27:22 From Alison Moore (Dyett & Bhatia) to Everyone:

Matt- you can check out Action 3.2.1, which addresses missing middle housing through zoning standards

10:27:53 From Alison Moore (Dyett & Bhatia) to Everyone:

https://oakland.konveio.com/draft-2023-2031-general-plan-housing-element

10:28:37 From Aaron Eckhouse (California YIMBY) to Everyone:

does the city have a published methodology for when to count new market housing as Moderate Income? I know San Jose does

10:31:45 From Jeff Levin, EBHO to Everyone:

TOPA/COPA combines a right of first offer with a right of first refusal, but does not require a discounted price

10:33:40 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

we can just thank him for his comment. no need to respond

10:35:13 From Audrey Lieberworth, City of Oakland to Everyone:

@Aaron - I'll follow up and check to see if the City has a published methodology

10:35:49 From Aaron Eckhouse (California YIMBY) to Everyone:

thanks! I think it will be important for Oakland to find a way to produce Moderate Income housing without subsidies/deed restriction

10:41:36 From Jeff Levin, EBHO to Everyone:

Aaron - I believe that historically the City has only counted moderate income housing if its deed restricted as it has not tracked rental rates or sales prices on newly produced housing.

10:41:48 From Sarah Karlinsky, SPUR (she/her) to Everyone:

Thank you so much for the responses to my questions. On the upzoning contemplated, is that discussed explicitly anywhere in the document beyond Policy 3.4? If you could let me know, I would appreciate it.

10:41:58 From Trisha Barua, she/they to Everyone:

First 5 Alameda County letter on Oakland Housing Element: http://www.first5alameda.org/files/Comment%20Draft%202023%20to%202031%20General%20Plan%20Housing%20Element.pdf

10:42:07 From David Wooley, UC Berkeley Goldman School to Everyone:

One other point: I am pleased to see parts of the Element devoted to remediation of environmental contaminated sites. Urge the city to consider that housing located near freeways, Oakland Ports and other heavy duty trucking concentrations to be included in definition of a contaminated sites and to help building owners in those locations to retrofit air filtration to reduce exposure of residents to transport related emissions. David Wooley, UC Berkeley, Goldman School davidwooley@berkeley.edu

10:43:28 From Keith Diggs to Everyone:

that's what I want to know too

10:44:42 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

can you respond to the maps?

10:45:00 From Aaron Eckhouse (California YIMBY) to Everyone:

I agree that table would be a great resource!

10:45:32 From Audrey Lieberworth, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

Could you answer the last of Warren's questions? Let them know we are working on this

10:47:28 From Alison Moore (Dyett & Bhatia) to Audrey Lieberworth, City of Oakland(Direct Message):

There's a table by tract, I will share that

10:47:59 From Lakshmi Rajagopalan, City of Oakland to Everyone:

Table C-21

10:49:18 From Jeff Levin, EBHO to Everyone:

Yes, a summary analysis of what C-21 actually tells us would be useful

10:49:45 From Sarah Karlinsky, SPUR (she/her) to Everyone:

+1 on summary of C-21. Thank you!

10:50:19 From Aaron Eckhouse (California YIMBY) to Everyone:

yes, very hard to parse C-21 on a parcel by parcel basis

10:51:03 From Brent Bucknum to Everyone:

I want to strongly second David Wooley's comments. We should not be putting housing next to freeways and we need to have a fund to in the GP to retrofit existing near road housing exposures.

10:53:21 From Warren Logan to Everyone:

One more comment: please consider ALL of AC Transitâ€™s Rapid corridors, not just the BRT line, when considering upzoning opportunities.

10:54:06 From Aaron Eckhouse (California YIMBY) to Everyone:

+1

10:55:08 From Alison Moore (Dyett & Bhatia) to Lakshmi Rajagopalan, City of Oakland(Direct Message):

Is this format ok? We did have other targeted discussion questions but I think we're getting good input

10:55:13 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

yes

10:55:16 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

this is great

10:55:38 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

these Qs are only if we go off topic

10:55:50 From Alison Moore (Dyett & Bhatia) to Lakshmi Rajagopalan, City of Oakland(Direct Message):

sounds good

10:56:06 From Raul Maldonado to Everyone:

+1 to @Brent. I'd be careful about exclusively putting housing next to freeways, as noise & car pollution on minority communities is a concern. I do love the alternative mentioned, @Warren's comment, which is above ^^^ â€" upzoning opportunities near **all** transit corridors.

10:57:11 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

will you save the chat or do you want me to?

10:57:29 From Alison Moore (Dyett & Bhatia) to Lakshmi Rajagopalan, City of Oakland(Direct Message):

I can save chat but please do too just in case

10:57:51 From Darbi Howard, East Oakland Collective to Everyone:

Agreed and current developers have already been violating current zoning rules and not being held to their proposals approved.

10:58:13 From Darbi Howard, East Oakland Collective to Everyone:

For decadesâ€¦

11:01:13 From Charles Reed to Everyone:

with all the new buildings being built that impact fee account should at least be 300 million by now

11:01:32 From Raul Maldonado to Everyone:

+1 to Charles feelings. From attending some housing projects, I would say homeowners do block housing projects that have between 15-40% BMR housing w/MR. It's hard to get that diversification, and thus we get mostly >95% BMR or MR buildings we see today :/

11:03:30 From Lakshmi Rajagopalan, City of Oakland to Everyone:

We do not have a map yet

11:03:41 From Lakshmi Rajagopalan, City of Oakland to Everyone:

we are working on identifying the areas

11:03:51 From Beth Altshuler Munoz to Everyone:

What can the city do to improve the funding tools and flexibility of local lenders / CDFI's for affordable housing?

11:04:36 From Sarah Karlinsky, SPUR (she/her) to Everyone:

+1 on upzoning the flatiron parcel and upzoning in Rockridge in general.

11:06:29 From Ms.Margaret Gordon to Everyone:

need to leave for my other meeting

11:07:20 From Warren Logan to Everyone:

+1 everything Aaron said

11:08:34 From Raul Maldonado to Everyone:

+1 To Aaronâ€™s notes, as well.

11:09:05 From Nico Nagle (he/him) - HAC to Everyone:

+1 to Aaron

11:10:05 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

pending project = permit has been filed right?

11:10:55 From Charles Reed to Everyone:

Is there a way for the public to monitor the impact fee account?

11:12:21 From Alison Moore (Dyett & Bhatia) to Lakshmi Rajagopalan, City of Oakland(Direct Message):

Yes, I believe so

11:13:58 From Beth Altshuler Munoz to Everyone:

I'm not a super housing expert tracking all the Oakland policies....BUT I remember hearing that in 2008 Oakland removed the requirement to break ground after 18 months of approval bc of the recession. has that rule been put back into place?

11:15:08 From Tracey Nails-Bell to Everyone:

So A Diamond in the Ruff is working with The Oakland Community Land Trust on a project for more affordable housing overlay with ADU'S. Is there a certain number of units that can be placed on the current acquisition of land? Which may include the Zoning in that part of Oakland? Which is right off Seminary

11:16:37 From Lakshmi Rajagopalan, City of Oakland to Everyone:

Comment from Charles: Is there a way for the public to track who paid impact fee's, for what, and where and how are those funds being used?

11:16:54 From Sonja Trauss to Everyone:

+1 AFFH is not just an analysis

11:17:19 From Charles Reed to Everyone:

Transparency is paramount

11:19:18 From Aaron Eckhouse (California YIMBY) to Everyone:

+1 to this comment from Jeff

11:20:24 From Trisha Barua, she/they to Everyone:

+1 for Jeff's comment

11:21:00 From Lakshmi Rajagopalan, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):

we will just thank him and consider his comments

11:21:09 From Christina Mun, Oakland HCD to Everyone:

Impact fees are reported on annually as informational reports to CED and Council. It will go to 6/28 CED for this year, here is last year's: https://oakland.legistar.com/LegislationDetail.aspx?ID=4769988&GUID=9F0A7046-EED8-4631-A4D1-BF5FFC1CA301&Options=&Search=

11:23:31 From Audrey Lieberworth, City of Oakland to Everyone:

email comments to generalplan@oaklandca.gov

11:25:35 From Darbi Howard, East Oakland Collective to Everyone:

I agree Sonja- The poor air and no green space is a disadvantage to improvements

11:27:13 From Darbi Howard, East Oakland Collective to Everyone:

Nico- this speaks to many issues with the City in terms of getting things actually done or more of the same!

11:27:29 From Raul Maldonado to Everyone:

+1 to Nico on kudos to AH overlay, and providing Berkeley as an example.

11:27:40 From Audrey Lieberworth, City of Oakland to Everyone:

@Tracey - can you send us an email about the project so that we can better understand the project and the zoning for the site? generalplan@oaklandca.gov

11:28:41 From Jeff Levin, EBHO to Everyone:

AH overlay - allowing approval by-right for affordable housing should be citywide anywhere that the project is consistent with zoning, including density bonus

11:29:21 From Lakshmi Rajagopalan, City of Oakland to Everyone:

https://www.oaklandca.gov/events/general-plan-update-housing-element-workshop-4

11:29:29 From Jeff Levin, EBHO to Everyone:

Please ensure that the next draft includes an Executive Summary and a clear table on NEW policies

11:29:34 From Aaron Eckhouse (California YIMBY) to Everyone:

agree with Jeff, and I think the city should move to ministerial approval generally

11:29:47 From Aaron Eckhouse (California YIMBY) to Everyone:

thank you for convening this meeting!

11:29:54 From Laura Kaminski, City of Oakland to Everyone:

https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports

11:30:22 From Laura Kaminski, City of Oakland to Everyone:

I included a link to impact fee reports, included are reports on the collection of the fees

11:30:25 From Nico Nagle (he/him) - HAC to Everyone:

Thank you for convening as well! And +1 to ministerial approval

11:31:01 From Sarah Karlinsky, SPUR (she/her) to Everyone:

I need to leave now. Thank you so much for holding this meeting it was very helpful and I learned alot.

11:31:14 From Raul Maldonado to Everyone:

Need to leave now; Thank you!

11:31:17 From Tracey Nails-Bell to Everyone:

Thank you for today's information!

Appendix J. Summary of Preliminary Draft Missing Middle, Other Planning Code Amendments, and Zoning Map Amendments to Facilitate More Housing Proposal

As part of its Housing Action Plan, the City has identified several zoning reforms that would further increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods, and reducing the exposure to air pollution, toxic and other environmental hazards in environmental justice communities. Below is a summary of the proposed rezonings from the Housing Action Plan that will go to City Council for adoption in June/July of 2023. The proposed changes are also available as an interactive map.

PURPOSE

The proposed missing-middle and other related Planning Code amendments will encourage a diversity of housing types such as flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and accessory dwelling units (ADUs) in currently single-family-dominated neighborhoods, and along corridors, transit-proximate areas, and high resource neighborhoods and remove constraints on the development of housing. The City is also proposing two overlay zones:

1. Affordable Housing Overlay (AHO) Zone: The proposed Affordable Housing Overlay (AHO) Zone is intended to create and preserve affordable housing restricted for extremely low, very low, low, and/or moderate-income households (as defined in California Government Health and Safety Code Sections 50093, 50105, and 50106 50052.5 and in Oakland Planning Code Section 17.107.020). By-right approvals for 100% affordable housing projects will apply in the AHO Zone.
2. Housing Sites Overlay Zone: The City is proposing through Action 3.4.10 to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) that build 20 percent or more of the units as affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. This could include by-right approval and/or other incentives to be further evaluated. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle), if redeveloped, will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay.

The proposed missing-middle Planning Code amendments will:

- Reduce minimum lot size and setback standards where appropriate throughout the Planning Code to facilitate small lot development.
  - Minimum lot size is reduced to 2,000 square feet (sf.) in RD and RM Residential Zones.
  - Residential side setbacks are reduced to 3 ft. for lots less than 3,000 sf. and 4 ft. for lots 3,000 sf. or greater in RD and RM Zones.

Preliminary Draft Proposal

  - Residential rear setbacks are reduced from 20 ft to 10 ft. in RD Zones and reduced from 15 ft. to 10 ft. in RM Zones.
  - Residential front setbacks in the RD and RM-1 and RM-2 Zones are reduced from 20 ft. to 15 ft (there is an existing provision that allows for further reduction if structures on either side of the parcel are closer than the setback requirement).
- Allow for encroachments of regular units into the rear setback, similar to encroachments allowed for Accessory Dwelling Units (ADUs).
- Revise density, maximum building heights, and minimum lot size standards to permit more housing units per lot where appropriate throughout the city in Hillside Residential RH-4, all Detached Residential (RD) Zones, all Residential Mixed Housing Type (RM) Zones, and Urban Residential RU-1 and RU-2 Zones.
  - Create new RD Zone to replace RD-1 and RD-2 so that both zones now have the same standards.
  - All RD, RM and RU Residential Zones will allow 4 or more units on lots that are 4,000 sf or more and 2 units on any lot smaller than 4,000 sf.
  - Maximum floor area ratio (FAR) and lot coverage has been increased to 55% lot coverage in RD and RM Zones, and they only apply to one and two residential units (FAR only applies to lots with a slope greater than 20%).
  - Minimum lot frontage for RD and RM Zones is reduced from 25 ft. to 20 ft.
  - Height limits increased for RD from 25 ft. wall height and 30 ft. roof height to 30 ft. wall height and 35 ft. roof height.
  - Height limits increased for RM-1, RM-2, and RM-3 from 25 ft. wall height and 30 ft. roof height to 35 ft. height for both wall and roof.
  - Open space requirements reduced in RD, RM, and RU Zones.
  - No minimum parking requirements for residential facility types within ½ mile of a major transit stop and if located farther than ½ mile from a major transit stop a minimum of 0.5 parking spaces per unit is required (reduced from 1 parking space per unit).
- Create a new residential facility type called "Two- to Four-Family Residential Facility" that would replace the current "Two-Family Residential Facility" Type throughout the Planning Code; and change the definition of a "Multifamily Residential Facility" from the current 3 or more units to 5 or more units.
- Eliminate all conditionally permitted densities throughout Planning Code (densities will all be by right); and the current requirement for a Major Conditional Use Permit for 3 or more dwelling units in the RM-2 Zone; 7 or more dwelling units in the RM-3 or RM-4 Zone; and for any project that exceeds the basic or permitted density resulting in 7 or more dwelling units in the RU or CBD-R Zones.

OTHER PLANNING CODE AMENDMENTS

Other Planning Code amendments to facilitate more housing:

- Increase permitted densities in areas near transit and along transit corridors through zoning map changes (see Figure 2 and Table 2 below for densities).

Preliminary Draft Proposal

- Reduce parking requirements to lower the cost of new housing production and allow for more housing to be built.
  - No minimum parking requirements for residential facility types within ½ mile of a major transit stop and if located farther than ½ mile from a major transit stop a minimum of 0.5 parking spaces per unit is required (reduced from 1 parking space per unit).
  - No minimum parking requirements within the S-15 Transit Zone, and D-CO-1 Zone in addition to the existing no minimum parking requirements in the CBD, D-LM, and S-2 Zones.
  - Reduced maximum parking requirements in the CBD, S-15 Transit Zone, D-CO-1, D-LM, and S-2 Zones.
  - No minimum parking requirements for 100% affordable housing developments.
- Reduce and revise open space regulations to allow flexibility on its onsite location and configuration to ensure that more of the allowed buildable area can be dedicated to new housing units.
- Remove an existing disincentive to mixed-use development outside of downtown – current regulations require that any nonresidential floor area over 3,000 sf. counts against the amount of lot area that can be used to calculate allowed residential density. The proposed amendments would utilize citywide the standard that applies now in downtown only and allow the total lot area to be used as the basis for computing both maximum nonresidential FAR and maximum residential density for mixed use projects.
- Remove conditional use permit requirements for grocery stores in food deserts.
- Remove conditional use permit requirements in RM Zone food deserts for food sales, cafes, restaurants, and retail activities in spaces that are 600 square feet or less,
- Streamline design review procedures and approve more project types ministerially.
- Remove unnecessary barriers in the Planning Code to the approval of Emergency Shelters and Residential Care activities.
- Reduce the allowed intensity of commercial and industrial activities permitted in the Housing and Business Mix (HBX) Commercial Zones, particularly HBX-1, to minimize impacts on the residential uses existing in and nearby these zones.
- Reduce allowed heavier industrial uses within certain distances of residential zones in the Commercial Industrial Mix (CIX), General Industrial (IG), and Industrial Office (IO) Zones to minimize impacts on the residential uses nearby.

Table 1 lists the existing and proposed zoning changes for missing middle zones, and Figure 1 shows existing zoning and proposed zoning changes. Table 2 lists the existing and proposed zoning changes for Commercial Zones associated with the key corridors in Figure 2. Figure 2 shows existing and proposed height changes along key corridors. Figure 3 shows existing and proposed height changes as part of the Downtown Oakland Specific Plan.

Preliminary Draft Proposal

Figure 3: Existing/Proposed Downtown Oakland Specific Plan Heights

Preliminary Draft Proposal

Summary of Preliminary Draft Affordable Housing Overlay Zone (AHO) Proposal

The City of Oakland (City) has completed a public hearing draft update to the 2023-2031 Housing Element as part of Phase 1 of the 2045 General Plan Update (GPU) process. As part of the Housing Element's Housing Action Plan, the City has identified several zoning reforms, including an Affordable Housing Overlay (AHO) Zone (see Action 3.3.5 in the Housing Action Plan).

The proposed AHO Zone is intended to create and preserve affordable housing restricted for extremely low, very low, low, and/or moderate-income households (as defined in California Health and Safety Code Sections 50093, 50105, and 50106). By-right approvals for 100% affordable housing projects will apply in the AHO Zone.

Generally, the AHO Zone would allow for a bonus height for eligible affordable housing projects, as well as relaxation of other listed development standards and an elimination of any maximum residential density standards.

The City would apply the AHO Zone (Shown in Figure 4) on top of existing Hillside Residential-4 (RH-4), Detached Unit Residential (RD), Mixed Housing Type Residential (RM), Urban Residential (RU), Housing and Business Mix Commercial (HBX), Central Estuary District (D-CE), Neighborhood Center Commercial (CN), Community Commercial (CC), Central Business District (CBD), Regional Commercial (CR), Transit-Oriented Development Commercial (S-15), Broadway Valdez District (D-BV), Lake Merritt District (D-LM), and Coliseum Area District (D-CO) zones. Property development standards for each zone are shown in Table 1.

The AHO zone would not be applied to these underlying zoning districts if they are in the designated very high fire hazard severity zone (VHFHSZ). The City is studying the potential for areas that might be appropriate to be included in the VHFHSZ based on further analysis that is currently being conducted from consultants, including evacuation scenarios. In no circumstances would the AHO Zone apply within the S-9 Fire Safety Protection Combining Zone.

Table 1: Base Zone and Property Development Standards in AHO

Zone	*Property Development Standards*
RH-4*, RD, RM, RU, HBX, D-CE	• Allow bonus height (of two additional stories) • Allow additional lot coverage of up to (70%) • Allow reduced rear setback (up to 10 feet.) • Allow unlimited density that fits within the allowed building envelope of new or existing structures • Additional height to allow a minimum of 65 feet is being studied for larger lots that could accommodate a 6-story affordable housing development. • Reduced open space requirements. • No minimum parking requirements.
CN, CC, CBD, CR, S-15, DB-V, D-LM, D-CO	• Allow bonus height (two - three additional stories) • Allow unlimited density that fits within the allowed building envelope of new or existing structures • Additional height to allow a minimum of 65 feet is being studied for larger lots that could accommodate a 6-story affordable housing development.

Preliminary Draft Proposal

	• Reduced open space requirements. • No minimum parking requirements.

*= RH-4 parcels that are not located in the Very High Fire Hazard Severity Zone.

EXEMPTIONS

The AHO zone would not apply in:

- Areas of the Very High Fire Hazard Severity Zone. Some parts of the Very High Fire Hazard Severity Zone may be included in the AHO zone, pending the result of further analysis on safety impacts. In no circumstances will the S-9 combining district be covered by the AHO.
- Parcels with Designated City, State, and Federal Historic Landmarks.

The AHO *height* addition would not apply in:

- Areas with established historical significance known as Areas of Primary Importance (API), if the site currently contains a structure that contributes to the Area of Primary Importance. This shall only apply to APIs that are currently designated.
  - Projects in these areas must meet certain design requirements and preserve structures that contribute to the Area of Primary Importance.

BY RIGHT APPROVAL

100 percent affordable projects proposed within the AHO zone would be subject to a ministerial approval process. A proposed project would not be subject to CEQA and would not be appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed-income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as potentially applying the overlay to select areas within the VHFHSZ . The City will allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay.

Preliminary Draft Proposal

Table 2: Existing Heights vs. Proposed AHO Height Changes

Zoning District[1]	*Maximum Building Heights*		
	Existing Heights	*Proposed Height Changes as part of Missing Middle Zoning Changes*	*Proposed Height Changes as part of AHO*[2]

Preliminary Staff Proposal

Figure 4. AHO Zone

Preliminary Draft Proposal

Summary of Preliminary Draft Housing Sites Overlay Zone Proposal

As part of the Housing Element's Housing Action Plan, the City has identified several zoning reforms.

For Action 3.4.10 the City will create a Housing Sites Overlay Zone to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) that build 20 percent or more of the units as affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. This could include by-right approval and/or other incentives to be further evaluated. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle) will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay.

The proposed Housing Sites Overlay Zone is intended to facilitate housing opportunities in Oakland and to bring attention to those sites that the City intends for housing to be built pursuant to the Housing Element.

APPLICATION OF THE HOUSING SITE OVERLAY ZONE

The Housing Site Overlay zone would apply to all housing sites identified in the Housing Sites Inventory in the Housing Element (See Housing Sites Inventory Map, Figure C-1 and Table C-26 in Appendix C).

Requirements

A minimum percentage of housing must be built on the site, with some allowance for limited non-residential on the site, such as the ground floor.

Incentives

Under a by right approval process, as per State requirements, any projects providing at least 20% affordable housing units proposed within the Housing Opportunity Sites Overlay Zone would be subject to a ministerial approval process. A proposed project would not be subject to CEQA and would not be appealable. This would provide greater certainty to projects building at least 20% affordable units that if the project is within the Housing Opportunity Overlay Zone and meets the objective zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process. This will also provide an incentive for mixed income buildings to be built on these designated opportunity sites.

Preliminary Draft Proposal

Appendix J. Summary of Preliminary Draft Missing Middle, Other Planning Code Amendments, and Zoning Map Amendments to Facilitate More Housing Proposal

As part of its Housing Action Plan, the City has identified several zoning reforms that would further increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods, and reducing the exposure to air pollution, toxic and other environmental hazards in environmental justice communities. Below is a summary of the proposed rezonings from the Housing Action Plan that will go to City Council for adoption in June/July of 2023. The proposed changes are also available as an interactive map.

PURPOSE

The proposed missing-middle and other related Planning Code amendments will encourage a diversity of housing types such as flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and accessory dwelling units (ADUs) in currently single-family-dominated neighborhoods, and along corridors, transit-proximate areas, and high resource neighborhoods and remove constraints on the development of housing. The City is also proposing two overlay zones:

1. Affordable Housing Overlay (AHO) Zone: The proposed Affordable Housing Overlay (AHO) Zone is intended to create and preserve affordable housing restricted for extremely low, very low, low, and/or moderate-income households (as defined in California Government Health and Safety Code Sections 50093, 50105, and 50106 50052.5 and in Oakland Planning Code Section 17.107.020). By-right approvals for 100% affordable housing projects will apply in the AHO Zone.
2. Housing Sites Overlay Zone: The City is proposing through Action 3.4.10 to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) that build 20 percent or more of the units as affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. This could include by-right approval and/or other incentives to be further evaluated. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle), if redeveloped, will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay.

The proposed missing-middle Planning Code amendments will:

- Reduce minimum lot size and setback standards where appropriate throughout the Planning Code to facilitate small lot development.

Preliminary Draft Proposal

- Minimum lot size is reduced to 2,000 square feet (sf.) in RD and RM Residential Zones.
- Residential side setbacks are reduced to 3 ft. for lots less than 3,000 sf. and 4 ft. for lots 3,000 sf. or greater in RD and RM Zones.
- Residential rear setbacks are reduced from 20 ft to 10 ft. in RD Zones and reduced from 15 ft. to 10 ft. in RM Zones.
- Residential front setbacks in the RD and RM-1 and RM-2 Zones are reduced from 20 ft. to 15 ft (there is an existing provision that allows for further reduction if structures on either side of the parcel are closer than the setback requirement).

- Allow for encroachments of regular units into the rear setback, similar to encroachments allowed for Accessory Dwelling Units (ADUs).
- Revise density, maximum building heights, and minimum lot size standards to permit more housing units per lot where appropriate throughout the city in Hillside Residential RH-4, all Detached Residential (RD) Zones, all Residential Mixed Housing Type (RM) Zones, and Urban Residential RU-1 and RU-2 Zones.
  - Create new RD Zone to replace RD-1 and RD-2 so that both zones now have the same standards.
  - All RD, RM and RU Residential Zones will allow 4 or more units on lots that are 4,000 sf or more and 2 units on any lot smaller than 4,000 sf.
  - Maximum floor area ratio (FAR) and lot coverage has been increased to 55% lot coverage in RD and RM Zones, and they only apply to one and two residential units (FAR only applies to lots with a slope greater than 20%).
  - Minimum lot frontage for RD and RM Zones is reduced from 25 ft. to 20 ft.
  - Height limits increased for RD from 25 ft. wall height and 30 ft. roof height to 30 ft. wall height and 35 ft. roof height.
  - Height limits increased for RM-1, RM-2, and RM-3 from 25 ft. wall height and 30 ft. roof height to 35 ft. height for both wall and roof.
  - Open space requirements reduced in RD, RM, and RU Zones.
  - No minimum parking requirements for residential facility types within ½ mile of a major transit stop and if located farther than ½ mile from a major transit stop a minimum of 0.5 parking spaces per unit is required (reduced from 1 parking space per unit).
- Create a new residential facility type called "Two- to Four-Family Residential Facility" that would replace the current "Two-Family Residential Facility" Type throughout the Planning Code; and change the definition of a "Multifamily Residential Facility" from the current 3 or more units to 5 or more units.
- Eliminate all conditionally permitted densities throughout Planning Code (densities will all be by right); and the current requirement for a Major Conditional Use Permit for 3 or more dwelling units in the RM-2

Preliminary Draft Proposal

Zone; 7 or more dwelling units in the RM-3 or RM-4 Zone; and for any project that exceeds the basic or permitted density resulting in 7 or more dwelling units in the RU or CBD-R Zones.

OTHER PLANNING CODE AMENDMENTS

Other Planning Code amendments to facilitate more housing:

- Increase permitted densities in areas near transit and along transit corridors through zoning map changes (see Figure 2 and Table 2 below for densities).
- Reduce parking requirements to lower the cost of new housing production and allow for more housing to be built.
  - No minimum parking requirements for residential facility types within ½ mile of a major transit stop and if located farther than ½ mile from a major transit stop a minimum of 0.5 parking spaces per unit is required (reduced from 1 parking space per unit).
  - No minimum parking requirements within the S-15 Transit Zone, and D-CO-1 Zone in addition to the existing no minimum parking requirements in the CBD, D-LM, and S-2 Zones.
  - Reduced maximum parking requirements in the CBD, S-15 Transit Zone, D-CO-1, D-LM, and S-2 Zones.
  - No minimum parking requirements for 100% affordable housing developments.
- Reduce and revise open space regulations to allow flexibility on its onsite location and configuration to ensure that more of the allowed buildable area can be dedicated to new housing units.
- Remove an existing disincentive to mixed-use development outside of downtown – current regulations require that any nonresidential floor area over 3,000 sf. counts against the amount of lot area that can be used to calculate allowed residential density. The proposed amendments would utilize citywide the standard that applies now in downtown only and allow the total lot area to be used as the basis for computing both maximum nonresidential FAR and maximum residential density for mixed use projects.
- Remove conditional use permit requirements for grocery stores in food deserts.
- Remove conditional use permit requirements in RM Zone food deserts for food sales, cafes, restaurants, and retail activities in spaces that are 600 square feet or less,
- Streamline design review procedures and approve more project types ministerially.
- Remove unnecessary barriers in the Planning Code to the approval of Emergency Shelters and Residential Care activities.
- Reduce the allowed intensity of commercial and industrial activities permitted in the Housing and Business Mix (HBX) Commercial Zones, particularly HBX-1, to minimize impacts on the residential uses existing in and nearby these zones.

Preliminary Draft Proposal

- Reduce allowed heavier industrial uses within certain distances of residential zones in the Commercial Industrial Mix (CIX), General Industrial (IG), and Industrial Office (IO) Zones to minimize impacts on the residential uses nearby.

Table 1 lists the existing and proposed zoning changes for missing middle zones, and Figure 1 shows existing zoning and proposed zoning changes. Table 2 lists the existing and proposed zoning changes for Commercial Zones associated with the key corridors in Figure 2. Figure 2 shows existing and proposed height changes along key corridors. Figure 3 shows existing and proposed height changes as part of the Downtown Oakland Specific Plan.

Summary of Preliminary Draft Affordable Housing Overlay Zone (AHO) Proposal

The City of Oakland (City) has completed a public hearing draft update to the 2023-2031 Housing Element as part of Phase 1 of the 2045 General Plan Update (GPU) process. As part of the Housing Element's Housing Action Plan, the City has identified several zoning reforms, including an Affordable Housing Overlay (AHO) Zone (see Action 3.3.5 in the Housing Action Plan).

The proposed AHO Zone is intended to create and preserve affordable housing restricted for extremely low, very low, low, and/or moderate-income households (as defined in California Health and Safety Code Sections 50093, 50105, and 50106). By-right approvals for 100% affordable housing projects will apply in the AHO Zone.

Generally, the AHO Zone would allow for a bonus height for eligible affordable housing projects, as well as relaxation of other listed development standards and an elimination of any maximum residential density standards.

The City would apply the AHO Zone (Shown in Figure 4) on top of existing Hillside Residential-4 (RH-4), Detached Unit Residential (RD), Mixed Housing Type Residential (RM), Urban Residential (RU), Housing and Business Mix Commercial (HBX), Central Estuary District (D-CE), Neighborhood Center Commercial (CN), Community Commercial (CC), Central Business District (CBD), Regional Commercial (CR), Transit-Oriented Development Commercial (S-15), Broadway Valdez District (D-BV), Lake Merritt District (D-LM), and Coliseum Area District (D-CO) zones. Property development standards for each zone are shown in Table 1.

The AHO zone would not be applied to these underlying zoning districts if they are in the designated very high fire hazard severity zone (VHFHSZ). The City is studying the potential for areas that might be appropriate to be included in the VHFHSZ based on further analysis that is currently being conducted from consultants, including evacuation scenarios. In no circumstances would the AHO Zone apply within the S-9 Fire Safety Protection Combining Zone.

Table 1: Base Zone and Property Development Standards in AHO

Zone	*Property Development Standards*
RH-4*, RD, RM, RU, HBX, D-CE	• Allow bonus height (of two additional stories) • Allow additional lot coverage of up to (70%) • Allow reduced rear setback (up to 10 feet.) • Allow unlimited density that fits within the allowed building envelope of new or existing structures • Additional height to allow a minimum of 65 feet is being studied for larger lots that could accommodate a 6-story affordable housing development. • Reduced open space requirements. • No minimum parking requirements.
CN, CC, CBD, CR, S-15, DB-V, D-LM, D-CO	• Allow bonus height (two - three additional stories) • Allow unlimited density that fits within the allowed building envelope of new or existing structures

Preliminary Draft Proposal

	• Additional height to allow a minimum of 65 feet is being studied for larger lots that could accommodate a 6-story affordable housing development. • Reduced open space requirements. • No minimum parking requirements.

*= RH-4 parcels that are not located in the Very High Fire Hazard Severity Zone.

EXEMPTIONS

The AHO zone would not apply in:

- Areas of the Very High Fire Hazard Severity Zone. Some parts of the Very High Fire Hazard Severity Zone may be included in the AHO zone, pending the result of further analysis on safety impacts. In no circumstances will the S-9 combining district be covered by the AHO.
- Parcels with Designated City, State, and Federal Historic Landmarks.

The AHO *height* addition would not apply in:

- Areas with established historical significance known as Areas of Primary Importance (API), if the site currently contains a structure that contributes to the Area of Primary Importance. This shall only apply to APIs that are currently designated.
  - Projects in these areas must meet certain design requirements and preserve structures that contribute to the Area of Primary Importance.

BY RIGHT APPROVAL

100 percent affordable projects proposed within the AHO zone would be subject to a ministerial approval process. A proposed project would not be subject to CEQA and would not be appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed-income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as potentially applying the overlay to select areas within the VHFHSZ . The City will allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay.

Preliminary Draft Proposal

Table 2: Existing Heights vs. Proposed AHO Height Changes

Preliminary Staff Proposal

Figure 4: Affordable Housing Overlay

SOURCE: City of Oakland, 2021; ALAMEDA County GIS, 2021; Dyett & Bhatia, 2022

Summary of Preliminary Draft Housing Sites Overlay Zone Proposal

As part of the Housing Element's Housing Action Plan, the City has identified several zoning reforms.

For Action 3.4.10 the City will create a Housing Sites Overlay Zone to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) that build 20 percent or more of the units as affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. This could include by-right approval and/or other incentives to be further evaluated. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle) will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay.

The proposed Housing Sites Overlay Zone is intended to facilitate housing opportunities in Oakland and to bring attention to those sites that the City intends for housing to be built pursuant to the Housing Element.

APPLICATION OF THE HOUSING SITE OVERLAY ZONE

The Housing Site Overlay zone would apply to all housing sites identified in the Housing Sites Inventory in the Housing Element (See Housing Sites Inventory Map, Figure C-1 and Table C-26 in Appendix C).

Requirements

A minimum percentage of housing must be built on the site, with some allowance for limited non-residential on the site, such as the ground floor.

Incentives

Under a by right approval process, as per State requirements, any projects providing at least 20% affordable housing units proposed within the Housing Opportunity Sites Overlay Zone would be subject to a ministerial approval process. A proposed project would not be subject to CEQA and would not be appealable. This would provide greater certainty to projects building at least 20% affordable units that if the project is within the Housing Opportunity Overlay Zone and meets the objective zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process. This will also provide an incentive for mixed income buildings to be built on these designated opportunity sites.

Preliminary Draft Proposal

Christina Mun, Interim Director
Housing & Community Development Department
City of Oakland
250 Frank H. Ogawa Plaza
Oakland, CA 94612

Dear Christina Mun:

RE: City of Oakland's 6th Cycle (2023-2031) Draft Housing Element

Thank you for submitting the City of Oakland's (City) draft housing element update received for review on June 29, 2022. Pursuant to Government Code section 65585, subdivision (b), the California Department of Housing and Community Development (HCD) is reporting the results of its review. Our review was facilitated by a conversation on August 12, 2022 with Audrey Lieberworth, Acting Planner III, Lakshmi Rajagopalan, Principal Planner, Michael Branson, Deputy City Attorney, Laura Kaminski, Strategic Planning Manager and William Gilchrist, Planning Director, as well as your consultants, Rajeev Bhatia, Alison Moore, and Mayu Tanaka. In addition, HCD considered comments from several stakeholders and members of the community, pursuant to Government Code section 65585, subdivision (c).

The draft element addresses many statutory requirements; however, revisions will be necessary to comply with State Housing Element Law (Article 10.6 of the Gov. Code). The enclosed Appendix describes the revisions needed to comply with State Housing Element Law.

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. Throughout the housing element process, the City should continue to engage the community, including organizations that represent lower-income and special needs households, by making information regularly available and considering and incorporating comments where appropriate. Please be aware, any revisions to the element must be posted on the local government's website and to email a link to all individuals and organizations that have previously requested notices relating to the local government's housing element at least seven days before submitting to HCD.

For your information, pursuant to Assembly Bill 1398 (Chapter 358, Statutes of 2021), if a local government fails to adopt a compliant housing element within 120 days of the statutory deadline (January 31, 2023), then any rezoning to accommodate the regional housing needs allocation, including for lower-income households, shall be completed no later than one year from the statutory deadline. Otherwise, the local government's housing element will no longer comply with State Housing Element Law, and HCD may revoke its finding of substantial compliance pursuant to Government Code section 65585, subdivision (i). Please be aware, if the City fails to adopt a compliant housing element within one year from the statutory deadline, the element cannot be found in substantial compliance until rezones to accommodate a shortfall of sites pursuant to Government Code section 65583, subdivision (c),paragraph (1), subparagraph (A) and Government Code section 65583.2, subdivision (c) are completed.

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. Throughout the housing element process, the City must continue to engage the community, including organizations that represent lower-income and special needs households, by making information regularly available while considering and incorporating comments where appropriate. Please be aware, any revisions to the element must be posted on the local government's website and to email a link to all individuals and organizations that have previously requested notices relating to the local government's housing element at least seven days before submitting to HCD.

Several federal, state, and regional funding programs consider housing element compliance as an eligibility or ranking criteria. For example, the CalTrans Senate Bill (SB) 1 Sustainable Communities grant; the Strategic Growth Council and HCD's Affordable Housing and Sustainable Communities programs; and HCD's Permanent Local Housing Allocation consider housing element compliance and/or annual reporting requirements pursuant to Government Code section 65400. With a compliant housing element, the City will meet housing element requirements for these and other funding sources.

For your information, some general plan element updates are triggered by housing element adoption. HCD reminds the City to consider timing provisions and welcomes the opportunity to provide assistance. For information, please see the Technical Advisories issued by the Governor's Office of Planning and Research at: https://www.opr.ca.gov/planning/general-plan/guidelines.html.

HCD appreciates the hard work and dedication of Audrey Lieberworth, Acting Planner III, Lakshmi Rajagopalan, Principal Planner, Michael Branson, Deputy City Attorney, Laura Kaminski, Strategic Planning Manager and William Gilchrist, Planning Director, as well as your consultants, Rajeev Bhatia, Alison Moore, and Mayu Tanaka in preparation of the City's housing element. If you have any questions or need additional technical assistance, please contact Shawn Danino, of our staff, at shawn.danino@hcd.ca.gov.

Sincerely,

Paul McDougall
Senior Program Manager

Enclosure

APPENDIX
CITY OF OAKLAND

The following changes are necessary to bring the City's housing element into compliance with Article 10.6 of the Government Code. Accompanying each recommended change, we cite the supporting section of the Government Code.

Housing element technical assistance information is available on HCD's website at https://www.hcd.ca.gov/hcd-memos. Among other resources, the housing element section contains HCD's latest technical assistance tool, *Building Blocks for Effective Housing Elements (Building Blocks),* available at https://www.hcd.ca.gov/building-blocks and includes the Government Code addressing State Housing Element Law and other resources.

A. Housing Needs, Resources, and Constraints

1. *Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2…shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)*

   Local Data and Knowledge: While the element incorporates some analysis based on local data and knowledge, the element should review and incorporate public comments into the assessment of fair housing.

   Racially Concentrated Areas of Affluence (RCAAs): The element should analyze RCAA. The analysis should evaluate pattern and trends at a local level (comparing areas within the City) and regional level (comparing the City to the region). Based on the analysis, the City should consider additional actions (not limited to the regional housing need allocation (RHNA)) to promote housing mobility and improve new housing opportunities throughout the City.

   Regional Analysis: The element generally describes local patterns and trends with regards to disproportionate housing needs but must also analyze Oakland relative to the rest of the region regarding disproportionate housing needs, including displacement risks.

   Affirmatively Furthering Fair Housing (AFFH) and Identified Sites: While the element provides some analysis of the sites in its inventory with regards to AFFH, it should analyze the lack of units in several higher opportunity areas (p. C-84), including but not limited to Rockridge (labeled North Oakland / Adams Point) and the area surrounding the Rockridge Bay Area Rapid Transit (BART) station. A complete analysis should fully assess how the site inventory is expected to improve and/or exacerbate fair housing conditions. This analysis should address the location, number of units by income group, magnitude of the impact and any isolation of the RHNA and could consider topics such as existing or proposed anti-displacement policies and place-based investments, and how such strategies will improve fair housing conditions when paired with the identified sites. Based on the outcomes of this analysis, the element should add or modify programs.

Goals and Actions: While the element provides additional analysis and identifies contributing factors to fair housing issues, it does not include sufficient action to overcome patterns of segregation and foster inclusive communities. As a result, programs must be added as appropriate to sufficiently respond to contributing factors to fair housing issues. In addition, all actions related to AFFH must contain specific commitment, timing, geographic targeting and metrics or numerical targets.

The element may, for example, as discussed on the August 11, 2022 call, revise Program 3.5.3 to make a firm commitment for removing design review requirements and establishing development standards for missing middle housing types. The element may also, for example, revise Action 3.5.3 to establish a social housing pilot program. Additionally, the element should commit to assessing and revising programs through a mid-cycle review. Please see HCD's AFFH memo for more information: https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf#page=23.

2. *Include an analysis of population and employment trends and documentation of projections and a quantification of the locality's existing and projected needs for all income levels, including extremely low-income households. (Gov. Code, § 65583, subd. (a)(1).)*

   Include an analysis and documentation of household characteristics, including level of payment compared to ability to pay, housing characteristics, including overcrowding, and housing stock condition. (Gov. Code, § 65583, subd. (a)(2).)

   Analyze any special housing needs such as elderly; persons with disabilities, including a developmental disability; large families; farmworkers; families with female heads of households; and families and persons in need of emergency shelter. (Gov. Code, § 65583, subd. (a)(7).)

   Extremely Low-Income Households (ELI): While the element includes some information on ELI households relative to race, it should also evaluate tenure, overpayment, resources and strategies available and the gap and magnitude of housing needs to better formulate policies and programs.

   Housing Conditions: The element provides some information on age of the housing stock. However, it must estimate the number of units in need of rehabilitation and replacement. For example, the analysis could include estimates from a recent windshield survey or sampling, estimates from the code enforcement agency, or information from knowledgeable organizations. For additional information, see the Building Blocks at http://www.hcd.ca.gov/community-development/building-blocks/housing-needs/housing-stock-characteristics.shtml.

   Persons Experiencing Homelessness: The element provides analysis of persons experiencing homelessness. However, given the magnitude of the need, the City should evaluate resources and strategies, gaps in addressing needs and formulate appropriate strategies to address the unmet need. For example, the element could identify and

evaluate capacity for emergency shelters, permanent supportive housing and other housing or shelter types relative to needs and address unmet needs through program actions.

3. *An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)*

   Parcel Listing: The element must include a parcel listing or sites inventory intended to accommodate the regional housing need allocation (RHNA). The sites inventory should list parcels by assessor parcel number, size, general plan designation, zoning, existing use, realistic residential capacity and anticipated affordability. The description of existing uses should be sufficiently detailed to facilitate an analysis of the potential for additional development and may utilize indicators of potential such as age of structure, existing versus allowable floor area and improvement to land value. If a site is owned by a city or county, the description must include whether there are any plans to dispose of the property.

   Pipeline and Potential Development Projects: While the element may utilize pipeline and potential development projects toward the RHNA, it must also demonstrate their affordability and availability in the planning period. Affordability must be demonstrated based on actual sales price, rent level or other mechanisms ensuring affordability (e.g., deed restrictions). Availability should account for the likelihood of project completion in the planning period and should address the status, necessary steps to issue permits, any barriers to development and other relevant factors. Given the element's reliance on pipeline projects, the element must include programs with actions that commit to facilitating development and monitoring approvals of the projects (e.g., coordination with applicants to approve remaining entitlements, supporting funding applications, expediating approvals and monitoring of project progress, including rezoning or identification of additional sites, if necessary).

   Realistic Capacity: While the element lists realistic residential capacity assumptions by various zoning districts (Table C-11), it should provide supporting information for these assumptions based on recent development history, including affordability. In addition, this calculation should also account for the likelihood of 100 percent non-residential development. The element lists recent trends for residential development in non-residential zones but should also consider the development activity of 100 percent non-residential uses. For example, the element could analyze all development activity in these nonresidential zones, how often residential development occurs and adjust residential capacity calculations, policies, and programs accordingly. This analysis may incorporate any proposed policies such as residential performance standards, prohibition of commercial uses and should clarify that all zones allow residential uses, particularly 100 percent residential uses.

   Nonvacant Sites: The element must include an analysis demonstrating the potential for additional development on nonvacant sites. While the element mentions underutilized

sites were identified based on assessed value (AV) and floor area (FAR) ratios, it must support the validity of these assumption in demonstrating the potential for redevelopment. For example, the element could utilize recent development activity. In addition, the element should consider additional factors such as building age, structural conditions, expressed interest in residential development and reflect those values in the sites inventory. Finally, the element should account for the extent existing uses impede additional residential development including market demand for the existing use and existing leases or contracts that would perpetuate the existing use or prevent additional residential development. For example, based on comments received, the City should also address the crediting of a site at 288 9th Avenue, where public comments reported a recently completed nonresidential project being credited for 254 units.

In addition, HCD notes the element currently does not rely on nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households. If future versions of the housing element rely upon nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households, the housing element must demonstrate existing uses are not an impediment to additional residential development and will likely discontinue in the planning period. (Gov. Code, § 65583.2, subd. (g)(2).) Absent findings (e.g., adoption resolution) based on substantial evidence, the existing uses will be presumed to impede additional residential development and will not be utilized toward demonstrating adequate sites to accommodate the RHNA.

City-Owned Sites: The element briefly describes its strategy to use City-Owned sites to accommodate a portion of the RHNA for lower income households (p. C-77). However, the element should identify which sites specifically are owned by the City and include a program with numerical objectives that ensures compliance with the Surplus Land Act, provides incentives and actions along with a schedule to facilitate development of City-owned sites. Actions should include outreach with developers, issuing requests for proposals, incentives, fee waivers, priority processing and financial assistance. The element should also update its Actions (3.3.1 and 3.3.4, for example) to describe a schedule of actions and, as described on the August 11, 2022 call, the timeline for completion of an Environmental Impact Report for these sites.

Alternative Adequate Sites: The sites inventory uses the adequate sites alternative to credit 82 units across two assisted housing sites that were acquired by the City to preserve affordability (p. C-27). However, the analysis must confirm compliance with all relevant requirements pursuant to Government Code 65583.1. This analysis may utilize HCD Alternate Adequate Sites checklist available at https://www.hcd.ca.gov/adequate-sites-alternative.

Zoning for a Variety of Housing Types:

- *Emergency Shelters*: The element mentions emergency shelters are permitted in various areas throughout the City. However, the element should also clarify shelters are permitted without discretionary action and discuss available acreage, including typical parcel sizes and the presence of reuse opportunities. In addition, the analysis should address proximity to transportation and services and any conditions inappropriate for human habitability.

- *Permanent Supportive Housing*: Supportive housing shall be a use by-right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses pursuant to Government Code section 65651. The element must demonstrate compliance with this requirement and include programs if necessary.
- *Employee Housing*: The element must demonstrate zoning is consistent with the Employee Housing Act (Health and Safety Code, § 17000 et seq.) or add or modify programs. Specifically, section 17021.5 requires employee housing for six or fewer employees to be treated as a single-family structure and permitted in the same manner as other dwellings of the same type in the same zone.
- *Small Units*: Pursuant to public comments received, the City should consider a variety of naturally affordable housing types as part of its strategy, including efficiency units, cohousing units, and any units tied to a social housing programs and pilots. The element may also, for example, consider limited equity condominiums, pursuant to public comments.
- *Single Room Occupancies (SRO)*: The element describes the zones in which SROs are currently permitted. However, given the success of SROs in providing housing for Extremely Low Income (ELI) households, the element should also describe how it will encourage SRO development.

4. *An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and for persons with disabilities as identified in the analysis pursuant to paragraph (7), including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures... (Gov. Code, § 65583, subd. (a)(5).)*

   Land Use Controls: The element identifies many land use controls as potential constraints on a variety of housing types. However, the analysis should analyze land use controls independently and cumulatively with other land use controls. The analysis should specifically address requirements related to Floor Area Ratios, open space requirements, setbacks, and limits on allowable densities. The analysis should address any impacts on cost, supply, housing choice, affordability, timing, approval certainty and ability to achieve maximum densities and include programs to address identified constraints.

   Processing and Permit Procedures: The element lists design review criteria (p. F-57), however, it should also evaluate those criteria for impacts on cost, timing and especially approval certainty. For example, one finding is the project will “enhance desirable neighborhood characteristics”. The element should explain how that finding is applied and met, whether there are any impacts on cost, timing and approval certainty and add or modify programs to address any identified constraints.

   Housing for Persons with Disabilities: The element describes its approval procedures for group homes for seven or more persons (p. 592), including limitations or approval criteria. However, the element should analyze these approval criteria as constraints on

approval certainty and objectivity for housing for persons with disabilities and include programs as appropriate.

B. Housing Programs

1. *Include a program which sets forth a schedule of actions during the planning period, each with a timeline for implementation, which may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the Housing Element through the administration of land use and development controls, the provision of regulatory concessions and incentives, and the utilization of appropriate federal and state financing and subsidy programs when available. The program shall include an identification of the agencies and officials responsible for the implementation of the various actions. (Gov. Code, § 65583, subd. (c).)*

   A large share of the programs lists implementation timelines as "ongoing." While this may be appropriate for some programs, programs with specific implementation actions must include completion dates resulting in beneficial impacts within the planning period. Programs that should be modified to add discrete timing include (but are not limited to) 1.1.3 (Strengthen Ellis Act Ordinance), 1.1.5 (Provide eviction defense and implement a right to counseling), 1.1.6 (Expand rent control in a limited manner to maintain affordability), 1.1.9 (Continue and expand the Tenant Protection Ordinance), 1.1.10 (Enforce the tenant right to return), 2.1.1 (Support home rehabilitation programs), 2.1.6 (Explore funding to improve indoor air quality), 2.2.5 (Extend local replacement unit provisions), 3.2.5 (Reduce constraints to the development of ADUs), 3.3.2 (Expansion of Section 8 vouchers), 3.3.3 (City of Oakland Rental Assistance Program), 3.3.4 (Develop permanent housing affordable to extremely-low income households on public land), 3.3.9 (Adjusting or waiving City fees and payment timing for affordable housing developments), 3.3.12 (Continue the Acquisition and Conversion to Affordable Housing Program), 3.3.13 (Expand availability of predevelopment funding and low-cost debt products for affordable housing development), 3.3.14 (Evaluate the creation of a leveraged acquisition fund or debt equity fund for small sites to support housing acquisition), 3.3.17 (Support low-income grassroots and BIPOC affordable housing developers), 3.7.1 (Incentivize development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs), 3.7.4 (Implement the sponsor-based Housing Assistance Program), 3.7.5 (Encourage a range of unit sizes including housing that matches a local household needs and family sizes), 3.8.1 (Continue to implement the Vacant Property Tax), 4.1.4 (Provide needed support and income to people who have been homeless), 4.2.4 (Increase oversight of homelessness strategies, investments and encampment operations with Homelessness Advisory Commission), 4.3.1 (Finance Construction and Maintenance of permanent supportive housing and deeply affordable housing), 5.1.1 (Provide First time home ownership incentives), 5.2.4 (Secure funding from AHSC Program), and 5.2.7 (Encourage new affordable housing in higher resource neighborhoods).

Additionally, several programs and actions have timelines that should be moved earlier in the planning period to ensure a beneficial impact. Examples include Programs 3.3.10 (Enhanced Infrastructure Financing District) and 3.5.2 (Support Housing Cooperatives).

Additionally, programs must have specific commitment to clear outcomes or deliverables. Several programs include actions with no description of how those actions will be implemented (e.g., “support”, “study”, “explore”, “evaluate”, etc.,). For example, Program 3.5.2 states that the City will "support housing cooperatives, co-living, and cohousing models". However, it does not state when and how their housing types will be available. Programs should be amended, as appropriate to include specific commitment. Examples include Programs 1.1.5 (Eviction Defense), 1.1.10 (Tenant Right to Return), 1.1.13 (Preventing Displacement / Homelessness), 3.3.15 (Citywide Density Bonus Expansion), 3.3.16 (Consider revising Real Estate Transfer Tax), 3.4.3 (Revising Parking Standards), 3.4.4 (Revising Open Space Requirements) and 5.2.9 (Accountability Measures for Housing Programs).

Based on public comments received, the City should also consider revising Action 2.2.5 to develop procedures that find and support displaced tenants after demolitions, as well as ensuring that projects pursuing SB-330 protections have sufficient replacement units for tenants at risk of displacement.

2. *Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city’s or county’s share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Government Code section 65584.09. Sites shall be identified as needed to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing. (Gov. Code, § 65583, subd. (c)(1).)*

   As noted in Finding A3, the element does not include a complete site analysis; therefore, the adequacy of sites and zoning were not established. Based on the results of a complete sites inventory and analysis, the City may need to add or revise programs to address a shortfall of sites or zoning available to encourage a variety of housing types.

3. *Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities. (Gov. Code, § 65583, subd. (c)(3).)*

   As noted in Finding A4, the element requires a complete analysis of potential governmental and nongovernmental constraints. Depending upon the results of that

analysis, the City may need to revise or add programs and address and remove or mitigate any identified constraints.

4. *Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics. (Gov. Code, § 65583, subd. (c)(5).)*

   As noted in Finding A1, the element must include a complete assessment of fair housing. Based on the outcomes of that analysis, the element must add or modify programs. Programs to AFFH should go beyond status quo actions, include specific commitment, timing, geographic targeting and metrics or numerical targets and should generally address housing mobility, encourage new housing choices in higher resource areas, improve place-based strategies toward community revitalization and protect existing residents from displacement.

5. *The housing program shall preserve for low-income household the assisted housing developments identified pursuant to paragraph (9) of subdivision (a)... (Gov. Code, § 65583, subd. (c)(6).)*

   Program 2.2.2 (Preserve Affordable Housing) should be revised with specific commitment to comply with noticing requirements, coordinate with qualified entities, assist with funding or support funding applicants and provide education and support to tenants.

6. *Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent... (Gov. Code, § 65583, subd. (c)(7).)*

   Program 3.2.4 (Incentives for Accessory Dwelling Units (ADU)) should commit to should monitor permitted ADUs and affordability every other year and take appropriate action such as adjusting assumptions or rezoning within a specified time (e.g., 6 months) if assumptions are not realized.

C. Quantified Objectives

Establish the number of housing units, by income level, that can be constructed, rehabilitated, and conserved over a five-year time frame. (Gov. Code, § 65583, subd. (b)(1 & 2).)

While the element includes quantified objectives for new construction, rehabilitation and conservation by income group, it could consider quantified objectives for conservation (beyond at-risk preservation). For your information, the quantified objectives do not represent a ceiling, but rather set a target goal for the City to achieve, based on needs, resources, and constraints.

D. Public Participation

Local governments shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the element shall describe this effort. (Gov. Code, § 65583, subd.(c)(9).)

The City made extensive efforts to reach the public, including hosting events and requesting input on suitable sites. Nonetheless, several comments questioned the lack of units in North Oakland, specifically around the Rockridge BART station, as concerns around why several eligible parcels were excluded from the inventory, and these issues must be addressed.

The City should also commit to revising Action 3.7.5 to studying second egress requirements. It can also discuss prioritizing cohousing opportunities, reducing lot size minimums in some zones to 3,000 square feet, finding suitable parcels for housing in the Dimond District, developing preapproved missing middle housing types in high opportunity areas, developing programs to address indoor air quality, analyze the cost reductions expected from removing parking minimums, analyze how the placement of historic districts relate AFFH and establish firmer commitments around the development of live/work units.

APPENDIX K: City of Oakland Responses to State HCD Findings Letter

The City of Oakland submitted the initial draft Housing Element for review to the California Department of Housing and Community Development (State HCD) on June 30, 2022. Staff received findings letter from State HCD on September 28, 2022. The following provides a brief summary of the changes and where they were made in the revised draft.

The following changes are necessary to bring the City's housing element into compliance with Article 10.6 of the Government Code. Accompanying each recommended change, we cite the supporting section of the Government Code.

Housing element technical assistance information is available on HCD's website at https://www.hcd.ca.gov/hcd-memos. Among other resources, the housing element section contains HCD's latest technical assistance tool, *Building Blocks for Effective Housing Elements (Building Blocks),* available at https://www.hcd.ca.gov/building-blocks and includes the Government Code addressing State Housing Element Law and other resources.

A. Housing Needs, Resources, and Constraints

1. *Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2…shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)*

   Local Data and Knowledge: While the element incorporates some analysis based on local data and knowledge, the element should review and incorporate public comments into the assessment of fair housing.

   - The revised draft incorporates public comments from Deeply Rooted and East Bay Housing Organizations (EBHO) to include additional information on historic context of discriminatory housing actions, the legacy of exclusionary zoning as a significant housing constraints and barrier to affirmatively furthering fair housing, and the negative impacts of California's Costa Hawkins Law, 1990's tech boom and Mayor Brown's 10k market rate housing plan to make Oakland attractive for SF tech workers. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11).

   - The Housing Element also includes a new Appendix L, which details how substantive comments from each comment letter was specifically addressed.

Racially Concentrated Areas of Affluence (RCAAs): The element should analyze RCAA. The analysis should evaluate pattern and trends at a local level (comparing areas within the City) and regional level (comparing the City to the region). Based on the analysis, the City should consider additional actions (not limited to the regional housing need allocation (RHNA)) to promote housing mobility and improve new housing opportunities throughout the City.

- The revised draft of Appendix D: Assessment of Fair Housing include a local and regional analysis of RCAAs in section D.3 pages D-34 and D-35. An analysis of how the Sites Inventory improves integration of lower and moderate income households is available in Table D-11 on page D-72. Table D-9 on page D-74 identifies additional actions to address issues of segregation and, disproportionate housing needs, and access to opportunity.

Regional Analysis: The element generally describes local patterns and trends with regards to disproportionate housing needs but must also analyze Oakland relative to the rest of the region regarding disproportionate housing needs, including displacement risks.

- Section D.5 of Appendix D, Disproportionate Housing Needs and Displacement Risks, now includes additional regional assessment on the following pages:
- Cost burden: p. D-54
- Overcrowding: p. D-58
  Displacement Risk: p. D-61

Affirmatively Furthering Fair Housing (AFFH) and Identified Sites: While the element provides some analysis of the sites in its inventory with regards to AFFH, it should analyze the lack of units in several higher opportunity areas (p. C-84), including but not limited to Rockridge (labeled North Oakland / Adams Point) and the area surrounding the Rockridge Bay Area Rapid Transit (BART) station. A complete analysis should fully assess how the site inventory is expected to improve and/or exacerbate fair housing conditions. This analysis should address the location, number of units by income group, magnitude of the impact and any isolation of the RHNA and could consider topics such as existing or proposed anti-displacement policies and place-based investments, and how such strategies will improve fair housing conditions when paired with the identified sites. Based on the outcomes of this analysis, the element should add or modify programs.

- Appendix D, tables D-10 through D-11, address how the sites inventory furthers lower and moderate income housing in higher resource communities.
- Additional sites in Rockridge have been added to the Sites Inventory, adding an additional 973 units of housing in this area.
- Chapter 3 section 3.3 includes analysis of affirmative efforts to locate affordable housing in high-resource areas like Rockridge. In the revised draft, additional sites have been added to the Rockridge area, summarized in Appendix C. In response to this comment, an additional action, 5.2.9 (in tandem with 5.2.8) has been added to the Housing Action Plan to prioritize improvements that target geographies and needs of low- resourced and disproportionately burdened communities, including

through actions related to parks and facilities, access to transit, and other place-based strategies. Action 3.4.1 has also been revised to further enhance strategies to improve fair housing conditions in high-resource neighborhoods.

- Other actions that support fair housing and integration include Action 3.3.5, which creates an Affordable Housing Overlay; Action 3.3.7, which would study targeted implementation of an inclusionary requirement in higher-resource neighborhoods; Action 3.4.1, which revises development standards and increases height/densities in resource-rich areas such as Rockridge; among others.

Goals and Actions: While the element provides additional analysis and identifies contributing factors to fair housing issues, it does not include sufficient action to overcome patterns of segregation and foster inclusive communities. As a result, programs must be added as appropriate to sufficiently respond to contributing factors to fair housing issues. In addition, all actions related to AFFH must contain specific commitment, timing, geographic targeting and metrics or numerical targets

The element may, for example, as discussed on the August 11, 2022 call, revise Program 3.5.3 to make a firm commitment for removing design review requirements and establishing development standards for missing middle housing types. The element may also, for example, revise Action 3.5.3 to establish a social housing pilot program. Additionally, the element should commit to assessing and revising programs through a mid-cycle review. Please see HCD's AFFH memo for more information: https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf#page=23.

- The revised draft includes numerous additional and revised programs in Chapter 4: Housing Action Plan, such as actions 5.2.9 through 5.2.11 under Goal 5 (Promote Neighborhood Stability and Health). Actions have been revised to ensure that they contain specific commitment, timing, geographic targeting and metrics or numerical targets. The revised draft considers the suggestion to revise Action 3.5.3 to establish a social housing pilot program, but the City does not currently have the capacity to implement such a program.
- *The revised draft includes a firm commitment to amend the Planning Code design review procedure to allow for streamlined ministerial approval. See Actions 3.4.3 and Action 3.4.8.*

Include an analysis of population and employment trends and documentation of projections and a quantification of the locality's existing and projected needs for all income levels, including extremely low-income households. (Gov. Code, § 65583, subd. (a)(1).)

Include an analysis and documentation of household characteristics, including level of payment compared to ability to pay, housing characteristics, including overcrowding, and housing stock condition. (Gov. Code, § 65583, subd. (a)(2).)

Analyze any special housing needs such as elderly; persons with disabilities, including a developmental disability; large families; farmworkers; families with female heads of

households; and families and persons in need of emergency shelter. (Gov. Code, § 65583, subd. (a)(7).)

Extremely Low-Income Households (ELI): While the element includes some information on ELI households relative to race, it should also evaluate tenure, overpayment, resources and strategies available and the gap and magnitude of housing needs to better formulate policies and programs.

- Appendix B Section B.6 includes a detailed evaluation of housing tenure through analysis of a number of factors, including race, income level, housing type. overpayment for ELI households. Overpayment, or cost-burden, is also examined in section B.6 with analysis detailing overpayment by income and tenure (p.B-41). The revised appendix includes an additional discussion of resources and programs coordinated by the City to support ELI households in Section B.5 (p.B-15). The added text clarifies specific policies and actions provided in the Housing Action Plan intended to provide permanent affordable housing to ELI households.

Housing Conditions: The element provides some information on age of the housing stock. However, it must estimate the number of units in need of rehabilitation and replacement. For example, the analysis could include estimates from a recent windshield survey or sampling, estimates from the code enforcement agency, or information from knowledgeable organizations. For additional information, see the Building Blocks at http://www.hcd.ca.gov/community-development/building-blocks/housing-needs/housing-stock-characteristics.shtml.

- The revised draft includes additional information from Oakland's Code Enforcement estimating the number of units in need of rehabilitation and replacement in Appendix B section B.6 (p.B-44).

Persons Experiencing Homelessness: The element provides analysis of persons experiencing homelessness. However, given the magnitude of the need, the City should evaluate resources and strategies, gaps in addressing needs and formulate appropriate strategies to address the unmet need. For example, the element could identify and evaluate capacity for emergency shelters, permanent supportive housing and other housing or shelter types relative to needs and address unmet needs through program actions

- In addition to the discussion of Oakland's five-year plan to address homelessness in section B.5 of Appendix B (p.B-29), text was added to section clarify additional programs the City is participating in to support persons experiencing homelessness (p.B-16). For example, the City participates in countywide efforts under the EveryOne Home Plan. The additional text also describes specific polices and actions intended to help provide permanent housing for extremely low-income households through state and federal funding.

2. *An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the*

planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)

Parcel Listing: The element must include a parcel listing or sites inventory intended to accommodate the regional housing need allocation (RHNA). The sites inventory should list parcels by assessor parcel number, size, general plan designation, zoning, existing use, realistic residential capacity and anticipated affordability. The description of existing uses should be sufficiently detailed to facilitate an analysis of the potential for additional development and may utilize indicators of potential such as age of structure, existing versus allowable floor area and improvement to land value. If a site is owned by a city or county, the description must include whether there are any plans to dispose of the property.

- Table C-26 of Appendix C has been updated to reflect the requested information and is organized according to the specifications identified in this comment (p.C-112).

Pipeline and Potential Development Projects: While the element may utilize pipeline and potential development projects toward the RHNA, it must also demonstrate their affordability and availability in the planning period. Affordability must be demonstrated based on actual sales price, rent level or other mechanisms ensuring affordability (e.g., deed restrictions). Availability should account for the likelihood of project completion in the planning period and should address the status, necessary steps to issue permits, any barriers to development and other relevant factors. Given the element's reliance on pipeline projects, the element must include programs with actions that commit to facilitating development and monitoring approvals of the projects (e.g., coordination with applicants to approve remaining entitlements, supporting funding applications, expediating approvals and monitoring of project progress, including rezoning or identification of additional sites, if necessary).

- Section C.2 of Appendix C includes a discussion of pipeline project affordability. The revised draft includes additional information clarifying the future availability of pipeline projects, defines affordability mechanisms for projects with lower and moderate-income units, and expands upon the City's permitting and approval process as it relates to the determination of availability. Additional text is incorporated in this section of the revised draft describing specific actions in the Housing Action plan relating to development and monitoring approvals of pipeline projects (p. C-10). Table C-5a and C-5b has also been updated to reflect the affordability mechanism for each pipeline project. Over a period of 8 years, 98.6 percent of projects with approved planning permits were completed. For potential projects, a capacity modifier of 0.9 is applied to the total overall. Additional language has also been added regarding the streamlining and permitting process for Potential Development projects, including a number of additional actions to support the development of potential projects.

Realistic Capacity: While the element lists realistic residential capacity assumptions by various zoning districts (Table C-11), it should provide supporting information for these assumptions based on recent development history, including affordability. In addition,

this calculation should also account for the likelihood of 100 percent non-residential development. The element lists recent trends for residential development in non-residential zones but should also consider the development activity of 100 percent non-residential uses. For example, the element could analyze all development activity in these nonresidential zones, how often residential development occurs and adjust residential capacity calculations, policies, and programs accordingly. This analysis may incorporate any proposed policies such as residential performance standards, prohibition of commercial uses and should clarify that all zones allow residential uses, particularly 100 percent residential uses.

- Sites inventory tables C-3, 4a and 4b, and 5 provide more information about realistic development capacity, including in commercial areas. In addition to these pipeline projects, many of which include actual densities over 100 percent the permitted densities, an exhibit of completed projects, maximum capacity, and realistic capacity information has also been added to support density assumptions. (p.C-32). This section clarifies that all future development on parcels within the Housing Sites Overlay Zone will be required to include a majority residential use, and will not allow a 100% non-residential use in this overlay. Additionally, Table C-12b, Projects Converting Existing Non-Residential Uses to Residential Uses, 2018-2021, shows examples of where completed and approved projects have changed from nonresidential to residential zones.

Nonvacant Sites: The element must include an analysis demonstrating the potential for additional development on nonvacant sites. While the element mentions underutilized sites were identified based on assessed value (AV) and floor area (FAR) ratios, it must support the validity of these assumption in demonstrating the potential for redevelopment. For example, the element could utilize recent development activity. In addition, the element should consider additional factors such as building age, structural conditions, expressed interest in residential development and reflect those values in the sites inventory. Finally, the element should account for the extent existing uses impede additional residential development including market demand for the existing use and existing leases or contracts that would perpetuate the existing use or prevent additional residential development. For example, based on comments received, the City should also address the crediting of a site at 288 9th Avenue, where public comments reported a recently completed nonresidential project being credited for 254 units.

In addition, HCD notes the element currently does not rely on nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households. If future versions of the housing element rely upon nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households, the housing element must demonstrate existing uses are not an impediment to additional residential development and will likely discontinue in the planning period. (Gov. Code, § 65583.2, subd. (g)(2).) Absent findings (e.g., adoption resolution) based on substantial evidence, the existing uses will be presumed to impede additional residential development and will not be utilized toward demonstrating adequate sites to accommodate the RHNA.

- The sites inventory provides a parcel-by-parcel assessment and justification for nonvacant opportunity sites in Table C-16. A majority of these parcels have

property owner interest or are City-owned surplus sites. The supplemented pipeline tables (C-4 and C-6) also provide evidence that projects have developed on nonvacant uses. Additionally, Table C-12b, Projects Converting Existing Non-Residential Uses to Residential Uses, 2018-2021, shows examples of where completed and approved projects have changed from nonresidential to residential zones and includes their AV ratio and FAR when provided. In many cases, actual densities are greater than permitted densities, even when AV ratios and FAR is higher than capacity modifiers as described in Table C-13.

City-Owned Sites: The element briefly describes its strategy to use City-Owned sites to accommodate a portion of the RHNA for lower income households (p. C-77). However, the element should identify which sites specifically are owned by the City and include a program with numerical objectives that ensures compliance with the Surplus Land Act, provides incentives and actions along with a schedule to facilitate development of City- owned sites. Actions should include outreach with developers, issuing requests for proposals, incentives, fee waivers, priority processing and financial assistance. The element should also update its Actions (3.3.1 and 3.3.4, for example) to describe a schedule of actions and, as described on the August 11, 2022 call, the timeline for completion of an Environmental Impact Report for these sites.

- The revised draft includes an updated Table C16-b to identify the specific sites owned by the city in Appendix C, section C.3. In response to the comment, Actions 3.3.1 and 3.3.4 in the Housing Action plan have been updated to clarify the schedule of actions and timeline for the completion of zoning and environmental review for these sites (p.32 and p.35).

Alternative Adequate Sites: The sites inventory uses the adequate sites alternative to credit 82 units across two assisted housing sites that were acquired by the City to preserve affordability (p. C-27). However, the analysis must confirm compliance with all relevant requirements pursuant to Government Code 65583.1. This analysis may utilize HCD Alternate Adequate Sites checklist available at https://www.hcd.ca.gov/adequate-sites-alternative.

- The revised draft of Appendix C includes updated language related to alternative adequate site compliance on p.C-26. The revised draft also includes an additional table, Table C-9b on p.C-31 summarizing Adequate Alternative Requirements to ensure compliance to relevant requirements.

Zoning for a Variety of Housing Types:
Emergency Shelters: The element mentions emergency shelters are permitted in various areas throughout the City. However, the element should also clarify shelters are permitted without discretionary action and discuss available acreage, including typical parcel sizes and the presence of reuse opportunities. In addition, the analysis should address proximity to transportation and services and any conditions inappropriate for human habitability.

- In response to the comment, Action 4.3.6 has been added to the Housing Action Plan to expand opportunities for the permitting of Emergency Shelters. This

action clarifies that the City plans to revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide. Appendix F has been revised to include a detailed analysis of currently designated areas for by right approval of emergency shelters, including information regarding available acreage, typical parcel sizes, presence of reuse opportunities, proximity to transportation and services and potential conditions inappropriate for human habitability (p.F-53-F-55).

Permanent Supportive Housing: Supportive housing shall be a use by-right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses pursuant to Government Code section 65651. The element must demonstrate compliance with this requirement and include programs if necessary.

- Appendix F reflects other constraints related to supportive housing, including residential care facilities and emergency shelters (F-52-F-55). The Housing Action Plan has been updated to include revised language in Action 4.3.3. The changes made indicate that the City will amend the Planning Code to remove regulatory restraints to the development of transitional and supportive housing. The revised action clarifies that the City will codify the by right requirements of Government Code section 65651 into the Oakland Planning code and modify the basic application to identify streamlining opportunities (p.75).

Employee Housing: The element must demonstrate zoning is consistent with the Employee Housing Act (Health and Safety Code, § 17000 et seq.) or add or modify programs. Specifically, section 17021.5 requires employee housing for six or fewer employees to be treated as a single-family structure and permitted in the same manner as other dwellings of the same type in the same zone.

- The revised draft of the Housing Action Plan has been updated to include the addition of Action 3.7.7 (Amend Planning Code to comply with the Employee Housing Act) (p.63). Additional language has also been added to Appendix F further clarifying the element's compliance with the Employee Housing act (p. F-59).

Small Units: Pursuant to public comments received, the City should consider a variety of naturally affordable housing types as part of its strategy, including efficiency units, cohousing units, and any units tied to a social housing programs and pilots. The element may also, for example, consider limited equity condominiums, pursuant to public comments.

- The Housing Action Plan highlights recent efforts the City has made to encourage a variety of naturally affordable housing types, such as Oakland's 2018 residential Hotels Ordinance, the "Nook" microunit project in 2016, and the completion of the co-housing project Phoenix Commons in 2016 (p.24). Additional language was added to Policy 3.5 (Explore Innovative and Alternative Housing Models) elaborating on the City's participation in Acquisition to Affordable Housing Programs (ACAH) intended to allocate funding for

community land trusts and limited equity housing cooperatives. Action 3.5.2 includes updated language clarifying the City's participation in Acquisition and Conversion to Affordable Housing programs to support community land trusts and cooperatives (p.55). Language was also updated in Action 3.7.6 (Expand areas where rooming and efficiency units are permitted by right) to further support the development of a variety of naturally affordable housing types(p.62)

Single Room Occupancies (SRO): The element describes the zones in which SROs are currently permitted. However, given the success of SROs in providing housing for Extremely Low Income (ELI) households, the element should also describe how it will encourage SRO development.

- The revised Housing Action Plan includes several actions intended to strengthen and support SRO developments. Action 3.3.5 (Implement affordable housing overlay) will allow SRO's and Rooming houses by right in areas subject to the prospective affordable housing overlay (p.36). Action 2.2.3 limits demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units and strengthens protections for residential hotels (p.19). The City plans to further encourage SRO development through Action 2.2.7: provide additional subsidy for residential hotels (p.21).

3. *An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and for persons with disabilities as identified in the analysis pursuant to paragraph (7), including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures... (Gov. Code, § 65583, subd. (a)(5).)*

   Land Use Controls: The element identifies many land use controls as potential constraints on a variety of housing types. However, the analysis should analyze land use controls independently and cumulatively with other land use controls. The analysis should specifically address requirements related to Floor Area Ratios, open space requirements, setbacks, and limits on allowable densities. The analysis should address any impacts on cost, supply, housing choice, affordability, timing, approval certainty and ability to achieve maximum densities and include programs to address identified constraints.

   - The revised draft of Appendix F includes analysis of independent and cumulative impacts of land use controls on F-31. Additionally, the Housing Action Plan includes revisions of Action 3.4.8. (Implement objective design standards) in order to address constraints identified in Appendix F.

   Processing and Permit Procedures: The element lists design review criteria (p. F-57), however, it should also evaluate those criteria for impacts on cost, timing and especially approval certainty. For example, one finding is the project will "enhance desirable neighborhood characteristics". The element should explain how that finding is applied and met, whether there are any impacts on cost, timing and approval certainty and add or modify programs to address any identified constraints.

- Effects of design review on cost and timing are included on p. F-64.
- To address this comment regarding identified constraints resulting from the design review process, the revised draft includes the addition of Action 3.4.3 (Revise Conditional Use (CUP) requirements) as well as Action 3.4.8 (Implement objective design standards). Combined, these two actions will allow a streamlined design review process, intended to reduce costs, shorten timelines, and increase approval certainty.

Housing for Persons with Disabilities: The element describes its approval procedures for group homes for seven or more persons (p. 592), including limitations or approval criteria. However, the element should analyze these approval criteria as constraints on approval certainty and objectivity for housing for persons with disabilities and include programs as appropriate.

- Appendix F expands discussion of residential care facilities constraints (p. F-51), including in commercial areas. To address potential constraints, the revised draft includes updated language in the Housing Action plan for Action 3.7.3 (Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs).

B. Housing Programs

1. *Include a program which sets forth a schedule of actions during the planning period, each with a timeline for implementation, which may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the Housing Element through the administration of land use and development controls, the provision of regulatory concessions and incentives, and the utilization of appropriate federal and state financing and subsidy programs when available. The program shall include an identification of the agencies and officials responsible for the implementation of the various actions. (Gov. Code, § 65583, subd. (c).)*

   A large share of the programs lists implementation timelines as "ongoing." While this may be appropriate for some programs, programs with specific implementation actions must include completion dates resulting in beneficial impacts within the planning period. Programs that should be modified to add discrete timing include (but are not limited to) 1.1.3 (Strengthen Ellis Act Ordinance), 1.1.5 (Provide eviction defense and implement a right to counseling), 1.1.6 (Expand rent control in a limited manner to maintain affordability), 1.1.9 (Continue and expand the Tenant Protection Ordinance), 1.1.10 (Enforce the tenant right to return), 2.1.1 (Support home rehabilitation programs), 2.1.6 (Explore funding to improve indoor air quality), 2.2.5 (Extend local replacement unit provisions), 3.2.5 (Reduce constraints to the development of ADUs), 3.3.2 (Expansion of Section 8 vouchers), 3.3.3 (City of Oakland Rental Assistance Program), 3.3.4 (Develop permanent housing affordable to extremely-low income households on public land), 3.3.9 (Adjusting or waiving City fees and payment timing for affordable housing developments), 3.3.12 (Continue the Acquisition and Conversion to Affordable Housing Program), 3.3.13 (Expand availability of predevelopment funding and low-cost debt products for affordable housing development),

3.3.14 (Evaluate the creation of a leveraged acquisition fund or debt equity fund for small sites to support housing acquisition), 3.3.17 (Support low-income grassroots and BIPOC affordable housing developers), 3.7.1 (Incentivize development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs), 3.7.4 (Implement the sponsor-based Housing Assistance Program), 3.7.5 (Encourage a range of unit sizes including housing that matches a local household needs and family sizes), 3.8.1 (Continue to implement the Vacant Property Tax), 4.1.4 (Provide needed support and income to people who have been homeless), 4.2.4 (Increase oversight of homelessness strategies, investments and encampment operations with Homelessness Advisory Commission), 4.3.1 (Finance Construction and Maintenance of permanent supportive housing and deeply affordable housing), 5.1.1 (Provide First time home ownership incentives), 5.2.4 (Secure funding from AHSC Program), and 5.2.7 (Encourage new affordable housing in higher resource neighborhoods).

Additionally, several programs and actions have timelines that should be moved earlier in the planning period to ensure a beneficial impact. Examples include Programs 3.3.10 (Enhanced Infrastructure Financing District) and 3.5.2 (Support Housing Cooperatives).

Additionally, programs must have specific commitment to clear outcomes or deliverables. Several programs include actions with no description of how those actions will be implemented (e.g., “support”, “study”, “explore”, “evaluate”, etc.,). For example, Program 3.5.2 states that the City will "support housing cooperatives, co-living, and cohousing models". However, it does not state when and how their housing types will be available. Programs should be amended, as appropriate to include specific commitment. Examples include Programs 1.1.5 (Eviction Defense), 1.1.10 (Tenant Right to Return), 1.1.13 (Preventing Displacement / Homelessness), 3.3.15 (Citywide Density Bonus Expansion), 3.3.16 (Consider revising Real Estate Transfer Tax), 3.4.3 (Revising Parking Standards), 3.4.4 (Revising Open Space Requirements) and 5.2.9 (Accountability Measures for Housing Programs).

Based on public comments received, the City should also consider revising Action 2.2.5 to develop procedures that find and support displaced tenants after demolitions, as well as ensuring that projects pursuing SB-330 protections have sufficient replacement units for tenants at risk of displacement.

- The revised draft includes modifications clarifying discrete timing for actions in the Housing Action Plan for the following actions identified in the comment: 1.1.3 (Strengthen Ellis Act Ordinance), 1.1.5 (Provide eviction defense and implement a right to counseling), 1.1.6 (Expand rent control in a limited manner to maintain affordability), 1.1.9 (Continue and expand the Tenant Protection Ordinance), 1.1.10 (Enforce the tenant right to return), 2.1.1 (Support home rehabilitation programs), 2.1.6 (Explore funding to improve indoor air quality), 2.2.5 (Extend local replacement unit provisions), 3.2.5 (Reduce constraints to the development of ADUs), 3.3.2 (Expansion of Section 8 vouchers), 3.3.3 (City of Oakland Rental Assistance Program), 3.3.4 (Develop permanent housing affordable to extremely-low income households on public land), 3.3.9 (Adjusting or waiving City fees and payment timing for affordable housing developments), 3.3.12 (Continue the Acquisition and Conversion to Affordable Housing Program), 3.3.13 (Expand

availability of predevelopment funding and low-cost debt products for affordable housing development), 3.3.14 (Evaluate the creation of a leveraged acquisition fund or debt equity fund for small sites to support housing acquisition), 3.3.17 (Support low-income grassroots and BIPOC affordable housing developers), 3.7.1 (Incentivize development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs), 3.7.4 (Implement the sponsor-based Housing Assistance Program), 3.7.5 (Encourage a range of unit sizes including housing that matches a local household needs and family sizes), 3.8.1 (Continue to implement the Vacant Property Tax), 4.1.4 (Provide needed support and income to people who have been homeless), 4.2.4 (Increase oversight of homelessness strategies, investments and encampment operations with Homelessness Advisory Commission), 4.3.1 (Finance Construction and Maintenance of permanent supportive housing and deeply affordable housing), 5.1.1 (Provide First time home ownership incentives), 5.2.4 (Secure funding from AHSC Program), and 5.2.7 (Encourage new affordable housing in higher resource neighborhoods).

The timelines of programs 3.3.10 (Enhanced Infrastructure Financing District) and 3.5.2 (Support Housing Cooperatives) have been moved to earlier dates, as per the comment's suggestion. For programs lacking clear outcomes and deliverables in the Housing Action Plan, language and program structure has been revised to demonstrate clear outcomes and objectives. Action 2.2.5 (Extend local replacement unit provisions) has also been revised according to the comment's suggestions, with the addition of plans for the maintenance of a displaced tenant database to identify and support displaced tenants.

2. *Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Government Code section 65584.09. Sites shall be identified as needed to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing. (Gov. Code, § 65583, subd. (c)(1).)*

   As noted in Finding A3, the element does not include a complete site analysis; therefore, the adequacy of sites and zoning were not established. Based on the results of a complete sites inventory and analysis, the City may need to add or revise programs to address a shortfall of sites or zoning available to encourage a variety of housing types.

   - In the revised draft, see Goal 3 of the Housing Action Plan for a number of additional actions added to encourage a variety of housing types. Some of these programs include but are not limited to: Action 3.2.1 (Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated

neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs), Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements), Action 3.5.1 (Support community land trusts and other shared equity models), Action 3.6.2. (Provide increased flexibility in development standards), Action 3.2.1 (Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs) in addition to many other programs in the Housing Action plan intended to address a shortfall of sites or zoning available to encourage a variety of housing types.

3. *Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities. (Gov. Code, § 65583, subd. (c)(3).)*

   As noted in Finding A4, the element requires a complete analysis of potential governmental and nongovernmental constraints. Depending upon the results of that analysis, the City may need to revise or add programs and address and remove or mitigate any identified constraints.

   - The revised draft of the Housing Action Plan includes a number of programs intended to alleviate governmental and nongovernmental constraints to maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. Numerous programs under Goal 3 (Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities) include revised language intendent to eliminate constraints, such as action 3.2.5 (Reduce constraints to the development of ADUs) or Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements). New programs have also been added to the revised draft to reduce constraints, such as Action 4.3.3 (Remove regulatory constraints to the development of transitional housing and supportive housing) and Action 3.4.10 (Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right).

4. *Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics. (Gov. Code, § 65583, subd. (c)(5).)*

   As noted in Finding A1, the element must include a complete assessment of fair housing. Based on the outcomes of that analysis, the element must add or modify programs. Programs to AFFH should go beyond status quo actions, include specific commitment, timing, geographic targeting and metrics or numerical targets and should generally address housing mobility, encourage new housing choices in higher resource

areas, improve place-based strategies toward community revitalization and protect existing residents from displacement.

- In the revised draft, many of the programs in the housing action plan have been significantly modified to include specific commitment, timing, geographic targeting and metrics.

5. *The housing program shall preserve for low-income household the assisted housing developments identified pursuant to paragraph (9) of subdivision (a)... (Gov. Code, § 65583, subd. (c)(6).)*

   Program 2.2.2 (Preserve Affordable Housing) should be revised with specific commitment to comply with noticing requirements, coordinate with qualified entities, assist with funding or support funding applicants and provide education and support to tenants.

   - Program 2.2.2 (Preserve Affordable Housing) has been revised with specific commitment to comply with noticing requirements, coordinate with qualified entities, assist with funding applicants and provide education and support to tenants.

6. *Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent... (Gov. Code, § 65583, subd. (c)(7).)*

   Program 3.2.4 (Incentives for Accessory Dwelling Units (ADU)) should commit to should monitor permitted ADUs and affordability every other year and take appropriate action such as adjusting assumptions or rezoning within a specified time (e.g., 6 months) if assumptions are not realized.

   - In response to the comment, an additional program in the Housing Action Plan has been added to the revised draft, Action 3.2.6. (Monitor Affordability of Permitted ADUs), to monitor permitted ADUs and affordability and also includes provisions for rezoning within a specified timeframe if assumptions are not realized.

C. Quantified Objectives

Establish the number of housing units, by income level, that can be constructed, rehabilitated, and conserved over a five-year time frame. (Gov. Code, § 65583, subd. (b)(1 & 2).)

While the element includes quantified objectives for new construction, rehabilitation and conservation by income group, it could consider quantified objectives for conservation (beyond at-risk preservation). For your information, the quantified objectives do not represent a ceiling, but rather set a target goal for the City to achieve, based on needs, resources, and constraints.

- Quantified objectives for rehabilitation and conservation are included in Table 4-1 (p.91) of the Housing Action Plan, with minor adjustments and additional language incorporated into the table in the revised draft.

D. Public Participation

Local governments shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the element shall describe this effort. (Gov. Code, § 65583, subd.(c)(9).)

The City made extensive efforts to reach the public, including hosting events and requesting input on suitable sites. Nonetheless, several comments questioned the lack of units in North Oakland, specifically around the Rockridge BART station, as concerns around why several eligible parcels were excluded from the inventory, and these issues must be addressed.

- The revised draft includes additional sites from the North Oakland Area in the site inventory in response to these comments and public input. Additionally, revisions have been made to Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements) to increase allowable heights and densities in areas near Rockridge BART. See Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing and open up exclusionary neighborhoods such as Rockridge.

The City should also commit to revising Action 3.7.5 to studying second egress requirements. It can also discuss prioritizing cohousing opportunities, reducing lot size minimums in some zones to 3,000 square feet, finding suitable parcels for housing in the Dimond District, developing preapproved missing middle housing types in high opportunity areas, developing programs to address indoor air quality, analyze the cost reductions expected from removing parking minimums, analyze how the placement of historic districts relate AFFH and establish firmer commitments around the development of live/work units.

- In response to this comment, Action 3.5.5 (Study Feasibility of Single-Stair Residential Buildings) has been added to study second egress requirements.
- See Appendix J for missing middle proposal the includes reduction of lot size minimums and reduction of parking minimums.

APPENDIX K
CITY OF OAKLAND
Responses to State HCD Findings Letter

The City of Oakland submitted the initial draft Housing Element for review to the California Department of Housing and Community Development (State HCD) on June 30, 2022. Staff received findings letter from State HCD on September 28, 2022. The following provides a brief summary of the changes and where they were made in the revised draft.

The following changes are necessary to bring the City's housing element into compliance with Article 10.6 of the Government Code. Accompanying each recommended change, we cite the supporting section of the Government Code.

Housing element technical assistance information is available on HCD's website at https://www.hcd.ca.gov/hcd-memos. Among other resources, the housing element section contains HCD's latest technical assistance tool, *Building Blocks for Effective Housing Elements (Building Blocks),* available at https://www.hcd.ca.gov/building-blocks and includes the Government Code addressing State Housing Element Law and other resources.

A. Housing Needs, Resources, and Constraints

1. *Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2…shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)*

   Local Data and Knowledge: While the element incorporates some analysis based on local data and knowledge, the element should review and incorporate public comments into the assessment of fair housing.

   - The revised draft incorporates public comments from Deeply Rooted and East Bay Housing Organizations (EBHO) to include additional information on historic context of discriminatory housing actions, the legacy of exclusionary zoning as a significant housing constraints and barrier to affirmatively furthering fair housing, and the negative impacts of California's Costa Hawkins Law, 1990's tech boom and Mayor Brown's 10k market rate housing plan to make Oakland attractive for SF tech workers. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11).

   - The Housing Element also includes a new Appendix L, which details how substantive comments from each comment letter was specifically addressed.

Racially Concentrated Areas of Affluence (RCAAs): The element should analyze RCAA. The analysis should evaluate pattern and trends at a local level (comparing areas within the City) and regional level (comparing the City to the region). Based on the analysis, the City should consider additional actions (not limited to the regional housing need allocation (RHNA)) to promote housing mobility and improve new housing opportunities throughout the City.

- The revised draft of Appendix D: Assessment of Fair Housing include a local and regional analysis of RCAAs in section D.3 pages D-34 and D-35. An analysis of how the Sites Inventory improves integration of lower and moderate income households is available in Table D-11 on page D-72. Table D-9 on page D-74 identifies additional actions to address issues of segregation and, disproportionate housing needs, and access to opportunity.

Regional Analysis: The element generally describes local patterns and trends with regards to disproportionate housing needs but must also analyze Oakland relative to the rest of the region regarding disproportionate housing needs, including displacement risks.

- Section D.5 of Appendix D, Disproportionate Housing Needs and Displacement Risks, now includes additional regional assessment on the following pages:
- Cost burden: p. D-54
- Overcrowding: p. D-58
  Displacement Risk: p. D-61

Affirmatively Furthering Fair Housing (AFFH) and Identified Sites: While the element provides some analysis of the sites in its inventory with regards to AFFH, it should analyze the lack of units in several higher opportunity areas (p. C-84), including but not limited to Rockridge (labeled North Oakland / Adams Point) and the area surrounding the Rockridge Bay Area Rapid Transit (BART) station. A complete analysis should fully assess how the site inventory is expected to improve and/or exacerbate fair housing conditions. This analysis should address the location, number of units by income group, magnitude of the impact and any isolation of the RHNA and could consider topics such as existing or proposed anti-displacement policies and place-based investments, and how such strategies will improve fair housing conditions when paired with the identified sites. Based on the outcomes of this analysis, the element should add or modify programs.

- Appendix D, tables D-10 through D-11, address how the sites inventory furthers lower and moderate income housing in higher resource communities.
- Additional sites in Rockridge have been added to the Sites Inventory, adding an additional 973 units of housing in this area.
- Chapter 3 section 3.3 includes analysis of affirmative efforts to locate affordable housing in high-resource areas like Rockridge. In the revised draft, additional sites have been added to the Rockridge area, summarized in Appendix C. In response to this comment, an additional action, 5.2.9 (in tandem with 5.2.8) has been added to the Housing Action Plan to prioritize improvements that target geographies and needs of low- resourced and disproportionately burdened communities, including through actions related to parks and facilities, access to

transit, and other place-based strategies. Action 3.4.1 has also been revised to further enhance strategies to improve fair housing conditions in high-resource neighborhoods.

- Other actions that support fair housing and integration include Action 3.3.5, which creates an Affordable Housing Overlay; Action 3.3.7, which would study targeted implementation of an inclusionary requirement in higher-resource neighborhoods; Action 3.4.1, which revises development standards and increases height/densities in resource-rich areas such as Rockridge; among others.

Goals and Actions: While the element provides additional analysis and identifies contributing factors to fair housing issues, it does not include sufficient action to overcome patterns of segregation and foster inclusive communities. As a result, programs must be added as appropriate to sufficiently respond to contributing factors to fair housing issues. In addition, all actions related to AFFH must contain specific commitment, timing, geographic targeting and metrics or numerical targets

The element may, for example, as discussed on the August 11, 2022 call, revise Program 3.5.3 to make a firm commitment for removing design review requirements and establishing development standards for missing middle housing types. The element may also, for example, revise Action 3.5.3 to establish a social housing pilot program. Additionally, the element should commit to assessing and revising programs through a mid-cycle review. Please see HCD's AFFH memo for more information: https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf#page=23.

- The revised draft includes numerous additional and revised programs in Chapter 4: Housing Action Plan, such as actions 5.2.9 through 5.2.11 under Goal 5 (Promote Neighborhood Stability and Health). Actions have been revised to ensure that they contain specific commitment, timing, geographic targeting and metrics or numerical targets. The revised draft considers the suggestion to revise Action 3.5.3 to establish a social housing pilot program, but the City does not currently have the capacity to implement such a program.
- *The revised draft includes a firm commitment to amend the Planning Code design review procedure to allow for streamlined ministerial approval. See Actions 3.4.3 and Action 3.4.8.*

Include an analysis of population and employment trends and documentation of projections and a quantification of the locality's existing and projected needs for all income levels, including extremely low-income households. (Gov. Code, § 65583, subd. (a)(1).)

Include an analysis and documentation of household characteristics, including level of payment compared to ability to pay, housing characteristics, including overcrowding, and housing stock condition. (Gov. Code, § 65583, subd. (a)(2).)

Analyze any special housing needs such as elderly; persons with disabilities, including a developmental disability; large families; farmworkers; families with female heads of households; and families and persons in need of emergency shelter. (Gov. Code, § 65583, subd. (a)(7).)

Extremely Low-Income Households (ELI): While the element includes some information on ELI households relative to race, it should also evaluate tenure, overpayment, resources and strategies available and the gap and magnitude of housing needs to better formulate policies and programs.

- Appendix B Section B.6 includes a detailed evaluation of housing tenure through analysis of a number of factors, including race, income level, housing type. overpayment for ELI households. Overpayment, or cost-burden, is also examined in section B.6 with analysis detailing overpayment by income and tenure (p.B-41). The revised appendix includes an additional discussion of resources and programs coordinated by the City to support ELI households in Section B.5 (p.B-15). The added text clarifies specific policies and actions provided in the Housing Action Plan intended to provide permanent affordable housing to ELI households.

Housing Conditions: The element provides some information on age of the housing stock. However, it must estimate the number of units in need of rehabilitation and replacement. For example, the analysis could include estimates from a recent windshield survey or sampling, estimates from the code enforcement agency, or information from knowledgeable organizations. For additional information, see the Building Blocks at http://www.hcd.ca.gov/community-development/building-blocks/housing-needs/housing-stock-characteristics.shtml.

- The revised draft includes additional information from Oakland's Code Enforcement estimating the number of units in need of rehabilitation and replacement in Appendix B section B.6 (p.B-44).

Persons Experiencing Homelessness: The element provides analysis of persons experiencing homelessness. However, given the magnitude of the need, the City should evaluate resources and strategies, gaps in addressing needs and formulate appropriate strategies to address the unmet need. For example, the element could identify and evaluate capacity for emergency shelters, permanent supportive housing and other housing or shelter types relative to needs and address unmet needs through program actions

- In addition to the discussion of Oakland's five-year plan to address homelessness in section B.5 of Appendix B (p.B-29), text was added to section clarify additional programs the City is participating in to support persons experiencing homelessness (p.B-16). For example, the City participates in countywide efforts under the EveryOne Home Plan. The additional text also describes specific polices and actions intended to help provide permanent housing for extremely low-income households through state and federal funding.

2. *An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)*
   Parcel Listing: The element must include a parcel listing or sites inventory intended to accommodate the regional housing need allocation (RHNA). The sites inventory should list parcels by assessor parcel number, size, general plan designation, zoning, existing use, realistic residential capacity and anticipated affordability. The description of existing uses should be sufficiently detailed to facilitate an analysis of the potential for additional development and may utilize indicators of potential such as age of structure, existing versus allowable floor area and improvement to land value. If a site is owned by a city or county, the description must include whether there are any plans to dispose of the property.

   - Table C-26 of Appendix C has been updated to reflect the requested information and is organized according to the specifications identified in this comment (p.C-112).

   Pipeline and Potential Development Projects: While the element may utilize pipeline and potential development projects toward the RHNA, it must also demonstrate their affordability and availability in the planning period. Affordability must be demonstrated based on actual sales price, rent level or other mechanisms ensuring affordability (e.g., deed restrictions). Availability should account for the likelihood of project completion in the planning period and should address the status, necessary steps to issue permits, any barriers to development and other relevant factors. Given the element's reliance on pipeline projects, the element must include programs with actions that commit to facilitating development and monitoring approvals of the projects (e.g., coordination with applicants to approve remaining entitlements, supporting funding applications, expediating approvals and monitoring of project progress, including rezoning or identification of additional sites, if necessary).

   - Section C.2 of Appendix C includes a discussion of pipeline project affordability. The revised draft includes additional information clarifying the future availability of pipeline projects, defines affordability mechanisms for projects with lower and moderate-income units, and expands upon the City's permitting and approval process as it relates to the determination of availability. Additional text is incorporated in this section of the revised draft describing specific actions in the Housing Action plan relating to development and monitoring approvals of pipeline projects (p. C-10). Table C-5a and C-5b has also been updated to reflect the affordability mechanism for each pipeline project. Over a period of 8 years, 98.6 percent of projects with approved planning permits were completed. For potential projects, a capacity modifier of 0.9 is applied to the total overall. Additional language has also been added regarding the streamlining and permitting process for Potential Development projects, including a number of additional actions to support the development of potential projects.

Realistic Capacity: While the element lists realistic residential capacity assumptions by various zoning districts (Table C-11), it should provide supporting information for these assumptions based on recent development history, including affordability. In addition, this calculation should also account for the likelihood of 100 percent non-residential development. The element lists recent trends for residential development in non-residential zones but should also consider the development activity of 100 percent non-residential uses. For example, the element could analyze all development activity in these nonresidential zones, how often residential development occurs and adjust residential capacity calculations, policies, and programs accordingly. This analysis may incorporate any proposed policies such as residential performance standards, prohibition of commercial uses and should clarify that all zones allow residential uses, particularly 100 percent residential uses.

- Sites inventory tables C-3, 4a and 4b, and 5 provide more information about realistic development capacity, including in commercial areas. In addition to these pipeline projects, many of which include actual densities over 100 percent the permitted densities, an exhibit of completed projects, maximum capacity, and realistic capacity information has also been added to support density assumptions. (p.C-32). This section clarifies that all future development on parcels within the Housing Sites Overlay Zone will be required to include a majority residential use, and will not allow a 100% non-residential use in this overlay. Additionally, Table C-12b, Projects Converting Existing Non-Residential Uses to Residential Uses, 2018-2021, shows examples of where completed and approved projects have changed from nonresidential to residential zones.

Nonvacant Sites: The element must include an analysis demonstrating the potential for additional development on nonvacant sites. While the element mentions underutilized sites were identified based on assessed value (AV) and floor area (FAR) ratios, it must support the validity of these assumption in demonstrating the potential for redevelopment. For example, the element could utilize recent development activity. In addition, the element should consider additional factors such as building age, structural conditions, expressed interest in residential development and reflect those values in the sites inventory. Finally, the element should account for the extent existing uses impede additional residential development including market demand for the existing use and existing leases or contracts that would perpetuate the existing use or prevent additional residential development. For example, based on comments received, the City should also address the crediting of a site at 288 9th Avenue, where public comments reported a recently completed nonresidential project being credited for 254 units.

In addition, HCD notes the element currently does not rely on nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households. If future versions of the housing element rely upon nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households, the housing element must demonstrate existing uses are not an impediment to additional residential development and will likely discontinue in the planning period. (Gov. Code, § 65583.2, subd. (g)(2).) Absent findings (e.g., adoption resolution) based on substantial evidence, the existing uses will be presumed to impede additional residential development and will not be utilized toward demonstrating adequate sites to accommodate the RHNA.

- The sites inventory provides a parcel-by-parcel assessment and justification for nonvacant opportunity sites in Table C-16. A majority of these parcels have property owner interest or are City-owned surplus sites. The supplemented pipeline tables (C-4 and C-6) also provide evidence that projects have developed on nonvacant uses. Additionally, Table C-12b, Projects Converting Existing Non-Residential Uses to Residential Uses, 2018-2021, shows examples of where completed and approved projects have changed from nonresidential to residential zones and includes their AV ratio and FAR when provided. In many cases, actual densities are greater than permitted densities, even when AV ratios and FAR is higher than capacity modifiers as described in Table C-13.

City-Owned Sites: The element briefly describes its strategy to use City-Owned sites to accommodate a portion of the RHNA for lower income households (p. C-77). However, the element should identify which sites specifically are owned by the City and include a program with numerical objectives that ensures compliance with the Surplus Land Act, provides incentives and actions along with a schedule to facilitate development of City-owned sites. Actions should include outreach with developers, issuing requests for proposals, incentives, fee waivers, priority processing and financial assistance. The element should also update its Actions (3.3.1 and 3.3.4, for example) to describe a schedule of actions and, as described on the August 11, 2022 call, the timeline for completion of an Environmental Impact Report for these sites.

- The revised draft includes an updated Table C16-b to identify the specific sites owned by the city in Appendix C, section C.3. In response to the comment, Actions 3.3.1 and 3.3.4 in the Housing Action plan have been updated to clarify the schedule of actions and timeline for the completion of zoning and environmental review for these sites (p.32 and p.35).

Alternative Adequate Sites: The sites inventory uses the adequate sites alternative to credit 82 units across two assisted housing sites that were acquired by the City to preserve affordability (p. C-27). However, the analysis must confirm compliance with all relevant requirements pursuant to Government Code 65583.1. This analysis may utilize HCD Alternate Adequate Sites checklist available at https://www.hcd.ca.gov/adequate-sites-alternative.

- The revised draft of Appendix C includes updated language related to alternative adequate site compliance on p.C-26. The revised draft also includes an additional table, Table C-9b on p.C-31 summarizing Adequate Alternative Requirements to ensure compliance to relevant requirements.

Zoning for a Variety of Housing Types:
Emergency Shelters: The element mentions emergency shelters are permitted in various areas throughout the City. However, the element should also clarify shelters are permitted without discretionary action and discuss available acreage, including typical parcel sizes and the presence of reuse opportunities. In addition, the analysis should address proximity to transportation and services and any conditions inappropriate for human habitability.

- In response to the comment, Action 4.3.6 has been added to the Housing Action Plan to expand opportunities for the permitting of Emergency Shelters. This action clarifies that the City plans to revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide. Appendix F has been revised to include a detailed analysis of currently designated areas for by right approval of emergency shelters, including information regarding available acreage, typical parcel sizes, presence of reuse opportunities, proximity to transportation and services and potential conditions inappropriate for human habitability (p.F-53-F-55).

Permanent Supportive Housing: Supportive housing shall be a use by-right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses pursuant to Government Code section 65651. The element must demonstrate compliance with this requirement and include programs if necessary.

- Appendix F reflects other constraints related to supportive housing, including residential care facilities and emergency shelters (F-52-F-55). The Housing Action Plan has been updated to include revised language in Action 4.3.3. The changes made indicate that the City will amend the Planning Code to remove regulatory restraints to the development of transitional and supportive housing. The revised action clarifies that the City will codify the by right requirements of Government Code section 65651 into the Oakland Planning code and modify the basic application to identify streamlining opportunities (p.75).

Employee Housing: The element must demonstrate zoning is consistent with the Employee Housing Act (Health and Safety Code, § 17000 et seq.) or add or modify programs. Specifically, section 17021.5 requires employee housing for six or fewer employees to be treated as a single-family structure and permitted in the same manner as other dwellings of the same type in the same zone.

- The revised draft of the Housing Action Plan has been updated to include the addition of Action 3.7.7 (Amend Planning Code to comply with the Employee Housing Act) (p.63). Additional language has also been added to Appendix F further clarifying the element's compliance with the Employee Housing act (p. F-59).

Small Units: Pursuant to public comments received, the City should consider a variety of naturally affordable housing types as part of its strategy, including efficiency units, cohousing units, and any units tied to a social housing programs and pilots. The element may also, for example, consider limited equity condominiums, pursuant to public comments.

- The Housing Action Plan highlights recent efforts the City has made to encourage a variety of naturally affordable housing types, such as Oakland's 2018 residential Hotels Ordinance, the "Nook" microunit project in 2016, and the completion of the co-housing project Phoenix Commons in 2016 (p.24). Additional language was added to Policy 3.5 (Explore Innovative and Alternative

Housing Models) elaborating on the City's participation in Acquisition to Affordable Housing Programs (ACAH) intended to allocate funding for community land trusts and limited equity housing cooperatives. Action 3.5.2 includes updated language clarifying the City's participation in Acquisition and Conversion to Affordable Housing programs to support community land trusts and cooperatives (p.55). Language was also updated in Action 3.7.6 (Expand areas where rooming and efficiency units are permitted by right) to further support the development of a variety of naturally affordable housing types(p.62)

Single Room Occupancies (SRO): The element describes the zones in which SROs are currently permitted. However, given the success of SROs in providing housing for Extremely Low Income (ELI) households, the element should also describe how it will encourage SRO development.

- The revised Housing Action Plan includes several actions intended to strengthen and support SRO developments. Action 3.3.5 (Implement affordable housing overlay) will allow SRO's and Rooming houses by right in areas subject to the prospective affordable housing overlay (p.36). Action 2.2.3 limits demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units and strengthens protections for residential hotels (p.19). The City plans to further encourage SRO development through Action 2.2.7: provide additional subsidy for residential hotels (p.21).

3. *An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and for persons with disabilities as identified in the analysis pursuant to paragraph (7), including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures... (Gov. Code, § 65583, subd. (a)(5).)*

   Land Use Controls: The element identifies many land use controls as potential constraints on a variety of housing types. However, the analysis should analyze land use controls independently and cumulatively with other land use controls. The analysis should specifically address requirements related to Floor Area Ratios, open space requirements, setbacks, and limits on allowable densities. The analysis should address any impacts on cost, supply, housing choice, affordability, timing, approval certainty and ability to achieve maximum densities and include programs to address identified constraints.

   - The revised draft of Appendix F includes analysis of independent and cumulative impacts of land use controls on F-31. Additionally, the Housing Action Plan includes revisions of Action 3.4.8. (Implement objective design standards) in order to address constraints identified in Appendix F.

   Processing and Permit Procedures: The element lists design review criteria (p. F-57), however, it should also evaluate those criteria for impacts on cost, timing and especially approval certainty. For example, one finding is the project will "enhance desirable neighborhood characteristics". The element should explain how that finding is applied

and met, whether there are any impacts on cost, timing and approval certainty and add or modify programs to address any identified constraints.

- Effects of design review on cost and timing are included on p. F-64.
- To address this comment regarding identified constraints resulting from the design review process, the revised draft includes the addition of Action 3.4.3 (Revise Conditional Use (CUP) requirements) as well as Action 3.4.8 (Implement objective design standards). Combined, these two actions will allow a streamlined design review process, intended to reduce costs, shorten timelines, and increase approval certainty.

Housing for Persons with Disabilities: The element describes its approval procedures for group homes for seven or more persons (p. 592), including limitations or approval criteria. However, the element should analyze these approval criteria as constraints on approval certainty and objectivity for housing for persons with disabilities and include programs as appropriate.

- Appendix F expands discussion of residential care facilities constraints (p. F-51), including in commercial areas. To address potential constraints, the revised draft includes updated language in the Housing Action plan for Action 3.7.3 (Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs).

B. Housing Programs

1. *Include a program which sets forth a schedule of actions during the planning period, each with a timeline for implementation, which may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the Housing Element through the administration of land use and development controls, the provision of regulatory concessions and incentives, and the utilization of appropriate federal and state financing and subsidy programs when available. The program shall include an identification of the agencies and officials responsible for the implementation of the various actions. (Gov. Code, § 65583, subd. (c).)*

   A large share of the programs lists implementation timelines as "ongoing." While this may be appropriate for some programs, programs with specific implementation actions must include completion dates resulting in beneficial impacts within the planning period. Programs that should be modified to add discrete timing include (but are not limited to) 1.1.3 (Strengthen Ellis Act Ordinance), 1.1.5 (Provide eviction defense and implement a right to counseling), 1.1.6 (Expand rent control in a limited manner to maintain affordability), 1.1.9 (Continue and expand the Tenant Protection Ordinance), 1.1.10 (Enforce the tenant right to return), 2.1.1 (Support home rehabilitation programs), 2.1.6 (Explore funding to improve indoor air quality), 2.2.5 (Extend local replacement unit provisions), 3.2.5 (Reduce constraints to the development of ADUs), 3.3.2 (Expansion of Section 8 vouchers), 3.3.3 (City of Oakland Rental Assistance Program), 3.3.4 (Develop permanent housing affordable to extremely-low income households on public land), 3.3.9 (Adjusting or waiving City fees and payment timing for affordable housing developments), 3.3.12 (Continue the

Acquisition and Conversion to Affordable Housing Program), 3.3.13 (Expand availability of predevelopment funding and low-cost debt products for affordable housing development), 3.3.14 (Evaluate the creation of a leveraged acquisition fund or debt equity fund for small sites to support housing acquisition), 3.3.17 (Support low-income grassroots and BIPOC affordable housing developers), 3.7.1 (Incentivize development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs), 3.7.4 (Implement the sponsor-based Housing Assistance Program), 3.7.5 (Encourage a range of unit sizes including housing that matches a local household needs and family sizes), 3.8.1 (Continue to implement the Vacant Property Tax), 4.1.4 (Provide needed support and income to people who have been homeless), 4.2.4 (Increase oversight of homelessness strategies, investments and encampment operations with Homelessness Advisory Commission), 4.3.1 (Finance Construction and Maintenance of permanent supportive housing and deeply affordable housing), 5.1.1 (Provide First time home ownership incentives), 5.2.4 (Secure funding from AHSC Program), and 5.2.7 (Encourage new affordable housing in higher resource neighborhoods).

Additionally, several programs and actions have timelines that should be moved earlier in the planning period to ensure a beneficial impact. Examples include Programs 3.3.10 (Enhanced Infrastructure Financing District) and 3.5.2 (Support Housing Cooperatives).

Additionally, programs must have specific commitment to clear outcomes or deliverables. Several programs include actions with no description of how those actions will be implemented (e.g., “support”, “study”, “explore”, “evaluate”, etc.,). For example, Program 3.5.2 states that the City will "support housing cooperatives, co-living, and cohousing models". However, it does not state when and how their housing types will be available. Programs should be amended, as appropriate to include specific commitment. Examples include Programs 1.1.5 (Eviction Defense), 1.1.10 (Tenant Right to Return), 1.1.13 (Preventing Displacement / Homelessness), 3.3.15 (Citywide Density Bonus Expansion), 3.3.16 (Consider revising Real Estate Transfer Tax), 3.4.3 (Revising Parking Standards), 3.4.4 (Revising Open Space Requirements) and 5.2.9 (Accountability Measures for Housing Programs).

Based on public comments received, the City should also consider revising Action 2.2.5 to develop procedures that find and support displaced tenants after demolitions, as well as ensuring that projects pursuing SB-330 protections have sufficient replacement units for tenants at risk of displacement.

- The revised draft includes modifications clarifying discrete timing for actions in the Housing Action Plan for the following actions identified in the comment: 1.1.3 (Strengthen Ellis Act Ordinance), 1.1.5 (Provide eviction defense and implement a right to counseling), 1.1.6 (Expand rent control in a limited manner to maintain affordability), 1.1.9 (Continue and expand the Tenant Protection Ordinance), 1.1.10 (Enforce the tenant right to return), 2.1.1 (Support home rehabilitation programs), 2.1.6 (Explore funding to improve indoor air quality), 2.2.5 (Extend local replacement unit provisions), 3.2.5 (Reduce constraints to the development of ADUs), 3.3.2 (Expansion of Section 8 vouchers), 3.3.3 (City of Oakland Rental Assistance Program), 3.3.4 (Develop permanent housing affordable to extremely-low income households on public land), 3.3.9 (Adjusting or waiving City fees and

payment timing for affordable housing developments), 3.3.12 (Continue the Acquisition and Conversion to Affordable Housing Program), 3.3.13 (Expand availability of predevelopment funding and low-cost debt products for affordable housing development), 3.3.14 (Evaluate the creation of a leveraged acquisition fund or debt equity fund for small sites to support housing acquisition), 3.3.17 (Support low-income grassroots and BIPOC affordable housing developers), 3.7.1 (Incentivize development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs), 3.7.4 (Implement the sponsor-based Housing Assistance Program), 3.7.5 (Encourage a range of unit sizes including housing that matches a local household needs and family sizes), 3.8.1 (Continue to implement the Vacant Property Tax), 4.1.4 (Provide needed support and income to people who have been homeless), 4.2.4 (Increase oversight of homelessness strategies, investments and encampment operations with Homelessness Advisory Commission), 4.3.1 (Finance Construction and Maintenance of permanent supportive housing and deeply affordable housing), 5.1.1 (Provide First time home ownership incentives), 5.2.4 (Secure funding from AHSC Program), and 5.2.7 (Encourage new affordable housing in higher resource neighborhoods).

The timelines of programs 3.3.10 (Enhanced Infrastructure Financing District) and 3.5.2 (Support Housing Cooperatives) have been moved to earlier dates, as per the comment's suggestion. For programs lacking clear outcomes and deliverables in the Housing Action Plan, language and program structure has been revised to demonstrate clear outcomes and objectives. Action 2.2.5 (Extend local replacement unit provisions) has also been revised according to the comment's suggestions, with the addition of plans for the maintenance of a displaced tenant database to identify and support displaced tenants.

2. *Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Government Code section 65584.09. Sites shall be identified as needed to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing. (Gov. Code, § 65583, subd. (c)(1).)*

   As noted in Finding A3, the element does not include a complete site analysis; therefore, the adequacy of sites and zoning were not established. Based on the results of a complete sites inventory and analysis, the City may need to add or revise programs to address a shortfall of sites or zoning available to encourage a variety of housing types.

   - In the revised draft, see Goal 3 of the Housing Action Plan for a number of additional actions added to encourage a variety of housing types. Some of these programs

include but are not limited to: Action 3.2.1 (Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs), Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements), Action 3.5.1 (Support community land trusts and other shared equity models), Action 3.6.2. (Provide increased flexibility in development standards), Action 3.2.1 (Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs) in addition to many other programs in the Housing Action plan intended to address a shortfall of sites or zoning available to encourage a variety of housing types.

3. *Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities. (Gov. Code, § 65583, subd. (c)(3).)*

   As noted in Finding A4, the element requires a complete analysis of potential governmental and nongovernmental constraints. Depending upon the results of that analysis, the City may need to revise or add programs and address and remove or mitigate any identified constraints.

   - The revised draft of the Housing Action Plan includes a number of programs intended to alleviate governmental and nongovernmental constraints to maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. Numerous programs under Goal 3 (Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities) include revised language intendent to eliminate constraints, such as action 3.2.5 (Reduce constraints to the development of ADUs) or Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements). New programs have also been added to the revised draft to reduce constraints, such as Action 4.3.3 (Remove regulatory constraints to the development of transitional housing and supportive housing) and Action 3.4.10 (Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right).

4. *Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics. (Gov. Code, § 65583, subd. (c)(5).)*

   As noted in Finding A1, the element must include a complete assessment of fair housing. Based on the outcomes of that analysis, the element must add or modify programs. Programs to AFFH should go beyond status quo actions, include specific

commitment, timing, geographic targeting and metrics or numerical targets and should generally address housing mobility, encourage new housing choices in higher resource areas, improve place-based strategies toward community revitalization and protect existing residents from displacement.

- In the revised draft, many of the programs in the housing action plan have been significantly modified to include specific commitment, timing, geographic targeting and metrics.

5. *The housing program shall preserve for low-income household the assisted housing developments identified pursuant to paragraph (9) of subdivision (a)... (Gov. Code, § 65583, subd. (c)(6).)*

   Program 2.2.2 (Preserve Affordable Housing) should be revised with specific commitment to comply with noticing requirements, coordinate with qualified entities, assist with funding or support funding applicants and provide education and support to tenants.

   - Program 2.2.2 (Preserve Affordable Housing) has been revised with specific commitment to comply with noticing requirements, coordinate with qualified entities, assist with funding applicants and provide education and support to tenants.

6. *Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent... (Gov. Code, § 65583, subd. (c)(7).)*

   Program 3.2.4 (Incentives for Accessory Dwelling Units (ADU)) should commit to should monitor permitted ADUs and affordability every other year and take appropriate action such as adjusting assumptions or rezoning within a specified time (e.g., 6 months) if assumptions are not realized.

   - In response to the comment, an additional program in the Housing Action Plan has been added to the revised draft, Action 3.2.6. (Monitor Affordability of Permitted ADUs), to monitor permitted ADUs and affordability and also includes provisions for rezoning within a specified timeframe if assumptions are not realized.

C. Quantified Objectives

Establish the number of housing units, by income level, that can be constructed, rehabilitated, and conserved over a five-year time frame. (Gov. Code, § 65583, subd. (b)(1 & 2).)

While the element includes quantified objectives for new construction, rehabilitation and conservation by income group, it could consider quantified objectives for conservation (beyond at-risk preservation). For your information, the quantified objectives do not represent a ceiling, but rather set a target goal for the City to achieve, based on needs, resources, and constraints.

- Quantified objectives for rehabilitation and conservation are included in Table 4-1 (p.91) of the Housing Action Plan, with minor adjustments and additional language incorporated into the table in the revised draft.

D. Public Participation

Local governments shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the element shall describe this effort. (Gov. Code, § 65583, subd.(c)(9).)

The City made extensive efforts to reach the public, including hosting events and requesting input on suitable sites. Nonetheless, several comments questioned the lack of units in North Oakland, specifically around the Rockridge BART station, as concerns around why several eligible parcels were excluded from the inventory, and these issues must be addressed.

- The revised draft includes additional sites from the North Oakland Area in the site inventory in response to these comments and public input. Additionally, revisions have been made to Action 3.4.1 (Revise development standards, including allowable building heights, densities, open space and setback requirements) to increase allowable heights and densities in areas near Rockridge BART. See Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing and open up exclusionary neighborhoods such as Rockridge.

The City should also commit to revising Action 3.7.5 to studying second egress requirements. It can also discuss prioritizing cohousing opportunities, reducing lot size minimums in some zones to 3,000 square feet, finding suitable parcels for housing in the Dimond District, developing preapproved missing middle housing types in high opportunity areas, developing programs to address indoor air quality, analyze the cost reductions expected from removing parking minimums, analyze how the placement of historic districts relate AFFH and establish firmer commitments around the development of live/work units.

- In response to this comment, Action 3.5.5 (Study Feasibility of Single-Stair Residential Buildings) has been added to study second egress requirements.
- See Appendix J for missing middle proposal the includes reduction of lot size minimums and reduction of parking minimums.

April 21, 2022

Dear Oakland City Council:

We are writing on behalf of **YIMBY Law** and **Greenbelt Alliance** regarding Oakland's 6th Cycle Housing Element Update. **YIMBY Law** is a legal nonprofit working to make housing in California more accessible and affordable through enforcement of state law. **Greenbelt Alliance** is an environmental nonprofit working to ensure that the Bay Area's lands and communities are resilient to a changing climate.

We are writing to remind you of Oakland's obligation to include sufficient sites in your upcoming Housing Element to accommodate your Regional Housing Needs Allocation (RHNA) of **26,251 units**.

In the Annual Progress Reports that Oakland submitted to HCD, we observe the following trend of housing units permitted in the last four years:

Year	Housing units permitted
2018	4,617
2019	2,154
2020	1,107
2021	1,667
Average, 2018–2021	**2,386**

To meet the 6th cycle RHNA target, the rate of new housing permits in Oakland would need to increase from **2,386 units per year** in 2018–2021 to **3,281 units per year** in the next 8 years. This is a 38% increase from recent years. **If the current pace were to continue, Oakland would meet only 73% of its new housing target**.

Based on these trends, it is unlikely that Oakland's existing realistic zoning capacity is sufficient to meet its 6th cycle RHNA target. According to HCD's Housing Element Site Inventory Guidebook, housing elements must analyze the realistic capacity of their sites, which may include considerations of "[l]ocal or regional track records", "past production trends", and "the rate at which similar parcels were developed during the previous planning period". A housing element that does not include a significant rezoning component is therefore unlikely to be compliant with state law.

We urge Oakland to include a major rezoning component in its Housing Element—a rezoning large enough to close the gap between recent housing production trends and the RHNA target. The rezoning should be within existing communities and should comply with the city's obligation to Affirmatively Further Fair Housing. We also urge Oakland to ease any other constraints, such as discretionary approval processes or impact fees, that may impede the rate of development on your city's housing sites.

Thank you,

Sid Kapur, East Bay YIMBY (sidharthkapur1@gmail.com)
Rafa Sonnenfeld, YIMBY Law (rafa@yimbylaw.org)
Zoe Siegel, Greenbelt Alliance (zsiegel@greenbelt.org)

DIMOND
IMPROVEMENT ASSOCIATION

17 May 2022

Dear Director Gilchrist and Staff of the 2045 General Plan Update,

The Board of the Dimond Improvement Association is writing today to provide input on the upcoming Housing Element of the 2045 General Plan Update.

The Dimond District is a resource-rich neighborhood in Oakland that is complete with high-quality transit service, park space, schools, access to grocery stores and restaurants, a library, and a post office. More Oaklanders should have access to the resources we currently enjoy. The Dimond Improvement Association has outlined the goals we wish to achieve for the 6th Housing Element Cycle to ensure strong equitable growth of our neighborhood.

High Level Goals

1. Develop without displacement
    a. Focus upzonings on commercial properties and single-family homes. Do not upzone multifamily buildings that are subject to rent control (i.e. multifamily buildings built before 1983).
    b. Continue to enforce the Housing Crisis Act of 2019 (SB 330) to ensure that any loss of rent controlled units is met with the addition of a corresponding number of new affordable units.
2. Encourage redevelopment in locations on and near transit lines in and around the Dimond to reduce vehicle miles traveled (VMT).
    a. In general, *increase* the number of people in the Dimond, but *decrease* the number of cars
3. Focus on mixed use developments in the Dimond Business District (DBD) and other commercial properties in and around the Dimond

Focused Goals

1. Eliminate parking minimums for new housing construction in the DBD and all areas in the Dimond within 1 mile of transit stops.
2. Establish parking maximums for new housing developments in the DBD of less than 0.1 parking space per dwelling unit.
3. Establish bicycle parking minimums of 3 spaces per dwelling unit.
4. Establish a base height limit of 55 ft in the DBD
    a. Upzone Opportunity Sites to a max height of 65 ft.
    b. Make exceptions for rent controlled (built prior to 1983) multifamily housing.
    c. Structure zoning changes such that newly constructed housing does not interfere with current and future business license permitting requirements (eg., liquor, cannabis dispensary, restaurant licenses, etc).

    d. Developments seeking additional height and density may do so through the State Density Bonus Law.
5. Upzone all transit corridors in and around the Dimond to 55 ft (MacArthur Blvd, Park Blvd, Fruitvale Ave, Lincoln Ave, etc).
    a. Make exceptions for rent controlled (built prior to 1983) multifamily housing.
    b. Modify zoning changes to within allowable density limits in high severity fire zones.

Small Lots

1. Draft clear rules for increasing density on smaller lots with different housing types (eg, apartments, bungalow courts, townhouses, etc), that allow for ministerial approvals.
2. Allow for six (6) units by-right for any lot that allows ADUs. Allow for ten (10) if two (2) are deed-restricted for affordable housing (subject to fire and building codes).
    a. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.
3. Legalize Accessory Commercial Units (ACUs) wherever ADUs are permitted to lower the barrier to entry for small-scale commercial businesses and encourage walkability within neighborhoods.
    a. Draft rules guiding the permitting process of ACUs that allow for ministerial approvals.
    b. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.

Potential Opportunity Sites for Redevelopment with a focus on Mixed Use

1. Empty lot at MacArthur Blvd and Dimond Ave, 2114 MacArthur Blvd
2. Bank of America, 2154 MacArthur Blvd
3. Wells Fargo and Chase Bank, 3450-3438 MacArthur Blvd
4. Giant Burger, 2055 MacArthur Blvd
5. Safeway, 3500 Fruitvale Ave
6. 7-11, 2411 MacArthur Blvd
7. CVS, 3320 Fruitvale Ave
8. Old “Hopkinstown” intersection and strip mall, at MacArthur Blvd and Coolidge Ave (2809-2833 MacArthur Blvd, including 2828 MacArthur, 2846 Georgia St.)
9. Diamond Market building, 2979-2973 MacArthur Blvd
10. Solar Car Wash, 3092 MacArthur Blvd
11. Oakland Imported Cars, 3200 MacArthur Blvd

Suggested Project Homekey Sites

1. Highlander Motel, 3255 MacArthur Blvd
2. The Oaks Motel, 3250 MacArthur Blvd

DIMOND
IMPROVEMENT ASSOCIATION

We hope you will take our wishes into consideration for the Housing Element process and serve us by meeting all State requirements during this cycle.

Thank you,

Ryan Romaneski
Chair, Dimond Improvement Association

Housing Plan Comments

Hello,

My general comment for the plan is the following:

Remove restrictions / increase incentives for developers and people to construct housing such as large buildings and/or ADUs

Cheers,
Jesse

To: General Plan <generalplan@oaklandca.gov>

Cc: HousingElements@hcd.ca.gov <HousingElements@hcd.ca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

The draft housing element lists 288 9th Avenue (APN 018 046500204) as a low-income site zoned for 254 units.

This is park space that contains Township Park and Rocky's Market. Both were built in the past 5 years.

Please remove this site from the site inventory. I would encourage you to re-allocate the 254 low-income units to high-resource sites such as the Claremont/College flatiron or new sites like 5354 Claremont Ave.

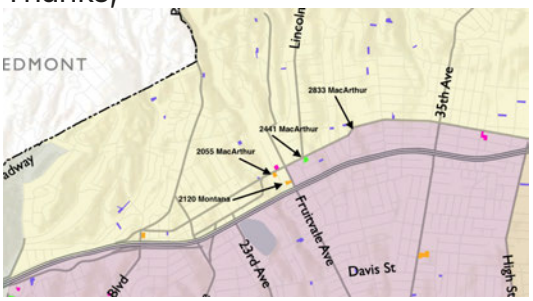
Oakland Draft HE: Dimond

Bret Peterson <bretnpeterson@gmail.com>

Sun 5/22/2022 11:29 AM



To: General Plan <generalplan@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

The draft HE fails to list 3 sites that are mapped on the pg 7 "Housing Sites Inventory" map. These sites are 2441 MacArthur Blvd, 2055 MacArthur Blvd, and 2120 Montana St. 2441 and 2055 MacArthur should be listed as official sites, as they are underutilized lots. Since 2120 is a current gas station, it is unclear if it could be developed in the next 8 years.

It is also strange that 2833 MacArthur has been left off the DHE. It is a dying strip mall with vacant storefronts and should be redeveloped for housing to reinvigorate the neighborhood. It is also on the MacArthur transit corridor and across the street from a public school.

Thanks,

CITY OF OAKLAND
Cultural Affairs Division | Economic & Workforce Development Department

Date: May 23, 2022
To: Lakshmi Rajagopalan, Project Manager, Oakland General Plan Update
From: Oakland Cultural Affairs Commission
Topic: Cultural Affairs Commission Initial Recommendations for the General Plan

Equity is the driving force.
Culture is the frame.
Belonging is the goal.

Above are the tenets of the Oakland Cultural Development Plan that guide the work of the Cultural Affairs Commission in its mission to advise the Mayor, City Council, and City Administrator on all matters pertaining to cultural development and vitality in Oakland.

With this front of mind, the Commission seeks to bring its voice and that of local culture keepers to the General Plan Update as its policies will shape the health and well-being of the soul of Oakland for decades to come. The culture of Oakland is generated by its people—their lives and livelihoods. The General Plan sets the conditions for ensuring there is sufficient and accessible shelter, thriving diverse businesses, and vibrant neighborhoods and gathering spaces that reflect and are for those very people.

For years, we have seen multi-generational Oaklanders pushed out of their homes, culture makers and keepers priced out of their spaces, and the tragic loss of life of those who are merely trying to keep a toehold in their city and a space to express and share their creativity and sense of community. This has to stop. We believe that for the cultural health of Oakland, we must have policies that support Oaklanders to exercise their right to feel they belong in their city and that their city belongs to them. To this end, we advocate for all Oaklanders' ability to:

- Stay in their homes
- Return from residential and business displacement
- Have spaces that facilitate cultural production and allow for exchange and innovation
- Maintain and create thriving, culturally-rooted local businesses and organizations (particularly of historically marginalized communities)
- Create and activate public and private spaces in which to negotiate and build community that are culturally-equitable, safe, and healthy

Recommendations

The following recommendations, based on the general principles articulated above, are put forth by the Cultural Affairs Commission for consideration by the Oakland Planning and Building Department, Dyett & Bhatia, Deeply Rooted, and the City Council. The Commission provides these recommendations as its first of several during the general planning process. Additional recommendations will be provided as forthcoming plan elements are considered.

#	Recommendation	Pg
Theme 1: Live/Work and Work/Live		
1A	Incentivize the development of affordable live/work and work/live units.	3
1B	Provide guiding language in the general plan and policies in the Zoning regulations for live/work and work/live units to reduce absorption into residential-only uses.	4
1C	Track live/work and work/live units as a category within the planning department.	5
1D	Codify policies in the general plan that ease the process and reduce expenses to get non-conforming spaces into code.	5
1E	Adopt policies in the general plan to protect cultural workers and workspaces at risk of displacement or affected by cannabis manufacturing, cultivation and other cannabis businesses.	7
Theme 2: Cultural Infrastructure		
2A	Expand the use of zoning regulations being piloted in the Downtown Oakland Specific Plan to increase first-floor cultural spaces to Districts 6 & 7.	9
2B	Establish a working group to make recommendations to the City Council for the timely development and implementation of a Cultural Facilities Policy.	10
Theme 3: Cultural Equity Impact Assessment		
3A	Establish the use of a Cultural Equity Impact Assessment as a condition of California Environmental Quality Act (CEQA) review	11
Theme 4: Right of Return		
4A	Codify guiding preference policy in the general plan to allow displaced Oaklanders the right of return.	12

Theme 1: Live/Work and Work/Live	
Recommendation 1A: Incentivize the development of affordable live/work and work/live units.	
Benchmark: *Increase number of affordable units available* ***Guiding Principles:*** *Have spaces that facilitate cultural production and allow for exchange and innovation*	
Rationale	**Resources**
Cultural infrastructure and cultural characteristics of cities have a demonstrated positive impact on a city's economy and vibrancy[1]. The presence of artists, cultural workers, and makers in a community is critical to that end and part of Oakland's "secret sauce"[2]. Many cultural workers in Oakland are at risk of displacement as illustrated by a 2015 survey[3] administered to creatives by the Mayor's Artist Housing and Workspace Task Force. Affordable live/work units fill an important gap which benefits a wide variety of residents including artists, cultural workers, and makers (particularly from historically marginalized communities) and aims to maintain Oakland's cultural vibrancy. The availability of space that is affordable, physically appropriate for makers, code-compliant, and blends the needs of housing and workspace into one unit creates increased financial stability for this demographic and has a demonstrated positive cultural and economic impact on the region.[4] **Sub-Recommendation from the White Paper[5]** • 1.1A — Tying conditional permits to the provision of affordable live/work housing in Community Commercial (CC) neighborhoods, including CC-3 where residential is not currently allowed.	*Belonging in Oakland: A Cultural Development Plan* *White Paper: Strategies for Protecting and Creating Arts & Culture Space in Oakland* *Oakland's Art and Cultural Economy: Appendix to Belonging in Oakland*

[1] "Cultural and Creative Cities and Regional Economic Efficiency: Context Conditions as Catalyzers of Cultural Vibrancy and Creative Economy." *Sustainability* 13, no. 13 (2021): 7150. http://dx.doi.org.libproxy.berkeley.edu/10.3390/su13137150.
[2]"Belonging in Oakland: A Cultural Development Plan," Spring 2018. https://cao-94612.s3.amazonaws.com/documents/Cultural-Plan-9.24-online.pdf.
[3]"Strategies for Protecting and Creating Arts and Culture Space in Oakland," Spring 2016. http://www2.oaklandnet.com/oakca1/groups/ceda/documents/agenda/oak062138.pdf.
[4]"Belonging in Oakland: A Cultural Development Plan," Spring 2018. https://cao-94612.s3.amazonaws.com/documents/Cultural-Plan-9.24-online.pdf.
[5] "Strategies for Protecting and Creating Arts and Culture Space in Oakland," Spring 2016. http://www2.oaklandnet.com/oakca1/groups/ceda/documents/agenda/oak062138.pdf.

Recommendation 1B: Provide guiding language in the general plan and policies in the Zoning regulations for live/work and work/live units to reduce absorption into residential-only uses.

Benchmark 1: *Guiding language added to general plan*
Benchmark 2: *Policies added to Zoning regulations*
Guiding Principles: *Stay in their homes, Have spaces that facilitate cultural production and allow for exchange and innovation*

Current code has several different working requirements for different live/work and work/live units.[6]

- Joint Living and Work Quarters (JLWQs): At least one resident must maintain a Business Tax Certificate and work out of the unit
- Residentially Oriented JLWQs: No requirement to have a tenant working in the unit
- HBX and D-CEs: At least one resident of a work/live unit must maintain a Business Tax Certificate and work out of the unit. No working activities are required to be performed in live/work units.

Live/work and work/live units are limited and incredibly valuable to Oakland's cultural workers and contribute to the cultural vibrancy of the city.[7] Requirements to use these spaces should be adjusted to reduce residential-only or digital economy uses that only require a home office while also preventing displacement of people in those spaces.

Consideration of a cultural worker certification process similar to the cities of Boston, MA or NYC may be a preferable alternative. It could improve enforcement of the policy which is currently weak. Intermediaries like Safer DIY Spaces and Vital Arts may be interested in piloting such a program.

Coordination of policy language with the Division of Cultural Affairs is recommended to avoid unintended exclusion of important segments of the cultural worker demographic.

Zoning Code Bulletin on work/live and live/work Housing

Belonging in Oakland: A Cultural Development Plan

Artist Housing Certification - Boston, MA

Artist Certification - NYC

Safer DIY Spaces

Vital Arts

[7] "Belonging in Oakland: A Cultural Development Plan," Spring 2018. https://cao-94612.s3.amazonaws.com/documents/Cultural-Plan-9.24-online.pdf.

Recommendation 1C: Track live/work and work/live units as a category within the planning department.	
Benchmark: *Planning department begins tracking live/work and work/live as a category* ***Guiding Principle****: Have spaces that facilitate cultural production and allow for exchange and innovation*	
The stock and production of these categories is not tracked.[8] It is valuable for the city to know existing quantities and uses so that it can be utilized for future planning purposes.	
Recommendation 1D: Codify policies in the general plan that ease the process and reduce expenses to get non-conforming spaces into code.	
Benchmark: *Adoption of approaches that increase code compliance and reduce harm* ***Guiding Principle:*** *Stay in their homes, Have spaces that facilitate cultural production and allow for exchange and innovation*	
The Ghost Ship tragedy exposed the lack of affordable space available for cultural production as well as the risks and spectrum of non-confirming living spaces in Oakland. Bringing unregulated spaces up to code is a better and less expensive alternative than tennant displacement from a non-conforming space and into houselessness. Organizations like Safer DIY Spaces have saved as much as 1 million square feet for $0.50/sqft.[9] The zoning regulations are fuzzy and leave a lot up to interpretation. Codifying policies in the general plan that reduce the expenses and red tape for conversion and lead to clear zoning regulations would be a great step. The following ideas surfaced from a UCLA Masters thesis by Megan Wissing Healy (linked in resources) and a conversation with Tom Dolan of Safer DIY Spaces : 1. Reorient code enforcement to adopt a harm reduction approach	*Secondary Units for Whom? Assessing interventions into Informal Housing in San Francisco and Oakland* Safer DIY Spaces

[8] Werth, Alex. "Statement of Methodology: Economic Impact Analysis and Cultural Asset Map," Spring 2018. https://oaklandca.s3.us-west-1.amazonaws.com/oakca1/groups/ceda/documents/report/oak071452.pdf.
[9] Tom Dolan, interview by Claire Pelley, April 26, 2022

2. Strengthen the role of intermediaries
3. Expand financing opportunities for essential life safety upgrades
4. Offer property owners amnesty while legalizing units
5. Recommended Building Code Changes
    a. Seismic retrofitting not required to get spaces into code
    b. Allow the use of less expensive sprinkler systems (plastic pipes, utilize same meter as home, etc)
    c. If a space has no walk-in trade or employees, make it exempt from ADA retrofitting
    d. Automatically consider all buildings more than 50 years historic to provide exemption from Title 24
    e. If there are two means of egress on a floor, remove the need for a bedroom window

Recommendation 1E: Adopt policies in the general plan to protect cultural workers and workspaces at risk of displacement or affected by cannabis manufacturing, cultivation and other cannabis businesses.

Benchmark: *Policies that protect cultural workers and spaces in industrial areas*
Guiding Principles: *Stay in their homes, Have spaces that facilitate cultural production and allow for exchange and innovation, Maintain and create thriving, culturally-rooted local businesses and organizations (particularly of historically marginalized communities)*

The implementation of legal cannabis production in the industrial zones has created unintended consequences for Oakland's cultural workers. Cannabis-related manufacturing, cultivation and other cannabis businesses are competing for space with artist live/work, work/live units and other industrial spaces serving artists and makers causing displacement. Cannabis uses often conflict with live/work spaces, due to industrial noise, increased pollution, and generally compromising the quality of life. While recent policy adoption has lessened these impacts by restricting approvals on properties used for work/live or residential purposes, there continue to be conflicts and displacement[10] exposing a gap that needs to be filled in order to protect Oakland's creative workforce.

One potential solution is to create a new cannabis-related land use category in the Planning Code, to allow the Planning and Building Department to have more regulatory oversight over Cannabis uses, and allow potential land use conflicts to be assessed and mitigated before a cannabis business receives permits.

Another idea would be to alter the borders of the cannabis green zone to protect existing clusters of artists and makers, including live/work space, from displacement by cannabis businesses. The process would include identifying clusters of live/work, work/live, and artist workspace in the industrial zone and

Oakland's Cultural Assets map

Cannabis Facilities Permitted Zones Map

Cannabis Ordinance Changes Sept. 18, 2020

[10] KQED. "A Denver-Based Firm Is Using Huge Diesel Generators to Grow Cannabis in East Oakland. Now the City Is Trying to Shut Them Down." Accessed May 8, 2022. https://www.kqed.org/news/11908979/a-denver-based-firm-is-using-huge-diesel-generators-to-grow-cannabis-in-east-oakland-now-the-city-is-trying-to-shut-them-down.

removing those areas from the cannabis green zone. The Cultural Assets map linked in resources is a starting place, but it is not complete. Live/work is not tracked as a category by the planning department. The Cultural Affairs Commission is open to alternative options that further protect cultural workers impacted by cannabis manufacturing, cultivation and other cannabis businesses.	

Theme 2: Cultural Infrastructure	
Recommendation 2A: Expand the use of zoning regulations being piloted in the Downtown Oakland Specific Plan to increase first-floor cultural spaces to Districts 6 & 7.	
Benchmark: *Zoning regulations added to more districts* ***Guiding Principle:*** *Maintain and create thriving, culturally-rooted local businesses and organizations (particularly of historically marginalized communities), Return from being displaced from Oakland, Create and activate public and private spaces in which to negotiate and build community that are culturally-equitable, safe, and healthy*	
Rationale	**Resources**
The Downtown Oakland Specific Plan (DOSP) will be piloting the use of a new cultural building category and requiring new developments to designate 50% of the ground floor storefront to be used as cultural space. Districts 6 and 7 lack cultural infrastructure relative to other districts[11] and would benefit from similar stimulation and incentives to increase and promote vibrancy. If the same tools cannot be expanded to other areas, consider alternatives that can also improve cultural infrastructure like a development fee to invest in city-owned cultural assets such as libraries, recreation centers, and open space. The Cultural Affairs Commission should be consulted on the definition of "cultural activity" to ensure it does not exclude important cultural stakeholders.	*White Paper: Strategies for Protecting and Creating Arts & Culture Space in Oakland* *Belonging in Oakland: A Cultural Development Plan* *The Downtown Oakland Specific Plan: Planning Code Amendments* Oakland's Cultural Assets map

[11] "Cultural and Creative Cities and Regional Economic Efficiency: Context Conditions as Catalyzers of Cultural Vibrancy and Creative Economy." *Sustainability* 13, no. 13 (2021): 7150. http://dx.doi.org.libproxy.berkeley.edu/10.3390/su13137150.

Recommendation 2B: Establish a working group to make recommendations to the City Council for the timely development and implementation of a Cultural Facilities Policy.	
Benchmark 1: *Working group established* ***Benchmark 2:*** *Cultural Facilities Policy added to general plan* ***Guiding Principle:*** *Have spaces that facilitate cultural production and allow for exchange and innovation, Create and activate public and private spaces in which to negotiate and build community that are culturally-equitable, safe, and healthy*	
The City of Oakland lacks a comprehensive and cohesive cultural facilities policy which could among other things: 1. Preserve cultural spaces and prevent loss 2. Provide guidance on type and geographies of needed cultural facilities development 3. Improve equitable access to cultural facilities 4. Increase stock of cultural facilities The working group should include collaborators from the Division of Cultural Affairs, the Planning Department, the Department of Parks, Recreation and Youth Development, and Oakland Public Library. The goal and North Star of the working group should be to create a cultural facilities policy which can be integrated into the general plan. Special attention should be focused on city-owned properties.	*Belonging in Oakland: A Cultural Development Plan*

Theme 3: Cultural Equity Impact Assessment

Recommendation 3A: Establish the use of a Cultural Equity Impact Assessment as a condition of California Environmental Quality Act (CEQA) review

Benchmark: *Addition of Cultural Equity Impact Assessment to CEQA review process*

Guiding Principle: *Stay in their homes, Maintain and create thriving, culturally-rooted local businesses and organizations (particularly of historically marginalized communities), Create and activate public and private spaces in which to negotiate and build community that are culturally-equitable, safe, and healthy*

Rationale	Resources
A Cultural Equity Impact Assessment would codify a process within the Department of Planning and Building to understand potential harms on culture and equity of proposed developments. Furthermore it recognizes the City of Oakland's responsibility to practice "equity in city practices that eliminates all forms of discrimination in City activities" as outlined in the establishment of the Department of Race and Equity. A Cultural Equity Impact Assessment can identify: 1. Potential loss of cultural vibrancy 2. Impacts on marginalized communities 3. Impacts of additional housing units on public facilities and open space 4. Threats of displacement 5. Ways to mitigate these potential harms	*Belonging in Oakland: A Cultural Development Plan* Department of Race and Equity Hawaii SB 987 requiring environmental impact statements assess effects on cultural practices

Theme 4: Right of Return

Recommendation 4A: Codify guiding preference policy in the general plan to allow displaced Oaklanders the right of return.

Benchmark: *Preference policy added to General Plan*

Guiding Principle: *Return from residential and business displacement*

Rationale	Resources
Systemic and historic housing policy injustices, escalating rents, housing unaffordability, and gentrification are all significant contributors to the Oakland housing crisis as well as the residential and business displacement of Oaklanders.[12] The Cultural Affairs Commission urges the adoption of a preference policy to protect Oaklanders impacted by displacement. A right of return policy will add value to the various measures aimed at protecting and maintaining Oakland's diversity and cultural vibrancy.[13]	*Belonging in Oakland: A Cultural Development Plan* Portland, OR preference policy Austin, TX resolution for a preference policy

RE: City of Oakland Draft Housing Element FY 2023-31

Dear Lakshmi Rajagopalan,

Thank you for the opportunity to help inform the City of Oakland's General Plan Housing Element. **We are writing to highlight the housing needs of families with young children and early care and education professionals living in Oakland and Alameda County.** The City of Oakland can invest in supports for families with young children and the early care and education (ECE) workforce through investments that promote the *structural conditions associated with child wellbeing*, including kindergarten readiness, a predictor of 3rd grade success which is itself a proxy for long term academic, career, and life outcomes.

Healthy, thriving communities are crucial for developing young minds and family well-being. Science tells us that there is a direct link between early childhood development, community and family conditions, and our city and county's stability and prosperity. Our biennial Kindergarten Readiness Assessment (KRA) consistently finds that kindergarten readiness is strongly linked to family access to basic needs, with housing at the center. This year, upon surveying over 3,000 people in the county – parents, early childhood educators, TK and kindergarten teachers, and with the guidance of our community-led Research Advisory Group, **housing and basic needs emerged as a top priority.** The study included 475 parents with Oakland addresses, 70 K/TK Oakland Unified School District teachers, and 150 ECE professionals in Oakland. These findings build on the evidence highlighting that the cost of living in Oakland and Alameda County has far outpaced families' abilities to make ends meet, and those structural inequities result in disparate outcomes for families of color and those with low incomes.

We support and encourage the city to prioritize policies, practices, and investments that:

1. **Increase the supply of affordable housing options for families with young children to support child health and well-being and prevent displacement of Black families and families disproportionately impacted by inequitable policies with racist and classist underpinnings.** Housing costs result in little or no disposable income for many families—putting pressure on families to decide between other basic needs like child care, food, and diapers.
    - 50% of renters in Alameda County pay more than one-third of their income for rent. For families of young children, the cost of child care creates an additional financial burden and contribute to financial instability. See more in our Data for Action guide.

2. **Adopt housing policies that support and advance the workforce of professionals who support our families including the ECE workforce, navigators, case workers, and family resource providers.** The high-cost of living in Alameda County also impacts our local community workforce. For example, the ECE workforce has historically earned lower wages than other educators in the public system. Affordable housing is a particularly pressing need for the population of mostly women small business owners who operate local family child cares homes;

without affordable and stable housing, family child care providers who provide home-based care face this risk of losing their business, and our community faces the risk of losing the critical service they provide. In Alameda County:

- Fifty-nine (59%) of family child care providers reported earning less than $15 per hour and struggle to meet their basic needs including covering the cost of rent or mortgage. In Oakland, approximately 40% of center directors and family child care providers rent their facility/home (192 of 481 child care programs).
- Eighty-seven (87%) of ECE professionals, 79% of whom identify as Black, Indigenous, or other women of color, are considered very low-income for the county.
- In our recent ECE facilities needs assessment survey we found:
    - 87% of Oakland center directors and family child care providers expressed interest in expanding their program to serve more children but have not been able to due to lack of resources and support.
    - 69% of Oakland center directors and family child care providers reported at least one component of their center or home as "inadequate or substandard"

3. **Expand and prioritize supports for unhoused pregnant people and families with young children.** The high costs of housing and population growth have made Alameda County a hot spot for housing instability and homelessness in the state of California. According to the Department of Housing and Urban Development, the *first year of life is when people are most likely to enter shelter and transitional housing programs, followed by ages one to five*. Pregnant women and families with young children are particularly at risk when they face housing instability. Currently in our county, families with newborns cannot leave the hospital without a car seat, but they can leave without a home.
    - One in five pregnant women who are homeless give birth prematurely, according to research findings cited in the California Health Report.
    - In 2018, the homeless management information system showed 969 families with 2,917 members as homeless in Alameda County, including 433 children ages 0-5. We know these numbers do not reflect the true extent of the issue as many families do not come forward to ask for assistance out of fear and live in their vehicles or with friends instead.

4. **Support place-based investments to promote family friendly neighborhoods.** As part of the Neighborhoods Ready for School (NRFS) strategy, First 5 Alameda funds trusted community organizations and family resource centers to build an ecosystem of support for families in the community. Three of our four NRFS grantees are in Oakland - Lincoln, San Antonio Family Resource Center, and Roots Community Health Center are working with partners to promote neighborhood conditions where families can thrive. These grantees quickly pivoted at the start of the pandemic to provide basic needs, health and safety supplies, and other family resources via trusted messengers in community. The city could build upon such place-based investments in a coordinated effort to support family friendly neighborhoods - including access to basic needs, affordable housing, child care, transportation, neighborhood libraries, and safe, green and accessible schools, parks, playgrounds. In our latest KRA we found that:
    - Connection to resources (i.e. family navigation to economic supports and basic needs, including housing) was significantly correlated to higher kindergarten readiness

- Families who resided in a higher-income neighborhoods reported higher readiness, and neighborhood assets (i.e. safety, parks/playgrounds, libraries) were correlated with readiness, regardless of family income
- Families want policies that invest in the local economic development to support job creation and advance living wages particularly for Black and Brown communities

Our mission at First 5 Alameda County is to build an early childhood system of care that cultivates the community and family conditions needed to support children's kindergarten readiness; as a funder, partner, administrator, and advocate, we prioritize policies, programs, and investments that narrow disparities and improve the lives of children from birth to age five, their families, and their caregivers. We partner with community-based organizations to ensure that families and providers have the resources they need for children to thrive—including basic needs, connections to services and information, and peer support to promote mental health and well-being. Through our work, we seek to improve underlying structural conditions and outcomes.

For these reasons, we urge the City of Oakland to consider the needs of families with young children and the early care and education workforce in the 2023-2031 Housing Element Plan. We look forward to the opportunity to partner with the City of Oakland to advance investments that make Oakland a city where all families and children can thrive.

Sincerely,

Kristin Spanos
Chief Executive Officer
First 5 Alameda County

6/1/22

EBHO Oakland Committee Meeting

- Liana
  - What are some concrete action items that have already been agreed upon?
  - RHNA numbers – how does the City anticipate being able to meet RHNA goals? Explanation of buffer
  - Constraints – noted that staff mentioned high fees as a constraint, but from what Liana hears, fees aren't high enough
- Jeff
  - Fees – need to distinguish btwn planning and building fees, the extent to which the fees are barriers, impact vs permitting fees
  - Please include an executive summary of the HE – organization and content
  - Sites – map of sites across the city with council districts, distinguish sites for lower income housing/market rate. Sites inventory needs to be sent to HCD can that be available to the public. Map sites against areas of concentration race/income - higher income and largely white neighborhoods; extent to which we are putting multifamily and aff housing into those areas. What share of lower income housing sites are going into high opportunity/high segregation areas?
  - How is the ADU production/affordability generated?
  - Maps from state maps – RECAP – not a terribly useful way of looking at segregation
  - HAP – is the list of new programs in the HE anywhere? Plan/study/consider - proposed policies with respect to inclusionary zoning will be presented to the Council for consideration by a specific date so that we are not endlessly studying. Policies will in fact reduce the racial disparities in housing opportunity/outcomes/conditions identified in the fair housing assessment
- Melody
  - What are some of the plans for seniors?

6/1/22

Planning Commission Meeting Notes

- Comments
    - Commissioner - Why didn't we build on opportunity sites from the previous cycle(s)?
    - WG - What will induce a developer to build housing? Those elements may not have been in place; obstacles were not always removed to induce a developer to build housing on the site
        - Moved regulations to having zoning allow housing by-right on those sites via state law
        - Hindsight analysis about areas where opportunity sites were / were not developed
    - Jeff Levin – 1999-2014, the city averaged less than 1,000 units per year. What actions is the city taking to encourage affordable housing development as a result of SB9? Five year impact fee study – when will this occur?
    - Daniel Gregg - Encourage development of local construction labor, apprenticeship programs, workable local hire, workforce necessary to build housing we desperately need
    - Michael Gabriel – lean toward objectivity. Action 2.2.8 investigate TOPA/COPA. Action 1.1.3 - strengthen ellis act – strengthen is an advocacy word. Implement, evaluate, monitor might be better words. Lacking information and education about how to follow rules on the landlord's side. Action 1.1.8 - rental registry – evaluate the value of instead of advocacy. Limit condo conversions – evaluate or impact instead
    - Tuan Ngo – TOPA/COPA - consider public input, change on p57 to reference this as an approach; moving private properties into social housing; will negatively impact small mom and pop owners. This policy is not effective; richmond city council unanimously voted to halt this program. Affordable housing directly into hands of low income tenants, provide downpayment assistance to homebuyers
    - Lucky Thomas – resident in west oakland. Member of In it together Oakland. Housing can be provided in many different ways/forms than just TOPA/COPA, shouldn't just be the GPU. Housing plan needs to be objective, shouldn't be advocacy for a political view or position. We should look at how do we best preserve our city, support mom and pops, small property owners, all of the rights/abilities to operate one's property. Remove TOPA/COPA. Explore condo conversions, cooperatives, etc
    - Chair Manus – statements about objectivity vs objectivity in the Housing Element, what does WG think?
    - Commissioner Shirazi – thorough and thoughtful HE. Map of sites – Rockridge area does not have any identified sites – is this because of rezoning program?
    - Chair Manus – convergence of building typology in the zoning. Having those who build / develop as a part of the assumptions about where upzoning is logical – make sure building code updates are reflected. Changing building type from Type 3 to Type 4
    - Commissioner Fearn – is there cliff notes version of what the State wants to see related to AFFH thresholds in the HE? Housing should be located in high resource areas,

increase investments in low resource areas. Are we leaning on our policies to ensure we meet RHNA bc we're not locating housing in opportunity sites

- Commissioner Sugrue - Conversations with market rate and affordable housing types affordable within a 5-10 year range? Townhomes are the most lucrative products now. How can we be as predictable as possible?
    - Haven't specifically heard about what types of housing developers want to build, but we've heard that they want zoning to allow for a mix of housing types
- Commissioner Shirazi – Map in appendix C. Sites Inventory is just a tool to demonstrate we can meet our numbers. AFFH helps us determine beyond the Sites Inventory where we want to pursue development. It seems more equitable now looking at these maps together. Working with Economic Development and HCD to ensure that displacement pressures are mitigated / working with other existing plans and policies to align?
- Daniel Gonzalez – TOPA/COPA HE – in the current version of that ordinance, it also allows for a 50% rent increase on tenants in a 5 year period. Policy isn't well thought out yet, shouldn't be a part of the HE
- Jeff Levin – RHNA and regional efforts to reduce racial disparities – Oakland's share of regional housing need has declined bc we advocated to ensure that the suburbs get more of the share of housing production. Product types – map zoning to production types; sweet spot is 4-5 stories on top of concrete podium, height limit of 70 ft. AFFH – sites need to show we are breaking down patterns of segregation – are we also providing opportunities in racially segregated areas, specifically white affluent part of town. Place-based strategies in investing in non-housing like infrastructure and facilities – must be coupled with investing in lower income neighborhoods. Policies need to show that we will reduce racial disparities in housing and metrics.
- Commissioner Renk – HAP – we already know we need to expand City resources, so how do we think about taking all of these goals, policies, and actions and turn them into reality? How do we do this when staff are already low capacity? Is there a step were some of this is winnowed down?
    - We are already working toward implementation
- Commissioner Jones – how does city see growing trend of integrating ADUs in townhomes – how does this contribute to HE as a whole? Innovation in the market place
- Commissioner Sugrue – receptivity of the GPU has been incredible based on emails and input he's received thus far
- Commissioner Shirazi – overarchingly, all of these policies are either proven to be positive or good to study in Oakland since we are not quite sure yet about some policies. Implementation is the next step – iterative, we should think about a midway point in the cycle, which would ultimately save us time and resources. Action 2.2.3 residential demolition – current ordinance may not be living up to what the goals were; we should look broader. Limit condo conversions – has good intentions, but may unintentionally limit housing purchase opportunities

June 7, 2022

Oakland, CA 94610

RE: Draft Housing Element 6th Cycle (2023-2031)

Director Gilchrist,

We write to provide comments on Oakland's Draft Housing Element for the 6th Planning Cycle (2023 - 2031). Overall there are many strong programs proposed in the Programs and Policies within this draft. Conversely, we have identified issues with sites within the site inventory, including the Affirmatively Further Fair Housing (AFFH) supplemental sites, related to likelihood of development, location and the non-inclusion of promising, underutilized sites in low-VMT and high-resource tracts.

Our comments, summarized, mainly fall along the following lines:

1. There are significant issues with the location, feasibility, documented landowner disinterest and development standards with the Supplementary AFFH. Some of the Supplementary AFFH sites are actually located in low-resource tracts, which runs counter to the text and spirit of HCD's AFFH guidance.
2. Several vacant and underutilized sites in high-resource tracts, especially near Rockridge BART, were not identified as Low-Income RHNA sites despite strong support from the community via the City of Oakland's own Maptionanaire survey tool. The City of Oakland's reasoning for not increasing the allowable height and density is questionable and inconsistent with actions taken elsewhere within the Draft Housing Element.
3. The City of Oakland has proposed many sorely needed actions within its Policies and Programs, including plex development in R-1 zones, an affordable housing overlay, and transit/high-resource rezoning. We provide comments on how to ensure these policies are crafted to meet their stated goals.

Site inventory

1. 288 9th Avenue (APN 018 046500204) - This site is on top of Township Park and Rocky's Market. It is unlikely this site will discontinue use within the eight year planning period. Please re-allocate these 274 units of low-income to another site or sites.

2. 514 Shattuck Avenue (APN 013 115400905) - This site is a low vacancy strip mall in Temescal and tagged as an supplementary AFFH site. The prescribed 182 units are unlikely to outbid the existing profitable uses.
    a. Does the City of Oakland have documentation from the landowner demonstrating interest in developing this site within the next eight years?
    b. There are nearly a dozen businesses renting on this site. Will those leases run beyond the planning period?
    c. The City of Oakland should consider increasing the allowable density above 182 units and increasing allowable heights to ensure this site is actually developed within the planning period.
3. 6039 and 6029 College Avenue (APNs 014 126800100; 014 126800100) - These are two adjacent vacant parcels in a high-resource tract very close to Rockridge BART. Collectively these sites of .4 acres will yield 26 units under existing zoning and development standards. Despite being ¼ mile from Rockridge BART, the City of Oakland imposes a 35' height limit on this site.
    a. In the notes for these parcels, the City of Oakland says it will not designate these parcels as Low-Income RHNA sites and re-zone them because they are below a .5 acre adequacy threshold for Low-Income sites per HCD Guidance.
    b. These sites received some of the highest Maptionairre Site Selections within the city's survey tool designed to solicit community feedback for siting housing as part of the Housing Element. Collectively these parcels received 23 recommendations for additional housing.
    c. The NIMBY group Rockridge Community Planning Council has tried to get the City of Oakland to buy these parcels and create a park for years in order to prevent mixed-income or affordable housing development at the site.
    d. The City of Oakland's reasoning for not designating this site as Low-Income and re-zoning is inconsistent with its other actions within the Draft Housing Element. For example, 4225 Broadway is a .15 acre site that is designated as a Low-Income site. 4225 Broadway is far below the .5 acre adequacy threshold for Low-Income sites provided by HCD guidance. By contrast, 6039 and 6029 College Avenue are only a 1/10th of an acre below this same threshold. In addition, 4225 Broadaway has existing uses that would need to be demolished whereas 6039 and 6029 College Avenue are currently vacant. 6039 and 6029 College Avenue are also closer to Rockridge BART and are in higher-resource tracts compared to 4225 Broadway and are more likely to be feasible for construction provided additional height and density.
    e. The City of Oakland should designate 6039 and 6029 College Avenue Low-Income sites. In addition, the City of Oakland should rezone and relax development standards to allow for at least 75 DUAs and 55' of height. This density and height is typical for sites in close proximity to BART stations. Given the wide range of small lot infill in Oakland over the past ten years as well as the prime location for TCAC

scoring, the City of Oakland should be able to provide additional analysis to meet HCD's scrutiny of Low-Income sites below the .5 acre threshold.

f. In the alternative, the City of Oakland should retain 6039 and 6029 College Avenue as Moderate-Income sites and rezone and relax development standards to allow for at least 75 DUAs and 55'. This density and height is typical for sites in close proximity to BART stations.

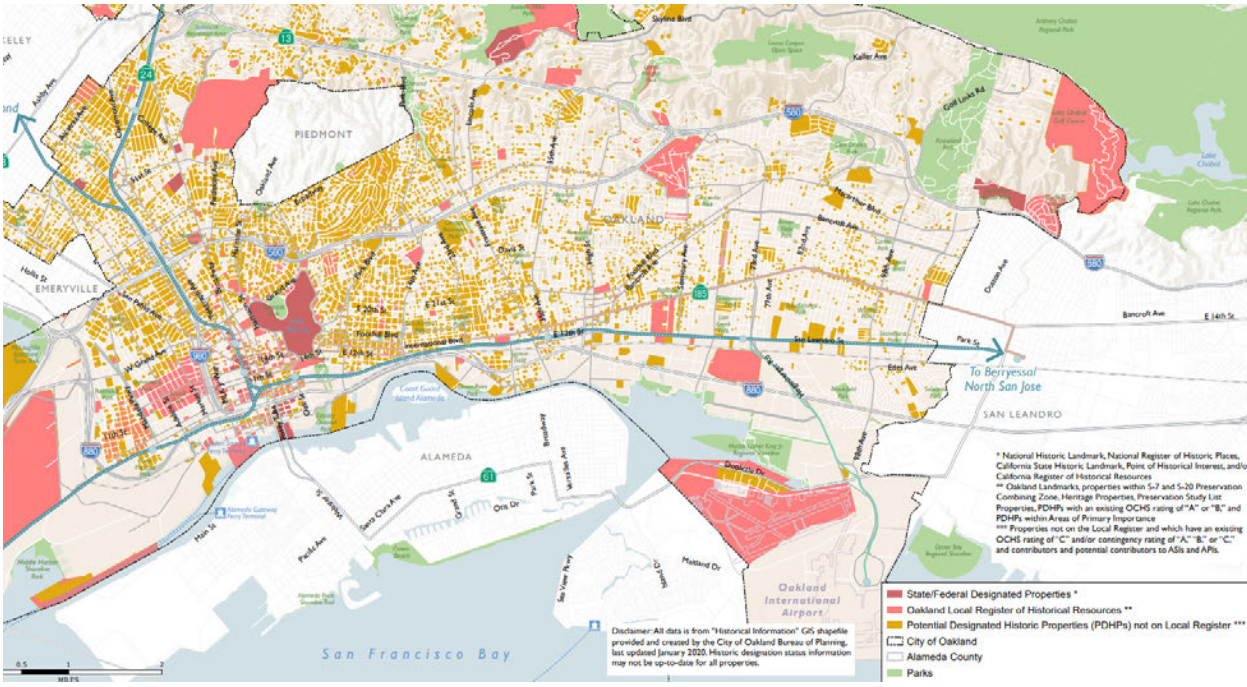
g. As discussed below, every BART station in Oakland apart from Rockridge has been host to specific plans to facilitate transit-oriented development. The City of Oakland's failure to identify 6039 and 6029 College Avenue as sites for Low-Income or otherwise increase the allowable height and density perpetuates a pattern or practice of the City of Oakland excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood.

4. 4400 Telegraph (APN 013 109902600) - This site is proposed for 24 units of Low - Income RHNA housing at a site owned by Critical Resistance, an abolitionist non-profit.
    a. An August 12, 2019 article from KQED describes how the prior owner of this parcel sold it to Critical Resistance after rejecting offers from "condo developers."
    b. Does the City of Oakland have documentation of interest from the property owner in developing this parcel within the eight year planning period?
5. 525 21st Street (APN 008 064503301) - This site is owned by the Department of Veterans Affairs and is proposed for 137 Low-Income units per RHNA. This site is coded as an AFFH supplementary site in a "moderate-resource" census tract.
    a. Does the City of Oakland have documentation of interest from the property owner in developing this parcel within the eight year planning period?
    b. The Draft Housing Element claims this site is in a moderate-resource tract. The 2022 TCAC Opportunity Map, however, shows this site as a low-resource tract. Given the concentration of low-income housing, supportive services, particulate matter from 980 and 580, lack of access to grocery stores and other resources, few Oaklanders would consider siting low-income housing at 525 21st Street as affirmatively furthering fair housing.
    c. Provided the Department of Veterans Affairs has expressed written interest in developing the site within the eight year planning period, this site should remain in the site inventory but should not be counted as a supplemental AFFH site. We have provided several sites in moderate and high-resource tracts below where these Low-Income RHNA units could be accommodated.
6. 4225 Broadway (APN 012 100200900) - This .15 acre site projected at 8 units of Low-Income RHNA housing is coded as a supplementary AFFH site.
    a. This site falls below the .5 acre adequacy threshold per HCD guidance. The City of Oakland provides zero analysis or justification as to why this small site would be developed or the city's track record of developing low-income housing on these sites.

    b. TCAC will not finance 8 unit low-income projects with tax credits. How does the City of Oakland expect a low-income housing developer to finance new construction at this site?
    c. There are several vacant and underutilized parcels surrounding 4225 Broadway that could be consolidated to create a more feasible low-income development opportunity site. Why weren't these sites included?
7. 4200-4224 Broadway (various APNs) - This supplementary AFFH site is in a good location and would replace underutilized commercial uses and parking lots. The 60 DUAs, however, are unlikely to outbid existing commercial uses. Consider increasing allowable density to 75 DUAs.
8. 6028 Claremont Avenue (APN 014 126803501) - This site is proposed for 23 Low-Income RHNA units in Rockridge on top of an existing office building. It is less than a ¼ mile from Rockridge BART. The site does not include adjacent parking lots that appear to serve the subject office building. The site is subject to a 35' height limit.
    a. The decision to include the office building, but not the parking lots that serve it is bizarre. The former Dreyer's headquarters, of which the subject site is part of, are owned by a single owner. Why would the owner demolish an existing office building to be rebuilt into 23 units of low-income housing but retain the surrounding parking lots that serve that office?
    b. 23 units of low-income housing will not outbid an office use so close to BART, especially with a 35' height limit.
9. 3875 Telegraph Avenue (APN 012 096800301) - This supplementary AFFH site is proposed for 35 Low-Income RHNA units. The existing use is a surgery center that is close to MacArthur BART, on a commercial corridor and is underutilized relative to its land value.
    a. The owners of this site previously refused rezoning between 2006 and 2008 as part of the MacArthur BART Transit Village PUD.
    b. The owners previously expressed interest in expanding the surgery use as recently as 2017.
    c. Given the owners' prior resistance to rezoning the site for housing, the City of Oakland must provide written proof of interest from the landowner in development of the site within the eight year planning period.
    d. This site, ⅛ of a mile from MacArthur BART, can accommodate much more density than 75 DUAs. If the owner provides written proof of interest in development, please consider increasing allowable density to 125 DUAs.

In order to effectively meet the demand for additional sites, especially in moderate to high-resource areas with low-VMT, we have provided a list of additional sites we ask you to consider.

<u>Suggested Site Inventory</u>



1. 501 MacArthur - underutilized commercial use at the corner of two commercial corridors.

2. 5352 Claremont Avenue - 1.5 acre underutilized commercial use surrounded by a large parking lot.
3. 3901 Broadway - underutilized fraternal lodge and parking lot.
4. 5216 Broadway - one of two Shell Gas stations within ½ mile of each in a high-resource neighborhood.
5. 6046 Claremont - .6 acre surface parking lot near Rockridge BART.
6. APN 14-1268-9-1 - .5 acre surface parking lot near Rockridge BART.

Programs and Policies Program

We are excited to see many bold programs and policies. We offer the following comments:

- Action 3.2.1 - Plex upzoning in single-family neighborhoods
    - Consider using five units as the base permitted density to allow for projects opt-in to the State Density Bonus Law and provide deed-restricted units on-site.
    - Consider allowing up to six units for larger lots and corner lots.
    - Provide a ministerial approval process so that small developers and property owners with lower risk tolerances can participate in the program.
- Action 3.3.5 - Affordable Housing Overlay
    - Please do not exempt historic districts from this policy. Historic districts and potential designated historic properties (PDHPs) tend to exist in high-resource areas that have historically excluded low-income housing. For reference, Oakland PDHPs are most highly concentrated in Rockridge, Trestle Glen and other high-resource neighborhoods that historically excluded low-income housing. By contrast there are relatively few PDHPs in low-resource places like East and Deep East Oakland where many low-income housing units have been developed historically.

- 

  - In case the City of Oakland decides to allow historic districts to be exempted from an Affordable Housing Overlay that exemption should only apply to historic districts that existed as of January 1, 2022. This will prevent the sort of defensive, dubious landmarking that we have seen from high-resource areas such as St. Francis Wood and Pasadena in direct response to the passage of SB9.
- Action 3.4.1 - Revise development standards, including allowable building heights, densities, open space and setbacks requirements
  - Transit-proximite zoning areas
    - The following BART station areas within Oakland have been subject to a specific plan to allow for transit-oriented development on public and/or private land nearby: Coliseum, Fruitvale, Lake Merritt, West Oakland, 12th Street, 19th Street, MacArthur. Tens of thousands of units have been constructed or in the process of being developed within these specific plan areas.

      The only BART station area in Oakland that has not had a specific plan developed and implemented is Rockridge. This station area contains some of the highest-resource tracts in Oakland and is one of the most "whites-only" census tracts in Alameda County, according to the Haas Institute for a Fair and Inclusive Society.

      The last low-income housing development constructed in Rockridge was the Otterbein Manor (SAHA Homes) in 1973. This development was completed one year prior to the 1974 Rockridge Downzoning. The 1974 Downzoning was an explicitly racist downzoning movement reacting to

state and federal fair housing laws, the perceived encroachment of Black families into the neighborhood and plans for transit-oriented development near the newly constructed BART station.

Any transit-proximate rezoning and revision of development standards must include the Rockridge station area. If the City Oakland fails to include the Rockridge station area with transit-proximate revision of zoning and development standards, it would perpetuate an existing pattern or practice of the City of Oakland of excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood.

- Additional height and density should be allowed at least a ½ mile of heavy rail stations and within ¼ mile of high frequency bus stops. This represents the walkshed for most transit users. Where areas have access to both rail and high-frequency bus transit access overlap, such as in North Oakland, greater additional height and density should be allowed.
- For these rezonings priority should be given to vacant or underutilized commercial land and owner-occupied residential land. Consider limiting rezonings on top of filtered or rent-controlled rental housing.

- Resource-rich areas
  - Consider providing setback and other development standard relief in addition to permitting 30 DUAs by-right in resource rich areas.
- Corridors
  - Foothill Boulevard, MacArthur Boulevard and International Boulevard are all commercial corridors in East Oakland that are specifically called out by name as requiring additional height and density for development to work. While we support additional height and density along these corridors, it is frustrating that similar corridors with low height limits remain unmentioned despite having similar issues with height and density.

    For example, Shattuck Avenue in North Oakland was downzoned to a 40' height from 50' in 2011. In 2021 a development application at 6300 Shattuck for housing at 50' (grandfathered in from a deemed complete application from 2010) was appealed by nearby property owners. This stretch of Shattuck Avenue is within easy walking/cycling distance to Ashby BART and near several bus routes and is in a high-resource tract. The appeal was dismissed by the Planning Commission, but it exemplifies how badly-needed multi-family housing near transit and low-VMT in higher-resource neighborhoods is often opposed and delayed by homeowners and property owners. The homeowners and property owners in higher-resource tracts have also historically been able to downzone

heights and densities on their corridors while allowable heights and densities on corridors in lower-resource areas of Oakland are increased.

The City of Oakland should commit to increasing heights and densities on commercial corridors in moderate and high-resource neighborhoods by name. Exemplar commercial corridors: Shattuck Avenue, Piedmont Avenue, upper Broadway, upper Telegraph Avenue, 51st Street, College Avenue, Grand Avenue, Lakeshore Avenue and Claremont Avenue.

- Action 3.4.2 - Revise Conditional Use Permit (CUP) requirements
    - While we support the removal of CUPs for multifamily housing development in RD-2 and RM zones, we request the City of Oakland please extend this action to include RD-1 zones as well.
- Action 3.4.3 - Revise citywide parking standards
    - Consider removing all parking minimums for housing development. At the very least, expand the ability to zero out parking minimums to all low-VMT areas.
    - Consider instituting parking maximums for residential development to reduce VMT and prevent overparking in downtown high-rise development.
- Action 3.5.3 - Advocate for statewide legislation on social housing
    - We are happy to see support for our sponsored legislation AB2053. Please consider sending a letter of support on behalf of the City of Oakland ahead of AB2053's June 21, 2022 Senate Housing Committee hearing.
- Action - 3.5.4: Evaluate acquisition and development opportunities for moderate- and middle-income households
    - While we support efforts to acquire and develop moderate-income housing we must caution against the use of bond-financed JPAs such as CalCHA for this task. These entities command high fees and underwrite risky debt.
    - The City of Oakland should consider creating and capitalizing an arms-length corporation to develop limited-equity cooperatives for moderate-income households, including public sector and essential workers.
- Action 3.7.5 - Encourage different sizes of housing for larger families – including affordable housing with courtyards, multigenerational housing
    - The City of Oakland should commit to studying the impact of second egress requirements for the feasibility of small and medium lot development of multifamily housing with 3 and 4 bedroom units.
        - The requirement of a second stairwell for purposes of egress reduces the usable floor plate for living space. The additional circulation forces many designers to arrange units along double-loaded corridors with internal hallways. This layout reduces the ability to provide natural light for more than 1 or 2 bedrooms (access to light or a light well is required for a habitable bedroom). The requirement for a second stair is a key driver in the relative overproduction of studios and 1 bedroom units compared to family-sized units.

        - The US is one of two developed countries in the world that doesn't allow single stair multifamily construction for at least four to five story buildings. Other developed countries provide a second means of egress via a fire ladder or other means.
        - Single stair multifamily buildings can also provide better access to light as well cross-ventilation. This makes it easier for new housing to meet passivehouse standards and reduce operational energy demands. In addition, because less circulation space allows for more floor space to be dedicated to group open space like courtyards or private open space like balconies or decks.
    - The City of Seattle passed and implemented local building code amendments in 1975 to allow a single stair as means of egress for buildings up to six stories. The current code caps such single stair structures to four units per floor, requires automatic fire sprinklers and imposes other fire-rated and corridor requirements. The City of New York also allows single stair buildings with similar mitigations. https://secondegress.ca/
    - The City of Oakland should study local building code amendments to allow up to six stories with single stairs with mitigations for fire, life and safety.
    - The City of Oakland should commit to supporting state legislation to direct the California Building Standards Commission to study allowing single stair multifamily housing up to six stories with proper fire, life and safety mitigations.
- Action 3.3.14 - Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing
    - Under Section 2.41.020 of the OMC, the City Administrator must seek City Council approval for purchases of any land valued at over $100,000. There is no parcel in Oakland with development or anti-displacement utility valued at $100,000 in 2022. This authority should be increased to, at least, $1,000,000 (pegged at CPI) to allow Oakland HCD staff to move quickly when the opportunity and funding present themselves for land acquisition.
- Action 1.1.8 - Create and maintain a rental housing registry
    - This policy is critical for the enforcement of SB330/SB8 tenant demolition and right to return policies. Oakland HCD needs this tool to be able to coordinate with Oakland Planning on evaluating development applications that propose to demolish protected housing and ensuring compliance with relocation and right of first refusal policies post-entitlement.
- Action 2.2.5 - Extend local replacement unit provisions
    - We appreciate Oakland's commitment to codifying these provisions locally beyond the current 2031 sunset. That codification must be paired with more proactive enforcement of SB330/SB8 demolition protections. In November 2021, EB4E notified Oakland Planning that an application for development at 469 40th Street did not include sufficient replacement units under SB330. The application was eventually re-submitted and approved with the necessary replacement units.

Projects should not be put out to public notice unless they have clearly demonstrated they have complied with SB330/SB8 demolition protections and provision of replacement units.
    - We request that Oakland Planning work proactively with Oakland HCD to create internal processes to help ensure displaced tenants are not lost in the post-entitlement and demolition process.

Thank you for considering these comments. We are available to discuss them via phone or video conference, if necessary.

Hello Stuart,

Thanks for your input. Great suggestion, and the the short answer is Yes. There is a specific program in the Draft Housing Element for this; see page 68 of the draft:

Action 3.3.5: Implement an affordable housing overlay.

The City will create an affordable housing overlay to streamline the approval of affordable housing by right. Potential features of this overlay could include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will study the feasibility of broadly applying this overlay, except for areas in the very high fire severity zone and protected historical sites/districts. The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program.

The element does not contain the program itself, and your suggested examples and ideas could definitely be part of what goes into this as details are fleshed out.

Thanks for your continued engagement and participation!

> Has the city considered the alternative of an affordable housing overlay district for high resource areas, rather than a blanket up-zoning?

A blanket up-zoning will act as an invitation for market-rate housing projects, while an affordable housing overlay will encourage projects that meet the overlay district's affordability requirement (which should be higher than what is required for the state's density bonus).

The affordability overlay could also allow for multiple levels of affordability to meet its threshold - i.e. 3% extremely low income, 5% very low income, 10% low income, 20% moderate income, with multipliers based on level of affordability - i.e., 4x for extremely low, 3x for very low, and 2x for low. Thus the suggested project would get 3x4 = 12 points + 5x3 = 15 points + 10x2 = 20 points + 20x1 = 20 points, for a total of 67 points. The threshold for triggering the overlay district's density and height levels might be 55 points. a standard 15% very low income density bonus project would only get 45 points - not enough. The overlay could allow more height and density than the state density bonus, encouraging developers to "go the extra mile" to qualify. A mixed-income project would also provide a healthier mix of different income levels than the standard 15% very low income, 85% market rate project.

Please think about this idea.

4035 Park Blvd missing from Housing Element Site Inventory

Kevin Morsony <[redacted]>

Wed 6/8/2022 6:02 PM

To: General Plan <generalplan@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Hello,

I am writing to express concern that 4035 Park Blvd in Glenview was not included in the site inventory in the Oakland Housing Element. This .2 acre site is an empty lot (remediated former gas station) in a high resource area served by both local and transbay bus lines that both stop in front of this location. It is adjacent to a 7 unit apartment building (on a lot half the size). At minimum, this lot should support at least 14 units even if only zoned for current capacity. This lot has been vacant for 30 years as owners have failed to develop it due to personal issues. It is exactly the type of location that the city should use their power of eminent domain to acquire and turn over to low income housing developers to ensure that high resource neighborhoods have low income housing. This is a ready to build location that should be included in the site inventory and the housing element.

I look forward to hearing from you soon,

Sincerely,

Kevin Morsony

==========

The "othering" of the Rockridge neighborhood of north Oakland is on full display in this document. The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version.

There is a popular opinion of what Rockridge is and always has been which is historically inaccurate. Rockridge is perceived as rich, white and elitist, **but Rockridge is the one neighborhood in Oakland which, as dominantly working class and diverse, recovered from the devastation of urban renewal policies.** Yet somehow, it has become popular to make this neighborhood the scapegoat for current urban housing ills instead of a role model for how to recover and thrive from governmental policy driven destruction.

Some basic facts:

- This is one of the most densely populated single-family housing areas in Oakland. About 45% of the people who live here are renters.
- This is the only neighborhood in the United States to fund and build its own branch library, running a successful volunteer political campaign to form a special taxation district
- This neighborhood built the first off-leash dog park in Oakland
- This neighborhood funded, built and partially maintains a new city children's park, the FROG Park, and the Rockridge-Temescal Greenbelt
- This neighborhood originated the all-in-one Disaster Recovery Center in response to the loss of 3,000 units of housing during the Oakland Firestorm, which is now the model for FEMA nationwide
- This neighborhood originated the C-31 special pedestrian oriented retail commercial zoning, now CN-1 in 1972. Rockridge has been a major economic engine for all of Oakland ever since. And activists from this neighborhood have helped five other neighborhoods throughout Oakland to adopt the pedestrian oriented retail shopping zoning and become economically successful.
- This neighborhood pioneered Neighborhood Watch in response to becoming the highest crime area of Oakland in the late 1960s. Neighborhood Watch is now a global phenomenon
- This neighborhood has its own Non-Profit organization, formed to fundraise for the library. If you live within the boundaries, renter or owner, you are a member with a vote and a voice.

- This neighborhood has a small, self-funding and award winning newsletter published continuously for almost 34 years. It comes out the first week of every month, and is 16 pages of community, land use and school news.

In the early 1960's demolition began for construction of the Grove-Shafter freeway (Hwy 24) and BART. 1,400 properties were demolished, mostly single family dwellings. College Avenue was bisected and almost brought to its commercial knees. Construction lasted for years, and the traffic disruption coupled with the loss of population, steadily eroded the commercial base. Store after store closed its doors, until finally 50% of the businesses stood empty with storefronts boarded up. Crime in the area skyrocketed and Rockridge became Oakland's highest crime neighborhood. We have never gotten any financial help from the City of Oakland to recover; the success you see is the result of thousands of volunteer hours through almost 50 years.

A lot of people have roots here going back multiple generations. Most people who live here could never afford to buy their homes here again. The neighborhood has gentrified around us, in part due to our hard work to make it a more livable neighborhood (see above), in part due to easy freeway access and transit options. We are now being heavily pressured by tech money from SF that has doubled the asking price of small bungalows through insane overbids and severely diminished our diversity.

It is sad to see knee-jerk assumptions about an entire area based on the often expensive and trendy regional dining and shopping you see on College Avenue. Most of us are not buying the $600 jeans or eating in the pricier restaurants, but the business taxes generated do fund city services for all Oakland. I am very alarmed by the now rapid gentrification of all of Oakland, and the resultant loss of diversity this city has experienced as young, affluent, tech workers, dominantly white, have displaced both the working class people who made this neighborhood a success and the many non-white neighbors we used to have.

My classmates at Peralta Elementary were Black, Hispanic, Asian and immigrants as well as white. The same was true at Claremont Junior High, as it was then, and Oakland Tech – in the 1960s, the only fully representationally integrated high school in Oakland**. If you are looking for the all-white high school at that time, it was Skyline High, built to exclude non-whites, the boundaries of which were carefully drawn around even single houses owned by non-whites to ensure their exclusion.** As an immigrant from an all white country, I know my life was immeasurably enriched by the racially and culturally diverse neighbors and classmates I had. (I am Row 3, 3rd from the right)

Housing Element Draft, Page 63:

"POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS

"Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

Oakland has a huge need for affordable housing, but nothing in this policy element addresses the building of affordable housing as defined by HUD, but rather will exclusively encourage the building of market-rate, luxury-class housing dominated by studio and 1-bedroom apartments/condos.

According to the National Low Income Housing Coalition, housing is affordable if it costs no more than 30 percent of one's income. Renters who pay more than this are considered "cost-burdened;" those who pay more than 50 percent are "severely cost-burdened." In Oakland, 59 percent of residents are renters, with the median income of these households around $40,000, more than half of them qualify as very low income.

However, due to the high cost of Bay Area housing, even households that bring in as much as six figures can be designated as "low income," as set by the Department of Housing and Urban Development (HUD). Its threshold is set for those earning incomes at or below 80 percent of area median income (AMI). In Oakland, 80 percent of AMI is very high — $73,100 for a single person; and for a 4-person household, $104,400.

Housing Cost Burdens Have Stark Racial Impacts

In Oakland, African American households face the highest housing cost burden, with 63 percent devoting more than 30 percent of their income to housing (according to the PolicyLink National Equity Atlas). Overall, 59 percent of households of color are housing-cost-burdened, compared to 42 percent of white households. Between 2000-2010, the City of Oakland lost 34,000 African American residents (a 24 percent decline). This included 10,000 OUSD students. Lack of affordable housing fuels the fire of Oakland's ongoing and dramatic exodus of African American and other POC households.

Is it reallyAffordable?

The need for genuinely affordable housing in Oakland is very high, but are proposed developments in Rockridge going to meet these affordability standards? The cost of land in Rockridge means that the answer is generally, no. For example, the multistory tower proposed for the CCA property would consist of ~467 residential units, 10 percent of which would be "affordable". That sounds good until you realize that here affordable is defined to mean "moderate-income" households, with eligibility defined as **120 percent of area median income (AMI).**

For 2020, that was $109,600 (1-person household) and $156,600 (4-person household). In other words, there would not be one single unit of affordable housing, as defined by HUD, created by the project and available to low-income renters.

Affordable housing is desperately needed in Oakland if we are to retain housing stock for low-income workers, seniors, and the disabled. About 93 percent of new construction in Oakland is market-rate developments geared to luxury class apartments like the 40 story Atlas Tower downtown. While rents dropped significantly during the initial COVID lock down, rents have rebounded and none fall into the affordable range. The number of available and genuinely affordable units is almost non-existent. The demand far outstrips the supply. Current building costs have risen steeply in the past years in response to Trump Administration tariffs on Canadian lumber and COVID slowed production of building materials.

Much of the newly proposed and /or built housing is also singularly family unfriendly. Few apartments are 2-bedrooms or more, and the vast majority are studio and 1-bedroom. It is assumed that people will not have private cars, but if you have two or three children who each require a different size car seat, Uber and Lyft cannot accommodate you. If you have a mobility impaired family member, someone in a wheelchair or one who uses adaptive tools to enter and exit a car from a walker, you also cannot be accommodated by ride-share or gig-vehicles within minutes of a phone call. These are wider issues of societal sustainability that are going utterly unaddressed by this housing element. But they eventually impact the lives of most of us.

For low to moderate income residents, housing is difficult at best, but as currently conceived, the new housing is also inadequately meeting the needs of child families, multigenerational families, and the disabled of higher income levels as well.

In summary, land and building costs are very high and rising, making public-private partnerships and government-subsidized construction perhaps the surest ways to add more truly affordable housing in Oakland — and particularly here in Rockridge.

Lack of inclusion in the process

The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version.

There is an organization that represents Rockridge, a registered 501(c)3, the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC's monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom meetings were held.

The exclusion of the RCPC, the most significant citizen institution in Rockridge, which has been reshaping the neighborhood since the early 1970s, when a resurrected RCPC led the way to obtaining funding from the Department of Housing and Urban Development (HUD) for planning studies which resulted in the City of Oakland adopting a new zoning designation C-31, currently CN-1, for College Avenue in 1973, consisting of pedestrian oriented retail with mixed use upper stories is remarkable and inexcusable. It argues for a total lack of knowledge about the neighborhood by City staff.

**It cannot have gone unnoticed that in the past 30 years, RCPC has directly brought in excess of $7 million into the City and the neighborhood, can it?** A new branch library funded by a citizen originated Mello-Roos taxation district, FROG Park, Hardy Dog Park, hundreds of thousands in traffic mitigation funds negotiated from CalTrans (4th Bore), Dreyer's and Safeway projects, and $3 million in environmental mitigation funds obtained by through litigation by the 4th Bore Coalition, a coalition of Oakland and Berkeley neighborhood groups organized and led by RCPC. Those $3 million dollars were used to add enhanced HVAC and filtration systems, sound dampening windows and environmental plantings to the two schools in the RCPC catchment, Chabot Elementary and Claremont Middle School severely impacted by the particulate, fume and noise pollution resulting from their locations within less than 100 feet of Hwy 24. A registered non-profit creating that much benefit to the City of Oakland should have been contacted, in particular when planning and zoning have been the primary focus of the organization for more than 50 years.

The "Introduction of the Housing Element Draft" on Page 5 has a heading:

"CHARTING AN EQUITABLE, INCLUSIVE FUTURE"

It is not equitable to exclude some neighborhoods from the process of producing the Housing Element Draft. It is not equitable to promote the building of market-rate housing which does not produce truly affordable housing but does produce profits for private real-estate developers. And it is not equitable to unduly burden a neighborhood that already brought itself back from an earlier round of governmental policy originated destruction.

10:09:02 From Beth Altshuler Munoz to Everyone:
thanks Lakshmi!
10:11:26 From Jeff Levin, EBHO to Everyone:
Oakland's RHNA increase is actually a lower percentage than the region as a whole.
10:11:34 From Charles Reed to Everyone:
Despite the increase how do we assure that the disenfranchised needs are met.
10:12:28 From Lakshmi Rajagopalan, City of Oakland to Everyone:
If you just joined, please add your name in the chat with your organization
10:12:48 From Lakshmi Rajagopalan, City of Oakland to Everyone:
The draft housing element is available here: https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element
10:13:08 From Charles Reed to Everyone:
Who do we target, and how do we penalize them when lower income needs are not met?
10:15:11 From Lakshmi Rajagopalan, City of Oakland to Everyone:
An overview presentation summarizing the draft Housing Element is also available on the City Website - https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element#draft-housing-element-resources
10:16:26 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
Should we post the interactive map here?
10:16:39 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
idk, I think we should wait until we hear from Ed, as per your guidance earlier
10:16:44 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
I mean, I would like it
10:16:59 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
this is a small group
10:17:12 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
not citywide
10:17:25 From Lakshmi Rajagopalan, City of Oakland to Audrey

Lieberworth, City of Oakland(Direct Message):
	so maybe we can share it out via email along with the presentation
10:17:36 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
	after the discussion group is done
10:17:40 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
	I can post the link if you think it's appropriate now
10:17:47 From Sarah Karlinsky, SPUR (she/her) to Everyone:
	Are the state-mandates on site size for low income housing, or for all housing that can count towards RHNA requirements?
10:17:49 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
	I doubt folks will look at the map as much after this meeting ends
10:18:18 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
	ok - you can just state that the table C-25 is visually represented in this interactive map
10:18:28 From Aaron Eckhouse (California YIMBY) to Everyone:
	Sarah, I believe they are specific to Lower Income sites, but cities can also use small sites for their Lower Income Inventory if they can point to a track record of development on similar sites
10:18:54 From Sarah Karlinsky, SPUR (she/her) to Everyone:
	Thnx
10:19:27 From Charles Reed to Everyone:
	Identifying sites is a first step, but it means nothing without meaningful accountability measures with quantifiable financial repercussions for non compliance.
10:19:46 From Audrey Lieberworth, City of Oakland to Everyone:
	Here is a link to an interactive map of the draft sites inventory (from Table C-25, Appendix C): https://oakgis.maps.arcgis.com/apps/mapviewer/index.html?webmap=6e5a81ace7ce4a9b906da42f75b4ddd4
10:22:12 From Lakshmi Rajagopalan, City of Oakland to Everyone:
	@sarah the guidance is for affordable housing for sites between 0.5 and 10 acres. For sites less than 0.5 ac and larger than 10 ac, we have to demonstrate a track record like Aaron mentions
10:22:35 From Sarah Karlinsky, SPUR (she/her) to Everyone:
	Thank you.
10:23:16 From Lakshmi Rajagopalan, City of Oakland to Everyone:
	The guidance from the State is here: https://www.hcd.ca.gov/community-development/housing-element/docs/sites_inventory_memo_final06102020.pdf
10:26:43 From Lakshmi Rajagopalan, City of Oakland to Everyone:
	RD, RM zones
10:27:22 From Alison Moore (Dyett & Bhatia) to Everyone:
	Matt- you can check out Action 3.2.1, which addresses missing middle housing through zoning standards

10:27:53 From Alison Moore (Dyett & Bhatia) to Everyone:
https://oakland.konveio.com/draft-2023-2031-general-plan-housing-element
10:28:37 From Aaron Eckhouse (California YIMBY) to Everyone:
does the city have a published methodology for when to count new market housing as Moderate Income? I know San Jose does
10:29:00 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
we don't right? re: Aaron's comment
10:29:21 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
I don't think so but we can get back to him
10:29:36 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
I cannot confirm 100%
10:31:45 From Jeff Levin, EBHO to Everyone:
TOPA/COPA combines a right of first offer with a right of first refusal, but does not require a discounted price
10:35:12 From Audrey Lieberworth, City of Oakland to Everyone:
@Aaron - I'll follow up and check to see if the City has a published methodology
10:35:49 From Aaron Eckhouse (California YIMBY) to Everyone:
thanks! I think it will be important for Oakland to find a way to produce Moderate Income housing without subsidies/deed restriction
10:41:36 From Jeff Levin, EBHO to Everyone:
Aaron - I believe that historically the City has only counted moderate income housing if its deed restricted as it has not tracked rental rates or sales prices on newly produced housing.
10:41:48 From Sarah Karlinsky, SPUR (she/her) to Everyone:
Thank you so much for the responses to my questions. On the upzoning contemplated, is that discussed explicitly anywhere in the document beyond Policy 3.4? If you could let me know, I would appreciate it.
10:41:58 From Trisha Barua, she/they to Everyone:
First 5 Alameda County letter on Oakland Housing Element: http://www.first5alameda.org/files/Comment%20Draft%202023%20to%202031%20General%20Plan%20Housing%20Element.pdf
10:42:07 From David Wooley, UC Berkeley Goldman School to Everyone:
One other point: I am pleased to see parts of the Element devoted to remediation of environmental contaminated sites. Urge the city to consider that housing located near freeways, Oakland Ports and other heavy duty trucking concentrations to be included in definition of a contaminated sites and to help building owners in those locations to retrofit air filtration to reduce exposure of residents to transport related emissions. David Wooley, UC Berkeley, Goldman School davidwooley@berkeley.edu
10:43:28 From Keith Diggs to Everyone:
that's what I want to know too
10:45:00 From Aaron Eckhouse (California YIMBY) to Everyone:

I agree that table would be a great resource!
10:45:32 From Audrey Lieberworth, City of Oakland to Alison Moore (Dyett & Bhatia)(Direct Message):
Could you answer the last of Warren's questions? Let them know we are working on this
10:47:28 From Alison Moore (Dyett & Bhatia) to Audrey Lieberworth, City of Oakland(Direct Message):
There's a table by tract, I will share that
10:47:59 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Table C-21
10:49:17 From Jeff Levin, EBHO to Everyone:
Yes, a summary analysis of what C-21 actually tells us would be useful
10:49:45 From Sarah Karlinsky, SPUR (she/her) to Everyone:
+1 on summary of C-21. Thank you!
10:50:18 From Aaron Eckhouse (California YIMBY) to Everyone:
yes, very hard to parse C-21 on a parcel by parcel basis
10:51:02 From Brent Bucknum to Everyone:
I want to strongly second David Wooley's comments. We should not be putting housing next to freeways and we need to have a fund to in the GP to retrofit existing near road housing exposures.
10:53:21 From Warren Logan to Everyone:
One more comment: please consider ALL of AC Transit’s Rapid corridors, not just the BRT line, when considering upzoning opportunities.
10:54:06 From Aaron Eckhouse (California YIMBY) to Everyone:
+1
10:56:06 From Raul Maldonado to Everyone:
+1 to @Brent. I'd be careful about exclusively putting housing next to freeways, as noise & car pollution on minority communities is a concern. I do love the alternative mentioned, @Warren's comment, which is above ^^^ — upzoning opportunities near **all** transit corridors.
10:57:51 From Darbi Howard, East Oakland Collective to Everyone:
Agreed and current developers have already been violating current zoning rules and not being held to their proposals approved.
10:58:13 From Darbi Howard, East Oakland Collective to Everyone:
For decades…
11:01:13 From Charles Reed to Everyone:
with all the new buildings being built that impact fee account should at least be 300 million by now
11:01:32 From Raul Maldonado to Everyone:
+1 to Charles feelings. From attending some housing projects, I would say homeowners do block housing projects that have between 15-40% BMR housing w/MR. It's hard to get that diversification, and thus we get mostly >95% BMR or MR buildings we see today :/
11:03:30 From Lakshmi Rajagopalan, City of Oakland to Everyone:
We do not have a map yet
11:03:41 From Lakshmi Rajagopalan, City of Oakland to Everyone:
we are working on identifying the areas

11:03:51 From Beth Altshuler Munoz to Everyone:
	What can the city do to improve the funding tools and flexibility of local lenders / CDFI's for affordable housing?
11:04:36 From Sarah Karlinsky, SPUR (she/her) to Everyone:
	+1 on upzoning the flatiron parcel and upzoning in Rockridge in general.
11:06:28 From Ms.Margaret Gordon to Everyone:
	need to leave for my other meeting
11:07:20 From Warren Logan to Everyone:
	+1 everything Aaron said
11:08:34 From Raul Maldonado to Everyone:
	+1 To Aaron’s notes, as well.
11:09:04 From Nico Nagle (he/him) – HAC to Everyone:
	+1 to Aaron
11:10:29 From Audrey Lieberworth, City of Oakland to Lakshmi Rajagopalan, City of Oakland(Direct Message):
	i missed susie's second question. was it about what potential projects mean?
11:10:55 From Charles Reed to Everyone:
	Is there a way for the public to monitor the impact fee account?
11:11:08 From Lakshmi Rajagopalan, City of Oakland to Audrey Lieberworth, City of Oakland(Direct Message):
	am gonna ask
11:13:58 From Beth Altshuler Munoz to Everyone:
	I'm not a super housing expert tracking all the Oakland policies....BUT I remember hearing that in 2008 Oakland removed the requirement to break ground after 18 months of approval bc of the recession. has that rule been put back into place?
11:15:08 From Tracey Nails-Bell to Everyone:
	So A Diamond in the Ruff is working with The Oakland Community Land Trust on a project for more affordable housing overlay with ADU'S. Is there a certain number of units that can be placed on the current acquisition of land? Which may include the Zoning in that part of Oakland? Which is right off Seminary
11:16:37 From Lakshmi Rajagopalan, City of Oakland to Everyone:
	Comment from Charles: Is there a way for the public to track who paid impact fee's, for what, and where and how are those funds being used?
11:16:54 From Sonja Trauss to Everyone:
	+1 AFFH is not just an analysis
11:17:19 From Charles Reed to Everyone:
	Transparency is paramount
11:19:18 From Aaron Eckhouse (California YIMBY) to Everyone:
	+1 to this comment from Jeff
11:20:24 From Trisha Barua, she/they to Everyone:
	+1 for Jeff's comment
11:21:08 From Christina Mun, Oakland HCD to Everyone:
	Impact fees are reported on annually as informational reports to CED and Council. It will go to 6/28 CED for this year, here is last

year's: https://oakland.legistar.com/LegislationDetail.aspx?ID=4769988&GUID=9F0A7046-EED8-4631-A4D1-BF5FFC1CA301&Options=&Search=
11:23:30 From Audrey Lieberworth, City of Oakland to Everyone:
email comments to generalplan@oaklandca.gov
11:25:35 From Darbi Howard, East Oakland Collective to Everyone:
I agree Sonja- The poor air and no green space is a disadvantage to improvements
11:27:13 From Darbi Howard, East Oakland Collective to Everyone:
Nico- this speaks to many issues with the City in terms of getting things actually done or more of the same!
11:27:29 From Raul Maldonado to Everyone:
+1 to Nico on kudos to AH overlay, and providing Berkeley as an example.
11:27:40 From Audrey Lieberworth, City of Oakland to Everyone:
@Tracey - can you send us an email about the project so that we can better understand the project and the zoning for the site? generalplan@oaklandca.gov
11:28:39 From Tracey Nails-Bell to Audrey Lieberworth, City of Oakland(Direct Message):
Yes, I will definitely send you a email!
11:28:41 From Jeff Levin, EBHO to Everyone:
AH overlay - allowing approval by-right for affordable housing should be citywide anywhere that the project is consistent with zoning, including density bonus
11:29:06 From Audrey Lieberworth, City of Oakland to Tracey Nails-Bell(Direct Message):
Great! I think you already have my email, but you can message me at ALieberworth@oaklandca.gov
11:29:21 From Lakshmi Rajagopalan, City of Oakland to Everyone:
https://www.oaklandca.gov/events/general-plan-update-housing-element-workshop-4
11:29:29 From Jeff Levin, EBHO to Everyone:
Please ensure that the next draft includes an Executive Summary and a clear table on NEW policies
11:29:33 From Aaron Eckhouse (California YIMBY) to Everyone:
agree with Jeff, and I think the city should move to ministerial approval generally
11:29:47 From Aaron Eckhouse (California YIMBY) to Everyone:
thank you for convening this meeting!
11:29:54 From Laura Kaminski, City of Oakland to Everyone:
https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports
11:30:22 From Laura Kaminski, City of Oakland to Everyone:
I included a link to impact fee reports, included are reports on the collection of the fees
11:30:25 From Nico Nagle (he/him) - HAC to Everyone:
Thank you for convening as well! And +1 to ministerial approval
11:31:01 From Sarah Karlinsky, SPUR (she/her) to Everyone:
I need to leave now. Thank you so much for holding this

meeting it was very helpful and I learned alot.
11:31:14 From Raul Maldonado to Everyone:
Need to leave now; Thank you!
11:31:16 From Tracey Nails-Bell to Everyone:
Thank you for today's information!

17:03:26 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Can those who did not go use the "Raise Hand" feature
17:04:13 From Diana Benitez to Everyone:
Share you name and one word to describe how your feeling today.
17:05:17 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Best of luck Iris
17:05:30 From Iris Quach (she/her) to Everyone:
thank you, Lakshmi!!!
17:05:36 From Bethsaida Ruiz, Ohlone/Huchiun Territory to Everyone:
Thank you
17:09:53 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Going off video for a bit to grab something to eat
17:15:24 From Lakshmi Rajagopalan, City of Oakland to Everyone:
https://city-of-oakland-general-plan-update-oakgis.hub.arcgis.com/
17:15:29 From Lakshmi Rajagopalan, City of Oakland to Everyone:

5
17:33:26 From Cathy Eberhardt, EBHO RCOP to Everyone:
5
17:33:38 From Esther Goolsby she.they to Everyone:
sorry I'm late. meeting ended late
17:33:49 From Nora-they/them to Everyone:
Love Ayodele
17:36:24 From Diana Perez-Domencich to Everyone:
Beautiful, thank you.
17:36:39 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Thank you sharing
17:37:01 From liz suk, she/they to Everyone:
Ayodele! Oakland’s Poet Laureate
17:37:12 From liz suk, she/they to Everyone:

17:39:36 From Lakshmi Rajagopalan, City of Oakland to Everyone:
There is a community workshop on the Housing Element tomorrow: https://www.oaklandca.gov/events/general-plan-update-housing-element-workshop-4
17:48:08 From Lakshmi Rajagopalan, City of Oakland to David Harris - Urban Strategies Council(Direct Message):
Do you want us to respond?
17:48:54 From Lakshmi Rajagopalan, City of Oakland to David Harris - Urban Strategies Council(Direct Message):
most of this information is included in the introduction chapter
17:48:55 From Shina R (she/her) to Everyone:
the city has a vacancy tax right? they should be tracking vacancy somehow
17:49:46 From Lakshmi Rajagopalan, City of Oakland to Diana Benitez(Direct Message):
Do you want me to respond? most of this information is included in the introduction chapter
17:52:35 From Liana Molina to Everyone:
Generally speaking, I agree with the community input & analysis. I didn't get a chance to read Ch 1, only Ch 3-4. ;)
17:54:54 From Bethsaida Ruiz, Ohlone/Huchiun Territory to Everyone:
Hey everyone, sorry I have to leave early today, I have a previous engagement I could not reschedule. See you all soon. Looking forward to more connection. thank you
17:55:19 From Alison Moore (Dyett & Bhatia) to Everyone:
Any way we can make things clearer, or things we may have missed, we are here to listen, thank you!
17:55:56 From David Harris - Urban Strategies Council to Everyone:
`I agree about capital access for BIPOC communities, but Black communities have been disproportionately impacted over all other communities of color
17:55:57 From Liana Molina to Everyone:
will we get to see the draft outreach materials?
17:56:50 From David Peters, WOCAN to Everyone:
@David - Absolutely agree
18:00:22 From David Harris - Urban Strategies Council to Everyone:
Please excuse my needing to leave early. I welcome you to visit the AARC website and sign up for information and updates about future meetings: https://africanamericanresponse.org/
18:01:16 From David Harris - Urban Strategies Council to Everyone:
COVID is still very active in our communities and adversely impacting our people the most.
18:08:47 From Liana Molina to Everyone:
those were super helpful examples, Diana.
18:09:00 From Liana Molina to Everyone:
EMP, moratorium etc
18:11:08 From Liana Molina to Everyone:
where are the input not included going to be noted, if at all, in the housing element? which chapter or appendix?

18:11:46 From Diana Benitez to Everyone:
I want to note that our initial Deep Listening survey is asking specific questions on housing and environmental health, but we have been hearing feedback on many of the element topics and have been saving them to track and analyze the other elements.
18:13:08 From Lakshmi Rajagopalan, City of Oakland to Everyone:
The Environmental and Racial Equity Baseline also highlights the issues you mentioned David
18:13:25 From Lakshmi Rajagopalan, City of Oakland to Everyone:
https://cao-94612.s3.amazonaws.com/documents/Equity-Baseline_revised4.15.22.pdf
18:15:57 From Liana Molina to Everyone:
yes, and to be clear, I was asking the question about criteria more broadly, assuming we will continue to hear about input that wasn't included. didn't mean to take up so much time with all this.
18:16:14 From William Gilchrist to Lakshmi Rajagopalan, City of Oakland(Direct Message):
I am going to have to go to another meeting. Are you ok to continue?
18:16:18 From Lakshmi Rajagopalan, City of Oakland to William Gilchrist(Direct Message):
yes
18:16:22 From Lakshmi Rajagopalan, City of Oakland to William Gilchrist(Direct Message):
thank you
18:19:15 From David Peters, WOCAN to Everyone:
moderate income is the lowest
18:19:34 From Liana Molina to Everyone:
what do you mean, david?
18:19:44 From David Peters, WOCAN to Everyone:
2.8%
18:19:48 From Liana Molina to Everyone:
oh, i see.
18:19:49 From Liana Molina to Everyone:
yes
18:19:58 From Liana Molina to Everyone:
where the city fell short?
18:20:27 From David Peters, WOCAN to Everyone:
yes
18:21:45 From Liana Molina to Everyone:
they failed to meet rhna goals across the board except market rate
18:21:51 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Annual Progress Reports - https://www.oaklandca.gov/documents/housing-element-annual-progress-reports
18:23:04 From David Peters, WOCAN to Everyone:
yes. its a formula for driving increasing wealth and income disparity in our City - only rich and low income
18:24:41 From Sandra Ue, OACC to Everyone:
so the number of permits does NOT reflect on actual built

units? the 1k under very low income might in actuality be less?
18:25:32 From Shina R (she/her) to Everyone:
it is unacceptable!
18:25:33 From Liana Molina to Everyone:
that's my understanding, Sandra. Can city staff re-confirm this? ^^
18:25:38 From Shina R (she/her) to Everyone:
is there a way to find actual units built?
18:26:11 From Lakshmi Rajagopalan, City of Oakland to Diana Perez-Domencich(Direct Message):
would you be able to respond?
18:26:30 From Diana Perez-Domencich to Lakshmi Rajagopalan, City of Oakland(Direct Message):
Sorry, to what?
18:26:34 From David Peters, WOCAN to Everyone:
^^ Great question, Shina
18:26:44 From Lakshmi Rajagopalan, City of Oakland to Diana Perez-Domencich(Direct Message):
the question from Sandra
18:27:00 From Sandra Ue, OACC to Everyone:
so basically some developments are stalled and that isn't captured... is there another table that reflects actually built #s?
18:28:27 From Diana Benitez to Everyone:
Just Cities did an analysis of built units (based on a sample) and we can share that two pager with you all after this call.
18:28:31 From David Peters, WOCAN to Everyone:
That's a great point, Diana
18:29:24 From Agnes Cho, Just Cities to Everyone:
Annual Progress Reports - https://www.oaklandca.gov/documents/housing-element-annual-progress-reports
18:29:30 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Annual Progress Report - https://www.oaklandca.gov/documents/housing-element-annual-progress-reports
18:33:05 From Sandra Ue, OACC to Everyone:
thx... my concern is folks looking at the "approved permits" data might misunderstand that as the actual # of available housing. if a lot of projects get stalled it would not be an accurate indication
18:33:46 From Diana Benitez to Everyone:
Thank you Sandra. We can make sure that the education material makes it clear.
18:33:50 From Liana Molina to Everyone:
probably equity permits re: cannabis
18:34:05 From Liana Molina to Everyone:
there are a bunch of streamlining action steps outlined in Ch 4
18:34:49 From Alison Moore (Dyett & Bhatia) to Everyone:
Here's an action that might be of interest: Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.
The City will work with developers and housing stakeholders,

particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.7, and/or increasing staffing at the Planning and/or Building Bureau to reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.
18:35:44 From David Peters, WOCAN to Everyone:
Thanks, Alison!
18:36:28 From Diana Perez-Domencich to Everyone:
Sandra --- That is correct, "Approved Permits" means a building permit has been issued, this means that construction can begin --- but a developer may not begin construction right away. To understand how many housing units have been completed and are ready for folks to move in, you'd want data on "Certificates of Occupancy" issued. That is the data Audrey showed. It is reported in the Housing Element Annual Progress Report. Diana B. mentioned that they summarized all of this information for you as well. https://www.oaklandca.gov/documents/housing-element-annual-progress-reports
18:37:27 From David Peters, WOCAN to Everyone:
I'm also thinking about permit fees for lower-income homeowners. I understand there is a fee schedule that imposes a minimum set permit fee even if you scrounged materials and did the work yourself
18:39:00 From Esther Goolsby she.they to Everyone:
they are vague, how? Only policy change will help here.
18:42:37 From Sandra Ue, OACC to Everyone:
Even if an easier permit approval process is developed & rolled out, it doesn't address issues that may cause the project being stalled. can we include consideration on obstacles to projects being completed
18:44:22 From Audrey Lieberworth, City of Oakland to Everyone:
@Sandra - yes, we identify and outline the constraints to the development of housing in Appendix F: Constraints here: https://cao-94612.s3.amazonaws.com/documents/Appendix-F-Housing-Constraints_Clean.pdf
18:47:08 From Esther Goolsby she.they to Everyone:
the goals name them but not how the protect would happen, how preserving willhappen and so on
18:47:33 From Audrey Lieberworth, City of Oakland to Everyone:
Some of the identified constraints include: zoning regulations, development standards, fees, and processing and permitting times. I've captured your comment to make sure that the constraints speak to projects that are stalled, as well
18:50:32 From Lakshmi Rajagopalan, City of Oakland to Everyone:

@david - Action 3.7.1: Incentivize the development of senior housing and provide financial assistance
to developers of housing for seniors and persons with special needs.
18:50:51 From Lakshmi Rajagopalan, City of Oakland to Everyone:
Action 3.7.4: Implement the sponsor-based Housing Assistance Program.
The City will continue to work with the Oakland Housing Authority to assist households that
otherwise might not qualify for or be successful in the traditional Public Housing and/or
Section 8 programs by partnering with agencies to provide service-enriched housing options
that increase housing choice for special needs populations. The City will explore options to
find more landlords willing to participate in the program.
18:51:08 From Alison Moore (Dyett & Bhatia) to Everyone:
That's great framing @david, elders as culture keepers
18:51:38 From David Peters, WOCAN to Everyone:
thx.....
18:51:49 From liz suk to Everyone:
Curious if the chat will be shared or included with the notes and slides?
18:52:35 From Lakshmi Rajagopalan, City of Oakland to Everyone:
An overview of the Housing Element is here: https://cao-94612.s3.amazonaws.com/documents/2022.06.07_HE-Summary.pdf
18:54:08 From Esther Goolsby she.they to Everyone:
was all most done
18:58:36 From Alison Moore (Dyett & Bhatia) to Everyone:
One of the challenges is lack of data, yes
19:01:02 From Alison Moore (Dyett & Bhatia) to Everyone:
regarding priority groups
19:01:13 From Shina R (she/her) to Everyone:
its hard to rank, but would like to include low-income non english speakers as having a barrier to accessing housing
19:01:37 From Liana Molina to Everyone:
i can stay 5 more min
19:01:46 From Sandra Ue, OACC to Everyone:
agree @shina
19:01:58 From Audrey Lieberworth, City of Oakland to Everyone:
@Shina - thank you, captured this in our list of comments
19:02:04 From Agnes Cho, Just Cities to Everyone:
I'll give folks another 30 seconds to finish the poll
19:02:17 From Liana Molina to Everyone:
i just wanted to note the result of the previous survey where 9 - 18% respondents disagreed or strongly disagreed re: goal 4 mtg community need

Oakland, CA 94612

Re: City of Oakland 2023 – 2031 Housing Element Update, Oakland

Dear Ms. Rajagopalan:

East Bay Municipal Utility District (EBMUD) appreciates the opportunity to comment on the 2023-2031 Housing Element Update in the City of Oakland's General Plan, which encompasses the entire City of Oakland (City). EBMUD commented on the Notice of Preparation of a Draft Environmental Impact Report for Phase 1 of the Oakland 2045 General Plan Update on April 14, 2022. EBMUD's original comments (see enclosure) apply to the 2023-2031 Housing Element Update regarding water service, geology, wastewater service, water recycling, and water conservation. EBMUD has the following additional comments.

GENERAL

EBMUD appreciates the City's efforts to achieve its Regional Housing Needs Allocation (RHNA) through identifying opportunity sites where additional development could occur. As noted in the Housing Element Update, these opportunity sites include both vacant and non-vacant sites. It is important that the City consider existing surrounding uses so that those uses may continue after new housing is developed. In particular, EBMUD has its main offices in Downtown Oakland and additional administrative offices and service yards in West Oakland near Grand Avenue and Adeline Street. In addition, EBMUD is developing a service yard at Willow Street and 24th Street, and its wastewater treatment plant is located at West Grand Avenue and Wake Avenue. Finally, EBMUD has a facility along Oakport Street in East Oakland as well as numerous water and wastewater facilities that support the community and provide essential services to residents and business owners throughout the City.

WASTEWATER SERVICE

The projected number of housing units within the City of Oakland as described in the Housing Element Update are higher than the quantities used by EBMUD in recent long-term planning efforts, and result in population growth rates higher than EBMUD assumed. The differences in EBMUD's assumptions and the Housing Element Update will not

Recycled Paper

necessarily result in a capacity deficiency, however, EBMUD will monitor the increase in flows over time and requests that the City continue to closely coordinate with EBMUD to ensure that implementation of the Housing Element Update proceeds as projected.

In addition, wet weather flows are a concern. The East Bay regional wastewater collection system experiences exceptionally high peak flows during storms due to excessive infiltration and inflow (I/I) that enters the system through cracks and misconnections in both public and private sewer lines. EBMUD has historically operated three Wet Weather Facilities (WWFs) to provide primary treatment and disinfection for peak wet weather flows that exceed the treatment capacity of the MWWTP. Due to reinterpretation of applicable law, EBMUD's National Pollutant Discharge Elimination System (NPDES) permit now prohibits discharges from EBMUD's WWFs. Additionally, the seven wastewater collection system agencies that discharge to the EBMUD wastewater interceptor system ("Satellite Agencies") hold NPDES permits that prohibit them from causing or contributing to WWF discharges. These NPDES permits have removed the regulatory coverage the East Bay wastewater agencies once relied upon to manage peak wet weather flows.

A federal consent decree, negotiated among EBMUD, the Satellite Agencies, the Environmental Protection Agency (EPA), the State Water Resources Control Board (SWRCB), and the Regional Water Quality Control Board (RWQCB), requires EBMUD and the Satellite Agencies to eliminate WWF discharges by 2036. To meet this requirement, actions will need to be taken over time to reduce I/I in the system. The consent decree requires EBMUD to continue implementation of its Regional Private Sewer Lateral Ordinance (www.eastbaypsl.com), construct various improvements to its interceptor system, and identify key areas of inflow and rapid infiltration over a 22-year period. Over the same time period, the consent decree requires the Satellite Agencies to perform I/I reduction work including sewer main rehabilitation and elimination of inflow sources. EBMUD and the Satellite Agencies must jointly demonstrate at specified intervals that this work has resulted in a sufficient, pre-determined level of reduction in WWF discharges. If sufficient I/I reductions are not achieved, additional investment into the region's wastewater infrastructure would be required, which may result in significant financial implications for East Bay residents.

To ensure that the proposed project contributes to these legally required I/I reductions, the lead agency should require the project applicant to comply with EBMUD's Regional Private Sewer Lateral Ordinance. Additionally, it would be prudent for the lead agency to require the following mitigation measures for the proposed project: (1) replace or rehabilitate any existing sanitary sewer collection systems, including sewer lateral lines to ensure that such systems and lines are free from defects or, alternatively, disconnect from the sanitary sewer system, and (2) ensure any new wastewater collection systems, including sewer lateral lines, for the project are constructed to prevent I/I to the maximum extent feasible while meeting all requirements contained in the Regional Private Sewer Lateral Ordinance and applicable municipal codes or Satellite Agency ordinances.

If you have any questions concerning this response, please contact Timothy R. McGowan, Senior Civil Engineer, Major Facilities Planning Section at (510) 287-1981.

Sincerely,

David J. Rehnstrom
Manager of Water Distribution Planning

Re: Notice of Preparation of a Draft Environmental Impact Report for Phase I of the Oakland 2045 General Plan Update, Oakland

Dear Ms. Rajagopalan:

East Bay Municipal Utility District (EBMUD) appreciates the opportunity to comment on the Notice of Preparation (NOP) of a Draft Environmental Impact Report (EIR) for Phase I of the Oakland 2045 General Plan Update, which encompasses the entire City of Oakland (City). EBMUD has the following comments.

WATER SERVICE

Effective January 1, 2018, water service for new multi-unit structures shall be individually metered or sub-metered in compliance with California State Senate Bill 7 (SB-7). SB-7 encourages conservation of water in multi-family residential, mixed-use multi-family and commercial buildings through metering infrastructure for each dwelling unit, including appropriate water billing safeguards for both tenants and landlords. EBMUD water services shall be conditioned for all development projects within the General Plan Update that are subject to SB-7 requirements and will be released only after the project sponsor has satisfied all requirements and provided evidence of conformance with SB-7.

Main extensions that may be required to serve any specific developments within the General Plan Update to provide adequate domestic water supply, fire flows, and system redundancy will be at the project sponsor's expense. Pipeline and fire hydrant relocations and replacements due to modifications of existing streets, and off-site pipeline improvements, also at the project sponsor's expense, may be required depending on EBMUD metering requirements and fire flow requirements set by the local fire department. When the development plans are finalized for individual projects within the General Plan Update, project sponsors for individual projects should contact EBMUD's New Business Office and request a water service estimate to determine costs and conditions of providing water service to the development. Engineering and installation of new and relocated pipelines and services require substantial lead time, which should be provided for in the project sponsor's development schedule.

Recycled Paper

Project sponsors for individual projects within the General Plan Update should be aware that EBMUD will not install piping or services in contaminated soil or groundwater (if groundwater is present at any time during the year at the depth piping is to be installed) that must be handled as a hazardous waste or that may be hazardous to the health and safety of construction and maintenance personnel wearing Level D personal protective equipment. Nor will EBMUD install piping or services in areas where groundwater contaminant concentrations exceed specified limits for discharge to the sanitary sewer system and sewage treatment plants. The project sponsor must submit copies to EBMUD of all known information regarding soil and groundwater quality within or adjacent to the project boundary and a legally sufficient, complete, and specific written remediation plan establishing the methodology, planning and design of all necessary systems for the removal, treatment, and disposal of contaminated soil and groundwater.

EBMUD will not design piping or services until soil and groundwater quality data and remediation plans have been received and reviewed and will not start underground work until remediation has been carried out and documentation of the effectiveness of the remediation has been received and reviewed. If no soil or groundwater quality data exists, or the information supplied by the project sponsor is insufficient, EBMUD may require the project sponsor to perform sampling and analysis to characterize the soil and groundwater that may be encountered during excavation, or EBMUD may perform such sampling and analysis at the project sponsor's expense. If evidence of contamination is discovered during EBMUD work on the project site, work may be suspended until such contamination is adequately characterized and remediated to EBMUD standards.

GEOLOGY

On Page 3 of the NOP, under Existing Conditions, it states that the greater Oakland area is vulnerable to seismic hazards including earthquake-inducing landslides, liquefaction, and ground shaking. When the project sponsor applies for water service for individual projects within the General Plan, they will need to provide EBMUD with any proposed landslide mitigation measures for the developments so that no landslide impact hazard is posed to proposed water main extensions that will serve the projects.

WASTEWATER SERVICE

EBMUD's Main Wastewater Treatment Plant (MWWTP) and interceptor system are anticipated to have adequate dry weather capacity to accommodate the proposed wastewater flows from this project and to treat such flows provided that the wastewater generated by the project meets the requirements of the EBMUD Wastewater Control Ordinance. However, wet weather flows are a concern. The East Bay regional wastewater collection system experiences exceptionally high peak flows during storms due to excessive infiltration and inflow (I/I) that enters the system through cracks and misconnections in both public and private sewer lines. EBMUD has historically operated three Wet Weather Facilities (WWFs) to provide primary treatment and disinfection for peak wet weather flows that exceed the treatment capacity of the MWWTP. Due to

reinterpretation of applicable law, EBMUD's National Pollutant Discharge Elimination System (NPDES) permit now prohibits discharges from EBMUD's WWFs. Additionally, the seven wastewater collection system agencies that discharge to the EBMUD wastewater interceptor system ("Satellite Agencies") hold NPDES permits that prohibit them from causing or contributing to WWF discharges. These NPDES permits have removed the regulatory coverage the East Bay wastewater agencies once relied upon to manage peak wet weather flows.

A federal consent decree, negotiated among EBMUD, the Satellite Agencies, the Environmental Protection Agency (EPA), the State Water Resources Control Board (SWRCB), and the Regional Water Quality Control Board (RWQCB), requires EBMUD and the Satellite Agencies to eliminate WWF discharges by 2036. To meet this requirement, actions will need to be taken over time to reduce I/I in the system. The consent decree requires EBMUD to continue implementation of its Regional Private Sewer Lateral Ordinance (www.eastbaypsl.com), construct various improvements to its interceptor system, and identify key areas of inflow and rapid infiltration over a 22-year period. Over the same time period, the consent decree requires the Satellite Agencies to perform I/I reduction work including sewer main rehabilitation and elimination of inflow sources. EBMUD and the Satellite Agencies must jointly demonstrate at specified intervals that this work has resulted in a sufficient, pre-determined level of reduction in WWF discharges. If sufficient I/I reductions are not achieved, additional investment into the region's wastewater infrastructure would be required, which may result in significant financial implications for East Bay residents.

To ensure that future projects following adoption of the City's General Plan Update contribute to these legally required I/I reductions, the lead agency should require all future housing project applicants to comply with EBMUD's Regional Private Sewer Lateral Ordinance. Additionally, it would be prudent for the lead agency to require the following mitigation measures for future proposed projects: (1) replace or rehabilitate any existing sanitary sewer collection systems, including sewer lateral lines to ensure that such systems and lines are free from defects or, alternatively, disconnected from the sanitary sewer system, and (2) ensure any new wastewater collection systems, including sewer lateral lines, for the project are constructed to prevent I/I to the maximum extent feasible while meeting all requirements contained in the Regional Private Sewer Lateral Ordinance and applicable municipal codes or Satellite Agency ordinances.

WATER RECYCLING

EBMUD's Policy 9.05 requires that customers use non-potable water, including recycled water, for non-domestic purposes when it is of adequate quality and quantity, available at reasonable cost, not detrimental to public health, and not injurious to plant, fish, and wildlife to offset demand on EBMUD's limited potable water supply.

Some portions of the City's boundaries fall within and around the service area of the East Bayshore Recycled Water Project transmission and distribution pipeline infrastructure. Although the housing element is residential in nature, many housing projects and any related non-residential developments present opportunities for recycled water uses. Appropriate recycled water uses range from landscape irrigation, toilet flushing, cooling, and other non-potable commercial and industrial applications. These could be served by existing or expanded recycled water pipelines in the future. Therefore, EBMUD recommends that the City and project sponsors maintain coordination and consultation with EBMUD during the planning and implementation of the various projects within the General Plan Update, regarding the feasibility of providing recycled water for appropriate non-potable uses.

WATER CONSERVATION

Individual projects within the General Plan Update presents an opportunity to incorporate water conservation measures. EBMUD requests that the City include in its conditions of approval a requirement that the project sponsor comply with Assembly Bill 325, "Model Water Efficient Landscape Ordinance," (Division 2, Title 23, California Code of Regulations, Chapter 2.7, Sections 490 through 495). The project sponsors should be aware that Section 31 of EBMUD's Water Service Regulations requires that water service shall not be furnished for new or expanded service unless all the applicable water-efficiency measures described in the regulation are installed at the project sponsor's expense.

If you have any questions concerning this response, please contact Timothy R. McGowan, Senior Civil Engineer, Major Facilities Planning Section at (510) 287-1981.

Sincerely,

David J. Rehnstrom
Manager of Water Distribution Planning

Just Cities

Deeply Rooted Feedback Table (6/10/22)

We only added track changes to section 7.1 of the Oakland HE and included the rest of our feedback in this table where we note which document or policy section we are referring to.

Topic Area	DR Feedback
Engagement and accountability	**Provided track changes to the Engagement section** that includes removing the DR Partners map and adding more detail to the Partners table. Oakland HE_compiled with TOC_DR_2022_0610: Section: 7.1 **Acknowledgement of Community Policy ideas:** As we have discussed, the City needs to explain why some of the community policy ideas in the Public Participation section didn't make it to the HAP. We recommend the following columns in the appendix for each community policy idea: policy idea, decisionmaker, issue/ disagreement, consensus, and next steps. **Community Policy Ideas not in HAP include:** ● Create and staff Neighborhood Planning Councils for residents to weigh in on what gets built in their neighborhoods during planning and implementation (i.e. RCPC or Mission group), particularly in areas where rapid displacement is happening. (Policy 5.2) ● Citywide Housing Commission to review City's progress on Housing Element actions. (Policy 5.2)
Health	**Community Policy Ideas not in HAP include:** ● Integrate Healthy Development Guidelines into GP (note under actions where it's come from HDG) (Policy 5.2) Examples include disclosure and reporting on rental unit loss, eviction, and relocation compensation; and displacement impact mitigation. ● Human Health/Socioeconomic Impacts Analysis: require public analysis of displacement/homelessness impacts of market rate projects prior to City providing permits or

	any zoning changes (Policy 1.1) • Acknowledge that proactive rental inspections can only be implemented with a new law. (Policy 2.1)
Tenant Protections	**Community Policy Ideas not in HAP include:** • A law requiring anti-displacement strategies for the proactive rental inspection program. (Policy 2.1) • Moratorium on market rate development for neighborhoods experiencing rapid gentrification. (Policy 1.1) • Community outreach & enforcement of City's Fair Chance Housing Ordinance (banning housing discrimination of people with criminal records). (Policy 1.1, 5.3) • Cultural Districts will protect existing residents from displacement. (Policy 3.2) • Address needs of undocumented residents, i.e. new local ordinance for removing Social Security Number from housing applications. (Policy 5.3) • Measure KK assessment (low-income homeowners applied and used funds). Update so low-income homeowners will not have to pay the new taxes. (Policy 3.3)
Housing Production	**Housing Affordability Densities:** City kept as is because it aligns with HCD Site Guidelines. We are concerned that size assumptions are in violation of fair housing laws. (Appendix C pages 50, 80-81; and Oakland HE page 39) **Use of City-owned land as 100% affordable housing (includes 10+ acre sites as well):** Action 3.3.1 discusses prioritizing ELI households on public land, but Table C-16 (Appendix C) in Housing Sites Inventory shows that housing at all income levels is being planning for on public land. **Community Policy Ideas not in HAP include:** • All public land for 100% affordable housing (includes 10+ acres). (Policy 3.3). • Utilize neighborhood Area Median Income for housing

	projects. (Policy 3.2) • Increase Housing Impact Fees.(Policy 3.3) • Create a real Inclusionary Zoning law. (Policy 3.3) • Link zoning changes for market rate projects to affordability requirements so more affordable housing is built. (Policy 3.4) • Prioritize re-entry housing in City funding applications. (Policy 3.7) • Ensure that TOD projects provide housing that neighborhood residents can afford (Policy 5.2)
Affordable Housing Preservation	**Community Policy Ideas not in HAP include:** • A tax on speculators AFTER they purchase the property does not reduce housing speculation and the City already has a registration fee & inspection requirement for speculators. The City should instead evaluate how the current program is working. (Policy 2.2)
Homelessness	**Goals, policies, and actions should treat unhoused people with dignity and respect the communities they have built rather than allowing for City evictions under the current Homeless Encampment Management Policy.** The current policies focused on unhoused people describes just enhancing operations of the EMP. **Community Policy Ideas not in HAP include:** • Stopping Encampment Management Policy. (Policy 4.2) • Changing zoning so tiny homes or RV's can be allowed across the City. (Policy 4.3) • No mention of permanent housing and how that aligns with AFFH. (Goal 4. How this Goal AFFH section) Note: We will be conducting focus groups conversations along with our DR Partners this summer and will have more feedback, including with unhoused communities for these specific policies.
AFFH integration throughout the	**Missing Special Needs Groups (prioritize housing for them):**

HE	• Formerly incarcerated individuals (Policy 1.1, 3.7), • Single parents (not just mother's) (Policy 1.1, 3.7) • young adults (Policy 1.1, 3.7) • low-income non-english speakers (Policy 1.1, 3.7) • youth aging out of foster care (Policy 1.1, 3.7) • Black Americans (this population particularly in relation to landlord housing discrimination). (Policy 1.1, 3.7) • Teachers (Policy 1.1, 3.7) **Need to integrate the following community input into Intro, Housing Needs (Appendix B) and AFFH sections (Appendix D and relevant Oakland HE sections):** • Historic and Current Racism are intentional public policy choices ○ Including intentional decrease of public housing in neighborhoods like Lower Bottoms. It was another policy choice that exacerbated racialized displacement. • Facts about ethnic enclaves created in part by racial housing covenants (Chinatown, West and East Oakland). • The negative impacts of California legislature's Costa Hawkins law • The negative impacts in the 1990s of the tech boom and Mayor Brown's 10k market rate housing plan to make Oakland attractive for SF tech workers. • Generational economic and housing discrimination impacts Oakland residents. • Market force displacement from lack of sufficient tenant protections • Blighted Housing Conditions: Lower income residents in West and East Oakland are facing unhealthy housing conditions ie. no heat, electrical issues, and faulty plumbing).
Previous HE Assessment (RHNA and background	**Mention Housing Equity Roadmap in Appendix A.** Lots of community orgs were involved in the development of that document and may not have been involved with HCD's Strategic Plan so may not see themselves reflected in the Strategic Plan.

	More information/data on assessment of previous housing cycle production. A summary of the previous HE assessment should be included in the Oakland HE (main chapters of document) for transparency and framing for the new RHNA goals. Draft HE (Appendix A) has only one sentence on total housing built in the previous cycle. Also include 1) the number of built units by affordability level in the 2015-2023 RHNA table alongside permitted, 2) Table by planning area and income level for built units, and a map of where those sites are by income level. Just Cities ended up doing this analysis with sample data.

1 Introduction

This Housing Element presents the City of Oakland's strategy and commitment for how it will meet the housing needs of the community. In the face of a crushing regional housing crisis, the task is formidable, but essential: to make quality housing opportunities available to all Oakland residents through the Protection, Preservation, and Production of homes, and to address systemic housing inequity.

Preparation of this Housing Element comes at a time of challenge and uncertainty for many Oaklanders. It comes amid a global pandemic, a renewed call for racial justice after the murder of George Floyd, and economic and global security uncertainty. It comes while Oakland has imposed one of the strongest eviction moratoriums in the State, and it comes at a moment where the world moves closer to the tipping point of irreversible climate change. All of these large issues collide to shape how housing does and will look like for individuals and families who call Oakland home.

2 Learning from the Past

What does it mean to call Oakland "home"? Oakland's current housing landscape tells the story of struggle, of systemic forces that have shaped the neighborhood geography of opportunity. To chart an equitable path forward, Oakland's history must be examined and addressed.

The land that is now Oakland is the ancestral home of the Ohlone indigenous group who were stewards of the oak and redwood forests, grasslands, and marshlands that make up the coastal region of central and northern California for thousands of years. The arrival of Spanish missionaries in the 1760s and subsequent periods of Spanish colonization, Mexican settlement, and American urbanization of the Ohlone region greatly shifted the cultural and physical landscape. Nevertheless, this land continues to be of great importance to the Ohlone people.[1]

Oakland has historically been a destination for working people and immigrants who sought out its abundant industrial jobs and relatively affordable neighborhoods. Many of these places were formed into cultural and ethnic enclaves as a result of segregationist and racially discriminatory policies and practices.[2] Government-sponsored "white flight" suburbanization during the early 1930s, followed by

[1] Mitchell Schwarzer, *Hella Town: Oakland's History of Development and Disruption*, (Oakland: University of California Press, 2021).

[2] City of Oakland, "Environmental Justice and Racial Equity Baseline." March 2022. Access available at https://cao-94612.s3.amazonaws.com/documents/Equity-Baseline_revised4.15.22.pdf

disinvestment and takings in neighborhoods of color, created socioeconomic and geographic lines that were further delineated by redlining (a federally sanctioned practice during the 1930s of denying mortgages in communities of color) and racially restrictive covenants.[3] In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color.

Since the late 1990s, Oakland has seen an increase in real estate investment, which has had both positive and negative effects. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process referred to as "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[4] This activity resulted in waves of foreclosures in East and West Oakland. A significant number of these foreclosed properties were then acquired by investors, and once-affordable and stable homes flipped overnight into market-rate rentals. An influx of private capital and a 2016 municipal bond for development, in part due to efforts like the City's 10K plan to revitalize the urban core, has reinvigorated downtown and uptown.[5] At the same time, rising housing prices and a lack of new affordable options created waves of residential and commercial gentrification, especially in North and West Oakland and Chinatown, with growing trends in East Oakland. Massive regional job growth, particularly in the technology sector, coupled with the lack of supply of housing in other cities to keep up, sent waves of new residents to the East Bay in search of more affordable housing.[6] New skyscrapers and midrise buildings sprung up largely targeted toward the upper end of the market in downtown, across North Oakland, along upper Broadway, and in West Oakland, in part driven by rising costs of land and construction. The impacts of lack of regional supply rippled through other residential areas of the city, where communities of color faced greater vulnerability to rising housing costs than white residents.[7]

The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities. From 2000 to 2019, Oakland lost nearly 30 percent of its Black population, and significant numbers of long-time Asian Americans residing in ethnic enclaves including Chinatown.[8] Homelessness

[8] American Community Survey (ACS) (2014-2018); U.S. Census 2000, 2010; Urban Displacement Project, 2021.

increased by 90 percent from 2013 to 2019.[9] The COVID-19 pandemic has brought into stark relief and exacerbated racial and economic disparities in housing security and the public health consequences of these conditions.[10] The consequence of this complex history has and continues to shape the city's built environment, including the distribution, types, affordability, and quality of housing in Oakland.

Today, Oakland has grown to be the largest city in Alameda County with the busiest port in Northern California. Neighboring cities include Berkeley and Emeryville to the north, San Leandro to the south, Alameda across the Oakland Estuary, and Piedmont surrounded by Oakland. San Francisco is located just 12 miles west across the San Francisco Bay, connected by Interstate 80 (I-80). Oakland is known for its diverse geography, including 19 miles of bay and estuary coastline to the west, the Oakland/Berkeley Hills to the east, and Lake Merritt, a tidal lagoon lake located within the city's borders.

3 Charting an Equitable, Inclusive Future

With the legacy of inequity top of mind, the City has begun planning for a more equitable future. In 2016, the City established the Department of Race and Equity with a mission "to advance the creation of a city where diversity has been maintained, racial disparities have been eliminated, and racial equity has been achieved." The Department of Race and Equity is particularly concerned with making a difference in the determinants of equity that lead to creation of a fair and just society, including housing. In 2018, the department published the Equity Indicators Report, which serves as a baseline quantitative framework that can be used by City staff and community members alike to better understand the impacts of policy on racial groups and measure inequities.

The work of the Department of Race and Equity informs the City of Oakland's Department of Housing and Community Development's (HCD) 2021-2023 Strategic Action Plan This plan is informed by past analyses, planning, and accomplishments such as the 2016 "Oakland At Home: Recommendations for Implementing A Roadmap Toward Equity from the Oakland Housing Cabinet," and applies a race and equity lens to the City's housing investments and services in wake of the public health, fiscal, and social crises caused by COVID-19. In practice, this includes transparent and regular reporting on outcomes disaggregated by race; Americans with Disabilities Act-compliant, accessible information provided in multiple languages; anti-displacement and housing production programs, policies, and initiatives focused on the most impacted vulnerable populations; and access and opportunity pathways to and for Black, Indigenous, and People of Color (BIPOC) developers, service providers, and other contractors to the resources the City has to offer in the conduct of its housing work. The Strategic Action Plan also

[9] *Ibid.*

[10] "City of Oakland HCD 2021-2023 Strategic Action Plan City of Oakland Housing & Community Development Department 2021-2023 Strategic Action Plan." n.d. Accessed May 9, 2022. https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

details a series of specific actions and policies HCD will pursue as part of a broader strategy to protect residents from displacement, preserve existing affordable housing - both subsidized and unsubsidized, and produce new affordable housing.

Community-based organizations, many of whom have been leading housing justice efforts for decades, are also shaping housing goals rooted in racial equity. Oakland residents, community organizations, developers, and government partners created the Healthy Development Guidelines (HDG) for Oakland's Planning and Building Department, the first health and racial equity-focused guidelines in the country. Two of the HDG's goals include enhancing access to affordable housing, particularly for vulnerable populations; and preserving existing affordable housing and protecting residents from involuntary displacement. These guidelines were incorporated into city development review process in 2018. The East Oakland Neighborhoods Initiative, a community plan created out of partnership between the City of Oakland Planning Bureau and twelve community-based organizations focused on equity-based planning for Deep East Oakland, also highlight anti-displacement among their plan goals, noting that improvements recommended in the plan must not drive out existing residents by inadvertently increasing the cost of housing. This is achieved in part through local wealth creation, well-crafted policies, and mainstreaming of affordability vehicles.

The global climate crisis will also have profound impacts on—among other things—housing security and availability in Oakland. To address the climate crisis, the City released the Oakland 2030 Equitable Climate Action Plan (ECAP) in July 2020. The ECAP is the City's strategy to create a future built on justice, equal opportunity, and environmental protection. Among the list of Transportation and Land Use (TLU) actions in the ECAP is TLU-3, "Take Action to Reduce and Prevent Displacement of Residents & Businesses." TLU-3 explicitly links anti-displacement efforts to climate equity action, as the City can only achieve its ECAP goals if Oaklanders are able to participate fully in, and benefit from, climate action without fear of displacement and homelessness.

The City is also undertaking an update to its Land Use and Transportation Element, in tandem with this Housing Element, to promote a land use pattern and policies that will help accelerate and target housing production. Like many other Bay Area cities, nearly every property in Oakland has been developed, with few "greenfield" (not yet developed) sites within its limits or at its borders, meaning that housing development will primarily rely on development and redevelopment of "infill" sites. Within the city limit, there are approximately 29,700 acres (46.4 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks, schools, and an international airport. The Housing Element applies to land within city limits, depicted in Figure 1-1.

Callout: Environmental Justice and Racial Equity Baseline
The Environmental Justice and Racial Equity Baseline, published in March 2022, identifies and details disparities by race and by geography that can be influenced directly or indirectly by the General Plan.

The findings in the Environmental Justice and Racial Equity Baseline identify environmental justice and racial equity existing conditions and inform conversations between City staff and members of the public. In parallel with the Housing Element, this baseline will be used as a starting place for policymaking related to environmental justice, safe and sanitary housing, and other community equity issues.

Figure 1-1: Regional Map

3.1 Purpose of the Housing Element

The 2023-2031 Oakland Housing Element is one component of a larger effort: an update to the City of Oakland General Plan. The General Plan Update will create Oakland's 2045 General Plan and is a "once-in-a-generation" opportunity for all Oaklanders to work together to create a visionary blueprint for the city's future over the next 20 years. The Oakland 2045 General Plan will be made up of several "elements" covering a wide range of topics important to the future of Oakland, including environmental justice, land use and transportation, open space, noise, conservation, and safety.

The 2023-2031 Housing Element sets forth the City's housing priorities and goals—as well as its vision for both short- and long-term development—to create a fair and just city. State law mandates that the Housing Element be updated every eight years to reflect changing conditions, community objectives, and goals. This Housing Element also provides an evaluation of the 2015-2023 Housing Element, including an assessment of prior programs and strategies.

Housing Element: components

In California, all cities must adopt a General Plan composed of at least seven elements, including the Housing Element. All cities must also incorporate environmental justice into the General Plan. Oakland has chosen to adopt an Environmental Justice Element while also incorporating environmental justice goals into each element, including the Housing Element. While the Housing Element is influenced by State law, it is essentially a local document. The Oakland Housing Element, in tandem with the rest of the General Plan Update, is designed to assess and shape the community's housing progress and needs.

Nonetheless, among all General Plan elements, the State of California has the most extensive set of requirements pertaining to housing elements. In accordance with State law, the Housing Element must include:

- A description of outreach conducted in preparation of the element
- An analysis of progress in implementing the previous Housing Element and effectiveness of its programs and actions
- An assessment of existing and projected housing needs
- An analysis of special housing needs, such as those of older adults and people with disabilities
- An analysis of existing assisted housing units at risk of conversion from affordable to market rate
- An analysis and inventory of resources and constraints relevant to meeting housing needs
- An affirmatively furthering fair housing (AFFH) analysis, which guides the analysis of each set of requirements

- An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels
- A program that sets forth specific actions to address housing needs, with identification of responsible agencies and timelines

4 REGIONAL HOUSING NEEDS ASSESSMENT (RHNA)

Oakland's Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (State HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then distributes a "fair share" portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, Oakland must identify sites sufficient to accommodate 26,251 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in Table 1-1.

A total of 6,511 units must be affordable to households making less than 50 percent of area median income (AMI), 3,750 units must be affordable to households making between 50 and 80 percent of AMI, 4,457 units must be affordable to households making between 80 and 120 percent of AMI, and 11,533 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in Appendix C.

Table 1-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Income Range*	*Needed Units*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	<$46,287	6,511	24.8%
Extremely-Low-Income (<30% AM part of Very-Low-Income in previous row)[2]	<$27,772	*3,256*	-
Low-Income (51-80% AMI)	$27,773-$74,059	3,750	14.3%
Moderate-Income (81-120% AMI)	$74,059-111,089	4,457	17.0%
Above-Moderate-Income (>120% AMI)	>$111,090	11,533	43.9%
Total		**26,251**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

5 HOUSING ELEMENT: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.

- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.

- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.

- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.

- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.
- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH) requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

Environmental Review

The Housing Element update is being accompanied by an Environmental Impact Report (EIR), which analyzes the potential impacts attributable to the Housing Element update, as well as the Safety and Environmental Justice Elements and related Planning Code, General Plan, and Zoning Map amendments.

5.1 Oakland's Housing Approach

Two important components of the Housing Element include a plan to address Oaklanders' housing needs, and an inventory of sites suitable for housing development at all income levels, based on Oakland's 6th cycle RHNA.

6 Housing Action Plan

This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2 of the Housing Element.

The goals include:

1. **Protect Oakland Residents from Displacement and Prevent Homelessness:** Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.
2. **Preserve and Improve Existing Housing Stock:** Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.
3. **Expand Affordable Housing Opportunities:** Facilitate the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, provide a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. Locate new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and remove constraints to affordable housing development.
4. **Address Homelessness and Expand Resources for the Unhoused:** Recognize housing as a human right. Reduce homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.
5. **Promote Neighborhood Stability and Health:** Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities.

The goals, policies, and actions form the Housing Action Plan for the 2023-2031 planning period and transform this framework into impactful action.

Housing Sites Inventory

The Housing Element also presents an inventory of housing sites suitable for new homes in Oakland at all income levels. To do this, the inventory includes:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units and other types); and
- Opportunity sites where additional development could occur. Opportunity sites were selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected so as to reduce segregation and increase affordable development in high resource neighborhoods, where possible.

Chapter 3 provides a summary of the inventory approach and Appendix C includes the detailed site inventory.

The Housing Action Plan and Housing Site Inventory remain a work in progress with the intent of soliciting feedback from members of the community and refining the goals, policies, and actions to reflect both local priorities and State obligations.

6.1 Organization of the Housing Element

The Housing Element is divided into four chapters: an Introduction, a Summary of Public Participation, a Summary of the Housing Sites Inventory, and the Housing Action Plan. In addition, there are several technical appendices that provide extensive detail on a range of topics, including many of the checklist items mandated by state law. This includes an evaluation of the City's 2015-2023 housing element, an assessment of housing needs, resources, and constraints, and the comprehensive housing sites inventory. A summary of the findings from each technical appendix is provided in the main body of the Housing Element. It is organized as follows:

- **Chapter 1 – Introduction:** Provides an overview of State requirements, a summary of the organization of the Housing Element, and an explanation of the Housing Element's relationship to the General Plan.
- **Chapter 2 – Public Participation:** Provides a description of the public participation process and a summary of community outreach activities.
- **Chapter 3 – Summary of the Housing Sites Inventory:** Summarizes the City's ability to accommodate the RHNA on available land, and the selection of sites in light of AFFH requirements.
- **Chapter 4 – Housing Action Plan:** Institutes the goals, policies, and actions of the 2023-2031 Housing Element, and provides quantified objectives.
- **Appendix A – Evaluation of the 2015-2023 Oakland Housing Element:** Summarizes the City's achievements in implementing goals, policies, and actions under the previous Housing Element.
- **Appendix B – Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify Oakland's housing needs.
- **Appendix C – Sites Inventory:** Outlines the selection and capacity methodology used to identify sites to accommodate the RHNA.
- **Appendix D – Assessment of Fair Housing:** Identifies fair housing issues and solutions to meet Oakland's AFFH mandate.

- **Appendix E – Housing Resources and Opportunities:** Assesses the City's financial and administrative resources available for future housing development.
- **Appendix F – Housing Constraints:** Analyzes governmental and non-governmental constraints to the development of housing.
- **Appendix G – Opportunities for Energy Conservation:** Presents opportunities to develop housing in a sustainable manner.
- **Appendix H – Glossary**
- **Appendix I – Reserved for Public Outreach Materials**

6.2 Relationship to Other General Plan Elements

State law requires the Housing Element to contain a statement of "the means by which consistency will be achieved with other general plan elements and community goals" (California Government Code, Section 65583(c)(8)). There are two aspects of this analysis: 1) an identification of other General Plan goals, policies, and programs that could affect implementation of the Housing Element or that could be affected by the implementation of the Housing Element, and 2) an identification of actions to ensure consistency between the Housing Element and affected parts of other General Plan elements.

As described above, the City is undergoing a comprehensive update to the General Plan. The General Plan update is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, which are due by the beginning of 2023, as well as preparation of a Racial Equity Impact Assessment, Zoning Code and Map update, and a new Environmental Justice Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by 2025.

The Land Use and Transportation Element (LUTE) of the Oakland General Plan was last revised in 1998. The vision and specific policies contained in the LUTE seek to encourage and facilitate the types of infill, re-use, mixed-use, and central city/corridor-oriented residential development that are the focus of the Housing Element and the City's ability to accommodate its regional housing allocation. Most of the housing to be provided in Oakland will result from the development or redevelopment of underutilized and infill parcels. In addition rezoning will occur in select areas to accommodate additional

density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing.

The goals, policies, and programs contained within this Housing Element will also inform the strategies included in the updated LUTE. As the Housing Element will be adopted prior to the LUTE update, the general distribution, location and extent of land uses as well as population density and building intensity standards carried out by the current Planning Code are used to determine the City's ability to accommodate residential development. Some initial amendments to the Land Use Element and Planning and Zoning Code along with initial zoning map changes will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Anticipated development on these sites is expected to be in compliance with updated policy standards for noise, safety, open space, recreation, and conservation contained in the other General Plan elements.

The policies in the other updated General Plan elements will advance the ability of the City to achieve the objectives contained in the 2023-2031 Housing Element. Likewise, the Housing Element policies will advance the implementation of policies and programs in the other updated General Plan elements. The City has therefore determined that the updated Housing Element is consistent with the General Plan.

6.3 Sources of Information

In preparing the Housing Element, various sources of information were utilized. As a starting point, the Element used ABAG-prepared local data and AFFH package pre-certified by State HCD for use in sixth cycle housing elements, which provides the basis for population and household characteristics and affirmatively furthering fair housing resources. Where necessary, several additional and more current sources are used to provide reliable updates of the ABAG data package. The sources used in the ABAG data package and many additional sources are listed below. Public input from members of the public, community-based organizations (CBOs), and community leaders, was also a key source of information for this Housing Element. More details on what information was collected from these partners can be found in Chapter 2.

7 Public Participation

Inclusive engagement and public participation have been key to the preparation of Oakland's Housing Element. Public participation is an ongoing process that will continue to occur as the General Plan is updated. Outreach completed as part of phase 1 of the update process will continue to inform phase 2 of the General Plan update. All community outreach is conducted through a racial equity lens to identify actions to affirmatively further fair housing, increase community assets, decrease pollution exposure, and improve overall health.

The community engagement effort is composed of an extensive outreach process that seeks to engage stakeholders throughout the community, with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and often most negatively impacted by City policies. All community input shared will be used to "ground truth" data based on peoples' lived experience, inform areas of focus for General Plan elements, and guide development of General Plan policies. Outreach that informed the development of this Housing Element is summarized in the following chapter, and materials used in the outreach process are included in Appendix I.

7.1 Summary of Community Outreach Activities

General Plan Update Outreach

The City, based on feedback received from community members, implemented an innovative approach to collaborating with consultants on the General Plan Update. The City partnered with both a Community Consultant Team – Deeply Rooted Collaborative and a Technical Consultant Team – Dyett and Bhatia, to ensure a planning process that 1) meets state deadlines and requirements for the GPU and 2) dedicates significant resources to deep and meaningful community engagement. The Community and Technical Consultants coordinated closely. The team leads meet weekly, and the entire project team meets biweekly to share key findings and provide feedback. Both Community Consultant and Technical Consultant outreach and feedback is incorporated into all components of the Housing Element. This approach aligns with advancing the City's critical mission of creating a just and fair City for all (Oakland Municipal Code Section 2.29.170.1).

Community engagement efforts for the General Plan Update include an extensive and inclusive outreach process, engaging stakeholders throughout the community with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and most negatively impacted by City policies.

The Deeply Rooted Collaborative focuses on engagement with the following key communities and geographic areas:

- Communities: Unhoused; formerly incarcerated; low-income Asian, Pacific Islander, Black, Latinx, multiracial communities including those experiencing environmental injustices
- Outreach Geographies: Fruitvale, West Oakland, East Oakland, Chinatown, Eastlake, San Antonio

Deeply Rooted has three organizations providing central support through the design and coordination of the overall structure for community engagement, providing technical assistance and community education in planning, and administrative support.

- EastSide Arts Alliance | Cultural Programming Partner
- Just Cities | Technical Assistance/Community Education Partner
- Urban Strategies Council | Administrative Partner

The Deeply Rooted Collaborative in partnership with community partners as shown in Figure 2-1. Deeply Rooted's community partner roles are listed in Table 2-1.

	Malonga Arts Residents Association (MARA)	Black and Brown communities, and partnership with members in Chinatown
	The Village in Oakland	Unhoused curbside communities in North Oakland, West Oakland, Downtown, and East Oakland

5 Community Engagement and Outreach Summary

A variety of outreach activities such as workshops, focused discussions, pop-ups, open houses, porch chats, and community hub events are planned throughout the entire process. All community input shared will be used to ground truth data based on peoples' lived experience, inform areas of focus for the update of General Plan elements, and guide development of General Plan policies.

Input related to housing overlaps with many General Plan topic areas and will be incorporated into both the eight-year Housing Element Update as well as into elements with a longer planning horizon, such as the Land Use and Transportation, Environmental Justice, and Safety Elements. A summary of the General Plan update project schedule is provided in Chart 2-1. Information on all community engagement events, including engagement summaries; workshop and townhall presentations, recordings, meeting summaries; and discussion group summaries, are provided via the General Plan

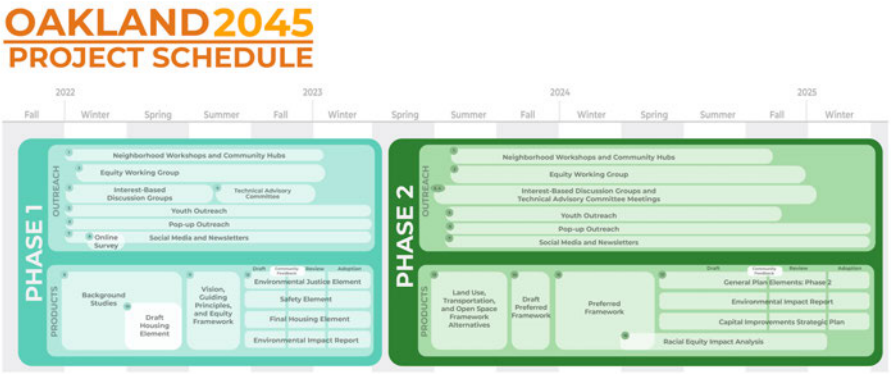
Update website at https://www.oaklandca.gov/topics/meetings-and-events. A summary of these engagement activities is described below:



- **Popup and Community Hub Events:** Since November 2021 to March 2022, the GPU Deeply Rooted Collaborative has conducted pop-up events in Eastmont, Fruitvale, San Antonio, Chinatown, West Oakland, and Downtown. For example, in West Oakland these events have been porchside chats and a pop-up at Hoover Elementary. Engagement has also been integrated into larger community events like the Oakland Asian Cultural Center's (OACC) Asian Pacific New Year Celebration and the Black Joy parade. At these community-embedded events, the team has engaged with over 1006 people, with a majority being individuals from communities of color. These events sought to hear community concerns, ideas and solutions through interviews and focus group conversations. Community concerns that rose to the top included affordability, displacement, disinvestment, housing quality, pollution (industry and cars), lack of parks, collisions, and illegal dumping.
- **Townhalls**: Two townhalls were held on March 26, 2022, and April 7, 2022. The townhall on March 26, 2022, introduced the General Plan Update process and gathered community input on a vision for the City in 2045, as well as local issues and opportunities that should be addressed in the General Plan. The townhall on April 7, 2022, focused on equity across all issues, with a special focus on EJ and safety priorities in the City.
- **Community Education Workshops:** Two community education workshops were hosted on April 8, 2022, and April 9, 2022, and organized by the Deeply Rooted Collaborative Community Engagement partner to review the past and present policies that led to today's conditions in housing and environmental justice. Over 100 people attended the workshops. Speakers included Oakland unhoused leader Needa Bee (The Village in Oakland), EJ leader Ms. Margaret Gordon (West Oakland Environmental Indicators Project), Margaretta Lin (Just Cities) and Diana Benitez (Just Cities). Attendees shared their frustration regarding ongoing displacement and disinvestment and various community-centered solutions that would bring much needed resources to communities of color in Oakland without displacement.
- **Youth Engagement:** Youth engagement for the GPU will take the form of a Deeply Rooted Fellowship with 15 – 20 fellows. The Fellowship will be a 2-to-3-year commitment and fellows will be provided with a monthly stipend. Planning, design, and training of the fellowship program will be done in coordination with Y-Plan. Fellows will coordinate with the Oakland Youth Advisory Commission (OYAC) and will be engaged in outreach activities such as community-based events, presentations to the community and schools, and social media outreach. Recruitment began in April 2022 with tentative commencement of the Fellowship in May 2022.
- **Neighborhood Group Meetings:** Staff are working with Neighborhood Service Coordinators to present at Neighborhood Crime Prevention Councils (NCPCs) on topics including housing,

environmental justice, industrial lands and safety and natural hazards and receive feedback. Staff have presented at several NCPCs and will continue to engage and obtain feedback. Staff are presenting to other Neighborhood – Community groups, faith-based organizations, and at other community congregation events as well.

- **Equity Working Group:** Convened by the Deeply Rooted Collaborative, the Equity Working Group (EWG) is comprised of 20 diverse community members who will 1) Identify the major challenges and impacts of the General Plan (housing, safety, environmental justice, land use, transportation, and parks) and 2) Advocate for solutions that advance equitable and healthy communities for Oakland residents. Each member will receive a stipend. 20 EWG members who met the following criteria were selected through an interview process from a total of 66 applicants:
  - Hard to reach communities: People from communities that the City traditionally has trouble engaging with including Indigenous, unhoused, formerly incarcerated, low-income, Asian, Black, Latinx, multiracial, people with disabilities, undocumented, and people experiencing environmental injustices.
  - In target geographic areas of: West Oakland, East Oakland, Chinatown, and Fruitvale.
  - Age diversity: People at different stages of their lives to ensure varied knowledge and experiences.
  - Diversity of gender and sexual orientation: To ensure women's and LGBTQ+ perspectives are included in this process.
  - People who own small businesses in Oakland.
- **Technical Advisory Committee:** The Technical Advisory Committee (TAC) is comprised of internal City department representatives as well as other Oakland-based, neighboring, and regional governmental agency representatives. The TAC serves to advise on key strategies to address Oakland's big issues related to housing, environmental justice, safety, and other topics; review community input collected at key points in the process; and inform, discuss, and provide technical direction on policies and actions. The second TAC meeting was held on March 7, 2022 and TAC members provided recommendations for housing strategies/actions for housing production, preservation, and protections.
- **Study Sessions with Official Decision-Making Bodies:** The Planning Commission, City Council, and various boards and commissions are active participants in the GPU and will have opportunities to provide direction at each Stage in the process. The project team will continue to check in with these decision-making bodies at key milestones to ensure that the project remains on the right track in terms of process, direction, and overall vision. Engagement will take the form of study sessions and informational presentations to review products and generate feedback on drafts. The Planning Commission and Special Community & Economic

Development Committee met on February 2nd and February 22nd to discuss potential housing site locations and recommended housing strategies and actions.

Chart 2-1: Oakland 2045 Project Schedule

Housing Element Outreach

To supplement efforts that were part of the General Plan update, a series of targeted activities related to housing were held prior to the release of the public Draft Housing Element. Additional opportunities for feedback will occur after plan release as well. These efforts are summarized in Chart 2-2 and described below:

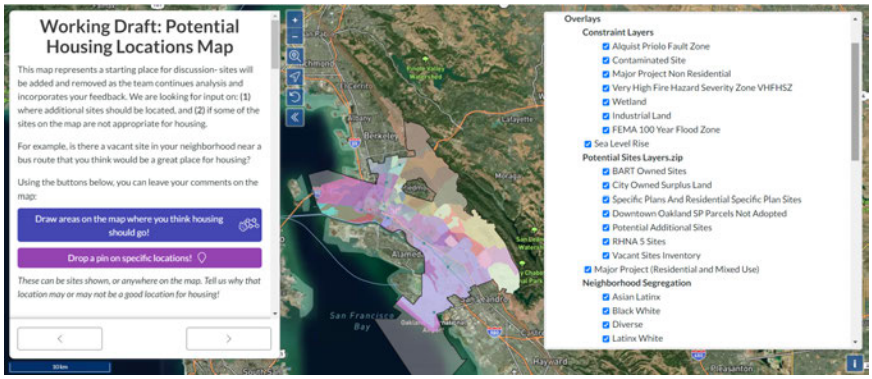
Chart 2-2: Housing Element Outreach Timeline

Housing Workshops: The team hosted three virtual housing workshops on February 10, 2022, February 17, 2022, and March 12, 2022, with one additional workshop planned to allow for the opportunity to give feedback on the Draft Housing Element. Approximately 200 people participated in

these three virtual workshops. The first workshop provided background information on the General Plan, the Housing Element, and housing sites inventory requirements. Workshop 2 sought to gather input on potential housing programs. Workshop 3 focused on community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. Workshop 4 was held on May 12, 2022, and sought Oaklanders' input on housing sites and proposed strategies included in a public review Housing Element draft before sending it to the California Department of Housing and Community Development (HCD). Summaries of these workshops are included in Appendix I.

Discussion Groups: A series of focus group discussions were held on the housing-related topics to solicit targeted feedback from organizations and individuals with direct experience with housing provisions and housing-related services. Discussion participants included organizations that may not have traditionally participated in the past including housing justice advocates, tenant rights organizations, faith-based organizations, and other community organizations.

Summaries of these meetings, including the names of participating groups, are provided in Appendix I; see below for the themes of the discussion groups:



- Focus Group Discussion 1 (February 2, 2022): Housing Sites
- Focus Group Discussion 2 (March 10, 2022): Production, Preservation, and Protections
- Focus Group Discussion 3 (*Forthcoming – placeholder*)

6 Housing Element Update Survey

The Oakland Housing Element Update Survey accompanied the first housing workshop on planning where housing should go. The survey was open from February 11, 2022 through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland.

The interactive map in the survey displayed the initial sites under consideration for the Housing Element and focused on identifying community priorities and recommendations for additional locations. See Figure 2-2 below for a snapshot of the interactive map. As an optional component of the survey, respondents were asked to describe their zip code, and race or ethnicity. The results of this survey guided the selection of sites identified in Chapter 3 and Appendix C, and a summary of the survey's findings is provided in Appendix I.

Figure 2-2: Interactive Map Survey Snapshot

Analysis of Impediments to Fair Housing Choice

The assessment of fair housing contained in Appendix D relies in part on outreach done in preparation of Alameda County's 2020 to 2024 Regional Analysis of Impediments to Fair Housing Choice (AI).[11] Historically, Oakland has prepared its own AI every five years as a U.S. Department of Housing and Urban Development (HUD) requirement. However, in 2020, the City joined various Alameda County cities and Housing Authority agencies to complete a regional AI.

A year-long community engagement process for the 2020 to 2024 AI consisted of three meetings and a seven-page survey between June 2019 – November 2019. The survey was translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include racial and ethnic minorities, people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses. Key data from the 2020 to 2024 AI is used in the Assessment of Fair Housing in Appendix D: Affirmatively Furthering Fair Housing.

6.1 Public Participation Themes

Across discussion groups, workshops, and other community engagement events, several key themes emerged that informed development of this Housing Element Update's goals, policies, and actions. This list is not comprehensive, but the key themes listed below are reflected in the overarching goals identified in Chapter 4: Housing Action Plan. The goals, policies, and actions seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

- **Address Homelessness: "Housing is a Human Right."** A common refrain from participants was that Oakland should recognize housing as a human right and focus on addressing the homelessness crisis. As experts from the National Law Center on Homelessness and Poverty note, "a right to adequate housing is not a requirement that states build free housing for the entire population, rather, it devotes resources and protective measures to prevent homelessness, discrimination, and promote permanent stable housing."[12] Participants expressed distrust with the City and frustration with the current unaffordability of housing and ongoing displacement. They suggested a wide variety of strategies to house the unhoused community, including treating unhoused populations with dignity, stopping the current encampment management policy, more flexible building types, temporary units, permanent supportive housing, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including a moratorium on market rate housing to balance the speed at which housing is built with the need to ensure that new housing is high-quality, affordable, and habitable, partnering with community groups that work with unhoused communities, and creating housing options that include wrap-around services. The Housing Element incorporates this input in the following ways:
  - **Goals:** 1, 2, 3, 4
  - **Policies:** 1.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.7, 4.1, 4.2, 4.3
  - **Actions:** 1.1.1 through 1.1.13, 2.2.1 through 2.2.8, 3.1.1, 3.1.2, 3.3.1 through 3.3.7, 3.3.9, 3.3.11 through 3.3.15, 3.3.17, 3.3.18, 3.5.1 through 3.5.3, 3.6.1, 3.6.2, 3.6.5, 3.7.1, 3.7.2, 3.7.4, 3.7.6, 4.1.1 through 4.1.5, 4.2.1 through 4.2.5, 4.3.1 through 4.3.4
- **Protect Oakland Residents from Displacement and Preserve Existing Affordable Housing.** Over the last two decades, housing costs in Oakland have risen dramatically – meaning many Oakland residents cannot afford to buy or rent a home within their own

[12] https://www.kqed.org/news/11801176/what-would-housing-as-a-human-right-look-like-in-california

neighborhood. Participants expressed frustration with increasing displacement pressures while the stock of affordable housing throughout the city decreases, including both subsidized housing and "naturally occurring affordable housing" – or unsubsidized housing that is affordable at market prices. Participants also discussed how Oakland's cultural institutions and history are at risk of loss due to continuing gentrification. To mitigate the pressures of displacement and gentrification, Oakland residents suggested a number of potential anti-displacement strategies, including enhanced rent stabilization measures, stronger just cause for eviction protections, increased enforcement of anti-harassment tenant protections, and historic preservation programs to preserve cultural institutions. Participants also discussed ways to preserve the city's existing affordable housing stock, including the implementation of a Community/Tenant Opportunity to Purchase Act, innovative solutions to maintain permanent affordability like community land trusts, additional acquisition and conversion to affordable housing efforts, live/work preferences for Oakland residents, and programs to physically rehabilitate homes to allow long-time residents to enjoy new community amenities. Participants also pointed to a need for better data collection to ensure accountability and to better understand and target anti-displacement resources. The Housing Element incorporates this input as through the following goals, policies, and actions:

- **Goals:** 1, 2
- **Policies:** 1.1, 2.1, 2.2, 3.5
- **Actions:** 1.1.1 through 1.1.13, 2.1.1 through 2.1.6, 2.2.1 through 2.2.8, 3.3.12, 3.3.18, 3.5.1, 3.5.2, 3.5.4

- **Focus on Building more Housing Affordable to Extremely Low, Very Low, Low, and Moderate Incomes.** Producing new affordable and deeply affordable housing options was identified as a key strategy to prevent displacement. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to build more inclusive neighborhoods add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, inclusionary zoning, changing the zoning to increase density in primarily single-family areas like Rockridge, supporting homeowners in the construction of additional dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and reducing the amount of discretionary review required for new housing projects. Other recommendations included creating housing commission and neighborhood planning councils for ongoing resident leadership to decide the kind of housing development. The City of Oakland recognizes the need to increase housing supply generally, and, with priority given to increasing housing affordable to very-low-, low-, and moderate-income households in the following ways:

  - **Goals:** 3
  - **Policies:** 3.1 through 3.8
  - **Actions:** 3.1.1, 3.1.2, 3.2.1 through 3.2.5, 3.3.1 through 3.3.18, 3.4.1 through 3.4.10, 3.5.1 through 3.5.4, 3.6.1 through 3.6.5, 3.7.4 through 3.7.6

- **Address Housing Quality Issues.** Housing quality issues can have detrimental impacts on people's physical and mental health. Through neighborhood outreach processes, many Oaklanders described housing quality issues they were living with, such as overcrowding, unsafe building conditions, and lack of maintenance, caused by landlord neglect, lack of funds for upkeep or housing burden, or fear of reporting these issues. Community-recommended strategies to address these issues included programs/grants to landlords and homeowners to make repairs; universal design to allow all Oaklanders to remain in their homes as they age, or to help mobility-impaired residents; and tax credits or programs to address other housing habitability concerns, like indoor air quality. The Housing Element addresses housing quality issues in the following ways:
  - **Goals:** 2, 5
  - **Policies:** 2.1, 5.2
  - **Actions:** 2.1.1 through 2.1.6, 3.3.12, 5.2.1, 5.2.5
- **Keep Oakland Communities Together.** All Oakland neighborhoods are deserving of high-quality amenities, more affordable housing, and other public investments, especially in areas that have suffered from disinvestment of the past. However, **c**oncerns about gentrification and displacement associated with new investment were top of mind for many Oaklanders. Scores of people expressed how difficult it was to pay the rent in light of rising costs. People who have long generational roots in Oakland have been displaced but continue to come to Oakland to be with community and work. This includes a significant loss (30 percent) of Oakland's Black population from 2000 to 2019. As some community members noted, Oakland neighborhoods are like villages where people care for and nurture each other, and displacement means these villages are fragmented, and culture is lost. Oaklanders recommended creative ways to bring back displaced people as homeowners, such as support for co-ops, land trusts, and shared multi-unit buildings. Other creative ways to prevent displacement include creation of cultural district/anti- displacement zones, a human health/socioeconomic impacts analysis to analyze displacement and homeless impacts of market rate projects before the City provides permits or zoning changes. Another way they saw keeping Oakland communities together was through investment to the most impacted communities via municipal reparation to redress Oakland's history of eminent domain and urban renewal and for Black Americans who are descendants of chattel slavery. The Housing Element addresses displacement and cultural preservation in the following ways:

  - **Goals:** 1, 2, 5
  - **Policies:** 1.1, 2.2, 3.5, 5.1, 5.3
  - **Actions:** 1.1.1 through 1.1.13, 2.1.4, 2.2.1 through 2.2.8, 3.2.2, 3.3.8, 3.3.12, 3.3.18, 3.5.1 through 3.5.4, 5.1.1 through 5.1.3, 5.3.1 through 5.3.3

- **Building in Accountability and Success Metrics.** Oaklanders desire more transparency around housing issues and actions in the City, and to be heard by elected officials and City departments stressing the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals. The Housing Elements aims to increase transparency and accountability in the following ways:
  - **Goals:** 1 through 5
  - **Policies:** 1.1, 2.1, 3.2, 3.3, 3.7, 4.1, 4.2, 4.3, 5.1, 5.2
  - **Actions:** 1.1.7, 1.1.8, 2.1.3, 3.2.5, 3.3.17, 3.3.13, 3.7.1, 4.1.2, 4.2.4, 4.3.1, 5.1.1, 5.1.2, 5.1.3 5.2.9

This page intentionally left blank.

7 Summary of the Housing Sites Inventory

The housing element of the general plan must include an inventory of land suitable and available for residential development to meet the city's regional housing need allocation by income level. This inventory is known as the Housing Sites Inventory ("Inventory"). This chapter provides a summary of the full Sites Inventory, available in Appendix C.

7.1 Regional Housing Needs Allocation

As required by State housing law, all California cities, towns and counties must plan for the housing needs of all their residents, at various income levels. This number is called the Regional Housing Needs Allocation (RHNA). For the planning period 2023 to 2031 (also known as the 6th housing cycle), Oakland must plan for 26,251 new units, a nearly 77.8 percent increase from the prior cycle's allocation of 14,765 new units. Table 3-1 shows the income breakdown of the RHNA with an additional buffer, as recommended by the State, to account for any loss due to reductions in density.

Table 3-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need, pursuant to Government Code Section 65583(a). Although extremely-low-income housing need is not explicitly projected in the RHNA, this group often requires the most subsidy and assistance to generate a sufficient number of housing units.

Source: ABAG, Final RHNA Plan, December 2021

7.2 Capacity to Accommodate the RHNA

Government Code Section 65583.2(c) requires that local jurisdictions determine their realistic capacity for new housing growth by means of a parcel-level analysis of land resources with the potential to accommodate residential uses. The analysis of potential to accommodate new housing growth considered physical and regulatory

constraints, including: lot area and configuration, environmental factors (e.g. slope, sensitive habitat, flood risk), allowable density, and other development standards such as parking requirements and building height limits.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will also occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Sites included in the inventory reflect those that are most likely to develop during the planning period and meet the RHNA; as the development potential of sites newly made available by one of these rezoning efforts is difficult to project, these new sites are not considered as part of this inventory.

The Inventory identifies sufficiently zoned land to accommodate the RHNA at all income levels. The inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units, or ADUs); and

- Opportunity sites where additional development could occur. This includes 1) potential development projects, where projects may be in pre-approval; sites from the previous RHNA cycle that remain available for development; and new opportunity sites, which includes both vacant and non-vacant sites and consists of City-owned sites, sites owned by Bay Area Rapid Transit (BART), sites located within a specific plan area, and other sites with expressed or potential development interest.

The analysis of nonvacant properties included only those properties with realistic potential for additional development or "recycling", in light of 1) existing uses on the site; 2) prevailing market conditions; 3) recent development trends; 4) expressed interests in housing development from property owners or developers; and 5) regulatory and/or other incentives to encourage recycling or intensification of existing development.

A summary of capacity by housing units to meet the RHNA is provided in Table 3-2, below. The complete 2023-2031 Inventory is provided in Table C25 of Appendix C, and can be seen in Figure 3-1 below.

Table 3-2: Summary of Residential Capacity to Accommodate the 2023-2031 RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income[1]*	*Moderate-Income*	*Above-Moderate-Income*	***Total***
Total Credits	2,183	2,388	364	9,718	**14,653**
Pipeline Projects	*1,213*	*1,498*	*166*	*9,716*	***12,593***
Projected ADUs	*890*	*890*	*198*	*0*	***1,978***
Adequate Sites Alternative	*80*	*0*	*0*	*2*	***82***
Potential Development Projects	386	1,354	211	6,525	**8,476**
Vacant	*225*	*846*	*27*	*1,832*	***2,930***
Non-Vacant	*161*	*508*	*184*	*4,693*	***5,546***
Available 5th Cycle RHNA		714	4,029	688	688
Vacant		*23*	*566*	*3*	***592***
Non-Vacant		*691*	*3,463*	*685*	***4,839***
New Opportunity Sites		5,425	1,134	2,120	**8,679**
Vacant		*142*	*200*	*0*	***342***
Non-Vacant		*5,283*	*934*	*2,120*	***8,337***
Total Capacity		**12,450**	**5,738**	**19,051**	**37,239**
6th Cycle RHNA		**10,261**	**4,457**	**11,533**	**26,251**
RHNA + 15% Buffer		***11,801***	***5,126***	***13,263***	***30,189***
Surplus Over RHNA		**2,189**	**1,281**	**7,518**	**10,988**
		(121.3%)	**(128.7%)**	**(165.2%)**	**(141.9%)**

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).
2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 units.

Credits towards the RHNA

HCD Guidance provides that the RHNA can be accommodated by looking at 1) projects that are currently in the development pipeline; and 2) by considering alternative means of meeting the RHNA, such as projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households.

Pipeline Projects

Pipeline projects are projects that have been approved, permitted, or will receive a Certificate of Occupancy during the projection period (June 30, 2022, to December 15, 2030) and can be credited toward the 6th cycle RHNA. Using data from the City's Accela permitting system, 336 pipeline projects with 12,593 units are spread across the city, with the majority in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. Based on the affordability levels or projected rents specified on the project proposal, approximately 21.5 percent of pipeline capacity is affordable for lower-income households, while 1.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. All pipeline projects are shown in Table C-4, Table C-5, and Table C-6, and shown in Figure C-2 in Appendix C.

Projected ADUs

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet the RHNA using past building permit approval patterns since 2018. From 2018 to 2021, approximately 247 permits were issued annually. Using a conservative estimate, the City anticipates approximately 1,978 ADUs, or approximately 247 average permits per year times eight years.) Annual ADU approvals are shown in Table C-7 in Appendix C. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[13] Projected ADU capacity by affordability level is shown in Appendix, Table C-8.

Adequate Alternative Sites

According to HCD, under "limited circumstances" a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[14] Limited circumstances refer to sites that are substantially rehabilitated; located on a foreclosed property or in a multifamily complex of three or more units converted from non-affordable to affordable rental; preserved at levels affordable to low- or very-low-income households with committed assistance; or preservation of mobile home parks through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units

[13] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

[14] More specific conditions that sites included under this option must meet are provided by HCD on their website: https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/adequate-sites-alternative.shtml

that the City will convert and/or preserve during the 2023-2031 planning period. The affordability of these projects reflects the actual affordability levels pursuant to the regulatory agreements that will maintain such income-restricted units. These sites and their capacity are shown in Appendix C, Table C-9.

8 Opportunity Sites

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop. These include both vacant and underutilized land in potential development projects, available 5th Cycle RHNA sites, and new opportunity sites identified as part of this cycle.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process, including those in the pre-application stage and those with filed and under review planning permits. Such projects are considered likely to develop. These sites are shown in Appendix C, Table C-14.

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous housing element cycles must be zoned at residential densities of at least 30 dwelling units per acre (du/ac) and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households. The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous housing element cycles. Specific sites carried over from prior housing cycles are described in more detail in Appendix C, Table C-15.

New Opportunity Sites

New opportunity sites not included in previous housing element cycles were identified to meet the remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed or potential development interest, including interest determined as part of a community mapping exercise. These sites can be found in Appendix C, Table C-16.

9 Site Selection and Capacity

As part of site analysis, a Housing Element also must demonstrate the projected residential development capacity of sites identified that can realistically be achieved. Creation of realistic assumptions involved survey of recently constructed and approved projects by base zone, density, and height; likelihood of residential conversion and infill development rates; and development capacity modifiers such as existing use on a site, and

potential development incentives like low assessed value (AV) ratio (when the value of the land is greater than the existing structure) and low floor area ratio (when a building only takes up a small part of a lot.)

To identify adequate sites and determine realistic capacity, a parcel-based analysis was conducted in accordance with the State site requirements for very-low and low-income sites. Sites that were excluded include non-residential projects already in development; sites without much incentive to redevelop; sites that were environmentally constrained by high fire risk, near fault lines, or within a 100-year flood plain; and sites with known contamination. In addition to these considerations, sites that are sought to be designated as capable of accommodating lower-income housing must meet the State-defined standard of 30 du/ac, known as the "default density", and they must be between 0.5 and 10 acres. A robust description of the methodology and full table of realistic capacity is provided in Appendix C.

9.1 Assessing Housing Sites Through a Fair Housing Lens

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in environmental justice communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against Affirmatively Furthering Fair Housing (AFFH) criteria, the Housing Element is an important step in achieving an equitable future in Oakland.

As described in Appendix D, the site identification requirement in the context of affirmatively furthering fair housing involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity.[15] Furthermore, this analysis will determine whether programs must be adopted to "make sites available" with appropriate zoning, development standards, and infrastructure capacity to accommodate the new development need.

Chart 3-1 summarizes the development process of the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. Sites were selected in a manner to further and prioritize investment in historically disadvantaged communities, to decrease displacement pressures, and to increase access to existing higher resourced neighborhoods.[16] More information on each of the steps to identify additional sites for lower-income housing is available in Appendix C.

[15] Gov. Code, § 8890.50. subd. (b).

[16] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

Chart 3-1: Housing Sites Inventory Development Process

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in lower-income neighborhoods and Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). In parallel with housing development, the City must invest in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—including investments in equitable access to transit, public facilities, food access, and other amenities.

The State and California Fair Housing Task Force use a series of Opportunity maps developed by the Tax Credit Allocation Committee (TCAC) and HCD to define areas of low to high opportunity using a set methodology. These maps, described more fully in Appendix D, indicate that a significant portion of Oakland is considered low resource or high segregation and poverty. As a result, while the RHNA is met for each income category based on pre-established housing sites in the Inventory, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. Many of these areas are, in fact, in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines and are suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource.

Most residential capacity at all income levels is located in the low resource and high segregation and poverty areas, largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation

and poverty per TCAC's Opportunity Scores. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards and fire risks, limited densities reflected in recent development patterns, and active pipeline projects. About 70.1 percent of Oakland's highest resource areas are within a very high fire hazard severity zone, as are about 25.7 percent of the city's high resource areas. Flooding also represents a risk in these areas (.6 percent in highest resource; 6.8 percent in high resource), as do earthquake fault zones (5.0 percent in highest resource; 2.2 percent in high resource) – see Appendix C for additional information. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, they will further increase the proportion of lower-income housing available in these neighborhoods. The location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure 3-2 below.

Figure 3-2: Housing Sites Access to Opportunity, 2022

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority to ensure that the City meets its requirements to affirmatively further fair housing. Therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in higher resource neighborhoods beyond the preliminary sites inventory – which already met the RHNA in each income category. As discussed in Appendix C, the preliminary sites inventory consisted of active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites without known environmental constraints and near amenities like transit. To identify supplemental sites, the City started with the entire universe of parcels in Oakland, and filtered out sites based on objective physical constraints and opportunity metrics. More information on these constraints and metrics can be found in Appendix C.

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[17] After completing this exercise, an additional 70 potential sites were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 15 parcels sites were identified as supplemental sites that would further AFFH objectives. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization, local knowledge of the sites, and aerial images of the current state of the property. Figure C-7 in Appendix C maps the locations of these supplemental "AFFH sites."

An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.

These actions, as outlined in the Housing Action Plan (Chapter 4) will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the difficultly associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting

[17] A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

strong tenant protections and anti-displacement strategies to ensure that the same market forces that promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call that neighborhood home.

1 Housing Action Plan

4.1 Goals, Policies, and Actions

This chapter includes the City of Oakland's goals, policies, and actions critical to respond to increasing housing pressures in Oakland. First, this Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The five goals are:

1. Protect Oakland Residents from Displacement and Prevent Homelessness
2. Preserve and Improve Existing Housing Stock
3. Expand Affordable Housing Opportunities
4. Address Homelessness and Expand Resources for the Unhoused
5. Promote Neighborhood Stability and Health

While these five goals provide an overall framework for addressing the multifaceted housing crisis, the policies and actions specify the means for implementing those goals. Actions include both programs currently in operation as well as new actions needed to address the city's housing needs.

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The San Francisco Bay Area is decades into an extreme housing crisis, and Oakland is at the center of that crisis. Housing production, and particularly affordable housing production, has not kept pace with the region's economic growth. Because Oakland's rental and housing market has traditionally been less expensive than other Bay Area cities, Oakland residents experience disproportionately high displacement pressure. As a result, many Oakland residents cannot afford to buy or rent a home within their own

neighborhood.[18] As households displaced from more expensive Bay Area communities search for more affordable housing options in Oakland and higher-income households continue to move into the city, Oakland's existing residents continue to bear the brunt of the Bay Area's housing crisis.[19] Community investment, including building new housing, is crucial for all Oakland neighborhoods to prevent displacement.[20] With demand outpacing the limited housing supply, competition for finite units and the resulting rising rents may create displacement pressure on low-income residents. Research by the Changing Cities Research Lab at Stanford University and the Federal Reserve Bank of San Francisco on credit score data shows that lower income residents who move from historically Black neighborhoods tend to move to neighborhoods with lower housing values and health scores, suggesting movement under constrained circumstances; over time, fewer of these low-income movers stayed within Oakland or moved into Oakland as affordable options declined.[21] Rising rents are a factor in increasing rates of homelessness. According to a 2019 survey, 11 percent of unsheltered Oakland residents report that rent increases were a primary cause of homelessness, in addition to job loss (13 percent) and other money issues (10 percent).[22]

Oakland is committed to enabling renters and owners to stay in their homes and communities, eliminating all involuntary moves out of the city. Goals and policies that are part of a comprehensive protection strategy are designed to prevent displacement and homelessness, and to ensure that low-income renters and homeowners have supports they need to stay in their homes and communities as increased neighborhood investment occurs.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

To meet the City's equity goals and mandate to affirmatively further fair housing, this goal—including the policies and actions contained within—will advance the City's commitment to reducing racial and economic disparities across Oakland. This goal seeks to protect from displacement pressures and prevent homelessness, both of which disproportionately impact Black, Indigenous, and People of Color (BIPOC) communities throughout Oakland. For instance, enhanced tenant protections will crack down on tenant-based racial discrimination in the housing market. This will be particularly important as the

eviction moratorium established during the COVID-19 pandemic eventually comes to an end, and further pressure is exerted on the residential rental market.

Rent stabilization and just cause protections also ensure that as more amenities are added to a neighborhood (and it becomes higher resource), the existing diverse residents are able to stay. Residents of historically disinvested neighborhoods should be able to remain in their homes and enjoy the results of improved amenities and increased services. In the long-term, this will enhance access to opportunity for historically marginalized and disadvantaged communities. Further, by pursuing live/work preferences for Oakland residents and taking actions to assist tenants at risk of eviction, Oakland helps tenants avoid displacement or concentration in disadvantaged neighborhoods.

Through more robust data collection efforts, the City will also be able to better identify and correct barriers to opportunity. These efforts include the creation of a rental registry and other displacement measure tracking. More accurate data will also ensure that the City is able to better target its existing and future housing resources to generate the maximum impact.

Policy 1.1. Tenant Protections and Anti-Displacement

Action 1.1.1: Continue to Implement the Rent Adjustment Program (RAP).

The RAP limits rent increases on units covered by the Rent Adjustment Ordinance (Chapter 8.22 of the Oakland Municipal Code) based on a formula tied to increases in the Consumer Price Index. These provisions were further strengthened in 2017. The City will continue to implement the RAP and enforce the Rent Adjustment Ordinance. The City also enforces AB 1482 rent increase caps and just provisions for certain units not covered by the City's ordinances.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: Ongoing, 2023-2031

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.2: Enforce Just Cause for Eviction measures.

Just Cause for Evictions protections are enforced as part of the RAP, and are contained within Chapter 8.22, Article II of the Oakland Municipal Code. The City will continue to enforce just cause measures and will expand tenant protections as feasible—including clarifying and limiting the definition of nuisance or other just cause evictions.

Responsible Party: *Oakland Planning & Building Department; Oakland Public Works Department; Oakland Department of Housing and Community Development; Oakland Department of Transportation*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.3: Strengthen Ellis Act Ordinance protections.

The Ellis Act is statewide law that permits property owners to terminate tenancy when withdrawing residential units from the rental market. Although the City cannot prohibit Ellis Act evictions, it has adopted the Ellis Act Ordinance (Chapter 8.22, Article III of the Oakland Municipal Code) to set specific requirements that must be followed when removing a property to discourage violations of the Act and prevent the displacement of renters. The City will continue to enforce the Ordinance and strengthen renter protections—including proactive enforcement of eviction protections—in case of an Ellis Act eviction where feasible. The City will also join neighboring Bay Area cities to advocate for statewide reform to the Ellis Act to stabilize rental housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.4: Implement and expand tenant relocation measures.

On January 16, 2018, the City of Oakland passed the Uniform Residential Tenant Relocation Ordinance (Ord. No. 13468) to establish a uniform schedule of relocation payments which are now extended to tenants evicted when the owner or qualifying relative moves in and for other "no tenant fault" evictions. The Uniform Relocation Ordinance (Ordinance) requires owners to provide relocation payments to tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act activity, and condominium conversions. The City will continue to implement and enforce the Ordinance, adjusting base payments for inflation annually on July 1st. Additional relocation payments shall be required for tenant households in rental units that include lower-income, elderly or disabled tenants, and/or minor children.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.5: Provide eviction defense and implement a right to counseling.

The City will explore the feasibility of implementing a tenant right to counsel, where all tenants who receive an eviction notice or have been served with an unlawful detainer lawsuit have right to free legal representation. This may include partnering with nonprofit organizations to provide those services.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Private donations or other local, State or federal sources as available*

Timeframe: *Ongoing, 2023- 2031*

Objective: *As funding permits, all tenants facing eviction will be provided with counsel to represent them during eviction proceedings.*

Action 1.1.6: Expand rent control in a limited manner to maintain affordability.

Rent control measures are outlined in Oakland's Rent Adjustment Ordinance and enforced through the RAP. Units are covered by the Rent Adjustment Ordinance if they are within a building built prior to 1983 and there are two or more units in the building. The City will consider a limited expansion of the number of units subject to rent control to maintain affordability.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *To the extent permitted by State law, Oakland will expand renter protections.*

Action 1.1.7: Monitor neighborhood displacement risk factors.

As the effects of the COVID-19 pandemic continue to unfold and eviction moratoriums lift, there is an urgent need to monitor displacement pressures. The City will regularly monitor displacement risk factors—including rising housing costs, rapid demographic changes, neighborhood instability, and trends in out- and in-migration across neighborhoods in Oakland—to understand local displacement

risk. This data will be used to better target anti-displacement programs and prioritize neighborhoods with a high risk of displacement. This data will also be used to better understand the causes of displacement and help tailor City programs to meet existing housing needs. The City will carry out the bi-annual Resident Mini Pulse Survey on the state of housing security as part of these monitoring efforts.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *The City of Oakland will include displacement-related statistics in a broader housing or community dashboard available on the City website.*

Action 1.1.8: Create and maintain a rental housing registry.

A rental housing registry is a database of all rental units within Oakland and would be used to track properties subject to rent control provisions, Just Cause for Eviction measures, and other property-specific policies and requirements. RAP staff have been studying the effectiveness of a rental housing registry in Oakland and plan to present initial findings to City Council during the summer of 2022. The City could use data collected in the rental housing registry to monitor and understand neighborhood change at a more granular level, to better target anti-displacement policies, and ensure that rent increases are compatible with tenant protection law.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *By 2023, the City will design and implement a rental housing registry.*

Action 1.1.9: Continue and expand the Tenant Protection Ordinance (TPO).

The TPO (Chapter 8.22, Article V of the Oakland Municipal Code) is meant to deter harassment by property owners and provide tenants legal recourse if they are harassed by the property owner. The TPO provides civil remedies for violations and implements tenant anti-harassment actions. The City will continue to enforce the TPO and expand anti-harassment protections, including tenant protections in ADUs.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.10: Enforce the tenant right to return.

Currently, through the Tenant Move Out Agreement Ordinance, Oakland renters have the right to return to their rental unit after certain no-fault evictions, such as code compliance evictions after the repairs are completed or Ellis Act evictions if the units are re-rented. Further, State law (SB 330) requires that property developers provide the right to return for low-income renters when a property is demolished and redeveloped, and that the charged rent must be affordable. The City will increase awareness of State and local requirements and will enforce affordability requirements in new development projects. Further, pursuant to Action 2.2.5 the City will extend this right beyond the sunset date of SB 330.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.11: Provide a local preference in affordable housing projects.

The City will continue to implement a preference for Oaklanders who have been displaced, neighborhood residents, Oakland residents and Oakland workers in the selection of tenants or homebuyers for affordable housing projects and programs assisted by City housing Notice of Funding Availability (NOFA) funds.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *The City will continue to provide Oakland residents and workers a preference for City-funded affordable housing to the extent allowed by law and the constraints of other involved funding sources.*

Action 1.1.12: Negotiate for appropriate community benefits during development

agreement approvals for major entitlements and use of City land.

While negotiating development agreements with developers for large scale market-rate and non-residential projects on City land or development agreements requiring complex, multi-phase entitlements, the City will advocate for appropriate community benefits to mitigate any displacement pressures that result from the development. This may include increased levels of required affordable housing units. The City will consult with community-based organizations and residents impacted by developments to evaluate the extent of community benefits required to properly mitigate displacement impacts.

Responsible Party: *Oakland Planning & Building Department, Oakland Department of Housing and Community Development*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly reduce displacement pressures through negotiating appropriate community benefits during the development agreements process.*

Action 1.1.13: Prevent Oakland residents from becoming homeless/Fewer people become homeless.

Keep Oakland Housed (a public-private partnership), the federally funded Emergency Rental Assistance Program (ERAP), and Lifelong Medical Care Services that help renters from becoming homeless through rental assistance, legal advice, housing counseling, and case management.

The City will continue to support and align City, Alameda County, and private partners (such as community-based and faith-based organizations that have roots in communities whose members are disproportionately at risk of homelessness) to strengthen their capacity to prevent displacement and respond effectively when people are experiencing a housing crisis, as well as expanding these types of programs and designing new ones that identify, assist, and prioritize funding for those who are most at risk of becoming homeless. In addition, the City will continue to make information about tenant protection, anti-displacement, rental assistance, and homelessness services available on the City's website and at City facilities and strive to improve public awareness of these programs. These efforts are especially key in the wake of the COVID-19 crisis and the eventual end of the eviction moratorium. Additional tenant protection actions are included in Actions 1.1.1-1.1.10.

Responsible Party: *Oakland Human Services Department; Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: *Ongoing, 2023-2031*

Objective: *100% of available rent relief and eviction prevention funds are spent according to funder guidelines.*

Goal 2. Preserve and Improve Existing Affordable Housing Stock

Oakland's existing affordable housing stock is an important resource for the city's lower- and moderate-income population. Housing preservation means retaining existing built affordable housing and extending its affordability for current and future tenants. Preventing the loss of valuable existing affordable units is a cost-effective way of maintaining this resource as well as keeping existing residents who may be more vulnerable to increasing cost pressures in their homes.

Preservation, improvement, and maintenance also have health and equity co-benefits—addressing housing habitability issues can help to narrow inequitable racial and ethnic gaps in substandard housing conditions and reduce the burden of maintenance challenges for lower-income homeowners. This goal includes policies and actions that conserve and improve existing housing stock.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

This goal sets forth several policies and actions that will advance fair housing in Oakland. Actions that physically rehabilitate housing units and make other safety improvements to the existing housing stock reduce displacement and ensure longtime residents are able to enjoy new community amenities. This physical rehabilitation also improves the environmental determinants of health, thereby advancing the City's Environmental Justice goals. Further, as discussed in Appendices B and D, BIPOC residents of Oakland are disproportionately impacted by substandard housing issues. Actions contained within this goal will reduce the prevalence of these substandard housing issues citywide. Universal design strategies will also increase housing access for seniors and people with disabilities.

Further, actions that preserve the affordability of existing homes also play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the gentrification of their neighborhoods. These actions include range from resale controls to demolition and conversion protections. A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability of benefits of

homeownership. Historic preservation actions also preserve cultural institutions and history that would otherwise be at risk of loss due to gentrification.

Policy 2.1 Existing Housing Stock Improvement

Action 2.1.1: Support home rehabilitation programs.

The City will continue to provide housing rehabilitation assistance to very low- and low-income homeowners and homeowners with special housing needs to address code violations, repair to major building systems in danger of failure, abatement of lead-based paint hazards, minor home repairs for seniors, and emergency repairs:

- Home Maintenance & Improvement Program (HMIP) Deferred Loan Program
- Emergency Home Repair Program Loan Program
- Weatherization and Energy Retrofit Loan Program
- Alameda County Minor Home Repair Grant Program
- Lead Hazard Control and Paint Program
- Neighborhood Housing Rehabilitation Program
- Access Improvement Program

The City will engage local partners and fair housing experts to help promote awareness of, and broad participation in these programs. The City will continue to implement, annually review, and revise, as needed, program guidelines for housing rehabilitation assistance. The City will target resources, as possible, to expand opportunities throughout the community, including in lower-income and lower resource areas, and will strive to build community capacity and technical know-how by connecting homeowners with local labor to carry out home rehabilitation projects. This assistance will be particularly targeted to neighborhoods experiencing or at severe risk of displacement and gentrification. The City will also commit to explore additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's programs.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding is available, the City of Oakland will continue to fund and operate home rehabilitation programs. At current funding trends, this will allow for approximately 80 rehabilitation projects each year.*

Action 2.1.2: Promote healthy homes and lead-safe housing.

The City will continue implementation of the Lead-Safe Homes Program to assist low- and moderate-income homeowners with lead paint identification and remediation, prioritizing resources for disadvantaged communities with high rates of asthma. The City will also continue to partner with the Alameda County Community Development Agency's Healthy Homes Department to provide education, lead-safety skills training, and on-site consultations for Oakland property owners and conduct lead poisoning prevention and asthma trigger interventions for Oakland residents. In accordance with Oakland's Equitable Climate Action Plan 2030, transition away from natural gas appliances, which has been proven to increase development of asthma in children by 24 percent.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding becomes available, the City of Oakland will implement programs to reduce health hazards from lead and natural gas appliances.*

Action 2.1.3: Conduct proactive rental inspections.

The City will develop a proactive, data-driven housing inspection program to track code compliance, with focus on safety, and housing quality among the City's rental stock. The City will work with community partners to develop appropriate enforcement mechanisms, including tenant protection and anti-displacement mechanisms to ensure tenants are not displaced as a result of proactive inspections turning up housing habitability issues and/or raising rents due to the cost of fixing habitability issues. Further, the City will prioritize inspections in areas with older housing stock and health disparities and seek funding to streamline the inspection/rehabilitation process by connecting property-owners to technical and financial assistance for safety and accessibility improvements at the time of inspection.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2023-2025*

Objective: *The City will develop a proactive rental inspections program to significantly improve housing safety and quality and address housing needs, particularly in areas with older housing stock and communities experiencing health disparities.*

Action 2.1.4: Support historic preservation and rehabilitation.

The City will support the preservation and rehabilitation of both the existing historic housing stock and adaptively reused non-residential structures through a variety of strategies, including continued implementation of Mills Act Contracts and the Oakland Community Buying Program. The City will support the preservation of historic, archaeological, and tribal cultural resources and their incorporation into project site planning where feasible. As described in Action 3.2.4, the City will also promote adaptive reuse to promote historic preservation.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to implement the Mills Act and the Oakland Community Buying Program to support to help support historic preservation.*

Action 2.1.5: Implement universal design strategies.

The City will initiate community engagement to understand the need for universal design strategies, including with seniors, people experiencing disabilities, and community-based organizations with insight and experience with accessibility issues. The City will consider the adoption of a Universal Design Ordinance, which would help close loopholes, ensure good faith compliance of ADA provisions, ensure that accommodations are built into new developments, and allow Oaklanders to age in place.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2025-2027*

Objective: *The City will consider adopting a Universal Design Ordinance to address housing needs and improve housing conditions for seniors, people experiencing disabilities, and other communities with accessibility issues.*

Action 2.1.6: Explore funding for improved indoor air quality.

The City will explore State and federal funding sources to provide financial assistance to property owners and very low- and low-income homeowners to offset some of the cost of investing in better ventilation and air filtration systems (e.g., MERV filter systems) to improve indoor air quality in existing single- and multifamily residential units, with a priority for homes in high air pollution areas such as near freeways.

Responsible Party: *Oakland Public Works Department, Environmental Services Division*

Potential Funding Source: *State and Federal Environmental Health Agencies*

Timeline: *Ongoing, 2023-2031*

Objective: *Significantly improve indoor air quality and address housing need in existing single- and multifamily residential buildings.*

Policy 2.2 Preserve the Affordability of Existing Homes

Action 2.2.1: Continue to implement resale controls on assisted housing.

The City will continue to use financing agreements for both City-assisted ownership and rental development projects to ensure that units remain permanently affordable through covenants running with the land.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *100% of City-assisted homeownership and rental units will have their affordability covenants effectively enforced.*

Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.

The City will proactively monitor and enforce affordable housing covenants, and will conduct outreach to the owners of assisted units that are at risk of conversion to market-rate housing. The City will prioritize the preservation of units at some level of risk of converting in the next 10 years by actively working with and encouraging the owners of those properties to extend their covenants.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *As funding becomes available, deed-restricted affordable housing units at risk of losing their affordability will be protected from a loss of affordability protections.*

Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.

Residential hotels, also referred to as single-room occupancy (SRO) units, provide an important source of deeply affordable housing in City. As such, Oakland has enacted regulations to limit the demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units. The City has recently amended these regulations (Chapter 17.153 of the Oakland Planning Code) to strengthen protections for residential hotels and will continue to enforce these protections to preserve their affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce Single-Room Occupancy (SRO) regulations to preserve affordability and meet housing need.*

Action 2.2.4: Limit condominium conversions.

The conversion of rental housing to condominiums provides a risk to the affordability of Oakland's housing stock. The City recently amended its condominium conversion regulations to require replacement rental housing for the conversion of two or more housing units, to remove the provision allowing the generation of conversion rights when the units are offered as rental units for seven or more years, to acknowledge the applicability of the Oakland Just Cause for Eviction Ordinance and the

Oakland Rent Adjustment Ordinance, and to afford greater rights and protections to existing tenants. The City will strictly enforce these recently adopted regulations to preserve Oakland's rental housing supply.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce condominium conversion regulations to preserve rental housing supply and prevent displacement.*

Action 2.2.5: Extend local replacement unit provisions.

State law (SB 330) mandates that "protected units" are replaced with comparably affordable units when a residential building is demolished and redeveloped. The City will codify and extend replacement provisions pursuant to State law beyond the established sunset date. Further, the City will engage in strict monitoring and enforcement of the law to ensure replacement units are provided. This will include active outreach to developers to ensure they are aware of and comply with replacement unit provisions. The City will require that any demolition proposals include sufficient relocation assistance and right to return to the new replacement units.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Codify and extend local replacement unit provisions to ensure compliance and prevent displacement.*

Action 2.2.6: Reduce housing speculation.

Housing speculation can cause housing costs to increase, leading to higher rates of displacement and increased exclusivity in higher resource neighborhoods. To curb the negative effects of speculation, the City will consider implementing an anti-speculation tax, which would apply a fee when a property is sold shortly after purchase. The City will conduct a market study to understand the potential impacts of such a tax and its appropriateness within Oakland. As discussed in Action 2.2.8, the City will also explore a possible Tenant Opportunity to Purchase/Community Opportunity to Purchase Act.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Plan Fund for the study; self-funding, if implemented*

Timeframe: *2026*

Objectives: *Study and consider implementing an anti-speculation tax to prevent displacement.*

Action 2.2.7: Provide additional subsidy for residential hotels.

The City will consider allowing owners of residential hotels that agree to restrict occupancy to lower-income residents to transfer development rights to create an endowed source of funding for an internal subsidy for such residents, or for maintenance/facility upgrades that do not increase rents.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2025-2027*

Objectives: *Preserve SROs and meet housing need.*

Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.

A Tenant/Community Opportunity to Purchase Act, referred to as TOPA/COPA, gives tenants and nonprofit organizations the opportunity to purchase their home when it goes up for sale, thereby preserving that housing unit as affordable. TOPA/COPA policies are under development in multiple Bay Area cities, including Oakland and the neighboring City of Berkeley. The City will study the effectiveness of a TOPA/COPA model suited to local conditions, which may include targeted TOPA/COPA in certain neighborhoods, equity-building mechanisms, racial equity impact considerations, or other approaches that may be appropriate to Oakland.

Responsible Agency: *City Council; Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Investigate and, if applicable, implement a TOPA/COPA policy (if appropriate) by 2024-2025*

Objective: *Oakland will study, and if appropriate implement, a TOPA/COPA policy by 2025.*

Goal 3. Expand Affordable Housing Opportunities

General production of housing is one of the most important strategies in addressing Oakland's housing crisis. Thoughtfully adding housing at every level can help reduce market competition for existing homes, a primary driver in displacement and homelessness. What the community needs most, however, is a concerted effort to increase production of homes that are affordable to very-low-, low-, and moderate-income households. In particular, Oakland needs more deeply affordable housing, particularly housing affordable to extremely-low-income residents, and housing that remains permanently affordable. One of the key objectives in producing more housing is overcoming patterns of discrimination and opening up neighborhoods that have historically been exclusionary to communities of color and low-income residents, while simultaneously refocusing resources and protections in historically disinvested neighborhoods (see Policy 2.2).

During the previous RHNA cycle, the City permitted more above-moderate-income housing than required by the RHNA. However, it fell short of meeting its lower- and moderate-income need, which has nearly doubled during the current 6th cycle RHNA. The shortfall is largely due to market constraints such as the cost of land, building materials and construction labor, as well as a lack of funding for affordable housing development. Other constraints are discussed in Appendix C. To meet the increased need for affordable housing, the City will identify new funding sources, expand existing programs and introduce new strategies to further incentivize high quality and abundant affordable housing development.

Like other Bay Area cities, one of the major challenges to developing permanent affordable housing in Oakland is the extremely high cost of development, especially the cost of land, labor, and materials. As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability.

Oakland also has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, can often provide significant opportunities for residential development. Further, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units.

Although housing is largely provided by the private and nonprofit sectors, the City has one major tool to influence development patterns and increase housing development of affordable housing and allow for other housing types: the Planning Code. To ensure that the Planning Code is responsive to housing policies and programs, the City will need specific zoning amendments that meet Oakland's changing needs and remove identified constraints to residential development. The suite of amendments the City will undertake range from short- to long-term solutions, some of which will be carried out alongside the update of the Housing Element and others as part of the comprehensive update to the City's General Plan that includes the Land Use and Transportation Element and will continue through 2025 after the Housing Element adoption.

The length and cost of the permitting process—which are ultimately reflected in a unit's selling price—are also generally within the City's control. An onerous and lengthy review process can be one of the most significant barriers to housing construction because some developers may decide that the cost of project review and its potential delays simply overcomes the revenue of new housing, particularly in the case of projects that may be only marginally financially feasible and/or profitable. Recognizing that long permitting processes are a statewide issue, a slate of new legislation, including SB 35, SB 330, AB 2162, and SB 1483, has introduced new requirements that are intended to facilitate the production of affordable housing through a streamlined residential permitting process.

The City of Oakland currently operates both an online permit center and an in-person "one-stop" permit center with counter services staffed by the Departments of Planning and Building, Fire, and Transportation. However, there are opportunities to better steward small nonprofit and BIPOC developers, homeowners looking to add additional units, affordable housing developers, and other community partners through the residential development process.

This goal will encourage the production of affordable housing and guide development of a more diverse range of housing choices for households of all types, incomes, and special needs; and promote changes to City tools like permitting processes and the zoning code to make it easier and faster to build affordable housing.

How this Goal affirmatively furthers fair housing

Though Oakland is one of California's most diverse cities overall, there is significant racial segregation between the city's neighborhoods. As a result of past practices such as mortgage redlining, disinvestment in neighborhoods of color, racially restrictive covenants on housing development, exclusionary zoning, destructive urban renewal, highway development and predatory lending in neighborhoods of color, many of Oakland's BIPOC residents live in neighborhoods that lack access to quality amenities or upward mobility. As higher income people move to Oakland, low-income neighborhoods of color are also more susceptible to gentrification and continue to bear the burden of the city's increased housing supply. In contrast, some high-resource areas remain disproportionately white in their racial composition

because they are zoned primarily for single-family homes, and the exclusion of lower cost housing types prevents BIPOC and lower-income families from moving to these neighborhoods. See Appendices B and D for additional detail on these patterns of segregation. The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive.

During the outreach process, many community members expressed desire to see Oakland be more inclusive and retain and strengthen its diversity with a wider array of housing choices, such as duplexes, fourplexes, cottage courts, and garden apartments throughout the city. These smaller, "missing middle" housing types[23] tend to be more affordable by design—compared to single-family homes—and thus provide additional options for first-time homebuyers, single people, and moderate-income households. These housing types can also increase the housing stock in previously built-out neighborhoods, and as such are an important factor for Oakland to meet its moderate-income RHNA target. Accessory dwelling units – also known as ADUs, granny flats, secondary units, in-law units, and backyard cottages – are another important strategy to increase the supply of affordable housing. ADUs offer an alternative for people who want to rent but do not want to live in larger apartment complexes, and tend to be located in lower-density and higher resource neighborhoods that often contain few other smaller affordable rental options. As described in Appendix C, the majority of ADUs in Oakland are estimated to have rents affordable to lower-income households. The community also expressed a desire to see increased housing typologies and affordable housing throughout the city, including existing working-class neighborhoods that are currently low-resource due to systemic racism and disinvestment. Efforts specifically aimed at increasing affordable housing production are included in Policy 3.3.

In March 2021, the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes—prior to the passage of SB 9.[24] Zoning reform actions under this goal will expand on this direction and help to open up exclusionary neighborhoods. Further, other housing development reforms—like permit streamlining and ADU promotion—will also help expand housing options in traditionally exclusionary neighborhoods.

Further, certain segments of the population face greater challenges when finding decent, affordable housing due to special characteristics. Such characteristics may include one's employment and income,

[23] Missing Middle Housing is a range of house-scale buildings with multiple units (e.g., duplexes, triplexes, fourplexes, cottage courts, and multiplexes) that are compatible in scale and form with detached single-family homes and are located in a walkable neighborhood. More information is available at missingmiddlehousing.com.

[24] SB 9, in effect as of January 1, 2022, permits increased density on single-family lots through duplexes and lot splits.

family characteristics, disability, or other conditions. Thus, some residents face greater housing cost burden, overcrowding, or other housing problems.

State Housing Element law defines "special needs" groups to include persons with disabilities (including developmental disabilities), the elderly, large households, female-headed households, homeless people, and farmworkers. Many households within these special needs groups also fall within the extremely-low-income category. The special needs of individuals within these groups are wide ranging; in addition to affordable and accessible housing opportunities in proximity to transportation and other services, individuals with disabilities or who are experiencing homelessness may need on-site support and services. Meanwhile, female-headed households benefit from on-site childcare, and universal design elements such as zero-step entrances and single floor living are important considerations for senior housing.

Special needs housing is an important component of Oakland's commitment to just and fair treatment of all individuals. It is critical that housing conditions foster an environment where everyone can participate, prosper, and reach their full potential. Actions contained within this goal will expand funding sources for affordable housing, including bonus points for serving special needs populations, will together allow for the expansion of affordable opportunities for special needs populations in high-opportunity neighborhoods. Actions related to expanding affordable housing options that are accessible to extremely-low-income households are also contained under Policy 3.1.

Policy 3.1 Facilitate Production of Deeply Affordable Housing[25]

Action 3.1.1. Develop a project-based rental or operating subsidy program for extremely-low-income residents.

Create either a capitalized operating subsidy or a rental housing subsidy for extremely-low-income households. This will help promote the financial viability of extremely-low-income housing.

Responsible Agency: *Oakland Department of Housing and Community Development*

Timeline: *Program will be launched by December 2023*

Potential Funding Source: *State of California Permanent Local Housing Allocation*

Objective: *This program will fund project-based rental or operating subsidy for at least 16 units of extremely-low-income housing per year, for a total of at least 56 extremely-low-income units by 2031.*

[25] Deeply Affordable housing for persons at 30% area median income or below.

Action 3.1.2. Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.

The Oakland Housing Authority will continue targeting vouchers to support the development of extremely-low-income Housing through the award of project-based vouchers.

Responsible Agency: *Oakland Housing Authority*

Timeline: *Ongoing, 2023-2031*

Potential Funding Source: *Federal Section 8 and/or VASH vouchers.*

Objective: *As vouchers are available, at least 20% of units in assisted developments will be deed restricted as extremely-low-income.*

Policy 3.2 Create a More Diverse Mix of Homes to Meet Community Needs

Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures.

The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) and Mixed Housing Type Residential (RM) zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet to remove constraints on lot splitting. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility, neighborhood scale and potential opportunities for homeownership (split lots and condominiums) in parallel with Policy 5.1. The City will develop objective design standards at the neighborhood level to ensure that multi-unit neighborhood scale housing types designed in a manner that is compatible with the scale of existing residential housing forms in these zoning districts is permitted ministerially.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2023*

Objective: *Significantly increase production of multi-unit housing types (including duplexes, triplexes and fourplexes) in current single-family-dominated neighborhoods to match housing need.*

Action 3.2.2: Promote live/work housing and housing for artists.

The City will update development standards and land use regulations to promote artist and live/work units in areas where appropriate under the General Plan. The City will encourage employers, trade groups, and arts and cultural districts to provide housing opportunities that are affordable to artists and similar professionals. The City will continue to allow the conversion of existing commercial nonresidential buildings to joint live/work units in specific commercial/industrial locations while considering the impacts on nearby viable businesses**.**

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase production of live/work housing and housing for artists to match housing need.*

Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.

The City will encourage the reuse and rehabilitation of Oakland's historic building stock to provide additional housing units and housing Oakland residents, keep the neighborhood character, and to preserve the energy embodied in the building's original construction. The City will amend land use regulations and development standards in the Planning Code to reduce constraints on adaptive reuse of commercial buildings for residential use. Reuse in environmentally sensitive areas—including in warehouses adjacent to industrial uses—will consider health and safety impacts prior to approval.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase reuse and rehabilitation of historic commercial buildings for residential use to match housing need.*

Action 3.2.4: Provide financial incentives for older or lower-income homeowners who want ADUs.

The City will identify potential funding sources and community partners to develop and implement a financial assistance program that would provide loans and/or grants to support low-income and older homeowners who want to construct an ADU. The City may prioritize funding for homeowners who agree to charge rents affordable for lower-income households or rent the ADU to Housing Choice Voucher participants.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Potential funding for an ADU incentive program could include funding from the State of California's CalHome program, potential future State funding for ADU development, or local sources*

Timeframe: *Ongoing as funding becomes available, 2023-2031*

Objective: *If funded, the City anticipates supporting at least 30 low-income and/or senior households with the cost of constructing on Accessory Dwelling Unit. This is based on the 30 loans projected for the existing CalHome grant the City has received to help low-income homeowners build ADUs.*

Action 3.2.5: Reduce constraints to the development of ADUs.

On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs that go went beyond the minimum requirements of State law. These additional allowances include higher maximum heights allowing for two-story ADUs, reduced setbacks in some zones, larger maximum sizes for detached ADUs, and an introduced ADU amnesty from Planning Code requirements allowing homeowners with existing un-permitted ADUs to legalize them. Also, this zoning update removed setback requirements and allowed additional envelope expansion of existing structures to create livable-size ADUs on "small lots" where ADUs would not be feasible under previous requirements.

The City will continue to host pre-approved ADU plans on its website to facilitate reduced applicant cost and expedited review for ADUs. The City will also provide increased staffing capacity to create a "one-stop shop" for information to property owners, contractors, and tenants. The City will invest in community outreach and education to teach property owners about ADU construction, financing, and landlord responsibilities. The City will also consider developing a database through which property owners can find and hire local workers to build ADUs. The City will also study how its implementation of the building code may constrain the legalization of unpermitted ADUs.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly increase production of ADUs to match housing need.*

Policy 3.3 Expand Resources for the Construction of Affordable Homes

Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.

The City will solicit proposals from interested developers to construct housing on City-owned sites with first consideration given for affordable housing projects, pursuant to the California Surplus Lands Act. If the City does not agree to price and terms with an affordable housing developer and disposes of the surplus land to an entity that develops 10 or more residential units on the property, the City will require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233. The City will consider depositing up to 100 percent of net proceeds from such sales or leases to the Affordable Housing Trust Fund. Requests for proposals will be posted on the City's website and distributed directly to developers, including nonprofit housing providers.

Responsible Agency: *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Donation of land value*

Timeline: *Ongoing, 2023-2031*

Objective: *City will issue Notices of Availability and/or Requests for Proposals on at least two City-owned surplus sites each year.*

Action 3.3.2: Expansion of Section 8 vouchers.

The City will continue to participate in the HUD-operated Section 8 Housing Choice Vouchers program, and will continue to work with the Oakland Housing Authority to obtain additional funding from the federal government for more Section 8 rental assistance for very-low-income renters by documenting the need for additional housing vouchers and contacting decision-makers at HUD as appropriate. The City will also advocate for additional funding as opportunities such as the American Recovery Act become available. Further, the City will work with nonprofit and community-based partners to educate property owners throughout the city about housing choice vouchers to encourage greater participation and to increase locational choices for voucher holders (see Action 5.2.7).

Responsible Agency: *Oakland Housing Authority, Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD Section 8 vouchers*

Timeline: *Ongoing, 2023-2031*

Objective: *The City of Oakland Housing Authority will increase the number of vouchers being used in proportion with any future federal expansion of Section 8 or similar programs.*

Action 3.3.3: City of Oakland Rental Assistance Program.

As funding allows, the City will build on the success of the Keep Oakland Housed program, a public-private partnership , and the Federal Emergency Rental Assistance program (ERAP) to offer rental assistance grants to distressed tenants, free legal consultation, eviction defense, case management, and employment and financial counseling. The City will work with community partners to expand public awareness of the rental assistance program and tenant rights to ensure access to timely access information.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State and federal emergency rental assistance funding, private donations, and other local funds as available*

Timeline: ***Ongoing, 2023-2031***

Objective: *100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle. At least 250 households will be provided financial assistance to stay in their housing each year, or more if additional funding becomes available.*

Action 3.3.4: Develop permanent housing affordable to extremely-low-income (ELI) households on public land.

Determine the feasibility of developing permanently affordable housing in partnerships with community land trusts mentioned in Action 3.5.1 and other community partners on publicly owned sites that may be designated as surplus property. Assist nonprofit and local developer partners to access public funding and financing to construct and increase the supply of permanently affordable rental units that are designated for extremely-low-income households. Seek public funding resources to advance the development of permanently affordable rental and ownership housing for extremely-low-income households. Ensure that permanently affordable housing for extremely-low-income households is prioritized where services and needs are accessible by transit or walking. For projects seeking City funding, continue to incorporate preference for new construction projects to set-aside at least 20 percent of housing for ELI or below with a homeless household preference.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Economic & Workforce Development Department; Oakland Human Services Department*

Potential Funding Source: *Donation of land value, City subsidy*

Timeline: *Ongoing, 2023-2031*

Objective: *City will issue Notices of Availability and/or Requests for Proposals on at least two City-owned surplus sites each year.*

Action 3.3.5: Implement an affordable housing overlay.

The City will create an affordable housing overlay to streamline the approval of affordable housing by right. Potential features of this overlay could include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will study the feasibility of broadly applying this overlay, except for areas in the very high fire severity zone and protected historical sites/districts. The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed

income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2024*

Objective: *Study and consider adopting an affordable and/or moderate-income housing overlay to meet housing need.*

Action 3.3.6: Access to low-cost financing for development.

The City currently awards local funding that affordable housing developers leverage to obtain financing for their projects. As funding allows, the City will continue to award funds to affordable housing developers on favorable terms—including simple low interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City will also continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate all budgeted local funding sources (approximately $12 million annually starting in 2023) to support the construction, acquisition, and/or preservation of deed restricted affordable housing units each year. With $12 million in local funding forecasted in 2023, approximately 80 units could be created or preserved; of these, approximately 16 would be extremely-low-income. This will result in a total of 640 low-income units over the Housing Element period, including 128 extremely-low-income units, which would increase if more local funds are identified or secured such as a new local bond measure dedicated to funding affordable housing.*

Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

While the City generally relies on development impact fees to provide local funding for affordable housing developers, targeted inclusionary housing requirements may increase the provision of affordable housing units in higher resource neighborhoods. A study is underway as part of the five-year update to

assess the benefits of impact fees versus inclusionary affordable housing requirements. The study will consider the number of units likely to be produced and likely affordability levels, and implement such requirements, if appropriate.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Study and consider adopting targeted inclusionary housing requirements to meet housing need.*

Action 3.3.8: Right-sized development fees on market-rate developments.

The City levies a number of development impact fees, including affordable housing impact fees, on market-rate projects to ensure that new development pays its fair share toward funding affordable housing, transportation improvements, and capital facilities. The City will regularly monitor its impact fees and ensure that appropriate amounts are set on an annual basis. Pursuant to the Mitigation Fee Act, the City will conduct a comprehensive analysis and make findings every five years for each impact fee along with review of whether to increase fees and if the option of building affordable housing units on-site percentage is set appropriately. The City will explore allowing developments to pay an in-lieu fee equivalent to the public art requirement to build art at affordable housing developments and promote neighborhood cultural preservation/stabilization.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Public Works Department; Department of Transportation (DOT)*

Potential Funding Source: *General Plan Surcharge, permit fees, and Impact Fees*

Timeline: *Ongoing, 2023-2031; initiate next five-year update in 2027*

Objective: *Continue to monitor and adjust impact fees.*

Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Affordable housing developers have pointed to the impact of City fees and the timing of fee payment, including both impact fees and building permits, as a constraint to development. The City will explore ways to increase flexibility in payment timing and expand direct financial support to reduce the burden imposed by the collection of City fees.

Responsible Agency: *Oakland Planning & Building Department; City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge, permit fees, and General Fund for any reduction of fees*

Timeline: *Ongoing, 2023-2031*

Objective: *Explore methods to reduce cost burden of City fees and payment timing to significantly increase affordable housing development.*

Action 3.3.10: Consider a citywide Enhanced Infrastructure Financing District (EIFD).

On December 16, 2021, the Rules and Legislation Committee of the Oakland City Council recommended that the City Administrator study the implementation of a citywide EIFD to fund affordable housing and infrastructure improvements. Upon completion of this study, the City will consider implementing the EIFD to increase available local funding for affordable housing. An EIFD is a special taxing district that directs a portion of future property tax growth towards infrastructure expenses, including affordable housing.

Responsible Agency: *City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *An EIFD would be a cost-recovering program for any implementation costs.*

Timeline: *By 2028, complete studying the possible implementation of an EIFD.*

Objective: *Study and consider implementing an EIFD to significantly increase affordable housing development and fund infrastructure improvements to match need.*

Action 3.3.11: Support innovations by design.

The City will support and encourage innovations in construction technology to build more housing in less time, more affordably, and with fewer resources by supporting non-traditional construction methods (such as modular and other offsite construction methods).

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Significantly increase production of housing using construction innovations to match housing need.*

Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.

The ACAH program provides loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing. The City will continue to issue NOFAs as funding is available and work with borrowers—including local community land trusts—to create new affordable housing units and preserve existing ones. The City will also continue to explore additional funding sources for the ACAH program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate approximately 25% of available local funding towards continuing the ACAH program.*

Action 3.3.13: Expand availability of predevelopment funding and low cost debt products for affordable housing development.

The City will continue to allocate funding to support predevelopment funding for affordable housing projects using its existing local sources, to help relieve the costs associated with the entitlement process especially for emerging and BIPOC affordable developers. The City will also identify and secure low-cost debt products for affordable housing development. To this end, the City has applied to HUD for Section 108 authority to leverage its CDBG allocation to provide low interest debt for affordable housing. Because Section 108 are hard loans that require repayment, the repayments could be revolved to support ongoing pipeline. The City will use a data-informed approach to target its resources towards historically marginalized and redlined areas as well as to support the growth of emerging and BIPOC affordable developers.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME and Section 108 funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As suitable funding and projects become available, predevelopment funding and low cost debt products will be made available for affordable housing development.*

Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing.

Affordable housing developers indicated during outreach that competing with market rate developers for sites posed a barrier on their ability to acquire sites for development. The City typically provides gap financing commitments during predevelopment, with funds provided at construction finance closing; acquisition is an eligible cost for reimbursement by the City's funding. While directly funding acquisition presents an earlier, riskier, and less efficient investment of the City's limited funds, the City will consider the implementation of a leveraged acquisition fund to allow for faster and more efficient acquisition transactions. The City will also study the creation of debt and/or equity funds to support

small site housing projects. If feasible and funding is available, this new fund may be similar in nature to the City and County of San Francisco's Small Sites Program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available to leverage philanthropic and other outside resources.*

Timeline: *Ongoing, 2023-2031*

Objective: *By the end of the Housing Element Cycle, the City will be able to report on the practicality of a leveraged acquisition fund, as well as the feasibility and appropriateness of a small sites fund.*

Action 3.3.15: Continue and expand density bonus incentives.

Continue to implement the City's density bonus ordinance and seek opportunities to expand the program, which offers developers density bonuses in exchange for the provision of affordable housing. Added provisions could include mixing and matching of low-income category percentages to get an additional bonus. Consider evaluating the density bonus ordinance and deed restrictions needed for the program to make the language more accessible and identify any unnecessary barriers that make it difficult for grassroots organizations and nonprofit developers to navigate this program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2025, Ongoing*

Objective: *Significantly expand the City's density bonus program and increase production of density bonus projects to match housing need.*

Action 3.3.16: Consider revising the Real Estate Transfer Tax.

The real estate transfer tax, also called a Real Property Transfer Tax (RPTT), is due when a home is sold or gifted. The City will consider the following revisions to the RPTT:

- Make the tax more progressive at higher rates; and
- Use of a portion of the revised tax rate as a dedicated funding stream for affordable housing. This could provide annual revenues at levels significantly higher than current Impact Fee revenue.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Department of Finance*

Potential Funding Source: *General Fund for any applicable studies*

Timeline: *Conduct the analysis by 2026*

Objective: *Complete an analysis by 2026.*

Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.

The City will work with low-income, grassroots, and BIPOC affordable housing developers to identify barriers that prevent BIPOC and small nonprofit developers from accessing City funding and navigating the permitting process, and develop solutions to ensure that the process is transparent, affordable, and accessible for these Emerging Developers, defined by Oakland HCD as "a developer who has less than five (5) years of experience as a developer and/or less than five completed projects." The City has secured a Breakthrough Grant from the San Francisco Foundation that will dedicate a full time fellow to facilitate this work of identifying and breaking down barriers for BIPOC and emerging developers to develop affordable housing in Oakland.

Responsible Agency: *City Administration Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *San Francisco Foundation, General Plan Surcharge, and permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The proportion of City funding distributed for affordable housing development to low-income, grassroots and BIPOC affordable housing developers will significantly increase by 2031.*

Action 3.3.18: Reauthorize Measure KK and release remaining funds.

Measure KK, a bond measure passed in 2016, has provided a significant source of funding for anti-displacement and affordable housing preservation projects. The City has released remaining Measure KK bond funds for resident-led and community land trust-supported preservation projects and homeless acquisition projects and will seek to reauthorize bond authority to increase the funding available for affordable housing.

Responsible Party: *Oakland City Council and Oakland Department of Housing and Community Development*

Potential Funding Source: *General Fund and Local Infrastructure Bond Funds post-Measure KK*

Timeframe: *Authorize local infrastructure bond by 2025, spend funds as available on an ongoing basis*

Objectives: *The size of the new infrastructure bond and the amount set-aside for Affordable Housing is still being determined. For reference, the Measure KK infrastructure bond of $100 million for affordable housing supported the new construction of over 700 units, the preservation of 420 units, and the acquisition and conversion of over 400 units. New construction projects will be prioritized for setting aside at least 20% of units for extremely-low-income populations.*

Policy 3.4. Reform Zoning and Land Use to Address Community Priorities

Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setbacks requirement.

The City will allow additional building heights and/or housing densities in certain corridors and districts. These changes include**:**

- **Zoning Districts** such as the Detached Unit and Mixed Housing Type Residential Zones. As discussed in Action 3.2.1, the City will develop zoning standards for a diversity of housing types in single-family neighborhoods, including duplexes, triplexes, and fourplexes. The City will also reduce minimum lot sizes to facilitate the subdivision of existing lots. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility and potential opportunities for home ownership (split lots and condominiums). The City will also develop objective design standards at the neighborhood level to ensure that such missing-middle housing is designed in a manner that is compatible with existing residential housing forms in these zoning districts.

- **Corridors** such as International, Foothill, and MacArthur Boulevards. The current building height map and permitted densities along key corridors does not always allow residential projects to meet their full potential. Consistent with the housing sites map, the City will undertake revisions to allow increased heights and densities.

- **Transit-proximate areas**. Alongside efforts to increase missing-middle housing (see Action 3.2.1), the City will increase allowed height and density in areas in close proximity to high-capacity transit, including areas near BART and BRT Stations.

- **Resource-rich areas**. Oakland's high resource neighborhoods are typically lower-density and have historically been exclusive – both economically and racially. Allowing higher density multi-unit buildings in these areas that are rich in services will help increase the competitiveness of affordable housing projects for State funding, as well as the feasibility of developing significant numbers of housing units within these neighborhoods. Zoning changes may include permitting residential densities above 30 dwelling units per acre by right in designated areas for affordable

housing projects. This will help further fair housing objectives by increasing the availability of housing, and particularly more affordable units by design, in high resource areas.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.2: Revise Conditional Use Permit (CUP) requirements.

Conditional Use Permits are currently required for multifamily buildings in the RD-2 and RM Zones, which can act as a constraint on development – especially for affordable housing. The City will revise regulations to permit multi-unit building according to objective criteria such as building type and development size, without subjecting multi-unit residential projects to CUPs. Under Action 3.4.7, the City will create objective design standards and amend the Planning Code design review procedures to allow for streamlined review and, where appropriate, ministerial approval. The City will also actively promote and support use of SB 35 to streamline 100 percent affordable housing developments. These revised standards will be implemented alongside changes to Oakland's RD, RM, and RU zones as described in Action 3.2.1.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.3: Revise citywide parking standards.

Parking requirements are a major cost driver in residential development, and often conflict with sustainable development goals that seek to reduce dependence on automobile use. As such, the City recently eliminated residential parking minimums in the downtown area. Continued revisions of Oakland's parking standards will be undertaken through a comprehensive review of existing residential parking standards and the identification of appropriate new standards to match long-term development and environmental goals. Additionally, for mixed-use development projects (commercial on ground floor and residential uses above), the City will explore flexibility in parking requirements so that additional residential development on these sites is not constrained by any lack of conformance with commercial parking regulations.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2026*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing.*

Action 3.4.4: Revise open space requirements.

Both affordable and market-rate developers have pointed to the relatively high open space standards in Oakland as a constraint to development, especially for higher-density projects. The City will revise common and private open space standards for multi-family developments to increase the feasibility of residential projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.5: Correct zoning district boundaries that cut through parcels.

Oakland's Zoning Map includes many zoning district boundaries that cut through individual parcels – meaning that the same parcel is subject to multiple development standards, which can act as a development constraint. In updating the Zoning Map, the City will correct instances of this occurrence and ensure that zoning district boundaries that affect allowed height and density follow parcel boundaries to the maximum extent feasible to remove inconsistencies and ambiguities.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.6: Capture the diversity of existing built fabric in zoning.

Oakland has a diverse historic urban fabric, some of which no longer conforms to the current Planning Code. To capture and continue this diversity and remove ambiguities, the City will reduce minimum lot sizes and setbacks to allow the creation of small-lot developments, as well as legitimize the many existing small-lot neighborhood patterns in West Oakland and other neighborhoods. The City will conduct a comprehensive review of the Planning Code to identify where current development standards have created non-conformities for older built facilities and amend development standards to reduce or eliminate them where appropriate. The City will also provide flexibility in the objective standards to retain and promote the City's vernacular built environment.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.7: Implement objective design standards.

The City currently requires design review for nearly all residential development, which can significantly lengthen the time required for project approval. To reduce the permitting timeline, the City has initiated a process to develop objective design standards to streamline the approval of residential, mixed-use, and commercial building types, with a particular focus on much-needed affordable housing projects in transit-rich areas. As opposed to "design guidelines," objective design standards will not be subject to interpretation, and result in faster, more predictable approvals of high-quality development that respects Oakland's history and benefits the local community.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, and SB2 Grant for Objective Design Standards*

Timeline: *2023 – 2024*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.8: Implement new ADU standards that streamline approvals and address unpermitted units.

In January 2022, the City updated its ADU regulations to comply with changes in State law. To address unpermitted units, the new ADU regulations go beyond minimum compliance with State law and establish an expansive legalization process for unpermitted ADUs addressing not only any existing non-compliance issues with the Building Code but the Planning Code as well. The City has also initiated a program to allow pre-approved construction documents for ADUs that creates a more streamlined approval pathway for many homeowners The City will continue to implement this legalization and streamlining of ADU permitting processes. The City will study options to alleviate the burden of the building code on the legalization of unpermitted ADUs.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and Ongoing*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.10: Permit sites included in prior RHNA cycles to develop with affordable housing by right.

Pursuant to State law, the City will permit vacant sites included in two consecutive prior RHNA cycles and non-vacant sites included in at least one prior RHNA to develop with owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. This means that the City cannot require any form of discretionary review or approval for such projects. These sites are identified in Appendix C, Table C-25.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Policy 3.5. Explore Innovative and Alternative Housing Models

Action 3.5.1: Support community land trusts and other shared equity models.

The City has worked with a variety of community land trusts, including East Bay Permanent Real Estate Cooperative, Sogorea Te', Oakland Community Land Trust, Bay Area Community Land Trust and the Northern California Land Trust to provide affordable housing (including ownership housing). Most significantly, the City created the Acquisition and Conversion to Affordable Housing Program, which provides funds through Bond Measure KK to community land trusts to acquire and preserve affordable housing units. The City will continue to offer this program and support community land trusts. The City is also working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units and will implement these practices going forward. Financial or technical assistance may become available from the Bay Area Housing Finance Agency (BAHFA) or possible State programs. The City will prioritize lower-income residents and residents at risk of displacement while supporting shared equity models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Funds will be made available to equity affordability models through the City's annual affordable housing NOFA's on an annual basis (2023-2031)*

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to shared equity affordability models as per current practice.*

Action 3.5.2: Support housing cooperatives, co-living, and cohousing models.

Formal and informal housing cooperatives, co-living and cohousing models in Oakland have traditionally provided an alternative form of affordable housing, including ownership housing. To further support these initiatives, the City will conduct outreach with community-based organizations and other community partners to identify ways the City can support these models, especially for lower-income residents. The City will prioritize lower-income residents and residents at risk of displacement when supporting these alternative housing models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *2031; Oakland Department of Housing and Community Development will be prepared to report back on the status of its cooperative-related engagement by the end of the Housing Element cycle*

Objective: *Oakland Department of Housing and Community Development will be prepared to report back on the status of its cooperative-related engagement by the end of the Housing Element cycle.*

Action 3.5.3: Advocate for statewide legislation on social housing.

The City of Oakland recognizes that the statewide housing crisis requires statewide solutions. As such, the City will advocate for social housing legislation under consideration in the State legislature, known as the California Social Housing Act or AB 2053. The Act would establish a California Housing Authority (CHA) to produce and preserve social housing – publicly-owned and mixed-income developments that maintain homes as permanently affordable.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *City legislative advocacy will be funded through the existing general fund-supported contract for State legislative representation services.*

Timeline: *Ongoing, 2023-2031; the City will continue advocacy for social housing legislation until it is adopted*

Objective: *The State of California will successfully adopt social housing legislation.*

Action: 3.5.4: Evaluate acquisition and development opportunities for moderate- and middle-income households.

The City will evaluate the merits of acquisition and development models to assist in the construction or preservation of middle-income housing, potentially in partnership with other regional agencies.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *The model could be financed by bond financing underwritten by rental revenue, with relatively shallow subsidies in the form of property tax abatements*

Timeline: *Evaluation will be ongoing as opportunities evolve*

Objective: *If a suitable opportunity exists to efficiently produce or preserve middle income housing, the City will design a program or participate in a program developed by other public agencies.*

Policy 3.6. Streamline the Approval of New HOUSING

Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.

The City will work with developers and housing stakeholders, particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.7, and/or increasing staffing at the Planning and/or Building Bureau to reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.2: Provide increased flexibility in development standards.

The City will provide increased flexibility in development standards, with a focus on smaller infill residential projects, to ensure that these projects can qualify for streamlined permitting without need for variances. The City will also consider increasing staff-level authority, with clear guidelines, to grant minor

exceptions, which can also reduce project timelines and costs. Alongside efforts described in Actions 3.2.1, this flexibility will increase the capacity of the Planning Bureau to permit a variety of units, more expediently, creating more residential units in traditionally lower-density neighborhoods.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing.

Through the implementation of objective design standards as described in Action 3.4.7, the City will create a ministerial review pathway for qualifying developments based on project size, type, affordability level, and location. Discretionary design review will still be required for some types of projects and where certain adjustments are requested. As part of the entitlement reform process, the City will consider fee subsidies and/or payment deferrals to better accommodate affordable housing projects and increase the financial feasibility of affordable projects. The City will work with community partners and affordable housing developers to identify and implement appropriate entitlement reform actions.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.4: Continue SB 35 streamlining.

SB 35 created a streamlined and ministerial approval process for housing projects that meet siting and construction criteria including being located in communities that have failed to meet their RHNA. The City of Oakland was among the 225 jurisdictions that made insufficient progress towards meeting the RHNA for low- and very-low-income housing at the time of the State's most recent determination in 2021 and is therefore subject to the streamlining provisions for proposed development in which 50 percent or more of the units will be affordable. The City provides an SB 35 streamlining checklist to facilitate the development of affordable housing, and will actively promote use of SB 35 streamlining for 100 percent affordable projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.5: Continue one-stop and online permitting services.

Through the Online Permit Center (Accela Citizen Access), property owners are able to apply for and follow the status of their permits online. The City also operates an in-person One-Stop Permit Center, where the counter services of the Planning & Building Department, Oakland Fire Department, and Department of Transportation have been combined in one location to expedite the permitting process. The City will continue to offer both online and in-person permitting services to reduce permitting timelines. The City will also coordinate with low-income and affordable housing developers to understand and correct the gaps in these services.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2031*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Policy 3.7. Expand Options for Special Needs Housing

Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.

The City will continue to encourage a wide variety of senior housing opportunities, particularly for lower-income seniors with special needs, through the provision of financial assistance and regulatory incentives as specified in Planning Code. The City will continue to award points in its consideration of housing funding to projects that serve special needs populations, including seniors and homeless individuals. The City will explore options to expand the amount of financial assistance available to developers of housing for seniors and persons with special needs and will commit to transparent reporting of how special needs units are assisted.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Economic & Workforce Development Department; Oakland Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.2: Provide housing for persons with HIV/AIDS.

The City will continue to provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. The City will enhance outcomes via housing first model under the Alameda County EveryOne Home Plan.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, HOPWA, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.3: Accessible units in new housing developments.

The City of Oakland's Housing Development Services unit will promote the inclusion of accessible units for projects receiving City funding and will award extra points to projects that exceed federal minimum requirements for accessible housing for all projects receiving federal funding assistance.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.4: Implement the sponsor-based Housing Assistance Program.

The City will continue to work with the Oakland Housing Authority to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service-enriched housing options that increase housing choice for special needs populations. The City will explore options to find more landlords willing to participate in the program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.5: Encourage different sizes of housing for larger families – including affordable housing with courtyards, multigenerational housing.

The City will continue to reward and incentivize projects that include multi-bedroom units suitable for families in its awards of City funding for housing development and will expand the program to grant points to affordable housing projects that provide different sizes of houses for multigenerational and larger families, such as housing with courtyards or cottages.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.6: Expand areas where residential hotels are permitted by right.

The City will consider expanding zoning districts where residential hotels and rooming houses are permitted by right. These housing typologies provide an important source of housing for extremely-low-income residents.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Significantly increase production of residential hotels to match housing need.*

Policy 3.8. Convert Vacant Land and Units to HOUSING

Action 3.8.1: Continue to implement the Vacant Property Tax (VPT).

On November 6, 2018, Oakland voters approved Measure W, the Oakland VPT. The VPT Act establishes an annual tax of $3,000 to $6,000 on vacant property. A property is considered "vacant" if it is "in use less than fifty days in a calendar year," and not subject to any of 10 exemptions. The City will continue to implement the VPT to encourage active uses on vacant land and regularly monitor the effectiveness of the program. The City will also consider expanding exemptions to the VPT to reduce the impacts of unintended hardships on nonprofit and affordable housing developers.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *Self-funding through the vacant property tax*

Timeline: *Ongoing, 2023-2031*

Objective: *Through the vacant parcel tax, seek a 10% reduction in vacant parcels by the end of the Housing Element period.*

Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations.

Traditional brick-and-mortar commercial and retail businesses have continued to transition to an Internet-based model, which has been further accelerated by the COVID-19 pandemic. As a result, a significant number of ground-floor commercial and retail spaces in Oakland remain vacant. The City will explore opportunities to promote the conversion of vacant ground floor spaces in certain areas to live-work and other residential use, as may be appropriate in the local context. The City will also explore other opportunities to promote the conversion of vacant office or commercial space to housing.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2026*

Objective: *Significantly increase conversion of vacant ground floor commercial space to residential uses, where appropriate, to match housing need.*

Action 3.8.3: Consider a tax on all vacant residential rental units.

Although housing demand in Oakland remains extremely high, the City experiences a higher vacancy rate than both Alameda County and the Bay Area overall. This results from a variety of factors but may ultimately lead to higher housing costs. Oakland currently has in place vacancy tax on parcels and several types of housing units – including condos, duplexes, and townhome units under separate ownership. The City will consider extending the current vacancy tax to all residential units to encourage active use of residential units and expand the available housing supply.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Fund*

Timeline: *Consider by the end of 2026 whether the vacant parcel tax ought to be revised or expanded*

Objective: *By the end of 2026, consider and if appropriate adopt a revision to the vacant parcel tax.*

Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.

The City currently provides the Community Buying Program, which assists Oakland residents in purchasing vacant or abandoned properties from the Scattered-Site Single Family Acquisition and Rehabilitation Program. These properties have been made available through programs like the Oaktown Roots Affordable Homes pilot program and local community land trusts, like the Oakland Community Land Trust and the Bay Area Community Land Trust. These programs will also help promote long-term affordable homeownership, which will also promote the objectives of Policy 5.1.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As additional funding is available, continue to convert vacant parcels to affordable housing.*

Action 3.8.5. Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

Partner with the Alameda County Tax Collector to identify tax-defaulted property suitable for development or preservation as affordable housing. Through use of the Chapter 8 tax sale program, make this property available to affordable housing providers, community land trusts, and related organizations.

Responsible Party: *Oakland Department of Housing and Community Development*

Funding: *Contributory value of the land, impact fees, HOME, other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *By the end of the Housing Element period, at least 40 parcels will be acquired by the City of Oakland or partner organizations that were previously tax defaulted.*

Goal 4. Address Homelessness and Expand Services for the Unhoused

The City of Oakland is facing an unprecedented humanitarian crisis of residents who are experiencing homelessness. As the United Nations notes in its mandate on the right to adequate housing, the right to adequate housing is more than having a roof over one's head, it is the right to live in safety and dignity in a decent home; HUD Secretary Fudge has declared that "housing is a human right." Ultimately, permanent housing is the solution to homelessness (see Goal 3). Goals, policies, and actions in this Housing Action Plan recognize housing as a human right and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Homelessness disproportionately impacts Oakland's BIPOC residents, particularly the city's Black residents. Further, special needs households—including extremely-low-income households—tend to be at greater risk of experiencing homelessness. Addressing homelessness and providing high quality services to the unhoused is also a racial equity issue, and must be part of the City's efforts to affirmatively further fair housing. By expanding access to quality homelessness services across Oakland, and seeking to expand transitional housing options in a citywide manner, the City will work to avoid an overconcentration in homelessness and homelessness-related services in disadvantaged neighborhoods. Further, by expanding economic opportunities for the unhoused, Oakland will help those currently unhoused access housing opportunities in a variety of Oakland neighborhoods. This goal, and the policies and actions that implement it, will address fair housing issues as they relate to homelessness in Oakland.

POLICY 4.1 EXPANSION OF HOMELESS SERVICES

Action 4.1.1: Expand, improve, and maintain crisis response beds.

Since 2018, the City has expanded its supply of emergency interim housing (community cabins, shelter beds, Safe RV parking) by over 1,000 beds/spaces. This increase is almost entirely funded with one-time funds. The City will use local, county, State, and federal funding to maintain these new resources and to improve the effectiveness of these beds in moving people to permanent housing (for example, by adding rapid rehousing exit resources). In addition, the City will continue to expand the interim housing sites and other forms of housing for people experiencing homelessness in the City. The City will ensure that such housing options include supportive services such as including rapid rehousing assistance, housing navigation, and access to resources via Coordinated Entry. The City will seek to partner with Alameda County to provide mental health and substance use services in interim sites and will partner with mainstream workforce programs to support on site job training programs. The City will coordinate

efficient provision of services and resources from private, nonprofit, local, Alameda County, and State organizations

Responsible Party: *Oakland Human Services Department*

Potential Funding Source: *Measure Q, ESG, State Homeless Housing Assistance and Prevention Funding, various HUD funding sources, CalAIM (through County)*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *1. Increase the number of people who are experiencing homelessness in Oakland who are sheltered; and 2. Invest in and improve the quality of interim housing programs so that more people exit to permanent housing and more people exit to permanent housing more quickly.*

Action 4.1.2: Expand, improve, and maintain crisis response beds for unsheltered communities of color.

Increasing the number of crisis response beds helps to address the disproportionate rates of unsheltered homelessness among communities of color, especially among African American households. Creating additional facilities in many parts of the city will assist households experiencing homelessness to remain in their communities will reduce the number of African American households who are displaced from Oakland. Track data to ensure that African American households are using emergency crisis response beds and exiting to permanent housing at rates that are proportional to their representation in the homeless population.

Responsible Party: *Homelessness Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Increase and stabilize people while providing opportunities to improve income they need to avoid entering or returning to homelessness.*

Action 4.1.3: Expand health and hygiene facilities and services, and improve access to bathrooms and showers.

Starting in FY 20-21, this intervention has greatly expanded to serve a minimum of 60 curbside sites with porta-potties, handwashing stations, and garbage pick-up. HSD has created two new outreach staff positions whose primary role is to support the encampments which have these interventions with maintaining the services as well as maintaining a level of cleanliness and compliance with the Encampment Management Policy. These City staff also support designated site leadership at each

encampment site. The site leaders ensure that the porta-potties are used appropriately, and keep the units clean in between the official servicing. City staff provide the site leaders with cleaning supplies and stipends for their work. Per Council directive, the goal is to increase to 100 sites and four City outreach staff.

Responsible Party: *Homeless Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funding, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *More people experiencing unsheltered homelessness have access to services which promote health and dignity.*

Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.

Recognizing that a lack of access to living wage jobs is a significant driver of homelessness in Oakland, the City will work with the Oakland Unified School District, higher educational institutions, related nonprofit agencies, business and other partners to create low barrier work opportunities for people who are currently unsheltered. These programs will offer support for development of work-related skills, provide services to address employment barriers specifically targeted to the needs of unhoused residents and increase the co-location and collaboration between providers of homeless assistance and employment programs and services. In addition, the City will work to match small business owners who want to address homelessness with job seekers who are homeless or formerly homeless.

Strategies to include:

- Low barrier work opportunities, for people re-entering the workforce
- Add employment specialist positions in core homeless services/prevention services programs
- Flexible funding pool to support career track training and employment programs
- Benefits advocacy to obtain SSI or other income for which they are eligible

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Reduction in the number of households which return to homelessness in the two years after obtaining housing.*

Action 4.1.5: Provide support for domestic violence shelters.

Recognizing that domestic violence is one of the leading causes of homelessness for women and children, the City will coordinate provision of counseling, case management, healthcare, rapid rehousing assistance, and other wraparound services for survivors of domestic violence within transitional housing programs, emergency shelters, and navigation centers. The City will work with housing and service providers to seek additional grant funding to support survivors of domestic violence. The City will continue to publicize health and wellness resources on its website and will ensure that this information remains up-to-date.

Responsible Agency: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator, Department of Violence Prevention*

Potential Funding Source: *To be determined*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will significantly increase supportive services (and their publicization) for domestic violence survivors to match need.*

Policy 4.2 Encampment Management

Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy.

The City of Oakland adopted the 2020 Encampment Management Policy. The purpose of this policy is to protect and serve all Oaklanders, sheltered and unsheltered, and to manage the adverse impacts of homeless encampments by balancing the interests of all residents, focusing encampments actions on mitigating negative outcomes as they pertain to public safety, public health, and equity outcomes.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *2023-2031*

Objectives: *The Encampment Management Policy is essential to connecting unsheltered individuals to human services, emergency shelter and long term permanent supportive housing, while executing comprehensive operations focused on managing health and safety conditions of*

public spaces. The goal is to close areas where encampments are not permitted, provide regular and adequate trash collection from encampments, to ensure that porta-potties and hand-washing stations are services regularly as needed, and that encampments receive regular deep cleanings that ensure that our unhoused residents are not living in conditions that threaten health and/or safety until fully abated.

The policy sets forth the following objectives:

1. *Designate high-sensitivity areas, where unmanaged encampments are presumed to cause unreasonably high levels of health and safety impacts due to the nature of the location;*
2. *Designate low-sensitivity areas, where enforcement will not be prioritized;*
3. *Make findings that will prompt Encampment Management Team intervention; and*
4. *Provide guidance on addressing unreasonable health and safety risks, promoting voluntary compliance, and strategies to address non-compliance.*

Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator.

Homelessness intersects with multiple departments and agencies, all of which fall under the City Administrator's purview. Leading from the Office of the City Administrator, the Homelessness Division serves as the primary liaison between the City Administrator's Office and internal and external agencies, along with other City departments, regarding the City's homelessness response and provides inter- and intra-agency coordination focusing on the City's management of its unsheltered population. This division directs the program and operational decision-making in division activities; encampment management response teams and task forces; organizes, manages, and directs the review and implementation of the City's major projects.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *2023—2031*

Objectives: *Lead the implementation, expansion, and strategic coordination of Homeless Response Operations and Service Delivery across City of Oakland departments, and external public and private partners, organizations, and agencies.*

Action 4.2.3: Strengthen interdepartmental Encampment Management Team.

The Encampment Management Team (EMT) is an interdepartmental working group tasked with implementing and administering this policy, consisting of representatives from Oakland's Public Works Department, Human Services Department, Oakland Policy Department, Oakland Fire Department, the City Administrator's Office (CAO), and other consulted departments as necessary (e.g., the Mayor's Office, the City Attorney's Office, Parks and Recreation). The EMT is facilitated by the CAO via the Homelessness Administrator.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *1. The EMT aims to execute duties assigned to their respective departments for the completion of interventions (Health and Safety) prescribed in the 2020 Encampment Management Policy (Health and Hygiene, Deep Cleanings, Partial Closure, and Closure); 2. To channel unsheltered individuals in every encampment to human services, emergency shelter and long term permanent supportive housing; 3. To effectuate the completion of the Encampment Management Policy interventions, each department may promulgate additional specific procedures necessary to effectuate the roles described in this policy under development specific Standard Operating Procedures.*

Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with the Homelessness Advisory Commission.

The City will increase opportunities for leadership and input from people experiencing homelessness in the design, implementation, and evaluation of encampment management and services that respond to unsheltered homelessness. The City will also seek to build trust between law enforcement, social workers, and homeless individuals/families and promote mentorship opportunities for formerly homeless individuals and people recovering from addiction. Further, the City will refine encampment management policies and strategies using qualitative and quantitative data to assess the experience of encampment for BIPOC residents and will implement culturally-specific and anti-racist strategies to better meet the short-term needs of BIPOC unsheltered residents.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Review and make recommendations of existing and new proposals funding homelessness services funded by City of Oakland Measures Q and W.*

Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.

In FY 21-22 the City opened its first co-governed program site. Co-governance is an intervention model where unsheltered residents come to an agreement about how they will live together in a community setting of an encampment. This includes, but is not limited to, selecting site leadership, determining eligibility for participation, developing community expectations for behaviors and for staffing/running the site, holding each other accountable for the agreed upon expectations, and maintaining the health and safety of the community residents. A backbone agency (nonprofit/community-based agency) works alongside residents to support the residents in the design, leadership and operations of the site. The backbone agency is the contracting entity with the City/funder and holds ultimate accountability for ensuring the safety and security of the site. The City, in partnership with unsheltered residents will continue to refine this model and to expand this model as new sites open.

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Homeless Housing Assistance and Prevention funds, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *Increase the number of interim housing sites which have people experiencing homelessness as partners in site design and operations.*

Policy 4.3 Promote Transitional and permanent supportive, Deeply Affordable Housing for Unhoused Communities

Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.

The City will secure and advocate for additional funding for building and operation of permanent supportive and deeply affordable housing for homeless households using a combination of State and

federal sources, such as the State Homekey program, the federal HOME-ARP program, and funding from the local Oakland Housing Authority. The City will continue incorporating a preference for City-assisted affordable housing projects that include at least 20 percent of units for vulnerable populations, including but not limited to homeless individuals and families living at or below 20 percent of AMI; as well, the City will increase this homeless set-aside in future NOFAs should operating funding resource availability support the increase. The City will work with residents, service providers, and property owners to ensure adequate and transparent long-term plans for maintenance and service provision within new and existing permanent supportive housing. The City will also pursue the strategic acquisition of hotel, motel, and dorm facilities by and with nonprofit partners to house unsheltered residents. The City will further work to coordinate Oakland Housing Authority's award process with the City's Affordable Housing NOFA process and Homekey opportunities. The City will also work with the State and other partners to explore opportunities to expand the supply of extremely-low-income housing for residents that do not require supportive services.

Responsible Party: *Oakland Human Services Department; Oakland Department of Housing and Community Development; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funds*

Timeframe: *Ongoing, 2023-2031, as funding is available*

Objectives: *Secure funding to significantly increase construction and maintenance of permanent supportive and deeply affordable housing to match need for unhoused communities.*

Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis.

The City will utilize statewide streamlining opportunities, such as categorical CEQA exemptions and Program EIRs, and revise the Planning Code to minimize the need for discretionary review with a ministerial option for projects that utilize objective design standards for approval. The City will also identify and eliminate roadblocks in the review of building permit applications to expedite and increase the production of modular developments and other quick-build shelter solutions on private land in Oakland. The City will also work with other public agencies, including Caltrans, to facilitate and streamline more flexible shelter solutions on public land. The City will ensure that smaller units used as permanent housing units are in compliance with the Building Code to mitigate fire and other public safety hazards.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Planning Code changes in 2023; ongoing, 2023-2031*

Objectives: *Significantly increase production of modular developments and other quick-build shelter solutions to match need for unhoused communities.*

Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing.

The City will amend the Planning Code to ensure that transitional housing and supportive housing projects are permitted equivalently to similar permanent residential uses in the appropriate zone.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of transitional and supportive housing.*

Action 4.3.4: Provide development standards for Low Barrier Navigation Centers.

Low Barrier Navigation Centers, pursuant to AB 101, are required to be permitted by right and without any discretionary approval. A Low Barrier Navigation Center is a "Housing First," low barrier, temporary, service-enriched shelter that helps homeless individuals and families to quickly obtain permanent housing. The City will amend the Planning Code to include a definition for “low barrier navigation centers” and ensure that such centers are permitted by right, pursuant to State law.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness.*

Goal 5. Promote Neighborhood Stability and Health

All Oakland residents deserve to live, work, play, and thrive in safe, affordable, healthy, and welcoming communities. In Oakland, this geography of opportunity and health-supporting neighborhoods has been inequitable, with low-income communities and communities of color more likely to live in neighborhoods overburdened by pollution, disinvestment, and other social and environmental injustices. Goals, policies, and actions in the Housing Action Plan can address environmental justice by protecting residential areas from harmful pollution impacts. Additionally, as the City prioritizes investments, infrastructure, building upon existing community assets, and resources to achieve environmental justice in disinvested areas, the Housing Action Plan seeks to ensure that existing residents can stay in their communities and benefit from these increased resources through opportunities for homeownership (see also Goals 1 and 3).

1. Reduce greenhouse gas emissions in the building sector through the promotion of sustainable design principles, energy efficiency, and smart growth principles into residential developments.

2. Encourage higher-density, infill, and mixed-use development near transit to reduce reliance on automobiles.

3. Promote adaptation strategies to improve neighborhood and community resilience to climate change in collaboration with local and regional partners.

4. Leverage State and federal resources to assist with the remediation of environmental constraints on potential housing sites.

5. Limit greater intensification of neighborhoods at very high risk of wildfires. Maintain parking and other regulations to facilitate evacuation when needed.

6. Promote an equitable distribution of housing, including affordable housing, throughout the community, while providing opportunities to those that want to remain in existing neighborhood to maintain local ties.

7. Ensure that programs support development of both rental and ownership opportunities for affordable and middle-income housing.

Homeownership confers a range of benefits – including greater certainty over housing costs, opportunity to stay in one's chosen neighborhood, ability to make changes to the living environment, privacy, and ability to build financial equity. In addition to tangible economic and other individual

benefits, homeownership also brings substantial social benefits such as a stronger sense of place and belonging, improved community health and safety, and civic participation.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Oakland has historically experienced patterns of significant inequities – between the hills and the flatlands, west and east, and across race and income. Rising housing costs and displacement pressures continue to disproportionately burden the city's Black population and other people of color, even as historically Black neighborhoods continue to see disinvestment and relatively high rates of poverty – see Appendix D for further context. The City has made great strides to correct these patterns of discrimination—including through the establishment of the Department of Race and Equity to advance racial equity in 2016—but needs to expand its efforts to eliminate racial disparities and discriminatory housing practices. The City will take steps to correct historic and ongoing patterns of discrimination to create a fair and just city through the simultaneous actions of opening up exclusionary neighborhoods (see Policy 3.4) and focusing resources, funds, tenant protections, and support of existing community assets in disinvested neighborhoods and ethnic enclaves (see Goals 1, 2, and 3).

Further, Oakland has some of the lowest rates of homeownership among major Bay Area cities, rivaled only by San Francisco. About 60 percent of Oaklanders are renters, and with continuously rising housing costs, affordable homeownership remains out of reach for most Oaklanders. This is especially true for the city's working and middle classes, as traditionally blue-collar neighborhoods have become increasingly expensive in recent years. Homeownership is distributed unevenly by race and ethnicity – while most white households own their homes, the majority of BIPOC households are renters. American Indian or Alaska Native (70.8 percent), Hispanic or Latinx (69.4 percent), and Black or African American (67.8 percent) households are especially likely to be renters. See Appendices B and D for more information.

This goal aims to expand opportunities for homeownership, particularly for low-income communities and communities of color. Along with efforts in Goal 1 and Goal 2, increased affordable and middle-income homeownership opportunities will reduce displacement pressures, and keep Oaklanders in their homes, thereby protecting both individual families and the social fabric of Oakland's neighborhoods. First-time homebuyer programs can also expand access to historically exclusionary neighborhoods by giving prospective homeowners the resources and tools they need to secure a home wherever they choose to live. Community land trusts and other models of maintaining permanently affordable housing, as outlined in Policy 3.5, also provide opportunities to increase rates of affordable homeownership.

As defined in the Oakland Municipal Code, in addition to safe, affordable, high-quality housing for all people, another determinant of equity is a healthy built and natural environment for all people that includes a mix of land uses that support jobs, housing, amenities and services, trees and forest canopy, and clean air, water, soil, and sediment. In Oakland, low-income communities and communities of color

are more likely to suffer from environmental injustices such as disproportionate exposure to air pollution, toxics and hazardous facilities and substances, contaminated water, and other environmental hazards that have an impact on human health due to a history of systemic racism and social injustices that influence where these communities live. As the impacts of climate change become more severe, these communities are most likely to be impacted first and hardest. As the City adds more housing stock over the course of this Housing Element period, it is imperative that new development sustains a healthy environment by working to "reduce the unique or compounded health risks in disadvantaged communities" and is prepared for the heightened impacts of climate change, especially protecting those who are most at risk. As part of this goal, efforts to align affordable housing development with transit—such as through the State's Affordable Housing and Sustainable Communities program—and expand access to high opportunity neighborhoods and good jobs are integral to furthering environmental justice through housing.

Policy 5.1 Sustain Affordable First-Time Homeownership Incentives

Action 5.1.1: Provide first-time homebuyer programs.

When funding is available, the City has historically provided a number of first-time homebuyer programs – including the First Time Homebuyer Mortgage Assistance Program (MAP), the CalHome Program, and Oaktown Roots Affordable Homes. As funding becomes available—either through State or program-related income—the City will resume these programs. The City also provides first-time homebuyer workshops and promotes workshops hosted by a HUD-approved counseling agency. Although City-sponsored classes are currently suspended due to the COVID-19 pandemic and the absence of funding, the City continues to provide information for other local classes. When the public health emergency subsides, the City will continue to directly offer workshops. Finally, the City maintains a list of deed-restricted below market rate (BMR) homes for sale to assist potential buyer and will continue to maintain this list throughout the planning period. The City will collect data through the first-time homebuyer programs to understand the extent of homeownership need and to identify gaps in the programs. Over time the City has increased the income limits for its first-time homebuyer programs because of the increasing gap between housing prices and incomes. The City will assess the impacts of this approach and the extent to which it may reinforce rather than reverse racial disparities in ownership. Further, as part of Action 5.3.3, the City will engage in targeted outreach in partnership with community-based organizations and fair housing services providers to reach the most impacted communities – including Black and Latinx households.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Funds (CalHFA, HCD), Private Lenders, CFPB, GSFA, FHLB WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data as available*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.2: Expand access to low-cost financing for home purchase.

Through the first-time homebuyer programs described in Action 5.1.1, the City was able to issue 121 loans totaling approximately $6.8 million during the previous planning period. With appropriate funding, these low-cost financing options have been very effective in promoting affordable homeownership. The City will continue to seek funding for these programs and provide access to homebuyer resources related to other county, State, or federal level funding – including through the Consumer Financial Protection Bureau (CFPB), California Housing Finance Agency (CalHFA), Golden State Finance Authority (GSFA), Federal Home Loan Bank's (FHLB) WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Funds (CalHFA, HCD), Private Lenders, CFPB, GSFA, FHLB WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data as available*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

Oakland HCD has traditionally worked with Section 8 voucher holders as part of the first-time homebuyer programs. Further, the Oakland Housing Authority (OHA) offers the Homeownership Program to eligible residents – which permits participants to apply their housing subsidy towards a

monthly mortgage payment. As funding and capacity permits, the OHA will continue to offer this program and expand eligibility criteria as feasible. Oakland HCD will also continue to work with voucher holders through first time homebuyer programs. OHA will collect data on residents who make use of the Homeownership Program to understand program participants and existing gaps.

Responsible Party: *OHA; Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD, State Housing Funds (CalHFA, HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on OHA's Homeownership Program*

Objectives: *If funded at historic levels, the City expects to provide 30 low-income Section 8 voucher holders with down payment assistance.*

Policy 5.2. Promote Resilient and Sustainable Development

Action 5.2.1: Protect against smoke and wildfire.

As wildfires become more frequent, it is increasingly important to ensure safe and healthy indoor air quality. The City will require new development follow requirements for indoor air filtration, including the installation of MERV filters, as specified in the California Building Code, and will support property owners in retrofitting their homes to protect inhabitants from wildfire smoke, prioritizing retrofits in communities with disproportionate exposure to air pollution and substandard housing. To reduce the impacts of secondhand smoke, the City will explore amendments to the smoking pollution control ordinance to create smoke-free environments within multifamily housing properties. Further, the City will encourage the addition of clean air centers and resilience spaces within residential areas that can provide emergency services in the event of a wildfire.

Responsible Party: *Oakland Public Works Department; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly improve access to better indoor air quality to protect against smoke and wildfire through methods such as requiring installation of MERV filters in new developments and identifying additional clean air centers and resilience spaces within residential areas.*

Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

Expand and allow community-serving uses such as retail, restaurants, and personal services within areas that are primarily residential, and increase opportunities to add multi-family housing in commercial areas that are well-served by transit. Encourage sustainable transportation choices and improve pedestrian activity with new housing development, potentially by reducing vehicular parking requirements in new development and/or requiring transit, cyclist, and pedestrian access design features. Work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. Ensure that new transit-oriented development is accompanied by tenant protection policies described in Policy 1.1.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2023 – 2025 and Ongoing*

Objectives: *Significantly increase infill, transit-oriented development and mixed-use development to meet housing need.*

Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.

The City will study options to provide financial assistance to property owners for the remediation of environmentally contaminated sites, such as former gas stations or auto mechanic shops, which are being developed for housing. Funding priority will go to sites with proposed affordable housing projects.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State of California's Equitable Community Revitalization Grant Program, United States Environmental Protection Agency Brownfields Grants program*

Timeframe: *Ongoing, 2023-2031 as funding is available*

Objectives: *As suitable funding is available, Oakland will study and/or remediate contaminated sites to the maximum feasible extent.*

Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.

The AHSC program, administered by the Strategic Growth Council and implemented by HCD, distributes Statewide Cap-and-Trade funding for affordable housing developments (new construction or renovation) and sustainable transportation infrastructure projects. Successfully implemented, the AHSC program transforms California cities into places where residents can get everywhere they want to go without having to drive. The City of Oakland will apply directly or support partners such as nonprofit and for-profit housing developers, transportation and transit agencies, and joint powers authorities to apply for AHSC grant funding.

Responsible Party: *Oakland Department of Housing and Community Development; DOT; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase affordable housing development through application for AHSC funding to meet housing need.*

Action 5.2.5: Encourage climate-resilient housing.

Consistent with the City's Equitable Climate Action Plan (ECAP) and Ordinance 13632 CMS, all newly constructed buildings in Oakland are prohibited from utilizing natural gas or connecting to natural gas infrastructure. The City will continue to support property owners in building electrification and seismic safety retrofits, prioritizing funding in frontline and disadvantaged communities. The City will work with organizations such as the U.S. Green Building Council to recognize net-zero energy projects with sustainable and resilient design, including passive design and energy- and water-efficient systems. The City will continue to require all projects that meet the Green Building Ordinance for Private Development thresholds comply with green building standards, exceeding CALGreen Standards, and will encourage and promote green features such as durable low-embodied carbon materials, green and cool roofs, electric vehicle charging stations, and others such features during the permitting and entitlements process. The City will continue to require green building certification under BuildItGreen.org's GreenPoint Rated or LEED Certification systems and give preference to projects scoring higher in the Green Point Checklist, or which meet or exceed LEED Gold level, in the NOFA scoring process. The City can promote and expand existing programs to provide education and incentives to property owners and residents who implement water conservation, energy conservation, waste reduction, and resilient landscaping measures. The City will ensure that new housing development within areas subject to flooding associated with sea level rise encourage placement of life safety,

mechanical, and electrical systems above flood elevations (i.e., second story or higher). The City will also encourage the addition of community spaces within residential areas that can provide emergency services in the event of a natural disaster or power outage.

Responsible Party: *Oakland Public Works Department; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase construction of climate-resilient housing to meet housing need.*

Action 5.2.6: Consider adoption of a disaster reconstruction overlay zone.

The City will consider the adoption of a disaster reconstruction overlay zone to streamline reconstruction following a natural disaster. Such a zone would establish ministerial approvals and streamlined permitting for the reconstruction of homes after a natural disaster, similar to reconstruction zoning created in Santa Rosa following the Santa Rosa Wildfire. This could accelerate reconstruction, require rebuilt homes to adhere to the latest earthquake and fire safety standards, and reduce the impacts of disasters on housing affordability in Oakland.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *State and federal grants, as available*

Timeframe: *2023 - 2027*

Objectives: *Consider adopting a disaster reconstruction overlay zone to meet housing need in response to potential disasters.*

Action 5.2.7. Encourage new affordable housing in higher resource neighborhoods.

Affordable housing units, including both publicly-assisted housing and housing choice vouchers, tend to be concentrated in low resource and high segregation and poverty areas., while higher resource neighborhoods have avoided providing their share of affordable units through low-density zoning that has largely prevented development at the scale necessary for affordability. To expand where affordable housing units are located, including both publicly assisted housing and housing choice vouchers, the City will encourage further affordable development in higher resource neighborhoods through allowing for higher densities and streamlined approval for affordable projects. In its annual competitions for the award of housing development funds, the City will continue to give preference to projects in areas which help advance desegregation and are located in neighborhoods with strong educational quality. Further efforts may include working with affordable developers to identify appropriate sites in high resource

neighborhoods and providing direct outreach and resources to Section 8 voucher holders and landlords to find appropriate housing in higher resource areas (see also Action 3.3.2). Actions 3.2.1 and 3.4.1 will also help increase the availability of housing within higher resource neighborhoods.

However, while increasing affordable development in higher-resource neighborhoods is a State priority, it only represents one strategy towards increasing opportunity for historically disadvantaged residents. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. These neighborhoods are also often rich in transit and service resources tailored to community needs. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). These efforts are also described in Goal 1 and Goal 2. Oakland HCD's New Construction Notice of Funding Availability has recently been modified to balance scoring to between being in higher-resource and high performing schools (for family housing) with the goal of seeking to increase investment in areas of the City that have suffered from economic and infrastructural disinvestment, as well as prioritizing affordable housing in areas where low income residents are especially vulnerable to displacement pressures.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General fund, permit fees, other local, State, and federal funding sources as available*

Timeframe: O*ngoing, 2023-2031*

Objectives: *Oakland's residential dissimilarity index (which compares racial segregation across neighborhoods) will decrease by at least 10% by 2031.*

Action 5.2.8: Promote the development of mixed-income housing to reduce income-based concentration.

As noted previously, lower-income housing tends to be concentrated in lower resourced neighborhoods. The City will work to promote mixed-income developments to further reduce the geographic isolation of lower-income units and promote increase neighborhood investment in distressed areas. The City will encourage use of the State Density Bonus program, promote mixed-income development in specific plan areas, and access CalHFA bond recycling facility for mixed-income projects.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Significantly increase production of mixed-income housing and reduce income-based concentration to match housing need.*

Action 5.2.9: Provide accountability measures for housing programs, including annual monitoring.

The Housing Element is a living document that provides a roadmap for the next eight years. As such, the City will actively monitor activities undertaken to meet program objectives pursuant to Annual Progress Report requirements. To ensure accountability, the City will solicit annual feedback from the community to understand the effectiveness of individual programs.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Human Services Department; Oakland Economic & Workforce Development Department; Oakland Public Works Department; DOT*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Monitor and enforce Housing Element implementation to understand whether individual programs significantly improve Oakland housing conditions and address housing need.*

Policy 5.3. Protect Homeowners and Tenants from Discrimination

Action 5.3.1: Provide fair housing services and outreach.

The City will continue to partner with fair housing service providers operating within Oakland. As most housing discrimination complaints are related to a disability bias, the City will work with fair housing providers to provide additional educational resources in a variety of languages to both tenants and landlords related to disability rights in housing. The City will publicize fair housing services on its website, in City Hall, and in all housing-related programming. The City will also seek additional State and federal funding to assist fair housing providers.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.2: Enact predatory lending protections.

Predatory lending practices are a major contributor to racially discriminatory housing patterns and were one of the major factors in the previous decade's foreclosure crisis. To curb these practices, the City will work with fair housing service providers to provide educational materials and workshops in a variety of languages to inform Oakland residents of best practices. The City will promote fair lending practices to ensure that low-income residents and residents of color have fair access to capital resources needed to acquire and maintain housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.

Oakland's Black and Latinx populations experience disproportionately high rates of cost burden and tend to live in neighborhoods with higher rates of overcrowding and other housing issues. The City will work with fair housing service providers to target outreach and programming to Black and Latinx Oaklanders, as well as neighborhoods experiencing high levels of housing issues. The City will regularly monitor housing issues like cost burden, overcrowding, code enforcement complaints, and substandard housing to understand where the highest need for services exists.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Fund, permit fees, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Oakland's residential dissimilarity index (which compares racial segregation across neighborhoods) will decrease by at least 10% by 2031.*

4.2 Quantified Objectives

State law requires that quantified objectives be established for new construction, rehabilitation, conservation, and preservation activities that will occur during the Housing Element cycle. Table 4-1 provides Oakland's quantified objectives by income category for the 2023-2031 planning period. New construction estimates include units in pipeline projects, projected accessory dwelling units (ADUs), and the minimum remaining RHNA capacity.

Table 4-1: City of Oakland 2023-2031 Quantified Objectives

	New Construction[1]				
Income Category	*Pipeline Project*	*Projected ADUs*	*Remaining RHNA*	*Rehabilitation*[2]	*Conservation/ Preservation*[3]
Very-Low-Income[4]	2,176	890	4,422	-	-
Extremely-Low-Income[4]	1,088	445	2,211	-	-
Low-Income	2,388	890	1,035	751	258
Moderate-Income	364	198	4,564	-	-
Above-Moderate-Income	9,152	-	4,111	-	-
Total	14,080	12,020	4,089	-	-

1. New construction objectives represent the City's RHNA for the Sixth Cycle Housing Element update. Estimates include units from pipeline projects and projected accessory dwelling units (ADUs).
2. Estimates are derived from the City's 2020/2021 Consolidated Annual Performance and Evaluation Report.
3. Conservation/preservation estimates are based on the estimated number of assisted units that are at risk of conversion to market rate, as discussed in Appendix B.
4. The extremely-low-income housing need is assumed to be 50% of very-low-income housing need. Quantified objectives for very-low-income housing includes extremely-low-housing objectives.

Re: City of Oakland Housing Element Update

Dear Catherine Payne,

Please accept these comments on the above referenced Housing Element Update on behalf of the members of Carpenters Local 713, which represents working men and women in the city of Oakland and Alameda County. We appreciate the opportunity and look forward to working together on this important endeavor.

To meet the urgent need for housing units outlined in the State's Regional Housing Needs Allocation (RHNA), as well as the policy goals outlined in the City of Oakland Housing Element and larger General Plan, it is vital that the City of Oakland support efforts to build the local construction workforce. Local 713 has long been at the forefront of training the next generation of construction workers, opening pathways to the industry for diverse and traditionally underserved populations, and embracing new technologies and delivery methods to expedite the construction of much needed housing.

The City of Oakland Housing Element notes in its housing constraints analysis that a shortage of construction labor can significantly increase "the time necessary to complete the development of a project."[1] Indeed, the Housing Element Update also outlines that construction workers make up a lower proportion of overall employment in Alameda County than even that of the wider Bay Area,[2] where an acute shortage of housing production and labor is also a pressing, widespread issue.

To be clear, neither Alameda county nor the City of Oakland have enough skilled, highly productive residential construction workers to build the 26,000+ units that the city of Oakland is

[1] Page 609: Oakland Housing Element compiled with appendices.
[2] Page 274: Ibid.

supposed to produce over an 8 year time period.[3] This is itself an almost 80 percent increase from the prior Housing Element cycle's RHNA goals.[4] However, as the housing crisis in our communities has continued to deteriorate in recent years, the number of workers employed in residential building construction in Alameda County has actually decreased by 18% since 2004.[5] A continuously shrinking residential construction workforce cannot build 26,000 units of housing in 8 years.

To support the policy goals of the Housing Element, Local 713 is requesting that the City add local hire and apprenticeship requirements to the General Plan and Housing Element for all residential construction projects larger than 10 units. The standards Local 713 is proposing in this comment letter would help to ensure greater benefits for the broader community, help ensure that construction labor needs are met, and guarantee that new residential development projects within the City are making needed investments in the region's skilled construction industry workforce.

The City Should Bar Issuance of Building Permits Unless Each Future Residential Development of 10 units or Above has a Viable Apprenticeship Program and Local Hiring Requirements

The Carpenters propose the following additions to the Municipal Code of the City of Oakland. for any residential project larger than 10 units

Permitting requirements in the Municipal Code of the City of Oakland.

> A person, firm, corporation, or other entity applying for a building permit under the relevant section of the Municipal Code of the City of Oakland, California shall be required to comply with the apprenticeship, healthcare, and local hire requirements of the Housing Element and General Plan. Failure to comply with the requirements set forth in this section shall be deemed a violation of this article.

Apprenticeship:

> For every apprenticeable craft, each general contractor and each subcontractor (at every tier for the project) will sign a certified statement under penalty of perjury that it participates in a Joint Apprenticeship Program Approved by the State of California, Division of Apprenticeship Standards **OR** in an apprenticeship program approved by the State of California Division of Apprenticeship Standards that has a graduation rate of 50% or higher and has graduated at least thirty (30) apprentices each consecutive year for the five (5) years immediately preceding submission of the pre

[3] Page 11: Ibid.
[4] Page 330: Ibid.
[5] QCEW data: Difference between 2004 employment and 2020 (latest available) in Private NAICS 2361 Residential building construction for All establishment sizes in Alameda County, California, NSA

qualification documents. The contractor or subcontractor will also maintain at least the ratio of apprentices required by California Labor Code section 1777.5.

Local Hire Policy:

> Contractor will be required to provide documentation that the contractor will hire a minimum of twenty-five percent (25%) of staff for any job classification with more than four (4) employees employed whose primary residence, which is not a post office box, is, and has been, within Alameda county within 180 days of the expected date of issuance of the Notice to Proceed for the project.

While there has been a remarkable economic expansion in Oakland since 2010, rising inequality and displacement adds to the City's affordability crisis and threatens to undermine the region's strong economy. One of the updated Housing Element's key, stated focuses will be to improve opportunities and outcomes for existing residents in our community.[6] The Housing Element specifically identifies that a lack of access to living wage jobs is a key element of current inequities, and a "significant driver of homelessness in Oakland"[7] itself. There are currently no clear policy antidotes to this. Current projections for our metropolitan area foresee that precarious, low-wage forms of employment, such as in food courier delivery, will far outpace employment growth in residential construction between now and 2028.[8]

Policies that require the utilization of apprentices and a local construction workforce will help counteract such trends. In tandem with programs currently operational by Local 713 outlined below, such policies will help improve local access to the type of living wage job the community needs, and also help ensure that the City meet the goals of the City of Oakland General Plan.

Local 713 has implemented many programs that will enable the City to meet the General Plan and Housing Element goals. These programs include a robust Joint Apprenticeship Training Committee, vigorous utilization of apprentices in the City of Oakland, healthcare coverage for all members and their families, and innovation within the construction industry.

Joint Apprenticeship Training Committees (JATC's), such as the Carpenters Training Committee for Northern California (CTCNC), are a proven method of career training built around a strong partnership between employers, training programs and the government. This tripartite system is financially beneficial not only for the apprentice, but is a major benefit for the employer and the overall economy of the City of Oakland. The CTCNC monitors current market conditions and adjusts the workflow of apprentices to meet the needs of the community, heading off any shortage of skilled workers. History has demonstrated that strong utilization of apprentices throughout the private sector helped California builders produce millions of units of housing.

---

[6] Page 41: Oakland Housing Element compiled with appendices.

[7] Page 94: Ibid.

[8] EDD Long-Term Industry Employment Projections, Oakland-Hayward-Berkeley (2018-28): Couriers and Messengers (+28.4%) vs. Residential Building Construction (+11.4%). https://data.edd.ca.gov/Employment-Projections/Long-Term-Industry-Employment-Projections/sp6i-jezb/data.

CTCNC recruitment strategies include robust diversity and inclusionary outreach programs, such as pre-apprenticeship, with proven results in representative workplaces and strong local economies. It is imperative that our underserved populations have supportive and effective pathways to viable construction careers, while ensuring that employers are able to find and develop the best and brightest talent needed to thrive in a competitive economy.

Employer-paid health insurance plans for our members and their families provides preventative services to stay healthy and prevent serious illness. Timely care reduces the fiscal burden for our members and their families, and significantly reduces the utilization of safety-net programs administered by the City of Oakland and Alameda County.

Embracing new technologies and delivery systems will have a significant impact on the construction industry, particularly the residential sector. Increasing housing delivery methods reduces project durations and provides City of Oakland residents housing sooner. Local 713 is at the forefront of ensuring that new construction technologies deliver those benefits while also creating work opportunities for those already in the trades as well as those looking to begin a construction career.

Local 713 is in a unique position to address many of the key ideas outline in the City of Oakland Housing Element Update. By investing in the training and utilization of apprentices, performing outreach to ensure that the workforce closely mirrors the demographics of our local community, providing employer-paid healthcare for our members and their families, and promoting innovation in the residential construction sector, Local 713 is prepared to assist in closing the affordability gap in the City of Oakland and the Bay Area. We look forward to engaging City staff and elected leaders as the Housing Element moves forward and working cooperatively to bridge the needs of the City with the skills and tools of Local 713.

Thank you for your time and consideration of these comments.

Sincerely,

Daniel Gregg
Senior Field Representative
Carpenters Local 713

Comments on the "City of Oakland 2023-2031 Housing Element Draft - Public Review May, 2022"

jongabel@rcn.com <[redacted]>
Fri 6/10/2022 10:26 AM
To: Lieberworth, Audrey <[redacted]>;General Plan <generalplan@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

I ask that my comments below on the **"City of Oakland 2023-2031 Housing Element Draft - Public Review May, 2022**" be entered into the public record.

I am a 47 year resident of Rockridge, Oakland and a neighborhood activist. My latest effort is a website, www.PreserveRockridge.com, which is dedicated to (surprise, surprise!) preserving this neighborhood. My website contains some lengthy material which is relevant to my comments below, so I have tried to keep these comments brief and provide links for the details.

I wish to take issue with several aspects of the Housing Element Draft:

1. Some of the stated goals in the Housing Element Draft are at odds with City policy, particularly with respect to Rockridge

As noted in the Housing Element Draft, Chapter 1: Introduction, Page 4:

"In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color.

"The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities."

As long as 100 years ago, Rockridge was a vibrant residential and business district. Construction of the Grove-Shafter freeway (Highway 24) and BART in the 1960's devastated the existing businesses. Half of them closed and crime was rampant. In 1973, the Rockridge Community Planning Council (RCPC) worked with the City of Oakland to rezone College Avenue and Rockridge, which led to its recovery and current prosperity. (For details, see www.PreserveRockridge.com/UpDownAndUp)

The people of Rockridge responded and brought our neighborhood back. With no funding and little help from the City of Oakland, Rockridge was resurrected after the BART and Highway 24 construction was completed. Old homes, including many Craftsman houses, were preserved and restored. Rockridge funded and built its own branch library. Parental support has helped make local public schools desirable. Strong local activism has resulted in many public benefit projects.

We should be lauded for this (For details, see www.PreserveRockridge.com/Accomplishments). But instead, the City of Oakland has adopted

and supported policies – like SB9 - which threaten the viability of the community which rebuilt Rockridge. Quoting from the home page of www.PreserveRockridge.com:

“The creation of financial incentives to tear down existing single family houses and replace them with larger market rate buildings would:

“- Eventually destroy the beautiful and architecturally historic Craftsman houses that we presently have;
- Push out the community that individually and collectively rebuilt itself after the construction of BART and Highway 24 right through the heart of it;
- Actually be a vehicle for real estate interests to make big profits.”

Again, from the Housing Element Draft, Pages 11-12:

“This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders… The goals include:

“1. Protect Oakland Residents from Displacement and Prevent Homelessness: Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.

“2. Preserve and Improve Existing Housing Stock: Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.
…

“5. Promote Neighborhood Stability and Health: Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities.”

These stated goals are at odds with the actual performance of the City of Oakland. The passage of SB9 by the State of California has enabled this threat to Rockridge and to other neighborhoods throughout the State. Oakland’s support of SB9 has put it in a tiny minority of California cities.

The following cities supported the passage of SB9:

Alameda, Oakland, and San Diego.

The following cities opposed the passage of SB9:

Arcata, Azusa, Bellflower, Belmont, Beverly Hills, Brea, Brentwood, Burbank, Calabasas, Camarilla, Carpinteria, Carson, Cerritos, Chino, China Hills, Clayton, Clearlake, Clovis, Colton, Corona, Costa Mesa, Cupertino, Cypress, Del Mar, Diamond Bar, Dorris, Downey, Dublin, Eastvale, El Segundo, Escalon, Fillmore, Fortuna, Foster City, Fountain Valley, Garden Grove, Glendora, Grand Terrace, Half Moon Bay, Hesperia, Hidden Hills, Huntington Beach, Indian Wells, Inglewood, Irvine, Irwindale, Kerman, King,
La Canada Flintridge, La Habra, La Habra Heights, La Mirada, La Palma, La Quinta, La Verne, Lafayette, Laguna Beach, Laguna Niguel, Lakeport, Lakewood, Lancaster, Lawndale, Lomita, Los Alamitos, Los Altos, Malibu, Martinez, Maywood, Menifee, Merced, Mission Viejo, Montclair, Monterey, Moorpark, Murrieta, Newman, Newport Beach, Norwalk, Novato, Oakdale, Ontario, Orinda, Pacifica, Palm Desert, Palo Alto, Palos Verdes Estates, Paramount, Pasadena, Pinole, Pismo Beach, Placentia, Pleasanton, Poway,

Rancho Cucamonga, Rancho Palos Verdes, Rancho Santa Margarita, Redding, Redondo Beach, Ripon, Rocklin, Rohnert Park, Rolling Hills, Rolling Hills Estates, Rosemead, San Buenaventura, San Carlos, San Clemente, San Dimas, San Fernanda, San Gabriel, San Jacinto, San Marcos, San Marino, Santa Clara, Santa Clarita, Santa Monica, Santa Paula, Saratoga, Signal Hill, Simi Valley, South Gate, South Pasadena, Stanton, Sunnyvale, Temecula, Thousand Oaks, Torrance, Tracy, Upland, Vacaville, Ventura, Visalia, Vista, West Covina, Westlake Village, Whittier, Yorba Linda, Yuba City

(For a more detailed discussion of SB9's impact on Rockridge, see www.PreserveRockridge.com/ZoningBusting)

2. The Housing Element Draft appears to subscribe to "Trickle-down" housing theory, which is false and similar to "Trickle-down" economics

Again from the Housing Element Draft, Page 63:

"POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS
"Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

"The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures.

"The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) and Mixed Housing Type Residential (RM) zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet to remove constraints on lot splitting."

I believe that there is support locally for allowing single family homes to be converted into duplexes; and ADU conversions are popular under existing statutes. But SB9-style changes which would incentivize tear-downs of existing homes in favor of market rate multiple unit dwellings – with no affordable housing required – is opposed locally by a margin of around 2 to 1. Adoption of Policy 3.2 would be counter to public sentiment here, and would be in contradiction of three of the Chapter 4: Housing Action Plan goals.

The concept that building more market rate housing will result in more affordable housing is called "Trickle-down" housing theory. It is false and is equivalent to "Trickle-down" economics.

"Trickle-down" economics theory, also referred to as "supply side" economics, "Reaganomics", and (by President George H.W. Bush) "voodoo" economics, is believed by most Americans to be false. However, it is still being promoted by some Republicans. "Trickle-down" housing theory, also referred to as "filtering" or "housing as opportunity", is based on the same concept as "trickle-down" economics: that increases in the supply of market rate housing will "trickle-down" to provide more affordable housing. Unlike "trickle-down" economics, "trickle-down" housing theory is being promoted by supposedly progressive Democrats.

The basic fallacy of “trickle-down” housing theory is that there is not a single unified housing market. To the contrary, supply and demand are different in different price ranges of housing. The "housing market" actually consists of multiple, non-intersecting sub-markets delineated by price. “Trickle-down” housing theory is not supported by econometric modeling, as shown in “The Maze of Urban Housing Markets: Theory, Evidence, and Policy” by Jerome Rothenberg et al.

Unless upzoning is tied to a requirement for truly affordable housing, it serves developers at the expense of the current residents. (For a detailed discussion of this topic, see www.PreserveRockridge.com/trickledown)

3. Lack of inclusion in the process

2.1 Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version.

There is an organization that represents Rockridge: the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC’s monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom meetings were held.

Chapter 1: Introduction of the Housing Element Draft, Page 5 has a heading:

“CHARTING AN EQUITABLE, INCLUSIVE FUTURE”

Both the process of producing the **“City of Oakland 2023-2031 Housing Element Draft - Public Review May, 2022**” and its contents are not equitable. Some neighborhoods were excluded from the process. The draft promotes “Trickle-down” housing theory, which does not produce truly affordable housing but does produce profits for real-estate developers. And enabling the destruction of a neighborhood, Rockridge, that brought itself back from an earlier round of destruction is the antithesis of what a City Plan should do.

Sincerely,

Jonathan Gabel

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Hello, I'm responding as a resident and not in my role as a city employee.

POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS
- The City should take **a much more proactive approach** to expanding the role of land trusts and other collective ownership strategies that take housing either into the City's, or the community's hands. The words "explore" and "support" are passive words, and don't commit the City to changing how it does business. Merely studying and considering these strategies continues to let primarily private developers make decisions about how the City's housing stock is built, and their decisions are not in the best interests of our residents. We need to move the City away from relying on the whims of the market and let Oakland residents take collective ownership of their land and housing.

Reduce the police budget and put it into other City priorities so that we have money in a dedicated housing fund to help subsidize rent for our most underserved residents living paycheck to paycheck. 32% of americans cannot afford a $400 emergency, and providing our residents with stable housing can help them stay on their feet.

Action 3.4.3: Revise citywide parking standards
- Please implement parking maximums city-wide, or with neighborhood-specific approaches. Developers still think there's a "market demand" for providing more parking than necessary, even in Downtown where we're trying to limit parking. While there's no minimum Downtown, developers are not reducing parking supply, such as at 1919 Webster, where the developer is currently proposing an extra wide driveway which will create conflicts with the future bike lane that's planned for Webster.

Thank you for your time,
Colin

Re: Oakland Housing Element Update – Tenant Opportunity to Purchase Act & Affordable Housing Preservation Funding

Dear Honorable Oakland City Councilmembers:

We are Alliance of Californians for Community Empowerment, Asian Pacific Environmental Network, Causa Justa :: Just Cause, the East Bay Permanent Real Estate Cooperative, the Oakland Community Land Trust, Oakland Tenants Union, PolicyLink, Public Advocates, and Urban Habitat. We urge the City of Oakland to take meaningful action in the 6th Cycle Housing Element update to address the unmet housing needs of low-income households and commit to policies and programs that affirmatively further fair housing. **Specifically, we are calling on the City to commit to (1) passing a strong Tenant Opportunity to Purchase Act by 2023 and (2) reauthorizing Measure KK with significantly increased funding (at least $350 million) for anti-displacement and affordable housing preservation.** These actions are essential to prevent displacement, stabilize current residents and existing communities, and preserve affordable housing for the long term.

Renters at risk of displacement in Oakland urgently need TOPA so that they can stay in their communities and have a voice in their housing options. Tenant Opportunity to Purchase Act (TOPA) policies give tenants and qualified organizations, like community land trusts and nonprofit affordable housing developers, the right to make the first offer and the right to match competitors' offers so that they can purchase their homes when offered for sale. As a key intervention against speculation, TOPA preserves housing as permanently affordable for future generations. TOPA expands stability and wealth-building opportunities for tenants by creating pathways to homeownership. TOPA does not require landlords to sell their properties or sell for less than market rate.

Both the implementation of a strong TOPA policy and dedicated funding for preservation are essential to actually preserving units as permanently affordable. Funding to support the acquisition and rehabilitation of properties is critical to ensure that TOPA leads to meaningful outcomes. As a package, this policy coupled with much-needed preservation resources will create new permanently affordable housing in Oakland and allow Oakland residents to stay in their current homes, avoiding the disruption and trauma of displacement.

Concrete commitments to pass TOPA on an urgent timeline and increase funding for affordable housing preservation will advance multiple Housing Element requirements. Among these, Oakland is required to address the housing needs of low-income households, identify specific strategies to conserve and improve affordable housing stock, and Affirmatively Further Fair Housing (AFFH). The acquisition and preservation of currently market-rate rental housing stock as permanently affordable housing is a crucial strategy that would help Oakland meet these obligations.

Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline

"Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act," as currently drafted,[1] is both insufficient to meet the needs of low-income community members and people of color at risk of displacement and inadequate to meet state statutory requirements. Action 2.2.8 states, "Oakland will study, and if appropriate implement, a TOPA/COPA policy by 2025."

"Studying" TOPA is unlikely to yield any benefit, and is also unnecessary as City Staff have already been exploring this policy for years, including drafting several different Tenant/Community Opportunity to Purchase ordinances since 2019, at the direction of two different City Council Members.

Moreover, state law requires all Housing Element programs to have beneficial impact within the planning period, including identification of specific actions, which agency or official is responsible for those actions, and a timeline.[2] Programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved."[3] A recent survey of HCD reviews of draft housing actions from Southern California jurisdictions emphasizes that time bound actions with "specific commitments [from local actors], metrics, and milestones" are required and that jurisdictions are expressly discouraged from relying on vague words like "study" or "explore" as such non-specific actions are unlikely to have any real-world impact within the planning period.[4]

Action 2.2.8 should instead commit to passing TOPA by 2023. A TOPA policy should include several key components – a right of first offer and right of first refusal for tenants (and for qualified organizations if tenants assign or waive their rights); sufficient timelines for tenants and qualified organizations to organize, negotiate a contract, secure financing, and close; technical assistance for tenants to understand the process, financing, and different ownership options; permanent affordability restrictions on all TOPA purchases; and clear enforcement mechanisms if owners of covered properties fail to comply with the law.

[3] Gov. Code § 65583(c)(10)(A)(iv).
[4] ABAG, Affirmatively Furthering Fair Housing (AFFH) Policy Tips Memo Learning from Southern California & Sacramento: Early Experiences in Complying with AB686.

Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation

"Action 3.3.18: Reauthorize Measure KK"[5] should commit to significantly increased funding for anti-displacement and affordable housing preservation. As currently drafted, the objective simply states, "The size of the new infrastructure bond and the amount set-aside for Affordable Housing is still being determined."[6] It goes on to provide details about the number of units of housing preserved under Measure KK.[7]

Action 3.3.18 should provide additional details and clear commitments about the reauthorization of the infrastructure bond measure, such as the size of the bond, the amount set-aside for affordable housing, and the number of housing units that will be preserved. As discussed above, state law requires all Housing Element programs to include identification of specific actions, and programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved."[8]

Action 3.3.18 should commit to set aside at least $350 million of the general obligation bond for anti-displacement and affordable housing preservation projects. The 2016 measure only set aside about 16 percent ($100 million) of the $600 million general obligation bond for affordable housing. Given the scope of the housing crisis in Oakland, we need more funding for resident-led and community land trust-supported preservation projects. And because low-income tenants lack the financing to purchase their own homes, this consistent funding source dedicated to preservation will be essential to make a TOPA policy effective.

TOPA and Affordable Housing Preservation Funding Address Unmet Needs of Low-Income Households

Housing Element law requires jurisdictions to develop an assessment of housing needs for all income levels and a plan to address these needs.[9] A TOPA policy and enhanced affordable housing preservation funding will clearly address the identified housing needs in Oakland's draft Housing Element. According to the draft Oakland Housing Needs Assessment, "housing affordability is particularly out of reach for lower-income households."[10] Nearly half (46.5 percent) of all renters experience some level of cost burden.[11] 11.5 percent of renter occupied households experience overcrowding.[12] Nearly half of all households in Oakland live in tracts at risk of or experiencing gentrification, while almost a quarter live in tracts susceptible to or experiencing displacement.[13]

[11] *Id.*
[12] *Id.* at B-34.
[13] *Id.* at D-58.

TOPA is a proven strategy to address these unmet needs of low-income renter households – the high rates of cost burdens, overcrowding, and displacement risk. For households facing unaffordable rent increases,[14] doubling up with friends and family, and paying more than 30 percent of their income on rent, the time to "study" proven anti-displacement strategies like tenant opportunity to purchase policies is long overdue. TOPA policies can only effectively address the unmet needs of low-income households when coupled with a dedicated funding source to assist in financing tenant purchases.

TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing

Affirmatively Furthering Fair Housing (AFFH) means taking meaningful actions to address disparities in housing needs and access to opportunity, and that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.[15] Protected characteristics under California law include race, sex, national origin, and disability status.[16] In this Housing Element Cycle, cities and counties are now required to analyze the fair housing issues, including "disproportionate housing needs" and "displacement risk" of members of protected groups, and identify and prioritize concrete actions to remedy these injustices.

The draft Oakland Housing Element correctly identifies that "[m]ost of Oakland is considered vulnerable to displacement pressures."[17] The City identified "disproportionate housing needs and displacement risk" as a fair housing issue with one of the contributing factors as "high rates of cost burden for renters and BIPOC individuals."[18] One of the goals and actions the City identified to address this fair housing issue is "implement[ing] affordable housing preservation … strategies."[19] This should be a high instead of medium priority.

As communities of color continue to be the primary demographic affected by displacement and lack of affordable housing in Oakland based on local data,[20] Oakland should put forward

[14] Oakland rents have risen by 47.3 percent since 2009. ABAG/MTC Housing Needs Data Report: Oakland, April 2, 2021, p. 38.
[15] Gov. Code §§ 65583(c)(5), 8899.50(a)(1).

[18] *Id.*
[19] *Id.*
[20] Since 2000, Oakland's Black or African American population has decreased by 41,390, resulting in its share of population decreasing from 36.26 percent to 23.23 percent. City of Oakland 2023-2031 Housing Element Draft – Public Review, May 2022, p. B-7. From 2000 to 2018, the Black population in Eastmont experienced a 53 percent decrease. *Id.* at D-57. Communities of color are particularly impacted by displacement as housing costs increase. *Id.* The highest rates of cost burden are experienced by Black or African American and Hispanic or Latinx households. *Id.* at B-37. "Between 2010 and 2017, Black, Hispanic, and Asian or Pacific Islander residents were all being displaced in Oakland and replaced by white residents." *Id.* at D-58. "Homelessness … impacts Oakland residents unequally by race/ethnicity …, the vast majority of unhoused Oakland residents are Black (about 70.0 percent)." *Id.* at. B-27. Overcrowding is most prevalent among Hispanic or Latinx households and other race or multiple race

concrete commitments to pass TOPA by next year and significantly expand preservation funding to address these fair housing issues. TOPA policies effectively prevent displacement, preserve existing housing as affordable for the long term, and convert market rate housing into permanently affordable housing stock.

As stated in Oakland's draft Housing Element, "actions that preserve the affordability of existing homes also play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the gentrification of their neighborhoods… A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability of benefits of homeownership."[21]

Oakland Must Incorporate Input from Renters and Low-Income People in the Housing Element Process

Jurisdictions must make a "diligent effort [...] to achieve public participation of all economic segments of the community in the development of the housing element." During the public engagement process, low-income residents and community-based organizations representing low-income people and members of protected classes identified housing preservation as a top priority.[22] The City highlighted that a key public participation theme that emerged to mitigate the pressures of displacement and gentrification was preserving the city's existing affordable housing stock, "including through implementation of a Community/Tenant Opportunity to Purchase Act" and "innovative solutions to maintain permanent affordability like community land trusts."[23] As we have detailed above, "investigating" a Tenant/Community Opportunity to Purchase Act is an insufficient action to respond to this community-identified priority.

Our local TOPA campaign is deeply rooted in the needs of the community, as this policy aims to support tenants at risk of displacement, facilitate tenant organizing and power-building, stabilize gentrifying neighborhoods, and take property off the speculative market and place it under community control. Oakland residents need the City of Oakland to take concrete steps in the 6th Cycle Housing Element to not only meet its legal obligations, but to ensure that every resident can continue to thrive and prosper here without fear of losing their homes.

We look forward to working with the City of Oakland to develop a TOPA program with a consistent funding source. We urge the City to make concrete commitments in the Housing Element update to pass TOPA by 2023 and to reauthorize Measure KK with at least $350 million

Super helpful, as always. And I heard from Tia and one of our current cohort members that the workshop last Thursday was excellent!

Re: zoning/densities for the site at 8400 Enterprise Way (City of Refuge), it looks like 5-6 stories, up to 100 units/acre, mixed-use multi-family housing and ground floor services/retail would be ideal. Between now and the fall, COR will be doing more work to further refine a more specific project vision, and I'd love to share where they land with you.

Let me know if you have any questions for us.

Elizabeth

Hi Elizabeth & Tia,

Great! Tia - in case you didn't already do so, make sure to sign up for the Housing Element workshop tonight.

Yes, the sites inventory is the table on pages 109-116 that you linked to.

Based on community feedback, the City and Housing Element/General Plan Update consultants are already in the process of identifying areas that could potentially be rezoned/upzoned. The City and our consultants will be studying the environmental impact of rezoning/upzoning this summer and into the fall. The zoning amendments will be taken through public hearing alongside of the Housing Element in early 2023.

Please let me know if you have any further questions!

- Audrey

Hi Audrey,

Sorry for not replying more quickly!

1) LOVE the idea of the overlay you mentioned. My colleague Tia Hicks (cc'ing her here) is going to attend the evening workshop on Thursday and we're excited to learn more.
2) I finally had a chance to review all of our current cohort member sites, and it looks like everyone besides City of Refuge (8400 Enterprise Way) is in the site inventory. (Just to confirm I'm looking at the right table, I'm seeing them all in the table on pages 109-111 in this document: https://cao-94612.s3.amazonaws.com/documents/Appendix-C-Sites-Inventory_clean_2022-05-13-171306_rmga.pdf)
3) We can share some preliminary estimates re: density, heights, and units for the COR site by Monday, but they'll be very early estimates at this stage. I'll be back in touch when we have those numbers.
4) Re: 8800 Fontaine (United Lutheran Church of Oakland) – I see is included with a capacity of 53 units. That looks right to me, though of course I would defer to the church representatives.

One more question for you – for the sites listed in the inventory that will need a zoning amendment – do you have a sense of when the City would decide to take on that rezoning task?

Thank you!

Subject: Re: Alameda County Affordable Housing with Faith Based Orgs

Great question!

One of the actions included in the Housing Element's Housing Action Plan is to create an affordable housing overlay zone which would apply broadly citywide, except in high fire risk zones and protected historical sites. In this overlay zone, the City is considering streamlining approval of affordable housing by right (could apply to mixed income projects). It could also include ministerial

approval of 100% affordable projects, increased height and density, waiver of parking, and reduction of zoning barriers. This could potentially support faith orgs in your current and future cohorts.

We'll actually discuss the affordable housing overlay (as well as gather general feedback on the draft Housing Element) at our upcoming Housing Element discussion session next Wednesday, June 8th from 10-11:30am. Are you interested in joining? I'm happy to send you the calendar invite. I think some members of the Faith and Housing first and second cohort are attending. We may also discuss it at the Housing Element public workshop next Thursday, June 9th from 6-8pm, if that time works better for you.

Thanks Audrey! I'll work on this today.

Do you think the City would be open to considering an overlay for all faith-owned land as part of the housing element? We can include the folks we're working with now, but I'm guessing this will come up again for faith organizations in future cohorts.

Hi Elizabeth,

Great, I've added 8400 Enterprise Way to the list of sites/broader areas that we should consider for zoning amendments.

I scrolled back and reviewed Cindy's initial messages with the cohort 1 and 2 spreadsheets she sent over. I saw her note about wanting to upzone 8800 Fontaine Street. For 8400 Enterprise Way, 8800 Fontaine St and any other sites that you would like us to add to the sites inventory and/or consider for upzoning or zoning amendments, could you please share the following info?:

- Desired zoning - base zoning, height, densities, etc
- Updates on project overview, # of units, etc (if it's changed from what's written in the spreadsheet)

This will give Staff a better understanding of what's needed for those sites and perhaps the broader area when we are discussing zoning amendments. I also know that zoning is a bit complicated, so please feel free to reach out if you have any questions or need help navigating the zoning. Our website says the public comment period for the Housing Element closes on Monday, June 13th, but you can still provide feedback afterward.

Thank you for coordinating this!

Subject: Re: Alameda County Affordable Housing with Faith Based Orgs

As a quick follow up - it looks like 8400 Enterprise Way is located in the CR-1 zone, or Regional Commercial zone, which prohibits residential activities.

If you can send me a list of any other sites, I will look into them and coordinate with other staff. We are proposing a series of zoning amendments alongside of the Housing Element that could change where residential uses are allowed, so let's continue to touch base and I will keep you in the loop.

Hi Elizabeth,

Thank you so much for taking a look! Can you send me the list of all sites that were not included? The only reason I can think that the sites may have been screened out is if they fall in the Very High Fire Hazard Severity Zone, if the site zoning does not allow residential by-right, or something of that nature.

Please let me know and I will make sure to follow up with you about any missing sites. Thank you!

Hi Audrey,

I hope you're doing well! I was looking at the draft Housing Element (congrats on getting a draft out!) and had a question. I noticed that several of the faith-based organizations that we've worked with have their sites listed, which is wonderful. But there were a few missing, and I was wondering if there was a reason for that.

I'm wondering in particular about City of Refuge, located at 8400 Enterprise Way, Oakland, CA 94621.

Let me know if you have any insights? And of course happy to work through official feedback channels as well.

Thank you!

TransForm

Our communities. Our transportation. Our future.

June 13, 2022

Oakland Planning Department
250 Frank H. Ogawa Plaza
Oakland, CA 94612

Re: Recommendation for parking component of Housing Element

Dear Oakland Planning Department,

TransForm is a regional non-profit focused on creating connected and healthy communities that can meet climate goals, reduce traffic, and include housing affordable to everyone. We have been based in Oakland for 22 years and greatly appreciate the collaborative work we have done with the community, city staff and elected leaders on bringing affordable, clean mobility options to equity priority communities

Oakland has been a leader in the Bay Area when it comes to smart parking policy. In 2015, the City eliminated parking minimums in the downtown zone and set parking minimums for residential and commercial development. These changes greatly reduced the financial and physical constraint posed by excessive parking mandates. Also by requiring unbundling for all developments of 10 or more units in the downtown development zone, it is clear Oakland understands the power of implementing many smart parking policies in tandem, a nuance missed by other municipalities.

Oakland's draft 2023-2031 Housing Element includes Action 3.4.3 which will fund a continued review of parking policies after the Housing Element is enacted. We commend this proposed action but are concerned with the lack of specificity in the proposed review. The action speaks to a "review of existing residential parking standards and the identifications of appropriate new standards to match long-term development and environmental goals" and, beyond a reference to exploring flexibility in parking requirements, the action lacks a concrete policy goal.

With the importance of implementing smarter parking policies, especially given our climate and housing affordability crises, we at TransForm want to ensure this funded review has clear goals so it is not ignored or pushed to the next Housing Element cycle. Specifically, we encourage implementing unbundling beyond the downtown development zone, and strengthening TDM by requiring provision of transit passes and bike share memberships to each resident.

To show the tremendous benefits these policies can have, we have used our GreenTRIP Connect tool to create scenarios for a potential future development site at 7000 Bancroft Ave.

GreenTRIP Connect is recommended by the California Office of Planning and Research as a tool to use while developing General Plans and is especially useful during development of Housing Elements. The tool is free to use whether planning at the site or city-wide level.

By implementing unbundling, and providing bikeshare and transit passes at this site, we saw a 26% decrease in parking and resident transportation savings of $988 per year. When combined with 100% affordable housing these strategies resulted in an incredible 50% reduction in driving and greenhouse gas emissions for the site, compared to the city average. If an affordable development with smart parking strategies were built on this site each household would drive 5,066 less miles per year creating a greener and safer community.

With a RHNA allocation of 26,251, it is essential that Oakland makes eliminating constraints to housing development such as parking a top priority for this Housing Element. Policies and investments that also maximize the amount of affordable housing will also be critical.These two crucial issues—smart parking strategies and affordable housing—go hand-in-hand and we hope the City defines concrete goals for parking reduction.

Please let me know if you have any questions. TransForm hopes this information clarifies why Oakland should make parking reform and provisions to support affordable housing central priorities in the Housing Element update.

Sincerely,
Kendra Ma
Housing Policy Analyst

To Whom it May Concern:

Attached are annotated copies of the Draft Housing Element and Appendix A to that element. The annotations contain my notes, comments and suggested edits. I am submitting them as an individual Oakland resident for more than thirty years as well as in my capacity as an East Bay land use attorney with thirty-two years' experience who has dealt extensively with housing elements and housing issues in the Bay Area.

Overall, I think that the Draft Housing Element does a good job of identifying what's working, what's not working, and what needs to be done to achieve the element's primary objective (providing housing for all of Oakland's residents – which is, I think, a very appropriate objective). However, as my annotations indicate, there are things that could be said better or more clearly, and there are some proposed actions that you may want to add, delete, or revise to improve the outcome.

Environmental, Land Use, and Elections Law

(Based on 2015-2023 Oakland Housing Element) A-6

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015
(Based on 2015-2023 Oakland Housing Element) A-13

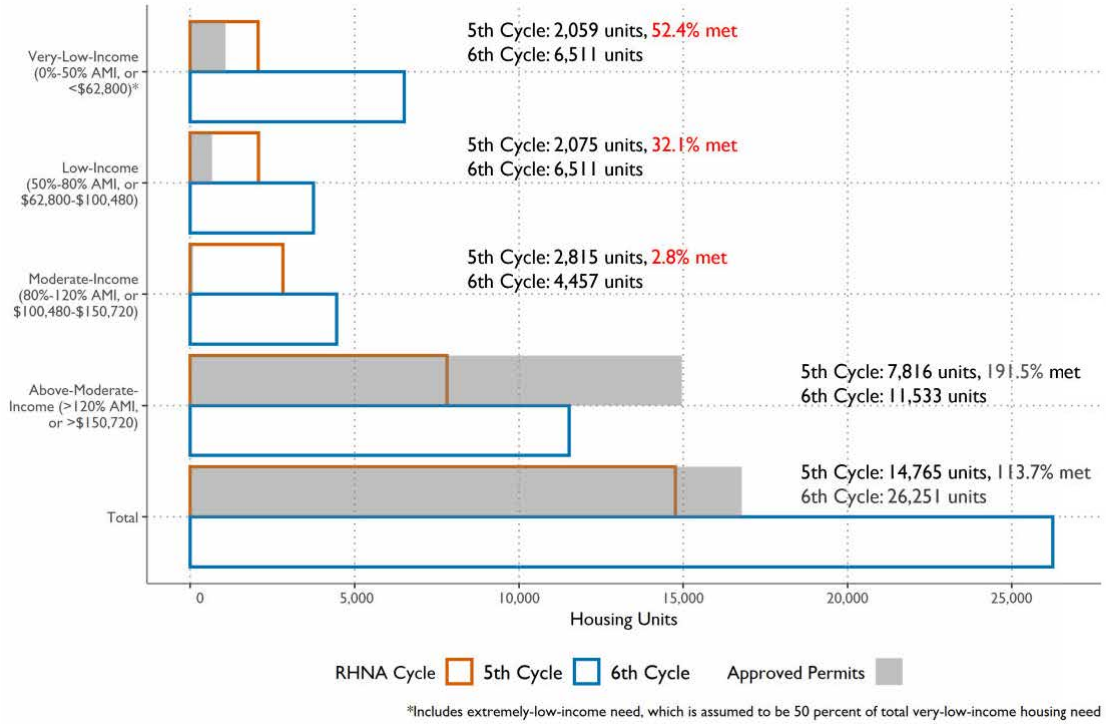
This appendix provides an evaluation of the City's previous Housing Element pursuant to State requirements, including the element's cumulative impact on special needs groups.

The City's previous Housing Element was adopted December 9, 2014, and covered the period from January 31, 2015, to January 31, 2023. California Government Code Section 65588(a) requires cities and counties to review their housing elements to evaluate:

- The appropriateness of housing goals, objectives, and policies;
- The effectiveness of the housing element in the attainment of the community's housing goals and objectives; and
- The progress in implementation of the housing element.

A.1 Regional Housing Need Allocation Progress

During the 2015-2023 Housing Element period, Oakland's Regional Housing Need Allocation (RHNA) was 14,629 housing units across all income levels. The City identified sites capable of accommodating a total of 18,009 units (123.1 percent of the RHNA). Capacity was derived from four groups: units constructed between January 1, 2014 and March 27, 2014, units receiving planning approvals, units planned, and additional capacity on opportunity sites. Approximately 21.1 percent of parcels identified to meet the 5th cycle RHNA developed with about 3,511 residential units during the planning period.



While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Above-moderate-income permitting during the period reached nearly double the RHNA, and These numbers largely reflect the strong market conditions and high housing prices present since recovery from the Great Recession, It also of course reflects the significant shortfall in funding sources and other incentives available for below market rate housing, and The COVID-19 pandemic is also likely to have a lasting impact on available City resources and housing needs in Oakland – including changes in building patterns and preferences that may increase development costs.

Unfortunately, recent studies have shown that the RHNA process asks cities to plan for more than 10 times the amount of subsidized housing than can be funded with existing funding sources, which must cover escalating land, construction, and labor costs.[1] Further, in line with

[1] Paavo et al., A Flawed Law: Reforming California's Housing Element (2019), UCLA Lewis Center for Regional Policy Studies, available at https://www.lewis.ucla.edu/research/flawed-law-reforming-california-housing-element/ (last accessed March 30, 2022).

State objectives, the City prioritizes deeper affordability when funding is available, Nonetheless, Oakland recognizes that more can and should be done to close the gap on affordable housing construction. and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland. The Housing Element process is thus critical in ensuring all California cities are doing their part.

Chart A-1: Progress Towards Meeting the RHNA, 2015-2020

Source: State HCD, 5th Cycle Annual Progress Report Permit Summary, 2021; ABAG, Final RHNA Plan, December 2021

In the seven years between 2015 and 2021, the City permitted a total of 1,079 very-low-income units (including extremely-low-income units), 666 low-income units, and 14,966 above-moderate-income units. These numbers reflect affordability provided specifically through deed restrictions that guarantee the units will remain affordable to the specified category for years to come, but does not take into account newly constructed units that may naturally be affordable to lower income households, nor does it reflect existing units that may become affordable to lower income families due to market conditions and unit age. See Chart A-1 for a comparison of approval rates to the 5th cycle RHNA, as well as a comparison to the increased 6th cycle allocation.

The Bay Area has been in the midst of an acute housing shortage or "crisis" since the end of the Great Recession (late 2009), which has continued unabated as of early 2022. The roots of the crisis lie in the significant mismatch between housing demand and housing production. This is reflected in dramatically increasing housing costs for renters and homebuyers, and increasing overcrowding and homelessness. As is discussed in Appendices B and F, the affordability gap for moderate- and lower-income residents—the gap between existing housing costs and affordable housing costs—is continuing to grow. It is in part exacerbated by the high costs of development and the limited amount of State and local funding for affordable housing – as well as income disparity, the impacts of the tech sector and regional market forces in the Bay Area, and the COVID-19 pandemic among other regional, State, and national factors. Other local factors, including City permitting processes have also contributed to constrained housing production rates. However, as noted in Appendix F, the City has permitted lower-income housing at rates comparable to other cities in Alameda County. To further address the housing crisis, the City passed Measure KK in 2016 to help fund affordable housing development – the revenues generated from this bond have already been spent and fully allocated. Further, the Affordable Housing Impact Fee was passed in 2016, and the Race and Equity Department was formed to address racial disparities in Oakland.

A.2 Evaluation of Goals, Policies, and Actions

ASSESSMENT OF GOALS AND POLICIES

The 2015-2023 Housing Element outlined seven housing goals with 46 policies and 131 policy actions to be taken to achieve those goals. The accomplishments of the goals and policies of the previous Housing Element is summarized in Table A-1 below. This is a high-level analysis meant to inform broad changes in the City's goals and policies, and the 2023-2031 Housing Element carries forward and consolidates goals and policies where appropriate.

ASSESSMENT OF ACTIONS

The policy actions contained within the previous Housing Element—131 in total—includes several duplicative or overlapping actions. Some actions do not have discrete timelines and are better suited as higher-level policies. Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions. A detailed assessment of each housing action is provided in Table A-2 below. The evaluation is based on input from a variety of City departments and agencies – including Oakland Housing and Community Development (HCD), the Planning and Building Department, the Human Services Department, and Oakland Public Works.

While housing actions are individually evaluated in Table A-2, the Housing Element must also assess the cumulative impact of housing actions on special needs groups. Goal 6, and all policies contained within it, addresses fair housing issues and promotes actions to meet the housing needs of statutorily protected groups, many of which are considered "special needs." Further, policies 2.5, 2.6, 2.9, and 5.4 directly address a variety of special housing needs such

as seniors, large families, extremely-low-income household, and persons experiencing homelessness. There are over 20 actions directly aimed at special needs groups – including persons experiencing homelessness, persons with a disability, the elderly, female-headed households, extremely-low-income households, and persons with HIV/AIDs.[2]

While the majority of these actions have been evaluated as effective, there is still a clear gap in meeting the housing needs of some special needs groups – especially those experiencing homelessness and extremely-low-income households. As indicated in Appendix B, the housing crisis has continued throughout the 2015 to 2023 period and rates of homelessness have drastically increased. Appendix F provides an assessment of the constraints to housing production and identifies potential reasons why the City fell short of meeting its RHNA. While discrete City actions may be effective, more comprehensive steps must be taken to encourage the production of emergency shelters and transitional and supportive housing, as well as housing affordable to lower-income groups. The Permanent Access to Housing (PATH) Framework to address homelessness represents one such approach that the City should continue to implement.[3] Other steps the City will take to adequately meet the needs of special needs groups during the 2023-2031 period are described in the Housing Action Plan.

[2] Actions related to special needs groups include the following: 2.5.1, 2.5.2, 2.5.3, 2.6.1, 2.9.1, 2.9.2, 2.9.3, 2.9.4, 2.9.5, 2.9.6, 2.9.7, 2.9.8, 3.1.2, 4.3.2, 4.3.3, 5.4.1, 6.1.1, 6.1.2, 6.1.3, 6.1.4, 6.2.1, 6.2.2, and 6.4.3.

[3] The PATH Framework is the City's updated five-year approach to address homelessness in Oakland, based on the following themes: 1. Prevention strategies to keep people from becoming homeless; 2. Emergency strategies to shelter and rehouse households and improve health and safety on the street and; 3. Creation of affordable, extremely low income and permanent supportive housing units prioritized for households experiencing homelessness. More information is available on the City's website: https://www.oaklandca.gov/resources/learn-more-about-our-homelessness-strategy.

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Goal 1 – Provide Adequate Sites Suitable for Housing for All Income Groups	
Policy 1.1 – Priority Development Areas Housing Program. The City will target development and marketing resources in Priority Development Areas (PDAs), and in areas for which Specific Plans have been completed or are underway. See also Policy 7.3.	While Oakland met its overall housing production goals, it did not meet the 5th Cycle RHNA for lower- and moderate-income households. During this period, the City implemented a number of actions to encourage residential development at all income levels. This includes the adoption of the Priority Development Areas, expedited review processes, development along International Boulevard with multiple affordable projects, micro-living units proposed in the Draft Downtown Oakland Specific Plan, residential development in specific plans, and encouragement of alternative housing like ADUs, manufactured housing, and live/work units. Because a significant portion of development occurred on sites that were not identified as opportunity sites in the 5th Cycle, the City has maintained an adequate supply of land to meet its 5th Cycle RHNA. Appendix C identifies additional sites for Oakland's 6th Cycle RHNA.
Policy 1.2 – Availability of Land. Maintain an adequate supply of land to meet the regional housing share under the ABAG Regional Housing Needs Allocation (RHNA).	
Policy 1.3 – Appropriate Locations and Densities for Housing. The City's Strategic Planning Division initiated five Specific Plans and one Area Plan during the 2007-2014 Housing Element period, which will further the housing location and density objectives contained in the recently completed residential and commercial zoning update. The Lake Merritt Station Area (Specific) Plan, Broadway Valdez Specific Plan, West Oakland Specific Plan, Coliseum Area Specific Plan, and Central Estuary Area Plan included extensive community outreach processes and have resulted in specific zoning proposals. These Specific and Area Plans will facilitate the construction of nearly 17,000 new housing units in the City of Oakland. The completion of the Specific and Area Plans will provide these substantial housing gains in two respects: environmental clearance and community buy-in for future housing projects. Each planning process involved extensive community participation which culminated with significant community buy-in to the policies and development framework outlined in the plans, thus minimizing possible community opposition to future housing development projects.	
Policy 1.4 – Secondary Units. Support the construction of secondary units in single-family zones and recognize these units as an important source of affordable housing.	
Policy 1.5 – Manufactured Housing. Provide for the inclusion of manufactured housing in appropriate locations.	
Policy 1.6 – Adaptive Reuse.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Encourage the re-use of industrial and commercial buildings for joint living quarters and working spaces.	
Policy 1.7 – Regional Housing Needs. The City of Oakland will strive to meet its fair share of housing needed in the Bay Area region.	
Goal 2 – Promote the Development of Adequate Housing for Low- and Moderate-Income Households	
Policy 2.1 – Affordable Housing Development Programs. Provide financing for the development of affordable housing for low- and moderate-income households. The City's financing programs will promote a mix of housing types, including homeownership, multifamily rental housing, and housing for seniors and persons with special needs.	The City has encouraged and promoted affordable housing development through a combination of incentives and funding. City efforts include the release of Notices of Funding Availability (NOFAs), predevelopment loans to non-profits, Oakland Housing Authority resources, first-time homebuyer programs, the Community Buying Program, and other loans. Impact fees, including the Jobs/Housing and Affordable Housing Impact Fee, provide funding to the Affordable Housing Trust Fund. Through the 5th cycle RHNA, there will have been approximately $150 million in total expenditures on these efforts. Other City incentives include density bonus provisions, impact fee waivers, promotion of City-owned property, geographic equity and quality in NOFA scoring, as well as promoting community land trusts, resale controls, and providing rental assistance.
Policy 2.2 – Affordable Homeownership Opportunities. Develop and promote programs and mechanisms to expand opportunities for lower-income households to become homeowners.	
Policy 2.3 – Density Bonus Program. Continue to refine and implement programs to permit projects to exceed the maximum allowable density set by zoning, if they include units set aside for occupancy by very-low-, low-, and moderate-income households and/or seniors.	
Policy 2.4 – Permanently Affordable Homeownership. Develop mechanisms for ensuring that assisted homeownership developments remain permanently affordable to lower-income households to promote a mix of incomes.	
Policy 2.5 – Seniors and Other Special Needs. Assist and promote the development of housing with appropriate supportive services for seniors and other persons with special needs.	
Policy 2.6 – Large Families. Encourage the development of affordable rental and ownership housing units that can accommodate large families.	
Policy 2.7 – Expand Local Funding Sources.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Increase local resources to support affordable housing development and develop new sources of funding.	The City also provides funding for special needs housing and implements the PATH strategy for homelessness.
Policy 2.8 – Rental Assistance. Increase the availability of rental assistance for very-low-income households.	
Policy 2.9 – PATH Strategy for the Homeless. Expand the City's Permanent Access to Housing (PATH) Plan to prevent and end homelessness and increase housing opportunities to the homeless through acquisition, rehabilitation and construction of housing, master leasing and short-term financial assistance	
Policy 2.10 – Promote an Equitable Distribution of Affordable Housing throughout the Community. The City will undertake a number of efforts to distribute assisted housing widely throughout the community and avoid the over-concentration of assisted housing in any particular neighborhood, in order to provide a more equitable distribution of households by income and by race and ethnicity.	
Policy 2.11 – Affordable Housing Preference for Oakland Residents and Workers. Implement the policy enacted by the City Council in 2008 granting a preference to Oakland residents and Oakland workers to buy or rent affordable housing units assisted by City of Oakland funds provided through its annual Notice of Funding Availability (NOFA) process.	
Goal 3 – Remove Constraints to the Availability and Affordability of Housing for All Income Groups	
Policy 3.1 – Expedite and Simplify Permit Processes. Continue to implement permit processes that facilitate the provision of housing and annually review and revise permit approval processes.	The City has undertaken a number of efforts to remove housing constraints. Rectified governmental constraints include aligning City regulations pursuant to State law (e.g., reasonable accommodation, transitional/supportive housing permitting, and emergency shelter permitting), prioritizing affordable housing applications, one-stop permitting, development impact fees, and reliance on specific plan EIRs to expedite review.
Policy 3.2 – Flexible Zoning Standards. Allow flexibility in the application of zoning, building, and other regulations.	
Policy 3.3 – Development Fees and Site Improvement Requirements. Reduce the cost of development through reasonable and predictable fees, and improvement of project review standards.	
Policy 3.4 – Intergovernmental Coordination.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Promote intergovernmental coordination in review and approval of residential development proposals when more than one governmental agency has jurisdiction.	Although the City still implements a discretionary design review process, it is currently developing objective design standards. The City continues to engage in community outreach, including with East Bay Housing Organizations (EBHO), the Non-Profit Housing Association of Northern California, the Oakland Property Acquisition Collective, and Bay Area For All Table.
Policy 3.5 – Financing Costs. Reduce financing costs for affordable housing development.	
Policy 3.6 – Environmental Constraints. Explore programs and funding sources to assist with the remediation of soil contamination on sites that maybe redeveloped for housing.	
Policy 3.7 – Community Outreach and Education. Increase public acceptance and understanding of affordable development and related issues through community outreach.	
Goal 4 – Conserve and Improve Older Housing and Neighborhoods	
Policy 4.1 – Housing Rehabilitation Loan Programs. Provide a variety of loan programs to assist with the rehabilitation of owner-occupied and rental housing for very-low- and low-income households.	The City continues to offer rehabilitation loans to lower- and moderate-income households through multiple programs—such as the Home Maintenance and Improvement Program (HMIP)—and responds housing maintenance issues through Code Enforcement Services. Other conservation and improvement efforts include the Community Buying Program, Mills Act Contracts, residential hotel (SRO) preservation requirements, and the Uniform Residential Tenant Relocation Ordinance.
Policy 4.2 – Blight Abatement. To improve housing and neighborhood conditions, the City should abate blighting conditions through a combination of code enforcement, financial assistance, and public investment.	
Policy 4.3 – Housing Preservation and Rehabilitation. Support the preservation and rehabilitation of existing housing stock with an emphasis on housing occupied by senior citizens, people with disabilities, and low-income populations. Encourage the relocation of structurally sound housing units scheduled for demolition to compatible neighborhoods when appropriate land can be found. Assist senior citizens and people with disabilities with housing rehabilitation so that they may remain in their homes. Continue to implement the Mills Act program.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Policy 4.4 – Anti-Displacement of City of Oakland Residents. The City will consider strengthening existing policies and introducing new policies or policy terms to current City policies to help prevent displacement of current Oakland residents and to preserve existing housing affordable to low-income residents, including both publicly-assisted and non-assisted housing that currently has affordable rents.	
Goal 5 – Preserve Affordable Rental Housing	
Policy 5.1 – Preservation of At-Risk Housing. Seek to preserve the affordability of subsidized rental housing for lower-income households that may be at-risk of converting to market rate housing.	There was no conversion of identified "at-risk" units during the period, although one project was destroyed by a fire. The City also continued to provide financial assistance for affordable development and preservation, including through Oakland Housing Authority resources. Other major programs include the Rent-Adjustment Program, the Just Cause for Eviction Ordinance, the Tenant Protection Ordinance, residential hotel (SRO) preservation requirements, limits on conversion of residential to non-residential uses, and limits on condo conversions.
Policy 5.2 – Support for Assisted Projects with Capital Needs. Work with owners of assisted projects that have substantial needs for capital improvements to maintain the use of the properties as decent affordable housing.	
Policy 5.3 – Rent Adjustment Program. Continue to administer programs to protect existing tenants from unreasonable rent increases.	
Policy 5.4 – Preservation of Single Room Occupancy Hotels. Seek mechanisms for protecting and improving the existing stock of residential hotels, which provide housing of last resort for extremely-low-income households.	
Policy 5.5 – Limitations on Conversion of Residential Property to Non-Residential Use. Continue to use regulatory controls to limit the loss of housing units due to their conversion to non-residential use.	
Policy 5.6 – Limitations on Conversion of Rental Housing to Condominiums. Continue to use regulatory controls to limit the loss of rental housing units due to their conversion to condominiums.	
Policy 5.7 – Preserve and Improve Existing Oakland Housing Authority-Owned Housing. Continue to preserve and improve existing Oakland Housing Authority-owned rental housing.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Goal 6 – Promote Equal Housing Opportunity	
Policy 6.1 – Fair Housing Actions. Actively support efforts to provide education and counseling regarding housing discrimination, to investigate discrimination complaints, and to pursue enforcement when necessary. Provide a one-stop resource center to address all housing issues faced by Oakland residents.	During the period, the City continued to work with the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa: Just Cause, and ECHO Fair Housing to provide fair housing services. Other effective actions related to equal housing opportunity include the Oakland Fair Chance Ordinance, publishing disability access and Affirmative Fair Marketing Procedures & Guidelines on the City's website, reasonable accommodation procedures, Community Credit Needs Assessments, and the Housing Element Annual Progress Report. The City's Department of Housing and Community Development's Community Development & Engagement section also provides resources.
Policy 6.2 – Reasonable Accommodations. Provide reasonable accommodations to persons with disabilities in access to public facilities, programs, and services.	
Policy 6.3 – Promote Regional Efforts to Expand Housing Choice. Encourage future regional housing allocations by ABAG to avoid over-concentration of low-income housing in communities with high percentages of such housing.	
Policy 6.4 – Fair Lending. Work to promote fair lending practices throughout the City to ensure that low-income and minority residents have fair access to capital resources needed to acquire and maintain housing.	
Policy 6.5 – Accountability. Work to promote accountability by City to the policies it has slated in the Housing Element.	
Goal 7 – Promote Sustainable Development and Sustainable Communities	
Policy 7.1 – Sustainable Residential Development Programs. In conjunction with the City's adopted Energy and Climate Action Plan (ECAP), develop and promote programs to foster the incorporation of sustainable design principles, energy efficiency and smart growth principles into residential developments. Offer education and technical assistance regarding sustainable development to project applicants.	The City continues to operate the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). Other actions related to sustainability include the promotion of solar energy, collaborations with Energy Upgrade California in Alameda County, Bay Area Regional Energy Network (BayREN), and East Bay Energy Watch (EBEW), and the promotion of mixed-use development, transit-oriented development, and development in PDAs.
Policy 7.2 – Minimize Energy and Water Consumption. Encourage the incorporation of energy conservation design features in existing and future residential development beyond minimum standards required by State building code.	
Policy 7.3 – Encourage Development that reduces Carbon Emissions. Continue to direct development toward existing communities and encourage infill development at densities that are higher than—but compatible with—the surrounding communities. Encourage	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
development in close proximity to transit, and with a mix of land uses in the same zoning district, or on the same site, so as to reduce the number and frequency of trips made by automobile.	In 2016, the City released the "Resilient Oakland Playbook," while in July 2020, the City Council adopted the Equitable Climate Action Plan. Further, in 2021 the City adopted a new 2021-2026 Local Hazard Mitigation Plan.
Policy 7.4 – Minimize Environmental Impacts from New Housing. Work with developers to encourage construction of new housing that, where feasible, reduces the footprint of the building and landscaping, preserves green spaces, and supports ecological systems.	
Policy 7.5 – Climate Adaptation and Neighborhood Resiliency. Continue to study the potential local effects of climate change in collaboration with local and regional partners, such as BCDC. Identify potential adaptation strategies to improve community resilience to climate change, and integrate these strategies in new development, where appropriate.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
GOAL 1: Provide Adequate Sites Suitable for Housing for All Income Groups						
POLICY 1.1: Priority Development Areas - Housing Program						
ACTION 1.1.1	*Site Identification*. Conduct an inventory of vacant and underutilized land within the City's PDAs including the MacArthur BART Station Area, West Oakland, Downtown/Jack London Square Area, Fruitvale/Dimond Area, Eastmont Town Center Area, and the Coliseum BART Station Area, identify sites suitable for housing, including estimates of the number of housing units that those sites can accommodate, and make that information available to developers through a variety of media.	Bureau of Planning	Keep updated inventory on the City's website, 2016-2023	The City has not yet conducted an inventory of vacant and underutilized land within the City's Priority Development Areas (PDA). The PDA designations were updated in 2019. The updated PDAs were adopted by the MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. The 2020 Adopted Priority Development Areas (PDAs) map is available on the City's website: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 In addition, these updated PDAs can also be found on MTC's website: https://mtc.ca.gov/planning/land-use/priority-development-areas-pdas	This action is an effective method of targeting development and marketing resources in Priority Development Areas (PDAs).	The action is appropriate to the Housing Element.
ACTION 1.1.2	*Expedited Review*. Continue to expedite the permit and entitlement process for housing developments with more	Bureau of Planning & Bureau of Building	Ongoing, 2015-23	From 2015-2021, Planners in the Bureau of Planning processed planning entitlement applications, including for larger developments in Downtown Oakland. In 2016, two new staff were	The policy is effective. Between 2018-2021 (the period during which State HCD	The action is appropriate to meet Housing Element goals.

				4) On October 17, 2016, the City of Oakland updated its CEQA Thresholds of Significance Guidelines related to transportation impacts to implement the directive from Senate Bill 743 (Steinberg 2013) to modify local environmental review processes by removing automobile delay as a significant impact on the environment pursuant to CEQA. The new CEQA thresholds help streamline the environmental review process for new infill housing development.		
ACTION 1.1.4	*International Blvd. Community Revitalization Without Displacement Incentive.* An inter-departmental City team is working with residents, businesses, community groups, the County and other public agencies, foundations, private industry and other partners to improve International Blvd. Corridor's housing, economic development, health, transportation, and public safety conditions, as well as to develop strategies to	Department of Housing & Community Development (DHCD) – Housing Assistance Center/Strategic Initiatives	Policy development starting 2014-15	The City continued its work to revitalize the International Boulevard corridor while also working to increase the availability of affordable housing along the corridor. The following affordable housing projects have completed construction or are currently underway along this corridor: • Camino 23, a 37-unit affordable development at 1245 23rd Avenue and International Boulevard, completed construction in 2019.	This initiative has been an effective means to improve International Blvd. Corridor's housing, economic development, health, transportation, and public safety conditions, as well as to develop strategies that prevent the displacement of long-time residents and small businesses.	The initiative is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	prevent the displacement of long-time residents and small businesses. Key parts from the City's award-wining International Boulevard Transit Oriented Development Plan will be implemented.			• Casa Arabella, a 94-unit affordable development adjacent to the Fruitvale BART station and International Boulevard corridor, completed construction in 2019. • Fruitvale Transit Village Phase II-B, a 181-unit affordable development also adjacent to the Fruitvale BART station, is currently under construction. • Ancora Place, a 77-unit affordable development located at 2227 International Blvd, received a commitment of $4.8 million in City funds, was awarded $11,740,653 in Multifamily Housing Program (MHP) funds and $5,602,112 in Infill Infrastructure Grant (IIG) funds from the California Department of Housing and Community Development. The developer also applied for California Housing Accelerator funding in fall 2021 and expects an award in 2022. • 3050 International, a 76-unit proposed affordable development, is applying for		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				funding. The developer applied for funding from the City's New Construction Notice of Funding Available (NOFA) and if awarded, will likely pursue tax credit funding in 2022. • A commercial development located at 2700 International was acquired by the Unity Council, who initiated plans to redevelop the property into a mixed-use affordable housing and commercial development. The Unity Council applied for funding from the City's New Construction NOFA in January 2022. In 2020, the City of Oakland, in partnership with the East Oakland Neighborhoods Initiative, was awarded a $28.2 million Transformative Climate Communities (TCC) Implementation Grant. The funds will be allocated to five community revitalization projects, including one 55-unit affordable housing development. TCC's 95th & International began construction in 2021.

	With the resolution of the legal challenges to the Brooklyn Basin project (formerly Oak-to-Ninth), new housing is scheduled to be built in the timeframe of the 2015-2023 Housing Element where former industrial uses predominated.			between 0-60% of AMI in the Brooklyn Basin development, which will include 3,100 total new units as well as commercial and open space. The affordable units include 258 Project-Based Section 8 vouchers for all phases from the Oakland Housing Authority (OHA), which jointly owns the land with the City. The master developer has proposed adding another 600 units of market rate housing to the overall project (as well as marina space). This request was heard at the March 23, 2022 Design Review Committee meeting. Support for the proposal to add 600 housing units moved forward and will be heard by the Planning Commission. Construction of the 211 affordable units on Parcel F completed in December 2020 and achieved 100% occupancy in 2021. The Parcel F projects included 101 units of family housing (Paseo Estero) and 110 units of senior housing (Vista Estero). MidPen Housing Corporation, Oakland Housing Authority, and the City entered into a Lease Disposition and	opportunities in the Central Estuary Area have borne fruit in the 2015-2023 cycle. 3,100 units of housing, including 465 units of affordable housing, are planned, underway, or completed in the Brooklyn Basin development. The City has carried out extensive efforts, including planning and zoning updates, environmental remediation, and direct financial assistance, to provide mixed-income housing in an amenities-rich environment. The City's policies and programs have been highly effective.	with the City's Central Estuary Plan. As the Brooklyn Basin development nears completion, this goal should be revised in future housing element cycles.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Development Agreement on Project 3 (Foon Lok West) on Parcel A in 2019, and closed their loan for the 130-unit Project 3 and started construction in July 2020, and construction continued throughout 2021. MidPen is assembling its financing for Project 4's (Foon Lok East) remaining 124 units of family housing, and pending awards from the new California Housing Accelerator Fund, is projected to commence construction in 2022. With regards to market-rate housing development of Brooklyn Basin, at the end of 2021: Parcels B, C, D, G, H and J are fully entitled (for a total of 1,843 entitled units; of the entitled units, 241 are constructed and occupied).		
POLICY 1.4: Secondary Units						
ACTION 1.4.1	*Secondary Unit – Parking Solutions.* Explore parking solutions (tandem parking, compact parking spaces, etc.) for secondary units to enable more secondary units as part of a Planning Code update of the City's parking regulations. Explore the option of eliminating the	Bureau of Planning	2014-2017	The majority of ADUs created in Oakland do not require additional parking because they are located within the 1/2-mile of transit. Tandem parking is also allowed. This has been positive for most areas, except for areas in the Very High Fire Hazard Severity Zone (VHFHSZ) where lots are steep and often do not have off-street parking, streets are narrow, and reliance on cars is very high. Any	The ADU program has been very effective in creating additional units of housing without adding additional off-street parking spaces.	The goals of this portion of the ADU ordinance are appropriate in creating additional housing units without the burden of additional parking in

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	existing requirement for a separate non-tandem parking space.			additional cars that ADUs bring are forced to park on the narrow streets creating emergency access issues and prompting additional resources for enforcement of the no-parking rules.	The number of ADUs permitted annually can be found in the City's Housing Element Annual Progress Reports (see Table A3 for APRs 2015-2017, and Tables A and A2 for APRs 2018-2021), which are posted to the City's webpage: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports	transit-rich areas where car ownership can be optional. This preserves valuable lot space for housing or as valuable open space instead of using it for parking. However, in VHFHSZ and S-9 Zone where roads are narrow and public transit is lacking, off-street parking or replacement of lost parking is required in some areas, consistent with State law.
ACTION 1.4.2	*Secondary Unit – Setback Solutions.* Explore relaxing the current prohibition on Secondary Units in the rear setback. If these zoning changes are	Bureau of Planning	2014-2017	The City has been approving ADUs with the regularly required side and rear setbacks according to State law requirements. Existing structures that are converted or rebuilt to ADUs in the same place and to the same	The ADU program has been very effective in creating additional units by converting existing structures	The ADU policy regarding the setbacks is appropriate in creating additional

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	implemented it will allow Secondary Units in the side and rear setback, as long as the structure doesn't exceed existing size limits and can meet all the same standards that allow a garage or accessory structure in the same location.			dimensions are allowed to remain in their current footprint without complying with any setbacks. Newly built ADUs are only required to comply with 4' side and rear setbacks, which is significantly less than regularly required by local zoning regulations. A recent ordinance amendment further reduces this setback to 3 feet in some cases.	on a lot to ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. In addition, the 4' required setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.	housing by allowing to convert existing structures on a lot into ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. Otherwise, the required 4' setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.
POLICY 1.5: Manufactured Housing						
ACTION 1.5.1	*Factory-Built Housing.* Continue to implement City-adopted regulations that allow manufactured housing	Bureau of Planning	Ongoing, 2015-23	The City continues to permit factory-built housing in all residential & commercial districts.	Factory-built manufactured housing becomes more common with the ease of	With the improved process, it is appropriate to allow for

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	in single-family residential districts.			In November 2021, City Council approved the Construction Innovation Ordinance, which amends the Planning Code to allow residential occupancy of recreational vehicles, mobile homes, and manufactured homes in all zoning districts where residential uses are permitted.	construction and the improved appearance and variety of designs.	construction in any zone where single-family residences are permitted.
POLICY 1.6: Adaptive Reuse						
ACTION 1.6.1	*Live/Work Conversions*. Allow the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Bureau of Planning	Ongoing, 2015-23	In 2021, the City continues to permit live/work conversions. Thereby allowing the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Live/work conversions continue to be permitted in Oakland. The State Building Code has been adopted by the City to be applied more uniformly as in other cities.	Given Oakland's extensive stock of formerly industrial and commercial buildings, live/work conversions are appropriate.
POLICY 1.7: Regional Housing Needs						
ACTION 1.7.1	*Accommodate 14,765 New Housing Units.* Designate sufficient sites, use the City's regulatory powers, and provide financial assistance to accommodate at least	Bureau of Planning	Ongoing, 2015-23	In addition to housing developments which are under construction, approved, or in pre-approval, the 2015-2023 Housing Element identified sites with the capacity and the zoning regulations to allow more units than the Regional Housing Needs Allocation	The City has effectively met its RHNA housing allocation for total number of units to be built, but it has not met the goal of	The policy is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	14,765 new dwelling units between January 2014 and June 2023. This sum represents the City's share of the Bay Area region's housing needs as estimated by the Association of Bay Area Governments (ABAG). The City will encourage the construction of at least 6,919 units for very-low-, low-, and moderate-income households.			for Oakland. Table A2 in Annual Progress Reports provides details on building starts for each calendar year. See also the City's Land Inventory posted to the City's web page: http://www2.oaklandnet.com/oakca1/groups/ceda/documents/policy/oak051104.pdf	the percentage of affordable units and exceeded the number of market-rate units built.	
GOAL 2: Promote the Development of Adequate Housing for Low- and Moderate-Income Households						
POLICY 2.1: Affordable Housing Development Programs						
ACTION 2.1.1	*New Construction and Substantial Rehabilitation Housing Development Program.* Issue annual Notice of Funding Availability (NOFA) for the competitive allocation of affordable housing funds. Points will be assigned for addressing City priorities to ensure that funds are used to further policy objectives.	DHCD – Housing Development Services	Ongoing, 2015-23	From 2015-2021, the City has continued to issue NOFA funds pursuant to funding being available. The City released one Notice of Funding Availability (NOFA) in 2021 for New Construction of Multifamily Affordable Housing, with a funding pot of approximately $15-20 million. Unlike the 2020 New Construction NOFA, which was limited to "Pipeline" projects—projects that had applied for funding in a previous NOFA round—the latest NOFA, for which applications were due in January 2022, was open for all applicants for new rental	The City's NOFAs are effective as the primary method of delivering affordable housing.	This program is highly appropriate and fully consistent with the Housing Element. In future Housing Element cycles, it may be advisable to clarify that NOFAs may be released on a more or less frequent basis

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				housing proposals. The City also made funding commitments to projects that applied for funding under a NOFA for Acquisition and Conversion to Affordable Housing (ACAH) of existing non-deed restricted projects that was released in late 2020. The City of Oakland will have spent approximately $150 million on affordable housing for the 2015-2023 Housing Element. More information about City NOFAs is available here: https://www.oaklandca.gov/resources/nofa-opportunities		than annually, to the extent that funding is available.
ACTION 2.1.2	*Housing Predevelopment Loan and Grant Program.* Provide loans to nonprofit housing organizations for predevelopment expenses such as preparation of applications for outside funding.	DHCD – Housing Development Services	Ongoing, 2015-23	From 2015-2021, the City has continued to provide predevelopment loans to nonprofit housing organizations for predevelopment expenses. No new projects applied for or received predevelopment loans in 2021.	The City's predevelopment loan program is effective in facilitating predevelopment activities for the construction of affordable housing. Staff may seek adjustments to the maximum loan amount and other terms to	The program is fully appropriate for the development of affordable housing.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					increase its effectiveness.	
ACTION 2.1.3	*Utilize Public Housing Resources for New Development.* Work with the Oakland Housing Authority to increase housing choices for low-income families by utilizing Making Transitions Work (MTW) voucher flexibilities toward the development of new affordable housing for extremely-low-, very-low-, low-, and moderate-income households.	Oakland Housing Authority	Ongoing, 2015-23	In 2015, under MTW authority, Oakland Housing Authority (OHA) promoted development of affordable housing stock by property acquisition, pre-development and permanent loans to create new units of affordable housing and rehabilitate existing units of affordable housing. During this year OHA completed construction on Lakeside Senior and placed 91 new units in service. Between 2016 and 2018, no public housing resources were utilized for new development activities. The OHA has continued to assist a number of affordable housing developments. In FY 2021, OHA completed construction on the first two phases of Brooklyn Basin closed financing and started construction on Project 3, known as Foon Lok West. An additional 53 units were rehabilitated in OHA's existing project-based portfolio. • Brooklyn Basin - OHA in partnership with the City of	This action has been an effective means of collaborating with the Oakland Housing Authority to maximize the benefit of housing vouchers. OHA's affordable housing development activity over the past ten years has been strategic, significant and impactful. OHA has developed on its own, or partnered with nine different affordable housing developers, on fifteen major projects adding 1,922 units of new affordable housing since 2008 with a	The action is fully appropriate for the expansion of affordable housing opportunities, as long as "public housing" refers to "affordable housing" and not a specific "public housing" program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Oakland and MidPen Housing Corporation is developing 465 units of affordable housing for low-income families and seniors as part of the Brooklyn Basin master planned community. • In FY 2021, Project 3, known as Foon Lok West, which includes 130 units for families and formerly homeless households (65 assisted with PBVs) closed all financing and started construction. • Construction was completed on 211 units (132 assisted with PBVs) at Projects 1 and 2, known as Paseo Estero and Vista Estero. Lease up was completed in 2021 and 101 family units (50 of which are PBV) were leased in Paseo Estero and 110 senior housing units (82 of which are served with PBVs) were leased. • 285 12th Street - OHA is partnering with the East Bay Asian Local Development Corporation (EBALDC) to construct affordable housing to include 65 units and 3,500	combined total development cost of over $763M. OHA's capital contribution to these projects ($92M) represents 12% of the overall financing required. In addition to providing capital directly to these projects, OHA awarded 719 project-based vouchers (PBVs) using MTW flexibility, which were used to leverage $75M in additional private debt financing. OHA's capital contribution and award of PBVs together contributed approximately 22% of the total cost for fifteen major projects.

				square feet of commercial space. The site is currently vacant and centrally located in downtown Oakland near several BART stations. OHA has committed to providing PBVs for 16 units. The project received NEPA clearance during FY 2021. • 500 Lake Park Avenue – OHA is partnering with EAH Housing to construct a 53-unit affordable housing building with 2,900 square feet of retail space at 500 Lake Park Avenue in the Grand Lake district of Oakland. The project received NEPA clearance in FY 2021. Also, during FY 2021, OHA acquired the land and provided a loan to EAH to continue funding predevelopment activities for the project. • 6946 Foothill Blvd - OHA and its affiliate OHI conducted predevelopment planning to rehabilitate and preserve 65 units of affordable housing using low-income housing tax credits.	OHA strategically purchased the land on 13 of the 15 projects to ensure that the housing will remain in reach of a stable public agency committed to the preservation of affordable housing in perpetuity. The disposition of 1,615 units of scattered site public housing at the beginning of the decade has proved especially fortuitous as the value of this real estate combined with low-income housing tax credits (LIHTC) and MTW flexibilities, will allow OHA to facilitate future building and redevelopment of

				• 7526 MacArthur Blvd Repositioning – OHA conducted a feasibility study on developing affordable housing on an OHA-owned vacant parcel at 7526 MacArthur Boulevard in order to meet Oakland's need for additional permanent affordable housing. • Lion Creek Crossing Phase I LP Buyout – OHA exercised its option to purchase the Limited Partner interest in Lion Creek Crossings Phase I.	new units within these sites at a fraction of the typical cost to develop. As a direct result of OHA's development activities, over 421 low-income, Section 3 eligible Oakland residents have been newly hired on OHA's major development projects. Additionally, OHA projects have helped preserve diversity by creating opportunities for low-income residents to live in central locations, also known as high opportunity areas.	
POLICY 2.2: Affordable Homeownership Opportunities						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 2.2.1	*First Time Homebuyer Programs.* Continue to operate a First Time Homebuyer Program as funding is available (either through State funding or through program-related income).	DHCD – Housing Development Services	Ongoing, 2015-23	The City continued to operate First Time Homebuyer Programs as funding was available (either through State funding or through program-related income). In 2021 the Mortgage Assistance Program (MAP) program made one loan with the last $15,000 of program funds to assist a first time homebuyer. In 2015-2021 the programs issued 121 loans totaling $6,782,346.	This program is effective, and is very effective in assisting low- and moderate-income homebuyers to acquire homes, in slowing the effects of gentrification, and in providing equitable opportunities for ownership and wealth-building among disadvantaged communities. The City will continue to fund first time homebuyer loans as funds are available.	The allocation of these first-time homebuyer loans was in alignment with this program's goals as planned and as stated in the Housing Element's policy guidance. The goals are achieved when down payment assistance is provided to assist low- and moderate-income buyers with low access to assets and credit to secure long term affordable housing through ownership, the greater community benefits by retaining a diversity of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						homeowners including those earning low to moderate incomes.
ACTION 2.2.2	*Scattered-Site Single Family Acquisition and Rehabilitation Program.* City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family homes for re-sale, lease-to-own, or for rent and if financially viable and operational capacity exists, will partner with community land trusts or otherwise incorporate resale restrictions to preserve affordability for Oakland	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for development and sale to moderate-income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021, the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the 2015-2021 period there were 18 units developed and closed. Also see Actions 2.2.4 and 4.3.4.	The program has been effective at turning blighted properties to new construction single-family dwelling for larger households.	The mechanism to clear liens and use developer capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a boot of subsidy may be needed to maintain feasibility of future projects using this model.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	residents (see also Action 4.3.4).					
ACTION 2.2.3	*Foreclosure Mitigation Pilot Loan Program.* Given that the City's foreclosure crisis is currently (2014) impacting long-time Oakland homeowners, the City has been engaging in new innovative strategies, such as launching a comprehensive program connecting door-to-door outreach with legal and housing counseling services, City escalation with bank officials, and the development of new loan fund programs. In addition, the City has been working on the development of a distressed mortgage notes program in order to purchase delinquent mortgage notes, modify loans of qualified homeowners, assist homeowners who are not able to receive modifications with alternative housing solutions, and then dispose	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	While the City no longer funds the Foreclosure Mitigation Pilot Loan Program, the City continued operation of its an Anti-Displacement Program (Oakland Housing Secure [OHS]-Homeowner Assistance) from October 2020 through September 30, 2021. Centro Legal de la Raza (program administrator) along with Housing and Economic Rights Advocates (HERA) provided emergency financial assistance to homeowners, legal representation, consultations, workshops, outreach, education, and other services to prevent foreclosure of property. Thirty-two homeowners received financial assistance and 498 homeowners benefitted from other services offered through OHS. This program is closed out as of September 2021. No new funding has been identified for FY 2021/22 and forward.	The demand for this service, particularly emergency mortgage assistance, far exceeded resources available. Legal representation successfully resolved legal matters for more than 50% of homeowners, who also reported improved housing stability through: avoiding an eviction, avoiding homelessness, or securing time and/or money to maintain housing. However, Centro Legal reported that mortgage services are slow and difficult to deal	The scope of Oakland Housing Secure (OHS) to support homeowners is important work, though this was one time funding that ended in September 2021. The City, HERA, Central Legal De La Raza and other agencies provide support for homeowners and renters, and rental assistance work continues under the City's Keep Oakland Housed (KOH) program.

	of units with three (3) or more bedrooms. The City will award points in the ranking process for projects with an average number of bedrooms exceeding the minimum specified in the program guidelines.			exceed this threshold, and up to nine points to ownership projects that exceed this threshold. Projects with affordable units that can accommodate larger families include the Fruitvale Transit Village, Estrella Vista, Redwood Hill Homes, 94th & International, Civic Center TOD, Mural Apartments, and 11th & Jackson.	constructed for large families.	include 2-bedroom units in next cycle.
POLICY 2.7: Expand Local Funding Sources						
ACTION 2.7.1	*Jobs/Housing Impact Fee.* Continue to implement the City's existing Jobs/Housing Impact Fee by collecting fees from new office and warehouse/distribution facilities.	DHCD	Ongoing, 2015-23	Data on the Jobs/Housing Impact Fee is reported in the Impact Fees Annual Report. Impact fee reports are available here: https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports Between FY 2016-2021, about $10,123,162 has been collected/paid towards the Jobs/Housing Impact Fee, while $23,209,708 has been assessed. Collected funds go into the Affordable Housing Trust Fund. In accordance with Sections 15.72.050 and 15.74.050 of the Oakland Municipal Code (OMC), the Oakland	The policy is an effective means of generating funds for affordable housing.	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Planning and Building Department (PBD) has calculated increases to the Affordable Housing, Transportation and Capital Improvement impact fees for FY 2021-22. Under the OMC, the City Administrator may adopt adjustments to these fees for inflation commencing July 1, 2021. As of January 2022, fees remain the same. In order for the fee increases to go into effect the City Administrator's authorization is required.		
ACTION 2.7.2	*Consider Implementing Mandatory and/or Voluntary Options for Developer Contributions to Affordable Housing Development by Conducting a Nexus Study and Economic Feasibility Study for Affordable Housing.* The City is committed to equitable development Citywide—with a focus on Specific Plan Areas, Priority Development Areas (PDAs) and large development projects—that provides housing for a range of economic levels to ensure the development of thriving,	DHCD; Bureau of Planning	Complete nexus study by December 31, 2014	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. In December 24, 2021 the City completed the Annual Report for Fiscal Year Ended June 30, 2021. See this link for the report: https://cao-94612.s3.amazonaws.com/documents/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf Since the Affordable Housing Impact Fees went into effect on September 1, 2016 – $17,584,503 has been paid and $33,895,450 in revenue has been	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional $33,895,450 to be collected once the developments are under construction and completed.	This program to find additional sources of funding for affordable housing is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	vibrant and complete communities. The Nexus Study and Economic Feasibility Study will provide documentation of what level of development impact fees are supportable, if at all, by quantifying the impacts of development and establishing whether there is a reasonable relationship between the amount of the fees to be imposed on new developments and the impact created by the new developments. Mandatory options for developer contributions will include the study of a housing impact fee or affordable housing set-asides for newly constructed ownership housing. Voluntary options for developer contributions will include the study of bonuses and incentives such as Housing Overlay Zones. The RFP released July 8, 2014 requires that the			assessed but not due yet, for a total accessed amount of $51,479,953. For Fiscal Year 2020-2021 (ending on 6/30/21), $4,430,250 has been paid for the Affordable Housing Impact Fee; and $15,688,799 was revenue assessed, but not due yet (due to the program's schedule for payments). City of Oakland Impact Fee Annual Reports and related documents covering Affordable Housing, Jobs/Housing, Transportation, and Capital Improvements can be found here: https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports

ACTION 2.7.4	*Utilize 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them into the Affordable Housing Trust Fund (aka "Boomerang Funds").* The State statutes governing the dissolution of redevelopment agencies and the wind-down of redevelopment activities provide for the distribution of former tax-increment funding to taxing entities. The City of Oakland is one of a number of taxing entities that will benefit from Oakland's Redevelopment Agency dissolution. The distribution of property tax will be from the Redevelopment Property Tax Trust Fund (RPTTF) and includes funds not needed by successor agencies to fulfill enforceable obligations. Additionally, there will be distributions to taxing entities sales	DHCD	Beginning in 2015 and ongoing, 2015-23	The City continues to allocate 25% of Boomerang Funds to the Affordable Housing Trust Fund.	The policy is a highly effective means of designating funds for affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	proceeds and other revenues from the use or disposition of assets of what are now called "successor agencies" (former redevelopment agencies). These funds are called "boomerang funds" and represent a windfall in property tax revenue to the City of Oakland. In late 2013, the City of Oakland committed to setting aside 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them into the Affordable Housing Trust Fund. Starting in 2015, the Affordable Housing Trust fund will begin to receive boomerang funds on an annual basis.					
POLICY 2.8: Rental Assistance						
ACTION 2.8.1	*Expansion of Section 8 Vouchers.* Work with the Oakland Housing Authority (OHA) to obtain additional funding from the federal	Housing Authority	Ongoing, 2015-23	During 2015, OHA awarded 21 units with project-based voucher assistance for low-income families and households with special needs. The awards were made to Redwood Hill Townhomes and 3706 San Pablo Avenue. OHA received a new	This program is effective. The OHA does their best to apply for and allocate these vouchers.	This program is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	government for more Section 8 rental assistance for very-low-income renters through documentation of need for additional housing vouchers and contacting decision-makers at HUD if appropriate.			allocation of 44 Section 8 vouchers for the Northgate Terrace development to serve additional low-income families. However, since 2016 Section 8 cannot be expanded without additional funding from the federal government, which has not occurred; nor is any funding anticipated in the foreseeable future. In 2021, OHA received an allocation of 515 Emergency Housing Vouchers (EHVs). After receipt of the award, the Executive Director quickly assigned staff to an interdepartmental team to manage and oversee distribution, placement and utilization of EHVs. With the same urgency, OHA staff led the effort to execute a county-wide Memorandum of Understanding (MOU) to memorialize the important, inter-jurisdictional collaboration to lease approximately 864 Emergency Housing Vouchers. OHA awarded 49 FYI Foster Youth to Independence (FYI) vouchers, that will be effective March 2022.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 2.8.2	*City of Oakland Rental Assistance Program.* Support a continued partnership between the City of Oakland and a non-profit agency to provide up to $5,000 in rental assistance grants to distressed tenants impacted by the foreclosure crisis.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing as funds are available, 2015-23	The City partnered with Seasons of Sharing to provide rental assistance and utility assistances to low- and moderate-income Oaklanders and seniors impacted by the foreclosure crisis. This program started in 2013 with three dedicated staff, Seasons of Sharing and 3 Community Groups. The program ended in 2019 due to decreased resources.	When operated with sufficient staff and fund resources, the program served close to 90 Oakland residents per year.	Households earning 50% or less of median income, especially those earning 40% or less are most likely to require rental assistance. With the appropriate level of resources this program is appropriate based on the need of the community.
POLICY 2.9: PATH Strategy for the Homeless						
ACTION 2.9.1	*Provide outreach programs to those who are homeless or in danger of becoming homeless.* The City will continue to provide the Homeless Mobile Outreach Program (HMOP), which provides outreach services to people living in homeless encampments. In addition to	DHS	Ongoing, 2015-23	Under the City of Oakland Permanent Access To Housing (PATH) Strategy, Homeless Mobile Outreach Program (HMOP), regular outreach is conducted to assess the needs of unsheltered persons in encampments, transition aged youth (TAY), and the general homeless population to not only assess their needs but also to also provide the intervention necessary to direct homeless/unsheltered persons to	DHS staff believe that this program is effective given its accomplishments during this planning period.	The PATH Strategy will continue to operate to serve the homeless population in Oakland.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	providing food and survival supplies, counseling and case management, the HMOP strives to encourage those living in these encampments to access available programs for housing and other necessary assistance to aid in attaining more stable living situations. The City will also continue to encourage outreach as part of the services of providers who are funded through City's PATH Strategy to end homelessness.			housing options, health services and other human services. In early 2021, the City's Homeless Mobile Outreach Program (HMOP) was expanded substantially, doubling FTE staff to 10 front line workers, and amended the scope of work to reflect the City's priorities more explicitly. In so doing, the make of the outreach team is as follows: • Specialist Mobile Outreach (SMO): Three teams of up to 3 staff members principally tasked with engagement and support for unsheltered homeless individuals and service details each consisting of: 1 clinical staff (master's level) who will support all three teams, 1 substance use and/or mental health specialist, 1 generalist outreach specialist. Each SMO teams is assigned a regional zone and provide in-depth services and continuity of care to the unsheltered homeless individuals in each zone.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				• Assessment, Procedures and Postings Team (APPT) consists of one team of up to 3 staff members principally tasked with assessment, mitigation, blight abatement, and implementation of procedural intervention at street-based encampments throughout the City of Oakland. In addition, this team respond to City requests to outreach and engage specific encampments, including progressive engagement model and supportive actions to increase the health and welfare of encampments and the surrounding community. In 2021, through such outreach efforts approximately 17,914 units of harm reduction supplies including food, water, blankets, fire extinguishers, flashlights, socks, etc. were distributed, that allowed the provision of street-based services to 895 unduplicated, unsheltered persons living in homeless encampments, in their vehicles or on the streets. Over 4,493 units of duplicated outreach and		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				intensive case management efforts were provided to the 895 unduplicated unsheltered persons. From the outreach services to the unsheltered, 43 individuals successfully exited homelessness to positive housing destinations including permanent housing, transitional housing, shelters, and respite.		
ACTION 2.9.2	*Support programs that help prevent renters from becoming homeless.* The City will support organizations that operate programs that prevent homelessness by providing emergency loans or grants for first and last month's rent for renters, security deposits, counseling, legal assistance, advocacy and other prevention services for those dealing with default and delinquency rental housing issues. Prevention services and programs will be funded under the City's adopted PATH Strategy to end homelessness. The City will investigate the possibility of establishing a	DHCD; DHS	Ongoing, 2015-23	The Oakland PATH Rehousing Initiative (OPRI) Program is a partnership with the Oakland Housing Authority, the City of Oakland & several homeless service provider agencies. OPRI provides housing subsidies (funded by OHA) & intensive case management (funded by the City of Oakland) to multiple populations experiencing homelessness in Oakland. OPRI served a total of 159 participants in FY 2020-2021. This included people living in encampments (46), people living in encampments with serious mental illness (19), seniors (8), re-entry clients (29) households with children (Abode) (7), Transitional Age Youth (23) and family households (BFWC) (10) including children (BFWC) (19). Between FY 2014-2018. 519	DHS staff believe that this program is effective given its accomplishments during this planning period.	~~.~~ DHS continues to provide this service as resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	funding source for an expanded rapid rehousing program both as a means to keep individuals and families at risk of falling into homelessness, as well as to improve the City's ability to rapidly rehouse those who do fall into homelessness; this could include short term and medium term rental subsidies.			households were served by OPRI and 431 clients were served between FY 2018-2021. In FY 2019-2020 the OPRI Collaboration expanded to include a family services provider, serving 20-40 families per year with housing subsidies and case management. In addition, the City of Oakland funds programs that help formerly homeless individuals maintain housing such as Lifelong Medical Care Services in the California and Harrison Hotels.		
ACTION 2.9.3	*Provide shelter programs to the homeless and special needs populations.* The City will continue to fund programs that are in line with the City's PATH Strategy to end homelessness. These agencies will provide housing and/or housing services that result in an outcome of obtaining and maintaining stable permanent housing for the homeless and near homeless population of Oakland. PATH	DHS	Ongoing, 2015-23	The City has continued to fund programs in line with the PATH Strategy. The current status of shelters include the following: <u>Crossroads Shelter</u> Crossroads Shelter, funded by ESG, CDBG, and Measure Q continued to be significantly impacted by the COVID-19 pandemic throughout FY 2020-2021. Although there was no interruption to the shelter being open 365 days per year, maximum occupancy was reduced by 24 single adult beds to accommodate CDC guidelines for physical distancing/decompression.	DHS staff believe that this program is effective given its accomplishments during this planning period.	DHS staff will continue to provide this service as resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	is inclusive of the special needs populations such as those with HIV/AIDS, mental illness, and victims of domestic violence.			The shelter maximum occupancy went from 123 single adults, and five family units (allowing for families to share rooms, dependent upon the composition of each family), to a single bed maximum of 99 and a family maximum of five households (with no interfamily unit sharing). A total of 471 unduplicated individuals utilized the Crossroads shelter during FY 2020-2021, with 67 households exited to Permanent Housing, and 12 to Transitional Housing (with another 69 to temporary stays with friends/family). EOCP Crossroads - FY 2020-2021 Occupancy Totals: Max # of singles beds available nightly: 99 Max # of family units available nightly: 5 Max # annual singles bed nights available: 36,135 Max # annual family unit nights available: 1,825 Actual singles bed nights provided: 25,418; 70% Actual family unit nights provided: 1,071; 59%

				<u>Family Matters Shelter</u> Family Matters Shelter is operated by East Oakland Community Project (EOCP) and provides an emergency family shelter with 72 emergency shelter beds for 20-25 literally homeless families at any time. During FY 2020-2021, a total of 117 individuals were served which included 59 children. In FY 2020-2021 the City also provided 107 spaces of safe RV parking which served 171 people.		
ACTION 2.9.4	*Provide transitional housing programs to those who are ready to transition to independent living.* The City will continue to fund and support as part of its PATH Strategy, transitional housing programs with services to homeless singles, families and homeless youth. By providing housing with services for up to 24 months, the program's tenants are prepared for more stable and permanent housing. Services provided assist the tenants with issues that	DHS	Ongoing, 2015-23	The City has continued to provide transitional housing and supportive services to individuals (including single adults), youth, and families. Community Cabins were established to provide individuals living in encampments with a specific location where they can stay temporarily. Residents are housed in temporary structures. Each site serves up to 40 individuals at a time for up to 6 months. Services included wash stations, portable toilets, garbage pickup, and housing navigation (case management) services. Program goals are to increase health and safety of residents, to connect residents with	DHS staff believe that this program is effective given its accomplishments during this planning period.	Department of Human Services will continue to support transitional housing programs while working to help families and individuals gain access to permanent housing. This program will continue as resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	prevent them from obtaining or returning to self-sufficiency.			mainstream services and the mainstream homeless response system, and to end the unsheltered status of residents. The pilot program began in December 2017 with the opening of the first site at 6Th & Castro (known as Castro Community Cabins). In May 2018, a second site was opened at 27th & Northgate (known as Northgate Community Cabins). The 6th and Castro site was closed in January 2019, two more programs opened during the 2018/19 operating year; Lake Merritt Community Cabins in October 2018, and Miller Community Cabins in January 2019. Three more sites opened in FY 19/20, Mandela Parkway North, Mandela Parkway South, and Oak St. Community Cabins. As of March 2020, the Lake Merritt Community Cabins were decommissioned and currently five sites are operating Citywide. In response to the COVID-19 pandemic approximately 10-12 beds are taken offline to afford single occupancy units for those who are medically fragile. The reduction of maximum occupancy in leads to approximately 182 beds		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				total available. In addition, the 2020-2021 FY led to significant reduction in positive outcomes as a result of the multitude of challenges presented during the global pandemic including but not limited to; staffing shortages, COVID-exposures and infections, shelter in place, eviction moratoriums, reduced housing availability, etc. The data below is presented for FY 2020/2021: • 428 unduplicated clients served • 253 of those have been homeless one year or longer • 72 exited to permanent housing locations • 121 exited to transitional housing/temporary locations		
ACTION 2.9.5	*Support development of permanent housing affordable to extremely-low-income households.* The City will continue to seek ways to provide permanent housing affordable to extremely low income households, by supporting funding from the	DHCD	Ongoing, 2015-23	The City of Oakland's NOFA for New Construction of Multifamily Affordable Housing includes a threshold requirement that 20% of units be affordable to Extremely Low-Income Households. Projects may be awarded additional points for exceeding this threshold (up to five points for rental projects, and up to 12 points for ownership projects). Rental projects	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	state and federal levels. The City will also take actions to address barriers to the development of such housing. The City will continue to participate in the Alameda County-wide efforts that have evolved from a County-Wide Continuum of Care Council to the Alameda County EveryOne Home Plan, a road map for ending homelessness.			can receive additional points for serving people with special needs (5 points) and for offering permanent supportive housing units for the formerly homeless (5 points). The City also coordinates its scoring criteria and funding pipeline with the Oakland Housing Authority, which awards Section 8 rental subsidies, in order to further support the creation of units affordable to extremely-low-income households. The City also continues to participate in the Alameda County-wide efforts under the EveryOne Home Plan, a road map for ending homelessness. The City will continue to seek ways to provide permanent housing affordable to extremely low-income households, by supporting funding from the state and federal levels, and take actions to address barriers to the development of such housing.		
ACTION 2.9.6	*Coordinate actions and policies that affect the extremely low income population of Alameda County.*	DHCD; DHS	Ongoing, 2015-23	The City continues to participate in the Alameda County-wide efforts under County's Racial Equity Systems Modeling and Home Together plan. The Racial Equity System Modeling was completed in 2019. The City also	DHS and DHCD Staff believe that this policy goal is effective to publicly state the City's involvement	DHS and DHCD will continue to support collaboration among City Departments

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	The City will continue to participate in the Alameda County-wide efforts that have evolved from a County-wide Continuum of Care Council to the Alameda County EveryOne Home Plan. The EveryOne Home Plan is a coordinated regional response seeking to streamline use of the county's resources and build capacity to attract funding from federal, state and philanthropic sources. The City will also participate in the County-Wide system redesign process.			issued its own five-year framework to address homelessness in 2019. The City has been a strong partner with Everyone Home and Alameda County in the development and implementation of a Coordinated Entry System for homeless services. Coordinated Entry is a standardized method to connect people experiencing homelessness to the resources available in a community. Coordinated entry processes help communities prioritize housing assistance based on vulnerability and the severity of housing barriers to ensure that people who need assistance the most receive it in a timely manner.	and support of regional efforts.	and other regional, State and federal efforts.
ACTION 2.9.7	*Advocate for policies beneficial to the extremely low income and homeless populations of Oakland.* The City continues to advocate for an expansion of Federal funding for the Section 8 program "Moving to Work" as implemented by the Housing Authority under the title "Making Transitions Work" Program (both with the same acronym MTW).	DHCD; DHS	Ongoing, 2015-23	Oakland began providing Coordinated Entry for literally homeless families in the fall of 2015. Coordinated entry for all homeless populations in Oakland began in the fall of 2017 and is managed by the County as of FY 2020-2021. DHS continues to participate in monthly calls of West Coast cities, led by the U.S. Interagency Council on Homelessness. These calls provide opportunities for sharing and learning about new innovative and effective practices to address homelessness as a	DHS staff believe that this policy goal is effective to publicly state the City's involvement and support of Citywide efforts.	DHS will continue to support collaboration among City Departments and with other City agencies including the Oakland Housing Authority.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	The City is an active partner in the implementation of a county-wide housing and services plan (EveryOne Home Plan) for extremely low income and homeless persons.			City jurisdiction. DHS continues to work closely with the County and CoC to address homelessness locally. DHS also maintains memberships and/or supports the following agencies: National Alliance to End Homelessness; Housing California; Corporation for Supportive Housing; East Bay Housing Organizations; and other federal and State initiatives to end homelessness.		
ACTION 2.9.8	*Sponsor-based Housing Assistance Program.* Work with the Oakland Housing Authority to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service enriched housing options that increase housing choice for special needs populations.	Oakland Housing Authority	Ongoing, 2015-23	The OPRI program, which began in 2010, has successfully housed 650 formerly homeless Oakland residents with subsidies provided by the Oakland Housing Authority (OHA) and services and program administration contracted by the City of Oakland. The COVID-19 pandemic greatly impacted the OPRI program in different facets. There was a decrease in the number of exits/step downs due to the need to remain housed under shelter in place conditions. There was also a decrease in youth participants due to extensions to exits from foster care. Lastly, the loss of jobs and economic impacts of the pandemic were experienced by OPRI clients.	The action is fully effective.	The action is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				However, overtime participants have been able to secure housing, find full time employment, enroll back in school and obtain support needed to address mental and emotional needs.		
POLICY 2.10: Promote an Equitable Distribution of Affordable Housing throughout the Community						
ACTION 2.10.1	*Provide Incentives for Location of City-Assisted Developments in Areas of Low Concentration of Poverty.* In its annual competitions for the award of housing development funds, the City will give preference to projects in areas with low concentrations of poverty.	DHCD – Housing Development Services	Ongoing, 2015-23	The City's New Construction of Multifamily Affordable Housing NOFA awards points to projects that help advance geographic equity (5 points) and are located in neighborhoods with strong educational quality (5 points).	The action is a necessary but not sufficient tool for advancing geographic equity.	The action is appropriate to Housing Element goals.
POLICY 2.11: Affordable Housing Preference for Oakland Residents and Workers						
ACTION 2.11.1	*Oakland Resident and Worker Housing Preference Policy Resolution.* Continue to give first preference to households with at least one member who qualifies as a City of Oakland resident or worker. All other households will get second preference. There is no minimum length or	DHCD	Ongoing enforcement, 2015-23	The City of Oakland continues to monitor the marketing plans and waitlist preferences of affordable housing to ensure that Oakland residents and workers are given preference. The City also continues to ensure that this standard was met for the First Time Homebuyer Mortgage Assistance Program.	The policy is fully effective.	The policy is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	residency or employment in Oakland to qualify for the resident or worker preference. The owner, developer, or leasing agent of each housing development will be required to verify residency and/or employment by collecting a Certification of Eligibility with the required documentation. The preference policy will be applied only if and to the extent that other funding sources for the housing project permit such a policy.			In 2016 the City updated a displaced person preference and a neighborhood preference. The City is pursuing Alameda County approval for the application of Oakland's resident preference for Measure A1 Funded Affordable Housing Developments.		
GOAL 3: Remove Constraints to the Availability and Affordability of Housing for All Income Groups						
POLICY 3.1: Expedite and Simplify Permit Processes						
ACTION 3.1.1	*Allow Multifamily Housing.* Continue to allow multifamily housing by right (no conditional use permit required) in specified residential zones and by conditional use permit in specified commercial zones.	Bureau of Planning	Ongoing, 2015-23	Continuing through 2021, multifamily housing continues to be permitted in Oakland.	Oakland's Planning Code has permitted multifamily housing, particularly on certain commercial streets, for decades. The zoning is effective: there have been	Multifamily housing development is a long-standing policy of the City of Oakland, and that is an appropriate policy to enact the Oakland General Plan's

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					numerous multifamily developments built in Oakland.	policy of concentrating new multifamily housing on the commercial streets and corridors. Staff is looking to make further changes to City regulations to expand opportunities for "missing middle" housing by permitting additional densities in single-family zones.
ACTION 3.1.2	*Special Needs Housing.* Pursuant to Government Code Section 65583(a)(5), transitional and supportive housing must be considered a residential use of property and must be subject only to those restrictions that apply to other residential dwellings of the same type in the same zone. The City of	Bureau of Planning	Transitional and Supportive Housing review and update: By December 2015	The City's Planning Code continued to permit transitional housing in compliance with State law and allows emergency shelters by right in limited segments of the Residential Mixed Use, Urban Residential, Neighborhood Center, Community Commercial, Broadway Retail Frontage District Interim Combining Zone, Medical Center, Housing and Business Mix, and the CIX-1, CIX-2, IG, and IO Industrial	The zoning text amendments to the definitions for transitional and supportive housing will facilitate clarity during the development review process for these types of activities.	The legislation was prepared in response to State law, and is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Oakland amended its Planning Code in July 2014 to comply with this provision. The City's Planning Code will be evaluated and amended as appropriate for consistency with these requirements. Pursuant to Government Code Section 65583 and 65589.5, City of Oakland will allow emergency shelters by-right as indicated in the Oakland Planning Code Section 17.103.015.		Allowing Emergency Shelters By-Right: Ongoing, 2015-23	zones as codified by Ordinance No. 13248 (adopted July 15, 2014). Further, the Reasonable Accommodations policy and procedure formalized the process for persons with disabilities to seek exceptions to the zoning rules to promote equal access to housing.	Permitting emergency shelters by right assists with providing housing opportunities for Oakland's homeless population.	
ACTION 3.1.3	*Discretionary Permits.* Continue to implement discretionary permit processes (design review, conditional use permits, etc.) in a manner that includes explicit approval criteria and approval procedures that facilitate the development of multifamily and special needs housing in appropriate areas of the City.	Bureau of Planning	Ongoing, 2015-23	The Planning and Building Department continues to issue discretionary design review permits for all new housing, except for Accessory Dwelling Units (ADU's) which are issued ministerially over the counter. For Special Needs housing, in 2016, the Planning and Zoning Division adopted amendments to the Oakland Planning Code ensuring that transitional and supportive housing is treated in the same manner as other housing facilities in the same zone.	Planning staff routinely uses the design review and other checklists when approving projects, and will continue to do so. These checklists are given to the public in advance of a project application, so they are also a tool for informing	To ensure a consistent set of design principles which apply to new residential development citywide, it is appropriate to have standard checklists for staff to review projects. It is appropriate to amend the

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No. *Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
			The City's reasonable accommodations procedure was also adopted in 2014, providing flexibility in the application of the Planning Code for individuals with a disability. While the Bureau of Planning manages a few residential development entitlements under SB330 and prioritizes processing of affordable housing and all residential development applications, efforts to streamline review are challenged by the lack of objective design guidelines and adequate staffing to process applications efficiently and effectively.	applicants about the standards and expectations of the City Planning division. If the City Council adopts the proposed ordinance to clarify that transitional and supportive housing (for six people or fewer) is a residential use, then applicants for transitional and supportive housing would not be required to obtain a conditional use permit, if their facility houses less than six people. While the Bureau prioritizes processing of residential development application, lack of objective design guidelines and lack	Oakland Planning Code to specifically clarify that the provisions of SB2 with regards to transitional and supportive housing apply to the Oakland Planning Code. The City is looking to make further types of housing subject to ministerial approval upon adoption of Objective Design Standards in late 2022/early 2023.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					of adequate staffing limit the ability to further achieve this goal.	
ACTION 3.1.4	*"One-Stop" Permit Process.* Continue the "one-stop" permit process that provides coordinated, comprehensive, and accurate review of residential development applications. Ensure coordination between different City departments, provide for parallel review of different permits associated with projects, and provide project coordinator services to expedite project review when needed.	Bureau of Planning	Ongoing, 2015-23	This process was implemented within the Bureaus of Planning and Building throughout the period. In 2021, the City launched a "Re-Imagining One Stop Permitting" (ROSP) initiative to coordinate and align permitting processes across several City departments, including: Planning and Building, Oakland Department of Transportation, and Oakland Public Works. This effort was implemented in early 2022.	This action is an effective method of providing coordinated, comprehensive, and accurate review of residential development applications.	The action is appropriate to the housing element.
ACTION 3.1.5	*Assign Priority to Affordable Housing*. Continue to assign priority to the review of affordable housing projects through an expedited review process and other techniques.	Bureau of Planning	Ongoing, 2015-23	The City continued to implement this process during the planning period. Permit applications for affordable housing developments, as with other multifamily projects, are "deemed complete" within 30 days of submittal. The City processed its first SB35 affordable housing case in 2018, which waives discretionary review for proposals that meet certain criteria,	Planning staff coordinates with the City's Housing staff on design review and land use permitting details for affordable housing projects.	Planning staff is appropriately assigning priority to affordable housing projects, when they are submitted for entitlements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and has continued to process cases under SB35. In 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process. In 2021, the City has prioritized the review of entitlements for affordable housing above most other types of applications. The City currently expedites residential applications in accordance with SB35.		
ACTION 3.1.6	*Expedite Environmental Review.* Reduce the time and cost of environmental review by using CEQA exemptions, the City's Standard Conditions of Approval, and focused and tiered Environmental Impact Reports, as appropriate.	Bureau of Planning	Ongoing, 2015-23	Oakland uses CEQA exemptions for development projects, where appropriate. See detailed response in Action 1.1.3. In January 2022, new ADU legislation was adopted by City Council to synchronize our regulations with those of the State. In 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process.	The City is continually evaluating its standards, procedures and permit process to allow development of multifamily, market-rate and affordable housing, within the restrictions of CEQA.	City staff considers streamlined environmental review, within the restrictions of CEQA, to be an appropriate ongoing project for staff.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Reliance on Specific Plan EIRs (such as the Broadway Valdez Specific Plan EIR) for residential and other development applications effectively streamlines environmental review for desired development.		
ACTION 3.1.7	*Secondary Units.* Continue to encourage the construction of new secondary units and the legalization of existing non-conforming secondary units to bring those units into compliance with current zoning and building standards.	Bureau of Planning	2015-2016	The City has continually adopted new ADU regulations to remain in compliance with State law. Between 2016-2021 (the period during which State HCD has required that jurisdictions report the number of ADUs permitted for the Annual Progress Report) 1,049 ADUs were permitted. In 2021 alone, the City permitted 274 ADUs. Most recently, a proposal went before City Council on December 21, 2021 and was adopted in January 2022 to allow additional building envelope expansion for "small lots," additional height limits to create two-story ADUs, provisions for reduced setbacks, amnesty and enforcement delay program for currently un-permitted ADUs, and a number of other proposals designed to make creation of ADUs more affordable and more accessible to different income groups.	This action has been effective in ensuring there are no local constraints to ADU development. Since the new proposal has not been adopted yet, it is not yet possible to evaluate its effects. It is important to acknowledge that wealthier residents have more resources to create ADUs in general, so additional support for lower-income residents is necessary for	The proposed ordinance amendments together with the project review streamlining requirement and private and public ADU assistance initiatives are appropriate to support the goals of the Housing Element. Expansion of the private and public programs to support the ADU applicants would further enhance access to ADUs for

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				In addition, a new City program administered by Oakland HCD was created to assist lower-income applicants with legalizing their existing un-permitted units. This program has secured a $3M State grant to create more ADUs that are safe to inhabit. Also, a privately-funded program Keys to Equity is helping lower-income applicants—many of whom are BIPOC residents—to build ADUs to either provide a rental income or provide for multi-generational households and remain in the community.	equitable distribution of the benefits this new ADU policy will create.	applicants of all income groups.
POLICY 3.2: Flexible Zoning Standards						
ACTION 3.2.1	*Alternative Building Code Standards.* Continue the use of alternative accommodations and equivalent facilitation of the California Building Codes to address the special housing needs of persons with disabilities and to facilitate the rehabilitation of older dwelling units. (See Actions 4.1.1 and 4.1.2 for housing rehabilitation actions and Action 6.2.1 for	Bureau of Planning	Ongoing, 2015-23	The City continues to search and to utilize alternative building code standards to remove any constraints to availability and affordability of housing. In 2021, the City allowed strawbale construction as alternative construction.	This action is effective.	This action is appropriate; the City will continue to review processes and procedures to allow for alternative construction methods.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	reasonable accommodations for persons with disabilities).					
ACTION 3.2.2	*Planned Unit Development Zoning.* Maintain the provisions in the Planning Code for planned unit developments on sites where the strict application of zoning standards could make development less feasible. Consider reducing the minimum lot area requirement for residential planned unit developments (PUD).	Bureau of Planning	Ongoing, 2015-23	While the City of Oakland has a PUD permit, it does not have PUD zoning. The PUD permit allows for the application of flexible development standards; staff educates applicants about this flexibility and applicants are encouraged to take advantage of these regulations, to ease entitlement of very large development projects that would otherwise be difficult to entitle. During this time period, the PUD permit has been used to maximize residential development at Oak Knoll, Brooklyn Basin, Mandela Station, Lake Merritt BART TOD, Jack London Square, 500 Kirkham, and MacArthur BART. In addition, applicants are currently taking advantage of these regulations for proposals, including Howard Terminal and CCA.	PUD regulations relax standards to allow for ease of delivery of residential development. This policy is effective for entitlement of large sites.	This is an appropriate for easing delivery of large numbers of residential units through a small set of entitlements.
ACTION 3.2.3	*Flexible Parking Standards.* Study and consider implementing reductions in the parking standards in any future Planning Code revisions. Consider expanding the reduced open space requirements as	Bureau of Planning	2014-2017	In 2015, City staff began public outreach through community meetings to propose new parking standards. In 2016, the City adopted new parking standards, including no parking required in the Central Business	The action is effective.	The action is appropriate

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.116.110D) citywide.			District and innovative parking reduction methods in other parts of the city. In 2019, the City reduced the parking requirements for multifamily projects further simplifying the process. Also in 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process.		
ACTION 3.2.4	*Reduced Open Space Requirements.* Consider expanding the reduced open space requirements as stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.101C.050B) citywide.	Bureau of Planning	2014-2017	In 2020, the Draft Downtown Oakland Specific Plan was released, including policies and actions for improving existing open space and parks, as well as allowing publicly accessibly open space to satisfy open space requirements (rather than private open space requirements) and allowing developers to contribute to off-site open space to provide greater flexibility to meet open space requirements. The zoning regulations that will implement the Downtown Oakland Specific Plan are in development, to be adopted along with the Plan in 2022, and will include open space standards, however, study of significant changes to the DOSP	These changes have not yet been adopted but are anticipated to be considered in late 2022 to remove constraints to the development of housing and encourage provision of publicly accessible open space, which contributes to more livable neighborhoods for lower-income residents.	This is an appropriate step to remove constraints to the development of housing. As described under "Status of Implementation, " this program is being considered for expansion into the DOSP area. This action is appropriate for the DOSP area

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				area's open space development requirements will be completed as a near-term implementation step.		and for further consideration in additional zoning areas.
POLICY 3.3: Development Fees and Site Improvement Requirements						
ACTION 3.3.1	*Project Review Process and Development Agreements.* Continue to require only those on- and off-site improvements necessary to meet the needs of projects and to mitigate significant on- and off-site environmental impacts.	Bureau of Planning	Ongoing, 2015-23	This action is limited in its application but can be very effective. Development Agreements (DA) can allow for delivery of increased and/or expanded affordability for residential projects. There are no newly adopted DAs since before 2015. There are three DA applications currently under review, including an amendment to the Brooklyn Basin DA.	This policy has the potential to be very effective, depending on policy maker discretion. Staff is currently seeking to boost residential affordability through DA applications.	This action is still appropriate for the 2023-2031 Housing Element period.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 3.3.2	*Development Impact Fees.* Consider transportation, capital improvement and housing impact fees to mitigate impacts on City infrastructure and services while balancing the costs to support new development. The City will be issuing a Request for Proposals (RFP) during the Housing Element planning period for an impact fee study that will consider transportation, infrastructure, and affordable housing. The RFP released July 8, 2014 requires that the contractor do an analysis of residential development costs and the market for both rental and owner-occupied housing in Oakland. (See also Action 2.7.2.)	Bureau of Planning	Ongoing, 2015-23	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. In December 24, 2021, the City completed the Annual Report for Fiscal Year Ended June 30, 2020. See this link for the report: https://cao-94612.s3.amazonaws.com/documents/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf On December 24, 2021, the City completed and published the 5-Year Impact Fee Review and Update.	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional $33,895,450 to be collected once the developments are under construction and completed.	This program is appropriate for the Housing Element
POLICY 3.4: Intergovernmental Coordination						
ACTION 3.4.1	*Multiple Agency Reviews.* Continue to coordinate multiple agency reviews of residential development proposals when more than	Bureau of Planning	Ongoing, 2015-23	The City continues to coordinate multiple agency reviews of residential development proposals when more than one level of government is required for project review. When	HDS has generally been effective at coordinating among different governmental	This policy is appropriate.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	one level of government is required for project review.			possible, we time the release of our Notice of Funding Available (NOFAs) to be consistent with the timeline of State and federal programs.	agencies in reviewing residential developments.	
ACTION 3.4.2	*Allocation of Project-based Section 8 Units.* Reduce costs and achieve greater cost effectiveness by allocating project-based vouchers, when possible, using an existing competitive process initiated by the City of Oakland, as funding and other program consideration allows.	Oakland Housing Authority	Ongoing, 2015-23	Per this policy, the Oakland Housing Authority matches its scoring criteria for allocation of Project-Based Vouchers (PBV) to the City's scoring criteria for NOFA applications. See www.oakha.org for the Annual MTW FY 2021 report - Activity #06-03 discusses allocation of project-based vouchers through existing competitive processes. Appendix C shows allocations of project-based vouchers across all projects. As of FY 2021, there are 5,135 PBV units allocated. See Action 5.1.4 for more information about voucher allocations.	The policy is an effective means of promoting intergovernmental coordination and maximizing the benefit of voucher subsidies.	The policy is appropriate to Housing Element goals.
POLICY 3.5: Financing Costs						
ACTION 3.5.1	*Access to Low-Cost Financing for Development.* Continue to assist affordable housing developers in obtaining financing for their projects. (See actions under Policy 2.1.)	DHCD – Housing Development Services	Ongoing, 2015-23	City funds awarded to affordable housing developers are offered on favorable terms, including a 3% simple interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves	The policy is a core component of the City's strategy to provide housing to low-income households.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and developer fee, and a 55-year loan term. The City works with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. The City also coordinates with developers to help ensure that they qualify for additional funding from county, state, and federal sources. For more information about NOFA funds committed recently, please see Action 2.1.1.		
ACTION 3.5.2	*Access to Low-Cost Financing for Home Purchase.* Continue to implement homebuyer assistance programs for low- and moderate-income households. (See Action 2.2.1.)	DHCD – Housing Development Services	Ongoing, 2015-23	The City continued to operate First Time Homebuyer Programs as funding was available (either through State funding or through program-related income). In 2021 the MAP program made one loan with the last $15,000 of program funds to assist a first-time homebuyer. In 2015-2021 the programs issued 121 loans totaling $6,782,346. See also Action 2.2.1.	The programs are very effective in assisting low- and moderate-income homebuyers to acquire homes, in slowing the effects of gentrification, and in providing equitable opportunities for ownership and wealth-building among disadvantaged communities.	The goals are achieved when down payment assistance is provided to assist low- and moderate-income buyers with low access to assets and credit to secure long term affordable housing through ownership, the greater

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						community benefits by retaining a diversity of homeowners including those earning low- to moderate-incomes.
POLICY 3.6: Environmental Constraints						
ACTION 3.6.1	*Remediation of Soil Contamination.* Explore possible funding sources and other ways to assist prospective housing developers in addressing soil contamination on potential housing sites. If appropriate funding can be identified, develop and implement a remediation assistance program.	Housing & Community Development	Investigate potential funding sources	There has been no new action since 2015. The City no longer operates the EPA's Revolving Loan Program due to a lack of staffing and currently identified environmentally-challenged small infill brownfield sites that would qualify for the program. However, the City can re-apply for the program when staffing and sufficient qualifying opportunities are available. As private development projects are proposed, City staff will explore the needs and possibly apply for assessment and cleanup grants for eligible sites, as needed. Other potential funding sources such as the Leaking Underground Storage Tank Fund can also be evaluated for applicability on a site-by-site basis.	The policy does not outline a clear plan of action. City staff have carried out or assisted with environmental remediation on an ad hoc basis.	The goal is appropriate but does not delineate a clear program or funding stream for implementation.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 3.7: Community Outreach and Education						
ACTION 3.7.1	*Community Outreach Program.* Continue to periodically meet with housing advocacy groups and neighborhood organizations to educate the public on affordable housing and reduce community opposition to affordable housing developments.	Bureau of Planning; Housing & Community Development	Ongoing, 2015-23	The City has continued to regularly attend meetings with East Bay Housing Organizations (EBHO), a local membership organization that conducts advocacy and policy work for affordable housing. It has also held ad hoc meetings with stakeholders about new housing programs and policies as needed. Affordable housing project sponsors are typically required to act as the lead organization in conducting outreach on specific projects, providing evidence of community support as a condition of receiving local and federal funds. The City has also engaged in direct outreach on specific projects on occasion as needed.	While quantitative data is not available to evaluate the effectiveness of community outreach, experience suggests that it has been an effective means of generating support for affordable housing.	While advocacy is an important tool for achieving Housing Element goals, it may not be properly suited to City staff to carry out such goals. The action may need to be refined to clarify role of City.
GOAL 4: Conserve and Improve Older Housing and Neighborhoods						
POLICY 4.1: Housing Rehabilitation Loan Programs						
ACTION 4.1.1	*Rehabilitation Loan Programs for Owner-Occupied Housing.* Provide loans for correction of code violations, repair to major building systems in danger of failure, abatement of lead-based paint hazards,	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent on availability of funding for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and Access Improvement Program for	The action is an effective means of repairing housing in danger of major code violations/deficiencies, and prevents health risks,	The action is appropriate; it is aligned with the Housing Element and preserving and protecting the City's

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	minor home repairs for seniors, and emergency repairs, using the following programs: • HMIP Deferred Loan Program • Alameda County Minor Home Repair Grant Program • Emergency Home Repair Program • Lead Hazard Control and Paint Program • Neighborhood Housing Rehabilitation Program • Access Improvement Program • Weatherization and Energy Retrofit Loan Program			disabled homeowners, though existing Rehabilitation Programs.	community deterioration, and blight.	existing housing stock.
ACTION 4.1.2	*Rehabilitation Loans for Owner-Occupied Buildings With 2 To 4 Units.* Use the City's HMIP Loan Program for owner-occupied buildings of 1-4 units. In structures with 2 to 4 units,	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent on availability of funding for the correction of major code violations/deficiencies, emergency repairs, and lead-based paint	The policy is an effective means of repairing housing in danger of major code violations/deficiencies, and prevents	The policy is appropriate for repairing housing in danger of major code violations/defici

	the rental units may also be rehabilitated using funds from this program.			abatement, though existing Rehabilitation Programs.	health risks, community deterioration, and blight.	encies, and prevents health risks, community deterioration, and blight.
POLICY 4.2: Blight Abatement						
ACTION 4.2.1	*Anti-Blight Programs*. Implement a variety of programs to reduce blighting conditions that can lead to disinvestment and deterioration of the housing stock. These include enforcement of blight regulations, graffiti abatement, boarding up of vacant buildings, and a Clean Oakland Program.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to neighbor complaints of property maintenance.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.
ACTION 4.2.2	*Housing Code Enforcement.* Enforce housing codes to ensure decent, safe, and sanitary housing conditions. Orders to abate will be followed up with additional actions. The City may correct deficiencies itself and then place a lien against the	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to tenant complaints of housing maintenance.	Given current methods of program execution, at the moment only the most egregious cases need enforcement efforts. The Bureau is moving toward a	The Building Services Department will continue this program and continue to look for more effective and efficient methods of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	property for the cost of the repairs.				proactive rental program to conserve/improve the older housing stocks.	addressing housing violations in the city.
ACTION 4.2.3	*Problem Properties Program.* City Staff will resolve public nuisance housing through joint enforcement actions of Code Enforcement, Police, Fire, and Alameda County Department of Environmental Health. Enforcement actions will include financial penalties and incentives.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to complaints of property and housing maintenance issues that involve abatement interference with contractors on problem properties.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.
ACTION 4.2.4	*Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program.* The City of Oakland's Foreclosed and Defaulted Residential Property Registration, and Abatement Program (O.M.C. 8.54) requires owners or the beneficiary and/or trustee	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	In 2015—since the Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program was strengthened to include defaulted properties in the fall of 2012—over 3,000 foreclosed or defaulted properties were registered (with 700 remaining active). The City continues to operate this program, although the number of registered properties	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	pursuing property foreclosure and/or their agents to register, inspect, and potentially maintain their residential properties to protect the health and safety, livability, appearance and social fabric of our neighborhoods. Code Enforcement pro-actively monitors registered properties for trespassers, blight, pollutants, and vectors. Enforcement actions include financial penalties for un-maintained properties or registration violations.			decreased significantly over the period. In 2021, about 31 foreclosed or defaulted properties were registered.		
ACTION 4.2.5	*Tax Default Properties Program.* City staff will continue to work with the Alameda County Tax Collector, to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The program takes advantage of the City's right of first refusal to purchase such properties. This program allows for City	Bureau of Building	Ongoing, 2015-23	During this period, City staff supported the Alameda County Tax Collector in its efforts to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The City encouraged and supported, where possible, non-profit partners to exercise their right of first refusal to purchase and rehabilitate such properties. The goal of these actions was to facilitate the rehabilitation and reuse of existing, distressed housing stock. The City does not intend to	The City conducted a pilot program to purchase and rehabilitate tax defaulted properties with a non-profit partner beginning in 2012. Since that time, however, the City has continued to pull properties from auction but	Acquisition and rehabilitation of distressed properties benefits when driven by small, nimble and focused actors. It is more appropriate at this time that the City defer to, encourage and,

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	to leverage its investment of Code Enforcement dollars by targeting third party purchases to small local developers of vacant problem properties. The goal of this program is to quickly rehabilitate housing stock for resale to affordable housing qualified applicants.			exercise its own right of first refusal and take title to such properties, so as to avoid complications and delays that may arise from public ownership and focus limited City resources on other higher-impact housing actions. In January 2022, DHCD received a Breakthrough Grant from San Francisco Foundation to support a fellow and a community partner in creating an emerging developer program, part of which would look at the tax defaulted properties as a potential source of projects for emerging developers.	has not consistently followed through in purchasing and rehabilitating the subject properties due to lack of resources, loss of institutional memory and other factors.	where possible, support its partners in purchasing tax defaulted properties rather than itself purchasing such properties.
ACTION 4.2.6	*Investor-owned Property Registration, Inspection and Maintenance Program.* The City of Oakland's Investor-owned Residential Property (IORP) Registration, Inspection and Rehabilitation Program (O.M.C. 8.58). In order to address the decline of neighborhood livability and health and safety problems that have arisen from high levels of foreclosure activity	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	Designed to manage the downstream effects of foreclosure, the IORP program was implemented in March of 2013 to enforce the registration, City inspection, and abatement requirements contained in OMC 8.58. The majority of violations found during these inspections have been related to blight and vandalism incurred during the foreclosure process and unpermitted work performed by the former owner or the investor that purchased the property with the intent to re-sell.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	in Oakland, the Oakland City Council passed an ordinance designed to address issues of deferred maintenance or property neglect associated with properties in the foreclosure process. This program requires non-owner occupant buyers of properties that have a default or foreclosure history to register and arrange for an inspection by Building Services. A City inspector will then assess whether the property conditions meet the local building or housing codes or whether blight abatement or rehabilitation work is needed. If the property is found to be in violation of City code requirements, the inspector will work with the new owner on an abatement plan.			In 2021, about 19 investor-owned properties were registered.		
POLICY 4.3: Housing Preservation and Rehabilitation						
ACTION 4.3.1	*Historic Residential Building Relocation.*	Bureau of Planning	Ongoing, 2015-23	Historic Preservation Element Policy 3.7, 'Property Relocation Rather Demolition,' recommends 'reasonable	In 2015 three houses were moved to new	Building moves occur very rarely, unless

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Notify the public of the opportunity to purchase and relocate a residential building, prior to its demolition for a public improvement project.			efforts to relocate the properties to an acceptable site' and references relocation effort as a 'standard condition of approval for... removal of any residential building' at the time the Historic Preservation Element was written. Requirements include advertising buildings' availability and contributing what would have been the cost of demolition toward the move. Work is entirely in the private sector as there are no City funds available to support these efforts financially. The main obstacles include finding available land, purchasing that land, and approving a complicated array of permits quickly.	sites where they continued in low-density residential use. Availability of land was by chance, where nearby owners happened to have sites. Two houses were displaced by Children's Hospital expansion and one in Fruitvale was accepted by an owner whose previous building had burned. Since then, there have been several efforts to relocate houses in West Oakland and the Broadway Valdez Specific Plan area, but development pressure seems too great to find available move-on sites or get the older buildings incorporated into	there is a major dislocation such as the 980 freeway construction that sent houses to both Preservation Park (museum and office uses) and to Oak Center (residential) under Redevelopment' s auspices in the 1980s. This is an appropriate way to conserve housing stock, but will never affect a large number of units unless large amounts of land somehow become available. Regardless, the City will continue to keep

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					new high-density development projects.	this policy under the auspices of the Planning and Building Department.
ACTION 4.3.2	*Housing Repairs for Seniors and People with Disabilities.* Support home repair program offered by a local nonprofit organization to assist low-income seniors and people with disabilities to remain independent by rehabilitating their homes. Citywide services are contingent upon award of funding.	DHCD – Community Development Block Grant Program	Consider funding program in next Housing Element Program Round	The City continued to provide rehabilitation loans and grants to moderate-, low-, and extremely-low-income homeowners including seniors and people with disabilities for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and accessibility modifications. Program availability is contingent on funding availability. A program specifically targeting only low-income seniors would require additional funding sources for implementation.	This program has been effective in assisting senior citizens and people with disabilities with housing rehabilitation so that they may remain in their homes.	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.
ACTION 4.3.3	*Access Improvement Program.* Provide grants to owners of rental and owner-occupied housing to make accessibility modifications to accommodate persons with disabilities.	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide Access Improvement grants to low- and extremely-low-income homeowners and tenants contingent of funding availability. Grant funds are designated for accessibility modifications to accommodate persons with disabilities.	This program has been effective.	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.
ACTION 4.3.4	*Scattered-site Single Family Acquisition and Rehabilitation Program.*	DHCD – Housing Assistance	Program implement ation	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for	The program has been effective at turning blighted	The mechanism to clear liens and use developer

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family homes for re-sale, lease-to-own, or for rent (see also Action 2.2.2).	Center/Strategic Initiatives	beginning 2014-15	development and sale to moderate income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021 the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the period 2015-2021 there were 18 units developed and closed. In 2021, the Oakland Community Land Trust was awarded $4,050,000 for three projects totaling 22 units and a Scattered Site Single Family Lease to Own Project, dedicated to the creation and preservation of affordable housing. The funds are available thanks to the 2016 voter-approved City Bond Measure KK. Oakland Community Land Trust (OakCLT) and the Bay Area Community Land Trust (BACLT) will develop four projects that preserve affordable housing for 28 Oakland households earning up to 80 percent of Area Median Income (AMI), or $73,100 for a single-person household.	properties to new construction single-family dwelling for larger households.	capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a boot of subsidy may be needed to maintain feasibility of future projects using this model.

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				See also Actions 2.2.2 and 2.2.4.		
ACTION 4.3.5	*Continuing Implementation of Mills Act Contracts.* The City will continue to offer several Mills Act contracts a year to stimulate the restoration and maintenance of designated historic properties through property tax reductions, as authorized by State law.	Bureau of Planning	Ongoing, 2015-23	Owners receive a property tax reduction in exchange for a long-term contract to put the property's tax savings into the rehabilitation of the building. The program was adopted as a recommended action of the West Oakland and Central City East Redevelopment Plans, though it is not restricted to those areas. The property must be a Designated Historic Property. The designation by Landmarks Board often occurs concurrently with the Mills Act application. Oakland's first Mills Act contracts were recorded in 2008.	As of 2021, the fourteenth year of the program, there are about 92 residential properties (out of 97 properties total) with recorded Mills Act contracts. The largest number are in Council Districts 2 and 3, where Oakland's oldest and largest buildings are concentrated. The City ordinance establishes annual caps on tax revenue reductions, and the practical limit on new contracts is usually about ten a year. The tax assessment formula established by	This program is an appropriate and popular way to conserve and create housing stock, though it will never affect a vast number of units. Program participation requires a fairly high level of planning and building sophistication and long-term commitment and follow-through. Work under the Mills Act has included seismic strengthening, reversal of inappropriate alterations, residential conversion of commercial and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					State law favors recent buyers with high assessments over longtime owners. Building rehabilitation is assisted not only by the Mills Act tax savings, but by the eligibility of historically designated properties to use the performance-based California Historical Building Code.	industrial buildings, and restoration and reactivation of a large blighted and abandoned former rest home near the 580 freeway.
ACTION 4.3.6	*Rehabilitating Public Housing.* Focus investment of Oakland Housing Authority's Making Transitions Work funds into rehabilitating current public housing or project-based voucher units in order to increase housing options for low-income families, improve the quality of housing for families, and improve the neighborhoods	Oakland Housing Authority	Ongoing, 2015-23	OHA continued to rehabilitate affordable housing units during the period. Oakland Housing Authority (OHA) also plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. OHA intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and	This policy action is effective. During the State's economic and foreclosure crisis, OHA preserved 1,615 former public housing units by moving the 249 properties onto the Section 8 Project Based rental assistance program through	This policy action is appropriate to the housing element. With HUD defunding the operating funds for both maintaining and rehabilitating public housing inventory, OHA has pursued multiple

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and communities surrounding the housing.			asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers. OHA uses MTW funding flexibility to address deferred maintenance in its PBV portfolio, OAHPI, and typically averages between 50-75 major unit rehabilitations annually, both preserving and improving this housing stock. In FY 2021, OHA continued the substantial rehabilitation of the following affordable housing projects: • Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. • Harrison Towers was also approved for disposition and	HUD's Section 18 Disposition process, which dramatically increased the operating revenue to the properties allowing for their on-going replacement and restoration. A long outstanding disposition application that was originally submitted in 2010 was revamped, resubmitted, and approved in FY 2019 to dispose of 253 units of public housing across three senior sites and planning for the extensive rehabilitation was ongoing during the FY. Following that model, during FY 2019 OHA planned for the conversion	strategies such as Section 8 disposition and RAD conversion to convert and preserve affordable housing stock to more financially viable programs with more flexible financing options.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022.	of 261 public housing units in mixed finance developments and plans were created to convert to RAD Section 8 Vouchers beginning in late 2019. These strategic moves have positioned the agency to be successful through future funding challenges allowing the agency to be less reliant on threatened funding streams and to generate revenue to sustain the agency going forward.	
ACTION 4.3.7	*Proactive Rental Inspection Policy.* Develop new policy to require registration and inspection of existing City market-rate rental units to	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Safe Housing Inspection Pilot Program (SHIP) concluded in 2016 – proactively inspecting approximately 1,200 rental units in 140 buildings.	The program will be implemented upon approval from the City Council.	The program will be implemented upon approval from the City Council.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	confirm code compliance and habitability.			In 2021, the program development process is almost completed for implementation to inspect 20% of all rental units.		
ACTION 4.3.8	*Mitigate Loss of Units Demolished by Public or Private Actions.* Consider developing a new policy to comply with the spirit of Government Code 65583(c)(4) that states: "Conserve and improve the condition of the existing affordable housing stock, which may include addressing ways to mitigate the loss of dwelling units demolished by public or private action."	DHCD; Bureau of Planning	Program implement ation beginning 2015	Planning Code Section 17.102.230, which requires a Conditional Use Permit and the provision of replacement units if Residential Hotel Units are converted or demolished, was not changed in 2021. In 2021-2022, the Planning & Building Department has been in the process of updating the City's existing Density Bonus Ordinance in compliance with State law (California Government Code Sections 65915 through 65918). This includes a provision clarifying implementation of required replacement units in density bonus projects when existing rent-controlled or affordable units will be demolished. In addition, in 2021, the Planning Bureau updated its basic application form to include questions for all applicants (regardless of the type of project they are applying for) about whether there are existing tenants and/or affordable units on site, and	This action has been effective in preventing demolition of Residential Hotel units. In addition, implementing the new provisions of State Density Bonus law and updating the basic application for projects is effective by alerting Staff of existing conditions and the applicants of requirements for the replacement of affordable and rent controlled units.	This action is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				whether any tenants will be displaced due to the project. See also Action 5.4.1.		
ACTION 4.3.9	*Seismic Safety Retrofit Policy.* Develop and explore funding sources for a new seismic retrofit policy, coupled with tenant protections, to preserve about 14,000 soft story housing units in Oakland's flatland neighborhoods at risk for destruction in a major earthquake. A low interest loan fund may be possible through combining available public monies with private capital or alternatively through issuing a new bond, which would require voter approval.	DHCD; Bureau of Planning	Program implementation beginning 2015	Two applications for FEMA Hazard Mitigation Grant Program (HMGP) funding were applied for in 2016 and $4.5MM for each was awarded in 2018, providing 9MM total in administrative and project cost reimbursement for two seismic retrofit programs: Earthquake-Safe Homes Program (ESHP: One- to four-unit owner-occupied homes) and Safer Housing for Oakland Program (SHOP: Five plus unit soft story apartment buildings). The programs provide up to 75% reimbursement to owners after retrofit completion. Both programs close in March 2022. A new application for additional HMGP funds for SHOP is being submitted in Spring of 2022, to re-fund the program for an additional 3 years.	Both SHOP and ESHOP have been very effective, even with the challenges introduced in 2020 by COVID-related health and financial instability and associated contact restrictions. In just over 3 years, SHOP expects to retrofit 39 buildings affecting 586 households. ESHP will retrofit 121 buildings affecting 145 households. Both programs together have made housing for 707 Oakland households safer and more stable.	Both programs are closely aligned to City priorities of preserving existing units and keeping residents safely and affordably housed. Most single-family owners would not be able to retrofit without assistance, especially if foundation work is required. Those that are the least likely to be able to afford to retrofit, will also be the least able to find temporary housing, rebuild,

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						and recover financially in the event of earthquake damage. Most soft-story building owners are in lower-income areas and all are restricted by rent control, with tenants who have similar displacement and recovery challenges as homeowners. Apartment building owners may struggle to finance what is now a mandatory retrofit required by City ordinance and many are non-compliant or applying for an extension due to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

						financial hardship. Without financial assistance, the buildings could remain at risk, or the financial burden of the required seismic retrofits is likely to be passed to tenants in the form of reduced property maintenance and rent increase due to capital improvement pass-through.
POLICY 4.4: Anti-Displacement of City of Oakland Residents						
ACTION 4.4.1	*Consider Developing a Standard City Tenant Relocation Policy and Fund City Program Operations.* The City has a number of ordinances that have tenant relocation assistance requirements, including	DHCD – Housing Assistance Center/Strategic Initiatives	FY 2014-15	The City continued to enforce the Uniform Residential Tenant Relocation Ordinance adopted in 2018. The City continued to fund a program providing advisory and financial assistance to tenants displaced as a result of a code compliance action, including paying relocation benefits in the case that a	The policy has been fully implemented and is effective.	The policy is appropriate to Housing Element goals. Since the policy has been fully adopted, this item should be revised in

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	under code enforcement activities, condo conversions, Ellis Act, Just Cause for evictions, and SRO conversions. City of Oakland will consider 1) establishing one standard policy across tenant relocation requirements, such as code enforcement, condo conversions, Ellis Act, Just Cause for evictions and SRO conversions, 2) explore new strategies to fund and recover relocation costs, and 3) allocate and fund adequate staffing to monitor relocation programs and recover costs from responsible landlords.			property owner does not meet their obligations, subject to availability of funds. City staff also operate a program to assist low-income and low-asset small property owners who are required to pay relocation benefits resulting from an owner or relative move-in but would face a financial hardship to do so.		future cycles to focus on maintenance or identify new goals.
GOAL 5: Preserve Affordable Rental Housing						
POLICY 5.1: Preservation of At-Risk Housing						
ACTION 5.1.1	*Monitoring and Preservation.* Monitor the status of federally assisted projects to identify those at-risk of converting to market rate housing. Monitoring will include analysis of HUD data,	DHCD – Policy and Programs	Annual, 2015-23; City will identify projects at highest-risk each year (that	The City is not aware of any restricted affordable units that converted to market-rate, and did not receive advance notice of an intent to terminate use restrictions on assisted housing. Staff have not had capacity to research or monitor the conversion of such units.	The policy is effective, but only rarely needed. Please note that staff have not had capacity to research or monitor the	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	a survey of building owners and managers to determine the likelihood that a building will convert, and consultation with the California Housing Partnership Corporation. Under California State Law, owners must provide tenants and the City with 12 months advance notice of an intent to terminate use restrictions on assisted housing.		could convert within the next 24 months)		conversion of such units.	
ACTION 5.1.2	*Contact With Owners of At-Risk Buildings.* Contact owners to advise them of notification requirements under State law, to offer to assist them in pursuing higher Section 8 rents from HUD, and to encourage them to work with the City to facilitate preservation purchases of their properties by interested parties.	DHCD – Policy and Programs	Annual, 2015-2023; City will identify projects at highest-risk each year (that could convert within the next 24 months)	See Action 5.1.1; In 2021, staff did not have capacity to research or monitor the conversion of such units. Five properties were listed as "At-Risk" or questionable in Table 3-54 of the 2015-2023 Housing Element: • Lottie Johnson Apts (970 14th St) • San Pablo Suites (2551 San Pablo Ave) • Santana Apts (2220 10th Ave) • Taylor Methodist (1080 14th St) • The Claridge Hotel (634 15th St)	The policy is effective. A new search for at-risk properties will need to be identified in the next cycle.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Of these properties, San Pablo Suites was destroyed in 2017 due to fire. The Claridge Hotel is classified as a residential hotel and is thus now subject to the City of Oakland's Ordinance No. 13509 regulating the demolition, conversion, and rehabilitation of residential hotels. Santana Apartments is owned by Mercy Housing, a nonprofit affordable housing developer committed to preserving affordable housing. Although CTCAC affordability requirements will expire before 2023, the property also has a Ground Lease with affordability restrictions through 2067. Lottie Johnson Apartments and Taylor Methodist are both funded by HUD. A HUD representative confirmed via email on 3/19/2020 that neither property should be considered at risk.		
ACTION 5.1.3	*Financial Assistance for Preservation Projects.* Award preference points under the City's Housing Development Program for	DHCD – Housing Development Services	Ongoing, 2015-23	The City of Oakland has continued to commit funds to projects that apply for its NOFA for the Acquisition, Rehabilitation, and Preservation of Multifamily Affordable Housing.	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	funding for projects that preserve existing rental housing that is at risk of loss to the affordable housing supply. Support applications for Federal, State and private funding for preservation.					
ACTION 5.1.4	*Project Based Section 8 Assistance.* Collaborate with the Oakland Housing Authority to secure project-based Section 8 assistance to preserve at-risk housing both to enhance affordability and to provide additional income that can leverage private capital for repairs and improvements.	DHCD – Housing Development Services; Oakland Housing Authority	Ongoing, 2015-23	While development of new affordable housing has been an ongoing strategy within OHA to fulfill the MTW objective to increase housing choice, OHA leadership recognized that the decline of utilization within the housing choice voucher (HCV) program required a faster response than building new units. At the start of the decade in late 2009, OHA had 273 project-based voucher (PBV) units and in FY 2019 this number has grown to 3,463 committed or leased and 5,246 allocated overall which is about 40% of the MTW voucher allocation. This growth was expedited by the disposition of 1,615 public housing units in 2010, and two Requests For Qualifications (RFQs) issued in 2017 to award project-based voucher subsidies to existing units and single room occupancy (SRO) apartments to serve specialized populations. The RFQs	The policy is effective. The strategy to allocate PBV subsidies through various methodologies has proved important and strategic to preserve affordable units for households served through the program as the housing market continues to remain expensive.	As the decline of HCV utilization and increasingly competitive and expensive housing market spurred the need to attach subsidy to the units themselves using PBVs.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				received a huge response from existing owners and along with awarding PBVs to projects receiving funding through the City of Oakland competitive NOFA process and OHA's new development projects, OHA has awarded thousands of PBVs which has helped offset the declining utilization within the HCV program and ensures long term affordability of these units. In FY 2019, OHA leased 388 additional PBV units and has many in the pipeline to allow us to continue to serve the maximum number of families possible. Additionally, in FY 2019 OHA was approved to dispose of 253 units of senior public housing through Section 18 disposition and planning for this major renovation continued with implementation of the disposition targeted for FY 2020. This new disposition will bring the total number of disposed units to 1,868. During 2021, OHA leased and/or contracted 213 new PBV units. The leased and contracted units consisted of new construction as well as previously conditionally awarded units, which included completing the environmental clearances, Housing		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Quality Standards (HQS) inspections and in-place tenant eligibility determination for sites previously awarded through two Requests for Qualifications (RFQ) issued in FY 2017. Furthermore, 95th and International (27 units), second phase of Acts Cyrene Apartments, which was not planned for FY 2021, entered into an Agreement to enter into a Housing Assistance Payment contract during the FY. In FY 2021, OHA had 4,462 PBV assisted units under contract as of the beginning of the FY and placed under contract an additional 213 PBVs during the FY, bringing the total under contract to 4,675. OHA's overall allocation of PBVs, which includes conditional awards, the pending disposition of Harrison Senior and units to be converted using RAD is 5,285 (14 are PBV VASH for Lake Park), which is approximately 40 percent of the voucher portfolio.		
ACTION 5.1.5	*Local Non-traditional Housing.*	Oakland Housing Authority	Ongoing, 2015-23	OHA administered existing programs and continued implementation of new local programs during the period.	This policy action is effective. Throughout the	The policy is appropriate to Housing Element

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Oakland Housing Authority will use Making Transitions Work funds to provide the appropriate financial and other interventions necessary to preserve at-risk affordable housing and to expand the population of families served in local, non-traditional OHA programs.			Existing programs such as the Sponsor Based Housing Assistance Program (SBHAP) offered housing assistance to 1) chronically homeless individuals from encampments, 2) formerly incarcerated individuals recently released from San Quentin prison, and 3) emancipated foster youth exiting the juvenile justice system. The Parents and Children Together (PACT) program evolved from a program serving primarily mothers exiting the criminal justice system to a citywide family unification program that includes any parent exiting the Santa Rita County Jail system that is enrolled in a reentry program designed and facilitated by the Alameda County Sherriff's Office (ACSO). In FY 2021, OHA served an average of 13 families through PACT. The Building Bridges (BB) initiative provides housing assistance to underserved populations, continued operations in FY 2021, but experienced some challenges with staff turnover and decreased utilization. Additionally, Oakland's plan to renovate a large site	previous decade, OHA has developed innovative local programs to meet the diverse needs of Oakland and served 673 families on average per month in 2010. This number has increased to 1,081 families per month served on average through local non-traditional programs made possible through MTW flexibility.	goals. With multiple factors squeezing the supply of affordable housing during this decade, Oakland saw a marked increase in homelessness and certain populations being especially hard hit by the housing crisis. Using MTW flexibility, OHA began strategic partnerships with City and county agencies to promote systems alignment by breaking down silos, to provide targeted housing resources alongside supportive services from

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				remained on hold due to COVID-19 delays and shifting priorities. This program seeks to extend and leverage existing support through systems alignment to increase the chance of sustained success and long-term positive outcomes for these families. The BB SRO program has a capacity, when all sites are renovated and ready, to serve 289 families through a service-enriched SRO model. The shared housing and transitional housing units are reserved to house veterans, homeless and foster youth. The BB CalWORKs program is designed to provide local housing assistance for one to two years for Alameda County Social Services Agency (ACSSA) clients who are actively engaged in a plan to achieve self-sufficiency. Specifically, the program serves employable, formerly homeless CalWORKs clients with the goal of stabilizing the housing and improving outcomes for families and children. During FY 2021, OHA housed families referred from ACSSA, averaging 24 families assisted per month, a 12% increase over FY 2020.		these agencies to extend the runway of support and leverage funding more effectively, building on a platform of stable housing. With the launch of the Building Bridges initiative in 2017, OHA provided additional housing assistance funding for marginally served populations such as emancipated foster youth, CalWORKs working families, homeless veterans and the elderly, to supplement the resources being provided by

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No. *Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
			BB THP+ is a short-term program designed to extend the runway of assistance and help create a pathway to economic stability for people exiting the foster care system. OHA utilized the County of Alameda's 2017 RFP as the competitive selection process to award housing assistance funding to First Place for Youth (FPY). The award of funding resulted in an executed contract between OHA and FPY to provide rental housing assistance for low-income THP+ participants for up to five years. The service provider assists program participants through direct referral. The program capacity can serve up to 50 families per month and in FY 2021 OHA served 25 families per month, a 12% increase over FY 2020. BB-Key To Home (BB-KTH) is a new program where OHA partnered with the Oakland Affordable Housing Preservation Initiative (OAHPI), Alameda County Health Care Services (HCSA) and Abode Services to provide property-based housing assistance to up to 23 families through a new local housing assistance pilot program. The program provided a coordinated exit		state and local funding sources. These programs in FY 2019 are adding 190 families served in Oakland. These programs would not be possible without the authority and flexibility granted through the MTW demonstration. The MTW demonstration was set to expire in 2018 and OHA's leadership via a national Steering Committee of a few MTW agencies, led negotiations with HUD on behalf of all 39 MTW agencies nationwide, to successfully

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				for families with children out of Project Roomkey interim housing into more long term supportive housing managed by a third-party homeless service provider and property manager contracted by OAHPI. The program served an average of 5 families per month during FY 2021.		extend the contract with HUD as is, until 2028. This was critical to enable OHA to continue to provide uninterrupted service to its many families served through local non-traditional programs using MTW flexibilities.
POLICY 5.2: Support for Assisted Projects with Capital Needs						
ACTION 5.2.1	*Advocacy for State and Federal Financing.* Actively work to identify and secure State and Federal funding to provide for capital needs of older assisted projects. The City will notify property owners of available state and federal funding options and provide technical assistance in applying for such funds.	DHCD – Policy and Programs	Ongoing, 2015-23	Significant changes to how competitive State funding is scored and prioritized has resulted in challenges for City projects and are at odds with City priorities. Specifically, the 4% tax credit and tax-exempt bond program, which is the lead funding vehicle for large affordable housing developments administered by the California Debt Limit Allocation Committee (CDLAC) and Tax Credit Allocation Committee (TCAC) shifted from being essentially over-the-counter to a competitive	The policy is effective and critical to producing and preserving affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				resource in recent years. The agencies have undergone significant scoring revisions that disadvantage Oakland, such as the emphasis on high opportunity neighborhoods (under which Oakland's census tracts are considered vastly low opportunity), or the penalization of high-cost cities under the tie-breaker scoring. The City has remained actively engaged in each scoring iteration, in coordination with other high cost cities and affordable housing developers. Whenever possible, the City advocates for increased funding at the State and federal level for affordable housing. The City regularly consults with affordable housing developers to ensure that the timing and dollar amount of City funding is aligned with county, State, and federal funding program requirements. This helps ensure that City funds are leveraged maximally against other funding sources. The City of Oakland acts as the Local Reviewing Agency for any affordable		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				housing applying for Low Income Housing Tax Credits in Oakland. The City of Oakland also acts as a co-applicant with developers seeking funds through California's Affordable Housing and Sustainable Communities (AHSC) program, Infill Infrastructure Grant (IIG) program, and Transformative Climate Communities (TCC) program. These programs are generally oriented towards new construction.		
ACTION 5.2.2	*Funding for Capital Needs – Preservation and Rehabilitation Programs for Rental Housing (not owner-occupied, buildings).* Provide loans through a competitive funding process for the rehabilitation of affordable rental housing for those buildings with existing City regulatory agreements. The goal of this program is to correct code deficiencies and ensure affordability for low-income households. The City will develop this for acquisition, rehabilitation,	DHCD – Housing Development Services	Ongoing, 2015-23	Sources of funding include Bond Measure KK ($100 million towards housing programs) and Alameda County Measure A-1 (almost $55 million towards housing). City NOFAs for the Acquisition, Rehabilitation, & Preservation of Multifamily Affordable Housing enable buildings with existing City regulatory agreements to apply for funding. Oakland Housing & Community Development issued its Strategic Action Plan (SAP) to outline its immediate strategies for investment for 2021-2023. In accordance with the SAP strategies, Oakland HCD has	The policy is effective in preserving and improving the City's stock of affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and preservation of rental housing. The rental housing eligible for this program will have City regulatory restrictions from funding sources such as CDBG and HOME Funds.			deployed its production funding through several NOFA rounds to support the generation of the New Construction pipeline, the acquisition and conversion of existing buildings through the Acquisition and Conversion to Affordable Housing program, and the preservation and extending affordability through a Preservation and Rehabilitation program. Oakland HCD also aggressively pursued competitive Homekey funding from the State to immediately acquire and create the homeless housing units that are so desperately needed across the City and region. Across all programs, funds are deployed in a competitive manner with an emphasis on prioritizing projects that reach deeper affordability and, in more recent NOFAs, reflect racial equity goals for the department and City.		
POLICY 5.3: Rent Adjustment Program						
ACTION 5.3.1	*Rent Adjustment Ordinance.* Continue to implement the Rent Adjustment program (Chapter 8.22 of the Oakland Municipal Code) that limits rent increases on units	DHCD – Rent Adjustment Board	Ongoing, 2015-23	Since 2015, the Rent Adjustment Program continued to implement the policies limiting rent increases on units covered by the Rent Adjustment Ordinance. In 2017, numerous changes were made to Oakland's Rent	The policy is effective in preventing displacement of existing tenants.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	covered by the Ordinance based on a formula tied to increases in the Consumer Price Index.			Adjustment and Just Cause ordinances that create more protection for tenants and facilitate improved enforcement and data collection such as owner move-in certifications, revisions to relocation provisions when owners move back into units, and noticing requirements. In addition, voter approved Measure JJ increased the number of units covered by the Just Cause ordinance and requires landlords to petition for increases that exceed CPI.		
ACTION 5.3.2	*Just Cause for Eviction Ordinance.* Continue to implement the Just Cause for Eviction program (Chapter 8.22 of the Oakland Municipal Code) that limits evictions of residential tenants to specified causes and provides remedies.	DHCD – Rent Adjustment Board	Ongoing, 2015-23	The Rent Adjustment Program continued to enforce the Just Cause for Eviction Ordinance.	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.
ACTION 5.3.3	*Ellis Act Protections Ordinance.* Continue to implement the adopted tenant protections (Chapter 8.22 of the Oakland Municipal Code) when landlords remove residential	DHCD – Rent Adjustment Board	Ongoing, 2015-23	In 2020, amendments to the Tenant Protection Ordinance, Rent Adjustment Program Ordinance, and Just Cause for Eviction Ordinance were adopted which strengthened protections for vulnerable tenants. Development of regulations to	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.

	rental units from the rental housing market pursuant to the Ellis Act (Cal. Gov't Code. §7060, et seq.).			implement these amendments were approved by the City Council in 2021.		
POLICY 5.4: Preservation of Single Room Occupancy Hotels						
ACTION 5.4.1	*Residential Hotel Conversion/Demolition Protections.* Continue to require, through the Planning Code, a Conditional Use Permit to convert a residential hotel facility to non-residential use (other than to a commercial hotel) or to demolish a residential hotel.	Bureau of Planning	Ongoing, 2015-23	The City continues the implementation of Planning Code Chapter 17.153 – regulations adopted in 2018 that protect Residential Hotels as an important housing typology. The regulations require a Conditional Use Permit and replacement units for any demolition or conversion of a Residential Hotel Unit. The Bureau of Planning continues to work with Residential Hotel property owners to create a Residential Hotel registry, so the City can monitor any proposed changes to these buildings to ensure they align with regulations. In addition, $14 million from the City's Measure KK bond proceeds for affordable housing is being targeted to the acquisition of SRO properties for use serving extremely-low-income and homeless households.	This program has been effective in retaining Residential Hotel units.	The policy is appropriate to Housing Element goals.
POLICY 5.5: Limitations on Conversion of Residential Property to Non-Residential Use						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 5.5.1	*Residential Property Conversion Ordinance.* Continue to require a Conditional Use Permit prior to converting a residential use to a nonresidential use in a non-residential zone. The City will review existing conditional use permit requirements to determine if revisions to the process are needed to reduce the potential for conversion of residential uses.	Bureau of Planning	Ongoing, 2015-23	In 2018, the City of Oakland strengthened regulations in Planning Code Section 17.102.230 restricting conversion of residential uses to non-residential uses.	This program has been effective in limiting the conversion of residential uses to non-residential uses.	The policy is appropriate to Housing Element goals.
POLICY 5.6: Limitations on Conversion of Rental Housing to Condominiums						
ACTION 5.6.1	*Condominium Conversion Ordinance.* The City will review the existing Condominium Conversion Ordinance and consider changes that: 1) considers an annual conversion cap, 2) eliminates the exemption for 2-4 unit buildings in the non-Impact Areas, 3) creates opportunities for tenant purchase and affordable homeownership for low to moderate income	Bureau of Planning	FY 2014-15	In February 2020, the Condo Conversion regulations were updated to make it harder to convert rental units to condominiums without replacement units being built.	This has been effective in reducing the number of condo conversions taking place.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	households, and 4) has strong tenant protection measures. Changes to this ordinance may only be made if adopted by the City Council and following appropriate public notice and debate.					
POLICY 5.7: Preserve and Improve Existing Oakland Housing Authority-Owned Housing						
ACTION 5.7.1	*Rehabilitation of Public Housing Units.* Utilize funding flexibilities provided by the Making Transitions Work program to rehabilitate and modernize existing public housing or project-based voucher units in order to increase housing options for low-income families and to ensure that OHA provides upgraded, high-quality units that are comparable or better than the market rate properties surrounding them.	Oakland Housing Authority	Ongoing, 2015-23	In 2018, the Bureau of Planning began working with OHA to develop a streamlined process for renovating existing affordable housing units and increasing density on existing OHA-owned properties. New state regulations, including SB 330, will facilitate processing of OHA applications once received by the City of Oakland. Further, the programs noted below do not require MTW funding, but are traditional HUD methods for rehabilitating public housing. OHA uses MTW funding flexibility to rehabilitate approximately 50-75 units annually in its PBV portfolio. The public housing portfolio maintained over 98% occupancy rate overall and staff aggressively pursued	This policy action is effective.	This is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				applicants on the waitlists to fill any open vacancies. In FY 2021, OHA continued the substantial rehabilitation of Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. There are 76 units in Oak Grove North including a manager's unit and 75 units in Oak Grove South including a manager's unit. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. The units in Oak Grove North and South had a status of "Demo/Dispo" during the disposition and renovation/rehabilitation process. At the end of FY 2021, interior rehabilitation at Oak Grove North had been completed and residents had moved back in while exterior work was continuing. At Oak Grove South, interior rehabilitation was in progress and residents were still relocated away from the building. Harrison Towers was also approved for disposition and during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022. OHA plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. The RAD program was signed into law in 2011 and further amended in 2014, and is administered under guidance from PIH Notice 2019-23 and all further revisions. OHA intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
GOAL 6: Promote Equal Housing Opportunity						
POLICY 6.1: Fair Housing Actions						
ACTION 6.1.1	*Funding for Fair Housing Organizations.* Provide funding for organizations that provide outreach, counseling, education, and investigation of fair housing and anti-discrimination laws. Specific areas of focus will include race, ethnicity, family status, and disability. Fair housing organizations respond to inquiries from those who believe they may have been victims of discrimination, and disseminate information through billboard campaigns, workshops, public service announcements and other media.	DHCD – CDBG Programs	Ongoing, 2015-23	Since 2015, the City has provided funding supporting the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa:Just Cause, and ECHO Fair Housing to provide fair housing related legal services, fair housing counseling, tenant-landlord mediation, outreach, education, info & referral, intake, assessment, fair housing investigations of discrimination, fair housing testing, and fair housing audits benefitting low- and moderate-income households. This includes CDBG funds. In FY 2020/21 and 2021/22, a pilot program under the Oakland Fair Chance Ordinance was implemented that prohibits rental housing providers in Oakland from advertising that applicants with criminal history will not be considered, inquiring about criminal history in rental applications, or relying on criminal history in making rental determinations. Affordable housing providers such as public housing or HUD-assisted housing providers may	The action has proven to be an effective resource in addressing housing discrimination. Each year the City funds fair housing organizations at approximately $261,475 among 4 fair housing agencies. Starting in FY 2020/21 and 2021/22 a two-year allocation was added for the Fair Chance Ordinance program. Annually the fair housing program benefits approximately 1,300 low- and moderate-income Oaklanders with fair housing issues. About 30-40 fair housing clients per	The action is a critical tool for addressing housing discrimination and promoting equal opportunity to housing. This action is in line with the City of Oakland's Race and Equity work and is further supported by findings in the 2020-20-25 Alameda County Regional Analysis of Impediments to Fair Housing Choice. Segregation between white and minority residents has increased in the

				screen only when required to under federal or State law.	year are able to preserve existing housing through the fair housing services. Fair Chance ordinance, while a pilot program is producing low numbers assisting 10 clients in year one of the pilot program.	last decade; number of Black residents in Oakland are decreasing; overall minority residents are being displaced; homelessness has increased by over 42% since 2017; minority households (especially Black and those of Hispanic ethnicity have highest rate of disproportionate housing needs. There are many more statistics to support the appropriateness of this program.
ACTION 6.1.2	*Housing Search Assistance for People with Disabilities.* Seek to provide funding to organizations that assist persons with disabilities to	DHCD – CDBG Programs	Ongoing, 2015-23	The City no longer contracts for housing search assistance and counseling, since 2013. The former Housing Resource Center staff, now a part of the Department of Housing and Community Development's	When fully resourced, this program is successful in assisting Oaklanders in	Oakland has experienced numerous shifts in its residential pattern in the years since the

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	locate accessible and affordable housing.			Community Development & Engagement section provided information and referral and kept updated resources for drop-in clients in need of housing search services. Due to limited staff and resource to support this work and due to the COVID-19 state of emergency, focus of services offered has shifted to keeping residents housed through the provision of relocation financial assistance to eligible residents per Oakland Municipal Code Section 15.60; anti-displacement services; and Emergency Rental Assistance services.	finding safe and affordable housing suitable for each household's needs, within means of each household; assisting in making sure all Oaklanders have safe and affordable housing. Housing search assistance is still a need, particularly for persons with disabilities.	Great Recession of 2008. With a current population of 440,981, Oakland's population has grown by approximately 13% compared to the 2010 Oakland population count. Oakland's central housing needs center on lack of affordable housing, high incidence of housing cost burden, particularly among extremely-low- and very-low-income renter populations, increasing degrees of homelessness

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						and lack of housing and critical services for homeless and special needs at-risk populations, and increasing displacement and gentrification pressures that have occurred over the past decade.
ACTION 6.1.3	*Affirmative Fair Marketing.* Require all recipients of funds for housing development to market their projects in accordance with written fair marketing guidelines, including measures to reach households otherwise unlikely to apply for housing due to its location or character.	DHCD – Policy and Programs	Ongoing, 2015-23	Most recent Affirmative Fair Marketing Procedures & Guidelines are posted on the City's website for owners and managing agents of housing assisted by the City, ensuring there is no discrimination against potential tenants or purchasers on basis of race, color, religion, sex, physical or mental disability, familial status (presence of child under age of 18 and pregnant women), national origin, ancestry, age, marital status, sexual orientation, gender identity or expression, having Acquired Immune Deficiency Syndrome (AIDS) or AIDS related conditions (ARC), source of income,	The policy is a highly effective means of ensuring access to affordable housing for underrepresented groups. This policy is effective in that in underscores the City's compliance with federal regulations.	The policy is fully consistent with the goal of promoting equal housing opportunity. Required for any unit of general local government (UGLG) for federally-assisted housing with five or more units.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				any arbitrary basis, or any other status protected by federal, State or local law.		
ACTION 6.1.4	*Housing Assistance Center.* Continue to support the Housing Assistance Centers' efforts to improve access to housing information and services for Oakland residents and small rental property owners and managers. The goal is to provide a one-stop housing services center that can assist with referrals, including accessing affordable housing and homeless shelter placements. The Housing Assistance Center is also partnering with other public and private agencies to improve access to additional housing resources and services available to Oakland residents.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	The Housing Assistance Center (HAC), launched in 2014 as a one stop housing services center serving residents with housing needs, allowing vulnerable residents to go to one place to address housing needs and questions. Since then, HAC transitioned to the Housing Resource Center (HRC), providing less counseling and housing search, providing more information and referral in addition to code compliance related relocation and anti-displacement services. Since 2020, HRC, now part of the Department of Housing and Community Development's Community Development & Engagement section, also administers the Emergency Rental Assistance Program (ERAP) funded by U.S. Treasury and State Rental Assistance Programs for the City's Keep Oakland Housed (KOH) programs.	Programs are very successful in serving Oaklanders who are most vulnerable to becoming homeless, helping to Keep Oakland Housed through rental assistance, anti-displacement, relocation services and other services supporting this effort.	As part of the Department of Housing & Community Development Strategic Plan, these efforts support Preservation and Protection Objectives of the "3-P" approach of Protection, Preservation and Production.
POLICY 6.2: Reasonable Accommodations						
ACTION 6.2.1	*Incorporate Reasonable Accommodations into City Programs and Policies.*	City Manager,	Ongoing, 2015-23	The City's reasonable accommodations procedure was adopted in 2014, and the City has continued to implement	Reasonable accommodations are an effective	Reasonable accommodations are a

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	plan that seeks to reduce concentrations of low-income people and low-income housing, and to provide a broader range of housing choices throughout the region.				recommendations that Oakland wrote in their letter.	
POLICY 6.4: Fair Lending						
ACTION 6.4.1	*Community Credit Needs Assessment.* Conduct regular assessments of community credit needs, including credit needs for housing. To conduct the assessment, the City will review reports from the federal government and nonprofit consumer organizations on lending patterns in Oakland and the availability of residential credit.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	Oakland HCD conducts periodic assessments of community credit needs, including credit needs for housing. The assessment involves reviews of lending patterns in Oakland and the availability of residential credit. In 2021 no Community Credit Needs Assessments were scheduled. Assessments have been performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018 the Linked Banking Ordinance requirements were waived when Treasury selected the new Fiscal Services vendor. In 2017 after a series of meetings, City Council amended the Linked Banking Ordinance to expand the survey questions and to require improvement plans for banks surveyed that fell short in various criteria. In past years, HCD budgeted	The program effectiveness has declined since Treasure may opt to waive the program's requirements for vendors, since the majority of credit provided to the community is no longer through the surveyed brick and mortar banks, and since few banks chose to respond to the program surveys in the last few survey cycles. There may be more effective ways to gauge	Over the years, the appropriateness of the program has declined since today's local brick and mortar banks supply only a fraction of the mortgage credit in comparison to the prior decades. The internet and the proliferation of non-bank mortgage lending options have expanded consumer options to seek

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				approximately $20,000 for a periodic Nexus study to determine the community's credit needs. In addition, at the initiation of Treasury's periodic RFP for fiscal services, Oakland HCD staff releases a survey to local brick and mortar banks to request lending practices data, and staff collates this data for Treasury's review as part of the Linked Banking Program. In 2021 neither activity was scheduled. See also Action 6.4.2.	community credit availability and the equitability of local lending practices.	credit and are not captured in the banking practices studies.
ACTION 6.4.2	*Community Reinvestment Activities Linked to Banking.* Actively support efforts to ensure that banks meet and exceed their responsibilities for community reinvestment. Limit a bank's eligibility to participate in City-assisted lending programs to institutions that provide reasonable levels (fair share) of investment within Oakland, including home mortgages and financing for housing development.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	In the period 2015-2021, assessments were performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018, the list of lenders eligible to participate in City-assisted lending programs was updated, and no lenders were excluded due to Linked Banking Ordinance requirements. The City-assisted lending programs were not funded in subsequent years. In 2021 no Community Reinvestment Activities Linked to Banking were used to limit bank eligibility to participate in City-assisted first-time homebuyer lending programs. See also Action 6.4.1.	The program effectiveness has declined since the majority of credit provided to the community is not provided through local brick and mortar banks.	In past years, HCD budgeted approximately $20,000 for a periodic Nexxus study to determine the community's credit needs. Separately, at the time of Treasury's periodic RFP for fiscal services, HCD would survey local brick and mortar

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

						practices studies.
ACTION 6.4.3	*Community Outreach and Predatory Lending Controls.* Discourage the practice of predatory lending which falls most heavily on low-income seniors and minorities, by financially supporting nonprofit organizations that investigate such practices, referring complaints to the appropriate legal authority, and providing consumer information on how to avoid predatory lending. Outreach efforts by non-profit organizations will include door-to-door outreach and funding legal services on foreclosure counseling and prevention.	DHCD – Housing Assistance Center/Strategic Initiatives; Financial Services Agency, Treasury Division	Ongoing, 2015-23	The City of Oakland provides resource information on predatory lending on its website: https://www.oaklandca.gov/resources/predatory-lending Community outreach around predatory lending practices is not contracted by the City. However, agencies such as HERA, Consumer Credit Counseling and other agencies provide outreach and services around predatory lending. To encourage more resilient and informed buyers in our community, the City's Homeownership Programs provides monthly homebuyer education to prospective buyers. The curriculum informs potential buyers on the homebuying process, puts them in touch with assistance resources including the City's assistance programs as well as other area benefits and assistance, and introduces them to community lenders, real estate professionals, and HUD-certified housing counselors. In	The Department of Housing and Community Development Strategic Initiatives Section has been effective in implementing predatory lending prevention strategies	This program is effective and will be continued into the next Housing Element planning period 2023-2031. In future Housing Element cycles, this measure should be combined with Action 2.2.3.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				2020 the City enrolled 224 students and issued certificates of completion to 97 class attendees before the live workshops were discontinued due to the COVID-19 pandemic. In March 2020, the City switched strategies to referring homebuyers to our local partners certified to provide HUD-certified Homebuyer Education using remote live classes and online education. As described in Action 6.1.4 "Housing Resource Center", the City of Oakland's Housing Resource Center provides assistance to residents who may be victims of foreclosure and predatory lending. In many cases, the Center refers such cases to Housing & Economic Rights Advocates (HERA).		
POLICY 6.5: Accountability						
ACTION 6.5.1	*Housing Element Annual Progress Report.* Submit, on an annual basis by April 1, a report to the California Department of Housing and Community Development on progress made by the City of Oakland on policies adopted in the	Planning Bureau; DHCD – Policy and Programs	On an annual basis by April 1	The Housing Element Annual Progress Report (APR) is due to the Department of Housing and Community Development (HCD) and the Governor's Office of Planning and Research (OPR) by April 1st each year. The City has continued to submit APRs during the period, and APRs from previous years can be found on the	This policy is an effective tool to promote accountability by the City to the policies it has slated in the Housing Element.	The action is appropriate to the Housing Element.

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	2015-2023 Housing Element (as required by state law). The City will also conduct annual public hearings before the Planning Commission and City Council to review and consider the Annual Progress Report within 30 days of its submittal to the State of California, and will post copies of the report on the City's website.			City's website, here: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports		
GOAL 7: Promote Sustainable Development and Sustainable Communities						
POLICY 7.1: Sustainable Residential Development Programs						
ACTION 7.1.1	*Promote Green Building Design for Private Development.* Continue to foster the design and building of durable, low-maintenance dwellings and make optimum use of existing infrastructure through an expanded physical and internet-based Green Building Resource Center. Design features, such as "green roofs", tree planting, open space devoted to food	Bureau of Building	Ongoing, 2015-23	Since 2015, the City continued to staff the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). The website continues to provide information to developers: (www.oaklandgreenbuilding.com). The City encourages participation in the Energy Upgrade California in Alameda County program by providing handouts at the Green Building Resource Center and on the website.	The City's planning and building staff enforce the Oakland Green Building Ordinance. The City's adopted Energy and Climate Action Plan encourages the construction of new and largely renovated buildings with energy efficient	The City is committed to promoting Green Building for private development, this action is appropriate for the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	production and electric vehicle charging stations, among others, are all supported by the ECAP for private housing development.				techniques and materials.	
ACTION 7.1.2	*Green Building Standards.* Continue to require all new residential construction, and single-family additions and alterations to demonstrate compliance with an approved green building standard. Consider revising the Green Building Ordinance for Private Development to include multi-family additions and alterations. Increase enforcement of green building and building energy codes.	Bureau of Building	Ongoing, 2015-23	Since 2015, green building standards are required for projects which meet the thresholds in the Green Building ordinance, in both the small project design review process, and for the regular design review applications (known as "planning entitlements"). All new buildings must now have some level of readiness for plug-in electric vehicle (PEV) charging, exceeding CalGreen standards.	The policy is effective.	The action is appropriate to meet Housing Element goals.
ACTION 7.1.3	*Require Green Building Design requirements for City-funded Development.* All City-funded housing developments require certification under BuildItGreen.org's	Bureau of Building	Ongoing, 2015-23	The City adopted its Green Building ordinance in October 2010, and has continued to regularly apply it to multifamily affordable housing development. In the City's NOFA, new development and rehabilitation projects must meet a minimum score in each Green Point Checklist category.	The policy is effective.	The action is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	GreenPoint Rated or LEED certifications systems.			Projects scoring higher in the Green Point Checklist evaluation, or which achieve LEED Gold level or higher are given preference in the NOFA scoring process.		
POLICY 7.2: Minimize Energy and Water Consumption						
ACTION 7.2.1	*Energy-Efficiency and Weatherization Programs.* Pursue opportunities, in partnership with regional, state, and utility partners when appropriate, to augment existing or create new residential energy programs, and market these programs to minimize consumption of energy throughout the community, through conservation and efficiency. Such programs may include Property-Based Energy Financing, Right-sizing of Energy Equipment Guidelines, green building standards within existing housing rehabilitation programs, Weatherization and Energy Retrofit Loan Program, Renter-Occupied Residential Energy Program,	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	The City helped launch and is a participant in the Bay Area Regional Energy Network (BayREN), also funded by PG&E utility ratepayers, to enhance delivery of their programs within Oakland. This includes the Home Upgrade and Advanced Home Upgrade programs (part of Energy Upgrade California), and Bay Area Multifamily Building Enhancements Program (BAMBE). These programs serve more than 1,000 units per year in reducing energy and water consumption of homes in Oakland. The City works directly with the California Youth Energy Services (CYES) program, subsidized by PG&E, which provides vocational building energy training to Oakland youth and serves at least 200 Oakland homes annually, including renters and focusing primarily on lower-income residents, with energy efficiency and conservation measures each Summer. More than 20 Property	These approaches have combined to create a highly effective approach to energy efficiency and conservation in existing buildings.	These programs are an appropriate method of implementing the relevant goals on reducing energy cost burdens for residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Energy Upgrade California, and adoption of Energy Improvement at Time of Sale Ordinance.			Assessed Clean Energy (PACE) financing programs are currently operating in the City, providing financing on the property tax bill for residences and businesses to conduct energy and water efficiency projects, install renewable energy systems, and install electric vehicle charging equipment. The City is also working with EBCE and BayREN to install clean electric technologies in homes and businesses to replace natural gas systems, utilizing a combination of State and regional funding sources to lower the costs of installing heat pump water heaters, heat pump space heating and cooling systems, and induction cooktops. The City has initiated a lending program for induction cooktops to expand awareness of and access to such new technologies. Finally, the City is using its Measure KK infrastructure bond funding, along with federal CARES Act funding, to install a wide array of efficient energy systems in municipal buildings.		
ACTION 7.2.2	*Alternative Energy Production.* Continue to review plans for residential construction,	Bureau of Planning; Bureau of Building;	Ongoing, 2015-23	The City of Oakland has continued to issue permits for a high number of residential solar PV systems, passing more than 8,200 installations and	The policies and programs have generated significant	This continues to be an appropriate method of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	taking into account building orientation, street layout, lot design, planting, and street tree configuration, with the intent of maximizing solar access and cooling opportunities. Assist the public to generate renewable energy by posting information on the City website that offers content created by the City and links to web pages hosted by other organizations. Examples of materials include: a solar energy generation calculator, and a guide about proper maintenance and disposal of solar and other renewable energy generation systems. Provide information about solar and renewable energy incentives and resources in conjunction with all residential rehabilitation projects. Continue to be a municipal policy leader by providing streamlined and advanced permitting processes, and by actively	Environmental Services (PWA)		more than 49 MW of installed solar capacity as of September 2021. The most significant source of renewable energy production serving Oakland comes as a result of the City's participation in East Bay Community Energy (EBCE), a community choice aggregator serving most of Alameda County. EBCE became the default electricity provider for all residences in Oakland in 2018, providing a minimum of 85% carbon free electricity. This electricity is generated from hydroelectric dams, solar PV, concentrated solar power, wind turbines, and geothermal energy sources. In addition, EBCE is serving 100 percent carbon free electricity to all accounts who elect to receive it in Oakland, including all municipal accounts of the City of Oakland. Oakland will receive a portion of power from the Scott Haggerty Wind Center project, a 57 MW renewable energy facility opened in Livermore in 2021. The generation of renewable energy from the EBCE program far exceeds local solar PV production, and will serve as the primary means of ensuring high levels of alternative	progress in building and operating renewable energy systems in support of homes. The approach is effective.	expanding renewable energy systems, although pairing with some elements of energy storage and resilience are likely warranted in future Housing Elements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	sharing Oakland's solar permitting Best Practices with others.			energy production for the foreseeable future.		
ACTION 7.2.3	*Facilitate a Community Solar Program.* Encourage and collaborate with local partners to launch a community solar program, to increase local use of renewable energy, including solar-thermal energy to produce heat and hot water.	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	Multiple community solar options now exist for Oakland ratepayers, including options with East Bay Community Energy and independently through developments in the private energy marketplace. Additionally, the City is worked with the Oakland EcoBlock project team, a pilot project of various academic and industry partners, to facilitate a shared solar approach to neighborhood-scale retrofits of solar PV in existing neighborhoods. This effort was recently funded $5 million by the California Energy Commission.	This approach has been effective in providing residents options for accessing renewable energy, regardless of home ownership or site conditions.	With the availability of renewable energy products through CCAs (East Bay Community Energy) and IOUs (Pacific Gas and Electric), the sole focus on community solar is no longer an appropriate means of providing the intended access.
ACTION 7.2.4	*Technical Assistance.* Continue to educate applicants and residents about the advantages of energy conservation and provide technical assistance to help new construction or remodeling projects achieve superior levels of energy efficiency.	Bureau of Building	Ongoing, 2015-23	The City continues to collaborate with East Bay Energy Watch (EBEW) and the Bay Area Regional Energy Network (BayREN), working directly with program implementers and PG&E to enhance local program delivery, and participating on the EBEW Strategic Advisory Committee.	The program is an effective way to partner with East Bay Municipal Utility District, the water provider to the City, and has made demonstrable reduction to	The organization of this action remains relevant and appropriate for facilitating partnerships to lead to water use reductions in residential settings.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				In July 2020, the City Council adopted the Equitable Climate Action Plan (ECAP), a ten-year strategic and policy plan to reduce energy consumption and expedite the transition away from fossil fuel use. This Plan contains policies to expand and deepen energy efficiency, renewable energy, decarbonization, and electric vehicle programs and reduce energy cost burden for all members of the community. In December 2020, the City Council passed a requirement for newly constructed buildings to be all-electric design, eliminating natural gas connections in such buildings. These efforts, in addition to ongoing energy programs, serve to reduce energy use among Oaklanders and facilitate the transition to cleaner energy sources.	potable water use in the City.	
ACTION 7.2.5	*Promote Water Conservation and Efficiency.* Expand promotion of water conservation and efficiency practices such as water-efficient landscaping, irrigation, lawn replacement, rainwater collection, greywater systems, and the installation of water efficient fixtures and plumbing. In	Bureau of Planning; Bureau of Building; Environmental Services (PWA)	Ongoing, 2015-23	Efforts to educate residents and commercial tenants about the advantages of energy efficiency and water conservation through EBMUD and Stopwaste continued through the period, as well as education via EBEW and the BayREN programs. Oakland City Council passed the Civic Bay Friendly Landscape Ordinance to require water efficiency in all public landscaping projects.	The program is an effective way to partner with East Bay Municipal Utility District, the water provider to the City, and has made demonstrable reduction to	The organization of this action remains relevant and appropriate for facilitating partnerships to lead to water use reductions in residential settings.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	affordable housing developments, this will reduce utility bills, freeing up more resources to pay rent or a mortgage.				potable water use in the City.	
POLICY 7.3: Encourage Development that reduces Carbon Emissions						
ACTION 7.3.1	*Mixed Use Development Incentives.* Provide development incentives for construction projects that mix land uses, build compactly, and ensure safe and inviting pedestrian corridors. Allowing uses in close proximity to one another encourages walking and bicycling, instead of automotive trips.	Bureau of Planning	Ongoing, 2015-23	With the update of the commercial and residential zoning districts in the City, and with the success of new private development applications in adopted Specific Plan areas (Broadway Valdez, Lake Merritt BART, West Oakland), the City continues to encourage development of mixed-use buildings in commercial areas. Specific Plans, with their certified EIRs, are considered an incentive for the construction of new housing. The current Specific planning process for the Downtown Oakland Specific Plan, continued work on the Final EIR, Final Plan, Zoning, and meetings on a Zoning Incentive Program as part of the implementation. The Draft Plan and DEIR documents can be found here: https://www.oaklandca.gov/documents/draft-dosp-eir	The Specific Plans have been very effective in providing an incentive with certified EIRs and development programs for developers to build housing in an expedited manner.	The policy is appropriate to Housing Element goals.
ACTION 7.3.2	*Transit-Oriented Development.*	Bureau of Planning	2014-2017	Construction is now complete of Phase 5 of "MacArthur Station" at the BART parking lot, including a 260-foot tall	This action is effective. During the planning	This action is appropriate for

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Evaluate the existing S-15 Transit Oriented Development zone, and consider if its development standards for areas near transit stations or major transit nodes are allowing for higher density housing with commercial development in close proximity to BART in ways that improve neighborhood livability. Develop and require transit-oriented performance criteria for associated miles traveled and transportation mode share.			building with 402 market-rate and affordable residential units. Panoramic Interests is seeking building permits related to the approved 500 Kirkham project located two blocks southeast of the West Oakland BART Station (and in the S-15 zone). In 2016, "Mural" by BRIDGE housing was completed at MacArthur BART, with 90 affordable units. The City previously adopted revisions to the transportation analysis using Vehicle Miles Traveled (VMT), instead of Level of Service, as directed by AB 743 (see Action 1.1.3). BART and its developer are seeking entitlement of transit-oriented development (including both market-rate and affordable housing) surrounding the Lake Merritt BART Station.	period, 402 market rate and affordable units were constructed through Phase 5 of the MacArthur Station project, and 1,032 residential units were approved for the 500 Kirkham site, located two blocks southeast of the West Oakland BART Station.	the Housing Element.
ACTION 7.3.3	*Implement SB 375 provisions, direct new housing to be built in Priority Development Areas.* Implement the provisions of State Bill (SB) 375 and regional agency rule-making, following their adoption. The City will continue to encourage mixed-use, infill, and transit development in designated Priority	Bureau of Planning	Ongoing, 2015-23	Priority Development Area (PDA) site Inventories were updated in 2019. The Association of Bay Area Governments (ABAG) and Metropolitan Transportation Commission (MTC) allowed for modifications of existing PDAs to occur at the administrative level. Planning staff recommended changes to existing PDAs and submitted the proposal to ABAG and MTC on September 16th, 2019. The updated PDAs were adopted by the	"Plan Bay Area" was adopted in July, 2013. The action is effective. Updating the PDA site inventory allows the City to apply for affordable housing development	The City will continue to encourage new housing development in Priority Development Area (PDA's) as identified in "Plan Bay Area." This action will be continued

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Development Areas. (See also Policy 1.1).			MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. See "2019 Proposed PDA map" for a map of existing PDAs following this year's update and "2019 Proposed PDA Map Showing Changes to Existing PDAs" for a map outlining the changes. Both maps can be found online: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 These updated PDAs can also be found on MTC's website: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1	grants for projects located in PDAs.	into the 2023-2031 Housing Element.
ACTION 7.3.4	*Integrate Land Use and Transportation Planning in Major Residential Projects.* Require the integration of land use and transportation planning and consideration of Greenhouse Gas (GHG) reduction opportunities in each planning, major development project, and	Bureau of Planning	Ongoing, 2015-23	The City effectively implements this action through the application of the Equitable Climate Action Plan (ECAP) checklist and requirement for compliance with transportation demand management (TDM) measures. This applies to all major project case files.	The action is effective.	The action is appropriate.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	planning effort undertaken by the City.					
ACTION 7.3.5	*Encourage New Housing at a Range of Prices.* Actively promote the construction of housing at a range of price levels near transit hubs and corridors in balance with local employment opportunities to meet the needs of Oakland's workforce. Consider adoption of a transit-oriented development affordability policy, including preservation of existing affordability.	Bureau of Planning	Ongoing, 2015-23	The City, in concert with various agencies and organizations, has continued to promote the construction and preservation of housing at a range of price levels near transit hubs and corridors: • Predevelopment activities continued at Lakehouse Commons, a 91-unit affordable development within the Lake Merritt Station Area. • Rehabilitation continued and was nearly completed at Frank G Mar Apartments, an existing 119-unit affordable housing development located within the Lake Merritt Station Area Plan. • Construction began at Fruitvale Transit Village Phase II-B, a 181-unit affordable development adjacent to the Fruitvale BART station. Construction is expected to be complete in 2023.	The City has successfully advanced policies on a somewhat ad hoc basis to encourage high-density housing at a range of income levels near transit stations. A more comprehensive uniform policy may be warranted for future Housing Element cycles.	Dense development near transit is a primary tool for reducing carbon emissions.
POLICY 7.4: Minimize Environmental Impacts from New Housing						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 7.4.1	*Compact Building Design.* Work with developers to encourage, where feasible, buildings to grow vertically rather than horizontally and to incorporate structured parking rather than surface parking, to preserve and encourage ground-level open space.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	This design standard continues to be recommended in the City's design guidelines for multi-family buildings on commercial corridors. See website: https://www.oaklandca.gov/documents/design-guidelines-for-commercial-and-corridor-areas	This program has been effective in encouraging maximizing use of sites.	The policy is appropriate to Housing Element goals.
ACTION 7.4.2	*Waste Reduction.* Continue to review and enforce adequate recycling and organic matter allocation areas. Encourage, where feasible, multifamily developments to comply with the City's Zero Waste Plan.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to meet with applicants to advise on the space allocated in buildings and on grounds. Section 9 of the City's Basic Application for Development Review requires applicants to provide sufficient space for the storage and collection of recyclable and organic materials to comply with SB 1383 and Ordinance No. 11807 – Recycling Space Allocation Requirements. Planning staff continues to review the recycling ordinance requirements at building permit plan check.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.3	*Foster Healthy Indoor Air Quality.* Encourage, where feasible, the use of zero-VOC materials to improve indoor air quality (e.g., paints,	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to apply its Standard Conditions of Approval for planning entitlements, as well as enforced regulations in the Green Building Ordinance, each of which improve indoor air quality, with	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	adhesives). Require measures to reduce the impact of air pollution on new housing (e.g., air filters).			techniques such as requiring the installation of air filters with prescribed MERV ratings.		Planning Code and the new Specific Plans.
ACTION 7.4.4	*Recycled, Reclaimed or Renewable content of Building Materials.* Encourage, where feasible, the use of environmentally preferable building materials. Encourage, where feasible, the re-use of building materials to reduce construction waste.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to enforce the Oakland Green Building Ordinance, with provisions for the use of building materials with recycled content in the construction of new multifamily housing, through the application of the Green Point Rated and the LEED for Homes checklists.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.5	*Re-Use and Rehabilitation of Historic Materials.* Encourage the reuse and rehabilitation of the City's historic building stock, using Policy D6.2 of the Land Use and Transportation Element of the Oakland General Plan as a guide, to increase neighborhood character and to preserve the energy embodied in the building's original construction.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City encourages the reuse and rehabilitation of the City's historic building stock, using Policy D6.2 of the Land Use and Transportation Element and the entire Historic Preservation Element of the Oakland General Plan as guides, to maintain and enhance neighborhood character and to preserve the energy and design integrity embodied in the buildings' original construction.	Planning staff consistently encourages applicants to retain and rehabilitate existing buildings, citing a smoother review process, savings of time and money, California Historical Building Code and other code accommodations for existing	Existing buildings support "naturally occurring affordable housing." Growing environmental concerns support the slogan "The greenest building is the one that is already built."

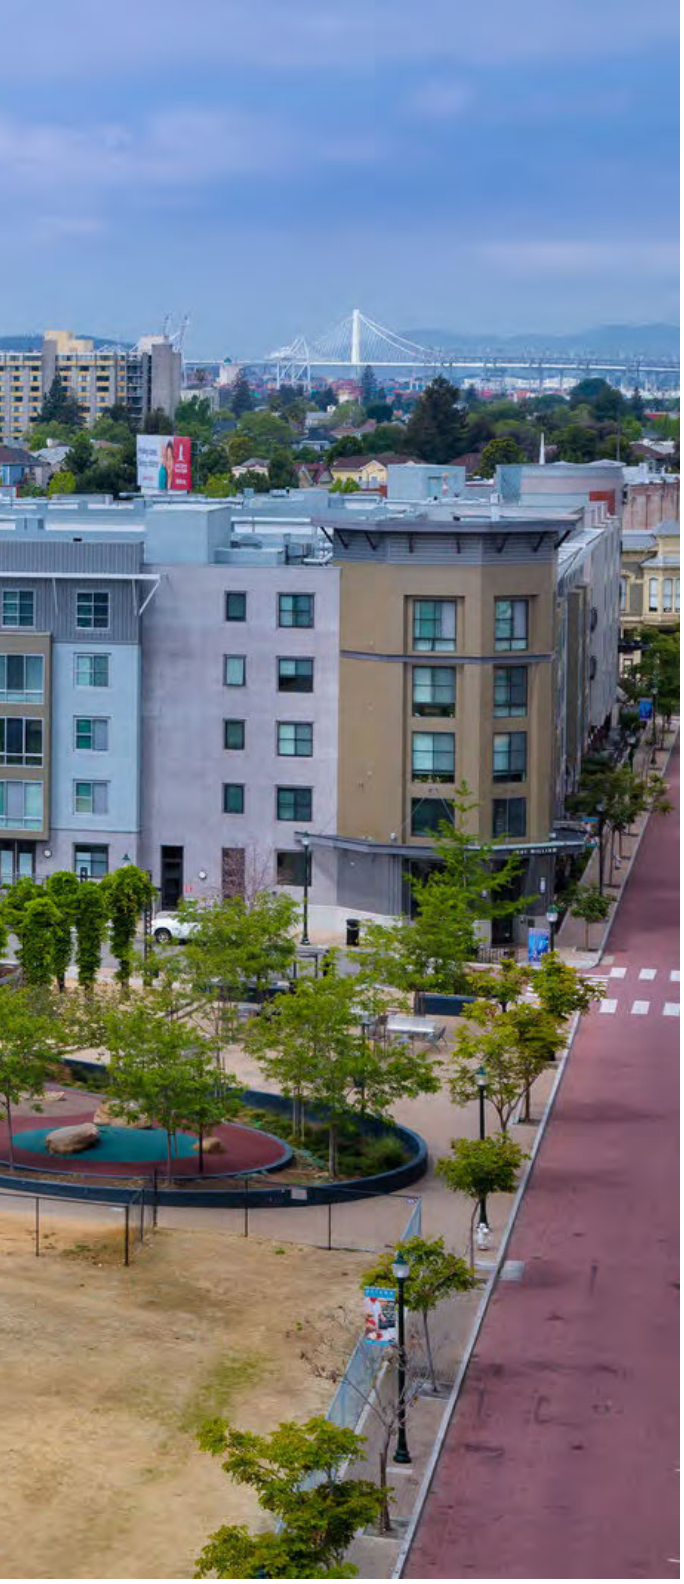
Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					buildings, the City's pioneering 1978 publication Rehab Right, and deterrents including the demolition regulations in the Planning Code. Residential and work-live adaptive reuse of commercial and industrial buildings continues, often facilitated by use of the Historical Building Code.	
ACTION 7.4.6	*Encourage Food Production in Open Space Areas.* Encourage the inclusion of food-producing gardens, including rooftop gardens, in private development, where appropriate, with consideration of Bay Friendly landscaping principles.	Bureau of Planning	Ongoing, 2015-23	In 2014, the City of Oakland adopted new urban agriculture regulations as a way for Oakland residents to provide more healthy food to their families and communities. In addition, allowing more urban farming has beautified vacant lots and fostered a sense of community in local neighborhoods, especially in respect to Community Gardens. The City Council adoption of amendments to the City's Agricultural Regulations advanced Oakland's sustainable food system goals.	The policy is effective.	The action is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 7.5: Climate Adaptation and Neighborhood Resiliency						
ACTION 7.5.1	*Climate Change and the Planning Process.* Consider qualitative and quantitative information regarding the potential effects of climate change during the project plan review process. Consider Oakland Planning Code amendments to limit certain vulnerable land uses (i.e. emergency, affordable, senior, or assisted living housing) in areas identified as vulnerable to climate change. Consider design review requirements for buildings to improve climate resiliency.	Bureau of Planning	Ongoing, 2015-23	In 2021, the City adopted a new 2021-2026 Local Hazard Mitigation Plan, which identifies priority actions to address the effects of natural hazards, including climate change. Also, in 2016, the City released the "Resilient Oakland Playbook" which includes a goal to "reduce current and future climate and seismic risks." Further, the Bureau of Planning was co-Chair, with the Oakland Sustainability office, on a multi-agency Sea Level Rise working group; the final report was issued in Fall 2017. See: http://www2.oaklandnet.com/oakca1/groups/pwa/documents/report/oak068799.pdf Beyond these efforts, the City revised its scoring criteria for its Capital Improvements Program (CIP) to score sustainability and resiliency in all capital projects in 2019. The City requires all staff reports to evaluate sustainability opportunities as part of project review and presentation to City Council. Additional climate adaptation and resilience programs and policies were adopted as part of the City	This approach is an effective way to document the role that climate action and resiliency planning are having on providing safe and affordable housing at all income levels.	The organization of this section remains relevant and appropriate for ensuring that local climate and resilience planning are supporting broad housing targets.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)



No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Council's adoption of the Equitable Climate Action Plan (ECAP) in July 2020, including the establishment of Resilience Hubs and Spaces, improved analysis of climate adaptation, and improved communication and coordination tools for neighborhood resilience.		
ACTION 7.5.2	*Climate Adaptation Strategies.* Communicate information about potential local climate impacts to neighborhoods and developers, and encourage participation in the development of climate adaptation strategies to improve project and neighborhood resiliency; consider including notification of climate-related vulnerabilities at time-of-sale for properties in especially vulnerable areas.	Bureau of Planning; Bureau of Building; Environmental Services (PWA)	Ongoing, 2015-23	In July 2020, Oakland City Council unanimously voted to adopt the 2030 Equitable Climate Action Plan (ECAP). The 2030 ECAP establishes actions that the City and its partners will take to equitably reduce Oakland's climate emissions and adapt to a changing climate. The ECAP was developed pursuant to City Council's adopted 2030 greenhouse gas emission reduction target of 56% relative to 2005 levels, as well as Oaklands 2018 Climate Emergency and Just Transition Resolution. Oakland's City Council also adopted a 2045 Carbon Neutrality Goal, calling for a dramatic reduction in Oakland's greenhouse gas emissions and "deep decarbonization" of the building and transportation sectors by 2045. The new 2030 ECAP is rooted in equity and a deep community engagement process: it identifies ambitious actions we can take to	The approach has been moderately effective in demonstrating the need for climate adaptation strategies to be made in support of housing policy.	The approach is appropriate, although the goals, objectives, policies, and programs would benefit from a more expansive description and focus on those elements of climate change with the potential to impact housing supply and quality, as well as resident health and safety.

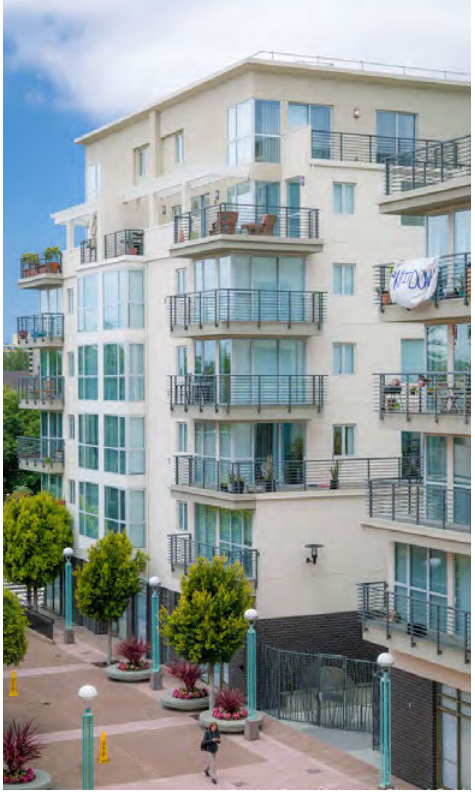


Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				combat climate change while also ensuring that frontline communities – those that have been harmed by environmental injustice and who are likely to be hurt first and worst by the impacts of climate change – will benefit first and foremost from climate action. The City is focusing its attention especially on actions that will result in cleaner air, improved economic security, good green jobs, and more resilient communities, while also minimizing our contribution to climate change. To find updates on ECAP implementation, please visit the Sustainability Page, where all ECAP-related topics and resources are listed and updated: https://www.oaklandca.gov/topics/sustainable-oakland-1 Climate adaptation strategies are also included in the City's Resilient Oakland Playbook, and Sea level Rise Road Map. The City was the focus of a 2018 effort by the All Bay Collective to identify climate adaptation strategies for the neighborhoods adjacent to San		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				Leandro Bay in East Oakland. The City is also working with community groups in the East Oakland Neighborhoods Initiative (EONI) to implement a Transformative Climate Communities grant from the Strategic Growth Council to further identify climate adaptation strategies for East Oakland.		

OAKLAND 2045
GENERAL PLAN

City of Oakland

2023-2031 Housing Element

DRAFT-PUBLIC REVIEW

May 2022

This is a preliminary draft document that has not been adopted by the City of Oakland or approved by any City department. This draft has not gone through graphic design or formatting. The purpose of this draft is to solicit public input prior to transmission to the State Department of Housing and Community Development.

Prepared by:

DYETT & BHATIA
Urban and Regional Planners

Cover photos: Greg Linhares, City of Oakland, and Dyett & Bhatia

Table of Contents

1 Introduction 3

1.1 Purpose of the Housing Element 8

1.2 Oakland's Housing Approach 11

1.3 Organization of the Housing Element 12

1.4 Relationship to Other General Plan Elements 14

1.5 Sources of Information 15

2 Public Participation 19

2.1 Summary of Community Outreach Activities 19

2.2 Public Participation Themes 27

3 Summary of the Housing Sites Inventory 32

3.1 Regional Housing Needs Allocation 32

3.2 Capacity to Accommodate the RHNA 32

3.3 Assessing Housing Sites Through a Fair Housing Lens 38

4 Housing Action Plan 43

4.1 Goals, Policies, and Actions 43

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness 43

Goal 2. Preserve and Improve Existing Affordable Housing Stock 50

Goal 3. Expand Affordable Housing Opportunities 59

Goal 4. Address Homelessness and Expand Services for the Unhoused 89

Goal 5. Promote Neighborhood Stability and Health 98

4.2 Quantified Objectives 108

Appendices

Appendix A: Evaluation of the 2015-2023 Oakland Housing Element

Appendix B: Housing Needs Assessment

Appendix C: Sites Inventory

Appendix D: Affirmatively Furthering Fair Housing draft

1 Introduction

This Housing Element presents the City of Oakland's strategy and commitment for how it will meet the housing needs of the community. In the face of a crushing regional housing crisis, the task is formidable, but essential: to make quality housing opportunities available to all Oakland residents through the Protection, Preservation, and Production of homes, and to address systemic housing inequity.

Preparation of this Housing Element comes at a time of challenge and uncertainty for many Oaklanders. It comes amid a global pandemic, a renewed call for racial justice after the murder of George Floyd, and economic and global security uncertainty. It comes while Oakland has imposed one of the strongest eviction moratoriums in the State, and it comes at a moment where the world moves closer to the tipping point of irreversible climate change. All of these large issues collide to shape how ~~housing does and will look like for individuals and families who call Oakland home.~~

LEARNING FROM THE PAST

What does it mean to call Oakland "home"? Oakland's current housing landscape tells the story of struggle, of systemic forces that have shaped the neighborhood geography of opportunity. To chart an equitable path forward, Oakland's history must be examined and addressed.

The land that is now Oakland is the ancestral home of the Ohlone indigenous group who were stewards of the oak and redwood forests, grasslands, and marshlands that make up the coastal region of central and northern California for thousands of years. The arrival of Spanish missionaries in the 1760s and subsequent periods of Spanish colonization, Mexican settlement, and American urbanization of the Ohlone region Nevertheless, this land continues to be of great importance to the Ohlone people.[1]

Oakland has historically been a destination for working people and immigrants who sought out its and relatively affordable neighborhoods. Many of these places were formed into cultural and ethnic enclaves as a result of segregationist and racially discriminatory policies and practices.[2] Government-sponsored "white flight" suburbanization during the early 1930s, followed by disinvestment and takings in

neighborhoods of color, created socioeconomic and geographic lines that were further delineated by redlining (a federally sanctioned practice during the 1930s of denying mortgages in communities of color) and racially restrictive covenants.[3] In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and

Since the late 1990s, Oakland has seen an increase in real estate investment, which has had both positive and negative effects. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process referred to as "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[4] This activity resulted in waves of foreclosures in East and West Oakland. A significant number of these foreclosed properties were then acquired by investors, and once-affordable and stable homes flipped overnight into market-rate rentals. An influx of private capital and a 2016 municipal bond for development, in part due to efforts like the City's 10K plan to revitalize the urban core, has reinvigorated downtown and uptown.[5] At the same time, rising housing prices and a lack of new affordable options created waves of residential and commercial gentrification, especially in North and West Oakland and Chinatown, with growing trends in East Oakland. Massive regional job growth, particularly in the technology sector, coupled with the lack of supply of housing in other cities to keep up, sent waves of new residents to the East Bay in search of more affordable housing.[6] New skyscrapers and midrise buildings sprung up largely targeted toward the upper end of the market in downtown, across North Oakland, along upper Broadway, and in West Oakland, in part driven by rising costs of land and construction. The impacts of lack of regional supply rippled through other residential areas of the city, where communities of color faced greater vulnerability to rising housing costs than white residents.[7]

The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities. From 2000 to 2019, Oakland lost nearly 30 percent of its Black population, and significant numbers of long-time Asian Americans residing in ethnic enclaves including Chinatown.[8] Homelessness increased by 90 percent from 2013 to 2019.[9] The COVID-19 pandemic has brought into stark relief and exacerbated racial and economic

disparities in housing security and the public health consequences of these conditions.[10]

Today, Oakland has grown to be the largest city in Alameda County with the busiest port in Northern California. Neighboring cities include Berkeley and Emeryville to the north, San Leandro to the south, Alameda across the Oakland Estuary, and Piedmont surrounded by Oakland. San Francisco is located just 12 miles west across the San Francisco Bay, connected by Interstate 80 (I-80). Oakland is known for its diverse geography, including 19 miles of bay and estuary coastline to the west, the Oakland/Berkeley Hills to the east, and Lake Merritt, a tidal lagoon lake located within the city's borders.

CHARTING AN EQUITABLE, INCLUSIVE FUTURE

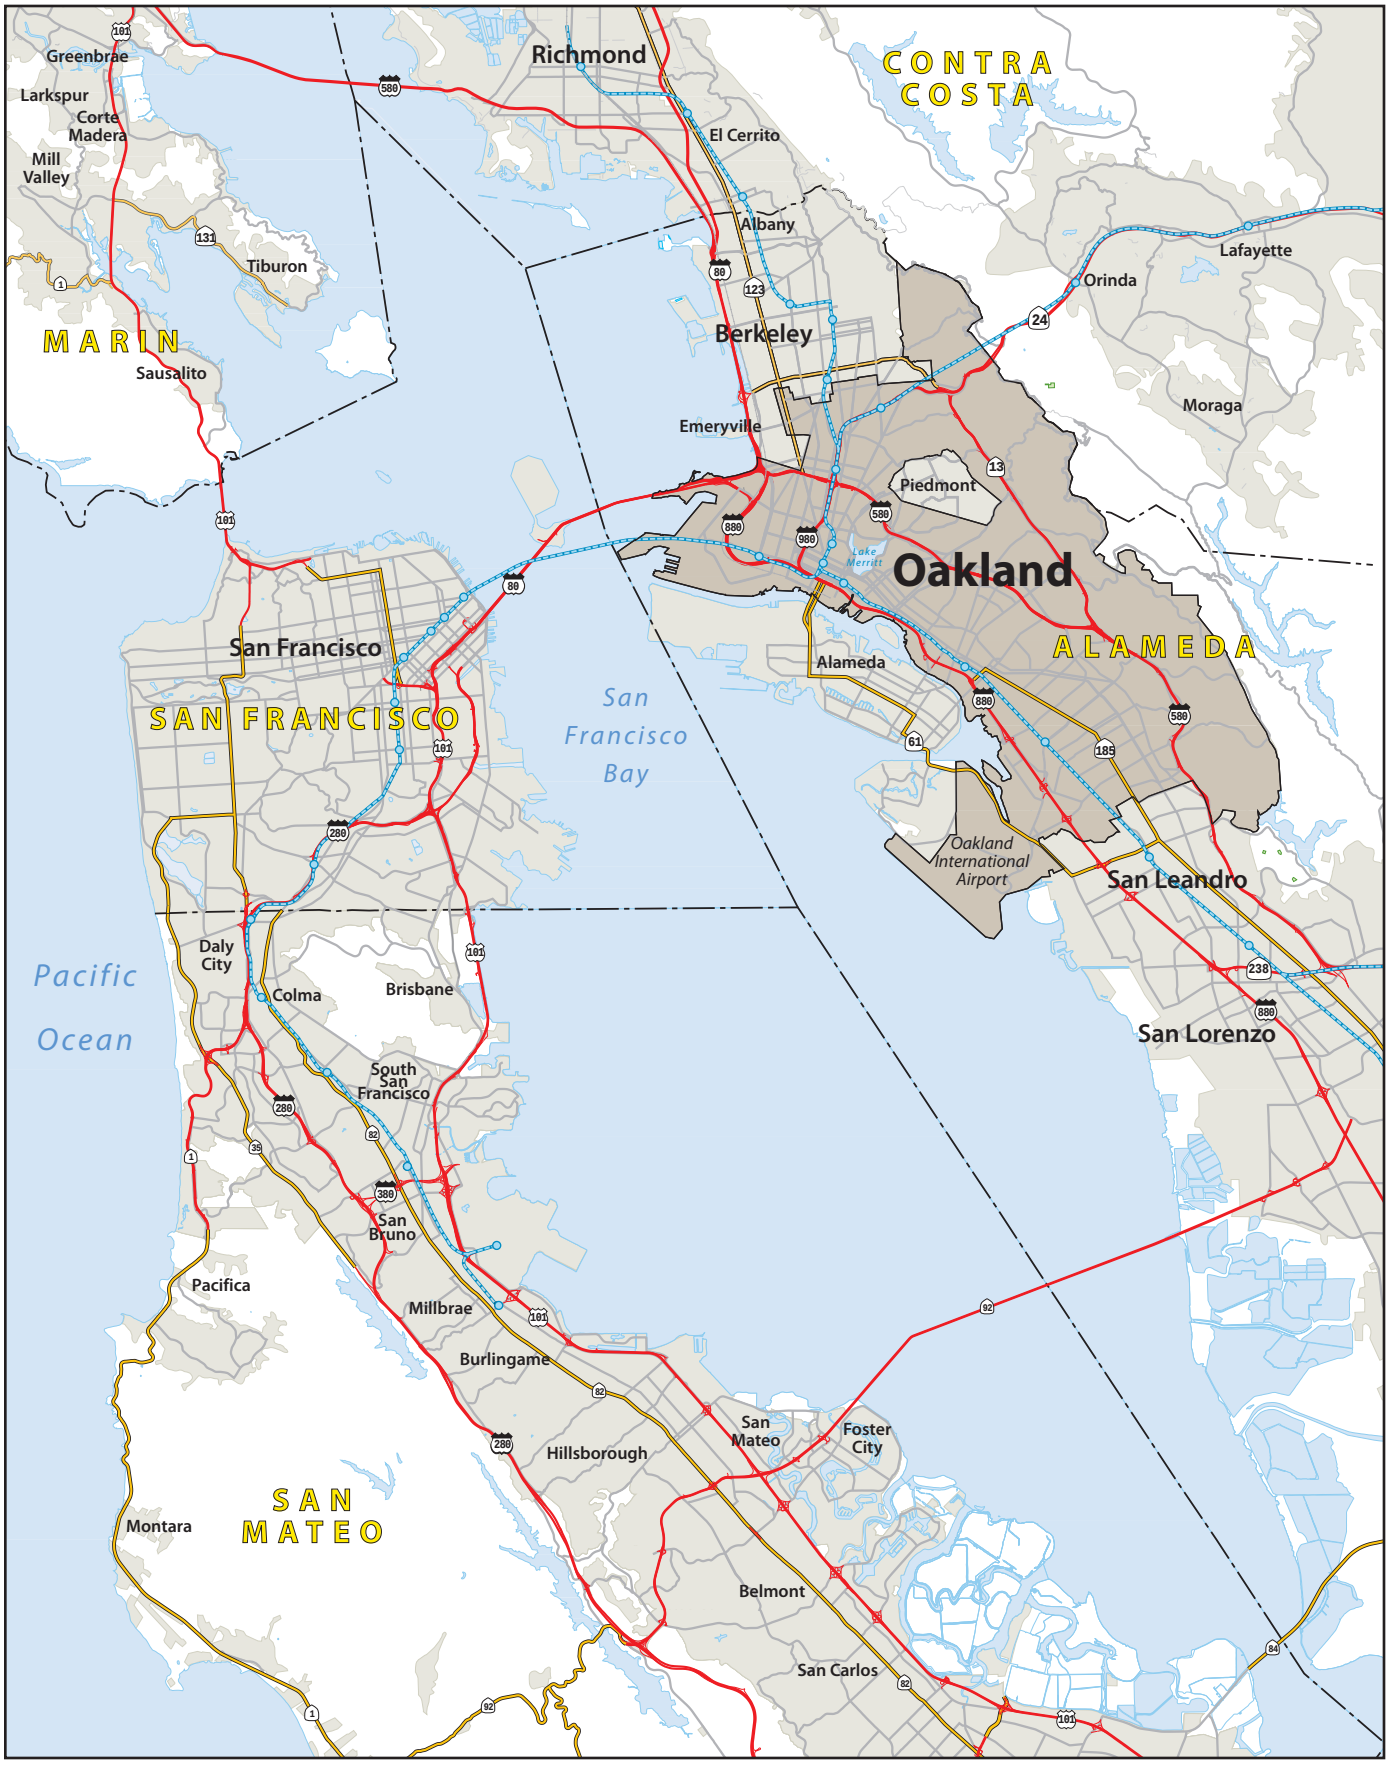
With the legacy of inequity top of mind, the City has begun planning for a more equitable future. In 2016, the City established the Department of Race and Equity with a mission "to advance the creation of a city where diversity has been maintained, racial disparities have been eliminated, and racial equity has been achieved." The Department of Race and Equity is particularly concerned with making a difference in the determinants of equity that lead to creation of a fair and just society, including housing. In 2018, the department published the Equity Indicators Report, which serves as a baseline quantitative framework that can be used by City staff and community members alike to better understand the impacts of policy on racial groups and measure inequities.

The work of the Department of Race and Equity informs the City of Oakland's Department of Housing and Community Development's (HCD) 2021-2023 Strategic Action Plan This plan is informed by past analyses, planning, and accomplishments such as the 2016 "Oakland At Home: Recommendations for Implementing A Roadmap Toward Equity from the Oakland Housing Cabinet," and applies a race and equity lens to the City's housing investments and services in wake of the public health, fiscal, and social crises caused by COVID-19. In practice, this includes transparent and regular reporting on outcomes disaggregated by race; Americans with Disabilities Act-compliant, accessible information provided in multiple languages; anti-displacement and housing production programs, policies, and initiatives focused on the most impacted vulnerable populations; and access and opportunity pathways to and for Black, Indigenous, and People of Color (BIPOC) developers, service providers, and other contractors to the resources the City has to offer in the conduct of its housing work. The Strategic Action Plan also details a series of specific actions and policies HCD will pursue as part of a broader strategy to protect residents from displacement, preserve existing affordable housing - both subsidized and unsubsidized, and produce new affordable housing.

Community-based organizations, many of whom have been leading housing justice efforts for decades, are also shaping housing goals rooted in racial equity. Oakland residents,

[10] "City of Oakland HCD 2021-2023 Strategic Action Plan City of Oakland Housing & Community Development Department 2021-2023 Strategic Action Plan." n.d. Accessed May 9, 2022. https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

community organizations, developers, and government partners created the Healthy Development Guidelines (HDG) for Oakland's Planning and Building Department, the first health and racial equity-focused guidelines in the country. Two of the 's goals include enhancing access to affordable housing, particularly for vulnerable populations; and preserving existing affordable housing and protecting residents from involuntary displacement. These guidelines were incorporated into city development review process in 2018. The East Oakland Neighborhoods Initiative, a community plan created out of partnership between the City of Oakland Planning Bureau and twelve community-based organizations focused on equity-based planning for also highlight anti-displacement among their plan goals, noting that improvements recommended in the plan must not drive out existing residents by inadvertently increasing the cost of housing. This is achieved in part through local wealth creation, well-crafted policies, and mainstreaming of affordability vehicles.



The global climate crisis will also have profound impacts on—among other things—housing security and availability in Oakland. To address the climate crisis, the City released the Oakland 2030 Equitable Climate Action Plan (ECAP) in July 2020. The ECAP is the City's strategy to create a future built on justice, equal opportunity, and environmental protection. Among the list of Transportation and Land Use (TLU) actions in the ECAP is TLU-3, "Take Action to Reduce and Prevent Displacement of Residents & Businesses." TLU-3 explicitly links anti-displacement efforts to climate equity action, as the City can only achieve its ECAP goals if Oaklanders are able to participate fully in, and benefit from, climate action without fear of displacement and homelessness.

The City is also undertaking an update to its Land Use and Transportation Element, in tandem with this Housing Element, to promote a land use pattern and policies that will help accelerate and target housing production. Like many other Bay Area cities, nearly every property in Oakland has been developed, with few "greenfield" (not yet developed) sites within its limits or at its borders, meaning that housing development will primarily rely on development and redevelopment of "infill" sites. Within the city limit, there are approximately 29,700 acres (46.4 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks, schools, and an international airport. The Housing Element applies to land within city limits, depicted in Figure 1-1.

Callout: Environmental Justice and Racial Equity Baseline

The Environmental Justice and Racial Equity Baseline, published in March 2022, identifies and details disparities by race and by geography that can be influenced directly or indirectly by the General Plan. The findings in the Environmental Justice and Racial Equity Baseline identify environmental justice and racial equity existing conditions and inform conversations between City staff and members of the public. In parallel with the Housing Element, this baseline will be used as a starting place for policymaking related to environmental justice, safe and sanitary housing, and other community equity issues.

Figure 1-1: Regional Location

1.1 Purpose of the Housing Element

The 2023-2031 Oakland Housing Element is one component of a larger effort: an update to the City of Oakland General Plan. The General Plan Update will create Oakland's 2045 General Plan and is a "once-in-a-generation" opportunity for all Oaklanders to work together to create a visionary blueprint for the city's future over the next 20 years. The Oakland 2045 General Plan will be made up of several "elements" covering a wide range of topics important to the future of Oakland, including environmental justice, land use and transportation, open space, noise, conservation, and safety.

The 2023-2031 Housing Element sets forth the City's housing priorities and goals—as well as its vision for both short- and long-term development—to create a fair and just city. State law mandates that the Housing Element be updated every eight years to reflect changing conditions, community objectives, and goals. This Housing Element also provides an evaluation of the 2015-2023 Housing Element, including an assessment of prior programs and strategies.

HOUSING ELEMENT: COMPONENTS

In California, all cities must adopt a General Plan composed of at least seven elements, including the Housing Element. All cities must also incorporate environmental justice into the General Plan. Oakland has chosen to adopt an Environmental Justice Element while also incorporating environmental justice goals into each element, including the Housing Element. While the Housing Element is influenced by State law, it is essentially a local document. The Oakland Housing Element, in tandem with the rest of the General Plan Update, is designed to assess and shape the community's housing progress and needs.

Nonetheless, among all General Plan elements, the State of California has the most extensive set of requirements pertaining to housing elements. In accordance with State law, the Housing Element must include:

- A description of outreach conducted in preparation of the element
- An analysis of progress in implementing the previous Housing Element and effectiveness of its programs and actions
- An assessment of existing and projected housing needs
- An analysis of special housing needs, such as those of older adults and people with disabilities
- An analysis of existing assisted housing units at risk of conversion from affordable to market rate
- An analysis and inventory of resources and constraints relevant to meeting housing needs
- An affirmatively furthering fair housing (AFFH) analysis, which guides the analysis of each set of requirements

- An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels
- A program that sets forth specific actions to address housing needs, with identification of responsible agencies and timelines

REGIONAL HOUSING NEEDS ASSESSMENT (RHNA)

Oakland's Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (State HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then distributes a "fair share" portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, Oakland must identify sites sufficient to accommodate 26,251 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in Table 1-1.

A total of 6,511 units must be affordable to households making less than 50 percent of area median income (AMI), 3,750 units must be affordable to households making between 50 and 80 percent of AMI, 4,457 units must be affordable to households making between 80 and 120 percent of AMI, and 11,533 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in Appendix C.

Table 1-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Income Range*	*Needed Units*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	<$46,287	6,511	24.8%
Extremely-Low-Income (<30% AM part of Very-Low-Income in previous row)[2]	*<$27,772*	*3,256*	-
Low-Income (51-80% AMI)	$27,773-$74,059	3,750	14.3%
Moderate-Income (81-120% AMI)	$74,059-111,089	4,457	17.0%
Above-Moderate-Income (>120% AMI)	>$111,090	11,533	43.9%
Total		**26,251**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

HOUSING ELEMENT: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.

- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.

- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.

- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.

- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.

- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH)

requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

ENVIRONMENTAL REVIEW

The Housing Element update is being accompanied by an Environmental Impact Report (EIR), which analyzes the potential impacts attributable to the Housing Element update, as well as the Safety and Environmental Justice Elements and related Planning Code, General Plan, and Zoning Map amendments.

1.2 Oakland's Housing Approach

Two important components of the Housing Element include a plan to address Oaklanders' housing needs, and an inventory of sites suitable for housing development at all income levels, based on Oakland's 6th cycle RHNA.

HOUSING ACTION PLAN

This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2 of the Housing Element.

The goals include:

1. **Protect Oakland Residents from Displacement and Prevent Homelessness:** Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.
2. **Preserve and Improve Existing Housing Stock:** Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.
3. **Expand Affordable Housing Opportunities:** Facilitate the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, provide a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. Locate

new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and remove constraints to affordable housing development.

4. **Address Homelessness and Expand Resources for the Unhoused:** Recognize housing as a human right. Reduce homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.
5. **Promote Neighborhood Stability and Health:** Promote development in safe, healthy, and just communities. Increase resources in disinvested communities and create stability through homeownership opportunities.

The goals, policies, and actions form the Housing Action Plan for the 2023-2031 planning period and transform this framework into impactful action.

HOUSING SITES INVENTORY

The Housing Element also presents an inventory of housing sites suitable for new homes in Oakland at all income levels. To do this, the inventory includes:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units and other types); and
- Opportunity sites where additional development could occur. Opportunity sites were selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected so as to reduce segregation and increase affordable development in where possible.

Chapter 3 provides a summary of the inventory approach and Appendix C includes the detailed site inventory.

The Housing Action Plan and Housing Site Inventory remain a work in progress with the intent of soliciting feedback from members of the community and refining the goals, policies, and actions to reflect both local priorities and State obligations.

1.3 Organization of the Housing Element

The Housing Element is divided into four chapters: an Introduction, a Summary of Public Participation, a Summary of the Housing Sites Inventory, and the Housing Action Plan. In addition, there are several technical appendices that provide extensive detail on a range of topics, including many of the checklist items mandated by state law. This includes an evaluation of the City's 2015-2023 housing element, an assessment of housing needs,

resources, and constraints, and the comprehensive housing sites inventory. A summary of the findings from each technical appendix is provided in the main body of the Housing Element. It is organized as follows:

- **Chapter 1 – Introduction:** Provides an overview of State requirements, a summary of the organization of the Housing Element, and an explanation of the Housing Element's relationship to the General Plan.
- **Chapter 2 – Public Participation:** Provides a description of the public participation process and a summary of community outreach activities.
- **Chapter 3 – Summary of the Housing Sites Inventory:** Summarizes the City's ability to accommodate the RHNA on available land, and the selection of sites in light of AFFH requirements.
- **Chapter 4 – Housing Action Plan:** Institutes the goals, policies, and actions of the 2023-2031 Housing Element, and provides quantified objectives.
- **Appendix A – Evaluation of the 2015-2023 Oakland Housing Element:** Summarizes the City's achievements in implementing goals, policies, and actions under the previous Housing Element.
- **Appendix B – Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify Oakland's housing needs.
- **Appendix C – Sites Inventory:** Outlines the selection and capacity methodology used to identify sites to accommodate the RHNA.
- **Appendix D – Assessment of Fair Housing:** Identifies fair housing issues and solutions to meet Oakland's AFFH mandate.
- **Appendix E – Housing Resources and Opportunities:** Assesses the City's financial and administrative resources available for future housing development.
- **Appendix F – Housing Constraints:** Analyzes governmental and non-governmental constraints to the development of housing.
- **Appendix G – Opportunities for Energy Conservation:** Presents opportunities to develop housing
- **Appendix H – Glossary**
- **Appendix I – Reserved for Public Outreach Materials**

1.4 Relationship to Other General Plan Elements

State law requires the Housing Element to contain a statement of "the means by which consistency will be achieved with other general plan elements and community goals" (California Government Code, Section 65583(c)(8)). There are two aspects of this analysis: 1) an identification of other General Plan goals, policies, and programs that could affect implementation of the Housing Element or that could be affected by the implementation of the Housing Element, and 2) an identification of actions to ensure consistency between the Housing Element and affected parts of other General Plan elements.

As described above, the City is undergoing a comprehensive update to the General Plan. The General Plan update is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, which are due by the beginning of 2023, as well as preparation of a Racial Equity Impact Assessment, Zoning Code and Map update, and a new Environmental Justice Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by 2025.

The Land Use and Transportation Element (LUTE) of the Oakland General Plan was last revised in 1998. The vision and specific policies contained in the LUTE seek to encourage and facilitate the types of infill, re-use, mixed-use, and central city/corridor-oriented residential development that are the focus of the Housing Element and the City's ability to accommodate its regional housing allocation. Most of the housing to be provided in Oakland will result from the development or redevelopment of underutilized and infill parcels. In addition rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for

The goals, policies, and programs contained within this Housing Element will also inform the strategies included in the updated LUTE. As the Housing Element will be adopted prior to the LUTE update, the general distribution, location and extent of land uses as well as population density and building intensity standards carried out by the current Planning Code are used to determine the City's ability to accommodate residential development. Some initial amendments to the Land Use Element and Planning and Zoning Code along with initial zoning map changes will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Anticipated development on these sites

The policies in the other updated General Plan elements will advance the ability of the City to achieve the objectives contained in the 2023-2031 Housing Element. Likewise, the Housing Element policies will advance the implementation of policies and programs in the other updated General Plan elements.

1.5 Sources of Information

In preparing the Housing Element, various sources of information were utilized. As a starting point, the Element used ABAG-prepared local data and AFFH package pre-certified by State HCD for use in sixth cycle housing elements, which provides the basis for population and household characteristics and affirmatively furthering fair housing resources. Where necessary, several additional and more current sources are used to provide reliable updates of the ABAG data package. The sources used in the ABAG data package and many additional sources are listed below. Public input from members of the public, community-based organizations (CBOs), and community leaders, was also a key source of information for this Housing Element. More details on what information was collected from these partners can be found in Chapter 2.

1. ABAG Pre-Certified Housing Needs Data Package, 2021

2 Public Participation

Inclusive engagement and public participation have been key to the preparation of Oakland's Housing Element. Public participation is an ongoing process that will continue to occur as the General Plan is updated. Outreach completed as part of phase 1 of the update process will continue to inform phase 2 of the General Plan update. All community outreach is conducted through a racial equity lens to identify actions to affirmatively further fair housing, increase community assets, decrease pollution exposure, and improve overall health.

The community engagement effort is composed of an extensive outreach process that seeks to engage stakeholders throughout the community, with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and often most negatively impacted by City policies. All community input shared will be used to "ground truth" data based on peoples' lived experience, inform areas of focus for General Plan elements, and guide development of General Plan policies. Outreach that informed the development of this Housing Element is summarized in the following chapter, and materials used in the outreach process are included in Appendix I.

2.1 Summary of Community Outreach Activities

GENERAL PLAN UPDATE OUTREACH

The City, based on feedback received from community members, implemented an innovative approach to collaborating with consultants on the General Plan Update. The City partnered with both a Community Consultant Team – Deeply Rooted Collaborative and a Technical Consultant Team – Dyett and Bhatia, to ensure a planning process that 1) meets state deadlines and requirements for the GPU and 2) dedicates significant resources to deep and meaningful community engagement. The Community and Technical Consultants coordinated closely. The team leads meet weekly, and the entire project team meets biweekly to share key findings and provide feedback. Both Community Consultant and Technical Consultant outreach and feedback is incorporated into all components of the Housing Element. This approach aligns with advancing the City's critical mission of creating a just and fair City for all (Oakland Municipal Code Section 2.29.170.1).

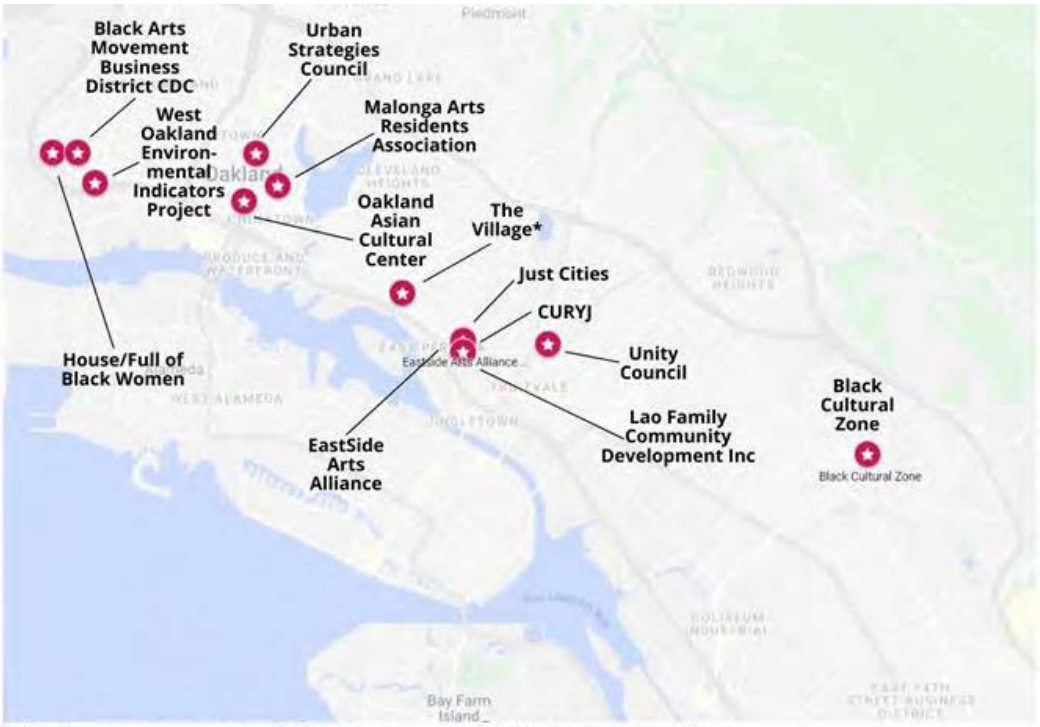
Community engagement efforts for the General Plan Update include an extensive and inclusive outreach process, engaging stakeholders throughout the community with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and most negatively impacted by City policies.

The Deeply Rooted Collaborative focuses on engagement with the following key communities and geographic areas:

- Communities: Unhoused; formerly incarcerated; low-income Asian, Pacific Islander, Black, Latinx, multiracial communities including those experiencing environmental injustices

- Outreach Geographies: Fruitvale, West Oakland, East Oakland, Chinatown, Eastlake, San Antonio

Deeply Rooted has three organizations providing central support through the design and coordination of the overall structure for community engagement, providing technical assistance and community education in planning, and administrative support.



- EastSide Arts Alliance | Cultural Programming Partner

- Just Cities | Technical Assistance/Community Education Partner

- Urban Strategies Council | Administrative Partner

The Deeply Rooted Collaborative in partnership with community partners as shown in Figure 2-1. Deeply Rooted's community partner roles are listed in Table 2-1.

Figure 2-1: Deeply Rooted Collaborative

*The Village operates as a network of encampments across Oakland without one address.

Table 2-1: Deeply Rooted Collaborative Community Partner Roles

Community Partner	*Community/ Outreach Geography*
The Black Cultural Zone Community Development Corporation	Black Community | East Oakland
CURYJ	Formerly incarcerated, Black and Latinx | Fruitvale
House/Full of Black Women/ Deep Waters Dance Theater	
Lao Family Community Development, Inc	Southeast Asian American community
Malonga Arts Residents Association (MARA)	Black and Brown communities, and partnership with members in Chinatown
Oakland Asian Cultural Center (OACC)/ API Cultural Center	Asian American community| Chinatown
Unity Council	Latinx community | Fruitvale
The Village in Oakland	Unhoused curbside communities in North Oakland, West Oakland, Downtown, and East Oakland
West Oakland Environmental Indicators Project.	Environmental Justice | West Oakland
Black Arts Movement Business District, CDC (BAMBD, CDC)	West Oakland (Lower Bottoms), Artists, flatland communities of color, those invested in the animation of BAMBD, CDC and its stakeholders

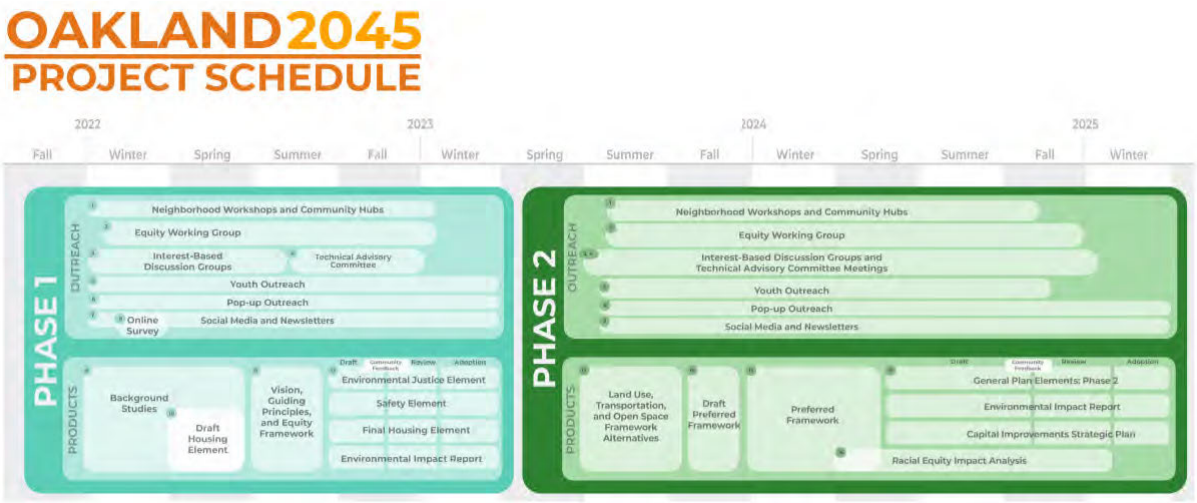
COMMUNITY ENGAGEMENT AND OUTREACH SUMMARY

A variety of outreach activities such as workshops, focused discussions, pop-ups, open houses, porch chats, and community hub events are planned throughout the entire process. All community input shared will be used to ground truth data based on peoples' lived experience, inform areas of focus for the update of General Plan elements, and guide development of General Plan policies.

Input related to housing overlaps with many General Plan topic areas and will be incorporated into both the eight-year Housing Element Update as well as into elements with a longer planning horizon, such as the Land Use and Transportation, Environmental Justice, and Safety Elements. A summary of the General Plan update project schedule is provided in Chart 2-1. Information on all community engagement events, including engagement summaries; workshop and townhall presentations, recordings, meeting summaries; and discussion group summaries, are provided via the General Plan Update website at https://www.oaklandca.gov/topics/meetings-and-events. A summary of these engagement activities is described below:

- **Popup and Community Hub Events:** Since November 2021 to March 2022, the GPU Deeply Rooted Collaborative has conducted pop-up events in Eastmont, Fruitvale, San Antonio, Chinatown, West Oakland, and Downtown. For example, in West Oakland these events have been porchside chats and a pop-up at Hoover Elementary. Engagement has also been integrated into larger community events like the Oakland Asian Cultural Center's (OACC) Asian Pacific New Year Celebration and the Black Joy parade. At these community-embedded events, the team has engaged with over 1006 people, with a majority being individuals from communities of color. These events sought to hear community concerns, ideas and solutions through interviews and

focus group conversations. Community concerns that rose to the top included affordability, displacement, disinvestment, housing quality, pollution (industry and cars), lack of parks, collisions, and illegal dumping.



- **Townhalls**: Two townhalls were held on March 26, 2022, and April 7, 2022. The townhall on March 26, 2022, introduced the General Plan Update process and gathered community input on a vision for the City in 2045, as well as local issues and opportunities that should be addressed in the General Plan. The townhall on April 7, 2022, focused on equity across all issues, with a special focus on EJ and safety priorities in the City.
- **Community Education Workshops:** Two community education workshops were hosted on April 8, 2022, and April 9, 2022, and organized by the Deeply Rooted Collaborative Community Engagement partner to review the past and present policies that led to today's conditions in housing and environmental justice. Over 100 people attended the workshops. Speakers included Oakland unhoused leader Needa Bee (The Village in Oakland), EJ leader Ms. Margaret Gordon (West Oakland Environmental Indicators Project), Margaretta Lin (Just Cities) and Diana Benitez (Just Cities). Attendees shared their frustration regarding ongoing displacement and disinvestment and various community-centered solutions that would bring much needed resources to communities of color in Oakland without displacement.
- **Youth Engagement:** Youth engagement for the GPU will take the form of a Deeply Rooted Fellowship with 15 – 20 fellows. The Fellowship will be a 2-to-3-year commitment and fellows will be provided with a monthly stipend. Planning, design, and training of the fellowship program will be done in coordination with Y-Plan. Fellows will coordinate with the Oakland Youth Advisory Commission (OYAC) and will be engaged in outreach activities such as community-based events, presentations to the community and schools, and social media outreach. Recruitment began in April 2022 with tentative commencement of the Fellowship in May 2022.
- **Neighborhood Group Meetings:** Staff are working with Neighborhood Service Coordinators to present at Neighborhood Crime Prevention Councils (NCPCs) on topics including housing, environmental justice, industrial lands and safety and natural hazards and receive feedback. Staff have presented at several NCPCs and will continue to engage and obtain feedback. Staff are presenting to other Neighborhood – Community groups, faith-based organizations, and at other community congregation events as well.
- **Equity Working Group:** Convened by the Deeply Rooted Collaborative, the Equity Working Group (EWG) is comprised of 20 diverse community members who will 1) Identify the major challenges and impacts of the General Plan (housing, safety, environmental justice, land use, transportation, and parks) and 2) Advocate for solutions that advance equitable and healthy communities for Oakland residents. Each member will receive a stipend. 20 EWG members who met the following criteria were selected through an interview process from a total of 66 applicants:
  - Hard to reach communities: People from communities that the City traditionally has trouble engaging with including Indigenous, unhoused, formerly

incarcerated, low-income, Asian, Black, Latinx, multiracial, people with disabilities, undocumented, and people experiencing environmental injustices.

- In target geographic areas of: West Oakland, East Oakland, Chinatown, and Fruitvale.
- Age diversity: People at different stages of their lives to ensure varied knowledge and experiences.
- Diversity of gender and sexual orientation: To ensure women's and LGBTQ+ perspectives are included in this process.
- People who own small businesses in Oakland.

- **Technical Advisory Committee:** The Technical Advisory Committee (TAC) is comprised of internal City department representatives as well as other Oakland-based, neighboring, and regional governmental agency representatives. The TAC serves to advise on key strategies to address Oakland's big issues related to housing, environmental justice, safety, and other topics; review community input collected at key points in the process; and inform, discuss, and provide technical direction on policies and actions. The second TAC meeting was held on March 7, 2022 and TAC members provided recommendations for housing strategies/actions for housing production, preservation, and protections.
- **Study Sessions with Official Decision-Making Bodies:** The Planning Commission, City Council, and various boards and commissions are active participants in the GPU and will have opportunities to provide direction at each Stage in the process. The project team will continue to check in with these decision-making bodies at key milestones to ensure that the project remains on the right track in terms of process, direction, and overall vision. Engagement will take the form of study sessions and informational presentations to review products and generate feedback on drafts. The Planning Commission and Special Community & Economic Development Committee met on February 2nd and February 22nd to discuss potential housing site locations and recommended housing strategies and actions.

Chart 2-1: Oakland 2045 Project Schedule

HOUSING ELEMENT OUTREACH

To supplement efforts that were part of the General Plan update, a series of targeted activities related to housing were held prior to the release of the public Draft Housing Element. Additional opportunities for feedback will occur after plan release as well. These efforts are summarized in Chart 2-2 and described below:

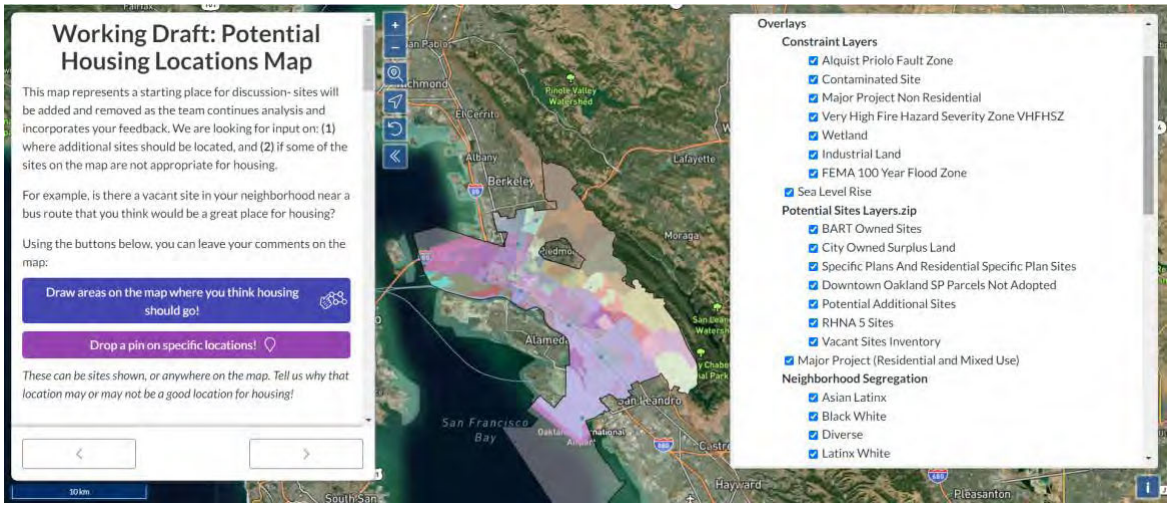
Chart 2-2: Housing Element Outreach Timeline

Housing Workshops: The team hosted three virtual housing workshops on February 10, 2022, February 17, 2022, and March 12, 2022, with one additional workshop planned to allow for the opportunity to give feedback on the Draft Housing Element. Approximately 200 people participated in these three virtual workshops. The first workshop provided background information on the General Plan, the Housing Element, and housing sites

inventory requirements. Workshop 2 sought to gather input on potential housing programs. Workshop 3 focused on community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. Workshop 4 was held on May 12, 2022, and sought Oaklanders' input on housing sites and proposed strategies included in a public review Housing Element draft before sending it to the California Department of Housing and Community Development (HCD). Summaries of these workshops are included in Appendix I.

Discussion Groups: A series of focus group discussions were held on the housing-related topics to solicit targeted feedback from organizations and individuals with direct experience with housing provisions and housing-related services. Discussion participants included organizations that may not have traditionally participated in the past including housing justice advocates, tenant rights organizations, faith-based organizations, and other community organizations.

Summaries of these meetings, including the names of participating groups, are provided in Appendix I; see below for the themes of the discussion groups:



- Focus Group Discussion 1 (February 2, 2022): Housing Sites
- Focus Group Discussion 2 (March 10, 2022): Production, Preservation, and Protections
- Focus Group Discussion 3 (*Forthcoming – placeholder*)

Housing Element Update Survey

The Oakland Housing Element Update Survey accompanied the first housing workshop on planning where housing should go. The survey was open from February 11, 2022 through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland.

The interactive map in the survey displayed the initial sites under consideration for the Housing Element and focused on identifying community priorities and recommendations for additional locations. See Figure 2-2 below for a snapshot of the interactive map. As an optional component of the survey, respondents were asked to describe their zip code, and race or ethnicity. The results of this survey guided the selection of sites identified in Chapter 3 and Appendix C, and a summary of the survey's findings is provided in Appendix I.

Figure 2-2: Interactive Map Survey Snapshot

ANALYSIS OF IMPEDIMENTS TO FAIR HOUSING CHOICE

The assessment of fair housing contained in Appendix D relies in part on outreach done in preparation of Alameda County's 2020 to 2024 Regional Analysis of Impediments to Fair Housing Choice (AI).[11] Historically, Oakland has prepared its own AI every five years as a U.S. Department of Housing and Urban Development (HUD) requirement. However, in 2020, the City joined various Alameda County cities and Housing Authority agencies to complete a regional AI.

A year-long community engagement process for the 2020 to 2024 AI consisted of three meetings and a seven-page survey between June 2019 – November 2019. The survey was translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include racial and ethnic minorities, people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses. Key data from the 2020 to 2024 AI is used in the Assessment of Fair Housing in Appendix D: Affirmatively Furthering Fair Housing.

[11] Alameda County, "Regional Analysis of Impediments to Fair Housing Choice." February 2020. Accessible at https://cao-94612.s3.amazonaws.com/documents/ALAMEDA-COUNTY-REGIONAL-ANALYSIS-OF-IMPEDIMENTS-TO-FAIR-HOUSING-Final-AI_Combined_2-24-20.pdf

2.2 Public Participation Themes

Across discussion groups, workshops, and other community engagement events, several key themes emerged that informed development of this Housing Element Update's goals, policies, and actions. This list is not comprehensive, but the key themes listed below are reflected in the overarching goals identified in Chapter 4: Housing Action Plan. The goals, policies, and actions seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

- **Address Homelessness: "Housing is a Human Right."** A common refrain from participants was that Oakland should recognize housing as a human right and focus on addressing the homelessness crisis. As experts from the National Law Center on Homelessness and Poverty note, "a right to adequate housing is not a requirement that states build free housing for the entire population, rather, it devotes resources and protective measures to prevent homelessness, discrimination, and promote permanent stable housing."[12] Participants expressed distrust with the City and frustration with the current unaffordability of housing and ongoing displacement. They suggested a wide variety of strategies to house the unhoused community, including treating unhoused populations with dignity, stopping the current encampment management policy, more flexible building types, temporary units, permanent supportive housing, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including a moratorium on market rate housing to balance the speed at which housing is built with the need to ensure that new housing is high-quality, affordable, and habitable, partnering with community groups that work with unhoused communities, and creating housing options that include wrap-around services. The Housing Element incorporates this input in the following ways:
  - **Goals:** 1, 2, 3, 4
  - **Policies:** 1.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.7, 4.1, 4.2, 4.3
  - **Actions:** 1.1.1 through 1.1.13, 2.2.1 through 2.2.8, 3.1.1, 3.1.2, 3.3.1 through 3.3.7, 3.3.9, 3.3.11 through 3.3.15, 3.3.17, 3.3.18, 3.5.1 through 3.5.3, 3.6.1, 3.6.2, 3.6.5, 3.7.1, 3.7.2, 3.7.4, 3.7.6, 4.1.1 through 4.1.5, 4.2.1 through 4.2.5, 4.3.1 through 4.3.4
- **Protect Oakland Residents from Displacement and Preserve Existing Affordable Housing.** Over the last two decades, housing costs in Oakland have risen dramatically – meaning many Oakland residents cannot afford to buy or rent a home within their own neighborhood. Participants expressed frustration with increasing displacement pressures while the stock of affordable housing throughout the city decreases, including both subsidized housing and "naturally occurring affordable housing" – or unsubsidized housing that is affordable at market prices. Participants

[12] https://www.kqed.org/news/11801176/what-would-housing-as-a-human-right-look-like-in-california

also discussed how Oakland's cultural institutions and history are at risk of loss due to continuing gentrification. To mitigate the pressures of displacement and gentrification, Oakland residents suggested a number of potential anti-displacement strategies, including enhanced rent stabilization measures, stronger just cause for eviction protections, increased enforcement of anti-harassment tenant protections, and historic preservation programs to preserve cultural institutions. Participants also discussed ways to preserve the city's existing affordable housing stock, including the implementation of a Community/Tenant Opportunity to Purchase Act, innovative solutions to maintain permanent affordability like community land trusts, additional acquisition and conversion to affordable housing efforts, live/work preferences for Oakland residents, and programs to physically rehabilitate homes to allow long-time residents to enjoy new community amenities. Participants also pointed to a need for better data collection to ensure accountability and to better understand and target anti-displacement resources. The Housing Element incorporates this input as through the following goals, policies, and actions:

  - **Goals:** 1, 2
  - **Policies:** 1.1, 2.1, 2.2, 3.5
  - **Actions:** 1.1.1 through 1.1.13, 2.1.1 through 2.1.6, 2.2.1 through 2.2.8, 3.3.12, 3.3.18, 3.5.1, 3.5.2, 3.5.4

- **Focus on Building more Housing Affordable to Extremely Low, Very Low, Low, and Moderate Incomes.** Producing new affordable and deeply affordable housing options was identified as a key strategy to prevent displacement. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to build more inclusive neighborhoods add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, inclusionary zoning, supporting homeowners in the construction of additional dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and Other recommendations included creating housing commission and neighborhood planning councils for ongoing resident leadership to decide the kind of housing development. The City of Oakland recognizes the and, with priority given to increasing housing affordable to very-low-, low-, and moderate-income households in the following ways:

  - **Goals:** 3
  - **Policies:** 3.1 through 3.8
  - **Actions:** 3.1.1, 3.1.2, 3.2.1 through 3.2.5, 3.3.1 through 3.3.18, 3.4.1 through 3.4.10, 3.5.1 through 3.5.4, 3.6.1 through 3.6.5, 3.7.4 through 3.7.6

- **Address Housing Quality Issues.** Housing quality issues can have detrimental impacts on people's physical and mental health. Through neighborhood outreach

processes, many Oaklanders described housing quality issues they were living with, such as overcrowding, unsafe building conditions, and lack of maintenance, caused by landlord neglect, lack of funds for upkeep or housing burden, or fear of reporting these issues. Community-recommended strategies to address these issues included programs/grants to landlords and homeowners to make repairs; universal design to allow all Oaklanders to remain in their homes as they age, or to help mobility-impaired residents; and tax credits or programs to address other housing habitability concerns, like indoor air quality. The Housing Element addresses housing quality issues in the following ways:

  - **Goals:** 2, 5
  - **Policies:** 2.1, 5.2
  - **Actions:** 2.1.1 through 2.1.6, 3.3.12, 5.2.1, 5.2.5

- **Keep Oakland Communities Together.** All Oakland neighborhoods are deserving of high-quality amenities, more affordable housing, and other public investments, especially in areas that have suffered from disinvestment of the past. However, **c**oncerns about gentrification and displacement associated with new investment were top of mind for many Oaklanders. Scores of people expressed how difficult it was to pay the rent in light of rising costs. People who have long generational roots in Oakland have been displaced but continue to come to Oakland to be with community and work. This includes a significant loss (30 percent) of Oakland's Black population from 2000 to 2019. As some community members noted, Oakland neighborhoods are like villages where people care for and nurture each other, and displacement means these villages are fragmented, and culture is lost. Oaklanders recommended creative ways to bring back displaced people as homeowners, such as support for co-ops, land trusts, and shared multi-unit buildings. Other creative ways to prevent displacement include creation of cultural district/anti- displacement zones, a human health/socioeconomic impacts analysis to analyze displacement and homeless impacts of market rate projects before the City provides permits or zoning changes. Another way they saw keeping Oakland communities together was through investment to the most impacted communities via municipal reparation to redress Oakland's history of eminent domain and urban renewal and for Black Americans who are descendants of chattel slavery. The Housing Element addresses displacement and cultural preservation in the following ways:
  - **Goals:** 1, 2, 5
  - **Policies:** 1.1, 2.2, 3.5, 5.1, 5.3
  - **Actions:** 1.1.1 through 1.1.13, 2.1.4, 2.2.1 through 2.2.8, 3.2.2, 3.3.8, 3.3.12, 3.3.18, 3.5.1 through 3.5.4, 5.1.1 through 5.1.3, 5.3.1 through 5.3.3
- **Building in Accountability and Success Metrics.** Oaklanders desire more transparency around housing issues and actions in the City, and to be heard by elected officials and City departments stressing the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals. The

Housing Elements aims to increase transparency and accountability in the following ways:

- **Goals:** 1 through 5
- **Policies:** 1.1, 2.1, 3.2, 3.3, 3.7, 4.1, 4.2, 4.3, 5.1, 5.2
- **Actions:** 1.1.7, 1.1.8, 2.1.3, 3.2.5, 3.3.17, 3.3.13, 3.7.1, 4.1.2, 4.2.4, 4.3.1, 5.1.1, 5.1.2, 5.1.3 5.2.9

This page intentionally left blank.

3 Summary of the Housing Sites Inventory

The housing element of the general plan must include an inventory of land suitable and available for residential development to meet the city's regional housing need allocation by income level. This inventory is known as the Housing Sites Inventory ("Inventory"). This chapter provides a summary of the full Sites Inventory, available in Appendix C.

3.1 Regional Housing Needs Allocation

As required by State housing law, all California cities, towns and counties must plan for the housing needs of all their residents, at various income levels. This number is called the Regional Housing Needs Allocation (RHNA). For the planning period 2023 to 2031 (also known as the 6th housing cycle), Oakland must plan for 26,251 new units, a nearly 77.8 percent increase from the prior cycle's allocation of 14,765 new units. Table 3-1 shows the income breakdown of the RHNA with an additional buffer, as recommended by the State, to account for any loss due to reductions in density.

Table 3-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Although extremely-low-income housing need is not explicitly projected in the RHNA, this group often requires the most subsidy and assistance to generate a sufficient number of housing units.

Source: ABAG, Final RHNA Plan, December 2021

3.2 Capacity to Accommodate the RHNA

Government Code Section 65583.2(c) requires that local jurisdictions determine their realistic capacity for new housing growth by means of a parcel-level analysis of land resources with the potential to accommodate residential uses. The analysis of potential to accommodate new housing growth considered physical and regulatory constraints, including: lot area and configuration, environmental factors (), allowable density, and other development standards such as parking requirements and building height limits.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will also occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for" housing. Sites included in the inventory reflect those that are most likely to develop during the planning period and meet the RHNA;

The Inventory identifies sufficiently zoned land to accommodate the RHNA at all income levels. The inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units, or ADUs); and

- Opportunity sites where additional development could occur. This includes 1) potential development projects, where projects may be in pre-approval; sites from the previous RHNA cycle that remain available for development; and new opportunity sites, which includes both vacant and non-vacant sites and consists of City-owned sites, sites owned by Bay Area Rapid Transit (BART), sites located within a specific plan area, and other sites with expressed or potential development interest.

The analysis of nonvacant properties included only those properties with

A summary of capacity by housing units to meet the RHNA is provided in Table 3-2, below. The complete 2023-2031 Inventory is provided in Table C25 of Appendix C, and can be seen in Figure 3-1 below.

Table 3-2: Summary of Residential Capacity to Accommodate the 2023-2031 RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income*[1]	*Moderate-Income*	*Above-Moderate-Income*	***Total***
Total Credits	2,183	2,388	364	9,718	**14,653**

SOURCE: City of Oakland, 2021; ALAMEDA County GIS, 2021; Dyett & Bhatia, 2021

CREDITS TOWARDS THE RHNA

HCD Guidance provides that the RHNA can be accommodated by looking at 1) projects that are currently in the development pipeline; and 2) by considering alternative means of meeting the RHNA, such as projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households.

Pipeline Projects

Pipeline projects are projects that have been approved, permitted, or will receive a Certificate of Occupancy during the projection period (June 30, 2022, to December 15, 2030) and can be credited toward the 6th cycle RHNA. Using data from the City's Accela permitting system, 336 pipeline projects with 12,593 units are spread across the city, with the majority in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. Based on the affordability levels or projected rents specified on the project proposal, approximately 21.5 percent of pipeline capacity is affordable for lower-income households, while 1.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. All pipeline projects are shown in Table C-4, Table C-5, and Table C-6, and shown in Figure C-2 in Appendix C.

Projected ADUs

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet the RHNA using past building permit approval patterns since 2018. From 2018 to 2021, approximately 247 permits were issued annually. Using a conservative estimate, the City anticipates approximately 1,978 ADUs, or approximately 247 average permits per year times eight years.) Annual ADU approvals are shown in Table C-7 in Appendix C. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[13] Projected ADU capacity by affordability level is shown in Appendix, Table C-8.

Adequate Alternative Sites

According to HCD, under "limited circumstances" a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[14] Limited circumstances refer to sites that are substantially rehabilitated; located on a foreclosed property or in a multifamily complex of three or more units converted from non-affordable to affordable rental; preserved at levels affordable to low- or very-low-income households with committed assistance; or preservation of mobile home parks through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the 2023-2031 planning period. The affordability of these projects reflects the actual affordability levels pursuant to the

[13] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

[14] More specific conditions that sites included under this option must meet are provided by HCD on their website: https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/adequate-sites-alternative.shtml

regulatory agreements that will maintain such income-restricted units. These sites and their capacity are shown in Appendix C, Table C-9.

OPPORTUNITY SITES

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop. These include both vacant and underutilized land in potential development projects, available 5th Cycle RHNA sites, and new opportunity sites identified as part of this cycle.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process, including those in the pre-application stage and those with filed and under review planning permits. Such projects are considered likely to develop. These sites are shown in Appendix C, Table C-14.

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous housing element cycles must be zoned at residential densities of at least 30 dwelling units per acre (du/ac) and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households. The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous housing element cycles. Specific sites carried over from prior housing cycles are described in more detail in Appendix C, Table C-15.

New Opportunity Sites

New opportunity sites not included in previous housing element cycles were identified to meet the remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed . These sites can be found in Appendix C, Table C-16.

Site Selection and Capacity

As part of site analysis, a Housing Element also must demonstrate the projected residential development capacity of sites identified that can realistically be achieved. Creation of realistic assumptions involved survey of recently constructed and approved projects by base zone, density, and height; and infill development rates; and development capacity modifiers such as existing use on a site, and potential development incentives like low assessed value (AV) ratio (when the value of the land is greater than the existing structure) and low floor area ratio (.)

To identify adequate sites and determine realistic capacity, a parcel-based analysis was conducted in accordance with the State site requirements for very-low and low-income sites. Sites that were

excluded include non-residential projects already in development; sites that were environmentally constrained by high fire risk, near fault lines, or within a 100-year flood plain; and sites with known contamination. In addition to these considerations, sites that are sought to be designated as capable of accommodating lower-income housing must meet the State-defined standard of 30 du/ac, known as the "default density", and they must be between 0.5 and 10 acres

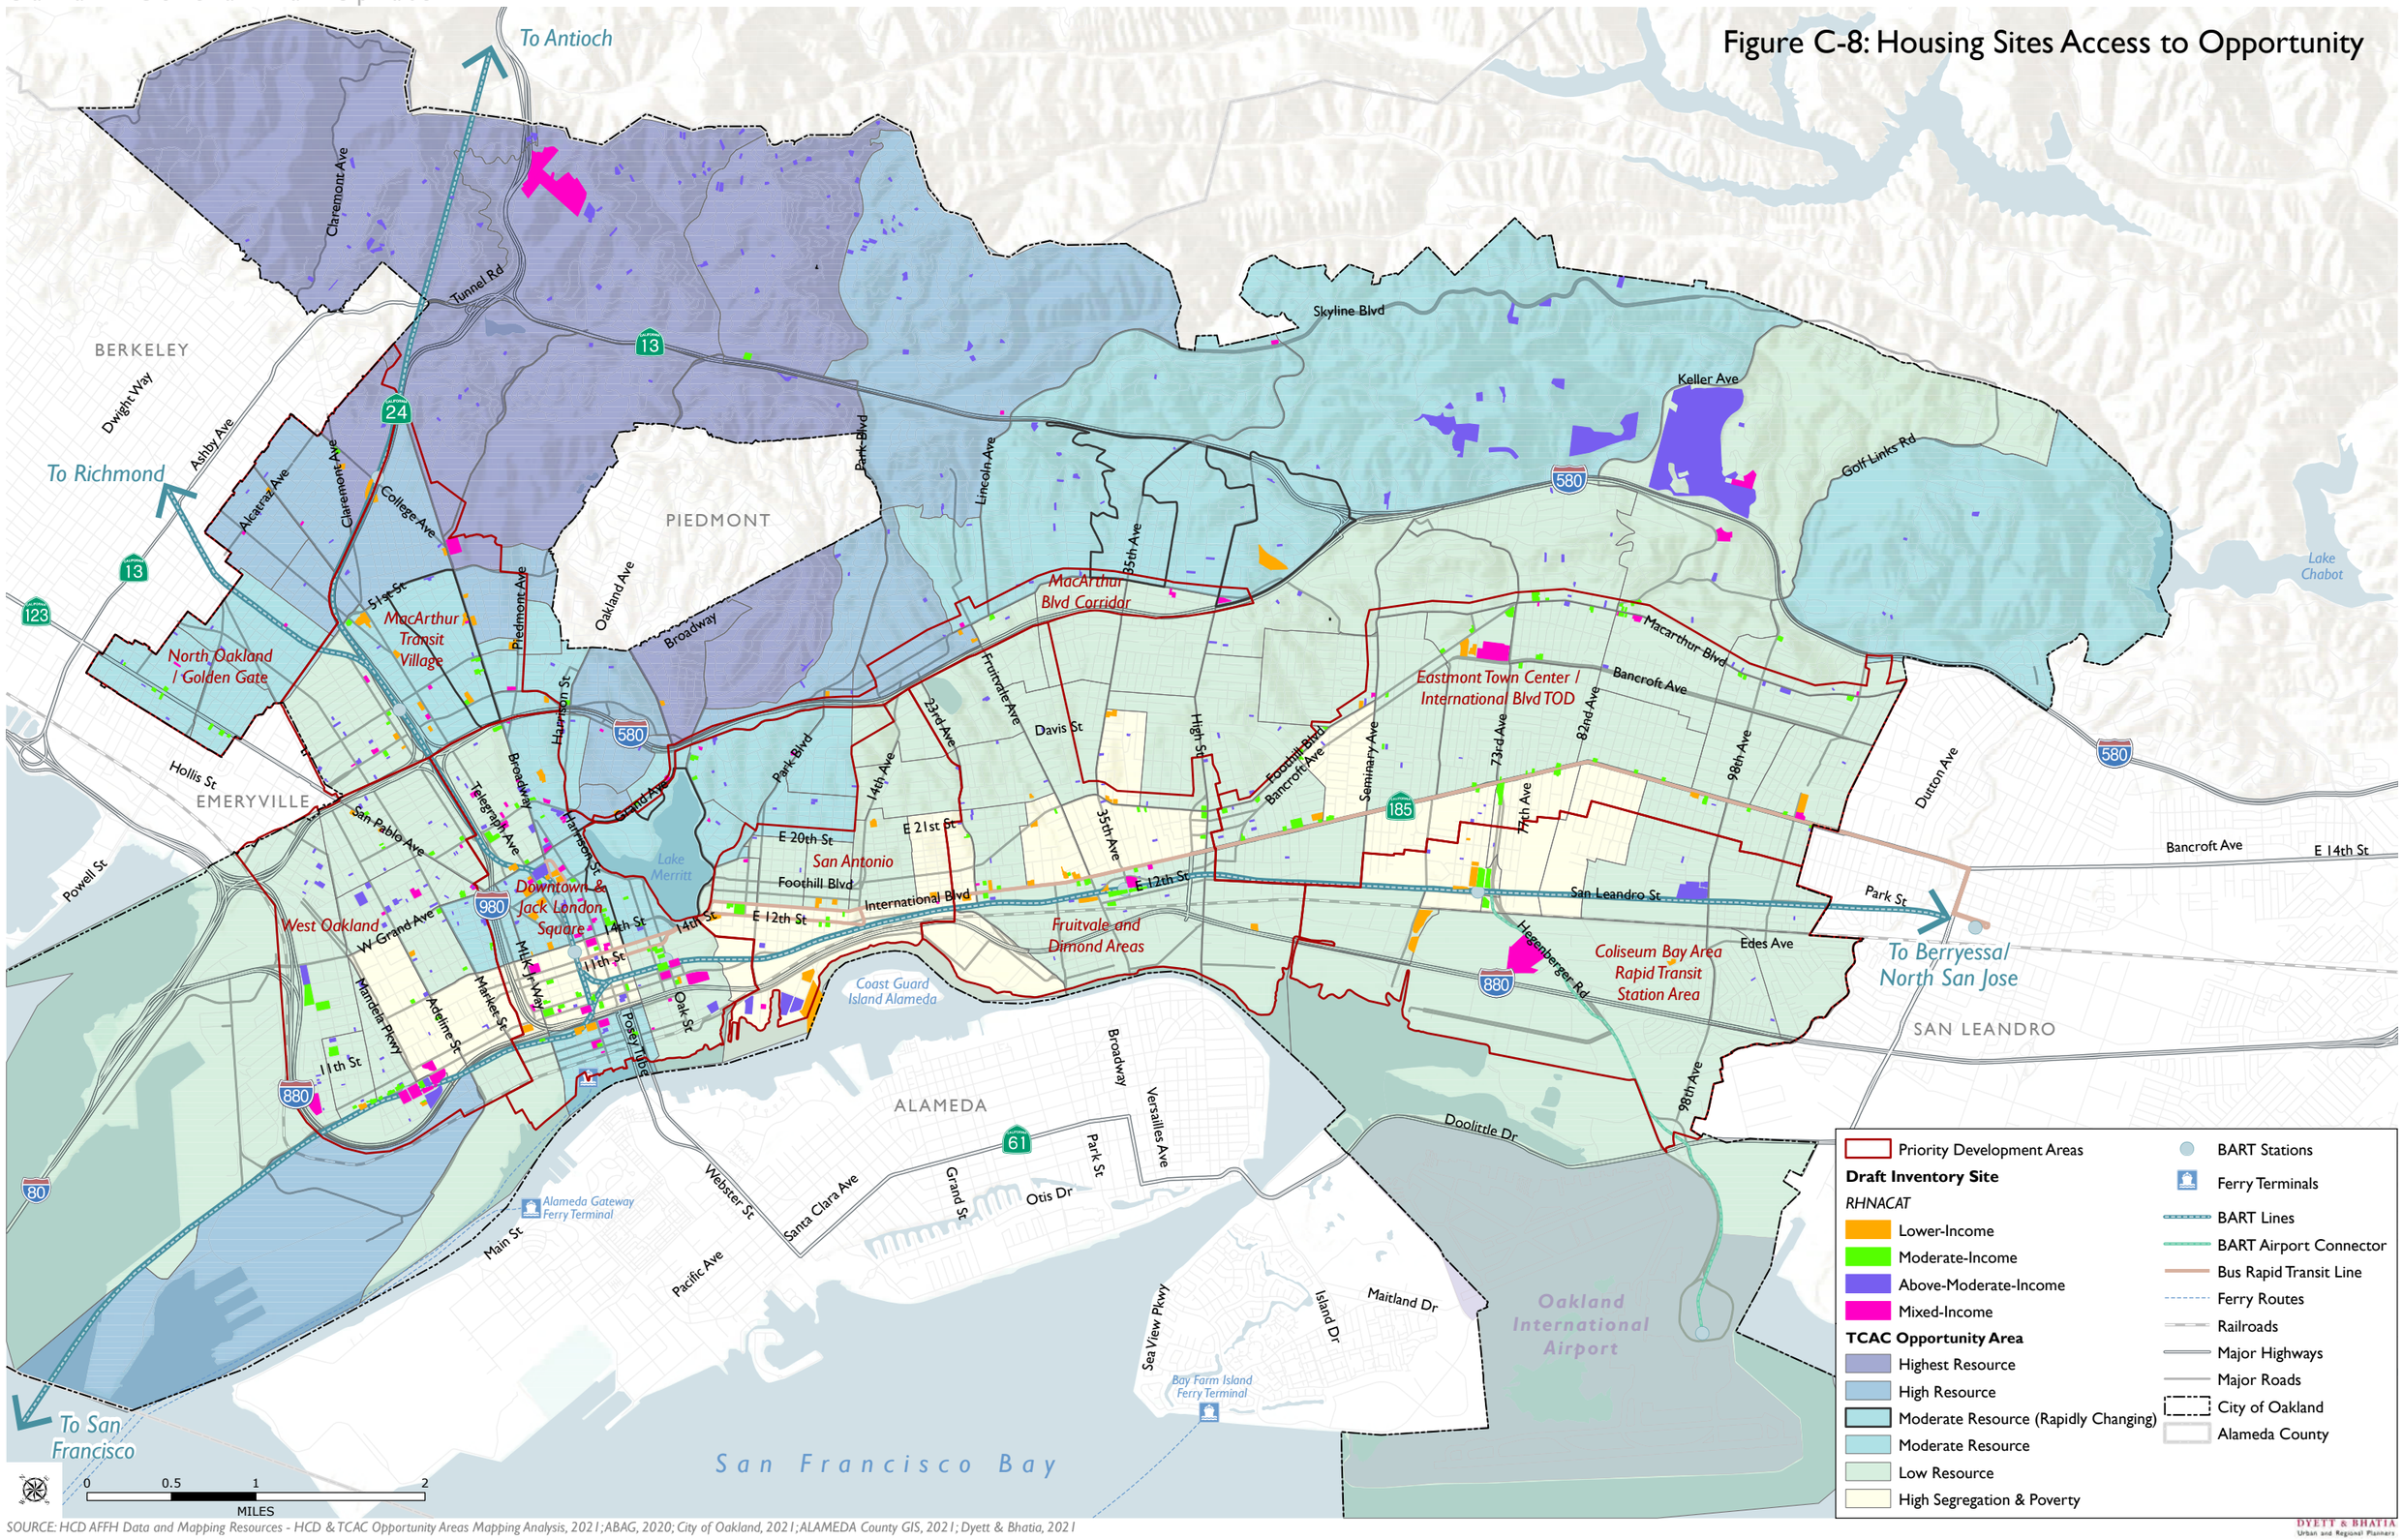
3.3 Assessing Housing Sites Through a Fair Housing Lens

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in environmental justice communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against Affirmatively Furthering Fair Housing (AFFH) criteria, the Housing Element is an important step in achieving an equitable future in Oakland.

As described in Appendix D, the site identification requirement in the context of affirmatively furthering fair housing involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity.[15] Furthermore, this analysis will determine whether programs must be adopted to "make sites available" with appropriate zoning, development standards, and infrastructure capacity to accommodate the new development need.

Chart 3-1 summarizes the development process of the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. Sites were selected in a manner to further and prioritize investment in historically disadvantaged communities, to decrease displacement pressures, and to increase access to existing higher resourced neighborhoods.[16] More information on each of the steps to identify additional sites for lower-income housing is available in Appendix C.

Chart 3-1: Housing Sites Inventory Development Process



[15] Gov. Code, § 8890.50. subd. (b).
[16] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in lower-income neighborhoods and Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). In parallel with housing development, the City must invest in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—including investments in equitable access to transit, public facilities, food access, and other amenities.

The State and California Fair Housing Task Force use a series of Opportunity maps developed by the Tax Credit Allocation Committee (TCAC) and HCD to define areas of low to high opportunity using a set methodology. These maps, described more fully in Appendix D, indicate that a significant portion of Oakland is considered low resource or high segregation and poverty. As a result, while the RHNA is met for each income category based on pre-established housing sites in the Inventory, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. Many of these areas are, in fact, in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines and are suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource.

Most residential capacity at all income levels is located in the low resource and high segregation and poverty areas, largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation and poverty per TCAC's Opportunity Scores. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards and fire risks, limited densities reflected in recent development patterns, and active pipeline projects. About 70.1 percent of Oakland's highest resource areas are within a very high fire hazard severity zone, as are about 25.7 percent of the city's high resource areas. Flooding also represents a risk in these areas (.6 percent in highest resource; 6.8 percent in high resource), as do earthquake fault zones (5.0 percent in highest resource; 2.2 percent in high resource) – see Appendix C for additional information. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, The location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure 3-2 below.

DYETT & BHATIA
Urban and Regional Planners

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority to ensure that the City meets its requirements to affirmatively further fair housing. Therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in higher resource neighborhoods beyond the preliminary sites inventory – which already met the RHNA in each income category. As discussed in Appendix C, the preliminary sites inventory consisted of active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites without known environmental constraints and near amenities like transit. To identify supplemental sites, the City started with the entire universe of parcels in Oakland, and filtered out sites based on objective physical constraints and opportunity metrics. More information on these constraints and metrics can be found in Appendix C.

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[17] After completing this exercise, an additional 70 potential sites were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 15 parcels sites were identified as supplemental sites that would further AFFH objectives. Figure C-7 in Appendix C maps the locations of these supplemental "AFFH sites."

and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing

These actions, as outlined in the Housing Action Plan (Chapter 4) will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, , however, since the City is able to meet the RHNA under existing zoning and due to the difficultly associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that

[17] A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call that neighborhood home.

4 Housing Action Plan

4.1 Goals, Policies, and Actions

This chapter includes the City of Oakland's goals, policies, and actions critical to respond to increasing housing pressures in Oakland. First, this Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The five goals are:

1. Protect Oakland Residents from Displacement and Prevent Homelessness
2. Preserve and Improve Existing Housing Stock
3. Expand Affordable Housing Opportunities
4. Address Homelessness and Expand Resources for the Unhoused
5. Promote Neighborhood Stability and Health

While these five goals provide an overall framework for addressing the multifaceted housing crisis, the policies and actions specify the means for implementing those goals. Actions include both programs currently in operation as well as new actions needed to address the city's housing needs.

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The San Francisco Bay Area is decades into an extreme housing crisis, and Oakland is at the center of that crisis. Housing production, and particularly affordable housing production, has not kept pace with the region's economic growth. Because Oakland's rental and housing market has traditionally been less expensive than other Bay Area cities, Oakland residents experience disproportionately high displacement pressure. As a result, many Oakland

residents cannot afford to buy or rent a home within their own neighborhood.[18] As households displaced from more expensive Bay Area communities search for more affordable housing options in Oakland and higher-income households continue to move into the city, Oakland's existing residents continue to bear the brunt of the Bay Area's housing crisis.[19] Community investment, including building new housing, is crucial for all Oakland neighborhoods to prevent displacement.[20] With demand outpacing the limited housing supply, competition for finite units and the resulting rising rents may create displacement pressure on low-income residents. Research by the Changing Cities Research Lab at Stanford University and the Federal Reserve Bank of San Francisco on credit score data shows that lower income residents who move from historically Black neighborhoods tend to move to neighborhoods with lower housing values and health scores, suggesting movement under constrained circumstances; over time, fewer of these low-income movers stayed within Oakland or moved into Oakland as affordable options declined.[21] Rising rents are a factor in increasing rates of homelessness. According to a 2019 survey, 11 percent of unsheltered Oakland residents report that rent increases were a primary cause of homelessness, in addition to job loss (13 percent) and other money issues (10 percent).[22]

Oakland is committed to enabling renters and owners to stay in their homes and communities, eliminating all involuntary moves out of the city. Goals and policies that are part of a comprehensive protection strategy are designed to prevent displacement and homelessness, and to ensure that low-income renters and homeowners have supports they need to stay in their homes and communities as increased neighborhood investment occurs.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

To meet the City's equity goals and mandate to affirmatively further fair housing, this goal—including the policies and actions contained within—will advance the City's commitment to reducing racial and economic disparities across Oakland. This goal seeks to protect from displacement pressures and prevent homelessness, both of which disproportionately impact Black, Indigenous, and People of Color (BIPOC) communities throughout Oakland. For instance, enhanced tenant protections will crack down on tenant-based racial discrimination in the housing market. This will be particularly important as the eviction moratorium established during the COVID-19 pandemic eventually comes to an end, and further pressure is exerted on the residential rental market.

[22] City of Oakland, "Homelessness County & Survey: Comprehensive Report." 2019. Available at https://everyonehome.org/wp-content/uploads/2019/12/2019HIRDReport_Oakland_2019-Final.pdf.

Rent stabilization and just cause protections also ensure that as more amenities are added to a neighborhood (and it becomes higher resource), the existing diverse residents are able to stay. Residents of historically disinvested neighborhoods should be able to remain in their homes and enjoy the results of improved amenities and increased services. In the long-term, this will enhance access to opportunity for historically marginalized and disadvantaged communities. Further, by pursuing live/work preferences for Oakland residents and taking actions to assist tenants at risk of eviction, Oakland helps tenants avoid displacement or concentration in disadvantaged neighborhoods.

Through more robust data collection efforts, the City will also be able to better identify and correct barriers to opportunity. These efforts include the creation of a rental registry and other displacement measure tracking. More accurate data will also ensure that the City is able to better target its existing and future housing resources to generate the maximum impact.

POLICY 1.1. TENANT PROTECTIONS AND ANTI-DISPLACEMENT

Action 1.1.1: Continue to Implement the Rent Adjustment Program (RAP).

The RAP limits rent increases on units covered by the Rent Adjustment Ordinance (Chapter 8.22 of the Oakland Municipal Code) based on a formula tied to increases in the Consumer Price Index. These provisions were further strengthened in 2017. The City will continue to implement the RAP and enforce the Rent Adjustment Ordinance. The City also enforces AB 1482 rent increase caps and just provisions for certain units not covered by the City's ordinances.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: Ongoing, 2023-2031

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.2: Enforce Just Cause for Eviction measures.

Just Cause for Evictions protections are enforced as part of the RAP, and are contained within Chapter 8.22, Article II of the Oakland Municipal Code. The City will continue to enforce just cause measures and will expand tenant protections as feasible—including clarifying and limiting the definition of nuisance or other just cause evictions.

Responsible Party: *Oakland Planning & Building Department; Oakland Public Works Department; Oakland Department of Housing and Community Development; Oakland Department of Transportation*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.3: Strengthen Ellis Act Ordinance protections.

The Ellis Act is statewide law that permits property owners to terminate tenancy when withdrawing residential units from the rental market. Although the City cannot prohibit Ellis Act evictions, it has adopted the Ellis Act Ordinance (Chapter 8.22, Article III of the Oakland Municipal Code) to set specific requirements that must be followed when removing a property to discourage violations of the Act and prevent the displacement of renters. The City will continue to enforce the Ordinance and strengthen renter protections—including proactive enforcement of eviction protections—in case of an Ellis Act eviction where feasible. The City will also join neighboring Bay Area cities to advocate for statewide reform to the Ellis Act to stabilize rental housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.4: Implement and expand tenant relocation measures.

On January 16, 2018, the City of Oakland passed the Uniform Residential Tenant Relocation Ordinance (Ord. No. 13468) to establish a uniform schedule of relocation payments which are now extended to tenants evicted when the owner or qualifying relative moves in and for other "no tenant fault" evictions. The Uniform Relocation Ordinance (Ordinance) requires owners to provide relocation payments to tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act activity, and condominium conversions. The City will continue to implement and enforce the Ordinance, adjusting base payments for inflation annually on July 1st. Additional relocation payments shall be required for tenant households in rental units that include lower-income, elderly or disabled tenants, and/or minor children.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.5: Provide eviction defense and implement a right to counseling.

The City will explore the feasibility of implementing a tenant right to counsel, where all tenants who receive an eviction notice or have been served with an unlawful detainer lawsuit have right to free legal representation. This may include partnering with nonprofit organizations to provide those services.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Private donations or other local, State or federal sources as available*

Timeframe: *Ongoing, 2023- 2031*

Objective: *As funding permits, all tenants facing eviction will be provided with counsel to represent them during eviction proceedings.*

Action 1.1.6: Expand rent control in a limited manner to maintain affordability.

Rent control measures are outlined in Oakland's Rent Adjustment Ordinance and enforced through the RAP. Units are covered by the Rent Adjustment Ordinance if they are within a building built prior to 1983 and there are two or more units in the building. The City will consider a limited expansion of the number of units subject to rent control to maintain affordability.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *To the extent permitted by State law, Oakland will expand renter protections.*

Action 1.1.7: Monitor neighborhood displacement risk factors.

As the effects of the COVID-19 pandemic continue to unfold and eviction moratoriums lift, there is an urgent need to monitor displacement pressures. The City will regularly monitor displacement risk factors—including rising housing costs, rapid demographic changes, neighborhood instability, and trends in out- and in-migration across neighborhoods in Oakland—to understand local displacement risk. This data will be used to better target anti-displacement programs and prioritize neighborhoods with a high risk of displacement. This data will also be used to better understand the causes of displacement and help tailor City programs to meet existing housing needs. The City will carry out the bi-annual Resident Mini Pulse Survey on the state of housing security as part of these monitoring efforts.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *The City of Oakland will include displacement-related statistics in a broader housing or community dashboard available on the City website.*

Action 1.1.8: Create and maintain a rental housing registry.

A rental housing registry is a database of all rental units within Oakland and would be used to track properties subject to rent control provisions, Just Cause for Eviction measures, and other property-specific policies and requirements. RAP staff have been studying the effectiveness of a rental housing registry in Oakland and plan to present initial findings to City Council during the summer of 2022. The City could use data collected in the rental housing registry to monitor and understand neighborhood change at a more granular level, to better target anti-displacement policies, and ensure that rent increases are compatible with tenant protection law.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *By 2023, the City will design and implement a rental housing registry.*

Action 1.1.9: Continue and expand the Tenant Protection Ordinance (TPO).

The TPO (Chapter 8.22, Article V of the Oakland Municipal Code) is meant to deter harassment by property owners and provide tenants legal recourse if they are harassed by the property owner. The TPO provides civil remedies for violations and implements tenant anti-harassment actions. The City will continue to enforce the TPO and expand anti-harassment protections, including tenant protections in ADUs.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.10: Enforce the tenant right to return.

Currently, through the Tenant Move Out Agreement Ordinance, Oakland renters have the right to return to their rental unit after certain no-fault evictions, such as code compliance evictions after the repairs are completed or Ellis Act evictions if the units are re-rented. Further, State law (SB 330) requires that property developers provide the right to return for

low-income renters when a property is demolished and redeveloped, and that the charged rent must be affordable. The City will increase awareness of State and local requirements and will enforce affordability requirements in new development projects. Further, pursuant to Action 2.2.5 the City will extend this right beyond the sunset date of SB 330.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.11: Provide a local preference in affordable housing projects.

The City will continue to implement a preference for Oaklanders who have been displaced, neighborhood residents, Oakland residents and Oakland workers in the selection of tenants or homebuyers for affordable housing projects and programs assisted by City housing Notice of Funding Availability (NOFA) funds.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *The City will continue to provide Oakland residents and workers a preference for City-funded affordable housing to the extent allowed by law and the constraints of other involved funding sources.*

Action 1.1.12: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.

While negotiating development agreements with developers for large scale market-rate and non-residential projects on City land or development agreements requiring complex, multi-phase entitlements, the City will advocate for appropriate community benefits to mitigate any displacement pressures that result from the development The City will consult with community-based organizations and residents impacted by developments to evaluate the extent of community benefits required to properly mitigate displacement impacts.

Responsible Party: *Oakland Planning & Building Department, Oakland Department of Housing and Community Development*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly reduce displacement pressures through negotiating appropriate community benefits during the development agreements process.*

Action 1.1.13: Prevent Oakland residents from becoming homeless/Fewer people become homeless.

Keep Oakland Housed (a public-private partnership), the federally funded Emergency Rental Assistance Program (ERAP), and Lifelong Medical Care Services that help renters from becoming homeless through rental assistance, legal advice, housing counseling, and case management.

The City will continue to support and align City, Alameda County, and private partners (such as community-based and faith-based organizations that have roots in communities whose members are disproportionately at risk of homelessness) to strengthen their capacity to prevent displacement and respond effectively when people are experiencing a housing crisis, as well as expanding these types of programs and designing new ones that identify, assist, and prioritize funding for those who are most at risk of becoming homeless. In addition, the City will continue to make information about tenant protection, anti-displacement, rental assistance, and homelessness services available on the City's website and at City facilities and strive to improve public awareness of these programs. These efforts are especially key in the wake of the COVID-19 crisis and the eventual end of the eviction moratorium. Additional tenant protection actions are included in Actions 1.1.1-1.1.10.

Responsible Party: *Oakland Human Services Department; Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: *Ongoing, 2023-2031*

Objective: *100% of available rent relief and eviction prevention funds are spent according to funder guidelines.*

Goal 2. Preserve and Improve Existing Affordable Housing Stock

Oakland's existing affordable housing stock is an important resource for the city's lower- and moderate-income population. Housing preservation means retaining existing built affordable housing and extending its affordability for current and future tenants. Preventing the loss of valuable existing affordable units is a cost-effective way of maintaining this resource as well as keeping existing residents who may be more vulnerable to increasing cost pressures in their homes.

Preservation, improvement, and maintenance also have health and equity co-benefits—addressing housing habitability issues can help to narrow inequitable racial and ethnic gaps in substandard housing conditions and reduce the burden of maintenance challenges for lower-income homeowners. This goal includes policies and actions that conserve and improve existing housing stock.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

This goal sets forth several policies and actions that will advance fair housing in Oakland. Actions that physically rehabilitate housing units and make other safety improvements to the existing housing stock reduce displacement and ensure longtime residents are able to enjoy new community amenities. This physical rehabilitation also improves the environmental determinants of health, thereby advancing the City's Environmental Justice goals. Further, as discussed in Appendices B and D, BIPOC residents of Oakland are disproportionately impacted by substandard housing issues. Actions contained within this goal will reduce the prevalence of these substandard housing issues citywide. Universal design strategies will also increase housing access for seniors and people with disabilities.

Further, actions that preserve the affordability of existing homes also play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the gentrification of their neighborhoods. These actions include range from resale controls to demolition and conversion protections. A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability of benefits of homeownership. Historic preservation actions also preserve cultural institutions and history that would otherwise be at risk of loss due to gentrification.

POLICY 2.1 EXISTING HOUSING STOCK IMPROVEMENT

Action 2.1.1: Support home rehabilitation programs.

The City will continue to provide housing rehabilitation assistance to very low- and low-income homeowners and homeowners with special housing needs to address code violations, repair to major building systems in danger of failure, abatement of lead-based paint hazards, minor home repairs for seniors, and emergency repairs:

- Home Maintenance & Improvement Program (HMIP) Deferred Loan Program
- Emergency Home Repair Program Loan Program
- Weatherization and Energy Retrofit Loan Program
- Alameda County Minor Home Repair Grant Program
- Lead Hazard Control and Paint Program
- Neighborhood Housing Rehabilitation Program
- Access Improvement Program

The City will engage local partners and fair housing experts to help promote awareness of, and broad participation in these programs. The City will continue to implement, annually review, and revise, as needed, program guidelines for housing rehabilitation assistance. The City will target resources, as possible, to expand opportunities throughout the community, including in lower-income and lower resource areas, and will strive to build community capacity and technical know-how by connecting homeowners with local labor to carry out home rehabilitation projects. This assistance will be particularly targeted to neighborhoods experiencing or at severe risk of displacement and gentrification. The City will also commit to explore additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's programs.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding is available, the City of Oakland will continue to fund and operate home rehabilitation programs. At current funding trends, this will allow for approximately 80 rehabilitation projects each year.*

Action 2.1.2: Promote healthy homes and lead-safe housing.

The City will continue implementation of the Lead-Safe Homes Program to assist low- and moderate-income homeowners with lead paint identification and remediation, prioritizing resources for disadvantaged communities with high rates of asthma. The City will also continue to partner with the Alameda County Community Development Agency's Healthy Homes Department to provide education, lead-safety skills training, and on-site consultations for Oakland property owners and conduct lead poisoning prevention and asthma trigger interventions for Oakland residents. In accordance with Oakland's Equitable Climate Action Plan 2030, transition away from natural gas appliances, which has been proven to increase development of asthma in children by 24 percent.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding becomes available, the City of Oakland will implement programs to reduce health hazards from lead and natural gas appliances.*

Action 2.1.3: Conduct proactive rental inspections.

The City will develop a proactive, data-driven housing inspection program to track code compliance, with focus on safety, and housing quality among the City's rental stock. The City will work with community partners to develop appropriate enforcement mechanisms, including tenant protection and anti-displacement mechanisms to ensure tenants are not displaced as a result of proactive inspections turning up housing habitability issues and/or raising rents due to the cost of fixing habitability issues. Further, the City will prioritize inspections in areas with older housing stock and health disparities and seek funding to streamline the inspection/rehabilitation process by connecting property-owners to technical and financial assistance for safety and accessibility improvements at the time of inspection.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2023-2025*

Objective: *The City will develop a proactive rental inspections program to significantly improve housing safety and quality and address housing needs, particularly in areas with older housing stock and communities experiencing health disparities.*

Action 2.1.4: Support historic preservation and rehabilitation.

The City will support the preservation and rehabilitation of both the existing historic housing stock and adaptively reused non-residential structures through a variety of strategies, including continued implementation of Mills Act Contracts and the Oakland Community Buying Program. The City will support the preservation of historic, archaeological, and tribal cultural resources and their incorporation into project site planning where feasible. As described in Action 3.2.4, the City will also promote adaptive reuse to promote historic preservation.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to implement the Mills Act and the Oakland Community Buying Program to support to help support historic preservation.*

Action 2.1.5: Implement universal design strategies.

The City will initiate community engagement to understand the need for universal design strategies, including with seniors, people experiencing disabilities, and community-based

organizations with insight and experience with accessibility issues. The City will consider the adoption of a Universal Design Ordinance, which would help close loopholes, ensure good faith compliance of ADA provisions, ensure that accommodations are built into new developments, and allow Oaklanders to age in place.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2025-2027*

Objective: *The City will consider adopting a Universal Design Ordinance to address housing needs and improve housing conditions for seniors, people experiencing disabilities, and other communities with accessibility issues.*

Action 2.1.6: Explore funding for improved indoor air quality.

The City will explore State and federal funding sources to provide financial assistance to property owners and very low- and low-income homeowners to offset some of the cost of investing in better ventilation and air filtration systems (e.g., MERV filter systems) to improve indoor air quality in existing single- and multifamily residential units, with a priority for homes in high air pollution areas such as near freeways.

Responsible Party: *Oakland Public Works Department, Environmental Services Division*

Potential Funding Source: *State and Federal Environmental Health Agencies*

Timeline: *Ongoing, 2023-2031*

Objective: *Significantly improve indoor air quality and address housing need in existing single- and multifamily residential buildings.*

POLICY 2.2 PRESERVE THE AFFORDABILITY OF EXISTING HOMES

Action 2.2.1: Continue to implement resale controls on assisted housing.

The City will continue to use financing agreements for both City-assisted ownership and rental development projects to ensure that units remain permanently affordable through covenants running with the land.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *100% of City-assisted homeownership and rental units will have their affordability covenants effectively enforced.*

Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.

The City will proactively monitor and enforce affordable housing covenants, and will conduct outreach to the owners of assisted units that are at risk of conversion to market-rate housing. The City will prioritize the preservation of units at some level of risk of converting in the next 10 years by actively working with and encouraging the owners of those properties to extend their covenants.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *As funding becomes available, deed-restricted affordable housing units at risk of losing their affordability will be protected from a loss of affordability protections.*

Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.

Residential hotels, also referred to as single-room occupancy (SRO) units, provide an important source of deeply affordable housing in City. As such, Oakland has enacted regulations to limit the demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units. The City has recently amended these regulations (Chapter 17.153 of the Oakland Planning Code) to strengthen protections for residential hotels and will continue to enforce these protections to preserve their affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce Single-Room Occupancy (SRO) regulations to preserve affordability and meet housing need.*

Action 2.2.4: Limit condominium conversions.

The conversion of rental housing to condominiums provides a risk to the affordability of Oakland's housing stock. The City recently amended its condominium conversion regulations

to require replacement rental housing for the conversion of two or more housing units, to remove the provision allowing the generation of conversion rights when the units are offered as rental units for seven or more years, to acknowledge the applicability of the Oakland Just Cause for Eviction Ordinance and the Oakland Rent Adjustment Ordinance, and to afford greater rights and protections to existing tenants. The City will strictly enforce these recently adopted regulations to preserve Oakland's rental housing supply.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce condominium conversion regulations to preserve rental housing supply and prevent displacement.*

Action 2.2.5: Extend local replacement unit provisions.

State law (SB 330) mandates that "protected units" are replaced with comparably affordable units when a residential building is demolished and redeveloped. The City will codify and extend replacement provisions pursuant to State law beyond the established sunset date. Further, the City will engage in strict monitoring and enforcement of the law to ensure replacement units are provided. This will include active outreach to developers to ensure they are aware of and comply with replacement unit provisions. The City will require that any demolition proposals include sufficient relocation assistance and right to return to the new replacement units.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Codify and extend local replacement unit provisions to ensure compliance and prevent displacement.*

Action 2.2.6: Reduce housing speculation.

Housing speculation can cause housing costs to increase, leading to higher rates of displacement and increased exclusivity in higher resource neighborhoods. To curb the negative effects of speculation, the City will consider implementing an anti-speculation tax, which would apply a fee . The City will conduct a market study to understand the potential impacts of such a tax and its appropriateness within Oakland. As discussed in Action 2.2.8, the City will also explore a possible Tenant Opportunity to Purchase/Community Opportunity to Purchase Act.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Plan Fund for the study; self-funding, if implemented*

Timeframe: *2026*

Objectives: *Study and consider implementing an anti-speculation tax to prevent displacement.*

Action 2.2.7: Provide additional subsidy for residential hotels.

The City will consider allowing owners of residential hotels that agree to restrict occupancy to lower-income residents to transfer development rights to create an endowed source of funding for an internal subsidy for such residents, or for maintenance/facility upgrades that do not increase rents.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2025-2027*

Objectives: *Preserve SROs and meet housing need.*

Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.

A Tenant/Community Opportunity to Purchase Act, referred to as TOPA/COPA, gives tenants and nonprofit organizations the opportunity to purchase their home when it goes up for sale, thereby preserving that housing unit as affordable. TOPA/COPA policies are under development in multiple Bay Area cities, including Oakland and the neighboring City of Berkeley. The City will study the effectiveness of a TOPA/COPA model suited to local conditions, which may include targeted TOPA/COPA in certain neighborhoods, equity-building mechanisms, racial equity impact considerations, or other approaches that may be appropriate to Oakland.

Responsible Agency: *City Council; Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Investigate and, if applicable, implement a TOPA/COPA policy (if appropriate) by 2024-2025*

Objective: *Oakland will study, and if appropriate implement, a TOPA/COPA policy by 2025.*

Goal 3. Expand Affordable Housing Opportunities

General production of housing is one of the most important strategies in addressing Oakland's housing crisis. Thoughtfully adding housing at every level can help reduce market competition for existing homes, a primary driver in displacement and homelessness. What the community needs most, however, is a concerted effort to increase production of homes that are affordable to very-low-, low-, and moderate-income households. In particular, Oakland needs more deeply affordable housing, particularly housing affordable to extremely-low-income residents, and housing that remains permanently affordable. One of the key objectives in producing more housing is overcoming patterns of discrimination and opening up neighborhoods that have historically been exclusionary to communities of color and low-income residents, while simultaneously refocusing resources and protections in historically disinvested neighborhoods (see Policy 2.2).

The shortfall is largely due to market constraints such as the cost of land, building materials and construction labor, as well as a lack of funding for affordable housing development. Other constraints are discussed in Appendix C. To meet the increased need for affordable housing, the City will identify new funding sources, expand existing programs and introduce new strategies to further incentivize high quality and abundant affordable housing development.

Like other Bay Area cities, one of the major challenges to developing permanent affordable housing in Oakland is the extremely high cost of development, especially the cost of land, labor, and materials. As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs.

Oakland also has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, can often provide significant opportunities for residential development. Further, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units.

Although housing is largely provided by the private and nonprofit sectors, the City has one major tool to influence development patterns and increase housing development of affordable housing and allow for other housing types: the Planning Code. To ensure that the Planning Code is responsive to housing policies and programs, the City will need specific zoning amendments that meet Oakland's changing needs and remove identified constraints

to residential development. The suite of amendments the City will undertake range from short- to long-term solutions, some of which will be carried out alongside the update of the Housing Element and others as part of the comprehensive update to the City's General Plan that includes the Land Use and Transportation Element and will continue through 2025 after the Housing Element adoption.

The City of Oakland currently operates both an online permit center and an in-person "one-stop" permit center with counter services staffed by the Departments of Planning and Building, Fire, and Transportation. However, there are opportunities to better steward small nonprofit and BIPOC developers, homeowners looking to add additional units, affordable housing developers, and other community partners through the residential development process.

This goal will encourage the production of affordable housing and guide development of a more diverse range of housing choices for households of all types, incomes, and special needs; and promote changes to City tools like permitting processes and the zoning code to make it easier and faster to build affordable housing.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Though Oakland is one of California's most diverse cities overall, there is significant racial segregation between the city's neighborhoods. As a result of past practices such as mortgage redlining, disinvestment in neighborhoods of color, racially restrictive covenants on housing development, exclusionary zoning, destructive urban renewal, highway development and predatory lending in neighborhoods of color, many of Oakland's BIPOC residents live in neighborhoods that lack access to quality amenities or upward mobility. As higher income people move to Oakland, low-income neighborhoods of color are also more susceptible to gentrification and continue to bear the burden of the city's increased housing supply. In contrast, some high-resource areas remain disproportionately white in their racial composition because they are zoned primarily for single-family homes, and the exclusion of lower cost housing types prevents BIPOC and lower-income families from moving to these neighborhoods. See Appendices B and D for additional detail on these patterns of segregation. The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive.

During the outreach process, many community members expressed desire to see Oakland be more inclusive and retain and strengthen its diversity with a wider array of housing choices, such as duplexes, fourplexes, cottage courts, and garden apartments throughout the city. These smaller, "missing middle" housing types[23] tend to be more affordable by design—compared to single-family homes—and thus provide additional options for first-time homebuyers, single people, and moderate-income households. These housing types can also increase the housing stock in previously built-out neighborhoods, and as such are an important factor for Oakland to meet its moderate-income RHNA target. Accessory dwelling units – also known as ADUs, granny flats, secondary units, in-law units, and backyard cottages – are another important strategy to increase the supply of affordable housing. ADUs offer an alternative for people who want to rent but do not want to live in larger apartment complexes, and tend to be located in lower-density and higher resource neighborhoods that often contain few other smaller affordable rental options. As described in Appendix C, the majority of ADUs in Oakland are estimated to have rents affordable to lower-income households. The community also expressed a desire to see increased housing typologies and affordable housing throughout the city, including existing working-class neighborhoods that are currently low-resource due to systemic racism and disinvestment. Efforts specifically aimed at increasing affordable housing production are included in Policy 3.3.

Further, certain segments of the population face greater challenges when finding decent, affordable housing due to special characteristics. Such characteristics may include one's employment and income, family characteristics, disability, or other conditions. Thus, some residents face greater housing cost burden, overcrowding, or other housing problems.

The special needs of individuals within these groups are wide ranging; in addition to affordable and accessible housing opportunities in proximity to transportation and other services, individuals with disabilities or who are experiencing homelessness may need on-site support and services. Meanwhile, female-headed households benefit from on-site childcare, and universal design elements

[23] Missing Middle Housing is a range of house-scale buildings with multiple units (e.g., duplexes, triplexes, fourplexes, cottage courts, and multiplexes) that are compatible in scale and form with detached single-family homes and are located in a walkable neighborhood. More information is available at missingmiddlehousing.com.

[24] SB 9, in effect as of January 1, 2022, permits increased density on single-family lots through duplexes and lot splits.

such as zero-step entrances and single floor living are important considerations for senior housing.

Special needs housing is an important component of Oakland's commitment to just and fair treatment of all individuals. It is critical that housing conditions foster an environment where everyone can participate, prosper, and reach their full potential. Actions contained within this goal will expand funding sources for affordable housing, including bonus points for serving special needs populations, will together allow for the expansion of affordable opportunities for special needs populations in high-opportunity neighborhoods. Actions related to expanding affordable housing options that are accessible to extremely-low-income households are also contained under Policy 3.1.

POLICY 3.1 FACILITATE PRODUCTION OF DEEPLY AFFORDABLE HOUSING[25]

Action 3.1.1. Develop a project-based rental or operating subsidy program for extremely-low-income residents.

Create either a capitalized operating subsidy or a rental housing subsidy for extremely-low-income households. This will help promote the financial viability of extremely-low-income housing.

Responsible Agency: *Oakland Department of Housing and Community Development*

Timeline: *Program will be launched by December 2023*

Potential Funding Source: *State of California Permanent Local Housing Allocation*

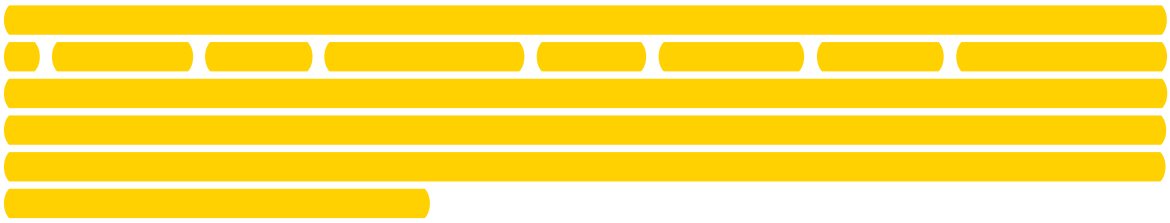
Objective: *This program will fund project-based rental or operating subsidy for at least 16 units of extremely-low-income housing per year, for a total of at least 56 extremely-low-income units by 2031.*

Action 3.1.2. Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.

The Oakland Housing Authority will continue targeting vouchers to support the development of extremely-low-income Housing through the award of project-based vouchers.

Responsible Agency: *Oakland Housing Authority*

Timeline: *Ongoing, 2023-2031*



Potential Funding Source: *Federal Section 8 and/or VASH vouchers.*

[25] Deeply Affordable housing for persons at 30% area median income or below.

Objective: *As vouchers are available, at least 20% of units in assisted developments will be deed restricted as extremely-low-income.*

POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS

Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) and Mixed Housing Type Residential (RM) zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet to remove constraints on lot splitting. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility, neighborhood scale and potential opportunities for homeownership (split lots and condominiums) in parallel with Policy 5.1. The City will develop objective design standards at the neighborhood level to ensure that multi-unit neighborhood scale housing types designed in a manner that is compatible with the scale of existing residential housing forms in these zoning districts is permitted ministerially.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2023*

Objective: *Significantly increase production of multi-unit housing types (including duplexes, triplexes and fourplexes) in current single-family-dominated neighborhoods to match housing need.*

Action 3.2.2: Promote live/work housing and housing for artists.

The City will update development standards and land use regulations to promote artist and live/work units in areas where appropriate under the General Plan. The City will encourage employers, trade groups, and arts and cultural districts to provide housing opportunities that are affordable to artists and similar professionals. The City will continue to allow the

conversion of existing commercial nonresidential buildings to joint live/work units in specific commercial/industrial locations while considering the impacts on nearby viable businesses.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase production of live/work housing and housing for artists to match housing need.*

Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.

The City will encourage the reuse and rehabilitation of Oakland's historic building stock to provide additional housing units and housing Oakland residents, keep the neighborhood character, and to preserve the energy embodied in the building's original construction. The City will amend land use regulations and development standards in the Planning Code to reduce constraints on adaptive reuse of commercial buildings for residential use. Reuse in environmentally sensitive areas—including in warehouses adjacent to industrial uses—will consider health and safety impacts prior to approval.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase reuse and rehabilitation of historic commercial buildings for residential use to match housing need.*

Action 3.2.4: Provide financial incentives for older or lower-income homeowners who want ADUs.

The City will identify potential funding sources and community partners to develop and implement a financial assistance program that would provide loans and/or grants to support low-income and older homeowners who want to construct an ADU. The City may prioritize funding for homeowners who agree to charge rents affordable for lower-income households or rent the ADU to Housing Choice Voucher participants.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Potential funding for an ADU incentive program could include funding from the State of California's CalHome program, potential future State funding for ADU development, or local sources*

Timeframe: *Ongoing as funding becomes available, 2023-2031*

Objective: *If funded, the City anticipates supporting at least 30 low-income and/or senior households with the cost of constructing on Accessory Dwelling Unit. This is based on the 30 loans projected for the existing CalHome grant the City has received to help low-income homeowners build ADUs.*

Action 3.2.5: Reduce constraints to the development of ADUs.

On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs that go went beyond the minimum requirements of State law. These additional allowances include higher maximum heights allowing for two-story ADUs, reduced setbacks in some zones, larger maximum sizes for detached ADUs, and an introduced ADU amnesty from Planning Code requirements allowing homeowners with existing un-permitted ADUs to legalize them. Also, this zoning update removed setback requirements and allowed additional envelope expansion of existing structures to create livable-size ADUs on "small lots" where ADUs would not be feasible under previous requirements.

The City will continue to host pre-approved ADU plans on its website to facilitate reduced applicant cost and expedited review for ADUs. The City will also provide increased staffing capacity to create a "one-stop shop" for information to property owners, contractors, and tenants. The City will invest in community outreach and education to teach property owners about ADU construction, financing, and landlord responsibilities. The City will also consider developing a database through which property owners can find and hire local workers to build ADUs. The City will also study how its implementation of the building code may constrain the legalization of unpermitted ADUs.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly increase production of ADUs to match housing need.*

POLICY 3.3 EXPAND RESOURCES FOR THE CONSTRUCTION OF AFFORDABLE HOMES

Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.

The City will solicit proposals from interested developers to construct housing on City-owned sites with first consideration given for affordable housing projects, pursuant to the California Surplus Lands Act. If the City does not agree to price and terms with an affordable housing developer and disposes of the surplus land to an entity that develops 10 or more residential units on the property, the City will require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups,

as required by Government Code Section 54233. The City will consider depositing up to 100 percent of net proceeds from such sales or leases to the Affordable Housing Trust Fund. Requests for proposals will be posted on the City's website and distributed directly to developers, including nonprofit housing providers.

Responsible Agency: *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Donation of land value*

Timeline: *Ongoing, 2023-2031*

Objective: *City will issue Notices of Availability and/or Requests for Proposals on at least two City-owned surplus sites each year.*

Action 3.3.2: Expansion of Section 8 vouchers.

The City will continue to participate in the HUD-operated Section 8 Housing Choice Vouchers program, and will continue to work with the Oakland Housing Authority to obtain additional funding from the federal government for more Section 8 rental assistance for very-low-income renters by documenting the need for additional housing vouchers and contacting decision-makers at HUD as appropriate. The City will also advocate for additional funding as opportunities such as the American Recovery Act become available. Further, the City will work with nonprofit and community-based partners to educate property owners throughout the city about housing choice vouchers to encourage greater participation and to increase locational choices for voucher holders (see Action 5.2.7).

Responsible Agency: *Oakland Housing Authority, Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD Section 8 vouchers*

Timeline: *Ongoing, 2023-2031*

Objective: *The City of Oakland Housing Authority will increase the number of vouchers being used in proportion with any future federal expansion of Section 8 or similar programs.*

Action 3.3.3: City of Oakland Rental Assistance Program.

As funding allows, the City will build on the success of the Keep Oakland Housed program, a public-private partnership , and the Federal Emergency Rental Assistance program (ERAP) to offer rental assistance grants to distressed tenants, free legal consultation, eviction defense, case management, and employment and financial counseling. The City will work with community partners to expand public awareness of the rental assistance program and tenant rights to ensure access to timely access information.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State and federal emergency rental assistance funding, private donations, and other local funds as available*

Timeline: ***Ongoing, 2023-2031***

Objective: *100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle. At least 250 households will be provided financial assistance to stay in their housing each year, or more if additional funding becomes available.*

Action 3.3.4: Develop permanent housing affordable to extremely-low-income (ELI) households on public land.

Determine the feasibility of developing permanently affordable housing in partnerships with community land trusts mentioned in Action 3.5.1 and other community partners on publicly owned sites that may be designated as surplus property. Assist nonprofit and local developer partners to access public funding and financing to construct and increase the supply of permanently affordable rental units that are designated for extremely-low-income households. Seek public funding resources to advance the development of permanently affordable rental and ownership housing for extremely-low-income households. Ensure that permanently affordable housing for extremely-low-income households is prioritized where services and needs are accessible by transit or walking. For projects seeking City funding, continue to incorporate preference for new construction projects to set-aside at least 20 percent of housing for ELI or below with a homeless household preference.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Economic & Workforce Development Department; Oakland Human Services Department*

Potential Funding Source: *Donation of land value, City subsidy*

Timeline: *Ongoing, 2023-2031*

Objective: *City will issue Notices of Availability and/or Requests for Proposals on at least two City-owned surplus sites each year.*

Action 3.3.5: Implement an affordable housing overlay.

The City will create [redacted] to streamline the approval of affordable housing by right. Potential features of this overlay could include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will study the feasibility of broadly applying this overlay, except for areas in the very high fire severity zone and protected historical sites/districts. The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2024*

Objective: *Study and consider adopting an affordable and/or moderate-income housing overlay to meet housing need.*

Action 3.3.6: Access to low-cost financing for development.

The City currently awards local funding that affordable housing developers leverage to obtain financing for their projects. As funding allows, the City will continue to award funds to affordable housing developers on favorable terms—including simple low interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City will also continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate all budgeted local funding sources (approximately $12 million annually starting in 2023) to support the construction, acquisition, and/or preservation of deed restricted affordable housing units each year. With $12 million in local funding forecasted in 2023, approximately 80 units could be created or preserved; of these, approximately 16 would be extremely-low-income. This will result in a total of 640 low-income units over the Housing Element period, including 128 extremely-low-income units, which would increase if more local funds are identified or secured such as a new local bond measure dedicated to funding affordable housing.*

Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

While the City generally relies on development impact fees to provide local funding for affordable housing developers, targeted inclusionary housing requirements may increase the provision of affordable housing units in higher resource neighborhoods. A study is underway as part of the five-year update to assess the benefits of impact fees versus inclusionary affordable housing requirements. The study will consider the number of units likely to be produced and likely affordability levels, and implement such requirements, if appropriate.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Study and consider adopting targeted inclusionary housing requirements to meet housing need.*

Action 3.3.8: Right-sized development fees on market-rate developments.

The City levies a number of development impact fees, including affordable housing impact fees, on market-rate projects to ensure that new development pays its fair share toward funding affordable housing, transportation improvements, and capital facilities. The City will regularly monitor its impact fees and ensure that appropriate amounts are set on an annual basis. Pursuant to the Mitigation Fee Act, the City will conduct a comprehensive analysis and make findings every five years for each impact fee along with review of whether to increase fees and if the option of building affordable housing units on-site percentage is set appropriately. The City will explore allowing developments to pay an in-lieu fee equivalent to the public art requirement to build art at affordable housing developments and promote neighborhood cultural preservation/stabilization.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Public Works Department; Department of Transportation (DOT)*

Potential Funding Source: *General Plan Surcharge, permit fees, and Impact Fees*

Timeline: *Ongoing, 2023-2031; initiate next five-year update in 2027*

Objective: *Continue to monitor and adjust impact fees.*

Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Affordable housing developers have pointed to the impact of City fees and the timing of fee payment, including both impact fees and building permits, as a constraint to development. The City will explore ways to increase flexibility in payment timing and expand direct financial support to reduce the burden imposed by the collection of City fees.

Responsible Agency: *Oakland Planning & Building Department; City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge, permit fees, and General Fund for any reduction of fees*

Timeline: *Ongoing, 2023-2031*

Objective: *Explore methods to reduce cost burden of City fees and payment timing to significantly increase affordable housing development.*

Action 3.3.10: Consider a citywide Enhanced Infrastructure Financing District (EIFD).

On December 16, 2021, the Rules and Legislation Committee of the Oakland City Council recommended that the City Administrator study the implementation of a citywide EIFD to fund affordable housing and infrastructure improvements. Upon completion of this study, the City will consider implementing the EIFD to increase available local funding for affordable housing. An EIFD is a special taxing district that directs a portion of future property tax growth towards infrastructure expenses, including affordable housing.

Responsible Agency: *City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *An EIFD would be a cost-recovering program for any implementation costs.*

Timeline: *By 2028, complete studying the possible implementation of an EIFD.*

Objective: *Study and consider implementing an EIFD to significantly increase affordable housing development and fund infrastructure improvements to match need.*

Action 3.3.11: Support innovations by design.

(such as modular and other offsite construction methods).

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Significantly increase production of housing using construction innovations to match housing need.*

Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.

The ACAH program provides loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing. The City will continue to issue NOFAs as funding is available and work with borrowers—including local community land trusts—to create new affordable housing units and preserve existing ones. The City will also continue to explore additional funding sources for the ACAH program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate approximately 25% of available local funding towards continuing the ACAH program.*

Action 3.3.13: Expand availability of predevelopment funding and low cost debt products for affordable housing development.

The City will continue to allocate funding to support predevelopment funding for affordable housing projects using its existing local sources, to help relieve the costs associated with the entitlement process especially for emerging and BIPOC affordable developers. The City will also identify and secure low-cost debt products for affordable housing development. To this end, the City has applied to HUD for Section 108 authority to leverage its CDBG allocation to provide low interest debt for affordable housing. Because Section 108 are hard loans that require repayment, the repayments could be revolved to support ongoing pipeline. The City will use a data-informed approach to target its resources towards historically marginalized and redlined areas as well as to support the growth of emerging and BIPOC affordable developers.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME and Section 108 funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As suitable funding and projects become available, predevelopment funding and low cost debt products will be made available for affordable housing development.*

Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing.

Affordable housing developers indicated during outreach that competing with market rate developers for sites posed a barrier on their ability to acquire sites for development. The City typically provides gap financing commitments during predevelopment, with funds provided at construction finance closing; acquisition is an eligible cost for reimbursement by the City's funding. While directly funding acquisition presents an earlier, riskier, and less efficient investment of the City's limited funds, the City will consider the implementation of a leveraged acquisition fund to allow for faster and more efficient acquisition transactions. The City will also study the creation of debt and/or equity funds to support small site housing projects. If feasible and funding is available, this new fund may be similar in nature to the City and County of San Francisco's Small Sites Program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available to leverage philanthropic and other outside resources.*

Timeline: *Ongoing, 2023-2031*

Objective: *By the end of the Housing Element Cycle, the City will be able to report on the practicality of a leveraged acquisition fund, as well as the feasibility and appropriateness of a small sites fund.*

Action 3.3.15: Continue and expand density bonus incentives.

Continue to implement the City's density bonus ordinance and seek opportunities to expand the program, which offers developers density bonuses in exchange for the provision of affordable housing. Added provisions could include mixing and matching of low-income category percentages to get an additional bonus. Consider evaluating the density bonus ordinance and deed restrictions needed for the program to make the language more accessible and identify any unnecessary barriers that make it difficult for grassroots organizations and nonprofit developers to navigate this program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2025, Ongoing*

Objective: *Significantly expand the City's density bonus program and increase production of density bonus projects to match housing need.*

Action 3.3.16: Consider revising the Real Estate Transfer Tax.

The real estate transfer tax, also called a Real Property Transfer Tax (RPTT), is due when a home is sold or gifted. The City will consider the following revisions to the RPTT:

- Make the tax more progressive at higher rates; and
- Use of a portion of the revised tax rate as a dedicated funding stream for affordable housing. This could provide annual revenues at levels significantly higher than current Impact Fee revenue.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Department of Finance*

Potential Funding Source: *General Fund for any applicable studies*

Timeline: *Conduct the analysis by 2026*

Objective: *Complete an analysis by 2026.*

Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.

The City will work with low-income, grassroots, and BIPOC affordable housing developers to identify barriers that prevent BIPOC and small nonprofit developers from accessing City funding and navigating the permitting process, and develop solutions to ensure that the process is transparent, affordable, and accessible for these Emerging Developers, defined by Oakland HCD as "a developer who has less than five (5) years of experience as a developer and/or less than five completed projects." The City has secured a Breakthrough Grant from the San Francisco Foundation that will dedicate a full time fellow to facilitate this work of identifying and breaking down barriers for BIPOC and emerging developers to develop affordable housing in Oakland.

Responsible Agency: *City Administration Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *San Francisco Foundation, General Plan Surcharge, and permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The proportion of City funding distributed for affordable housing development to low-income, grassroots and BIPOC affordable housing developers will significantly increase by 2031.*

Action 3.3.18: Reauthorize Measure KK and release remaining funds.

Measure KK, a bond measure passed in 2016, has provided a significant source of funding for anti-displacement and affordable housing preservation projects. The City has released remaining Measure KK bond funds for resident-led and community land trust-supported preservation projects and homeless acquisition projects and will seek to reauthorize bond authority to increase the funding available for affordable housing.

Responsible Party: *Oakland City Council and Oakland Department of Housing and Community Development*

Potential Funding Source: *General Fund and Local Infrastructure Bond Funds post-Measure KK*

Timeframe: *Authorize local infrastructure bond by 2025, spend funds as available on an ongoing basis*

Objectives: *The size of the new infrastructure bond and the amount set-aside for Affordable Housing is still being determined. For reference, the Measure KK infrastructure bond of $100 million for affordable housing supported the new construction of over 700 units, the preservation of 420 units, and the acquisition and conversion of over 400 units. New construction projects will be prioritized for setting aside at least 20% of units for extremely-low-income populations.*

POLICY 3.4. REFORM ZONING AND LAND USE TO ADDRESS COMMUNITY PRIORITIES

Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setbacks requirement.

The City will allow additional building heights and/or housing densities in certain corridors and districts. These changes include**:**

- **Zoning Districts** such as the Detached Unit and Mixed Housing Type Residential Zones. As discussed in Action 3.2.1, the City will develop zoning standards for a diversity of housing types in single-family neighborhoods, including duplexes, triplexes, and fourplexes. The City will also reduce minimum lot sizes to facilitate the subdivision of existing lots. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility and potential opportunities for home ownership (split lots and condominiums). The City will also develop objective design standards at the neighborhood level to ensure that such is designed in a manner that is compatible with existing residential housing forms in these zoning districts.

- **Corridors** such as International, Foothill, and MacArthur Boulevards. The current building height map and permitted densities along key corridors does not always allow residential projects to meet their full potential. Consistent with the housing sites map, the City will undertake revisions to allow increased heights and densities.

- **Transit-proximate areas**. Alongside efforts to increase missing-middle housing (see Action 3.2.1),

- **Resource-rich areas**. Oakland's high resource neighborhoods are typically lower-density and have historically been exclusive – both economically and racially. Allowing higher density multi-unit buildings in these areas that are rich in services will help increase the competitiveness of affordable housing projects for State funding, as well as the feasibility of developing significant numbers of housing units within these neighborhoods. Zoning changes may include permitting residential densities above 30 dwelling units per acre by right in designated areas This will help further fair housing objectives by increasing the availability of housing, and particularly in high resource areas.

  Responsible Agency: *Oakland Planning & Building Department*

  Potential Funding Source: *General Plan Surcharge and permit fees*

  Timeline: *2023 – 2025*

  Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.2: Revise Conditional Use Permit (CUP) requirements.

Conditional Use Permits are currently required for multifamily buildings in the RD-2 and RM Zones, which can act as a constraint on development – especially for affordable housing. The City will revise regulations to permit multi-unit building according to objective criteria such as building type and development size, without subjecting multi-unit residential projects to CUPs. Under Action 3.4.7, the City will create objective design standards and amend the Planning Code design review procedures to allow for streamlined review and, where appropriate, ministerial approval. The City will also actively promote and support use of SB 35 to streamline 100 percent affordable housing developments. These revised standards will be implemented alongside changes to Oakland's RD, RM, and RU zones as described in Action 3.2.1.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.3: Revise citywide parking standards.

Parking requirements are a major cost driver in residential development, and often conflict with sustainable development goals that seek to reduce dependence on automobile use. As such, the City recently eliminated residential parking minimums in the downtown area. Continued revisions of Oakland's parking standards will be undertaken through a comprehensive review of existing residential parking standards and the identification of appropriate new standards to match long-term development and environmental goals. Additionally, for mixed-use development projects (commercial on ground floor and residential uses above), the City will explore flexibility in parking requirements so that additional residential development on these sites is not constrained by any lack of conformance with commercial parking regulations.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2026*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing.*

Action 3.4.4: Revise open space requirements.

Both affordable and market-rate developers have pointed to the relatively high open space standards in Oakland as a constraint to development, especially for higher-density projects.

The City will revise common and private open space standards for multi-family developments to increase the feasibility of residential projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023-2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.5: Correct zoning district boundaries that cut through parcels.

Oakland's Zoning Map includes many zoning district boundaries that cut through individual parcels – meaning that the same parcel is subject to multiple development standards, which can act as a development constraint. In updating the Zoning Map, the City will correct instances of this occurrence and ensure that zoning district boundaries that affect allowed height and density follow parcel boundaries to the maximum extent feasible to remove inconsistencies and ambiguities.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.6: Capture the diversity of existing built fabric in zoning.

Oakland has a diverse historic urban fabric, some of which no longer conforms to the current Planning Code. To capture and continue this diversity and remove ambiguities, the City will reduce minimum lot sizes and setbacks to allow the creation of small-lot developments, as well as legitimize the many existing small-lot neighborhood patterns in West Oakland and other neighborhoods. The City will conduct a comprehensive review of the Planning Code to identify where current development standards have created non-conformities for older built facilities and amend development standards to reduce or eliminate them where appropriate. The City will also provide flexibility in the objective standards to retain and promote the City's vernacular built environment.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.7: Implement objective design standards.

The City currently requires design review for nearly all residential development, which can significantly lengthen the time required for project approval. To reduce the permitting timeline, the City has initiated a process to develop objective design standards to streamline the approval of residential, mixed-use, and commercial building types, with a particular focus on much-needed affordable housing projects in transit-rich areas. As opposed to "design guidelines," objective design standards will not be subject to interpretation, and result in faster, more predictable approvals of high-quality development that respects Oakland's history and benefits the local community.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, and SB2 Grant for Objective Design Standards*

Timeline: *2023 – 2024*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.8: Implement new ADU standards that streamline approvals and address unpermitted units.

In January 2022, the City updated its ADU regulations to comply with changes in State law. To address unpermitted units, the new ADU regulations go beyond minimum compliance with State law and establish an expansive legalization process for unpermitted ADUs addressing not only any existing non-compliance issues with the Building Code but the Planning Code as well. The City has also initiated a program to allow pre-approved construction documents for ADUs that creates a more streamlined approval pathway for many homeowners The City will continue to implement this legalization and streamlining of ADU permitting processes. The City will study options to alleviate the burden of the building code on the legalization of unpermitted ADUs.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and Ongoing*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.10: Permit sites included in prior RHNA cycles to develop with affordable housing by right.

Pursuant to State law, the City will permit vacant sites included in two consecutive prior RHNA cycles and non-vacant sites included in at least one prior RHNA to develop with owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. This means that the City cannot require any form of discretionary review or approval for such projects. These sites are identified in Appendix C, Table C-25.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS

The City has worked with a variety of community land trusts, including East Bay Permanent Real Estate Cooperative, Sogorea Te', Oakland Community Land Trust, Bay Area Community Land Trust and the Northern California Land Trust to provide affordable housing (including ownership housing). Most significantly, the City created the Acquisition and Conversion to Affordable Housing Program, which provides funds through Bond Measure KK to community land trusts to acquire and preserve affordable housing units. The City will continue to offer this program and support community land trusts. The City is also working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units and will implement these practices going forward. Financial or technical assistance may become available from the Bay Area Housing Finance Agency (BAHFA) or possible State programs. The City will prioritize lower-income residents and residents at risk of displacement while supporting shared equity models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Funds will be made available to equity affordability models through the City's annual affordable housing NOFA's on an annual basis (2023-2031)*

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to shared equity affordability models as per current practice.*

Action 3.5.2: Support housing cooperatives, co-living, and cohousing models.

Formal and informal housing cooperatives, co-living and cohousing models in Oakland have traditionally provided an alternative form of affordable housing, including ownership

housing. To further support these initiatives, the City will conduct outreach with community-based organizations and other community partners to identify ways the City can support these models, especially for lower-income residents. The City will prioritize lower-income residents and residents at risk of displacement when supporting these alternative housing models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *2031; Oakland Department of Housing and Community Development will be prepared to report back on the status of its cooperative-related engagement by the end of the Housing Element cycle*

Objective: *Oakland Department of Housing and Community Development will be prepared to report back on the status of its cooperative-related engagement by the end of the Housing Element cycle.*

Action 3.5.3: Advocate for statewide legislation on social housing.

The City of Oakland recognizes that the statewide housing crisis requires statewide solutions. As such, the City will advocate for social housing legislation under consideration in the State legislature, known as the California Social Housing Act or AB 2053. The Act would establish a California Housing Authority (CHA) to produce and preserve social housing – publicly-owned and mixed-income developments that maintain homes as permanently affordable.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *City legislative advocacy will be funded through the existing general fund-supported contract for State legislative representation services.*

Timeline: *Ongoing, 2023-2031; the City will continue advocacy for social housing legislation until it is adopted*

Objective: *The State of California will successfully adopt social housing legislation.*

Action: 3.5.4: Evaluate acquisition and development opportunities for moderate- and middle-income households.

The City will evaluate the merits of acquisition and development models to assist in the construction or preservation of middle-income housing, potentially in partnership with other regional agencies.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *The model could be financed by bond financing underwritten by rental revenue, with relatively shallow subsidies in the form of property tax abatements*

Timeline: *Evaluation will be ongoing as opportunities evolve*

Objective: *If a suitable opportunity exists to efficiently produce or preserve middle income housing, the City will design a program or participate in a program developed by other public agencies.*

POLICY 3.6. STREAMLINE THE APPROVAL OF NEW HOUSING

Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.

The City will work with developers and housing stakeholders, particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.7, and/or increasing staffing at the Planning and/or Building Bureau to reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.2: Provide increased flexibility in development standards.

The City will provide increased flexibility in development standards, with a focus on smaller infill residential projects, to ensure that these projects can qualify for streamlined permitting without need for variances. The City will also consider increasing staff-level authority, with clear guidelines, to grant minor exceptions, which can also reduce project timelines and costs. Alongside efforts described in Actions 3.2.1, this flexibility will increase the capacity of the Planning Bureau to permit a variety of units, more expediently, creating more residential units in traditionally lower-density neighborhoods.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing.

Through the implementation of objective design standards as described in Action 3.4.7, the City will create a ministerial review pathway for qualifying developments based on project size, type, affordability level, and location. Discretionary design review will still be required for some types of projects and where certain adjustments are requested. As part of the entitlement reform process, the City will consider fee subsidies and/or payment deferrals to better accommodate affordable housing projects and increase the financial feasibility of affordable projects. The City will work with community partners and affordable housing developers to identify and implement appropriate entitlement reform actions.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.4: Continue SB 35 streamlining.

SB 35 created a streamlined and ministerial approval process for housing projects that meet siting and construction criteria including being located in communities that have failed to meet their RHNA. The City of Oakland was among the 225 jurisdictions that made insufficient progress towards meeting the RHNA for low- and very-low-income housing at the time of the State's most recent determination in 2021 and is therefore subject to the streamlining provisions for proposed development in which 50 percent or more of the units will be affordable. The City provides an SB 35 streamlining checklist to facilitate the development of affordable housing, and will actively promote use of SB 35 streamlining for 100 percent affordable projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.5: Continue one-stop and online permitting services.

Through the Online Permit Center (Accela Citizen Access), property owners are able to apply for and follow the status of their permits online. The City also operates an in-person One-Stop Permit Center, where the counter services of the Planning & Building Department, Oakland Fire Department, and Department of Transportation have been combined in one location to expedite the permitting process. The City will continue to offer both online and in-person permitting services to reduce permitting timelines. The City will also coordinate with low-income and affordable housing developers to understand and correct the gaps in these services.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2031*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

POLICY 3.7. EXPAND OPTIONS FOR SPECIAL NEEDS HOUSING

Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.

The City will continue to encourage a wide variety of senior housing opportunities, particularly for lower-income seniors with special needs, through the provision of financial assistance and regulatory incentives as specified in Planning Code. The City will continue to award points in its consideration of housing funding to projects that serve special needs populations, including seniors and homeless individuals. The City will explore options to expand the amount of financial assistance available to developers of housing for seniors and persons with special needs and will commit to transparent reporting of how special needs units are assisted.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Economic & Workforce Development Department; Oakland Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.2: Provide housing for persons with HIV/AIDS.

The City will continue to provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. The City will enhance outcomes via housing first model under the Alameda County EveryOne Home Plan.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, HOPWA, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.3: Accessible units in new housing developments.

The City of Oakland's Housing Development Services unit will promote the inclusion of accessible units for projects receiving City funding and will award extra points to projects that exceed federal minimum requirements for accessible housing for all projects receiving federal funding assistance.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.4: Implement the sponsor-based Housing Assistance Program.

The City will continue to work with the Oakland Housing Authority to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service-enriched housing options that increase housing choice for special needs populations. The City will explore options to find more landlords willing to participate in the program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.5: Encourage different sizes of housing for larger families – including affordable housing with courtyards, multigenerational housing.

The City will continue to reward and incentivize projects that include multi-bedroom units suitable for families in its awards of City funding for housing development and will expand the program to grant points to affordable housing projects that provide different sizes of houses for multigenerational and larger families, such as housing with courtyards or cottages.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.6: Expand areas where residential hotels are permitted by right.

The City will consider expanding zoning districts where residential hotels and rooming houses are permitted by right. These housing typologies provide an important source of housing for extremely-low-income residents.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Significantly increase production of residential hotels to match housing need.*

POLICY 3.8. CONVERT VACANT LAND AND UNITS TO HOUSING

Action 3.8.1: Continue to implement the Vacant Property Tax (VPT).

On November 6, 2018, Oakland voters approved Measure W, the Oakland VPT. The VPT Act establishes an annual tax of $3,000 to $6,000 on vacant property. A property is considered "vacant" if it is "in use less than fifty days in a calendar year," and not subject to any of 10 exemptions. The City will continue to implement the VPT to encourage active uses on vacant land and regularly monitor the effectiveness of the program. The City will also consider expanding exemptions to the VPT to reduce the impacts of unintended hardships on nonprofit and affordable housing developers.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *Self-funding through the vacant property tax*

Timeline: *Ongoing, 2023-2031*

Objective: *Through the vacant parcel tax, seek a 10% reduction in vacant parcels by the end of the Housing Element period.*

Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations.

Traditional brick-and-mortar commercial and retail businesses have continued to transition to an Internet-based model, which has been further accelerated by the COVID-19 pandemic. As a result, a significant number of ground-floor commercial and retail spaces in Oakland remain vacant. The City will explore opportunities to promote the conversion of vacant ground floor spaces in certain areas to live-work and other residential use, as may be appropriate in the local context. The City will also explore other opportunities to promote the conversion of vacant office or commercial space to housing.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2026*

Objective: *Significantly increase conversion of vacant ground floor commercial space to residential uses, where appropriate, to match housing need.*

Although housing demand in Oakland remains extremely high, the City experiences a higher vacancy rate than both Alameda County and the Bay Area overall. This results from a variety of factors but may ultimately lead to higher housing costs. Oakland currently has in place vacancy tax on parcels and several types of housing units – including condos, duplexes, and townhome units under separate ownership. The City will consider extending the current vacancy tax to all residential units to encourage active use of residential units and expand the available housing supply.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Fund*

Timeline: *Consider by the end of 2026 whether the vacant parcel tax ought to be revised or expanded*

Objective: *By the end of 2026, consider and if appropriate adopt a revision to the vacant parcel tax.*

Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.

The City currently provides the Community Buying Program, which assists Oakland residents in purchasing vacant or abandoned properties from the Scattered-Site Single Family Acquisition and Rehabilitation Program. These properties have been made available through programs like the Oaktown Roots Affordable Homes pilot program and local community land trusts, like the Oakland Community Land Trust and the Bay Area Community Land Trust. These programs will also help promote long-term affordable homeownership, which will also promote the objectives of Policy 5.1.

Responsible Agency: *Oakland Department of Finance; Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As additional funding is available, continue to convert vacant parcels to affordable housing.*

Action 3.8.5. Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

Partner with the Alameda County Tax Collector to identify tax-defaulted property suitable for development or preservation as affordable housing. Through use of the Chapter 8 tax sale program, make this property available to affordable housing providers, community land trusts, and related organizations.

Responsible Party: *Oakland Department of Housing and Community Development*

Funding: *Contributory value of the land, impact fees, HOME, other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *By the end of the Housing Element period, at least 40 parcels will be acquired by the City of Oakland or partner organizations that were previously tax defaulted.*

Goal 4. Address Homelessness and Expand Services for the Unhoused

The City of Oakland is facing an unprecedented humanitarian crisis of residents who are experiencing homelessness. As the United Nations notes in its mandate on the right to

adequate housing, the right to adequate housing is more than having a roof over one's head, it is the right to live in safety and dignity in a decent home; HUD Secretary Fudge has declared that "housing is a human right." Ultimately, permanent housing is the solution to homelessness (see Goal 3). Goals, policies, and actions in this Housing Action Plan recognize housing as a human right and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Homelessness disproportionately impacts Oakland's BIPOC residents, particularly the city's Black residents. Further, special needs households—including extremely-low-income households—tend to be at greater risk of experiencing homelessness. Addressing homelessness and providing high quality services to the unhoused is also a racial equity issue, and must be part of the City's efforts to affirmatively further fair housing. By expanding access to quality homelessness services across Oakland, and seeking to expand transitional housing options in a citywide manner, the City will work to avoid an overconcentration in homelessness and homelessness-related services in disadvantaged neighborhoods. Further, by expanding economic opportunities for the unhoused, Oakland will help those currently unhoused access housing opportunities in a variety of Oakland neighborhoods. This goal, and the policies and actions that implement it, will address fair housing issues as they relate to homelessness in Oakland.

POLICY 4.1 EXPANSION OF HOMELESS SERVICES

Action 4.1.1: **Expand, improve, and maintain crisis response beds.**

Since 2018, the City has expanded its supply of emergency interim housing (community cabins, shelter beds, Safe RV parking) by over 1,000 beds/spaces. This increase is almost entirely funded with one-time funds. The City will use local, county, State, and federal funding to maintain these new resources and to improve the effectiveness of these beds in moving people to permanent housing (for example, by adding rapid rehousing exit resources). In addition, the City will continue to expand the interim housing sites and other forms of housing for people experiencing homelessness in the City. The City will ensure that such housing options include supportive services such as including rapid rehousing assistance, housing navigation, and access to resources via Coordinated Entry. The City will seek to partner with Alameda County to provide mental health and substance use services in interim sites and will partner with mainstream workforce programs to support on site job training programs. The City will coordinate efficient provision of services and resources from private, nonprofit, local, Alameda County, and State organizations

Responsible Party: *Oakland Human Services Department*

Potential Funding Source: *Measure Q, ESG, State Homeless Housing Assistance and Prevention Funding, various HUD funding sources, CalAIM (through County)*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *1. Increase the number of people who are experiencing homelessness in Oakland who are sheltered; and 2. Invest in and improve the quality of interim housing programs so that more people exit to permanent housing and more people exit to permanent housing more quickly.*

Action 4.1.2: Expand, improve, and maintain crisis response beds for unsheltered communities of color.

Increasing the number of crisis response beds helps to address the disproportionate rates of unsheltered homelessness among communities of color, especially among African American households. Creating additional facilities in many parts of the city will assist households experiencing homelessness to remain in their communities will reduce the number of African American households who are displaced from Oakland. Track data to ensure that African American households are using emergency crisis response beds and exiting to permanent housing at rates that are proportional to their representation in the homeless population.

Responsible Party: *Homelessness Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Increase and stabilize people while providing opportunities to improve income they need to avoid entering or returning to homelessness.*

Action 4.1.3: Expand health and hygiene facilities and services, and improve access to bathrooms and showers.

Starting in FY 20-21, this intervention has greatly expanded to serve a minimum of 60 curbside sites with porta-potties, handwashing stations, and garbage pick-up. HSD has created two new outreach staff positions whose primary role is to support the encampments which have these interventions with maintaining the services as well as maintaining a level of cleanliness and compliance with the Encampment Management Policy. These City staff also support designated site leadership at each encampment site. The site leaders ensure that the porta-potties are used appropriately, and keep the units clean in between the official servicing. City staff provide the site leaders with cleaning supplies and stipends for their work. Per Council directive, the goal is to increase to 100 sites and four City outreach staff.

Responsible Party: *Homeless Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funding, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *More people experiencing unsheltered homelessness have access to services which promote health and dignity.*

Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.

Recognizing that a lack of access to living wage jobs is a significant driver of homelessness in Oakland, the City will work with the Oakland Unified School District, higher educational institutions, related nonprofit agencies, business and other partners to create low barrier work opportunities for people who are currently unsheltered. These programs will offer support for development of work-related skills, provide services to address employment barriers specifically targeted to the needs of unhoused residents and increase the co-location and collaboration between providers of homeless assistance and employment programs and services. In addition, the City will work to match small business owners who want to address homelessness with job seekers who are homeless or formerly homeless.

Strategies to include:

- Low barrier work opportunities, for people re-entering the workforce
- Add employment specialist positions in core homeless services/prevention services programs
- Flexible funding pool to support career track training and employment programs
- Benefits advocacy to obtain SSI or other income for which they are eligible

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Reduction in the number of households which return to homelessness in the two years after obtaining housing.*

Action 4.1.5: Provide support for domestic violence shelters.
