Recognizing that domestic violence is one of the leading causes of homelessness for women and children, the City will coordinate provision of counseling, case management, healthcare, rapid rehousing assistance, and other wraparound services for survivors of domestic violence within transitional housing programs, emergency shelters, and navigation centers. The City will work with housing and service providers to seek additional grant funding to support survivors of domestic violence. The City will continue to publicize health and wellness resources on its website and will ensure that this information remains up-to-date.

Responsible Agency: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator, Department of Violence Prevention*

Potential Funding Source: *To be determined*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will significantly increase supportive services (and their publicization) for domestic violence survivors to match need.*

POLICY 4.2 ENCAMPMENT MANAGEMENT

Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy.

The City of Oakland adopted the 2020 Encampment Management Policy. The purpose of this policy is to protect and serve all Oaklanders, sheltered and unsheltered, and to manage the adverse impacts of homeless encampments by balancing the interests of all residents, focusing encampments actions on mitigating negative outcomes as they pertain to public safety, public health, and equity outcomes.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *2023-2031*

Objectives: *The Encampment Management Policy is essential to connecting unsheltered individuals to human services, emergency shelter and long term permanent supportive housing, while executing comprehensive operations focused on managing health and safety conditions of public spaces. The goal is to close areas where encampments are not permitted, provide regular and adequate trash collection from encampments, to ensure that porta-potties and hand-washing stations are services regularly as needed, and that encampments receive regular deep cleanings that ensure that our unhoused residents are not living in conditions that threaten health and/or safety until fully abated.*

The policy sets forth the following objectives:

1. *Designate high-sensitivity areas, where unmanaged encampments are presumed to cause unreasonably high levels of health and safety impacts due to the nature of the location;*
2. *Designate low-sensitivity areas, where enforcement will not be prioritized;*
3. *Make findings that will prompt Encampment Management Team intervention; and*
4. *Provide guidance on addressing unreasonable health and safety risks, promoting voluntary compliance, and strategies to address non-compliance.*

Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator.

Homelessness intersects with multiple departments and agencies, all of which fall under the City Administrator's purview. Leading from the Office of the City Administrator, the Homelessness Division serves as the primary liaison between the City Administrator's Office and internal and external agencies, along with other City departments, regarding the City's homelessness response and provides inter- and intra-agency coordination focusing on the City's management of its unsheltered population. This division directs the program and operational decision-making in division activities; encampment management response teams and task forces; organizes, manages, and directs the review and implementation of the City's major projects.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *2023—2031*

Objectives: *Lead the implementation, expansion, and strategic coordination of Homeless Response Operations and Service Delivery across City of Oakland departments, and external public and private partners, organizations, and agencies.*

Action 4.2.3: Strengthen interdepartmental Encampment Management Team.

The Encampment Management Team (EMT) is an interdepartmental working group tasked with implementing and administering this policy, consisting of representatives from Oakland's Public Works Department, Human Services Department, Oakland Policy Department, Oakland Fire Department, the City Administrator's Office (CAO), and other consulted departments as necessary (e.g., the Mayor's Office, the City Attorney's Office, Parks and Recreation). The EMT is facilitated by the CAO via the Homelessness Administrator.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *1. The EMT aims to execute duties assigned to their respective departments for the completion of interventions (Health and Safety) prescribed in the 2020 Encampment Management Policy (Health and Hygiene, Deep Cleanings, Partial Closure, and Closure); 2. To channel unsheltered individuals in every encampment to human services, emergency shelter and long term permanent supportive housing; 3. To effectuate the completion of the Encampment Management Policy interventions, each department may promulgate additional specific procedures necessary to effectuate the roles described in this policy under development specific Standard Operating Procedures.*

Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with the Homelessness Advisory Commission.

The City will increase opportunities for leadership and input from people experiencing homelessness in the design, implementation, and evaluation of encampment management and services that respond to unsheltered homelessness. The City will also seek to build trust between law enforcement, social workers, and homeless individuals/families and promote mentorship opportunities for formerly homeless individuals and people recovering from addiction. Further, the City will refine encampment management policies and strategies using qualitative and quantitative data to assess the experience of encampment for BIPOC residents and will implement culturally-specific and anti-racist strategies to better meet the short-term needs of BIPOC unsheltered residents.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Review and make recommendations of existing and new proposals funding homelessness services funded by City of Oakland Measures Q and W.*

Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.

In FY 21-22 the City opened its first co-governed program site. Co-governance is an intervention model where unsheltered residents come to an agreement about how they will live together in a community setting of an encampment. This includes, but is not limited to, selecting site leadership, determining eligibility for participation, developing community expectations for behaviors and for staffing/running the site, holding each other accountable for the agreed upon expectations, and maintaining the health and safety of the community residents. A backbone agency (nonprofit/community-based agency) works alongside residents to support the residents in the design, leadership and operations of the site. The backbone agency is the contracting entity with the City/funder and holds ultimate

accountability for ensuring the safety and security of the site. The City, in partnership with unsheltered residents will continue to refine this model and to expand this model as new sites open.

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Homeless Housing Assistance and Prevention funds, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *Increase the number of interim housing sites which have people experiencing homelessness as partners in site design and operations.*

POLICY 4.3 PROMOTE TRANSITIONAL AND PERMANENT SUPPORTIVE, DEEPLY AFFORDABLE HOUSING FOR UNHOUSED COMMUNITIES

Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.

The City will secure and advocate for additional funding for building and operation of permanent supportive and deeply affordable housing for homeless households using a combination of State and federal sources, such as the State Homekey program, the federal HOME-ARP program, and funding from the local Oakland Housing Authority. The City will continue incorporating a preference for City-assisted affordable housing projects that include at least 20 percent of units for vulnerable populations, including but not limited to homeless individuals and families living at or below 20 percent of AMI; as well, the City will increase this homeless set-aside in future NOFAs should operating funding resource availability support the increase. The City will work with residents, service providers, and property owners to ensure adequate and transparent long-term plans for maintenance and service provision within new and existing permanent supportive housing. The City will also pursue the strategic acquisition of hotel, motel, and dorm facilities by and with nonprofit partners to house unsheltered residents. The City will further work to coordinate Oakland Housing Authority's award process with the City's Affordable Housing NOFA process and Homekey opportunities. The City will also work with the State and other partners to explore opportunities to expand the supply of extremely-low-income housing for residents that do not require supportive services.

Responsible Party: *Oakland Human Services Department; Oakland Department of Housing and Community Development; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funds*

Timeframe: *Ongoing, 2023-2031, as funding is available*

Objectives: *Secure funding to significantly increase construction and maintenance of permanent supportive and deeply affordable housing to match need for unhoused*

communities.

Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis.

The City will utilize statewide streamlining opportunities, such as categorical CEQA exemptions and Program EIRs, and revise the Planning Code to minimize the need for discretionary review with a ministerial option for projects that utilize objective design standards for approval. The City will also identify and eliminate roadblocks in the review of building permit applications to expedite and increase the production of modular developments and other quick-build shelter solutions on private land in Oakland. The City will also work with other public agencies, including Caltrans, to facilitate and streamline more flexible shelter solutions on public land. The City will ensure that smaller units used as permanent housing units are in compliance with the Building Code to mitigate fire and other public safety hazards.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Planning Code changes in 2023; ongoing, 2023-2031*

Objectives: *Significantly increase production of modular developments and other quick-build shelter solutions to match need for unhoused communities.*

Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing.

The City will amend the Planning Code to ensure that transitional housing and supportive housing projects are permitted equivalently to similar permanent residential uses in the appropriate zone.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of transitional and supportive housing.*

Action 4.3.4: Provide development standards for Low Barrier Navigation Centers.

Low Barrier Navigation Centers, pursuant to AB 101, are required to be permitted by right and without any discretionary approval. A Low Barrier Navigation Center is a "Housing First,"

low barrier, temporary, service-enriched shelter that helps homeless individuals and families to quickly obtain permanent housing. The City will amend the Planning Code to include a definition for "low barrier navigation centers" and ensure that such centers are permitted by right, pursuant to State law.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness.*

Goal 5. Promote Neighborhood Stability and Health

All Oakland residents deserve to live, work, play, and thrive in safe, affordable, healthy, and welcoming communities. In Oakland, this geography of opportunity and health-supporting neighborhoods has been inequitable, with low-income communities and communities of color more likely to live in neighborhoods overburdened by pollution, disinvestment, and other social and environmental injustices. Goals, policies, and actions in the Housing Action Plan can address environmental justice by protecting residential areas from harmful pollution impacts. Additionally, as the City prioritizes investments, infrastructure, building upon existing community assets, and resources to achieve environmental justice in disinvested areas, the Housing Action Plan seeks to ensure that existing residents can stay in their communities and benefit from these increased resources through opportunities for homeownership (see also Goals 1 and 3).

1. Reduce greenhouse gas emissions in the building sector through the promotion of sustainable design principles, energy efficiency, and smart growth principles into residential developments.

2. Encourage higher-density, infill, and mixed-use development near transit to reduce reliance on automobiles.

3. Promote adaptation strategies to improve neighborhood and community resilience to climate change in collaboration with local and regional partners.

4. Leverage State and federal resources to assist with the remediation of environmental constraints on potential housing sites.

5. Limit greater intensification of neighborhoods at very high risk of wildfires. Maintain parking and other regulations to facilitate evacuation when needed.

6. Promote an equitable distribution of housing, including affordable housing, throughout the community, while providing opportunities to those that want to remain in existing neighborhood to maintain local ties.

7. Ensure that programs support development of both rental and ownership opportunities for affordable and middle-income housing.

Homeownership confers a range of benefits – including greater certainty over housing costs, opportunity to stay in one's chosen neighborhood, ability to make changes to the living environment, privacy, and ability to build financial equity. In addition to tangible economic and other individual benefits, homeownership also brings substantial social benefits such as a stronger sense of place and belonging, improved community health and safety, and civic participation.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Oakland has historically experienced patterns of significant inequities – between the hills and the flatlands, west and east, and across race and income. Rising housing costs and displacement pressures continue to disproportionately burden the city's Black population and other people of color, even as historically Black neighborhoods continue to see disinvestment and relatively high rates of poverty – see Appendix D for further context. The City has made great strides to correct these patterns of discrimination—including through the establishment of the Department of Race and Equity to advance racial equity in 2016—but needs to expand its efforts to eliminate racial disparities and discriminatory housing practices. The City will take steps to correct historic and ongoing patterns of discrimination to create a fair and just city through the simultaneous actions of opening up exclusionary neighborhoods (see Policy 3.4) and focusing resources, funds, tenant protections, and support of existing community assets in disinvested neighborhoods and ethnic enclaves (see Goals 1, 2, and 3).

Further, Oakland has some of the lowest rates of homeownership among major Bay Area cities, rivaled only by San Francisco. About 60 percent of Oaklanders are renters, and with continuously rising housing costs, affordable homeownership remains out of reach for most Oaklanders. This is especially true for the city's working and middle classes, as traditionally blue-collar neighborhoods have become increasingly expensive in recent years. Homeownership is distributed unevenly by race and ethnicity – while most white households own their homes, the majority of BIPOC households are renters. American Indian or Alaska Native (70.8 percent), Hispanic or Latinx (69.4 percent), and Black or African American (67.8 percent) households are especially likely to be renters. See Appendices B and D for more information.

This goal aims to expand opportunities for homeownership, particularly for low-income communities and communities of color. Along with efforts in Goal 1 and Goal 2, increased affordable and middle-income homeownership opportunities will reduce displacement pressures, and keep Oaklanders in their homes, thereby protecting both individual families and the social fabric of Oakland's neighborhoods. First-time homebuyer programs can also expand access to historically exclusionary neighborhoods by giving prospective homeowners

the resources and tools they need to secure a home wherever they choose to live. Community land trusts and other models of maintaining permanently affordable housing, as outlined in Policy 3.5, also provide opportunities to increase rates of affordable homeownership.

As defined in the Oakland Municipal Code, in addition to safe, affordable, high-quality housing for all people, another determinant of equity is a healthy built and natural environment for all people that includes a mix of land uses that support jobs, housing, amenities and services, trees and forest canopy, and clean air, water, soil, and sediment. In Oakland, low-income communities and communities of color are more likely to suffer from environmental injustices such as disproportionate exposure to air pollution, toxics and hazardous facilities and substances, contaminated water, and other environmental hazards that have an impact on human health due to a history of systemic racism and social injustices that influence where these communities live. As the impacts of climate change become more severe, these communities are most likely to be impacted first and hardest. As the City adds more housing stock over the course of this Housing Element period, it is imperative that new development sustains a healthy environment by working to "reduce the unique or compounded health risks in disadvantaged communities" and is prepared for the heightened impacts of climate change, especially protecting those who are most at risk. As part of this goal, efforts to align affordable housing development with transit—such as through the State's Affordable Housing and Sustainable Communities program—and expand access to high opportunity neighborhoods and good jobs are integral to furthering environmental justice through housing.

POLICY 5.1 SUSTAIN AFFORDABLE FIRST-TIME HOMEOWNERSHIP INCENTIVES

Action 5.1.1: Provide first-time homebuyer programs.

When funding is available, the City has historically provided a number of first-time homebuyer programs – including the First Time Homebuyer Mortgage Assistance Program (MAP), the CalHome Program, and Oaktown Roots Affordable Homes. As funding becomes available—either through State or program-related income—the City will resume these programs. The City also provides first-time homebuyer workshops and promotes workshops hosted by a HUD-approved counseling agency. Although City-sponsored classes are currently suspended due to the COVID-19 pandemic and the absence of funding, the City continues to provide information for other local classes. When the public health emergency subsides, the City will continue to directly offer workshops. Finally, the City maintains a list of deed-restricted below market rate (BMR) homes for sale to assist potential buyer and will continue to maintain this list throughout the planning period. The City will collect data through the first-time homebuyer programs to understand the extent of homeownership need and to identify gaps in the programs. Over time the City has increased the income limits for its first-time homebuyer programs because of the increasing gap between housing prices and incomes. The City will assess the impacts of this approach and the extent to which it may reinforce rather than reverse racial disparities in ownership. Further, as part of Action 5.3.3, the City will engage in targeted outreach in partnership with community-based organizations and fair housing services providers to reach the most impacted communities – including Black and Latinx households.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Funds (CalHFA, HCD), Private Lenders, CFPB, GSFA, FHLB WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data as available*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.2: Expand access to low-cost financing for home purchase.

Through the first-time homebuyer programs described in Action 5.1.1, the City was able to issue 121 loans totaling approximately $6.8 million during the previous planning period. With appropriate funding, these low-cost financing options have been very effective in promoting affordable homeownership. The City will continue to seek funding for these programs and provide access to homebuyer resources related to other county, State, or federal level funding – including through the Consumer Financial Protection Bureau (CFPB), California Housing Finance Agency (CalHFA), Golden State Finance Authority (GSFA), Federal Home Loan Bank's (FHLB) WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Funds (CalHFA, HCD), Private Lenders, CFPB, GSFA, FHLB WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data as available*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

Oakland HCD has traditionally worked with Section 8 voucher holders as part of the first-time homebuyer programs. Further, the Oakland Housing Authority (OHA) offers the Homeownership Program to eligible residents – which permits participants to apply their housing subsidy towards a monthly mortgage payment. As funding and capacity permits, the OHA will continue to offer this program and expand eligibility criteria as feasible. Oakland

HCD will also continue to work with voucher holders through first time homebuyer programs. OHA will collect data on residents who make use of the Homeownership Program to understand program participants and existing gaps.

Responsible Party: *OHA; Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD, State Housing Funds (CalHFA, HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on OHA's Homeownership Program*

Objectives: *If funded at historic levels, the City expects to provide 30 low-income Section 8 voucher holders with down payment assistance.*

POLICY 5.2. PROMOTE RESILIENT AND SUSTAINABLE DEVELOPMENT

Action 5.2.1: Protect against smoke and wildfire.

As wildfires become more frequent, it is increasingly important to ensure safe and healthy indoor air quality. The City will require new development follow requirements for indoor air filtration, including the installation of MERV filters, as specified in the California Building Code, and will support property owners in retrofitting their homes to protect inhabitants from wildfire smoke, prioritizing retrofits in communities with disproportionate exposure to air pollution and substandard housing. To reduce the impacts of secondhand smoke, the City will explore amendments to the smoking pollution control ordinance to create smoke-free environments within multifamily housing properties. Further, the City will encourage the addition of clean air centers and resilience spaces within residential areas that can provide emergency services in the event of a wildfire.

Responsible Party: *Oakland Public Works Department; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly improve access to better indoor air quality to protect against smoke and wildfire through methods such as requiring installation of MERV filters in new developments and identifying additional clean air centers and resilience spaces within residential areas.*

Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

Expand and allow community-serving uses such as retail, restaurants, and personal services within areas that are primarily residential, and increase opportunities to add multi-family

housing in commercial areas that are well-served by transit. Encourage sustainable transportation choices and improve pedestrian activity with new housing development, potentially by reducing vehicular parking requirements in new development and/or requiring transit, cyclist, and pedestrian access design features. Work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. Ensure that new transit-oriented development is accompanied by tenant protection policies described in Policy 1.1.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2023 – 2025 and Ongoing*

Objectives: *Significantly increase infill, transit-oriented development and mixed-use development to meet housing need.*

Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.

The City will study options to provide financial assistance to property owners for the remediation of environmentally contaminated sites, such as former gas stations or auto mechanic shops, which are being developed for housing. Funding priority will go to sites with proposed affordable housing projects.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State of California's Equitable Community Revitalization Grant Program, United States Environmental Protection Agency Brownfields Grants program*

Timeframe: *Ongoing, 2023-2031 as funding is available*

Objectives: *As suitable funding is available, Oakland will study and/or remediate contaminated sites to the maximum feasible extent.*

Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.

The AHSC program, administered by the Strategic Growth Council and implemented by HCD, distributes Statewide Cap-and-Trade funding for affordable housing developments (new construction or renovation) and sustainable transportation infrastructure projects. Successfully implemented, the AHSC program transforms California cities into places where residents can get everywhere they want to go without having to drive. The City of Oakland will apply directly or support partners such as nonprofit and for-profit housing developers, transportation and transit agencies, and joint powers authorities to apply for AHSC grant funding.

Responsible Party: *Oakland Department of Housing and Community Development; DOT; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase affordable housing development through application for AHSC funding to meet housing need.*

Action 5.2.5: Encourage climate-resilient housing.

Consistent with the City's Equitable Climate Action Plan (ECAP) and Ordinance 13632 CMS, all newly constructed buildings in Oakland are prohibited from utilizing natural gas or connecting to natural gas infrastructure. The City will continue to support property owners in building electrification and seismic safety retrofits, prioritizing funding in frontline and disadvantaged communities. The City will work with organizations such as the U.S. Green Building Council to recognize net-zero energy projects with sustainable and resilient design, including passive design and energy- and water-efficient systems. The City will continue to require all projects that meet the Green Building Ordinance for Private Development thresholds comply with green building standards, exceeding CALGreen Standards, and will encourage and promote green features such as durable low-embodied carbon materials, green and cool roofs, electric vehicle charging stations, and others such features during the permitting and entitlements process. The City will continue to require green building certification under BuildItGreen.org's GreenPoint Rated or LEED Certification systems and give preference to projects scoring higher in the Green Point Checklist, or which meet or exceed LEED Gold level, in the NOFA scoring process. The City can promote and expand existing programs to provide education and incentives to property owners and residents who implement water conservation, energy conservation, waste reduction, and resilient landscaping measures. The City will ensure that new housing development within areas subject to flooding associated with sea level rise encourage placement of life safety, mechanical, and electrical systems above flood elevations (i.e., second story or higher). The City will also encourage the addition of community spaces within residential areas that can provide emergency services in the event of a natural disaster or power outage.

Responsible Party: *Oakland Public Works Department; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase construction of climate-resilient housing to meet housing need.*

Action 5.2.6: Consider adoption of a disaster reconstruction overlay zone.

The City will consider the adoption of a disaster reconstruction overlay zone to streamline reconstruction following a natural disaster.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *State and federal grants, as available*

Timeframe: *2023 - 2027*

Objectives: *Consider adopting a disaster reconstruction overlay zone to meet housing need in response to potential disasters.*

Action 5.2.7. Encourage new affordable housing in higher resource neighborhoods.

Affordable housing units, including both publicly-assisted housing and housing choice vouchers, tend to be concentrated in low resource and high segregation and poverty areas., while higher resource neighborhoods have avoided providing their share of affordable units through low-density zoning that has largely prevented development at the scale necessary for affordability. To expand where affordable housing units are located, including both publicly assisted housing and housing choice vouchers, the City will encourage further affordable development in higher resource neighborhoods In its annual competitions for the award of housing development funds, the City will continue to give preference to projects in areas which help advance desegregation and are located in neighborhoods with strong educational quality. Further efforts may include working with affordable developers to identify appropriate sites in high resource neighborhoods and providing direct outreach and resources to Section 8 voucher holders and landlords to find appropriate housing in higher resource areas (see also Action 3.3.2). Actions 3.2.1 and 3.4.1 will also help increase the availability of housing within higher resource neighborhoods.

However, while increasing affordable development in higher-resource neighborhoods is a State priority, it only represents one strategy towards increasing opportunity for historically disadvantaged residents. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to “higher-resource” areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. These neighborhoods are also often rich in transit and service resources tailored to community needs. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-

displacement efforts in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). These efforts are also described in Goal 1 and Goal 2. Oakland HCD's New Construction Notice of Funding Availability has recently been modified to balance scoring to between being in higher-resource and high performing schools (for family housing) with the goal of seeking to increase investment in areas of the City that have suffered from economic and infrastructural disinvestment, as well as prioritizing affordable housing in areas where low income residents are especially vulnerable to displacement pressures.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General fund, permit fees, other local, State, and federal funding sources as available*

Timeframe: O*ngoing, 2023-2031*

Objectives: *Oakland's residential dissimilarity index (which compares racial segregation across neighborhoods) will decrease by at least 10% by 2031.*

Action 5.2.8:

As noted previously, lower-income housing tends to be concentrated in lower resourced neighborhoods. The City will work to promote mixed-income developments to further reduce the geographic isolation of lower-income units and promote increase neighborhood investment in distressed areas. The City will encourage use of the State Density Bonus program, promote mixed-income development in specific plan areas, and access CalHFA bond recycling facility for mixed-income projects.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Significantly increase production of mixed-income housing and reduce income-based concentration to match housing need.*

Action 5.2.9: Provide accountability measures for housing programs, including annual monitoring.

The Housing Element is a living document that provides a roadmap for the next eight years. As such, the City will actively monitor activities undertaken to meet program objectives pursuant to Annual Progress Report requirements. To ensure accountability, the City will solicit annual feedback from the community to understand the effectiveness of individual programs.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Human Services Department; Oakland Economic & Workforce Development Department; Oakland Public Works Department; DOT*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Monitor and enforce Housing Element implementation to understand whether individual programs significantly improve Oakland housing conditions and address housing need.*

POLICY 5.3. PROTECT HOMEOWNERS AND TENANTS FROM DISCRIMINATION

Action 5.3.1: Provide fair housing services and outreach.

The City will continue to partner with fair housing service providers operating within Oakland. As most housing discrimination complaints are related to a disability bias, the City will work with fair housing providers to provide additional educational resources in a variety of languages to both tenants and landlords related to disability rights in housing. The City will publicize fair housing services on its website, in City Hall, and in all housing-related programming. The City will also seek additional State and federal funding to assist fair housing providers.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.2: Enact predatory lending protections.

Predatory lending practices are a major contributor to racially discriminatory housing patterns and were one of the major factors in the previous decade's foreclosure crisis. To curb these practices, the City will work with fair housing service providers to provide educational materials and workshops in a variety of languages to inform Oakland residents of best practices. The City will promote fair lending practices to ensure that low-income residents and residents of color have fair access to capital resources needed to acquire and maintain housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.

Oakland's Black and Latinx populations experience disproportionately high rates of cost burden and tend to live in neighborhoods with higher rates of overcrowding and other housing issues. The City will work with fair housing service providers to target outreach and programming to Black and Latinx Oaklanders, as well as neighborhoods experiencing high levels of housing issues. The City will regularly monitor housing issues like cost burden, overcrowding, code enforcement complaints, and substandard housing to understand where the highest need for services exists.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Fund, permit fees, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Oakland's residential dissimilarity index (which compares racial segregation across neighborhoods) will decrease by at least 10% by 2031.*

4.2 Quantified Objectives

State law requires that quantified objectives be established for new construction, rehabilitation, conservation, and preservation activities that will occur during the Housing Element cycle. Table 4-1 provides Oakland's quantified objectives by income category for the 2023-2031 planning period. New construction estimates include units in pipeline projects, projected accessory dwelling units (ADUs), and the minimum remaining RHNA capacity.

Table 4-1: City of Oakland 2023-2031 Quantified Objectives

Income Category	*New Construction*[1]			*Rehabilitation*[2]	*Conservation/Preservation*[3]
	Pipeline Project	*Projected ADUs*	*Remaining RHNA*		
Very-Low-Income[4]	2,176	890	4,422	-	-
Extremely-Low-Income[4]	1,088	445	2,211	-	-
Low-Income	2,388	890	1,035	751	258
Moderate-Income	364	198	4,564	-	-
Above-Moderate-Income	9,152	-	4,111	-	-
Total	14,080	12,020	4,089	-	-

1. New construction objectives represent the City's RHNA for the Sixth Cycle Housing Element update. Estimates include units from pipeline projects and projected accessory dwelling units (ADUs).
2. Estimates are derived from the City's 2020/2021 Consolidated Annual Performance and Evaluation Report.
3. Conservation/preservation estimates are based on the estimated number of assisted units that are at risk of conversion to market rate, as discussed in Appendix B.
4. The extremely-low-income housing need is assumed to be 50% of very-low-income housing need. Quantified objectives for very-low-income housing includes extremely-low-housing objectives.

OAKLAND 2045
GENERAL PLAN

Comments on draft Housing Element

Ronnie Spitzer [redacted]

Mon 6/13/2022 12:56 PM

To: General Plan <generalplan@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

To Whom it May Concern:

Thank you for this opportunity to comment on the draft Oakland Housing Element (HE) for the 2045 Oakland General Plan. The Housing Element is updated more frequently than the General Plan, having last been updated in 2015. This document is an excellent starting point. I have several comments for improvements.

Many terms used within the document require more precise definition. The document currently contains phrases which could be construed one way within the current context but might assume an entirely different meaning in the future. One such example is “missing middle”, which is in common usage within planning circles but might be considered “jargon” to the general public even now.

Most important, the Housing Element states the upcoming 2023-2031 RHNA allocation is already covered by the identified inventory of adequate sites within the EXISTING General Plan, even adding in a 15% buffer. No further changes should be required. Therefore, the main purpose of this document might be to incorporate the Housing Action Plan goals listed on page 11, although that point is not clearly described in the document. This should be made explicit throughout the document. Likewise, upzoning around transit stations and along transit corridors is not required to meet 2023-2031 RHNA goals. A justification within the context of RHNA goals should be made to support statements such as, “Some initial amendments to the Land Use Element and Planning and Zoning Code along with initial zoning map changes will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing on page 14. Is this change proposed on general principles, to meet and equity goad, to encourage a more diverse mixture of housing, or some other reason?

High resource areas (“high resource” itself should be precisely defined and the locations identified within the draft Element) are discussed in several places within this document. What exactly are the goals for the high resource areas; is it the exact RHNA housing mix goal or something else? Implementation of the Housing Action Plan broadly in the City’s high resource areas requires an understanding of the barriers to development there, is not cohesively described in one location within the draft.

Based on studies, the largest barrier to housing production in an area such as Rockridge is the high land cost. Development of any housing other than market-rate housing is difficult to pencil out. This needs to be explicitly discussed in the HE and policies proposed to overcome this difficulty. One option proposed in the HE is an affordable housing overlay. It should be specific to each area within the City, and take into account local conditions.

Another point regards tenant and anti-displacement protections explicitly removing properties with existing units from further development to avoid displacement. Those policies look very different in higher resource areas than low ones, and would require the development of vacant parcels in Rockridge. As mentioned earlier in this comment, those are few and far between. For example, much of College Ave, Claremont and portions of Upper Broadway, i.e. the arterials, already include the types of housing proposed in the HE. How those housing goals can be accomplished should be explicitly described.

Regards,

Ronnie Spitzer

[By email]

June 13, 2022

Dear Planning Bureau staff:

Thank you very much for the opportunity to comment on the 2023 - 2029 Oakland General Plan Housing Element Update.

As a statement of general principles, the Rockridge Community Planning Council (RCPC) wants to acknowledge that the State of California is experiencing a housing crisis of historic proportions and that Oakland as a City and Rockridge as a neighborhood within the City must do their parts to ease this crisis. Furthermore, as a "high resource" neighborhood with some of the highest housing prices in the entire region, we believe it is incumbent upon us to lead by example in advocating for more housing development within our borders. We believe that welcoming significant numbers of new residents to Rockridge would be entirely consistent with our values and the cherished historically diverse character of our neighborhood.

Please find our specific comments on a few portions of the draft Housing Element below:

Housing Sites Inventory

First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses.

While some infill and densification is likely to occur organically in Rockridge's lower density residential neighborhoods, we believe the most important opportunities exist on a handful of larger sites within the neighborhood. The maps and tables in the draft are a little difficult to

navigate, but we believe we can see the following sites identified on Figure 3-1: Housing Sites Inventory:

- CCA Site
- Rockridge BART Site
- Triangular site at the corner of Claremont and College
- A portion of the Dreyer's Ice Cream site
- Wendy's site at College and Broadway

We agree with the inclusion of these sites on the inventory but believe several other important potential housing development sites have been left out, including:

- Ridge site at Broadway and Pleasant Hill (already discussed above)
- Carpet store site at College and Kales
- Dialysis Center site at Claremont and Clifton
- DMV Site at Claremont and Cavour
- Chevron Station Site at Telegraph near highway 24

The omission of these sites or others yet to be identified in Rockridge contradicts a key narrative discussed in the Housing Action Plan beginning on page 60 to affirmatively further fair housing goals. The section reads: *"The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive."*

We are aware that some of the sites on the second list above may have been omitted from the Inventory by staff because of technical guidelines governing what sorts of sites are eligible for inclusion. However, we feel strongly that we should err on the side of inclusivity due to the seriousness of the housing crisis. We would welcome an opportunity to discuss these criteria further with Planning Department staff.

Housing Action Plan:

<u>Five Overarching Goals</u>

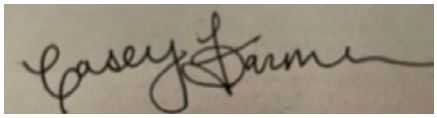
The first paragraph of the narrative on page 59 under Goal #3 <u>"Expand Affordable Housing Opportunities"</u> discusses the importance of the general production of housing and asserts that "thoughtfully adding housing at every level can reduce market competition for existing homes…." before going on to point out the overarching importance of making a concerted effort to increase production of homes that are affordable to very-low, low and moderate income households. We agree with these sentiments but feel that the headline "Expand Affordable Housing Opportunities" is not descriptive of the Element's stated policy goals. We recommend the headline be amended to read something like "<u>Expand Housing Opportunities at All Income Levels, With a Very Strong Emphasis on Affordable Housing.</u>"

Policy 3.2: Create a More Diverse Mix of Homes to Meet Community Needs

This policy would be implemented in part by zoning amendments to permit more "missing middle" type small scale multi-unit housing in low density zoning districts like those found in most of Rockridge. Our own economic studies have shown that similar to SB 9 which is already in effect, these regulatory changes will result in only a small amount of change in Rockridge, where very high land values mean that demolition of most existing houses is unlikely. However, we are supportive of these policy changes for both our own neighborhood and the City as a whole. If feasible, we would like to see these zoning amendments incentivize family, senior and disabled – friendly units.

This policy would also be implemented by actions taken by the City to reduce regulatory constraints to the development of ADUs and also to help older or lower-income homeowners develop ADUs. We are very supportive of these efforts and feel that they could help bring a modest number of moderately affordable units to Rockridge.

Policy 3.3: Expand Resources for the Construction of Affordable Homes



We are broadly supportive of the intent and implementation ideas contained in this section, recognizing that while it is important to add housing at all affordability levels, by far the greatest need is for affordable units. We also recognize that construction of affordable housing is unfortunately very expensive and there is a need to find more resources and innovative ways to pay for this.

In particular, we are intrigued by the concept of an "affordable housing overlay" outlined in action 3.3.5. We would be interested in exploring this idea along College Avenue as well as on some or all of the opportunity sites discussed above.

Lastly, we think there is a role to play for measures that don't involve new construction, such as discouraging holding of units off the rental market and condo conversions. In addition, the City should look at amending the CN-1 zoning to prohibit conversions of upper floor residential units to non-residential uses.

We look forward to continuing to participate in the Housing Element process and thank you for your considerable work on creating a vision for inclusive neighborhoods throughout Oakland.

Very truly yours,

Casey Farmer, Board Chair, Rockridge Community Planning Council

Ken Rich, Land Use Committee Chair, Rockridge Community Planning Council

Subject: Housing Element

Dear Ms. Rajagopalan, Ms. Lieberworth, and General Plan Team,

The draft Housing Element is a very impressive and complex document. We are pleased that several of our previous recommendations are reflected in the draft.

Some of the upzoning proposals could adversely affect historic properties, but they are presented very generally in the draft with the intent of being fleshed out as part of the upcoming zoning amendments and objective design review standards. We therefore are considering these implementing documents as the appropriate vehicles for evaluating the impact of housing element proposals on historic properties and look forward to opportunities for early input on these documents.

It is good that "landmarks/historic properties" are included among the constraints considered in Figure C-6 regarding Supplemental Housing Sites for AFFH. However, Figure C-6 does not include Areas of Secondary Importance (ASIs) as defined in the Historic Preservation Element and Oakland Cultural Heritage Survey. We therefore request that ASIs be reflected in Figure C-6 and that the housing element and follow up zoning amendments and objective design review standards be structured to avoid adverse impacts on ASIs as well as other historic properties.

Thank you for the opportunity to comment.

Sincerely,

Mary Harper

Dear Audry,

The opportunity to comment on the Draft Housing Element is appreciated. My architectural firm has designed hundreds of dwelling units; including for sale, for rent, subsidized/affordable, ordinary market rate, and luxury market. My comments are rather general, but address gaps that I perceive in the Draft. These comments are from me as an individual. I have also contributed to discussion of the Draft with community groups, including RCPC, Upper Broadway Advocates and Oakland Heritage Alliance.

Affordable housing is housing very hard to find for low income families. The Housing Element should promote the construction of more affordable/subsidized units that will accommodate families, as well as families that can afford to occupy market rate housing. I'd say a family is a group of more than three related individuals, possibly including multiple generations and generally including children, or we can simply say a related group that needs three bedrooms. There are legal definitions. It's easier and more lucrative to build studio, or one or two bedroom units. Many (most?) landlords would rather rent to adults only, as the wear and tear on the unit will probably be less, and these people are more likely to move out, and not stay for a longtime. In addition to that, there is likely to be a loss of family-sized dwellings, as existing single family houses are divided into apartments, or demolished to make way for multi-unit structures with small units. It would be negligent of the City to ignore the possibility of significant demographic changes related to the Housing Element. Until such potential changes are examined it cannot be determined if they are good or not, or consistent with the goals of the City. It is important that the Housing Element include language to help promote housing for families. This means numbers of people housed, not numbers of units.

When the draft talks about 'opportunity sites' it seems to only look at large parcels that could hold many units, of which there are relatively few in most neighborhoods. These are often owned by entities that have no interest in building housing. I would like the Element to look at our boulevards and arterial streets as 'opportunity sites' that could yield a large number of units. There are about fifty miles of such streets, with thousands of small parcels. The element should look at how to promote development of the smaller (up to

five story) multi-unit buildings along the street that are already zoned for it. This would be a more 'organic' sort of growth that could be more 'Oaklandish' and neighborhood-friendly than the huge boxes most developers want to build. The city should encourage 'mom and pop' local development done by local people who own small parcels. The Housing Element should look at how the City can facilitate such development, instead of devoting so much effort to helping corporations build big lucrative projects.

Home ownership has many benefits for individuals and cities. The Element should address the importance of home ownership.
People who are literally invested in Oakland are most likely to be involved in and contributing to the community over time, which is good for all. The City should promote home ownership, and facilitate projects that allow for it. This could include requiring that projects include for sale units, possibly with developer-subsidized down payments or financing assistance. Such a policy would be a contrast to historic institutional exclusionary practice.

To what extent is planning considering the effects of lots of new development on the character and quality of life for Oakland citizens. present and future. I have seen the negative effects of 'redevelopment ' in Oakland in person. The Draft does not seem to include much on possible widespread cumulative negative impacts on cultural and natural resources. In the denser more crowded Oakland will the increase in housing result in diminishing the quality of and access to other things cities need. Will there be a commensurate increase of parks and open space, or libraries. or accessibility to historic sites and districts, or their expansion. Our present citizens care about these things. To what extent shall we socialize the risk of the loss or diminishment of such things, while the economic benefit of development remains private? Meeting a state quota for housing is a bureaucratic legal goal - but it cannot be a lived reality

Sincerely,

Kirk Peterson

Re: 2023 - 2031 Housing Element Update

Dear Audrey Lieberworth and Lakshmi Rajagp lan:

Thank you for the op rtni ty to review the draft 2023- 0 Hos ing Element that was released in May 2022. BART supr ts the ga ls and pl icies included in the draft 2023- 0 Hos ing Element, and we look forward to partnering with the City to achieve the following ga ls and policies.

Goal 3. Expand Affordable Housing Opportunities
Policy 3.1 Facilitate Production of Deeply Affordable Housing
Policy 3.2 Create A More Diverse Mix of Homes to Meet Community Needs
Policy 3.3 Expand Resources for The Construction of Affordable Homes
Policy 3.4. Reform Zoning and Land Use to Address Community Priorities
Goal 4. Address Homelessness and Expand Services for the Unhoused
Goal 5. Promote Neighborhood Stability and Health
Policy 5.2. Promote Resilient and Sustainable Development
Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

We also appreciate the City of Oakland's (City) interest in incld ng BART's land in its 2023- Hos ing Element, as shown in Ap nd x C: Sites Inventory of the draft Hos ing Element. As the City is aware, *BART's Transit-Oriented Development Program Work Plan* currently does not categorize all of the BART prop rties that are listed in Ap nd x C: Sites Inv ntory as 'Near-term (project initiation in 2020-2025)'.

It is on collective ga l to d liver as much hos ing near transit as ps sible, and BART wol d like to supr t local jurisd ctions to achieve the Bay Area's reg onal hos ing g als. However, BART has limited staffing reso ces and few fnd ngs o ces for the infrastructure - most notably p rking e p acement - that is often required to free-p sp ce on BART's land for d velop ent. Given current reso ces, it will be challeng ng for BART to support d velop ent of all the land that has been p anned for inclusion in BART partner jurisdictions' Hos ing Elements during the 2023- upcoming cycle.

In addition, several BART properties that are listed in Appendix C: Sites Inventory are not suitable for development due to proximity to BART infrastructure and associated structural issues. Please see attached for a detailed analysis of each of BART properties.

Delivering TOD projects on BART's land is much more complex and time consuming than development projects on private land and requires strong partnerships and commitment between BART and local jurisdictions. As noted in the previous letter issued on March 7, 2022, BART's *TOD Work Plan* prioritizes development in its station areas based on the following three criteria:

1. Market readiness for TOD
2. Local support for TOD
3. Infrastructure needs

If conditions have changed since the last assessment in 2019/2020, the timeframe for TOD development in station areas can be updated in BART's *TOD Work Plan*. Key considerations by BART for prioritizing development projects are 1) availability of local funding and resources to support development, including staff support and funding for community outreach, affordable housing, and infrastructure, and 2) seamless coordination with local jurisdiction staff.

Jurisdictions with station areas that are currently listed in BART's TOD Work Plan timeframes of Mid-term or Long-term need to meet the following conditions to be considered for prioritization:

1. **Local Support and Funding**: First and foremost, we see TOD projects on our property not as solely a BART project, but a BART/local jurisdiction-partnership. BART TOD projects are civic destinations, and transformative to the community, often including off-site improvements. The City must be committed to working closely with BART to find funds and resources to facilitate community outreach, discussions, and decisions on TOD development and area-wide parking. It takes several years of pre-development work prior to issuance of a RFP for developers, so any development of BART land within the planning period of 2023-2031 must dedicate sufficient BART and City staff time to advance a TOD project within a reasonable timeframe.

2. **Prohousing Designation**: BART will prioritize projects in jurisdictions that are pursuing a Prohousing Designation by California Department of Housing and Community Development. We may advance housing development on BART's property located within a Prohousing Designation even if other conditions have not yet been met.

3. **Station Access and Parking Strategies**: Maintaining access to the station is important for the City and region. BART will work with City staff and developers to develop and implement a Station Access Plan that identifies potential improvement projects to enhance pedestrian, bicycle, transit, and vehicular access. The City should plan for and implement a locally led parking resource assessment and management plan for at least ¼-mile radius around the station area. It should identify parking opportunities for BART riders that would minimize the number of spaces to be included in the TOD project and address spillover concerns by neighbors. BART staff will work with the jurisdiction to provide support and guidance as needed but will not be able to lead the development and implementation of a parking management plan.

4. **Environmental Studies**: The City shou d ensure that enir ronmental std es associated with the 2023-0 Hos ing Element assume a minimum d nsity of 75 dwelling units per acre for BART's land that is likely to be d velop dw ithin the p anningp riod

5. **BART Policies and Standards**: Any develop ent on BART's land is subject to BART's review procedures and approvals and shall follow relevant guid lines, pl icies, and regulations. The jurisd ction shou d commit to spr t and meet BART's policies and stand rd . Most of these policies and are summarized on ou TOD Guid lines and Procedures webpage.

We look forward to bu lding ou p rtnerships with the City of Oakland to realize ou shared g al of increasing the amou t of hos ing near transit. Please contact us to further ou conr rsation on advancingT OD p ojects on BART's land

Sincerely,

Val Menotti

Val Josep M enotti
Chief Planning& Development Officer

Attachment: Review of Ap nid x C: Sites Inr ntory of Draft 2 0 Hos ingE lement

Review of Appendix C: Sites Inventory of Draft 2023- 2031 Housing Element

Date: June 13, 2022

Station Location	APN	BART's Support to include in the 2023 - 2031 HE	Reason
19th Street	008-0649-011-00	No	Structural challenges
12th Street	001-0131-008-01	No	BART ROW with tracks. Financially challenging. Categorized as a Long Term site in BART's TOD Plan
19th Street	008-0660-052-03	Yes with conditions	Categorized as a Mid Term site in BART's TOD Plan
Coliseum	041-4164-024-03 041-4164-031-02 041-4162-001-05	Yes with conditions	Categorized as a Mid Term site in BART's TOD Plan
Fruitvale	025-0692-006-00	Yes with conditions	Categorized as a Mid Term site in BART's TOD Plan

Oakland, CA 94612

RE: Comments on Draft Housing Element for 2023-2031

Dear General Plan Update Team:

Thank you for the opportunity to comment on the draft Housing Element. We appreciate all the work that has gone into producing this document, and we offer our comments with the hope that the City will incorporate them to produce a final document that moves the City in the direction of significant progress to achieve housing justice and meet our current and future housing needs.

EBHO is a member-driven organization working to preserve, protect, and create affordable housing opportunities for low-income communities in the East Bay by educating, advocating, organizing, and building coalitions.

Our comments are organized into the following five areas:

- Public Outreach and Participation
- Evaluation of Past Performance
- Affirmatively Furthering Fair Housing
- Site Inventory
- Action Plan

While we are submitting these comments to meet the City's deadline for its 30-day public comment period and allow the City time to review and respond to these comments in its submission to HCD, we intend to continue reviewing and commenting on the document during HCD's 90-day review period.

Public Outreach and Participation

The City's public outreach for the 6th Cycle Housing Element Update has been commendable and the City has done far more outreach than in past cycles, with a particular effort to reach out to marginalized and previously excluded communities. The City held numerous stakeholder sessions, community workshops, pop-up events and other efforts, and solicited a large number of comments. We look forward to seeing many of those comments and suggestions included in the next draft of the Housing Element.

We were disappointed, however, with the manner in which the Draft Housing Element was released for public review and comment and the way in which it was presented to the Planning Commission, City Council Community and Economic Development Committee, and others:

- The draft document, which runs to more than 800 pages including all its appendices, contains no executive summary or other guide. At a minimum, both the draft and final document should include a summary narrative that outlines the key findings of the evaluation of past performance, the results of the Fair Housing Assessment including identification of the most important underlying factors to be addressed, the identified governmental and non-governmental constrains to housing, a summary of the site inventory that quantifies and maps key issues such as the geographic distribution or concentration of sites – particularly those for lower income households, and key elements of the action plan including a listing that highlights new programs and policies.

- The presentation of the draft Housing Element to both Planning Commission and City Council was subsumed within a much larger information report on the overall update of the City's General Plan. As such it wasn't clear from the lengthy title of the agenda item that this was the opportunity to provide comments on the Housing Element. At those meetings, the presentation focused on the update process but did not include any information on the actual content of the document. It wasn't until we commented on this that a summary presentation was finally made available halfway through the public comment period. We do note that the Planning Commission scheduled a subsequent meeting to review the draft in more detail.

Evaluation of Past Performance

As noted in Appendix A, performance in meeting the RHNA goals of the 5th Cycle Housing Element has been mixed. From 2015 through 2021 (7 years out of the 8-year planning period), the City has issued permits for more units than its total RHNA. However, as the Draft notes, this has been disproportionately concentrated in the Above-Moderate Income category, where the City has already issued permits for nearly 200% of its RHNA, while falling far short for Very Low, Low and Moderate Income. The result has been a "housing balance ratio" of one unit of lower income (VLI + LI) housing for every eight units of Above Moderate-Income housing, despite a RHNA goal of one unit of lower income housing for every 1.9 units of Above Moderate-Income housing.

Oakland has long passed the point where it needs to make special efforts to attract market-rate development. Over the 3rd and 4th housing element cycles (1999-2014), Oakland permitted an average of just under 700 units per year, rarely exceeding 1,000 in a year, and of which 73% were Above Moderate Income. In the current cycle, the average has been 2,400 permits per year, with only two years below 1,000, of which 88% were Above Moderate Income.

In light of this record, the evaluation of past performance should take a harder look at the reasons for this disproportionality. In particular, the City should assess the need for continuing to

incentivize production of market-rate housing without conditioning such incentives on production of affordable units or payments of appropriate fees to the Affordable Housing Trust Fund, particularly since the 6th cycle RHNA requires not only a much greater number of units, but also a higher proportion of lower income units.

The evaluation needs to not just provide data on past performance, it should include analysis of what is working and what is not, the reasons for this performance, and a serious consideration of which programs need to be discontinued or seriously modified.

Affimatively Furthering Fair Housing

Despite having completed a Fair Housing Assessment in Appendix D, there still appears to be a disconnect between this assessment and the housing element itself. In the Introduction chapter, the City refers to "an affirmatively furthering fair housing analysis (AFFH), which guides the analysis of each set of requirements." Similarly, Appendix D is labeled as the "Affirmatively Furthering Fair Housing Draft" but is primarily a fair housing analysis. The new statutory requirement to affirmatively further fair housing requires more than an analysis of fair housing issues. The analysis must identify and prioritize the key factors contributing to segregation and disparities in housing opportunity and conditions, and then the City must develop both the site inventory and the action plan in ways that address these factors, along with clear metrics for determining whether those actions result in real improvements. It is not enough to determine after the fact whether an AFFH-neutral selection process results in non-discriminatory outcomes. The requirement to affirmatively further fair housing must fully inform the site inventory and action plan. We encourage the City to review HCD's April 2020 AFFH Memo (AB 686 Summary of Requirements in Housing Law) and its April 2021 AFFH Guidance, which includes detailed explanations of specific requirements for housing elements, to ensure it is fully meeting these requirements

Among the issues we have identified are the following:

- The Fair Housing analysis does not consider whether the City's zoning contributes to enduring patterns of racial segregation. The word "zoning" barely appears in the analysis, and while the Draft Housing Element notes that most of the City's residentially zoned land is zoned for single-family housing, this is not related back to patterns of racial segregation. Not surprisingly, in the absence of such an analysis, the City conducted its site inventory with the aim of meeting its RHNA numbers without having to rezone any sites. The Housing Element should include an analysis of the extent to which existing zoning is a barrier and a set of strategies to overcome this barrier through strategic rezoning.

- Table D-9 provides a brief summary of fair housing issues, contributing factors and proposed actions, but the proposed actions are fairly general and not tied back to the action plan. We recommend that Table D-9 be revised to explicitly cross-reference specific actions described in the action plan itself.

- Table D-9 notes as one issue that "Affordable housing is limited by location and housing type," but there's little examination of the reasons for this. The table recommends that this be addressed primarily through mobility strategies including expanded use of Housing Choice Vouchers but fails to note that in many of the higher opportunity areas, rents are far higher than what's allowed for with the Housing Choice Voucher payment standards. While there is a vague call to "eliminate single-family zoning," it's unclear if this refers to allowing 2-4 units buildings in single-family zones, or if it means expanding multifamily zoning at densities of 30 du/acre or greater. Finally, while it is proposed that affordable housing be increased in high opportunity areas, there's no specific program referenced here by which this might be achieved, particularly given the limited number of lower income sites identified in high opportunity areas.

Site Inventory

The proposed site inventory raises a number of concerns for us, with respect to how the information is provided, how the sites were selected, and whether the inventory adequately addresses the requirement to affirmatively further fair housing:

- The site map is at a scale that makes it difficult to adequately see whether these is an equitable geographic distribution of sites, particularly sites for lower income housing. The City should provide a series of maps for each planning area or council district in addition to a single citywide map.

- The site maps should be overlaid on maps of key demographic indicators, particularly racial concentrations and concentrations of high- and low-income households. It would be especially useful to map sites against areas of concentration of white residents vs concentrations of people of color.

- The City recently provided links to an interactive GIS map. This map would also benefit from additional layers showing key demographic indicators including race and income. Sites should be color coded for income level (lower income, moderate income, above moderate income). Rather than shading the parcels, which at best indicates the relative size of parcels, sites should be indicate with dots of different sizes representing the number of units that can be accommodated on the site.

- The Excel table for the site inventory has modified the total capacity column and eliminated the formula that is in the State's template spreadsheet and replaced it with actual numbers. The result is that in a number of places the entry for "total capacity" does not equal the sum of the columns for lower, moderate and above-moderate income capacity. This should be corrected, since at present the sum of the total capacity column exceeds the sum of the individual columns.

- The inventory should provide more detail on the current use of non-vacant sites. In particular, while the inventory identifies whether non-vacant sites have office, commercial, or other uses, it does not distinguish between sites with active uses and those with vacant buildings. That information is needed to assess the likelihood that a site will become available during the planning period.

- The projection that roughly 90% of all new ADUs will be affordable to lower income households is significantly different from the regional ADU affordability distribution provided by ABAG (see Appendix C, page 25). The City has relied on a limited (and not necessarily representative) survey that was conducted as part of a City-commissioned report. Data on ADU rental rates is based on just 56 responses to this question. It indicated that the average rent for an existing ADU is $1,112. However, one third of the responses indicated that their ADUs were being occupied rent free. As these units are likely being provided to family members, without further data it cannot be assumed that these units are available to and occupied by low-income households. The calculation of average rents should remove the zero rent units from the calculation.

  Further evidence that the $1,112 figure is unlikely to apply to newly created ADUs is contained in this same City-commissioned report. That study includes model pro-formas for several ADU development scenarios and uses rents that range between $2,360 and $3,029 per month. The City should re-evaluate its projections of affordability level for newly created ADUs and revise the site inventory accordingly.

- There is little discussion or analysis of how the inventory does or doesn't change patterns of segregation. Table C-19 on page C-83 shows that for the preliminary site inventory, 26.1% of lower income capacity is located in moderate to highest resource tracts, while 36.4% of above moderate-income capacity is located in these tracts. On its face this does not appear to further fair housing. While the City has provided additional AFFH sites, it has not indicated the extent to which those supplemental sites would offset the disparity described above.

- The geographic distribution of sites is not surprising in light of the City's decision to focus only on opportunity sites that require no rezoning, and to rule out in advance any rezoning of low-density areas to accommodate some of the lower income portion of the RHNA. While the City proposes, outside of the site inventory, to consider some future rezoning, the areas that will be studied are not identified and it appears that the focus will be more on accommodating "missing middle" housing types that cannot be assumed necessarily to be affordable to lower income households.

- The City explains the relatively small proportion of lower income sites in high and moderate resource areas by noting that significant portions of these areas are also very high fire hazard or seismic hazard areas, which are located primarily in the most affluent portions of the city with the greatest degree of racial segregation. At the same time, other hazards such as industrial pollution, poor air quality, or sea level rise, were not

considered disqualifying. The result is a set of criteria that by definition rule out the majority of high opportunity areas and areas of concentration of affluence and white population.

- The City justifies concentration of affordable housing in lower opportunity areas as a strategy of investment in these areas to prevent displacement. However, State guidance is clear that this needs to be coupled with place-based community development strategies that involve investments not only in housing, but also in enhanced infrastructure, services, schools, jobs, and other community needs that serve the existing population in at-risk neighborhoods. While the Draft Housing Element makes reference to the need for such investments, it does not provide adequate detail on specific programs, strategies or non-housing investments to be pursued, the anticipated outcomes, or any metrics for determining if such programs are effective in stabilizing at-risk communities.

Action Plan

We are not able to provide detailed comment on each and every policy and action at this time. Additional and more detailed comments on the Action Plan may be submitted during the HCD review period. We do want to call attention to the following:

- Much of the Action Plan consists of continuation of policies and programs already in place. Since it's clear that existing policies have resulted in over-production of market-rate housing and under-production of lower income housing, the City must consider how existing programs can be recalibrated to produce better results.

- Where new programs are mentioned, they are generally described with terms such as "consider," "study", or "evaluate". These are not actions in themselves. HCD has been clear in its guidance and in reviews of draft housing elements in other regions that these kinds of general statements are not sufficient. In its review of Los Angeles' Draft Housing Element, HCD clearly stated:

  > Programs must commit to completing an action that will have an actual impact on housing such as "amend," "revise," or "establish"

  While we would like to see the Housing Element itself be the vehicle for new housing policies, where this is not possible then *at a minimum the Housing Element should commit to bringing concrete legislation before the City Council for adoption by a specific date*. Moreover, these dates should be in the first few years of the housing element. Postponing these studies to the later years means that many of these new programs, if implemented at all, will have limited impact in the housing element cycle.

  This is not a new issue. There are a number of policies and programs that the City has pledged to "consider" for multiple housing element cycles without ever having a full

policy discussion and proposed legislation before the City Council. For this update, the City should commit to move beyond this.

- In many cases the time frames are vague. Specific milestones and deadlines for completion should be called out.

- There is no clear prioritization of the many actions contained in the Action Plan. Which actions are most important to achievement of the City's goals and objectives? For the many new programs and policies that the City will "consider" or "study," which are the most important and what resources will be available to ensure that they are completed in a timely fashion?

- Anticipated outcomes and metrics are insufficient. Many of the action items have no quantified objectives and it is unclear what outcomes are anticipated or how the effectiveness of these actions, particularly in addressing fair housing issues, will be assessed.

- While the Action Plan discusses how the City's major goals address AFFH, it doesn't clearly identify specific actions that address priority factors for AFFH. HCD's guidance on affirmatively furthering fair housing is clear that jurisdictions must identify underlying factors that create and maintain segregations and inequitable opportunities and outcomes, and then select a number of factors that are the highest priority and ensure that the site inventory and action plan are clearly related back to these priority factors.

- The City should not take actions that incentivize market-rate housing without requiring affordability in return. In the past, many policies that could be used to incentivize affordable housing have been implemented across the board without any affordability requirements, leaving the City with limited options for incentives specifically to produce affordable housing. After two decades of significant above-moderate income housing production dating back to the "10K" plan, it's clear that such incentives are no longer needed. Rather than continuing to "expand housing for all economic levels" the housing element action plan needs to focus on the most deficient areas and therefore must prioritize actions that will improve performance in creating and preserving housing for the lowest income individuals, including persons who are currently unhoused.

We offer specific comments on the following action items:

Action 2.2.5 The City should provide a specific date for adopting SB 330 anti-demolition protections. Since this is a matter of bringing the City's code into compliance this should be implemented by the end of 2023 at the latest, including extending it beyond SB 330's sunset date.

Action 2.2.6 We strongly support efforts to reduce speculation in housing through both a speculation tax and adoption of Tenant Opportunity to Purchase Act/Community Opportunity to Purchase Act (TOPA/COPA) legislation.

Action 2.2.8. In place of vague action to study a possible TOPA/COPA policy, the City should commit to bringing a TOPA/COPA ordinance before the City Council for adoption within the first year of the housing element.

Action 3.3.1 Any strategy regarding use of public land should start with adoption of a public land disposition ordinance consistent with the policy framework adopted by the City Council in December 2018. If the City is now proposing to abandon that framework and take a different approach, that should be clearly stated and presented to the City Council as a change in adopted policy.

Action 3.3.3 This action speaks primarily to provision of rental assistance but includes as part of its objective the statement that "100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle." This statement should be included in action 1.1.5, which currently contains no actual commitment.

Action 3.3.5 We strongly support an Affordable Housing overlay that provides by-right approval of 100% affordable housing projects citywide, wherever zoning currently permits it. We also support identifying specific incentives and bonuses that could be part of such an overlay, but that process should not delay the immediate adoption and implementation of a by-right overlay.

Action 3.3.8 We support revision of the Affordable Housing and Jobs/Housing Impact Fee programs, with particular attention to the amount and timing of the fee and recalibration of the on-site alternative compliance option to provide an outcome (number and affordability of units) comparable to what would be achieved through investment of the fee in affordable housing. This analysis was supposed to have been completed by the end of 2021 for presentation to the City Council in early 2022 and was to involve community participation throughout the process and not just in response to a completed study. This has not been the case. The City should commit to a firm date for revision of these ordinances, and should ensure that all evaluations and assessments include meaningful community involvement.

Action 3.3.9 We support deferral or reduction of planning and building fees to increase the feasibility and reduce the cost of producing affordable housing. In particular, we support deferring or reducing building permit fees. For City-financed affordable housing, fee payments could be deferred until a certificate of occupancy is issued, as the City has ample leverage to ensure that those fees will be paid.

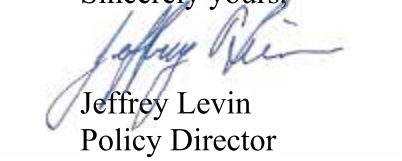
Action 3.3.10 We support the creation of a Citywide Enhanced Infrastructure Financing District (EIFD) with a primary goal of providing additional funding resources for affordable housing.

Action 3.3.12 We support continuation of the Acquisition and Conversion to Affordable Housing (ACAH) program, including support for community land trusts and limited equity cooperatives in addition to traditional nonprofit housing.

3.3.15: We support continuation of density bonus incentives, but call on the city to evaluate any barriers to a broader use of the density bonus program, including information on what developers have shared regarding how this program might be improved or expanded. His evaluation should also distinguish between use of density bonus for 100% affordable projects vs predominately market-rate projects.

Action 3.3.16 We support increasing the Real Estate Transfer Tax on higher end transactions including dedication of that increased revenue for programs that produce, preserve and protect affordable housing opportunities. We urge the City to move forward to place such an item on the November 2024 ballot to maximize the likelihood of passage.

Action 3.3.18 We strongly support extension of the Measure KK infrastructure and affordable housing bond, with a substantial increase in the share and amount devoted to housing production and preservation, at a scale that will make a significant impact on Oakland's pressing affordable housing needs. This is an urgent priority and should be implemented as rapidly as possible.



Action 3.4.10 For inventory sites that are carried over from previous housing element cycles, the City must commit to actually rezone those sites – perhaps through use of a zoning overlay – that provides for by-right approval on these sites if a minimum of 20 percent of the units will be affordable to lower-income households. Ideally this should be implemented as part of the Housing Element itself. If not, then the Housing Element must include a specific rezoning program for these sites.

Action 3.6.4 We support active encouragement of use of SB 35 to provide by-right approval for 100% affordable housing, including training and direction to Planning staff that this should be affirmatively pursued.

Action 5.2.8 We have substantial concerns that, given the limited targeting of high opportunity neighborhoods in the site inventory, a "mixed-income" strategy in areas of concentration may lead to more gentrification and displacement. The City must ensure that a better mix of incomes in a neighborhood is not simply capturing a point in time where a neighborhood transition is actually taking place. We note that despite acknowledging the need for place-based strategies to stabilize and improve low resource areas, these programs are not included in the Action Plan.

We again thank you for the opportunity to comment on this Draft Housing Element, and will continue to participate and comment throughout the update process. We look forward to your response to these comments as part of your submission of the Draft Housing Element to HCD.

Sincerely yours,

Jeffrey Levin
Policy Director

To: City of Oakland General Plan Update Team
From: West Oakland Community Action Plan (WOCAP) Steering Committee
Re: Draft Housing Element Comments related to Air Quality and Environmental Justice

This comment letter is submitted on behalf of the West Oakland Community Action Plan (WOCAP) Steering Committee - a group of residents, researchers/academics, public agencies, non-profits, and community institutions involved in the implementation of the WOCAP through the AB 617 process. WOCAP is co-managed by the Bay Area Air Quality Management District and the West Oakland Environmental Indicators Project. While our group cares deeply about ALL aspects of the housing element (preservation, affordability, community ownership, displacement prevention, etc.), this comment letter will primarily focus on policies related to air pollution exposure and mitigation. Because the online mapping tool did not have its full functionality until today, we will submit comments on the sites inventory in West Oakland at a future time.

The following is a list of comments and questions - some related to specific policies/actions and others are more general recommendations:

- ***Indoor air pollution:*** We are glad to see references to indoor air pollution remediation in the Housing Element, for existing homes. From an equity, resource and health perspective it makes sense to preserve existing housing wherever possible. We know that indoor air pollution is a significant health burden on Oakland residents, particularly heavy for people who suffer from other air pollution exposure burdens. We urge the City to add specifics about how it will undertake the objective of improving air pollution exposure and how that effort will be targeted. We suggest that the city commit to work with Alameda County Health Department, local hospitals, nonprofits and others to specifically target these efforts toward families with asthmatic children, for the purpose of reducing emergency room visits for treatment of asthma and other lung diseases. There was a program operating several years ago called “Pay for Success" that pioneered an approach to identify these families, coordinate housing improvement services and secure innovative forms of funding from health care providers. That program may have information or lessons that could help the City establish a larger effort.
- **Unintended consequences.**
    - Actions should be more explicit about steps to avoid inequitable and unintended consequences and steps to overcome access barriers (ex. many times do not have electrical systems that will accommodate filtration, how will people be protected from utility/PGE imposed fees resulting from electrification).
- **Strengthen Wording.**
    - Actions related to air quality are currently worded too vaguely and use very weak language, and at some points don’t propose any new actions. This would be fine if air quality wasn't a serious issue, however we know there are serious air quality issues

in many areas that lead to elevated rates of asthma and other health issues. For example 2.1.1, and 2.1.2 use the phrase “the city will continue to…” implying that they will not be doing anything new. We expect the city to step up and find additional ways to expand this important work. Additionally, 2.1.6 says the “city will explore…” explore feels like weak language - please make a more serious commitment to this important action.

- **2.1.6 Explore funding for improved indoor air quality.**
    - Ways to strengthen this language could include: "Increase funding" "Create dedicated funding" "match funding" "secure funding".
    - Some requirements are triggered when property changes hands (ex. 1031 swap). Or at the point of vacancy (new tenant).
    - Additionally why just "federal and state $", why not all sorts of sources of funds, from the City, creative philanthropic partners (e.g., the California Endowment), community benefits funds from the health care sector, etc.
- **2.1.1 Support home rehabilitation programs.**
    - Can this also include rehab for soft story buildings. We want to ensure that if a big earthquake hits, we aren’t in danger of losing precious housing stock.
- **2.1.2 Promote healthy homes and lead-safe housing**
  AND 5.2.5 Encourage climate-resilient housing.
    - **Get Gas Out of Residential Buildings:** Recent research shows that indoor gas appliances emit unhealthy levels of air pollution, sometimes in concentrations much higher than outdoor air pollution. Gas use in buildings regularly causes explosions - particularly in older buildings and from aging gas infrastructure. The City’s ECAP rightly establishes a goal to gradually remove fossil gas from existing buildings to be replaced with heat pump technology. We understand that the City Staff is developing a Building Electrification Roadmap The Housing Element of the General Plan should contain specific actions to implement this ECAP objective and fully actualize the Roadmap. This is important from a public health and safety perspective, will help the City reduce greenhouse gas emissions, and in the long run lower the cost of residential heating, cooling and hot water services for Oakland residents.
    - Need to protect people from additional charges from PG&E related to decommissioning or removing gas infrastructure from existing homes
    - For 2.1.2, we’d encourage the city to meet with and partner with the Alameda County Department of Public Health’s Asthma Start Program and the Alameda County Healthy Homes Department to collaborate in future efforts.
    - We hope the city can think through what happens for existing buildings if they switch to electric? How can we prevent an owner from switching back to gas in the future? Please better define what it would mean to remove natural gas. Also, it might be appropriate to connect with the Fire Department and understand if they have a role? How will OFD get educated around the removal of natural gas since this will reduce the risk of explosions and fires.

    - Because these both are connected to the Electrification Roadmap process, it seems like the Sustainability Office should be consulted and listed as a responsible party.
    - Finally, what types of accountability (evaluation measures and /or an oversight committee) can the city implement to decarbonize existing homes and buildings in Oakland?
- ***Remediation of Contaminated Sites:*** The Housing Element rightly contains planning to remediate environmentally contaminated sites. Historically this has meant cleanup of hazardous waste dump sites. That work certainly needs to continue. But there is another form of contamination that the City should address in this plan. Due to decades of structural racism, many low income people and communities of color live in or near places that experience unhealthy levels of air pollution. This is evident near the Port of Oakland, near freeways and places with high concentrations of heavy duty diesel powered vehicle traffic. We urge the City to expand the definition of contaminated sites to include neighborhoods exposed to high levels of air pollution. This will help prioritize remediation efforts such as retrofitting existing housing with indoor air filtration. Funding could be used to support and incentivise housing upgrades in highly polluted locations. Also consider that in West Oakland the City is working with businesses (CASS and CSW) to relocate out of the main neighborhood. This would open up some VERY large contaminated parcels for potential housing development and neighborhood amenities.
    - These comments relate to
        - 3.2.3 Promote flexibility in adaptive reuse to increase the housing stock.
        - 5.2.3 Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.
            - This action currently reads as if it will subsidize redevelopment regardless of who the developer is ("to property owners") and for whom the housing is being made available. This is too broad. This action needs to be focused on equitable development and housing.
            - We'd like to see additional details (and we're open to brainstorming with you) related to HOW the city can help coordinate between developers and federal clean up funds. Strengthen langue to include "Support, find, locate and arrange for clean up funcs" or something similar.
            - Should the Building Dept also be a stakeholder / leader for this? Do Public Works and Sustainability have a role as well? Also consider partnering with foundations.
            - Alameda County's Dept of Environmental Health - Land and Water Protection Local Oversight Program has an initiative to map environmentally polluted sites in the whole county. They could potentially partner data and clean up funding efforts.
- **5.2.4 "Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program. "**

    - Are there opportunities to use this funding source for remediation and/or electrification / decarbonization?
- ***Innovative Financing for New and Renovated Housing:*** In the past year, we have entered a period of rising interest rates and inflation that makes it more difficult to finance housing. One partial pollution is to use Green or Social Bonds to finance the city's housing efforts. Recent experience indicates rising demand from investors for these kinds of bonds. There are a wide range of benefits. Green and Social bonds tend to attract wider participation from investors in bond issues, Green bonds help align city finance with other objects including: equity and climate resilience. There is also evidence from Europe and from corporate bond market that these kinds of financing instruments can attract investors to accept a lower interest rate, partly because of lower risk and partly to satisfy growing investor interest in projects having sustainability and equity attributes. We urge the City to actively consider using green or social bond frameworks to finance housing costs, and potentially lower finance costs for this part of the General Plan.
- **Take advantage of point of sale or change of occupancy rules.** Across several action areas, the City can take a more programmatic approach to require or facilitate property modifications that promote environmental health at the point at which a property changes hands (e.g. someone vacates a lease, sells a home or residential building). This approach should include equity measures to ensure lower-resource property owners and/or properties that are "naturally occurring" affordable housing, can implement the improvements. Funding can come from some of the resources mentioned above.
- **5.2.6 Consider adoption of a disaster reconstruction overlay zone.**
    - We hope this action can ensure that new homes have strict air quality / electrification / weatherization standards and that affordability is preserved?
    - Maybe consider creating a low-interest construction loan program for income-qualified owners trying to recover. This type of support should prioritize folks who need it the most and/or who's housing can be preserved for low and moderate income Oaklanders.

Thank you for your time,

The West Oakland Community Action Plan Steering Committee

RE: The Unity Council's Building Fee Deferral Comment on Oakland's Draft 2023-2031 General Plan Housing Element

Dear City of Oakland,

On behalf of The Unity Council, a 57-year-old Social Equity Community Development Corporation in Oakland, I want to thank you for the opportunity to present a comment on the Draft 2023-2031 General Plan Housing Element.

Our comment is on the "***Housing action plan draft HE, chapter 4, action 3.6.3 (page 83)****: Expand by-right approvals and implement entitlement reform for affordable housing".*

Recommendation: Building Fee Deferral for City-sponsored affordable housing development is a Housing Element policy recommendation that the City of Oakland should enact.

- Issue: The requirement to pay fees up front without ability to defer is a "governmental constraint on housing.
- Policy solution: The solution is to provide for a deferral of fees on 100% affordable housing developments.

As part of the entitlement reform, the city of Oakland will consider fee subsidies/or payment deferrals to better accommodate affordable housing developers, therefore the City of Oakland should consider including Building Fee deferral to fruition the shared goals of providing desperately needed affordable housing for Oakland's most at-risk and vulnerable residents.

Reform in the process to allow building fee deferral for city-sponsored affordable housing developments would allow nonprofit organizations to build more affordable housing. This important step would allow nonprofit affordable housing developers to make it sustainable and ensure that affordable housing developers have an equal opportunity.

The building fee deferral would address the specific barriers of the fees so that we can expand affordable housing in our community which is so urgently needed. By deferring these fees, the City of Oakland will be showing itself as a true partner to affordable housing organizations like

The Unity Council, who has been a trustworthy, reliable and steadfast partners to the City of Oakland, and has worked together for years.

Thank you for your review and consideration.

Respectfully,

Chris Iglesias
Chief Executive Officer

The Unity Council
1900 Fruitvale Ave, Suite 2A, Oakland, CA 94601

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Dear City of Oakland,

I read the City of Oakland Housing Plan and appreciate the depth and breadth of work that went into the plan. There is an area that I don't see included very well and that is my particular circumstances.

"An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in placebased strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas." - Chapter 3

We own a home in East Oakland that serves the criteria above from Chapter 3. It is an area with high displacement (displacement especially occurs on Outlook Avenue - with the View - just above us (68th Ave). We have very nice houses on our block, but areas nearby and down the hill are a bit more rugged. I believe our neighborhood region is an area with historic disinvestment, but with substantial gentrifying forces (houses on the block are now going for a million, a 2-bedroom one block over went for $750K). We're on the low hills, not the high hills, so not much risk of mudslide, or much risk of being flooded (I think we're too high). Our property is 10,000 square feet with a very large yard behind us with fruit trees and an area for an urban garden. There is another chunk of vacant lot just next to our large backyard lot that is currently housing a discarded moldy van (sometimes inhabited by homeless people) and a non-operational boat detritus. I would love to be able to purchase the small slot just next to our large backyard and combine the properties to build the largest ADU allowed, or possibly a small house (depending how zoning might go), or two ADUs. The area cannot stand alone without an easement off our neighbors apartment complex for access in the back, or easement off our property. My goal would be to provide it as affordable housing. However, we are stretched thin with the current mortgage and lack the capital to develop this area for affordable housing currently (building and a bit of leveling out the low hill area for proper foundation). I know second-hand of the displacement that has happened in my neighborhood, even my best friend was forced to move to Antioch (someone who had called Oakland home for 20 years). Rising rent costs caused him to be displaced along with two of his roommates, all African-American.

Prior to owning this house, we previously managed a 48-unit building for several years near Lake Merritt, so we are very familiar with Fair Housing Practices and non-discriminatory methods for renting units. We employed every strategy we could to ensure absolute fairness in renting out the units available at that complex; however, we were constrained by the owner's requirements and a lack of affordable housing units in that building. We were well aware of the housing crisis when the owner asked us to rent studios for $1750 (this was four years ago), and we had two tiny efficiency units that went in a day, because their cost was only $1350 (but they were tiny rooms with a separate bathroom).

Goal 3, p. 61
"Like other Bay Area cities, one of the major challenges to developing permanent affordable housing in Oakland is the extremely high cost of development, especially the cost of land, labor, and materials. As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability. Oakland also has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, can often provide significant opportunities for residential development. Further, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units."

We're not a unit that falls within the category of a vacant lot. We are a unit that has a very large space that could be developed into affordable housing, but lack the capital means to do so currently.

"The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet to remove constraints on lot splitting." p.65

This softening of requirement would allow for at least the possibility of what I'd like to do to the land available.

"Action 3.2.4: Provide financial incentives for older or lower-income homeowners who want ADUs."

We might or might not be eligible for something like this. We aren't high income, but we have one city income and one disability income, so we might fall in the middle of this action step.

Comment about rent control: increase the options for rent control, expand rent control

I personally believe it should be within the city's housing plan to increase the rental control increase cap to all housing units in Oakland, not just those built before 1983. New developers,

new housing construction should also be bound by the same laws, and rent control has saved so many people in the past (including myself when fully disabled, on limited income).

Action 1.1.13
This is not an exhaustive list. Catholic Charities and other entities helped prevent homelessness through various programs, but have not been mentioned here.

Action 3.7.1:
This is an extremely important area. I know two elderly ladies (76 and 80) with ailing health concerns. If either one of them dies, the other will become homeless, with no housing options, because neither of them can afford the rent on their own (disability social security - only funding). Both are physically disabled, one in a wheelchair, one requiring a scooter, and need accessible housing.

Action 3.7.3 I think this is NOT STRONG ENOUGH! Promoting affordable units in new construction is not enough. REQUIRING IT is the only thing that will force most developers to even offer. Policy efforts should be undertaken to make this kind of policy change into law. Simple carrots are not effective enough, as evidenced by what has happened in Los Angeles.

Action 3.8.3
This is a tough one. The actions of this will fall primarily on the shoulders of low or underpaid property managers (with the exception of large corporate property managers - who usually do receive a salary). We worked super hard as building managers of the 48-unit complex to fill the units, but it was so much work at market rate (set by owner). We received only $300/month in compensation if the building was full (in addition to our no rent in exchange for exhaustive duties of a building manager). Most work was unpaid. Any extra city requirements, like city garbage - push/pull, bulk waste pick-ups, composting were always unpaid. An action like this will invite retaliation from building owners down on underpaid building managers. A caution should be applied here, perhaps only enacting this action after 3-months vacant. Sometimes units were also rehabbed, being updated, and this construction process took longer than 3 months, and an exception should be made for units that are being improved for tenants.

POLICY 4.2 ENCAMPMENT MANAGEMENT Action 4.2.1
I believe offering mental health site access, or social work ability near these encampment sites should be part of this section. It would require funding, but should not just be funding security guards or police for safety, should offer the material and immaterial services really needed by this population group.

Goal 5
First time home buyer programs should also help to address the extra mortgage insurance that folks without quite enough of a down payment have to pay, just extra, which substantially disadvantages marginalized groups and further perpetuates inequity. We didn't have to pay that extra insurance cost because we were very fortunate, but others are not so lucky.

Action 5.2.3
The caution here is that contaminated sites truly must be deemed decontaminated and safe by EPA standards at bare minimum. Too many low income housing projects in other cities have

been built over these sites, and residents were never informed of the risks. Some sites had a small sign saying do not play on the soil/grass, but parents didn't know that their children were receiving high levels of contamination. How do you have children in these areas without safety? Children should be allowed safe places to play and safe areas outside, not to mention inside. Extreme caution must be used not to perpetuate environmental injustice at the expense of meeting demand.

Thank you for reading/considering my comments, and thank you for the effort to be inclusionary, reduce displacement, address homeless needs, and enact fair housing standards that address systemic environmental and racism areas.

Warmly,

Crystal

Feedback on the Oakland Plan

Scott Forman [redacted]
Tue 6/14/2022 12:56 PM

To: General Plan <generalplan@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Greetings,

I have been following the progress towards a new General Plan for Downtown Oakland. There is a lot in the draft that I find laudable. I'm really impressed with all the work that has gone into it, and want to applaud all of the contributors to the effort.

My main point of feedback is that, especially with respect to the housing element, we should go **much farther** in making it possible to build lots of new homes.

I think our default stance should be much closer to "all and every type of home building is allowed, everywhere, by right." The same goes for any and all commercial activities that don't have significant negative externalities like lots of noise or noxious fumes.

In other words, while I love that we're liberalizing and loosening some constraints, I believe most of the remaining restrictions are themselves entirely unnecessary and counterproductive, and that Oakland can be **much denser**, and welcoming **many new neighbors** with **dramatically lower** housing costs.

I think we should be planning to **increase the population of Oakland by 25-50%** in the next decade, and even well-meaning constraints on growth, like to preserve the character of certain neighborhoods, or to extract concessions from real estate developers in exchange for more density...as if density is a bad thing that we begrudge! — are profoundly misguided.

In short, I'm an enthusiastic "yes" to a lot of what's in this plan, but I'd like to see it go much further in actively promoting new homes and businesses, and discouraging cars and parking.

Sincerely,
Scott J. Forman

SPUR
San Francisco | San José | Oakland

June 15, 2022

Dear Oakland Housing Element Team,

Thank you for the opportunity to comment on Oakland's Draft Housing Element. As you know the Housing Element is a critical document that lays out how the city is going to accommodate future housing growth at all income levels and the policies can help make Oakland a more affordable city. We appreciate the time and care that the Housing Element Team has put into drafting this document and conducting outreach to groups across the city.

SPUR is a public policy non-profit organization in the Bay Area with offices in Oakland, San Francisco and San Jose. We work across policy areas and political lines to solve the big problems the region faces. Our comments on this housing element combine both a regional and local perspective. Our feedback on the Draft Housing Element is as follows:

1. **The Housing Element should take stronger steps to affirmatively furthering fair housing.**
   We appreciate the effort that the team has taken to analyze how this Housing Element draft affirmatively furthers fair housing. However, we believe that more can be done to achieve this goal. The draft notes that most of the residential capacity for housing is located in low resource, high segregation areas due to the fact that over 60% of the land in Oakland is in these categories. And the land that is located in high and highest resource categories is impacted by environmental constraints such as very high fire hazard severity zones.

   These are challenging constraints to address. Nevertheless, we believe that there are some steps that can be taken to increase the housing capacity in high resource areas. Specifically, we believe that Oakland's Housing Element should look at sites that can be intensively upzoned within the Rockridge and Elmwood neighborhoods, including the Rockridge BART parking lot. Potential sites could include the Trader Joe's site directly adjacent to the BART station (inclusive of parking lot) and the triangular lot at the corner of College Avenue and Claremont. While some sites in this area may be too small to support affordable housing, they could accommodate apartments that would be more affordable than the single family homes that currently exist in the majority of the neighborhood.

   Additionally, the city may wish to consider requiring that some larger lots that are currently zoned for community commercial include housing at some required minimum density. This would be particularly appropriate for the large, currently undeveloped portion of the shopping center site at the corner of Pleasant Hill and Broadway.

2. **The Housing Element should identify concrete strategies to build more community infrastructure in low-income communities in order to make affordable housing in those neighborhoods more equitable.**
   Given that so much of the residential capacity in Oakland is located in low resource and high segregation areas, and therefore that a sizable portion of affordable housing in Oakland may be located in these areas, it is important to ensure that appropriate community infrastructure is being

planned in these neighborhoods. Building affordable housing in low-income neighborhoods can help stabilize communities and is an important anti-displacement strategy. However it must be paired with investments in parks, community spaces, and programs that benefit low-income families.

3. **The Housing Element should clarify where upzoning is being contemplated.**
   Policy 3.4 - Reforming zoning and Land Use to Address Community Priorities references allowing additional building heights and/or housing densities along certain corridors such as International, Foothill and MacArthur Boulevards, allowing a diversity of housing types in single-family neighborhoods, increasing height and density in areas approximate to BART and BRT and increasing density in resource rich neighborhoods.

   We appreciate and support all these policies. However, we feel that it is important for the Housing Element to provide more specific detail about precisely which locations are being contemplated for upzoning and by how much.

   Additionally, we understand that the Housing Element team is considering tools such as affordable housing overlays to help encourage more affordable housing production. We support the use of affordable housing overlays, but feel that the team should provide more information about where they should be utilized.

4. **State housing agencies should prioritize numerous important goals – including funding affordable housing near transit and stabilizing neighborhoods at risk of displacement – when determining where to allocate affordable housing funds.**
   Appendix F of the Draft Housing Element notes that the California Tax Credit Allocation Committee's competitive tax credit applications disadvantage Oakland because so much of the residentially zoned land is considered "low resource". While affirmatively furthering fair housing is an absolutely critical goal that the state should be advancing, it is also important that Oakland, as a regional hub with many BART stations, be able to access tax credits and other funding to build affordable housing close to transit. Additionally, as mentioned earlier, affordable housing is an important tool for stabilizing neighborhoods at risk of displacement. It would be helpful for HCD to work with partner agencies at the state level to help balance these important values in the allocation of affordable housing resources.

Thank you for your consideration of our comments. Should you have any questions, please do not hesitate to contact me.

Sincerely,

Sarah Karlinsky

Dear Councilmembers -

On behalf of East Bay Housing Organizations (EBHO), I am offering comments on two items on today's agenda that focus on past performance on the current housing element and preparation of the draft Housing Element for the next housing element cycle.

Please see also the attached items, which include our full written comments on the draft Housing Element and two important memos from ABAG that provide clarity about what the State is actually looking for in its review of local housing elements.

Item 3.1: Housing Element Annual Progress Report (APR)

This report summarizes the City's progress in meeting its Housing Element goals after 7 of the 8 years of the current housing element cycle have been completed. Unfortunately, the City has fallen far short of meeting it's assigned housing production targets.

The report notes that building permits peaked at slightly more than 4,000 annually in both 2017 and 2018, and have since fallen off. In 2021, there were "only" 1,667 units permitted. This needs to be taken in historical perspective. These are still record-breaking numbers.

- For the previous two housing element cycles, covering the period 1999 – 2014, the average number of units permitted was 690 per year.
- For the last seven years, the average is nearly 2,400, more than three times the average over the preceding 16 years.

This record level of production has been anything but equitable. As we have pointed out many times before, there is a tremendous imbalance between production of housing for above-moderate income and production for very-low, low and moderate income.

- While the City has permitted nearly double its RHNA target for above-moderate income, it has permitted only 26% of the RHNA target for lower and moderate income.
- Put another way, while the RHNA called for 53% of new housing to be targeted to above-moderate income, 89% of the building permits for new housing have been higher-end, above-moderate income housing that very few Oakland renters and first-time homebuyers can afford, while only 11% have been for affordable housing.
- Only 1 affordable unit has been built for every 8 unaffordable market-rate units.

Given this track record, a vague call to develop "housing for all economic levels" is not enough. **Oakland needs a housing strategy that explicitly prioritizes affordable housing for those with the greatest needs**, and does not need to provide additional incentives for above-moderate income, market-rate housing, which has been substantially over-produced. We hope you will consider this as Oakland moves forward to update its housing element for the 2023-2031 cycle.

Item 6: Work Session on the General Plan Update (including update of the Housing Element)

While this agenda item focuses broadly on the update of the City's General Plan, and particularly on the Environmental Justice Element and the City's equity indicators, our comments today focus specifically on one part of that project– the update of the City's Housing Element. (Please see comments at the end of this email regarding the deletion of the Housing Element piece from the title of today's agenda item).

EBHO submitted extensive written comments during the public comment period on the draft Housing Element, and a copy of those comments is attached to this email. We are also attaching two short memos from ABAG that summarize lessons learned from other regions of the State and how the State is reviewing (and often failing to approve) housing elements.

We want to call attention to a few critical issues.

Affirmatively Furthering Fair Housing

We believe the draft Housing Element falls far short of meeting the State requirement to affirmatively further fair housing – that is, to identify concrete goals, strategies and actions to reduce racial segregation and eliminate racial disparities in access to opportunity and housing outcomes.

While the draft Housing Element contains an extensive Fair Housing Assessment with a wealth of data and maps, it falls short on at least two counts. While there is a description of current racial and economic segregation and disparities, there is little analysis of the history and underlying factors that gave rise to, and continue to perpetuate, these conditions. The most glaring issue is that the Fair Housing Assessment completely fails to analyze exclusionary zoning patterns as a key factor in racial segregation, despite passing mention that zoning was an issue. This is particularly disappointing in light of the informational report on redlining, segregation and reparations in West Oakland that you received at your meeting last week, which does a far better job of identifying historical, structural and systemic factors and policies to address these.

The draft Housing Element does not clearly identify and prioritize factors underlying racial segregation and disparities, and therefore also does not adequately link the goals, strategies and actions to the prioritized fair housing factors. This is explicitly required by the State, and failure to do so will likely result in the State rejecting the City's draft Housing Element.

Inventory of Available Sites

Of particular concern is the inventory of availability of suitable sites to meet Oakland's Regional Housing Needs Allocation (RHNA) targets for the various income levels. The draft was developed with the stated intent to create an inventory based on current zoning, without the need to identify additional parcels to be rezoned to accommodate the City's housing needs. As a result, most of the sites suitable for affordable housing continue to be concentrated in lower opportunity areas with higher concentrations of low income households and communities of color, particularly Black residents who historically have suffered the worst segregation and discrimination. Even if all the identified housing sites were developed as projected, racial segregation would not be significantly reduced, and the high opportunity, historically exclusive areas would remain as inaccessible as before. The City cannot say that it is affirmatively furthering fair housing if its plans and goals don't even mention reducing patterns of segregation and overcoming the historical barriers posed by exclusionary zoning.

Proposed Strategies and Programs

Another area of concern is the identification and description of new strategies and programs. Many of the new actions described in the draft Housing Element are policies and programs that EBHO and many other organizations had long advocated, such as greater tenant protections, a Tenant and Community Opportunity to Purchase Act, finalization of the City's public land policy, and more, and we are pleased to see these included here.

Unfortunately, the language in the draft element says only that the City will "study" or "consider" such programs, with no concrete steps, milestones, expected outcomes, or performance metrics. The State has explicitly instructed cities that such vague statements are not sufficient, and has rejected draft housing elements from other cities for just this reason. If it is not possible to fully adopt new policies and programs as part of the Housing Element, then at a minimum the document must commit to bringing concrete legislation before the City Council by a specific date in order to implement these new programs. Simply continuing the same actions that have been undertaken to date is not sufficient, since as clearly demonstrated in the City's Annual Performance Report, the City is falling far short of meeting its RHNA goals in the current cycle.

Additional Goals

The draft Housing Element is organized around five goals. We would suggest that at least two additional goals be included:

- Reduce racial segregation and racial disparities in housing opportunities and outcomes. Simply stating a goal to "expand affordable housing opportunities" is not sufficient.
- Close the gap between market-rate and affordable housing production by prioritizing preservation and development of housing affordable to those with the greatest needs, including Black and Brown households that constitute the bulk of the lower income population. Instead of "promoting housing opportunities for all economic levels," the City must explicitly prioritize actions that address these pressing needs, in both its funding priorities and its land use and other regulatory actions.

Council and Public Review of the Draft Housing Element

To date the City Council has not had an opportunity to consider the draft Housing Element. Despite an extensive community outreach process during preparation of the draft, once it was completed, consideration of the draft was subsumed within a larger report on development of the entire General Plan update. Initially there was no summary or overview of the content of the housing element and particularly new policies and actions and consideration of the obligation to affirmatively further fair housing until we explicitly called for such a summary. Previous draft Housing Elements have at least included an Executive Summary; there was no such summary in the current draft.

We note with some dismay that the title of today's agenda item was modified in Rules Committee to remove the reference to "Receive Public Comments And Provide Feedback To Staff On The Draft Housing Element." While the initial formal 30-day public comment period closed on June 13, staff have repeatedly stated that they will continue to accept and consider public comment while the draft undergoes a 90-day review by the State. We are therefore puzzled and concerned that this language was omitted from the title as it suggests that the City is not prepared to consider public comments on the draft Housing Element at this meeting.

We call on the City to ensure an open and inclusive process in the next revision of the draft Housing Element. Once staff receives comments from the State, that information should be brought before the City Council to get input on how best to address the State's comments. After the new draft is developed, there should be a public comment period of not less than 30 days, including a public hearing before the Council to consider and comment

on the revised draft, prior to preparing a final draft for adoption and submission.

Thank you for your consideration of these issues. Oakland has the opportunity to develop a Housing Element that contains bold new solutions to the housing crisis and a strategy to reduce segregation and racial disparities in housing. As always, we look forward to working with the City to achieve these goals.

Affirmatively Furthering Fair Housing (AFFH) Policy Tips Memo
Learning from Southern California & Sacramento: Early Experiences in Complying with AB686

This memo outlines findings from a review of eleven draft or final Southern California and Sacramento region Housing Elements to better understand how jurisdictions are integrating new state Affirmatively Furthering Fair Housing (AFFH) requirements. The goal of this review is to highlight common challenges and the feedback jurisdictions received from the Department of Housing and Community Development (HCD), to aid Bay Area jurisdictions in complying with these rules.

Bay Area jurisdictions are fortunate to learn from the experience of other regions that were required to submit their Housing Elements earlier in this sixth cycle of RHNA. This extra time, however, comes with more experience and oversight from HCD reviewers. It is therefore important to consider the findings and recommendations below to expedite their review processes and to meet the intended outcomes of AB686 to "overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity" for protected classes.

Methodology

Eleven Housing Elements – recommended by HCD or planning consultants – were reviewed, along with HCD's response letters to the jurisdictions. Housing Elements were examined for their consistency with the format and content laid out according to HCD's AFFH guidance, with acknowledgement that many of the reviewed Housing Elements were drafted before statewide guidance was released. The review was conducted not to observe how well jurisdictions followed HCD guidance, but rather to understand what worked and what needed improvement from the first several rounds of submissions in complying with State law. The following Housing Elements were reviewed:

Chula Vista	Culver City	Escondido	Long Beach
Los Angeles (City)	Los Angeles (County)	Rancho Cucamonga	Sacramento
San Diego (City)	San Juan Capistrano	West Hollywood	

Findings

Based on the review of these Housing Elements and HCD response letters, below are six observations and five recommendations for Bay Area jurisdictions to consider during Housing Element drafts. The five recommendations are:

1. Include place-based strategies, naming specific neighborhoods or geographies and articulating why certain strategies are best suited to tackle geographically-specific problems.
2. Ensure that strategies will address the disparate outcomes and segregation patterns of impacted racial and ethnic groups identified in the Assessment of Fair Housing portion of the Housing Element.

3. Include actions that are specific and time bound with commitments, metrics and milestones. Avoid policies with vague words like "explore" that are unaccompanied by more detailed, concrete actions.
4. Use HCD's five fair housing categories for goals, policies and actions: (i) Outreach Capacity and Enforcement; (ii) Segregation/Integration Patterns; (iii) Racially and/or Ethnically Concentrated Areas of Poverty; (iv) Disparities in Access to Opportunity; and (v) Disproportionate Housing Need for Low-income Households and Protected Classes.
5. Follow HCD's AFFH guidance closely, making sure to include each section and subsection in the outlined order.

Observation 1: Few and Vague Place-Based Strategies are Included in the Housing Elements

Statewide AFFH requirements seek to address inequitable access to opportunity for protected classes, which plays out geographically at the neighborhood level. HCD recommends, therefore, that successful AFFH policy frameworks should include place-based responses and activities oriented around specific locations. Several Southern California jurisdictions successfully outline policies intended to tackle specific neighborhood housing and resource inequities, for example:

- *Los Angeles County describes community development work in specific low-income areas including the East San Gabriel Valley area and the Florence-Firestone Transit District.*[1]
- *San Juan Capistrano describes specific community development plans including Los Rios Park Improvements and a neighborhood-specific senior mobility program.*[2]

However, few other jurisdictions include this level of place-based specificity in their policy frameworks. Many rely on policies and programs that are not place-based at all. Others employ strategies that are place-based in theory but fail to articulate which neighborhoods these activities target and how they will tackle geographically-specific issues.

Recommendation: To tackle place-based inequity, jurisdictions should aim to articulate place-based responses, naming specific neighborhoods or geographies and articulating why certain strategies are best suited to tackle geographically-specific problems.

Observation 2: Few Housing Elements Articulate the Connection Between Policy Goals and Racial Segregation or Disproportionate Housing Need for Protected Classes

One of the central goals of statewide AFFH requirements is replacing segregated housing patterns with truly integrated living patterns. HCD requires jurisdictions to design AFFH-responsive policies and actions that are "significant and meaningful enough to overcome identified patterns" of segregation and other housing inequities, specifically those identified in the jurisdictions' Assessment of Fair Housing.

However, the reviewed Housing Elements largely fail to connect policies and actions directly to the issues producing residential segregation and to the issues affecting racialized groups. This observation is perhaps related to the tension between AFFH goals and antidiscrimination laws, which prohibit

[1] Los Angeles County Housing Element, pages 19, 25.
[2] San Juan Capistrano Housing Element, page 213.

jurisdictions from targeting protected classes (like racial groups) for programmatic support. Only one Housing Element reviewed successfully identifies a housing access issue which disproportionately impacts communities of color and articulates specifically how a proposed response policy – though not racially targeted – will work to address this pattern.

- *Long Beach:*
    - *AFFH goal: "Pursue homeownership opportunities with an emphasis on providing affordable options for lower and moderate income households, with a particular focus on Black households."*[3]
    - *Policy and program description: "Homeownership remains a city goal, as it allows lower income households to build wealth through equity and eventually move towards financial independence. This has become an even greater priority since the City's Framework for Reconciliation in 2020 through which Black residents and communities of color underscored the criticality of homeownership as a pathway to wealth that has been and remains less accessible to people of color. In response, new funds have been allocated for a down payment assistance program."*[4]

Other jurisdictions reference an intention to target policy work "in communities of color" or "in disadvantaged communities." But the policies, strategies and actions corresponding to these goals fail to concretely address issues faced by these communities.

- *One city in Los Angeles County aims to "Protect communities, especially communities of color, from predatory lending, land acquisition, speculative real estate transactions, and any other practices that undermine intergenerational wealth accumulation and housing stability." However, the only corresponding supporting actions concern mobile home parks writ-large: "Support legislation that expands local authority over conversion of mobile home parks to ownership structures."*

Still others avoid mentioning race altogether or identifying policies to address the findings of the fair housing assessments. Several jurisdictions propose policy interventions aimed at dismantling socioeconomic neighborhood segregation or expanding housing access for low-income households but fail to expressly connect these policies and actions to goals of *racial* desegregation and *racialized* housing disparity.

Recommendation: Jurisdictions should identify housing issues that disproportionately impact communities of color and racialized households (e.g., housing cost burden, lack of homeownership opportunities, etc.) and should incorporate policy responses that — while not racially targeted — address these issues. Jurisdictions should articulate the connection between these policies and AFFH goals related to racial desegregation and other racialized housing inequities. In particular, jurisdictions must connect the issues facing members of protected classes as identified in their Assessment of Fair Housingto their proposed list of policies and programs. Jurisdictions may in addition indicate an intention to practice affirmative outreach – the targeted advertising of policies and programs in impacted communities.

Observation 3: Many Policies and Actions Are Insufficiently Specific

Statewide AFFH guidance requires jurisdictions to outline concrete policies and actions in response to local fair housing issues. Specifically, HCD requires time bound actions with "specific commitments [from local actors], metrics, and milestones." Several jurisdictions outline policies that meet this requirement, for instance:

- *Los Angeles County: By 2023, complete equity audit of all land use plans and zoning code. Amend land use plans and zoning code to address findings of the equity audit and to ensure consistency with racial justice initiatives. By October 2029, achieve a 10% increase in multifamily housing approvals in high or highest*

[3] City of Long Beach Housing Element, page 69.
[4] City of Long Beach Housing Element, page 87.

resource areas as determined by TCAC. [5]

However, the policies and actions of many jurisdictions are not sufficiently specific – they are not time bound and they fail to include commitments from local officials or staff, metrics and milestones. Many rely heavily on vague words like "explore," "study," and "convene," words HCD expressly discourages jurisdictions from using. Furthermore, there are many examples where a higher-level policy meets HCD's specificity criteria, but corresponding actions remain non-specific and not time bound.

Recommendation: Jurisdictions should ensure that all policies and all corresponding actions are specific and time bound, and include commitments, metrics and milestones. Jurisdictions should avoid policies with vague words like "explore" that are unaccompanied by more detailed actions.

Observation 4: Many Policies have the Potential to Impact AFFH if Linked to SegregationPatterns and Informed by Geography

Many Housing Elements feature strong policy platforms with actions ranging from permit streamlining and inclusionary zoning, to first time home buyer assistance and tenant-based rental assistance.

However, as a result of the three preceding observations, many of these policies and actions are insufficiently focused on fair housing issues. Instead, the policy approach appears to rest on an unstated assumption that by tackling issues of supply and affordability more broadly, fair housing goals will also be achieved. Absent more specific language targeting place-based inequities and racial segregation, it is unclear whether or how these policies will advance AFFH goals. If jurisdictions effectively link, define, and target their otherwise strong policy platforms, however, these platforms have potential to impact AFFH. Examples of this include:

- *A city in Los Angeles County references the City's 2022 budget allocation of $3 million for economic empowerment zones, including dedicated funding for community land trusts (CLTs), stating as an AFFH goal the provision of "technical assistance to community groups in establishing CLTs for community ownership of affordable housing."* Like many others, this goal could have a significant AFFH-related impact if linked to segregation patterns and geographically targeted.

Recommendations: See Observations #1, #2, and #3

Observation 5: HCD is looking for Cities to Organize their Housing Elements according to the AFFH Guidance

HCD outlines a specific organizational system for addressing AFFH requirements in Housing Elements. State guidance lays out a template, requiring jurisdictions to:

1. Assess five discrete components of fair housing issues: (i) Outreach Capacity and Enforcement; (ii) Segregation/Integration Patterns; (iii) Racially and/or Ethnically Concentrated Areas of Poverty; (iv) Disparities in Access to Opportunity; and (v) Disproportionate Housing Need for Low-income Households and Protected Classes.
2. Identify the primary causes of these fair housing issues (or "contributing factors") and list these causes *for each of the same five categories*.
3. Identify fair housing solutions (or goals, policies and actions) that connect conceptually to the preceding assessment and organize these policy solutions *again into the same five categories*.

Many jurisdictions effectively identified goals/policies/actions that responded to their fair housing assessments and contributing factors. However, most jurisdictions did not use HCD's organizational system — using the five conceptual buckets only for the fair housing assessment and forgoing them in

[5] Los Angeles County Housing Element, pages 31-37.

later sections. These jurisdictions received letters from HCD in response to their draft submissions asking them to reorganize their Housing Elements.

Recommendation: Jurisdictions should use HCD's five fair housing categories to organize multiple sections of AFFH analysis: fair housing assessment, contributing factors, and goals/policies/actions.

Observation 6: HCD is doing a Thorough Review

HCD is doing a thorough review of Housing Element drafts and connecting the dots between APRs, current goals/policies/actions, site analyses and fair housing assessments. It is clear from comment letters that HCD is reviewing Housing Element drafts in their entirety using an AFFH lens, rather than only examining AFFH sections, when providing comments on AFFH requirements. Many jurisdictions have received comments from HCD for failing to connect all of these pieces:

- *HCD comments to a city in Los Angeles County: "Goals, actions and metrics must be modified based on the outcomes of more complete [fair housing and site] analyses."*
- *HCD told many jurisdictions that their goals/policy actions must be "significant and meaningful enough to overcome identified patterns" and that their actions should have "specific commitments, metrics and milestones."*
- *HCD comment to another city in Los Angeles County: "Programs for anti-displacement and new housing in high opportunity areas do not appear adequate to address the fair housing issues described in the element."*

HCD is reviewing Housing Elements to make sure that jurisdictions cover all the section/subsection requirements in a sensible order. Many jurisdictions received comments from HCD about missing specific elements of the AFFH guidance:

- *For example, several jurisdictions missed required components of the fair housing analysis like "Local Data and Knowledge" and "Other Relevant Factors."*
- *Other jurisdictions effectively listed contributing factors but failed to prioritize these factors by salience.*

Recommendation: Jurisdictions should follow HCD's guidance closely, making sure to include eachsection and subsection in the outlined order.

Summary of Housing Element Review Letters

Learning from Southern California & Sacramento

In Winter/Spring 2022, ABAG staff and consultants reviewed 33 comment letters from the California Department of Housing and Community Development (HCD) to jurisdictions in regions with earlier Housing Element deadlines. This summary presents common themes and lessons for Bay Area jurisdictions as they prepare their 6th cycle Housing Elements.

Methodology

Staff and consultants identified a subset of 33 representative comment letters from jurisdictions in the SCAG (Southern California), SACOG (Sacramento) and SANDAG (San Diego) regions. Letters were selected to reflect a diversity of jurisdiction types by geography, size, and socioeconomic characteristics, including racial and ethnic diversity. Staff analyzed both the frequency of comments by Housing Element section and compiled both common and unique comments by major section.

Key Findings and Recommendations

Many assumptions that jurisdictions made in previous Housing Elements will not be possible this cycle. Local jurisdictions will want to ensure that their Housing Elements are thorough, with more robust descriptions of housing needs, more inclusive outreach, a stronger focus on fair housing, more specific policies and programs, and strong justification for sites included in the inventory.

Although the types of comments received by each jurisdiction varied based on their particular demographic and economic characteristics and planning contexts, the most frequent comments can be grouped into five major categories (including the percentage of letters that contained comments on each topic):

- Affirmatively Further Fair Housing (AFFH) (94%);
- Public Participation (67%);
- Sites Inventory (94%);
- Government Constraints (58%);
- Policies and Programs (55%).

In addition, a cross-cutting theme is noted below in terms of special needs populations. Finally, unique and recent comments from HCD review letters are presented that may have special relevance for Bay Area jurisdictions.

1. AFFH

Observation
A common theme in the comments across ninety-four percent of the HCD review letters is that the draft Housing Elements are not sufficiently detailed and specific with respect to the required data and analyses for AFFH, and also fail to connect findings from the AFFH analysis with specific sites strategies and programs and policies.

Recommendations

1) Review the recommendations and observations contained in the ABAG memo from March 2022, which can be found here and take advantage of ABAG's other AFFH technical assistance which can be found here.
2) Ensure that the AFFH analyses are sufficiently detailed in terms of required data and maps and include local knowledge and other relevant factors to address State guidelines. Additionally, have a summary narrative that tells the story of the community: how it has changed over time and what the landscape is like today.
3) Connect findings from the AFFH analysis to proposed affordable housing programs and policies. It is not enough to just discuss the data, cities must show how they intend to advance fair housing.
4) Document how the jurisdiction considered AFFH when initially deciding on sites to include by describing the jurisdiction's process and considerations.

2. Public Participation

Observation
Sixty-seven percent of the letters contained comments concerning inadequate public outreach, almost always connected with the need to demonstrate that outreach was conducted to both lower-income households and households with special needs.

Recommendations

1) Ensure robust outreach to lower-income and special needs groups and meetings should include special focus on lower-income or special needs groups.
2) Connect the community input received through outreach activities to policies and programs. There should be clear text that summarizes the feedback from the community and how the suggestions were or were not incorporated into the Housing Element.

3) Take advantage of ABAG's technical assistance on public participation including messaging guides, a Multi-lingual Community Survey Template & Social Media Toolkit and translation services which can be found here.

3. Sites Inventory

Observation

All but two jurisdictions in this analysis received one or more comments on the sites inventory section, with the most common and extensive comments falling under two major subcategories: realistic capacity (73%) and non-vacant sites (65%). A frequent type of comment from HCD regarding these sections was that jurisdictions did not provide sufficiently detailed analysis to demonstrate that the proposed sites would develop with the proposed number of housing units during the planning period.

Recommendations

1) Follow HCD's detailed guidance (provided in their memo of June 10, 2020, which can be found here) and provide specific, site-level analyses to demonstrate that proposed housing sites could actually accommodate the proposed number of housing units by income-level during the planning period. This includes analysis for realistic capacity calculations as well as for development on non-vacant sites that allow other uses in addition to residential uses.
2) Use ABAG's free Housing Element Site Selection (HESS) tool to:
    a. view HCD's data points, including AFFH data points, at the parcel level;
    b. see estimations of realistic development capacity of each parcel given local market trends; and
    c. automatically complete much of HCD's required electronic sites inventory form.
3) For non-vacant sites, most jurisdictions will need to provide evidence that the existing use is not a barrier to redevelopment with both site specific analysis and a summary of development trends. Additionally, jurisdictions should summarize policies and programs that support residential development on proposed redevelopment sites.
4) Assumptions that sites that allow both residential and commercial will include residential need to be supported by evidence. If sites permit developers to choose office or other non-residential uses, it is important to analyze what percentage of applicants are likely to choose non-residential (based on market trends and experience on nearby or similar sites) and reduce unit assumptions accordingly.

4. Governmental Constraints

Observation

Fifty-five percent of letters included comments related to governmental constraints on housing production, frequently including comments on constraints to housing development for lower-income and special needs households.

Recommendations

1) Data alone is not sufficient. Provide an analysis of what is or is not a constraint for both market-rate and affordable projects. If there are constraints, identify policies and programs to address those constraints. Jurisdictions should explicitly document and analyze governmental constraints to housing production for lower-income and special needs households and include detailed policies and programs to address such constraints, with clear timelines, milestones, responsible parties and funding.

Policies and Programs

Observation

Many jurisdictions received comments asking for more specificity in their policies and programs section. Generally, a program to study an issue will receive a comment asking for more concrete actions. Vague language will likely be rejected, especially if a program is tied to a constraint.

Recommendations

1) Review all programs to ensure that there are clear timelines and metrics to evaluate success. Pay close attention to "ongoing" programs, which may need to be modified to include clear, accountable steps.
2) Have a narrative that summarizes key new policies and programs, and connects them to needs, community feedback or constraints.

5. Special Needs Populations

Observation

Across every section included in this analysis, HCD reviewers commented on the lack of sufficient attention to special needs populations (e.g., the elderly, persons with disabilities, large households, female-headed households, farmworkers, and persons experiencing homelessness). Both in terms of fully documenting and analyzing housing needs and in terms of developing policies, programs and affordable housing sites strategies, the draft Housing Element's treatment of special housing needs tended to be more high-level and/or cursory than required or expected by HCD.

Recommendations

1) In addition to the general data in the housing needs section, prepare detailed assessments of special housing needs and clearly connect special housing needs findings to programs, policies and sites strategies that are concrete and actionable.

7. Unique and Recent Comments: Accessory Dwelling Units, SB 9 and AB 215

Observation

Numerous jurisdiction-specific comments were noted in the review letters, but three major types of comments are especially worthy of elevation to inform Bay Area Housing Elements. These concern how jurisdictions count units towards their RHNA using past Accessory Dwelling Unit (ADU) development trends as well as more recent guidance regarding SB 9 and AB 215.

Recommendations

1) **ADUs:** Average at least the past three years of production rather than one recent year to determine the anticipated development of ADUs during the eight-year planning period.

2) **SB 9:** The lack of clear, published guidance may have led some jurisdictions to over-estimate unit production related to the state's adoption of SB 9. As with the sites inventory generally, potential SB 9 sites require detailed site by site analysis. Carefully review the guidance recently provided by HCD on this topic, which can be found here.

3) **AB 215 and Public Outreach:** AB 215 adds an additional 30-day review period plus 10 business days for jurisdictions to consider comments before drafts can be submitted to HCD. Jurisdictions should plan to make drafts available for comment per AB 215 and HCD guidance to ensure that the public has adequate opportunity to comment on drafts before elements are submitted for HCD review.

East Bay Housing Organizations

Oakland, CA 94612

RE: Comments on Draft Housing Element for 2023-2031

Dear General Plan Update Team:

Thank you for the opportunity to comment on the draft Housing Element. We appreciate all the work that has gone into producing this document, and we offer our comments with the hope that the City will incorporate them to produce a final document that moves the City in the direction of significant progress to achieve housing justice and meet our current and future housing needs.

EBHO is a member-driven organization working to preserve, protect, and create affordable housing opportunities for low-income communities in the East Bay by educating, advocating, organizing, and building coalitions.

Our comments are organized into the following five areas:

- Public Outreach and Participation
- Evaluation of Past Performance
- Affirmatively Furthering Fair Housing
- Site Inventory
- Action Plan

While we are submitting these comments to meet the City's deadline for its 30-day public comment period and allow the City time to review and respond to these comments in its submission to HCD, we intend to continue reviewing and commenting on the document during HCD's 90-day review period.

Public Outreach and Participation

The City's public outreach for the 6th Cycle Housing Element Update has been commendable and the City has done far more outreach than in past cycles, with a particular effort to reach out to marginalized and previously excluded communities. The City held numerous stakeholder sessions, community workshops, pop-up events and other efforts, and solicited a large number of comments. We look forward to seeing many of those comments and suggestions included in the next draft of the Housing Element.

We were disappointed, however, with the manner in which the Draft Housing Element was released for public review and comment and the way in which it was presented to the Planning Commission, City Council Community and Economic Development Committee, and others:

- The draft document, which runs to more than 800 pages including all its appendices, contains no executive summary or other guide. At a minimum, both the draft and final document should include a summary narrative that outlines the key findings of the evaluation of past performance, the results of the Fair Housing Assessment including identification of the most important underlying factors to be addressed, the identified governmental and non-governmental constrains to housing, a summary of the site inventory that quantifies and maps key issues such as the geographic distribution or concentration of sites – particularly those for lower income households, and key elements of the action plan including a listing that highlights new programs and policies.

- The presentation of the draft Housing Element to both Planning Commission and City Council was subsumed within a much larger information report on the overall update of the City's General Plan. As such it wasn't clear from the lengthy title of the agenda item that this was the opportunity to provide comments on the Housing Element. At those meetings, the presentation focused on the update process but did not include any information on the actual content of the document. It wasn't until we commented on this that a summary presentation was finally made available halfway through the public comment period. We do note that the Planning Commission scheduled a subsequent meeting to review the draft in more detail.

Evaluation of Past Performance

As noted in Appendix A, performance in meeting the RHNA goals of the 5th Cycle Housing Element has been mixed. From 2015 through 2021 (7 years out of the 8-year planning period), the City has issued permits for more units than its total RHNA. However, as the Draft notes, this has been disproportionately concentrated in the Above-Moderate Income category, where the City has already issued permits for nearly 200% of its RHNA, while falling far short for Very Low, Low and Moderate Income. The result has been a "housing balance ratio" of one unit of lower income (VLI + LI) housing for every eight units of Above Moderate-Income housing, despite a RHNA goal of one unit of lower income housing for every 1.9 units of Above Moderate-Income housing.

Oakland has long passed the point where it needs to make special efforts to attract market-rate development. Over the 3rd and 4th housing element cycles (1999-2014), Oakland permitted an average of just under 700 units per year, rarely exceeding 1,000 in a year, and of which 73% were Above Moderate Income. In the current cycle, the average has been 2,400 permits per year, with only two years below 1,000, of which 88% were Above Moderate Income.

In light of this record, the evaluation of past performance should take a harder look at the reasons for this disproportionality. In particular, the City should assess the need for continuing to

incentivize production of market-rate housing without conditioning such incentives on production of affordable units or payments of appropriate fees to the Affordable Housing Trust Fund, particularly since the 6th cycle RHNA requires not only a much greater number of units, but also a higher proportion of lower income units.

The evaluation needs to not just provide data on past performance, it should include analysis of what is working and what is not, the reasons for this performance, and a serious consideration of which programs need to be discontinued or seriously modified.

Affimatively Furthering Fair Housing

Despite having completed a Fair Housing Assessment in Appendix D, there still appears to be a disconnect between this assessment and the housing element itself. In the Introduction chapter, the City refers to "an affirmatively furthering fair housing analysis (AFFH), which guides the analysis of each set of requirements." Similarly, Appendix D is labeled as the "Affirmatively Furthering Fair Housing Draft" but is primarily a fair housing analysis. The new statutory requirement to affirmatively further fair housing requires more than an analysis of fair housing issues. The analysis must identify and prioritize the key factors contributing to segregation and disparities in housing opportunity and conditions, and then the City must develop both the site inventory and the action plan in ways that address these factors, along with clear metrics for determining whether those actions result in real improvements. It is not enough to determine after the fact whether an AFFH-neutral selection process results in non-discriminatory outcomes. The requirement to affirmatively further fair housing must fully inform the site inventory and action plan. We encourage the City to review HCD's April 2020 AFFH Memo (AB 686 Summary of Requirements in Housing Law) and its April 2021 AFFH Guidance, which includes detailed explanations of specific requirements for housing elements, to ensure it is fully meeting these requirements

Among the issues we have identified are the following:

- The Fair Housing analysis does not consider whether the City's zoning contributes to enduring patterns of racial segregation. The word "zoning" barely appears in the analysis, and while the Draft Housing Element notes that most of the City's residentially zoned land is zoned for single-family housing, this is not related back to patterns of racial segregation. Not surprisingly, in the absence of such an analysis, the City conducted its site inventory with the aim of meeting its RHNA numbers without having to rezone any sites. The Housing Element should include an analysis of the extent to which existing zoning is a barrier and a set of strategies to overcome this barrier through strategic rezoning.

- Table D-9 provides a brief summary of fair housing issues, contributing factors and proposed actions, but the proposed actions are fairly general and not tied back to the action plan. We recommend that Table D-9 be revised to explicitly cross-reference specific actions described in the action plan itself.

- Table D-9 notes as one issue that "Affordable housing is limited by location and housing type," but there's little examination of the reasons for this. The table recommends that this be addressed primarily through mobility strategies including expanded use of Housing Choice Vouchers but fails to note that in many of the higher opportunity areas, rents are far higher than what's allowed for with the Housing Choice Voucher payment standards. While there is a vague call to "eliminate single-family zoning," it's unclear if this refers to allowing 2-4 units buildings in single-family zones, or if it means expanding multifamily zoning at densities of 30 du/acre or greater. Finally, while it is proposed that affordable housing be increased in high opportunity areas, there's no specific program referenced here by which this might be achieved, particularly given the limited number of lower income sites identified in high opportunity areas.

Site Inventory

The proposed site inventory raises a number of concerns for us, with respect to how the information is provided, how the sites were selected, and whether the inventory adequately addresses the requirement to affirmatively further fair housing:

- The site map is at a scale that makes it difficult to adequately see whether these is an equitable geographic distribution of sites, particularly sites for lower income housing. The City should provide a series of maps for each planning area or council district in addition to a single citywide map.

- The site maps should be overlaid on maps of key demographic indicators, particularly racial concentrations and concentrations of high- and low-income households. It would be especially useful to map sites against areas of concentration of white residents vs concentrations of people of color.

- The City recently provided links to an interactive GIS map. This map would also benefit from additional layers showing key demographic indicators including race and income. Sites should be color coded for income level (lower income, moderate income, above moderate income). Rather than shading the parcels, which at best indicates the relative size of parcels, sites should be indicate with dots of different sizes representing the number of units that can be accommodated on the site.

- The Excel table for the site inventory has modified the total capacity column and eliminated the formula that is in the State's template spreadsheet and replaced it with actual numbers. The result is that in a number of places the entry for "total capacity" does not equal the sum of the columns for lower, moderate and above-moderate income capacity. This should be corrected, since at present the sum of the total capacity column exceeds the sum of the individual columns.

- The inventory should provide more detail on the current use of non-vacant sites. In particular, while the inventory identifies whether non-vacant sites have office, commercial, or other uses, it does not distinguish between sites with active uses and those with vacant buildings. That information is needed to assess the likelihood that a site will become available during the planning period.

- The projection that roughly 90% of all new ADUs will be affordable to lower income households is significantly different from the regional ADU affordability distribution provided by ABAG (see Appendix C, page 25). The City has relied on a limited (and not necessarily representative) survey that was conducted as part of a City-commissioned report. Data on ADU rental rates is based on just 56 responses to this question. It indicated that the average rent for an existing ADU is $1,112. However, one third of the responses indicated that their ADUs were being occupied rent free. As these units are likely being provided to family members, without further data it cannot be assumed that these units are available to and occupied by low-income households. The calculation of average rents should remove the zero rent units from the calculation.

  Further evidence that the $1,112 figure is unlikely to apply to newly created ADUs is contained in this same City-commissioned report. That study includes model pro-formas for several ADU development scenarios and uses rents that range between $2,360 and $3,029 per month. The City should re-evaluate its projections of affordability level for newly created ADUs and revise the site inventory accordingly.

- There is little discussion or analysis of how the inventory does or doesn't change patterns of segregation. Table C-19 on page C-83 shows that for the preliminary site inventory, 26.1% of lower income capacity is located in moderate to highest resource tracts, while 36.4% of above moderate-income capacity is located in these tracts. On its face this does not appear to further fair housing. While the City has provided additional AFFH sites, it has not indicated the extent to which those supplemental sites would offset the disparity described above.

- The geographic distribution of sites is not surprising in light of the City's decision to focus only on opportunity sites that require no rezoning, and to rule out in advance any rezoning of low-density areas to accommodate some of the lower income portion of the RHNA. While the City proposes, outside of the site inventory, to consider some future rezoning, the areas that will be studied are not identified and it appears that the focus will be more on accommodating "missing middle" housing types that cannot be assumed necessarily to be affordable to lower income households.

- The City explains the relatively small proportion of lower income sites in high and moderate resource areas by noting that significant portions of these areas are also very high fire hazard or seismic hazard areas, which are located primarily in the most affluent portions of the city with the greatest degree of racial segregation. At the same time, other hazards such as industrial pollution, poor air quality, or sea level rise, were not

considered disqualifying. The result is a set of criteria that by definition rule out the majority of high opportunity areas and areas of concentration of affluence and white population.

- The City justifies concentration of affordable housing in lower opportunity areas as a strategy of investment in these areas to prevent displacement. However, State guidance is clear that this needs to be coupled with place-based community development strategies that involve investments not only in housing, but also in enhanced infrastructure, services, schools, jobs, and other community needs that serve the existing population in at-risk neighborhoods. While the Draft Housing Element makes reference to the need for such investments, it does not provide adequate detail on specific programs, strategies or non-housing investments to be pursued, the anticipated outcomes, or any metrics for determining if such programs are effective in stabilizing at-risk communities.

Action Plan

We are not able to provide detailed comment on each and every policy and action at this time. Additional and more detailed comments on the Action Plan may be submitted during the HCD review period. We do want to call attention to the following:

- Much of the Action Plan consists of continuation of policies and programs already in place. Since it's clear that existing policies have resulted in over-production of market-rate housing and under-production of lower income housing, the City must consider how existing programs can be recalibrated to produce better results.

- Where new programs are mentioned, they are generally described with terms such as "consider," "study", or "evaluate". These are not actions in themselves. HCD has been clear in its guidance and in reviews of draft housing elements in other regions that these kinds of general statements are not sufficient. In its review of Los Angeles' Draft Housing Element, HCD clearly stated:

  > Programs must commit to completing an action that will have an actual impact on housing such as "amend," "revise," or "establish"

  While we would like to see the Housing Element itself be the vehicle for new housing policies, where this is not possible then *at a minimum the Housing Element should commit to bringing concrete legislation before the City Council for adoption by a specific date*. Moreover, these dates should be in the first few years of the housing element. Postponing these studies to the later years means that many of these new programs, if implemented at all, will have limited impact in the housing element cycle.

  This is not a new issue. There are a number of policies and programs that the City has pledged to "consider" for multiple housing element cycles without ever having a full

policy discussion and proposed legislation before the City Council. For this update, the City should commit to move beyond this.

- In many cases the time frames are vague. Specific milestones and deadlines for completion should be called out.

- There is no clear prioritization of the many actions contained in the Action Plan. Which actions are most important to achievement of the City's goals and objectives? For the many new programs and policies that the City will "consider" or "study," which are the most important and what resources will be available to ensure that they are completed in a timely fashion?

- Anticipated outcomes and metrics are insufficient. Many of the action items have no quantified objectives and it is unclear what outcomes are anticipated or how the effectiveness of these actions, particularly in addressing fair housing issues, will be assessed.

- While the Action Plan discusses how the City's major goals address AFFH, it doesn't clearly identify specific actions that address priority factors for AFFH. HCD's guidance on affirmatively furthering fair housing is clear that jurisdictions must identify underlying factors that create and maintain segregations and inequitable opportunities and outcomes, and then select a number of factors that are the highest priority and ensure that the site inventory and action plan are clearly related back to these priority factors.

- The City should not take actions that incentivize market-rate housing without requiring affordability in return. In the past, many policies that could be used to incentivize affordable housing have been implemented across the board without any affordability requirements, leaving the City with limited options for incentives specifically to produce affordable housing. After two decades of significant above-moderate income housing production dating back to the "10K" plan, it's clear that such incentives are no longer needed. Rather than continuing to "expand housing for all economic levels" the housing element action plan needs to focus on the most deficient areas and therefore must prioritize actions that will improve performance in creating and preserving housing for the lowest income individuals, including persons who are currently unhoused.

We offer specific comments on the following action items:

Action 2.2.5 The City should provide a specific date for adopting SB 330 anti-demolition protections. Since this is a matter of bringing the City's code into compliance this should be implemented by the end of 2023 at the latest, including extending it beyond SB 330's sunset date.

Action 2.2.6 We strongly support efforts to reduce speculation in housing through both a speculation tax and adoption of Tenant Opportunity to Purchase Act/Community Opportunity to Purchase Act (TOPA/COPA) legislation.

Action 2.2.8. In place of vague action to study a possible TOPA/COPA policy, the City should commit to bringing a TOPA/COPA ordinance before the City Council for adoption within the first year of the housing element.

Action 3.3.1 Any strategy regarding use of public land should start with adoption of a public land disposition ordinance consistent with the policy framework adopted by the City Council in December 2018. If the City is now proposing to abandon that framework and take a different approach, that should be clearly stated and presented to the City Council as a change in adopted policy.

Action 3.3.3 This action speaks primarily to provision of rental assistance but includes as part of its objective the statement that "100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle." This statement should be included in action 1.1.5, which currently contains no actual commitment.

Action 3.3.5 We strongly support an Affordable Housing overlay that provides by-right approval of 100% affordable housing projects citywide, wherever zoning currently permits it. We also support identifying specific incentives and bonuses that could be part of such an overlay, but that process should not delay the immediate adoption and implementation of a by-right overlay.

Action 3.3.8 We support revision of the Affordable Housing and Jobs/Housing Impact Fee programs, with particular attention to the amount and timing of the fee and recalibration of the on-site alternative compliance option to provide an outcome (number and affordability of units) comparable to what would be achieved through investment of the fee in affordable housing. This analysis was supposed to have been completed by the end of 2021 for presentation to the City Council in early 2022 and was to involve community participation throughout the process and not just in response to a completed study. This has not been the case. The City should commit to a firm date for revision of these ordinances, and should ensure that all evaluations and assessments include meaningful community involvement.

Action 3.3.9 We support deferral or reduction of planning and building fees to increase the feasibility and reduce the cost of producing affordable housing. In particular, we support deferring or reducing building permit fees. For City-financed affordable housing, fee payments could be deferred until a certificate of occupancy is issued, as the City has ample leverage to ensure that those fees will be paid.

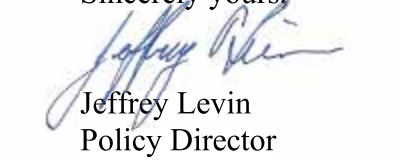
Action 3.3.10 We support the creation of a Citywide Enhanced Infrastructure Financing District (EIFD) with a primary goal of providing additional funding resources for affordable housing.

Action 3.3.12 We support continuation of the Acquisition and Conversion to Affordable Housing (ACAH) program, including support for community land trusts and limited equity cooperatives in addition to traditional nonprofit housing.

3.3.15: We support continuation of density bonus incentives, but call on the city to evaluate any barriers to a broader use of the density bonus program, including information on what developers have shared regarding how this program might be improved or expanded. His evaluation should also distinguish between use of density bonus for 100% affordable projects vs predominately market-rate projects.

Action 3.3.16 We support increasing the Real Estate Transfer Tax on higher end transactions including dedication of that increased revenue for programs that produce, preserve and protect affordable housing opportunities. We urge the City to move forward to place such an item on the November 2024 ballot to maximize the likelihood of passage.

Action 3.3.18 We strongly support extension of the Measure KK infrastructure and affordable housing bond, with a substantial increase in the share and amount devoted to housing production and preservation, at a scale that will make a significant impact on Oakland's pressing affordable housing needs. This is an urgent priority and should be implemented as rapidly as possible.



Action 3.4.10 For inventory sites that are carried over from previous housing element cycles, the City must commit to actually rezone those sites – perhaps through use of a zoning overlay – that provides for by-right approval on these sites if a minimum of 20 percent of the units will be affordable to lower-income households. Ideally this should be implemented as part of the Housing Element itself. If not, then the Housing Element must include a specific rezoning program for these sites.

Action 3.6.4 We support active encouragement of use of SB 35 to provide by-right approval for 100% affordable housing, including training and direction to Planning staff that this should be affirmatively pursued.

Action 5.2.8 We have substantial concerns that, given the limited targeting of high opportunity neighborhoods in the site inventory, a "mixed-income" strategy in areas of concentration may lead to more gentrification and displacement. The City must ensure that a better mix of incomes in a neighborhood is not simply capturing a point in time where a neighborhood transition is actually taking place. We note that despite acknowledging the need for place-based strategies to stabilize and improve low resource areas, these programs are not included in the Action Plan.

We again thank you for the opportunity to comment on this Draft Housing Element, and will continue to participate and comment throughout the update process. We look forward to your response to these comments as part of your submission of the Draft Housing Element to HCD.

Sincerely yours,

Jeffrey Levin
Policy Director

Comments on draft housing element

COMMENTS ON CITY OF OAKLAND GENERAL PLAN DRAFT HOUSING ELEMENT

Submitted by Tom Cooke, June 27, 2022

The draft plan identifies a multitude of housing issues and problems and sets forth many admirable goals and policies to be addressed. The draft checks off all the boxes, and makes the case there are sufficient parcels and capacity to meet the State mandated housing goal, to meet compliance with State housing element requirements.However, if Oakland is to make any meaningful process in addressing its housing needs a more *proactive, implementation orientation is required.*The comments below suggest several means by which to do so.

1 Expand search and identification of potential housing sites. It appears the planners relied primarily of other sources to identify potential sites and did not conduct original search and analysis. Have the many church properties for example been surveyed? Have there been any surveys done to identify underutilized commercial property with housing potential for either rezoning or mixed use. other than those suggested by the community? Provide scheduling for any planning or zoning changes required to facilitate housing construction and conditions thereof.

2. Although extensive tables documenting the characteristics of many sites are provided, any sense priority is lost. To off set this problem a more selective, high priority site category should be established to promote and expedite housing construction. Sites on this list should be given priority for local and other funding resources. Criteria already provided in the draft should be refined (simplified) to distinguish such sites. As necessary such sites should be designated for plan and/or zoning changes to avoid preemption by non-residential development.

A good example of such sites is the Ridge 2 site located at Broadway and Pleasant Valley Road.

3. Identify and set forth more specific models for housing/rental mechanisms such as limit equity condominium, co-housing, and cooperatives.

BUILD AFFORDABLE FASTER

June 29, 2022

To: Lakshmi Rajagopalan, Planner IV

CC: California Department of Housing and Community Development

Re: Feedback on Draft 2023 - 2031 Housing Element Update

Ms. Rajagopalan:

Thank you for the community engagement and technical work you've led in the process to update our city's Housing Element and General Plan. We are writing to submit comments on behalf of Build Affordable Faster (BAF), a state and regional advocacy program of Tenants and Owners Development Corporation (TODCO Group), an affordable housing developer. The policy advocacy branch of our organization, Build Affordable Faster, advocates with and for vulnerable, low-income families and historically marginalized communities of color to increase affordable housing and build a strong social safety net which supports the health, safety, and well-being of California's diverse communities.

We are at a critical moment for the City of Oakland where homelessness has grown exponentially, ballooning to 3,337 unsheltered individuals according to the February 2022 Homeless Point-In-Time Count Report. Oakland did not fulfill its 2015-2022 RHNA requirements for very low-, low-, and moderate-income households, and those 1171 very low-income units that were not constructed could have housed up 35% of the existing unhoused population.

Meeting our goals to produce affordable housing is a priority for Oakland residents. In a September 2020 David Binder survey of Oakland voters (Margin of Error: ±5.7%) by David Binder for BAF, 83% of residents believe we are not building enough for low- and middle-income residents. 71% believe market rate construction is too expensive and pushes out existing residents, and 83% believe market rate housing should include as many affordable housing units as possible.

Next, please (tell me / indicate) whether you agree or disagree with each of the following statements.

	AGREE		DISAGREE		Don't know	SUMMARY	
	Strongly	Some-what	Some-what	Strongly		Agree	Disagree
We are already building enough housing for low- and middle-income residents.	2	5	19	64	10	**7**	**83**
Market-rate construction is too expensive and pushes out existing residents.	47	24	14	8	6	**71**	**23**
New market-rate housing developments should be required to include as many affordable housing units for low and middle-income residents as possible.	61	22	8	5	4	**83**	**13**
When new housing is constructed on publicly owned land, at least 33% of the units should be affordable to low and middle-income residents.	66	21	4	4	4	**88**	**8**
Underused commercial properties, such as abandoned malls or parking lots, should be rezoned for housing, excluding industrial zones.	51	39	3	1	6	**90**	**4**

It is not clear how the action plan outlined in the draft housing element will achieve our RHNA goals for affordable housing, especially when many of the strategies are a mere continuation of policies and programs currently in place which have not been sufficient to prevent displacement of long-term residents and have resulted in the massive under-production of moderate- and lower-income housing.

There is no reflective assessment of what program elements have been most successful, nor indication of how existing programs should be amended to produce better outcomes. The site inventory and action plan should include an explicit correlation with and metric for how these components address patterns of racial segregation that exist in Oakland, and specific action steps that will affirmatively further fair housing (AFFH) and correct exclusionary neighborhoods. While each section features a discussion of how the overarching goals address AFFH, the site inventory and action plan are not clearly related back to the priority contributing factors identified in the fair housing assessment, along with clear metrics to measure results, as directly by HCD's guidance.

The housing element should reaffirm the principle of housing as a fundamental human right, as this has been a recurring theme in many of the community workshops and other public meetings over the past several years. In these meetings and in our poll, it is clear - Oaklanders want stronger anti-displacement measures and more affordable housing.

Below we highlight and comment on key issues and action steps we encourage the city to prioritize:

Tenant Protections, Anti-Displacement and Preservation of Existing Affordable Housing

We support Action **1.1.3 to strengthen Ellis Act Ordinance protections**. The city should be more actively advocating for state legislative reform to ensure the Ellis Act is not used by large conglomerates to push out tenants. We encourage more specificity regarding City Council

direction to ensure that this is a legislative priority for the firm representing the city's interests in Sacramento.

We support **Action 1.1.5 to provide eviction defense and implement a right to counseling**. Post pandemic, the city needs to increase its ability and capacity to represent individuals in unfair evictions. The administration and city council should ensure adequate funding for these programs during the current and upcoming two year and mid cycle budget processes.

We support **Action 1.1.7 to monitor neighborhood displacement risk factors**. The city should build on the mapping work already produced for the site inventory, zoning, environmental justice analysis and other components of the housing element and general plan by conducting further analysis including an overlay of key demographic information to identify communities vulnerable to displacement. The city should allocate resources accordingly and center outreach and advocacy efforts in these areas in appropriate languages.

We strongly support **Action 1.1.11 to provide a local preference in affordable housing projects**, **Action 2.2.6 to reduce housing speculation through an anti-speculation tax**, and the adoption of **Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act** that grants the right of first offer and right of refusal for tenants, community land trusts and nonprofits.

Regarding **Action 1.1.12 to negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land**: we urge the city to set strong community benefits standards including deeply affordable housing requirements and anti-displacement resources for tenants, across the board, which the approval of development agreements is conditioned upon. This would help offset the impacts of further displacement and gentrification and help provide more certainty for the city, project developers and other stakeholders, versus an unpredictable and resource intensive negotiation process.

Housing Production

We strongly support the recommendations in the overarching **Policy Goal 3.1 to facilitate production of deeply affordable housing**. This policy goal goes hand in hand with **Action 3.3.5 to implement an affordable housing overlay** to establish by right (non-discretionary) zoning for 100% affordable housing developments and development projects that offer higher affordability and **Action 3.3.1 is key to make all available city-owned property for affordable housing** and ensure that city-owned property goes to extremely low-income households as stated in **Action 3.3.4**. For any streamlining of 100% affordable, the city should explicitly mandate city staff to prioritize affordable housing projects.

In addition, **Action 3.2.3**, is key to opening more land, and to promote flexibility in adaptive reuse to increase the housing stock. The city should look at vacant commercial stock and make it easier for it to be residential with higher affordability. In our previously referenced 2020 David Binder poll, allowing for residential for underutilized commercial properties had 90% support among Oakland voters. We believe in unlocking the potential of thousands of square

miles of urban and suburban commercial districts, transforming underutilized office parks and expansive parking lots into hundreds of thousands -- or even millions -- of new market-rate and affordable homes.

The cost of construction materials, high interest rates, and cost/competition for land are huge factors that will impact the delivery of housing projects, especially affordable housing projects. The city should not only engage **Action 3.3.11: Support innovations by design** but convene stakeholders such as labor and developers to significantly increase production of housing using construction innovations, such as exploring modular, to match housing needs.

Lastly, given the city's absolute failure to deliver adequate affordable housing, and exceeding the market rate production goals, any implementation of **Action 3.3.15 (density bonus incentives) should always be coupled with increased affordability requirements**.

Financing

If the City is to meet its goal of building housing for the working and middle class it must provide a comprehensive financing plan for how we will build 10,000 very low-, low-, and moderate-income units by 2031, as required by our RHNA. We support **Action 3.3.16: Consider revising the Real Estate Transfer Tax** to use "a portion of the revised tax rate as a dedicated funding stream for affordable housing." We also support **Action 3.3.18 to reauthorize Measure KK** if it is a bond that predominantly addresses our housing affordability crisis.

We also support **Action 3.3.8 to right-size development fees** on market-rate developments. In our analysis below, the city only gets a mere fraction of what a developer could afford in 2020. Factors such as the current recession conditions, interest rates, and cost of construction materials may need to be re-visited.

Affordable Housing Impact Fee per Unit- For-Sale Homes						
	Single-Family - Hills	Single Family -Urban		Townhomes-Hills	Townhomes-Urban	
	zone 1	zone 2	zone 3	zone 1	zone 2	zone 3
2021 max fees (nexus study update)	$99,776	$41,839		$65,018	$53,813	
Actual Fees (2021)	$24,219	$17,375	$8,424	$21,060	$15,005	$8,424
Difference	$75,557	$24,464	$33,415	$43,958	$38,808	$45,389
% of max fee	24%	42%	20%	32%	28%	16%

EIFD

In 2019, the Mayor's Housing Cabinet published recommendations in the report *Oakland at Home: Recommendations for Implementing A Roadmap Toward Equity* which explored an Enhanced Infrastructure Financing District (EIFD) for affordable housing. Three years later, the draft Housing Element, also recommends considering an EIFD via **Action 3.3.10**, **Consider a citywide Enhanced Infrastructure Financing District (EIFD)**. We're concerned

about the proposed timeline and advocate that the city act with urgency regarding an EIFD that invests in the public good- affordable housing and associated infrastructure. A study and subsequent steps to form an EIFD should be completed in the near term, not 2028. Our agency has contracted with a respected third-party agency to do this analysis and is working with the city administration and other stakeholders to identify specific boundaries and uses for the EIFD revenues. An EIFD would allow for increased bonding capacity to leverage funding that local Oakland based developers can access to support the production and preservation of affordable housing.

Homelessness and Services for the Unhoused

Regarding Goal 4. Address Homelessness and Expand Services for the Unhoused, the codification of the controversial “Encampment Management Policy” in Policy 4.2, Action 4.2.1 and 4.2.3, should be reconsidered. While addressing homelessness should be a top priority for the city, many directly impacted members of the unhoused community and advocates for the homeless have registered formal opposition to the EMP and have requested that City Council rescind the ordinance. We urge the city to continue to engage these stakeholders to identify and build more consensus on ways to meet the health and safety needs of both unhoused residents and the greater Oakland community.

In closing, we appreciate the opportunity to comment on the draft housing element, and look forward to continuing the conversation, providing further input, and understanding how our comments are addressed and incorporated into revisions of the draft housing element submitted to the State. Thanks again for your work and please reach out if you have questions.

RE: Comments on Draft Housing Element for 2023-2031

Dear Lakshmi Rajagopalan,

Thank you for the opportunity to provide comments on the draft Housing Element. Save The Bay is appreciative of the work that went into this draft element, and we hope that our comments will help the city plan for more climate resilient housing in the years to come. We believe that climate SMART (Sustainable, Mixed-Use, Affordable, Resilient, Transit-Oriented) housing[1] can build resilience to climate impacts and reduce housing inequities.

Save The Bay is an Oakland-based, Bay Area-wide organization that protects and restores San Francisco Bay for people and wildlife. We envision a clean and healthy bay, free from pollution, ringed by restored wetlands, and Bay Area communities that are resilient to and prepared for the intensifying impacts of climate change.

As the City of Oakland plans to meet its RHNA goals, selecting sites that are resilient to the impacts of climate change is critically important. New housing construction, especially for low-income communities who face the greatest risk from climate impacts, should be located away from areas prone to fires, flooding, extreme heat, and sea level rise. Dense, affordable, infill development close to transit can connect historically under-invested communities to resources and infrastructure across the city and region. Building SMART housing will also advance Oakland's climate goals by mitigating greenhouse gas emissions from driving by supporting the use of alternative modes.

One opportunity to add more climate SMART housing in Oakland is in the Rockridge neighborhood. Housing built here would be accessible by BART and bus lines, and would be more resilient to extreme heat[2] due to an abundance of trees and parks. This neighborhood is also more resilient to other climate impacts, as it is outside of the sea level rise and fire hazard zones. Affordable housing in this high opportunity area is especially impactful toward reducing income inequality and racial segregation, which the City of Oakland is required to address under AB 686. Prioritizing dense, affordable housing development in this and other high opportunity areas through strategic rezoning is necessary to affirmatively further fair housing as required by law, and to move toward racial and environmental equity in Oakland.

The Housing Element update provides an opportunity to advance both climate and housing justice by planning for dense, climate SMART housing. Incorporating resilience into this Housing Element update will ensure that Oaklanders are protected from climate impacts for years to come.

Thank you for your consideration.

Sincerely,

David Lewis
Executive Director, Save The Bay

To: Lieberworth, Audrey <ALieberworth@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

My name is Louis Eisenberg, and I am an Oakland resident and homeowner in Upper Rockridge. I am writing to express my strong support for a comment letter submitted by the Rockridge Community Planning Council (RCPC) Board on the topic of Oakland's draft Housing Element. In particular, I want to emphasize my support for the following paragraph:

> *First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses.*

Thank you,

Louis Eisenberg

Housing Element - Rockridge meeting

Maya Schechter [redacted]

Tue 8/16/2022 1:41 PM

To: Lieberworth, Audrey <ALieberworth@oaklandca.gov>

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Hello,

I am writing to share a comment in advance of Thursday's Rockridge meeting on the draft Housing Element. I cannot attend the meeting but I strongly support the points made by RCPC in the letter sent to the city, including allowing and incentivizing housing, especially affordable housing, on all of sites listed in the letter:

- CCA Site
- Rockridge BART Site
- Triangular site at the corner of Claremont and College
- A portion of the Dreyer's Ice Cream site
- Wendy's site at College and Broadway
- Ridge site at Broadway and Pleasant Hill
- Carpet store site at College and Kales
- Dialysis Center site at Claremont and Clifton
- DMV Site at Claremont and Cavour
- Chevron Station Site at Telegraph near highway 24

I also support the other points made to encourage housing in Rockridge.

Thanks for your work on this.

Best,
Maya Schechter, Rockridge resident

RE: Oakland's 6th Cycle Housing Element Update

Dear City of Oakland:

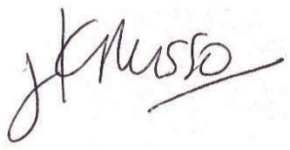
Thank you for the opportunity to provide input on the city of Oakland's housing element. Your work supporting your community to meet its housing needs is critical in addressing the housing affordability crisis. We understand that at this moment in the housing element process, your jurisdiction is awaiting input from HCD on your draft housing element. As such, we are offering the attached equitable policy resources in addition to offering technical assistance from Baird + Driskell Community Planning ("B+D") if your jurisdiction is interested in this level of support.

The Partnership for the Bay's Future ("PBF") is a public-private-nonprofit partnership working to create a more livable Bay Area in which diverse people of all walks of life can afford to live and thrive. To do so, we address the challenges of housing and protecting tenants through the support of equitable policy change as well as investing in the production and preservation of affordable housing.

In consultation with government leaders, housing policy experts, and communities, we have compiled a list of equitable housing priorities that we hope Oakland will consider incorporating into the new housing element. In some cases, these are policies that housing element law requires jurisdictions to address as a potential action or recommendation in their housing elements, but in other cases, these are suggested policies that we are raising up as equitable planning priorities. We are including the following resources for your review and consideration:

- a slide deck covering each priority policy idea, with template language for your jurisdiction to consider,
- examples of places where the policy has been adopted, and
- additional links and resources.

We believe that Oakland's current efforts already include many of the listed policies, which we applaud. These summaries can be used as resources for staff as they communicate with both decision makers and the public. If you are interested, we are happy to provide further assistance to incorporate these policies into your housing element as well as help draft talking points that can be tailored for local implementation.



We believe the following policies can play an important role in meeting the requirements of this housing element and supporting thriving communities:

1. Favorable Zoning and Land Use
    - Make multifamily infill easier to develop
    - Allow, require or encourage multifamily housing in more places
    - Allow or encourage missing middle housing in single-family neighborhoods
    - Provide incentives for affordable housing development
    - Provide incentives for affordable ADUs and "missing middle" housing
2. Accelerating Production Timeframes
    - Streamline development approvals and environmental review process for multifamily housing
    - Streamline permitting process for multifamily housing
3. Reducing Construction and Development Costs
    - Ensure local requirements are not making development more expensive without requisite benefits
    - Actively support the use of modular and factory-built construction methods
4. Providing Financial Subsidies: Generate new or dedicate existing revenue for affordable housing
5. Advocating for Rent Control and Just Cause for Eviction Policies
    - Adopt or update rent stabilization policies
    - Adopt or update just cause eviction policies
6. Advocating for Community Land Trusts (CLTs): Support the formation and operation of community land trusts
7. Advocating for Inclusionary Zoning and Impact Fees: Create or review/update inclusionary housing (including in-lieu fees) and commercial linkage fee requirements
8. Inventory of Sites: Ensure that land is equitably zoned for multifamily housing, especially in high-opportunity areas

If you have any questions, please contact me (krusso@sff.org) and our colleagues at Baird + Driskell (Kristy Wang, wang@bdplanning.com, and Joshua Abrams, abrams@bdplanning.com). We do hope that you consider tapping into the B+D team's technical assistance to explore some of these policies further or receive support with policies Oakland is already considering. Please contact us and we will be happy to arrange that.

Thank you again for the opportunity to provide input into Oakland's housing element. We appreciate all your efforts to address the housing needs of Bay Area and California residents.

Sincerely,

Khanh Russo
Vice President of Policy and Innovation
San Francisco

PBF's Priorities for 6th Cycle Housing Elements

August 2022

Priority Policies and Actions

1. Favorable Zoning and Land Use
   - Make multifamily infill easier to develop
   - Allow, require or encourage multifamily housing in more places
   - Allow or encourage missing middle housing in single-family neighborhoods
   - Provide incentives for affordable housing development
   - Provide incentives for affordable ADUs and "missing middle" housing
2. Accelerating Production Timeframes
   - Streamline development approvals and environmental review process for multifamily housing
   - Streamline permitting process for multifamily housing
3. Reducing Construction and Development Costs
   - Ensure local requirements are not making development more expensive without requisite benefits
   - Actively support the use of modular and factory-built construction methods
4. Providing Financial Subsidies: Generate new or dedicate existing revenue for affordable housing
5. Advocating for Rent Control and Just Cause for Eviction Policies
   - Adopt or update rent stabilization policies
   - Adopt or update just cause eviction policies
6. Advocating for Community Land Trusts (CLTs): Support the formation and operation of community land trusts (CLTs)
7. Advocating for Inclusionary Zoning and Impact Fees: Create or review/update inclusionary housing (including in-lieu fees) and commercial linkage fee requirements
8. Inventory of Sites: Ensure that land is equitably zoned for multifamily housing, especially in high-opportunity areas

Make multifamily infill easier to develop

Explore the following policies and programs:

- **Revise development codes:** Review multifamily development standards to allow greater density, including floor area ratio, height limits, minimum lot or unit sizes, setbacks, lot coverage and/or allowable dwelling units per acre.
- **Reduced parking requirements:** Adopt policies that reduce parking minimums, establish parking maximums and encourage other practices that reduce cost and the amount of space dedicated to cars.
- **Eliminate design standards:** Eliminate or replace subjective development and design standards with objective standards that simplify zoning clearance and improve approval certainty and timing.
- **Form-based codes:** Establish form-based codes that can be paired with by-right approvals.

EXAMPLES

San Francisco, Berkeley and San Diego have eliminated minimum parking requirements in new housing development. San Francisco also has parking maximums.

Redwood City's Downtown Precise Plan links adherence to development standards with a streamlined approvals process.

Allow, require or encourage multifamily housing in more places

Explore the following policies and programs:

In mixed-use zones where commercial uses outcompete residential uses, cities could:

- **Change zoning standards:** Offer greater FAR, height and other zoning standards for residential developments in mixed use zones.
- **Encourage mixed-use:** Require applicants to build housing when applying to build commercial developments in mixed use zones

Cities can also ensure their regulations don't preclude the development of microunits, single room occupancy (SRO) buildings.

EXAMPLES

Redwood City's Mixed-Use Neighborhood District allows greater height and FAR for residential-only and mixed-use buildings than for commercial-only buildings.

In 2019, San Jose revised its planning regulations to allow for co-living housing types.

Allow or encourage missing middle housing in single-family neighborhoods

Explore the following policies and programs:

- **Rezoning:** Rezone in single-family neighborhoods to allow additional ADUs, duplexes, triplexes and other small-scale multifamily ("missing middle") housing
- **New standards and guidelines:** Establish design and development standards and guidelines that support missing middle housing types
- **SB 9 ordinances:** Develop local SB 9 implementing ordinances that encourage and support the creation of small-scale multifamily housing rather than merely comply with state requirements.

EXAMPLES

Portland has established a strong missing middle policy, including their Better Housing by Design work, focused on design guidelines and related zoning code changes in multi-family zones, and the Residential Infill Project development standards focused on single family neighborhoods.

Eugene, Oregon approved Middle Housing Code Amendments to comply with state law. The amendments include smaller minimum lot sizes, lot size reductions for affordable units, parking reductions for housing built near transit, and other changes.

Provide incentives for affordable housing development

Explore the following policies and programs:

- **Overlay zones:** Establish an affordable housing overlay zone to encourage the production of below-market-rate affordable housing with targeted incentives or relaxed requirements that go beyond state density bonus law
- **Incentives for developers:** Offer zoning concessions and fee exemptions as incentives to developers of multifamily housing projects which meet [JURISDICTION]'s housing needs, in exchange for an agreement that more than [#%] of the total number of units constructed will be affordable to lower-income households

EXAMPLES

Menlo Park's Affordable Housing Overlay Zone

Foster City's Affordable Housing Overlay Zone

Oakley's Affordable Housing Overlay Zone

Sunnyvale's waiver of parking requirements

Half Moon Bay's waiver of development standards

Provide incentives for deed-restricted affordable ADUs and "missing middle" housing

Explore the following policies and programs:

- **Lot splits:** Allow nonprofits and community land trusts (CLTs) to sell deed restricted affordable ADUs separately from the main house.
- **Increase ADUs per lot:** Allow nonprofits/CLTs to build two detached, deed restricted, affordable ADUs per property.
- **Community partnerships:** Develop zoning standards that provide additional flexibility to nonprofits/CLTs that want to build ADUs, including 2-story ADUs.
- **Upzoning partnerships:** Allow nonprofits/CLTs to convert single family homes into deed restricted, affordable duplexes, triplexes or quads (more permissive than SB 9)
- **Density bonuses:** Develop rules that extend the density bonus to 100 percent affordable projects smaller than 5 units.

EXAMPLES

San Diego allows an extra ADU on a site that has reached the maximum ADU limit if the extra one is deed-restricted affordable.

Piedmont has flexibility built into their ADU ordinance where larger ADUs are permitted if they are deed restricted affordable for low-income households.

Pasadena incentivizes the creation of ADUs affordable to Section 8 voucher holders with incomes below 80% of AMI. The city offers comprehensive assistance (with financing, designing, permitting, and constructing) and low-interest construction loans.

LA ADU Accelerator matches homeowners with older renters, providing landlord support and reliable rent in return for affordability.

LA Mas's Backyard Homes Project

Streamline development approvals and environmental review process for multifamily housing

Explore the following policies and programs:

In locations that have not yet met their housing targets, SB 35 pairs a streamlined approval process with objective design standards for infill projects that provide a certain level of affordability and comply with existing residential and mixed-use zoning and other requirements.

Localities could take it further by:

- Establishing by-right zoning and local systems/dedicated staff for more types of housing beyond SB 35-eligible projects
- Establishing by-right zoning in certain areas or neighborhoods

EXAMPLES

Redwood City's Downtown Precise Plan allows for the ministerial approval of certain multifamily infill projects.

Streamline permitting process for multifamily housing

Explore the following policies and programs:

- **Improve application processes:** Review application review and approvals process to identify improvements (convene stakeholders, hire an outside firm).
- **Pre-application checks:** Establish pre-application checks to ensure that applications are complete before submission.
- **One-stop-shops:** Establish one-stop-shop permitting process and/or a single point of contact for coordinating permitting across city approval functions (e.g., planning, public works, building) from entitlement application to certificate of occupancy.
- **Special expedited permits:** Establish priority permit processing or reduced plan check times for specific categories of housing (ADU/JADUs, multifamily housing, affordable housing, etc.)

EXAMPLES

San Diego has an expedited permitting process for affordable, infill and sustainable buildings.

Seattle has a expedited approvals program for new construction projects that meet certain sustainability requirements.

San Francisco's Mayoral Executive Directives on ADUs and setting timelines for approvals have sped up permitting processes by providing a rationale to create a sense of urgency and focus city staff.

San Jose had "ADU Tuesdays" at the city's permit counter in order to streamline ADU permit processing.

Ensure local requirements do not make development more costly without requisite benefits

Explore the following policies and programs:

- **Flexible standards:** Provide additional flexibility on development standards, including parking standards, for affordable housing
- **Reduce construction costs:** Review current local construction requirements and building standards for excessive and costly terms

EXAMPLES

Half Moon Bay's zoning code allows for flexibility in the application of development standards for affordable housing projects.

Actively support the use of modular and factory-built construction methods

Explore the following policies and programs:

- **Expedited permits:** Establish a clear and expedited approval and permitting process for modular and manufactured homes.
- **Pre-fab trainings:** Conduct or require a training for building officials and relevant staff to ensure they are aware of current state processes and requirements and how they intersect with local authority/responsibilities.

Generate new revenue and/or dedicate existing revenue towards affordable housing

Explore the following policies and programs:

- **Explore new or increased taxes:** Generate new dedicated revenue for affordable housing. This could include:
  - Sales tax increases
  - General obligation bonds
  - Transient occupancy taxes
  - Parcel taxes
  - Head taxes
  - Business license (landlord) taxes
  - Real estate transfer taxes
  - Vacant property and vacancy taxes
- **Prioritize existing revenue:** Establish priorities or set-aside existing local general funds for affordable housing.

EXAMPLES

In 2016, Santa Clara County voters and Alameda County voters approved general obligation bonds for affordable housing through Measure A ($950 million in Santa Clara County) and Measure A1 ($580 million in Alameda County).

In 2018, Oakland voters approved a vacant property tax that generates revenue for homeless services.

By resolution, San Mateo County's Board of Supervisors established funding priorities – including affordable housing uses – for 2016's Measure K half-cent sales tax extension.

In 2012, San Francisco established its Housing Trust Fund through a set-aside in the General Fund.

Adopt or update rent stabilization policies

Explore the following policies and programs:

Under California's Tenant Protection Act of 2019 (AB 1482):

- Rent cannot be increased more than 5% + your local CPI (Consumer Price Index) OR 10% annually – whichever of these is lower.

Localities could take it further by:

- Adopting a local ordinance with a smaller allowable annual rent increase
- Adopting a local ordinance that does not sunset in 2030

Localities could also dedicate funding and resources toward education and enforcement.

EXAMPLES

Several Bay Area jurisdictions have rent stabilization policies that go beyond state law (such as smaller allowed rent increases), including:

- San Francisco
- San Jose
- Oakland
- Berkeley
- East Palo Alto
- Mountain View
- Richmond

Adopt or update just cause eviction policies

Explore the following policies and programs:

California's Tenant Protection Act of 2019 (AB 1482) limits the reasons for which tenants can be evicted. This law does not cover all buildings or all tenants. It expires on Jan. 1, 2030.

Localities could take it further by:

- Applying protections on day 1 of a tenancy (instead of day 365)
- Requiring landlords to have a permit in hand before evicting tenants using the "substantial remodel" provision
- Passing a local ordinance that is permanent
- Expanding just cause eviction policies to cover new construction, single-family homes and condominiums

Localities could also dedicate funding and resources toward education and enforcement.

EXAMPLES

Berkeley, East Palo Alto and Oakland are some Bay Area jurisdictions that have existing permanent Just Cause evictions ordinances.

Most rental units in Oakland and Richmond are subject to their just cause eviction ordinances.

Support the formation and operation of community land trusts (CLTs)

Explore the following policies and programs:

- **Eligibility:** Ensure CLTs are eligible for local housing funding.
- **Opportunity to Purchase:** Establish a right of first offer/refusal that gives nonprofits/CLTs enhanced ability to buy property
- **CLT Incubation:** Establish an initiative to support the incubation or creation of a new community land trust. Provide financial support to CLTs in the early stages of organizational development.
- **CLT Pipeline Development:** Study the feasibility of requiring new inclusionary ownership units to be stewarded by a CLT.
- **Extra Flexibility:** Give CLTs extra flexibility to develop/steward ADUs, allowing CLTs to sell ADUs to low-income buyers and giving CLTs more flexibility with development standards (multiple ADUs, 2-story ADUs, etc.). *See affordable ADU slide*

EXAMPLES

In 2018, New York City funded a citywide CLT initiative to support the incubation/expansion of 10 CLTs

Cities like Irvine and Chicago have city sponsored/chartered CLTs that manage the affordable ownership stock.

Create or review/update inclusionary housing and commercial linkage fee requirements

Explore the following policies and programs:

- **Establish New Inclusionary Requirements:** Require the provision of affordable housing by the private sector through an inclusionary requirement for market-rate housing (including in-lieu fee options) and a commercial linkage fee paid by new commercial development.
- **Regularly Update Inclusionary Requirements:** Conduct an inclusionary housing feasibility study in [20XX] and develop policy recommendations on inclusionary zoning in [20XX].

EXAMPLES

Inclusionary housing requirements have been widely, but not universally, adopted by jurisdictions across the Bay Area.

San Mateo (city) and Boulder, CO are two examples of small to midsized cities that have set up strong inclusionary programs that deliver affordable units and maintain affordability over time.

Ensure that land is equitably zoned for multifamily housing, especially in high-opportunity areas

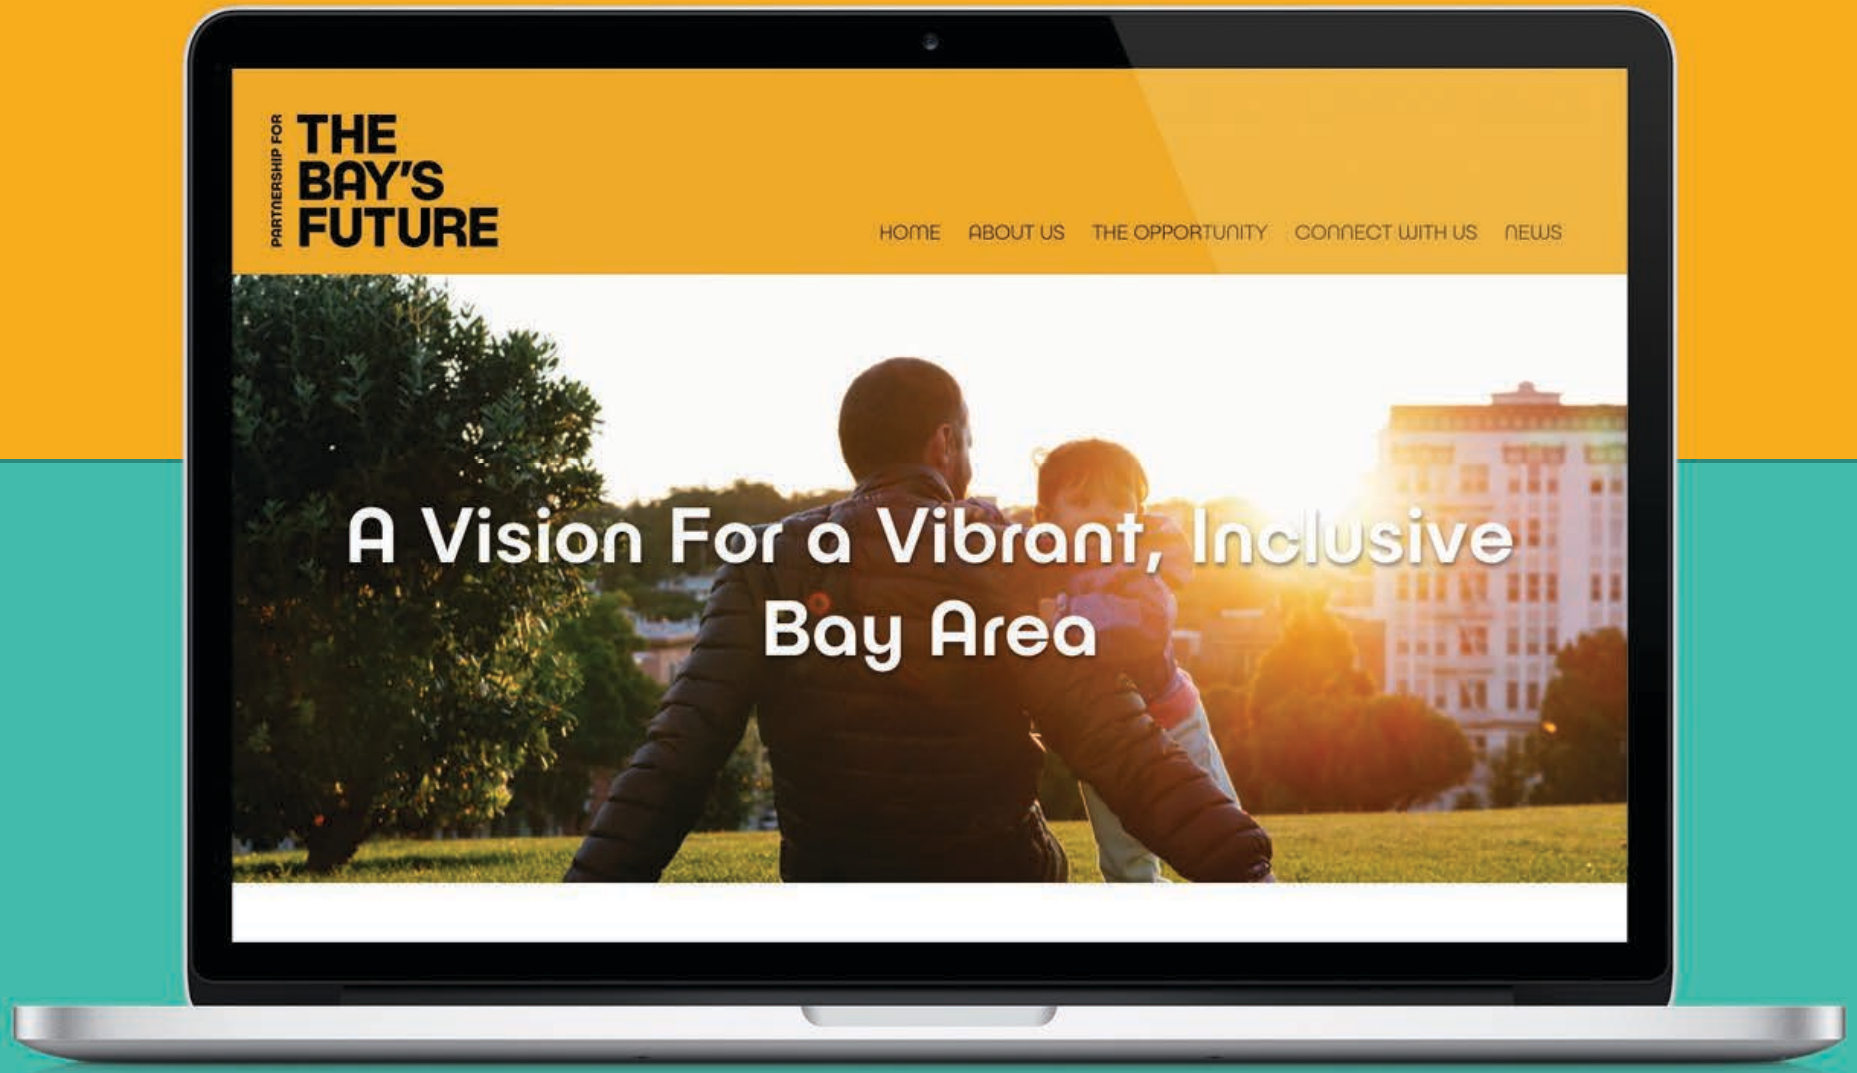
Explore the following policies and programs:

- **Zoning:** Rezone sites for multi-unit housing in high resource areas.
- **Public Land:** Set-aside publicly owned land in high opportunity areas for housing development.
- **Affordable Housing Siting Policy:** Develop an affordable housing siting policy to provide affordable housing equitably across a jurisdiction.
- **Tax Credit Competitiveness:** Conduct an analysis of a jurisdiction's geography for tax credit amenity scoring.
    - Zone more land for multi-family in amenity-rich areas, and do land assembly/acquisition in places that score highly for tax credits
    - Address gaps in communities that do not score highly for tax credit amenities, especially if they are high resource areas

EXAMPLES

Los Angeles's 6th Cycle housing element includes an objective to "Increase the utilization of public land for affordable housing with particular emphasis in high resource and gentrifying areas."

Seattle has a development siting policy that seeks to provide housing opportunities for the lowest-income and the most vulnerable populations across the city, including amenity-rich neighborhoods.



San Jose has begun a process to develop an affordable housing siting process to ensure the city meets its fair housing and affordable housing goals, including providing affordable housing in higher-opportunity neighborhoods.

Other equitable housing policies for further exploration

Explore the following policies and programs:

- Anti-tenant harassment policies (Oakland and Concord)
- Preservation policies including acquisition/rehab models
- Transit Oriented Communities (TOC) policies

Oakland General Plan Update

Draft Housing Element 2023-31
Missing Housing Justice Priority Policy Recommendations
from
Deeply Rooted Collaborative Community Engagement
Date : 09/29/2022

"The rampant displacement seen today in the SF Bay Area is built upon a history of exclusion and dispossession, centered on race, and driven by the logic of capitalism. This history established massive inequities in who owned land, who had access to financing, and who held political power, all of which determined–and still remain at the root of deciding–who can call the Bay Area home."
Othering & Belonging Institute, Roots, Race, Place: A History of Racially Exclusionary Housing in the SF Bay Area

The following list of priority housing policies are currently missing from the City's draft Housing Element. These proposals that begin to address the priority needs of Oakland residents most impacted by housing discrimination and injustice came from

Deeply Rooted's ongoing engagement with community residents (via interviews and surveys), Equity Working Group, and Deeply Rooted partner organizations.

*A few policies are listed under multiple departments.

Director Wiliam Gilchrist
Department of Planning and Building
City of Oakland
350 Frank Ogawa Plaza
Oakland, CA 94610

RE: Preliminary Zoning Proposals - Draft Housing Element 6th Cycle (2023-2031)

Dear Director Gilchrist,

We write to provide comments on Oakland's Preliminary Zoning Proposals (Proposals) as part of the Draft Housing Element for the 6th Planning Cycle (2023 - 2031). We welcome the power and extent of the proposed Affordable Housing Overlay. However, we have identified significant issues with the missing middle program, the sites identified to affirmatively further fair housing in Rockridge and elsewhere, commercial corridor rezonings, and the continued non-inclusion of promising, underutilized sites in low-VMT and high-resource tracts.

In terms of process, we notice Oakland identifies key feedback from community outreach for the general plan and housing element updates at the start of the proposals, but it is unclear how or where this feedback is reflected in the respective rezoning parts of the Proposals, or even whether they all represent suggestions the city has opted to take up. Please consider revising the Proposals to clearly identify how the key feedback is connected to and accomplished in the rezonings.

We summarize our comments as follows:

1. Revise the Missing Middle Program to ensure high-resource neighborhoods allow four units on most lots in practice, including providing setback relief and reducing/eliminating off-street parking minimums.

2. The proposed Rockridge rezoning sites have significant issues related to feasibility, equity and displacement risk; zoning a wider swath of land rather than picking a handful of sites would be more effective.
3. Choosing to leave in place current heights in Rockridge along College Avenue and Claremont Avenue, while miles of MacArthur Boulevard and International Boulevard in East Oakland are rezoned to allow significantly more height and development, is reinforcing patterns of spatial segregation. Oakland needs to be more ambitious with North Oakland standards to affirmatively further fair housing as required by state law.
4. Oakland should undo the 2011 downzoning along the high and moderate-resource Shattuck Avenue commercial corridor and increase heights to 45'.
5. We make various suggestions to improve the proposed Affordable Housing Overlay, including removing the exemption for height bonuses for prospective Areas of Primary Importance that are formed after the effective date of the rezoning.

Missing Middle Program

The proposed Missing Middle Program, while making some noteworthy changes, overall does not go far enough to meet the goals of the Missing Middle referral from CM Rebecca Kaplan and the Oakland City Council. In certain instances, *Oakland's draft Missing Middle Program represents a downzoning from the SB9 development capacity*.

Currently 2-4 units is the baseline set by state housing law. Oakland should be pursuing a framework that allows **more** than that baseline on a majority of single-family lots. Staff's proposal provides greater certainty by removing conditional use permits for residential zones, but does not provide sufficient density and development-standard relief for these opportunities to be reliable and straightforward - a necessity for any significant use of the opportunities. Few projects will be able to take advantage of a by-right process because density limits for standard lot sizes of 4,000-6,000 square feet are still too low. Furthermore, unchanged setbacks, especially the 15' front and rear setbacks in most zones, severely constrains the feasibility of 3- and 4-unit developments.

We believe this program can be revised to facilitate the production of attainable and affordable middle housing. We recommend Oakland consider the following:

- Sixplexes: Sixplexes are more likely to be both feasible in the context of high land values and produce middle income housing (see study from San Jose; attached as Exhibit A). Consider allowing up to six units by right in certain high-opportunity residential zones, as well as on corner lots and lots over 5,000 square feet.
- Minimum Lot Sizes and Lot Splits:
    - Please confirm explicitly that lot splits in residential zones will be approved ministerially.

    - The minimum lot size in residential zones should be reduced from 2,500 to 2,000 square feet. Under SB9 the minimum lot size post-split is 1,200 square feet. While we appreciate Oakland reducing minimum lot sizes across residential zones, the 2,500 square foot minimum is twice that of the SB9 baseline. Moreover, 4,000 square feet is a common Oakland lot size, perhaps the most common. A 2,000 square foot minimum lot size would facilitate lot splits in most cases, whereas a 2,500 square foot minimum would largely exclude them. *As it stands, the proposed minimum lot sizes constitute a downzoning of development capacity in residential zones from SB9 and should be revised.*
- Lower Rockridge and Temescal:
    - To ensure Lower Rockridge and Temescal allow fourplexes in practice, consider rezoning them to RM-4. Lower Rockridge and Temescal typical lots are roughly 4,000 square feet. The proposed rezoning of these high-resource and low-VMT areas requires 1,500 square feet of land per unit. In practice this means only 2 units are allowed, which is the bare minimum under SB9. Moreover, 2 units does not meet the goals of Oakland City Council to allow at least 4 units in residential zones, and reduces owner incentives to add those units (these projects will often be complex and expensive). Rezoning these areas to RM-4 would require 1,000 square feet of land per unit, which would allow 4 units per lot by right in most or all cases.
- Adams Point: The zoning map shows a rezoning of the center of Adams Point from RM-1 to RM-2. This neighborhood is already full of medium-sized apartment buildings (see Figure 1 below, taken from the Oakland Map Atlas) These zoned capacity should match the existing built environment to allow for 4-8 story apartments. Alternatively, consider rezoning this area to RM-4.
- High Resource Areas: Bushrod, Santa Fe, Trestle Glen, Crocker Highlands are all high-resource or moderate-resource areas that are untouched by the proposed Missing Middle Program rezonings. These are also low-VMT neighborhoods with easy non-car access to jobs, parks and schools. They should be rezoned to at least RM-2. (Also in Figure 1 below).
- Heights: RM-1 should allow 3 stories by right.
- Parking: The current requirement of 1 unit of off-street parking requirement in most Oakland greater than ½ mile from transit makes most missing middle projects infeasible. The off-street parking requirements should be fully eliminated. Alternatively, the city could match the California ADU standard by eliminating off-street parking requirements within one (1) mile of any bus stop, but if so should require no more than 0.5 spaces per unit elsewhere.
- Setbacks:
    - As written, the Missing Middle Program offers no reduction in setbacks. As we have seen in Minneapolis and other places the failure to reduce lot coverage and setback rules in tandem with upzoning for 2-4 units will result in few to any construction. The existing RM front setback of 15-20’ is a nonstarter for middle housing development.

    - Consider reducing RM setbacks to 10' for front setbacks (or average of immediately adjacent neighboring buildings, whichever is less), 4' on all sides, and 0' for inner side or street side on lots less than 50' wide.
    - Increase lot coverage to allow 50% lot coverage in all residential zones for projects seeking 3 or more units.
    - Some zones have not only minimum lot area but minimum average width and minimum frontage. Those should be reduced in tandem with minimum lot areas.
- High-resource/Low-VMT gradation:
    - In order to reduce patterns of spatial segregation, Oakland should make special effort to ensure that 2-4 unit development is feasible in high-resource residential neighborhoods. The high land values of these neighborhoods also makes it harder for 2-4 residential uses to outbid luxury single-family homes. Therefore, we have previously written to Oakland suggesting that additional density beyond 4 units and additional setback relief be offered in high-resource areas. The proposed Missing Middle Program makes no effort in that regard. We recommend Oakland revise the program to confer additional density (baseline 5 units) and additional setback relief in high-resource residential zones.
    - In order to reduce VMT, Oakland should allow additional density and setback relief in residential zones near BART stations.
- Mills College:
    - Please clarify the reasoning behind rezoning Mills College at Northeastern University from RM-3 to RM-4. Plans for student housing on the actual Mills site should be tailored to student housing; RM-4 is a residential neighborhood standard. Without additional context, this appears to be a paper upzoning that will result in no new housing.
- Accessory Commercial Units:
    - The Proposals' key points from community engagement cites the need to attract retailers in food deserts. In many Oakland neighborhoods, especially East Oakland, the distance between commercial corridors where retail uses are permitted exceeds easy walking distance. Moreover commercial floor plates are often too big or expensive for many start-up or would-be retailers.
    - All RM zones in the current intent section include "and neighborhood businesses where appropriate", but in practice all subzones except RM-5 make food sales, restaurants, cafes, and retail sales require conditional use approval, and alcohol sales are only allowed if grandfathered. Consider allowing a wider range of commercial businesses as permitted in any space less than 600 square feet in all RM and RU zones ("Accessory Commercial Units") to facilitate greater food access, increased walkability and low impact diversity of uses.

///

Rockridge Rezonings

We appreciate that Oakland's Proposals include specific rezoning for Rockridge in response to our comments and those of HCD. Unfortunately, as discussed below, the rezonings as written have significant issues in terms of spatial equity, horizontal equity, feasibility and displacement. We are also concerned that staff continue to avoid rezoning soft sites near Rockridge BART that could easily be rezoned to further fair housing and reduce VMT.

- Commercial Corridor:
    - As noted below, commercial corridors throughout West and East Oakland are having their heights increased. These include commercial corridors close to BART and high-frequency bus (Fruitvale, West Oakland, Coliseum, and Telegraph Avenue near MacArthur BART) as well as on BRT lines (International Boulevard in San Antonio and between 73rd Avenue and Durant Avenue) and also some corridors miles from BART (Dimond District and Laurel District). All the while, heights for the commercial corridor of College Avenue near Rockridge BART remain untouched at 35' in CN-1 zones.
    - While Oakland proposes to rezone eight sites along College Avenue and Claremont Avenue, there are significant issues with many of these sites (see below). Moreover, it is concerning that Oakland seems perfectly willing to increase heights along miles of MacArthur and International boulevards but cannot countenance allowing more than two parcels to go up to 65' on College Avenue.
    - While we support height increases in commercial corridors generally, we are concerned about the horizontal inequity of excluding College Avenue and Claremont Avenue. Why should a strong commercial corridor in the Laurel District, over 2 miles from Fruitvale BART, be rezoned from 35' to 65', while College Avenue, within ½ mile of Rockridge BART, remains at 35'? Why should commercial land in Deep East Oakland in Elmhurst along International Boulevard go from 75' to 95' while Claremont Avenue near Rockridge is stuck at 35'? Are the existing commercial uses in Rockridge simply more valuable to Oakland than the existing commercial uses in East Oakland?
    - ***This concentration of multifamily development potential in lower income and non-white neighborhoods, especially in East Oakland, while preserving the height limits of commercial land in high-income and mostly white Rockridge is reinforcing, not reversing, existing patterns of spatial segregation.***
    - Oakland, in order to affirmatively further fair housing, should increase heights along College Avenue and Claremont Avenue to 55'.
- RM Zoning: As noted above, Lower Rockridge needs to go from RM-2 to RM-4 in order to allow for 3- or 4-unit development to occur - or the entire RM zone needs to allow 3- or 4-unit development both by right and in practice.
- DMV: Does Oakland have written confirmation that DMV plans to redevelop its property on Claremont? The use of state-owned land for redevelopment must be accompanied by a

firm commitment by the Department of General Services to redevelop the site within the eight year planning period.

- 5248 Claremont Avenue: Site 5 on Figure 4 is a 3-story, 42-unit apartment building constructed in 1959 called Claremont Park Apartments. It is highly likely that this property is subject to Oakland's rent control ordinance. In any case, this property should not be rezoned. ***If it remains as a rezoning site either: 1) no redevelopment will occur due to the costs associated with SB330/SB8 replacement, relocation and right to return requirements; or 2) redevelopment will occur and 42 units of rent-controlled housing will be destroyed when vacant, commercial and owner-occupied sites abound nearby. Oakland should not be in the business of designating rent-controlled housing in high-resource areas for upzoning and redevelopment.*** Please remove this site.
- Trader Joe's parking lot: This is a high-volume grocery store with two surface parking lots. It is highly unlikely either the store itself or the parking lot fronting College Avenue will be redeveloped. The Miles Avenue fronted surface parking lot may be feasible for redevelopment, but it will be difficult given that the CN-1 standards only permit approximately 40 units.
- 5264 Claremont and 5256 Claremont: These sites include approximately four residential units. Under the CN-1 density standards and unchanged 35' height limit these sites could yield 9 units at most each. If there are existing low-income tenants on-site then 1 or 2 of 9 units will be required to be replaced with deed-restricted units. Does Oakland have a track record of producing developments with less than 10 units and on-site affordable housing in this manner? If not, they should be considered for higher density or removed.
- 6209 College: This site has an existing banking use and surface parking lot. Under the CN-1 standards it can yield at best 20 units. It is unlikely that 42 dwelling units per acre will outbid the existing banking use.
- 5220 Claremont: This site has an existing pediatric use that is part of UCSF Benioff Hospital. Has Oakland obtained written evidence that the property owner intends to discontinue this use within the eight year planning period?
- Unpicked Sites: As seen above, there are significant issues with Oakland's Rockridge rezoning sites. There are many sites that Oakland could identify for rezoning that would be more feasible for housing while minimizing displacement.
    - The vacant site at Pleasant Valley/51st Street and Broadway - This is a large vacant site near BART and Lines 51A and 18. It is in a high-resource tract and has easy access to health services, grocery stores and open space.
    - Claremont flatiron - This vacant parcel at Claremont and College is currently zoned to only allow 18 units. It was also a very popular site in the city's survey data. Consider rezoning to allow 75 dwelling units per acre.
    - Gas Stations - There are several gas stations that could be rezoned within Rockridge.
    - 51st Street - This is a 75' wide residential street with bus service and is within a ½ mile of Rockridge BART. It is proposed to be rezoned to RM-2. It should be rezoned to allow for multifamily housing with heights of 45' and up to 55 dwelling units per

acre. The existing uses of mostly owner-occupied single family homes and a few duplexes would reduce the impacts of potential displacement and relocation costs.
    - In practice, most development usually occurs in places outside those designated in housing elements, because for- and non-profit developers evaluate prospects in different ways from planning professionals and often come to different conclusions. In addition to trying to pick winners among sites, the city should consider a broader upzoning to 6+ stories and 75+ units per acre in a one-mile radius of Rockridge BART.

Commercial Corridors

We understand that many of Oakland's proposed commercial corridor rezonings are meant to reconcile planning code with building typologies. In addition, the Proposals increase heights in commercial corridors in several key areas near transit (excluding College Avenue and Claremont Avenue in Rockridge). While these heights increases are certainly helpful for increasing housing feasibility and lowering VMT we are concerned about the lack of height increases in key areas.

- Park Boulevard: Heights along the commercial sections of Park Boulevard in Eastlake and Glenview should be increased.
- Shattuck Avenue:
    - This section was downzoned in 2011 to 35' in response to housing development in the mid-2000s. Homeowners in these high-resource areas pushed to downzone the corridor due to concerns about development exceeding existing zoning (through use of State Density Bonus Law) but within the general plan designations; the groups supporting the downzoning cited impacts to "sunlight, privacy and appearance." [Oakland Planning Commission staff report, July 14, 2010; attached as Exhibit B]. This was a poor justification for downzoning a high-resource, low-VMT transit corridor and should be undone.
    - In February 2021 a 45' multifamily development project at 6501 Shattuck Avenue (½ mile from Ashby BART) that had submitted an application prior to the 2011 35' downzoning was appealed and delayed for months by nearby homeowners and landlords. The appeal was ultimately rejected but such appeals add risk and cost to housing development.
    - Recently, a proposal was submitted for an apartment building at 6341 Shattuck Avenue. Consistent with the zoning, it is limited to 3 stories; allowing 4 stories would likely enable a 30-40% increase in new homes built.
    - Consider increasing heights along Shattuck Avenue back to 45' or more to facilitate housing development in this high-resource and low-VMT neighborhood.

///

Affordable Housing Overlay

Overall we are highly encouraged by the Affordable Housing Overlay (AHO) proposal. We believe it has the potential to open up more residential land for affordable housing development, including in high-resource areas. The by-right provisions of this rezoning program can provide needed greater certainty to affordable housing developers. The AHO, if implemented with care, can deliver more low and moderate income housing and help reverse patterns of spatial segregation.

We offer the following suggestions:

- Co-ops and CLTs: Make sure the ordinance explicitly allows co-ops and land trusts to use the AHO.
- Relax open space requirements: convert open space per unit into open space per residential living space, so that more density does not penalize them in terms of open space requirements. For further context, the CN zone already has lower requirements for efficiency units but residential zones do not.
- Cohousing: Allow cohousing with shared bathrooms and shared kitchens.
- Historic Districts: Not allowing +20ft height in historic areas, aka Areas of Primary Importance (APIs), is inequitable. Some of the high-resource areas affected include most of the rectangle between Alcatraz, Woolsey, College, & Telegraph; as well as the entire CCA site at 5200 Broadway. A historical building is *not* demeaned or diminished by having a taller building next to it.
    - We strongly request that Oakland does not allow newly formed, prospective APIs at the effective date of the rezoning to be exempted from AHO height bonuses.
- Roof Heights: Many zones like RM currently allow 5 feet more roof height than wall height to allow for pitched roofs. But when this proposal adds 20 feet that +5 feet often vanishes. What is the rationale for this? Pitched roofs can work in taller buildings too. Consider allowing +5 feet for pitched roof in every AHO zoning category.
- DBL Consistency: Clarify the meaning of 100% affordable in terms of income levels that the units must be restricted to. At a minimum, 100% affordable projects under the definition of State Density Bonus Law (AB1763), which are defined as 20% moderate-income, 80% extremely, very low or low-income, and one manager's unit, should qualify under the city AHO. Additionally, the city could consider allowing more than 20% of units to be moderate-income-restricted to open more options.
- Parking: Off-street parking requirements represent significant hard costs and opportunity costs for low-income housing. Parking requirements are a binding constraint on development of multifamily housing that reduces site viability. AB2097 and other state bills have reduced parking requirements within ½ mile of transit and in low-VMT areas. Oakland should go further and require no off-street parking for AHO projects anywhere.
- Fire Zones: The Very High Fire Severity Zones (VHFSZs) are exempted from the AHO. While there are valid safety concerns related to fire risk and escape we would be remiss not to point out the inequity of exempting high-resource and historically exclusionary

VHFSZs. Oakland should explore allowing AHO projects in VHFSZs with hardening and other mitigations.

Thank you for considering these comments. We are available to discuss them via phone or video conference, if necessary.

Figure 1: Existing Residential Density, Central and North Oakland Inset (from Oakland Map Atlas, Figure 2-6)

The goal of this figure is to show that:

- the triangle of Adams Point in the lower right of the figure is already densely full of medium- and some large apartment buildings - the densest census tracts in Oakland outside downtown - yet is mostly zoned RM out of keeping with its current environment, and the proposed rezonings only move a small chunk of it up one level within RM. It should be a high-density zoning designation that allows the same buildings that exists now - not RM or even RU.
- Rockridge, Temescal, and other parts of North Oakland are nearly a single-family monoculture, while the proposed rezonings only increase the density in that large, high-opportunity by a small degree.

I. INTRODUCTION

The City of San José is exploring the potential of allowing 2-4 unit housing development projects (Opportunity Housing) on parcels within one-half mile of transit-oriented Urban Villages. These locations have been identified in the Envision San José General Plan. Opportunity Housing areas are envisioned as walkable, bikeable, and transit-rich neighborhoods that could eventually include a mix of a single-family home, duplex, triplex, or fourplex units on parcels, while generally maintaining zoning setbacks and heights. Opportunity Housing could potentially take a variety of forms, including newly built stacked apartments, condos, duplexes, townhomes, and small lot single family homes. To help assess the viability of Opportunity Housing, the City of San José Planning Department retained Strategic Economics and Opticos Design (the Consultant Team) to evaluate the financial feasibility of new development projects.

This report, prepared by Strategic Economics, presents the analyses conducted to test the financial feasibility of various housing types that could be included in the Opportunity Housing policy. Opticos Design prepared a second companion report completed in September 2021, which evaluates with a site design lens the extent to which certain Missing Middle housing types, such as stacked fourplexes, could be built in residential neighborhoods. Opticos Design's report can be found in Appendix C, on Page 56. Strategic Economics used Opticos Design's analysis to develop more detailed financial feasibility prototypes presented in this report. The feasibility prototypes are distinct from housing types because they incorporate assumptions about tenure (ownership versus rental) and market values (sales prices or rents) necessary to test financial performance.

Opticos Design's report addresses the following:

- Locations where Opportunity Housing would likely be eligible in San José, if the City implements a policy that allows Opportunity Housing in areas adjacent to Urban Villages.
- The existing urban form, regulatory context, and street network connectivity for those areas as well as for the City.
- Lots that could accommodate a stacked fourplex, the initial housing type that Opticos Design evaluated, which informed the first two prototypes that Strategic Economics tested. [1]
- Lots that could accommodate other Missing Middle housing types, such as duplexes, townhomes, multiplexes, and other types.
- Lot testing. This analysis illustrated the options for building dimensions and parking for the development of the stacked fourplex, duplex addition, attached townhomes, small lot single-family, and stacked eightplex housing types on commonly occurring single-family lots in San José. Certain "test fits" directly informed the feasibility prototypes shown in this report.

[1] The Stacked Fourplex Rental and Stacked Fourplex Condo, described on Page 12.

II. APPROACH

To evaluate financial feasibility of Opportunity Housing across the City, Strategic Economics performed following steps:

Step 1: Sub-areas and Market Tiers

Strategic Economics analyzed and mapped the market for ownership condominiums and rental housing in 12 San José sub-areas, which correspond to the Inclusionary Housing Ordinance Market Areas/Development Fee Framework Areas established by the City of San José. [2] Then, each sub-area was categorized into a market tier. This analysis helped describe the potential for Opportunity Housing by location within the city.

Step 2: Development of Prototypes

Strategic Economics worked with Opticos Design iteratively to develop housing prototypes that represented potential Opportunity Housing types. They ranged from small-lot single-family units to stacked rental apartments or condominiums. The process to refine these prototypes is described in more detail on Page 11.

Step 3: Feasibility Analysis

Strategic Economics evaluated feasibility using a pro forma model. The pro forma model tallied the project values (rental revenues or unit sales), subtracted development costs (construction costs, soft costs, and profit) and calculated the residual value. To be considered financially feasible, the project's residual value would need to be equal or greater than the value of acquiring a typical lot.

The feasibility results reflect a snapshot in time, and they do not account for potential future changes in San José's real estate market. With this in mind, it is important to note that market shifts could change the feasibility outlook for the prototypes evaluated in this analysis.

Strategic Economics also conducted a cash-flow pro forma analysis from the perspective of an existing owner.

The methodology for each step of the feasibility analysis is described in more detail in Section III on Page 17.

Sub-Areas and Market Tiers

Strategic Economics analyzed the housing market for each of the 12 sub- areas , and categorized each sub-area into a "market tier." This step allowed for the study to reflect that different areas of the City have different land values, sales prices, and rents, affecting the likelihood of Opportunity Housing being built. The analysis considered the following data points:

[2] The Inclusionary Housing Ordinance Market Areas can be found at this link:
https://csj.maps.arcgis.com/apps/webappviewer/index.html?id=8518bc095ae54f4ea025d7743c650881

- The price of townhomes and condominium units built from 2000 to 2021, and sold from 2019 to 2021, according to Redfin. This characterizes the strength of the townhome and condo ownership market.
- The rental rates for multifamily rental properties built since 1980 (not subject to the Apartment Rent Ordinance), based on Costar data, which shows the strength of the multifamily rental market.
- The price of single-family homes built from 2000 to 2021, and sold from 2019 to 2021, according to Redfin. This characterizes the current value of single-family properties, which provided supplemental data on the dynamics of the home ownership market. While traditional single-family homes were not studied as a prototype, this is a more robust dataset than Redfin's townhome and condo data, and it can serve to clarify home value assumptions in places with limited townhome and condo data.
- The price of single-family homes that are smaller than 1,250 square feet, that were built before 1970, and that sold for less than $1,275,000. This Redfin dataset included home sales between December 2020 to June 2021. This indicated expected acquisition costs for properties that would be priced most competitively to be acquired for Opportunity Housing development.[3]

After reviewing and mapping this data, each sub-area was assigned a market tier based on the strength of the housing prices and rents. Tier 1 represents the highest value market tier, while Tier 3 is the lowest value. When sub-areas lacked data for certain product types, they were categorized based on available housing market data within the sub-area and in neighboring sub-areas.

The classification of each sub-area's market tier is summarized in Figure 1 for rental housing and Figure 2 for condo housing. The maps of the rental and condo market tiers are shown below in figures 3 and 4.

[3] The timeframe of this dataset is narrower than the other Redfin datasets that were analyzed because of limitations with Redfin's data export process.

FIGURE 3. SAN JOSÉ RENTAL SUBAREAS BY TIER

STRATEGICECONOMICS

FIGURE 4. SAN JOSÉ CONDO SUBAREAS BY TIER

As shown, some sub-areas have stronger, more established markets for rental housing than for condo housing. For example, Central San José is classified as a Tier 1 rental market because it has attracted significant new luxury rental housing projects. However, recently built condos in Central San José command lower sale values than West San José, placing it in the Tier 2 category for condos.

The tiers are a general characterization of the City's condo and rental markets by sub-area. There might be certain neighborhoods within sub-areas that command higher or lower values than the designated market tier.

Interview Findings

Before conducting the financial feasibility analysis, the Consultant Team interviewed eight individuals with real estate development experience who are active in San José and Silicon Valley. The Consultant Team spoke with the following people during spring of 2021.

- Adam Mayberry, Mayberry Workshop
- Jerry Strangis, Strangis Properties
- Kurt Anderson, Anderson Architects
- Mark Robson, Robson Homes
- Paul Ring, Urban Catalyst
- Reyad Katwan, Hawkstone Development
- Andrew and Ryan Quinley, Twinley Homes

The interviewees had a variety of perspectives and specializations. They range from overseeing large-scale firms to running their own independent operations. The interviewees also had different niches, with some developing larger, townhome-style units in more suburban contexts, while others focused on multiplex buildings with smaller units in central locations.

Because there is limited potential for Opportunity Housing under current land use policies, there are few developers with direct experience building these housing types. Most prototypes tested in this analysis are not currently permitted in San José. The larger-scale developers that were interviewed did not have on-the-ground experience in developing housing on small lots; developers with experience building 2-4 unit projects had only completed a small number of projects in San José.

There are many different approaches that developers and property owners might pursue to add units to existing single-family lots. Property owners may choose to subdivide their existing home into multiple units or subdivide their lot to build infill units. Experienced housing developers are more likely to maximize the density on their lots with townhome-style or multiplex projects to enhance the financial feasibility of projects. Both rental and for-sale projects are possible, depending on the preferences of the developer or property owner. These varied approaches suggest that San José's Opportunity Housing policy should be flexible enough to accommodate the many interests and specializations of those in the development community.

Central San José and West San José, which command higher rents and home values and offer high-quality transit, would be the most attractive locations for the development of Opportunity Housing, from a market perspective. According to interviewees, areas in the Central sub-area, which includes downtown San José, as well as areas in West San José (including West Valley and Willow Glen) have the strongest markets for Opportunity Housing. The Central sub-area in particular, which has a very

strong rental market, would be best-suited for smaller units and developments with reduced parking, especially in areas near high-quality transit.

Allowing three-story buildings and parking reductions may be appropriate in certain contexts to create incentives for Opportunity Housing. Developers believed that three-story buildings could be appropriate in some transition areas between Urban Villages and single-family neighborhoods. Buildings with reduced parking, which generally can provide deeper affordability, could be suitable for areas near high-quality transit.

Pioneering developers may run into construction financing hurdles. Developers seeking to build Opportunity Housing projects may find it difficult to get construction financing approval, especially if the product they are seeking to build does not yet have a proven market in San José. Independent, smaller-scale builders are more likely to consider building these housing types that are less common in San José, such as stacked multiplexes, or buildings with reduced parking. They may find it more cumbersome to obtain financing than larger developers who tend to have access to institutional capital.

Condos are more expensive to build than rentals in San José. Because of the construction liability issues of attached condominium buildings, there are fewer sub-contractors available to bid on condominium projects, which drives up construction bids. Establishing a homeowner's association, and other administrative requirements associated with condominiums can also create more burdens on condominium development compared to rental housing.

The high cost of utility hookups might discourage developers from incorporating more units. According to a developer that specialized in multiplex housing, utility hookup fees can be as high as $100,000 per unit, because individual meters are often required. Allowing multiplexes to share one meter would alleviate this issue. Encouraging developers to provide more units on-site would translate to deeper affordability, generally.

Prototypes

Strategic Economics tested the feasibility of 12 Opportunity Housing prototypes, which were based on extensive lot analysis and test fits provided by Opticos Design. The prototypes include small single-family units (four units on a lot), townhomes, duplexes, and fourplexes. In a supplementary analysis, the Consultant Team also examined the feasibility of sixplex and eightplex units to provide additional context.

The prototypes are organized into three sets, described below in Figure 5. All prototypes incorporate a new construction component, and two (the Side-by-Side Duplex Condo in Rear Yard and the Side-by-Side Duplex Rental in Rear Yard prototypes), incorporate the preservation of an existing home.[4] The lot size, which is consistent across the prototypes, was chosen as a baseline for the analysis because it is a typical-sized lot in many residential neighborhoods in San José, and is sufficiently large to accommodate small multifamily buildings with on-site parking.

[4] It is also possible that a property owner would subdivide their existing home into multiple units. However, this method tends to be less cost-effective than the new-construction methods that were tested. There are also many more factors involved (e.g. age, size, and condition of the existing home) that make it difficult to test the feasibility of this approach in a generalized manner.

SET 1: TWO-STORY BUILDINGS WITH 2-4 UNITS

The first set of prototypes (Figure 6) are in line with the initial guidance from City staff regarding building height, on-site parking expectations, and other parameters for the Opportunity Housing program. All Set 1 prototypes provide between two and four units on one residential lot. They are two stories in height, with a minimum parking ratio of one space per unit (a "1:1 ratio"). The prototypes have a floor-area-ratio (FAR) of about 0.60. Set 1 prototypes are incorporate the following housing types:

- Stacked Fourplex: A traditional stacked fourplex (with one common entrance, and two units on each floor), which was tested as both a condo and a rental project.
- Side-by-Side Large Duplex: A side-by-side duplex condo with the same gross building square feet as the stacked fourplex.
- Side-by-Side Duplex in Rear Yard: A new construction side-by-side duplex built in the rear yard of an existing single-family home, resulting in three total units on one lot. This was tested as both a condo and a rental project.

FIGURE 6. SET 1 PROTOTYPES: TWO-STORY BUILDINGS WITH 2-4 UNITS

(b) Includes both the new construction duplex and the existing home.
(c) Refers to the units in the new construction duplex. The existing single-family home has 1,250 square feet and three bedrooms.
Source: Strategic Economics, 2021.

SET 2: THREE-STORY SINGLE-FAMILY/ATTACHED TOWNHOME PROJECTS WITH FOUR UNITS

The second set of prototypes (Figure 7) are townhome-style buildings that include tuck-under garages, and are three stories. These prototypes also maintain a parking ratio of at least "1:1", and they have higher floor-area ratios than Set 1, due to the third story. Both prototypes are for-sale condos, and the unit sizes are the same. They are described below:

- Attached Townhomes: Four attached townhomes on one lot.
- Small Lot Single Family: Four detached "small lot single family" units on one lot.

FIGURE 7. SET 2 PROTOTYPES: THREE-STORY SINGLE-FAMILY/ATTACHED TOWNHOME PROJECTS WITH FOUR UNITS

Source: Strategic Economics, 2021.

SET 3: STACKED MULTIPLEXES WITH MORE THAN FOUR UNITS

Opportunity Housing is currently defined as projects with two to four units. However, it is possible to develop more than four units on a single-family lot, while staying within similar building envelopes as the prototypes in Set 1 and Set 2. Adding more units allows the cost per unit to be reduced significantly, potentially making it more financially feasible.

The third set of prototypes (Figure 8) has parking ratios less than "1:1", because the prototypes fit more units on the lot than in the previous sets. They are all iterations of the Stacked Fourplex in Set 1 shown earlier in Figure 6. The prototypes incorporate the following housing types:

- Three-Story Sixplex: The Sixplex, tested as both a rental and condo, adds a third story to the fourplex, and has two more units that are the same as the fourplex on the third story.
- Two-Story Eightplex: The Two-Story Eightplex, tested as a rental, has the same gross building square footage as the Stacked Fourplex, but with four units on each floor. These units are the smallest tested.
- Three-Story Eightplex, tested as rental and condo, has the same building square footage as the Three-Story Sixplex, but with three units that are smaller on the first two floors.

These prototypes achieve the highest unit densities of the three sets, and their floor-area ratios (FARs) are similar to the townhome-style prototypes.

FIGURE 8. PROTOTYPES: STACKED MULTIPLEXES WITH MORE THAN FOUR UNITS

Potential Impacts of SB 9 and SB 10

In September 2021, Governor Gavin Newsom signed SB 9 and SB 10 into state law, and both go into effect January 2022. Both pieces of legislation, which are described below, could have implications for Missing Middle housing in California cities.

SB 9: BY-RIGHT DUPLEXES AND LOT SPLITS IN SINGLE-FAMILY ZONES

SB 9 allows by-right duplexes and lot splits on most single-family lots. SB 9 will require that cities allow duplexes and lot splits on single-family lots. This in practice legalizes four units on single-family lots, because duplexes would be permissible on lot splits. Typically, this type of proposal might have required zoning changes or conditional use permits, with entitlement process timelines comparable to those for multifamily development. Under SB 9 however, cities will be required to grant ministerial approval (or "by-right" approval) to duplex and lot split applications that meet objective design standards. SB 9 will also limit the amount of off-street parking that cities can require. The legislation establishes that cities can only require up to one off-street parking space per unit, and that cities cannot require off-street parking in locations near high-quality transit.

There are specific criteria that will determine whether lots are eligible for lot splits and duplexes under SB 9. They include the following:

- Only owner occupants[5] and non-profit owners (e.g. community land trusts and neighborhood development corporations) are eligible to initiate lot splits.
- Properties in fire zones are not eligible.
- Historically significant properties are not eligible.
- There are demolition restrictions for properties with affordable housing units and units that have been recently used as rentals..[6]
- Cities can determine whether they want to allow demolition of existing single-family homes that have not been recently rented. [7]

SB 9 will make the development of new market-feasible units possible within San José's residential areas. A Terner Center analysis found that under SB 9, 319,000 parcels would be eligible for lot splits in Santa Clara County, and 40,000 financially feasible units that before SB 9's passage would not have been allowed would now be legal. [8]

Some prototypes evaluated in this report may be considered legal by-right once SB 9 takes effect. Two prototypes involve the construction of a duplex in the rear yard of an existing single-family home (Side-by-Side Duplex Condo in Rear Yard and Side-by-Side Duplex Rental in Rear Yard). These prototypes reflect a scenario that would be possible under SB 9. In this circumstance, a homeowner could split their lot and build a new duplex in the rear of their lot under the legislation. The other prototypes that incorporate four units or less could also be permissible, depending on the objective design standards that the City of San José adopts. Note that for any circumstance that involves a lot split, the property owner would be required to live in one of the units for three years.

SB 10: CITY PROCESS TO UPZONE UP TO 10 UNITS PER PARCEL IS SIMPLIFIED

SB 10 streamlines the residential upzoning process for cities. It allows them to zone lots for up to 10 dwelling units in urban infill locations and transit-rich areas. This legislation does not impose new requirements on cities. Rather, it allows cities to upzone certain parcels up to ten units per parcel without having to undergo requirements associated with the California Environmental Quality Act (CEQA) that previously would have been triggered by such an upzoning. It also allows cities to override land use regulations established through voter initiatives if the regulation requires a more restrictive density than the state law. [9]

SB 10 will likely have a narrower impact on Missing Middle development than SB 9. In the areas where the City chooses to upzone, projects with up to ten units (or with up to the number of units specified by the City) will undergo a more simplified approval process. A developer seeking to build a sixplex, or an eightplex, such as the prototypes in Set 3, may find that there are more well-located areas within the City of San José that are zoned for such projects. The City will have deference in determining if any eligible areas should be upzoned.

---

[5] Owner occupants are required to reside in one of the units for three years following the lot split.
[6] The project cannot involve the demolition or alteration of designated affordable or rent-stabilized housing, housing that has been withdrawn from the rental market in the last 15 years, or housing that has been renter-occupied in the last three years.

III. FINANCIAL FEASIBILITY ANALYSIS

Financial feasibility was calculated for all 12 prototypes using a static pro forma model that measures the residual land value (RLV) of a development project. This "point in time" model reflects the process a developer would undertake in determining whether to pursue a project, and it assumes that most developers would have to acquire land to build Opportunity Housing.

Residual land value is the net value available for land acquisition after accounting for all revenues and development costs, including profit. If the residual value is higher than the expected acquisition cost of the lot, then the development project is considered feasible for a developer who has to purchase land. However, if the residual value is less than the acquisition cost, then the development is considered infeasible.

This model is effective at evaluating feasibility for traditional developers who have access to substantial capital. It is possible that existing property owners would also develop Opportunity Housing.

There could be instances where investor-owners build Opportunity Housing on their properties. The static pro forma model illustrates the feasibility outlook for investors who also have strong access to capital. With the property already owned, the prototypes would be considered feasible as long as the residual value is positive.

Owner-occupants, who have significantly less access to capital, might also pursue Opportunity Housing development. An owner-occupant who builds Opportunity Housing would be making a major personal financial decision that would require them to navigate complex challenges. Strategic Economics conducted a supplemental cash flow analysis, which was applied to one prototype, from the perspective of an owner-occupant. This analysis may also be more appropriate for understanding the decision-making process of a small-scale investor with less capital.

The development cost and revenue inputs, which generally inform both the static and cash flow pro forma analyses, are described in detail in this section. Instances are noted where assumptions only inform one of the two models.

Land Acquisition Cost

The land acquisition cost varies depending on the lot's location within the City. Strategic Economics analyzed Redfin point sales data for lots with older, smaller single-family homes that would be the most likely targets for a redevelopment project.[10] Because there are so few vacant parcels within the fabric of residential neighborhoods, it was assumed that any developer interested in pursuing an Opportunity Housing project would have to acquire a lot with an existing home. The acquisition data was collected and summarized by sub-area and by quartile. The acquisition price per square foot of land is based on the lower end of the range for home sales (first quartile) in the sub-areas of each market tier. The acquisition cost assumptions are summarized by market tier in Figure 9. As shown, areas with the strongest housing market (Tier 1) have the highest acquisition price. Note that existing

[10] Redfin provides easily available sales data for recent sales for custom geographies. The Redfin data included all sales in San José between 12/7/2020 and 6/7/2021, for homes that were less than 1,250 square feet, that were built before 1970, and sold for less than $1.25 million, which is just under the median home sale price in San José, which is currently $1.3 million. This dataset includes 378 home sales.

property owners do not need to account for property acquisition costs in their decision-making processes.

FIGURE 9. LAND ACQUISITION COST ASSUMPTIONS BY TIER

Tier	Land Cost per Sq. Ft.	Total Land Cost
Tier 1	$170	$1,275,000
Tier 2	$155	$1,162,500
Tier 3	$130	$975,000

Source: Redfin, 2021; Strategic Economics, 2021.

Development Costs

HARD COSTS

Hard costs also sometimes called "direct costs," are costs associated with construction. This includes "horizontal" costs, which include demolition, site preparation, grading, and utility connections, as well as "vertical" costs, which refer to costs associated with the building itself.

The hard cost assumptions are based on input from residential developers with experience in San José [11] and the Bay Area, Strategic Economics' recent work on feasibility analysis for other development projects in Santa Clara County, and recent studies on the cost of development in San José.

The COVID-19 pandemic has greatly impacted global supply chains, significantly increasing the cost of lumber, appliances and fixtures, and other construction materials. Therefore, the vertical building hard costs are based on cost expectations before the pandemic, under the assumption that the price of materials will eventually stabilize.

For the prototypes, the horizonal site development cost was assumed to be **$10 per land square foot**, which includes demolition cost, as well as utility connections and other costs associated with preparing the lot for development. Because of the scarcity of vacant single-family parcels in San José, it is assumed that a developer would be more likely to purchase a lot with an existing home that would be demolished. For the Side-by-Side Duplex Condo in Rear Yard and Side-by-Side Duplex Rental in Rear Yard prototypes, the horizontal site cost is just $6 per land square foot, reflecting that just a portion of the lot is being prepared for construction, and there is no demolition cost.

The vertical construction cost assumptions depend on the complexity of the various product types as well as on housing tenure. Detached products, such as the Small Lot Single-Family prototype, are the most straightforward to build. The side-by-side duplexes are also relatively straightforward. Attached townhomes are more expensive because they are slightly more complex, with more party walls, and possible design constraints. Stacked multiplexes, including fourplexes, sixplexes, and eightplexes, are

[11] The developers that were interviewed included: 1) developers with experience working on townhome and duplex projects, but at larger scales than the single lot; and 2) developer-builders with small-scale operations that have niche expertise based on their projects. There are few examples of recently built Opportunity Housing projects in San José because it is currently not permitted in most areas of the City, and there is a lack of developers interested in projects of this scale.

the most complicated to construct. Among the prototypes tested, they have the most party walls, the most complex building systems, and the greatest chance of design constraints, which all add to costs.

Condos are also more expensive to build than rentals because there are fewer subcontractors for attached or stacked ownership housing, which drives up the bids. Furthermore, condo buildings typically have higher-end finishings than rental apartments.

The per-square-foot assumptions for each prototype are displayed below in Figure 10.

FIGURE 10. VERTICAL COSTS BY PROTOTYPE

Prototype	Hard Costs per Gross Building Sq. Ft.
Small Lot Single Family (a)	$175
Side-by-Side Large Duplex Condo	$175
Side-by-Side Duplex Rental in Rear Yard (b)	$160
Side-by-Side Duplex Condo in Rear Yard (b)	$175
Attached Townhomes (a)	$250
Rental Stacked Flats (fourplex, sixplex, eightplex)	$275
Condo Stacked Flats (fourplex, sixplex, eightplex)	$300

Notes

(a) Includes garage cost.

(b) Renovation cost of $100,000 for existing home is also applied to total vertical cost .

Source: Interviews with developers, 2021; Strategic Economics, 2021.

Lastly, a **contingency cost of five percent of the total vertical cost**, is also applied universally for each prototype, which is a standard assumption.

SOFT COSTS

Soft costs, sometimes referred to as "indirect" costs, are development costs associated with other items besides construction, such as design, overhead, and other costs of doing business, like legal costs, and taxes. There are certain soft costs, primarily those associated with consulting fees for project design, as well as developer overhead, that are expected to be consistent across prototypes, since all the prototypes are at the single-lot scale. It is assumed that these costs would together total **$50,000 per project**. Therefore, this is a smaller share of total development cost for the stacked multiplex prototypes, which cost the most overall to build, and translate to the highest unit densities.

Other soft cost items, include taxes, legal costs, accounting costs, and insurance costs, as well as holding costs. These are assumed to be equivalent to **eight percent of total hard costs**, which is a standard assumption that is commonly used by real estate developers across specializations.

MUNICIPAL FEES

Various municipal fees and taxes would be charged for all the prototypes. These fees help fund City services, as well as the administrative tasks and requirements associated with processing permit applications at the City.

FEES EVALUATED FOR FEASIBILITY IMPACTS

Strategic Economics evaluated the feasibility impacts of two types of municipal fees:

- **Site Development Permit fees**, which would only be charged if Opportunity Housing is not permitted by-right; and,
- The **Parkland In-Lieu Fee**, a park use impact fee, which is in the process of being revised.

This report will assist the City in determining how these fees should apply to Opportunity Housing projects. Further discussion on the feasibility impacts of these fees is found in Section VI on Page 36.

Both the site development and park fees were incorporated into the total development cost used in the pro formas for the prototypes, because the pro forma analyses reflect what would currently be charged on the prototypes if they were developed today.[12]

Other Standard Fees and Taxes

There are other standard fees and taxes that would apply to all the prototypes. These fees are shown below in Figure 11 and include:

- City fees associated with processing project building permits, which include permit issuance, plan review, and inspection fees. Based on the City's fee schedule, the fees are estimated at approximately $9,700 per unit for single-family and duplex projects, or $26,000 per project for projects with three or more units.
- School district impact fees. For areas that fall in the San José Unified School District, the fee amount is $3.48 per net residential square feet.
- The Building and Structure Construction Tax (Municipal Code, Chapter 4.46), which is between approximately $7,000 and $12,000 per project, depending on the building valuation, which is tied to the gross building square feet.
- The Commercial, Residential, Mobile Home Park Construction Tax (Municipal Code, Chapter 4.47), which is between approximately $11,000 and $19,000 per project, which also depends on the building valuation.
- Other city and state construction taxes that charge nominal fees, including the City's Residential Construction Tax (Municipal Code, Chapter 4.64), the Construction Tax (Municipal Code 4.54), and the State's SMIPA and BSARSF taxes.

Note that the City of San José's Inclusionary Housing Ordinance (IHO), which was revised in 2021, only applies to projects with ten or more units. Therefore, the IHO fees were not incorporated into the fee calculation for any of the prototypes, which are all under 10 units. [13]

[12] Note that the feasibility analysis in Section VI uses a different approach. It shows the percentage increase on total development cost that each fee adds for the prototypes, if total development cost hypothetically did not include these fees. This approach was used because the total development cost calculated in the pro forma analyses vary across tiers because the Parkland In-Lieu fee varies by sub-area. The hypothetical total development cost used in this detailed municipal fee analysis standardizes the denominator across the three tiers, which more accurately shows the impact of these fees by tier.

[13] City of San José, 2021. https://www.sanJoséca.gov/your-government/departments/housing/developers/inclusionary-ordinance-housing-impact-fee

FIGURE 11. OVERVIEW OF TYPICAL MUNICIPAL FEES

Fee	Fee Amount	Basis
San José Unified Developer Fee (a)	$3.48	Per Net Sq. Ft.
Building Permit Fees (b)		
Single Family, Duplex	$9,740	Per Unit
3+ Units (per project)	$26,037	Per Project
City Construction Taxes		
Building and Structure Construction Tax	1.54%	Of building valuation (c)
Residential Construction Tax	2.42%	Of building valuation (c)
Construction Tax	$113	Per unit
Residential Construction Tax	$135	Per unit
State Construction Taxes (d)	$65-$113	Per project, depending on gross sq. ft.

Notes

(a) Some areas of San José fall into other school districts that charge their own fees. These districts tend to charge varying fees for elementary, middle, and high schools. The San José Unified fee was used for all scenarios because San José Unified charges just one, universal fee for projects in its jurisdiction, and the district covers most of the areas of the City analyzed in this study.

(b) Includes permit issuance, plan review, and inspection fees. For single family and duplexes, new units between 1,000 and 3,000 gross square feet are charged the same flat fee, per unit. For 3+ unit building types, new projects that are less than 10,000 gross square feet are charged the same flat fee, per project.

(c) For residential uses: $112 per gross square feet.

(d) Includes SMIPA and BSARSF

Sources: City of San José, 2021; Strategic Economics, 2021.

FINANCING COSTS FOR TRADITIONAL DEVELOPERS

The total financing cost for traditional developers includes the cost of interest payments associated with the construction loan, and the construction loan fee. Total financing cost ranges from $30,000 to $90,000 per project depending on the overall development cost of the prototype, and this cost is equivalent to approximately three percent of total development cost (excluding land). The assumptions used to calculate financing costs are below in Figure 12. These financing assumptions are only applicable in the static pro forma model.

FIGURE 12. FINANCING COST ASSUMPTIONS

Financing Costs	
Amount financed (loan-to-cost)	60% of hard and soft costs
Average Outstanding Balance	55% of amount financed
Construction Loan Fee	2% of amount financed
Construction Interest Rate (annual)	4.25%
Term	18 months

Source: Strategic Economics, 2021.

PROFIT EXPECTATION FOR TRADITIONAL DEVELOPERS

Figure 13 below shows the assumptions used to estimate the developer's profit. These profit expectation assumptions are only applicable in the static pro forma model.

For the rental prototypes, the profit expectation is based on the yield on cost (YOC), which is calculated as annual net operating income (NOI) divided by total development cost. For the purposes of this

analysis, the target YOC is between 5.0 and 6.0 percent, which is at least one percentage point higher than the current capitalization rates for multifamily housing in San José.

The minimum developer return for the condo prototypes is based on the Return on Cost (ROC) measure, which is calculated as the net value divided by total development cost. The return on cost target is 18 percent of development costs, excluding land.

FIGURE 13. DEVELOPER PROFIT EXPECTATION

Rental Prototypes	Target Return
Minimum Yield on Cost	5% (NOI/TDC)
Condo Prototypes	
Minimum Return on Cost	18% of development costs, excluding land

Source: Strategic Economics, 2021.

Revenues

A detailed revenue analysis was conducted to identify monthly rent and sale price assumptions for new rental and condo development. Strategic Economics collected multifamily rental data from Costar and townhome/condo sales data from Redfin for recently built product, organized by tier.

RENTS

Rents were estimated based on Costar data for recently built multifamily projects in San José. Because of the short-term impacts of the COVID-19 pandemic on rental rates, the rents used in this analysis are based on pre-pandemic conditions in San José, with the expectation that the market will become more stable over the next several years.

The rent assumptions for each of the units associated with rental prototypes are shown below in Figure 14, organized roughly by set. The table includes the unit size, the rent per square foot, and the overall unit rent for each of the unit types associated with the rental prototypes by tier. As shown in the table, there is an inverse relationship between unit size and rent per square foot, with the smaller units yielding higher rents per square foot than the larger units.

FIGURE 14. EXPECTED RENTS FOR RENTAL PROTOTYPES BY TIER

	Tier 1	Tier 2	Tier 3
Side-by-Side Duplex Rental in Rear Yard (a)			
3-Bedroom			
Unit Size (Sq. Ft.)	1,286	1,286	1,286
Rent per Sq. Ft.	$3.13	$2.95	$2.66
Unit Rent	$4,030	$3,790	$3,420
Fourplex, Sixplex Rentals (b)			
2-Bedroom			
Unit Size (Sq. Ft.)	1,080	1,080	1,080
Rent per Sq. Ft.	$3.33	$3.13	$2.83
Unit Rent	$3,600	$3,380	$3,060
Two-Story Eightplex Rental			
1-Bedroom			
Unit Size (Sq. Ft.)	510	510	510
Rent per Sq. Ft.	$4.25	$3.63	$3.27
Unit Rent	$2,170	$1,850	$1,670
Three-Story Eightplex Rental			
1-Bedroom			
Unit Size (Sq. Ft.)	680	680	680
Rent per Sq. Ft.	$3.96	$3.38	$3.06
Unit Rent	$2,695	$2,300	$2,080
2-Bedroom (c)			
Unit Size (Sq. Ft.)	1,020	1,020	1,020
Rent per Sq. Ft.	$3.35	$3.15	$2.85
Unit Rent	$3,420	$3,210	$2,910

Notes:
(a) Refers to the new construction duplex. The existing single-family home, which is 1,250 square feet, would garner $4,530 in Tier 1, $4,260 in Tier 2, and $3,850 in Tier 3.
(b) Refers to both the Stacked Fourplex Rental, and the Three-Story Sixplex Rental, which have equivalent units.
(c) The two-bedroom units in the Three-Story Eightplex Condo are slightly smaller due to the building's lower efficiency ratio.
Source: Costar, 2021; Strategic Economics, 2021.

The vacancy loss is expected to be **five percent of gross rent revenue**, and the operating expenses are expected to be **30 percent of gross rent revenue**. Both assumptions are standard industry assumptions. The net annual revenue of the prototypes is identified after subtracting vacancy loss and operating expenses.

CONDOS

The expected sales prices for the condo prototypes are shown below in Figure 15. The net revenues include a marketing cost of **four percent of the gross sales price**, which is a standard industry assumption. The table includes the unit size, the price per square foot, and the overall unit price for each of the unit types associated with the condo prototypes. It is organized roughly by set. The stacked condo units have the lowest overall sales prices, since they are the smallest units, and the Side-by-Side Large Duplex Condo units have the highest sales prices. As shown in the table, there is an inverse

relationship between unit size and price per square foot, with the smaller units yielding higher sales prices per square foot than the larger units.

FIGURE 15. EXPECTED SALES PRICES FOR CONDO PROTOTYPES BY TIER

	Tier 1	Tier 2	Tier 3
Side-by-Side Large Duplex Condo			
4-Bedroom			
Unit Size (Sq. Ft.)	2,400	2,400	2,400
Rent per Sq. Ft.	$667	$588	$425
Unit Rent	$1,600,000	$1,410,000	$1,020,000
Side-by-Side Duplex Condo in Rear Yard (a)			
3-Bedroom			
Unit Size (Sq. Ft.)	1,286	1,286	1,286
Rent per Sq. Ft.	747	655	570
Unit Rent	960,000	842,000	733,000
Small Lot Single-Family, Attached Townhomes (b)			
3-Bedroom			
Unit Size (Sq. Ft.)	1480	1480	1480
Rent per Sq. Ft.	$740	$649	$509
Unit Rent	$1,095,200	$960,500	$753,300
Fourplex, Sixplex Condos (c)			
2-Bedroom			
Unit Size (Sq. Ft.)	1080	1080	1080
Rent per Sq. Ft.	$769	$675	$612
Unit Rent	$831,000	$729,000	$661,000
Three-Story Eightplex Condo			
1-Bedroom			
Unit Size (Sq. Ft.)	680	680	680
Rent per Sq. Ft.	$831	$729	$661
Unit Rent	$564,800	$495,700	$449,600
2-Bedroom (d)			
Unit Size (Sq. Ft.)	1020	1020	1020
Rent per Sq. Ft.	$769	$675	$612
Unit Rent	$784,400	$688,500	$624,200

Notes:

(a) The existing single-family home, which is 1,250 square feet, would sell for $1,075,000 in Tier 1, $927,000 in Tier 2, and $807,000 in Tier 3.

(b) The units in Small Lot Single-Family and the Attached Townhomes prototypes are the same size, with the same sale prices.

(c) Refers to both the Stacked Fourplex Condo, and the Three-Story Sixplex Condo, which have equivalent units.

(d) The two-bedroom units in the Three-Story Eightplex Condo are slightly smaller due to the building's lower efficiency ratio.

Source: Redfin, 2021; Strategic Economics, 2021.

Cash-Flow Analysis: Property Owner Perspective

Strategic Economics conducted a supplemental cash flow feasibility analysis for the Side-by-Side Duplex Rental in Rear Yard prototype, to illustrate the likelihood that existing homeowners would develop Opportunity Housing on their property. The development cost assumptions and rent revenue assumptions are consistent with the "point in time" pro forma analysis for this prototype, with some variation based on the expectations that: 1) the property owner already resides in the existing home; 2) they are pursuing a different financing product; and 3) they are evaluating their decision based on the time that they break even.

- In the static pro forma analysis, $100,000 was added to the construction cost to reflect the fact that a developer is purchasing a property with a lower-end home that they would renovate to earn competitive rents for the home. In this analysis, there is no renovation cost for the existing home.
- In the static pro forma analysis, the total revenue is associated with the rental income from the two duplex units and the existing home. In this scenario, the revenue is only from the two duplex units.
- In the static pro forma analysis, the financing costs and profit expectation are incorporated into total development cost. These costs have been removed, because: 1) the financing costs associated with the cash-out refinance mortgage, discussed below, are already accounted for in the cash flow model; and 2) The cash flow model identifies the year the homeowner breaks even, so a separate profit metric is unnecessary. Additionally, it is very unlikely a homeowner would incorporate a profit expectation in their total development cost estimate because doing so would raise their debt amount.

In this scenario, it is assumed that an existing property owner would apply for a **cash-out refinance mortgage,** provided that they have paid off most of their existing mortgage or own their property outright. With cash-out refinance mortgages, property owners can access the equity in their property to pay for construction of the duplex. There are few restrictions on what the loan can be used for, but lenders require that the total mortgage amount may not exceed 80 percent of the property value, less their principal balance. The assumptions regarding the cash-out refinance mortgage are discussed below:

- The mortgage is a conventional, **30-year, fixed rate** loan, which is typical for cash-out refinance mortgages. For the purposes of the cash flow analysis, it is assumed that the owner has paid off the entirety of their mortgage for purchasing the property.
- An **interest rate** of **3.25 percent** was used, which is a conservative estimate, approximately 0.75 percent higher than existing rates as of September 2021. This is a similar approach that was used to identify the interest rate for the construction loan, because it is likely that interest rates, which are currently very low for most real estate loan products, may rise in the near future.
- **Closing costs** are expected to be **four percent** of the loan amount, which reflects the mid-point of the typical range for cash-out refinance mortgages.
- The **existing property value** informs the maximum value of the loan. If the loan amount is less than the total development cost, the property owner would need to pay for the difference up front. Because the development cost is generally the same across tiers, (except for variation in park fees), property owners in Tier 3 would need to provide significant funds up front. There are of course variations in property value across the tiers, but generally these assumptions

indicate that homeowners with higher property values will be better positioned to use this financing tool. The median value of homes in San José in May 2021 was approximately **$1.2 million,** according to Zillow. It is assumed that this would correlate to the estimated value for a property owner in Tier 2. According to Redfin's single-family home data analyzed in this report, the median sale price for Tier 1 is approximately eight percent higher than in Tier 2, while the median sale value for Tier 3 is approximately 17 percent lower than in Tier 2. This relationship informs the following land value assumptions shown below in Figure 16.

FIGURE 16. EXPECTED VALUE FOR EXISTING PROPERTY BY TIERS IN 2021

	Expected Property Value
Tier 1	$1,296,000
Tier 2	$1,200,000
Tier 3	$996,000

Source: Zillow, 2021; Redfin, 2021; Strategic Economics, 2021.

IV. SUMMARY OF RESULTS

The feasibility of Opportunity Housing is determined by the residual land value generated from development. If the residual land value is lower than the expected acquisition cost for a lot in the market tier, the project is infeasible. If the residual land value is greater or equal to the cost of acquisition, the prototype is feasible. However, it is important to note that a project could be feasible but still not generate developer interest if there are other development alternatives that might be more lucrative. For example, a luxury single-family home may still generate a higher residual land value than any of the Opportunity Housing prototypes tested.

Generally, the prototypes that benefit from lower construction costs and high-end sales prices for larger units, such as the duplex condos and townhome-style prototypes are the most feasible to develop.

Existing property owners benefit from not needing to acquire land, which substantially reduces their total development cost. In this circumstance, any prototype where the residual land value is positive would be feasible. A supplemental cash flow analysis, which better illustrates the dynamics associated with typical homeowners, is also included for the Side-by-Side Duplex Rental in Rear Yard.

The detailed pro forma results are included in Appendix A on Page 41, and the detailed results of the cash flow analysis are included in Appendix B, on Page 53.

Results by Prototype

SET 1: TWO-STORY BUILDINGS WITH 2-4 UNITS

The feasibility by tier for prototypes in Set 1 is shown below in Figure 17, with the feasible scenarios shaded in green, and infeasible scenarios shaded in red. Within Set 1, the duplex prototypes tend to be more feasible than the fourplex prototypes. The duplexes are more straightforward to build, and the sale revenues associated with the two duplex condos are strong enough to make the projects feasible. The Side-by-Side Large Duplex Condo is feasible in both Tier 1 and Tier 2 while the Side-by-Side Duplex Condo in Rear Yard is just feasible in Tier 1.

FIGURE 17. SET 1 FEASIBILITY: RESIDUAL LAND VALUE LESS EXPECTED ACQUISITION COST

	Tier 1	Tier 2	Tier 3
Side-by-Side Large Duplex Condo	Feasible	Feasible	Not Feasible
Side-by-Side Duplex Condo in Rear Yard	Feasible	Not Feasible	Not Feasible
Side-by-Side Duplex Rental in Rear Yard	Not Feasible	Not Feasible	Not Feasible
Stacked Fourplex Rental	Not Feasible	Not Feasible	Not Feasible
Stacked Fourplex Condo	Not Feasible	Not Feasible	Not Feasible

Source: Strategic Economics, 2021.

The Side-by-Side Duplex Rental in Rear Yard is not feasible in this analysis. However, the supplemental cash flow analysis evaluated this prototype from a homeowner's perspective. These results are on Page 30.

SET 2: THREE STORY SINGLE-FAMILY/ATTACHED TOWNHOME PROJECTS WITH FOUR UNITS

For both townhome-style prototypes, developers benefit from lower construction costs, and high-end sales prices. As shown in Figure 18, The Small Lot Single-Family prototype is more feasible than the Attached Townhomes prototype because the construction process for detached units is more straightforward, which translates to lower construction costs. Still, both prototypes are expected to be feasible in Tier 1, and the Small Lot Single-Family prototype is also expected to be feasible in Tier 2.

FIGURE 18. SET 2 FEASIBILITY: RESIDUAL LAND VALUE LESS EXPECTED ACQUISITION COST

	Tier 1	Tier 2	Tier 3
Small Lot Single Family	Feasible	Feasible	Not Feasible
Attached Townhomes	Feasible	Not Feasible	Not Feasible

Source: Strategic Economics, 2021.

SET 3: STACKED MULTIPLEXES WITH MORE THAN FOUR UNITS

Within Set 3, the two condo prototypes, as well as the Three-Story Eightplex Rental are feasible, but only in Tier 1. (Figure 19). These prototypes generally have the highest construction costs. The condos perform better because the expected sale revenues generate higher profits than the rent revenues, which incorporate operating and vacancy costs.

FIGURE 19. SET 3 FEASIBILITY: RESIDUAL LAND VALUE LESS EXPECTED ACQUISITION COST

	Tier 1	Tier 2	Tier 3

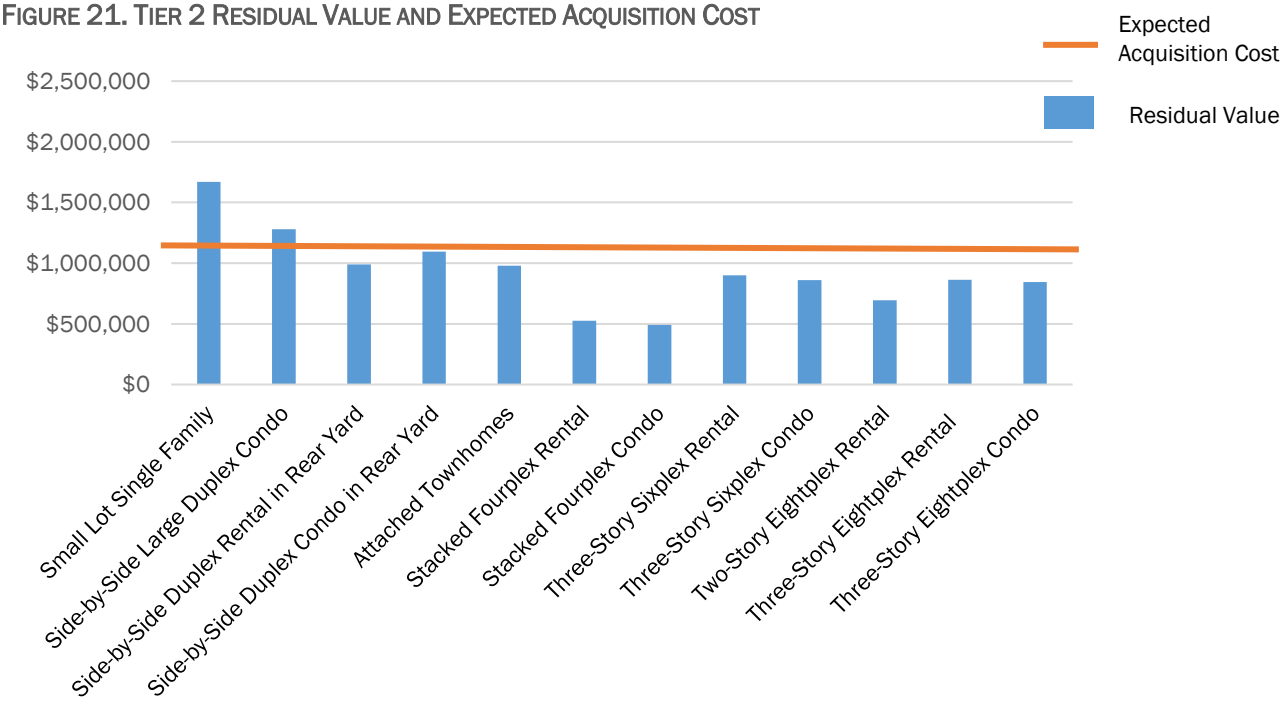
Results by Market Tier

The following charts (Figures 20-22) demonstrate the feasibility results by market tier. As shown, a variety of Opportunity Housing prototypes are feasible in Tier 1, including 2-4 unit for-sale projects (small lot single-family, duplex condos, attached townhomes). None of the fourplex prototypes are feasible, but the sixplex and eightplex condos, as well as the Three-Story Eightplex Rental are financially feasible.



In Tier 2, only the Small Lot Single-Family and the Side-by-Side Large Duplex Condo prototypes are feasible. In Tier 3, none of the prototypes tested are feasible because the revenues generated are insufficient to cover the cost of development and site acquisition.

Results of Cash-Flow Analysis

A supplemental cash flow analysis was also conducted to illustrate the perspective of an existing property owner adding units to their lot. The Side-by-Side Duplex Rental in Rear Yard prototype was evaluated with this lens, because it would be the least disruptive to an existing resident, since it does not involve demolition. It would also be legal by-right if the property owner resides in the existing home under SB 9. This analysis assumes the property owner owns their property outright, either by paying off the entirety of their previous mortgage or by having purchased their home with cash.

Figure 23 below provides a summary of the cash flow analysis findings. As shown in this table, property owners in Tier 1 and Tier 2 are most likely to pursue this strategy because they would not have to pay substantial upfront costs. Tier 1 property owners are best-positioned, due to the relatively higher rent revenues.

With a cash-out refinance mortgage, the loan value is tied to the existing property value. Property owners with higher home values are expected to be better positioned to use this financing product, because the loan values will more likely cover the development cost.[14]

[14] There are other financing products that property owners in this position could theoretically use, such as a construction loan, or a HELOC, but the cash-out refinance mortgage is expected to be the most common, because it typically offers lower interest rates than these other products.

The cash flow analysis calculates the profit from Year 1 (the year that the mortgage begins, during which the duplex is built) through Year 30 (the year the mortgage would be paid off). Property owners start to earn rental income in Year 2, when the duplex is completed. Property owners in Tier 1, who likely have higher home values, would break even and start to see a profit on their investment earliest in Year 6, while Tier 2 homeowners would see a profit in Year 7. Because of the lower rent revenues, Tier 3 owners would not break even until Year 14. Property owners with lower existing property values pursuing a cash-out refinance mortgage, as shown in Tier 3, would have to pay significant upfront costs. This is major barrier for property owners pursuing this strategy.

FIGURE 23. CASH FLOW SUMMARY: EXISTING PROPERTY OWNER BUILDS DUPLEX RENTAL IN REAR YARD

	Tier 1	Tier 2	Tier 3
Net Annual Operating Income (a)	$62,868	$59,124	$53,352
Total Development Cost (b)	$887,186	$863,610	$864,616
Cash-Out Refinance Mortgage Financing Summary			
Expected Property Value	$1,296,000	$1,200,000	$996,000
Maximum Loan Amount Possible (c)	$1,036,800	$960,000	$796,800
Loan Amount	$887,186	$863,610	$796,800
Closing Costs (d)	$35,487	$34,544	$31,872
Development Costs Paid Up Front	$0	$0	$67,816
Total Cost Required Up Front	$35,487	$34,544	$99,688
Annual Mortgage Payment (e)	$46,333	$45,102	$41,613
Year that Property Owner Breaks Even	Year 6	Year 7	Year 14

Notes:
(a) Rent from two duplex units, less 5% vacancy and 30% operating costs.
(b) Equivalent to total development cost for Duplex Rental in Rear Yard prototype, less the $100,000 renovation cost of existing home, and less developer profit and financing cost assumptions.
(c) 80% of expected property value, which reflects the total loan amount available to homeowners who own their property outright.
(d) 4% of loan amount.
(e) Assumes 30-year fixed rate mortgage with 3.25% interest rate.

Furthermore, ff an owner only owns a share of equity on their home, the maximum possible value of the loan would be significantly reduced, and the owner would have to pay a much larger sum of money up front. This would be a major barrier for typical property owners interested in this type of project.[15] The City of San José could explore collaborating with local credit unions or CDFIs to develop specialized financing products that could allow homeowners more options to pursue these projects. For example, innovative loan products could allow homeowners to rely on the expected future value of their property with the duplex constructed, or on the future rental income, as a basis for their loan.

[15] To illustrate this, an additional analysis was conducted for a property owner in Tier 1 with 50 percent equity in their home. With a hypothetical purchase price of $1,100,000, they would have $550,000 equity in their home and $550,000 of principal still outstanding. With a current value of $1,296,000, they would qualify for a cash-out refinance mortgage of just $486,800 (80 percent of current value, less outstanding principal). In this scenario, they would have to pay $400,386 in development costs up front plus $19,472 in closing costs.

V. AFFORDABILITY OF OPPORTUNITY HOUSING

The affordability of the prototypes in both tiers 1 and 2 was calculated, to provide context around the households that these types of units would serve. The methodology for calculating the affordability of the prototypes' units is described below.

Methodology for Estimating Unit Affordability

The methodology for identifying the affordability of the prototypes' units is described below:

1) The affordability levels were identified by calculating the incomes needed to afford the housing costs associated with the prototypes' units. For rental housing, it was assumed that housing would be considered affordable if the household pays no more than 30 percent of their income on housing costs. For ownership housing, housing is considered affordable if housing costs account for no more than 35 percent of their household income.[16]
2) Other housing costs in addition to either rent or mortgage payments were estimated based on standard industry assumptions and available research on the various cost categories. For rental prototypes, the monthly housing cost simply includes rent and a utility cost estimate. For condo prototypes, the monthly housing cost includes a variety of other items besides the mortgage payment, including utilities, property taxes, HOA fees, mortgage insurance, and homeowner's insurance.
3) The incomes required to afford the unit were then translated into AMI levels, calculated from the Santa Clara County median income levels for the relevant household sizes, published annually by CA HCD. The household sizes were identified by multiplying the unit's bedroom amount by 1.5 people, which is a standard method used by TCAC.

Figure 24 below shows AMI ranges associated with income levels that are tied to affordable housing programs and plans, ranging from "Extremely Low Income" up to "Above Middle Income." Most affordable housing programs focus on producing housing that is affordable for households considered "low-income" or below, which is 80 percent of AMI or less. In high-cost cities like San José, there have also been efforts to increase the supply of moderate-income housing, which is between 80 and 120 percent of AMI.

FIGURE 24. INCOME LEVELS AND ASSOCIATED "% OF AMI" RANGES

Income Level	AMI Range	Annual Income (3-Person Household)
Extremely Low Income	<30% AMI	<$41,000
Very Low Income	30-50% AMI	$41,000 - $75,000
Low Income	50-80% AMI	$75,000 - $106,000
Moderate Income	80-120% AMI	$106,000 - $163,000
Middle Income	120-150% AMI	$163,000 - $204,000
Above Middle Income	>150% AMI	>$204,000

Source: City of San José, 2020; Strategic Economics, 2021.

[16] The assumption that no more than 30% of a household's income should be used for housing costs for the housing to be considered affordable is a standard industry assumption. In cases where the affordability of luxury, market-rate, for-sale housing is being evaluated, the percentage is increased to 35% to reflect the fact that higher-income households are able to spend a higher share of their income on housing.

Affordability of Opportunity Housing

A summary of the affordability of the Opportunity Housing prototypes in Tiers 1 and 2 is displayed below in Figures 25 and 26. The tables, which are organized by set, show the affordability for the units in every prototype, and those that were found financially feasible are color-coded in green. The affordability for Tier 3 is not shown because every prototype in Tier 3 was found to be infeasible. As shown in Section IV, feasibility is significantly more attainable in Tier 1 than in Tier 2, but it is plausible that there could be instances where prototypes that were found infeasible in Tier 2 could be feasible in certain circumstances.

Most prototypes in Tier 1 fall in the "middle-income" range, which is between 120 and 150 percent of AMI, while there are some prototypes with units that are considered "moderate-income." Middle-income households are generally well-served by the existing stock of market-rate housing. A three-person, middle-income household in Santa Clara County would earn between $165,000 and $205,000 annually in 2021.

The stacked multiplex prototypes in Tier 1 achieve deeper affordability than the duplex and townhome-style prototypes, which have larger units. Some multiplex units are affordable to households in the moderate-income range. These smaller units are more affordable by design.

Rental prototypes, all of which are in stacked multiplexes, are more affordable than condo prototypes largely because of the added expenses associated with condo ownership. For example, the Stacked Fourplex Rental is affordable to a household at 125 percent of AMI, while the Stacked Fourplex Condo is affordable to a household at 135 percent of AMI. The 2-Story Eightplex Rental has the lowest rent, and is affordable to households between 80 and 90 percent of AMI, depending on household size.

More prototypes are considered feasible in Tier 1 because the revenues associated with the prototypes are highest. Therefore, households would be required to pay more in housing costs for prototypes in Tier 1 than in other tiers, making housing in Tier 1 less affordable overall.

FIGURE 25. TIER 1 AFFORDABILITY SUMMARY

Prototype	Income Needed to Afford Unit	Affordable to Household at:
Set 1		
Stacked Fourplex Rental (2-BR)	$153,320	125% AMI
Stacked Fourplex Condo (2-BR)	$183,198	135% AMI
Side-by-Side Large Duplex Condo (4-BR)	$339,550	195% AMI
Side-by-Side Duplex Rental in Rear Yard (3-BR)	$172,000	105-115% AMI
Side-by-Side Duplex Condo in Rear Yard (3-BR)	$210,224	130-140% AMI
Set 2		
Small Lot Single Family (3-BR)	$237,702	145-155% AMI
Attached Townhome (3-BR)	$237,291	145-155% AMI
Set 3		
Three-Story Sixplex Rental (2-BR)	$153,320	125% AMI
Three-Story Sixplex Condo (2-BR)	$183,198	135% AMI
Two-Story Eightplex Rental (1-BR)	$94,840	80-90% AMI
Three-Story Eightplex Rental		
1-BR	$115,840	95-110% AMI
2-BR	$146,120	105% AMI
Three-Story Eightplex Condo		
1-BR	$128,809	105-120% AMI
2-BR	$173,869	130% AMI

Notes:
(a) Condo prototypes: Housing is considered affordable if monthly housing costs do not exceed 35% of monthly household income. It is assumed the buyer uses a 30-year fixed rate mortgage, and contributes a 5% down payment. An interest rate of 3.8% was used, based on average interest rates over the last five years. Other monthly housing costs include: utility costs, which are between $200 and $300 per month depending on unit type; homeowners' association dues, which are on average $258 per month, according to a previous housing affordability analysis for San José by Strategic Economics and Street Level Advisors; Monthly property taxes based on an annual cost equivalent to 0.75% of the sales price; Annual homeowner's insurance estimated to be 0.28% of the sales value, based on the average rates for California homebuyers (Quotewizard.com); and annual mortgage insurance estimated to be 0.7% of the mortgage amount, based on median PMI rates for California homebuyers (bpfund.com).

(b) Rental prototypes: Housing is considered affordable if monthly housing costs do not exceed 30% of monthly household income. It is assumed that households pay monthly utility costs of between $180 and $230 per month, depending on unit type.

Household sizes: The affordability levels are based on Santa Clara County 2021 income limits, published by CA HCD. They are tied to specific household sizes, which are based on federal TCAC guidelines of 1.5 people per bedroom. (Ex. The AMI for 2-bedroom units is based on 3-person households). When the associated household size calculation is between integers, the affordability for both household sizes are shown (i.e., For 3-bedroom units, the affordability for both 4-person and 5-person households is shown).
Source: CA HCD, 2021; ValuePenguin.com, 2021; Street Level Advisors; 2019; Santa Clara County Utility Allowance Schedule, 2021; Strategic Economics, 2021.

The affordability summary for Tier 2 is shown below in Figure 26. These units would be more affordable than Tier 1 prototypes, but the Small Lot Single-Family prototype and the Side-by-Side Large Duplex Condo are the only prototypes expected to be feasible in Tier 2 based on this analysis. They would be affordable to households in the 130 to 140 percent and 170 percent of AMI ranges, respectively. If other prototypes were feasible, they could reach deeper levels of affordability. For example, the Two-Story Eightplex Rental would be affordable to low-income households. However, the development of these prototypes is much less likely in Tier 2.

FIGURE 26. TIER 2 AFFORDABILITY SUMMARY

Prototype	Income Needed to Afford Unit	Affordable to Household at:
Set 1		
Stacked Fourplex Rental (2-BR)	$144,536	105% AMI
Stacked Fourplex Condo (2-BR)	$162,778	120% AMI
Side-by-Side Large Duplex Condo (4-BR)	$301,513	170% AMI
Side-by-Side Duplex Rental in Rear Yard (3-BR)	$162,000	100-105% AMI
Side-by-Side Duplex Condo in Rear Yard (3-BR)	$186,601	115-125% AMI
Set 2		
Small Lot Single Family (3-BR)	$210,735	130-140% AMI
Attached Townhome (3-BR)	$210,324	130-140% AMI
Set 3		
Three-Story Sixplex Rental (2-BR)	$144,536	105% AMI
Three-Story Sixplex Condo (2-BR)	$162,778	120% AMI
Two-Story Eightplex Rental (1-BR)	$82,040	70-75% AMI
Three-Story Eightplex Rental		
1-BR	$100,040	85-95% AMI
2-BR	$137,720	100% AMI
Three-Story Eightplex Condo		
1-BR	$114,975	95-110% AMI
2-BR	$154,670	115% AMI

VI. ROLE OF MUNICIPAL FEES

In addition to standard municipal fees, such as building permit fees, school district fees, and construction taxes described on Page 20, Parkland In-Lieu fees and Site Development Permit fees would also be charged on the prototypes if they were to be developed today. Strategic Economics evaluated the feasibility impacts of these two fee categories. While exempting either of these fees does not make any infeasible prototypes feasible, they both constitute sizeable shares of total development cost, and the feasibility outlook of the prototypes would improve if there are circumstances where these fees could be reduced for Opportunity Housing projects.

Parkland In-Lieu Fee

The Parkland In-Lieu Fee is an impact fee paid to the Department of Parks, Recreation, and Neighborhood Services (PRNS), that addresses the increased need for public recreational facilities from new residents associated with the creation of new housing units.

This section shows the feasibility impact of the current Parkland In-Lieu fees under the existing methodology. PRNS is in the process of reviewing the Parkland In-Lieu Fee and has hired a consultant to carry out that analysis.[17]

The current fee, which is charged on a per-unit basis, varies depending on the building type.[18] The fees also vary based on the Multiple Listing Service (MLS) district in which the project falls. The MLS districts are similar to the 12 sub-areas used in this analysis. There are higher fees in MLS districts that have higher land values because the expected cost of acquiring land for new facilities would be higher in those districts. The MLS districts with higher fees correlate to the sub-areas that fall into Tier 1, because those sub-areas have the highest land costs. Therefore, the Parkland In-Lieu fee has the greatest impact on feasibility for Tier 1, specifically. Note that residential development projects can apply for credits towards this fee obligation which can effectively lower the cost. In addition, credits are also applied when a project incorporates the demolition of an existing housing unit, since the fee is based on needs associated with new households.

Figure 27 and 28 below show the per-unit fees by building type and sub-area, organized by tier. The average fee for the sub-areas in each tier was used to assess the feasibility impacts of the fee.

Note that the Tier 1 fee for rental prototypes is higher than for condo prototypes because Central San José, which is in Tier 1 for rental and Tier 2 for condo prototypes, has a higher fee compared to other

[17] The Department of Parks Recreation and Neighborhood Services has hired a consultant to review and recommend updates to the Parkland Dedication and Park Impact ordinances (SJMC: 19.38 and 14.25). The park fee schedule has not been modified since December 2017 (effective date March 2018) and the underlying assumptions that support the fee schedule have not been re-evaluated since the early 2000's, making this current study critically important. The selected consultant will assist staff in a comprehensive analysis of the ordinances which may include: 1) Recommending a methodology for the City to annually assess fair market land values for the purposes of assessing impact fees in-lieu of land dedication; 2) Assessing various methods of how fees are calculated in other jurisdictions and recommending a methodology for San José; 3) Evaluating the geographic boundaries where fees can be spent and evaluate mechanisms for equitable and fair distributions; 4) Modernizing how credits toward the PDO/PIO are qualified and applied; and 5) Demonstrating the legal nexus for any recommended changes.

[18] The per-unit fees are highest for single-family buildings, and lowest for buildings with five or more units. This is because the average household size in San José for households in single-family units is larger than the average household size for households in units that are part of multifamily buildings.

sub-areas. This also translates to a higher fee assumption for condo prototypes than rental prototypes in Tier 2.

The fee is highest for sub-areas where land costs are higher, which largely fall into Tier 1. The fees in Central San José, West Valley, and Willow Glen range between $24,400 and $28,600 per unit for 2-4 unit projects and between $19,300 and $22,600 per unit for buildings with five or more units. The fee is lower in sub-areas that generally fall into tiers 2 and 3, such as South San José and Alum Rock ($11,600 per unit for 2-4 unit projects and $9,200 per unit for buildings with five or more units).

FIGURE 27. RENTAL PROTOTYPES: PARKLAND IN-LIEU FEE ASSUMPTIONS BY TIER AND BUILDING TYPE

	2-4 Unit Building	5+ Unit Building
Tier 1 (a)		
Willow Glen	$26,300	$20,800
West Valley	$24,400	$19,300
Central	$28,600	$22,600
Tier 1 Average	**$26,433**	**$20,900**
Tier 2		
Alviso	$10,100	$8,000
Cambrian/Pioneer	$13,500	$10,700
Almaden	$15,500	$12,200
Berryessa	$17,400	$13,800
South	$11,600	$9,200
Edenvale	$13,200	$10,400
Tier 2 Average	**$13,550**	**$10,717**

Tier 3 Average	**$14,825**	**$13,250**	**$10,475**

Notes:

(a) While North San José is in Tier 1, the North fee was excluded from the average because it is a very high outlier ($58,800 per unit for single-family project, $52,000 per unit for 2-4 unit projects and $41,600 for five or more units).

Source: City of San José, 2021; Strategic Economics, 2021.

The Parkland In-Lieu Fee has the greatest impact on development feasibility in Tier 1. Figure 29 shows the share of total development cost that the Parkland In-Lieu fee comprises, with the prototypes organized by density, (as shown in Figures 20-22). The fee constitutes between one and eight percent of total development cost in Tier 1, and approximately between one and three percent of total development cost in Tiers 2 and 3.

FIGURE 29. PARKLAND IN-LIEU FEE AS SHARE OF TOTAL DEVELOPMENT COST

	Tier 1	Tier 2	Tier 3
Small Lot Single Family	4.4%	3.7%	2.7%
Side-by-Side Large Duplex Condo	1.6%	1.3%	1.0%
Side-by-Side Duplex Rental in Rear Yard	5.0%	2.6%	2.7%
Side-by-Side Duplex Condo in Rear Yard	3.7%	3.1%	2.3%
Attached Townhomes	3.2%	2.7%	2.0%
Stacked Fourplex Rental	4.4%	2.2%	2.3%
Stacked Fourplex Condo	3.3%	2.7%	2.0%
Three-Story Sixplex Rental	3.8%	1.9%	2.0%
Three-Story Sixplex Condo	2.8%	2.4%	1.7%
Two-Story Eightplex Rental	7.8%	2.2%	2.3%
Three-Story Eightplex Rental	5.4%	2.8%	2.9%
Three-Story Eightplex Condo	4.1%	3.4%	2.5%

Notes:
The total development cost does not include the Parkland In-Lieu or Site Development Permit fees. The shares vary by tier because the parkland fee is higher in certain areas of the City.
Source: City of San José, 2021; Strategic Economics, 2021.

Site Development Permit Fees

A site development permit would be required for projects that are not permitted by right in the City's zoning code. This process would trigger various fees associated with processing the permit. Within the City, the Planning, Building, and Code Enforcement Department (PBCE) as well as the Public Works Department both charge site development permit fees.

PCBE currently charges a site development permit fee of $12,952 per residential project.[19], as well as $565 for every unit beyond two units.

Public Works charges a fee of $927 per project for projects with one or two units. For projects with three or more units, it charges a flat fee of $3,202 per project, plus $76 per unit.

These fees would be applicable for the prototypes if they were built under existing development regulations in the City of San José. Once SB 9 is implemented, these fees would likely not apply to some of the prototypes that have between two and four units. As part of the implementation process of the Opportunity Housing policy, the City will consider to what extent Opportunity Housing in general could be allowed by right, particularly for buildings that will not be allowed by right as a part of SB 9.

The site development permit fees account for between 0.7 percent and 1.3 percent of the total development cost for the prototypes. Since both the PBCE and Public Works fees are based on a

[19] This amount incorporates the Department of Transportation's flat site development permit fee of $447 per project.

project's number of units, prototypes with the same number of units have equivalent fees. These fees are applied universally across the City, so there is no variation across tiers. While these fees do not have a large impact on the overall feasibility of the prototypes, allowing projects to be permitted by right would still help developers save money both directly and by reducing the amount of time for project approvals.

FIGURE 30. SITE DEVELOPMENT PERMIT FEES AS SHARE OF TOTAL DEVELOPMENT COST

	Total Site Development Permit Fees	Site Development Permit Fees as Share of Total Development Cost
Small Lot Single Family	$17,588	1.1%

Three-Story Sixplex Condo	$18,870	0.7%
Two-Story Eightplex Rental	$20,152	1.1%
Three-Story Eightplex Rental	$20,152	0.8%
Three-Story Eightplex Condo	$20,152	0.7%

Notes:
The total development cost does not include the Parkland In-Lieu or Site Development Permit fees. The shares vary by tier because the parkland fee is higher in certain areas of the City.
Source: City of San José, 2021; Strategic Economics, 2021.

The Site Development Permit fees are base fees, and other permitting fees might also be applicable depending on the project and its location. This could include fees associated with tentative map requirements, lot line adjustments, tree removal, Riparian Corridor Policy Conformance requirements, historic analysis, environmental review, and others.

VII. APPENDIX A: DETAILED PRO FORMA RESULTS

The full pro formas for each prototype are included below. Scenarios that are considered feasible are highlighted in green.

Set 1 Results

IX. APPENDIX C: OPTICOS DESIGN: OPPORTUNITY HOUSING CITYWIDE ANALYSIS

Opportunity Housing Citywide Analysis

San Jose, CA

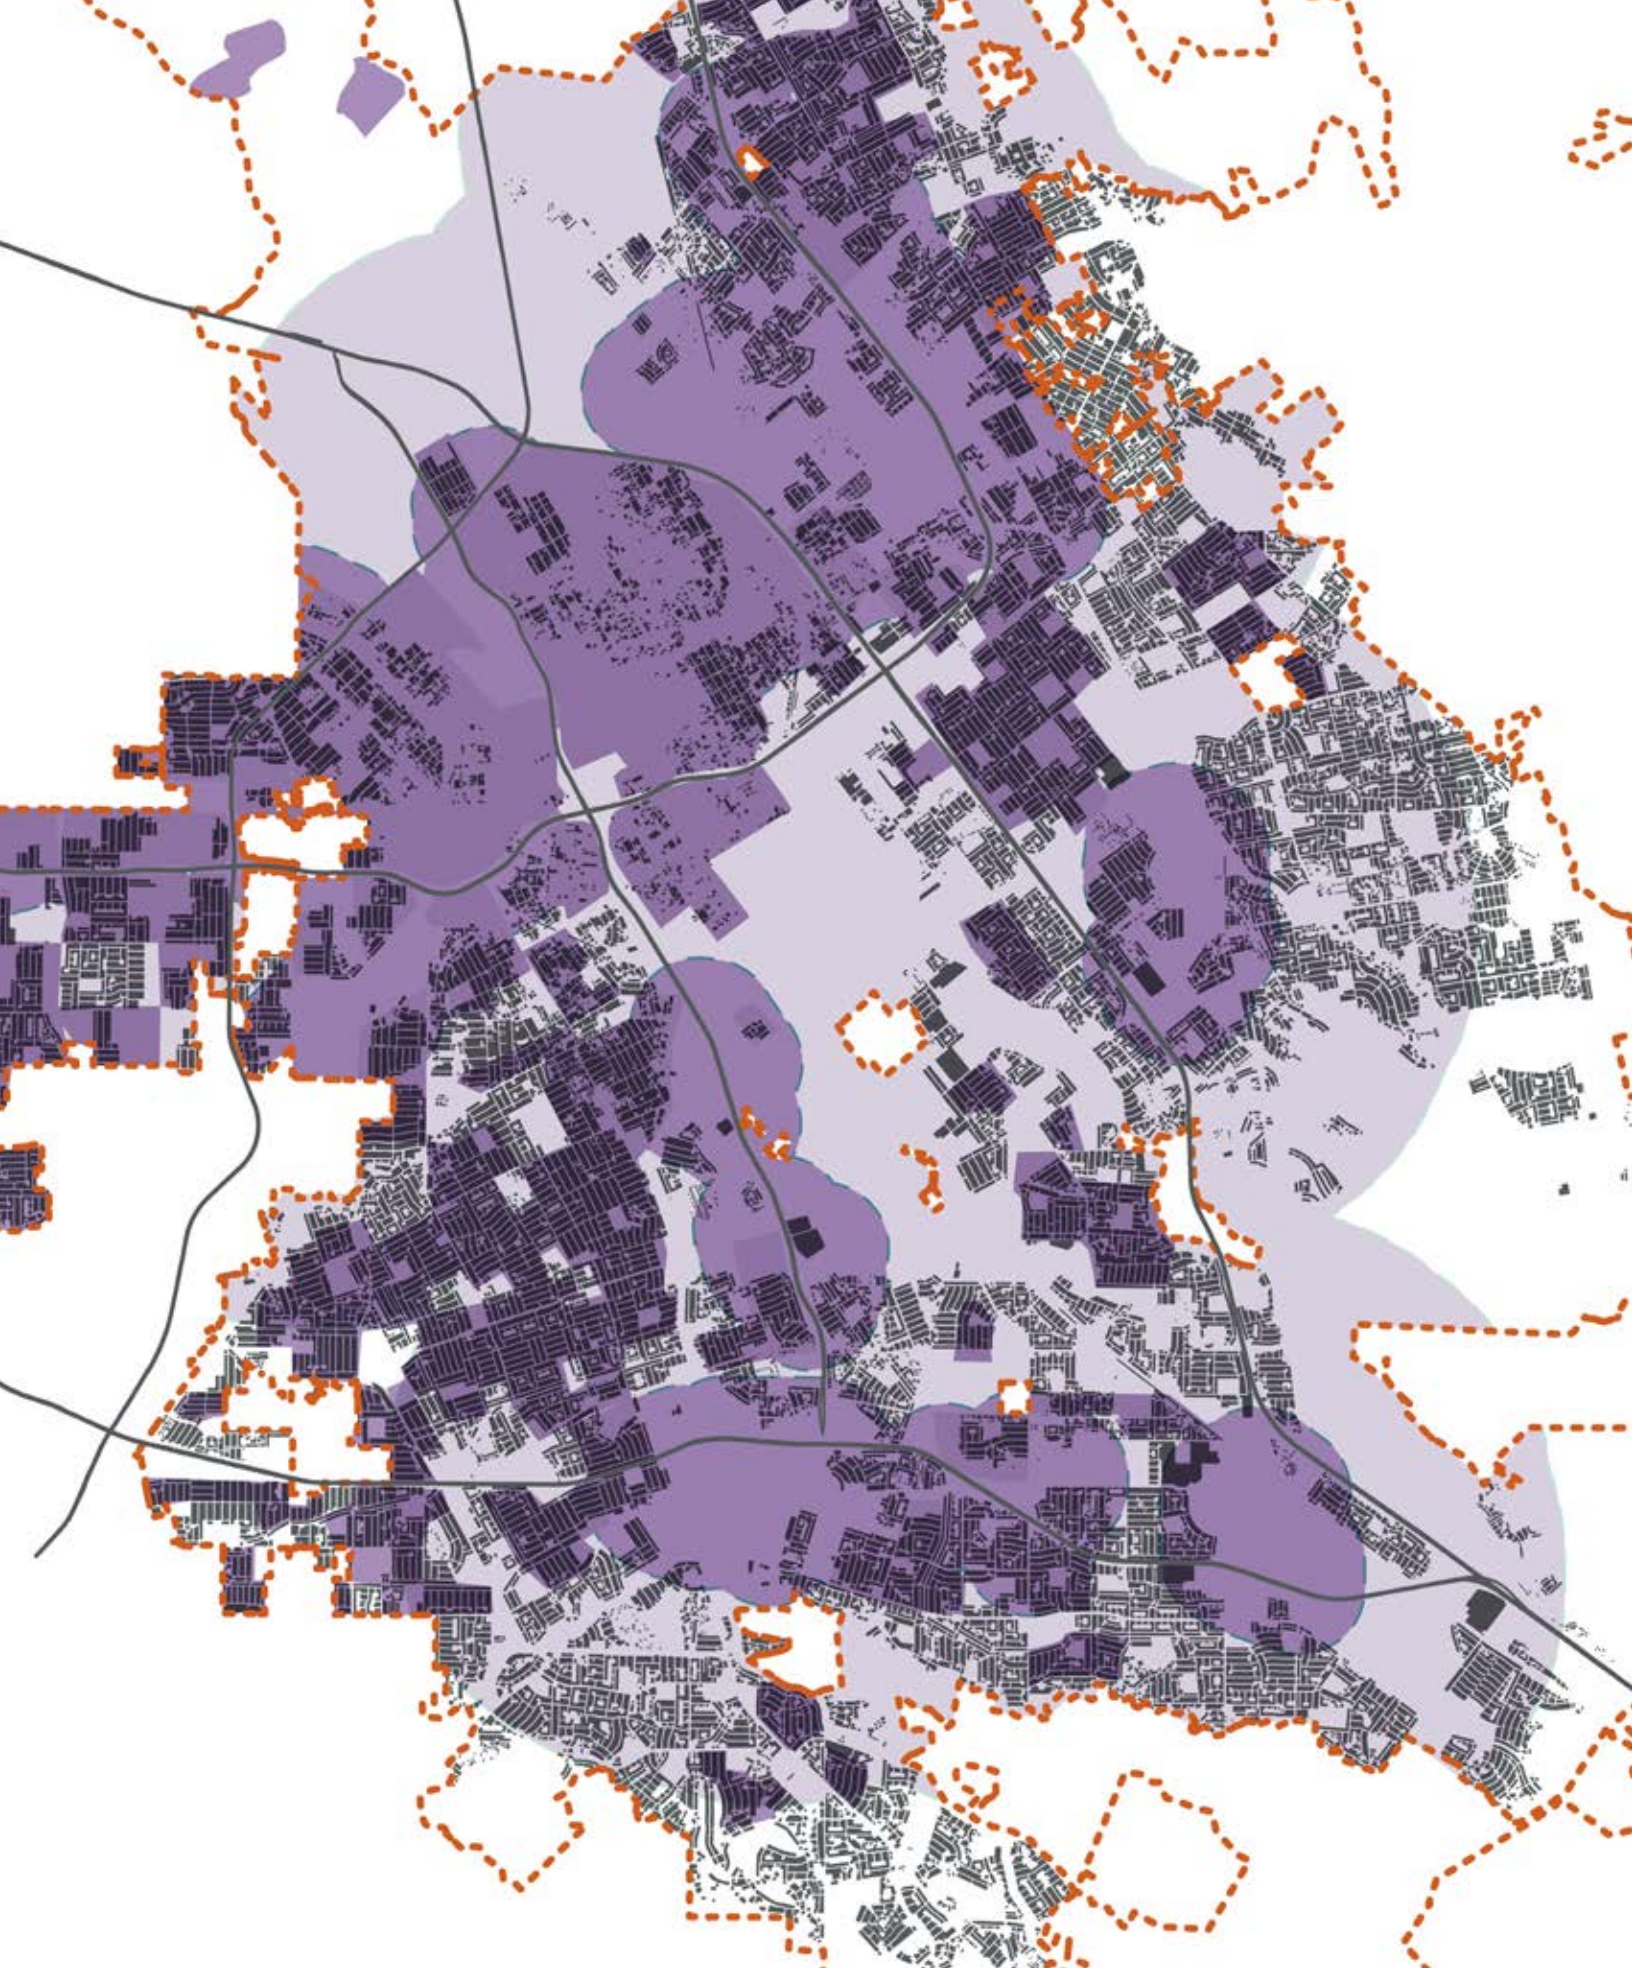
Summary Report
October 2021

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

STRATEGICECONOMICS

OPTICOS

The City of San Jose is studying Opportunity Housing as a response to the housing crisis.



Purpose Of This Study

The City of San Jose, like the rest of the Bay Area, is experiencing a severe housing shortage. One potential strategy proposed by the City Council to address this housing shortage is to change regulatory standards that currently limit the number of dwelling units on a parcel, raising the standards from allowing only a single-family house to allowing four housing units per lot in select areas of the city. **This study analyzes existing conditions that contribute to the feasibility of allowing units such as stacked fourplexes both in the half-mile radius around transit-oriented Urban Villages and on parcels citywide as a potential policy solution to alleviate the housing crisis.**

Regulatory barriers have not been the only barriers to constructing adequate housing in San Jose. Regional real estate and economic trends are formidable hurdles. Astronomical land prices and high construction costs impact the feasibility of small-scale development projects and a developer will typically not receive the rent or sale price of a duplex that justifies the investment of land and construction costs. **This study includes "lot testing" of stacked fourplexes and similar housing types on a range of lot conditions as part of a financial feasibility analysis carried out by Strategic Economics to produce an accurate cost analysis for Opportunity Housing.** Understanding the conditions required for successful development of Opportunity Housing types can help guide housing policy and stimulate housing production in San Jose.

This study supports and references the feasibility report titled "San Jose Opportunity Housing: Feasibility Results" (October 2021) prepared by Strategic Economics for the City of San Jose.

Lot Testing + Feasibility Analysis 24

Methodology + Objectives

This study relies on both qualitative and quantitative analysis in order to inform policy recommendations that would enable Opportunity Housing.

Starting Point

This study builds upon the City's prior work identifying Urban Villages as part of the San Jose 2040 General Plan and designating blocks within one-half mile of transit-oriented Urban Villages as Opportunity Housing Areas.

Purview and Objectives

This study gives particular focus to the potential for Opportunity Housing (typically two to four housing units per lot) within the Opportunity Housing Areas discussed above. However, the city's Opportunity Housing Task Force has also directed staff to evaluate the potential for Opportunity Housing citywide due to equity concerns. As a result, this study is citywide in extent.

This study aims to analyze Opportunity Housing Areas using a variety of metrics to identify optimal locations where Opportunity Housing may be viable. In doing so, the analysis considers existing street patterns, built context, urban form, and regulatory standards.

Since the threshold established by the Opportunity Housing Task Force and City Council is of two to four housing units on a lot, this study uses a typical stacked fourplex as a building type for analysis. Additional Missing Middle building types that are eligible for Opportunity Housing (such as duplexes, townhomes, multiplexes, etc.) were also considered in assessing the development potential of Opportunity Housing Areas.

Qualitative Analysis

Qualitative analysis is an essential component of a complete approach to crafting housing policy, which is intertwined with placemaking, a complex phenomenon that is not comprehensively captured by quantitative methods alone. Qualitative analysis, such as the development and categorization of context types, involves trained observation and judgment to organize patterns into a meaningful framework, and yields greater insight than quantitative analysis alone.

Quantitative Analysis

Quantitative analysis is a second essential component of this study, used to generate critical information about the comparative performance of housing types in different real estate submarkets of the city; the percentage of parcels that could physically fit a typical fourplex if regulations were changed; and the potential net gain of units that could result from changes in housing policy, among other insights.

Multiple Scales of Analysis

This study included analysis at two scales: the citywide scale and the district scale. The citywide scale was a jumping-off point; it illustrated macroscopic patterns that invited further study. The district scale analysis zoomed into specific characteristics of blocks, lots, and building footprints to understand the microscale conditions responsible for citywide patterns, as well as meaningful distinctions between different areas of the city.

Study Methodology

The study employs the following steps for the citywide analysis.

Identify **Urban Villages and Opportunity Housing Areas** citywide

Analyze **urban form patterns,** including building footprints and open space

Study the **regulatory context,** including current zoning and land uses

Analyze **context types** including street connectivity and built form

Identify **the range of lots** that can physically accommodate stacked fourplexes

Carry out **lot testing** using typical stacked fourplexes and other housing types to support financial feasibility analysis

Missing Middle Housing Types

Missing Middle Housing types offer a palette of house-form multi-unit housing options that are compatible with the range of two to four units per lot being considered for Opportunity Housing in San Jose.

Why Definition Matters

Building form will be an important consideration when establishing policies to deliver multi-unit housing into San Jose's existing primarily single-family neighborhoods in a way that expands housing options and also has a positive impact on the surrounding neighborhood.

Building form is an essential component of the concept of **Missing Middle Housing**, which is why several Missing Middle housing types have been considered for this study. Defined as "*a range of multi-unit or clustered housing types (ranging from two to 19 units per lot) that are compatible in scale with single-family homes, Missing Middle Housing types help meet the growing demand for walkable urban living, respond to shifting household demographics, and meet the need for more housing choices at different price points.*"[1]

Beginning with a specific building type in mind such as a stacked duplex or a stacked fourplex enables sharp economic analysis and a clear and communicable vision for the built results of any proposed policy change for Opportunity Housing.

Since the upper threshold established by the San Jose Opportunity Housing Task Force is of four housing units per lot, a stacked fourplex is an important prototype to consider for both its unit count and also its form characteristics.

What Is A Stacked Fourplex?

A Missing Middle Housing type with four units in one house-form building, a stacked fourplex is an optimal building type to study the implications of allowing four units per lot in Opportunity Housing Areas.

A Building Type, Not Just Unit Count

In this study, the term *fourplex* and *stacked fourplex* have been used interchangeably. Both refer to the Missing Middle housing type, and not (as the term is sometimes used) to just any configuration of four housing units on a lot. A stacked fourplex is defined as **"a small to medium-sized structure that consists of two units on the ground floor and two units stacked directly above them."**[2] Delivering four units as a stacked fourplex has many benefits: it can be built on smaller lots, it lives much like a single-family home, and its small-to-medium footprint and two-story height is compatible in scale with existing single-family neighborhoods.

What Is *Not* a Stacked Fourplex

Other ways to deliver four units on a lot may include four side-by-side townhouses, oriented to face the street, or perpendicular to the street with a driveway on one side (sometimes called a "slot home"); or even as four detached units. These alternatives do deliver housing but typically have larger unit sizes than the stacked fourplex, and are thus likely not available at attainable price points. Also, not all configurations of four units on a lot may contribute to good urban form and an active public realm.

[1,2] *Parolek, Dan. Missing Middle Housing: Thinking Big and Building Small to Respond to Today's Housing Crisis*

Typical Lot Dimensions	
Lot Width	50' - 100'
Lot Depth	100' - 150'
Resultant Density (du/acre)	
Without ADU	12 - 36
With ADU	18 - 55

Stacked Fourplex

- *Two units are located on the ground floor and two other units are stacked above them*
- *A common stoop and entrance is used to access all four units*
- *Has the form and scale of one house*

Not a Stacked Fourplex

- *Units are located side-by-side, not stacked*
- *Each unit has distinct massing and a separate entrance*
- *Much wider than one house*

Transit-Oriented Urban Villages + Opportunity Housing

These frameworks identify strategic locations for Opportunity Housing.

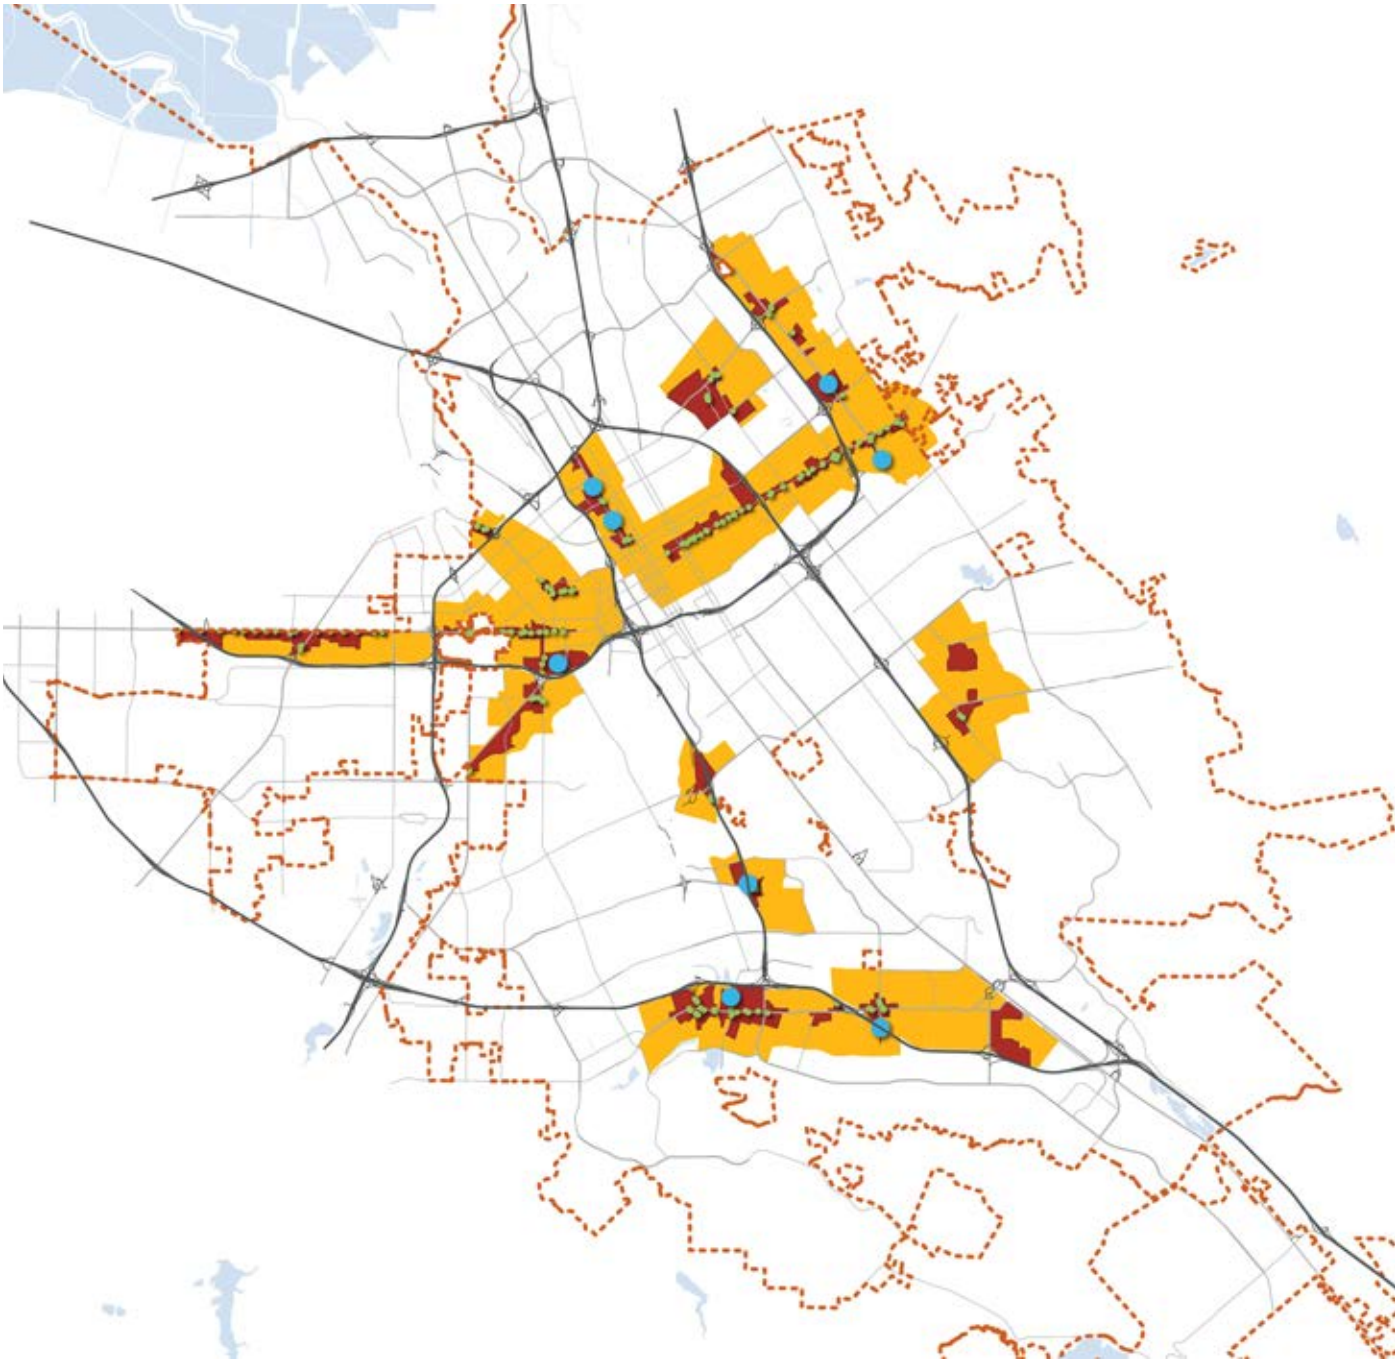
Summary

The City of San Jose has designated multiple "Urban Villages" to accommodate growth in both employment and housing. The locations of the Urban Villages were determined during the Envision San Jose 2040 General Plan process. Urban Villages are typically walkable, bikeable, mixed-use, and transit-rich. A subset of Urban Villages are planned around existing or planned regional and local transit stops such as BART, VTA light rail, BRT, and Caltrain, and are designated as *transit-oriented* Urban Villages.

The City has designated the parcels within one-half mile of these transit-oriented Urban Villages as Opportunity Housing Areas, which are priority areas for consideration in the construction of multifamily housing. In the City's words:

Opportunity Housing refers to enabling multi-unit housing on properties with a Residential Neighborhood General Plan land use designation. In San José, these are typically properties in single-family neighborhoods.

Staff and the General Plan Review Task Force explored allowing up to four units per parcel that could include a mix of a single-family home, duplex, triplex, or fourplex for a total of four dwelling units on the parcel while generally maintaining zoning setbacks and heights. This type of development was allowed in San José prior to World War II and still exists in many older neighborhoods.



Although the present analysis is citywide, it pays special attention to the locations of transit-oriented Urban Villages and their surrounding Opportunity Housing Areas as strategic locations for new multifamily housing.

Key Components of Analysis

Transit Routes

Transit routes and stops are concentrated within the transit-oriented Urban Villages, making these areas prime candidates for walkable, transit-oriented development that can support Missing Middle Housing. San Jose has rich transit providing both local and regional service, including ACE, Caltrain, Amtrak Capital Corridor, and VTA light rail and buses.

Transit-Oriented Urban Villages and Opportunity Housing Areas

Transit-oriented Urban Villages and their surrounding Opportunity Housing Areas are distributed throughout the city, with many clustered around downtown. Located near transit stops, these designations were created and mapped by the City prior to the present study.

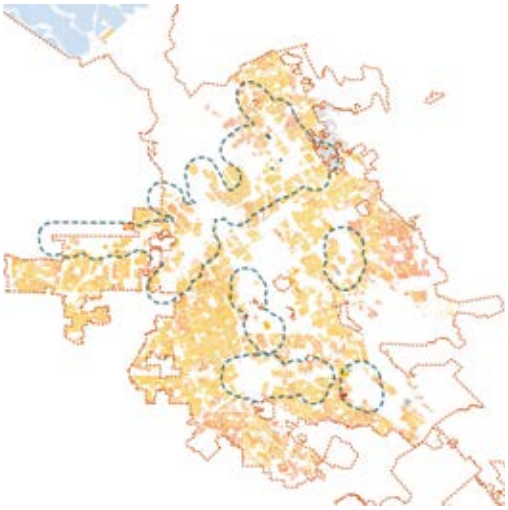
Key

- Transit-oriented Urban Village
- Potential Opportunity Housing Area
- Light rail stop
- Bus stop
- City limit

Urban Form

Analyzing the form of the built environment reveals different kinds of places within the city.

Summary



Buildings, streets, and blocks play a key role in shaping the public realm, which in turn impacts walkability. The sizes and shapes of buildings and the uses that occur within them can indicate an area's walkability or lack thereof.

San Jose contains diverse patterns of urban form including a finely gridded downtown with buildings at the edge of the sidewalk, neighborhoods with gridded streets and one- to two-story buildings with small or medium setbacks, neighborhoods with curvilinear streets and one- to two-story buildings with deep setbacks; as well as corridors with large-footprint one-story retail buildings set behind surface parking lots.

Key Components of Analysis

1-2 stories
typical building height

1 unit
predominant among residential buildings

Existing Building Heights
Buildings in San Jose are predominantly one to two stories in height.

Number of Units Per Lot
Most residential units in San Jose are in single-unit buildings (e.g. single-family homes).

Urban Form

San Jose and its transit-oriented Urban Villages (red fill) and Opportunity Housing Areas (yellow fill) include a diverse range of urban patterns.

Widely-spaced medium-footprint buildings in a curvilinear street pattern

Closely-spaced small-footprint buildings arranged in a modified street grid

Widely-spaced large-footprint buildings organized as a district

Regulatory Context

Current zoning standards regulate housing in different parts of the city. The General Plan allocates land uses and provides policy direction for how those neighborhoods should evolve in the future.

Summary

The zoning standards applying to a large portion of the city do not yet support the type of housing envisioned by the Opportunity Housing Areas study.

Key Components of Analysis

8 du/ac

is the maximum allowed density in Single-Family Residential zones

At this density, a lot would need to be

150'x150'

in order to accommodate a fourplex (much larger than physically needed)

General Plan Land Use
In the 2040 General Plan land use map, the predominant land use is Residential Neighborhood (shown here in purple). The General Plan describes this land use as encompassing "*most of the established, single-family residential neighborhoods, including both the suburban and traditional residential neighborhood areas which comprise the majority of its developed land.*"

Zoning and Building Footprints
The building footprints show the pattern of building forms and built up area across the city. Overlaid on zoning districts, these footprints provide a snapshot of development resulting from zoning standards.

Zoning

The zone covering the largest land area in the city is Single-Family Residential (shown in green) allowing up to 8 dwelling units per acre. Fourplexes are not allowed in this zone under the current standards. Opportunity Housing Areas (represented with the blue dashed line designating a half-mile buffer from transit-oriented Urban Villages) contain many parcels that currently have this zoning designation.

- R-2
- RM-H
- Non-Residential

Connectivity Context Types

A key ingredient for walkability is street connectivity. Analyzing existing connectivity revealed context types, one indicator of where Opportunity Housing and other Missing Middle Housing types are appropriate and/or likely to occur under existing conditions.

Background

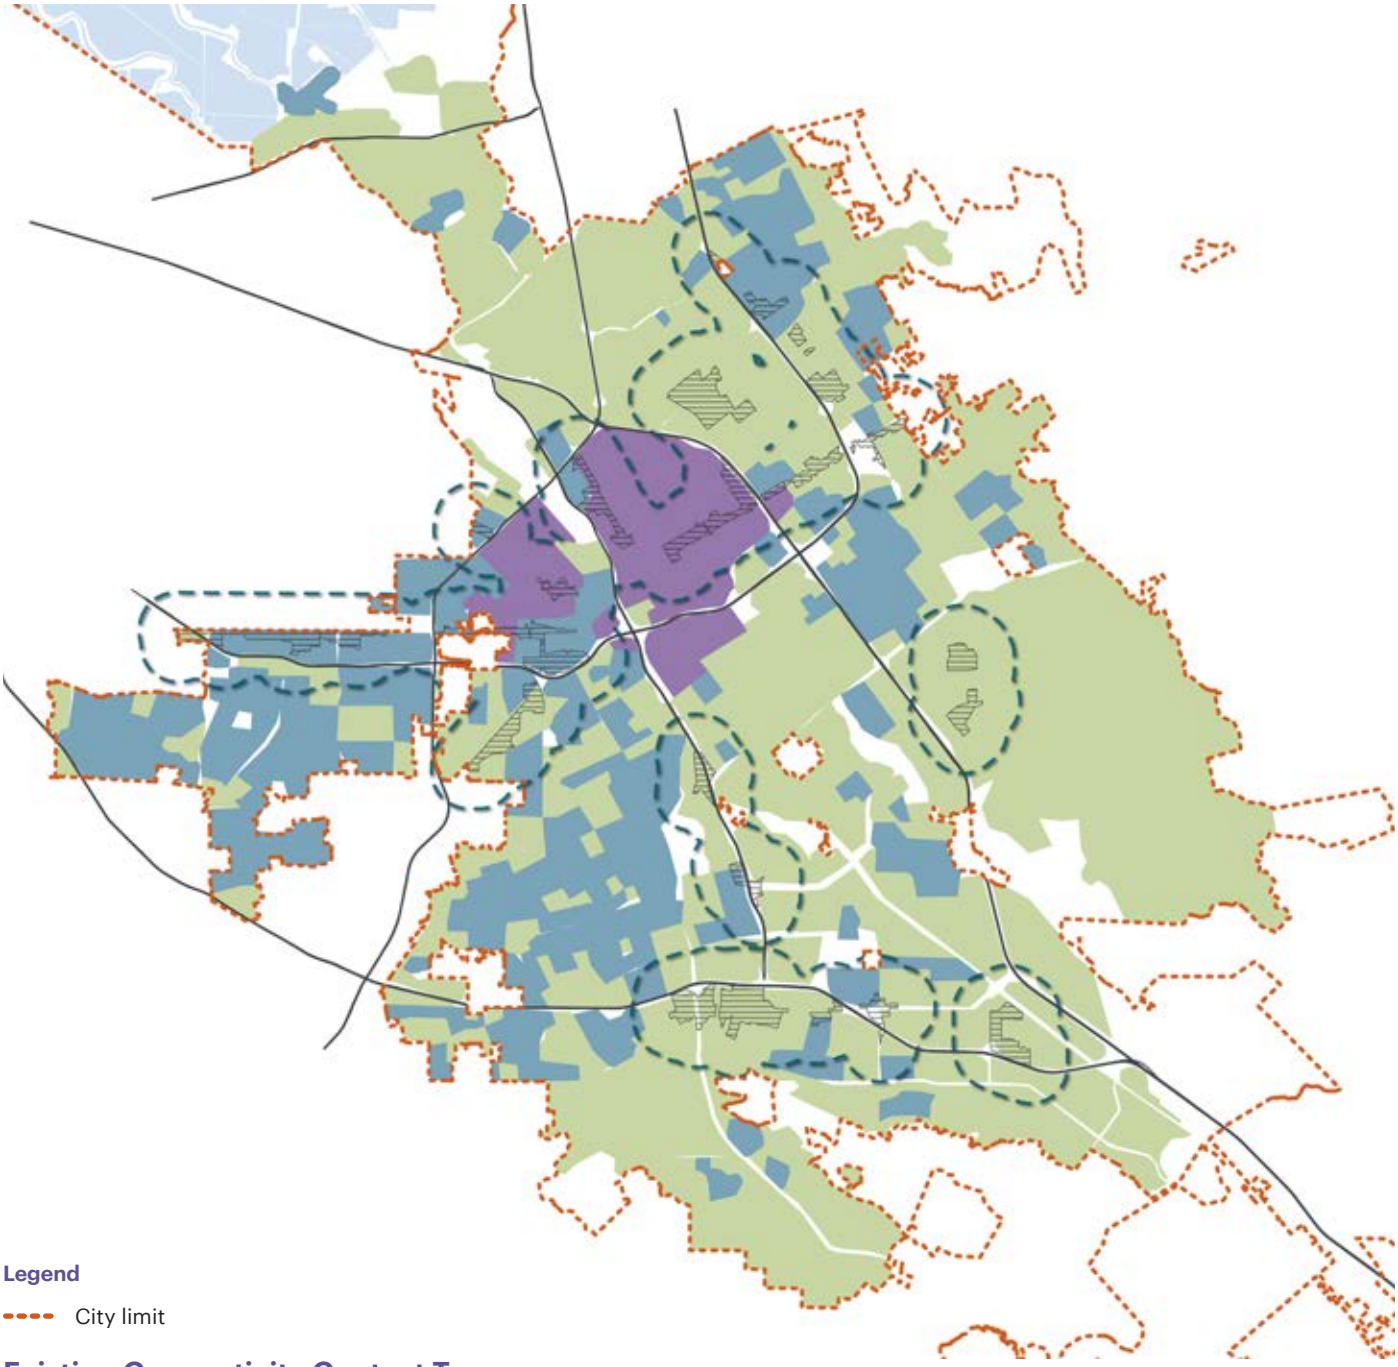
Missing Middle building types, including stacked fourplexes, are generally viable only when they have no more than one parking space per unit. This parking ratio is suitable for a walkable or bikeable context. This analysis looks at connectivity to establish context types that are walkable and bikeable. Note that this is a snapshot of existing conditions, and context types within San Jose may change over time, particularly in the areas surrounding transit-oriented Urban Villages. Urban Village boundaries may also change.

Methodology

Analyze street and lot patterns to classify groups of blocks as walkable urban, transitional urban-suburban, or suburban context types. These designations account for street connectivity and building placement only. Additional factors such as the mix of uses, quality of the public realm, and multimodal infrastructure also impact walkability.

Key Findings

Extensive walkable urban context in Central; extensive transitional context in West Valley and in Berryessa; transitional or suburban context in and adjacent to most other transit-oriented Urban Villages.



Key Components of Analysis

Connectivity and Street Types
The level of connectivity can be read from intersection frequency and number of connections within a neighborhood and to the surrounding street network.

Building Footprints
Building footprints provide information about how building form interfaces with the public realm. Walkable places tend to have buildings near the sidewalk where they are easily visible and accessible to pedestrians.

Legend

City limit

Existing Connectivity Context Types

Walkable Urban

Streets are well-connected with frequent intersections. Lots are long and narrow and some include alley access.

Transitional Urban-Suburban

Streets are well-connected within the neighborhood but may have limited connection to external streets. Lots are wide and deep.

Drivable Suburban

Streets have low intersection frequency and many dead-ends. Lots are large and irregular.

Fourplex-Supportive Lots

This analysis identifies lots that can physically accommodate fourplexes, specifically "stacked fourplexes". Lot size considerations can help to refine density and off-street parking requirements.

Methodology

Establish thresholds for lot dimensions that can fit a typical stacked fourplex: lot width may range from 50 ft to 100 feet, and lot depth may range from 100 ft to 150 feet.

Key Findings

The stacked fourplex building type can fit on a known range of lot depths and lot widths. San Jose has an abundance of lots that fit these dimensional requirements. 113,400 lots, which accounts for approximately **76 percent** of all Residential Neighborhood General Plan land use lots within San Jose, are fourplex-supportive based upon these typical dimensional requirements (lot width and lot depth).

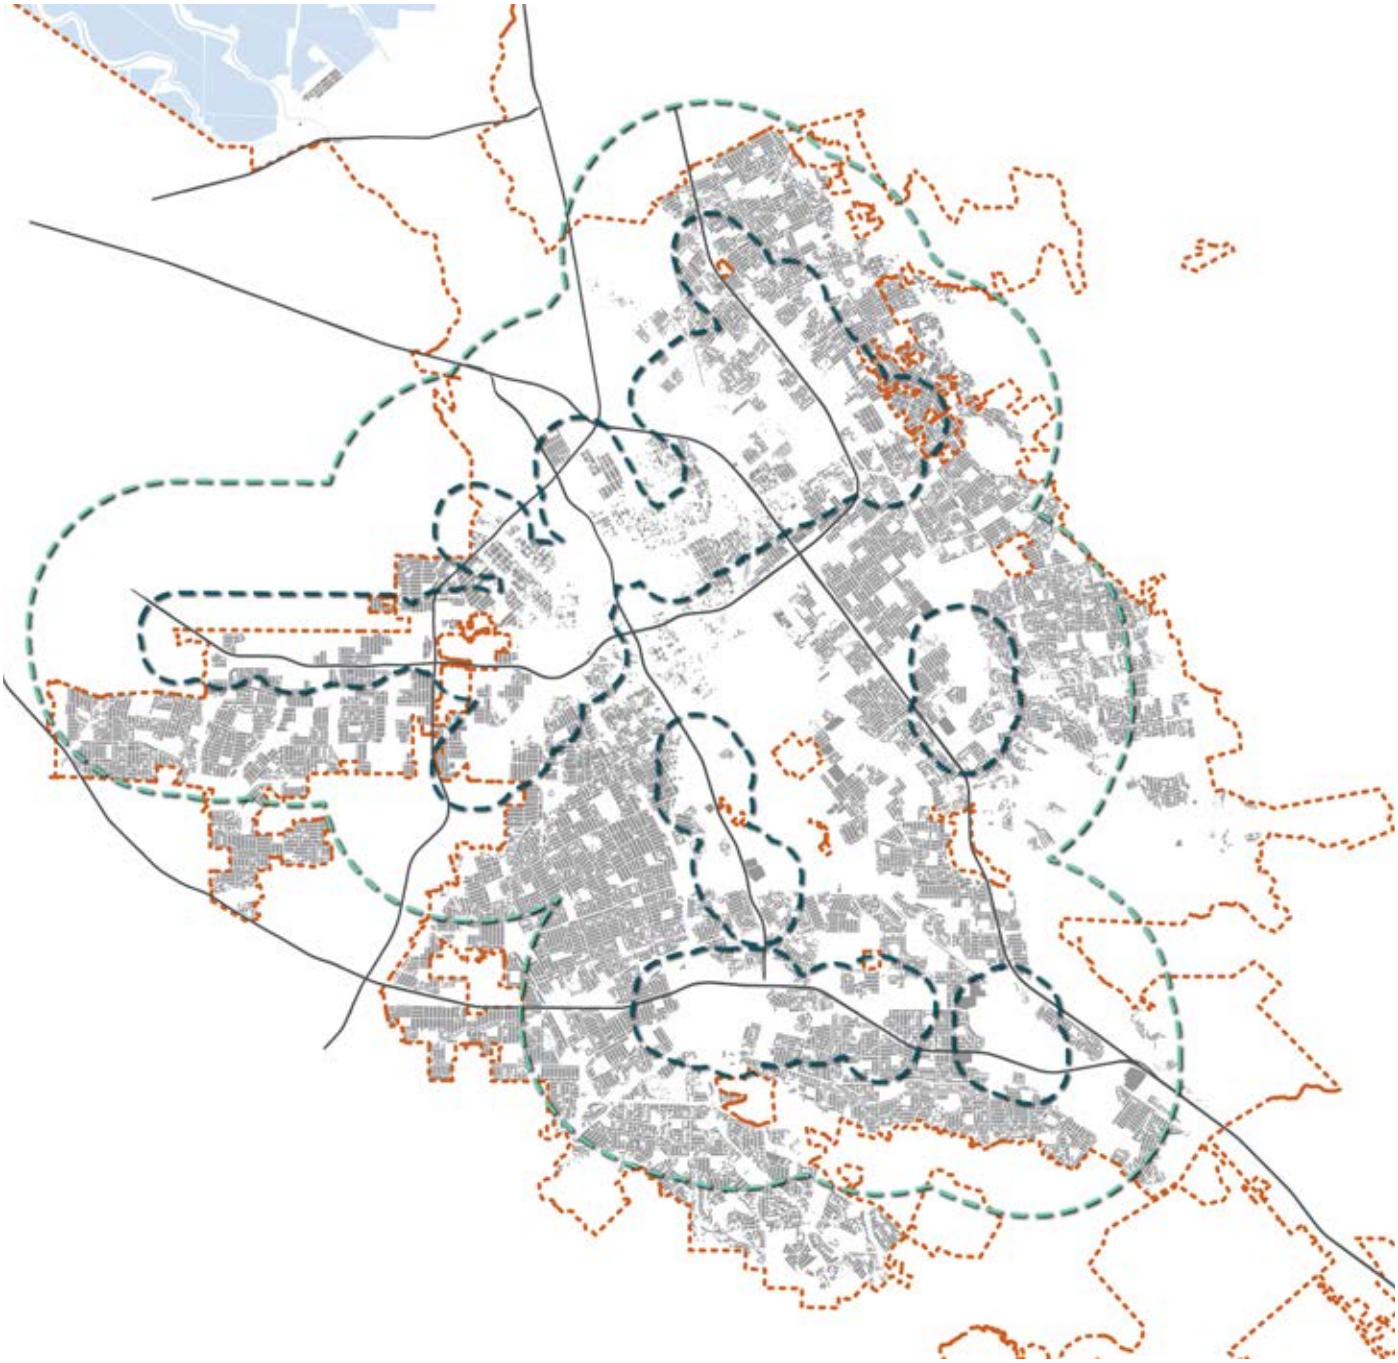
If one considers only the more typical lot dimensions for fourplexes - 50 to 65 feet in width by 100 to 150 feet in depth, approximately **57 percent** of the over 149,700 Residential Neighborhood General Plan land use lots could physically fit a stacked fourplex. An additional 1 percent of the lots could physically fit a fourplex with minimum setbacks and no parking requirement.

Key Components of Analysis

113,400

lots dimensionally suitable for fourplex development

=76%



of all Residential Neighborhood General Plan land use lots

Lot Width
The most prevalent dimensional range is greater than 50 feet wide and less than or equal to 75 feet wide. 119,412 lots fall into this range.

Lot Depth
Similar to the lot width analysis, parcels were classified as belonging to one of several ranges of lot depths. The most prevalent dimensional range is greater than 100 feet and less than or equal to 150 feet. 123,009 lots fall into this range.

Fourplex-Supportive Lots

This map displays the lots that meet both the lot width and the lot depth dimensional requirements for fourplexes, along with the half-mile walk shed (dark blue dashed line) and two-mile bike shed (light blue dashed line) from transit-oriented Urban Villages. Parking requirements further refine the lot size required for a fourplex project. As the map shows, significant parts of the city that are outside Opportunity Housing Areas can support fourplexes. This analysis provided the starting point for the lot testing analysis, that also examined additional economic and regulatory factors.

Legend

- Fourplex-supportive lots
- 1/2 mile walk shed
- 2 mile bike shed
- City limit

Missing Middle-Supportive Lots

In analyzing the potential for Opportunity Housing, additional Missing Middle Housing types were also considered that can further the City's Opportunity Housing goals.

145,241 lots

dimensionally supportive of duplexes

30,171 lots

dimensionally supportive of courtyard apartments, cottage courts, townhouses, and multiplexes

Methodology

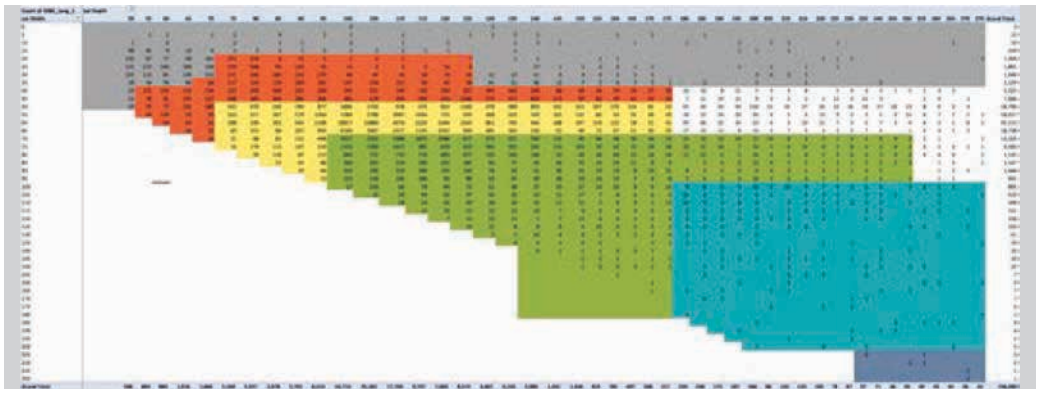
The parcel data of all parcels designated as Residential Neighborhood General Plan land use were charted in a matrix that shows the number of lots that fall within specific width and depth ranges. These were then classified to indicate what parcels a typical stacked fourplex would physically fit on, with setbacks and parking. The range of lots that can fit fourplexes varies from the smallest at 50 foot wide by 75 foot deep lot up to 65 foot wide by 175 foot wide lot. The matrix also provides a snapshot of other Missing Middle Housing types that can physically fit within the lot width and depth ranges.

Key Findings

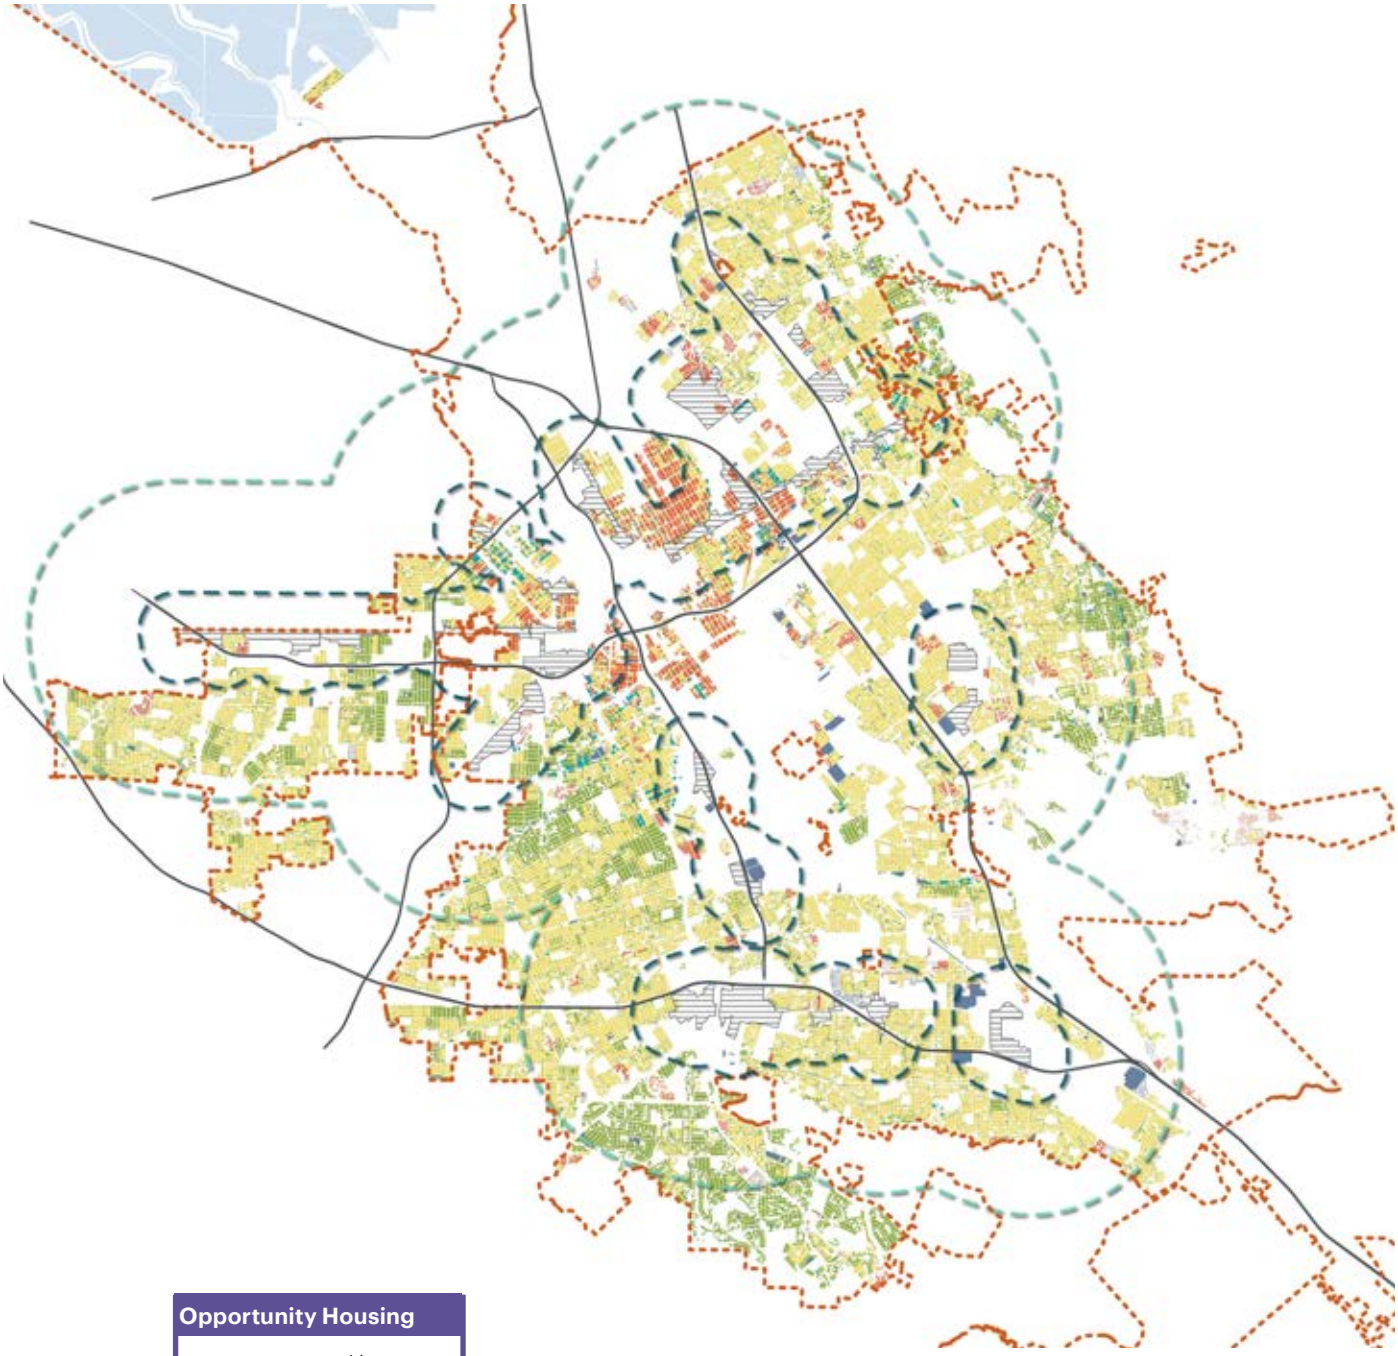
79 percent of the over 149,700 Residential Neighborhood General Plan land use lots are larger than the minimum lot size needed to accommodate a stacked fourplex. These lots could develop as multiple fourplexes or might accommodate a different building type such as a courtyard building or a cottage court.

This analysis can be further refined based on parcels that:

- City staff has recommended as Opportunity Housing sites (16,855 lots), based upon a half-mile walkshed from transit stops within each transit-oriented Urban Village;
- Are within a half-mile mile of city designated transit-oriented Urban Villages but not part of the city staff identified Opportunity Housing sites (20,452 lots); or
- Are within the city of San Jose and outside the half-mile radius of the city designated transit-oriented Urban Villages (93,484 lots).



Next Steps



While this analysis explored the range of lots that could accommodate a stacked fourplex building type, additional consideration for financial feasibility will need to be taken into consideration to understand where true redevelopment potential exists.

Lots Supportive of Missing Middle Housing Types

This map displays a range of lot size categories based on lot width and depth. Displayed are lots that physically accommodate various Missing Middle housing types, corresponding to the matrix at left.

Considerations for Enabling Stacked Fourplexes

Particular site conditions and parking requirements further refine dimensional requirements for stacked fourplexes.

Refining Dimensions for Particular Conditions

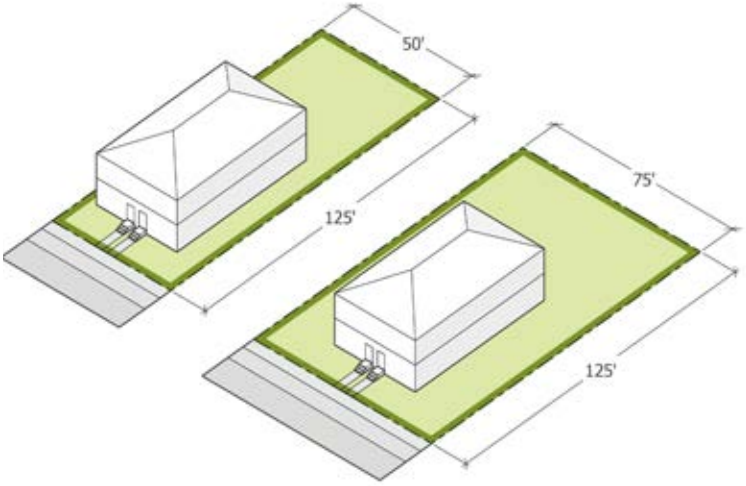

Image Copyright 2020 Opticos Design

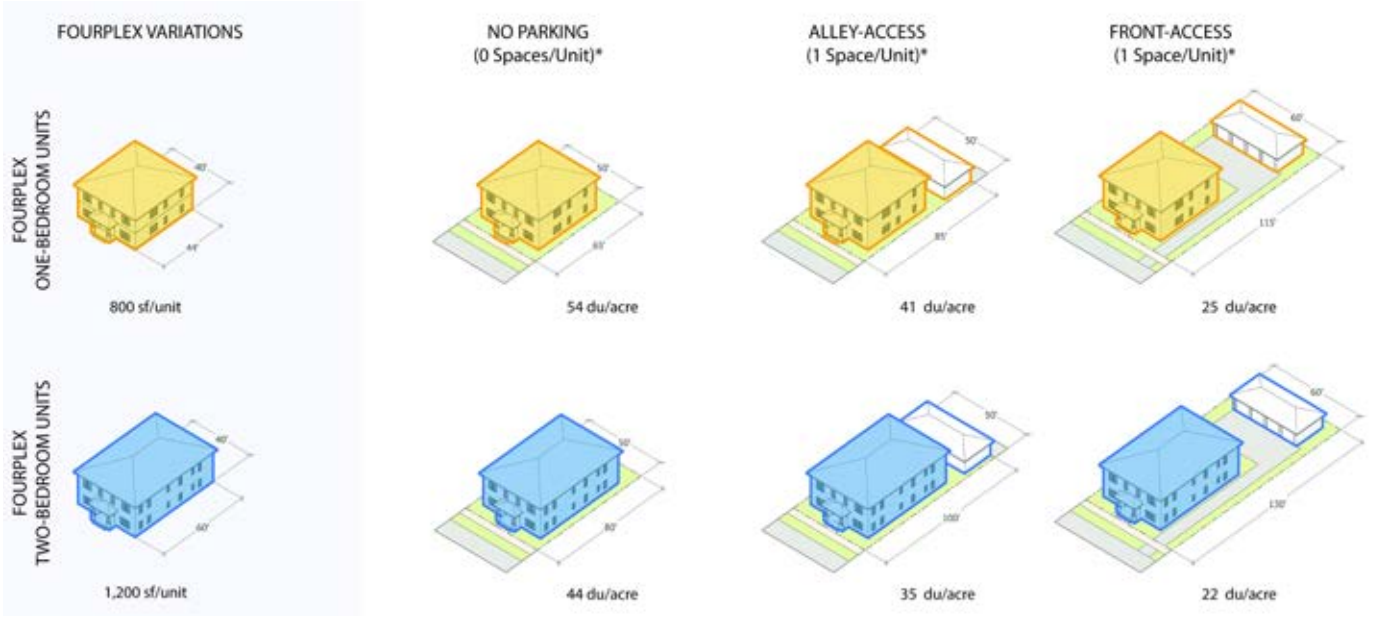
The diagram at left illustrates how the dimensional requirements for a stacked fourplex are further refined beyond the two extremes of the lot width range. The 50 by 75 feet lot would accommodate a compact fourplex with 5 foot setbacks and one parking space per unit provided from a rear lane or alley, while a 65 x 175 feet lot would accommodate a larger fourplex with more substantial setbacks and up to two parking spaces per unit. Lots wider than 75 feet and/or deeper than 175 feet can accommodate fourplexes but would not likely develop as a single fourplex building. Larger lots might develop as multiple fourplexes or might accommodate a different building type such as a courtyard building.

Variations in Unit Size and Parking Configuration

The diagram below illustrates how unit size, parking requirements, and whether parking is accessed from the street or from the alley all impact the minimum lot size that can physically accommodate a fourplex.



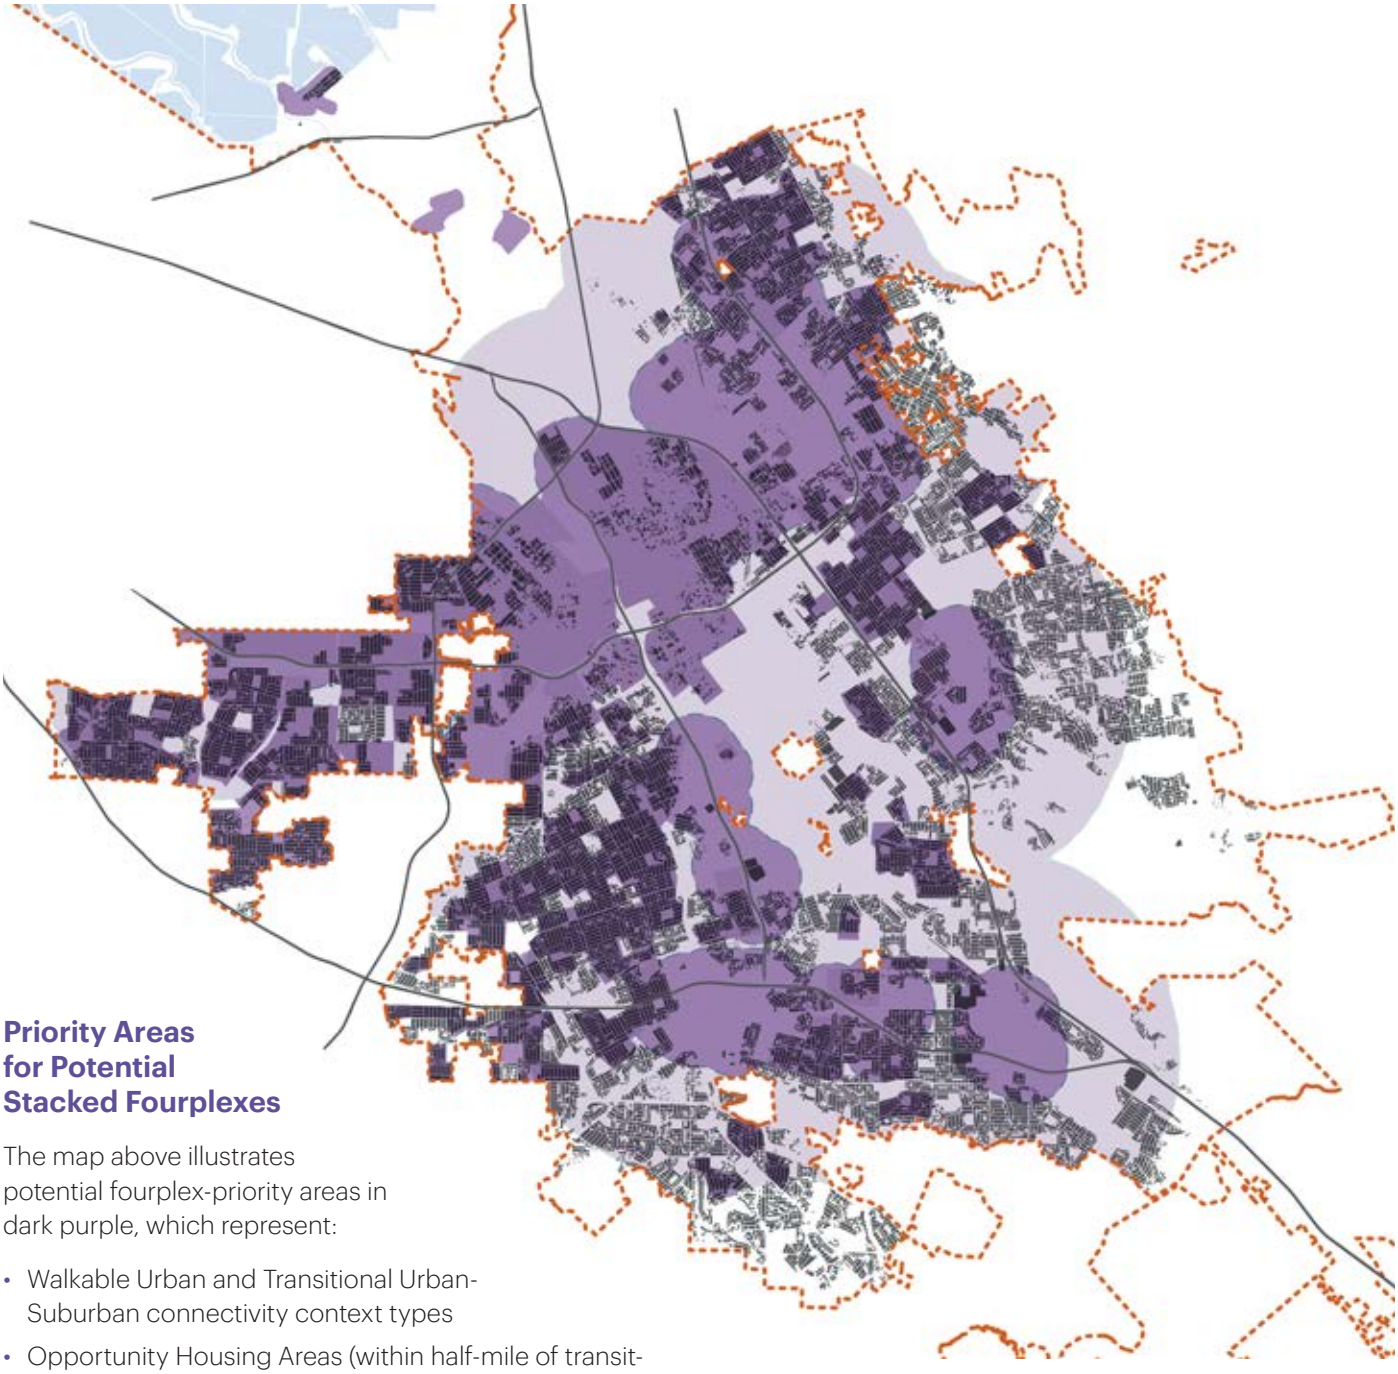


Image Copyright 2020 Opticos Design

Priority Areas for Potential Stacked Fourplexes

The map above illustrates potential fourplex-priority areas in dark purple, which represent:

- Walkable Urban and Transitional Urban-Suburban connectivity context types
- Opportunity Housing Areas (within half-mile of transit-oriented Urban Villages)

Additionally, the City should consider the bike shed (two-mile radius, shown in lavender) in addition to the walk shed (half-mile) from transit-oriented Urban Villages as stacked fourplex-priority areas.

The form of the housing provided also impacts which areas have the potential to prioritize fourplexes. Missing Middle housing types, such as stacked fourplexes, typically provide smaller units than are offered by, for example, four attached townhomes. Smaller units expand housing access, and typically can rent or sell with just one parking space per unit, even if not located within a walkable urban context type or within a walk shed of a transit-oriented Urban Village.

Lot Testing + Feasibility Analysis

To assess the viability of building types on specific lot configurations, lot testing is an essential step to inform the cost feasibility analysis of Opportunity Housing.

The Purpose of Lot Testing

Lot testing involves the design testing of typical building prototypes on select lot configurations. Since specific building types have inherent minimum dimensions, lot testing reveals the impacts and limitations of lot width and lot depth toward building size and off-street parking. The process seeks to optimize the unit count and parking count for a given lot size, with respect to desired building form within the allowed density and/or FAR. Since this involves using actual building types and site and parking layout, the results are more precise than numeric calculations based only on density or FAR.

Determining the Inputs

The first criteria for lot selection were allowed land use and lot size. Lots selected for this purpose were in the Residential Neighborhood General Plan land use with lot widths ranging from 50 to 60 feet. More information on the selection criteria is described on the facing page.

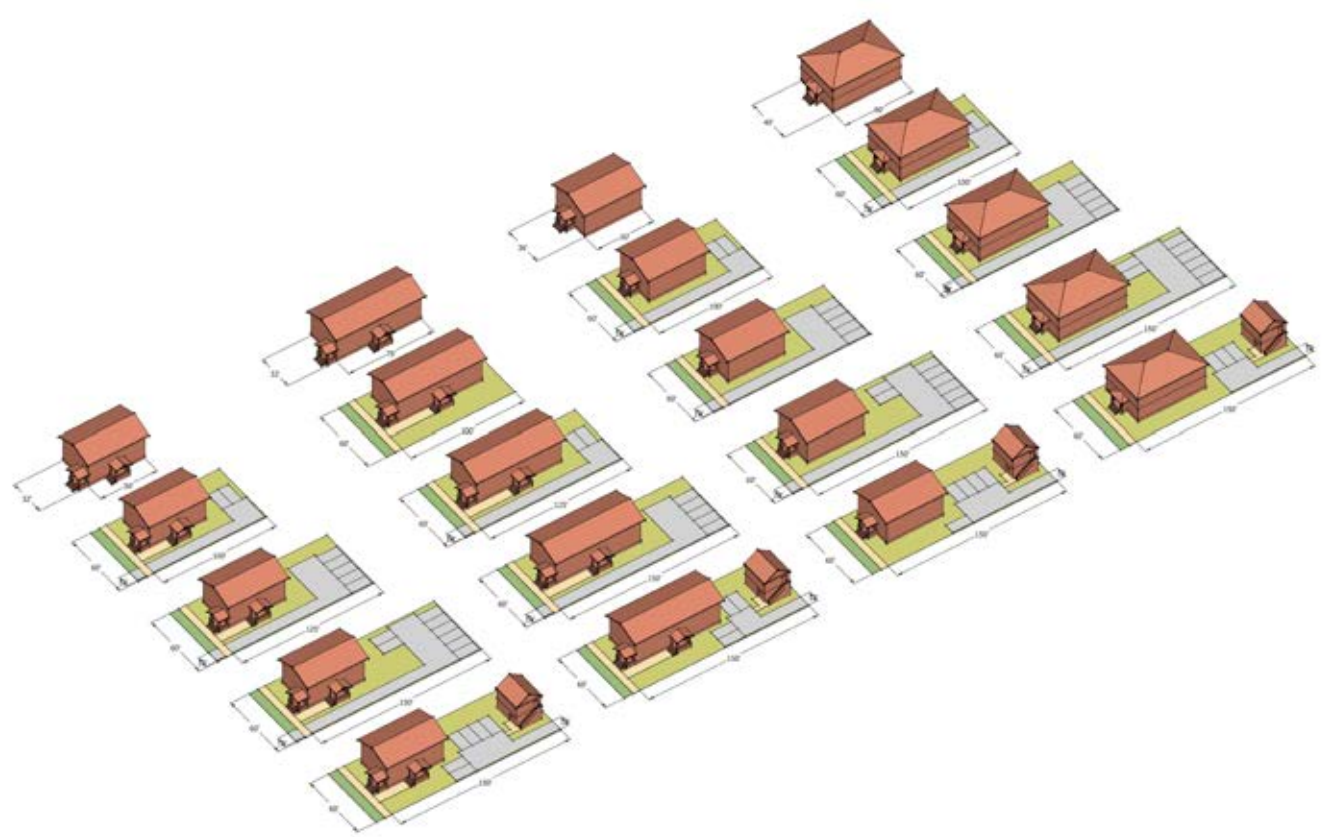
For the selected lot widths (50 feet and 60 feet), a stacked fourplex was a logical baseline building type for comparative feasibility analysis, since the upper threshold set by the Opportunity Housing Task Force and City Council for this analysis was four units per lot.

A stacked fourplex was selected because it provides four units, but within an overall footprint that is generally comparable to the footprints of single-family homes. The remaining lot area not dedicated to the building footprint could be utilized for a more intense parking approach when appropriate. The lot testing also considered variations in fourplex unit and building footprint sizes, and this in turn affected the parking approach as well.

Iterative Learning

The lot testing consisted of three rounds, and the process involved close collaboration with Strategic Economics. For each round, the development program achieved from the lot test was analyzed for financial feasibility for both rental and for-sale products in the three tiered submarkets identified for San Jose by Strategic Economics. For additional information on the submarkets, please refer to the report titled "San Jose Opportunity Housing: Feasibility Results", by Strategic Economics, October 2021.

A Note About ADUs



Accessory dwelling units were considered for 150-feet deep lots in the first round of testing and for select 125-feet deep lots in the second round. However, for consistency in comparing the different lot tests, ADUs are excluded from the FAR calculated and the feasibility results.

Attainability and Livability Considerations

In assessing financial feasibility, an important consideration to keep in mind is whether the "financially feasible" outcomes are also attainable at area median incomes. Unless the additional housing units delivered as part of Opportunity

CLOSER LOOK

Selecting Lot Sizes for Feasibility Testing

Four variations of the stacked fourplex building type were tested on lots 50 feet and 60 feet wide, and varying lot depths commonly found in San Jose. The graphic above shows the lot testing for 60 feet-wide lots.

Lot sizes were determined through citywide analysis of lot widths and depths of lots with the Residential Neighborhood General Plan land use designation. Lot widths and depths were arranged in a matrix to show the number of lots with each dimension, grouped in five-foot increments, revealing the most prevalent lot dimensions throughout the city. For example, the matrix showed that 60 feet is the most commonly occurring lot width with 90,364 lots having this dimension, more than double the number of lots with any other lot width. As a result, 60 feet was the lot width selected for study in most prototypes.

A lot depth of 125 feet allows most traditional fourplexes to have 4 off-street surface parking spaces, accessed by a front-loaded driveway that leads to the parking area in the middle and rear of the lot. The lot testing showed that 100-feet deep lots are not able to support off-street parking at a ratio of 1 space per unit, and 150-feet deep lots are able to support off-street parking at a ratio of 1:1 or slightly greater.

After an initial round of analysis, the lot size of 60 feet x 125 feet was determined to be most suitable for further testing. About five thousand (5,030) lots fall in the range of 60-65 feet width and 125-150 feet depth.

Housing are attainable to a majority of the San Jose population, the policy will be limited in its equity goals.

Another key consideration in drafting policy is that of livability. The manner in which the new housing will respond to privacy concerns from existing homeowners, and how the new housing types will engage with the street and sidewalk will be important. For instance, when building entrances face the street, it contributes to a safer, more walkable environment and helps build a sense of community. When building facades "back on" or "side on" to a street, this aspect is not addressed. Similarly, if a new building has all its units with windows overlooking a neighbor's yard, it may cause friction. These and other form criteria should form part of policy decisions regarding Opportunity Housing.

Summary of Lot Testing Results

The three rounds of lot testing included testing a variety of units on the same lot size (7,500 sq ft; 60 x 125 feet) for consistency. Strategic Economics tested the types described below for financial feasibility, in addition to other variations. The following steps were followed:

Round 1. Test an "idealized" housing type and additions

The first round tested a stacked fourplex, considered an ideal type to deliver attainability (due to its smaller unit sizes) and livability (due to its massing and orientation that work well in single-family neighborhoods). The stacked fourplex was found to be financially unfeasible (both rental and for-sale) across all three submarket tiers.

A stacked duplex prototype with larger, for-sale units had better feasibility in two of the three submarket tiers. This round also tested the scenario of maintaining the primary single family home while adding a duplex at the rear yard of the lot. This option was feasible in one submarket as a for-sale product but not as rental.

With these initial findings, the team sought to explore options that would be more feasible.

Round 2. Test housing types most likely to be market-feasible

In the second round, the team selected housing types more likely to achieve feasibility. These included a set of four side-by-side townhouse units oriented perpendicular to the street, a common lot configuration seen in San Jose and parts of the Bay Area. A set of four detached single-family homes were also studied. Modifications to improve financial feasibility included increasing unit sizes and building footprints, and adding a third story. These types were found to be financially viable in some submarkets under current market conditions.

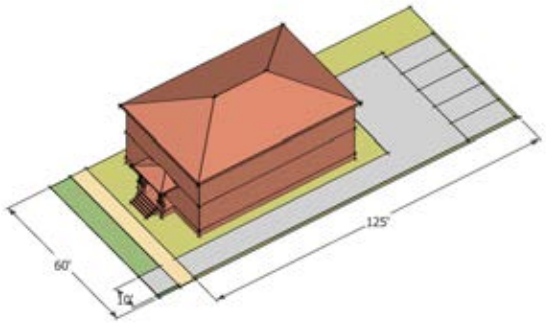
The results from this round showed that increasing FAR improved the potential for market feasibility. As building size increased, so did the unit size, up to the market threshold beyond which it became more appropriate to increase unit count as opposed to unit size. Given that the lot size stayed the same, FAR could increase with additional height or larger footprints with reductions to the open space on the lot, but generally the parking count could not be increased without drastic reductions to existing setbacks.

While prototypes tested in this round are financially feasible, they typically may not provide housing that is attainable to most median-income residents. In terms of building form and orientation, these do not make much contribution to neighborhood character or an active public realm.

Round 3. Find the sweet spot for feasibility, attainability and livability

In the third round of testing, the team sought to make modifications to the housing types to achieve financial feasibility while also aiming for good urban form and addressing attainability concerns.

To do this, the team had to push the defined parameters for Opportunity Housing, and add units beyond the established threshold of four per lot. In this round, the prototypes tested include two- and three-story stacked eightplexes and three-story stacked sixplexes. For this exercise, unit sizes and building footprints were kept similar to those used in the first round, and parking was reduced. Overall FAR was increased to improve financial feasibility by adding on a third floor.



Some of these prototypes were found to be feasible in some submarkets under current market conditions. These also would likely be more attainable, since unit sizes are smaller. These typically have reduced on-site parking, which may limit their appeal to some.

In the following pages, the three rounds of testing are described, with supporting graphics and program summaries.

For additional information about the feasibility analysis across the tiered submarkets, refer to the report prepared by Strategic Economics titled "San Jose Opportunity Housing: Feasibility Results", October 2021. This report by Strategic Economics also includes discussion on related topics such as potential impacts of recent state-wide legislation on Opportunity Housing (SB9, SB10) and other relevant information.

Round 1 Test an "idealized" housing type and additions

Stacked Fourplex

This lot test used a typical stacked fourplex building type, known to promote livability and attainability. A typical fourplex has smaller individual units, with an overall building footprint that closely matches that of a medium-to-large single-family house. For achieving the equity goals of Opportunity Housing, it was important to test this type.

However, the financial model showed this prototype to be financially infeasible, for both rental and for-sale products. **As a result, this type is unlikely to contribute to additional housing in San Jose.** A variation tested was a larger side-by-side duplex. **This type was found to be feasible as a for-sale product in two of the three submarket tiers.** However, the larger unit sizes indicate that attainability may be an issue with this prototype.

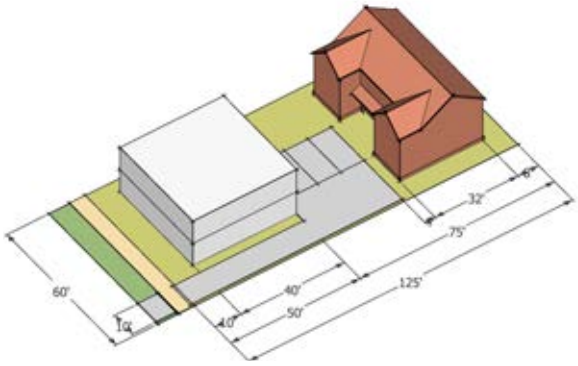
Attainability **Feasibility** **Livability**



Variation Tested (not shown here)

Two-Story Side-by-Side Large Duplex. This was tested as a for-sale product and was feasible in Tiers 1 and 2.

Round 1 *(Continued)*

Side-by-Side Duplex Addition

This prototype adds a side-by-side duplex to the rear yard of an existing single-family home. Approaches to off-street parking for this scenario can vary. The single-family home may have a front-loaded garage with a driveway that can support one or two tandem parking spaces. In lieu of that, a separate drive aisle for mid-lot parking could provide up to two parking spaces, with the portential for additional tandem parking within the drive aisle.
This prototype was found to be feasible in one submarket tier, as a for-sale product.

Round 2 Test housing types most likely to be market-feasible

Side-by-Side Townhouses

This round evaluated building types proven to be market-feasible based upon their recent production in San Jose. Understanding the financial performance of these types provided a helpful benchmark against which to compare the performance of other tested types. The prototype tested consists of four attached three-story townhouse units with tuck-under parking; oriented perpendicular to the street, all fronting onto a common driveway (colloquially called "slot houses"). **This type is financially feasible, but with larger units, the typical sale price or rent of this type of housing will be too high to provide additional attainable housing at area median incomes.**

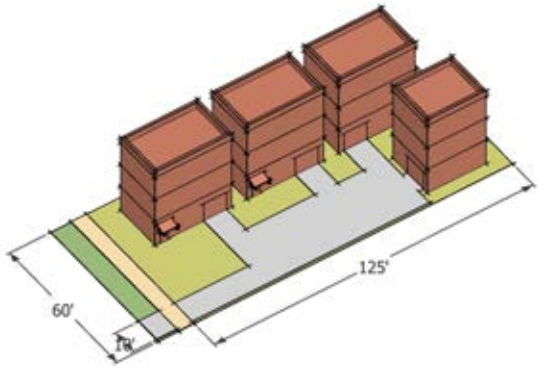
Tier 2	*Not feasible*	*Not tested*
Tier 3	*Not feasible*	*Not tested*



Attainability **Feasibility** **Livability**

Round 2 (*Continued*)

Multiple Single-Family Houses

Also as part of Round 2, a prototype tested included four detached three-story single-family units, oriented perpendicular to the street and fronting onto a common driveway. A variety of parking approaches can be used for this type, including garages, tuck-under and/or tandem parking in the driveway. **Similar to the attached side-by-side townhouse prototype, this type is financially feasible, but with larger units, the typical sale price or rent of this type of housing will be too high to provide additional attainable housing at area median incomes.**

Lot + Building Specifications	
Lot size	*7,500 sf*
Lot dimensions	*60 ft x 125 ft*
# of units	*4*
# of parking spaces	*4 (1 per unit)*
Unit types	*3 bd / 2.5 ba*

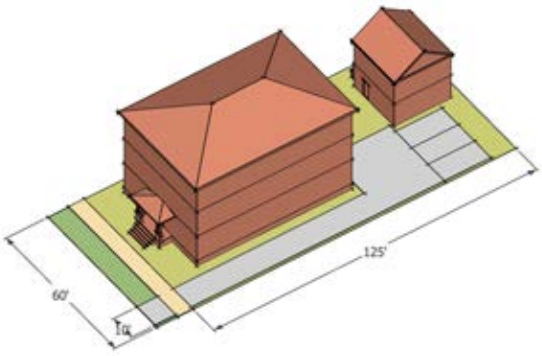
Tier 2	*Feasible*	*Not tested*
Tier 3	*Not feasible*	*Not tested*



Attainability **Feasibility** **Livability**

Round 3 Find the sweet spot for feasibility, attainability, and livability

Three-Story Stacked Sixplex

In Round 3, the team expanded on the unit count thresholds established for Opportunity Housing in order to explore housing options that could deliver livability and attainability while also being financially feasible. In this round, sixplexes and eightplexes were tested. Unit sizes were kept the same as the fourplex tested in Round 1, but FAR was increased by adding on a third story. Since the building footprint remained the same, a reasonable amount of parking could be provided. Alternatively, the building envelope could be increased, providing slightly larger units, when used in areas where parking is not a high priority (such as Opportunty Housing Areas adjacent to transit stops). **This type is financially more feasible, and with additional smaller units, potentially more attainable. While reduced parking may limit its appeal, it is likely to yield additional housing, in at least some of San Jose's submarkets.**

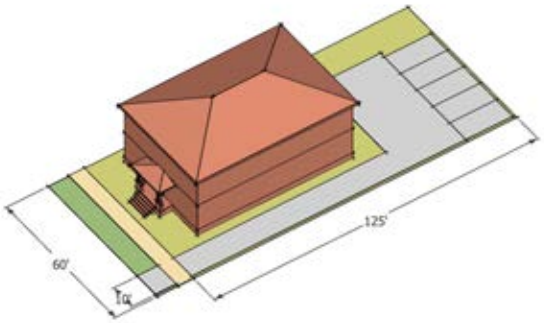
Lot + Building Specifications	
Lot size	*7,500 sf*
Lot dimensions	*60 ft x 125 ft*
# of units	*6*
# of parking spaces	*3 (0.5 per unit)*
Unit types	*2 bd / 2 ba*
Unit sizes	*1,080 sf*
Density	*35 du/ac*
FAR	*0.96*

Feasibility by Submarket

Note: Calculated based on residual value to acquisition cost ratio

	For-Sale	***Rental***
Tier 1	*Feasible*	*Not feasible*
Tier 2	*Not feasible*	*Not feasible*
Tier 3	*Not feasible*	*Not feasible*

Attainability **Feasibility** **Livability**



Variations Tested (not shown here)

Three-Story Stacked Eightplex. This prototype was derived by adding a 2-story, 2-unit wing to the rear of a 3-story fourplex. The increased FAR made this type feasible as both a for-sale and as a rental product but only in Tier 1, not Tiers 2 and 3.

Round 3 *(Continued)*

Two-Story Stacked Eightplex

Also as part of Round 3, a two-story stacked eightplex was tested as a rental product. This prototype had similar unit sizes to the fourplex tested in Round 1. While this configuration is likely to blend in well with adjacent single-family homes, and also has reasonably small unit sizes to address attainability, it does have higher construction costs per square foot. **This housing type was found to be infeasible, and is not is likely to contribute to additional housing in San Jose.**

Zoning Update Committee **STAFF REPORT**

Blake Huntsman - Chair
Michael Colbruno
Doug Boxer

July 14, 2010

Location:	**Citywide**
Proposal:	Zoning Text amendments and Zoning Map revisions to update the City's commercial and residential zoning districts. This project also includes establishing height maps along the City's corridors and revising the "Guidelines for Determining Project Conformity with the General Plan and Zoning Regulations" to reflect the new zoning designations.
Applicant:	Planning Commission
Case File Numbers:	**ZT10-111, RZ10-112**
General Plan:	Hillside Residential, Mixed Housing Type Residential, Urban Residential, Mixed Housing Type Residential, Neighborhood Center Mixed Use, Community Commercial, Regional Commercial
Zoning:	Various
Service Delivery District:	All Districts
City Council District:	All Districts
Action to be Taken:	Public Hearing and Discussion
For Further Information:	Contact case planner Neil Gray at **(510) 238-3878** or by email: **ngray@oaklandnet.com**

SUMMARY/BACKGROUND

At the May 26, 2010 Zoning Update Committee (ZUC) meeting, staff presented an overview of the proposed commercial and residential zoning regulations. At that meeting, staff also recommended, and ZUC agreed to, a general timetable for the discussion and presentation of the proposed zoning maps. Review of the proposed zoning maps will first focus on North Oakland, West Oakland and North Hills (Area 1); followed by Central Oakland, including San Antonio, Fruitvale, Adams Point/Grand Lake and the Lower Hills (Area 2); and finally East Oakland, including areas such as Elmhurst, the South Hills and Central East Oakland (Area 3). This staff report describes the methodology used to produce the proposed zoning maps, it describes the highlights of the proposed zoning map for Area 1, and includes, as Attachment A, a response to comments received at the May 26, 2010 ZUC meeting.

The presentation of this staff report was originally scheduled for the June 26, 2010 ZUC meeting. That meeting was cancelled due to a lack of quorum. Changes to the zoning maps made after the publication of the June 26 staff report are summarized in the Proposed Mapping section, below.

APPROACH

The following is a review of staff's approach to mapping zoning districts and height areas in the City's residential and commercial neighborhoods.

Approach to Mapping the Zoning Districts

The mapping of the proposed zones is based on a consistent citywide methodology taking into consideration the criteria described in this section.

- General Plan Designation. The foremost criterion for how a property is zoned is its designation on the General Plan Land Use Diagram. The overarching goal of the zoning update is to achieve a zoning map that is fully consistent with the Land Use Diagram.
- Strategy Diagram Designation. As noted earlier, the LUTE Strategy Diagram designates some areas of Oakland as "Maintain and Enhance" and others as "Grow and Change." For areas with the former designation, an effort was made to assign a zoning district which reflected *existing* densities. This was particularly important in areas designated "Mixed Housing Type" on the Land Use Diagram since there are four possible zoning districts consistent with this designation.
- Existing Zoning. Within a given General Plan category, existing zoning was a major factor in determining future zoning, particularly in areas that were rezoned during the 1990s and 2000s, and in commercial areas (such as C-31).
- Existing Land Uses. Extensive field work and Geographic Information Systems (GIS) analysis of parcel data was conducted as part of the mapping process. In residential areas, existing densities were used to assign the correct zoning designations. In commercial areas, the mix of uses was used to determine the "best fit" zone for a given General Plan category. The result is a much finer-grained zoning map than the current map.
- Parcelization. Geographic Information Systems (GIS) analysis was conducted to study patterns, such as median lot sizes, in order to determine the appropriate zone in many areas, particularly in residential areas.
- General Plan policies. The maps reflect the interpretation of General Plan policies as well as the Land Use Diagram. For instance, height limits on any given commercial parcel reflect Historic Preservation policies to promote context-sensitive design; hillside densities reflect OSCAR Element policies to conserve steep slopes; and densities near the BART stations reflect LUTE policies to promote transit-oriented development; and so on.
- Community Input. More than 50 neighborhood meetings have been held to date. The maps have been edited to reflect input from these meetings, as well as written correspondence from residents, and will continue to be amended during the coming months as the public process continues.

Approach to Mapping the Height Areas

In the commercial and corridor zones (CN, CC, CR, RU-4 and RU-5 zones), height, bulk and intensity are proposed to be regulated separately from the base zoning district. Two areas may have the same base zoning district that encourages pedestrian-oriented commercial activities, but one location may be in a height area that allows greater intensity that the other, due to factors that will be described below.

Staff proposes seven height areas with corresponding maximum height limits, residential densities, nonresidential floor area ratios and number of floors. These regulations are summarized in Attachment C. The height maximums (35, 45, 60, 75, 90, 120, and 160 feet) were chosen to be just below where "life safety" requirements would necessitate a more

expensive building type. A minimum height of 25 feet is also proposed for new construction on major corridors that are at least 100 feet wide, such as Telegraph Avenue, San Pablo Avenue, International Boulevard and Broadway. This regulation is further discussed in the "Key Issues and Impacts" section of this report.

Height areas were mapped using the following basic principles:

- More intensity (and higher height limits) would be allowed on wider corridors, so new development could frame and enclose a wide expanse of street space;
- More intensity would be allowed near transit (BART stations and AC Transit hubs) to encourage new development to locate in areas with good transit accessibility;
- Less intensity would be allowed in intact historic districts, generally Areas of Secondary Importance (ASIs)[1], to reduce development pressure and preserve the integrity of those districts;
- More intensity would be allowed on portions of a corridor that are adjacent to high intensity residential neighborhoods or industrial areas that would have fewer solar and privacy impacts from new development.
- Less intensity (and lower height limits) would be allowed for areas adjacent to a bluff to reduce view impacts.

The following table summarizes the rules of thumb for mapping height areas:

Condition	Height Area	Examples
Wide Streets (right of way > 100 feet), such as San Pablo Ave, Telegraph Ave and International Blvd		
Near a BART Station	75 to 120 feet	Fruitvale, West Oakland BART station areas
At an AC Transit hub (trunk lines) or intersection of two major and wide streets	75 feet	40th and Broadway
Not adjacent to a lower density residential neighborhood	75 feet	Telegraph Ave adjacent to Pill Hill
Adjacent to a lower density residential neighborhood	60 feet	Most of San Pablo Ave
In a historic neighborhood	45 feet	Grand Ave at Adams Point
Directly adjacent to a bluff	45 feet	Broadway 41st to 45th
Hegenberger Corridor	120 to 160 feet	Hegenberger Road, 98th Ave
Narrow Streets (right of way < 100 feet), such as College Ave, Macarthur Blvd and Foothill Blvd		
At an AC transit hub (trunk lines) or intersection of two major streets	60 feet	35th Ave and Macarthur Blvd
Not adjacent to a lower density residential neighborhood	60 feet	International near 4th Ave
Adjacent to a lower density residential neighborhood	45 feet	Dimond District
In a historic district	35 feet	Rockridge

[1] ASIs are historically or visually cohesive areas or property groups identified by City surveys that contain a high proportion of historic buildings. ASIs do not appear eligible and not considered CEQA Historic Resources. There are several ASIs on the corridors and tend to be located at commercial districts where major streets intersect, such as the Fruitvale, Rockridge, and Fairview Commercial Districts. ASIs are distinguished from APIs because APIs appear eligible for the National Register of Historic Places and thus are considered CEQA Historic Resources. The 7th Street commercial district is the only API on a commercial corridor outside of Downtown.

The above table does not include all contexts and situations. For example, the height limits for Telegraph and Shattuck Avenues in Temescal, were formulated as part of a previous process. That process and the proposed height limits for Temescal are described in the Key Issues and Impacts section of this report.
Staff also proposes to strengthen the regulations that create a transition from new, higher-intensity construction on the corridors to the middle- and lower-density residential neighborhoods behind the corridors. These regulations are especially important in Oakland because of its pattern of long corridors adjacent to residential neighborhoods and the General Plan's policies that focus development on the corridors. Current regulations require a ten-foot setback adjacent to residential neighborhoods and a 30-foot height maximum at this setback line. This 30-foot height limit is consistent with the height limit for low density residential neighborhoods. This height limit increases one foot for every foot from the setback line. Staff proposes to modify this regulation by requiring a fifteen-foot setback for lots that are deeper than 100 feet.

On June 14, 2010, the Landmarks Preservation Advisory Board reviewed the proposed heights for the City and proposed no changes to the Area 1 proposal, described in more detail below.

PROPOSED MAPPING

The following is an overview of the proposed zoning maps for Area 1. The maps themselves are contained in Attachment B, the height/intensity regulations are contained in Attachment C, descriptions of the zones are contained in Attachment D, and the text of the zones is contained in Attachment E. Due to the number and extent of the changes, the narrative below is not intended to be comprehensive and only provides highlights. A more detailed narrative summarizing the changes is provided in Attachment F—but even that narrative does not annotate each individual change. Because the maps implement a new zoning framework for the entire city, virtually every residential and commercial property in the city will have a new zoning designation. This staff report focuses on large contiguous areas where substantive changes will occur.

For ease of presentation, Area 1 has been subdivided into three geographic subareas: North Hills, North Oakland, and West Oakland (which includes the area north of Downtown). These same subareas were used to present the maps to the community during the April 26, 2010 community workshop, and have been used in prior planning studies by the City (including the General Plan).

The maps themselves indicate the existing zoning and proposed zoning for all parcels. Shading has been used to distinguish those areas where substantive changes will occur. Light gray shading indicates an increase or decrease in the allowable intensity/ density. Dark gray shading indicates a change in the basic use category (i.e., from industrial to residential, from residential to commercial, etc.). Areas that are unshaded are proposed for no substantive change, and will essentially be rezoned with the zone that most closely matches the existing zone.

North Hills

The North Hills area is generally located above Highway 13 between Berkeley on the north and and Redwood Road on the south. It includes Claremont Hills, Hiller Highlands, parts of Upper Rockridge, Piedmont Pines, Montclair, and the Joaquin Miller/ Butters Canyon area. The prevailing General Plan designations are Hillside Residential and Resource Conservation Area, with a few "nodes" of Neighborhood Center Mixed Use. Existing residential zoning is generally R-30, with some areas of R-10 and R-20 and a few small areas of medium density (R-40 and R-50) zoning. Existing commercial zones include the C-27 district (Montclair) and pockets of C-10 and C-20 zoning corresponding to small shopping centers. The entire area is designated as "Maintain and Enhance" on the General Plan Strategy Diagram.

General Plan policies for the North Hills support low to very low density infill development, consistent with prevailing land use patterns. Policies generally do not support increases in the currently allowed density, and in some cases imply that decreases are desired. For instance, the Open Space, Conservation and Recreation (OSCAR) Element discourages subdivision of steeply sloping lots and the Safety Element calls for continued low densities in fire-prone and landslide prone hillside neighborhoods. The Land Use and Transportation Element (LUTE) itself calls for a minimum lot size of 8,000 square feet, which is substantially less dense than what is permitted by the existing R-30 zone.

The "default" designation for areas with a General Plan designation of "Hillside Residential" and an existing zoning designation of R-30 is RH-4. Most of the North Hills have been zoned this way. Consistent with the LUTE, an 8,000 square foot minimum lot size applies in these areas, with 6,500 square foot lots permitted under some circumstances (see attached materials). A number of R-30 areas have been further reduced to RH-1, RH-2, or RH-3, based on prevailing lot sizes that exceed 12,000 square feet. The reduction is justified by the General Plan directive to "maintain and enhance" these areas, as well as OSCAR and Safety Element policies to limit future subdivision. Examples include the Castle Canyon area in Piedmont Pines, the top of Fairlane Drive/ Gwin Canyon, and the Elverton Drive area. There are very few lots in these areas less than 12,000 square feet; an RH-3 designation would reduce subdivision potential relative to existing zoning, while maintaining the buildability of previously subdivided lots.

Commercial zoning in the North Hills is limited. Proposed zoning for Montclair Village is CN-1, which is not a substantive change relative to the existing C-27 zoning. The other "pockets" of commercial land use in the area (Village Market, Thornhill Shopping Center, Woodminster, etc.) are generally designated CN-3 or CN-4 depending on their General Plan designation. Areas shown on the General Plan as Neighborhood Center Mixed Use are generally CN-3, while the smaller "pockets" that correspond to gas stations or other single-parcel commercial districts are CN-4. The Claremont Hotel (designated Community Commercial on the General Plan) has been zoned RU-3 (equivalent to R-70, which is the current zoning of the site). Staff believes this zone is more consistent with General Plan policies than a Community Commercial zoning designation, given the location of the property and its current (and likely future) use.

Parts of the North Hills are currently included in special zoning overlay districts. Specifically, the S-10 (scenic route overlay) zone includes supplemental standards for driveway access, height on downslope lots, and design review. The S-11 zone is linked to the the North Oakland Hills Specific Plan Area (NOHASP) and includes special provisions for site planning and density along Skyline and in Shepherd Canyon. Both of these overlays have been retained and no changes to their boundaries have been proposed.

North Oakland

North Oakland includes the Golden Gate, Temescal, Rockridge, and Piedmont Avenue neighborhoods, as well as other areas roughly located "above" Highway 580, and "below" Highway 13 in the area between Piedmont, Emeryville, and Berkeley. The area includes a variety of General Plan designations, corresponding to a diverse land use pattern and mixed densities. Most of the area is designated "Maintain and Enhance" on the General Plan Strategy Diagram, but key areas such as the San Pablo corridor, the Telegraph Avenue corridor (in Temescal), the MacArthur corridor, the MLK Jr Corridor (below Children's Hospital), and the Broadway corridor (below 51st) are designated "Grow and Change." The Grow and Change designation suggests that greater development intensities than currently exist are appropriate in these areas.

West of Broadway, the prevailing residential zones in North Oakland are R-35 and R-40. There are a few pockets of medium to high density zoning corresponding to existing multi-family development, especially along corridor streets and near Mosswood Park. East of Broadway (e.g., in the Piedmont Avenue neighborhood), the current zoning allows for medium to high density residential uses, with large areas zoned R-50 or R-70. Some of these areas are developed with apartments but others have historically been "overzoned" and primarily contain single family homes or 2-4 unit buildings.

The new zoning maps propose downzoning in the Piedmont Avenue neighborhood to implement General Plan "maintain and enhance" policies as well as the "Mixed Housing Type" Residential designation. In areas designated "Mixed Housing Type" currently developed with mostly 1-3 unit buildings, RM-2 has typically been used. In areas with a mix of single family homes and 2-8 unit buildings, the designation is typically RM-3. "Mixed Housing Type" areas with existing concentrations of large apartment buildings have typically been designated RM-4. An effort was made to apply designations that would limit the number of structures that would become non-conforming, while still respecting General Plan directives. Areas in the Piedmont Avenue neighborhood designated "Urban Residential" are proposed to be zoned with a combination of RU-1, RU-2, and RU-3, with the locations of highest allowed densities corresponding to the locations of existing concentrations of higher density apartments.

Similar reductions in allowable density are proposed in the Mosswood area west of Broadway near 40th Street. Existing R-70 zoning will be replaced by a combination of RM-3 and RM-4 zoning, reflecting the General Plan designation of Mixed Housing Type Residential as well as existing land use patterns.

In the Rockridge and Temescal districts, proposed residential zoning generally mirrors existing designations. Most R-35 areas (currently the "default" zone for Rockridge) have been zoned RM-1. Most R-40 areas (currently the "default" zone for Temescal, the Santa Fe/ Longfellow, and Golden Gate neighborhoods) have been zoned RM-2. In the western part of North Oakland (near San Pablo Avenue), several blocks have been designated RM-3 to recognize existing concentrations of medium density housing.

Zoning changes along the commercial corridors in North Oakland are guided by General Plan designations. For instance, the Telegraph corridor includes sections designated on the Land Use Diagram as Urban Residential, Neighborhood Center Mixed Use, and Community Commercial. The existing C-28 zoning on this corridor will be replaced with a more fine-grained mix of RU-4 and RU-5 (in the Urban Residential areas), CN-2 (in the Neighborhood Center areas), and CC-2 (in the Community Commercial areas). Height limits on the corridor reflect prior community input during the Temescal planning process as well as the factors listed earlier in this staff report.

A few of the commercial corridors in North Oakland are proposed for rezoning as Urban Residential. For example, the Martin Luther King Junior corridor (below 51st Street) will be rezoned from C-30 to a combination of RU-4 and RU-5. The RU-4 designation has been proposed in areas where the existing land use is predominantly residential. The RU-5 designation has been proposed in areas where the existing land use is predominantly commercial.

Land around the MacArthur BART station is generally proposed for S-15 (Transit Oriented Development) zoning. This is the same district that applies in West Oakland and Fruitvale, and it is intended to accommodate high density mixed use development, consistent with the General Plan. Height limits in this area reflect prior planning studies for the BART station, as well as the factors listed earlier in this staff report. The adjacent stretch of MacArthur Boulevard between the BART Station and Emeryville will be rezoned from commercial (C-25 and C-30) to a mix of RU-4 and RU-5, responding both to the General Plan and existing land use patterns.

New zoning on the Market Street corridor in North Oakland reflects the General Plan designation of this area as Mixed Housing Type Residential. Historically this corridor has included a mix of housing and neighborhood-serving retail/ office uses, but the General Plan designation indicates it should trend residential. Thus, the existing commercial zoning on the corridor will be replaced with residential zoning. A proposed "RC" (Residential-Commercial) overlay district will be used in a few locations (such as 45th/Market) to reflect concentrations of existing businesses.

Proposed zoning on most of the other corridors in North Oakland is comparable to existing zoning and is already consistent with the General Plan. This includes Broadway (to be zoned CC-2, which is similar to the existing C-40 zone but with height limits and more emphasis on pedestrian-oriented design) and San Pablo Avenue (to be zoned CC-2, with CN-3 near the Powell Street intersection). The proposed zoning on both of these corridors would establish context-sensitive height limits where no height limits at all exist today. In addition, the Piedmont Avenue and College Avenue shopping districts are proposed for CN-1 zoning. This is similar to the existing C-31 zoning, including the 35-foot height limit.

West Oakland/ Pill Hill

For the purposes of this staff report, the West Oakland/ Pill Hill area includes those areas bounded by I-580 on the north, I-880 on the west and south, and Harrison Street or Downtown Oakland on the east. The most substantial zoning changes are on San Pablo Avenue, in the Oak Center area (roughly between 12th and Grand, between I-980 and Mandela Parkway), and along Market Street and Martin Luther King Junior Way.

San Pablo Avenue presently includes a mix of C-30 and C-40 zoning. Consistent with the General Plan, the corridor has been divided into segments of Community Commercial (CC-2 and CC-3) and Urban Residential (RU-4 and RU-5) zoning. Height limits ranging from 35 to 75 feet have been assigned to the corridor (there are no height limits today). The mapping has been structured to minimize the creation of new non-conforming uses, with RU-4 applied in those areas where the prevailing use is residential (including SROs) and CC-3 applied in areas with concentrations of quasi-industrial and automotive service uses.

Most of the Oak Center neighborhood has been downzoned from R-60 and R-70 to RM-2 and RM-4. This is consistent with the General Plan designation of this area as "Mixed Housing Type Residential" and its Strategy Diagram designation of "Maintain and Enhance." The proposed zones on any given block reflect existing land use patterns and housing types as well as the historic character of the area. The S-20 (Historic Preservation) overlay district that presently applies in this area will be retained. RM-4 zoning is applied on the higher-volume streets (14th 18th, Adeline Streets, etc.). The local streets in this area are generally proposed for RM-2, and the new single family subdivisions on the former Housing Authority sites are proposed as RM-1.

Significant changes are also proposed along Market Street (between 18th and 26th Streets). Although the predominant existing zoning is commercial (C-10, etc.), the General Plan designates the area as Mixed Housing Type Residential and does not acknowledge the existing business district. Accordingly, the extent of commercial zoning has been reduced, with a commercial (R/C) overlay used in areas where active small businesses in this area are presently clustered. The balance of the corridor in this area is proposed for RM-4, which will encourage residential infill development.

Similarly, the segment of Martin Luther King Junior Way from Grand Avenue to 29th Street will be rezoned from commercial (C-30) use to RU-4 and RU-5, implementing the General Plan designation of Urban Residential. Some of the existing "heavier" commercial uses on both the Market Street and MLK corridors would become non-conforming as a result of these changes.

Another change in West Oakland is on the south side of 7th Street between Union and Market, where the existing zoning is M-20. The General Plan designation in this area is Community Commercial. Accordingly, a zone change to CC-3 has been proposed. Most of the existing businesses in this area conform to the CC-3 regulations. At the other end of West Oakland, the East Baybridge Center (e.g., Home Depot, et. al) is proposed for rezoning from M-40 to RC-1, reflecting its designation on the General Plan as Regional Commercial.

Several remnant "pockets" of industrial zoning in residential areas will be eliminated in West Oakland. This is the case in the Clawson (Dogtown) neighborhood, where about a half-dozen scattered "islands" had retained M-30 (or C-10) zoning despite the previous rezoning of all properties around them as HBX-2. Such pockets would be rezoned HBX-2. Similarly, a number of M-20 parcels near McClymonds High School and along Adeline Street will be rezoned for residential uses (RM-2 or RM-4) to reflect their General Plan designations for housing. In some cases, these parcels have already been converted from industrial to residential use. In other cases, new non-conforming uses may result.

Elsewhere in West Oakland, the predominant existing residential zoning is R-36 and R-50. The "default" proposed zone for areas now zoned R-36 is RM-2, while the "default" proposed zone for areas now zoned R-50 is RM-3. In a few cases (for instance, the area around McClymonds High School and along Athens Avenue), a reduction from R-50 to RM-2 is proposed to reflect existing single family land uses. Other changes include the rezoning of the 14th/ Peralta commercial district from C-10 to RM-4/C, and a slight expansion of the S-15 (Transit-Oriented Development) zone around the West Oakland BART station.

East of I-980 and north of Grand Avenue, zoning in the Pill Hill, Northgate, and Harrison/ Oakland neighborhoods will be changed to match General Plan designations and better reflect General Plan policy directives. This will mean a reduction in allowable densities in areas between Telegraph and I-980 now zoned R-70 and R-80 (proposed for RU-1 and RU-2), and some conversion of C-45 zoning to RU-3 zoning (between Grand and 27th Street). The Broadway and Telegraph corridors in this area are proposed for CC-2 zoning, with height limits that reflect street widths, close proximity to Downtown, and transit access. CC-3 zoning has been applied to the existing cluster of automotive businesses along 24th and 25th Streets north of Downtown. Zoning designations in this area will be further refined and supplemented following the completion of the Upper Broadway Specific Plan.

Mapping Changes since the June 23, 2010 ZUC staff report

Since the publication of the June 23, 2010 ZUC staff report, staff has proposed additional minor changes to the new zoning maps. These changes respond to: (a) a detailed analysis of areas where the General Plan and proposed zoning were still inconsistent; and (b) staff-level discussions of the proposed maps and their consistency with evolving plans and economic development initiatives. The following designations appear on the maps that accompany this staff report, but were not on the previous maps:

- Single family parcels along Chadbourne Way and Stantonville Drive (near Skyline/Redwood) are proposed as RD-1 and not RH-4, as previously indicated (General Plan designation is Detached Residential, not Hillside Residential)
- Single family parcels along Dublin, Kearney, Pierpoint, Woodside Cir, Woodcrest Glen (Woodminster area) are proposed as RD-1 and not RH-4 as previously indicated (General Plan designation is Detached Residential, not Hillside Residential)
- Parcels on San Pablo Avenue between 32nd and 36th and between Grand Avenue and 27th are now proposed as RU-5 instead of a mix of RU-4 and RU-5

- A ½ block area on Martin Luther King Jr Way between 37th Street and MacArthur Blvd is proposed as CN-3 rather than RU-5.
- A single commercially used parcel on Pleasant Valley Road just west of Piedmont Av is now proposed as CN-3 rather than RM-2.
- Parcels on the north side of 27th Street between Northgate and Telegraph re now proposed as RU-4 rather than RU-2. A 45' height limit would apply.
- The boundary between the S-1 zone and the CC-2 zone on the east side of Pill Hill has been moved to the centerline of Webster Street to better match the Specific Plan boundary.
- The heights at the Macarthur BART Station have been adjusted to reflect those already approved for the master plan of the site.

KEY ISSUES AND IMPACTS

Height Limits on Telegraph Avenue in Temescal

In the mid-2000s, the Temescal neighborhood experienced a substantial amount of new development. That new development was to be built at an intensity greater than allowed by the existing zoning, but within the maximum density allowed by the General Plan. While that new development was seen positively by some, it was seen as inappropriate by others. A public dialogue ensued and a process began to formulate new zoning regulations (including rules about intensity of development) that would appropriately implement the policies of the General Plan in this particular neighborhood. In 2006 and 2007, a series of five, well-attended, community workshops were held regarding the rezoning of the Temescal corridor. Although the meetings produced consensus on several items, significant differences remained regarding the height limits along Telegraph Avenue from 41st Street (just north of the Macarthur BART station) to the Berkeley border. Some people were concerned about new development's impact on access to sunlight, views, privacy, and the appearance of Telegraph Avenue. Others stated that greater density and height is required to create a transit-oriented corridor, promote active retail nodes, mitigate regional sprawl, create an attractive streetscape, and contribute to the Bay Area's housing needs. Community opinions regarding height in the Temescal corridor ranged from instituting a height limit of three stories to an unrestricted height limit. There was a sizable number of people expressing a preference for a 40-45 foot height limit and a sizable number expressing a preference for a 65-75 foot height limit.

After this public process, staff developed recommendations that were presented to the Zoning Update Committee on May 16, 2007. Staff recommended a 45-foot height limit with a conditionally permitted maximum of 55 feet in all areas outside Shattuck Avenue and the core historic commercial ASI on Telegraph Avenue between 48th and 51st Streets. Staff recommended a 35-foot height limit for Shattuck Avenue and the Telegraph historic commercial district, with a conditionally permitted height of 45 feet (see Attachment G for maps). Staff recommended lower heights on Shattuck Avenue because it is narrower than Telegraph Avenue; the lower height at the core historic commercial area was proposed to respect the historic

context. Construction to the conditionally permitted heights in either of these areas required a top story step back and a package of community benefits.

The current proposal (see Attachment H for a close-up view of the proposed height limits for this particular area) is largely a continuation of the previous proposal. Staff proposes a height limit of 35 feet on Shattuck Avenue and at the core historical district of Telegraph Avenue and 45 feet for the rest of the Telegraph Corridor from 41st Street to the Berkeley border. Staff proposes that a trading of development rights (TDR) program be studied in the next phase of the zoning update process to allow greater heights along this corridor.

The rules of thumb for determining height areas, summarized in a table in the Approach section, above, indicate that Telegraph Avenue from 41st Street to the Berkeley Border should be assigned a 60-foot height limit except in the following areas:

- A 45-foot height maximum at the historic commercial ASI to respect the historic context;
- A height limit of 45 feet on Shattuck Avenue due to its relatively narrow 65 foot right of way; and
- A 75-foot height limit at the corner of 51st Street and Telegraph Avenue due to the intersection of these major streets.

Staff requests input from the ZUC regarding whether current proposal (continuation of the past recommendation and process) is appropriate or whether the height limits proposed for similar areas of the rest of the City should be applied to the Temescal corridors.

Height Limits on Broadway near 51st Street

Residents of Desmond Street behind Broadway near 51st Street (see Attachment I for close-up view of this particular area) have commented to staff that the proposed height limits of 60 feet on Broadway between 49th Street and Coronado Avenue are too high. These residents prefer a 60-foot height limit on the parcels at the intersection of 51st Street and Broadway and a 45-foot height limit on all other parcels between 49th and Coronado Avenue. These residents have made the following points:

- New development built to the proposed height limit would create solar impacts on the properties on Desmond Street;
- The elevations of the lots facing Broadway are higher than the lots on Desmond Street, which increases their height relative to the Desmond Street neighborhood. *Staff analysis of the topography of Broadway and Desmond Street indicates that the parcels on Desmond Street between 49th and 51st Streets have approximately the same elevation as those on Broadway. Broadway and Desmond Street slope approximately five percent upward from 49th to 51st Streets. Two interior lots between 51st Street and Coronado Avenue are approximately 10 feet below the elevation of adjacent parcels on Broadway;*

Staff believes that the proposed height limits are appropriate for the following reasons:

- Staff has lowered the originally proposed height maximum of 75 feet to 60 feet for the lots at the intersection of 51st Street and Broadway due to neighborhood concerns; and
- The proposal is consistent with the principal stating that parcels on major corridors that are adjacent to low- and middle-density residential neighborhoods are assigned a 60-foot height maximum (see Approach section, above);
- The proposed height limits fulfill the General Plan Land Use and Transportation Element's objectives to focus development toward major corridors to revitalize retail, increase access to transit, and maintain lower-density residential neighborhoods;
- Line 51, an AC Transit trunk line, stops at the intersection of 51st and Broadway;
- The proposal does not represent an increase in allowed intensity, because there is currently no height limit on Broadway;
- Broadway runs approximately north-south, which minimizes the solar impacts of new development on adjacent residential neighborhoods;
- As described earlier, staff is proposing increased setback requirements to ease the transition from construction on the corridors to lower density zones behind the corridors.

Staff requests input from the ZUC regarding the maximum height proposal for Broadway between 49th Street and Coronado Avenue. Staff has identified two alternatives for the ZUC to consider:

1. **A 60-foot height limit from 49th Street to Coronado Avenue (staff recommendation);**
2. **A 45-foot height limit from 49th Street to Coronado Avenue except for a height limit of 60 feet at the intersection of 51st Street and Broadway (recommendation from residents of Desmond Street).**

Height Minimum on Wide Corridors

Staff currently recommends a height *minimum* of 25 feet for the new construction of buildings on corridors 100 feet or wider. Structures used to accommodate certain activities, such as gas stations and electrical substations, would be exempt from the minimum. Staff originally proposed a 35-foot minimum, but lowered the recommendation to 25 feet after the Technical Advisory Group expressed concern that a 35-foot height minimum could discourage construction on underutilized or blighted properties. Staff has also received input that the previously recommended 35-foot minimum should be restored because it assures substantial construction on the major, wide corridors such as International Boulevard, San Pablo Avenue, Telegraph Avenue, and Broadway. Substantial development on these transit corridors is consistent with the policies of the General Plan.

Staff requests guidance from the ZUC regarding whether a 35- or 25-foot height minimum is appropriate for the major, wide corridors.

RECOMMENDATIONS

Staff recommends that the Committee review and discuss the staff report and provide guidance to staff regarding the proposed zoning and height map for Area 1. Staff requests that in particular, the Committee provide guidance on the appropriate height proposals for the areas discussed in the Key Issues and Impacts section of this report.

Appendix L – Response to Public Comments

The public comment period for the first Draft 2023-2031 Housing Element began on May 12, 2022. As required by AB 215, the first Draft Housing Element was available for a 30-day public review period, before incorporating public comments and sending the revised first draft to HCD. Based on community feedback and to ensure that the Oakland community had enough time to review and comment, the City kept the first public review draft of the Housing Element available for public comment through the 90-day State HCD review period (June 30 - September 30, 2022). Thank you to all those who submitted public comments and attended public meetings.

Based on community feedback and direction from Councilmembers, staff have prepared a response to comments to illustrate how the revised draft reflects public input received during the 142-day comment period.

A total of 54 comments, comment letters, and emails were received during the comment period. Comments and responses to comments are organized by the date they were received. Each letter or summary is identified by a designator (e.g., "1"). Specific comments within each letter or summary are identified by a designator in the page margin that reflects the sequence of the specific comment within the correspondence (e.g. "1-A" for the first comment in Letter 1).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
1	**Sid Kapur, YIMBY Law, Greenbelt Alliance**	4/21/2022	To meet the 6th cycle RHNA target, the rate of new housing permits in Oakland would need to increase from 2,386 units per year in 2018-2021 to 3,281 units per year in the next 8 years. This is a 38% increase from recent years. If the current pace were to continue, Oakland would meet only 73% of its new housing target. Based on these trends, it is unlikely that Oakland's existing realistic zoning capacity is sufficient to meet its 6th cycle RHNA target. According to HCD's Housing Element Site Inventory Guidebook, housing elements must analyze the realistic capacity of their sites, which may include considerations of "[l]ocal or regional track re-cords", "past production trends", and "the rate at which similar parcels were developed during the previous planning period". A housing element that does not include a significant rezoning component is therefore un-likely to be compliant with state law. We urge Oakland to include a major rezoning component in its Housing Element—a rezoning large enough to close the gap between recent housing production trends and the RHNA target. The rezoning should be within existing communities and should comply with the city's obligation to Affirmatively Further Fair Housing. We also urge Oakland to ease any other constraints, such as discretionary approval processes or impact fees, that may impede the rate of development on your city's housing sites.	Goals 3 and 5 in Chapter 4 - Housing Action Plan in the 2023-2031 Housing Element seek to close the gap between affordable and market- rate housing production by expanding affordable housing opportunities and promote neighborhood stability and health. Actions under Goals 3 and 5 will increase housing production capacity, unlock additional opportunities for affordable and missing middle housing, and affirmatively further fair housing by opening up high-resource and exclusionary neighborhoods, reducing exposure to air pollution, toxic and other environmental hazards in environmental justice communities, and prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities. These actions will allow zoning for diverse housing types, elimination of Conditional Use Permits (CUPS), implementation of Objective Design Standards, increased heights and densities along corridors such as MacArthur, International, Foothill, College, Claremont, Dimond, increased heights and densities in transit proximate areas such as Rockridge BART, and resource-rich areas such as Rockridge, Trestle Glen, and Crocker Highlands. See Appendix J for the City's proposed rezoning changes. In addition, the Housing Action Plan also includes actions to address constraints such as discretionary approval processes and impact fees. **Specific actions include:**- Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. - Action 3.3.5: Implement an Affordable Housing Overlay - Action 3.3.9: Adjusting or waiving city fees and payment timing for affordable housing developments - Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setbacks requirements. - Action 3.4.3: Revise Conditional Use Permit (CUP) requirements - Action 3.4.4: Revise citywide parking standards - Action 3.4.5: Revise open space requirements - Action 3.4.8: Implement objective design standards - Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop affordable housing by right

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				- Action 5.2.8: Encourage new affordable housing in higher resource neighborhoods - Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration
2	**Dimond Improvement Association**	5/17/2022	**High Level Goals** 1. Develop without displacement a. Focus upzonings on commercial properties and single-family homes. Do not upzone multifamily buildings that are subject to rent control (i.e. multifamily buildings built before 1983). b. Continue to enforce the Housing Crisis Act of 2019 (SB 330) to ensure that any loss of rent controlled units is met with the addition of a corresponding number of new affordable units. 2. Encourage redevelopment in locations on and near transit lines in and around the Dimond to reduce vehicle miles traveled (VMT). a. In general, increase the number of people in the Dimond, but decrease the number of cars 3. Focus on mixed use developments in the Dimond Business District (DBD) and other commercial properties in and around the Dimond	The City actively enforces SB 330. Please see Action 1.1.11: Enforce the Tenant Right to Return and Action 2.2.5: Extend Local Replacement Unit Provisions. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
			Focused Goals - Parking 1. Eliminate parking minimums for new housing construction in the DBD and all areas in the Dimond within 1 mile of transit stops. 2. Establish parking maximums for new housing developments in the DBD of less than 0.1 parking space per dwelling unit. 3. Establish bicycle parking minimums of 3 spaces per dwelling unit.	As part of Action 3.4.4: Revise citywide parking standards, the City will eliminate parking minimums within ½ mile of a major transit stop and reduce parking minimums in downtown. The City also establish new parking minimums near BART stations. See Appendix J for the City's proposed rezoning changes. Comment noted. Staff will coordinate a study of parking maximums in areas beyond downtown and areas near BART as well as increases to bicycle parking minimums citywide as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process
			Focused Goals - Zoning 4. Establish a base height limit of 55 ft in the DBD a. Upzone Opportunity Sites to a max height of	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			65 ft. b. Make exceptions for rent controlled (built prior to 1983) multifamily housing. c. Structure zoning changes such that newly constructed housing does not interfere with current and future business license permitting requirements (eg., liquor,cannabis dispensary, restaurant licenses, etc). d. Developments seeking additional height and density may do so through the State Density Bonus Law. 5. Upzone all transit corridors in and around the Dimond to 55 ft (MacArthur Blvd, ParkBlvd, Fruitvale Ave, Lincoln Ave, etc). a. Make exceptions for rent controlled (built prior to 1983) multifamily housing. b. Modify zoning changes to within allowable density limits in high severity fire zones. **Small Lots** 1. Draft clear rules for increasing density on smaller lots with different housing types (eg,apartments, bungalow courts, townhouses, etc), that allow for ministerial approvals. **Small Lots** 2. Allow for six (6) units by-right for any lot that allows ADUs. Allow for ten (10) if two (2) are deed-restricted for affordable housing (subject to fire and building codes). a. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.	
			Small Lots 3. Legalize Accessory Commercial Units (ACUs) wherever ADUs are permitted to lower the barrier to entry for small-scale commercial businesses and encourage walkability within neighborhoods. a. Draft rules guiding the permitting process of ACUs that allow for ministerial approvals.	Comment noted. Staff will study this as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			b. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.	
			Potential Opportunity Sites for Redevelopment with a focus on Mixed Use 1. Empty lot at MacArthur Blvd and Dimond Ave, 2114 MacArthur Blvd 2. Bank of America,2154 MacArthur Blvd 3. Wells Fargo and Chase Bank, 3450-3438 MacArthur Blvd 4. Giant Burger, 2055 MacArthur Blvd 5. Safeway, 3500 Fruitvale Ave 6. 7-11, 2411 MacArthur Blvd 7. CVS, 3320 Fruitvale Ave 8. Oakland Imported Cars, 3200 MacArthur Blvd **Suggested Project Homekey Sites** 1.Highlander Motel, 3255 MacArthur Blvd 2.The Oaks Motel, 3250 MacArthur Blvd	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) Oakland Housing and Community Development (Oakland HCD) department will encourage owners to work with sponsors to apply to the City's Homekey RFP due 11/18/22
3	**Jesse Boudart**	5/19/2022	My general comment for the plan is the following: Remove restrictions / increase incentives for developers and people to construct housing such as large buildings and/or ADUs	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. In addition, the Housing Action Plan also includes actions to address constraints to ADU development through actions in Chapter 4: Housing Action Plan. Specific actions include: Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units. Action 3.4.8. Implement objective design standards. Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.
4	**Derek Sagehorn**	5/21/2022	The draft housing element lists 288 9th Avenue (APN 018 046500204) as a low-income site zoned for 254 units. This is park space that contains Township Park and Rocky's Market. Both were built in the past 5 years. Please remove this site from the site inventory. I would encourage you to re-allocate the 254 low-income units to high-resource sites such as the Claremont/College flatiron or new sites like 5354 Claremont Ave.	This site has been removed from the Revised 2023-2031 Housing Element.
5	Bret Peterson	5/22/2022	The draft HE fails to list 3 sites that are mapped on the pg 7 "Housing Sites Inventory" map. These sites are 2441 MacArthur Blvd, 2055 MacArthur Blvd, and 2120 Montana St. 2441 and 2055 MacArthur should be listed as official sites, as they are underutilized lots. Since 2120 is a current gas station, it is unclear if it could be developed in the next 8 years. It is also strange that 2833 MacArthur has been left off the DHE. It is a dying strip mall with vacant storefronts and should be redeveloped for housing to reinvigorate the neighborhood. It is also on the MacArthur transit corridor and across the street from a public school.	Comment noted, see revised Housing Sites Inventory. 2055 MacArthur Blvd and 2120 Montanta sites are included in Table C-17. 2441 MacArthur Blvd is an existing single-family residence and is not included in the sites inventory. The revised 2023-2031 Housing Element Housing Inventory includes the 2833 MacArthur site.

7	**Kristin Spanos, First 5 Alameda County**	6/1/2022	A. Increase the supply of affordable housing options for families with young children to support child health and well-being and prevent displacement of Black families and families disproportionately impacted by inequitable policies with racist and classist underpinnings. Housing costs result in little or no disposable income for many families—putting pressure on families to decide between other basic needs like child care, food, and diapers. •50% of renters in Alameda County pay more than one-third of their income for rent. For families of young children, the cost of child care creates an additional financial burden and contribute to financial	A. Comment noted. B. Comment noted. The City can also help to advance First 5's interest in affordable housing for young families by continuing to bring to market the City's surplus properties for affordable housing development consistent with the State Surplus Lands Act. It's up to market actors (e.g., affordable housing developers) to propose projects that might specifically address the needs of this cohort. C. and D. See **Action 5.2.8:** Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with **NEW Action 5.2.9:** Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			instability. See more in our Data for Action guide. B. Adopt housing policies that support and advance the workforce of professionals who support our families including the ECE workforce, navigators, case workers, and family resource providers. The high-cost of living in Alameda County also impacts our local community workforce. For example, the ECE workforce has historically earned lower wages than other educators in the public system. Affordable housing is a particularly pressing need for the population of mostly women small business owners who operate local family child cares homes; without affordable and stable housing, family child care providers who provide home-based care face this risk of losing their business, and our community faces the risk of losing the critical service they provide. In Alameda County: •Fifty-nine (59%) of family child care providers reported earning less than $15 per hour and struggle to meet their basic needs including covering the cost of rent or mortgage. In Oakland, approximately 40% of center directors and family child care providers rent their facility/home (192 of 481 child care programs). •Eighty-seven (87%) of ECE professionals, 79% of whom identify as Black, Indigenous, or other women of color, are considered very low-income for the county •In our recent ECE facilities needs assessment survey we found:o87% of Oakland center directors and family child care providers expressed interest in expanding their program to serve more children but have not been able to due to	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			lack of resources and support. o69% of Oakland center directors and family child care providers reported at least one component of their center or home as "inadequate or substandard" A. Expand and prioritize supports for unhoused pregnant people and families with young children. The high costs of housing and population growth have made Alameda County a hot spot for housing instability and homelessness in the state of California. According to the Department of Housing and Urban Development, the first year of life is when people are most likely to enter shelter and transitional housing programs, followed by ages one to five. Pregnant women and families with young children are particularly at risk when they face housing instability. Currently in our county, families with newborns cannot leave the hospital without a car seat, but they can leave without a home. •One in five pregnant women who are homeless give birth prematurely, according to research findings cited in the California Health Report. •In 2018, the homeless management information system showed 969 families with 2,917 members as homeless in Alameda County, including 433 children ages 0-5. We know these numbers do not reflect the true extent of the issue as many families do not come forward to ask for assistance out of fear and live in their vehicles or with friends instead.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			B. Support place-based investments to promote family friendly neighborhoods. As part of the Neighborhoods Ready for School (NRFS) strategy, First 5 Alameda funds trusted community organizations and family resource centers to build an ecosystem of support for families in the community. Three of our four NRFS grantees are in Oakland - Lincoln, San Antonio Family Resource Center, and Roots Community Health Center are working with partners to promote neighborhood conditions where families can thrive. These grantees quickly pivoted at the start of the pandemic to provide basic needs, health and safety supplies, and other family resources via trusted messengers in community. The city could build upon such place-based investments in a coordinated effort to support family friendly neighborhoods - including access to basic needs, affordable housing, child care, transportation, neighborhood libraries, and safe, green and accessible schools, parks, playgrounds. In our latest KRA we found that: •Connection to resources (i.e. family navigation to economic supports and basic needs, including housing) was significantly correlated to higher kindergarten readiness •Families who resided in a higher-income neighborhoods reported higher readiness, and neighborhood assets (i.e. safety, parks/playgrounds, libraries) were correlated with	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			readiness, regardless of family income •Families want policies that invest in the local economic development to support job creation and advance living wages particularly for Black and Brown communities	
8	**Comments Received on City Staff Presentation to EBHO Oakland Committee**	6/1/2022	A. Constraints – noted that staff mentioned high impact fees as a constraint, but from what Liana hears, fees aren't high enough B. Please include an executive summary of the HE – organization and content C. Site inventory – need map of sites across the city with council districts, distinguish sites for lower income housing/market rate. Map sites against areas of concentration race/income - higher income and largely white neighborhoods; to what extent is the City putting multifamily and affordable housing into those areas. What share of lower income housing sites are going into high opportunity/high segregation areas? D. Housing Action Plan - is the list of new programs in the HE anywhere? E. Plan/study/consider - show that proposed HAP policies will be presented to the Council for consideration by a specific date so that we are not endlessly studying. Show that policies will in fact reduce the racial disparities in housing opportunity/outcomes/conditions identified in the fair housing assessment	A. Comment received. Impact fee constraints are discussed in Appendix F: Housing Constraints B. The revised 2023-2031 Housing Element includes an Executive Summary. C. The interactive Sites Inventory Map includes sites, Council Districts, and affordability level and is available at: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d D. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions with blue text**.** E. Actions in Chapter 4: Housing Action Plan includes discrete implementation timelines and milestones within the eight-year Housing Element planning period.
9	**Jeff Levin, Planning Commission Hearing**	6/1/2022	A. What actions is the city taking to encourage affordable housing development as a result of SB9 B. Five year impact fee study – when will this occur? C. AFFH - sites need to show how we are breaking down patterns of segregation. Are we	A. The City has published a Planning Application For Ministerial Approval of Two-Unit Residential Development or Parcel Subdivision Resulting in Two Lots With Residential Units On Each Lot (SB-9) and provided clear step-by-step instructions for potential applications. More information can be found at: https://www.oaklandca.gov/services/apply-for-two-unit-residential-development-and-parcel-subdivision-resulting-in-two-lots-under-senate-bill-9-sb-9

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			also providing opportunities in racially segregated areas, specifically white affluent parts of town? Policies need to show that we will reduce racial disparities in housing and metrics D. Place-based strategies in investing in non-housing like infrastructure and facilities must be coupled with investing in lower income neighborhoods	B. The Five-Year impact fee study is currently underway. More information can be found at: https://www.oaklandca.gov/projects/5-year-impact-fee-review-and-update-reports C. The Housing Element presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures. Sites for upzoning are included in Table B of Table C-26, and an analysis of how sites affirmatively further fair housing is available in Appendix D. D. See Response to Letter #6 C. and D.
10	**Daniel Gregg, Planning Commission Hearing**	6/1/2022	Encourage development of local construction labor, apprenticeship programs, workable local hire, workforce necessary to build housing we desperately need	Comment noted.
11	**Michael Gabriel, Planning Commission Hearing**	6/1/2022	Lean toward objectivity. Action 2.2.8 "Investigate" TOPA/COPA, Action 1.1.3 - Strengthen Ellis Act – "strengthen" is an advocacy word. Implement, evaluate, monitor might be better words. Lacking information and education about how to follow rules on the landlord's side. Action 1.1.8 - rental registry – "evaluate the value of" instead of advocacy. Limit condo conversions – "evaluate" or "impact" instead	Comments Noted.
12	**Tuan Ngo, Planning Commission Hearing**	6/1/2022	TOPA/COPA - Change on p. 57 to reference this as an approach - Moving private properties into social housing will negatively impact small mom and pop owners	Comments noted. Enactment of a Tenant/Community Opportunity to Purchase Act (TOPA/COPA) policy would require City Council review and approval. See updates to **Action 2.2.8:** Investigate a Tenant/Community Opportunity to Purchase Act.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			- Richmond City Council unanimously voted to halt this program - Instead, put affordable housing directly into the hands of low income tenants, provide downpayment assistance to homebuyers	
13	**Lucky Thomas, Planning Commission Hearing**	6/1/2022	TOPA/COPA - Housing can be provided in many different ways/forms than just TOPA/COPA - Housing plan needs to be objective, shouldn't be advocacy for a political view or position - We should look at how do we best preserve our city, support mom and pop businesses, small property owners - Remove TOPA/COPA. Explore condo conversions, cooperatives, etc	
14	**Daniel Gonzalez, Planning Commission Hearing**	6/1/2022	TOPA/COPA - in the current version, it allows for a 50% rent increase on tenants in a 5-year period. Policy isn't well thought out yet, shouldn't be a part of the housing element	
15	**Planning Commissioner Fearn, Planning Commission Hearing**	6/1/2022	A. Why didn't we build on opportunity sites from the previous cycle(s)? B, Is there a cliff notes version of what the State wants to see related to AFFH thresholds in the HE? Are we leaning on our policies to ensure we meet RHNA because w're not locating housing in opportunity sites?	A. Majority of new housing development occurred in neighborhoods targeted for new development such as the Broadway Valdez area, Downtown, and West Oakland, in addition to along major transit corridors. B. The Housing Element presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
16	**Planning Commissioner Sugrue, Planning Commission Hearing**	6/1/2022	Are Staff having conversations with market rate and affordable housing developers about the types of housing they want to build within a 5-10 year range? Townhomes are the most lucrative products now. How can we be as predictable as possible?	Between March - May 2022, Staff held a series of Housing Element focused discussion groups with affordable and market rate developers, housing justice and tenant rights advocates and received feedback on housing types. Staff will hold a series of discussion groups starting in December 2022 to discuss and gather feedback on the zoning reforms proposed in conjunction with the Housing Element Update
17	**Planning Commissioner Renk, Planning Commission Hearing**	6/1/2022	We already know we need to expand City resources, so how do we think about taking all of these goals, policies, and actions and turn them into reality? How do we do this when staff are already low capacity? Is there a step where some of this is winnowed down?	Comment noted.
18	**Planning Commissioner Jones, Planning Commission Hearing**	6/1/2022	How does City see growing trend of integrating ADUs in townhomes? How does this contribute to the housing element as a whole?	On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs. The City has seen continued interest in ADU development and has continued to approve building permits for ADU development. The revised 2023-2031 Housing Element includes 2 NEW actions related to ADU development and affordability projections: - **Action 3.2.5:** Reduce constraints to the development of ADUs - **Action 3.2.6:** Monitor affordability of permitted ADUs
19	**Planning Commissioner Shirazi, Planning Commission Hearing**	6/1/2022	A. Are Staff working with EWD and HCD to ensure that displacement pressures are mitigated / working with other existing plans and policies to align? B. Overarchingly, all of these policies are either proven to be positive or good to study in Oakland since we are not quite sure yet about some policies. Implementation is the next step (iterative) - we should think about an assessment at the midway point in the housing element cycle, which would ultimately save us time and resources.	A. Oakland Planning Staff are working in collaboration with Economic and Workforce Development Department, Oakland Housing and Community Development Department, and all City departments, as appropriate, to ensure that displacement pressures are mitigated and are in alignment with other existing plans and policies. B. Progress toward addressing each Housing Element program and policy is evaluated in the Annual Progress Reports submitted to State HCD. In addition, the revised 2023-2031 Housing Element includes a **NEW Action 3.3.19:** Sites Inventory and Fair Housing Accomplishments Tracking Program, which will require mid-cycle assessment of the effectiveness of AFFH programs. C. Comment received. D. Comment received.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			C. Action 2.2.3 residential demolition - current ordinance may not be living up to what the goals were. We should look broader D. Limit condo conversions - has good intentions, but may unintentionally limit housing purchase opportunities	
20	**East Bay for Everyone**	6/7/2022	**Site inventory** 1. 288 9th Avenue (APN 018 046500204) - This site is on top of Township Park and Rocky's Market. It is unlikely this site will discontinue use within the eight year planning period. Please re-allocate these 274 units of low-income to another site or sites	This site has been removed from the Revised 2023-2031 Housing Element
			Site inventory 2. 514 Shattuck Avenue (APN 013 115400905) - This site is a low vacancy strip mall in Temescal and tagged as an supplementary AFFH site. The prescribed 182 units are unlikely to outbid the existing profitable uses. a. Does the City of Oakland have documentation from the landowner demonstrating interest in developing this site within the next eight years? b. There are nearly a dozen businesses renting on this site. Will those leases run beyond the planning period? c. The City of Oakland should consider increasing the allowable density above 182 units and increasing allowable heights to ensure this site is actually developed within the planning period	This site has been added to the Sites Inventory, Table C-26.
			Site inventory 3. 6039 and 6029 College Avenue (APNs 014 126800100; 014 126800100) - These are two adjacent vacant parcels in a high-resource tract very close to Rockridge BART. Collectively these sites of .4 acres will yield 26 units under existing zoning and development standards. Despite being ¼ mile from Rockridge BART, the City of	These sites have been added to the Sites Inventory, Table C-26.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Oakland imposes a 35' height limit on this site. a. In the notes for these parcels, the City of Oakland says it will not designate these parcels as Low-Income RHNA sites and re-zone them because they are below a .5 acre adequacy threshold for Low-Income sites per HCD Guidance. b. These sites received some of the highest Maptionairre Site Selections within the city's survey tool designed to solicit community feedback for siting housing as part of the Housing Element. Collectively these parcels received 23 recommendations for additional housing. c. The NIMBY group Rockridge Community Planning Council has tried to get the City of Oakland to buy these parcels and create a park for years in order to prevent mixed-income or affordable housing development at the site. d. The City of Oakland's reasoning for not designating this site as Low-Income and re-zoning is inconsistent with its other actions within the Draft Housing Element. For example, 4225 Broadway is a .15 acre site that is designated as a Low-Income site. 4225 Broadway is far below the .5 acre adequacy threshold for Low-Income sites provided by HCD guidance. By contrast, 6039 and 6029 College Avenue are only a 1/10th of an acre below this same threshold. In addition, 4225 Broadaway has existing uses that would need to be demolished whereas 6039 and 6029 College Avenue are currently vacant. 6039 and 6029 College Avenue are also closer to Rockridge BART and are in higher-resource tracts compared to 4225 Broadway and are more likely to be feasible for construction provided additional height and density.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			e. The City of Oakland should designate 6039 and 6029 College Avenue Low-Income sites. In addition, the City of Oakland should rezone and relax development standards to allow for at least 75 DUAs and 55' of height. This density and height is typical for sites in close proximity to BART stations. Given the wide range of small lot infill in Oakland over the past ten years as well as the prime location for TCAC scoring, the City of Oakland should be able to provide additional analysis to meet HCD's scrutiny of Low-Income sites below the .5 acre threshold. f. In the alternative, the City of Oakland should retain 6039 and 6029 College Avenue as Moderate-Income sites and rezone and relax development standards to allow for at least 75 DUAs and 55'. This density and height is typical for sites in close proximity to BART stations. g. As discussed below, every BART station in Oakland apart from Rockridge has been host to specific plans to facilitate transit-oriented development. The City of Oakland's failure to identify 6039 and 6029 College Avenue as sites for Low-Income or otherwise increase the allowable height and density perpetuates a pattern or practice ofthe City of Oakland excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood.	
			Site Inventory 4. 4400 Telegraph (APN 013 109902600) - This site is proposed for 24 units of Low - Income RHNA housing at a site owned by Critical Resistance, an abolitionist non-profit. a. An August 12, 2019 article from KQED describes how the prior owner of this parcel sold it to Critical Resistance after rejecting offers from "condo developers." b. Does the City of Oakland have	This site is included in the Sites Inventory. It is part of a larger group of sites; most of these sites are within an above 30 du/ac zone. While redevelopment would be at the discretion of the property owner, the HAP provides access to low-cost financing for developers, density bonus incentives, and support of grassroots developers. This parcel may also change the land use designation of this parcel as part of the LUTE phase 2.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			documentation of interest from the property owner in developing this parcel within the eight year planning period?	
			Site Inventory 5. 525 21st Street (APN 008 064503301) - This site is owned by the Department of Veterans Affairs and is proposed for 137 Low-Income units per RHNA. This site is coded as an AFFH supplementary site in a "moderate-resource" census tract. a. Does the City of Oakland have documentation of interest from the property owner in developing this parcel within the eight year planning period? b. The Draft Housing Element claims this site is in a moderate-resource tract. The 2022 TCAC Opportunity Map, however, shows this site as a low-resource tract. Given the concentration of low-income housing, supportive services, particulate matter from 980 and 580, lack of access to grocery stores and other resources, few Oaklanders would consider siting low-income housing at 525 21st Street as affirmatively furthering fair housing. c. Provided the Department of Veterans Affairs has expressed written interest in developing the site within the eight year planning period, this site should remain in the site inventory but should not be counted as a supplemental AFFH site. We have provided several sites in moderate and high-resource tracts below where these Low-Income RHNA units could be accommodated.	A-c: This site is included in the Sites Inventory. It is part of a larger group of sites; most of these sites are within an above 30 du/ac zone, and located in a moderate resource tract based on TCAC 2021 maps. The site is within walking distance to 19th Street BART and within a 0.6 and 0.7 miles of two full service grocery stores. The site is also close to Downtown, a major jobs center. See response above regarding HAP actions that incentivize housing development on sites identified in the Inventory.
			Site Inventory 6. 4225 Broadway (APN 012 100200900) - This .15 acre site projected at 8 units of Low-Income RHNA housing is coded as a supplementary AFFH site. a. This site falls below the .5 acre adequacy	A-c: As indicated in the Sites Inventory, this is an underutilized commercial site (low AV ratio and low FAR) with previous development interest and adjacent to a potential residential project. See response above regarding HAP actions that incentivize housing development on sites identified in the Inventory and provide support to affordable housing developers.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			threshold per HCD guidance. The City of Oakland provides zero analysis or justification as to why this small site would be developed or the city's track record of developing low-income housing on these sites. b. TCAC will not finance 8 unit low-income projects with tax credits. How does the City of Oakland expect a low-income housing developer to finance new construction at this site? c. There are several vacant and underutilized parcels surrounding 4225 Broadway that could be consolidated to create a more feasible low-income development opportunity site. Why weren't these sites included?	
			Site Inventory 7. 4200-4224 Broadway (various APNs) - This supplementary AFFH site is in a good location and would replace underutilized commercial uses and parking lots. The 60 DUAs, however, are unlikely to outbid existing commercial uses. Consider increasing allowable density to 75 DUAs.	This site is part of group III. Realistic capacity does not reflect allowable density; this site's current permitted density is 96.8 du/ac. The site may be considered for upzoning or land use designation change as part of Phase 2.
			Site Inventory 8. 6028 Claremont Avenue (APN 014 126803501) - This site is proposed for 23 Low-Income RHNA units in Rockridge on top of an existing office building. It is less than a ¼ mile from Rockridge BART. The site does not include adjacent parking lots that appear to serve the subject office building. The site is subject to a 35' height limit. a. The decision to include the office building, but not the parking lots that serve it is bizarre. The former Dreyer's headquarters, of which the subject site is part of, are owned by a single owner. Why would the owner demolish an existing office building to be rebuilt into 23 units of low-income housing but retain the	These sites have been revised to indicate grouping (ZZZ) which includes adjacent parking lots.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			surrounding parking lots that serve that office? b. 23 units of low-income housing will not outbid an office use so close to BART, especially with a 35' height limit	
			Site Inventory 9. 3875 Telegraph Avenue (APN 012 096800301) - This supplementary AFFH site is proposed for 35 Low-Income RHNA units. The existing use is a surgery center that is close to MacArthur BART, on a commercial corridor and is underutilized relative to its land value. a. The owners of this site previously refused rezoning between 2006 and 2008 as part of the MacArthur BART Transit Village PUD. b. The owners previously expressed interest in expanding the surgery use as recently as 2017. c. Given the owners' prior resistance to rezoning the site for housing, the City of Oakland must provide written proof of interest from the landowner in development of the site within the eight year planning period. d. This site, ⅛ of a mile from MacArthur BART, can accommodate much more density than 75 DUAs. If the owner provides written proof of interest in development, please consider increasing allowable density to 125 DUAs.	a-d: This site is upzoned in Table B of C-26; it is given a height increase to 95 ft, increasing allowable density to 158.4 du/ac. HAP Action 3.4.10 states that any site included in the inventory, should the property owner choose to redevelop, develop as a majority residential use.
			In order to effectively meet the demand for additional sites, especially in moderate to high-resource areas with low-VMT, we have provided a list of additional sites we ask you to consider. <u>Suggested Site Inventory</u> 1. 501 MacArthur - underutilized commercial use at the corner of two commercial corridors. 2. 5352 Claremont Avenue - 1.5 acre underutilized commercial use surrounded by a large parking lot. 3. 3901 Broadway - underutilized fraternal	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			lodge and parking lot. 4. 5216 Broadway - one of two Shell Gas stations within ½ mile of each in a high-resource neighborhood. 5. 6046 Claremont - .6 acre surface parking lot near Rockridge BART. 6. APN 14-1268-9-1 - .5 acre surface parking lot near Rockridge BART	
			Programs and Policies Program A. Action 3.2.1 - Plex upzoning in single-family neighborhoods o Consider using five units as the base permitted density to allow for projects opt-in to the State Density Bonus Law and provide deed-restricted units on-site. o Consider allowing up to six units for larger lots and corner lots. o Provide a ministerial approval process so that small developers and property owners with lower risk tolerances can participate in the program. B. Action 3.3.5 - Affordable Housing Overlay o Please do not exempt historic districts from this policy. Historic districts and potential designated historic properties (PDHPs) tend to exist in high-resource areas that have historically excluded low-income housing. For reference, Oakland PDHPs are most highly concentrated in Rockridge, Trestle Glen and other high-resource neighborhoods that historically excluded low-income housing. By contrast there are relatively few PDHPs in low-resource places like East and Deep East Oakland where many low-income housing units have been developed historically. [- See image on page 6 of EB4E's comments - use link to the right of this column] - In case the City of Oakland decides to allow	A. See updated language included in Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Also see Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. See updated language included in **Action 3.3.5:** Implement an Affordable Housing Overlay. C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health D. Comment noted. E. Comment noted. The City has been approached about and has thus far declined to join bond-financed JPAs for exactly the reasons described in this public comment. The City welcomes additional information about successful examples of arms-length corporations that engaged in the development of limited equity cooperatives. F. See **NEW Action 3.5.5:** Study feasibility of single-stair residential buildings is included in the Housing Element to address this comment. G. The City Administrator's contract authority limit is a matter of Council policy and would require amendment by the City Council. H. As part of implementing **Action 1.1.9:** Implement a rental housing registry, the City will seek to use the rental registry to support SB 330 demolition protections. I. See updated language included in **Action 2.2.5:** Extend local replacement unit provisions to require that developers notify existing and prospective tenants of their tenant rights as provided both under SB 330 as well as Oakland's Just Cause for Eviction Notice.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			historic districts to be exempted from an Affordable Housing Overlay that exemption should only apply to historic districts that existed as of January 1, 2022. This will prevent the sort of defensive, dubious landmarking that we have seen from high-resource areas such as St. Francis Wood and Pasadena in direct response to the passage of SB9 C. Action 3.4.1 - Revise development standards, including allowable building heights, densities, open space and setbacks requirements ○ Transit-proximite zoning areas ■ The following BART station areas within Oakland have been subject to a specific plan to allow for transit-oriented development on public and/or private land nearby: Coliseum, Fruitvale, Lake Merritt, West Oakland, 12th Street, 19th Street, MacArthur. Tens of thousands of units have been constructed or in the process of being developed within these specific plan areas. The only BART station area in Oakland that has not had a specific plan developed and implemented is Rockridge. This station area contains some of the highest-resource tracts in Oakland and is one of the most “whites-only” census tracts in Alameda County, according to the Haas Institute for a Fair and Inclusive Society. The last low-income housing development constructed in Rockridge was the Otterbein Manor (SAHA Homes) in 1973. This development was completed one year prior to the 1974 Rockridge Downzoning. The 1974 Downzoning was an explicitly racist downzoning movement reacting to state and federal fair housing laws, the perceived encroachment of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Black families into the neighborhood and plans for transit-oriented development near the newly constructed BART station. Any transit-proximate rezoning and revision of development standards must include the Rockridge station area. If the City Oakland fails to include the Rockridge station area with transit-proximate revision of zoning and development standards, it would perpetuate an existing pattern or practice ofthe City of Oakland of excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood. ■ Additional height and density should be allowed at least a ½ mile of heavy rail stations and within ¼ mile of high frequency bus stops. This represents the walkshed for most transit users. Where areas have access to both rail and high-frequency bus transit access overlap, such as in North Oakland, greater additional height and density should be allowed. ■ For these rezonings priority should be given to vacant or underutilized commercial land and owner-occupied residential land. Consider limiting rezonings on top of filtered or rent-controlled rental housing. Action 3.4.1 - Revise development standards, including allowable building heights, densities, open space and setbacks requirements ○ Resource-rich areas ■ Consider providing setback and other development standard relief in addition to permitting 30 DUAs by-right in resource rich areas. Action 3.4.1 - Revise development standards, including allowable building heights, densities,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			open space and setbacks requirements ○ Corridors ■ Foothill Boulevard, MacArthur Boulevard and International Boulevard are all commercial corridors in East Oakland that are specifically called out by name as requiring additional height and density for development to work. While we support additional height and density along these corridors, it is frustrating that similar corridors with low height limits remain unmentioned despite having similar issues with height and density. For example, Shattuck Avenue in North Oakland was downzoned to a 40' height from 50' in 2011. In 2021 a development application at 6300 Shattuck for housing at 50' (grandfathered in from a deemed complete application from 2010) was appealed by nearby property owners. This stretch of Shattuck Avenue is within easy walking/cycling distance to Ashby BART and near several bus routes and is in a high-resource tract. The appeal was dismissed by the Planning Commission, but it exemplifies how badly-needed multi-family housing near transit and low-VMT in higher-resource neighborhoods is often opposed and delayed by homeowners and property owners. The homeowners and property owners in higher-resource tracts have also historically been able to downzone heights and densities on their corridors while allowable heights and densities on corridors in lower-resource areas of Oakland are increased. The City of Oakland should commit to increasing heights and densities on commercial corridors in moderate and high-resource neighborhoods by name. Exemplar commercial	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			corridors: Shattuck Avenue, Piedmont Avenue, upper Broadway, upper Telegraph Avenue, 51st Street, College Avenue, Grand Avenue, Lakeshore Avenue and Claremont Avenue C. Action 3.4.2 - Revise Conditional Use Permit (CUP) requirements ○ While we support the removal of CUPs for multifamily housing development in RD-2 and RM zones, we request the City of Oakland please extend this action to include RD-1 zones as well. C. Action 3.4.3 - Revise citywide parking standards ○ Consider removing all parking minimums for housing development. At the very least, expand the ability to zero out parking minimums to all low-VMT areas. ○ Consider instituting parking maximums for residential development to reduce VMT and prevent overparking in downtown high-rise development. D. Action 3.5.3 - Advocate for statewide legislation on social housing ○ We are happy to see support for our sponsored legislation AB2053. Please consider sending a letter of support on behalf of the City of Oakland ahead of AB2053's June 21, 2022 Senate Housing Committee hearing E. Action - 3.5.4: Evaluate acquisition and development opportunities for moderate- and middle-income households ○ While we support efforts to acquire and develop moderate-income housing we must caution against the use of bond-financed JPAs such as CalCHA for this task. These entities command high fees and underwrite risky debt. ○ The City of Oakland should consider creating and capitalizing an arms-length corporation to develop limited-equity cooperatives for	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			moderate-income households, including public sector and essential workers. F. Action 3.7.5 - Encourage different sizes of housing for larger families – including affordable housing with courtyards, multigenerational housing ○ The City of Oakland should commit to studying the impact of second egress requirements for the feasibility of small and medium lot development of multifamily housing with 3 and 4 bedroom units. ■ The requirement of a second stairwell for purposes of egress reduces the usable floor plate for living space. The additional circulation forces many designers to arrange units along double-loaded corridors with internal hallways. This layout reduces the ability to provide natural light for more than 1 or 2 bedrooms (access to light or a light well is required for a habitable bedroom). The requirement for a second stair is a key driver in the relative overproduction of studios and 1 bedroom units compared to family-sized units. ■ The US is one of two developed countries in the world that doesn't allow single stair multifamily construction for at least four to five story buildings. Other developed countries provide a second means of egress via a fire ladder or other means. ■ Single stair multifamily buildings can also provide better access to light as well cross-ventilation. This makes it easier for new housing to meet passivehouse standards and reduce operational energy demands. In addition, because less circulation space allows for more floor space to be dedicated to group open space like courtyards or private open space like balconies or decks. ○ The City of Seattle passed and implemented	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			local building code amendments in 1975 to allow a single stair as means of egress for buildings up to six stories. The current code caps such single stair structures to four units per floor, requiresautomatic fire sprinklers and imposes other fire-rated and corridor requirements. The City of New York also allows single stair buildings with similar mitigations. https://secondegress.ca/ ○ The City of Oakland should study local building code amendments to allow up to six stories with single stairs with mitigations for fire, life and safety. ○ The City of Oakland should commit to supporting state legislation to direct the California Building Standards Commission to study allowing single stair multifamily housing up to six stories with proper fire, life and safety mitigations. G. Action 3.3.14 - Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing ○ Under Section 2.41.020 of the OMC, the City Administrator must seek City Council approval for purchases of any land valued at over $100,000. There is no parcel in Oakland with development or anti-displacement utility valued at $100,000 in 2022. This authority should be increased to, at least, $1,000,000 (pegged at CPI) to allow Oakland HCD staff to move quickly when the opportunity and funding present themselves for land acquisition H. Action 1.1.8 - Create and maintain a rental housing registry ○ This policy is critical for the enforcement of SB330/SB8 tenant demolition and right to return policies. Oakland HCD needs this tool to be able to coordinate with Oakland Planning on	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			evaluating development applications that propose to demolish protected housing and ensuring compliance with relocation and right of first refusal policies post-entitlement I. Action 2.2.5 - Extend local replacement unit provisions ○ We appreciate Oakland's commitment to codifying these provisions locally beyond the current 2031 sunset. That codification must be paired with more proactive enforcement of SB330/SB8 demolition protections. In November 2021, EB4E notified Oakland Planning that an application for development at 469 40th Street did not include sufficient replacement units under SB330. The application was eventually re-submitted and approved with the necessary replacement units. Projects should not be put out to public notice unless they have clearly demonstrated they have complied with SB330/SB8 demolition protections and provision of replacement units. ○ We request that Oakland Planning work proactively with Oakland HCD to create internal processes to help ensure displaced tenants are not lost in the post-entitlement and demolition process.	
21	**Stuart Flashman**	6/8/2022	Has the city considered the alternative of an affordable housing overlay district for high resource areas, rather than a blanket up-zoning? A blanket up-zoning will act as an invitation for market-rate housing projects, while an affordable housing overlay will encourage projects that meet the overlay district's affordability requirement (which should be higher than what is required for the state's density bonus).	See **Action 3.3.5:** Implement an Affordable Housing Overlay (AHO). Proposed features of this overlay include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will broadly apply this overlay, except for contaminated sites, protected historical sites/districts, and areas in the Very High Fire Hazard Severity Zone.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			The affordability overlay could also allow for multiple levels of affordability to meet its threshold - i.e., 3% extremely low income, 5% very low income, 10% low income, 20% moderate income, with multipliers based on level of affordability - i.e., 4x for extremely low, 3x for very low, and 2x for low. Thus the suggested project would get 3x4 = 12 points + 5x3 = 15 points + 10x2 = 20 points + 20x1 = 20 points, for a total of 67 points. The threshold for triggering the overlay district's density and height levels might be 55 points. a standard 15% very low income density bonus project would only get 45 points - not enough. The overlay could allow more height and density than the state density bonus, encouraging developers to "go the extra mile" to qualify. A mixed-income project would also provide a healthier mix of different income levels than the standard 15% very low income, 85% market rate project. Please think about this idea.	
22	**Kevin Morsony**	6/8/2022	I am writing to express concern that 4035 Park Blvd in Glenview was not included in the site inventory in the Oakland Housing Element. This .2 acre site is an empty lot (remediated former gas station) in a high resource area served by both local and transbay bus lines that both stop in front of this location. It is adjacent to a 7 unit apartment building (on a lot half the size). At minimum, this lot should support at least 14 units even if only zoned for current capacity. This lot has been vacant for 30 years as owners have failed to develop it due to personal issues. It is exactly the type of location that the city should use their power of eminent domain to acquire and turn over to low income housing developers to ensure that high resource	The revised 2023-2031 Housing Element includes this site as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhoods have low income housing. This is a ready to build location that should be included in the site inventory and the housing element.	
23	**Annette Floystrup**	6/8/2022	The "othering" of the Rockridge neighborhood of north Oakland is on full display in this document. The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. Housing Element Draft, Page 63: "POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS "Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Oakland has a huge need for affordable housing, but nothing in this policy element addresses the building of affordable housing as defined by HUD, but rather will exclusively encourage the building of market-rate, luxury-class housing dominated by studio and 1-bedroom apartments/condos. According to the National Low Income Housing Coalition, housing is affordable if it costs no more than 30 percent of one's income. Renters who pay more than this are considered "cost-burdened;" those who pay more than 50 percent are "severely cost-burdened." In Oakland, 59 percent of residents are renters,	Comments noted. Oakland Planning Staff presented the first Public Review Draft Housing Element to the Rockridge Community Planning Council on August 18, 2022. This presentation took place during the extended public review period (June 30 - September 30, 2022).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			with the median income of these households around $40,000, more than half of them qualify as very low income. However, due to the high cost of Bay Area housing, even households that bring in as much as six figures can be designated as “low income,” as set by the Department of Housing and Urban Development (HUD). Its threshold is set for those earning incomes at or below 80 percent of area median income (AMI). In Oakland, 80 percent of AMI is very high — $73,100 for a single person; and for a 4-person household, $104,400. Housing Cost Burdens Have Stark Racial Impacts In Oakland, African American households face the highest housing cost burden, with 63 percent devoting more than 30 percent of their income to housing (according to the PolicyLink National Equity Atlas). Overall, 59 percent of households of color are housing-cost-burdened, compared to 42 percent of white households. Between 2000-2010, the City of Oakland lost 34,000 African American residents (a 24 percent decline). This included 10,000 OUSD students. Lack of affordable housing fuels the fire of Oakland’s ongoing and dramatic exodus of African American and other POC households. Is it really Affordable? The need for genuinely affordable housing in Oakland is very high, but are proposed developments in Rockridge going to meet these affordability standards? The cost of land in Rockridge means that the answer is generally, no. For example, the multistory tower proposed for the CCA property would consist of ~467 residential units, 10 percent of which would be	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			"affordable". That sounds good until you realize that here affordable is defined to mean "moderate-income" households, with eligibility defined as 120 percent of area median income (AMI). For 2020, that was $109,600 (1-person household) and $156,600 (4-person household). In other words, there would not be one single unit of affordable housing, as defined by HUD, created by the project and available to low-income renters. Affordable housing is desperately needed in Oakland if we are to retain housing stock for low-income workers, seniors, and the disabled. About 93 percent of new construction in Oakland is market-rate developments geared to luxury class apartments like the 40 story Atlas Tower downtown. While rents dropped significantly during the initial COVID lock down, rents have rebounded and none fall into the affordable range. The number of available and genuinely affordable units is almost non-existent. The demand far outstrips the supply. Current building costs have risen steeply in the past years in response to Trump Administration tariffs on Canadian lumber and COVID slowed production of building materials Much of the newly proposed and /or built housing is also singularly family unfriendly. Few apartments are 2-bedrooms or more, and the vast majority are studio and 1-bedroom. It is assumed that people will not have private cars, but if you have two or three children who each require a different size car seat, Uber and Lyft cannot accommodate you. If you have a mobility impaired family member, someone in a wheelchair or one who uses adaptive tools to	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			enter and exit a car from a walker, you also cannot be accommodated by ride-share or gig-vehicles within minutes of a phone call. These are wider issues of societal sustainability that are going utterly unaddressed by this housing element. But they eventually impact the lives of most of us. For low to moderate income residents, housing is difficult at best, but as currently conceived, the new housing is also inadequately meeting the needs of child families, multigenerational families, and the disabled of higher income levels as well. In summary, land and building costs are very high and rising, making public-private partnerships and government-subsidized construction perhaps the surest ways to add more truly affordable housing in Oakland — and particularly here in Rockridge. Lack of inclusion in the process The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. There is an organization that represents Rockridge, a registered 501(c)3, the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC's monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			meetings were held. The exclusion of the RCPC, the most significant citizen institution in Rockridge, which has been reshaping the neighborhood since the early 1970s, when a resurrected RCPC led the way to obtaining funding from the Department of Housing and Urban Development (HUD) for planning studies which resulted in the City of Oakland adopting a new zoning designation C-31, currently CN-1, for College Avenue in 1973, consisting of pedestrian oriented retail with mixed use upper stories is remarkable and inexcusable. It argues for a total lack of knowledge about the neighborhood by City staff. It cannot have gone unnoticed that in the past 30 years, RCPC has directly brought in excess of $7 million into the City and the neighborhood, can it? A new branch library funded by a citizen originated Mello-Roos taxation district, FROG Park, Hardy Dog Park, hundreds of thousands in traffic mitigation funds negotiated from CalTrans (4th Bore), Dreyer's and Safeway projects, and $3 million in environmental mitigation funds obtained by through litigation by the 4th Bore Coalition, a coalition of Oakland and Berkeley neighborhood groups organized and led by RCPC. Those $3 million dollars were used to add enhanced HVAC and filtration systems, sound dampening windows and environmental plantings to the two schools in the RCPC catchment, Chabot Elementary and Claremont Middle School severely impacted by the particulate, fume and noise pollution resulting from their locations within less than 100 feet of Hwy 24. A registered non-profit creating that much benefit to the City of Oakland should have been contacted, in particular when planning and zoning have been	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			the primary focus of the organization for more than 50 years. The "Introduction of the Housing Element Draft" on Page 5 has a heading: "CHARTING AN EQUITABLE, INCLUSIVE FUTURE" It is not equitable to exclude some neighborhoods from the process of producing the Housing Element Draft. It is not equitable to promote the building of market-rate housing which does not produce truly affordable housing but does produce profits for private real-estate developers. And it is not equitable to unduly burden a neighborhood that already brought itself back from an earlier round of governmental policy originated destruction.	
24	**Housing Element Discussion Session #3**	6/8/2022	A. General Comments - Despite the increase [in Oakland's 6th cycle RHNA] how do we assure that the disenfranchised needs are met. - Who do we target, and how do we penalize them when lower income needs are not met? - Is there a way for the public to track who paid impact fee's, for what, and where and how are those funds being used? - Are the state-mandates on site size for low income housing, or for all housing that can count towards RHNA requirements? - Does the city have a published methodology for when to count new market housing as Moderate Income? I know San Jose does - One other point: I am pleased to see parts of the Element devoted to remediation of environmental contaminated sites. Urge the city to consider that housing located near freeways, Oakland Ports and other heavy duty trucking concentrations to be included in definition of a contaminated sites and to help	A: Comments noted. See notes from Housing Element Discussion Session #3 - https://cao-94612.s3.amazonaws.com/documents/Housing-Element-Discussion-Session-3_06.08.2022.pdf B. 			- it's hard to rank, but would like to include low-income non english speakers as having a barrier to accessing housing B. where are the input not included going to be noted, if at all, in the housing element? which chapter or appendix? C. APR - so the number of permits does NOT reflect on actual built units? the 1k under very low income might in actuality be less? - is there a way to find actual units built? - so basically some developments are stalled and that isn't captured... is there another table that reflects actually built #s? - my concern is folks looking at the "approved permits" data might misunderstand that as the actual # of available housing. if a lot of projects get stalled it would not be an accurate indication	(APR) on the jurisdiction's status and progress in implementing its housing element. For the 5th cycle Housing Element period (2015-2023), State HCD required that jurisdictions report completed units in the APR form beginning in 2019. Oakland Planning Staff have data on permitted units for the 2015-2023 period and completed units for 2019 and onward. See Table A2 of Oakland's APR form to view completed units beginning in 2019: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports.
26	**EBMUD**	6/9/2022	**General** EBMUD appreciates the City's efforts to achieve its Regional Housing Needs Allocation (RHNA) through identifying opportunity sites where additional development could occur. As noted in the Housing Element Update, these opportunity sites include both vacant and non-vacant sites. It is important that the City consider existing surrounding uses so that those uses may continue after new housing is developed. In particular, EBMUD has its main offices in Downtown Oakland and additional administrative offices and service yards in West Oakland near GRand Avenue and Adeline Street. In addition, EBMUD is developing a service yard at Willow Street and 24th Street, and its wastewater treatment plant is located at West Grand Avenue and Wake Avenue. Finally, EBMUD has a facility along Oakport Street in	Comments noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			East Oakland as well as numerous water and wastewater facilities that support the community and provide essential services to residents and business owners throughout the City. **Wastewater Service** The projected number of housing units within the City of Oakland as described in the Housing Element Update are higher than the quantities used by EBMUD in recent long-term planning efforts, and result in population growth rates higher than EBMUD assumed. The differences in EBMUD's assumptions and the Housing Element Update will not necessarily result in a capacity deficiency, however, EBMUD will monitor the increase in flows over time and requests that the City continue to closely coordinate with EBMUD to ensure that implementation of the Housing Element Update proceeds as projected. **Wastewater Service** In addition, wet weather flows are a concern. The East Bay regional wastewater collection system experiences exceptionally high peak flows during storms due to excessive infiltration and inflow (I/I) that enters the system through cracks and misconnections in both public and private sewer lines. EBMUD has historically operated three Wet Weather Facilities (WWFs) to provide primary treatment and disinfection for peak wet weather flows that exceed the treatment capacity of the MWWTP. Due to reinterpretation of applicable law, EBMUD's National Pollutant Discharge Elimination System (NPDES) permit now prohibits discharges from EMBUD's WWFs. Additionally, the seven wastewater collection system agencies that	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			discharge the EBMUD wastewater interceptor system ("Satellite Agencies") hold NPDES permits that prohibit them from causing or contributing to WWF discharges. These NPDES permits have removed the regulatory coverage the East Bay wastewater agencies once relied upon to manage peak wet weather flows. **Wastewater Service** A federal consent decree, negotiated among EBMUD, the Satellite Agencies, the Environmental Protection Agency (EPA), the State Water Resources Control Board (SWRCB), and the Regional Water Quality Control Board (RWQCB), requires EBMUD and the Satellite Agencies to eliminate WWF discharges by 2036. To meet this requirement, actions will need to be taken over time to reduce I/I in the system. The consent decree requires EBMUD to continue implementation of its Regional Private Sewer Lateral Ordinance (www.eastbaypsl.com), construct various improvements to its interceptor system, and identify key areas of inflow and rapid infiltration over a 22-year period. Over the same time period, the consent decree requires the Satellite Agencies to perform I/I reduction work including sewer main rehabilitation and elimination of inflow sources. EBMUD and the Satellite Agencies must jointly demonstrate at specified intervals that this work has resulted in a sufficient, pre-determined level of reduction in WWF discharges. If sufficient I/I reductions are not achieved, additional investment into the region's wastewater infrastructure would be required, which may result in significant financial implications for East Bay residents **Wastewater Service**	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			To ensure that the proposed project contributes to these legally required I/I reductions, the lead agency should require the project applicant to comply with EBMUD's Regional Private Sewer Lateral Ordinance. Additionally, it would be prudent for the lead agency to require the following mitigation measures for the proposed projects: (1) replace or rehabilitate any existing sanitary sewer collection systems, including sewer lateral lines to ensure that such systems and lines are free from defects or, alternatively, disconnect from the sanitary sewer system, and (2) ensure any new wastewater collection systems, including sewer lateral lines, for the project are constructed to prevent I/I to the maximum extent feasible while meeting all requirements contained in the Regional Private Sewer Lateral Ordinance and applicable municipal codes or Satellite Agency ordinances.	
27	**Deeply Rooted**	6/10/2022	A. Provided track changes to the Engagement section that includes removing the DR Partners map and adding more detail to the Partners table. Oakland HE_compiled with TOC_DR_2022_0610: Section: 7.1 B. Acknowledgement of Community Policy ideas: As we have discussed, the City needs to explain why some of the community policy ideas in the Public Participation section didn't make it to the HAP. We recommend the following columns in the appendix for each community policy idea: policy idea, decisionmaker, issue/ disagreement, consensus, and next steps. **C.** Create and staff Neighborhood Planning Councils for residents to weigh in on what gets built in their neighborhoods during planning and implementation (i.e. RCPC or Mission	A. Oakland Planning Staff included this information in the updated Draft Housing Element submitted to State HCD on June 30, 2022. B. Appendix L in the revised 2023-2031 Housing Element includes Responses to Public Comments C. Oakland already has a Neighborhood Council structure that City staff engage with on a variety of issues of interest, including public safety, improvements, and more. Staff will look at options of improving this structure and broadening its scope for purposes of engagement as well as look at options of creating neighborhood groups for the specific purpose of gathering feedback on planning initiative and projects. Action 5.2.9 addresses the need to reduce barriers with inclusive engagement with actions in the Environmental Justice (EJ) Element. A policy in the EJ Element will be written to address this. D. Creation of new commissions requires action by City Council. The City should utilize existing boards and commissions instead of establishing a new body. However, Planning Staff will bring an item to the Planning Commission to set up a new subcommittee that monitors City performance with Housing Element and other housing policy implementation, see Action 5.2.11:

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			group), particularly in areas where rapid displacement is happening. (Policy 5.2) **D.** Citywide Housing Commission to review City's progress on Housing Element actions. (Policy 5.2) **E.** Integrate Healthy Development Guidelines into GP (note under actions where it's come from HDG) (Policy 5.2) Examples include disclosure and reporting on rental unit loss, eviction, and relocation compensation; and displacement impact mitigation. **F.**Human Health/Socioeconomic Impacts Analysis: require public analysis of displacement/homelessness impacts of market rate projects prior to City providing permits or any zoning changes (Policy 1.1) **G.** Acknowledge that proactive rental inspections can only be implemented with a new law. (Policy 2.1) **H.** A law requiring anti-displacement strategies for the proactive rental inspection program. (Policy 2.1) **I.** Moratorium on market rate development for neighborhoods experiencing rapid gentrification. (Policy 1.1) **J.** Community outreach & enforcement of City's Fair Chance Housing Ordinance (banning housing discrimination of people with criminal records). (Policy 1.1, 5.3) **K.** Cultural Districts will protect existing residents from displacement. (Policy 3.2) **L.** Address needs of undocumented residents, i.e. new local ordinance for removing Social Security Number from housing applications. (Policy 5.3) **M.**Measure KK assessment (low-income homeowners applied and used funds). Update so low-income homeowners will not have to pay the new taxes. (Policy 3.3)	Provide accountabililty measures for housing programs, including annual monitoring. **E. It** is not within the City's authority to implement all of the Healthy Development Guidelines as they are written. Staff conducted an assessment of the HDGs and will incorporate those goals and policies that are within the City's purview as part of the General Plan Update for the various related Elements. For the Housing Element the following Actions are included to address the Healthy Development Guidelines (HDG). See Action 5.2.1: Protect against smoke and wildfire to address HDG EH 1.7 Project Wide no smoking policy. See Action 5.2.9 and zoning in Appendix J to remove CUP for grocery stores in food deserts for HDG goal F1 Increase Access to Healthy Foods. For HDG H1.3 see Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement and Action 3.5.1: Support community land trusts and other shared equity models. For HDG H1.4: Prioritization of housing units for vulnerable populations see Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land. **For H**DG **goal H2: Preserve existing affordable housing and protect residents from involuntary displacement see Action** 1.1.14: Protect Oakland residents from displacement and becoming homeless and Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units. For HDG CC2.2 and OS1.1 see Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities. F. Due to a series of new State laws that streamline and regulate the timeline for project approvals, the required review structure and timing would not allow Staff to conduct a study of this nature on a project-by-project basis. Instead, this analysis could be performed prior to adoption of new zoning regulations (ex. General Plan zoning amendments). G. Building Bureau staff updated the language of the Housing Element **Action 2.1.3:** Conduct proactive rental inspections to reflect this comment. The City is also staffing up to respond more rapidly to code complaints. H. The City will look at ways to consider anti-displacement strategies as part of this program. With regard to displacement as a result of code enforcement, in coordination with the Planning & Building Department, Oakland HCD administers the Code Compliance Relocation Program. In addition, the upcoming Rent Registry will allow for a form of proactive protection for Oakland residents. I. The State will not approve a Housing Element that places a moratorium on market rate housing or any type of housing at any affordability level.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			KN. City kept as is because it aligns with HCD Site Guidelines. We are concerned that size assumptions are in violation of fair housing laws. (Appendix C pages 50, 80-81; and Oakland HE page 39) **O. Use of City-owned land as 100% affordable housing (includes 10+ acre sites as well):** Action 3.3.1 discusses prioritizing ELI households on public land, but Table C-16 (Appendix C) in Housing Sites Inventory shows that housing at all income levels is being planning for on public land. All public land for 100% affordable housing (includes 10+ acres). (Policy 3.3). **P.** Utilize neighborhood Area Median Income for housing projects. (Policy 3.2) **Q.** Increase Housing Impact Fees.(Policy 3.3) **R.** Create a real Inclusionary Zoning law. (Policy 3.3) **S.** Link zoning changes for market rate projects to affordability requirements so more affordable housing is built. (Policy 3.4) A developer who wants to build more units (say, 200 units instead of 100 units) should also increase the number of affordable housing units on site. **T.** Prioritize re-entry housing in City funding applications. (Policy 3.7) **U.** Ensure that TOD projects provide housing that neighborhood residents can afford (Policy 5.2) **V.** A tax on speculators AFTER they purchase the property does not reduce housing speculation and the City already has a registration fee & inspection requirement for speculators. The City should instead evaluate how the current program is working. (Policy 2.2)	J. Staff need more information about what Deeply Rooted is proposing in order to prepare a response. **K. See response to Letter #53** L. Comment noted. This comment speaks to issues outside the scope of the 2023-2031 Housing Element Update. M. When Measure KK was approved by voters, the measure did not include an exemption for low-income property owners. N. See Action 3.4.10 and Appendix J for revisions for the new 6th cycle RHNA sites to look at ways to incentivize affordable housing. This will be further discussed and various options analyzed during the Zoning implementation. O. The City disposes of public land according to State and local law, specifically the State Surplus Land Act (SLA) and the Oakland Municipal Code (OMC), specifically Chapter 2.42 that governs the disposition of real property. Decisions about the disposition of a particular parcel are made by City Council action, consistent with the requirements of the OMC P. This would greatly impact and complicate funding, closing, and asset monitoring processes for the City with impacts on the pace of AH creation/admin capacity. Neighborhood AMIs don't align with State or Federal funding mechanisms. The City will however continue to seek opportunities to target deeper AMI groups. The City welcomes examples of this being successfuly implemented in other communities Q. An economic feasibility study is underway as part of the five-year impact fee update to determine the potential for increasing impact fees. In addition, the affordable housing impact fees automatically increase at the beginning of each fiscal year with the rate of construction inflation. Most recently, in July 2022, the affordable housing impact fees went up by 15% because of the high construction inflation rate. Action 3.3.8: Right size development fees on market rate housing addresses the City to look at its Impact Fees on a regular basis. R. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. This comment is addressed in Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			W. Goals, policies, and actions should treat unhoused people with dignity and respect the communities they have built rather than allowing for City evictions under the current Homeless Encampment Management Policy. The current policies focused on unhoused people describes just enhancing operations of the EMP. **X.** Stopping Encampment Management Policy. (Policy 4.2) **Y.** Changing zoning so tiny homes or RV's can be allowed across the City. (Policy 4.3) **Z.** No mention of permanent housing and how that aligns with AFFH. (Goal 4. How this Goal AFFH section) **Z1. Missing Special Needs Groups (prioritize housing for them):** Formerly incarcerated individuals (Policy 1.1, 3.7), Single parents (not just mother's) (Policy 1.1, 3.7) young adults (Policy 1.1, 3.7) low-income non-english speakers (Policy 1.1, 3.7) youth aging out of foster care (Policy 1.1, 3.7) Black Americans (this population particularly in relation to landlord housing discrimination). (Policy 1.1, 3.7) Teachers (Policy 1.1, 3.7) **Z2. Need to integrate the following community input into Intro, Housing Needs (Appendix B) and AFFH sections (Appendix D and relevant Oakland HE sections):** Historic and Current Racism are intentional public policy choices Including intentional decrease of public housing in neighborhoods like Lower Bottoms. It was another policy choice that exacerbated racialized displacement.	S. As part of the impact fee study from Action 3.3.8, the City is studying the potential increase of onsite affordable housing instead of paying the affordable housing impact fees. Onsite requirements are already based on a percentage of the overall units, so the more units that are built the higher the number of affordable units that are required in order not to pay Affordable Housing Impact Fees. In addition, Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement will be looking at how much affordable units would be required with market rate development. **T. See response to 27-Z1** U. This comment is addressed in **Action 5.2.2:** Promote infill, transit-oriented development (TOD), and mixed use development. V. The City does not regulate homeownership sales or transfers. Policies would need to go through City Council and/or the County Assessor's Office for consideration. An anti-speculation tax is already a study item in the Housing Element (**Action 2.2.6**: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.). A direct ban on investors buying and flipping homes would likely require a change to state law. W. Each year, it is estimated that 15,786 people in 13,135 households experience homelessness in Alameda County, and approximately 60% of them reside in Oakland. The conditions at many encampments are inhumane, dangerous, often fatal. The Encampment Management policy is rooted to a shelter offer policy that places a requirement on the City to provide shelter options when closing an encampment. While improvements are still being developed in the homelessness system, when a encampment is closed, individuals at the camp are offered a shelter bed and an alternative to sleeping in a place not fit for human habitation as defined by US Department of Housing and Urban Development. X. Comment noted. This comment speaks to issues outside the scope of the 2023-2031 Housing Element Update. Y. The Oakland Construction Innovation and Expanded Housing Options Ordinance was approved by City Council on November 16, 2021, and went into effect on January 15, 2022. This Ordinance updated the City's zoning regulations to allow RVs, mobile homes, manufactured homes and tiny houses on private properties in any zone that allows residential. See more

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Facts about ethnic enclaves created in part by racial housing covenants (Chinatown, West and East Oakland). The negative impacts of California legislature's Costa Hawkins law The negative impacts in the 1990s of the tech boom and Mayor Brown's 10k market rate housing plan to make Oakland attractive for SF tech workers. Generational economic and housing discrimination impacts Oakland residents. Market force displacement from lack of sufficient tenant protections Blighted Housing Conditions: Lower income residents in West and East Oakland are facing unhealthy housing conditions ie. no heat, electrical issues, and faulty plumbing). **Mention Housing Equity Roadmap in Appendix A.** Lots of community orgs were involved in the development of that document and may not have been involved with HCD's Strategic Plan so may not see themselves reflected in the Strategic Plan. **More information/data on assessment of previous housing cycle production.** A summary of the previous HE assessment should be included in the Oakland HE (main chapters of document) for transparency and framing for the new RHNA goals. Draft HE (Appendix A) has only one sentence on total housing built in the previous cycle. Also include 1) the number of built units by affordability level in the 2015-2023 RHNA table alongside permitted, 2) Table by planning area and income level for built units, and a map of where those sites are by income level. Just Cities ended up doing this analysis with sample data.	information here: https://www.oaklandca.gov/news/2022/new-policies-expand-housing-options-on-single-family-parcels-allow-rv-residences. Z. See response to Letter #53 Z1. Existing language aligns with federal and State funding sources, allowing projects to qualify for unique "special needs" funding that would not otherwise be available. Some of the suggested prioritizations conflict with CA Prop 209 (e.g. explicitly targeting Black residents). We have focused on deepening affordability and addressing homelessness (following US Department of Housing and Urban Development target populations under homelessness) as top priorities with the limited resources we have. Within that, we have sought to encourage projects that serve a range of household needs, and with a focus on deepening affordability. We do have several layers of local preference for our affordable projects: displaced residents (code enforcement), residents within one mile of development/same council district, and then Citywide. Z2. The revised 2023-2031 Housing Element incorporates this feedback. Additional information on historic context of discriminatory housing actions and the legacy of exclusionary zoning as a significant housing constraints and barrier to affirmatively furthering fair housing. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.5D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11). Z3. The text describing the intent of Housing Action Plan Goal 5 was updated to make it more explicit that policies and actions are focused on homeownership strategies.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Z3. HAP: Goal 5 should make it more explicit that policies and actions are focused on homeownership strategies	
28	**Harvey McKeon, Carpenters Local 713**	6/10/2022	The City of Oakland Housing Element notes in its housing constraints analysis that a shortage of construction labor can significantly increase "the time necessary to complete the development of a project." Indeed, the Housing Element Update also outlines that construction workers make up a lower proportion of overall employment in Alameda County than even that of the wider Bay Area, where an acute shortage of housing production and labor is also a pressing, widespread issue. To be clear, neither Alameda county nor the City of Oakland have enough skilled, highly productive residential construction workers to build the 26,000+ units that the city of Oakland is supposed to produce over an 8 year time period. This is itself an almost 80 percent increase from the prior Housing Element cycle's RHNA goals. However, as the housing crisis in our communities has continued to deteriorate in recent years, the number of workers employed in residential building construction in Alameda County has actually decreased by 18% since 2004. A continuously shrinking residential construction workforce cannot build 26,000 units of housing in 8 years. **The City Should Bar Issuance of Building Permits Unless Each Future Residential Development of 10 units or Above has a Viable Apprenticeship Program and Local Hiring Requirements** The Carpenters propose the following additions to the Municipal Code of the City of Oakland. for any residential project larger than 10 units	Comments noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Permitting requirements in the Municipal Code of the City of Oakland A person, firm, corporation, or other entity applying for a building permit under the relevant section of the Municipal Code of the City of Oakland, California shall be required to comply with the apprenticeship, healthcare, and local hire requirements of the Housing Element and General Plan. Failure to comply with the requirements set forth in this section shall be deemed a violation of this article. Apprenticeship: For every apprenticeable craft, each general contractor and each subcontractor (at every tier for the project) will sign a certified statement under penalty of perjury that it participates in a Joint Apprenticeship Program Approved by the State of California, Division of Apprenticeship Standards OR in an apprenticeship program approved by the State of California Division of Apprenticeship Standards that has a graduation rate of 50% or higher and has graduated at least thirty (30) apprentices each consecutive year for the five (5) years immediately preceding subsmission of the pre qualification documents. The contractor or subcontractor will also maintain at least the ratio of apprentices required by California Labor Code section 1777.5. Local Hire Policy: Contractor will be required to provide documentation that the contractor will hire a minimum of twenty-five percent (25%) of staff for any job classification with more than four (4) employees employed whose primary residence,

			which is not a post office box, is, and has been, within Alameda county within 180 days of the expected date of issuance of the Notice to Proceed for the project.	
29	**Jon Gabel**	6/10/2022	1. Some of the stated goals in the Housing Element Draft are at odds with City policy, particularly with respect to Rockridge As noted in the Housing Element Draft, Chapter 1: Introduction, Page 4: "In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color. "The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities." As long as 100 years ago, Rockridge was a vibrant residential and business district. Construction of the Grove-Shafter freeway (Highway 24) and BART in the 1960's devastated the existing businesses. Half of them closed and crime was rampant. In 1973, the Rockridge Community Planning Council (RCPC) worked with the City of Oakland to rezone College Avenue and Rockridge, which led to its recovery and current prosperity. (For details, see www.PreserveRockridge.com/UpDownAndUp) The people of Rockridge responded and brought our neighborhood back. With no funding and little help from the City of Oakland,	Comments noted. Oakland Planning Staff presented the first Public Review Draft Housing Element to the Rockridge Community Planning Council on August 18, 2022. This presentation took place during the extended public review period (June 30 - September 30, 2022).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Rockridge was resurrected after the BART and Highway 24 construction was completed. Old homes, including many Craftsman houses, were preserved and restored. Rockridge funded and built its own branch library. Parental support has helped make local public schools desirable. Strong local activism has resulted in many public benefit projects. We should be lauded for this (For details, see www.PreserveRockridge.com/Accomplishments). But instead, the City of Oakland has adopted and supported policies – like SB9 - which threaten the viability of the community which rebuilt Rockridge. Quoting from the home page of www.PreserveRockridge.com: "The creation of financial incentives to tear down existing single family houses and replace them with larger market rate buildings would: "- Eventually destroy the beautiful and architecturally historic Craftsman houses that we presently have; - Push out the community that individually and collectively rebuilt itself after the construction of BART and Highway 24 right through the heart of it; - Actually be a vehicle for real estate interests to make big profits." **1. Some of the stated goals in the Housing Element Draft are at odds with City policy, particularly with respect to Rockridge** Again, from the Housing Element Draft, Pages 11-12:	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			"This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders… The goals include: "1. Protect Oakland Residents from Displacement and Prevent Homelessness: Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities. "2. Preserve and Improve Existing Housing Stock: Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions. "5. Promote Neighborhood Stability and Health: Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities." These stated goals are at odds with the actual performance of the City of Oakland. The passage of SB9 by the State of California has enabled this threat to Rockridge and to other neighborhoods throughout the State. Oakland's support of SB9 has put it in a tiny minority of California cities. The following cities supported the passage of SB9: Alameda, Oakland, and San Diego. The following cities opposed the passage of SB9: Arcata, Azusa, Bellflower, Belmont, Beverly

			(For a more detailed discussion of SB9's impact on Rockridge, see www.PreserveRockridge.com/ZoningBusting) **2. The Housing Element Draft appears to subscribe to "Trickle-down" housing theory, which is false and similar to "Trickle-down" economics** Again from the Housing Element Draft, Page 63: "POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS "Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. "The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures. "The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) and Mixed Housing Type Residential (RM) zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Type Residential generally to 3,000 square feet to remove constraints on lot splitting." I believe that there is support locally for allowing single family homes to be converted into duplexes; and ADU conversions are popular under existing statutes. But SB9-style changes which would incentivize tear-downs of existing homes in favor of market rate multiple unit dwellings – with no affordable housing required – is opposed locally by a margin of around 2 to 1. Adoption of Policy 3.2 would be counter to public sentiment here, and would be in contradiction of three of the Chapter 4: Housing Action Plan goals. The concept that building more market rate housing will result in more affordable housing is called "Trickle-down" housing theory. It is false and is equivalent to "Trickle-down" economics. "Trickle-down" economics theory, also referred to as "supply side" economics, "Reaganomics", and (by President George H.W. Bush) "voodoo" economics, is believed by most Americans to be false. However, it is still being promoted by some Republicans. "Trickle-down" housing theory, also referred to as "filtering" or "housing as opportunity", is based on the same concept as "trickle-down" economics: that increases in the supply of market rate housing will "trickle-down" to provide more affordable housing. Unlike "trickle-down" economics, "trickle-down" housing theory is being promoted by supposedly progressive Democrats. The basic fallacy of "trickle-down" housing theory is that there is not a single unified	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			housing market. To the contrary, supply and demand are different in different price ranges of housing. The "housing market" actually consists of multiple, non-intersecting sub-markets delineated by price. “Trickle-down” housing theory is not supported by econometric modeling, as shown in “The Maze of Urban Housing Markets: Theory, Evidence, and Policy” by Jerome Rothenberg et al. Unless upzoning is tied to a requirement for truly affordable housing, it serves developers at the expense of the current residents. (For a detailed discussion of this topic, see www.PreserveRockridge.com/trickledown) **3. Lack of inclusion in the process** 2.1 Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. There is an organization that represents Rockridge: the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC’s monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom meetings were held. Chapter 1: Introduction of the Housing Element Draft, Page 5 has a heading: “CHARTING AN EQUITABLE, INCLUSIVE FUTURE”	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Both the process of producing the "City of Oakland 2023-2031 Housing Element Draft - Public Review May, 2022" and its contents are not equitable. Some neighborhoods were excluded from the process. The draft promotes "Trickle-down" housing theory, which does not produce truly affordable housing but does produce profits for real-estate developers. And enabling the destruction of a neighborhood, Rockridge, that brought itself back from an earlier round of destruction is the antithesis of what a City Plan should do.	
30	**Colin Piethe**	6/10/2022	A. POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS - The City should take a much more proactive approach to expanding the role of land trusts and other collective ownership strategies that take housing either into the City's, or the community's hands. The words "explore" and "support" are passive words, and don't commit the City to changing how it does business. Merely studying and considering these strategies continues to let primarily private developers make decisions about how the City's housing stock is built, and their decisions are not in the best interests of our residents. We need to move the City away from relying on the whims of the market and let Oakland residents take collective ownership of their land and housing. Reduce the police budget and put it into other City priorities so that we have money in a dedicated housing fund to help subsidize rent for our most underserved residents living paycheck to paycheck. 32% of americans cannot afford a $400 emergency, and providing our	A. See Action 3.5.1: Support community land trusts and other shared equity models and Action 3.5.2: Support housing cooperatives, co-living, and cohousing models . Actions in Chapter 4: Housing Action Plan includes discrete implementation timelines and milestones within the eight-year Housing Element planning period. B. See the revised **Action 3.4.4**: Revise citywide parking standards in the Housing Element.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			residents with stable housing can help them stay on their feet. B. Action 3.4.3: Revise citywide parking standards - Please implement parking maximums city-wide, or with neighborhood-specific approaches. Developers still think there's a "market demand" for providing more parking than necessary, even in Downtown where we're trying to limit parking. While there's no minimum Downtown, developers are not reducing parking supply, such as at 1919 Webster, where the developer is currently proposing an extra wide driveway which will create conflicts with the future bike lane that's planned for Webster.	
31	**Alliance of Californians for Community Empowerment, Asian Pacific Environmental Network, Causa Justa :: Just Cause, the East Bay Permanent Real Estate Cooperative, the Oakland Community Land Trust, Oakland Tenants Union, PolicyLink, Public Advocates, and Urban Habitat**	6/10/2022	We urge the City of Oakland to take meaningful action in the 6th Cycle Housing Element update to address the unmet housing needs of low-income households and commit to policies and programs that affirmatively further fair housing. Specifically, we are calling on the City to commit to (1) passing a strong Tenant Opportunity to Purchase Act by 2023 and (2) reauthorizing Measure KK with significantly increased funding (at least $350 million) for anti-displacement and affordable housing preservation. These actions are essential to prevent displacement, stabilize current residents and existing communities, and preserve affordable housing for the long term Renters at risk of displacement in Oakland urgently need TOPA so that they can stay in their communities and have a voice in their housing options. Tenant Opportunity to Purchase Act (TOPA) policies give tenants and qualified organizations, like community land trusts and nonprofit affordable housing developers, the right to make the first offer and the right to match competitors' offers so that	1. COPA/TOPA policies are relatively new to the Bay Area and are complex undertakings that require careful financial, regulatory, and legal alignment. Before proceeding with a COPA/TOPA policy, staff would require direction from Council on the scope and goals of such a potential policy. Such direction has not yet been received, and as such, COPA/TOPA policy must remain a study item. 2. See **Action 3.3.18:** Implement affordable housing investments contained in Measure U. . This action has been updated to include information about Measure U, the November 2022 Infrastructure Bond that was approved andincludes $350 million for affordable housing.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			they can purchase their homes when offered for sale. As a key intervention against speculation, TOPA preserves housing as permanently affordable for future generations. TOPA expands stability and wealth-building opportunities for tenants by creating pathways to homeownership. TOPA does not require landlords to sell their properties or sell for less than market rate. Both the implementation of a strong TOPA policy and dedicated funding for preservation are essential to actually preserving units as permanently affordable. Funding to support the acquisition and rehabilitation of properties is critical to ensure that TOPA leads to meaningful outcomes. As a package, this policy coupled with much-needed preservation resources will create new permanently affordable housing in Oakland and allow Oakland residents to stay in their current homes, avoiding the disruption and trauma of displacement. Concrete commitments to pass TOPA on an urgent timeline and increase funding for affordable housing preservation will advance multiple Housing Element requirements. Among these, Oakland is required to address the housing needs of low-income households, identify specific strategies to conserve and improve affordable housing stock, and Affirmatively Further Fair Housing (AFFH). The acquisition and preservation of currently market-rate rental housing stock as permanently affordable housing is a crucial strategy that would help Oakland meet these obligations **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** "Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act," as currently	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			drafted, is both insufficient to meet the needs of low-income community members and people of color at risk of displacement and inadequate to meet state statutory requirements. Action 2.2.8 states, "Oakland will study, and if appropriate implement, a TOPA/COPA policy by 2025." **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** "Studying" TOPA is unlikely to yield any benefit, and is also unnecessary as City Staff have already been exploring this policy for years, including drafting several different Tenant/Community Opportunity to Purchase ordinances since 2019, at the direction of two different City Council Members. **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** Moreover, state law requires all Housing Element programs to have beneficial impact within the planning period, including identification of specific actions, which agency or official is responsible for those actions, and a timeline. Programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved." A recent survey of HCD reviews of draft housing actions from Southern California jurisdictions emphasizes that time bound actions with "specific commitments [from local actors], metrics, and milestones" are required and that jurisdictions are expressly discouraged from relying on vague words like "study" or "explore" as such non-specific actions are unlikely to have any real-world impact within the planning period **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline**	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Action 2.2.8 should instead commit to passing TOPA by 2023. A TOPA policy should include several key components – a right of first offer and right of first refusal for tenants (and for qualified organizations if tenants assign or waive their rights); sufficient timelines for tenants and qualified organizations to organize, negotiate a contract, secure financing, and close; technical assistance for tenants to understand the process, financing, and different ownership options; permanent affordability restrictions on all TOPA purchases; and clear enforcement mechanisms if owners of covered properties fail to comply with the law. **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** "Action 3.3.18: Reauthorize Measure KK" should commit to significantly increased funding for anti-displacement and affordable housing preservation. As currently drafted, the objective simply states, "The size of the new infrastructure bond and the amount set-aside for Affordable Housing is still being determined." It goes on to provide details about the number of units of housing preserved under Measure KK. **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** Action 3.3.18 should provide additional details and clear commitments about the reauthorization of the infrastructure bond measure, such as the size of the bond, the amount set-aside for affordable housing, and the number of housing units that will be preserved. As discussed above, state law	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			requires all Housing Element programs to include identification of specific actions, and programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved." **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** Action 3.3.18 should commit to set aside at least $350 million of the general obligation bond for anti-displacement and affordable housing preservation projects. The 2016 measure only set aside about 16 percent ($100 million) of the $600 million general obligation bond for affordable housing. Given the scope of the housing crisis in Oakland, we need more funding for resident-led and community land trust-supported preservation projects. And because low-income tenants lack the financing to purchase their own homes, this consistent funding source dedicated to preservation will be essential to make a TOPA policy effective. **TOPA and Affordable Housing Preservation Funding Address Unmet Needs of Low-Income Households** Housing Element law requires jurisdictions to develop an assessment of housing needs for all income levels and a plan to address these needs.9 A TOPA policy and enhanced affordable housing preservation funding will clearly address the identified housing needs in Oakland's draft Housing Element. According to the draft Oakland Housing Needs Assessment, "housing affordability is particularly out of reach for lower-income households." Nearly half (46.5 percent) of all renters experience some level of cost burden. 11.5 percent of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			renter occupied households experience overcrowding. Nearly half of all households in Oakland live in tracts at risk of or experiencing gentrification, while almost a quarter live in tracts susceptible to or experiencing displacement. **TOPA and Affordable Housing Preservation Funding Address Unmet Needs of Low-Income Households** TOPA is a proven strategy to address these unmet needs of low-income renter households – the high rates of cost burdens, overcrowding, and displacement risk. For households facing unaffordable rent increases, doubling up with friends and family, and paying more than 30 percent of their income on rent, the time to "study" proven anti-displacement strategies like tenant opportunity to purchase policies is long overdue. TOPA policies can only effectively address the unmet needs of low-income households when coupled with a dedicated funding source to assist in financing tenant purchases. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** Affirmatively Furthering Fair Housing (AFFH) means taking meaningful actions to address disparities in housing needs and access to opportunity, and that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Protected characteristics under California law include race, sex, national origin, and disability status. In this Housing Element Cycle, cities and counties are now required to analyze the fair housing issues, including "disproportionate housing needs" and "displacement risk" of members of protected groups, and identify and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			prioritize concrete actions to remedy these injustices. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** The draft Oakland Housing Element correctly identifies that "[m]ost of Oakland is considered vulnerable to displacement pressures."17 The City identified "disproportionate housing needs and displacement risk" as a fair housing issue with one of the contributing factors as "high rates of cost burden for renters and BIPOC individuals." One of the goals and actions the City identified to address this fair housing issue is "implement[ing] affordable housing preservation … strategies." This should be a high instead of medium priority. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** As communities of color continue to be the primary demographic affected by displacement and lack of affordable housing in Oakland based on local data, Oakland should put forward concrete commitments to pass TOPA by next year and significantly expand preservation funding to address these fair housing issues. TOPA policies effectively prevent displacement, preserve existing housing as affordable for the long term, and convert market rate housing into permanently affordable housing stock. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** As stated in Oakland's draft Housing Element, "actions that preserve the affordability of existing homes also play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the gentrification of their neighborhoods… A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			if adopted, would allow for tenants to access the wealth building and stability of benefits of homeownership." **Oakland Must Incorporate Input from Renters and Low-Income People in the Housing Element Process** Jurisdictions must make a "diligent effort [...] to achieve public participation of all economic segments of the community in the development of the housing element." During the public engagement process, low-income residents and community-based organizations representing low-income people and members of protected classes identified housing preservation as a top priority. The City highlighted that a key public participation theme that emerged to mitigate the pressures of displacement and gentrification was preserving the city's existing affordable housing stock, "including through implementation of a Community/Tenant Opportunity to Purchase Act" and "innovative solutions to maintain permanent affordability like community land trusts." As we have detailed above, "investigating" a Tenant/Community Opportunity to Purchase Act is an insufficient action to respond to this community-identified priority. **Oakland Must Incorporate Input from Renters and Low-Income People in the Housing Element Process** Our local TOPA campaign is deeply rooted in the needs of the community, as this policy aims to support tenants at risk of displacement, facilitate tenant organizing and power-building, stabilize gentrifying neighborhoods, and take property off the speculative market and place it under community control. Oakland residents need the City of Oakland to take concrete steps in the 6th Cycle Housing Element to not only	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			meet its legal obligations, but to ensure that every resident can continue to thrive and prosper here without fear of losing their homes	
32	**Elizabeth Wampler, Bay Area LISC**	6/13/2022	Do you think the City would be open to considering an overlay for all faith-owned land as part of the housing element? We can include the folks we're working with now, but I'm guessing this will up again for faith organizations in future cohorts. Re: zoning/densities for the site at 8400 Enterprise Way (City of Refuge), it looks like 5-6 stories,up to 100 units/acre, mixed-use multi-family housing and ground floor services/retail would be ideal. Between now and the fall, COR will be doing more work to further refine a more specific project vision, and I'd love to share where they land with you.	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites). In addition, the preliminary zoning reforms proposed include changing the zoning of some of these faith-owned sites to the new Regional Commercial CR-2 zone, where residential activities will be permitted. Furthermore, the new proposed Affordable Housing Overlay Zone will apply to all of these faith-owned sites. Also, see Action 4.3.6: Expand opportunities for permitting of Emergency Shelters, where the City will revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide when located on properties owned by churches, temples, synagogues, and other similar institutions approved for Community Assembly Civic Activities.
33	**TransForm**	6/13/2022	A. Oakland has been a leader in the Bay Area when it comes to smart parking policy. In 2015, the City eliminated parking minimums in the downtown zone and set parking minimums for residential and commercial development. These changes greatly reduced the financial and physical constraint posed by excessive parking mandates. Also by requiring unbundling for all developments of 10 or more units in the downtown development zone, it is clear Oakland understands the power of implementing many smart parking policies in tandem, a nuance missed by other municipalities. B. Oakland's draft 2023-2031 Housing Element includes Action 3.4.3 which will fund a continued review of parking policies after the Housing Element is enacted. We commend this proposed action but are concerned with the lack of specificity in the proposed review. The action speaks to a "review of existing residential	A. Comment noted. B. See the revised **Action 3.4.4**: Revise citywide parking standards in the Housing Element and Appendix J for a summary of zoning amendments related to parking.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			parking standards and the identifications of appropriate new standards to match long-term development and environmental goals" and, beyond a reference to exploring flexibility in parking requirements, the action lacks a concrete policy goal. With the importance of implementing smarter parking policies, especially given our climate and housing affordability crises, we at TransForm want to ensure this funded review has clear goals so it is not ignored or pushed to the next Housing Element cycle. Specifically, we encourage implementing unbundling beyond the downtown development zone, and strengthening TDM by requiring provision of transit passes and bike share memberships to each resident. To show the tremendous benefits these policies can have, we have used our GreenTRIPConnect tool to create scenarios for a potential future development site at 7000 Bancroft Ave. GreenTRIP Connect is recommended by the California Office of Planning and Research as a tool to use while developing General Plans and is especially useful during development of Housing Elements. The tool is free to use whether planning at the site or city-wide level. By implementing unbundling, and providing bikeshare and transit passes at this site, we saw a 26% decrease in parking and resident transportation savings of $988 per year. When combined with 100% affordable housing these strategies resulted in an incredible 50% reduction in driving and greenhouse gas emissions for the site, compared to the city average. If an affordable development with	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			smart parking strategies were built on this site each household would drive 5,066 less miles per year creating a greener and safer community. With a RHNA allocation of 26,251, it is essential that Oakland makes eliminating constraints to housing development such as parking a top priority for this Housing Element. Policies and investments that also maximize the amount of affordable housing will also be critical. These two crucial issues—smart parking strategies and affordable housing—go hand-in-hand and we hope the City defines concrete goals for parking reduction.	
34	**Stuart Flashman**	6/13/2022	Stuart's annotations on Appendix A - see link in column to the right Stuart's annotations on Ch 1-4 - see link in column to the right	Comments noted.
35	**Ronnie Spitzer**	6/13/2022	A. Many terms used within the document require more precise definition. The document currently contains phrases which could be construed one way within the current context but might assume an entirely different meaning in the future. One such example is “missing middle”, which is in common usage within planning circles but might be considered “jargon” to the general public even now. B. Most important, the Housing Element states the upcoming 2023-2031 RHNA allocation is already covered by the identified inventory of adequate sites within the EXISTING General Plan, even adding in a 15% buffer. No further changes should be required. Therefore, the main purpose of this document might be to incorporate the Housing Action Plan goals listed on page 11, although that point is not clearly described in the document. This should be made explicit throughout the document.	A. See Appendix H: Glossary for key terms used in the Housing Element. B. Comment noted and the role of the Housing Action Plan to affirmatively further fair housing has been made explicit throughout the document C. The 2023-2031 is Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing. The goals seek to - Reduce racial segregation and disparities in housing opportunities and outcomes - Significantly address disparities in housing needs and access to opportunity, - Replace segregated living patterns with truly integrated and balanced living patterns - Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. In addition, the City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation and fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			C. Likewise, upzoning around transit stations and along transit corridors is not required to meet 2023-2031 RHNA goals. A justification within the context of RHNA goals should be made to support statements such as, “Some initial amendments to the Land Use Element and Planning and Zoning Code along with initial zoning map changes will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing on page 14. Is this change proposed on general principles, to meet and equity goad, to encourage a more diverse mixture of housing, or some other reason? High resource areas (“high resource” itself should be precisely defined and the locations identified within the draft Element) are discussed in several places within this document. What exactly are the goals for the high resource areas; is it the exact RHNA housing mix goal or something else? Implementation of the Housing Action Plan broadly in the City’s high resource areas requires an understanding of the barriers to development there, is not cohesively described in one location within the draft. Based on studies, the largest barrier to housing production in an area such as Rockridge is the high land cost. Development of any housing other than market-rate housing is difficult to pencil out. This needs to be explicitly discussed in the HE and policies proposed to overcome this difficulty. One option proposed in the HE is an affordable housing overlay. It should be specific to each area within the City, and take into account local conditions.	market- rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each goal includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low -income households. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Another point regards tenant and anti-displacement protections explicitly removing properties with existing units from further development to avoid displacement. Those policies look very different in higher resource areas than low ones, and would require the development of vacant parcels in Rockridge. As mentioned earlier in this comment, those are few and far between. For example, much of College Ave, Claremont and portions of Upper Broadway, i.e. the arterials, already include the types of housing proposed in the HE. How those housing goals can be accomplished should be explicitly described.	
36	**Rockridge Community Planning Council**	6/13/2022	A. As a statement of general principles, the Rockridge Community Planning Council (RCPC) wants to acknowledge that the State of California is experiencing a housing crisis of historic proportions and that Oakland as a City and Rockridge as a neighborhood within the City must do their parts to ease this crisis. Furthermore, as a "high resource" neighborhood with some of the highest housing prices in the entire region, we believe it is incumbent upon us to lead by example in advocating for more housing development within our borders. We believe that welcoming significant numbers of new residents to Rockridge would be entirely consistent with our values and the cherished historically diverse character of our neighborhood. **B. Housing Sites Inventory** First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density	A. Comment noted. B. Oakland Planning Staff included the "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley in the revised Housing Element Sites Inventory. C. Comment noted. The Draft Housing Inventory Sites Interactive Map has been updated here: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d D. The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) E. Comment noted. Goal #3 has been revised to read "Close the Gap Between Affordable and Market Rate Housing Production by Expanding Affordable Housing Opportunities." F. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. G. The City will broadly apply the Affordable Housing Overlay (AHO) citywide, except for contaminated sites, protected historical sites/districts, and selected areas in the Very High Fire Hazard Severity Zone, per **Action 3.4.10** Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right , the City will create a Housing Opportunity Sites Overlay Zone to permit sites included in the Housing Element's Housing Sites Inventory (**identified in Table C-26 in Appendix C**) to develop owner-occupied and rental multifamily

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses. While some infill and densification is likely to occur organically in Rockridge's lower density residential neighborhoods, we believe the most important opportunities exist on a handful of larger sites within the neighborhood. C. The maps and tables in the draft are a little difficult to navigate, but we believe we can see the following sites identified on Figure 3-1: Housing Sites Inventory: • CCA Site • Rockridge BART Site • Triangular site at the corner of Claremont and College • A portion of the Dreyer's Ice Cream site • Wendy's site at College and Broadway D. We agree with the inclusion of these sites on the inventory but believe several other important potential housing development sites have been left out, including: • Ridge site at Broadway and Pleasant Hill (already discussed above) • Carpet store site at College and Kales • Dialysis Center site at Claremont and Clifton • DMV Site at Claremont and Cavour	uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. H. Comment noted. Staff will undertake a comprehensive update of the Land Use and Transportation Element (LUTE) and the Planning Code in Phase 2 of the General Plan Update process

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			• Chevron Station Site at Telegraph near highway 24 The omission of these sites or others yet to be identified in Rockridge contradicts a key narrative discussed in the Housing Action Plan beginning on page 60 to affirmatively further fair housing goals. The section reads: "The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive." We are aware that some of the sites on the second list above may have been omitted from the Inventory by staff because of technical guidelines governing what sorts of sites are eligible for inclusion. However, we feel strongly that we should err on the side of inclusivity due to the seriousness of the housing crisis. We would welcome an opportunity to discuss these criteria further with Planning Department staff. **E. Housing Action Plan:** <u>Five Overarching Goals</u> The first paragraph of the narrative on page 59 under Goal #3 <u>"Expand Affordable Housing Opportunities"</u> discusses the importance of the general production of housing and asserts that "thoughtfully adding housing at every level can reduce market competition for existing homes…." before going on to point out the overarching importance of making a concerted effort to increase production of homes that are	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			affordable to very-low, low and moderate income households. We agree with these sentiments but feel that the headline “Expand Affordable Housing Opportunities” is not descriptive of the Element’s stated policy goals. We recommend the headline be amended to read something like “Expand Housing Opportunities at All Income Levels, With a Very Strong Emphasis on Affordable Housing." F. Policy 3.2: Create a More Diverse Mix of Homes to Meet Community Needs This policy would be implemented in part by zoning amendments to permit more “missing middle” type small scale multi-unit housing in low density zoning districts like those found in most of Rockridge. Our own economic studies have shown that similar to SB 9 which is already in effect, these regulatory changes will result in only a small amount of change in Rockridge, where very high land values mean that demolition of most existing houses is unlikely. However, we are supportive of these policy changes for both our own neighborhood and the City as a whole. If feasible, we would like to see these zoning amendments incentivize family, senior and disabled – friendly units. This policy would also be implemented by actions taken by the City to reduce regulatory constraints to the development of ADUs and also to help older or lower-income homeowners develop ADUs. We are very supportive of these efforts and feel that they could help bring a modest number of moderately affordable units to Rockridge G. Policy 3.3: Expand Resources for the Construction of Affordable Homes We are broadly supportive of the intent and implementation ideas contained in this section,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			recognizing that while it is important to add housing at all affordability levels, by far the greatest need is for affordable units. We also recognize that construction of affordable housing is unfortunately very expensive and there is a need to find more resources and innovative ways to pay for this. In particular, we are intrigued by the concept of an "affordable housing overlay" outlined in action 3.3.5. We would be interested in exploring this idea along College Avenue as well as on some or all of the opportunity sites discussed above H. Lastly, we think there is a role to play for measures that don't involve new construction, such as discouraging holding of units off the rental market and condo conversions. In addition, the City should look at amending the CN-1 zoning to prohibit conversions of upper floor residential units to non-residential uses.	
37	**Oakland Heritage Alliance**	6/13/2022	A. Some of the upzoning proposals could adversely affect historic properties, but they are presented very generally in the draft with the intent of being fleshed out as part of the upcoming zoning amendments and objective design review standards. We therefore are considering these implementing documents as the appropriate vehicles for evaluating the impact of housing element proposals on historic properties and look forward to opportunities for early input on these documents B. It is good that "landmarks/historic properties" are included among the constraints considered in Figure C-6 regarding Supplemental Housing Sites for AFFH. However, Figure C-6 does not include Areas of Secondary Importance (ASIs) as defined in the Historic Preservation Element and Oakland Cultural	A. Comment noted. B. Areas of Secondary Importance (ASIs) are not included in Figure C-6, but the City is considering how ASIs will be impacted with regard to the Housing Element and development of the proposed zoning reforms and objective design standards.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Heritage Survey. We therefore request that ASIs be reflected in Figure C-6 and that the housing element and follow up zoning amendments and objective design review standards be structured to avoid adverse impacts on ASIs as well as other historic properties.	
38	**Kirk Peterson**	6/13/2022	A. Affordable housing is housing very hard to find for low income families. The Housing Element should promote the construction of more affordable/subsidized units that will accommodate families, as well as families that can afford to occupy market rate housing. I'd say a family is a group of more than three related individuals, possibly including multiple generations and generally including children, or we can simply say a related group that needs three bedrooms. There are legal definitions. It's easier and more lucrative to build studio, or one or two bedroom units. Many (most?) landlords would rather rent to adults only, as the wear and tear on the unit will probably be less, and these people are more likely to move out, and not stay for a longtime. In addition to that, there is likely to be a loss of family-sized dwellings, as existing single family houses are divided into apartments, or demolished to make way for multi-unit structures with small units. It would be negligent of the City to ignore the possibility of significant demographic changes related to the Housing Element. Until such potential changes are examined it cannot be determined if they are good or not, or consistent with the goals of the City. It is important that the Housing Element include language to help promote housing for families. This means numbers of people housed, not numbers of units. B. When the draft talks about 'opportunity sites' it seems to only look at large parcels that could	A. Comment noted. This comment is addressed in revised **Action 3.7.5:** Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes. B. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. C. Comment noted. Actions in Goal 5 Policy 5.1 Sustain Affordable First-Time Homeownership Incentives address this comment, as well as actions in Goals 1 and 2, which are designed to protect homeowners from displacement pressures and provide investments to help homeowners preserve and improve their homes. D. Comment noted. Staff will study these issues as part of the Land Use and Transportation Element (LUTE) and Open Space, Conservation and Recreation Element updates, as well as through the new Infrastructure / Facilities Element in Phase 2 of the General Plan Update process.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			hold many units, of which there are relatively few in most neighborhoods. These are often owned by entities that have no interest in building housing. I would like the Element to look at our boulevards and arterial streets as 'opportunity sites' that could yield a large number of units. There are about fifty miles of such streets, with thousands of small parcels. The element should look at how to promote development of the smaller (up to five story) multi-unit buildings along the street that are already zoned for it. This would be a more 'organic' sort of growth that could be more 'Oaklandish' and neighborhood-friendly than the huge boxes most developers want to build. The city should encourage 'mom and pop' local development done by local people who own small parcels. The Housing Element should look at how the City can facilitate such development, instead of devoting so much effort to helping corporations build big lucrative projects. C. Home ownership has many benefits for individuals and cities. The Element should address the importance of home ownership. People who are literally invested in Oakland are most likely to be involved in and contributing to the community over time, which is good for all. The City should promote home ownership, and facilitate projects that allow for it. This could include requiring that projects include for sale units, possibly with developer-subsidized down payments or financing assistance. Such a policy would be a contrast to historic institutional exclusionary practice. D. To what extent is planning considering the effects of lots of new development on the character and quality of life for Oakland citizens. present and future. I have seen the negative effects of 'redevelopment ' in Oakland	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			in person. The Draft does not seem to include much on possible widespread cumulative negative impacts on cultural and natural resources. In the denser more crowded Oakland will the increase in housing result in diminishing the quality of and access to other things cities need. Will there be a commensurate increase of parks and open space, or libraries. or accessibility to historic sites and districts, or their expansion. Our present citizens care about these things. To what extent shall we socialize the risk of the loss or diminishment of such things, while the economic benefit of development remains private? Meeting a state quota for housing is a bureaucratic legal goal - but it cannot be a lived reality	
39	**BART**	6/13/2022	A. We also appreciate the City of Oakland's (City) interest in including BART's land in its 2023-2031 Housing Element, as shown in Appendix C: Sites Inventory of the draft Housing Element. As the City is aware, BART's Transit-Oriented Development Program Work Plan currently does not categorize all of the BART properties that are listed in Appendix C: Sites Inventory as 'Near-term (project initiation in 2020-2025)'. It is our collective goal to deliver as much housing near transit as possible, and BART would like to support local jurisdictions to achieve the Bay Area's regional housing goals. However, BART has limited staffing resources and few funding sources for the infrastructure - most notably parking replacement - that is often required to free-up space on BART's land for development. Given current resources, it will be challenging for BART to support	A. Comment noted. B. These sites have been removed from the Revised 2023-2031 Housing Element. C. Comment noted. The City has been working closely with BART during the 2023-2031 Housing Element Update. In addition, **Action 5.2.2** also promotes infill, transit-oriented development (TOD), and mixed-use development and directs staff to work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. The City has applied for the State Prohousing Designation and is awaiting final decision.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development of all the land that has been planned for inclusion in BART partner jurisdictions' Housing Elements during the 2023-2031 upcoming cycle. B. In addition, several BART properties that are listed in Appendix C: Sites Inventory are not suitable for development due to proximity to BART infrastructure and associated structural issues. Please see attached for a detailed analysis of each of BART properties. [see link to comment letter p.4-5 in column to the right] C. If conditions have changed since the last assessment in 2019/2020, the timeframe for TOD development in station areas can be updated in BART's TOD Work Plan. Key considerations by BART for prioritizing development projects are 1) availability of local funding and resources to support development, including staff support and funding for community outreach, affordable housing, and infrastructure, and 2) seamless coordination with local jurisdiction staff. Jurisdictions with station areas that are currently listed in BART's TOD Work Plan timeframes of Mid-term or Long-term need to meet the following conditions to be considered for prioritization: **1.Local Support and Funding:** First and foremost, we see TOD projects on our property not as solely a BART project, but a BART/local jurisdiction-partnership. BART TOD projects are civic destinations, and transformative to the community, often including off-site improvements. The City must be committed to working closely with BART to find funds and resources to facilitate community outreach, discussions, and decisions on TOD development and area-wide parking. It takes	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			several years of pre-development work prior to issuance of a RFP for developers, so any development of BART land within the planning period of 2023-2031 must dedicate sufficient BART and City staff time to advance a TOD project within a reasonable timeframe. **2.Prohousing Designation:** BART will prioritize projects in jurisdictions that are pursuing a Prohousing Designation by California Department of Housing and Community Development. We may advance housing development on BART's property located within a Prohousing Designation even if other conditions have not yet been met. **3.Station Access and Parking Strategies:** Maintaining access to the station is important for the City and region. BART will work with City staff and developers to develop and implement a Station Access Plan that identifies potential improvement projects to enhance pedestrian, bicycle, transit, and vehicular access. The City should plan for and implement a locally led parking resource assessment and management plan for at least ¼-mile radius around the station area. It should identify parking opportunities for BART riders that would minimize the number of spaces to be included in the TOD project and address spillover concerns by neighbors. BART staff will work with the jurisdiction to provide support and guidance as needed but will not be able to lead the development and implementation of a parking management plan. **4.Environmental Studies:** The City should ensure that environmental studies associated with the 2023-2031 Housing Element assume a minimum density of 75 dwelling units per acre for BART's land that is likely to be developed	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			within the planning period. **5. BART Policies and Standards:** Any development on BART's land is subject to BART's review procedures and approvals and shall follow relevant guidelines, policies, and regulations. The jurisdiction should commit to support and meet BART's policies andstandards. Most of these policies and are summarized on our TOD Guidelines and Procedures webpage.	
40	**EBHO**	6/13/2022	A. The draft document, which runs to more than 800 pages including all its appendices, contains no executive summary or other guide. At a minimum, both the draft and final document should include a summary narrative that outlines the key findings of the evaluation of past performance, the results of the Fair Housing Assessment including identification of the most important underlying factors to be addressed, the identified governmental and non-governmental constrains to housing, a summary of the site inventory that quantifies and maps key issues such as the geographic distribution or concentration of sites – particularly those for lower incomehouseholds, and key elements of the action plan including a listing that highlights new programs and policies. B. The presentation of the draft Housing Element to both Planning Commission and City Council was subsumed within a much larger information report on the overall update of the City's General Plan. As such it wasn't clear from the lengthy title of the agenda item that this was the opportunity to provide comments on the Housing Element. At those meetings, the presentation focused on the update process but did not include any information on the actual content of the document. It wasn't until we	A. The revised 2023-2031 Housing Element includes an Executive Summary. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions in blue text. B. Comment noted. The Draft Housing Element was presented to the Planning Commission on June 1, 2022. Staff also presented to City Council on October 18, 2022, and Planning Commission on October 19, 2022, to review the findings letter from State HCD. C. Appendix A: Evaluation of the 2015-2023 Housing Element includes a discussion on shortfalls in producing affordable housing D. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing. In addition, the 2023-2031 Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing. The goals seek to: - Reduce racial segregation and disparities in housing opportunities and outcomes - Significantly address disparities in housing needs and access to opportunity, - Replace segregated living patterns with truly integrated and balanced living patterns - Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation and fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between market- rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			commented on this that a summary presentation was finally made available halfway through the public comment period. We do note that the Planning Commission scheduled a subsequent meeting to review the draft in more detail. C. Evaluation of Past Performance As noted in Appendix A, performance in meeting the RHNA goals of the 5th Cycle Housing Element has been mixed. From 2015 through 2021 (7 years out of the 8-year planning period), the City has issued permits for more units than its total RHNA. However, as the Draft notes, this has been disproportionately concentrated in the Above-Moderate Income category, where the City has already issued permits for nearly 200% of its RHNA, while falling far short for Very Low, Low and Moderate Income. The result has been a "housing balance ratio" of one unit of lower income (VLI+ LI) housing for every eight units of Above Moderate-Incomehousing, despite a RHNA goal of oneunit of lower income housing for every 1.9 units of Above Moderate-Income housing. Oakland has long passed the point where it needs to make special efforts to attract market-rate development. Over the 3rdand 4thhousing element cycles(1999-2014), Oakland permittedan average of just under 700 units per year, rarely exceeding 1,000 in a year, and of which 73% were Above Moderate Income. In the currentcycle, the average has been 2,400 permits per year, with only two years below 1,000, of which 88% were Above Moderate Income. In light of this record, the evaluation of past	goal includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low -income households. E. The interactive Sites Inventory Map includes sites, Council Districts, and affordability level and is available at: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d F. The Excel table was updated on the City's Housing Element website on August 9, 2022. Please see the revised table here: https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element. G. The revised 2023-2031 Housing Element incorporates this feedback and includes an updated analysis of nonvacant sites H. Based on a recent online survey conducted by the City as well as data provided by the Association of Bay Area Governments, the Appendix C Sites Inventory estimates that ADUs produced from 2023 to 2031 will have the following projected affordability levels (See Table C-8): 35% affordable to very-low-income households, 35% affordable to low-income households, and 30% affordable to moderate-income households. Based on a total projected ADU production of 1,978 units through 2031, the City has estimated that ADU construction will result in the creation of 692 very-low-income units, 692 low-income units, and 593 moderate-income units. To ensure that Oakland's ADU production aligns with these projections, the City has added a NEW Action 3.2.6: Monitor Affordability of Permitted ADUs to identify any additional actions in the event of a shortfall. I. The revised 2023-2031 Housing Element incorporates this feedback. The revised 2023-2031 Housing Element includes additional sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) J. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. K. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. The revised 2023-2031 Housing Element includes additional sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			performance should take a harder look at the reasons for this disproportionality. In particular, the City should assess the need for continuing to incentivize production of market-rate housing without conditioning such incentives on production of affordable units or payments of appropriate fees to the Affordable Housing Trust Fund, particularly since the 6th cycle RHNA requires not only a much greater numberof units, but also a higher proportion of lower income units. The evaluation needs to not just provide data on past performance, it should include analysis of what is working and what is not, the reasons for this performance, and a serious consideration of which programs need to be discontinued or seriously modified. D. Affimatively Furthering Fair Housing Despite having completed a Fair Housing Assessment in Appendix D, there still appears to be a disconnect between this assessment and the housing element itself. In the Introduction chapter, the City refers to "an affirmatively furthering fair housing analysis (AFFH), which guides the analysis of each set of requirements." Similarly, Appendix D is labeled as the "Affirmatively Furthering Fair Housing Draft" but is primarily a fair housing analysis. The new statutory requirement to affirmatively further fair housing requires more than an analysis of fair housing issues. The analysis must identify and prioritize the key factors contributing to segregation and disparities in housing opportunity and conditions, and then the City must develop both the site inventory and the action plan in ways that address these factors, along with clear metrics for determining whether those actions result in real	L. See Action 5.2.8: Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with NEW Action 5.2.9: Prioritize investments and improvements to meet the needs of low-resourced and disproportionately burdened communities. M. Comment received. N. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes discrete implementation timelines and milestones within the 8-year planning period. O. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes updated milestones and objectives for programs and policies, especially actions that address fair housing issues, within the 8-year planning period. P. In the revised 2023-2031 Housing Element, Goal 3 of the Housing Action Plan is reframed to state "Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities." In addition, "Reduce racial segregation and racial disparities in housing opportunities and outcomes" is explicitly called out as a priority in the introduction to the Housing Action Plan. Q-1. See the revised Action 2.2.5: Extend local replacement unit provisions. Q-2: Comment noted. Q-3: COPA/TOPA policies are relatively new to the Bay Area and are complex undertakings that require careful financial, regulatory, and legal alignment. Before proceeding with a COPA/TOPA policy, staff would require direction from Council on the scope and goals of such a potential policy. Such direction has not yet been received, and as such, COPA/TOPA policy must remain a study item. Q-4: City staff dispose of public land according to Council direction and State and local law, specifically the State Surplus Land Act (SLA) and the Oakland Municipal Code (OMC) (see Chapter 2.42 which governs the disposition of real property). Decisions about the disposition of a particular parcel are made by City Council action, consistent with the requirements of the OMC Q-5: See revised Action 3.3.3 Q-6 See revised Action 3.3.5: Implement an Affordable Housing Overlay. Q-7: See updated timeline to Action 3.3.8: Right-sized development fees on market-rate developments. Q-8: See revised Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			improvements. It is not enough to determine after the fact whether an AFFH-neutral selection process results in non-discriminatory outcomes. The requirement to affirmatively further fair housing must fully inform the site inventory and action plan. We encourage the City to review HCD's April 2020 AFFH Memo (AB 686 Summary of Requirements in Housing Law)and its April 2021 AFFH Guidance, which includes detailed explanations of specific requirements for housing elements, to ensure it is fully meeting these requirements The Fair Housing analysis does not consider whether the City's zoning contributes to enduring patterns of racial segregation. The word "zoning" barely appears in the analysis, and while the Draft Housing Element notes that most of the City's residentially zoned land is zoned for single-family housing, this is not related back to patterns of racial segregation. Not surprisingly, in the absence of such an analysis, the City conducted its site inventory with the aim of meeting its RHNA numbers without having to rezone any sites. The Housing Element should include an analysis of the extent to which existing zoning is a barrier and a set of strategies to overcome this barrier through strategic rezoning. Table D-9 provides a brief summary of fair housing issues, contributing factors and proposed actions, but the proposed actions are fairly general and not tied back to the action plan. We recommend that Table D-9 be revised to explicitly cross-reference specific actions described in the action plan itself. Table D-9 notes as one issue that "Affordable housing is limited by location and housing type," but there's little examination of the reasons for this. The table recommends that	Q-9: On May 17, 2022, Oakland City Council directed the City Administration to study the creation and implementation of a citywide enhanced infrastructure financing district (EIFD) funding affordable housing and infrastructure improvements. Staff will be conducting a feasibility study of various EIFD scenarios and anticipate that a final recommendation will be provided by Fiscal Year 2024. See Action 3.3.10: Citywide Enhanced Infrastructure Financing District (EIFD). Q-11: Comment noted. Q-12: Please see the revised Action 3.3.15: Continue and expand density bonus incentives. The City will solicit additional ideas for incentives and expansion of the density bonus program and gather feedback from Planning Commission and City Council, as well, during a mid-cycle Housing Element assessment. Q-13: Planning Staff are exploring this with the Department of Finance. Q-14: Action 3.3.18: Implement affordable housing investments contained in Measure U has been updated to include information about Measure U, the November 2022 Infrastructure Bond that, if approved, will include $350 million for affordable housing. Q-15: See revised Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right. The City will create a Housing Opportunity Sites Overlay Zone to permit all sites included in the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to develop owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. Q-16: Comment noted Q-17: See Action 5.2.8: Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with NEW Action 5.2.9: Prioritize investments and improvements to meet the needs of low-resourced and disproportionately burdened communities.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			this be addressed primarily throughmobility strategies including expanded use of Housing Choice Vouchers but fails to note that in many of the higher opportunity areas,rents are far higher than what's allowed for with the Housing Choice Voucher payment standards. While there is a vague call to "eliminatesingle-family zoning," it's unclear if this refers to allowing 2-4 units buildings in single-family zones, or if it means expanding multifamily zoning at densities of 30 du/acre or greater. Finally, while it is proposed that affordable housing be increased in high opportunity areas, there's no specific program referenced here by which this might be achieved, particularly given the limited number of lower income sites identified in high opportunity areas. E. Site Inventory The site map is at a scale that makes it difficult to adequately see whether these is an equitable geographic distribution of sites, particularly sites for lower income housing. The City should provide a series of maps for each planning area or council districtin addition to a single citywide map. The site maps should be overlaid on maps of key demographic indicators, particularly racial concentrations and concentrations of high-and low-incomehouseholds. It would be especially useful to map sites against areas of concentration of white residents vs concentrations of people of color. The City recently provided links to an interactive GIS map. This map would also benefit from additional layers showing key demographic indicators including race and income. Sites should be color coded for income level (lower income, moderate income, above moderate income). Rather than shading the	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			parcels, which at best indicates the relative size of parcels, sites should be indicate with dots of different sizes representing the number of units that can be accommodated on the site. F. The Excel table for the site inventory has modified the total capacity column and eliminated the formula that is in the State's template spreadsheet and replaced it with actual numbers. The result is that in a number of places the entry for "total capacity"does not equal the sum of the columns for lower, moderate and above-moderate income capacity. This should be corrected, since at present the sum of the total capacity column exceeds the sum of the individual columns. G. The inventory should provide more detail on the current use of non-vacant sites. In particular, while the inventory identifies whether non-vacant sites have office, commercial, or other uses, it does not distinguish between sites with active uses and those with vacant buildings. That information is needed to assess the likelihood that a site will become available during the planning period. H. The projection that roughly 90% of all new ADUs will be affordable to lower incomehouseholds is significantly different from the regional ADU affordability distribution provided by ABAG (see Appendix C, page 25). The City has relied on a limited (and not necessarily representative) survey that was conducted as part of a City-commissioned report. Data on ADU rental rates is based on just 56 responses to this question. It indicated that the average rent for anexisting ADUis $1,112. However, one third of the responses indicated that their ADUs were being occupied rent free. As these units are likely being provided to family members, without further	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			data it cannot be assumed that these units are available to and occupied by low-income households. The calculation of average rents should remove the zero rent units from the calculation. Further evidence that the $1,112 figure is unlikely to apply to newly created ADUs is contained in this same City-commissioned report. That study includes model pro-formas for several ADU development scenarios and uses rents that range between $2,360 and $3,029 per month. The City should re-evaluate its projections of affordability level for newly created ADUs and revise the site inventory accordingly. I. There is little discussion or analysis of how the inventory does or doesn't change patterns of segregation. Table C-19 on page C-83 shows that for the preliminary site inventory, 26.1%of lowerincome capacity is located in moderate to highest resource tracts, while 36.4% of above moderate-income capacity is located in these tracts. On its face this does not appear to further fair housing. While the City has provided additional AFFH sites, it has not indicated the extent to which those supplemental sites would offset the disparity described above. J. The geographic distribution of sites is not surprising in light of the City's decision to focus only on opportunity sites that require no rezoning, and to rule out in advance any rezoning of low-density areas to accommodate some of the lower income portion of the RHNA. While the City proposes, outside of the site inventory, to consider some future rezoning, the areas that will be studied are not identified and it appears that the focus will be more on	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			accommodating “missing middle” housing types that cannot be assumed necessarily to be affordable to lower income households. K. The City explains the relatively small proportion of lower income sites in high and moderate resource areas by noting that significant portions of these areas are also very high fire hazard or seismic hazard areas, which are located primarily in the most affluent portions of the city with the greatest degree of racial segregation. At the same time, other hazards such as industrial pollution, poor air quality, or sea level rise, were not considered disqualifying. The result is a set of criteria that by definition rule out the majority of high opportunity areas and areas of concentration of affluence and white population. L. The City justifies concentration of affordable housing in lower opportunity areas as a strategy of investment in these areas to prevent displacement. However, State guidance is clear that this needs to be coupled with place-based community development strategies that involve investments not only in housing, but alsoin enhanced infrastructure, services, schools, jobs, and other community needs that serve the existing population in at-risk neighborhoods. While the Draft Housing Element makes reference to the need for such investments, it does not provide adequate detail on specific programs, strategies or non-housing investments to be pursued, the anticipated outcomes, or any metrics for determining if such programs are effective in stabilizing at-risk communities. M. Action Plan Much of the Action Plan consists of continuation of policies and programs already in place. Since it’s clear that existing policies have	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			resulted in over-production of market-rate housing and under-production of lower income housing, the City must consider how existing programs can be recalibrated to produce better results. N. Where new programs are mentioned, they are generally described with terms such as “consider,” “study”, or “evaluate”. These are not actions in themselves. HCD has been clear in its guidance and in reviews of draft housing elements in other regions that these kinds of general statementsare not sufficient. In its reviewo f Los Angeles’ Draft Housing Element, HCD clearly stated: Programs must commit to completing an action that will have an actual impact on housing such as “amend,” “revise,” or “establish” While we would like to see the Housing Element itself be the vehicle for new housing policies, where this is not possible then at a minimum the Housing Element should commit to bringing concrete legislation before the City Council for adoption by a specific date. Moreover, these dates should be in the firstfew years of the housingelement. Postponing these studies to the later years means that many of these new programs, if implementedat all, will have limited impact in the housing elementcycle. This is not a new issue. There are a number of policies and programs that the City has pledged to “consider” for multiple housing element cycles without ever having a full policy discussion and proposed legislation before the City Council. For this update, the City should commit to move beyond this	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			In many cases the time frames are vague. Specific milestones and deadlines for completion should be called out. O. There is no clear prioritization of the many actions contained in the Action Plan. Which actions are most important to achievement of the City's goals and objectives? For the many new programs and policies that the City will "consider" or "study," which are the most important and what resources will be available to ensure that they are completed in a timely fashion? Anticipated outcomes and metrics are insufficient. Many of the action items have no quantified objectives and it is unclear what outcomes are anticipated or how the effectiveness of these actions, particularly in addressing fair housing issues, will be assessed. While the Action Plan discusses how the City's major goals address AFFH, it doesn't clearly identify specific actions that address priority factors for AFFH. HCD's guidance on affirmatively furthering fair housing is clear that jurisdictions must identify underlying factors that create and maintain segregations and inequitable opportunities and outcomes, and then select a number of factors that are the highest priority and ensure that the site inventory and action plan are clearly related back to these priority factors. P. The City should not take actions that incentivize market-rate housing without requiring affordability in return. In the past, many policies that could be used to incentivize affordable housing have been implemented across the board without any affordability requirements, leaving the City with limited options for incentives specifically to produce affordable housing. After two decades of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			significant above-moderate income housing productiondating back to the “10K” plan, it’s clear that such incentives are no longer needed. Rather than continuing to “expand housing for all economic levels” the housing element action plan needs to focus on the most deficient areas and therefore must prioritize actions that will improve performance in creating and preserving housing for the lowest income individuals, including persons who are currently unhoused. Q-1 Action 2.2.5 The City should provide a specific date for adopting SB 330 anti-demolition protections. Since this is a matter of bringing the City’s code into compliance this should be implemented by the end of 2023 at the latest, including extending it beyond SB 330’s sunset date. Q-2: Action 2.2.6 We strongly support efforts to reduce speculation in housing through both a speculation tax and adoption of Tenant Opportunity to Purchase Act/Community Opportunity to Purchase Act (TOPA/COPA) legislation. Q-3: Action 2.2.8.In place of vague action to study a possible TOPA/COPA policy, the City should commit to bringing a TOPA/COPA ordinance before the City Council for adoption within the first year of the housing element. Q-4 Action 3.3.1 Any strategy regarding use of public land should start with adoption of a public land disposition ordinance consistent with the policy framework adopted by the City Council in December 2018. If the City is now proposing to abandon that framework and take a different approach, that should be clearly stated and presented to the City Council as a change in adopted policy.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Q-5: Action 3.3.3 This action speaks primarily to provision of rental assistance but includes as part of its objective thestatement that “100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle.” This statement should be included in action 1.1.5, which currently contains no actual commitment. Q-6: Action 3.3.5 We strongly support an Affordable Housing overlay that provides by-right approval of 100% affordable housing projects citywide, wherever zoning currently permits it. We also support identifying specific incentives and bonuses that could be part of such an overlay, but that process should not delay the immediate adoption and implementation of a by-right overlay. Q-7: Action 3.3.8 We support revision of the Affordable Housing and Jobs/Housing Impact Fee programs, with particular attention to the amount and timing of the fee and recalibration of the on-site alternative compliance option to provide an outcome (number and affordabilityof units) comparable to what would be achieved through investment of the fee in affordable housing. This analysis was supposed to have been completed by the end of 2021 for presentation to the City Council in early 2022 and was to involve community participation throughout theprocess and not just in response to a completed study. This has not been the case. The City should commit to a firm date for revision of these ordinances, and should ensure that all evaluations and assessments include meaningful community involvement. Q-8: Action 3.3.9 We support deferral or reduction of planning and building fees to increase the feasibility and reduce the cost of producing affordable housing. In particular, we	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			support deferring or reducing building permit fees. For City-financed affordable housing, fee payments could be deferred until a certificate of occupancy is issued, as the City has ample leverage to ensure that those fees will be paid. Q-9: Action 3.3.10 We support the creation of a Citywide Enhanced Infrastructure Financing District (EIFD) with a primary goal of providing additional funding resources for affordable housing. Q-11: Action 3.3.12 We support continuation of the Acquisitionand Conversion to Affordable Housing (ACAH) program, including support for community land trusts and limited equity cooperatives in addition to traditional nonprofit housing. Q-12: 3.3.15: We support continuation of density bonus incentives, but call on the city to evaluate any barriers to a broader use of the density bonus program, including information on what developers have shared regarding how this program might be improved or expanded. His evaluation should also distinguish between use of density bonus for 100% affordable projects vs predominately market-rate projects. Q-13: Action 3.3.16 We support increasing the Real Estate Transfer Tax on higher end transactions including dedication of that increased revenue for programs that produce, preserve and protect affordable housing opportunities. We urge the City to move forward to place such an item on the November 2024 ballot to maximize the likelihood of passage. Q-14: Action 3.3.18 We strongly support extension of the Measure KK infrastructure and affordable housing bond, with asubstantial increase in the share and amount devoted to housing production and preservation, at a scale	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			that will make a significant impact on Oakland's pressing affordable housing needs.This is an urgent priority and should be implemented as rapidly as possible. Q-15: Action 3.4.10 For inventory sites that are carried over from previous housing element cycles, the City must commit to actually rezone those sites –perhaps through use of a zoning overlay – that provides for by-right approval on these sites if a minimumof 20 percent of the units will be affordable to lower-income households. Ideally this should be implemented as part of the Housing Element itself. If not, then the Housing Element must include a specific rezoning program for these sites. Q16: Action 3.6.4 We support active encouragement of use of SB 35 to provide by-right approval for 100% affordable housing, including training and direction to Planning staff that this should be affirmatively pursued. Q-17: Action 5.2.8 We have substantial concerns that, given the limited targeting of high opportunity neighborhoods in the site inventory, a "mixed-income" strategy in areas of concentration may lead to more gentrification and displacement. The City must ensure that a better mix of incomes in a neighborhood is not simply capturing a point in time where a neighborhood transition is actually taking place. We note that despite acknowledging the need for place-based strategies to stabilize and improve low resource areas, these programs are not included in the Action Plan.	
41	**WOCAP Steering Committee**	6/14/2022	**A. Indoor air pollution:** We are glad to see references to indoor air pollution remediation in the Housing Element, for existing homes.	A. See updates to **Action 2.1.6:** Increased Funding for Improved Indoor Air Quality B. See **Action 5.2.5**: Encourage earthquake-resilient housing

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			From an equity, resource and health perspective it makes sense to preserve existing housing wherever possible. We know that indoor air pollution is a significant health burden on Oakland residents, particularly heavy for people who suffer from other air pollution exposure burdens. We urge the City to add specifics about how it will undertake the objective of improving air pollution exposure and how that effort will be targeted. We suggest that the city commit to work with Alameda County Health Department, local hospitals, nonprofits and others to specifically target these efforts toward families with asthmatic children, for the purpose of reducing emergency room visits for treatment of asthma and other lung diseases. There was a program operating several years ago called "Pay for Success" that pioneered an approach to identify these families, coordinate housing improvement services and secure innovative forms of funding from health care providers. That program may have information or lessons that could help the City establish a larger effort. **Unintended consequences:** Actions should be more explicit about steps to avoid inequitable and unintended consequences and steps to overcome access barriers (ex. Many times do not have electrical systems that will accommodate filtration, how will people be protected from utility/PGE imposed fees resulting from electrification) **Strengthen Wording:** Actions related to air quality are currently worded too vaguely and use very weak language, and at some points don't propose any new actions. This would be fine if air quality wasn't a serious issue, however we know there are serious air quality issues in many areas that lead to elevated rates	C. Comment noted. See updates to **Action 2.1.2:** Promote Healthy Homes Lead-Safe Housing and **Action 5.2.6:** Encourage Climate Resilient Housing. D. The City recommends that the definition of a contaminated site is not expanded to include air pollution. Air pollution is too transitory to assign a "site" to it. More broadly, the definition of contaminated sites can be addressed through the Citywide Vulnerability Assessment & Comprehensive Adaptation Plan (ECAP A-3). Several long-term solutions to address unhealthy levels of air pollution in low income communities of color are provided through the Zero Emissions Vehicle Plan (i.e., reducing truck pollution through the transition to 100% zero-emission vehicles), and to a latter extent will be included in the Building Electrification Roadmap. Improving building envelopes and indoor air filtration (addressed in the Building Electrification Roadmap) are critical interim steps to protect most-impacted communities - as are vegetated buffers. However, the City currently does not have funding nor organizational placement for vegetated buffer work. **Action 5.2.3:** Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects would only pursue grant and loan programs and other technical assistance programs to support the contamination characterization and remediation costs. Pursuing funding for this program would rely upon leadership from the Sustainability and Resilience Division of the City Administrator's Office, as well as the Planning & Building Department and Economic and Workforce Development Department. Historically, the Environmental Services Division of Oakland Public Works has only worked on obtaining grants for City-owned properties or public/private partnerships where the City was listed as a property owner. F. AHSC funding is not used for existing buildings. G. Comment noted H. Comment noted. I. Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			of asthma and other health issues. For example 2.1.1, and 2.1.2 use the phrase "the city will continue to..." implying that they will not be doing anything new. We expect the city to step up and find additional ways to expand this important work. Additionally, 2.1.6 says the "city will explore..." explore feels like weak language - please make a more serious commitment to this important action **2.1.6 Explore funding for improved indoor air quality:** - Ways to strengthen this language could include: "Increase funding" "Create dedicated funding" "match funding" "secure funding". - Some requirements are triggered when property changes hands (ex. 1031 swap). Or at the point of vacancy (new tenant). - Additionally why just "federal and state $", why not all sorts of sources of funds, from the City, creative philanthropic partners (e.g. the California Endowment), community benefits funds from the health care sector, etc. **B. 2.1.1 Support home rehabilitation programs:** - Can this also include rehab for soft story buildings. We want to ensure that if a big earthquake hits, we aren't in danger of losing precious housing stock. **C. 2.1.2 Promote healthy homes and lead-safe housing AND 5.2.5 Encourage climate-resilient housing.** **- Get Gas Out of Residential Buildings:** Recent research shows that indoor gas appliances emit unhealthy levels of air pollution, sometimes in concentrations much higher than outdoor air pollution. Gas use in buildings regularly causes explosions - particularly in older buildings and from aging gas infrastructure. The City's ECAP rightly establishes a goal to gradually remove	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			fossil gas from existing buildings to be replaced with heath pump technology. We understand that the City Staff is developing a Building Electrification Roadmap The Housing Element of the General Plan should contain specific actions to implement this ECAP objective and fully actualize the Roadmap. This is important from a public health and safety perspective, will help the City reduce greenhouse gas emissions, and in the long run lower the cost of residential heating, cooling and hot water services for Oakland residents. - Need to protect people from additional charges from PG&E related to decommissioning or removing gas infrastructure from existing homes - For 2.1.2, we'd encourage the city to meet with and partner with Alameda County Department of Public Health's Asthma Start Program and the Alameda County Healthy Homes Department to collaborate in future efforts. - We hope the city can think through what happens for existing buildings if they switch to electric? How can we prevent an owner from switching back to gas in the future? Please better define what it would mean to remove natural gas. Also, it might be appropriate to connect with the Fire Department and understand if they have a role? How will OFD get educated around the removal of natural gas since this will reduce the risk of explosions and fires. **D. Remediation of Contaminated Sites:** The Housing Element rightly contains planning to remediate environmentally contaminated sites. Historically this has meant cleanup of hazardous waste dump sites. That work certainly needs to continue. But there is another form of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			contamination that the City should address in this plan. Due to deacdes of structural racism, many low income people and communities of color live in or near places that experience unhealthy levels of air pollution. This is evident near the Port of Oakland, near freeways and places with high concentrations of heavy duty diesel powered vehicle traffic. We urge the City to expand the definition of contaminated sites to include neighborhoods exposed to high levels of air pollution. This will help prioritize remediation efforts such as retrofitting existing housing with indoor air filtration. Funding could be used to support and incentivise housing upgrades in highly polluted locations. Also consider that in West Oakland the City is working with businesses (CASS and CSW) to relocate out of the main neighborhood. This would open up some VERY large contaminated parcels for potential housing development and neighborhood amenities. These comments relate to - 3.2.3 Promote flexibility in adaptive reuse to increase the housing stock - 5.2.3 Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects - This action currently reads as if it will subsidize redevelopment regardless of who the developer is ("to property owners") and for whom the housing is being made available. This is too broad. This actions needs to be focus on equitable development and housing. - We'd like to see additional details (and we're open to brainstorming with you) related to HOW the city can help coordinate between developers and federal clean up funds. Strengthen langue to include "Support, find,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			locate and arrange for clean up funcs" or something similar. - Should the Building Dept also be a stakeholder / leader for this? Do Public Works and Sustinability have a role as well? Also consider partnering with foundations. - Alameda County's Dept of Environmental Health - Land and Water Protection Local Oversight Program has an initiative to map environmentally polluted sites in the whole county. They could potentially partner data and clean up funding efforts. **F. 5.2.4 "Secure funding from the State's Affordable Housing and Sustainable Communities AHSC) Program"** - Are there opportunities to use this funidng source for remediation and/or electrification / decarbonization? **G. Innovative Financing for New and Renovated Housing:** In the past year, we have entered a period of rising interest rates and inflation that makes it more difficult to finance housing. One partial pollution is to use Green or Social Bonds to finance the city's housing efforts. Recent experience indicates rising demand from investors for these kinds of bonds. There are a wide range of benefits. Green and Social bonds tend to attract wider participation from investors in bond issues, Green bonds help align city finance with other objects including: equity and climate resilience. There is also evidence from Europe and from corporate bond market that these kinds of financing instruments can attract investors to accept a lower interest rate, partly because of lower risk and partly to satisfy growing investor interest in projects having sustainability and equity attributes. We urge the City to actively consider using green or social bond frameworks	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to finance housing costs, and potentially lower finance costs for this part of the General Plan **H. Take advantage of point of sale or change of occupancy rules.** Across several action areas, the City can take a more programmatic approach to require or facilitate property modifications that promote environmental health at the point at which a property changes hands (e.g. someone vacates a lease, sells a home or residential building). This approach should include equity measures to ensure lower-resource property owners and/or properties that are "naturally occurring" affordable housing, can implement the improvements. Funding can come from some of the resources mentioned above. **I. 5.2.6 Consider adoption of a disaster reconstruction overlay zone.** - We hope this action can ensure that new homes have strict air quality / electrification / weatherization standards and that affordability is preserved? - Maybe consider creating a low-interest construction loan program for income-qualified owners trying to recover. This type of support should prioritize folks who need it the most and/or who's housing can be preserved for low and moderate income Oaklanders.	
42	**The Unity Council**	6/14/2022	"Housing action plan draft HE, chapter 4, action 3.6.3 (page 83): Expand by-right approvals and implement entitlement reform for affordable housing". Recommendation: Building Fee Deferral for City-sponsored affordable housing development is a Housing Element policy recommendation that the City of Oakland should enact. - Issue: The requirement to pay fees up front without ability to defer is a "governmental	Comment noted. Please see revised **Action 3.3.9:** Adjusting or waiving City fees and payment timing for affordable housing developments. The City currently requires only one-half of the amount of impact fees to be paid before permit issuance and the remaining half to be paid before the issuance of a Certificate of Occupancy. The City also defers other fees such as public art and school tax. The City will explore additional ways to increase flexibility in payment timing and potential fee reductions and/or waivers to reduce the burden imposed by the collection of City fees and requirements.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			constraint on housing. - Policy solution: The solution is to provide for a deferral of fees on 100% affordable housing developments. As part of the entitlement reform, the city of Oakland will consider fee subsidies/or payment deferrals to better accommodate affordable housing developers, therefore the City of Oakland should consider including Building Fee deferral to fruition the shared goals of providing desperately needed affordable housing for Oakland's most at-risk and vulnerable residents. Reform in the process to allow building fee deferral for city-sponsored affordable housing developments would allow nonprofit organizations to build more affordable housing. This important step would allow nonprofit affordable housing developers to make it sustainable and ensure that affordable housing developers have an equal opportunity. The building fee deferral would address the specific barriers of the fees so that we can expand affordable housing in our community which is so urgently needed. By deferring these fees, the City of Oakland will be showing itself as a true partner to affordable housing organizations like The Unity Council, who has been a trustworthy, reliable and steadfast partners to the City of Oakland, and has worked together for years.	
43	**Crystal Lynn Keeler**	6/14/2022	A. "An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic	A. Comment noted. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. See updates to Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in placebased strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas." - Chapter 3 We own a home in East Oakland that serves the criteria above from Chapter 3. It is an area with high displacement (displacement especially occurs on Outlook Avenue - with the View - just above us (68th Ave). We have very nice houses on our block, but areas nearby and down the hill are a bit more rugged. I believe our neighborhood region is an area with historic disinvestment, but with substantial gentrifying forces (houses on the block are now going for a million, a 2-bedroom one block over went for $750K). We're on the low hills, not the high hills, so not much risk of mudslide, or much risk of being flooded (I think we're too high). Our property is 10,000 square feet with a very large yard behind us with fruit trees and an area for an urban garden. There is another chunk of vacant lot just next to our large backyard lot that is currently housing a discarded moldy van (sometimes inhabited by homeless people) and a non-operational boat detritus. I would love to be able to purchase the small slot just next to	C. Although the state-level Costa-Hawkins Act constrains Oakland's ability to further extend rent control tenant protections, there are several provisions in the Housing Element that will better protect tenants. **Action 2.2.5** would extend replacement unit protections beyond the expiration of SB 330. **Action 1.1.9** implements a housing registry, which will be a valuable tool in enforcing existing tenant protection laws. **Action 2.2.6** studies a possible "flip tax" that might reduce speculation. D. Comment noted. Please see revised **Action 1.1.14** Protect Oakland residents from displacement and becoming homeless. E. Comment noted. Please refer to the City of Oakland's Housing Resource Center- https://www.oaklandca.gov/topics/housing-resource-center. F. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. G. Comment noted. If someone believes they are compensated below the minimum wage, they should file a claim: https://www.oaklandca.gov/topics/measure-ff-and-measure-z. H. Comment noted. Revisions to the Encampment Management Policy itself will be addressed outside of the Housing Element. I. Comment noted. J. There are multiple safeguards placed for redevelopment of contaminated sites. Alameda County Environmental Health is the local agency responsible for review and oversight of redevelopment of contaminated sites. Known contaminated sites would be required to be remediated prior to redevelopment activities with human health risk exposure screening processes that would be in compliance with local, state, and federal requirements. The proposed policy would pursue grant and loan programs and other technical assistance programs to support the contamination characterization and remediation costs.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			our large backyard and combine the properties to build the largest ADU allowed, or possibly a small house (depending how zoning might go), or two ADUs. The area cannot stand alone without an easement off our neighbors apartment complex for access in the back, or easement off our property. My goal would be to provide it as affordable housing. However, we are stretched thin with the current mortgage and lack the capital to develop this area for affordable housing currently (building and a bit of leveling out the low hill area for proper foundation). I know second-hand of the displacement that has happened in my neighborhood, even my best friend was forced to move to Antioch (someone who had called Oakland home for 20 years). Rising rent costs caused him to be displaced along with two of his roommates, all African-American. Prior to owning this house, we previously managed a 48-unit building for several years near Lake Merritt, so we are very familiar with Fair Housing Practices and non-discriminatory methods for renting units. We employed every strategy we could to ensure absolute fairness in renting out the units available at that complex; however, we were constrained by the owner's requirements and a lack of affordable housing units in that building. We were well aware of the housing crisis when the owner asked us to rent studios for $1750 (this was four years ago), and we had two tiny efficiency units that went in a day, because their cost was only $1350 (but they were tiny rooms with a separate bathroom). Goal 3, p. 61 "Like other Bay Area cities, one of the major challenges to developing permanent affordable housing in Oakland is the extremely high cost of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development, especially the cost of land, labor, and materials. As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability. Oakland also has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, can often provide significant opportunities for residential development. Further, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units." We're not a unit that falls within the category of a vacant lot. We are a unit that has a very large space that could be developed into affordable housing, but lack the capital means to do so currently. "The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to remove constraints on lot splitting." p.65 This softening of requirement would allow for at least the possibility of what I'd like to do to the land available. B. "Action 3.2.4: Provide financial incentives for older or lower-income homeowners who want ADUs." We might or might not be eligible for something like this. We aren't high income, but we have one city income and one disability income, so we might fall in the middle of this action step. C. Comment about rent control: increase the options for rent control, expand rent control I personally believe it should be within the city's housing plan to increase the rental control increase cap to all housing units in Oakland, not just those built before 1983. New developers, new housing construction should also be bound by the same laws, and rent control has saved so many people in the past (including myself when fully disabled, on limited income). D. Action 1.1.13 This is not an exhaustive list. Catholic Charities and other entities helped prevent homelessness through various programs, but have not been mentioned here. E. Action 3.7.1: This is an extremely important area. I know two elderly ladies (76 and 80) with ailing health concerns. If either one of them dies, the other will become homeless, with no housing options, because neither of them can afford the rent on their own (disability social security - only funding). Both are physically disabled, one in a wheelchair, one requiring a scooter, and need accessible housing.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			F. Action 3.7.3 I think this is NOT STRONG ENOUGH! Promoting affordable units in new construction is not enough. REQUIRING IT is the only thing that will force most developers to even offer. Policy efforts should be undertaken to make this kind of policy change into law. Simple carrots are not effective enough, as evidenced by what has happened in Los Angeles. Action 3.8.3 This is a tough one. The actions of this will fall primarily on the shoulders of low or underpaid property managers (with the exception of large corporate property managers - who usually do receive a salary). We worked super hard as building managers of the 48-unit complex to fill the units, but it was so much work at market rate (set by owner). We received only $300/month in compensation if the building was full (in addition to our no rent in exchange for exhaustive duties of a building manager). Most work was unpaid. Any extra city requirements, like city garbage - push/pull, bulk waste pick-ups, composting were always unpaid. An action like this will invite retaliation from building owners down on underpaid building managers. A caution should be applied here, perhaps only enacting this action after 3-months vacant. Sometimes units were also rehabbed, being updated, and this construction process took longer than 3 months, and an exception should be made for units that are being improved for tenants. H. POLICY 4.2 ENCAMPMENT MANAGEMENT Action 4.2.1 I believe offering mental health site access, or social work ability near these encampment sites should be part of this section. It would require funding, but should not just be funding security	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			guards or police for safety, should offer the material and immaterial services really needed by this population group. I. Goal 5 First time home buyer programs should also help to address the extra mortgage insurance that folks without quite enough of a down payment have to pay, just extra, which substantially disadvantages marginalized groups and further perpetuates inequity. We didn't have to pay that extra insurance cost because we were very fortunate, but others are not so lucky. J. Action 5.2.3 The caution here is that contaminated sites truly must be deemed decontaminated and safe by EPA standards at bare minimum. Too many low income housing projects in other cities have been built over these sites, and residents were never informed of the risks. Some sites had a small sign saying do not play on the soil/grass, but parents didn't know that their children were receiving high levels of contamination. How do you have children in these areas without safety? Children should be allowed safe places to play and safe areas outside, not to mention inside. Extreme caution must be used not to perpetuate environmental injustice at the expense of meeting demand.	
44	**Scott Forman**	6/14/2022	My main point of feedback is that, especially with respect to the housing element, we should go much farther in making it possible to build lots of new homes. I think our default stance should be much closer to "all and every type of home building allowed, everywhere, by right." The same goes for any and all commercial activities that don't have significant negative externalities like lots of	Comments noted. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			noise or noxious fumes. In other words, while I love that we're liberalizing and loosening some constraints, I believe most of the remaining restrictions are themselves entirely unncessary and counterproductive, and that Oakland can be much denser, and welcoming many new neighbors with dramatically lower housing costs. I think we should be planning to increase the population of Oakland by 25-50% in the next decade, and even well-meaning constraints on growth, like to preserve the character of certain neighborhoods, or to extract concessions from real estate developers in exchange for more density... as if density is a bad thing that we begrudge! -- are profoundly misguided. In short, I'm an enthusiastic "yes" to a lot of what's in this plan, but I'd like to see it go much further in actively promoting new homes and businesses, and discouraging cars and parking.	
45	**Sarah Karlinsky, SPUR**	6/15/2022	A. The Housing Element should take stronger steps to affirmatively further fair housing. We appreciate the effort that the team has taken to analyze how this Housing Element draft affirmatively furthers fair housing. However, we believe that more can be done to achieve this goal. The draft notes that most of the residential capacity for housing is located in low resource, high segregation areas due to the fact that over 60% of the land in Oakland is in these categories. And the land that is located in high and highest resource categories is impacted by environmental constraints such as very high fire hazard severity zones. These are challenging constraints to address. Nevertheless, we believe that there are some	A. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities, particularly in high resource areas, and promoting neighborhood stability and health. Also, see Appendix J for a summary of zoning amendments, including a summary of a Housing Sites Overlay zone that requires a majority of a site listed as a housing opportunity site be developed as residential. B. Comment noted. As part of the Phase 1 GPU Environmental Justice Element, as well as Phase 2 of the GPU with the Open Space, Conservation and Recreation Element update and creation of the new Infrastructure and Facilities Element, staff will be assessing the current state of community assets to identify improvements, increase assets, and identify locations in underserved residential areas. C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health, with more detail about locations impacted by these measures.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			steps that can be taken to increase the housing capacity in high resource areas. Specifically, we believe that Oakland's Housing Element should look at sites that can be intensively upzoned within the Rockridge and Elmwood neighborhoods, including the Rockridge BART parking lot. Potential sites could include the Trader Joe's site directly adjacent to the BART station (inclusive of parking lot) and the triangular lot at the corner of College Avenue and Claremont. While some sites in this area may be too small to support affordable housing, they could accommodate apartments that would be more affordable than the single family homes that currently exist in this majority of the neighborhood. Additionally, the city may wish to consider requiring that some larger lots that are currently zoned for community commercial include housing at some required minimum density. This would be particularly appropriate for the large, currently undeveloped portions of the shopping center site at the corner of Pleasant Hill and Broadway. B. The Housing Element should identify concrete strategies to build more community infrastructure in low-income communities in order to make affordable housing in those neighborhoods more equitable. Given that so much of the residential capacity in Oakland is located in low resource and high segregation areas, and therefore that a sizable portion of affordable housing in Oakland may be located in these areas, it is important to ensure that appropriate community infrastructure is being planned in these neighborhoods. Building affordable housing in low-income neighborhoods can help stabilize communities	D. Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			and is an important anti-displacement strategy. However it must be paired with investments in parks, community spaces, and programs that benefit low-income families. C. The Housing Element should clarify where upzoning is being contemplated. Policy 3.4 - Reforming zoning and Land Use to Address Community Priorities references allowing additional building heights and/or housing densities along certain corridors such as International, Foothill and MacArthur Boulevards, allowing a diversity of housing types in single-family neighborhoods, increasing height and density in areas approximate to BART and BRT and increasing density in resource rich neighborhoods. We appreciate and support all these policies. However, we feel that it is important for the Housing Element to provide more specific detail about precisely which locations are being contemplated for upzoning and by how much. Additionally, we understand that the Housing Element team is considering tools such as affordable housing overlays to help encourage more affordable housing production. We support the use of affordable housing overlays, but feel that the team should provide more information about where they should be utilized. D. State housing agencies should prioritize numerous important goals - including funding affordable housing near transit and stabilizing neighborhoods at risk of displacement - when determining where to allocate affordable housing funds. Appendix F of the Draft Housing Element notes that the California Tax Credit Allocation Committee's competitive tax credit	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			applications disadvantage Oakland because so much of the residentially zoned land is considered "low resource". While affirmatively furthering fair housing is an absolutely critical goal that the state should be advancing, it is also important that Oakland, as a regional hub with many BART stations, be able to access tax credits and other funding to build affordable housing close to transit. Additionally, as mentioned earlier, affordable housing is an important tool for stabilizing neighborhoods at risk of displacement. It would be helpful for HCD to work with partner agencies at the state level to help balance these important values in the allocation of affordable housing resources.	
46	**Thomas Cooke**	6/29/2022	A. The draft plan identifies a multitude of housing issues and problems and sets forth many admirable goals and policies to be addressed. The draft checks off all the boxes, and makes the case there are sufficient parcels and capacity to meet the State mandated housing goal, to meet compliance with State housing element requirements. However, if Oakland is to make any meaningful process in addressing its housing needs a more *proactive, implementation orientation is required.* The comments below suggest several means by which to do so. B. Expand search and identification of potential housing sites. It appears the planners relied primarily of other sources to identify potential sites and did not conduct original search and analysis. Have the many church properties for example been surveyed? Have there been any surveys done to identify underutilized commercial property with housing potential for either rezoning or mixed use. other than those suggested by the community? Provide scheduling for any planning or zoning changes	A. Comment noted. B. The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites). Please also see **NEW Action 3.4.10**: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right. C. See updates to **Action 3.5.1:** Support community land trusts and other shared equity models.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			required to facilitate housing construction and conditions thereof. Although extensive tables documenting the characteristics of many sites are provided, any sense priority is lost. To off set this problem a more selective, high priority site category should be established to promote and expedite housing construction. Sites on this list should be given priority for local and other funding resources. Criteria already provided in the draft should be refined (simplified) to distinguish such sites. As necessary such sites should be designated for plan and/or zoning changes to avoid preemption by non-residential development. A good example of such sites is the Ridge 2 site located at Broadway and Pleasant Valley Road. C. Identify and set forth more specific models for housing/rental mechanisms such as limit equity condominium, co-housing, and cooperatives.	
47	**Liana Molina, Build Affordable Faster**	6/30/2022	A. Meeting our goals to produce affordable housing is a priority for Oakland residents. In a September 2020 David Binder survey of Oakland voters (Margin of Error: ±5.7%) by David Binder for BAF, 83% of residents believe we are not building enough for low- and middle-income residents. 71% believe market rate construction is too expensive and pushes out existing residents, and 83% believe market rate housing should include as many affordable housing units as possible. [See chart on page 2 of comment letter.] B. It is not clear how the action plan outlined in the draft housing element will achieve our RHNA goals for affordable housing, especially when many of the strategies are a mere continuation of policies and programs currently	A. Comment noted. B. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions with blue text. C. Appendix A: Evaluation of the 2015-2023 Housing Element includes a discussion on shortfalls in producing affordable housing. See response to Letter #1 for more actions included in the Housing Action Plan to expand affordable housing opportunities and promote neighborhood stability and health. In addition, **NEW Action 3.3.19:** Sites Inventory and Fair Housing Accomplishments Tracking Program was included in the Housing Action Plan to conduct a mid-cycle assessment of progress toward meeting the City's RHNA housing production goals and to ensure there is adequate capacity to develop units at each income level. D. Goals 1 and 3 of the Housing Action Plan address anti-displacement measures and affordable housing production. The description of Goal 4 in the Housing Action Plan explicitly reaffirms the principle of housing as a human right.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			in place which have not been sufficient to prevent displacement of long-term residents and have resulted in the massive under-production of moderate- and lower-income housing. C. There is no reflective assessment of what program elements have been most successful, nor indication of how existing programs should be amended to produce better outcomes. The site inventory and action plan should include an explicit correlation with and metric for how these components address patterns of racial segregation that exist in Oakland, and specific action steps that will affirmatively further fair housing (AFFH) and correct exclusionary neighborhoods. While each section features a discussion of how the overarching goals address AFFH, the site inventory and action plan are not clearly related back to the priority contributing factors identified in the fair housing assessment, along with clear metrics to measure results, as directly by HCD's guidance. D. The housing element should reaffirm the principle of housing as a fundamental human right, as this has been a recurring theme in many of the community workshops and other public meetings over the past several years. In these meetings and in our poll, it is clear - Oaklanders want stronger anti-displacement measures and more affordable housing. **Below we highlight and comment on key issues and action steps we encourage the city to prioritize:** **Tenant Protections, Anti-Displacement and Preservation of Existing Affordable Housing** E. We support Action 1.1.3 to strengthen Ellis Act Ordinance protections. The city should be more actively advocating for state legislative reform to ensure the Ellis Act is not used by	E. Although the state-level Costa-Hawkins Act constrains Oakland's ability to further extend tenant protections, there are several provisions in the Housing Element that will better protect tenants. **Action 2.2.5** would extend replacement unit protections beyond the expiration of SB 330. **Action 1.1.9** implements a housing registry, which will be a valuable tool in enforcing existing tenant protection laws. **Action 2.2.6** studies a possible "flip tax" that might reduce speculation. F. Comment noted. G. Comment noted. Staff will address this as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process. H. Comment noted. I. The City will work on establishing a standardized approach to the community benefits provided within a development agreement. Language updated in **Action 1.1.13:** Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land" to reflect this. J. City staff currently prioritize review of affordable housing projects. Please see updated Actions 3.3.1, 3.3.4, and 3.3.5 in the revised 2023-2031 Housing Element. K. Almost all of Oakland's zoning allow both residential and commercial, except industrial zones and the CR-1 and CC-3 zones. The Affordable Housing Overlay and Housing Sites Overlay Zones will apply in areas that could help facilitate commercial-residential conversions. L. The City will meet with stakeholders periodically to discuss emerging innovations and gather more information to understand and accommodate barriers. See updated language for **Action 3.3.11**: Support innovations by design. M. Please see the revised **Action 3.3.15**: Continue and expand density bonus incentives. The City will solicit additional ideas for incentives and expansion of the density bonus program and gather feedback from Planning Commission and City Council, as well, during a mid-cycle Housing Element assessment. N. The Affordable Housing and Infrastructure Bond Measure (Measure U) allocates $350 million to affordable housing preservation projects. O. An economic feasibility study is underway as part of the five-year impact fee update to determine the potential for increasing impact fees. In addition, the affordable housing impact fees automatically increase at the beginning of each fiscal year with the rate of construction inflation. Most recently, in

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			large conglomerates to push out tenants. We encourage more specificity regarding City Council direction to ensure that this is a legislative priority for the firm representing the city's interests in Sacramento. F. We support Action 1.1.5 to provide eviction defense and implement a right to counseling. Post pandemic, the city needs to increase its ability and capacity to represent individuals in unfair evictions. The administration and city council should ensure adequate funding for these programs during the current and upcoming two year and mid cycle budget processes. G. We support Action 1.1.7 to monitor neighborhood displacement risk factors. The city should build on the mapping work already produced for the site inventory, zoning, environmental justice analysis and other components of the housing element and general plan by conducting further analysis including an overlay of key demographic information to identify communities vulnerable to displacement. The city should allocate resources accordingly and center outreach and advocacy efforts in these areas in appropriate languages. H. We strongly support Action 1.1.11 to provide a local preference in affordable housing projects, Action 2.2.6 to reduce housing speculation through an anti-speculation tax, and the adoption of Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act that grants the right of first offer and right of refusal to tenants, community land trusts and nonprofits. I. Regarding Action 1.1.12 to negotiate for appropriate community benefits during development agreement approvals for major	July 2022, the affordable housing impact fees went up by 15% because of the high construction inflation rate. P. On May 17, 2022, Oakland City Council directed the City Administration to study the creation and implementation of a citywide enhanced infrastructure financing district (EIFD) funding affordable housing and infrastructure improvements. Staff will be conducting a feasibility study of various EIFD scenarios and anticipates that a final recommendation will be provided by Fiscal Year 2024. Please see **Action 3.3.10:** Citywide Enhanced Infrastructure Financing District (EIFD). Q. Comment noted. Revisions to the Encampment Management Policy itself will be addressed outside of the Housing Element.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			entitlements and use of City land: we urge the city to set strong community benefits standards including deeply affordable housing requirements and anti-displacement resources for tenants, across the board, which the approval of development agreements is conditioned upon. This would help offset the impacts of further displacement and gentrification and help provide more certainty for the city, project developers and other stakeholders, versus an unpredictable and resource intensive negotiation process. **J. Housing Production** We strongly support the recommendations in the overarching Policy Goal 3.1 to facilitate production of deeply affordable housing. This policy goal goes hand in hand with Action 3.3.5 to implement an affordable housing overlay to establish by right (non-discretionary) zoning for 100% affordable housing developments and development projects that offer higher affordability and Action 3.3.1 is key to make all available city-owned property for affordable housing and ensure that city-owned property goes to extremely low-income households as stated in Action 3.3.4. For any streamlining of 100% affordable, the city should explicitly mandate city staff to prioritize affordable housing projects. K. In addition, Action 3.2.3, is key to opening more land, and to promote flexibility in adaptive reuse to increase the housing stock. The city should look at vacant commercial stock and make it easier for it to be residential with higher affordability. In our previously referenced 2020 David Binder poll, allowing for residential for underutilized commercial properties had 90% support among Oakland voters. We believe in unlocking the potential of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			thousands of square miles of urban and suburban commercial districts, transforming underutilized office parks and expansive parking lots into hundreds of thousands -- or even millions -- of new market-rate and affordable homes L. The cost of construction materials, high interest rates, and cost/competition for land are huge factors that will impact the delivery of housing projects, especially affordable housing projects. The city should not only engage Action 3.3.11: Support innovations by design but convene stakeholders such as labor and developers to significantly increase production of housing using construction innovations, such as exploring modular, to match housing needs. M. Lastly, given the city's absolute failure to deliver adequate affordable housing, and exceeding the market rate production goals, any implementation of Action 3.3.15 (density bonus incentives) should always be coupled with increased affordability requirements. **N. Financing** If the City is to meet its goal of building housing for the working and middle class it must provide a comprehensive financing plan for how we will build 10,000 very low-, low-, and moderate-income units by 2031, as required by our RHNA. We support Action 3.3.16: Consider revising the Real Estate Transfer Tax to use "a portion of the revised tax rate as a dedicated funding stream for affordable housing." We also support Action 3.3.18 to reauthorize Measure KK if it is a bond that predominantly addresses our housing affordability crisis. O. We also support Action 3.3.8 to right-size development fees on market-rate developments. In our analysis below, the city only gets a mere fraction of what a developer	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			could afford in 2020. Factors such as the current recession conditions, interest rates, and cost of construction materials may need to be re-visited. [See Table on page 4 of comment letter.] **P. EIFD** In 2019, the Mayor's Housing Cabinet published recommendations in the report *Oakland at Home: Recommendations for Implementing A Roadmap Toward Equity* which explored an Enhanced Infrastructure Financing District (EIFD) for affordable housing. Three years later, the draft Housing Element, also recommends considering an EIFD via Action 3.3.10, Consider a citywide Enhanced Infrastructure Financing District (EIFD). We're concerned about the proposed timeline and advocate that the city act with urgency regarding an EIFD that invests in the public good- affordable housing and associated infrastructure. A study and subsequent steps to form an EIFD should be completed in the near term, not 2028. Our agency has contracted with a respected third-party agency to do this analysis and is working with the city administration and other stakeholders to identify specific boundaries and uses for the EIFD revenues. An EIFD would allow for increased bonding capacity to leverage funding that local Oakland based developers can access to support the production and preservation of affordable housing. **Q. Homelessness and Services for the Unhoused** Regarding Goal 4. Address Homelessness and Expand Services for the Unhoused, the codification of the controversial "Encampment Management Policy" in Policy 4.2, Action 4.2.1 and 4.2.3, should be reconsidered. While addressing homelessness should be a top	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			priority for the city, many directly impacted members of the unhoused community and advocates for the homeless have registered formal opposition to the EMP and have requested that City Council rescind the ordinance. We urge the city to continue to engage these stakeholders to identify and build more consensus on ways to meet the health and safety needs of both unhoused residents and the greater Oakland community.	
48	**Jeff Levin, EBHO**	7/26/2022	**A. Item 3.1: Housing Element Annual Progress Report (APR)** This report summarizes the City's progress in meeting its Housing Element goals after 7 of the 8 years of the current housing element cycle have been completed. Unfortunately, the City has fallen far short of meeting it's assigned housing production targets. The report notes that building permits peaked at slightly more than 4,000 annually in both 2017 and 2018, and have since fallen off. In 2021, there were "only" 1,667 units permitted. This needs to be taken in historical perspective. These are still record-breaking numbers. - For the previous two housing element cycles, covering the period 1999 – 2014, the average number of units permitted was 690 per year. - For the last seven years, the average is nearly 2,400, more than three times the average over the preceding 16 years. This record level of production has been anything but equitable. As we have pointed out many times before, there is a tremendous imbalance between production of housing for above-moderate income and production for very-low, low and moderate income. - While the City has permitted nearly double its	A. Comment noted. See also response to Letter #1 for more actions included in the Housing Action Plan to expand affordable housing opportunities and promote neighborhood stability and health. In addition, NEW Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program was included in the Housing Action Plan to conduct a mid-cycle assessment of progress toward meeting the City's RHNA housing production goals and to ensure there is adequate capacity to develop units at each income level. B. The revised 2023-2031 Housing Element includes additional sites in Rockridge to meet the State's requirement to AFFH. In addition, Chapter 4: Housing Action Plan (HAP) describes in more detail the goals, strategies, and actions the City will implement in the 2023-2031 planning period to reduce racial segregation and eliminate racial disparities in access to opportunity and housing. NEW Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program was added to the Housing Element to conduct a mid-cycle assessment of the effectiveness of AFFH programs, including sites that develop in high resource areas. See response to Letter #1 for more actions included in the HAP to expand affordable housing opportunities, particularly in high resource areas, and promote neighborhood stability and health. C. The revised 2023-2031 Housing Element incorporates this feedback. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.5D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11). D. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes discrete implementation timelines and milestones within the 8-year planning period

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			RHNA target for above-moderate income, it has permitted only 26% of the RHNA target for lower and moderate income. - Put another way, while the RHNA called for 53% of new housing to be targeted to above-moderate income, 89% of the building permits for new housing have been higher-end, above-moderate income housing that very few Oakland renters and first-time homebuyers can afford, while only 11% have been for affordable housing. - Only 1 affordable unit has been built for every 8 unaffordable market-rate units. Given this track record, a vague call to develop "housing for all economic levels" is not enough. Oakland needs a housing strategy that explicitly prioritizes affordable housing for those with the greatest needs, and does not need to provide additional incentives for above-moderate income, market-rate housing, which has been substantially over-produced. We hope you will consider this as Oakland moves forward to update its housing element for the 2023-2031 cycle. B. We believe the draft Housing Element falls far short of meeting the State requirement to affirmatively further fair housing – that is, to identify concrete goals, strategies and actions to reduce racial segregation and eliminate racial disparities in access to opportunity and housing outcomes. C. While the draft Housing Element contains an extensive Fair Housing Assessment with a wealth of data and maps, it falls short on at	F. In the revised 2023-2031 Housing Element, Goal 3 of the Housing Action Plan is reframed to state "Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities." In addition, "Reduce racial segregation and racial disparities in housing opportunities and outcomes" is explicitly called out as a priority in the introduction to the Housing Action Plan. G. The Housing Element was taken to City Council on October 18, 2022, and Planning Commission on October 19, 2022 to review the findings letter from State HCD, and will be presented to Planning Commission and Council for adoption in January 2023.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			least two counts. While there is a description of current racial and economic segregation and disparities, there is little analysis of the history and underlying factors that gave rise to, and continue to perpetuate, these conditions. The most glaring issue is that the Fair Housing Assessment completely fails to analyze exclusionary zoning patterns as a key factor in racial segregation, despite passing mention that zoning was an issue. This is particularly disappointing in light of the informational report on redlining, segregation and reparations in West Oakland that you received at your meeting last week, which does a far better job of identifying historical, structural and systemic factors and policies to address these. The draft Housing Element does not clearly identify and prioritize factors underlying racial segregation and disparities, and therefore also does not adequately link the goals, strategies and actions to the prioritized fair housing factors. This is explicitly required by the State, and failure to do so will likely result in the State rejecting the City's draft Housing Element. **Inventory of Available Sites** Of particular concern is the inventory of availability of suitable sites to meet Oakland's Regional Housing Needs Allocation (RHNA) targets for the various income levels. The draft was developed with the stated intent to create an inventory based on current zoning, without the need to identify additional parcels to be rezoned to accommodate the City's housing needs. As a result, most of the sites suitable for affordable housing continue to be concentrated in lower opportunity areas with higher concentrations of low income households and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			communities of color, particularly Black residents who historically have suffered the worst segregation and discrimination. Even if all the identified housing sites were developed as projected, racial segregation would not be significantly reduced, and the high opportunity, historically exclusive areas would remain as inaccessible as before. The City cannot say that it is affirmatively furthering fair housing if its plans and goals don't even mention reducing patterns of segregation and overcoming the historical barriers posed by exclusionary zoning. **Proposed Strategies and Programs** D. Another area of concern is the identification and description of new strategies and programs. Many of the new actions described in the draft Housing Element are policies and programs that EBHO and many other organizations had long advocated, such as greater tenant protections, a Tenant and Community Opportunity to Purchase Act, finalization of the City's public land policy, and more, and we are pleased to see these included here. Unfortunately, the language in the draft element says only that the City will "study" or "consider" such programs, with no concrete steps, milestones, expected outcomes, or performance metrics. The State has explicitly instructed cities that such vague statements are not sufficient, and has rejected draft housing elements from other cities for just this reason. If it is not possible to fully adopt new policies and programs as part of the Housing Element, then at a minimum the document must commit to bringing concrete legislation before the City Council by a specific date in order to implement these new programs. Simply continuing the	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			same actions that have been undertaken to date is not sufficient, since as clearly demonstrated in the City's Annual Performance Report, the City is falling far short of meeting its RHNA goals in the current cycle. **F. Additional Goals** - The draft Housing Element is organized around five goals. We would suggest that at least two additional goals be included: Reduce racial segregation and racial disparities in housing opportunities and outcomes. Simply stating a goal to "expand affordable housing opportunities" is not sufficient. - Close the gap between market-rate and affordable housing production by prioritizing preservation and development of housing affordable to those with the greatest needs, including Black and Brown households that constitute the bulk of the lower income population. Instead of "promoting housing opportunities for all economic levels," the City must explicitly prioritize actions that address these pressing needs, in both its funding priorities and its land use and other regulatory actions. **G. Council and Public Review of the Draft Housing Element** To date the City Council has not had an opportunity to consider the draft Housing Element. Despite an extensive community outreach process during preparation of the draft, once it was completed, consideration of the draft was subsumed within a larger report on development of the entire General Plan update. Initially there was no summary or overview of the content of the housing element and particularly new policies and actions and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			consideration of the obligation to affirmatively further fair housing until we explicitly called for such a summary. Previous draft Housing Elements have at least included an Executive Summary; there was no such summary in the current draft. We note with some dismay that the title of today's agenda item was modified in Rules Committee to remove the reference to "Receive Public Comments And Provide Feedback To Staff On The Draft Housing Element." While the initial formal 30-day public comment period closed on June 13, staff have repeatedly stated that they will continue to accept and consider public comment while the draft undergoes a 90-day review by the State. We are therefore puzzled and concerned that this language was omitted from the title as it suggests that the City is not prepared to consider public comments on the draft Housing Element at this meeting. We call on the City to ensure an open and inclusive process in the next revision of the draft Housing Element. Once staff receives comments from the State, that information should be brought before the City Council to get input on how best to address the State's comments. After the new draft is developed, there should be a public comment period of not less than 30 days, including a public hearing before the Council to consider and comment on the revised draft, prior to preparing a final draft for adoption and submission.	
49	**Sangeeta Sarkar, Save the Bay**	8/5/2022	As the City of Oakland plans to meet its RHNA goals, selecting sites that are resilient to the impacts of climate change is critically	Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			important. New housing construction, especially for low-income communities who face the greatest risk from climate impacts, should be located away from areas prone to fires, flooding, extreme heat, and sea level rise. Dense, affordable, infill development close to transit can connect historically under-invested communities to resources and infrastructure across the city and region. Building SMART housing will also advance Oakland's climate goals by mitigating greenhouse gas emissions from driving by supporting the use of alternative modes. One opportunity to add more climate SMART housing in Oakland is in the Rockridge neighborhood. Housing built here would be accessible by BART and bus lines, and would be more resilient to extreme heat due to an abundance of trees and parks. This neighborhood is also more resilient to other climate impacts, as it is outside of the sea level rise and fire hazard zones. Affordable housing in this high opportunity area is especially impactful toward reducing income inequality and racial segregation, which the City of Oakland is required to address under AB 686. Prioritizing dense, affordable housing development in this and other high opportunity areas through strategic rezoning is necessary to affirmatively further fair housing as required by law, and to move toward racial and environmental equity in Oakland.	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
50	**Louis Eisenberg**	8/15/2022	I am writing to express my strong support for a comment letter submitted by the Rockridge Community Planning Council (RCPC) Board on the topic of Oakland's draft Housing Element. In particular, I want to emphasize my support for the following paragraph:	Oakland Planning Staff included the "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley in the revised Housing Element Sites Inventory.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses.	
51	**Maya Schechter**	8/16/2022	I am writing to share a comment in advance of Thursday's Rockridge meeting on the draft Housing Element. I cannot attend the meeting but I strongly support the points made by RCPC in the letter sent to the city, including allowing and incentivizing housing, especially affordable housing, on all of sites listed in the letter: - CCA Site - Rockridge BART Site - Triangular site at the corner of Claremont and College - A portion of the Dreyer's Ice Cream site - Wendy's site at College and Broadway - Ridge site at Broadway and Pleasant Hill - Carpet store site at College and Kales - Dialysis Center site at Claremont and Clifton - DMV Site at Claremont and Cavour - Chevron Station Site at Telegraph near highway 24	Comment noted. See Response to Letter #36

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			I also support the other points made to encourage housing in Rockridge.	
52	**Khanh Russo, Partnership for the Bay's Future**	8/26/2022	We believe the following policies can play an important role in meeting the requirements of this housing element and supporting thriving communities: A. Favorable Zoning and Land Use + Make multifamily infill easier to develop + Allow, require or encourage multifamily housing in more places + Allow or encourage missing middle housing in single-family neighborhoods + Provide incentives for affordable housing development + Provide incentives for affordable ADUs and "missing middle" housing B. Accelerating Production Timeframes + Streamline development approvals and environmental review process for multifamily housing + Streamline permitting process for multifamily housing C. Reducing Construction and Development Costs + Ensure local requirements are not making development more expensive without requisite benefits + Actively support the use of modular and factory-built construction methods D. Providing Financial Subsidies: Generate new or dedicate existing revenue for affordable housing F. Advocating for Rent Control and Just Cause for Eviction Policies + Adopt or update rent stabilization policies + Adopt or update just cause eviction policies G. Advocating for Community Land Trusts (CLTs): Support the formation and operation of community land trusts	Comments noted. A. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. Please see the following actions, which address this issue: - **NEW Action 3.3.5:** Implement an Affordable Housing Overlay - **Action 3.3.15** Continue and expand density bonus incentives - **NEW Action 3.4.3:** Revise Conditional Use Permit (CUP) requirements - **NEW Action 3.4.8:** Implement Objective Design Standards - **NEW Action 3.4.10** Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right - **NEW Action 3.6.1:** Streamline the City permitting process, especially for low-income and nonprofit builders - **Action 3.6.4:** Continue SB 35 streamlining and encourage projects to use it C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health, in particular Action 3.3.5: Implement an Affordable Housing Overlay and NEW Action 3.4.10: Implement a Housing Sites Overlay Zone. In addition, please see Action 3.3.11: Support innovations by design, which addresses support for modular and factory-built construction methods. D. Measure U was placed on the ballot for November 2022. If passed by voters, Measure U will issue bonds to raise $850 million, including $350 million dedicated to funding affordable housing. F. This comment is addressed in the Housing Element by **Action 1.1.1**: Continue to implement the rent adjustment ordinance. G. HCD's Acquisition and Conversion to Affordable Housing (ACAH) Notices of Funding Availability (NOFA) for the 2019-20 and 2020-21 funding rounds contained funding set-asides for Coop/CLT projects and will continue with this approach in upcoming NOFA rounds. HCD staff is also preparing revised loan documents to address potential tenant ownership in properties. H. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			H. Advocating for Inclusionary Zoning and Impact Fees: Create or review/update inclusionary housing (including in-lieu fees) and commercial linkage fee requirements I. Inventory of Sites: Ensure that land is equitably zoned for multifamily housing, especially in high-opportunity areas	discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. I. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
53	**Deeply Rooted**	10/1/2022	Community Proposed Strategy A. Treat unhoused people with dignity and respect the communities they have built rather than allowing for City evictions under the current Homeless Encampment Management Policy. B. Prioritize Compassionate Care and Facilities: Support humane and positive spaces with services such as showers, coffee, and groups that encourage individual expression; hire counselors and formerly/currently unhoused people to conduct outreach in communities they are familiar with; improve benefits and higher pay for social service workers and homeless shelter staff. C. Ensure Clean Environments: Support trash removal and address illegal dumping around homeless encampments in active partnership with unhoused residents. D. **[New City policy states]** Update zoning of single family (one home per parcel) to allow for duplex, fourplex, townhomes, and accessory dwelling units. Upzoning to allow for more live/work housing (live in and run a business) and artist housing in cultural districts). **Create Cultural Preservation Districts** to **protect existing residents** from displacement, i.e. require on-site affordable units from market rate projects (instead of in-lieu fee), use neighborhood area median income for defining affordability, require fair housing impact	A. Each year, it is estiated that 15,786 people in 13,135 households experience homelessness in Alameda County, and approximately 60% of them reside in Oakland. The conditions at many encampments are inhumane, dangerous, often fatal. The Encampment Management policy is rooted to a shelter offer policy that places a requirement on the City to provide shelter options when closing an encampment. While improvements are still being developed in the homelessness system, when an encampment is closed, individuals at the camp are offered a shelter bed and an alternative to sleeping in a place not fit for human habitation as defined by US Department of Housing and Urban Development. B. Many of the Emergency Shelter interventions operated by the Human Services Department offer showers, groups, services and housing navigation as part of a managed program. Futhermore, the local Continuum of Care (CoC) provides training and opportunities for individuals with lived expertise to contribute to the development of the Homeless Services System in Alameda County and the City of Oakland. Lastly the Commission on Homelessness regularly recruits individuals with lived experience to participate in meetings and inform the city on issues faced by people experiencing homelessness. C. It is the goal of the City to provide regular and adequate trash collection from encampments, to ensure that porta-potties and hand-washing stations are serviced regularly as needed, and that encampments receive regular deep cleanings to ensure that our unhoused residents are not living in conditions that threaten health and/or safety. D. Typically, affordable housing needs to be built at fairly sizable densities for it to be feasible to develop on-site affordable units. It would be challenging to finance affordable units for small increases in density, such as any upzoning projects to allow for duplexes, fourplexes, townhomes, and accessory dwelling units. Requiring affordable units to be developed for small-scale upzoning projects could limit development of single family neighborhoods altogether and therefore keep them single-family. In addition, this would create an equity problem where it would be more

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			assessment of market rate projects, have a Community Planning Council to vote on new development projects, etc. F. Support streamlined communication with affordable housing applicants for quicker response times and accurate updates on housing application status [Action items in the current Housing Element include housing preference policies for displaced residents and current Oakland residents and workers]. **G. Provide Financial Assistance:** Consider publicly subsidized housing stipends for Oakland natives. **H. Grow Shared Ownership/Homeownership Opportunities:** Support pathway to homeownership and shared ownership programs for Black and other residents of color; create shared housing options for formerly incarcerated people. **I. Fund Supportive Housing:** Fund permanent supportive housing with intensive wraparound services, including mental health and case management services; dedicate housing for unhoused veterans and people with disabilities.* **J. The State Affirmatively Furthering Fair Housing** new rules requires the City to acknowledge the history of and current fair housing violations, and to affirmatively solve for these problems. The City's consultants should work closely with DR groups to include the history of Oakland's different communities that have experienced housing and racial exclusion and fair housing discrimination in Housing Element sections. **K. Value Community Assets:** Prioritize community assets such as recreation centers	expensive to build additional units in these proposed cultural preservation districts than those areas that would not have this requirement of building affordable units on site. And, it is a more complicated process that the average mom and pop home owner would have difficulty managing (often duplexes, fourplexes, and ADUs are a home owner or smaller developer). Anti-displacement protections are outlined in detail in Chapter 4, Goal 1 of the Housing Element. These existing and proposed anti-displacement programs and policies will be implemented during the 2023-2031 Housing Element planning period. F. This is a major challenge for most jurisdictions. Oakland HCD has been working with the County to develop an online affordable housing access portal for residents to apply to new construction lease ups; several Oakland projects and other projects in the county have gone through the portal. We are currently in conversations on how to improve the portal's functionality. Please also note that Bay Area Housing Finance Authority is working on developing a region-wide portal: http://housing.acgov.org/. G. Oakland HCD focuses on producing new affordable housing units and rehabilitating existing units. We rely on our partnership with the Oakland Housing Authority to subsidize unit affordability via vouchers or other operating subsidy. The City is monitoring pilots that offer "shallow subsidy" programs which offer a middle path between one-time emergency rental assistance and long-term Section 8 vouchers. Such a program would most effectively be run through Oakland Housing Authority, but could be piloted together with HCD. A challenge overall has been the difficulty of finding rental units in the City, as demonstrated by the Emergency Housing Vouchers absorption rates. H. City of Oakland has continuously applied for State funding to support homeownership opportunities for Oaklanders, but we have consistently been denied (three years in a row now) because we are a "high-cost city." Oakland HCD staff are advocating with State officers and lobbyists to shift scoring criteria and priorities for future application rounds. We encourage Deeply Rooted to work with us and Council on these and other State advocacy efforts - many of the State's programs are in conflict with each other (e.g. Multifamily Housing Program deeper affordability that is higher cost, or Affordable Housing Sustainable Communities in transit rich areas,

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			and parks; increase trees and green spaces in underserved residential areas. L. Require/Provide an air purifier per unit in neighborhoods with high levels of pollution. This will also help address wildfire smoke. M. Commission a market force displacement study (building on the City's 2005 West Oakland Wood Street Project Impact study conducted by Mundie & Associates) and utilizing data from the City's Affirmatively Furthering Fair Housing, develop a moratorium on market rate housing in displacement vulnerable areas.	but Oakland is too high cost or too low opportunity to be competitive for CDLAC/TCAC or CalHOME). With the limited funds Oakland HCD has available, we continue to operate a First Time Homebuyer program. Though not large in scale, it exists and can be scaled up again once additional funding sources are identified. (https://www.oaklandca.gov/topics/first-time-homebuyer-mortgage-assistance-program-map) Other opportunities include the Acquisition and Conversion to Affordable Housing (ACAH) program, which has provided funds for Community Land Trusts and Coops. I. The City will continue funding permanent supportive, homeless, and extremely-low income units, and have focused more intensely on expanding homeless units. Specifically, the New Construction Notice of Funding Availability requires a minimum of 20% homeless set aside, but the points encourage 30% or more set-aside for homeless units. The challenge continues to be funding: we are pursuing every funding opportunity we come across, like aggressively competing for HomeKey or LHTF, or creating local operating subsidy from new State sources like PLHA and working with the Oakland Housing Authority to stretch their operating dollars. We have learned from working with City Human Services Department and Alameda County Continuum of Care that while full PSH and wrap-around services are desired, deeply affordable units with a range of services are just as critical. J. The Oakland General Plan Update includes Deeply Rooted Collaborative and Dyett and Bhatia as the City's consultant team. Deeply Rooted Collaborative serves as the Community Consultant and Dyett and Bhatia serve as the Technical Consultant. How would DR like City Staff to acknowledge/include this history beyond what was provided as part of the DR (and DR partner) feedback that was provided to City staff on the Draft Housing Element? Staff have shared DR's feedback with D&B for incorporation. K. As part of the Phase 1 GPU Environmental Justice Element, as well as Phase 2 of the GPU with the Open Space, Conservation and Recreation Element, and the Infrastructure/Facilities Element, staff will be assessing the current state of community assets to identify improvements, increase assets, and identify locations in underserved residential areas. L. Installation of air filter devices rated MERV-13 is required for new construction in Oakland.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				If funding became available, the City would pursue funding sources such as grants to provide property owners with standalone air purifiers for existing residential buildings. The City is actively working to support and expand neighborhood resilience hubs and respite centers so that residents in heavily-impacted areas who lack sufficient air purification systems can have a central, convenient place to go to escape smoke. See also Housing Element Action 2.1.6: Increase funding for improved indoor air quality. M. The State will not approve a Housing Element that places a moratorium on market rate housing or any type of housing at any affordability level.
54	**EB4E**	10/14/2022	A. Revise the Missing Middle Program to ensure high-resource neighborhoods allow four units on most lots in practice, including providing setback relief and reducing/eliminating off-street parking minimums. <u>Missing Middle Program:</u> ● Sixplexes: Sixplexes are more likely to be both feasible in the context of high land values and produce middle income housing (see study from San Jose; attached as Exhibit A). Consider allowing up to six units by right in certain high-opportunity residential zones, as well as on corner lots and lots over 5,000 square feet. ● Minimum Lot Sizes and Lot Splits: ○ Please confirm explicitly that lot splits in residential zones will be approved ministerially. ○ The minimum lot size in residential zones should be reduced from 2,500 to 2,000 square feet. Under SB9 the minimum lot size post-split is 1,200 square feet. While we appreciate Oakland reducing minimum lot sizes across residential zones, the 2,500 square foot minimum is twice that of the SB9 baseline. Moreover, 4,000 square feet is a common Oakland lot size, perhaps the most common. A 2,000 square foot minimum lot size would facilitate lot splits in most cases, whereas a	A. Comments noted, see Appendix J for a summary of zoning amendments the City will implement. The following changes below also summarize some of the Missing Middle Planning Code Amendments that will be implemented in June-July 2023 to include the following changes: - Reduce minimum lot size and setback standards where appropriate throughout the Planning Code to facilitate small lot development. - Minimum lot size will be reduced to 2,000 sf. in RD and RM Residential Zones - Residential side setbacks will be reduced to 3' for lots less than 3,000 sf. and 4' for lots 4,000 sf. or greater in RD and RM Zones - Revise density, maximum building heights, and minimum lot size standards to permit more housing units per lot where appropriate throughout the city in Hillside Residential RH-4, all Detached Residential (RD) Zones, all Residential Mixed Housing Type (RM) Zones, and Urban Residential RU-1 and RU-2 Zones. - Create new RD zone to replace RD-1 and RD-2 - All RD, RM and RU Residential Zones will now allow 4 or more units - Maximum floor area ratio (FAR) and lot coverage will be increased in RD and RM Zones - Minimum lot frontage for RD and RM Zones will reduced from 25 ft. to 20 ft. in RD and RM Zones - Open space requirements reduced in RD, RM, and RU Zones - Rezone Lower Rockridge and Temescal to RM-4. - Rezone Adams Point to RM-4 - Reduce minimum lot frontage to 20 feet - Increase lot coverage to 55% in all residential zones for projects seeking 3 or more units. - Create a new RD zone to replace RD-1 and RD-2 to ensure that 2-4 unit development is feasible in high-resource residential neighborhoods

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			2,500 square foot minimum would largely exclude them. As it stands, the proposed minimum lot sizes constitute a downzoning of development capacity in residential zones from SB9 and should be revised. ● Lower Rockridge and Temescal: ○ To ensure Lower Rockridge and Temescal allow fourplexes in practice, consider rezoning them to RM-4. Lower Rockridge and Temescal typical lots are roughly 4,000 square feet. The proposed rezoning of these high-resource and low-VMT areas requires 1,500 square feet of land per unit. In practice this means only 2 units are allowed, which is the bare minimum under SB9. Moreover, 2 units does not meet the goals of Oakland City Council to allow at least 4 units in residential zones and reduces owner incentives to add those units (these projects will often be complex and expensive). Rezoning these areas to RM-4 would require 1,000 square feet of land per unit, which would allow 4 units per lot by right in most or all cases. ● Adams Point: The zoning map shows a rezoning of the center of Adams Point from RM-1 to RM-2. This neighborhood is already full of medium-sized apartment buildings (see Figure 1 below, taken from the Oakland Map Atlas) These zoned capacity should match the existing built environment to allow for 4-8 story apartments. Alternatively, consider rezoning this area to RM-4. ● High Resource Areas: Bushrod, Santa Fe, Trestle Glen, Crocker Highlands (currently RD-1 – mostly not on VHFHSZ. Only a small portion is in VHFHSZ) are all high-resource or moderate-resource areas that are untouched by the proposed Missing Middle Program rezonings. These are also low-VMT	- Create a new residential facility type called “Two- to Four-Family Residential Facility” that would replace the current “Two-Family Residential Facility” Type throughout the Planning Code; and change the definition of a “Multifamily Residential Facility” from the current 3 or more units to 5 or more units. - Eliminate all conditionally permitted densities throughout Planning Code (densities will all be by right); and the current requirement for a Major Conditional Use Permit for 3 or more dwelling units in the RM-2 Zone; 7 or more dwelling units in the RM-3 or RM-4 Zone; and for any project that exceeds the basic or permitted density resulting in 7 or more dwelling units in the RU or CBD-R Zones. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City’s proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and “missing middle” housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands As part of the city's rezoning proposal to implement the rezoning actions in the Housing Action Plan, the undeveloped western edge of the Mills College campus adjacent to MacArthur Blvd. was identified as a potential location for the addition of infill housing. Any rezoning of that portion of the campus would only occur if the community and decisionmakers support such a change and only for the purpose of facilitating the addition of housing along this undeveloped campus edge. The City has not received any proposals for the redevelopment of the Mills College campus, nor does it any seek to encourage such a proposal. The rezoning, if adopted, would only apply to the MacArthur Blvd.-fronting campus edge to facilitate the addition of housing on a currently undeveloped portion of the campus. RM-3 is the Mixed Housing Type Residential-3 Zone and RM-4 is the Mixed Housing Type Residential-4 Zone. Both these RM zones allow a variety of residential, commercial, and civic activities. The primary difference between RM-3 and RM-4 is the amount of allowed residential density: RM-3 allows 1 unit per 1,500 sf. of lot area, whereas RM-4 allows slightly more density (1 unit per 1,100 sf. of lot area).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhoods with easy non-car access to jobs, parks and schools. They should be rezoned to at least RM-2. (Also in Figure 1 below). ● Heights: RM-1 should allow 3 stories by right. ● Parking: The current requirement of 1 unit of off-street parking requirement in most Oakland greater than ½ mile from transit makes most missing middle projects infeasible. The off-street parking requirements should be fully eliminated. Alternatively, the city could match the California ADU standard by eliminating off-street parking requirements within one (1) mile of any bus stop, but if so should require no more than 0.5 spaces per unit elsewhere. ● Setbacks: ○ As written, the Missing Middle Program offers no reduction in setbacks. As we have seen in Minneapolis and other places the failure to reduce lot coverage and setback rules in tandem with upzoning for 2-4 units will result in few to any construction. The existing RM front setback of 15-20' is a nonstarter for middle housing development. ○ Consider reducing RM setbacks to 10' for front setbacks (or average of immediately adjacent neighboring buildings, whichever is less), 4' on all sides, and 0' for inner side or street side on lots less than 50' wide. ○ Increase lot coverage to allow 50% lot coverage in all residential zones for projects seeking 3 or more units. - increased to 55% ○ Some zones have not only minimum lot area but minimum average width and minimum frontage. Those should be reduced in tandem with minimum lot areas. ● High-resource/Low-VMT gradation: ○ In order to reduce patterns of spatial segregation, Oakland should make special effort	Comment noted. Staff will undertake a comprehensive update of the Land Use and Transportation Element (LUTE) and the Planning Code in Phase 2 of the General Plan Update process B. Guidance from State HCD requires sites to be between 0.5 to 10 ac to accommodate lower income RHNA. Using that guidance and feedback from State HCD, staff identified additional sites in Rockridge (that are not included in the Draft Sites Inventory) that conform to State HCD requirements (0.5 - 10 ac) to accommodate lower income RHNA. THe 3 sites that were identified include: 5354 Claremont Ave, 5257 College Ave, and 6209 College Ave. The 51st and Broadway site has also been added to the updated Sites Inventory for the Revised Housing Element. This site was previously excluded as the City had received a pre-app for development on the site, but Staff recently provided a decision that the proposed activity was not an allowed use. In order to avoid split zoning/zoning inconsistencies along Claremont Ave, other sites such as the DMV site at 5300 Claremont Ave were included. Claremont flatiron parcels are included in the sites inventory The revised 2023-2031 Housing Element includes additional sites as part of Appendix #: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) (list Table #) See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands C. Comments noted and the City will create a 55 feet height area and increase heights along College Avenue and Claremont Avenue to 55'. These changes will be implemented via the Missing Middle Planning Code Amendments in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to ensure that 2-4 unit development is feasible in high-resource residential neighborhoods. The high land values of these neighborhoods also makes it harder for 2-4 residential uses to outbid luxury single-family homes. Therefore, we have previously written to Oakland suggesting that additional density beyond 4 units and additional setback relief be offered in high-resource areas. The proposed Missing Middle Program makes no effort in that regard. We recommend Oakland revise the program to confer additional density (baseline 5 units) and additional setback relief in high-resource residential zones. ○ In order to reduce VMT, Oakland should allow additional density and setback relief in residential zones near BART stations. ● Mills College: ○ Please clarify the reasoning behind rezoning Mills College at Northeastern University from RM-3 to RM-4. Plans for student housing on the actual Mills site should be tailored to student housing; RM-4 is a residential neighborhood standard. Without additional context, this appears to be a paper upzoning that will result in no new housing. ● Accessory Commercial Units: ○ The Proposals' key points from community engagement cites the need to attract retailers in food deserts. In many Oakland neighborhoods, especially East Oakland, the distance between commercial corridors where retail uses are permitted exceeds easy walking distance. Moreover commercial floor plates are often too big or expensive for many start-up or would-be retailers. ○ All RM zones in the current intent section	Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands D. Comment noted and the City will upzone Lower Rockridge from RM-2 to RM-4 via the Missing Middle Planning Code Amendments that will be implemented in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands E. Comments noted and the City will increase heights along Shattuck Avenue back to 45' or more to facilitate housing development in this high-resource and low-VMT neighborhood via the Missing Middle Planning Code Amendments that will be implemented in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands F. As part of the Safety Element Update, the City is studying the potential for areas that might be appropriate to be included in the Very High Fire Hazard Severity Zone (VHFHSZ) based on analysis regarding evacuation scenarios. The City will implement the Affordable Housing Overlay between June - July 2023 **Action 3.3.5:** Implement an Affordable Housing Overlay includes the

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			include "and neighborhood businesses where appropriate", but in practice all subzones except RM-5 make food sales, restaurants, cafes, and retail sales require conditional use approval, and alcohol sales are only allowed if grandfathered. Consider allowing a wider range of commercial businesses as permitted in any space less than 600 square feet in all RM and RU zones ("Accessory Commercial Units") to facilitate greater food access, increased walkability and low impact diversity of uses. B. The proposed Rockridge rezoning sites have sig related to feasibility, equity and displacement risk swath of land rather than picking a handful of site effective. "● DMV: Does Oakland have written confirmation that DMV plans to redevelop its property on Claremont? The use of state-owned land for redevelopment must be accompanied by a firm commitment by the Department of General Services to redevelop the site within the eight year planning period. ● 5248 Claremont Avenue: Site 5 on Figure 4 is a 3-story, 42-unit apartment building constructed in 1959 called Claremont Park Apartments. It is highly likely that this property is subject to Oakland's rent control ordinance. In any case, this property should not be rezoned. If it remains as a rezoning site either: 1) no redevelopment will occur due to the costs associated with SB330/SB8 replacement, relocation and right to return requirements; or 2) redevelopment will occur and 42 units of rent-controlled housing will be destroyed when vacant, commercial and owner-occupied sites abound nearby. Oakland should not be in the business of designating rent-controlled housing in high-resource areas for upzoning and redevelopment. Please remove this site.	following revisions: The City will create an Affordable Housing Overlay (AHO) to streamline the approval of affordable housing by right. Proposed ~~otential~~ features of this overlay ~~could~~ include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will ~~study the feasibility of~~ broadly apply~~ing~~ this overlay, except for , limitations on designated historic resources as well as ~~selected~~ areas in the Very High Fire Hazard Severity Zzone (VHFHSZ). ~~contaminated sites, and protected historical sites/districts~~. The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as the potential for select areas within the VHFHSZ for the overlay to apply. The City will ~~also study allowing~~allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay. 100 percent affordable projects within the AHO zone would be subject to a ministerial approval process. A proposed project would be exempt from CEQA and not be appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			● Trader Joe's parking lot: This is a high-volume grocery store with two surface parking lots. It is highly unlikely either the store itself or the parking lot fronting College Avenue will be redeveloped. The Miles Avenue fronted surface parking lot may be feasible for redevelopment, but it will be difficult given that the CN-1 standards only permit approximately 40 units. ● 5264 Claremont and 5256 Claremont: These sites include approximately four residential units. Under the CN-1 density standards and unchanged 35' height limit these sites could yield 9 units at most each. If there are existing low-income tenants on-site then 1 or 2 of 9 units will be required to be replaced with deed-restricted units. Does Oakland have a track record of producing developments with less than 10 units and on-site affordable housing in this manner? If not, they should be considered for higher density or removed. ● 6209 College: This site has an existing banking use and surface parking lot. Under the CN-1 standards it can yield at best 20 units. It is unlikely that 42 dwelling units per acre will outbid the existing banking use. ● 5220 Claremont: This site has an existing pediatric use that is part of UCSF Benioff Hospital. Has Oakland obtained written evidence that the property owner intends to discontinue this use within the eight year planning period? ● Unpicked Sites: As seen above, there are significant issues with Oakland's Rockridge rezoning sites. There are many sites that Oakland could identify for rezoning that would be more feasible for housing while minimizing displacement. ○ The vacant site at Pleasant Valley/51st Street and Broadway - This is a large vacant site near	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			BART and Lines 51A and 18. It is in a high-resource tract and has easy access to health services, grocery stores and open space. - Home Depot ○ Claremont flatiron - This vacant parcel at Claremont and College is currently zoned to only allow 18 units. It was also a very popular site in the city's survey data. Consider rezoning to allow 75 dwelling units per acre. ○ Gas Stations - There are several gas stations that could be rezoned within Rockridge. - can be considered for rezone/upzoning but not for sites inventory due to non-vacant sites issues and contaminants-cleanup ○ 51st Street - This is a 75' wide residential street with bus service and is within a ½ mile of Rockridge BART. It is proposed to be rezoned to RM-2. It should be rezoned to allow for multifamily housing with heights of 45' and up to 55 dwelling units per acre. The existing uses of mostly owner-occupied single family homes and a few duplexes would reduce the impacts of potential displacement and relocation costs. ○ In practice, most development usually occurs in places outside those designated in housing elements, because for- and non-profit developers evaluate prospects in different ways from planning professionals and often come to different conclusions. In addition to trying to pick winners among sites, the city should consider a broader upzoning to 6+ stories and 75+ units per acre in a one-mile radius of Rockridge BART." C. Choosing to leave in place current heights in Rockridge along College Avenue and Claremont Avenue, while miles of MacArthur Boulevard and International Boulevard in East Oakland are rezoned to allow significantly more height and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development, is reinforcing patterns of spatial segregation. Oakland needs to be more ambitious with North Oakland standards to affirmatively further fair housing as required by state law. ● Commercial Corridor: ○ As noted below, commercial corridors throughout West and East Oakland are having their heights increased. These include commercial corridors close to BART and high-frequency bus (Fruitvale, West Oakland, Coliseum, and Telegraph Avenue near MacArthur BART) as well as on BRT lines (International Boulevard in San Antonio and between 73rd Avenue and Durant Avenue) and also some corridors miles from BART (Dimond District and Laurel District). All the while, heights for the commercial corridor of College Avenue near Rockridge BART remain untouched at 35' in CN-1 zones. ○ While Oakland proposes to rezone eight sites along College Avenue and Claremont Avenue, there are significant issues with many of these sites (see below). Moreover, it is concerning that Oakland seems perfectly willing to increase heights along miles of MacArthur and International boulevards but cannot countenance allowing more than two parcels to go up to 65' on College Avenue. ○ While we support height increases in commercial corridors generally, we are concerned about the horizontal inequity of excluding College Avenue and Claremont Avenue. Why should a strong commercial corridor in the Laurel District, over 2 miles from Fruitvale BART, be rezoned from 35' to 65', while College Avenue, within 1⁄2 mile of Rockridge BART, remains at 35'? Why should	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			commercial land in Deep East Oakland in Elmhurst along International Boulevard go from 75' to 95' while Claremont Avenue near Rockridge is stuck at 35'? Are the existing commercial uses in Rockridge simply more valuable to Oakland than the existing commercial uses in East Oakland? ○ This concentration of multifamily development potential in lower income and non-white neighborhoods, especially in East Oakland, while preserving the height limits of commercial land in high-income and mostly white Rockridge is reinforcing, not reversing, existing patterns of spatial segregation. ○ Oakland, in order to affirmatively further fair housing, should increase heights along College Avenue and Claremont Avenue to 55'. D. RM Zoning: As noted above, Lower Rockridge needs to go from RM-2 to RM-4 in order to allow for 3- or 4-unit development to occur - or the entire RM zone needs to allow 3- or 4-unit development both by right and in practice. E. Oakland should undo the 2011 downzoning along the high and moderate-resource Shattuck Avenue commercial corridor and increase heights to 45'. Commercial Corridors We understand that many of Oakland's proposed commercial corridor rezonings are meant to reconcile planning code with building typologies. In addition, the Proposals increase heights in commercial corridors in several key areas near transit (excluding College Avenue and Claremont Avenue in Rockridge). While these heights increases are certainly helpful for increasing housing feasibility and lowering VMT we are concerned about the lack of height	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			increases in key areas. Park Boulevard: Heights along the commercial sections of Park Boulevard in Eastlake and Glenview should be increased. Shattuck Avenue: This section was downzoned in 2011 to 35' in response to housing development in the mid-2000s. Homeowners in these high-resource areas pushed to downzone the corridor due to concerns about development exceeding existing zoning (through use of State Density Bonus Law) but within the general plan designations; the groups supporting the downzoning cited impacts to "sunlight, privacy and appearance." [Oakland Planning Commission staff report, July 14, 2010; attached as Exhibit B]. This was a poor justification for downzoning a high-resource, low-VMT transit corridor and should be undone. In February 2021 a 45' multifamily development project at 6501 Shattuck Avenue (½ mile from Ashby BART) that had submitted an application prior to the 2011 35' downzoning was appealed and delayed for months by nearby homeowners and landlords. The appeal was ultimately rejected but such appeals add risk and cost to housing development. Recently, a proposal was submitted for an apartment building at 6341 Shattuck Avenue. Consistent with the zoning, it is limited to 3 stories; allowing 4 stories would likely enable a 30-40% increase in new homes built. Consider increasing heights along Shattuck	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Avenue back to 45' or more to facilitate housing development in this high-resource and low-VMT neighborhood. F. We make various suggestions to improve the proposed Affordable Housing Overlay, including removing the exemption for height bonuses for prospective Areas of Primary Importance that are formed after the effective date of the rezoning. Overall we are highly encouraged by the Affordable Housing Overlay (AHO) proposal. We believe it has the potential to open up more residential land for affordable housing development, including in high-resource areas. The by-right provisions of this rezoning program can provide needed greater certainty to affordable housing developers. The AHO, if implemented with care, can deliver more low and moderate income housing and help reverse patterns of spatial segregation. We offer the following suggestions: Co-ops and CLTs: Make sure the ordinance explicitly allows co-ops and land trusts to use the AHO. Relax open space requirements: convert open space per unit into open space per residential living space, so that more density does not penalize them in terms of open space requirements. For further context, the CN zone already has lower requirements for efficiency units but residential zones do not. Cohousing: Allow cohousing with shared bathrooms and shared kitchens.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Historic Districts: Not allowing +20ft height in historic areas, aka Areas of Primary Importance (APIs), is inequitable. Some of the high-resource areas affected include most of the rectangle between Alcatraz, Woolsey, College, & Telegraph; as well as the entire CCA site at 5200 Broadway. A historical building is not demeaned or diminished by having a taller building next to it. We strongly request that Oakland does not allow newly formed, prospective APIs at the effective date of the rezoning to be exempted from AHO height bonuses. Roof Heights: Many zones like RM currently allow 5 feet more roof height than wall height to allow for pitched roofs. But when this proposal adds 20 feet that +5 feet often vanishes. What is the rationale for this? Pitched roofs can work in taller buildings too. Consider allowing +5 feet for pitched roof in every AHO zoning category. DBL Consistency: Clarify the meaning of 100% affordable in terms of income levels that the units must be restricted to. At a minimum, 100% affordable projects under the definition of State Density Bonus Law (AB1763), which are defined as 20% moderate-income, 80% extremely, very low or low-income, and one manager's unit, should qualify under the city AHO. Additionally, the city could consider allowing more than 20% of units to be moderate-income-restricted to open more options. Parking: Off-street parking requirements	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			represent significant hard costs and opportunity costs for low-income housing. Parking requirements are a binding constraint on development of multifamily housing that reduces site viability. AB2097 and other state bills have reduced parking requirements within ½ mile of transit and in low-VMT areas. Oakland should go further and require no off-street parking for AHO projects anywhere. Fire Zones: The Very High Fire Severity Zones (VHFSZs) are exempted from the AHO. While there are valid safety concerns related to fire risk and escape we would be remiss not to point out the inequity of exempting high-resource and historically exclusionary VHFSZs. Oakland should explore allowing AHO projects in VHFSZs with hardening and other mitigations.	

Appendix L – Response to Public Comments

The public comment period for the first Draft 2023-2031 Housing Element began on May 12, 2022. As required by AB 215, the first Draft Housing Element was available for a 30-day public review period, before incorporating public comments and sending the revised first draft to HCD. Based on community feedback and to ensure that the Oakland community had enough time to review and comment, the City kept the first public review draft of the Housing Element available for public comment through the 90-day State HCD review period (June 30 - September 30, 2022). Thank you to all those who submitted public comments and attended public meetings.

Based on community feedback and direction from Councilmembers, staff have prepared a response to comments to illustrate how the revised draft reflects public input received during the 142-day comment period.

A total of 54 comments, comment letters, and emails were received during the comment period. Comments and responses to comments are organized by the date they were received. Each letter or summary is identified by a designator (e.g., "1"). Specific comments within each letter or summary are identified by a designator in the page margin that reflects the sequence of the specific comment within the correspondence (e.g. "1-A" for the first comment in Letter 1). Click the TOC below to jump to a response.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
1	**Sid Kapur, YIMBY Law, Greenbelt Alliance**	4/21/2022	To meet the 6th cycle RHNA target, the rate of new housing permits in Oakland would need to increase from 2,386 units per year in 2018-2021 to 3,281 units per year in the next 8 years. This is a 38% increase from recent years. If the current pace were to continue, Oakland would meet only 73% of its new housing target. Based on these trends, it is unlikely that Oakland's existing realistic zoning capacity is sufficient to meet its 6th cycle RHNA target. According to HCD's Housing Element Site Inventory Guidebook, housing elements must analyze the realistic capacity of their sites, which may include considerations of "[l]ocal or regional track re-cords", "past production trends", and "the rate at which similar parcels were developed during the previous planning period". A housing element that does not include a significant rezoning component is therefore un-likely to be compliant with state law. We urge Oakland to include a major rezoning component in its Housing Element—a rezoning large enough to close the gap between recent housing production trends and the RHNA target. The rezoning should be within existing communities and should comply with the city's obligation to Affirmatively Further Fair Housing. We also urge Oakland to ease any other constraints, such as discretionary approval processes or impact fees, that may impede the rate of development on your city's housing sites.	Goals 3 and 5 in Chapter 4 - Housing Action Plan in the 2023-2031 Housing Element seek to close the gap between affordable and market- rate housing production by expanding affordable housing opportunities and promote neighborhood stability and health. Actions under Goals 3 and 5 will increase housing production capacity, unlock additional opportunities for affordable and missing middle housing, and affirmatively further fair housing by opening up high-resource and exclusionary neighborhoods, reducing exposure to air pollution, toxic and other environmental hazards in environmental justice communities, and prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities. These actions will allow zoning for diverse housing types, elimination of Conditional Use Permits (CUPS), implementation of Objective Design Standards, increased heights and densities along corridors such as MacArthur, International, Foothill, College, Claremont, Dimond, increased heights and densities in transit proximate areas such as Rockridge BART, and resource-rich areas such as Rockridge, Trestle Glen, and Crocker Highlands. See Appendix J for the City's proposed rezoning changes. In addition, the Housing Action Plan also includes actions to address constraints such as discretionary approval processes and impact fees. **Specific actions include:**- Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. - Action 3.3.5: Implement an Affordable Housing Overlay - Action 3.3.9: Adjusting or waiving city fees and payment timing for affordable housing developments - Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setbacks requirements. - Action 3.4.3: Revise Conditional Use Permit (CUP) requirements - Action 3.4.4: Revise citywide parking standards - Action 3.4.5: Revise open space requirements - Action 3.4.8: Implement objective design standards - Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop affordable housing by right

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				- Action 5.2.8: Encourage new affordable housing in higher resource neighborhoods - Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration
2	**Dimond Improvement Association**	5/17/2022	**High Level Goals** 1. Develop without displacement a. Focus upzonings on commercial properties and single-family homes. Do not upzone multifamily buildings that are subject to rent control (i.e. multifamily buildings built before 1983). b. Continue to enforce the Housing Crisis Act of 2019 (SB 330) to ensure that any loss of rent controlled units is met with the addition of a corresponding number of new affordable units. 2. Encourage redevelopment in locations on and near transit lines in and around the Dimond to reduce vehicle miles traveled (VMT). a. In general, increase the number of people in the Dimond, but decrease the number of cars 3. Focus on mixed use developments in the Dimond Business District (DBD) and other commercial properties in and around the Dimond	The City actively enforces SB 330. Please see Action 1.1.11: Enforce the Tenant Right to Return and Action 2.2.5: Extend Local Replacement Unit Provisions. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
			Focused Goals - Parking 1. Eliminate parking minimums for new housing construction in the DBD and all areas in the Dimond within 1 mile of transit stops. 2. Establish parking maximums for new housing developments in the DBD of less than 0.1 parking space per dwelling unit. 3. Establish bicycle parking minimums of 3 spaces per dwelling unit.	As part of Action 3.4.4: Revise citywide parking standards, the City will eliminate parking minimums within ½ mile of a major transit stop and reduce parking minimums in downtown. The City also establish new parking minimums near BART stations. See Appendix J for the City's proposed rezoning changes. Comment noted. Staff will coordinate a study of parking maximums in areas beyond downtown and areas near BART as well as increases to bicycle parking minimums citywide as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process
			Focused Goals - Zoning 4. Establish a base height limit of 55 ft in the DBD a. Upzone Opportunity Sites to a max height of	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			65 ft. b. Make exceptions for rent controlled (built prior to 1983) multifamily housing. c. Structure zoning changes such that newly constructed housing does not interfere with current and future business license permitting requirements (eg., liquor,cannabis dispensary, restaurant licenses, etc). d. Developments seeking additional height and density may do so through the State Density Bonus Law. 5. Upzone all transit corridors in and around the Dimond to 55 ft (MacArthur Blvd, ParkBlvd, Fruitvale Ave, Lincoln Ave, etc). a. Make exceptions for rent controlled (built prior to 1983) multifamily housing. b. Modify zoning changes to within allowable density limits in high severity fire zones. **Small Lots** 1. Draft clear rules for increasing density on smaller lots with different housing types (eg,apartments, bungalow courts, townhouses, etc), that allow for ministerial approvals. **Small Lots** 2. Allow for six (6) units by-right for any lot that allows ADUs. Allow for ten (10) if two (2) are deed-restricted for affordable housing (subject to fire and building codes). a. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.	
			Small Lots 3. Legalize Accessory Commercial Units (ACUs) wherever ADUs are permitted to lower the barrier to entry for small-scale commercial businesses and encourage walkability within neighborhoods. a. Draft rules guiding the permitting process of ACUs that allow for ministerial approvals.	Comment noted. Staff will study this as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			b. Limit public hearings to only one (1) if, and only if, the appearance of the lot is changed from the street view.	
			Potential Opportunity Sites for Redevelopment with a focus on Mixed Use 1. Empty lot at MacArthur Blvd and Dimond Ave, 2114 MacArthur Blvd 2. Bank of America,2154 MacArthur Blvd 3. Wells Fargo and Chase Bank, 3450-3438 MacArthur Blvd 4. Giant Burger, 2055 MacArthur Blvd 5. Safeway, 3500 Fruitvale Ave 6. 7-11, 2411 MacArthur Blvd 7. CVS, 3320 Fruitvale Ave 8. Oakland Imported Cars, 3200 MacArthur Blvd **Suggested Project Homekey Sites** 1.Highlander Motel, 3255 MacArthur Blvd 2.The Oaks Motel, 3250 MacArthur Blvd	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) Oakland Housing and Community Development (Oakland HCD) department will encourage owners to work with sponsors to apply to the City's Homekey RFP due 11/18/22
3	**Jesse Boudart**	5/19/2022	My general comment for the plan is the following: Remove restrictions / increase incentives for developers and people to construct housing such as large buildings and/or ADUs	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. In addition, the Housing Action Plan also includes actions to address constraints to ADU development through actions in Chapter 4: Housing Action Plan. Specific actions include: Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units. Action 3.4.8. Implement objective design standards. Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.
4	**Derek Sagehorn**	5/21/2022	The draft housing element lists 288 9th Avenue (APN 018 046500204) as a low-income site zoned for 254 units. This is park space that contains Township Park and Rocky's Market. Both were built in the past 5 years. Please remove this site from the site inventory. I would encourage you to re-allocate the 254 low-income units to high-resource sites such as the Claremont/College flatiron or new sites like 5354 Claremont Ave.	This site has been removed from the Revised 2023-2031 Housing Element.
5	Bret Peterson	5/22/2022	The draft HE fails to list 3 sites that are mapped on the pg 7 "Housing Sites Inventory" map. These sites are 2441 MacArthur Blvd, 2055 MacArthur Blvd, and 2120 Montana St. 2441 and 2055 MacArthur should be listed as official sites, as they are underutilized lots. Since 2120 is a current gas station, it is unclear if it could be developed in the next 8 years. It is also strange that 2833 MacArthur has been left off the DHE. It is a dying strip mall with vacant storefronts and should be redeveloped for housing to reinvigorate the neighborhood. It is also on the MacArthur transit corridor and across the street from a public school.	Comment noted, see revised Housing Sites Inventory. 2055 MacArthur Blvd and 2120 Montanta sites are included in Table C-17. 2441 MacArthur Blvd is an existing single-family residence and is not included in the sites inventory. The revised 2023-2031 Housing Element Housing Inventory includes the 2833 MacArthur site.

7	**Kristin Spanos, First 5 Alameda County**	6/1/2022	A. Increase the supply of affordable housing options for families with young children to support child health and well-being and prevent displacement of Black families and families disproportionately impacted by inequitable policies with racist and classist underpinnings. Housing costs result in little or no disposable income for many families—putting pressure on families to decide between other basic needs like child care, food, and diapers. •50% of renters in Alameda County pay more than one-third of their income for rent. For families of young children, the cost of child care creates an additional financial burden and contribute to financial	A. Comment noted. B. Comment noted. The City can also help to advance First 5's interest in affordable housing for young families by continuing to bring to market the City's surplus properties for affordable housing development consistent with the State Surplus Lands Act. It's up to market actors (e.g., affordable housing developers) to propose projects that might specifically address the needs of this cohort. C. and D. See **Action 5.2.8:** Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with **NEW Action 5.2.9:** Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			instability. See more in our Data for Action guide. B. Adopt housing policies that support and advance the workforce of professionals who support our families including the ECE workforce, navigators, case workers, and family resource providers. The high-cost of living in Alameda County also impacts our local community workforce. For example, the ECE workforce has historically earned lower wages than other educators in the public system. Affordable housing is a particularly pressing need for the population of mostly women small business owners who operate local family child cares homes; without affordable and stable housing, family child care providers who provide home-based care face this risk of losing their business, and our community faces the risk of losing the critical service they provide. In Alameda County: •Fifty-nine (59%) of family child care providers reported earning less than $15 per hour and struggle to meet their basic needs including covering the cost of rent or mortgage. In Oakland, approximately 40% of center directors and family child care providers rent their facility/home (192 of 481 child care programs). •Eighty-seven (87%) of ECE professionals, 79% of whom identify as Black, Indigenous, or other women of color, are considered very low-income for the county •In our recent ECE facilities needs assessment survey we found:o87% of Oakland center directors and family child care providers expressed interest in expanding their program to serve more children but have not been able to due to	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			lack of resources and support. o69% of Oakland center directors and family child care providers reported at least one component of their center or home as "inadequate or substandard" A. Expand and prioritize supports for unhoused pregnant people and families with young children. The high costs of housing and population growth have made Alameda County a hot spot for housing instability and homelessness in the state of California. According to the Department of Housing and Urban Development, the first year of life is when people are most likely to enter shelter and transitional housing programs, followed by ages one to five. Pregnant women and families with young children are particularly at risk when they face housing instability. Currently in our county, families with newborns cannot leave the hospital without a car seat, but they can leave without a home. •One in five pregnant women who are homeless give birth prematurely, according to research findings cited in the California Health Report. •In 2018, the homeless management information system showed 969 families with 2,917 members as homeless in Alameda County, including 433 children ages 0-5. We know these numbers do not reflect the true extent of the issue as many families do not come forward to ask for assistance out of fear and live in their vehicles or with friends instead.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			B. Support place-based investments to promote family friendly neighborhoods. As part of the Neighborhoods Ready for School (NRFS) strategy, First 5 Alameda funds trusted community organizations and family resource centers to build an ecosystem of support for families in the community. Three of our four NRFS grantees are in Oakland - Lincoln, San Antonio Family Resource Center, and Roots Community Health Center are working with partners to promote neighborhood conditions where families can thrive. These grantees quickly pivoted at the start of the pandemic to provide basic needs, health and safety supplies, and other family resources via trusted messengers in community. The city could build upon such place-based investments in a coordinated effort to support family friendly neighborhoods - including access to basic needs, affordable housing, child care, transportation, neighborhood libraries, and safe, green and accessible schools, parks, playgrounds. In our latest KRA we found that: •Connection to resources (i.e. family navigation to economic supports and basic needs, including housing) was significantly correlated to higher kindergarten readiness •Families who resided in a higher-income neighborhoods reported higher readiness, and neighborhood assets (i.e. safety, parks/playgrounds, libraries) were correlated with	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			readiness, regardless of family income •Families want policies that invest in the local economic development to support job creation and advance living wages particularly for Black and Brown communities	
8	**Comments Received on City Staff Presentation to EBHO Oakland Committee**	6/1/2022	A. Constraints – noted that staff mentioned high impact fees as a constraint, but from what Liana hears, fees aren't high enough B. Please include an executive summary of the HE – organization and content C. Site inventory – need map of sites across the city with council districts, distinguish sites for lower income housing/market rate. Map sites against areas of concentration race/income - higher income and largely white neighborhoods; to what extent is the City putting multifamily and affordable housing into those areas. What share of lower income housing sites are going into high opportunity/high segregation areas? D. Housing Action Plan - is the list of new programs in the HE anywhere? E. Plan/study/consider - show that proposed HAP policies will be presented to the Council for consideration by a specific date so that we are not endlessly studying. Show that policies will in fact reduce the racial disparities in housing opportunity/outcomes/conditions identified in the fair housing assessment	A. Comment received. Impact fee constraints are discussed in Appendix F: Housing Constraints B. The revised 2023-2031 Housing Element includes an Executive Summary. C. The interactive Sites Inventory Map includes sites, Council Districts, and affordability level and is available at: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d D. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions with blue text**.** E. Actions in Chapter 4: Housing Action Plan includes discrete implementation timelines and milestones within the eight-year Housing Element planning period.
9	**Jeff Levin, Planning Commission Hearing**	6/1/2022	A. What actions is the city taking to encourage affordable housing development as a result of SB9 B. Five year impact fee study – when will this occur? C. AFFH - sites need to show how we are breaking down patterns of segregation. Are we	A. The City has published a Planning Application For Ministerial Approval of Two-Unit Residential Development or Parcel Subdivision Resulting in Two Lots With Residential Units On Each Lot (SB-9) and provided clear step-by-step instructions for potential applications. More information can be found at: https://www.oaklandca.gov/services/apply-for-two-unit-residential-development-and-parcel-subdivision-resulting-in-two-lots-under-senate-bill-9-sb-9

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			also providing opportunities in racially segregated areas, specifically white affluent parts of town? Policies need to show that we will reduce racial disparities in housing and metrics D. Place-based strategies in investing in non-housing like infrastructure and facilities must be coupled with investing in lower income neighborhoods	B. The Five-Year impact fee study is currently underway. More information can be found at: https://www.oaklandca.gov/projects/5-year-impact-fee-review-and-update-reports C. The Housing Element presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures. Sites for upzoning are included in Table B of Table C-26, and an analysis of how sites affirmatively further fair housing is available in Appendix D. D. See Response to Letter #6 C. and D.
10	**Daniel Gregg, Planning Commission Hearing**	6/1/2022	Encourage development of local construction labor, apprenticeship programs, workable local hire, workforce necessary to build housing we desperately need	Comment noted.
11	**Michael Gabriel, Planning Commission Hearing**	6/1/2022	Lean toward objectivity. Action 2.2.8 "Investigate" TOPA/COPA, Action 1.1.3 - Strengthen Ellis Act – "strengthen" is an advocacy word. Implement, evaluate, monitor might be better words. Lacking information and education about how to follow rules on the landlord's side. Action 1.1.8 - rental registry – "evaluate the value of" instead of advocacy. Limit condo conversions – "evaluate" or "impact" instead	Comments Noted.
12	**Tuan Ngo, Planning Commission Hearing**	6/1/2022	TOPA/COPA - Change on p. 57 to reference this as an approach - Moving private properties into social housing will negatively impact small mom and pop owners	Comments noted. Enactment of a Tenant/Community Opportunity to Purchase Act (TOPA/COPA) policy would require City Council review and approval. See updates to **Action 2.2.8:** Investigate a Tenant/Community Opportunity to Purchase Act.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			- Richmond City Council unanimously voted to halt this program - Instead, put affordable housing directly into the hands of low income tenants, provide downpayment assistance to homebuyers	
13	**Lucky Thomas, Planning Commission Hearing**	6/1/2022	TOPA/COPA - Housing can be provided in many different ways/forms than just TOPA/COPA - Housing plan needs to be objective, shouldn't be advocacy for a political view or position - We should look at how do we best preserve our city, support mom and pop businesses, small property owners - Remove TOPA/COPA. Explore condo conversions, cooperatives, etc	
14	**Daniel Gonzalez, Planning Commission Hearing**	6/1/2022	TOPA/COPA - in the current version, it allows for a 50% rent increase on tenants in a 5-year period. Policy isn't well thought out yet, shouldn't be a part of the housing element	
15	**Planning Commissioner Fearn, Planning Commission Hearing**	6/1/2022	A. Why didn't we build on opportunity sites from the previous cycle(s)? B, Is there a cliff notes version of what the State wants to see related to AFFH thresholds in the HE? Are we leaning on our policies to ensure we meet RHNA because w're not locating housing in opportunity sites?	A. Majority of new housing development occurred in neighborhoods targeted for new development such as the Broadway Valdez area, Downtown, and West Oakland, in addition to along major transit corridors. B. The Housing Element presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
16	**Planning Commissioner Sugrue, Planning Commission Hearing**	6/1/2022	Are Staff having conversations with market rate and affordable housing developers about the types of housing they want to build within a 5-10 year range? Townhomes are the most lucrative products now. How can we be as predictable as possible?	Between March - May 2022, Staff held a series of Housing Element focused discussion groups with affordable and market rate developers, housing justice and tenant rights advocates and received feedback on housing types. Staff will hold a series of discussion groups starting in December 2022 to discuss and gather feedback on the zoning reforms proposed in conjunction with the Housing Element Update
17	**Planning Commissioner Renk, Planning Commission Hearing**	6/1/2022	We already know we need to expand City resources, so how do we think about taking all of these goals, policies, and actions and turn them into reality? How do we do this when staff are already low capacity? Is there a step where some of this is winnowed down?	Comment noted.
18	**Planning Commissioner Jones, Planning Commission Hearing**	6/1/2022	How does City see growing trend of integrating ADUs in townhomes? How does this contribute to the housing element as a whole?	On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs. The City has seen continued interest in ADU development and has continued to approve building permits for ADU development. The revised 2023-2031 Housing Element includes 2 NEW actions related to ADU development and affordability projections: - **Action 3.2.5:** Reduce constraints to the development of ADUs - **Action 3.2.6:** Monitor affordability of permitted ADUs
19	**Planning Commissioner Shirazi, Planning Commission Hearing**	6/1/2022	A. Are Staff working with EWD and HCD to ensure that displacement pressures are mitigated / working with other existing plans and policies to align? B. Overarchingly, all of these policies are either proven to be positive or good to study in Oakland since we are not quite sure yet about some policies. Implementation is the next step (iterative) - we should think about an assessment at the midway point in the housing element cycle, which would ultimately save us time and resources.	A. Oakland Planning Staff are working in collaboration with Economic and Workforce Development Department, Oakland Housing and Community Development Department, and all City departments, as appropriate, to ensure that displacement pressures are mitigated and are in alignment with other existing plans and policies. B. Progress toward addressing each Housing Element program and policy is evaluated in the Annual Progress Reports submitted to State HCD. In addition, the revised 2023-2031 Housing Element includes a **NEW Action 3.3.19:** Sites Inventory and Fair Housing Accomplishments Tracking Program, which will require mid-cycle assessment of the effectiveness of AFFH programs. C. Comment received. D. Comment received.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			C. Action 2.2.3 residential demolition - current ordinance may not be living up to what the goals were. We should look broader D. Limit condo conversions - has good intentions, but may unintentionally limit housing purchase opportunities	
20	**East Bay for Everyone**	6/7/2022	**Site inventory** 1. 288 9th Avenue (APN 018 046500204) - This site is on top of Township Park and Rocky's Market. It is unlikely this site will discontinue use within the eight year planning period. Please re-allocate these 274 units of low-income to another site or sites	This site has been removed from the Revised 2023-2031 Housing Element
			Site inventory 2. 514 Shattuck Avenue (APN 013 115400905) - This site is a low vacancy strip mall in Temescal and tagged as an supplementary AFFH site. The prescribed 182 units are unlikely to outbid the existing profitable uses. a. Does the City of Oakland have documentation from the landowner demonstrating interest in developing this site within the next eight years? b. There are nearly a dozen businesses renting on this site. Will those leases run beyond the planning period? c. The City of Oakland should consider increasing the allowable density above 182 units and increasing allowable heights to ensure this site is actually developed within the planning period	This site has been added to the Sites Inventory, Table C-26.
			Site inventory 3. 6039 and 6029 College Avenue (APNs 014 126800100; 014 126800100) - These are two adjacent vacant parcels in a high-resource tract very close to Rockridge BART. Collectively these sites of .4 acres will yield 26 units under existing zoning and development standards. Despite being ¼ mile from Rockridge BART, the City of	These sites have been added to the Sites Inventory, Table C-26.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Oakland imposes a 35' height limit on this site. a. In the notes for these parcels, the City of Oakland says it will not designate these parcels as Low-Income RHNA sites and re-zone them because they are below a .5 acre adequacy threshold for Low-Income sites per HCD Guidance. b. These sites received some of the highest Maptionairre Site Selections within the city's survey tool designed to solicit community feedback for siting housing as part of the Housing Element. Collectively these parcels received 23 recommendations for additional housing. c. The NIMBY group Rockridge Community Planning Council has tried to get the City of Oakland to buy these parcels and create a park for years in order to prevent mixed-income or affordable housing development at the site. d. The City of Oakland's reasoning for not designating this site as Low-Income and re-zoning is inconsistent with its other actions within the Draft Housing Element. For example, 4225 Broadway is a .15 acre site that is designated as a Low-Income site. 4225 Broadway is far below the .5 acre adequacy threshold for Low-Income sites provided by HCD guidance. By contrast, 6039 and 6029 College Avenue are only a 1/10th of an acre below this same threshold. In addition, 4225 Broadaway has existing uses that would need to be demolished whereas 6039 and 6029 College Avenue are currently vacant. 6039 and 6029 College Avenue are also closer to Rockridge BART and are in higher-resource tracts compared to 4225 Broadway and are more likely to be feasible for construction provided additional height and density.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			e. The City of Oakland should designate 6039 and 6029 College Avenue Low-Income sites. In addition, the City of Oakland should rezone and relax development standards to allow for at least 75 DUAs and 55' of height. This density and height is typical for sites in close proximity to BART stations. Given the wide range of small lot infill in Oakland over the past ten years as well as the prime location for TCAC scoring, the City of Oakland should be able to provide additional analysis to meet HCD's scrutiny of Low-Income sites below the .5 acre threshold. f. In the alternative, the City of Oakland should retain 6039 and 6029 College Avenue as Moderate-Income sites and rezone and relax development standards to allow for at least 75 DUAs and 55'. This density and height is typical for sites in close proximity to BART stations. g. As discussed below, every BART station in Oakland apart from Rockridge has been host to specific plans to facilitate transit-oriented development. The City of Oakland's failure to identify 6039 and 6029 College Avenue as sites for Low-Income or otherwise increase the allowable height and density perpetuates a pattern or practice ofthe City of Oakland excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood.	
			Site Inventory 4. 4400 Telegraph (APN 013 109902600) - This site is proposed for 24 units of Low - Income RHNA housing at a site owned by Critical Resistance, an abolitionist non-profit. a. An August 12, 2019 article from KQED describes how the prior owner of this parcel sold it to Critical Resistance after rejecting offers from "condo developers." b. Does the City of Oakland have	This site is included in the Sites Inventory. It is part of a larger group of sites; most of these sites are within an above 30 du/ac zone. While redevelopment would be at the discretion of the property owner, the HAP provides access to low-cost financing for developers, density bonus incentives, and support of grassroots developers. This parcel may also change the land use designation of this parcel as part of the LUTE phase 2.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			documentation of interest from the property owner in developing this parcel within the eight year planning period?	
			Site Inventory 5. 525 21st Street (APN 008 064503301) - This site is owned by the Department of Veterans Affairs and is proposed for 137 Low-Income units per RHNA. This site is coded as an AFFH supplementary site in a "moderate-resource" census tract. a. Does the City of Oakland have documentation of interest from the property owner in developing this parcel within the eight year planning period? b. The Draft Housing Element claims this site is in a moderate-resource tract. The 2022 TCAC Opportunity Map, however, shows this site as a low-resource tract. Given the concentration of low-income housing, supportive services, particulate matter from 980 and 580, lack of access to grocery stores and other resources, few Oaklanders would consider siting low-income housing at 525 21st Street as affirmatively furthering fair housing. c. Provided the Department of Veterans Affairs has expressed written interest in developing the site within the eight year planning period, this site should remain in the site inventory but should not be counted as a supplemental AFFH site. We have provided several sites in moderate and high-resource tracts below where these Low-Income RHNA units could be accommodated.	A-c: This site is included in the Sites Inventory. It is part of a larger group of sites; most of these sites are within an above 30 du/ac zone, and located in a moderate resource tract based on TCAC 2021 maps. The site is within walking distance to 19th Street BART and within a 0.6 and 0.7 miles of two full service grocery stores. The site is also close to Downtown, a major jobs center. See response above regarding HAP actions that incentivize housing development on sites identified in the Inventory.
			Site Inventory 6. 4225 Broadway (APN 012 100200900) - This .15 acre site projected at 8 units of Low-Income RHNA housing is coded as a supplementary AFFH site. a. This site falls below the .5 acre adequacy	A-c: As indicated in the Sites Inventory, this is an underutilized commercial site (low AV ratio and low FAR) with previous development interest and adjacent to a potential residential project. See response above regarding HAP actions that incentivize housing development on sites identified in the Inventory and provide support to affordable housing developers.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			threshold per HCD guidance. The City of Oakland provides zero analysis or justification as to why this small site would be developed or the city's track record of developing low-income housing on these sites. b. TCAC will not finance 8 unit low-income projects with tax credits. How does the City of Oakland expect a low-income housing developer to finance new construction at this site? c. There are several vacant and underutilized parcels surrounding 4225 Broadway that could be consolidated to create a more feasible low-income development opportunity site. Why weren't these sites included?	
			Site Inventory 7. 4200-4224 Broadway (various APNs) - This supplementary AFFH site is in a good location and would replace underutilized commercial uses and parking lots. The 60 DUAs, however, are unlikely to outbid existing commercial uses. Consider increasing allowable density to 75 DUAs.	This site is part of group III. Realistic capacity does not reflect allowable density; this site's current permitted density is 96.8 du/ac. The site may be considered for upzoning or land use designation change as part of Phase 2.
			Site Inventory 8. 6028 Claremont Avenue (APN 014 126803501) - This site is proposed for 23 Low-Income RHNA units in Rockridge on top of an existing office building. It is less than a ¼ mile from Rockridge BART. The site does not include adjacent parking lots that appear to serve the subject office building. The site is subject to a 35' height limit. a. The decision to include the office building, but not the parking lots that serve it is bizarre. The former Dreyer's headquarters, of which the subject site is part of, are owned by a single owner. Why would the owner demolish an existing office building to be rebuilt into 23 units of low-income housing but retain the	These sites have been revised to indicate grouping (ZZZ) which includes adjacent parking lots.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			surrounding parking lots that serve that office? b. 23 units of low-income housing will not outbid an office use so close to BART, especially with a 35' height limit	
			Site Inventory 9. 3875 Telegraph Avenue (APN 012 096800301) - This supplementary AFFH site is proposed for 35 Low-Income RHNA units. The existing use is a surgery center that is close to MacArthur BART, on a commercial corridor and is underutilized relative to its land value. a. The owners of this site previously refused rezoning between 2006 and 2008 as part of the MacArthur BART Transit Village PUD. b. The owners previously expressed interest in expanding the surgery use as recently as 2017. c. Given the owners' prior resistance to rezoning the site for housing, the City of Oakland must provide written proof of interest from the landowner in development of the site within the eight year planning period. d. This site, ⅛ of a mile from MacArthur BART, can accommodate much more density than 75 DUAs. If the owner provides written proof of interest in development, please consider increasing allowable density to 125 DUAs.	a-d: This site is upzoned in Table B of C-26; it is given a height increase to 95 ft, increasing allowable density to 158.4 du/ac. HAP Action 3.4.10 states that any site included in the inventory, should the property owner choose to redevelop, develop as a majority residential use.
			In order to effectively meet the demand for additional sites, especially in moderate to high-resource areas with low-VMT, we have provided a list of additional sites we ask you to consider. <u>Suggested Site Inventory</u> 1. 501 MacArthur - underutilized commercial use at the corner of two commercial corridors. 2. 5352 Claremont Avenue - 1.5 acre underutilized commercial use surrounded by a large parking lot. 3. 3901 Broadway - underutilized fraternal	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			lodge and parking lot. 4. 5216 Broadway - one of two Shell Gas stations within ½ mile of each in a high-resource neighborhood. 5. 6046 Claremont - .6 acre surface parking lot near Rockridge BART. 6. APN 14-1268-9-1 - .5 acre surface parking lot near Rockridge BART	
			Programs and Policies Program A. Action 3.2.1 - Plex upzoning in single-family neighborhoods o Consider using five units as the base permitted density to allow for projects opt-in to the State Density Bonus Law and provide deed-restricted units on-site. o Consider allowing up to six units for larger lots and corner lots. o Provide a ministerial approval process so that small developers and property owners with lower risk tolerances can participate in the program. B. Action 3.3.5 - Affordable Housing Overlay o Please do not exempt historic districts from this policy. Historic districts and potential designated historic properties (PDHPs) tend to exist in high-resource areas that have historically excluded low-income housing. For reference, Oakland PDHPs are most highly concentrated in Rockridge, Trestle Glen and other high-resource neighborhoods that historically excluded low-income housing. By contrast there are relatively few PDHPs in low-resource places like East and Deep East Oakland where many low-income housing units have been developed historically. [- See image on page 6 of EB4E's comments - use link to the right of this column] - In case the City of Oakland decides to allow	A. See updated language included in Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Also see Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. See updated language included in **Action 3.3.5:** Implement an Affordable Housing Overlay. C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health D. Comment noted. E. Comment noted. The City has been approached about and has thus far declined to join bond-financed JPAs for exactly the reasons described in this public comment. The City welcomes additional information about successful examples of arms-length corporations that engaged in the development of limited equity cooperatives. F. See **NEW Action 3.5.5:** Study feasibility of single-stair residential buildings is included in the Housing Element to address this comment. G. The City Administrator's contract authority limit is a matter of Council policy and would require amendment by the City Council. H. As part of implementing **Action 1.1.9:** Implement a rental housing registry, the City will seek to use the rental registry to support SB 330 demolition protections. I. See updated language included in **Action 2.2.5:** Extend local replacement unit provisions to require that developers notify existing and prospective tenants of their tenant rights as provided both under SB 330 as well as Oakland's Just Cause for Eviction Notice.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			historic districts to be exempted from an Affordable Housing Overlay that exemption should only apply to historic districts that existed as of January 1, 2022. This will prevent the sort of defensive, dubious landmarking that we have seen from high-resource areas such as St. Francis Wood and Pasadena in direct response to the passage of SB9 C. Action 3.4.1 - Revise development standards, including allowable building heights, densities, open space and setbacks requirements ○ Transit-proximite zoning areas ■ The following BART station areas within Oakland have been subject to a specific plan to allow for transit-oriented development on public and/or private land nearby: Coliseum, Fruitvale, Lake Merritt, West Oakland, 12th Street, 19th Street, MacArthur. Tens of thousands of units have been constructed or in the process of being developed within these specific plan areas. The only BART station area in Oakland that has not had a specific plan developed and implemented is Rockridge. This station area contains some of the highest-resource tracts in Oakland and is one of the most “whites-only” census tracts in Alameda County, according to the Haas Institute for a Fair and Inclusive Society. The last low-income housing development constructed in Rockridge was the Otterbein Manor (SAHA Homes) in 1973. This development was completed one year prior to the 1974 Rockridge Downzoning. The 1974 Downzoning was an explicitly racist downzoning movement reacting to state and federal fair housing laws, the perceived encroachment of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Black families into the neighborhood and plans for transit-oriented development near the newly constructed BART station. Any transit-proximate rezoning and revision of development standards must include the Rockridge station area. If the City Oakland fails to include the Rockridge station area with transit-proximate revision of zoning and development standards, it would perpetuate an existing pattern or practice ofthe City of Oakland of excluding low-income and multi-family housing from this high-resource and heavily segregated neighborhood. ■ Additional height and density should be allowed at least a ½ mile of heavy rail stations and within ¼ mile of high frequency bus stops. This represents the walkshed for most transit users. Where areas have access to both rail and high-frequency bus transit access overlap, such as in North Oakland, greater additional height and density should be allowed. ■ For these rezonings priority should be given to vacant or underutilized commercial land and owner-occupied residential land. Consider limiting rezonings on top of filtered or rent-controlled rental housing. Action 3.4.1 - Revise development standards, including allowable building heights, densities, open space and setbacks requirements ○ Resource-rich areas ■ Consider providing setback and other development standard relief in addition to permitting 30 DUAs by-right in resource rich areas. Action 3.4.1 - Revise development standards, including allowable building heights, densities,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			open space and setbacks requirements ○ Corridors ■ Foothill Boulevard, MacArthur Boulevard and International Boulevard are all commercial corridors in East Oakland that are specifically called out by name as requiring additional height and density for development to work. While we support additional height and density along these corridors, it is frustrating that similar corridors with low height limits remain unmentioned despite having similar issues with height and density. For example, Shattuck Avenue in North Oakland was downzoned to a 40' height from 50' in 2011. In 2021 a development application at 6300 Shattuck for housing at 50' (grandfathered in from a deemed complete application from 2010) was appealed by nearby property owners. This stretch of Shattuck Avenue is within easy walking/cycling distance to Ashby BART and near several bus routes and is in a high-resource tract. The appeal was dismissed by the Planning Commission, but it exemplifies how badly-needed multi-family housing near transit and low-VMT in higher-resource neighborhoods is often opposed and delayed by homeowners and property owners. The homeowners and property owners in higher-resource tracts have also historically been able to downzone heights and densities on their corridors while allowable heights and densities on corridors in lower-resource areas of Oakland are increased. The City of Oakland should commit to increasing heights and densities on commercial corridors in moderate and high-resource neighborhoods by name. Exemplar commercial	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			corridors: Shattuck Avenue, Piedmont Avenue, upper Broadway, upper Telegraph Avenue, 51st Street, College Avenue, Grand Avenue, Lakeshore Avenue and Claremont Avenue C. Action 3.4.2 - Revise Conditional Use Permit (CUP) requirements ○ While we support the removal of CUPs for multifamily housing development in RD-2 and RM zones, we request the City of Oakland please extend this action to include RD-1 zones as well. C. Action 3.4.3 - Revise citywide parking standards ○ Consider removing all parking minimums for housing development. At the very least, expand the ability to zero out parking minimums to all low-VMT areas. ○ Consider instituting parking maximums for residential development to reduce VMT and prevent overparking in downtown high-rise development. D. Action 3.5.3 - Advocate for statewide legislation on social housing ○ We are happy to see support for our sponsored legislation AB2053. Please consider sending a letter of support on behalf of the City of Oakland ahead of AB2053's June 21, 2022 Senate Housing Committee hearing E. Action - 3.5.4: Evaluate acquisition and development opportunities for moderate- and middle-income households ○ While we support efforts to acquire and develop moderate-income housing we must caution against the use of bond-financed JPAs such as CalCHA for this task. These entities command high fees and underwrite risky debt. ○ The City of Oakland should consider creating and capitalizing an arms-length corporation to develop limited-equity cooperatives for	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			moderate-income households, including public sector and essential workers. F. Action 3.7.5 - Encourage different sizes of housing for larger families – including affordable housing with courtyards, multigenerational housing ○ The City of Oakland should commit to studying the impact of second egress requirements for the feasibility of small and medium lot development of multifamily housing with 3 and 4 bedroom units. ■ The requirement of a second stairwell for purposes of egress reduces the usable floor plate for living space. The additional circulation forces many designers to arrange units along double-loaded corridors with internal hallways. This layout reduces the ability to provide natural light for more than 1 or 2 bedrooms (access to light or a light well is required for a habitable bedroom). The requirement for a second stair is a key driver in the relative overproduction of studios and 1 bedroom units compared to family-sized units. ■ The US is one of two developed countries in the world that doesn't allow single stair multifamily construction for at least four to five story buildings. Other developed countries provide a second means of egress via a fire ladder or other means. ■ Single stair multifamily buildings can also provide better access to light as well cross-ventilation. This makes it easier for new housing to meet passivehouse standards and reduce operational energy demands. In addition, because less circulation space allows for more floor space to be dedicated to group open space like courtyards or private open space like balconies or decks. ○ The City of Seattle passed and implemented	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			local building code amendments in 1975 to allow a single stair as means of egress for buildings up to six stories. The current code caps such single stair structures to four units per floor, requiresautomatic fire sprinklers and imposes other fire-rated and corridor requirements. The City of New York also allows single stair buildings with similar mitigations. https://secondegress.ca/ ○ The City of Oakland should study local building code amendments to allow up to six stories with single stairs with mitigations for fire, life and safety. ○ The City of Oakland should commit to supporting state legislation to direct the California Building Standards Commission to study allowing single stair multifamily housing up to six stories with proper fire, life and safety mitigations. G. Action 3.3.14 - Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing ○ Under Section 2.41.020 of the OMC, the City Administrator must seek City Council approval for purchases of any land valued at over $100,000. There is no parcel in Oakland with development or anti-displacement utility valued at $100,000 in 2022. This authority should be increased to, at least, $1,000,000 (pegged at CPI) to allow Oakland HCD staff to move quickly when the opportunity and funding present themselves for land acquisition H. Action 1.1.8 - Create and maintain a rental housing registry ○ This policy is critical for the enforcement of SB330/SB8 tenant demolition and right to return policies. Oakland HCD needs this tool to be able to coordinate with Oakland Planning on	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			evaluating development applications that propose to demolish protected housing and ensuring compliance with relocation and right of first refusal policies post-entitlement I. Action 2.2.5 - Extend local replacement unit provisions ○ We appreciate Oakland's commitment to codifying these provisions locally beyond the current 2031 sunset. That codification must be paired with more proactive enforcement of SB330/SB8 demolition protections. In November 2021, EB4E notified Oakland Planning that an application for development at 469 40th Street did not include sufficient replacement units under SB330. The application was eventually re-submitted and approved with the necessary replacement units. Projects should not be put out to public notice unless they have clearly demonstrated they have complied with SB330/SB8 demolition protections and provision of replacement units. ○ We request that Oakland Planning work proactively with Oakland HCD to create internal processes to help ensure displaced tenants are not lost in the post-entitlement and demolition process.	
21	**Stuart Flashman**	6/8/2022	Has the city considered the alternative of an affordable housing overlay district for high resource areas, rather than a blanket up-zoning? A blanket up-zoning will act as an invitation for market-rate housing projects, while an affordable housing overlay will encourage projects that meet the overlay district's affordability requirement (which should be higher than what is required for the state's density bonus).	See **Action 3.3.5:** Implement an Affordable Housing Overlay (AHO). Proposed features of this overlay include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will broadly apply this overlay, except for contaminated sites, protected historical sites/districts, and areas in the Very High Fire Hazard Severity Zone.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			The affordability overlay could also allow for multiple levels of affordability to meet its threshold - i.e., 3% extremely low income, 5% very low income, 10% low income, 20% moderate income, with multipliers based on level of affordability - i.e., 4x for extremely low, 3x for very low, and 2x for low. Thus the suggested project would get 3x4 = 12 points + 5x3 = 15 points + 10x2 = 20 points + 20x1 = 20 points, for a total of 67 points. The threshold for triggering the overlay district's density and height levels might be 55 points. a standard 15% very low income density bonus project would only get 45 points - not enough. The overlay could allow more height and density than the state density bonus, encouraging developers to "go the extra mile" to qualify. A mixed-income project would also provide a healthier mix of different income levels than the standard 15% very low income, 85% market rate project. Please think about this idea.	
22	**Kevin Morsony**	6/8/2022	I am writing to express concern that 4035 Park Blvd in Glenview was not included in the site inventory in the Oakland Housing Element. This .2 acre site is an empty lot (remediated former gas station) in a high resource area served by both local and transbay bus lines that both stop in front of this location. It is adjacent to a 7 unit apartment building (on a lot half the size). At minimum, this lot should support at least 14 units even if only zoned for current capacity. This lot has been vacant for 30 years as owners have failed to develop it due to personal issues. It is exactly the type of location that the city should use their power of eminent domain to acquire and turn over to low income housing developers to ensure that high resource	The revised 2023-2031 Housing Element includes this site as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhoods have low income housing. This is a ready to build location that should be included in the site inventory and the housing element.	
23	**Annette Floystrup**	6/8/2022	The "othering" of the Rockridge neighborhood of north Oakland is on full display in this document. The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. Housing Element Draft, Page 63: "POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS "Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. Oakland has a huge need for affordable housing, but nothing in this policy element addresses the building of affordable housing as defined by HUD, but rather will exclusively encourage the building of market-rate, luxury-class housing dominated by studio and 1-bedroom apartments/condos. According to the National Low Income Housing Coalition, housing is affordable if it costs no more than 30 percent of one's income. Renters who pay more than this are considered "cost-burdened;" those who pay more than 50 percent are "severely cost-burdened." In Oakland, 59 percent of residents are renters,	Comments noted. Oakland Planning Staff presented the first Public Review Draft Housing Element to the Rockridge Community Planning Council on August 18, 2022. This presentation took place during the extended public review period (June 30 - September 30, 2022).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			with the median income of these households around $40,000, more than half of them qualify as very low income. However, due to the high cost of Bay Area housing, even households that bring in as much as six figures can be designated as “low income,” as set by the Department of Housing and Urban Development (HUD). Its threshold is set for those earning incomes at or below 80 percent of area median income (AMI). In Oakland, 80 percent of AMI is very high — $73,100 for a single person; and for a 4-person household, $104,400. Housing Cost Burdens Have Stark Racial Impacts In Oakland, African American households face the highest housing cost burden, with 63 percent devoting more than 30 percent of their income to housing (according to the PolicyLink National Equity Atlas). Overall, 59 percent of households of color are housing-cost-burdened, compared to 42 percent of white households. Between 2000-2010, the City of Oakland lost 34,000 African American residents (a 24 percent decline). This included 10,000 OUSD students. Lack of affordable housing fuels the fire of Oakland’s ongoing and dramatic exodus of African American and other POC households. Is it really Affordable? The need for genuinely affordable housing in Oakland is very high, but are proposed developments in Rockridge going to meet these affordability standards? The cost of land in Rockridge means that the answer is generally, no. For example, the multistory tower proposed for the CCA property would consist of ~467 residential units, 10 percent of which would be	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			"affordable". That sounds good until you realize that here affordable is defined to mean "moderate-income" households, with eligibility defined as 120 percent of area median income (AMI). For 2020, that was $109,600 (1-person household) and $156,600 (4-person household). In other words, there would not be one single unit of affordable housing, as defined by HUD, created by the project and available to low-income renters. Affordable housing is desperately needed in Oakland if we are to retain housing stock for low-income workers, seniors, and the disabled. About 93 percent of new construction in Oakland is market-rate developments geared to luxury class apartments like the 40 story Atlas Tower downtown. While rents dropped significantly during the initial COVID lock down, rents have rebounded and none fall into the affordable range. The number of available and genuinely affordable units is almost non-existent. The demand far outstrips the supply. Current building costs have risen steeply in the past years in response to Trump Administration tariffs on Canadian lumber and COVID slowed production of building materials Much of the newly proposed and /or built housing is also singularly family unfriendly. Few apartments are 2-bedrooms or more, and the vast majority are studio and 1-bedroom. It is assumed that people will not have private cars, but if you have two or three children who each require a different size car seat, Uber and Lyft cannot accommodate you. If you have a mobility impaired family member, someone in a wheelchair or one who uses adaptive tools to	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			enter and exit a car from a walker, you also cannot be accommodated by ride-share or gig-vehicles within minutes of a phone call. These are wider issues of societal sustainability that are going utterly unaddressed by this housing element. But they eventually impact the lives of most of us. For low to moderate income residents, housing is difficult at best, but as currently conceived, the new housing is also inadequately meeting the needs of child families, multigenerational families, and the disabled of higher income levels as well. In summary, land and building costs are very high and rising, making public-private partnerships and government-subsidized construction perhaps the surest ways to add more truly affordable housing in Oakland — and particularly here in Rockridge. Lack of inclusion in the process The Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. There is an organization that represents Rockridge, a registered 501(c)3, the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC's monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			meetings were held. The exclusion of the RCPC, the most significant citizen institution in Rockridge, which has been reshaping the neighborhood since the early 1970s, when a resurrected RCPC led the way to obtaining funding from the Department of Housing and Urban Development (HUD) for planning studies which resulted in the City of Oakland adopting a new zoning designation C-31, currently CN-1, for College Avenue in 1973, consisting of pedestrian oriented retail with mixed use upper stories is remarkable and inexcusable. It argues for a total lack of knowledge about the neighborhood by City staff. It cannot have gone unnoticed that in the past 30 years, RCPC has directly brought in excess of $7 million into the City and the neighborhood, can it? A new branch library funded by a citizen originated Mello-Roos taxation district, FROG Park, Hardy Dog Park, hundreds of thousands in traffic mitigation funds negotiated from CalTrans (4th Bore), Dreyer's and Safeway projects, and $3 million in environmental mitigation funds obtained by through litigation by the 4th Bore Coalition, a coalition of Oakland and Berkeley neighborhood groups organized and led by RCPC. Those $3 million dollars were used to add enhanced HVAC and filtration systems, sound dampening windows and environmental plantings to the two schools in the RCPC catchment, Chabot Elementary and Claremont Middle School severely impacted by the particulate, fume and noise pollution resulting from their locations within less than 100 feet of Hwy 24. A registered non-profit creating that much benefit to the City of Oakland should have been contacted, in particular when planning and zoning have been	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			the primary focus of the organization for more than 50 years. The "Introduction of the Housing Element Draft" on Page 5 has a heading: "CHARTING AN EQUITABLE, INCLUSIVE FUTURE" It is not equitable to exclude some neighborhoods from the process of producing the Housing Element Draft. It is not equitable to promote the building of market-rate housing which does not produce truly affordable housing but does produce profits for private real-estate developers. And it is not equitable to unduly burden a neighborhood that already brought itself back from an earlier round of governmental policy originated destruction.	
24	**Housing Element Discussion Session #3**	6/8/2022	A. General Comments - Despite the increase [in Oakland's 6th cycle RHNA] how do we assure that the disenfranchised needs are met. - Who do we target, and how do we penalize them when lower income needs are not met? - Is there a way for the public to track who paid impact fee's, for what, and where and how are those funds being used? - Are the state-mandates on site size for low income housing, or for all housing that can count towards RHNA requirements? - Does the city have a published methodology for when to count new market housing as Moderate Income? I know San Jose does - One other point: I am pleased to see parts of the Element devoted to remediation of environmental contaminated sites. Urge the city to consider that housing located near freeways, Oakland Ports and other heavy duty trucking concentrations to be included in definition of a contaminated sites and to help	A: Comments noted. See notes from Housing Element Discussion Session #3 - https://cao-94612.s3.amazonaws.com/documents/Housing-Element-Discussion-Session-3_06.08.2022.pdf B. See Response to Letter #1 for upzoning actions included in the Housing Action Plan. C. The revised 2023-2031 Housing Element includes an Executive Summary. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions with blue text. D. The City through **Action 3.3.6:** Access to low-cost financing for development will continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			building owners in those locations to retrofit air filtration to reduce exposure of residents to transport related emissions. David Wooley, UC Berkeley, Goldman School davidwooley@berkeley.edu - Yes, a summary analysis of what C-21 actually tells us would be useful - We should not be putting housing next to freeways and we need to have a fund to in the GP to retrofit existing near road housing exposures. - One more comment: please consider ALL of AC Transit's Rapid corridors, not just the BRT line, when considering upzoning opportunities. - So A Diamond in the Ruff is working with The Oakland Community Land Trust on a project for more affordable housing overlay with ADU'S. Is there a certain number of units that can be placed on the current acquisition of land? Which may include the Zoning in that part of Oakland? Which is right off Seminary B. On the upzoning contemplated, is that discussed explicitly anywhere in the document beyond Policy 3.4? If you could let me know, I would appreciate it. C. Please ensure that the next draft includes an Executive Summary and a clear table on NEW policies D. What can the city do to improve the funding tools and flexibility of local lenders / CDFI's for affordable housing?	
25	**Equity Work Group** Meeting #2	6/8/2022	A. General Comments - The city has a vacancy tax right? they should be tracking vacancy somehow	A. Comment noted. B. Appendix L in the revised 2023-2031 Housing Element includes Responses to Public Comments C. The State Housing & Community Development Department (HCD) requires that all California jurisdictions prepare an annual progress report

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			- it's hard to rank, but would like to include low-income non english speakers as having a barrier to accessing housing B. where are the input not included going to be noted, if at all, in the housing element? which chapter or appendix? C. APR - so the number of permits does NOT reflect on actual built units? the 1k under very low income might in actuality be less? - is there a way to find actual units built? - so basically some developments are stalled and that isn't captured... is there another table that reflects actually built #s? - my concern is folks looking at the "approved permits" data might misunderstand that as the actual # of available housing. if a lot of projects get stalled it would not be an accurate indication	(APR) on the jurisdiction's status and progress in implementing its housing element. For the 5th cycle Housing Element period (2015-2023), State HCD required that jurisdictions report completed units in the APR form beginning in 2019. Oakland Planning Staff have data on permitted units for the 2015-2023 period and completed units for 2019 and onward. See Table A2 of Oakland's APR form to view completed units beginning in 2019: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports.
26	**EBMUD**	6/9/2022	**General** EBMUD appreciates the City's efforts to achieve its Regional Housing Needs Allocation (RHNA) through identifying opportunity sites where additional development could occur. As noted in the Housing Element Update, these opportunity sites include both vacant and non-vacant sites. It is important that the City consider existing surrounding uses so that those uses may continue after new housing is developed. In particular, EBMUD has its main offices in Downtown Oakland and additional administrative offices and service yards in West Oakland near GRand Avenue and Adeline Street. In addition, EBMUD is developing a service yard at Willow Street and 24th Street, and its wastewater treatment plant is located at West Grand Avenue and Wake Avenue. Finally, EBMUD has a facility along Oakport Street in	Comments noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			East Oakland as well as numerous water and wastewater facilities that support the community and provide essential services to residents and business owners throughout the City. **Wastewater Service** The projected number of housing units within the City of Oakland as described in the Housing Element Update are higher than the quantities used by EBMUD in recent long-term planning efforts, and result in population growth rates higher than EBMUD assumed. The differences in EBMUD's assumptions and the Housing Element Update will not necessarily result in a capacity deficiency, however, EBMUD will monitor the increase in flows over time and requests that the City continue to closely coordinate with EBMUD to ensure that implementation of the Housing Element Update proceeds as projected. **Wastewater Service** In addition, wet weather flows are a concern. The East Bay regional wastewater collection system experiences exceptionally high peak flows during storms due to excessive infiltration and inflow (I/I) that enters the system through cracks and misconnections in both public and private sewer lines. EBMUD has historically operated three Wet Weather Facilities (WWFs) to provide primary treatment and disinfection for peak wet weather flows that exceed the treatment capacity of the MWWTP. Due to reinterpretation of applicable law, EBMUD's National Pollutant Discharge Elimination System (NPDES) permit now prohibits discharges from EMBUD's WWFs. Additionally, the seven wastewater collection system agencies that	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			discharge the EBMUD wastewater interceptor system ("Satellite Agencies") hold NPDES permits that prohibit them from causing or contributing to WWF discharges. These NPDES permits have removed the regulatory coverage the East Bay wastewater agencies once relied upon to manage peak wet weather flows. **Wastewater Service** A federal consent decree, negotiated among EBMUD, the Satellite Agencies, the Environmental Protection Agency (EPA), the State Water Resources Control Board (SWRCB), and the Regional Water Quality Control Board (RWQCB), requires EBMUD and the Satellite Agencies to eliminate WWF discharges by 2036. To meet this requirement, actions will need to be taken over time to reduce I/I in the system. The consent decree requires EBMUD to continue implementation of its Regional Private Sewer Lateral Ordinance (www.eastbaypsl.com), construct various improvements to its interceptor system, and identify key areas of inflow and rapid infiltration over a 22-year period. Over the same time period, the consent decree requires the Satellite Agencies to perform I/I reduction work including sewer main rehabilitation and elimination of inflow sources. EBMUD and the Satellite Agencies must jointly demonstrate at specified intervals that this work has resulted in a sufficient, pre-determined level of reduction in WWF discharges. If sufficient I/I reductions are not achieved, additional investment into the region's wastewater infrastructure would be required, which may result in significant financial implications for East Bay residents **Wastewater Service**	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			To ensure that the proposed project contributes to these legally required I/I reductions, the lead agency should require the project applicant to comply with EBMUD's Regional Private Sewer Lateral Ordinance. Additionally, it would be prudent for the lead agency to require the following mitigation measures for the proposed projects: (1) replace or rehabilitate any existing sanitary sewer collection systems, including sewer lateral lines to ensure that such systems and lines are free from defects or, alternatively, disconnect from the sanitary sewer system, and (2) ensure any new wastewater collection systems, including sewer lateral lines, for the project are constructed to prevent I/I to the maximum extent feasible while meeting all requirements contained in the Regional Private Sewer Lateral Ordinance and applicable municipal codes or Satellite Agency ordinances.	
27	**Deeply Rooted**	6/10/2022	A. Provided track changes to the Engagement section that includes removing the DR Partners map and adding more detail to the Partners table. Oakland HE_compiled with TOC_DR_2022_0610: Section: 7.1 B. Acknowledgement of Community Policy ideas: As we have discussed, the City needs to explain why some of the community policy ideas in the Public Participation section didn't make it to the HAP. We recommend the following columns in the appendix for each community policy idea: policy idea, decisionmaker, issue/ disagreement, consensus, and next steps. **C.** Create and staff Neighborhood Planning Councils for residents to weigh in on what gets built in their neighborhoods during planning and implementation (i.e. RCPC or Mission	A. Oakland Planning Staff included this information in the updated Draft Housing Element submitted to State HCD on June 30, 2022. B. Appendix L in the revised 2023-2031 Housing Element includes Responses to Public Comments C. Oakland already has a Neighborhood Council structure that City staff engage with on a variety of issues of interest, including public safety, improvements, and more. Staff will look at options of improving this structure and broadening its scope for purposes of engagement as well as look at options of creating neighborhood groups for the specific purpose of gathering feedback on planning initiative and projects. Action 5.2.9 addresses the need to reduce barriers with inclusive engagement with actions in the Environmental Justice (EJ) Element. A policy in the EJ Element will be written to address this. D. Creation of new commissions requires action by City Council. The City should utilize existing boards and commissions instead of establishing a new body. However, Planning Staff will bring an item to the Planning Commission to set up a new subcommittee that monitors City performance with Housing Element and other housing policy implementation, see Action 5.2.11:

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			group), particularly in areas where rapid displacement is happening. (Policy 5.2) **D.** Citywide Housing Commission to review City's progress on Housing Element actions. (Policy 5.2) **E.** Integrate Healthy Development Guidelines into GP (note under actions where it's come from HDG) (Policy 5.2) Examples include disclosure and reporting on rental unit loss, eviction, and relocation compensation; and displacement impact mitigation. **F.**Human Health/Socioeconomic Impacts Analysis: require public analysis of displacement/homelessness impacts of market rate projects prior to City providing permits or any zoning changes (Policy 1.1) **G.** Acknowledge that proactive rental inspections can only be implemented with a new law. (Policy 2.1) **H.** A law requiring anti-displacement strategies for the proactive rental inspection program. (Policy 2.1) **I.** Moratorium on market rate development for neighborhoods experiencing rapid gentrification. (Policy 1.1) **J.** Community outreach & enforcement of City's Fair Chance Housing Ordinance (banning housing discrimination of people with criminal records). (Policy 1.1, 5.3) **K.** Cultural Districts will protect existing residents from displacement. (Policy 3.2) **L.** Address needs of undocumented residents, i.e. new local ordinance for removing Social Security Number from housing applications. (Policy 5.3) **M.**Measure KK assessment (low-income homeowners applied and used funds). Update so low-income homeowners will not have to pay the new taxes. (Policy 3.3)	Provide accountabililty measures for housing programs, including annual monitoring. **E. It** is not within the City's authority to implement all of the Healthy Development Guidelines as they are written. Staff conducted an assessment of the HDGs and will incorporate those goals and policies that are within the City's purview as part of the General Plan Update for the various related Elements. For the Housing Element the following Actions are included to address the Healthy Development Guidelines (HDG). See Action 5.2.1: Protect against smoke and wildfire to address HDG EH 1.7 Project Wide no smoking policy. See Action 5.2.9 and zoning in Appendix J to remove CUP for grocery stores in food deserts for HDG goal F1 Increase Access to Healthy Foods. For HDG H1.3 see Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement and Action 3.5.1: Support community land trusts and other shared equity models. For HDG H1.4: Prioritization of housing units for vulnerable populations see Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land. **For H**DG **goal H2: Preserve existing affordable housing and protect residents from involuntary displacement see Action** 1.1.14: Protect Oakland residents from displacement and becoming homeless and Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units. For HDG CC2.2 and OS1.1 see Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities. F. Due to a series of new State laws that streamline and regulate the timeline for project approvals, the required review structure and timing would not allow Staff to conduct a study of this nature on a project-by-project basis. Instead, this analysis could be performed prior to adoption of new zoning regulations (ex. General Plan zoning amendments). G. Building Bureau staff updated the language of the Housing Element **Action 2.1.3:** Conduct proactive rental inspections to reflect this comment. The City is also staffing up to respond more rapidly to code complaints. H. The City will look at ways to consider anti-displacement strategies as part of this program. With regard to displacement as a result of code enforcement, in coordination with the Planning & Building Department, Oakland HCD administers the Code Compliance Relocation Program. In addition, the upcoming Rent Registry will allow for a form of proactive protection for Oakland residents. I. The State will not approve a Housing Element that places a moratorium on market rate housing or any type of housing at any affordability level.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			KN. City kept as is because it aligns with HCD Site Guidelines. We are concerned that size assumptions are in violation of fair housing laws. (Appendix C pages 50, 80-81; and Oakland HE page 39) **O. Use of City-owned land as 100% affordable housing (includes 10+ acre sites as well):** Action 3.3.1 discusses prioritizing ELI households on public land, but Table C-16 (Appendix C) in Housing Sites Inventory shows that housing at all income levels is being planning for on public land. All public land for 100% affordable housing (includes 10+ acres). (Policy 3.3). **P.** Utilize neighborhood Area Median Income for housing projects. (Policy 3.2) **Q.** Increase Housing Impact Fees.(Policy 3.3) **R.** Create a real Inclusionary Zoning law. (Policy 3.3) **S.** Link zoning changes for market rate projects to affordability requirements so more affordable housing is built. (Policy 3.4) A developer who wants to build more units (say, 200 units instead of 100 units) should also increase the number of affordable housing units on site. **T.** Prioritize re-entry housing in City funding applications. (Policy 3.7) **U.** Ensure that TOD projects provide housing that neighborhood residents can afford (Policy 5.2) **V.** A tax on speculators AFTER they purchase the property does not reduce housing speculation and the City already has a registration fee & inspection requirement for speculators. The City should instead evaluate how the current program is working. (Policy 2.2)	J. Staff need more information about what Deeply Rooted is proposing in order to prepare a response. **K. See response to Letter #53** L. Comment noted. This comment speaks to issues outside the scope of the 2023-2031 Housing Element Update. M. When Measure KK was approved by voters, the measure did not include an exemption for low-income property owners. N. See Action 3.4.10 and Appendix J for revisions for the new 6th cycle RHNA sites to look at ways to incentivize affordable housing. This will be further discussed and various options analyzed during the Zoning implementation. O. The City disposes of public land according to State and local law, specifically the State Surplus Land Act (SLA) and the Oakland Municipal Code (OMC), specifically Chapter 2.42 that governs the disposition of real property. Decisions about the disposition of a particular parcel are made by City Council action, consistent with the requirements of the OMC P. This would greatly impact and complicate funding, closing, and asset monitoring processes for the City with impacts on the pace of AH creation/admin capacity. Neighborhood AMIs don't align with State or Federal funding mechanisms. The City will however continue to seek opportunities to target deeper AMI groups. The City welcomes examples of this being successfuly implemented in other communities Q. An economic feasibility study is underway as part of the five-year impact fee update to determine the potential for increasing impact fees. In addition, the affordable housing impact fees automatically increase at the beginning of each fiscal year with the rate of construction inflation. Most recently, in July 2022, the affordable housing impact fees went up by 15% because of the high construction inflation rate. Action 3.3.8: Right size development fees on market rate housing addresses the City to look at its Impact Fees on a regular basis. R. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. This comment is addressed in Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			W. Goals, policies, and actions should treat unhoused people with dignity and respect the communities they have built rather than allowing for City evictions under the current Homeless Encampment Management Policy. The current policies focused on unhoused people describes just enhancing operations of the EMP. **X.** Stopping Encampment Management Policy. (Policy 4.2) **Y.** Changing zoning so tiny homes or RV's can be allowed across the City. (Policy 4.3) **Z.** No mention of permanent housing and how that aligns with AFFH. (Goal 4. How this Goal AFFH section) **Z1. Missing Special Needs Groups (prioritize housing for them):** Formerly incarcerated individuals (Policy 1.1, 3.7), Single parents (not just mother's) (Policy 1.1, 3.7) young adults (Policy 1.1, 3.7) low-income non-english speakers (Policy 1.1, 3.7) youth aging out of foster care (Policy 1.1, 3.7) Black Americans (this population particularly in relation to landlord housing discrimination). (Policy 1.1, 3.7) Teachers (Policy 1.1, 3.7) **Z2. Need to integrate the following community input into Intro, Housing Needs (Appendix B) and AFFH sections (Appendix D and relevant Oakland HE sections):** Historic and Current Racism are intentional public policy choices Including intentional decrease of public housing in neighborhoods like Lower Bottoms. It was another policy choice that exacerbated racialized displacement.	S. As part of the impact fee study from Action 3.3.8, the City is studying the potential increase of onsite affordable housing instead of paying the affordable housing impact fees. Onsite requirements are already based on a percentage of the overall units, so the more units that are built the higher the number of affordable units that are required in order not to pay Affordable Housing Impact Fees. In addition, Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement will be looking at how much affordable units would be required with market rate development. **T. See response to 27-Z1** U. This comment is addressed in **Action 5.2.2:** Promote infill, transit-oriented development (TOD), and mixed use development. V. The City does not regulate homeownership sales or transfers. Policies would need to go through City Council and/or the County Assessor's Office for consideration. An anti-speculation tax is already a study item in the Housing Element (**Action 2.2.6**: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.). A direct ban on investors buying and flipping homes would likely require a change to state law. W. Each year, it is estimated that 15,786 people in 13,135 households experience homelessness in Alameda County, and approximately 60% of them reside in Oakland. The conditions at many encampments are inhumane, dangerous, often fatal. The Encampment Management policy is rooted to a shelter offer policy that places a requirement on the City to provide shelter options when closing an encampment. While improvements are still being developed in the homelessness system, when a encampment is closed, individuals at the camp are offered a shelter bed and an alternative to sleeping in a place not fit for human habitation as defined by US Department of Housing and Urban Development. X. Comment noted. This comment speaks to issues outside the scope of the 2023-2031 Housing Element Update. Y. The Oakland Construction Innovation and Expanded Housing Options Ordinance was approved by City Council on November 16, 2021, and went into effect on January 15, 2022. This Ordinance updated the City's zoning regulations to allow RVs, mobile homes, manufactured homes and tiny houses on private properties in any zone that allows residential. See more

			Facts about ethnic enclaves created in part by racial housing covenants (Chinatown, West and East Oakland). The negative impacts of California legislature's Costa Hawkins law The negative impacts in the 1990s of the tech boom and Mayor Brown's 10k market rate housing plan to make Oakland attractive for SF tech workers. Generational economic and housing discrimination impacts Oakland residents. Market force displacement from lack of sufficient tenant protections Blighted Housing Conditions: Lower income residents in West and East Oakland are facing unhealthy housing conditions ie. no heat, electrical issues, and faulty plumbing). **Mention Housing Equity Roadmap in Appendix A.** Lots of community orgs were involved in the development of that document and may not have been involved with HCD's Strategic Plan so may not see themselves reflected in the Strategic Plan. **More information/data on assessment of previous housing cycle production.** A summary of the previous HE assessment should be included in the Oakland HE (main chapters of document) for transparency and framing for the new RHNA goals. Draft HE (Appendix A) has only one sentence on total housing built in the previous cycle. Also include 1) the number of built units by affordability level in the 2015-2023 RHNA table alongside permitted, 2) Table by planning area and income level for built units, and a map of where those sites are by income level. Just Cities ended up doing this analysis with sample data.	information here: https://www.oaklandca.gov/news/2022/new-policies-expand-housing-options-on-single-family-parcels-allow-rv-residences. Z. See response to Letter #53 Z1. Existing language aligns with federal and State funding sources, allowing projects to qualify for unique "special needs" funding that would not otherwise be available. Some of the suggested prioritizations conflict with CA Prop 209 (e.g. explicitly targeting Black residents). We have focused on deepening affordability and addressing homelessness (following US Department of Housing and Urban Development target populations under homelessness) as top priorities with the limited resources we have. Within that, we have sought to encourage projects that serve a range of household needs, and with a focus on deepening affordability. We do have several layers of local preference for our affordable projects: displaced residents (code enforcement), residents within one mile of development/same council district, and then Citywide. Z2. The revised 2023-2031 Housing Element incorporates this feedback. Additional information on historic context of discriminatory housing actions and the legacy of exclusionary zoning as a significant housing constraints and barrier to affirmatively furthering fair housing. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.5D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11). Z3. The text describing the intent of Housing Action Plan Goal 5 was updated to make it more explicit that policies and actions are focused on homeownership strategies.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Z3. HAP: Goal 5 should make it more explicit that policies and actions are focused on homeownership strategies	
28	**Harvey McKeon, Carpenters Local 713**	6/10/2022	The City of Oakland Housing Element notes in its housing constraints analysis that a shortage of construction labor can significantly increase "the time necessary to complete the development of a project." Indeed, the Housing Element Update also outlines that construction workers make up a lower proportion of overall employment in Alameda County than even that of the wider Bay Area, where an acute shortage of housing production and labor is also a pressing, widespread issue. To be clear, neither Alameda county nor the City of Oakland have enough skilled, highly productive residential construction workers to build the 26,000+ units that the city of Oakland is supposed to produce over an 8 year time period. This is itself an almost 80 percent increase from the prior Housing Element cycle's RHNA goals. However, as the housing crisis in our communities has continued to deteriorate in recent years, the number of workers employed in residential building construction in Alameda County has actually decreased by 18% since 2004. A continuously shrinking residential construction workforce cannot build 26,000 units of housing in 8 years. **The City Should Bar Issuance of Building Permits Unless Each Future Residential Development of 10 units or Above has a Viable Apprenticeship Program and Local Hiring Requirements** The Carpenters propose the following additions to the Municipal Code of the City of Oakland. for any residential project larger than 10 units	Comments noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Permitting requirements in the Municipal Code of the City of Oakland A person, firm, corporation, or other entity applying for a building permit under the relevant section of the Municipal Code of the City of Oakland, California shall be required to comply with the apprenticeship, healthcare, and local hire requirements of the Housing Element and General Plan. Failure to comply with the requirements set forth in this section shall be deemed a violation of this article. Apprenticeship: For every apprenticeable craft, each general contractor and each subcontractor (at every tier for the project) will sign a certified statement under penalty of perjury that it participates in a Joint Apprenticeship Program Approved by the State of California, Division of Apprenticeship Standards OR in an apprenticeship program approved by the State of California Division of Apprenticeship Standards that has a graduation rate of 50% or higher and has graduated at least thirty (30) apprentices each consecutive year for the five (5) years immediately preceding subsmission of the pre qualification documents. The contractor or subcontractor will also maintain at least the ratio of apprentices required by California Labor Code section 1777.5. Local Hire Policy: Contractor will be required to provide documentation that the contractor will hire a minimum of twenty-five percent (25%) of staff for any job classification with more than four (4) employees employed whose primary residence,

			which is not a post office box, is, and has been, within Alameda county within 180 days of the expected date of issuance of the Notice to Proceed for the project.	
29	**Jon Gabel**	6/10/2022	1. Some of the stated goals in the Housing Element Draft are at odds with City policy, particularly with respect to Rockridge As noted in the Housing Element Draft, Chapter 1: Introduction, Page 4: "In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color. "The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities." As long as 100 years ago, Rockridge was a vibrant residential and business district. Construction of the Grove-Shafter freeway (Highway 24) and BART in the 1960's devastated the existing businesses. Half of them closed and crime was rampant. In 1973, the Rockridge Community Planning Council (RCPC) worked with the City of Oakland to rezone College Avenue and Rockridge, which led to its recovery and current prosperity. (For details, see www.PreserveRockridge.com/UpDownAndUp) The people of Rockridge responded and brought our neighborhood back. With no funding and little help from the City of Oakland,	Comments noted. Oakland Planning Staff presented the first Public Review Draft Housing Element to the Rockridge Community Planning Council on August 18, 2022. This presentation took place during the extended public review period (June 30 - September 30, 2022).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Rockridge was resurrected after the BART and Highway 24 construction was completed. Old homes, including many Craftsman houses, were preserved and restored. Rockridge funded and built its own branch library. Parental support has helped make local public schools desirable. Strong local activism has resulted in many public benefit projects. We should be lauded for this (For details, see www.PreserveRockridge.com/Accomplishments). But instead, the City of Oakland has adopted and supported policies – like SB9 - which threaten the viability of the community which rebuilt Rockridge. Quoting from the home page of www.PreserveRockridge.com: "The creation of financial incentives to tear down existing single family houses and replace them with larger market rate buildings would: "- Eventually destroy the beautiful and architecturally historic Craftsman houses that we presently have; - Push out the community that individually and collectively rebuilt itself after the construction of BART and Highway 24 right through the heart of it; - Actually be a vehicle for real estate interests to make big profits." **1. Some of the stated goals in the Housing Element Draft are at odds with City policy, particularly with respect to Rockridge** Again, from the Housing Element Draft, Pages 11-12:	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			"This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders… The goals include: "1. Protect Oakland Residents from Displacement and Prevent Homelessness: Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities. "2. Preserve and Improve Existing Housing Stock: Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions. "5. Promote Neighborhood Stability and Health: Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities." These stated goals are at odds with the actual performance of the City of Oakland. The passage of SB9 by the State of California has enabled this threat to Rockridge and to other neighborhoods throughout the State. Oakland's support of SB9 has put it in a tiny minority of California cities. The following cities supported the passage of SB9: Alameda, Oakland, and San Diego. The following cities opposed the passage of SB9: Arcata, Azusa, Bellflower, Belmont, Beverly

			(For a more detailed discussion of SB9's impact on Rockridge, see www.PreserveRockridge.com/ZoningBusting) **2. The Housing Element Draft appears to subscribe to "Trickle-down" housing theory, which is false and similar to "Trickle-down" economics** Again from the Housing Element Draft, Page 63: "POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS "Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs. "The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures. "The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) and Mixed Housing Type Residential (RM) zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Type Residential generally to 3,000 square feet to remove constraints on lot splitting." I believe that there is support locally for allowing single family homes to be converted into duplexes; and ADU conversions are popular under existing statutes. But SB9-style changes which would incentivize tear-downs of existing homes in favor of market rate multiple unit dwellings – with no affordable housing required – is opposed locally by a margin of around 2 to 1. Adoption of Policy 3.2 would be counter to public sentiment here, and would be in contradiction of three of the Chapter 4: Housing Action Plan goals. The concept that building more market rate housing will result in more affordable housing is called "Trickle-down" housing theory. It is false and is equivalent to "Trickle-down" economics. "Trickle-down" economics theory, also referred to as "supply side" economics, "Reaganomics", and (by President George H.W. Bush) "voodoo" economics, is believed by most Americans to be false. However, it is still being promoted by some Republicans. "Trickle-down" housing theory, also referred to as "filtering" or "housing as opportunity", is based on the same concept as "trickle-down" economics: that increases in the supply of market rate housing will "trickle-down" to provide more affordable housing. Unlike "trickle-down" economics, "trickle-down" housing theory is being promoted by supposedly progressive Democrats. The basic fallacy of "trickle-down" housing theory is that there is not a single unified	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			housing market. To the contrary, supply and demand are different in different price ranges of housing. The "housing market" actually consists of multiple, non-intersecting sub-markets delineated by price. “Trickle-down” housing theory is not supported by econometric modeling, as shown in “The Maze of Urban Housing Markets: Theory, Evidence, and Policy” by Jerome Rothenberg et al. Unless upzoning is tied to a requirement for truly affordable housing, it serves developers at the expense of the current residents. (For a detailed discussion of this topic, see www.PreserveRockridge.com/trickledown) **3. Lack of inclusion in the process** 2.1 Summary of Community Outreach Activities, Page 19, shows that Rockridge has been omitted from the list of neighborhoods contacted for input on the Housing Element Draft – even though Rockridge will be deeply affected by the final version. There is an organization that represents Rockridge: the Rockridge Community Planning Council (RCPC). It is usual for RCPC to schedule local town hall meetings on topics of importance, which the Housing Element Draft certainly is. The City could have easily arranged with RCPC for a meeting and notified residents through RCPC’s monthly newsletter, The Rockridge News. Instead, a small number of poorly publicized Zoom meetings were held. Chapter 1: Introduction of the Housing Element Draft, Page 5 has a heading: “CHARTING AN EQUITABLE, INCLUSIVE FUTURE”	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Both the process of producing the "City of Oakland 2023-2031 Housing Element Draft - Public Review May, 2022" and its contents are not equitable. Some neighborhoods were excluded from the process. The draft promotes "Trickle-down" housing theory, which does not produce truly affordable housing but does produce profits for real-estate developers. And enabling the destruction of a neighborhood, Rockridge, that brought itself back from an earlier round of destruction is the antithesis of what a City Plan should do.	
30	**Colin Piethe**	6/10/2022	A. POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS - The City should take a much more proactive approach to expanding the role of land trusts and other collective ownership strategies that take housing either into the City's, or the community's hands. The words "explore" and "support" are passive words, and don't commit the City to changing how it does business. Merely studying and considering these strategies continues to let primarily private developers make decisions about how the City's housing stock is built, and their decisions are not in the best interests of our residents. We need to move the City away from relying on the whims of the market and let Oakland residents take collective ownership of their land and housing. Reduce the police budget and put it into other City priorities so that we have money in a dedicated housing fund to help subsidize rent for our most underserved residents living paycheck to paycheck. 32% of americans cannot afford a $400 emergency, and providing our	A. See Action 3.5.1: Support community land trusts and other shared equity models and Action 3.5.2: Support housing cooperatives, co-living, and cohousing models . Actions in Chapter 4: Housing Action Plan includes discrete implementation timelines and milestones within the eight-year Housing Element planning period. B. See the revised **Action 3.4.4**: Revise citywide parking standards in the Housing Element.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			residents with stable housing can help them stay on their feet. B. Action 3.4.3: Revise citywide parking standards - Please implement parking maximums city-wide, or with neighborhood-specific approaches. Developers still think there's a "market demand" for providing more parking than necessary, even in Downtown where we're trying to limit parking. While there's no minimum Downtown, developers are not reducing parking supply, such as at 1919 Webster, where the developer is currently proposing an extra wide driveway which will create conflicts with the future bike lane that's planned for Webster.	
31	**Alliance of Californians for Community Empowerment, Asian Pacific Environmental Network, Causa Justa :: Just Cause, the East Bay Permanent Real Estate Cooperative, the Oakland Community Land Trust, Oakland Tenants Union, PolicyLink, Public Advocates, and Urban Habitat**	6/10/2022	We urge the City of Oakland to take meaningful action in the 6th Cycle Housing Element update to address the unmet housing needs of low-income households and commit to policies and programs that affirmatively further fair housing. Specifically, we are calling on the City to commit to (1) passing a strong Tenant Opportunity to Purchase Act by 2023 and (2) reauthorizing Measure KK with significantly increased funding (at least $350 million) for anti-displacement and affordable housing preservation. These actions are essential to prevent displacement, stabilize current residents and existing communities, and preserve affordable housing for the long term Renters at risk of displacement in Oakland urgently need TOPA so that they can stay in their communities and have a voice in their housing options. Tenant Opportunity to Purchase Act (TOPA) policies give tenants and qualified organizations, like community land trusts and nonprofit affordable housing developers, the right to make the first offer and the right to match competitors' offers so that	1. COPA/TOPA policies are relatively new to the Bay Area and are complex undertakings that require careful financial, regulatory, and legal alignment. Before proceeding with a COPA/TOPA policy, staff would require direction from Council on the scope and goals of such a potential policy. Such direction has not yet been received, and as such, COPA/TOPA policy must remain a study item. 2. See **Action 3.3.18:** Implement affordable housing investments contained in Measure U. . This action has been updated to include information about Measure U, the November 2022 Infrastructure Bond that was approved andincludes $350 million for affordable housing.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			they can purchase their homes when offered for sale. As a key intervention against speculation, TOPA preserves housing as permanently affordable for future generations. TOPA expands stability and wealth-building opportunities for tenants by creating pathways to homeownership. TOPA does not require landlords to sell their properties or sell for less than market rate. Both the implementation of a strong TOPA policy and dedicated funding for preservation are essential to actually preserving units as permanently affordable. Funding to support the acquisition and rehabilitation of properties is critical to ensure that TOPA leads to meaningful outcomes. As a package, this policy coupled with much-needed preservation resources will create new permanently affordable housing in Oakland and allow Oakland residents to stay in their current homes, avoiding the disruption and trauma of displacement. Concrete commitments to pass TOPA on an urgent timeline and increase funding for affordable housing preservation will advance multiple Housing Element requirements. Among these, Oakland is required to address the housing needs of low-income households, identify specific strategies to conserve and improve affordable housing stock, and Affirmatively Further Fair Housing (AFFH). The acquisition and preservation of currently market-rate rental housing stock as permanently affordable housing is a crucial strategy that would help Oakland meet these obligations **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** "Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act," as currently	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			drafted, is both insufficient to meet the needs of low-income community members and people of color at risk of displacement and inadequate to meet state statutory requirements. Action 2.2.8 states, "Oakland will study, and if appropriate implement, a TOPA/COPA policy by 2025." **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** "Studying" TOPA is unlikely to yield any benefit, and is also unnecessary as City Staff have already been exploring this policy for years, including drafting several different Tenant/Community Opportunity to Purchase ordinances since 2019, at the direction of two different City Council Members. **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline** Moreover, state law requires all Housing Element programs to have beneficial impact within the planning period, including identification of specific actions, which agency or official is responsible for those actions, and a timeline. Programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved." A recent survey of HCD reviews of draft housing actions from Southern California jurisdictions emphasizes that time bound actions with "specific commitments [from local actors], metrics, and milestones" are required and that jurisdictions are expressly discouraged from relying on vague words like "study" or "explore" as such non-specific actions are unlikely to have any real-world impact within the planning period **Action 2.2.8 Should Commit to More Specific Action on TOPA on a More Urgent Timeline**	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Action 2.2.8 should instead commit to passing TOPA by 2023. A TOPA policy should include several key components – a right of first offer and right of first refusal for tenants (and for qualified organizations if tenants assign or waive their rights); sufficient timelines for tenants and qualified organizations to organize, negotiate a contract, secure financing, and close; technical assistance for tenants to understand the process, financing, and different ownership options; permanent affordability restrictions on all TOPA purchases; and clear enforcement mechanisms if owners of covered properties fail to comply with the law. **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** "Action 3.3.18: Reauthorize Measure KK" should commit to significantly increased funding for anti-displacement and affordable housing preservation. As currently drafted, the objective simply states, "The size of the new infrastructure bond and the amount set-aside for Affordable Housing is still being determined." It goes on to provide details about the number of units of housing preserved under Measure KK. **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** Action 3.3.18 should provide additional details and clear commitments about the reauthorization of the infrastructure bond measure, such as the size of the bond, the amount set-aside for affordable housing, and the number of housing units that will be preserved. As discussed above, state law	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			requires all Housing Element programs to include identification of specific actions, and programs to affirmatively further fair housing must identify "metrics and milestones for determining what fair housing results will be achieved." **Action 3.3.18 Should Commit to a More Specific Action on Funding for Anti-Displacement and Affordable Housing Preservation** Action 3.3.18 should commit to set aside at least $350 million of the general obligation bond for anti-displacement and affordable housing preservation projects. The 2016 measure only set aside about 16 percent ($100 million) of the $600 million general obligation bond for affordable housing. Given the scope of the housing crisis in Oakland, we need more funding for resident-led and community land trust-supported preservation projects. And because low-income tenants lack the financing to purchase their own homes, this consistent funding source dedicated to preservation will be essential to make a TOPA policy effective. **TOPA and Affordable Housing Preservation Funding Address Unmet Needs of Low-Income Households** Housing Element law requires jurisdictions to develop an assessment of housing needs for all income levels and a plan to address these needs.9 A TOPA policy and enhanced affordable housing preservation funding will clearly address the identified housing needs in Oakland's draft Housing Element. According to the draft Oakland Housing Needs Assessment, "housing affordability is particularly out of reach for lower-income households." Nearly half (46.5 percent) of all renters experience some level of cost burden. 11.5 percent of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			renter occupied households experience overcrowding. Nearly half of all households in Oakland live in tracts at risk of or experiencing gentrification, while almost a quarter live in tracts susceptible to or experiencing displacement. **TOPA and Affordable Housing Preservation Funding Address Unmet Needs of Low-Income Households** TOPA is a proven strategy to address these unmet needs of low-income renter households – the high rates of cost burdens, overcrowding, and displacement risk. For households facing unaffordable rent increases, doubling up with friends and family, and paying more than 30 percent of their income on rent, the time to "study" proven anti-displacement strategies like tenant opportunity to purchase policies is long overdue. TOPA policies can only effectively address the unmet needs of low-income households when coupled with a dedicated funding source to assist in financing tenant purchases. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** Affirmatively Furthering Fair Housing (AFFH) means taking meaningful actions to address disparities in housing needs and access to opportunity, and that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Protected characteristics under California law include race, sex, national origin, and disability status. In this Housing Element Cycle, cities and counties are now required to analyze the fair housing issues, including "disproportionate housing needs" and "displacement risk" of members of protected groups, and identify and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			prioritize concrete actions to remedy these injustices. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** The draft Oakland Housing Element correctly identifies that "[m]ost of Oakland is considered vulnerable to displacement pressures."17 The City identified "disproportionate housing needs and displacement risk" as a fair housing issue with one of the contributing factors as "high rates of cost burden for renters and BIPOC individuals." One of the goals and actions the City identified to address this fair housing issue is "implement[ing] affordable housing preservation … strategies." This should be a high instead of medium priority. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** As communities of color continue to be the primary demographic affected by displacement and lack of affordable housing in Oakland based on local data, Oakland should put forward concrete commitments to pass TOPA by next year and significantly expand preservation funding to address these fair housing issues. TOPA policies effectively prevent displacement, preserve existing housing as affordable for the long term, and convert market rate housing into permanently affordable housing stock. **TOPA and Affordable Housing Preservation Funding Affirmatively Further Fair Housing** As stated in Oakland's draft Housing Element, "actions that preserve the affordability of existing homes also play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the gentrification of their neighborhoods… A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			if adopted, would allow for tenants to access the wealth building and stability of benefits of homeownership." **Oakland Must Incorporate Input from Renters and Low-Income People in the Housing Element Process** Jurisdictions must make a "diligent effort [...] to achieve public participation of all economic segments of the community in the development of the housing element." During the public engagement process, low-income residents and community-based organizations representing low-income people and members of protected classes identified housing preservation as a top priority. The City highlighted that a key public participation theme that emerged to mitigate the pressures of displacement and gentrification was preserving the city's existing affordable housing stock, "including through implementation of a Community/Tenant Opportunity to Purchase Act" and "innovative solutions to maintain permanent affordability like community land trusts." As we have detailed above, "investigating" a Tenant/Community Opportunity to Purchase Act is an insufficient action to respond to this community-identified priority. **Oakland Must Incorporate Input from Renters and Low-Income People in the Housing Element Process** Our local TOPA campaign is deeply rooted in the needs of the community, as this policy aims to support tenants at risk of displacement, facilitate tenant organizing and power-building, stabilize gentrifying neighborhoods, and take property off the speculative market and place it under community control. Oakland residents need the City of Oakland to take concrete steps in the 6th Cycle Housing Element to not only	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			meet its legal obligations, but to ensure that every resident can continue to thrive and prosper here without fear of losing their homes	
32	**Elizabeth Wampler, Bay Area LISC**	6/13/2022	Do you think the City would be open to considering an overlay for all faith-owned land as part of the housing element? We can include the folks we're working with now, but I'm guessing this will up again for faith organizations in future cohorts. Re: zoning/densities for the site at 8400 Enterprise Way (City of Refuge), it looks like 5-6 stories,up to 100 units/acre, mixed-use multi-family housing and ground floor services/retail would be ideal. Between now and the fall, COR will be doing more work to further refine a more specific project vision, and I'd love to share where they land with you.	The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites). In addition, the preliminary zoning reforms proposed include changing the zoning of some of these faith-owned sites to the new Regional Commercial CR-2 zone, where residential activities will be permitted. Furthermore, the new proposed Affordable Housing Overlay Zone will apply to all of these faith-owned sites. Also, see Action 4.3.6: Expand opportunities for permitting of Emergency Shelters, where the City will revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide when located on properties owned by churches, temples, synagogues, and other similar institutions approved for Community Assembly Civic Activities.
33	**TransForm**	6/13/2022	A. Oakland has been a leader in the Bay Area when it comes to smart parking policy. In 2015, the City eliminated parking minimums in the downtown zone and set parking minimums for residential and commercial development. These changes greatly reduced the financial and physical constraint posed by excessive parking mandates. Also by requiring unbundling for all developments of 10 or more units in the downtown development zone, it is clear Oakland understands the power of implementing many smart parking policies in tandem, a nuance missed by other municipalities. B. Oakland's draft 2023-2031 Housing Element includes Action 3.4.3 which will fund a continued review of parking policies after the Housing Element is enacted. We commend this proposed action but are concerned with the lack of specificity in the proposed review. The action speaks to a "review of existing residential	A. Comment noted. B. See the revised **Action 3.4.4**: Revise citywide parking standards in the Housing Element and Appendix J for a summary of zoning amendments related to parking.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			parking standards and the identifications of appropriate new standards to match long-term development and environmental goals" and, beyond a reference to exploring flexibility in parking requirements, the action lacks a concrete policy goal. With the importance of implementing smarter parking policies, especially given our climate and housing affordability crises, we at TransForm want to ensure this funded review has clear goals so it is not ignored or pushed to the next Housing Element cycle. Specifically, we encourage implementing unbundling beyond the downtown development zone, and strengthening TDM by requiring provision of transit passes and bike share memberships to each resident. To show the tremendous benefits these policies can have, we have used our GreenTRIPConnect tool to create scenarios for a potential future development site at 7000 Bancroft Ave. GreenTRIP Connect is recommended by the California Office of Planning and Research as a tool to use while developing General Plans and is especially useful during development of Housing Elements. The tool is free to use whether planning at the site or city-wide level. By implementing unbundling, and providing bikeshare and transit passes at this site, we saw a 26% decrease in parking and resident transportation savings of $988 per year. When combined with 100% affordable housing these strategies resulted in an incredible 50% reduction in driving and greenhouse gas emissions for the site, compared to the city average. If an affordable development with	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			smart parking strategies were built on this site each household would drive 5,066 less miles per year creating a greener and safer community. With a RHNA allocation of 26,251, it is essential that Oakland makes eliminating constraints to housing development such as parking a top priority for this Housing Element. Policies and investments that also maximize the amount of affordable housing will also be critical. These two crucial issues—smart parking strategies and affordable housing—go hand-in-hand and we hope the City defines concrete goals for parking reduction.	
34	**Stuart Flashman**	6/13/2022	Stuart's annotations on Appendix A - see link in column to the right Stuart's annotations on Ch 1-4 - see link in column to the right	Comments noted.
35	**Ronnie Spitzer**	6/13/2022	A. Many terms used within the document require more precise definition. The document currently contains phrases which could be construed one way within the current context but might assume an entirely different meaning in the future. One such example is “missing middle”, which is in common usage within planning circles but might be considered “jargon” to the general public even now. B. Most important, the Housing Element states the upcoming 2023-2031 RHNA allocation is already covered by the identified inventory of adequate sites within the EXISTING General Plan, even adding in a 15% buffer. No further changes should be required. Therefore, the main purpose of this document might be to incorporate the Housing Action Plan goals listed on page 11, although that point is not clearly described in the document. This should be made explicit throughout the document.	A. See Appendix H: Glossary for key terms used in the Housing Element. B. Comment noted and the role of the Housing Action Plan to affirmatively further fair housing has been made explicit throughout the document C. The 2023-2031 is Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing. The goals seek to - Reduce racial segregation and disparities in housing opportunities and outcomes - Significantly address disparities in housing needs and access to opportunity, - Replace segregated living patterns with truly integrated and balanced living patterns - Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. In addition, the City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation and fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			C. Likewise, upzoning around transit stations and along transit corridors is not required to meet 2023-2031 RHNA goals. A justification within the context of RHNA goals should be made to support statements such as, “Some initial amendments to the Land Use Element and Planning and Zoning Code along with initial zoning map changes will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing on page 14. Is this change proposed on general principles, to meet and equity goad, to encourage a more diverse mixture of housing, or some other reason? High resource areas (“high resource” itself should be precisely defined and the locations identified within the draft Element) are discussed in several places within this document. What exactly are the goals for the high resource areas; is it the exact RHNA housing mix goal or something else? Implementation of the Housing Action Plan broadly in the City’s high resource areas requires an understanding of the barriers to development there, is not cohesively described in one location within the draft. Based on studies, the largest barrier to housing production in an area such as Rockridge is the high land cost. Development of any housing other than market-rate housing is difficult to pencil out. This needs to be explicitly discussed in the HE and policies proposed to overcome this difficulty. One option proposed in the HE is an affordable housing overlay. It should be specific to each area within the City, and take into account local conditions.	market- rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each goal includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low -income households. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Another point regards tenant and anti-displacement protections explicitly removing properties with existing units from further development to avoid displacement. Those policies look very different in higher resource areas than low ones, and would require the development of vacant parcels in Rockridge. As mentioned earlier in this comment, those are few and far between. For example, much of College Ave, Claremont and portions of Upper Broadway, i.e. the arterials, already include the types of housing proposed in the HE. How those housing goals can be accomplished should be explicitly described.	
36	**Rockridge Community Planning Council**	6/13/2022	A. As a statement of general principles, the Rockridge Community Planning Council (RCPC) wants to acknowledge that the State of California is experiencing a housing crisis of historic proportions and that Oakland as a City and Rockridge as a neighborhood within the City must do their parts to ease this crisis. Furthermore, as a "high resource" neighborhood with some of the highest housing prices in the entire region, we believe it is incumbent upon us to lead by example in advocating for more housing development within our borders. We believe that welcoming significant numbers of new residents to Rockridge would be entirely consistent with our values and the cherished historically diverse character of our neighborhood. **B. Housing Sites Inventory** First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density	A. Comment noted. B. Oakland Planning Staff included the "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley in the revised Housing Element Sites Inventory. C. Comment noted. The Draft Housing Inventory Sites Interactive Map has been updated here: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d D. The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) E. Comment noted. Goal #3 has been revised to read "Close the Gap Between Affordable and Market Rate Housing Production by Expanding Affordable Housing Opportunities." F. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. G. The City will broadly apply the Affordable Housing Overlay (AHO) citywide, except for contaminated sites, protected historical sites/districts, and selected areas in the Very High Fire Hazard Severity Zone, per **Action 3.4.10** Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right , the City will create a Housing Opportunity Sites Overlay Zone to permit sites included in the Housing Element's Housing Sites Inventory (**identified in Table C-26 in Appendix C**) to develop owner-occupied and rental multifamily

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses. While some infill and densification is likely to occur organically in Rockridge's lower density residential neighborhoods, we believe the most important opportunities exist on a handful of larger sites within the neighborhood. C. The maps and tables in the draft are a little difficult to navigate, but we believe we can see the following sites identified on Figure 3-1: Housing Sites Inventory: • CCA Site • Rockridge BART Site • Triangular site at the corner of Claremont and College • A portion of the Dreyer's Ice Cream site • Wendy's site at College and Broadway D. We agree with the inclusion of these sites on the inventory but believe several other important potential housing development sites have been left out, including: • Ridge site at Broadway and Pleasant Hill (already discussed above) • Carpet store site at College and Kales • Dialysis Center site at Claremont and Clifton • DMV Site at Claremont and Cavour	uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. H. Comment noted. Staff will undertake a comprehensive update of the Land Use and Transportation Element (LUTE) and the Planning Code in Phase 2 of the General Plan Update process

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			• Chevron Station Site at Telegraph near highway 24 The omission of these sites or others yet to be identified in Rockridge contradicts a key narrative discussed in the Housing Action Plan beginning on page 60 to affirmatively further fair housing goals. The section reads: "The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive." We are aware that some of the sites on the second list above may have been omitted from the Inventory by staff because of technical guidelines governing what sorts of sites are eligible for inclusion. However, we feel strongly that we should err on the side of inclusivity due to the seriousness of the housing crisis. We would welcome an opportunity to discuss these criteria further with Planning Department staff. **E. Housing Action Plan:** <u>Five Overarching Goals</u> The first paragraph of the narrative on page 59 under Goal #3 <u>"Expand Affordable Housing Opportunities"</u> discusses the importance of the general production of housing and asserts that "thoughtfully adding housing at every level can reduce market competition for existing homes…." before going on to point out the overarching importance of making a concerted effort to increase production of homes that are	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			affordable to very-low, low and moderate income households. We agree with these sentiments but feel that the headline “Expand Affordable Housing Opportunities” is not descriptive of the Element’s stated policy goals. We recommend the headline be amended to read something like “Expand Housing Opportunities at All Income Levels, With a Very Strong Emphasis on Affordable Housing." F. Policy 3.2: Create a More Diverse Mix of Homes to Meet Community Needs This policy would be implemented in part by zoning amendments to permit more “missing middle” type small scale multi-unit housing in low density zoning districts like those found in most of Rockridge. Our own economic studies have shown that similar to SB 9 which is already in effect, these regulatory changes will result in only a small amount of change in Rockridge, where very high land values mean that demolition of most existing houses is unlikely. However, we are supportive of these policy changes for both our own neighborhood and the City as a whole. If feasible, we would like to see these zoning amendments incentivize family, senior and disabled – friendly units. This policy would also be implemented by actions taken by the City to reduce regulatory constraints to the development of ADUs and also to help older or lower-income homeowners develop ADUs. We are very supportive of these efforts and feel that they could help bring a modest number of moderately affordable units to Rockridge G. Policy 3.3: Expand Resources for the Construction of Affordable Homes We are broadly supportive of the intent and implementation ideas contained in this section,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			recognizing that while it is important to add housing at all affordability levels, by far the greatest need is for affordable units. We also recognize that construction of affordable housing is unfortunately very expensive and there is a need to find more resources and innovative ways to pay for this. In particular, we are intrigued by the concept of an "affordable housing overlay" outlined in action 3.3.5. We would be interested in exploring this idea along College Avenue as well as on some or all of the opportunity sites discussed above H. Lastly, we think there is a role to play for measures that don't involve new construction, such as discouraging holding of units off the rental market and condo conversions. In addition, the City should look at amending the CN-1 zoning to prohibit conversions of upper floor residential units to non-residential uses.	
37	**Oakland Heritage Alliance**	6/13/2022	A. Some of the upzoning proposals could adversely affect historic properties, but they are presented very generally in the draft with the intent of being fleshed out as part of the upcoming zoning amendments and objective design review standards. We therefore are considering these implementing documents as the appropriate vehicles for evaluating the impact of housing element proposals on historic properties and look forward to opportunities for early input on these documents B. It is good that "landmarks/historic properties" are included among the constraints considered in Figure C-6 regarding Supplemental Housing Sites for AFFH. However, Figure C-6 does not include Areas of Secondary Importance (ASIs) as defined in the Historic Preservation Element and Oakland Cultural	A. Comment noted. B. Areas of Secondary Importance (ASIs) are not included in Figure C-6, but the City is considering how ASIs will be impacted with regard to the Housing Element and development of the proposed zoning reforms and objective design standards.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Heritage Survey. We therefore request that ASIs be reflected in Figure C-6 and that the housing element and follow up zoning amendments and objective design review standards be structured to avoid adverse impacts on ASIs as well as other historic properties.	
38	**Kirk Peterson**	6/13/2022	A. Affordable housing is housing very hard to find for low income families. The Housing Element should promote the construction of more affordable/subsidized units that will accommodate families, as well as families that can afford to occupy market rate housing. I'd say a family is a group of more than three related individuals, possibly including multiple generations and generally including children, or we can simply say a related group that needs three bedrooms. There are legal definitions. It's easier and more lucrative to build studio, or one or two bedroom units. Many (most?) landlords would rather rent to adults only, as the wear and tear on the unit will probably be less, and these people are more likely to move out, and not stay for a longtime. In addition to that, there is likely to be a loss of family-sized dwellings, as existing single family houses are divided into apartments, or demolished to make way for multi-unit structures with small units. It would be negligent of the City to ignore the possibility of significant demographic changes related to the Housing Element. Until such potential changes are examined it cannot be determined if they are good or not, or consistent with the goals of the City. It is important that the Housing Element include language to help promote housing for families. This means numbers of people housed, not numbers of units. B. When the draft talks about 'opportunity sites' it seems to only look at large parcels that could	A. Comment noted. This comment is addressed in revised **Action 3.7.5:** Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes. B. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. C. Comment noted. Actions in Goal 5 Policy 5.1 Sustain Affordable First-Time Homeownership Incentives address this comment, as well as actions in Goals 1 and 2, which are designed to protect homeowners from displacement pressures and provide investments to help homeowners preserve and improve their homes. D. Comment noted. Staff will study these issues as part of the Land Use and Transportation Element (LUTE) and Open Space, Conservation and Recreation Element updates, as well as through the new Infrastructure / Facilities Element in Phase 2 of the General Plan Update process.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			hold many units, of which there are relatively few in most neighborhoods. These are often owned by entities that have no interest in building housing. I would like the Element to look at our boulevards and arterial streets as 'opportunity sites' that could yield a large number of units. There are about fifty miles of such streets, with thousands of small parcels. The element should look at how to promote development of the smaller (up to five story) multi-unit buildings along the street that are already zoned for it. This would be a more 'organic' sort of growth that could be more 'Oaklandish' and neighborhood-friendly than the huge boxes most developers want to build. The city should encourage 'mom and pop' local development done by local people who own small parcels. The Housing Element should look at how the City can facilitate such development, instead of devoting so much effort to helping corporations build big lucrative projects. C. Home ownership has many benefits for individuals and cities. The Element should address the importance of home ownership. People who are literally invested in Oakland are most likely to be involved in and contributing to the community over time, which is good for all. The City should promote home ownership, and facilitate projects that allow for it. This could include requiring that projects include for sale units, possibly with developer-subsidized down payments or financing assistance. Such a policy would be a contrast to historic institutional exclusionary practice. D. To what extent is planning considering the effects of lots of new development on the character and quality of life for Oakland citizens. present and future. I have seen the negative effects of 'redevelopment ' in Oakland	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			in person. The Draft does not seem to include much on possible widespread cumulative negative impacts on cultural and natural resources. In the denser more crowded Oakland will the increase in housing result in diminishing the quality of and access to other things cities need. Will there be a commensurate increase of parks and open space, or libraries. or accessibility to historic sites and districts, or their expansion. Our present citizens care about these things. To what extent shall we socialize the risk of the loss or diminishment of such things, while the economic benefit of development remains private? Meeting a state quota for housing is a bureaucratic legal goal - but it cannot be a lived reality	
39	**BART**	6/13/2022	A. We also appreciate the City of Oakland's (City) interest in including BART's land in its 2023-2031 Housing Element, as shown in Appendix C: Sites Inventory of the draft Housing Element. As the City is aware, BART's Transit-Oriented Development Program Work Plan currently does not categorize all of the BART properties that are listed in Appendix C: Sites Inventory as 'Near-term (project initiation in 2020-2025)'. It is our collective goal to deliver as much housing near transit as possible, and BART would like to support local jurisdictions to achieve the Bay Area's regional housing goals. However, BART has limited staffing resources and few funding sources for the infrastructure - most notably parking replacement - that is often required to free-up space on BART's land for development. Given current resources, it will be challenging for BART to support	A. Comment noted. B. These sites have been removed from the Revised 2023-2031 Housing Element. C. Comment noted. The City has been working closely with BART during the 2023-2031 Housing Element Update. In addition, **Action 5.2.2** also promotes infill, transit-oriented development (TOD), and mixed-use development and directs staff to work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. The City has applied for the State Prohousing Designation and is awaiting final decision.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development of all the land that has been planned for inclusion in BART partner jurisdictions' Housing Elements during the 2023-2031 upcoming cycle. B. In addition, several BART properties that are listed in Appendix C: Sites Inventory are not suitable for development due to proximity to BART infrastructure and associated structural issues. Please see attached for a detailed analysis of each of BART properties. [see link to comment letter p.4-5 in column to the right] C. If conditions have changed since the last assessment in 2019/2020, the timeframe for TOD development in station areas can be updated in BART's TOD Work Plan. Key considerations by BART for prioritizing development projects are 1) availability of local funding and resources to support development, including staff support and funding for community outreach, affordable housing, and infrastructure, and 2) seamless coordination with local jurisdiction staff. Jurisdictions with station areas that are currently listed in BART's TOD Work Plan timeframes of Mid-term or Long-term need to meet the following conditions to be considered for prioritization: **1.Local Support and Funding:** First and foremost, we see TOD projects on our property not as solely a BART project, but a BART/local jurisdiction-partnership. BART TOD projects are civic destinations, and transformative to the community, often including off-site improvements. The City must be committed to working closely with BART to find funds and resources to facilitate community outreach, discussions, and decisions on TOD development and area-wide parking. It takes	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			several years of pre-development work prior to issuance of a RFP for developers, so any development of BART land within the planning period of 2023-2031 must dedicate sufficient BART and City staff time to advance a TOD project within a reasonable timeframe. **2.Prohousing Designation:** BART will prioritize projects in jurisdictions that are pursuing a Prohousing Designation by California Department of Housing and Community Development. We may advance housing development on BART's property located within a Prohousing Designation even if other conditions have not yet been met. **3.Station Access and Parking Strategies:** Maintaining access to the station is important for the City and region. BART will work with City staff and developers to develop and implement a Station Access Plan that identifies potential improvement projects to enhance pedestrian, bicycle, transit, and vehicular access. The City should plan for and implement a locally led parking resource assessment and management plan for at least ¼-mile radius around the station area. It should identify parking opportunities for BART riders that would minimize the number of spaces to be included in the TOD project and address spillover concerns by neighbors. BART staff will work with the jurisdiction to provide support and guidance as needed but will not be able to lead the development and implementation of a parking management plan. **4.Environmental Studies:** The City should ensure that environmental studies associated with the 2023-2031 Housing Element assume a minimum density of 75 dwelling units per acre for BART's land that is likely to be developed	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			within the planning period. **5. BART Policies and Standards:** Any development on BART's land is subject to BART's review procedures and approvals and shall follow relevant guidelines, policies, and regulations. The jurisdiction should commit to support and meet BART's policies andstandards. Most of these policies and are summarized on our TOD Guidelines and Procedures webpage.	
40	**EBHO**	6/13/2022	A. The draft document, which runs to more than 800 pages including all its appendices, contains no executive summary or other guide. At a minimum, both the draft and final document should include a summary narrative that outlines the key findings of the evaluation of past performance, the results of the Fair Housing Assessment including identification of the most important underlying factors to be addressed, the identified governmental and non-governmental constrains to housing, a summary of the site inventory that quantifies and maps key issues such as the geographic distribution or concentration of sites – particularly those for lower incomehouseholds, and key elements of the action plan including a listing that highlights new programs and policies. B. The presentation of the draft Housing Element to both Planning Commission and City Council was subsumed within a much larger information report on the overall update of the City's General Plan. As such it wasn't clear from the lengthy title of the agenda item that this was the opportunity to provide comments on the Housing Element. At those meetings, the presentation focused on the update process but did not include any information on the actual content of the document. It wasn't until we	A. The revised 2023-2031 Housing Element includes an Executive Summary. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions in blue text. B. Comment noted. The Draft Housing Element was presented to the Planning Commission on June 1, 2022. Staff also presented to City Council on October 18, 2022, and Planning Commission on October 19, 2022, to review the findings letter from State HCD. C. Appendix A: Evaluation of the 2015-2023 Housing Element includes a discussion on shortfalls in producing affordable housing D. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing. In addition, the 2023-2031 Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing. The goals seek to: - Reduce racial segregation and disparities in housing opportunities and outcomes - Significantly address disparities in housing needs and access to opportunity, - Replace segregated living patterns with truly integrated and balanced living patterns - Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation and fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between market- rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			commented on this that a summary presentation was finally made available halfway through the public comment period. We do note that the Planning Commission scheduled a subsequent meeting to review the draft in more detail. C. Evaluation of Past Performance As noted in Appendix A, performance in meeting the RHNA goals of the 5th Cycle Housing Element has been mixed. From 2015 through 2021 (7 years out of the 8-year planning period), the City has issued permits for more units than its total RHNA. However, as the Draft notes, this has been disproportionately concentrated in the Above-Moderate Income category, where the City has already issued permits for nearly 200% of its RHNA, while falling far short for Very Low, Low and Moderate Income. The result has been a "housing balance ratio" of one unit of lower income (VLI+ LI) housing for every eight units of Above Moderate-Incomehousing, despite a RHNA goal of oneunit of lower income housing for every 1.9 units of Above Moderate-Income housing. Oakland has long passed the point where it needs to make special efforts to attract market-rate development. Over the 3rdand 4thhousing element cycles(1999-2014), Oakland permittedan average of just under 700 units per year, rarely exceeding 1,000 in a year, and of which 73% were Above Moderate Income. In the currentcycle, the average has been 2,400 permits per year, with only two years below 1,000, of which 88% were Above Moderate Income. In light of this record, the evaluation of past	goal includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low -income households. E. The interactive Sites Inventory Map includes sites, Council Districts, and affordability level and is available at: https://oakgis.maps.arcgis.com/apps/instant/interactivelegend/index.html?appid=2cb71a0c3b5e45df9dabe3e0239c245d F. The Excel table was updated on the City's Housing Element website on August 9, 2022. Please see the revised table here: https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element. G. The revised 2023-2031 Housing Element incorporates this feedback and includes an updated analysis of nonvacant sites H. Based on a recent online survey conducted by the City as well as data provided by the Association of Bay Area Governments, the Appendix C Sites Inventory estimates that ADUs produced from 2023 to 2031 will have the following projected affordability levels (See Table C-8): 35% affordable to very-low-income households, 35% affordable to low-income households, and 30% affordable to moderate-income households. Based on a total projected ADU production of 1,978 units through 2031, the City has estimated that ADU construction will result in the creation of 692 very-low-income units, 692 low-income units, and 593 moderate-income units. To ensure that Oakland's ADU production aligns with these projections, the City has added a NEW Action 3.2.6: Monitor Affordability of Permitted ADUs to identify any additional actions in the event of a shortfall. I. The revised 2023-2031 Housing Element incorporates this feedback. The revised 2023-2031 Housing Element includes additional sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) J. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. K. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. The revised 2023-2031 Housing Element includes additional sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			performance should take a harder look at the reasons for this disproportionality. In particular, the City should assess the need for continuing to incentivize production of market-rate housing without conditioning such incentives on production of affordable units or payments of appropriate fees to the Affordable Housing Trust Fund, particularly since the 6th cycle RHNA requires not only a much greater numberof units, but also a higher proportion of lower income units. The evaluation needs to not just provide data on past performance, it should include analysis of what is working and what is not, the reasons for this performance, and a serious consideration of which programs need to be discontinued or seriously modified. D. Affimatively Furthering Fair Housing Despite having completed a Fair Housing Assessment in Appendix D, there still appears to be a disconnect between this assessment and the housing element itself. In the Introduction chapter, the City refers to “an affirmatively furthering fair housing analysis (AFFH), which guides the analysis of each set of requirements.” Similarly, Appendix D is labeled as the “Affirmatively Furthering Fair Housing Draft” but is primarily a fair housing analysis. The new statutory requirement to affirmatively further fair housing requires more than an analysis of fair housing issues. The analysis must identify and prioritize the key factors contributing to segregation and disparities in housing opportunity and conditions, and then the City must develop both the site inventory and the action plan in ways that address these factors, along with clear metrics for determining whether those actions result in real	L. See Action 5.2.8: Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with NEW Action 5.2.9: Prioritize investments and improvements to meet the needs of low-resourced and disproportionately burdened communities. M. Comment received. N. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes discrete implementation timelines and milestones within the 8-year planning period. O. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes updated milestones and objectives for programs and policies, especially actions that address fair housing issues, within the 8-year planning period. P. In the revised 2023-2031 Housing Element, Goal 3 of the Housing Action Plan is reframed to state "Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities." In addition, "Reduce racial segregation and racial disparities in housing opportunities and outcomes" is explicitly called out as a priority in the introduction to the Housing Action Plan. Q-1. See the revised Action 2.2.5: Extend local replacement unit provisions. Q-2: Comment noted. Q-3: COPA/TOPA policies are relatively new to the Bay Area and are complex undertakings that require careful financial, regulatory, and legal alignment. Before proceeding with a COPA/TOPA policy, staff would require direction from Council on the scope and goals of such a potential policy. Such direction has not yet been received, and as such, COPA/TOPA policy must remain a study item. Q-4: City staff dispose of public land according to Council direction and State and local law, specifically the State Surplus Land Act (SLA) and the Oakland Municipal Code (OMC) (see Chapter 2.42 which governs the disposition of real property). Decisions about the disposition of a particular parcel are made by City Council action, consistent with the requirements of the OMC Q-5: See revised Action 3.3.3 Q-6 See revised Action 3.3.5: Implement an Affordable Housing Overlay. Q-7: See updated timeline to Action 3.3.8: Right-sized development fees on market-rate developments. Q-8: See revised Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			improvements. It is not enough to determine after the fact whether an AFFH-neutral selection process results in non-discriminatory outcomes. The requirement to affirmatively further fair housing must fully inform the site inventory and action plan. We encourage the City to review HCD's April 2020 AFFH Memo (AB 686 Summary of Requirements in Housing Law)and its April 2021 AFFH Guidance, which includes detailed explanations of specific requirements for housing elements, to ensure it is fully meeting these requirements The Fair Housing analysis does not consider whether the City's zoning contributes to enduring patterns of racial segregation. The word "zoning" barely appears in the analysis, and while the Draft Housing Element notes that most of the City's residentially zoned land is zoned for single-family housing, this is not related back to patterns of racial segregation. Not surprisingly, in the absence of such an analysis, the City conducted its site inventory with the aim of meeting its RHNA numbers without having to rezone any sites. The Housing Element should include an analysis of the extent to which existing zoning is a barrier and a set of strategies to overcome this barrier through strategic rezoning. Table D-9 provides a brief summary of fair housing issues, contributing factors and proposed actions, but the proposed actions are fairly general and not tied back to the action plan. We recommend that Table D-9 be revised to explicitly cross-reference specific actions described in the action plan itself. Table D-9 notes as one issue that "Affordable housing is limited by location and housing type," but there's little examination of the reasons for this. The table recommends that	Q-9: On May 17, 2022, Oakland City Council directed the City Administration to study the creation and implementation of a citywide enhanced infrastructure financing district (EIFD) funding affordable housing and infrastructure improvements. Staff will be conducting a feasibility study of various EIFD scenarios and anticipate that a final recommendation will be provided by Fiscal Year 2024. See Action 3.3.10: Citywide Enhanced Infrastructure Financing District (EIFD). Q-11: Comment noted. Q-12: Please see the revised Action 3.3.15: Continue and expand density bonus incentives. The City will solicit additional ideas for incentives and expansion of the density bonus program and gather feedback from Planning Commission and City Council, as well, during a mid-cycle Housing Element assessment. Q-13: Planning Staff are exploring this with the Department of Finance. Q-14: Action 3.3.18: Implement affordable housing investments contained in Measure U has been updated to include information about Measure U, the November 2022 Infrastructure Bond that, if approved, will include $350 million for affordable housing. Q-15: See revised Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right. The City will create a Housing Opportunity Sites Overlay Zone to permit all sites included in the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to develop owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. Q-16: Comment noted Q-17: See Action 5.2.8: Encourage new affordable housing in higher resource areas, which seeks to increase access to exclusive neighborhoods coupled with NEW Action 5.2.9: Prioritize investments and improvements to meet the needs of low-resourced and disproportionately burdened communities.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			this be addressed primarily throughmobility strategies including expanded use of Housing Choice Vouchers but fails to note that in many of the higher opportunity areas,rents are far higher than what's allowed for with the Housing Choice Voucher payment standards. While there is a vague call to "eliminatesingle-family zoning," it's unclear if this refers to allowing 2-4 units buildings in single-family zones, or if it means expanding multifamily zoning at densities of 30 du/acre or greater. Finally, while it is proposed that affordable housing be increased in high opportunity areas, there's no specific program referenced here by which this might be achieved, particularly given the limited number of lower income sites identified in high opportunity areas. E. Site Inventory The site map is at a scale that makes it difficult to adequately see whether these is an equitable geographic distribution of sites, particularly sites for lower income housing. The City should provide a series of maps for each planning area or council districtin addition to a single citywide map. The site maps should be overlaid on maps of key demographic indicators, particularly racial concentrations and concentrations of high-and low-incomehouseholds. It would be especially useful to map sites against areas of concentration of white residents vs concentrations of people of color. The City recently provided links to an interactive GIS map. This map would also benefit from additional layers showing key demographic indicators including race and income. Sites should be color coded for income level (lower income, moderate income, above moderate income). Rather than shading the	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			parcels, which at best indicates the relative size of parcels, sites should be indicate with dots of different sizes representing the number of units that can be accommodated on the site. F. The Excel table for the site inventory has modified the total capacity column and eliminated the formula that is in the State's template spreadsheet and replaced it with actual numbers. The result is that in a number of places the entry for "total capacity"does not equal the sum of the columns for lower, moderate and above-moderate income capacity. This should be corrected, since at present the sum of the total capacity column exceeds the sum of the individual columns. G. The inventory should provide more detail on the current use of non-vacant sites. In particular, while the inventory identifies whether non-vacant sites have office, commercial, or other uses, it does not distinguish between sites with active uses and those with vacant buildings. That information is needed to assess the likelihood that a site will become available during the planning period. H. The projection that roughly 90% of all new ADUs will be affordable to lower incomehouseholds is significantly different from the regional ADU affordability distribution provided by ABAG (see Appendix C, page 25). The City has relied on a limited (and not necessarily representative) survey that was conducted as part of a City-commissioned report. Data on ADU rental rates is based on just 56 responses to this question. It indicated that the average rent for anexisting ADUis $1,112. However, one third of the responses indicated that their ADUs were being occupied rent free. As these units are likely being provided to family members, without further	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			data it cannot be assumed that these units are available to and occupied by low-income households. The calculation of average rents should remove the zero rent units from the calculation. Further evidence that the $1,112 figure is unlikely to apply to newly created ADUs is contained in this same City-commissioned report. That study includes model pro-formas for several ADU development scenarios and uses rents that range between $2,360 and $3,029 per month. The City should re-evaluate its projections of affordability level for newly created ADUs and revise the site inventory accordingly. I. There is little discussion or analysis of how the inventory does or doesn't change patterns of segregation. Table C-19 on page C-83 shows that for the preliminary site inventory, 26.1%of lowerincome capacity is located in moderate to highest resource tracts, while 36.4% of above moderate-income capacity is located in these tracts. On its face this does not appear to further fair housing. While the City has provided additional AFFH sites, it has not indicated the extent to which those supplemental sites would offset the disparity described above. J. The geographic distribution of sites is not surprising in light of the City's decision to focus only on opportunity sites that require no rezoning, and to rule out in advance any rezoning of low-density areas to accommodate some of the lower income portion of the RHNA. While the City proposes, outside of the site inventory, to consider some future rezoning, the areas that will be studied are not identified and it appears that the focus will be more on	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			accommodating “missing middle” housing types that cannot be assumed necessarily to be affordable to lower income households. K. The City explains the relatively small proportion of lower income sites in high and moderate resource areas by noting that significant portions of these areas are also very high fire hazard or seismic hazard areas, which are located primarily in the most affluent portions of the city with the greatest degree of racial segregation. At the same time, other hazards such as industrial pollution, poor air quality, or sea level rise, were not considered disqualifying. The result is a set of criteria that by definition rule out the majority of high opportunity areas and areas of concentration of affluence and white population. L. The City justifies concentration of affordable housing in lower opportunity areas as a strategy of investment in these areas to prevent displacement. However, State guidance is clear that this needs to be coupled with place-based community development strategies that involve investments not only in housing, but alsoin enhanced infrastructure, services, schools, jobs, and other community needs that serve the existing population in at-risk neighborhoods. While the Draft Housing Element makes reference to the need for such investments, it does not provide adequate detail on specific programs, strategies or non-housing investments to be pursued, the anticipated outcomes, or any metrics for determining if such programs are effective in stabilizing at-risk communities. M. Action Plan Much of the Action Plan consists of continuation of policies and programs already in place. Since it’s clear that existing policies have	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			resulted in over-production of market-rate housing and under-production of lower income housing, the City must consider how existing programs can be recalibrated to produce better results. N. Where new programs are mentioned, they are generally described with terms such as “consider,” “study”, or “evaluate”. These are not actions in themselves. HCD has been clear in its guidance and in reviews of draft housing elements in other regions that these kinds of general statementsare not sufficient. In its reviewo f Los Angeles’ Draft Housing Element, HCD clearly stated: Programs must commit to completing an action that will have an actual impact on housing such as “amend,” “revise,” or “establish” While we would like to see the Housing Element itself be the vehicle for new housing policies, where this is not possible then at a minimum the Housing Element should commit to bringing concrete legislation before the City Council for adoption by a specific date. Moreover, these dates should be in the firstfew years of the housingelement. Postponing these studies to the later years means that many of these new programs, if implementedat all, will have limited impact in the housing elementcycle. This is not a new issue. There are a number of policies and programs that the City has pledged to “consider” for multiple housing element cycles without ever having a full policy discussion and proposed legislation before the City Council. For this update, the City should commit to move beyond this	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			In many cases the time frames are vague. Specific milestones and deadlines for completion should be called out. O. There is no clear prioritization of the many actions contained in the Action Plan. Which actions are most important to achievement of the City's goals and objectives? For the many new programs and policies that the City will "consider" or "study," which are the most important and what resources will be available to ensure that they are completed in a timely fashion? Anticipated outcomes and metrics are insufficient. Many of the action items have no quantified objectives and it is unclear what outcomes are anticipated or how the effectiveness of these actions, particularly in addressing fair housing issues, will be assessed. While the Action Plan discusses how the City's major goals address AFFH, it doesn't clearly identify specific actions that address priority factors for AFFH. HCD's guidance on affirmatively furthering fair housing is clear that jurisdictions must identify underlying factors that create and maintain segregations and inequitable opportunities and outcomes, and then select a number of factors that are the highest priority and ensure that the site inventory and action plan are clearly related back to these priority factors. P. The City should not take actions that incentivize market-rate housing without requiring affordability in return. In the past, many policies that could be used to incentivize affordable housing have been implemented across the board without any affordability requirements, leaving the City with limited options for incentives specifically to produce affordable housing. After two decades of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			significant above-moderate income housing productiondating back to the “10K” plan, it’s clear that such incentives are no longer needed. Rather than continuing to “expand housing for all economic levels” the housing element action plan needs to focus on the most deficient areas and therefore must prioritize actions that will improve performance in creating and preserving housing for the lowest income individuals, including persons who are currently unhoused. Q-1 Action 2.2.5 The City should provide a specific date for adopting SB 330 anti-demolition protections. Since this is a matter of bringing the City’s code into compliance this should be implemented by the end of 2023 at the latest, including extending it beyond SB 330’s sunset date. Q-2: Action 2.2.6 We strongly support efforts to reduce speculation in housing through both a speculation tax and adoption of Tenant Opportunity to Purchase Act/Community Opportunity to Purchase Act (TOPA/COPA) legislation. Q-3: Action 2.2.8.In place of vague action to study a possible TOPA/COPA policy, the City should commit to bringing a TOPA/COPA ordinance before the City Council for adoption within the first year of the housing element. Q-4 Action 3.3.1 Any strategy regarding use of public land should start with adoption of a public land disposition ordinance consistent with the policy framework adopted by the City Council in December 2018. If the City is now proposing to abandon that framework and take a different approach, that should be clearly stated and presented to the City Council as a change in adopted policy.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Q-5: Action 3.3.3 This action speaks primarily to provision of rental assistance but includes as part of its objective thestatement that “100% of tenants facing eviction will have access to counsel by the end of the Housing Element cycle.” This statement should be included in action 1.1.5, which currently contains no actual commitment. Q-6: Action 3.3.5 We strongly support an Affordable Housing overlay that provides by-right approval of 100% affordable housing projects citywide, wherever zoning currently permits it. We also support identifying specific incentives and bonuses that could be part of such an overlay, but that process should not delay the immediate adoption and implementation of a by-right overlay. Q-7: Action 3.3.8 We support revision of the Affordable Housing and Jobs/Housing Impact Fee programs, with particular attention to the amount and timing of the fee and recalibration of the on-site alternative compliance option to provide an outcome (number and affordabilityof units) comparable to what would be achieved through investment of the fee in affordable housing. This analysis was supposed to have been completed by the end of 2021 for presentation to the City Council in early 2022 and was to involve community participation throughout theprocess and not just in response to a completed study. This has not been the case. The City should commit to a firm date for revision of these ordinances, and should ensure that all evaluations and assessments include meaningful community involvement. Q-8: Action 3.3.9 We support deferral or reduction of planning and building fees to increase the feasibility and reduce the cost of producing affordable housing. In particular, we	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			support deferring or reducing building permit fees. For City-financed affordable housing, fee payments could be deferred until a certificate of occupancy is issued, as the City has ample leverage to ensure that those fees will be paid. Q-9: Action 3.3.10 We support the creation of a Citywide Enhanced Infrastructure Financing District (EIFD) with a primary goal of providing additional funding resources for affordable housing. Q-11: Action 3.3.12 We support continuation of the Acquisitionand Conversion to Affordable Housing (ACAH) program, including support for community land trusts and limited equity cooperatives in addition to traditional nonprofit housing. Q-12: 3.3.15: We support continuation of density bonus incentives, but call on the city to evaluate any barriers to a broader use of the density bonus program, including information on what developers have shared regarding how this program might be improved or expanded. His evaluation should also distinguish between use of density bonus for 100% affordable projects vs predominately market-rate projects. Q-13: Action 3.3.16 We support increasing the Real Estate Transfer Tax on higher end transactions including dedication of that increased revenue for programs that produce, preserve and protect affordable housing opportunities. We urge the City to move forward to place such an item on the November 2024 ballot to maximize the likelihood of passage. Q-14: Action 3.3.18 We strongly support extension of the Measure KK infrastructure and affordable housing bond, with asubstantial increase in the share and amount devoted to housing production and preservation, at a scale	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			that will make a significant impact on Oakland's pressing affordable housing needs.This is an urgent priority and should be implemented as rapidly as possible. Q-15: Action 3.4.10 For inventory sites that are carried over from previous housing element cycles, the City must commit to actually rezone those sites –perhaps through use of a zoning overlay – that provides for by-right approval on these sites if a minimumof 20 percent of the units will be affordable to lower-income households. Ideally this should be implemented as part of the Housing Element itself. If not, then the Housing Element must include a specific rezoning program for these sites. Q16: Action 3.6.4 We support active encouragement of use of SB 35 to provide by-right approval for 100% affordable housing, including training and direction to Planning staff that this should be affirmatively pursued. Q-17: Action 5.2.8 We have substantial concerns that, given the limited targeting of high opportunity neighborhoods in the site inventory, a "mixed-income" strategy in areas of concentration may lead to more gentrification and displacement. The City must ensure that a better mix of incomes in a neighborhood is not simply capturing a point in time where a neighborhood transition is actually taking place. We note that despite acknowledging the need for place-based strategies to stabilize and improve low resource areas, these programs are not included in the Action Plan.	
41	**WOCAP Steering Committee**	6/14/2022	**A. Indoor air pollution:** We are glad to see references to indoor air pollution remediation in the Housing Element, for existing homes.	A. See updates to **Action 2.1.6:** Increased Funding for Improved Indoor Air Quality B. See **Action 5.2.5**: Encourage earthquake-resilient housing

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			From an equity, resource and health perspective it makes sense to preserve existing housing wherever possible. We know that indoor air pollution is a significant health burden on Oakland residents, particularly heavy for people who suffer from other air pollution exposure burdens. We urge the City to add specifics about how it will undertake the objective of improving air pollution exposure and how that effort will be targeted. We suggest that the city commit to work with Alameda County Health Department, local hospitals, nonprofits and others to specifically target these efforts toward families with asthmatic children, for the purpose of reducing emergency room visits for treatment of asthma and other lung diseases. There was a program operating several years ago called "Pay for Success" that pioneered an approach to identify these families, coordinate housing improvement services and secure innovative forms of funding from health care providers. That program may have information or lessons that could help the City establish a larger effort. **Unintended consequences:** Actions should be more explicit about steps to avoid inequitable and unintended consequences and steps to overcome access barriers (ex. Many times do not have electrical systems that will accommodate filtration, how will people be protected from utility/PGE imposed fees resulting from electrification) **Strengthen Wording:** Actions related to air quality are currently worded too vaguely and use very weak language, and at some points don't propose any new actions. This would be fine if air quality wasn't a serious issue, however we know there are serious air quality issues in many areas that lead to elevated rates	C. Comment noted. See updates to **Action 2.1.2:** Promote Healthy Homes Lead-Safe Housing and **Action 5.2.6:** Encourage Climate Resilient Housing. D. The City recommends that the definition of a contaminated site is not expanded to include air pollution. Air pollution is too transitory to assign a "site" to it. More broadly, the definition of contaminated sites can be addressed through the Citywide Vulnerability Assessment & Comprehensive Adaptation Plan (ECAP A-3). Several long-term solutions to address unhealthy levels of air pollution in low income communities of color are provided through the Zero Emissions Vehicle Plan (i.e., reducing truck pollution through the transition to 100% zero-emission vehicles), and to a latter extent will be included in the Building Electrification Roadmap. Improving building envelopes and indoor air filtration (addressed in the Building Electrification Roadmap) are critical interim steps to protect most-impacted communities - as are vegetated buffers. However, the City currently does not have funding nor organizational placement for vegetated buffer work. **Action 5.2.3:** Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects would only pursue grant and loan programs and other technical assistance programs to support the contamination characterization and remediation costs. Pursuing funding for this program would rely upon leadership from the Sustainability and Resilience Division of the City Administrator's Office, as well as the Planning & Building Department and Economic and Workforce Development Department. Historically, the Environmental Services Division of Oakland Public Works has only worked on obtaining grants for City-owned properties or public/private partnerships where the City was listed as a property owner. F. AHSC funding is not used for existing buildings. G. Comment noted H. Comment noted. I. Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			of asthma and other health issues. For example 2.1.1, and 2.1.2 use the phrase "the city will continue to..." implying that they will not be doing anything new. We expect the city to step up and find additional ways to expand this important work. Additionally, 2.1.6 says the "city will explore..." explore feels like weak language - please make a more serious commitment to this important action **2.1.6 Explore funding for improved indoor air quality:** - Ways to strengthen this language could include: "Increase funding" "Create dedicated funding" "match funding" "secure funding". - Some requirements are triggered when property changes hands (ex. 1031 swap). Or at the point of vacancy (new tenant). - Additionally why just "federal and state $", why not all sorts of sources of funds, from the City, creative philanthropic partners (e.g. the California Endowment), community benefits funds from the health care sector, etc. **B. 2.1.1 Support home rehabilitation programs:** - Can this also include rehab for soft story buildings. We want to ensure that if a big earthquake hits, we aren't in danger of losing precious housing stock. **C. 2.1.2 Promote healthy homes and lead-safe housing AND 5.2.5 Encourage climate-resilient housing.** **- Get Gas Out of Residential Buildings:** Recent research shows that indoor gas appliances emit unhealthy levels of air pollution, sometimes in concentrations much higher than outdoor air pollution. Gas use in buildings regularly causes explosions - particularly in older buildings and from aging gas infrastructure. The City's ECAP rightly establishes a goal to gradually remove	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			fossil gas from existing buildings to be replaced with heath pump technology. We understand that the City Staff is developing a Building Electrification Roadmap The Housing Element of the General Plan should contain specific actions to implement this ECAP objective and fully actualize the Roadmap. This is important from a public health and safety perspective, will help the City reduce greenhouse gas emissions, and in the long run lower the cost of residential heating, cooling and hot water services for Oakland residents. - Need to protect people from additional charges from PG&E related to decommissioning or removing gas infrastructure from existing homes - For 2.1.2, we'd encourage the city to meet with and partner with Alameda County Department of Public Health's Asthma Start Program and the Alameda County Healthy Homes Department to collaborate in future efforts. - We hope the city can think through what happens for existing buildings if they switch to electric? How can we prevent an owner from switching back to gas in the future? Please better define what it would mean to remove natural gas. Also, it might be appropriate to connect with the Fire Department and understand if they have a role? How will OFD get educated around the removal of natural gas since this will reduce the risk of explosions and fires. **D. Remediation of Contaminated Sites:** The Housing Element rightly contains planning to remediate environmentally contaminated sites. Historically this has meant cleanup of hazardous waste dump sites. That work certainly needs to continue. But there is another form of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			contamination that the City should address in this plan. Due to deacdes of structural racism, many low income people and communities of color live in or near places that experience unhealthy levels of air pollution. This is evident near the Port of Oakland, near freeways and places with high concentrations of heavy duty diesel powered vehicle traffic. We urge the City to expand the definition of contaminated sites to include neighborhoods exposed to high levels of air pollution. This will help prioritize remediation efforts such as retrofitting existing housing with indoor air filtration. Funding could be used to support and incentivise housing upgrades in highly polluted locations. Also consider that in West Oakland the City is working with businesses (CASS and CSW) to relocate out of the main neighborhood. This would open up some VERY large contaminated parcels for potential housing development and neighborhood amenities. These comments relate to - 3.2.3 Promote flexibility in adaptive reuse to increase the housing stock - 5.2.3 Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects - This action currently reads as if it will subsidize redevelopment regardless of who the developer is ("to property owners") and for whom the housing is being made available. This is too broad. This actions needs to be focus on equitable development and housing. - We'd like to see additional details (and we're open to brainstorming with you) related to HOW the city can help coordinate between developers and federal clean up funds. Strengthen langue to include "Support, find,	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			locate and arrange for clean up funcs" or something similar. - Should the Building Dept also be a stakeholder / leader for this? Do Public Works and Sustinability have a role as well? Also consider partnering with foundations. - Alameda County's Dept of Environmental Health - Land and Water Protection Local Oversight Program has an initiative to map environmentally polluted sites in the whole county. They could potentially partner data and clean up funding efforts. **F. 5.2.4 "Secure funding from the State's Affordable Housing and Sustainable Communities AHSC) Program"** - Are there opportunities to use this funidng source for remediation and/or electrification / decarbonization? **G. Innovative Financing for New and Renovated Housing:** In the past year, we have entered a period of rising interest rates and inflation that makes it more difficult to finance housing. One partial pollution is to use Green or Social Bonds to finance the city's housing efforts. Recent experience indicates rising demand from investors for these kinds of bonds. There are a wide range of benefits. Green and Social bonds tend to attract wider participation from investors in bond issues, Green bonds help align city finance with other objects including: equity and climate resilience. There is also evidence from Europe and from corporate bond market that these kinds of financing instruments can attract investors to accept a lower interest rate, partly because of lower risk and partly to satisfy growing investor interest in projects having sustainability and equity attributes. We urge the City to actively consider using green or social bond frameworks	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to finance housing costs, and potentially lower finance costs for this part of the General Plan **H. Take advantage of point of sale or change of occupancy rules.** Across several action areas, the City can take a more programmatic approach to require or facilitate property modifications that promote environmental health at the point at which a property changes hands (e.g. someone vacates a lease, sells a home or residential building). This approach should include equity measures to ensure lower-resource property owners and/or properties that are "naturally occurring" affordable housing, can implement the improvements. Funding can come from some of the resources mentioned above. **I. 5.2.6 Consider adoption of a disaster reconstruction overlay zone.** - We hope this action can ensure that new homes have strict air quality / electrification / weatherization standards and that affordability is preserved? - Maybe consider creating a low-interest construction loan program for income-qualified owners trying to recover. This type of support should prioritize folks who need it the most and/or who's housing can be preserved for low and moderate income Oaklanders.	
42	**The Unity Council**	6/14/2022	"Housing action plan draft HE, chapter 4, action 3.6.3 (page 83): Expand by-right approvals and implement entitlement reform for affordable housing". Recommendation: Building Fee Deferral for City-sponsored affordable housing development is a Housing Element policy recommendation that the City of Oakland should enact. - Issue: The requirement to pay fees up front without ability to defer is a "governmental	Comment noted. Please see revised **Action 3.3.9:** Adjusting or waiving City fees and payment timing for affordable housing developments. The City currently requires only one-half of the amount of impact fees to be paid before permit issuance and the remaining half to be paid before the issuance of a Certificate of Occupancy. The City also defers other fees such as public art and school tax. The City will explore additional ways to increase flexibility in payment timing and potential fee reductions and/or waivers to reduce the burden imposed by the collection of City fees and requirements.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			constraint on housing. - Policy solution: The solution is to provide for a deferral of fees on 100% affordable housing developments. As part of the entitlement reform, the city of Oakland will consider fee subsidies/or payment deferrals to better accommodate affordable housing developers, therefore the City of Oakland should consider including Building Fee deferral to fruition the shared goals of providing desperately needed affordable housing for Oakland's most at-risk and vulnerable residents. Reform in the process to allow building fee deferral for city-sponsored affordable housing developments would allow nonprofit organizations to build more affordable housing. This important step would allow nonprofit affordable housing developers to make it sustainable and ensure that affordable housing developers have an equal opportunity. The building fee deferral would address the specific barriers of the fees so that we can expand affordable housing in our community which is so urgently needed. By deferring these fees, the City of Oakland will be showing itself as a true partner to affordable housing organizations like The Unity Council, who has been a trustworthy, reliable and steadfast partners to the City of Oakland, and has worked together for years.	
43	**Crystal Lynn Keeler**	6/14/2022	A. "An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic	A. Comment noted. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. See updates to Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in placebased strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas." - Chapter 3 We own a home in East Oakland that serves the criteria above from Chapter 3. It is an area with high displacement (displacement especially occurs on Outlook Avenue - with the View - just above us (68th Ave). We have very nice houses on our block, but areas nearby and down the hill are a bit more rugged. I believe our neighborhood region is an area with historic disinvestment, but with substantial gentrifying forces (houses on the block are now going for a million, a 2-bedroom one block over went for $750K). We're on the low hills, not the high hills, so not much risk of mudslide, or much risk of being flooded (I think we're too high). Our property is 10,000 square feet with a very large yard behind us with fruit trees and an area for an urban garden. There is another chunk of vacant lot just next to our large backyard lot that is currently housing a discarded moldy van (sometimes inhabited by homeless people) and a non-operational boat detritus. I would love to be able to purchase the small slot just next to	C. Although the state-level Costa-Hawkins Act constrains Oakland's ability to further extend rent control tenant protections, there are several provisions in the Housing Element that will better protect tenants. **Action 2.2.5** would extend replacement unit protections beyond the expiration of SB 330. **Action 1.1.9** implements a housing registry, which will be a valuable tool in enforcing existing tenant protection laws. **Action 2.2.6** studies a possible "flip tax" that might reduce speculation. D. Comment noted. Please see revised **Action 1.1.14** Protect Oakland residents from displacement and becoming homeless. E. Comment noted. Please refer to the City of Oakland's Housing Resource Center- https://www.oaklandca.gov/topics/housing-resource-center. F. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. G. Comment noted. If someone believes they are compensated below the minimum wage, they should file a claim: https://www.oaklandca.gov/topics/measure-ff-and-measure-z. H. Comment noted. Revisions to the Encampment Management Policy itself will be addressed outside of the Housing Element. I. Comment noted. J. There are multiple safeguards placed for redevelopment of contaminated sites. Alameda County Environmental Health is the local agency responsible for review and oversight of redevelopment of contaminated sites. Known contaminated sites would be required to be remediated prior to redevelopment activities with human health risk exposure screening processes that would be in compliance with local, state, and federal requirements. The proposed policy would pursue grant and loan programs and other technical assistance programs to support the contamination characterization and remediation costs.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			our large backyard and combine the properties to build the largest ADU allowed, or possibly a small house (depending how zoning might go), or two ADUs. The area cannot stand alone without an easement off our neighbors apartment complex for access in the back, or easement off our property. My goal would be to provide it as affordable housing. However, we are stretched thin with the current mortgage and lack the capital to develop this area for affordable housing currently (building and a bit of leveling out the low hill area for proper foundation). I know second-hand of the displacement that has happened in my neighborhood, even my best friend was forced to move to Antioch (someone who had called Oakland home for 20 years). Rising rent costs caused him to be displaced along with two of his roommates, all African-American. Prior to owning this house, we previously managed a 48-unit building for several years near Lake Merritt, so we are very familiar with Fair Housing Practices and non-discriminatory methods for renting units. We employed every strategy we could to ensure absolute fairness in renting out the units available at that complex; however, we were constrained by the owner's requirements and a lack of affordable housing units in that building. We were well aware of the housing crisis when the owner asked us to rent studios for $1750 (this was four years ago), and we had two tiny efficiency units that went in a day, because their cost was only $1350 (but they were tiny rooms with a separate bathroom). Goal 3, p. 61 "Like other Bay Area cities, one of the major challenges to developing permanent affordable housing in Oakland is the extremely high cost of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development, especially the cost of land, labor, and materials. As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability. Oakland also has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, can often provide significant opportunities for residential development. Further, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units." We're not a unit that falls within the category of a vacant lot. We are a unit that has a very large space that could be developed into affordable housing, but lack the capital means to do so currently. "The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential generally to 3,000 square feet	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to remove constraints on lot splitting." p.65 This softening of requirement would allow for at least the possibility of what I'd like to do to the land available. B. "Action 3.2.4: Provide financial incentives for older or lower-income homeowners who want ADUs." We might or might not be eligible for something like this. We aren't high income, but we have one city income and one disability income, so we might fall in the middle of this action step. C. Comment about rent control: increase the options for rent control, expand rent control I personally believe it should be within the city's housing plan to increase the rental control increase cap to all housing units in Oakland, not just those built before 1983. New developers, new housing construction should also be bound by the same laws, and rent control has saved so many people in the past (including myself when fully disabled, on limited income). D. Action 1.1.13 This is not an exhaustive list. Catholic Charities and other entities helped prevent homelessness through various programs, but have not been mentioned here. E. Action 3.7.1: This is an extremely important area. I know two elderly ladies (76 and 80) with ailing health concerns. If either one of them dies, the other will become homeless, with no housing options, because neither of them can afford the rent on their own (disability social security - only funding). Both are physically disabled, one in a wheelchair, one requiring a scooter, and need accessible housing.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			F. Action 3.7.3 I think this is NOT STRONG ENOUGH! Promoting affordable units in new construction is not enough. REQUIRING IT is the only thing that will force most developers to even offer. Policy efforts should be undertaken to make this kind of policy change into law. Simple carrots are not effective enough, as evidenced by what has happened in Los Angeles. Action 3.8.3 This is a tough one. The actions of this will fall primarily on the shoulders of low or underpaid property managers (with the exception of large corporate property managers - who usually do receive a salary). We worked super hard as building managers of the 48-unit complex to fill the units, but it was so much work at market rate (set by owner). We received only $300/month in compensation if the building was full (in addition to our no rent in exchange for exhaustive duties of a building manager). Most work was unpaid. Any extra city requirements, like city garbage - push/pull, bulk waste pick-ups, composting were always unpaid. An action like this will invite retaliation from building owners down on underpaid building managers. A caution should be applied here, perhaps only enacting this action after 3-months vacant. Sometimes units were also rehabbed, being updated, and this construction process took longer than 3 months, and an exception should be made for units that are being improved for tenants. H. POLICY 4.2 ENCAMPMENT MANAGEMENT Action 4.2.1 I believe offering mental health site access, or social work ability near these encampment sites should be part of this section. It would require funding, but should not just be funding security	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			guards or police for safety, should offer the material and immaterial services really needed by this population group. I. Goal 5 First time home buyer programs should also help to address the extra mortgage insurance that folks without quite enough of a down payment have to pay, just extra, which substantially disadvantages marginalized groups and further perpetuates inequity. We didn't have to pay that extra insurance cost because we were very fortunate, but others are not so lucky. J. Action 5.2.3 The caution here is that contaminated sites truly must be deemed decontaminated and safe by EPA standards at bare minimum. Too many low income housing projects in other cities have been built over these sites, and residents were never informed of the risks. Some sites had a small sign saying do not play on the soil/grass, but parents didn't know that their children were receiving high levels of contamination. How do you have children in these areas without safety? Children should be allowed safe places to play and safe areas outside, not to mention inside. Extreme caution must be used not to perpetuate environmental injustice at the expense of meeting demand.	
44	**Scott Forman**	6/14/2022	My main point of feedback is that, especially with respect to the housing element, we should go much farther in making it possible to build lots of new homes. I think our default stance should be much closer to "all and every type of home building allowed, everywhere, by right." The same goes for any and all commercial activities that don't have significant negative externalities like lots of	Comments noted. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			noise or noxious fumes. In other words, while I love that we're liberalizing and loosening some constraints, I believe most of the remaining restrictions are themselves entirely unncessary and counterproductive, and that Oakland can be much denser, and welcoming many new neighbors with dramatically lower housing costs. I think we should be planning to increase the population of Oakland by 25-50% in the next decade, and even well-meaning constraints on growth, like to preserve the character of certain neighborhoods, or to extract concessions from real estate developers in exchange for more density... as if density is a bad thing that we begrudge! -- are profoundly misguided. In short, I'm an enthusiastic "yes" to a lot of what's in this plan, but I'd like to see it go much further in actively promoting new homes and businesses, and discouraging cars and parking.	
45	**Sarah Karlinsky, SPUR**	6/15/2022	A. The Housing Element should take stronger steps to affirmatively further fair housing. We appreciate the effort that the team has taken to analyze how this Housing Element draft affirmatively furthers fair housing. However, we believe that more can be done to achieve this goal. The draft notes that most of the residential capacity for housing is located in low resource, high segregation areas due to the fact that over 60% of the land in Oakland is in these categories. And the land that is located in high and highest resource categories is impacted by environmental constraints such as very high fire hazard severity zones. These are challenging constraints to address. Nevertheless, we believe that there are some	A. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities, particularly in high resource areas, and promoting neighborhood stability and health. Also, see Appendix J for a summary of zoning amendments, including a summary of a Housing Sites Overlay zone that requires a majority of a site listed as a housing opportunity site be developed as residential. B. Comment noted. As part of the Phase 1 GPU Environmental Justice Element, as well as Phase 2 of the GPU with the Open Space, Conservation and Recreation Element update and creation of the new Infrastructure and Facilities Element, staff will be assessing the current state of community assets to identify improvements, increase assets, and identify locations in underserved residential areas. C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health, with more detail about locations impacted by these measures.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			steps that can be taken to increase the housing capacity in high resource areas. Specifically, we believe that Oakland's Housing Element should look at sites that can be intensively upzoned within the Rockridge and Elmwood neighborhoods, including the Rockridge BART parking lot. Potential sites could include the Trader Joe's site directly adjacent to the BART station (inclusive of parking lot) and the triangular lot at the corner of College Avenue and Claremont. While some sites in this area may be too small to support affordable housing, they could accommodate apartments that would be more affordable than the single family homes that currently exist in this majority of the neighborhood. Additionally, the city may wish to consider requiring that some larger lots that are currently zoned for community commercial include housing at some required minimum density. This would be particularly appropriate for the large, currently undeveloped portions of the shopping center site at the corner of Pleasant Hill and Broadway. B. The Housing Element should identify concrete strategies to build more community infrastructure in low-income communities in order to make affordable housing in those neighborhoods more equitable. Given that so much of the residential capacity in Oakland is located in low resource and high segregation areas, and therefore that a sizable portion of affordable housing in Oakland may be located in these areas, it is important to ensure that appropriate community infrastructure is being planned in these neighborhoods. Building affordable housing in low-income neighborhoods can help stabilize communities	D. Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			and is an important anti-displacement strategy. However it must be paired with investments in parks, community spaces, and programs that benefit low-income families. C. The Housing Element should clarify where upzoning is being contemplated. Policy 3.4 - Reforming zoning and Land Use to Address Community Priorities references allowing additional building heights and/or housing densities along certain corridors such as International, Foothill and MacArthur Boulevards, allowing a diversity of housing types in single-family neighborhoods, increasing height and density in areas approximate to BART and BRT and increasing density in resource rich neighborhoods. We appreciate and support all these policies. However, we feel that it is important for the Housing Element to provide more specific detail about precisely which locations are being contemplated for upzoning and by how much. Additionally, we understand that the Housing Element team is considering tools such as affordable housing overlays to help encourage more affordable housing production. We support the use of affordable housing overlays, but feel that the team should provide more information about where they should be utilized. D. State housing agencies should prioritize numerous important goals - including funding affordable housing near transit and stabilizing neighborhoods at risk of displacement - when determining where to allocate affordable housing funds. Appendix F of the Draft Housing Element notes that the California Tax Credit Allocation Committee's competitive tax credit	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			applications disadvantage Oakland because so much of the residentially zoned land is considered "low resource". While affirmatively furthering fair housing is an absolutely critical goal that the state should be advancing, it is also important that Oakland, as a regional hub with many BART stations, be able to access tax credits and other funding to build affordable housing close to transit. Additionally, as mentioned earlier, affordable housing is an important tool for stabilizing neighborhoods at risk of displacement. It would be helpful for HCD to work with partner agencies at the state level to help balance these important values in the allocation of affordable housing resources.	
46	**Thomas Cooke**	6/29/2022	A. The draft plan identifies a multitude of housing issues and problems and sets forth many admirable goals and policies to be addressed. The draft checks off all the boxes, and makes the case there are sufficient parcels and capacity to meet the State mandated housing goal, to meet compliance with State housing element requirements. However, if Oakland is to make any meaningful process in addressing its housing needs a more *proactive, implementation orientation is required.* The comments below suggest several means by which to do so. B. Expand search and identification of potential housing sites. It appears the planners relied primarily of other sources to identify potential sites and did not conduct original search and analysis. Have the many church properties for example been surveyed? Have there been any surveys done to identify underutilized commercial property with housing potential for either rezoning or mixed use. other than those suggested by the community? Provide scheduling for any planning or zoning changes	A. Comment noted. B. The revised 2023-2031 Housing Element includes these sites as part of Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites). Please also see **NEW Action 3.4.10**: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right. C. See updates to **Action 3.5.1:** Support community land trusts and other shared equity models.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			required to facilitate housing construction and conditions thereof. Although extensive tables documenting the characteristics of many sites are provided, any sense priority is lost. To off set this problem a more selective, high priority site category should be established to promote and expedite housing construction. Sites on this list should be given priority for local and other funding resources. Criteria already provided in the draft should be refined (simplified) to distinguish such sites. As necessary such sites should be designated for plan and/or zoning changes to avoid preemption by non-residential development. A good example of such sites is the Ridge 2 site located at Broadway and Pleasant Valley Road. C. Identify and set forth more specific models for housing/rental mechanisms such as limit equity condominium, co-housing, and cooperatives.	
47	**Liana Molina, Build Affordable Faster**	6/30/2022	A. Meeting our goals to produce affordable housing is a priority for Oakland residents. In a September 2020 David Binder survey of Oakland voters (Margin of Error: ±5.7%) by David Binder for BAF, 83% of residents believe we are not building enough for low- and middle-income residents. 71% believe market rate construction is too expensive and pushes out existing residents, and 83% believe market rate housing should include as many affordable housing units as possible. [See chart on page 2 of comment letter.] B. It is not clear how the action plan outlined in the draft housing element will achieve our RHNA goals for affordable housing, especially when many of the strategies are a mere continuation of policies and programs currently	A. Comment noted. B. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element highlights new actions with blue text. C. Appendix A: Evaluation of the 2015-2023 Housing Element includes a discussion on shortfalls in producing affordable housing. See response to Letter #1 for more actions included in the Housing Action Plan to expand affordable housing opportunities and promote neighborhood stability and health. In addition, **NEW Action 3.3.19:** Sites Inventory and Fair Housing Accomplishments Tracking Program was included in the Housing Action Plan to conduct a mid-cycle assessment of progress toward meeting the City's RHNA housing production goals and to ensure there is adequate capacity to develop units at each income level. D. Goals 1 and 3 of the Housing Action Plan address anti-displacement measures and affordable housing production. The description of Goal 4 in the Housing Action Plan explicitly reaffirms the principle of housing as a human right.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			in place which have not been sufficient to prevent displacement of long-term residents and have resulted in the massive under-production of moderate- and lower-income housing. C. There is no reflective assessment of what program elements have been most successful, nor indication of how existing programs should be amended to produce better outcomes. The site inventory and action plan should include an explicit correlation with and metric for how these components address patterns of racial segregation that exist in Oakland, and specific action steps that will affirmatively further fair housing (AFFH) and correct exclusionary neighborhoods. While each section features a discussion of how the overarching goals address AFFH, the site inventory and action plan are not clearly related back to the priority contributing factors identified in the fair housing assessment, along with clear metrics to measure results, as directly by HCD's guidance. D. The housing element should reaffirm the principle of housing as a fundamental human right, as this has been a recurring theme in many of the community workshops and other public meetings over the past several years. In these meetings and in our poll, it is clear - Oaklanders want stronger anti-displacement measures and more affordable housing. **Below we highlight and comment on key issues and action steps we encourage the city to prioritize:** **Tenant Protections, Anti-Displacement and Preservation of Existing Affordable Housing** E. We support Action 1.1.3 to strengthen Ellis Act Ordinance protections. The city should be more actively advocating for state legislative reform to ensure the Ellis Act is not used by	E. Although the state-level Costa-Hawkins Act constrains Oakland's ability to further extend tenant protections, there are several provisions in the Housing Element that will better protect tenants. **Action 2.2.5** would extend replacement unit protections beyond the expiration of SB 330. **Action 1.1.9** implements a housing registry, which will be a valuable tool in enforcing existing tenant protection laws. **Action 2.2.6** studies a possible "flip tax" that might reduce speculation. F. Comment noted. G. Comment noted. Staff will address this as part of the Land Use and Transportation Element (LUTE) update in Phase 2 of the General Plan Update process. H. Comment noted. I. The City will work on establishing a standardized approach to the community benefits provided within a development agreement. Language updated in **Action 1.1.13:** Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land" to reflect this. J. City staff currently prioritize review of affordable housing projects. Please see updated Actions 3.3.1, 3.3.4, and 3.3.5 in the revised 2023-2031 Housing Element. K. Almost all of Oakland's zoning allow both residential and commercial, except industrial zones and the CR-1 and CC-3 zones. The Affordable Housing Overlay and Housing Sites Overlay Zones will apply in areas that could help facilitate commercial-residential conversions. L. The City will meet with stakeholders periodically to discuss emerging innovations and gather more information to understand and accommodate barriers. See updated language for **Action 3.3.11**: Support innovations by design. M. Please see the revised **Action 3.3.15**: Continue and expand density bonus incentives. The City will solicit additional ideas for incentives and expansion of the density bonus program and gather feedback from Planning Commission and City Council, as well, during a mid-cycle Housing Element assessment. N. The Affordable Housing and Infrastructure Bond Measure (Measure U) allocates $350 million to affordable housing preservation projects. O. An economic feasibility study is underway as part of the five-year impact fee update to determine the potential for increasing impact fees. In addition, the affordable housing impact fees automatically increase at the beginning of each fiscal year with the rate of construction inflation. Most recently, in

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			large conglomerates to push out tenants. We encourage more specificity regarding City Council direction to ensure that this is a legislative priority for the firm representing the city's interests in Sacramento. F. We support Action 1.1.5 to provide eviction defense and implement a right to counseling. Post pandemic, the city needs to increase its ability and capacity to represent individuals in unfair evictions. The administration and city council should ensure adequate funding for these programs during the current and upcoming two year and mid cycle budget processes. G. We support Action 1.1.7 to monitor neighborhood displacement risk factors. The city should build on the mapping work already produced for the site inventory, zoning, environmental justice analysis and other components of the housing element and general plan by conducting further analysis including an overlay of key demographic information to identify communities vulnerable to displacement. The city should allocate resources accordingly and center outreach and advocacy efforts in these areas in appropriate languages. H. We strongly support Action 1.1.11 to provide a local preference in affordable housing projects, Action 2.2.6 to reduce housing speculation through an anti-speculation tax, and the adoption of Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act that grants the right of first offer and right of refusal to tenants, community land trusts and nonprofits. I. Regarding Action 1.1.12 to negotiate for appropriate community benefits during development agreement approvals for major	July 2022, the affordable housing impact fees went up by 15% because of the high construction inflation rate. P. On May 17, 2022, Oakland City Council directed the City Administration to study the creation and implementation of a citywide enhanced infrastructure financing district (EIFD) funding affordable housing and infrastructure improvements. Staff will be conducting a feasibility study of various EIFD scenarios and anticipates that a final recommendation will be provided by Fiscal Year 2024. Please see **Action 3.3.10:** Citywide Enhanced Infrastructure Financing District (EIFD). Q. Comment noted. Revisions to the Encampment Management Policy itself will be addressed outside of the Housing Element.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			entitlements and use of City land: we urge the city to set strong community benefits standards including deeply affordable housing requirements and anti-displacement resources for tenants, across the board, which the approval of development agreements is conditioned upon. This would help offset the impacts of further displacement and gentrification and help provide more certainty for the city, project developers and other stakeholders, versus an unpredictable and resource intensive negotiation process. **J. Housing Production** We strongly support the recommendations in the overarching Policy Goal 3.1 to facilitate production of deeply affordable housing. This policy goal goes hand in hand with Action 3.3.5 to implement an affordable housing overlay to establish by right (non-discretionary) zoning for 100% affordable housing developments and development projects that offer higher affordability and Action 3.3.1 is key to make all available city-owned property for affordable housing and ensure that city-owned property goes to extremely low-income households as stated in Action 3.3.4. For any streamlining of 100% affordable, the city should explicitly mandate city staff to prioritize affordable housing projects. K. In addition, Action 3.2.3, is key to opening more land, and to promote flexibility in adaptive reuse to increase the housing stock. The city should look at vacant commercial stock and make it easier for it to be residential with higher affordability. In our previously referenced 2020 David Binder poll, allowing for residential for underutilized commercial properties had 90% support among Oakland voters. We believe in unlocking the potential of	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			thousands of square miles of urban and suburban commercial districts, transforming underutilized office parks and expansive parking lots into hundreds of thousands -- or even millions -- of new market-rate and affordable homes L. The cost of construction materials, high interest rates, and cost/competition for land are huge factors that will impact the delivery of housing projects, especially affordable housing projects. The city should not only engage Action 3.3.11: Support innovations by design but convene stakeholders such as labor and developers to significantly increase production of housing using construction innovations, such as exploring modular, to match housing needs. M. Lastly, given the city's absolute failure to deliver adequate affordable housing, and exceeding the market rate production goals, any implementation of Action 3.3.15 (density bonus incentives) should always be coupled with increased affordability requirements. **N. Financing** If the City is to meet its goal of building housing for the working and middle class it must provide a comprehensive financing plan for how we will build 10,000 very low-, low-, and moderate-income units by 2031, as required by our RHNA. We support Action 3.3.16: Consider revising the Real Estate Transfer Tax to use "a portion of the revised tax rate as a dedicated funding stream for affordable housing." We also support Action 3.3.18 to reauthorize Measure KK if it is a bond that predominantly addresses our housing affordability crisis. O. We also support Action 3.3.8 to right-size development fees on market-rate developments. In our analysis below, the city only gets a mere fraction of what a developer	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			could afford in 2020. Factors such as the current recession conditions, interest rates, and cost of construction materials may need to be re-visited. [See Table on page 4 of comment letter.] **P. EIFD** In 2019, the Mayor's Housing Cabinet published recommendations in the report *Oakland at Home: Recommendations for Implementing A Roadmap Toward Equity* which explored an Enhanced Infrastructure Financing District (EIFD) for affordable housing. Three years later, the draft Housing Element, also recommends considering an EIFD via Action 3.3.10, Consider a citywide Enhanced Infrastructure Financing District (EIFD). We're concerned about the proposed timeline and advocate that the city act with urgency regarding an EIFD that invests in the public good- affordable housing and associated infrastructure. A study and subsequent steps to form an EIFD should be completed in the near term, not 2028. Our agency has contracted with a respected third-party agency to do this analysis and is working with the city administration and other stakeholders to identify specific boundaries and uses for the EIFD revenues. An EIFD would allow for increased bonding capacity to leverage funding that local Oakland based developers can access to support the production and preservation of affordable housing. **Q. Homelessness and Services for the Unhoused** Regarding Goal 4. Address Homelessness and Expand Services for the Unhoused, the codification of the controversial "Encampment Management Policy" in Policy 4.2, Action 4.2.1 and 4.2.3, should be reconsidered. While addressing homelessness should be a top	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			priority for the city, many directly impacted members of the unhoused community and advocates for the homeless have registered formal opposition to the EMP and have requested that City Council rescind the ordinance. We urge the city to continue to engage these stakeholders to identify and build more consensus on ways to meet the health and safety needs of both unhoused residents and the greater Oakland community.	
48	**Jeff Levin, EBHO**	7/26/2022	**A. Item 3.1: Housing Element Annual Progress Report (APR)** This report summarizes the City's progress in meeting its Housing Element goals after 7 of the 8 years of the current housing element cycle have been completed. Unfortunately, the City has fallen far short of meeting it's assigned housing production targets. The report notes that building permits peaked at slightly more than 4,000 annually in both 2017 and 2018, and have since fallen off. In 2021, there were "only" 1,667 units permitted. This needs to be taken in historical perspective. These are still record-breaking numbers. - For the previous two housing element cycles, covering the period 1999 – 2014, the average number of units permitted was 690 per year. - For the last seven years, the average is nearly 2,400, more than three times the average over the preceding 16 years. This record level of production has been anything but equitable. As we have pointed out many times before, there is a tremendous imbalance between production of housing for above-moderate income and production for very-low, low and moderate income. - While the City has permitted nearly double its	A. Comment noted. See also response to Letter #1 for more actions included in the Housing Action Plan to expand affordable housing opportunities and promote neighborhood stability and health. In addition, NEW Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program was included in the Housing Action Plan to conduct a mid-cycle assessment of progress toward meeting the City's RHNA housing production goals and to ensure there is adequate capacity to develop units at each income level. B. The revised 2023-2031 Housing Element includes additional sites in Rockridge to meet the State's requirement to AFFH. In addition, Chapter 4: Housing Action Plan (HAP) describes in more detail the goals, strategies, and actions the City will implement in the 2023-2031 planning period to reduce racial segregation and eliminate racial disparities in access to opportunity and housing. NEW Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program was added to the Housing Element to conduct a mid-cycle assessment of the effectiveness of AFFH programs, including sites that develop in high resource areas. See response to Letter #1 for more actions included in the HAP to expand affordable housing opportunities, particularly in high resource areas, and promote neighborhood stability and health. C. The revised 2023-2031 Housing Element incorporates this feedback. This context is incorporated in the Introduction (1-1 through1-4); Appendix D (section D.2, pp. D-14 and 15, and new section D.5D.6 [Housing Sites Inventory Analysis]); Appendix F (F-10 through F-11). D. Chapter 4: Housing Action Plan in the revised 2023-2031 Housing Element includes discrete implementation timelines and milestones within the 8-year planning period

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			RHNA target for above-moderate income, it has permitted only 26% of the RHNA target for lower and moderate income. - Put another way, while the RHNA called for 53% of new housing to be targeted to above-moderate income, 89% of the building permits for new housing have been higher-end, above-moderate income housing that very few Oakland renters and first-time homebuyers can afford, while only 11% have been for affordable housing. - Only 1 affordable unit has been built for every 8 unaffordable market-rate units. Given this track record, a vague call to develop "housing for all economic levels" is not enough. Oakland needs a housing strategy that explicitly prioritizes affordable housing for those with the greatest needs, and does not need to provide additional incentives for above-moderate income, market-rate housing, which has been substantially over-produced. We hope you will consider this as Oakland moves forward to update its housing element for the 2023-2031 cycle. B. We believe the draft Housing Element falls far short of meeting the State requirement to affirmatively further fair housing – that is, to identify concrete goals, strategies and actions to reduce racial segregation and eliminate racial disparities in access to opportunity and housing outcomes. C. While the draft Housing Element contains an extensive Fair Housing Assessment with a wealth of data and maps, it falls short on at	F. In the revised 2023-2031 Housing Element, Goal 3 of the Housing Action Plan is reframed to state "Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities." In addition, "Reduce racial segregation and racial disparities in housing opportunities and outcomes" is explicitly called out as a priority in the introduction to the Housing Action Plan. G. The Housing Element was taken to City Council on October 18, 2022, and Planning Commission on October 19, 2022 to review the findings letter from State HCD, and will be presented to Planning Commission and Council for adoption in January 2023.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			least two counts. While there is a description of current racial and economic segregation and disparities, there is little analysis of the history and underlying factors that gave rise to, and continue to perpetuate, these conditions. The most glaring issue is that the Fair Housing Assessment completely fails to analyze exclusionary zoning patterns as a key factor in racial segregation, despite passing mention that zoning was an issue. This is particularly disappointing in light of the informational report on redlining, segregation and reparations in West Oakland that you received at your meeting last week, which does a far better job of identifying historical, structural and systemic factors and policies to address these. The draft Housing Element does not clearly identify and prioritize factors underlying racial segregation and disparities, and therefore also does not adequately link the goals, strategies and actions to the prioritized fair housing factors. This is explicitly required by the State, and failure to do so will likely result in the State rejecting the City's draft Housing Element. **Inventory of Available Sites** Of particular concern is the inventory of availability of suitable sites to meet Oakland's Regional Housing Needs Allocation (RHNA) targets for the various income levels. The draft was developed with the stated intent to create an inventory based on current zoning, without the need to identify additional parcels to be rezoned to accommodate the City's housing needs. As a result, most of the sites suitable for affordable housing continue to be concentrated in lower opportunity areas with higher concentrations of low income households and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			communities of color, particularly Black residents who historically have suffered the worst segregation and discrimination. Even if all the identified housing sites were developed as projected, racial segregation would not be significantly reduced, and the high opportunity, historically exclusive areas would remain as inaccessible as before. The City cannot say that it is affirmatively furthering fair housing if its plans and goals don't even mention reducing patterns of segregation and overcoming the historical barriers posed by exclusionary zoning. **Proposed Strategies and Programs** D. Another area of concern is the identification and description of new strategies and programs. Many of the new actions described in the draft Housing Element are policies and programs that EBHO and many other organizations had long advocated, such as greater tenant protections, a Tenant and Community Opportunity to Purchase Act, finalization of the City's public land policy, and more, and we are pleased to see these included here. Unfortunately, the language in the draft element says only that the City will "study" or "consider" such programs, with no concrete steps, milestones, expected outcomes, or performance metrics. The State has explicitly instructed cities that such vague statements are not sufficient, and has rejected draft housing elements from other cities for just this reason. If it is not possible to fully adopt new policies and programs as part of the Housing Element, then at a minimum the document must commit to bringing concrete legislation before the City Council by a specific date in order to implement these new programs. Simply continuing the	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			same actions that have been undertaken to date is not sufficient, since as clearly demonstrated in the City's Annual Performance Report, the City is falling far short of meeting its RHNA goals in the current cycle. **F. Additional Goals** - The draft Housing Element is organized around five goals. We would suggest that at least two additional goals be included: Reduce racial segregation and racial disparities in housing opportunities and outcomes. Simply stating a goal to "expand affordable housing opportunities" is not sufficient. - Close the gap between market-rate and affordable housing production by prioritizing preservation and development of housing affordable to those with the greatest needs, including Black and Brown households that constitute the bulk of the lower income population. Instead of "promoting housing opportunities for all economic levels," the City must explicitly prioritize actions that address these pressing needs, in both its funding priorities and its land use and other regulatory actions. **G. Council and Public Review of the Draft Housing Element** To date the City Council has not had an opportunity to consider the draft Housing Element. Despite an extensive community outreach process during preparation of the draft, once it was completed, consideration of the draft was subsumed within a larger report on development of the entire General Plan update. Initially there was no summary or overview of the content of the housing element and particularly new policies and actions and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			consideration of the obligation to affirmatively further fair housing until we explicitly called for such a summary. Previous draft Housing Elements have at least included an Executive Summary; there was no such summary in the current draft. We note with some dismay that the title of today's agenda item was modified in Rules Committee to remove the reference to "Receive Public Comments And Provide Feedback To Staff On The Draft Housing Element." While the initial formal 30-day public comment period closed on June 13, staff have repeatedly stated that they will continue to accept and consider public comment while the draft undergoes a 90-day review by the State. We are therefore puzzled and concerned that this language was omitted from the title as it suggests that the City is not prepared to consider public comments on the draft Housing Element at this meeting. We call on the City to ensure an open and inclusive process in the next revision of the draft Housing Element. Once staff receives comments from the State, that information should be brought before the City Council to get input on how best to address the State's comments. After the new draft is developed, there should be a public comment period of not less than 30 days, including a public hearing before the Council to consider and comment on the revised draft, prior to preparing a final draft for adoption and submission.	
49	**Sangeeta Sarkar, Save the Bay**	8/5/2022	As the City of Oakland plans to meet its RHNA goals, selecting sites that are resilient to the impacts of climate change is critically	Comment noted.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			important. New housing construction, especially for low-income communities who face the greatest risk from climate impacts, should be located away from areas prone to fires, flooding, extreme heat, and sea level rise. Dense, affordable, infill development close to transit can connect historically under-invested communities to resources and infrastructure across the city and region. Building SMART housing will also advance Oakland's climate goals by mitigating greenhouse gas emissions from driving by supporting the use of alternative modes. One opportunity to add more climate SMART housing in Oakland is in the Rockridge neighborhood. Housing built here would be accessible by BART and bus lines, and would be more resilient to extreme heat due to an abundance of trees and parks. This neighborhood is also more resilient to other climate impacts, as it is outside of the sea level rise and fire hazard zones. Affordable housing in this high opportunity area is especially impactful toward reducing income inequality and racial segregation, which the City of Oakland is required to address under AB 686. Prioritizing dense, affordable housing development in this and other high opportunity areas through strategic rezoning is necessary to affirmatively further fair housing as required by law, and to move toward racial and environmental equity in Oakland.	See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
50	**Louis Eisenberg**	8/15/2022	I am writing to express my strong support for a comment letter submitted by the Rockridge Community Planning Council (RCPC) Board on the topic of Oakland's draft Housing Element. In particular, I want to emphasize my support for the following paragraph:	Oakland Planning Staff included the "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley in the revised Housing Element Sites Inventory.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			First and foremost, we were extremely surprised and disappointed to see that the large "Shops at the Ridge Phase II" site at Broadway and Pleasant Valley was not included in the Inventory and we cannot understand the reasoning behind this omission. This site, which is flat, not within an established low-density neighborhood and less than a 15-minute walk from Rockridge BART, is clearly one of the most important undeveloped housing opportunity sites in the City. The current Home Depot proposal for this site would be an extremely inappropriate use. A survey of Rockridge residents from RCPC indicated that neighbors overwhelmingly prefer housing at the Ridge Phase II. The site should be included within the Inventory. As an implementation action of the Housing Element, the site should be rezoned to encourage high density residential development and prohibit stand-alone non-residential uses.	
51	**Maya Schechter**	8/16/2022	I am writing to share a comment in advance of Thursday's Rockridge meeting on the draft Housing Element. I cannot attend the meeting but I strongly support the points made by RCPC in the letter sent to the city, including allowing and incentivizing housing, especially affordable housing, on all of sites listed in the letter: - CCA Site - Rockridge BART Site - Triangular site at the corner of Claremont and College - A portion of the Dreyer's Ice Cream site - Wendy's site at College and Broadway - Ridge site at Broadway and Pleasant Hill - Carpet store site at College and Kales - Dialysis Center site at Claremont and Clifton - DMV Site at Claremont and Cavour - Chevron Station Site at Telegraph near highway 24	Comment noted. See Response to Letter #36

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			I also support the other points made to encourage housing in Rockridge.	
52	**Khanh Russo, Partnership for the Bay's Future**	8/26/2022	We believe the following policies can play an important role in meeting the requirements of this housing element and supporting thriving communities: A. Favorable Zoning and Land Use + Make multifamily infill easier to develop + Allow, require or encourage multifamily housing in more places + Allow or encourage missing middle housing in single-family neighborhoods + Provide incentives for affordable housing development + Provide incentives for affordable ADUs and "missing middle" housing B. Accelerating Production Timeframes + Streamline development approvals and environmental review process for multifamily housing + Streamline permitting process for multifamily housing C. Reducing Construction and Development Costs + Ensure local requirements are not making development more expensive without requisite benefits + Actively support the use of modular and factory-built construction methods D. Providing Financial Subsidies: Generate new or dedicate existing revenue for affordable housing F. Advocating for Rent Control and Just Cause for Eviction Policies + Adopt or update rent stabilization policies + Adopt or update just cause eviction policies G. Advocating for Community Land Trusts (CLTs): Support the formation and operation of community land trusts	Comments noted. A. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health. B. Please see the following actions, which address this issue: - **NEW Action 3.3.5:** Implement an Affordable Housing Overlay - **Action 3.3.15** Continue and expand density bonus incentives - **NEW Action 3.4.3:** Revise Conditional Use Permit (CUP) requirements - **NEW Action 3.4.8:** Implement Objective Design Standards - **NEW Action 3.4.10** Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right - **NEW Action 3.6.1:** Streamline the City permitting process, especially for low-income and nonprofit builders - **Action 3.6.4:** Continue SB 35 streamlining and encourage projects to use it C. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health, in particular Action 3.3.5: Implement an Affordable Housing Overlay and NEW Action 3.4.10: Implement a Housing Sites Overlay Zone. In addition, please see Action 3.3.11: Support innovations by design, which addresses support for modular and factory-built construction methods. D. Measure U was placed on the ballot for November 2022. If passed by voters, Measure U will issue bonds to raise $850 million, including $350 million dedicated to funding affordable housing. F. This comment is addressed in the Housing Element by **Action 1.1.1**: Continue to implement the rent adjustment ordinance. G. HCD's Acquisition and Conversion to Affordable Housing (ACAH) Notices of Funding Availability (NOFA) for the 2019-20 and 2020-21 funding rounds contained funding set-asides for Coop/CLT projects and will continue with this approach in upcoming NOFA rounds. HCD staff is also preparing revised loan documents to address potential tenant ownership in properties. H. An economic feasibility study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary requirements. This analysis will be presented to City Council for further

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			H. Advocating for Inclusionary Zoning and Impact Fees: Create or review/update inclusionary housing (including in-lieu fees) and commercial linkage fee requirements I. Inventory of Sites: Ensure that land is equitably zoned for multifamily housing, especially in high-opportunity areas	discussion and direction. Legislative authority to enact an Inclusionary Zoning law must come from City Council action. I. See Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health.
53	**Deeply Rooted**	10/1/2022	Community Proposed Strategy A. Treat unhoused people with dignity and respect the communities they have built rather than allowing for City evictions under the current Homeless Encampment Management Policy. B. Prioritize Compassionate Care and Facilities: Support humane and positive spaces with services such as showers, coffee, and groups that encourage individual expression; hire counselors and formerly/currently unhoused people to conduct outreach in communities they are familiar with; improve benefits and higher pay for social service workers and homeless shelter staff. C. Ensure Clean Environments: Support trash removal and address illegal dumping around homeless encampments in active partnership with unhoused residents. D. **[New City policy states]** Update zoning of single family (one home per parcel) to allow for duplex, fourplex, townhomes, and accessory dwelling units. Upzoning to allow for more live/work housing (live in and run a business) and artist housing in cultural districts). **Create Cultural Preservation Districts** to **protect existing residents** from displacement, i.e. require on-site affordable units from market rate projects (instead of in-lieu fee), use neighborhood area median income for defining affordability, require fair housing impact	A. Each year, it is estiated that 15,786 people in 13,135 households experience homelessness in Alameda County, and approximately 60% of them reside in Oakland. The conditions at many encampments are inhumane, dangerous, often fatal. The Encampment Management policy is rooted to a shelter offer policy that places a requirement on the City to provide shelter options when closing an encampment. While improvements are still being developed in the homelessness system, when an encampment is closed, individuals at the camp are offered a shelter bed and an alternative to sleeping in a place not fit for human habitation as defined by US Department of Housing and Urban Development. B. Many of the Emergency Shelter interventions operated by the Human Services Department offer showers, groups, services and housing navigation as part of a managed program. Futhermore, the local Continuum of Care (CoC) provides training and opportunities for individuals with lived expertise to contribute to the development of the Homeless Services System in Alameda County and the City of Oakland. Lastly the Commission on Homelessness regularly recruits individuals with lived experience to participate in meetings and inform the city on issues faced by people experiencing homelessness. C. It is the goal of the City to provide regular and adequate trash collection from encampments, to ensure that porta-potties and hand-washing stations are serviced regularly as needed, and that encampments receive regular deep cleanings to ensure that our unhoused residents are not living in conditions that threaten health and/or safety. D. Typically, affordable housing needs to be built at fairly sizable densities for it to be feasible to develop on-site affordable units. It would be challenging to finance affordable units for small increases in density, such as any upzoning projects to allow for duplexes, fourplexes, townhomes, and accessory dwelling units. Requiring affordable units to be developed for small-scale upzoning projects could limit development of single family neighborhoods altogether and therefore keep them single-family. In addition, this would create an equity problem where it would be more

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			assessment of market rate projects, have a Community Planning Council to vote on new development projects, etc. F. Support streamlined communication with affordable housing applicants for quicker response times and accurate updates on housing application status [Action items in the current Housing Element include housing preference policies for displaced residents and current Oakland residents and workers]. **G. Provide Financial Assistance:** Consider publicly subsidized housing stipends for Oakland natives. **H. Grow Shared Ownership/Homeownership Opportunities:** Support pathway to homeownership and shared ownership programs for Black and other residents of color; create shared housing options for formerly incarcerated people. **I. Fund Supportive Housing:** Fund permanent supportive housing with intensive wraparound services, including mental health and case management services; dedicate housing for unhoused veterans and people with disabilities.* **J. The State Affirmatively Furthering Fair Housing** new rules requires the City to acknowledge the history of and current fair housing violations, and to affirmatively solve for these problems. The City's consultants should work closely with DR groups to include the history of Oakland's different communities that have experienced housing and racial exclusion and fair housing discrimination in Housing Element sections. **K. Value Community Assets:** Prioritize community assets such as recreation centers	expensive to build additional units in these proposed cultural preservation districts than those areas that would not have this requirement of building affordable units on site. And, it is a more complicated process that the average mom and pop home owner would have difficulty managing (often duplexes, fourplexes, and ADUs are a home owner or smaller developer). Anti-displacement protections are outlined in detail in Chapter 4, Goal 1 of the Housing Element. These existing and proposed anti-displacement programs and policies will be implemented during the 2023-2031 Housing Element planning period. F. This is a major challenge for most jurisdictions. Oakland HCD has been working with the County to develop an online affordable housing access portal for residents to apply to new construction lease ups; several Oakland projects and other projects in the county have gone through the portal. We are currently in conversations on how to improve the portal's functionality. Please also note that Bay Area Housing Finance Authority is working on developing a region-wide portal: http://housing.acgov.org/. G. Oakland HCD focuses on producing new affordable housing units and rehabilitating existing units. We rely on our partnership with the Oakland Housing Authority to subsidize unit affordability via vouchers or other operating subsidy. The City is monitoring pilots that offer "shallow subsidy" programs which offer a middle path between one-time emergency rental assistance and long-term Section 8 vouchers. Such a program would most effectively be run through Oakland Housing Authority, but could be piloted together with HCD. A challenge overall has been the difficulty of finding rental units in the City, as demonstrated by the Emergency Housing Vouchers absorption rates. H. City of Oakland has continuously applied for State funding to support homeownership opportunities for Oaklanders, but we have consistently been denied (three years in a row now) because we are a "high-cost city." Oakland HCD staff are advocating with State officers and lobbyists to shift scoring criteria and priorities for future application rounds. We encourage Deeply Rooted to work with us and Council on these and other State advocacy efforts - many of the State's programs are in conflict with each other (e.g. Multifamily Housing Program deeper affordability that is higher cost, or Affordable Housing Sustainable Communities in transit rich areas,

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			and parks; increase trees and green spaces in underserved residential areas. L. Require/Provide an air purifier per unit in neighborhoods with high levels of pollution. This will also help address wildfire smoke. M. Commission a market force displacement study (building on the City's 2005 West Oakland Wood Street Project Impact study conducted by Mundie & Associates) and utilizing data from the City's Affirmatively Furthering Fair Housing, develop a moratorium on market rate housing in displacement vulnerable areas.	but Oakland is too high cost or too low opportunity to be competitive for CDLAC/TCAC or CalHOME). With the limited funds Oakland HCD has available, we continue to operate a First Time Homebuyer program. Though not large in scale, it exists and can be scaled up again once additional funding sources are identified. (https://www.oaklandca.gov/topics/first-time-homebuyer-mortgage-assistance-program-map) Other opportunities include the Acquisition and Conversion to Affordable Housing (ACAH) program, which has provided funds for Community Land Trusts and Coops. I. The City will continue funding permanent supportive, homeless, and extremely-low income units, and have focused more intensely on expanding homeless units. Specifically, the New Construction Notice of Funding Availability requires a minimum of 20% homeless set aside, but the points encourage 30% or more set-aside for homeless units. The challenge continues to be funding: we are pursuing every funding opportunity we come across, like aggressively competing for HomeKey or LHTF, or creating local operating subsidy from new State sources like PLHA and working with the Oakland Housing Authority to stretch their operating dollars. We have learned from working with City Human Services Department and Alameda County Continuum of Care that while full PSH and wrap-around services are desired, deeply affordable units with a range of services are just as critical. J. The Oakland General Plan Update includes Deeply Rooted Collaborative and Dyett and Bhatia as the City's consultant team. Deeply Rooted Collaborative serves as the Community Consultant and Dyett and Bhatia serve as the Technical Consultant. How would DR like City Staff to acknowledge/include this history beyond what was provided as part of the DR (and DR partner) feedback that was provided to City staff on the Draft Housing Element? Staff have shared DR's feedback with D&B for incorporation. K. As part of the Phase 1 GPU Environmental Justice Element, as well as Phase 2 of the GPU with the Open Space, Conservation and Recreation Element, and the Infrastructure/Facilities Element, staff will be assessing the current state of community assets to identify improvements, increase assets, and identify locations in underserved residential areas. L. Installation of air filter devices rated MERV-13 is required for new construction in Oakland.

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
				If funding became available, the City would pursue funding sources such as grants to provide property owners with standalone air purifiers for existing residential buildings. The City is actively working to support and expand neighborhood resilience hubs and respite centers so that residents in heavily-impacted areas who lack sufficient air purification systems can have a central, convenient place to go to escape smoke. See also Housing Element Action 2.1.6: Increase funding for improved indoor air quality. M. The State will not approve a Housing Element that places a moratorium on market rate housing or any type of housing at any affordability level.
54	**EB4E**	10/14/2022	A. Revise the Missing Middle Program to ensure high-resource neighborhoods allow four units on most lots in practice, including providing setback relief and reducing/eliminating off-street parking minimums. <u>Missing Middle Program:</u> ● Sixplexes: Sixplexes are more likely to be both feasible in the context of high land values and produce middle income housing (see study from San Jose; attached as Exhibit A). Consider allowing up to six units by right in certain high-opportunity residential zones, as well as on corner lots and lots over 5,000 square feet. ● Minimum Lot Sizes and Lot Splits: ○ Please confirm explicitly that lot splits in residential zones will be approved ministerially. ○ The minimum lot size in residential zones should be reduced from 2,500 to 2,000 square feet. Under SB9 the minimum lot size post-split is 1,200 square feet. While we appreciate Oakland reducing minimum lot sizes across residential zones, the 2,500 square foot minimum is twice that of the SB9 baseline. Moreover, 4,000 square feet is a common Oakland lot size, perhaps the most common. A 2,000 square foot minimum lot size would facilitate lot splits in most cases, whereas a	A. Comments noted, see Appendix J for a summary of zoning amendments the City will implement. The following changes below also summarize some of the Missing Middle Planning Code Amendments that will be implemented in June-July 2023 to include the following changes: - Reduce minimum lot size and setback standards where appropriate throughout the Planning Code to facilitate small lot development. - Minimum lot size will be reduced to 2,000 sf. in RD and RM Residential Zones - Residential side setbacks will be reduced to 3' for lots less than 3,000 sf. and 4' for lots 4,000 sf. or greater in RD and RM Zones - Revise density, maximum building heights, and minimum lot size standards to permit more housing units per lot where appropriate throughout the city in Hillside Residential RH-4, all Detached Residential (RD) Zones, all Residential Mixed Housing Type (RM) Zones, and Urban Residential RU-1 and RU-2 Zones. - Create new RD zone to replace RD-1 and RD-2 - All RD, RM and RU Residential Zones will now allow 4 or more units - Maximum floor area ratio (FAR) and lot coverage will be increased in RD and RM Zones - Minimum lot frontage for RD and RM Zones will reduced from 25 ft. to 20 ft. in RD and RM Zones - Open space requirements reduced in RD, RM, and RU Zones - Rezone Lower Rockridge and Temescal to RM-4. - Rezone Adams Point to RM-4 - Reduce minimum lot frontage to 20 feet - Increase lot coverage to 55% in all residential zones for projects seeking 3 or more units. - Create a new RD zone to replace RD-1 and RD-2 to ensure that 2-4 unit development is feasible in high-resource residential neighborhoods

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			2,500 square foot minimum would largely exclude them. As it stands, the proposed minimum lot sizes constitute a downzoning of development capacity in residential zones from SB9 and should be revised. ● Lower Rockridge and Temescal: ○ To ensure Lower Rockridge and Temescal allow fourplexes in practice, consider rezoning them to RM-4. Lower Rockridge and Temescal typical lots are roughly 4,000 square feet. The proposed rezoning of these high-resource and low-VMT areas requires 1,500 square feet of land per unit. In practice this means only 2 units are allowed, which is the bare minimum under SB9. Moreover, 2 units does not meet the goals of Oakland City Council to allow at least 4 units in residential zones and reduces owner incentives to add those units (these projects will often be complex and expensive). Rezoning these areas to RM-4 would require 1,000 square feet of land per unit, which would allow 4 units per lot by right in most or all cases. ● Adams Point: The zoning map shows a rezoning of the center of Adams Point from RM-1 to RM-2. This neighborhood is already full of medium-sized apartment buildings (see Figure 1 below, taken from the Oakland Map Atlas) These zoned capacity should match the existing built environment to allow for 4-8 story apartments. Alternatively, consider rezoning this area to RM-4. ● High Resource Areas: Bushrod, Santa Fe, Trestle Glen, Crocker Highlands (currently RD-1 – mostly not on VHFHSZ. Only a small portion is in VHFHSZ) are all high-resource or moderate-resource areas that are untouched by the proposed Missing Middle Program rezonings. These are also low-VMT	- Create a new residential facility type called “Two- to Four-Family Residential Facility” that would replace the current “Two-Family Residential Facility” Type throughout the Planning Code; and change the definition of a “Multifamily Residential Facility” from the current 3 or more units to 5 or more units. - Eliminate all conditionally permitted densities throughout Planning Code (densities will all be by right); and the current requirement for a Major Conditional Use Permit for 3 or more dwelling units in the RM-2 Zone; 7 or more dwelling units in the RM-3 or RM-4 Zone; and for any project that exceeds the basic or permitted density resulting in 7 or more dwelling units in the RU or CBD-R Zones. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City’s proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and “missing middle” housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands As part of the city's rezoning proposal to implement the rezoning actions in the Housing Action Plan, the undeveloped western edge of the Mills College campus adjacent to MacArthur Blvd. was identified as a potential location for the addition of infill housing. Any rezoning of that portion of the campus would only occur if the community and decisionmakers support such a change and only for the purpose of facilitating the addition of housing along this undeveloped campus edge. The City has not received any proposals for the redevelopment of the Mills College campus, nor does it any seek to encourage such a proposal. The rezoning, if adopted, would only apply to the MacArthur Blvd.-fronting campus edge to facilitate the addition of housing on a currently undeveloped portion of the campus. RM-3 is the Mixed Housing Type Residential-3 Zone and RM-4 is the Mixed Housing Type Residential-4 Zone. Both these RM zones allow a variety of residential, commercial, and civic activities. The primary difference between RM-3 and RM-4 is the amount of allowed residential density: RM-3 allows 1 unit per 1,500 sf. of lot area, whereas RM-4 allows slightly more density (1 unit per 1,100 sf. of lot area).

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			neighborhoods with easy non-car access to jobs, parks and schools. They should be rezoned to at least RM-2. (Also in Figure 1 below). ● Heights: RM-1 should allow 3 stories by right. ● Parking: The current requirement of 1 unit of off-street parking requirement in most Oakland greater than ½ mile from transit makes most missing middle projects infeasible. The off-street parking requirements should be fully eliminated. Alternatively, the city could match the California ADU standard by eliminating off-street parking requirements within one (1) mile of any bus stop, but if so should require no more than 0.5 spaces per unit elsewhere. ● Setbacks: ○ As written, the Missing Middle Program offers no reduction in setbacks. As we have seen in Minneapolis and other places the failure to reduce lot coverage and setback rules in tandem with upzoning for 2-4 units will result in few to any construction. The existing RM front setback of 15-20' is a nonstarter for middle housing development. ○ Consider reducing RM setbacks to 10' for front setbacks (or average of immediately adjacent neighboring buildings, whichever is less), 4' on all sides, and 0' for inner side or street side on lots less than 50' wide. ○ Increase lot coverage to allow 50% lot coverage in all residential zones for projects seeking 3 or more units. - increased to 55% ○ Some zones have not only minimum lot area but minimum average width and minimum frontage. Those should be reduced in tandem with minimum lot areas. ● High-resource/Low-VMT gradation: ○ In order to reduce patterns of spatial segregation, Oakland should make special effort	Comment noted. Staff will undertake a comprehensive update of the Land Use and Transportation Element (LUTE) and the Planning Code in Phase 2 of the General Plan Update process B. Guidance from State HCD requires sites to be between 0.5 to 10 ac to accommodate lower income RHNA. Using that guidance and feedback from State HCD, staff identified additional sites in Rockridge (that are not included in the Draft Sites Inventory) that conform to State HCD requirements (0.5 - 10 ac) to accommodate lower income RHNA. THe 3 sites that were identified include: 5354 Claremont Ave, 5257 College Ave, and 6209 College Ave. The 51st and Broadway site has also been added to the updated Sites Inventory for the Revised Housing Element. This site was previously excluded as the City had received a pre-app for development on the site, but Staff recently provided a decision that the proposed activity was not an allowed use. In order to avoid split zoning/zoning inconsistencies along Claremont Ave, other sites such as the DMV site at 5300 Claremont Ave were included. Claremont flatiron parcels are included in the sites inventory The revised 2023-2031 Housing Element includes additional sites as part of Appendix #: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites) (list Table #) See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands C. Comments noted and the City will create a 55 feet height area and increase heights along College Avenue and Claremont Avenue to 55'. These changes will be implemented via the Missing Middle Planning Code Amendments in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			to ensure that 2-4 unit development is feasible in high-resource residential neighborhoods. The high land values of these neighborhoods also makes it harder for 2-4 residential uses to outbid luxury single-family homes. Therefore, we have previously written to Oakland suggesting that additional density beyond 4 units and additional setback relief be offered in high-resource areas. The proposed Missing Middle Program makes no effort in that regard. We recommend Oakland revise the program to confer additional density (baseline 5 units) and additional setback relief in high-resource residential zones. ○ In order to reduce VMT, Oakland should allow additional density and setback relief in residential zones near BART stations. ● Mills College: ○ Please clarify the reasoning behind rezoning Mills College at Northeastern University from RM-3 to RM-4. Plans for student housing on the actual Mills site should be tailored to student housing; RM-4 is a residential neighborhood standard. Without additional context, this appears to be a paper upzoning that will result in no new housing. ● Accessory Commercial Units: ○ The Proposals' key points from community engagement cites the need to attract retailers in food deserts. In many Oakland neighborhoods, especially East Oakland, the distance between commercial corridors where retail uses are permitted exceeds easy walking distance. Moreover commercial floor plates are often too big or expensive for many start-up or would-be retailers. ○ All RM zones in the current intent section	Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands D. Comment noted and the City will upzone Lower Rockridge from RM-2 to RM-4 via the Missing Middle Planning Code Amendments that will be implemented in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands E. Comments noted and the City will increase heights along Shattuck Avenue back to 45' or more to facilitate housing development in this high-resource and low-VMT neighborhood via the Missing Middle Planning Code Amendments that will be implemented in June-July 2023. See also Response to Letter #1 for actions included in the Housing Action Plan to expand affordable housing opportunities and promoting neighborhood stability and health and • Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands F. As part of the Safety Element Update, the City is studying the potential for areas that might be appropriate to be included in the Very High Fire Hazard Severity Zone (VHFHSZ) based on analysis regarding evacuation scenarios. The City will implement the Affordable Housing Overlay between June - July 2023 **Action 3.3.5:** Implement an Affordable Housing Overlay includes the

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			include "and neighborhood businesses where appropriate", but in practice all subzones except RM-5 make food sales, restaurants, cafes, and retail sales require conditional use approval, and alcohol sales are only allowed if grandfathered. Consider allowing a wider range of commercial businesses as permitted in any space less than 600 square feet in all RM and RU zones ("Accessory Commercial Units") to facilitate greater food access, increased walkability and low impact diversity of uses. B. The proposed Rockridge rezoning sites have sig related to feasibility, equity and displacement risk swath of land rather than picking a handful of site effective. "● DMV: Does Oakland have written confirmation that DMV plans to redevelop its property on Claremont? The use of state-owned land for redevelopment must be accompanied by a firm commitment by the Department of General Services to redevelop the site within the eight year planning period. ● 5248 Claremont Avenue: Site 5 on Figure 4 is a 3-story, 42-unit apartment building constructed in 1959 called Claremont Park Apartments. It is highly likely that this property is subject to Oakland's rent control ordinance. In any case, this property should not be rezoned. If it remains as a rezoning site either: 1) no redevelopment will occur due to the costs associated with SB330/SB8 replacement, relocation and right to return requirements; or 2) redevelopment will occur and 42 units of rent-controlled housing will be destroyed when vacant, commercial and owner-occupied sites abound nearby. Oakland should not be in the business of designating rent-controlled housing in high-resource areas for upzoning and redevelopment. Please remove this site.	following revisions: The City will create an Affordable Housing Overlay (AHO) to streamline the approval of affordable housing by right. Proposed ~~otential~~ features of this overlay ~~could~~ include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will ~~study the feasibility of~~ broadly apply~~ing~~ this overlay, except for , limitations on designated historic resources as well as ~~selected~~ areas in the Very High Fire Hazard Severity Zzone (VHFHSZ). ~~contaminated sites, and protected historical sites/districts~~. The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as the potential for select areas within the VHFHSZ for the overlay to apply. The City will ~~also study allowing~~allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay. 100 percent affordable projects within the AHO zone would be subject to a ministerial approval process. A proposed project would be exempt from CEQA and not be appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

			● Trader Joe's parking lot: This is a high-volume grocery store with two surface parking lots. It is highly unlikely either the store itself or the parking lot fronting College Avenue will be redeveloped. The Miles Avenue fronted surface parking lot may be feasible for redevelopment, but it will be difficult given that the CN-1 standards only permit approximately 40 units. ● 5264 Claremont and 5256 Claremont: These sites include approximately four residential units. Under the CN-1 density standards and unchanged 35' height limit these sites could yield 9 units at most each. If there are existing low-income tenants on-site then 1 or 2 of 9 units will be required to be replaced with deed-restricted units. Does Oakland have a track record of producing developments with less than 10 units and on-site affordable housing in this manner? If not, they should be considered for higher density or removed. ● 6209 College: This site has an existing banking use and surface parking lot. Under the CN-1 standards it can yield at best 20 units. It is unlikely that 42 dwelling units per acre will outbid the existing banking use. ● 5220 Claremont: This site has an existing pediatric use that is part of UCSF Benioff Hospital. Has Oakland obtained written evidence that the property owner intends to discontinue this use within the eight year planning period? ● Unpicked Sites: As seen above, there are significant issues with Oakland's Rockridge rezoning sites. There are many sites that Oakland could identify for rezoning that would be more feasible for housing while minimizing displacement. ○ The vacant site at Pleasant Valley/51st Street and Broadway - This is a large vacant site near

			BART and Lines 51A and 18. It is in a high-resource tract and has easy access to health services, grocery stores and open space. - Home Depot ○ Claremont flatiron - This vacant parcel at Claremont and College is currently zoned to only allow 18 units. It was also a very popular site in the city's survey data. Consider rezoning to allow 75 dwelling units per acre. ○ Gas Stations - There are several gas stations that could be rezoned within Rockridge. - can be considered for rezone/upzoning but not for sites inventory due to non-vacant sites issues and contaminants-cleanup ○ 51st Street - This is a 75' wide residential street with bus service and is within a ½ mile of Rockridge BART. It is proposed to be rezoned to RM-2. It should be rezoned to allow for multifamily housing with heights of 45' and up to 55 dwelling units per acre. The existing uses of mostly owner-occupied single family homes and a few duplexes would reduce the impacts of potential displacement and relocation costs. ○ In practice, most development usually occurs in places outside those designated in housing elements, because for- and non-profit developers evaluate prospects in different ways from planning professionals and often come to different conclusions. In addition to trying to pick winners among sites, the city should consider a broader upzoning to 6+ stories and 75+ units per acre in a one-mile radius of Rockridge BART." C. Choosing to leave in place current heights in Rockridge along College Avenue and Claremont Avenue, while miles of MacArthur Boulevard and International Boulevard in East Oakland are rezoned to allow significantly more height and	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			development, is reinforcing patterns of spatial segregation. Oakland needs to be more ambitious with North Oakland standards to affirmatively further fair housing as required by state law. ● Commercial Corridor: ○ As noted below, commercial corridors throughout West and East Oakland are having their heights increased. These include commercial corridors close to BART and high-frequency bus (Fruitvale, West Oakland, Coliseum, and Telegraph Avenue near MacArthur BART) as well as on BRT lines (International Boulevard in San Antonio and between 73rd Avenue and Durant Avenue) and also some corridors miles from BART (Dimond District and Laurel District). All the while, heights for the commercial corridor of College Avenue near Rockridge BART remain untouched at 35' in CN-1 zones. ○ While Oakland proposes to rezone eight sites along College Avenue and Claremont Avenue, there are significant issues with many of these sites (see below). Moreover, it is concerning that Oakland seems perfectly willing to increase heights along miles of MacArthur and International boulevards but cannot countenance allowing more than two parcels to go up to 65' on College Avenue. ○ While we support height increases in commercial corridors generally, we are concerned about the horizontal inequity of excluding College Avenue and Claremont Avenue. Why should a strong commercial corridor in the Laurel District, over 2 miles from Fruitvale BART, be rezoned from 35' to 65', while College Avenue, within 1⁄2 mile of Rockridge BART, remains at 35'? Why should	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			commercial land in Deep East Oakland in Elmhurst along International Boulevard go from 75' to 95' while Claremont Avenue near Rockridge is stuck at 35'? Are the existing commercial uses in Rockridge simply more valuable to Oakland than the existing commercial uses in East Oakland? ○ This concentration of multifamily development potential in lower income and non-white neighborhoods, especially in East Oakland, while preserving the height limits of commercial land in high-income and mostly white Rockridge is reinforcing, not reversing, existing patterns of spatial segregation. ○ Oakland, in order to affirmatively further fair housing, should increase heights along College Avenue and Claremont Avenue to 55'. D. RM Zoning: As noted above, Lower Rockridge needs to go from RM-2 to RM-4 in order to allow for 3- or 4-unit development to occur - or the entire RM zone needs to allow 3- or 4-unit development both by right and in practice. E. Oakland should undo the 2011 downzoning along the high and moderate-resource Shattuck Avenue commercial corridor and increase heights to 45'. Commercial Corridors We understand that many of Oakland's proposed commercial corridor rezonings are meant to reconcile planning code with building typologies. In addition, the Proposals increase heights in commercial corridors in several key areas near transit (excluding College Avenue and Claremont Avenue in Rockridge). While these heights increases are certainly helpful for increasing housing feasibility and lowering VMT we are concerned about the lack of height	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			increases in key areas. Park Boulevard: Heights along the commercial sections of Park Boulevard in Eastlake and Glenview should be increased. Shattuck Avenue: This section was downzoned in 2011 to 35' in response to housing development in the mid-2000s. Homeowners in these high-resource areas pushed to downzone the corridor due to concerns about development exceeding existing zoning (through use of State Density Bonus Law) but within the general plan designations; the groups supporting the downzoning cited impacts to "sunlight, privacy and appearance." [Oakland Planning Commission staff report, July 14, 2010; attached as Exhibit B]. This was a poor justification for downzoning a high-resource, low-VMT transit corridor and should be undone. In February 2021 a 45' multifamily development project at 6501 Shattuck Avenue (½ mile from Ashby BART) that had submitted an application prior to the 2011 35' downzoning was appealed and delayed for months by nearby homeowners and landlords. The appeal was ultimately rejected but such appeals add risk and cost to housing development. Recently, a proposal was submitted for an apartment building at 6341 Shattuck Avenue. Consistent with the zoning, it is limited to 3 stories; allowing 4 stories would likely enable a 30-40% increase in new homes built. Consider increasing heights along Shattuck	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Avenue back to 45' or more to facilitate housing development in this high-resource and low-VMT neighborhood. F. We make various suggestions to improve the proposed Affordable Housing Overlay, including removing the exemption for height bonuses for prospective Areas of Primary Importance that are formed after the effective date of the rezoning. Overall we are highly encouraged by the Affordable Housing Overlay (AHO) proposal. We believe it has the potential to open up more residential land for affordable housing development, including in high-resource areas. The by-right provisions of this rezoning program can provide needed greater certainty to affordable housing developers. The AHO, if implemented with care, can deliver more low and moderate income housing and help reverse patterns of spatial segregation. We offer the following suggestions: Co-ops and CLTs: Make sure the ordinance explicitly allows co-ops and land trusts to use the AHO. Relax open space requirements: convert open space per unit into open space per residential living space, so that more density does not penalize them in terms of open space requirements. For further context, the CN zone already has lower requirements for efficiency units but residential zones do not. Cohousing: Allow cohousing with shared bathrooms and shared kitchens.	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			Historic Districts: Not allowing +20ft height in historic areas, aka Areas of Primary Importance (APIs), is inequitable. Some of the high-resource areas affected include most of the rectangle between Alcatraz, Woolsey, College, & Telegraph; as well as the entire CCA site at 5200 Broadway. A historical building is not demeaned or diminished by having a taller building next to it. We strongly request that Oakland does not allow newly formed, prospective APIs at the effective date of the rezoning to be exempted from AHO height bonuses. Roof Heights: Many zones like RM currently allow 5 feet more roof height than wall height to allow for pitched roofs. But when this proposal adds 20 feet that +5 feet often vanishes. What is the rationale for this? Pitched roofs can work in taller buildings too. Consider allowing +5 feet for pitched roof in every AHO zoning category. DBL Consistency: Clarify the meaning of 100% affordable in terms of income levels that the units must be restricted to. At a minimum, 100% affordable projects under the definition of State Density Bonus Law (AB1763), which are defined as 20% moderate-income, 80% extremely, very low or low-income, and one manager's unit, should qualify under the city AHO. Additionally, the city could consider allowing more than 20% of units to be moderate-income-restricted to open more options. Parking: Off-street parking requirements	

Letter #	Name Organization/Agency/ Meeting	Date	Comment	Staff Response to Comment
			represent significant hard costs and opportunity costs for low-income housing. Parking requirements are a binding constraint on development of multifamily housing that reduces site viability. AB2097 and other state bills have reduced parking requirements within ½ mile of transit and in low-VMT areas. Oakland should go further and require no off-street parking for AHO projects anywhere. Fire Zones: The Very High Fire Severity Zones (VHFSZs) are exempted from the AHO. While there are valid safety concerns related to fire risk and escape we would be remiss not to point out the inequity of exempting high-resource and historically exclusionary VHFSZs. Oakland should explore allowing AHO projects in VHFSZs with hardening and other mitigations.	

Appendix M: Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)

The City of Oakland has received a number of housing site recommendations from the public. Some of the sites are included in the inventory already (shown in yellow); the City will analyze these sites for Phase I upzone potential or other applicable zoning changes to facilitate housing development. For sites not included in the inventory, the City will consider land use changes as part of the longer term General Plan Update.

0 Executive Summary

Oakland's 2023-2031 Housing Element is a plan that presents goals, policies, and actions to address Oakland's need for more affordable homes and to promote integrated, vibrant communities. By expanding housing options in more affluent neighborhoods and reinvesting in less affluent neighborhoods, the Housing Element will affirmatively further fair housing for all Oaklanders. The Housing Element takes significant action to address urgent community needs, including protecting Oakland residents from displacement, improving Oakland's existing housing stock, expanding affordable housing opportunities, expanding resources for the unhoused, and promoting neighborhood stability and health.

The Housing Element includes five specific goals with associated programs that are priorities for the City of Oakland. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2 and is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices.

Many of Oakland's existing housing programs will be carried forward, but there are many **new actions, that are shown in blue,** that address the city's housing needs that are added to the Housing Element.

GOAL 1: PROTECT OAKLAND RESIDENTS FROM DISPLACEMENT AND PREVENT HOMELESSNESS

The Housing Element protects Oakland tenants from displacement and creates conditions that enable them to remain in their homes and communities.

- Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.
- **Action 1.1.2: Enforce Just Cause for Eviction measures.**
- Action 1.1.3: Enforce and Strengthen Ellis Act protections.
- **Action 1.1.4: Implement tenant relocation measures.**
- **Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.**
- Action 1.1.6: Enhance housing related legal services
- **Action 1.1.7: Expand our ability to enforce rent control to maintain affordability.**
- **Action 1.1.8: Monitor neighborhood displacement**
- **Action 1.1.9: Implement a rental housing registry.**
- Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).
- **Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.**
- **Action 1.1.12: Provide a local preference in affordable housing projects**
- **Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.**
- Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

GOAL 2: PRESERVE AND IMPROVE EXISTING HOUSING STOCK

The Housing Element conserves and improves the affordability of existing housing stock in Oakland and addresses substandard conditions.

- Action 2.1.1: Support home rehabilitation programs.
- Action 2.1.2: Promote healthy homes and lead-safe housing.
- **Action 2.1.3: Conduct proactive rental inspections.**
- Action 2.1.4: Support historic preservation and rehabilitation.
- **Action 2.1.5: Implement universal design strategies**
- **Action 2.1.6: Increase funding for improved indoor air quality.**
- Action 2.2.1: Continue to implement resale controls on assisted housing.
- Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.
- Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.
- Action 2.2.4: Limit condominium conversions.
- Action 2.2.5: Extend local replacement unit provisions.
- **Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.**
- **Action 2.2.7: Provide additional subsidy for residential hotels.**
- **Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.**

GOAL 3: CLOSE THE GAP BETWEEN AFFORDABLE AND MARKET-RATE HOUSING PRODUCTION BY EXPANDING AFFORDABLE HOUSING OPPORTUNITIES

The Housing Element facilitates the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, the Housing Element provides a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. The Housing Element locates new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and removes constraints to affordable housing development.

- **Action 3.1.1: Develop a project-based rental or operating subsidy program for extremely-low-income residents.**
- **Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.**
- **Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs**
- **Action 3.2.2: Promote and protect live/work housing and housing for artists**
- Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.
- **Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs**

- **Action 3.2.5: Reduce constraints to the development of ADUs**
- **Action 3.2.6: Monitor affordability of permitted ADUs**
- **Action 3.2.7: Proactive Short-Term Rental Enforcement**
- Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.
- Action 3.3.2: Expansion of Section 8 vouchers.
- Action 3.3.3: City of Oakland Emergency Rental Assistance Program.
- **Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.**
- **Action 3.3.5: Implement an affordable housing overlay.**
- Action 3.3.6: Access to low-cost financing for development.
- **Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement**
- **Action 3.3.8: Right-sized development fees on market-rate developments**
- **Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.**
- **Action 3.3.10: Consider a citywide Enhanced Infrastructure Financing District (EIFD)**
- **Action 3.3.11: Support innovations by design**
- Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.
- Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.
- **Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing**
- Action 3.3.15: Continue and expand density bonus incentives.
- **Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund**
- Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.
- **Action 3.3.18: Implement affordable housing investments contained in Measure U**
- **Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program**
- **Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements**
- **Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update**
- **Action 3.4.3: Revise Conditional Use Permit (CUP) requirements**
- **Action 3.4.4: Revise citywide parking standards**
- **Action 3.4.5: Revise open space requirements**
- **Action 3.4.6: Correct zoning district boundaries that cut through parcels**
- **Action 3.4.7: Capture the diversity of existing built fabric in zoning**
- **Action 3.4.8: Implement objective design standards**

- Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.
- **Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right**
- **Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing**
- **Action 3.5.1: Support community land trusts and other shared equity model**
- **Action 3.5.2: Support housing cooperatives, co-living, and cohousing models**
- **Action 3.5.3: Advocate for statewide legislation on social housing**
- **Action 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households**
- **Action 3.5.5: Study Feasibility of Single-Stair Residential Buildings**
- **Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders**
- **Action 3.6.2: Provide increased flexibility in development standards**
- **Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing**
- **Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.**
- Action 3.6.5: Continue one-stop and online permitting services.
- **Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.**
- Action 3.7.2: Provide housing for persons with HIV/AIDS.
- Action 3.7.3: Accessible units in new housing developments.
- Action 3.7.4: Implement the sponsor-based Housing Assistance Program.
- **Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes**
- **Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right**
- **Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act**
- **Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right**
- **Action 3.8.1: Continue to implement the Vacant Property Tax (VPT)**
- **Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations**
- **Action 3.8.3: Tax vacant residential rental units**
- Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.
- Action 3.8.5: Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

GOAL 4: ADDRESS HOMELESSNESS AND EXPAND RESOURCES FOR THE UNHOUSED

The Housing Element recognizes housing as a human right and reduces homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

- **Action 4.1.1: Expand, improve, and maintain crisis response beds**
- **Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color**
- **Action 4.1.3: Expand health and hygiene facilities and services and improve access to bathrooms and showers.**
- **Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.**
- **Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy**
- **Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator**
- **Action 4.2.3: Strengthen interdepartmental Encampment Management Team**
- **Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.**
- **Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.**
- **Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.**
- **Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis**
- **Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing**
- **Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist**
- **Action 4.3.5: Provide development standards for low barrier navigation centers**
- Action 4.3.6: Expand opportunities for the permitting of emergency shelters

GOAL 5: PROMOTE NEIGHBORHOOD STABILITY AND HEALTH

The Housing Element promotes resilient development in safe, healthy, and just communities. It also increases resources in disinvested communities and create long-time stability through homeownership opportunities.

- Action 5.1.1: Provide first-time homebuyer programs.
- Action 5.1.2: Expand access to low-cost financing for home purchase.
- Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

- **Action 5.2.1: Protect against smoke and wildfire.**
- Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.
- **Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.**
- **Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.**
- Action 5.2.5: Encourage earthquake-resilient housing.
- Action 5.2.6: Encourage climate-resilient housing.
- **Action 5.2.7: Consider the adoption of a disaster reconstruction overlay zone**
- **Action 5.2.8: Encourage new affordable housing in higher resource neighborhoods**
- **Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.**
- **Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration**
- Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.
- Action 5.3.1: Provide fair housing services and outreach.
- Action 5.3.2: Promote awareness of predatory lending practices.
- **Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.**

1 Introduction

This Housing Element presents the City of Oakland's strategy and commitment for how it will meet the housing needs of the community over the next 8 years (covering the years 2023-2031). In the face of a crushing regional housing crisis, the task is formidable, but essential: to make quality housing opportunities available to all Oakland residents through the Protection, Preservation, and Production of homes, and to address systemic housing inequity.

Preparation of this Housing Element comes at a time of challenge and uncertainty for many Oaklanders. It comes amid a global pandemic, a renewed call for racial justice after the murder of George Floyd, and economic and global security uncertainty. It comes while Oakland has imposed one of the strongest eviction moratoriums in the State, and it comes at a moment when the world moves closer to the tipping point of irreversible climate change. All of these systemic challenges play a vital role in the current and future shape of housing for individuals and families who call Oakland home.

The actions in this Housing Element also account for Oakland's production of affordable and market rate housing over the previous eight-year Housing Element period. The California legislature has found that the state of California has accumulated an unmet housing backlog of nearly 2,000,000 units and must provide for at least 180,000 new units annually to keep pace with growth through 2025.[1] Over the last eight years, Oakland produced sufficient housing units to meet its share of the overall state-mandated housing production goals. Many other cities throughout the state fell short of their assigned goals, which exacerbates the current housing affordability crisis and creates additional displacement forces on cities like Oakland.

However, Oakland's housing production skewed significantly toward market-rate development and fell short of producing sufficient affordable housing. This Housing Element explores why this occurred and focuses actions on increasing affordable housing production to address this imbalance. The 2023-2031 Housing Element finds that there are sufficient parcels of land under existing zoning regulations to meet the City's assigned eight-year housing production goals, and that these sites are zoned at a sufficiently high density so as to not preclude affordable housing development. Nevertheless, this Housing Element additionally concludes that even if the land is available for housing development, this is only one necessary factor to create an environment where affordable housing is constructed at sufficient levels. Given the shortfall in affordable housing production over the previous eight-year period, there is little reason to expect different results over the next eight years unless

[1] See California Government Code Section 65589.5, subdivision (a)(2).

constraints are removed, incentives are added, and additional funding sources are identified. This Housing Element seeks to do that.

Finally, the Housing Element's actions are also proposed in the context of the longer historical patterns of segregation and exclusion that have resulted in racial and geographic disparities throughout the region and within the City of Oakland. It is not by accident or coincidence that Oakland has historically had more Black residents and more lower income residents than other cities in Alameda County. Nor is it a coincidence that Black, Indigenous, and People of Color (BIPOC) and lower income residents disproportionately live in the Oakland flatlands and disproportionately not in single-family neighborhoods north of Highway 580.

The historic factors that led to this segregation are numerous and can be difficult to untangle, but it is clear that the City has an obligation to undo these patterns of past harms by taking affirmative steps to further fair housing opportunities for all residents. Again, looking at the past eight-year period, it is apparent that the majority of new housing development occurred in neighborhoods targeted for new development such as the Broadway Valdez area, Downtown, West Oakland, and other major transit corridors. These patterns of growth may be appropriate for purposes of creating transit-oriented development and reducing automobile reliance, but without other actions also serve to maintain the existing exclusivity of other neighborhoods. This Housing Element recognizes that the City's obligation to affirmatively further fair housing compels the City to redress the fact that some Oakland neighborhoods were purposefully designed to be exclusive, and preserved that exclusivity through racial covenants, unfair mortgage lending practices, and exclusionary zoning. The Housing Element proposes actions to reverse those trends.

LEARNING FROM THE PAST

What does it mean to call Oakland "home"? Oakland's current housing landscape tells the story of struggle, of systemic forces that have shaped the neighborhood geography of opportunity. To chart an equitable path forward, Oakland's history must be examined and addressed. In particular, Oakland and other governmental entities that influence fair housing choice must affirmatively further fair housing by creating policies that increase affordable housing in high-resource neighborhoods that were formed through exclusionary policies and must also bring additional resources to under-resourced neighborhoods.

The land that is now Oakland is the ancestral home of the Ohlone indigenous group who were stewards of the oak and redwood forests, grasslands, and marshlands that make up the coastal region of central and northern California for thousands of years. The arrival of Spanish missionaries in the 1760s and subsequent periods of Spanish colonization, Mexican settlement, and American urbanization of the Ohlone region greatly shifted the cultural and physical landscape. Nevertheless, this land continues to be of great importance to the Ohlone people.[2]

[2] Mitchell Schwarzer, *Hella Town: Oakland's History of Development and Disruption*, (Oakland: University of California Press, 2021).

Oakland has historically been a destination for working people and immigrants who sought out its abundant industrial jobs and relatively affordable neighborhoods. Many of these places, including Chinatown, West Oakland, and East Oakland, formed into cultural and ethnic enclaves as a result of segregationist and racially discriminatory policies and practices, including exclusionary single-family zoning (see 'Constraints' chapter for more information).[3] Government-sponsored "white flight" suburbanization during the early 1930s, followed by disinvestment and takings in neighborhoods of color, created socioeconomic and geographic lines that were further delineated by redlining (a federally sanctioned practice during the 1930s of denying mortgages in communities of color) and racially restrictive covenants.[4] In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color. Segregation pressures and private developer interests prevented additional expansions of public housing, and Hope VI initiatives to replace larger public housing projects decreased the overall number of rent-subsidized units, particularly in West Oakland. During the period between 1960 to 1966 alone, 11,800 housing units were razed in Oakland to make room for freeways, BART projects, new public housing, and other urban renewal developments.[5]

Since the late 1990s, Oakland has seen an increase in real estate investment, which has had both positive and negative effects. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process referred to as "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[6] This activity resulted in waves of foreclosures in East and West Oakland. A significant number of these foreclosed properties were then acquired by investors, and once-affordable and stable homes flipped overnight into market-rate rentals. An influx of private capital, in part due to efforts like the City's 10K plan to revitalize the urban core with infill, market-rate housing, has reinvigorated downtown and uptown.[7] The 10K plan aimed to attract new residents, often with higher salaries than existing communities, to spend incomes at commercial establishments downtown. At the same time as this influx, rising housing prices and a lack of new affordable options created waves of residential and commercial gentrification, especially in North and West Oakland and Chinatown, with a growing pattern of displacement in East Oakland.[8] Massive regional job

growth, particularly in the technology sector, coupled with the lack of supply of housing in other cities to keep up, sent waves of new residents to the East Bay in search of more affordable homes.[9] The impacts of lack of regional supply rippled through other residential areas of the city, where communities of color faced greater vulnerability to rising housing costs than white residents.[10] California's Costa Hawkins Law, passed in 1995, also exempted newly constructed units and single-family homes from rent control and effectively banned local vacancy control laws, exacerbating displacement and socioeconomic exclusion in the city.[11] Generational economic and housing discrimination continues to impact Oakland residents: significant disparities remain in home ownership, household incomes, and health outcomes that are tied to race, income, neighborhood poverty level, and housing status, among other social and environmental conditions.[12, 13]

Nowhere has the impacts of these changes been more visible than on Oakland's streets, as homelessness increased by 83 percent from 2017 to 2022.[14] Although the individual causes for homelessness are complex, there are key structural reasons why Oakland has one of the worst homelessness crises in America. These reasons include structural racism, unstable rental markets for tenants, systemic barriers to housing for the formerly incarcerated, a lack of living wage job opportunities, and, above all else, a catastrophic shortage of deeply affordable homes. Another vital truth is that the impacts of homelessness compound over time- the longer someone is homeless, the worse the impacts on physical and mental health, social and family networks, and the ability to find, maintain, and sustain permanent housing.

The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only individual households but also the cultural identity and viability of these communities. From 2000 to 2019, Oakland lost nearly 30 percent of its Black population and significant numbers of long-time Asian Americans

residing in ethnic enclaves including Chinatown.[15] The COVID-19 pandemic has highlighted and exacerbated racial and economic disparities in housing security; the pandemic has also shown the public health consequences of Oakland's housing disparities.[16] The consequence of Oakland's complex history has and continues to shape the city's built environment, including the distribution, types, affordability, and quality of housing in Oakland.

Today, Oakland has grown to be the largest city in Alameda County and the busiest port in Northern California. Neighboring cities include Berkeley and Emeryville to the north, San Leandro to the south, Alameda across the Oakland Estuary, and Piedmont surrounded by Oakland. San Francisco is located just 12 miles west across the San Francisco Bay, connected by Interstate 80 (I-80). Oakland is known for its diverse geography, including 19 miles of bay and estuary coastline to the west, the Oakland/Berkeley Hills to the east, and Lake Merritt, a tidal lagoon located within the city's borders.

CHARTING AN EQUITABLE, INCLUSIVE FUTURE

With the legacy of inequity top of mind, the City has begun planning for a more equitable future. In 2016, the City established the Department of Race and Equity with a mission "to advance the creation of a city where diversity has been maintained, racial disparities have been eliminated, and racial equity has been achieved." The Department of Race and Equity is particularly concerned with making a difference in the determinants of equity that lead to creation of a fair and just society, including housing. In 2018, the department published the Equity Indicators Report, which serves as a baseline quantitative framework that can be used by City staff and community members alike to better understand the impacts of policy on racial groups and measure inequities. In 2022, the City declared racism a public health crisis and in response has provided funding for additional staff in the Department of Race and Equity to track performance and equity progress.

The work of the Department of Race and Equity informs the City of Oakland's Department of Housing and Community Development's (Oakland HCD) 2021-2023 Strategic Action Plan. This plan is informed by past analyses, planning, and accomplishments such as the 2016 "Oakland At Home: Recommendations for Implementing A Roadmap Toward Equity from the Oakland Housing Cabinet," and applies a race and equity lens to the City's housing investments and services in wake of the public health, fiscal, and social crises caused by COVID-19. In practice, this includes:

- transparent and regular reporting on outcomes disaggregated by race;
- Americans with Disabilities Act-compliant, accessible information provided in multiple languages;

[15] American Community Survey (ACS) (2014-2018); U.S. Census 2000, 2010; Urban Displacement Project, 2021.

[16] "City of Oakland HCD 2021-2023 Strategic Action Plan City of Oakland Housing & Community Development Department 2021-2023 Strategic Action Plan." n.d. Accessed May 9, 2022. https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

- anti-displacement and housing production programs, policies, and initiatives focused on the most impacted vulnerable populations;
- access and opportunity pathways to and for Black, Indigenous, and People of Color (BIPOC) developers, service providers, and other contractors to the resources the City has to offer in the conduct of its housing work.

The 2021-2023 Strategic Action Plan also details a series of specific actions and policies Oakland HCD will pursue as part of a broader strategy to protect residents from displacement, preserve existing affordable housing - both subsidized and unsubsidized, and produce new affordable housing.

Community-based organizations, many of whom have been leading housing justice efforts for decades, are also shaping housing goals rooted in racial equity. Oakland residents, community organizations, developers, and government partners created the Healthy Development Guidelines (HDG) with the intent of establishing a shared vision of a healthy, equitable community. The guidelines promote policies, goals, and development guidelines that strengthen environmental justice, sustainability, health, and racial equity in Oakland. In particular, the guidelines are intended to empower residents to address planning, policy, and public health issues in Oakland, so that no neighborhood or demographic group is unduly burdened by development that exacerbates health disparities, economic inequality, or access to open space. A City Council resolution recognized the guidelines, which commended the coalition for their collaborative and engaging partnership with the community.

The East Oakland Neighborhood Initiative (EONI) is a collaborative partnership between the City of Oakland and CBOs leveraging the Transformative Climate Communities grant administered by California's Strategic Growth Council. The EONI plan is a community-driven plan for a just transition to a regenerative economy for East Oakland, led by frontline communities, to strengthen the health, wealth, and resilience of East Oakland neighborhoods in the face of displacement and climate impacts. The plan is focused on five goals: reduce greenhouse gases, prevent displacement, improve public health, build economic empowerment, and plan "by and with" the community.

Callout: Two of the HDG's goals include enhancing access to affordable housing, particularly for vulnerable populations; preserving existing affordable housing and protecting residents from involuntary displacement.

The East Oakland Neighborhoods Initiative highlights anti-displacement among their plan goals, noting that improvements recommended in the plan must not drive out existing residents by inadvertently increasing the cost of housing. This is achieved in part through local wealth creation, well-crafted policies, and mainstreaming of affordability vehicles.

Goals, Policies, and Actions included in the Housing Action Plan seek to overcome patterns of segregation, foster inclusive communities free from barriers that restrict access to opportunity and housing, and close the gap between market rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households.

The global climate crisis will also have profound impacts on—among other things—housing security and availability in Oakland. To address the climate crisis, the City released the Oakland 2030 Equitable Climate Action Plan (ECAP) in July 2020. The ECAP is the City's strategy to create a future built on justice, equal opportunity, and environmental protection. Among the list of Transportation and Land Use (TLU) actions in the ECAP is TLU-3, "Take Action to Reduce and Prevent Displacement of Residents & Businesses." TLU-3 explicitly links anti-displacement efforts to climate equity action, as the City can only achieve its ECAP goals if Oaklanders are able to fully participate in, and benefit from, climate action without fear of displacement and homelessness.

The City is also undertaking an update to its Land Use and Transportation Element of the General Plan, in tandem with this Housing Element, to promote a land use pattern and policies that will help accelerate and target housing production. Like many other Bay Area cities, nearly every property in Oakland has been developed, with few "greenfield" (not yet developed) sites within its limits or at its borders, meaning that housing development will primarily rely on development and redevelopment of "infill" sites. Within the city limit, there are approximately 29,700 acres (46.4 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks, schools, and an international airport. The Housing Element applies to land within city limits, depicted in Figure 1-1.

Callout: Environmental Justice and Racial Equity Baseline
The Environmental Justice and Racial Equity Baseline, published in March 2022, identifies and details disparities by race and by geography that can be influenced directly or indirectly by the General Plan. The findings in the Environmental Justice and Racial Equity Baseline identify environmental justice and racial equity existing conditions and inform conversations between City staff and members of the public. In parallel with the Housing Element, this baseline will be used as a starting place for policymaking related to environmental justice, safe and sanitary housing, and other community equity issues.

Figure 1-1: Regional Map

1.2 Purpose of the Housing Element

The 2023-2031 Oakland Housing Element is one component of a larger effort: an update to the City of Oakland General Plan. The General Plan Update will create Oakland's 2045 General Plan and is a "once-in-a-generation" opportunity for all Oaklanders to work together to create a visionary blueprint for the city's future over the next 20 years. The Oakland 2045 General Plan will be made up of several "elements" covering a wide range of topics important to the future of Oakland, including environmental justice, land use, transportation, open space, noise, conservation, and safety.

The 2023-2031 Housing Element sets forth the City's housing priorities and goals—as well as its vision for both short- and long-term development—to create a fair and just city. The actions proposed by this Housing Element cover a wide range of housing issues but are largely focused on addressing two major issues: the City's shortfall of housing production and affirmatively undoing past patterns of exclusivity. State law mandates that the Housing Element be updated every eight years to reflect changing conditions, community objectives, and goals. The key components of the Housing Element include an evaluation of whether the City has sufficient zoned capacity to accommodate required housing production at all affordability levels, an assessment of whether the geographic distribution of that capacity will either further entrench or help to ameliorate existing patterns of segregation, and finally a set of programs and policies to address shortfalls and reduce identified constraints to the maintenance, improvement, and development of housing.

HOUSING ELEMENT: COMPONENTS

In California, all cities must adopt a General Plan composed of at least seven elements, including the Housing Element. All cities must also incorporate environmental justice into the General Plan. Oakland has chosen to adopt an Environmental Justice Element while also incorporating environmental justice goals into each element, including the Housing Element. The Oakland Housing Element, in tandem with the rest of the General Plan Update, is designed to assess and shape the community's housing progress and needs.

In accordance with State law, the Housing Element must include:

- A description of outreach conducted in preparation of the element;
- An analysis of progress in implementing the previous Housing Element and effectiveness of its programs and actions;
- An assessment of existing and projected housing needs;
- An analysis of special housing needs, such as those of older adults and people with disabilities;
- An analysis of existing assisted housing units at risk of conversion from affordable to market-rate;
- An analysis and inventory of resources and constraints relevant to meeting housing needs;

- An affirmatively furthering fair housing (AFFH) analysis, which guides the analysis of each set of requirements;
- An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels;
- A program that sets forth specific actions to address housing needs, with identification of responsible agencies and timelines.

REGIONAL HOUSING NEEDS ASSESSMENT (RHNA)

Oakland's Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (State HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then distributes a "fair share" portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, Oakland must identify sites sufficient to accommodate 26,251 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in Table 1-1.

A total of 6,511 units must be affordable to households making less than 50 percent of area median income (AMI), 3,750 units must be affordable to households making between 50 and 80 percent of AMI, 4,457 units must be affordable to households making between 80 and 120 percent of AMI, and 11,533 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in Appendix C.

Table 1-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Income Range*	*Needed Units*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	<$46,287	6,511	24.8%
Extremely-Low-Income (<30% AM part of Very-Low-Income in previous row)[2]	*<$27,772*	*3,256*	-
Low-Income (51-80% AMI)	$27,773-$74,059	3,750	14.3%
Moderate-Income (81-120% AMI)	$74,059-111,089	4,457	17.0%
Above-Moderate-Income (>120% AMI)	>$111,090	11,533	43.9%
Total		**26,251**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

HOUSING ELEMENT: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.

- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.

- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.

- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.

- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.

- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH)

requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

ENVIRONMENTAL REVIEW

The General Plan update is being accompanied by an Environmental Impact Report (EIR), which analyzes the potential impacts attributable to the Housing Element Planning Code amendments, as well as the Safety and Environmental Justice Elements and related General Plan and Zoning Map amendments.

1.3 Oakland's Housing Approach

Two important components of the Housing Element include a plan to address Oaklanders' housing needs, and an inventory of sites suitable for housing development at all income levels, based on Oakland's 6th cycle RHNA.

HOUSING ACTION PLAN

This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2. The Housing Action Plan is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices.

The goals include:

1. **Protect Oakland Residents from Displacement and Prevent Homelessness:** Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.
2. **Preserve and Improve Existing Housing Stock:** Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.
3. **Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities:** Facilitate the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, provide a diversity of housing types, ownership

opportunities, living arrangements, and features supportive of special needs. Locate new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and remove constraints to affordable housing development.

4. **Address Homelessness and Expand Resources for the Unhoused:** Recognize housing as a human right. Reduce homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

5. **Promote Neighborhood Stability and Health:** Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities.

The goals, policies, and actions form the Housing Action Plan for the 2023-2031 planning period and transform this framework into impactful action.

HOUSING SITES INVENTORY

The Housing Element also presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. To do this, the inventory includes:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units); and

- Opportunity sites where additional development could occur. Opportunity sites were selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected so as to reduce segregation and increase affordable development in high resource neighborhoods, where possible.

Chapter 3 provides a summary of the inventory approach and Appendix C includes the detailed site inventory. While the Housing Sites Inventory documents that Oakland has sufficient zoning capacity to meet Oakland's RHNA requirements, the City's Housing Action Plan includes several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures. A few examples of actions in the Housing Action Plan include:

- Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family dominated neighborhoods (Action 3.2.1);

- Reduce constraints to the development of accessory dwelling units (Action 3.2.5);
- Implement an affordable housing overlay zone that would allow for 100% affordable housing development at any density up to a specified height in most areas where housing is currently permitted (Action 3.3.5);
- Revise development standards, including allowable building heights, densities, open space, and setback requirements (Action 3.4.1);
- Remove conditional use permit requirements for housing in RD-2 and RM zones (Action 3.4.3);
- Implement objective design standards (Action 3.4.8);
- Implement a housing sites overlay zone that would allow all sites included in the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to develop owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households (Action 3.4.10);
- Promote infill, transit-oriented development (TOD), and mixed-use development (Action 5.2.2); and
- Encourage new affordable housing in higher resource neighborhoods (Action 5.2.8)
- Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities (Action 5.2.9)

The Housing Action Plan and Housing Sites Inventory reflects feedback from members of the community and the goals, policies, and actions reflect both local priorities and State obligations.

1.4 Organization and Summary of the Housing Element

The Housing Element is divided into four chapters: an Introduction, a Summary of Public Participation, a Summary of the Housing Sites Inventory, and the Housing Action Plan. In addition, there are several technical appendices that provide extensive detail on a range of topics, including many of the checklist items mandated by state law. This includes an evaluation of the City's 2015-2023 Housing Element, an assessment of housing needs, resources, and constraints, and the comprehensive housing sites inventory. A summary of the findings from each technical appendix is provided in the main body of the Housing Element. It is organized as follows:

- **Chapter 1 – Introduction:** Provides an overview of State requirements, a summary of the organization of the Housing Element, and an explanation of the Housing Element's relationship to the General Plan.

- **Chapter 2 – Public Participation:** Provides a description of the public participation process and a summary of community outreach activities.

- **Chapter 3 – Summary of the Housing Sites Inventory:** Summarizes the City's ability to accommodate the RHNA on available land, and the selection of sites in light of AFFH requirements.

- **Chapter 4 – Housing Action Plan:** Institutes the goals, policies, and actions of the 2023-2031 Housing Element, and provides quantified objectives. The Plan includes five goals: protect Oakland residents from displacement and prevent homelessness; Preserve and improve existing affordable housing stock; Close the gap between affordable and market-rate housing production by expanding affordable housing opportunities; Address homelessness and expand services for the unhoused; and Promote neighborhood stability and health.

- **Appendix A – Evaluation of the 2015-2023 Oakland Housing Element:** Summarizes the City's achievements in implementing goals, policies, and actions under the previous Housing Element. While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Oakland recognizes that more can and should be done to close the gap on affordable housing construction. Oakland further recognizes that many cities in the Bay Area region have failed to meet market rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland.

- **Appendix B – Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify Oakland's housing needs. Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland—Oakland's Black population has decreased from 36 percent in 2000 to 23 percent in 2020. Oakland's rates of homelessness have also significantly increased from 2017-2022 (83 percent), though the rate of increase has decreased from the period of 2019-2022 (23 percent, compared to 47 percent from 2017-2019). Oaklanders of color also disproportionately face lower rates of homeownership, higher housing cost burden, overcrowded conditions, and homelessness. These trends are being compounded by demographic factors such as the rapid aging of the population and continued prevalence of poverty.

- **Appendix C – Sites Inventory:** Outlines the selection and capacity methodology used to identify sites to accommodate the RHNA. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's

RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas.

- **Appendix D – Assessment of Fair Housing:** Identifies fair housing issues and solutions to meet Oakland's AFFH mandate. Oakland is incredibly diverse at the City level, but at the neighborhood level, geographic patterns of income segregation and racial/ethnic segregation are clear. Additionally, Oakland has racially and ethnically concentrated areas of poverty localized to four areas in the City. Neighborhoods across Oakland have received varying levels of investment, which is reflected in the unequal opportunities available for communities of color. Additionally, access to economic, educational, and environmental opportunities vary greatly across the City. Comparing access to opportunity with displacement risk and gentrification across the City, areas that are exclusive, stable, or in the advanced stages of gentrification offer the best access to opportunity. Much of the City has gentrified in recent years, leaving residents in the few (predominantly BIPOC) neighborhoods that have not gentrified at risk of displacement. Oakland is further impacted by disproportionate housing needs: overcrowding rates are higher in the City than in the County/Bay Area Region, cost burden rates are high (highest for Black and African-American households and lowest for white households), and homelessness is a major public health crisis in the City. Individuals experiencing homelessness increased 83 percent between 2017 and 2022 and individuals identifying as Black or African American are disproportionately represented in the unhoused population.

    - The goals and actions concluding this appendix have a strong focus on investing in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps (i.e. those neighborhoods with low access to opportunity). These neighborhoods have high concentrations of BIPOC populations.
- **Appendix E – Housing Resources and Opportunities**: Assesses the City's financial and administrative resources available for future housing development. This appendix describes and assesses the resources available for the development, rehabilitation, and preservation of housing in Oakland. The following sections provide an overview of the financial and administrative resources to support the provision of affordable housing. These include Oakland Housing Authority funds, the Affordable Housing Trust Fund, Community Development Block Grant Funds, and other sources of funding. The appendix also describes additional housing resources or considerations relevant for the provision of housing in the city, including publicly-owned and surplus land, as well as utility and service systems to support new housing.

- **Appendix F – Housing Constraints:** Analyzes governmental and non-governmental constraints to the development of housing. Governmental constraints on affordable housing construction include a lack of local and State funding to support the development of affordable housing, a lack of clarity on permit streamlining processes, higher costs for all housing developments due to a lack of City staff capacity. Both market rate and affordable housing also face constraints from development

standards and green building standards. Non-governmental constraints on housing development include environmental constraints such as risk of seismic activity, infrastructure needs for infill housing, rising interest rates, and the high cost of land, materials, and labor in Oakland.

- **Appendix G – Opportunities for Energy Conservation:** Presents opportunities to develop housing in a sustainable manner. While electrification is one of the primary ways to reduce the environmental impact of a building and improve energy performance, residential buildings in Oakland face a range of difficulties when pursuing electrification including lack of electrical panel or service capacity, and the extensive renovations and remediations that the retrofitting for electrification might trigger. Residents and property owners in Oakland have access to a variety of resources to assist with and incentivize residential energy conservation including local and state financing programs, and local resources such as solar rebates and incentives, and assistance with conversions of gas stoves to induction cooktops. Low-income Oakland utility customers who qualify can also take advantage of State and Federal Energy Bill assistance and energy efficiency programs.
- **Appendix H – Glossary.** Defines key terms used in the Housing Element.
- **Appendix I – Public Outreach Materials.** Includes meeting materials, outreach and survey summaries.
- **Appendix J – Proposed Rezoning and Height Changes.** Illustrates proposed rezoning and height changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods. The proposed changes are also available as an interactive map.
- **Appendix K – Findings Letter from California Housing and Community Development (State HCD) dated 9/28/22 and Responses.** Provides a brief summary of the changes in response to the State HCD letter and where they were made in the revised draft.
- **Appendix L – Response to Public Comments.** Provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period. Appendix L-1 includes comment letters; Appendix L-2 includes responses.
- **Appendix M –Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)** The City of Oakland has received a number of housing site recommendations from the public. Some of the sites are in the inventory already (shown in yellow); others have been analyzed for Phase I upzone potential or other applicable zoning changes to facilitate housing development. For sites not included in the inventory, the City will consider land use changes as part of the longer-term General Plan Update.

1.5 Relationship to Other General Plan Elements

State law requires the Housing Element to contain a statement of "the means by which consistency will be achieved with other general plan elements and community goals" (California Government Code, Section 65583(c)(8)). There are two aspects of this analysis: 1) an identification of other General Plan goals, policies, and programs that could affect implementation of the Housing Element or that could be affected by the implementation of the Housing Element, and 2) an identification of actions to ensure consistency between the Housing Element and affected parts of other General Plan elements.

As described above, the City is undergoing a comprehensive update to the General Plan. The General Plan update is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, which are due by the beginning of 2023, as well as preparation of a Racial Equity Impact Assessment, Zoning Code and Map update, and a new Environmental Justice Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by 2025.

The Land Use and Transportation Element (LUTE) of the Oakland General Plan was last comprehensively updated in 1998. The vision and specific policies contained in the LUTE seek to encourage and facilitate the types of infill, re-use, mixed-use, and central city/corridor-oriented residential development that are the focus of the Housing Element and the City's ability to accommodate its regional housing allocation. Most of the housing to be provided in Oakland will result from the development or redevelopment of underutilized and infill parcels. In addition, rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing.

The goals, policies, and programs contained within this Housing Element will also inform the strategies included in the updated LUTE. As the Housing Element will be adopted prior to the LUTE update, the general distribution, location and extent of land uses as well as population density and building intensity standards prescribed by the current Planning Code are used to determine the City's ability to accommodate residential development. Some initial amendments to the Land Use and Transportation Element and Planning Code and initial zoning map changes will be made during Phase I; this will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Anticipated development on these sites is expected to be in compliance with updated policy standards for noise, safety, open space, recreation, and conservation contained in the other General Plan elements.

The policies in the other updated General Plan elements will advance the ability of the City to achieve the objectives contained in the 2023-2031 Housing Element. Likewise, the Housing Element policies will advance the implementation of policies and programs in the other updated General Plan elements. Evaluation of General Plan consistency will be made as part

of adoption of the Housing Element. As other elements are updated as part of Phase 2, consistency will be achieved and maintained as part of General Plan adoption and maintained through any General Plan amendments. The City has therefore determined that the updated Housing Element is consistent with the General Plan.

1.6 Sources of Information

In preparing the City's Housing Element, various sources of information were utilized. As a starting point, the Element used ABAG-prepared local data and AFFH package pre-certified by State HCD for use in sixth cycle housing elements, which provides the basis for population and household characteristics and affirmatively furthering fair housing resources. Where necessary, several additional and more current sources are used to provide reliable updates of the ABAG data package. The sources used in the ABAG data package and many additional sources are listed below. Public input from members of the public, community-based organizations (CBOs), and community leaders, was also a key source of information for this Housing Element. More details on what information was collected from these partners can be found in Chapter 2.

1. ABAG Pre-Certified Housing Needs Data Package, 2021
    a. Federal Financial Institutions Examination Council's (FFIEC) Home Mortgage Disclosure Act loan/application register (LAR) files
    b. U.S. Census Bureau, Census 2000; Census 2010; American Community Survey 5-Year Data (2005-2009 through 2015-2019)

2 Public Participation

Inclusive engagement and public participation have been key to the preparation of Oakland's Housing Element. Public participation is an ongoing process that will continue to occur as the General Plan is updated. Outreach completed as part of phase 1 of the update process will continue to inform phase 2 of the General Plan update. All community outreach is conducted through a racial equity lens to identify actions to affirmatively further fair housing, increase community assets, decrease pollution exposure, and improve overall health.

The community engagement effort is composed of an extensive outreach process that seeks to engage stakeholders throughout the community, with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and often most negatively impacted by City policies and represents a diligent effort to include public participation from all economic segments of the community, consistent with outreach requirements under AB 686. All community input shared will be used to "ground truth" data based on peoples' lived experience, inform areas of focus for General Plan elements, and guide development of General Plan policies. Outreach that informed the development of this Housing Element is summarized in the following chapter, and materials used in the outreach process are included in Appendix I. Appendix J provides an overview of public comments and staff responses to illustrate how the revised draft reflect public input received during the public comment period.

2.1 Summary of Community Outreach Activities

GENERAL PLAN UPDATE OUTREACH

The City, based on feedback received from community members, implemented an innovative approach by bringing on two collaborating consultant teams to assist on the General Plan Update. The City partnered with both a Community Consultant Team – Deeply Rooted Collaborative, and a Technical Consultant Team – Dyett and Bhatia, to ensure a planning process that: 1) meets state deadlines and requirements for the GPU, and 2) dedicates significant resources to deep and meaningful community engagement. The Community and Technical Consultants coordinate closely. The team leads meet weekly, and the entire project team meets biweekly to share key findings and provide feedback. Both Community Consultant and Technical Consultant outreach and feedback is incorporated into all components of the Housing Element. This approach aligns with advancing the City's critical mission of creating a just and fair City for all (Oakland Municipal Code Section 2.29.170.1).

Community engagement efforts for the General Plan Update include an extensive and inclusive outreach process, engaging stakeholders throughout the community with

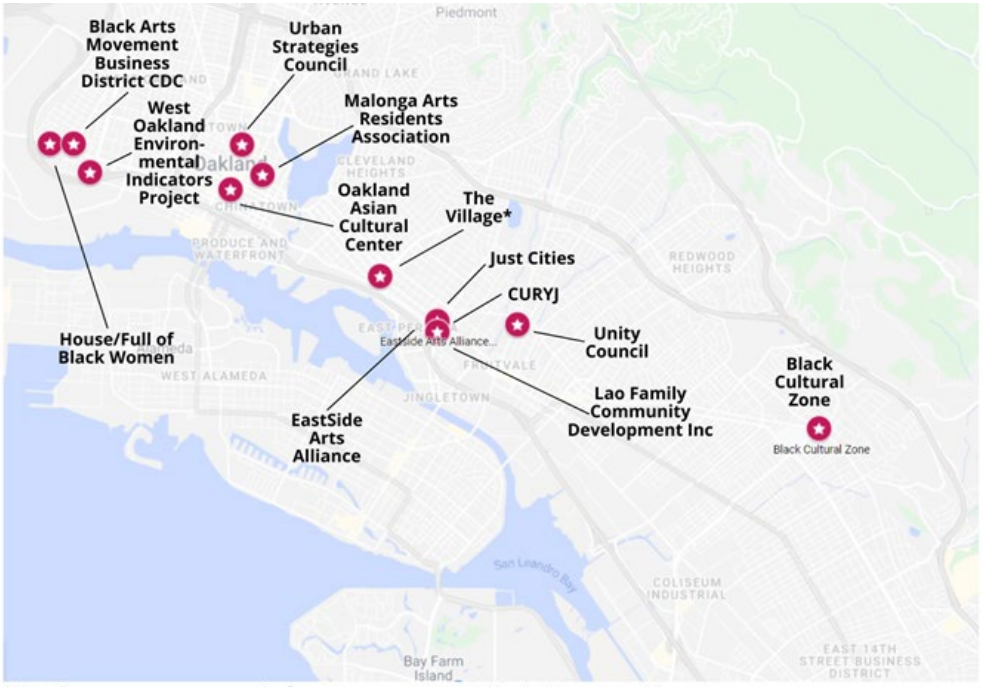
additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and most negatively impacted by City policies.

The Community Consultant Team, Deeply Rooted Collaborative, focuses on engagement with the following key communities and geographic areas:

- Communities: Unhoused; formerly incarcerated; low-income Asian, Pacific Islander, Black, Latinx, multiracial communities including those experiencing environmental injustices

- Outreach Geographies: Fruitvale, West Oakland, East Oakland, Chinatown, Eastlake, San Antonio

Deeply Rooted has three organizations providing central support through the design and coordination of the overall structure for community engagement, providing technical assistance and community education in planning, and administrative support.



- EastSide Arts Alliance | Cultural Programming Partner

- Just Cities | Technical Assistance/Community Education Partner

- Urban Strategies Council | Administrative Partner

The Deeply Rooted Collaborative in partnership with community partners as shown in Figure 2-1. Deeply Rooted's community partner roles are listed in Table 2-1.

Figure 2-1: Deeply Rooted Collaborative

*The Village operates as a network of encampments across Oakland without one address.

Table 2-1: Deeply Rooted Collaborative Community Partner Roles

Community Partner	*Community/ Outreach Geography*
The Black Cultural Zone Community Development Corporation	Black Community | East Oakland
CURYJ	Formerly incarcerated, Black and Latinx | Fruitvale
House/Full of Black Women/ Deep Waters Dance Theater	
Lao Family Community Development, Inc	Southeast Asian American community
Malonga Arts Residents Association (MARA)	Black and Brown communities, and partnership with members in Chinatown
Oakland Asian Cultural Center (OACC)/ API Cultural Center	Asian American community| Chinatown
Unity Council	Latinx community | Fruitvale
The Village in Oakland	Unhoused curbside communities in North Oakland, West Oakland, Downtown, and East Oakland
West Oakland Environmental Indicators Project.	Environmental Justice | West Oakland
Black Arts Movement Business District, CDC (BAMBD, CDC)	West Oakland (Lower Bottoms), Artists, flatland communities of color, those invested in the animation of BAMBD, CDC and its stakeholders

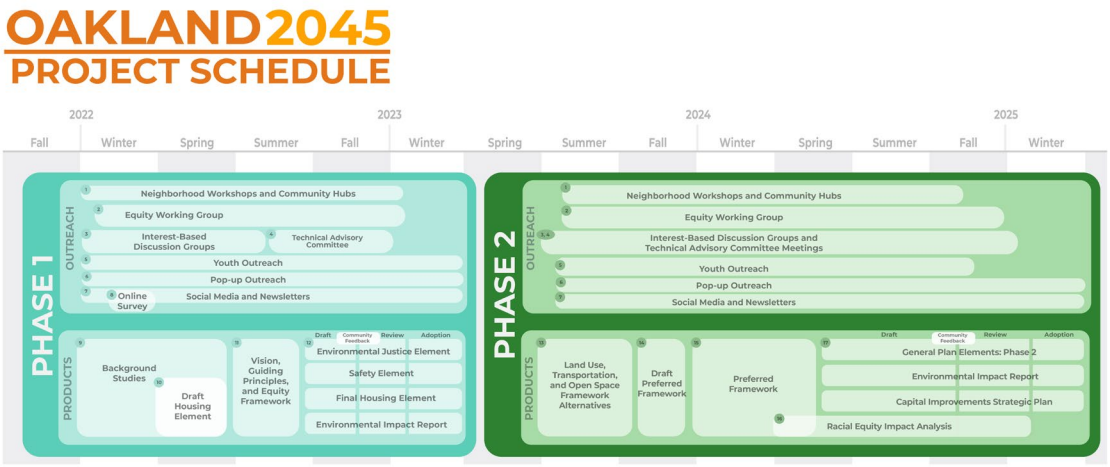
Community Engagement and Outreach Summary

A variety of outreach activities such as workshops, focused discussions, pop-ups, open houses, porch chats, and community hub events are planned throughout the entire process. All community input shared will be used to ground truth data based on peoples' lived experience, inform areas of focus for the update of General Plan elements, and guide development of General Plan policies.

Input related to housing overlaps with many General Plan topic areas and will be incorporated into both the eight-year Housing Element Update as well as into elements with a longer planning horizon, such as the Land Use and Transportation, Environmental Justice, and Safety Elements. A summary of the General Plan update project schedule is provided in Chart 2-1. Information on all community engagement events, including engagement summaries; workshop and townhall presentations, recordings, meeting summaries; and discussion group summaries, are provided via the General Plan Update website at https://www.oaklandca.gov/topics/meetings-and-events. A summary of these engagement activities is described below:

- **Popup and Community Hub Events:** Since November 2021 to March 2022, the GPU Deeply Rooted Collaborative has conducted pop-up events in Eastmont, Fruitvale, San Antonio, Chinatown, West Oakland, and Downtown. For example, in West Oakland these events have been porch-side chats and a pop-up at Hoover Elementary. Engagement has also been integrated into larger community events like the Oakland Asian Cultural Center's (OACC) Asian Pacific New Year Celebration and the Black Joy parade. At these community-embedded events, the team has engaged with over 1,006

people, with a majority being individuals from communities of color. These events sought to hear community concerns, ideas and solutions through interviews and focus group conversations. Community concerns that rose to the top included affordability, displacement, disinvestment, housing quality, pollution (industry and cars), lack of parks, collisions, and illegal dumping.



- **Townhalls**: Two townhalls were held on March 26, 2022, and April 7, 2022. The townhall on March 26, 2022, introduced the General Plan Update process and gathered community input on a vision for the City in 2045, as well as local issues and opportunities that should be addressed in the General Plan. The townhall on April 7, 2022, focused on equity across all issues, with a special focus on EJ and safety priorities in the City.
- **Community Education Workshops:** Two community education workshops were hosted on April 8, 2022, and April 9, 2022, and organized by the Deeply Rooted Collaborative Community Engagement partner to review the past and present policies that led to today's conditions in housing and environmental justice. Over 100 people attended the workshops. Speakers included Oakland unhoused leader Needa Bee (The Village in Oakland), EJ leader Ms. Margaret Gordon (West Oakland Environmental Indicators Project), Margaretta Lin (Just Cities) and Diana Benitez (Just Cities). Attendees shared their frustration regarding ongoing displacement and disinvestment and various community-centered solutions that would bring much needed resources to communities of color in Oakland without displacement.
- **Youth Engagement:** Youth engagement for the GPU will take the form of a Deeply Rooted Fellowship with 15 – 20 fellows. The Fellowship will be a 2-to-3-year commitment and fellows will be provided with a monthly stipend. Planning, design, and training of the fellowship program will be done in coordination with Y-Plan. Fellows will coordinate with the Oakland Youth Advisory Commission (OYAC) and will be engaged in outreach activities such as community-based events, presentations to the community and schools, and social media outreach. Recruitment began in April 2022. On August 31, 2022, twenty (20) young leaders were selected as inaugural Deeply Rooted (DR) Fellows. These young people will lead DR outreach efforts to engage Oakland's youth in the GPU update. DR Fellow activities will include interviewing and surveying young people about their visions and aspirations for the City; educating elementary, middle and high school students about the OGP; gathering data and conducting research to identify the challenges young people face in the City and their proposed solutions; and, implementing a social media campaign to increase youth awareness of the GPU.
- **Neighborhood Group Meetings:** Staff are working with Neighborhood Service Coordinators to present at Neighborhood Crime Prevention Councils (NCPCs) on topics including housing, environmental justice, industrial lands and safety and natural hazards and receive feedback. Staff have presented at several NCPCs and will continue to engage and obtain feedback. Staff are presenting to other Neighborhood – Community groups, faith-based organizations, and at other community congregation events as well.

- **Equity Working Group:** Convened by the Deeply Rooted Collaborative, the Equity Working Group (EWG) is comprised of 20 diverse community members who will: 1) Identify the major challenges and impacts of the General Plan (housing, safety, environmental justice, land use, transportation, and parks); and 2) Advocate for solutions that advance equitable and healthy communities for Oakland residents. Each member will receive a stipend. 20 EWG members who met the following criteria were selected through an interview process from a total of 66 applicants:
  - Hard to reach communities: People from communities that the City traditionally has trouble engaging with including Indigenous, unhoused, formerly incarcerated, low-income, Asian, Black, Latinx, multiracial, people with disabilities, undocumented, and people experiencing environmental injustices.
  - In target geographic areas of: West Oakland, East Oakland, Chinatown, and Fruitvale.
  - Age diversity: People at different stages of their lives to ensure varied knowledge and experiences.
  - Diversity of gender and sexual orientation: To ensure women's and LGBTQ+ perspectives are included in this process.
  - People who own small businesses in Oakland.

Additional information about the EWG selection process can be found at https://www.oaklandca.gov/news/2022/general-plan-equity-working-group-members-selected.

- **Technical Advisory Committee:** The Technical Advisory Committee (TAC) is comprised of internal City department representatives as well as other Oakland-based, neighboring, and regional governmental agency representatives. The TAC serves to advise on key strategies to address Oakland's big issues related to housing, environmental justice, safety, and other topics; review community input collected at key points in the process; and inform, discuss, and provide technical direction on policies and actions. The second TAC meeting was held on March 7, 2022 and TAC members provided recommendations for housing strategies/actions for housing production, preservation, and protections.
- **Study Sessions with Official Decision-Making Bodies:** The Planning Commission, City Council, and various boards and commissions are active participants in the GPU and will have opportunities to provide direction at each Stage in the process. The project team will continue to check in with these decision-making bodies at key milestones to ensure that the project remains on the right track in terms of process, direction, and overall vision. Engagement will take the form of study sessions and informational presentations to review products and generate feedback on drafts. The Planning Commission and Special Community & Economic Development Committee met on February 2nd and February 22nd to discuss potential housing site locations and recommended housing strategies and actions.

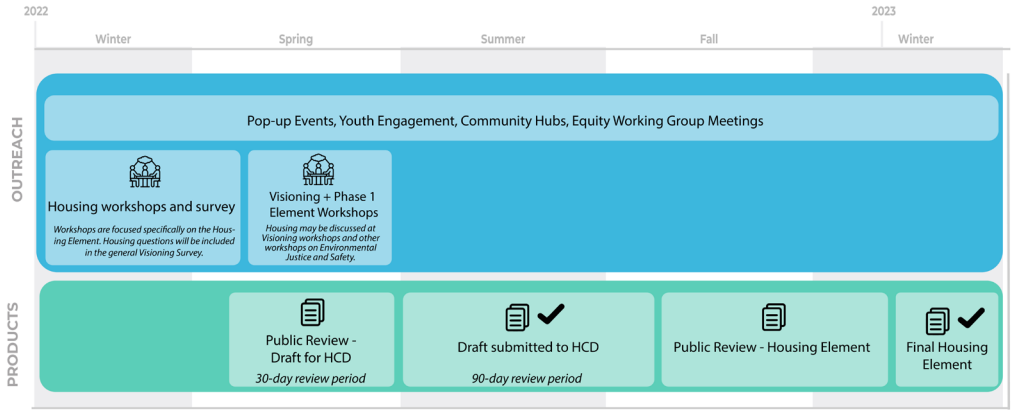


Chart 2-1: Oakland 2045 Project Schedule

HOUSING ELEMENT OUTREACH

To supplement efforts that were part of the General Plan update, a series of targeted activities related to housing were held prior to the release of the public Draft Housing Element. Additional opportunities for feedback will occur after plan release as well. These efforts are summarized in Chart 2-2 and described below:

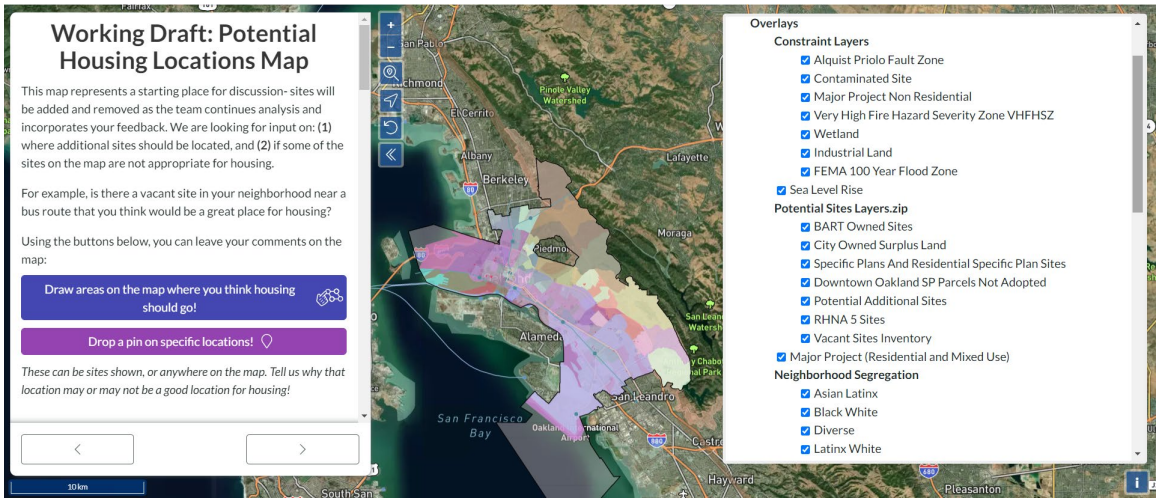
Chart 2-2: Housing Element Outreach Timeline

Housing Workshops: The team hosted four virtual housing workshops on February 10, 2022, February 17, 2022, March 12, 2022, and June 9, 2022 to solicit feedback on the Draft Housing Element. Approximately 200 people participated in these three virtual workshops. The first workshop provided background information on the General Plan, the Housing Element, and housing sites inventory requirements. Workshop 2 sought to gather input on potential housing programs. Workshop 3 focused on community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. Workshop

4 was held on June 9, 2022, and sought Oaklanders' input on housing sites and proposed strategies included in a public review Housing Element draft before sending it to the California Department of Housing and Community Development (State HCD). Summaries of these workshops are included in Appendix I.

Discussion Groups: A series of focus group discussions were held on the housing-related topics to solicit targeted feedback from organizations and individuals with direct experience with housing provisions and housing-related services. Discussion participants included organizations that may not have traditionally participated in the past including housing justice advocates, tenant rights organizations, faith-based organizations, and other community organizations.

Summaries of these meetings, including the names of participating groups, are provided in Appendix I; see below for the themes of the discussion groups:



- Focus Group Discussion 1 (February 2, 2022): Housing Sites
- Focus Group Discussion 2 (March 10, 2022): Production, Preservation, and Protections
- Focus Group Discussion 3 (June 8, 2022): Draft Housing Element

Housing Element Update Survey

The Oakland Housing Element Update Survey accompanied the first housing workshop on planning where housing should go. The survey was open from February 11, 2022, through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland.

The interactive map in the survey displayed the initial sites under consideration for the Housing Element and focused on identifying community priorities and recommendations for additional locations. See Figure 2-2 below for a snapshot of the interactive map. As an optional component of the survey, respondents were asked to describe their zip code, and race or ethnicity. The results of this survey guided the selection of sites identified in Chapter 3 and Appendix C, and a summary of the survey's findings is provided in Appendix I.

Figure 2-2: Interactive Map Survey Snapshot- Draft Housing Element Plan Release

The Draft Housing Element was released on May 12, 2022 and was made available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element. Pursuant to AB 215, the city made the first draft available for public review for 32 days between May 12, 2022, to June 13, 2022.

The City also created an interactive Konveio page so the community could read, post comments, and submit questions on the Draft Housing Element and Appendices. During the 30-day mandatory public review period, a fourth Housing Element workshop was held on June 9th to describe the community outreach process and Housing Element content (with particular focus on the Sites Inventory and Housing Action Plan) and provide opportunity for the members of the public to ask questions.

During this initial comment period, the City received 18 letters from Oakland residents and organizations. Staff also sought feedback on the 2023-2031 Draft Housing Element from the Community and Economic Development (CED) Committee of the Oakland City Council on May 24, 2022, and from the Planning Commission on May 18, 2022, and June 1, 2022. City staff incorporated changes to the draft prior to submittal to State HCD where it was feasible to do so within the short time period.

The city provided its draft Housing Element to State HCD for the first 90-day review period on June 30, 2022. The Draft Housing Element (clean and redlined versions) submitted to State HCD is available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element.

EXTENDED PUBLIC REVIEW PERIOD FOR COMMUNITY FEEDBACK

To ensure that the community had enough time to review and comment, the City committed to keeping the first draft of the Housing Element available for public comment during the 90-day State HCD review period, until September 30, 2022. The first Draft Housing Element was available for public review and feedback for a total of 142 days between May 12, 2022, until September 30, 2022.

Staff presented the draft Housing Element to neighborhood and community groups such as Monarch Senior Homes – Satellite Affordable Housing Associates (SAHA) development, East Bay Housing Organizations (EBHO)'s Oakland Committee, Allen Temple Public Ministry's Virtual Townhall, Rockridge Community Planning Council (RCPC) Townhall and the Piedmont Avenue Neighborhood Improvement League (PANIL). Finally, staff conducted study sessions with the City Council and Planning Commission in October to seek additional feedback on the 2023-2031 Draft Housing Element.

Equity Working Group

Between June 2022 and October 2022, the Equity Working Group (EWG) group met eight times to provide feedback and housing policy recommendations on the 2023-2031 Draft Housing Element. EWG members also shared a list of their housing policy recommendations and met with the Directors from the Planning and Building (PBD), Human Services Department (HSD), Oakland Housing and Community Development (Oakland HCD) and the Office of the City Administrator (CAO) and the CAO Homelessness Division to review the policy recommendations.

Response to Public Comments

Appendix L provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period.

Analysis of Impediments to Fair Housing Choice

The assessment of fair housing contained in Appendix D relies in part on outreach done in preparation of Alameda County's 2020 to 2024 Regional Analysis of Impediments to Fair Housing Choice (AI).[17] Historically, Oakland has prepared its own AI every five years as a U.S. Department of Housing and Urban Development (HUD) requirement. However, in 2020, the City joined various Alameda County cities and Housing Authority agencies to complete a regional AI.

A year-long community engagement process for the 2020 to 2024 AI consisted of three meetings and a seven-page survey between June 2019 – November 2019. The survey was translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include racial and ethnic minorities, people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses. Key data from the 2020 to 2024 AI is used in the Assessment of Fair Housing in Appendix D: Affirmatively Furthering Fair Housing.

[17] Alameda County, "Regional Analysis of Impediments to Fair Housing Choice." February 2020. Accessible at https://cao-94612.s3.amazonaws.com/documents/ALAMEDA-COUNTY-REGIONAL-ANALYSIS-OF-IMPEDIMENTS-TO-FAIR-HOUSING-Final-AI_Combined_2-24-20.pdf

Housing Element Community Education Materials

The GPU Deeply Rooted in Oakland Partnership is preparing a Housing Element community education summary intended to synthesize the complex and lengthy housing element as well as community priorities heard throughout the year of outreach and conversations with Oaklanders (i.e., pop-ups, Equity Working Group, Deeply Rooted Community Partners). This summary will provide a focused look at housing issues and their structural roots, key points, community solutions and what policies were integrated into the element to help address these issues. It will also provide a deep dive into people's history and how it shaped housing quality, access, and opportunity for the following areas: Citywide, Chinatown, East Oakland, West Oakland, and North Oakland. The summary is expected to be released in winter/early spring of 2023.

2.2 Public Participation Themes

Across discussion groups, workshops, EWG meetings, and other community engagement events, several key themes emerged that informed development of this Housing Element Update's goals, policies, and actions. This list is not comprehensive, but the key themes listed below are reflected in the overarching goals identified in Chapter 4: Housing Action Plan. The goals, policies, and actions seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

- **Address Homelessness: "Housing is a Human Right."** A common refrain from participants was that Oakland should recognize housing as a human right and focus on addressing the homelessness crisis. As experts from the National Law Center on Homelessness and Poverty note, "a right to adequate housing is not a requirement that states build free housing for the entire population, rather, it devotes resources and protective measures to prevent homelessness, discrimination, and promote permanent stable housing."[18] Participants expressed distrust with the City and frustration with the current unaffordability of housing and ongoing displacement. They suggested a wide variety of strategies to house the unhoused community, including treating unhoused populations with dignity, stopping the current encampment management policy, more flexible building types, temporary units, permanent supportive housing, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including a moratorium on market rate housing to balance the speed at which housing is built with the need to ensure that new housing is high-quality, affordable, and habitable, partnering with community groups that work with unhoused communities,

[18] https://www.kqed.org/news/11801176/what-would-housing-as-a-human-right-look-like-in-california

and creating housing options that include wrap-around services. The Housing Element incorporates this input in the following ways:

  - **Goals:** 1, 2, 3, 4
  - **Policies:** 1.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.7, 4.1, 4.2, 4.3
  - **Actions:** 1.1.1 through 1.1.14, 2.2.1 through 2.2.8, 3.1.1, 3.1.2, 3.3.1 through 3.3.7, 3.3.9, 3.3.11 through 3.3.15, 3.3.17, 3.3.18, 3.5.1 through 3.5.3, 3.6.1, 3.6.2, 3.6.5, 3.7.1, 3.7.2, 3.7.4, 3.7.6, 4.1.1 through 4.1.4, 4.2.1 through 4.2.5, 4.3.1 through 4.3.6

- **Protect Oakland Residents from Displacement and Preserve Existing Affordable Housing.** Over the last two decades, housing costs in Oakland have risen dramatically – meaning many Oakland residents cannot afford to buy or rent a home within their own neighborhood. Participants expressed frustration with increasing displacement pressures while the stock of affordable housing throughout the city decreases, including both subsidized housing and "naturally occurring affordable housing" – or unsubsidized housing that is affordable at market prices. Participants also discussed how Oakland's cultural institutions and history are at risk of loss due to continuing gentrification. To mitigate the pressures of displacement and gentrification, Oakland residents suggested a number of potential anti-displacement strategies, including enhanced rent stabilization measures, stronger just cause for eviction protections, increased enforcement of anti-harassment tenant protections, and historic preservation programs to preserve cultural institutions. Participants also discussed ways to preserve the city's existing affordable housing stock, including the implementation of a Community/Tenant Opportunity to Purchase Act, innovative solutions to maintain permanent affordability like community land trusts, additional acquisition and conversion to affordable housing efforts, live/work preferences for Oakland residents, and programs to physically rehabilitate homes to allow long-time residents to enjoy new community amenities. Participants also pointed to a need for better data collection to ensure accountability and to better understand and target anti-displacement resources. The Housing Element incorporates this input as through the following goals, policies, and actions:

  - **Goals:** 1, 2, 3
  - **Policies:** 1.1, 2.1, 2.2, 3.3, 3.5
  - **Actions:** 1.1.1 through 1.1.14, 2.1.1 through 2.1.6, 2.2.1 through 2.2.8, 3.2.7, 3.3.12, 3.3.18, 3.5.1, 3.5.2, 3.5.4

- **Focus on Building more Housing Affordable to Extremely Low, Very Low, Low, and Moderate Incomes.** Producing new affordable and deeply affordable housing options was identified as a key strategy to prevent displacement. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to build more inclusive neighborhoods add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, inclusionary zoning, changing the zoning to increase density in primarily single-family areas like Rockridge, supporting homeowners in the construction of accessory

dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and reducing the amount of discretionary review required for new housing projects. Other recommendations included creating housing commission and neighborhood planning councils for ongoing resident leadership to decide the kind of housing development. The City of Oakland recognizes the need to increase housing supply generally, and, with priority given to increasing housing affordable to very-low-, low-, and moderate-income households in the following ways:

  - **Goals:** 3
  - **Policies:** 3.1 through 3.8
  - **Actions:** 3.1.1, 3.1.2, 3.2.1 through 3.2.6, 3.3.1 through 3.3.18, 3.4.1, 3.4.3 through 3.4.11, 3.5.1 through 3.5.4, 3.6.1 through 3.6.5, 3.7.4 through 3.7.6

- **Address Housing Quality Issues.** Housing quality issues can have detrimental impacts on people's physical and mental health. Through neighborhood outreach processes, many Oaklanders described housing quality issues they were living with, such as overcrowding, unsafe building conditions, and lack of maintenance, caused by landlord neglect, lack of funds for upkeep or housing burden, or fear of reporting these issues. Community-recommended strategies to address these issues included programs/grants to landlords and homeowners to make repairs; universal design to allow all Oaklanders to remain in their homes as they age, or to help mobility-impaired residents; and tax credits or programs to address other housing habitability concerns, like indoor air quality. The Housing Element addresses housing quality issues in the following ways:
  - **Goals:** 2, 5
  - **Policies:** 2.1, 5.2
  - **Actions:** 2.1.1 through 2.1.6, 3.3.12, 5.2.1, 5.2.5, 5.2.6
- **Keep Oakland Communities Together.** All Oakland neighborhoods deserve high-quality amenities, more affordable housing, and other public investments, especially in areas that have suffered from disinvestment of the past. However, concerns about gentrification and displacement associated with new investment were top of mind for many Oaklanders. Scores of people expressed how difficult it was to pay the rent in light of rising costs. People who have long generational roots in Oakland have been displaced but continue to come to Oakland to be with community and work. This includes a significant loss (30 percent) of Oakland's Black population from 2000 to 2019. As some community members noted, Oakland neighborhoods are like villages where people care for and nurture each other, and displacement means these villages are fragmented, and culture is lost. Oaklanders recommended creative ways to bring back displaced people as homeowners, such as support for co-ops, land trusts, and shared multi-unit buildings. Other creative ways to prevent displacement include creation of cultural district/anti- displacement zones, a human health/socioeconomic impacts analysis to analyze displacement and homeless impacts of market rate projects before the City provides permits or zoning changes. Another way they saw keeping Oakland communities together was through investment to the most

impacted communities via municipal reparation to redress Oakland's history of eminent domain and urban renewal and for Black Americans who are descendants of chattel slavery. The Housing Element addresses displacement and cultural preservation in the following ways:

  - **Goals:** 1, 2, 5
  - **Policies:** 1.1, 2.1, 2.2, 3.5, 5.1, 5.3
  - **Actions:** 1.1.1 through 1.1.14, 2.1.4, 2.2.1 through 2.2.8, 3.2.2, 3.3.8, 3.3.12, 3.3.18, 3.5.1 through 3.5.4, 5.1.1 through 5.1.3, 5.3.1 through 5.3.3

- **Building in Accountability and Success Metrics.** Oaklanders desire more transparency around housing issues and actions in the City, and to be heard by elected officials and City departments stressing the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals. The Housing Elements aims to increase transparency and accountability in the following ways:
  - **Goals:** 1 through 5
  - **Policies:** 1.1, 2.1, 3.2, 3.3, 3.7, 4.1, 4.2, 4.3, 5.1, 5.2
  - **Actions:** 1.1.8, 1.1.9, 2.1.3, 3.2.5, 3.3.13, 3.3.17, 3.7.1, 4.1.2, 4.2.4, 4.3.1, 5.1.1, 5.1.2, 5.1.3, 5.2.11

3 Summary of the Housing Sites Inventory

The Housing Element of the General Plan must include an inventory of land suitable and available for residential development to meet the city's regional housing needs allocation (RHNA) by income level. This inventory is known as the Housing Sites Inventory ("Inventory"). This chapter provides a summary of the full Sites Inventory, available in Appendix C.

3.1 Regional Housing Needs Allocation

As required by State housing law, all California cities and counties must plan for the housing needs of all their residents, at various income levels. This number is called the Regional Housing Needs Allocation (RHNA). For the planning period 2023 to 2031 (also known as the 6th housing cycle), Oakland must plan for 26,251 new units, or approximately six percent of the total allocation for the nine-county Bay Area region. Oakland's allocation is a 77.8 percent increase from the prior cycle's allocation of 14,765 new units, but many nearby jurisdictions have been assigned a larger percentage increase than Oakland compared to their prior RHNA allocation. This is in alignment with the regional goal of ensuring all cities and counties are affirmatively furthering fair housing. Table 3-1 shows the income breakdown of the Oakland RHNA with an additional buffer, as recommended by the State, to account for any loss due to reductions in density.

Table 3-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need, pursuant to Government Code Section 65583(a). Although extremely-low-income housing need is not explicitly projected in the RHNA, this group often requires the most subsidy and assistance to generate a sufficient number of housing units.

Source: ABAG, Final RHNA Plan, December 2021

3.2 Capacity to Accommodate the RHNA

Government Code Section 65583.2(c) requires that local jurisdictions determine their realistic capacity for new housing growth by means of a parcel-level analysis of land resources with the potential to accommodate residential uses. Oakland's analysis of potential to accommodate new housing growth has considered physical and regulatory constraints, including: lot area and configuration, environmental factors (e.g. slope, sensitive habitat, flood risk), allowable density, and other development standards such as parking requirements and building height limits.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. This rezoning proposal will unlock new sites that can accommodate affordable housing within high resource neighborhoods. Sites included in the inventory reflect those that are most likely to develop during the planning period and meet the RHNA; sites that are newly made available by one of the rezoning efforts identified in the Housing Action Plan are not considered as part of this inventory since they do not reflect zoning conditions at the beginning of the Housing Element update process.

The Inventory identifies sufficiently zoned land to accommodate the Oakland RHNA at all income levels. The inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units, or ADUs); and

- Opportunity sites where additional development could occur. This includes 1) potential development projects, where projects may be in pre-approval; sites from the previous RHNA cycle that remain available for development; and new opportunity sites, which includes both vacant and non-vacant sites and consists of City-owned sites, sites owned by Bay Area Rapid Transit (BART) or other government agencies, sites located within a specific plan area, and other sites with expressed or potential development interest.

The analysis of nonvacant properties included only those properties with realistic potential for additional development, in light of 1) existing uses on the site; 2) prevailing market conditions; 3) recent development trends; 4) expressed interests in housing development from property owners or developers; and 5) regulatory and/or other incentives to encourage recycling or intensification of existing development.

A summary of capacity by housing units to meet the Oakland RHNA is provided in Table 3-2, below. The complete 2023-2031 Inventory is provided in Table C25 of Appendix C, and can be seen in Figure 3-1 below.

Table 3-2: Summary of Residential Capacity to Accommodate the 2023-2031 Oakland RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income[1]*	*Moderate-Income*	*Above-Moderate-Income*	***Total***
Total Credits	1,978	2,191	776	10,176	**15,261**
Pipeline Projects	*1,206*	*1,499*	*182*	*10,174*	***13,201***
Projected ADUs	*692*	*692*	*594*	*0*	***1,978***
Adequate Sites Alternative	*80*	*0*	*0*	*2*	***82***
Potential Development Projects[3]	413	1,332	194	5,417	**7,167**
Vacant	*203*	*787*	*23*	*1,201*	***2,235***
Non-Vacant	*211*	*545*	*171*	*4,217*	***4,932***
Available 5th Cycle RHNA		714	3,795	688	**5,197**
Vacant		*23*	*566*	*3*	***592***
Non-Vacant		*691*	*3,229*	*685*	***4,605***
New Opportunity Sites		5,498	999	2,456	**8,953**
Vacant		*142*	*200*	*0*	***342***
Non-Vacant		*5,356*	*799*	*2,456*	***8,611***
Total Capacity		**12,127**	**5,764**	**18,737**	**36,578**
6th Cycle RHNA		**10,261**	**4,457**	**11,533**	**26,251**
RHNA + 15% Buffer		***11,801***	***5,126***	***13,263***	***30,189***
Surplus Over RHNA		**1,866**	**1,307**	**7,204**	**10,327**
		118.2%	**129.3%**	**162.5%**	**139.3%**

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).

2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 units.

3. Potential development project totals are reduced by 10% to account for likelihood of pre-application or early-phase planning permits that may not move forward.

Figure 3-1: City of Oakland 2023-2031 Housing Sites Inventory

Source: City of Oakland, 2022; Dyett & Bhatia, 2022

CREDITS TOWARDS THE RHNA

State HCD Guidance provides that the RHNA can be accommodated by looking at: 1) projects that are currently in the development pipeline; and 2) by considering alternative means of meeting the RHNA, such as projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households.

Pipeline Projects

Pipeline projects are projects that have been approved, permitted, or will receive a Certificate of Occupancy during the projection period (June 30, 2022, to December 15, 2030) and can be credited toward the City's 6th cycle RHNA. Using data from the City's Accela permitting system, 336 pipeline projects with 12,593 units are spread across the city, with the majority in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. Based on the affordability levels or projected rents specified on the project proposal, approximately 21.5 percent of pipeline capacity is affordable for lower-income households, while 1.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. All pipeline projects are shown in Table C-5a and b, and shown in Figure C-2 in Appendix C.

Projected ADUs

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet their RHNA using past building permit approval patterns since 2018. From 2018 to 2021, approximately 247 ADU permits were issued annually in the City of Oakland. Using a conservative estimate, the City anticipates approximately 1,978 ADUs, or approximately 247 average permits per year times eight years.) Annual ADU approvals are shown in Table C-7 in Appendix C. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[19] Projected ADU capacity by affordability level is shown in Appendix C, Table C-8.

Adequate Alternative Sites

According to State HCD, under "limited circumstances" a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[20] Limited circumstances refer to sites that are substantially rehabilitated; located on a foreclosed property or in a multifamily complex of three or more units converted from non-affordable to affordable rental; preserved at levels affordable to low- or very-low-income households with committed assistance; or preservation of mobile home parks through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the 2023-2031 planning period. The affordability of these projects reflects the actual affordability levels pursuant to the

[19] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

[20] More specific conditions that sites included under this option must meet are provided by HCD on their website: https://www.hcd.ca.gov/planning-and-community-development/housing-elements/building-blocks/adequate-sites-alternative

regulatory agreements that will maintain such income-restricted units. These sites and their capacity are shown in Appendix C, Table C-9.

OPPORTUNITY SITES

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop. These include both vacant and underutilized land in potential development projects, available 5th Cycle RHNA sites, and new opportunity sites identified as part of this Housing Element cycle.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process, including those in the pre-application stage and those with filed and under review planning permits. Such projects are considered likely to develop. These sites are shown in Appendix C, Table C-14.

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous Housing Element cycles must be zoned at residential densities of at least 30 dwelling units per acre (du/ac) and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower-income households. The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous Housing Element cycles. Specific sites carried over from prior housing cycles are described in more detail in Appendix C, Table C-15.

New Opportunity Sites

New opportunity sites not included in previous Housing Element cycles were identified to meet the City's remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed or potential development interest, including interest determined as part of a community mapping exercise. Capacity of and rationale for nonvacant sites redevelopments can be found in Appendix C, Table C-16.

Site Selection and Capacity

As part of site analysis, a Housing Element also must demonstrate the projected residential development capacity of sites identified that can realistically be achieved. Creation of realistic assumptions involved survey of recently constructed and approved projects by base zone, density, and height; likelihood of residential conversion and infill development rates; and development capacity modifiers such as existing use on a site, and potential development incentives like low assessed value (AV) ratio (when the value of the land is greater than the existing structure) and low floor area ratio (when a building only takes up a small part of a lot.)

To identify adequate sites and determine realistic capacity, a parcel-based analysis was conducted in accordance with the State site requirements for very-low and low-income sites. Sites that were excluded include non-residential projects already in development; sites without much incentive to

redevelop; sites that were environmentally constrained by high fire risk, near fault lines, or within a 100-year flood plain; and sites with known contamination. In addition to these considerations, sites that are sought to be designated as capable of accommodating lower-income housing must meet the State-defined standard of 30 du/ac, known as the "default density", and they must be between 0.5 and 10 acres. A robust description of the methodology and full table of realistic capacity is provided in Appendix C.

3.3 Assessing Housing Sites Through a Fair Housing Lens

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in identified Environmental Justice Communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against Affirmatively Furthering Fair Housing (AFFH) criteria, the Housing Element is an important step in achieving an equitable future in Oakland.

As described in Appendix D, the site identification requirement in the context of affirmatively furthering fair housing involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity.[21] Furthermore, this analysis will determine whether programs must be adopted to "make sites available" with appropriate zoning, development standards, and infrastructure capacity to accommodate the new development need.

Chart 3-1 summarizes the process of developing the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. Sites were selected in a manner to further and prioritize investment in historically disadvantaged communities, to decrease displacement pressures, and to increase access to existing higher resourced neighborhoods.[22] More information on each of the steps to identify additional sites for lower-income housing is available in Appendix C.

Chart 3-1: Housing Sites Inventory Development Process

[21] Gov. Code, § 8890.50. subd. (b).

[22] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in lower-income neighborhoods and Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). In parallel with housing development, the City must invest in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—including investments in equitable access to transit, public facilities, food access, and other amenities.

The State and California Fair Housing Task Force use a series of Opportunity maps developed by the Tax Credit Allocation Committee (TCAC) and HCD to define areas of low to high opportunity using a set methodology. These maps, described more fully in Appendix D, indicate that a significant portion of Oakland is considered low resource or high segregation and poverty. As a result, while the RHNA is met for each income category based on pre-established housing sites in the Inventory, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. With the exception of Rockridge BART, which has historically not been available for lower income housing, many of these areas are, in fact, in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines and are suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource.

Most residential capacity at all income levels is located in the low resource and high segregation and poverty areas, largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation and poverty per TCAC's Opportunity Scores. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards, high fire risks, and active pipeline projects. About 70.1 percent of Oakland's highest resource areas are within a Very High Fire Hazard Severity Zone (VHFHSZ), as are about 25.7 percent of the city's high resource areas. Flooding also represents a risk in these areas (.6 percent in highest resource; 6.8 percent in high resource), as do earthquake fault zones (5.0 percent in highest resource; 2.2 percent in high resource) – see Appendix C for additional information. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, they will further increase the proportion of lower-income housing available in these neighborhoods.

Many of these higher resourced neighborhoods currently reflect a historic pattern of exclusionary zoning; to address this, the City is taking action to upzone these areas to further increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing

in high-resource neighborhoods. These reforms would also affirmatively further fair housing by opening up exclusionary neighborhoods, and reducing the exposure to air pollution, toxic and other environmental hazards in environmental justice communities. See Appendix J-1 for more information on these rezoning actions, and Chapter 4: Housing Action Plan for other actions that support affirmatively furthering fair housing. The location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure 3-2 below

Figure 3-2: Housing Sites Access to Opportunity, 2022

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority to ensure that the City meets its requirements to affirmatively further fair housing. Therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in higher resource neighborhoods beyond the preliminary sites inventory – which already met the RHNA in each income category. As discussed in Appendix C, the preliminary sites inventory consisted of active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites without known environmental constraints and near amenities like transit. To identify supplemental sites, the City started with the entire universe of parcels in Oakland, and filtered out sites based on objective physical constraints and opportunity metrics. More information on these constraints and metrics can be found in Appendix C.

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[23] After completing this exercise, an additional 70 potential sites were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 19 parcels were identified as supplemental sites that would further AFFH objectives. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization, local knowledge of the sites, and aerial images of the current state of the property. Figure C-7 in Appendix C maps the locations of these supplemental "AFFH sites."

An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.

These actions, as outlined in the Housing Action Plan (Chapter 4) will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the difficultly associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that

[23] A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call that neighborhood home.

4 Housing Action Plan

4.1 Goals, Policies, and Actions

The 2023-2031 Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing.

- Reduce racial segregation and disparities in housing opportunities and outcomes
- Replace segregated living patterns with truly integrated and balanced living patterns
- Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

The five goals are:

Goal 1: Protect Oakland Residents from Displacement and Prevent Homelessness

Goal 2: Preserve and Improve Existing Housing Stock

Goal 3: Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

Goal 4: Address Homelessness and Expand Resources for the Unhoused

Goal 5: Promote Neighborhood Stability and Health

While these five goals provide an overall framework for addressing the multifaceted housing crisis, the policies and actions described in this chapter specify the means for implementing those goals. Actions include both programs currently in operation as well as **new actions** needed to address the city's housing needs.

In addition, the City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation, fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between market-rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each goal below includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low-income households. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing.

In order to provide more immediate housing solutions and stability for existing tenants and unsheltered residents, the City's Housing and Community Development Department (Oakland HCD) has established a balanced approach to investing its available resources, with 25 percent of available resources to rehabilitation/preservation of existing deed-restricted affordable housing, 25 percent

to acquisition and conversion of unsubsidized affordable housing opportunities, and 50 percent dedicated to the new construction of affordable housing with a required homeless set-aside. These funding priorities are outlined in HCD's Strategic Action Plan (2021-2023), found here: https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

The City's Notices of Funding Availability (NOFA) and Request for Proposal (RFP) processes are key for how the City supports many of the goals outlined below. NOFAs and RFPs released by Oakland HCD are competitive application processes for awarding City of Oakland funds for the development of affordable housing. Currently, HCD has three NOFA programs: 1. Acquisition and Conversion to Affordable Housing (ACAH), 2. New Construction of Multifamily Housing, and 3. Acquisition, Rehabilitation, and Preservation of Multifamily Affordable Housing. When funding is available, NOFA are released under the three programs to issue funds for affordable housing projects, which are then reviewed for feasibility and scored based on criteria in each NOFA. Based on ranking, projects are recommended for funding to the Oakland City Council. NOFA scoring is guided by the values centered on advancing racial equity and to prioritize assisting housing projects where the tenants are at risk of displacement and that target assistance towards extremely low income households. In recent years, the City has also implemented its Homekey Program, which uses State Homekey funds to expand housing for people experiencing homelessness or at risk of homelessness. The City chooses Homekey partners via an RFP process seeking proposals for the rapid acquisition and operation of homeless housing .

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The San Francisco Bay Area is decades into an extreme housing crisis, and Oakland is at the center of that crisis. Housing production, and particularly affordable housing production, has not kept pace with the region's economic growth. Because Oakland's rental and housing market has traditionally been less expensive than other Bay Area cities, Oakland residents experience disproportionately high displacement pressure. As a result, many Oakland residents cannot afford to buy or rent a home within their own neighborhood.[24] As households displaced from more expensive Bay Area communities search for more affordable housing options in Oakland and higher-income households continue to move into the city, Oakland's existing residents continue to bear the brunt of the Bay Area's housing crisis.[25] Community investment, including building new housing, is crucial for all Oakland neighborhoods to prevent displacement.[26] With demand outpacing the limited housing supply, competition for finite units and the resulting rising rents creates displacement pressure on low-income residents. Research by the Changing Cities Research Lab at Stanford University and the Federal Reserve Bank of San Francisco on credit score data shows that lower income residents who move from historically Black neighborhoods tend to move to neighborhoods with lower housing values and health scores, suggesting movement under constrained circumstances; over time, fewer of these low-income movers stayed within Oakland or moved into Oakland as affordable options

[25] Urban Displacement Project, "Mapping Displacement, Gentrification, and Exclusion in the San Francisco Bay Area." 2018. Available at https://www.urbandisplacement.org/maps/sf-bay-area-gentrification-and-displacement/.

[26] Office of Policy Development and Research, U.S. Department of Housing and Urban Development, "Displacement of Lower-Income Families in Urban Areas Report." May 2018. Available at https://www.huduser.gov/portal/sites/default/files/pdf/DisplacementReport.pdf.

declined.[27] Rising rents are a factor in increasing rates of homelessness. According to the 2022 Alameda County Point in Time Count, 25 percent of unsheltered Oakland residents report that rent increases were a primary cause of homelessness, in addition to job loss (22 percent) and other money issues (13 percent).[28]

Oakland is committed to enabling renters and owners to stay in their homes and communities, eliminating all involuntary moves out of the city. Goals and policies that are part of a comprehensive protection strategy are designed to prevent displacement and homelessness, and to ensure that low-income renters and homeowners have supports they need to stay in their homes and communities as increased neighborhood investment occurs.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

To meet the City's equity goals and mandate to affirmatively further fair housing, this goal of protecting Oakland residents from displacement and preventing homelessness —including the policies and actions contained within—will advance the City's commitment to reducing racial and economic disparities across Oakland. This goal seeks to protect Oakland renters and owners from displacement pressures and prevent homelessness, both of which disproportionately impact Black, Indigenous, and People of Color (BIPOC) communities throughout Oakland. For example, enhanced tenant protections will crack down on tenant-based racial discrimination in the housing market. This will be particularly important as the eviction moratorium established during the COVID-19 pandemic eventually comes to an end and as further pressure is exerted on the residential rental market.

Rent stabilization and just cause protections also ensure that as more amenities are added to a neighborhood (and it becomes higher resource), the existing residents from diverse backgrounds are able to stay. Residents of historically disinvested neighborhoods should be able to remain in their homes and enjoy the results of improved amenities and increased services. In the long-term, this will enhance access to opportunity for historically marginalized and disadvantaged communities. By pursuing live/work preferences for Oakland residents and taking actions to assist tenants at risk of eviction, Oakland helps tenants avoid displacement or concentration in disadvantaged neighborhoods.

[27] Hwang, Jackelyn, and Vineet Gupta. "Residential and Neighborhood Instability in Oakland." 2021. Available at https://ccrl.stanford.edu/publications/residential-and-neighborhood-instability-in-oakland.

[28] City of Oakland, "Homelessness County & Survey: Comprehensive Report." 2019. Available at https://everyonehome.org/wp-content/uploads/2022/10/2022-Alameda-County-PIT-Report_9.22.22-FINAL-3.pdf

Through more robust data collection efforts, the City will also be able to better identify and correct barriers to opportunity. These efforts include the creation of a rental registry and other displacement measure tracking. More accurate data will also help the City to better target its existing and future housing resources for maximum impact.

POLICY 1.1. TENANT PROTECTIONS AND ANTI-DISPLACEMENT

Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.

The Oakland Rent Adjustment Ordinance (Chapter 8.22, Article I of the Oakland Municipal Code) limits rent increases on covered units (most units built before 1983) based on a formula tied to increases in the Consumer Price Index. In 2022, the City Council adopted an amendment to change the formula used to calculate the annual allowable rent increase to 60 percent of the change in CPI, or 3 percent, whichever is lower. The Rent Adjustment Program (RAP), a division of Oakland Department of Housing and Community Development, will continue to enforce the Rent Adjustment Ordinance.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Revisions to formula to calculate allowable rent increase completed in 2022. Implementation ongoing, 2023-2031.*

Objective: *All tenant rights and protections under applicable City law will be enforced.*

Action 1.1.2: Enforce Just Cause for Eviction measures.

Just Cause for Eviction protections are enforced by the Rent Adjustment Program (RAP) and are contained within Chapter 8.22, Article II of the Oakland Municipal Code. In 2022, the City Council voted to place on the November 2022 ballot an expansion of the Just Cause for Eviction ordinance. In particular, the ballot measures asks: Shall the Measure amending the Just Cause for Eviction Ordinance to: (1) prohibit no-fault evictions of children and educators during the school year; (2) extend eviction protections to tenants in recreational vehicles (RVs), tiny homes on wheels, and newly constructed units except during the first 10 years after issuance of the certificate of occupancy; (3) remove failure to sign a new lease as grounds for eviction; and (4) make other clarifying amendments, be adopted? The City will continue to enforce just cause measures, undertake efforts to ensure the public is aware of revisions if enacted by the voters, and expand tenant protections as feasible—including identifying additional limitations to just causes.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.3: Enforce and Strengthen Ellis Act protections.

The Ellis Act is a statewide law that permits property owners to terminate tenancy when withdrawing residential units from the rental market. Although the City cannot prohibit Ellis Act

evictions, it has adopted the Ellis Act Ordinance (Chapter 8.22, Article III of the Oakland Municipal Code) to set specific requirements that must be followed when removing a property to discourage violations of the Act and prevent the displacement of renters. This includes filing withdrawal notices with the Oakland Rent Adjustment Program, and the provision of relocation assistance. Recent efforts to reform or repeal the Ellis Act at the State level have gained significant traction but have not to date been successful. The City has supported those efforts—for example, see City Resolution No. 88571 C.M.S. in support of Assembly Bill 854 (Lee) that would have prohibited a rental housing owner from removing a building from the market pursuant to the Ellis Act unless all owners of the property have held their ownership interest for at least five years. The City continues to hold that reform is necessary to reduce speculator abuse and protect tenants. The City will join neighboring Bay Area cities to advocate for statewide reform to the Ellis Act to stabilize rental housing.

Furthermore, the City's requirements when removing a property through the Ellis Act Ordinance are bolstered by protections under the City's Just Cause for Eviction Ordinance (see Action 1.1.2 above) and Relocation Ordinance (Action 1.1.4 below). The City's newly implemented rental registry (2022) will also help the City monitor Ellis Act-related eviction cases.

The City will continue to enforce the Ellis Act Ordinance and, based on any changes allowed by statewide reform, explore ways to strengthen renter protections—including proactive enforcement of eviction protections—in case of an Ellis Act eviction where feasible.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ellis Act Ordinance Protections are ongoing, 2023-2031; staff will continue to process Ellis findings, which have averaged 25 annually over the past four years, and will continuously seek ways to improve efforts to inform owners and tenants of their rights and obligations under the Ellis Act through robust outreach and counseling. Furthermore, the rental registry will be required as of July 1, 2023 and monitored thereafter. Lastly, the City will engage its legislative lobbyists annually and submit a support letter to the State annually to continue Statewide advocacy efforts.*

Objective: *All tenant rights and protections under applicable City and State law will be enforced, and the City will continue to seek ways to improve tenant protections under the related ordinances.*

Action 1.1.4: Implement tenant relocation measures.

On January 16, 2018, the City of Oakland passed the Uniform Residential Tenant Relocation Ordinance (Ord. No. 13468) to establish a uniform schedule of relocation payments which are now extended to tenants evicted when the owner or qualifying relative moves in and for other "no tenant fault" evictions. The Uniform Relocation Ordinance (Ord. No. 13468) requires owners to provide relocation payments to tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act activity, and condominium conversions. The City will continue to implement and enforce the Ordinance, adjusting base payments for inflation annually on July 1st. Additional relocation payments shall be required for tenant households in rental units that include lower-income, elderly or disabled tenants, and/or minor children.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.

The City will implement a tenant right to counsel in Rent Adjustment Program (RAP) proceedings, where qualified tenants who participate in RAP hearings have right to free legal representation within the funding availability restrictions. This includes partnering with nonprofit organizations to provide those services.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: In October, 2022 *Council approved a service provider contract to provide legal representation during RAP proceedings beginning in providing representation services in Fall 2022.* **Objective:** *Resources permitting, all tenants participating in RAP proceedings will have access to legal representation. to prevent displacement by preventing unlawful rent increases. (see Action 1.1.6 below).*

Action 1.1.6: Enhance housing related legal services

As funding becomes available, the City will increase housing related legal services, including eviction defense services and legal counseling through community partners. Housing Related legal services will help address displacement risks, eviction defense, and housing instability through legal representation, consultation, and education. T

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Local, State or federal sources as available, and Annual Rent Adjustment Fee*

Timeframe: In July 2022 Council approved a direct grant to a consortium of nonprofit legal service providers to continue eviction protection and other legal services. Other tenant legal service contracts are administered through the Rent Adjustment Program. Staff will continue to *seek funding to ensure services will be ongoing.*

Objective: *Resources permitting, all at risk tenants may seek free legal services from external partners to prevent evictions and housing instability.*

Action 1.1.7: Expand the City's ability to enforce rent control to maintain affordability.

Rent control measures are outlined in Oakland's Rent Adjustment Ordinance and enforced through the Rent Adjustment Program (RAP). Currently, residential rental units are covered by the Rent Adjustment Ordinance if they are within a building built prior to 1983 and there are two or more units in the building. In addition, the City's new rental registry, approved in 2022, will require

property owners to report rent and tenancy information to RAP on an annual basis. This new tool will allow the City to better monitor rent control and will help both tenants and owners understand whether their rents comply with Oakland's Rent Adjustment Ordinance. The City will consider how to expand the number of units subject to rent control to maintain affordability.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Rent control measures are ongoing, 2023-2031. As of July, 1, 2023, the City's rental registry will require owners of these units to report rent and tenancy information to RAP on an annual basis. With this new tool, staff will be able to better monitor rent control measures.*

Objective: *To the extent permitted by State law, Oakland will use the rental registry to ensure rent control laws are being followed, enabling better renter protections.*

Action 1.1.8: Monitor neighborhood displacement risk factors.

As the effects of the COVID-19 pandemic continue to unfold and eviction moratoriums lift, there is an urgent need to monitor displacement pressures. The City will regularly monitor displacement risk factors—including rising housing costs, rapid demographic changes, neighborhood instability, climate risks, and trends around in- and out-migration across neighborhoods in Oakland—to understand local displacement risk. This data will be used to better target anti-displacement programs and prioritize neighborhoods with a high risk of displacement. This data will also be used to better understand the causes of displacement and help tailor City programs to meet existing housing needs. The City will carry out the bi-annual Resident Mini Pulse Survey on the state of housing security as part of these monitoring efforts.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment fee*

Timeframe: *Ongoing, 2023-2031; conduct Resident Mini Pulse Survey on biannual basis.*

Objective: *The City of Oakland will include displacement-related statistics in a broader housing or community dashboard available on the City website.*

Action 1.1.9: Implement a rental housing registry.

A rental housing registry is a database of rental units within Oakland and will be used to track properties subject to rent control provisions, Just Cause for Eviction measures, and other property-specific policies and requirements. In June 2022, the Oakland City Council adopted Ordinance No. 13695 CMS to establish a rental registry in Oakland. The City will use data collected in the rental housing registry to monitor and understand neighborhood change at a more granular level, to better target anti-displacement policies and ensure that rent increases are compliant under the Rent Adjustment Ordinance.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: Implement the rental registry by 2023, maintain it *ongoing, 2023-2031*

Objective: *By 2023, the City will design and implement a rental housing registry. This registry will cover housing units subject to rent stabilization and/or just cause protections under City law.*

Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).

The TPO (Chapter 8.22, Article V of the Oakland Municipal Code) recognizes tenants' right to live in safe, dignified, harassment-free homes. The TPO deters and makes unlawful harassment by property owners and their agents, including property managers, recognizing that such harassment can frequently force tenants from their homes. The ordinance provides tenants strong legal recourse in the event of such prohibited harassment. On July 21, 2020, the City further amended the TPO to strengthen existing protections and include additional remedies. For example, the amendments established heightened penalties for violations against elderly, disabled, and/or catastrophically ill tenants. The amendments further expanded the ordinance's application to non-profit-owned rental housing and rental units in newly constructed residential properties. City enforcement of the TPO can prevent and remedy violations against tenants, for example by deterring unscrupulous landlords from undertaking "self-help" evictions and securing building and/or citywide relief for tenants. City enforcement therefore is critical to ensuring that Oakland's most marginalized tenants also receive the protections of the TPO.

In October 2020, the Oakland City Attorney launched the Housing Justice Initiative, a housing enforcement unit specifically dedicated to protecting marginalized Oakland tenants through the enforcement of the TPO and other similar or related local and State laws.

Through the Housing Justice Initiative and the work of the City Attorney's existing Neighborhood Law Corps, the City will continue to expand its enforcement of the TPO.

Responsible Party: *Oakland City Attorney*

Potential Funding Source: *Additional grant sources will be pursued.*

Timeframe: *Ongoing, 2023-2031*

Objective: *Tenants' rights and protections under applicable City and State law will be enforced more systematically and on a larger scale over time, with a focus on actions that protect the most marginalized tenants and hold large-scale bad actors to account.*

Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.

Currently, through the Tenant Move Out Ordinance (Chapter 8.22.700, Article VI of the Oakland Municipal Code), Oakland renters have protections from unfair or coercive buyout agreements. Further, State law (SB 330) requires that property developers provide the right to return to low-income renters when a property is demolished and redeveloped, and that the charged rent must be affordable. The City will continue providing awareness of State and local requirements and will enforce affordability requirements in new development projects. Further, pursuant to Action 2.2.5, the City will extend this right beyond the sunset date of SB 330.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *Legal fees associated with case parties involved*

Timeframe: *SB 330 rights will be extended by the end of 2024.*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.12: Provide a local preference in affordable housing projects.

Oakland Municipal Code [Chapter 15.63] grants preference in City-assisted affordable housing projects to (1) Oakland residents displaced due to City actions or no-fault evictions, (2) neighborhood residents, and (3) Oakland residents and workers. All three preferences are applied at initial occupancy, to the extent permitted by other funding sources. After initial occupancy, displaced households and Oakland residents and workers continue to receive priority preference for available units. Oakland's Housing and Community Development Department recently updated its findings to support its preferences and ensure that its preferences may be permitted in County-assisted projects. The City will continue its efforts to streamline the process by which these preferences are applied, including through a regional housing portal and a more robust tracking system for displaced households.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *n/a*

Timeframe: *Ongoing, 2023-2031. While the ability of the City to require its projects to participate in a regional application portal depends in part on the readiness of such portals, the City currently attends regular meetings around the design of a regional portal. The City intends to identify a suitable application portal to partner with by the end of 2024.*

Objective: *The City will continue to apply local preferences in City-assisted affordable housing to the extent allowed by law and the constraints of other involved funding sources. The City will continue to identify ways to streamline the administration of its preferences, including through a regional housing portal and a more robust tracking system for displaced households.*

Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.

While negotiating development agreements with developers for large scale market-rate and non-residential projects on City land or development agreements requiring complex, multi-phase entitlements, the City will advocate for establishing an appropriate set of standardized community benefits to mitigate any displacement pressures that result from the development. This may include increased levels of required affordable housing units. The City will consult with community-based organizations and residents impacted by developments to evaluate the extent of community benefits required to properly mitigate displacement impacts.

Responsible Party: *Oakland Planning & Building Department, Oakland Department of Housing and Community Development; Economic and Workforce Development Department*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly reduce displacement pressures through negotiating appropriate community benefits during the development agreements process.*

Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

Keep Oakland Housed, the Shallow Subsidy Pilot (public-private partnerships), Oakland Housing Secure, and the federally funded Emergency Rental Assistance Program (ERAP) are programs that currently help prevent renters from becoming homeless through rental assistance, legal advice, housing counseling, and/or case management. Through these programs, a diverse and vibrant network of providers has been created that work together to provide individualized services to Oakland tenants.

The City will support and align City, Alameda County, and private partners (such as community-based and faith-based organizations that have roots in communities whose members are disproportionately at risk of homelessness) to strengthen their capacity to prevent displacement and respond effectively when people are experiencing a housing crisis. The City will also expand these types of programs and design new ones that identify, assist, and prioritize funding for those who are most at risk of becoming homeless. In addition, the City will continue to make information about tenant protection, anti-displacement, rental assistance, and homelessness services available on the City's website and at City facilities and strive to improve public awareness of these programs. These efforts are especially key in the wake of the COVID-19 crisis and the eventual end of the eviction moratorium. Additional tenant protection actions are included in Actions 1.1.1-1.1.10.

Responsible Party: *Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: Continue implementation of the ERAP program 2022-2023, and *The City of Oakland to issue a Request for Proposals and award a contract to a homeless prevention program provider(s) by mid-2023.*

Objective: *The City of Oakland will continue to implement a homeless prevention program that includes emergency financial assistance, legal support and wrap around services. The program will be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program.*

Goal 2. Preserve and Improve Existing Affordable Housing Stock

Oakland's existing affordable housing stock is an important resource for the city's lower- and moderate-income population. Housing preservation means retaining existing built affordable housing and extending its affordability for current and future tenants. Preventing the loss of valuable existing affordable housing units is a cost-effective way of maintaining this resource as well as keeping existing residents who may be more vulnerable to increasing cost pressures in their homes.

Oakland has numerous preservation policies in place already, including rehabilitation programs for low-income homeowners, demolition and condo conversion restrictions, resale controls to preserve affordability, and regular inspections of City-assisted affordable housing stock. A primary task of City staff will be to enforce and maintain these policies over the coming cycle. In addition, the City has identified areas where it may seek to expand preservation strategies, such as through a proactive inspection program for non-restricted housing stock, environmental remediation programs, and policies to facilitate acquisition of properties by tenants and mission-driven nonprofits. These strategies are described below.

Preservation, improvement, and maintenance also have health and equity co-benefits—addressing housing habitability issues can help to narrow inequitable racial and ethnic gaps in substandard housing conditions and reduce the burden of maintenance challenges for lower-income homeowners. This goal includes policies and actions that conserve and improve existing housing stock.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

This goal sets forth several policies and actions that will advance fair housing in Oakland though actions that physically rehabilitate housing units, reduce displacement by deepening and/or extending affordability, and ensure Oakland residents are able to remain in their communities and enjoy new amenities and benefits. Physical rehabilitation of housing also improves the environmental determinants of health, thereby advancing the City's Environmental Justice goals. As discussed in Appendices B and D, BIPOC residents of Oakland are disproportionately impacted by substandard housing issues. Actions contained within this goal will reduce the prevalence of these substandard housing issues citywide. Universal design strategies will also increase housing access for seniors and people with disabilities.

Actions that preserve the affordability of existing homes play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the displacement pressures in their neighborhoods. These actions range from resale controls to demolition and conversion protections. A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability benefits of homeownership. Historic preservation actions also preserve cultural institutions and history that would otherwise be at risk of loss due to gentrification.

POLICY 2.1 EXISTING HOUSING STOCK IMPROVEMENT

Action 2.1.1: Support home rehabilitation programs.

The City will expand housing rehabilitation assistance to very low- and low-income homeowners to address code violations, repair major building systems in danger of failure, abate lead-based paint hazards, conduct minor home repairs for seniors, and perform or fund emergency repairs. Per the Council-adopted target of 100 percent building electrification by 2040 (Equitable Climate Action Plan (ECAP) Action B-2) and energy resilience for all (ECAP Action A-2), the City will pursue resources to integrate holistic building electrification, onsite renewable energy, and energy storage into these programs where possible, and combining building electrification improvements with other improvements for health, safety, and livability. Per the ECAP, electrification refers to the replacement of methane (aka "natural") gas systems and appliances with efficient, effective, all-electric alternatives, such as heat pumps or induction cooking. Electrification is intended to be permanent: to meet the Council's 2040 target, buildings switching away from gas to efficient electric systems and

appliances should not later add gas infrastructure or appliances. Some of the programs currently operated by the City of Oakland or its partners include:

- Home Maintenance & Improvement Program (HMIP) Deferred Loan Program
- Emergency Home Repair Program Loan Program
- Alameda County Minor Home Repair Grant Program
- Lead Hazard Control and Paint Program
- Access Improvement Program
- Oakland CalHome ADU/JADU Loan Program
- Bay Area Regional Energy Network's HomePlus Program and Home Energy Advisor
- TECH Clean California
- California Energy Smart Homes
- Low Income Weatherization Program

The City will engage local partners and fair housing experts to help promote awareness of, and broad participation in, these programs. The City will continue to implement, annually review, and revise, as needed, program guidelines for housing rehabilitation assistance. The City will target resources, as available, to expand opportunities throughout the community, including in lower-income and lower resource areas. The City will also strive to build community capacity and technical know-how by connecting homeowners with local labor to carry out home rehabilitation projects. This assistance will be particularly targeted to neighborhoods experiencing or at severe risk of displacement and gentrification. The City will also commit to explore additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's homeowner rehabilitation programs.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *The City of Oakland Department of Housing and Community Development will continue to accept applications for and serve residents through its established low-income homeowner rehab programs and facilitate access to other resources on an annual basis. The City will also pursue additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's programs. The timing on pursuit of these additional funding sources depends on when such opportunities are available, as State funding streams for home rehabilitation/electrification are unpredictable or trade off with other Housing Element priorities (for example, the CalHome program could fund rehabilitation, but that would potentially mean applying for less money for down payment homebuyer assistance which has no other dedicated funding).*

Objective: *As funding is available, the City of Oakland will continue to fund and operate home rehabilitation programs. At current funding trends, this will allow for approximately 80 rehabilitation projects each year.*

Action 2.1.2: Promote healthy homes and lead-safe housing.

The City will continue, and seek resources to expand, implementation of the Lead-Safe Homes Program to assist low- and moderate-income homeowners with lead paint identification and remediation, prioritizing resources for disadvantaged communities with high rates of asthma. The City will also continue to partner with the Alameda County Community Development Agency's Healthy Homes Department to provide education, lead-safety skills training, and on-site consultations for Oakland property owners and conduct lead poisoning prevention and asthma trigger interventions for Oakland residents. In accordance with Oakland's 2030 Equitable Climate Action Plan, the City will encourage the transition away from natural gas appliances, which has been proven to increase development of asthma in children by 24 percent and which increases risks of fire and explosions. The City will seek resources to integrate electrification, lead abatement, and home rehabilitation activities in order to maximize public health and housing security benefits for frontline Oaklanders. The City will also seek resources and inter-agency partnerships to monitor public health impacts of new programing and requirements.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division; Sustainability and Resilience Division, City Administrator's Office*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding becomes available, the City of Oakland will implement programs to reduce health hazards from lead and natural gas appliances.*

Action 2.1.3: Conduct proactive rental inspections.

The City is adopting a proactive, data-driven housing inspection program for City Council's approval in early 2023 to improve housing habitability conditions among the City's rental stock. Covered rental units will be inspected on a regular basis at designated intervals thereby reducing the likelihood of deterioration and escalation to substandard housing conditions by identifying and targeting exterior and interior code violation early on. The City will continue to monitor and inspect properties in response to a complaint driven process from the public on habitability and blight condition. The City will work with community partners to develop appropriate enforcement mechanisms, including tenant protection and anti-displacement mechanisms to ensure tenants are not displaced as a result of proactive inspections turning up housing habitability issues and/or raising rents due to the cost of fixing habitability issues. Further, the City will prioritize inspections in areas with older housing stock and health disparities and seek funding to streamline the inspection/rehabilitation process by connecting property-owners to technical and financial assistance for safety and accessibility improvements at the time of inspection. Guidelines are being developed to identify issues that may qualify as delay of enforcement actions to provide property-owners with sufficient time to complete the needed repairs, thereby mitigating displacement of existing tenants and preserving affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Permit fees*

Timeline: *2023*

Objective: *The City will develop a proactive rental inspections program to significantly improve housing safety and quality and address housing needs, particularly in areas with older housing stock and communities experiencing health disparities.*

Action 2.1.4: Support historic preservation and rehabilitation.

The City will support the preservation and rehabilitation of both the existing historic housing stock and adaptively reused non-residential structures through a variety of strategies, including continued implementation of Mills Act Contracts and the Oakland Community Buying Program. The City will support the preservation of historic, archaeological, and tribal cultural resources and their incorporation into project site planning where feasible. As described in Action 3.2.3, the City will also promote adaptive reuse to promote historic preservation.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to implement the Mills Act and the Oakland Community Buying Program to support to help support historic preservation.*

Action 2.1.5: Implement universal design strategies.

The City will initiate community engagement to understand the need for universal design strategies, including with seniors, people experiencing disabilities, and community-based organizations with insight and experience with accessibility issues. The City will consider the adoption of a Universal Design Ordinance, which would help close loopholes, ensure good faith compliance of Americans with Disability Act provisions, ensure that accommodations are built into new developments, and allow Oaklanders to age in place.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2025-2027*

Objective: *The City will consider adopting a Universal Design Ordinance to address housing needs and improve housing conditions for seniors, people experiencing disabilities, and other communities with accessibility issues.*

Action 2.1.6: Increase funding for improved indoor air quality.

The City will seek State, Federal, and other funding sources to provide financial assistance to property owners and very low- and low-income homeowners to offset some of the cost of investing in better ventilation, air filtration systems (e.g., MERV filter systems), and efficient electrification to improve indoor air quality in existing single- and multifamily residential units, with a priority for homes in high air pollution areas such as near freeways. The City will adopt and implement an Existing Building Electrification Roadmap, using an equity-centered approach to transition all homes away from methane (aka "natural") gas systems by 2040. The Roadmap will specify policy strategies, necessary

incentives and safety nets, and other steps to avoid increasing housing displacement or energy insecurity in the electrification transition.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office

Potential Funding Source: *State funding such as Technology and Equipment for Clean Heating Initiative, Building Initiative for Low-Emissions Development, and California utility repayment funding. Federal funding is available through the Inflation Reduction Act. Additional sources of funding could include CEQA mitigation funds, philanthropic sources, and other public-private partnerships.*

Timeline: *Identify funding by 2026; bring Existing Building Electrification Roadmap to Council for adoption by end of July 2023*

Objective: *Significantly improve indoor air quality and address housing need in existing single- and multifamily residential buildings.*

POLICY 2.2 PRESERVE THE AFFORDABILITY OF EXISTING HOMES

Action 2.2.1: Continue to implement resale controls on assisted housing.

The City will continue to use financing agreements for both City-assisted ownership and rental development projects to ensure that units remain permanently affordable through covenants running with the land.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *100 percent of City-assisted homeownership and rental units will have their affordability covenants effectively enforced.*

Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.

The City will proactively monitor and enforce affordable housing covenants and will conduct outreach to the owners of assisted units that are at risk of conversion to market-rate housing. The City will prioritize the preservation of units at some level of risk of converting in the next 10 years by actively working with and encouraging the owners of those properties to extend their covenants. Pursuant to law, the City will also engage in required noticing, tenant education, and coordinating with qualified entities.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: Program monitoring and enforcement of this program is ongoing, 2023-2031. Furthermore, the City has issued Preservation and Rehabilitation NOFAs on a periodic basis, per funding availability to capture existing affordable units at-risk of conversion to market-rate, and perform rehabilitation work on properties in exchange for extending the term of affordability restrictions. Recent NOFA under this program were released in 2017 ($9.5M) and 2019 ($11M), and the next NOFA release is anticipated in 2023. The City is aiming for approximately $10M in this round, but will likely bolster that amount with the 2022 Bond Measure funding for affordable housing and infrastructure approved by voters.).

Objectives: *As funding becomes available, deed-restricted affordable housing units at risk of losing their affordability will be protected from a loss of affordability protections through extensions of regulatory agreements, and deepening of affordability levels when possible. Currently the City's policy is to allocate approximately 25 percent of available local funding towards Preservation and Rehabilitation NOFA, and future funds will be allocated contingent upon availability.*

Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.

Residential hotels, also referred to as single-room occupancy (SRO) units, provide an important source of naturally occurring, deeply affordable housing in City. As such, Oakland has enacted regulations to limit the demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units. The City has recently amended these regulations (Chapter 17.153 of the Oakland Planning Code) to strengthen protections for residential hotels and will continue to enforce these protections to preserve their affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce Single-Room Occupancy (SRO) regulations to preserve affordability and meet housing needs.*

Action 2.2.4: Limit condominium conversions.

The conversion of rental housing to condominiums provides a risk to the affordability of Oakland's housing stock. The City recently amended its condominium conversion regulations to require replacement rental housing for the conversion of two or more housing units, to remove the provision allowing the generation of conversion rights when the units are offered as rental units for seven or more years, to acknowledge the applicability of the Oakland Just Cause for Eviction Ordinance and the Oakland Rent Adjustment Ordinance, and to afford greater rights and protections to existing tenants. The City will strictly enforce these recently adopted regulations to preserve Oakland's rental housing supply.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce condominium conversion regulations to preserve rental housing supply and prevent displacement.*

Action 2.2.5: Extend local replacement unit provisions.

State law (SB 330) mandates that "protected units" are replaced with comparably affordable units when a residential building is demolished and redeveloped. The City will codify and extend replacement provisions pursuant to State law beyond the established sunset date. The City will require that developers notify existing and prospective tenants of their tenant rights as provided both under SB 330 as well as Oakland's Just Cause for Eviction Notice. The City will require developers to comply with applicable tenant right to refusal provisions. Further, the City will engage in strict monitoring and enforcement of the law to ensure replacement units are provided. This will include active outreach to developers to ensure they are aware of and comply with replacement unit provisions, and the maintenance of a displaced tenant database. The City will require that any demolition proposals include sufficient relocation assistance and right to return to the new replacement units.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Enforcement of SB 330 requirements: Ongoing, 2023-2031. Adoption of Requirements above SB 330: 2024.*

Objectives: *Codify and extend local replacement unit provisions to ensure compliance and prevent displacement.*

Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.

The practice of "house flipping," —acquiring properties, making superficial improvements, and quickly reselling at a higher price—can cause housing costs to increase, leading to higher rates of displacement and increased exclusivity in higher resource neighborhoods. To curb the negative effects of speculation, the City will consider implementing an anti-speculation tax, which would apply a fee when a property is sold shortly after purchase. The City will conduct a market study to understand the potential impacts of such a tax and its appropriateness within Oakland. As discussed in Action 2.2.8, the City will also explore a possible Tenant Opportunity to Purchase/Community Opportunity to Purchase Act.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge for the study; self-funding, if implemented*

Timeframe: *2026*

Objectives: *Study the root causes of unaffordability and displacement and consider possible taxes to prevent displacement and maintain affordability. Looking specifically at the cost to rehabilitate a home and incentivizing the market to maintain neighborhood level affordability through tax incentive or disincentive.*

Action 2.2.7: Provide additional subsidy for residential hotels.

The City will consider allowing owners of residential hotels that agree to restrict occupancy to lower-income residents to transfer development rights to create an endowed source of funding for an internal subsidy for such residents, or for maintenance/facility upgrades that do not increase rents.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2025-2027*

Objectives: *Preserve SROs and meet housing need.*

Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.

A Tenant/Community Opportunity to Purchase Act, referred to as TOPA/COPA, gives tenants and nonprofit organizations the opportunity to purchase their home when it goes up for sale, thereby preserving that housing unit as affordable. TOPA/COPA policies are under development in multiple Bay Area cities, including Oakland, the neighboring City of Berkeley, East Palo Alto, and San Jose. The City will study the effectiveness of a TOPA/COPA model suited to local conditions, which may include equity-building mechanisms, funding needs and sources, racial equity impact considerations, or other approaches that may be appropriate to Oakland. Enactment of a TOPA/COPA policy would require City Council review and approval.

Responsible Agency: *City Council; Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Investigate a TOPA/COPA policy and present findings to Oakland City Council for discussion by Fiscal Year 2025. If adopted, implementation will occur at maximum two years after the date of adoption.*

Objective: *Oakland will study by FY2025, and if appropriate, implement a TOPA/COPA policy by 2027 at the latest.*

Goal 3. Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

To address Oakland's ongoing housing crisis, key strategies should focus on closing the gap between market-rate and affordable housing production by prioritizing the preservation of existing housing and developing high-quality and abundant affordable housing for those of the greatest need, including Black, Indigenous, and other People of Color (BIPOC) households.

During the previous RHNA cycle, the City permitted more above-moderate-income housing than required by the RHNA, whereas the City only permitted one affordable housing unit for every eight above-moderate income units. This highlights the need for a concerted effort to increase production of homes that are affordable to very low-, low-, and moderate-income households. While adding housing at every income level can help reduce market competition for existing homes, a primary driver in displacement and homelessness, Oakland also needs more deeply affordable housing. Oakland especially needs housing affordable to extremely-low-income residents and housing that remains permanently affordable. One of the key objectives in expanding affordable housing opportunities and producing more affordable housing is overcoming patterns of discrimination and opening up neighborhoods that have historically been exclusionary to communities of color and low-income residents, while simultaneously refocusing resources and protections towards historically disinvested neighborhoods (see Policy 2.2).

As stated above, the City fell short of meeting its lower- and moderate-income need, which has nearly doubled during the current 6th cycle RHNA. The shortfall is primarily a reflection of the lack of commensurate state and federal subsidies that would be necessary to achieve Oakland's targets for low- and moderate-income households. Public funds for affordable housing would need to be expanded *tenfold* in order to meet these 6th Cycle RHNA targets. Other constraints are discussed in Appendix C. To meet the increased need for affordable housing, the City will identify new funding sources, expand existing programs, and introduce new strategies to close the gap between market-rate and affordable housing production, and further encourage high quality and abundant affordable housing development.

As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. This includes alternative housing models that have the benefit of being more affordable and can meet a wider range of community needs, incomes, and lifestyles, including single room occupancy (SRO) programs; efficiency units (where the kitchen/dining area is segmented off from a combination sleeping/living area); micro units (units usually less than ~250 square feet); and co-housing (private homes clustered around shared space). The City is encouraging these models: recent examples include Oakland's 2018 Residential Hotels Ordinance, the "Nook" microunit project built in 2016, and completion of co-housing project Phoenix Commons in 2016. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability.

Oakland has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, often provide significant opportunities for residential development. Furthermore, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units.

Although housing is largely provided by the private and nonprofit sectors, the City has one major tool to influence development patterns and increase housing development of affordable housing and allow for other housing types: the Planning Code. To ensure that the Planning Code is responsive to housing policies and programs, the City will need specific zoning amendments that meet Oakland's changing needs and remove identified constraints to residential development. The suite of

amendments the City will undertake range from short- to long-term solutions, some of which will be carried out alongside the update of the Housing Element and others as part of the comprehensive update to the City's General Plan that includes the Land Use and Transportation Element and will continue through 2025 after the Housing Element adoption.

The length and cost of the residential permitting process—which are ultimately reflected in a unit's selling price—are also generally within the City's control. An onerous and lengthy review process can be one of the most significant barriers to housing construction because some developers may decide that the cost of project review and its potential delays simply overcomes the revenue of new housing, particularly in the case of projects that are only marginally financially feasible and/or profitable. Recognizing that long permitting processes are a statewide issue, a slate of new legislation, including SB 35, SB 330, AB 2162, and SB 1483, has introduced new requirements that are intended to facilitate the production of affordable housing through a streamlined residential permitting process.

The City of Oakland currently operates both an online permit center and an in-person "one-stop" permit center with counter services staffed by the Departments of Planning and Building, Fire, and Transportation. However, there are opportunities to better steward small nonprofit and BIPOC developers, homeowners looking to add additional units, affordable housing developers, and other community partners through the residential permitting process.

This goal will encourage the production of affordable housing and guide development of a more diverse range of housing choices for households of all types, incomes, and special needs; and promote changes to City tools like its permitting procedures and zoning code to make it easier and faster to build affordable housing.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Though Oakland is one of California's most diverse cities overall, there is significant racial segregation between the city's neighborhoods. As a result of past practices such as mortgage redlining, disinvestment in neighborhoods of color, racially restrictive covenants on housing development, exclusionary zoning, destructive urban renewal, highway development and predatory lending in neighborhoods of color, many of Oakland's BIPOC residents live in neighborhoods that lack access to quality amenities or upward mobility. As higher income people move to Oakland, low-income neighborhoods of color are also more susceptible to gentrification and continue to bear infrastructure burdens from the city's increased housing supply. In contrast, some high-resource areas remain disproportionately white in their racial composition because they are zoned primarily for single-family homes, and the absence of lower cost housing types prevents BIPOC and lower-income families from moving to these neighborhoods. See Appendices B and D for additional detail on these patterns of segregation. The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive.

During the outreach process, many community members expressed a desire to see Oakland be more inclusive and retain and strengthen its diversity with a wider array of housing choices. Community members sought more duplexes, fourplexes, cottage courts, and garden apartments throughout the

city. These smaller, "missing middle" housing types[29] tend to be more affordable by design—compared to single-family homes—and thus provide additional options for first-time homebuyers, single people, and moderate-income households. These housing types can also increase the housing stock in previously built-out neighborhoods, and as such are an important factor for Oakland to meet its moderate-income RHNA target. Accessory dwelling units – also known as ADUs, granny flats, secondary units, in-law units, and backyard cottages – are another important strategy to increase the supply of housing that is more affordable by design. ADUs offer an alternative for people who want to rent but do not want to live in larger apartment complexes. ADUs tend to be located in lower-density and higher resource neighborhoods that often contain few other rental options that are affordable. As described in Appendix C, the majority of ADUs in Oakland are estimated to have rents affordable to lower-income households. The community also expressed a desire to see increased housing typologies and affordable housing throughout the city, including existing working-class neighborhoods that are currently low-resource due to systemic racism and disinvestment. Efforts specifically aimed at increasing affordable housing production are included in Policy 3.3.

On March 16, 2021[30], the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes—prior to the passage of SB 9.[31] Zoning reform actions under this goal will expand on this direction and help to open up exclusionary neighborhoods. Other housing development reforms—like permit streamlining and ADU promotion—will also help expand housing options in traditionally exclusionary neighborhoods.

Further, certain segments of the population face greater challenges to finding decent, affordable housing due to special characteristics. Such characteristics may include one's employment and income, family characteristics, disability, or other conditions. Thus, some residents face greater housing cost burden, overcrowding, or other housing problems.

State Housing Element law defines "special needs" groups to include persons with disabilities (including developmental disabilities), the elderly, large households, female-headed households, homeless people, and farmworkers. Many households within these special needs groups also fall within the extremely-low-income category. The special needs of individuals within these groups are wide ranging: in addition to affordable and accessible housing opportunities in proximity to transportation and other services, individuals with disabilities or who are experiencing homelessness may need on-site support and services. Meanwhile, female-headed households benefit from on-site childcare, and universal design elements such as zero-step entrances and single floor living are important considerations for senior housing.

Special needs housing is an important component of Oakland's commitment to just and fair treatment of all individuals. It is critical that housing conditions foster an environment where everyone can participate, prosper, and reach their full potential. Actions contained within this goal will expand funding sources for affordable housing, including bonus points for serving special needs populations,

---

[29] Missing Middle Housing is a range of house-scale buildings with multiple units (e.g., duplexes, triplexes, fourplexes, cottage courts, and multiplexes) that are compatible in scale and form with detached single-family homes and are located in a walkable neighborhood. More information is available at missingmiddlehousing.com.

[30] March 16, 2021, City Council Resolution to study and consider criteria for allowing four-plexes in areas designated for single family residences: https://oakland.legistar.com/LegislationDetail.aspx?ID=4815334&GUID=C981D0A8-C841-43F1-A33F-12CA0DA76B07&Options=&Search=

[31] SB 9, in effect as of January 1, 2022, permits increased density on single-family lots through duplexes and lot splits.

will together allow for the expansion of affordable opportunities for special needs populations in high-opportunity neighborhoods. Actions related to expanding affordable housing options that are accessible to extremely-low-income households are also contained under Policy 3.1.

POLICY 3.1 FACILITATE PRODUCTION OF DEEPLY AFFORDABLE HOUSING[32]

Action 3.1.1. Develop a project-based rental or operating subsidy program for extremely-low-income residents.

Create a capitalized operating subsidy program for extremely-low-income households. This will enable the creation of extremely-low-income housing, which is only possible with the provision of public operating subsidies to ensure financial stability for the property and appropriate support services for the residents.

Responsible Agency: *Oakland Department of Housing and Community Development*

Timeline: *Program will be launched by December 2023*

Potential Funding Source: *State of California Permanent Local Housing Allocation (PLHA), Homeless Housing Assistance & Prevention (HHAP), and any and all other resources that become available for this use.*

Objective: *This program will fund project-based rental or operating subsidy for at least 16 units of extremely-low-income housing per year, for a total of at least 56 extremely-low-income units by 2031.*

Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.

The Oakland Housing Authority will continue targeting vouchers to support the development of extremely-low-income Housing through the award of project-based vouchers and/or other Oakland Housing Authority funds.

Responsible Agency: *Oakland Housing Authority*

Timeline: *Ongoing, 2023-2031*

Potential Funding Source: *Federal Section 8 vouchers, VASH vouchers, and/or other Oakland Housing Authority funds.*

Objective: *As vouchers or funds are available, at least 20 percent of units in assisted developments will be deed restricted as extremely-low-income.*

POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS

Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes

[32] Deeply Affordable housing for persons at 30 percent area median income or below.

(triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures.

The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) Zones and additional multi-unit housing types in Mixed Housing Type Residential (RM) Zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential lots to 2,000 square feet to remove constraints on lot splitting. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility, neighborhood scale and potential opportunities for homeownership (split lots and condominiums) in parallel with Policy 3.4 and Policy 5.1. See Appendix J for a summary of missing middle zoning amendments.

Under Action 3.4.1, the City will revise development standards, including allowable building heights, densities, open space and setbacks requirements.

Under Action 3.4.8, the City will develop objective design standards at the neighborhood level to ensure that multi-unit neighborhood scale housing types designed in a manner that is compatible with the scale of existing residential housing forms in these zoning districts is permitted ministerially.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *June – July 2023*

Objective: *Significantly increase production of multi-unit housing types (including duplexes, triplexes and fourplexes, along with other multi-unit housing types) in current single-family-dominated neighborhoods to match housing need.*

Action 3.2.2: Promote and protect live/work housing and housing for artists.

The City will update development standards, building codes, and land use regulations to promote artist housing, including joint living and working quarters (JLWQs) in areas where appropriate under the General Plan. The City will encourage employers, trade groups, and arts and cultural districts to provide housing opportunities that are affordable to artists and similar professionals. The City will continue to allow the conversion of existing commercial nonresidential buildings to JLWQs in specific commercial/industrial locations while considering the impacts on nearby viable businesses. The City will support bringing existing, unpermitted JLWQ units in commercial and industrial buildings into compliance with Building Codes and the Planning Code in a way that mitigates displacement of existing tenants and preserves affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase production and protection of live/work housing and housing for artists to match housing need.*

Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.

The City will encourage the reuse and rehabilitation of Oakland's historic building stock to provide additional housing units, safeguard neighborhood character, and preserve the energy embodied in the building's original construction. The City will amend land use regulations and development standards in the Planning Code to reduce constraints on adaptive reuse of commercial buildings for residential use, and help make clear how the Historic Building Code and Alternate Materials and Methods Request (AMMRs) can be used to facilitate the adaptive reuse of older commercial buildings. Reuse in environmentally sensitive areas—including in warehouses adjacent to industrial uses—will consider health and safety impacts prior to approval.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase reuse and rehabilitation of historic commercial buildings for residential use to match housing need.*

Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs.

The City will implement its "ADU Loan Program" to provide deferred loans to low-income homeowners who want to legalize an ADU.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Funding for an ADU incentive program would include $3 million already awarded from the State of California's CalHome program for a pilot program, and the City would seek ongoing State funding for ADU development in the future.*

Timeframe: *The City's ADU Loan Program opened in Fall 2022 and will offer loans into 2023. As additional funding becomes available, the City will provide additional funding opportunities. For more information on the City's Accessory Dwelling Unit Loan Program (ADULP), see https://www.oaklandca.gov/adulp.*

Objective: *Using the ADU CalHome grant, the City anticipates supporting at least 25 low-income and/or senior households with the cost of legalizing at least 25 Accessory Dwelling Units. This is based on the 25 loans projected for the existing CalHome grant the City has received to help low-income homeowners build ADUs.*

Action 3.2.5: Reduce constraints to the development of ADUs.

On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs that went beyond the minimum requirements of State law. These additional allowances include higher maximum heights allowing for two-story ADUs, reduced setbacks in some zones, larger maximum sizes for detached ADUs, and an introduced ADU amnesty from Planning Code requirements allowing homeowners with existing un-permitted ADUs to legalize them. Also, this zoning update removed setback requirements and allowed additional envelope expansion of existing structures to create livable-size ADUs on "small lots" where ADUs would not be feasible under previous requirements.

The City's current Planning Code already meets the requirements for recently passed ADU state laws under SB 897 and AB 2221. City Staff will work to implement the new requirements for these laws through the City's administrative approval process.

The City will continue to provide pre-approved ADU plans on its website to facilitate reduced applicant cost and expedited review for ADUs. The City will also provide increased staffing capacity for the "one-stop shop" to distribute information to property owners, contractors, and tenants. The City will budget a new staff position for an ADU Specialist whose assignments would include community outreach and education to teach property owners about ADU construction, financing, and landlord responsibilities. The City will also consider developing a database through which property owners can find and hire local workers to build ADUs. The City will comply with State law (including recently passed SB 897 and AB 2221) and Building Code requirements for ADUs, and also study how the implementation of the Building Code may constrain the legalization of unpermitted ADUs. Oakland's Planning & Building Department will take the lead in implementing these efforts, with support as needed from Oakland's Department of Housing and Community Development.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *January 2023 (Comply with 2022 State ADU law requirements); 2023-2024 (One-Stop Shop); by 2025 (Budget a new ADU Specialist position)*

Objective: *Significantly increase production of ADUs to match housing need.*

Action 3.2.6: Monitor Affordability of Permitted ADUs.

Based on a recent online survey conducted by the City as well as data provided by the Association of Bay Area Governments, the Appendix C Sites Inventory estimates that ADUs produced from 2023 to 2031 will have the following projected affordability levels: 35 percent affordable to very-low-income households, 35 percent affordable to low-income households, and 30 percent affordable to moderate-income households. Based on a total projected ADU production of 1,978 units through 2031, the City has estimated that ADU construction will result in the creation of 692 very-low-income units, 692 low-income units, and 593 moderate-income units.

To ensure that Oakland's ADU production aligns with these projections, the City will send a survey to the property owners of ADUs that received a certificate of occupancy within the prior two-year

period requesting information on household size and rents charged for these recently constructed ADUs. If the survey identifies a shortfall in the numerical affordability production projections, within six months of the survey report being published the City will provide to the Planning Commission a report summarizing the survey report and identifying additional actions that can be taken to either increase the production of affordable ADUs, and/or proposing other rezoning programs that will enable additional affordable housing production to fill any identified affordable housing production shortfall.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *First survey to be conducted first quarter of 2024. Results to be presented to Planning Commission by end of 2024. Any necessary reforms to ADU regulations and/or rezoning programs to be adopted in 2025. Second survey to be conducted in first quarter 2026.*

Objective: *To match affordability projection included in Table C-8 of Appendix C, produce on average 86.5 very-low-income ADUs, 86.5 low-income ADUs, and 74 moderate-income ADUs per year.*

Action 3.2.7: Proactive Short-Term Rental Enforcement.

With limited exceptions in single-family homes with a CUP for a traditional owner-run bed and breakfast, Oakland's current planning regulations prohibit any rental of an accessory dwelling unit (ADU), single-family home, duplex, apartment/condo, live/work unit, or other dwelling unit for less than 30 consecutive days. In addition, State laws that govern ADUs do not allow for any ADU to be rented as a short-term rental of less than 30 consecutive days. The City's code compliance division reviews zoning code violations on a complaint-driven basis, which has not sufficiently deterred property owners from operating short-term rentals that do not comply with planning regulations. Additionally, code compliance often lacks sufficient evidence to clearly document that an ADU or other dwelling unit is operating as a short-term rental.

In response, the City will pursue additional data collection tools that will allow the City to access information showing addresses of units listed on short-term rental platforms. Upon securing this data, the City will engage in proactive enforcement against property owners who are operating short term rentals in ADUs and in other dwelling units throughout the City.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Violation Fees, permit fees, transient occupancy tax collection*

Timeframe: *Secure additional data collection tools and begin proactive enforcement in 2023. Complaint-based enforcement is ongoing and would continue, supplemented by the additional data collection tools.*

Objective: *Reduce the number of unauthorized short-term rentals in Oakland by having bi-yearly data scrapes of short-term rental platforms and automatic mailing notifications to owners in violation.*

POLICY 3.3 EXPAND RESOURCES FOR THE CONSTRUCTION OF AFFORDABLE HOMES

Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.

Consistent with the California Surplus Lands Act (SLA) and the Oakland Municipal Code, the City will continue to release land designated as surplus for development of affordable housing and other uses. The City will continue to release one to two surplus sites per year for permanent affordable housing development projects, noticing them via a Notice of Availability (NOA) to local Bay Area affordable housing developers, as well as to all California Housing Finance Agency (CalHFA) housing sponsors, consistent with the SLA. All surplus sites are tracked on the City's website and NOAs are available on the website as well. All surplus sites disposed of pursuant to the SLA will include a minimum of 25 percent affordable units and in many cases will include up to 100 percent affordable units. If the SLA process does not conclude in an affordable housing development for a particular site, the City will issue Request for Proposals (RFP) for its designated surplus properties. If the RFP process results in an agreement with an entity that develops 10 or more residential units on the property, the City will require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233 of the SLA. The City will consider depositing up to 100 percent of net proceeds from such sales or leases to the Affordable Housing Trust Fund. The Planning Bureau provides priority processing for affordable projects that are located on surplus sites. The City will also continue to seek to utilize surplus sites – as well as other City-owned or City-leased properties – for emergency housing programs (e.g., safe RV parking and community cabins) and other community-serving uses prior to disposition under the SLA.

> **Responsible Agency:** *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development, Oakland Planning and Building Department*
>
> **Potential Funding Source:** *City subsidy*
>
> **Timeline:** *The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete EIR for rezoning by July 2023.*
>
> **Objective:** *Issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. Notices will be posted on the City's website and distributed directly to developers, including nonprofit housing providers.*

Action 3.3.2: Expansion of Section 8 vouchers.

The City will continue to participate in the HUD-operated Section 8 Housing Choice Vouchers program, and the City will continue to coordinate with the Oakland Housing Authority to advocate for additional funding from the federal government for more Section 8 rental assistance for very-low-income renters by documenting the need for additional housing vouchers and contacting decision-makers at HUD as appropriate. The City will also advocate for additional funding at the federal level as opportunities such as the American Recovery Act become available. Further, the City will work with nonprofit and community-based partners to educate property owners throughout the city about housing choice vouchers to encourage greater participation and to increase locational choices for

voucher holders (see Action 5.2.8). In 2022, Oakland secured 515 emergency housing vouchers as part of its advocacy to expand the number of housing vouchers for Oakland residents.

Responsible Agency: *Oakland Mayor's Office, Oakland Housing Authority, Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD Section 8 vouchers*

Timeline: *Ongoing, 2023-2031. As part of its landlord education efforts, the Oakland Department of Housing and Community Development will promote voucher acceptance. The Oakland Department of Housing and Community Development hosts multiple landlord education workshops each year that can serve as an opportunity for this promotion. The Mayor's Office will lead federal advocacy during budget discussions with the federal government on an annual basis.*

Objective: *The City of Oakland Housing Authority will increase the number of vouchers being used in proportion with any future federal expansion of Section 8 or similar programs.*

Action 3.3.3: City of Oakland Emergency Rental Assistance Program.

As funding allows, the City will build on the success of the Keep Oakland Housed program (a public-private partnership) and the Federal Emergency Rental Assistance Program (ERAP) to offer homeless prevention services to those most at risk of experiencing housing instability or homelessness including rental assistance grants to distressed tenants, free legal consultation, eviction defense, case management, and employment and financial counseling and other services to increase housing stability and prevention of homelessness. The City will work with community partners to provide these direct services and to advance racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness.

Responsible Party: *Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: *The City of Oakland allocated over $42 million of Federal and State ERAP funding for emergency rental assistance between 2020-2022 and, if resources are available, will allocate additional ERAP funds to an existing waitlist in 2023. Of the approximately 3,500 Oakland households served by the ERAP program, over 85 percent earned less than 30 percent AMI. The City of Oakland will also issue a Request for Proposals and award a contract of approximately $2.3 million to a collaborative of homelessness prevention program providers by mid-2023.*

Objective: *The City of Oakland will continue to implement a homelessness prevention program that includes emergency financial assistance, legal support and wrap around services. The program will be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program with a focus on advancing racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness*

Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.

The City will continue to work with development partners including Community Land Trusts, co-ops and emerging developers for possible partnerships involving City land as mentioned in Action 3.5.1 and other community partners on publicly owned sites that may be designated as surplus property. To support Action 3.3.1, the City will assist nonprofit and local developer partners to access public funding and financing to construct and increase the supply of permanently affordable rental units that are designated for extremely-low-income households. In addition, the City will ensure that permanently affordable housing for extremely-low-income households is prioritized where services and needs are accessible by transit or walking. The City will prioritize affordable housing developments that dedicate at least 20 percent of units for extremely-low-income (ELI) or homeless households in accordance with current policies. The Planning Bureau provides priority processing for affordable projects located on surplus sites. The City will review City-owned sites to identify, and, where appropriate, address land use conflicts that would prevent affordable housing development.

Responsible Agency: *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development; Oakland Human Services Department*

Potential Funding Source: *City subsidy*

Timeline:. *The City will continue to release future NOFAs contingent upon funding and staff availability. The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete rezoning by July 2023.*

Objective: *The City will continue to release future NOFAs contingent upon funding and staff availability. City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. NOFAs, Notices of Availability and/or Requests for Proposals will be posted on the City's website and distributed directly to developers, including nonprofit housing providers and community partners.*

Action 3.3.5: Implement an affordable housing overlay.

The City will create an Affordable Housing Overlay (AHO) to streamline the approval of affordable housing by right. Proposed features of this overlay include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will broadly apply this overlay, except for limitations on designated historic resources as well as areas in the Very High Fire Hazard Severity Zone (VHFHSZ). The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as the potential for select areas within the VHFHSZ for the overlay to apply. The City will allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay. See Appendix J for a summary of the AHO.

100 percent affordable projects within the AHO zone would be subject to a ministerial approval process. A proposed project would be exempt from CEQA and not appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and

meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Objective: *Enable development of additional affordable housing throughout the City, including in higher resource areas.*

Action 3.3.6: Access to low-cost financing for development.

The City currently awards local funding that affordable housing developers leverage to obtain financing for their projects. As funding allows, the City will continue to award funds to affordable housing developers on favorable terms—including simple low interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City will also continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate all budgeted local funding sources (approximately $12 million annually starting in 2023) to support the construction, acquisition, and/or preservation of deed restricted affordable housing units each year. With $12 million in local funding forecasted in 2023, at least 80 units could be created or preserved; of these, at least 16 would be set-aside for extremely low-income residents; the creation of extremely low-income units will be constrained by the availability of operating subsidy (see Action 3.1.1). This will result in a total of at least 640 low-income units over the Housing Element period, including 128 extremely-low-income units, which would increase if more local funds are identified or secured such as a new local bond measure dedicated to funding affordable housing.*

Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

The City currently relies on development impact fees to provide local funding for affordable housing. A study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary affordable housing requirements. The study will consider the number of units likely to be produced through impact fees versus inclusionary affordable housing requirements and their likely affordability levels; and whether targeted inclusionary housing requirements may increase the provision of affordable housing units in higher-resource neighborhoods.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *By mid-2024, complete a study on targeted inclusionary housing requirements and present to Council.*

Objective: *Ensure implementation of affordable housing impact fees and/or inclusionary housing requirements maximizes production of affordable housing in all areas of the city.*

Action 3.3.8: Right-sized development fees on market-rate developments.

The City levies a number of development impact fees, including for affordable housing, to ensure that new market-rate development pays its fair share toward funding affordable housing, transportation improvements, and capital facilities. The City will regularly monitor its impact fees and ensure that appropriate amounts are set on an annual basis. Pursuant to the Mitigation Fee Act, the City will conduct a comprehensive analysis and make findings every five years for each impact fee along with review of whether to increase fees and if the option of building affordable housing units on-site percentage is set appropriately.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Public Works Department; Department of Transportation (DOT)*

Potential Funding Source: *General Plan Surcharge, permit fees, and Impact Fees*

Timeline: *Ongoing, 2023-2031; initiate next five-year update in 2026*

Objective: *Continue to monitor and adjust impact fees.*

Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Affordable housing developers have pointed to the impact of City fees and the timing of fee payment, including impact fees, building permits, and public art requirements, as constraints to development. The City currently requires for Affordable Housing Impact Fees only one-half of the amount of impact fees to be paid before permit issuance and the remaining half to be paid before the issuance of Certificate Of Occupancy (COO), while the Transportation and Capital Improvement Impact Fees are paid in full before building permit issuance. The City also defers other fees such as public art and school tax. The City will explore additional ways to increase flexibility in payment timing and potential fee reductions and/or waivers to reduce the burden imposed by the collection of City fees and requirements.

Responsible Agency: *Oakland Planning & Building Department; City Administrator's Office; Oakland Department of Finance; City Attorney's Office*

Potential Funding Source: *Permit fees, and General Fund for any reduction of fees*

Timeline: *Review and update where possible Impact Fee and other payment timing as well as fees charged by mid-2024.*

Objective: *Explore methods to reduce cost burden of City fees and payment timing to significantly increase affordable housing development.*

Action 3.3.10: Citywide Enhanced Infrastructure Financing District (EIFD).

On November 1, 2022, the Oakland City Council enacted a resolution expressing the City's interest in establishing one or more Enhanced Infrastructure Financing Districts (EIFD) to fund affordable housing that affirms the City's commitment to furthering fair housing and infrastructure improvements. The resolution directed the City Administrator to study proposals for the creation and implementation of an EIFD exclusively for East Oakland, exclusively for West Oakland, and a combined East and West Oakland EIFD. Upon completion of this study, the City Administrator is to return to Council with reports and recommendations. The City will consider implementing the EIFD to increase available local funding for affordable housing.

An EIFD is a special taxing district that directs a portion of future property tax growth towards infrastructure expenses, including affordable housing. The Draft Downtown Oakland Specific Plan is also recommending the creation of an EIFD in the downtown area to support the construction of onsite and offsite affordable housing as part of future development in the downtown.

Responsible Agency: *City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *An EIFD would be a cost-recovering program for any implementation costs.*

Timeline: *By end of 2024, complete studying the implementation of one or more EIFDs and determine proposed EIFD boundaries.*

Objective: *Implement one or more EIFDs to significantly increase affordable housing development and fund infrastructure improvements to match need, if feasible and financially appropriate.*

Action 3.3.11: Support innovations by design.

The City will support and encourage innovations in construction technology to build more housing in less time, more affordably, and with fewer resources by supporting non-traditional construction methods (such as modular and other offsite construction methods). The City will meet with stakeholders periodically to discuss emerging innovations and gather more information to understand and accommodate barriers.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Significantly increase production of housing using construction innovations to match housing need.*

Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.

The ACAH Program provides loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing. The ACAH Program, formerly known as the Site Acquisition Program, was formalized through the passing and issuance of local Measure KK bond funds but continues under other funding sources even as Measure KK funds have all been allocated. With the passage of Bond Measure U, it is expected that funds from this new

funding source will continue to support the acquisition and conversion to affordable housing of existing units. The City will continue to issue NOFAs as funding is available and work with borrowers—including local community land trusts—to create new affordable housing units and preserve existing ones. The City will also continue to explore additional funding sources to sustain the ACAH program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *The ACAH Program has issued 3 Notices of Funding Availability (NOFA) since the program's inception: in 2017, 2019, and 2020, issuing approximately $45 million to affordable housing developers through the 3 NOFAs. The Oakland Department of Housing and Community Development will continue to release future NOFAs contingent upon funding and staff availability. The next ACAH NOFA release is anticipated in December 2022, and pending City Council approval, staff expect to begin reviewing the next round of ACAH NOFA applications in 2023.*

Objective: *Provide loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing throughout the City of Oakland. Currently the City's policy is to allocate approximately 25 percent of available local funding towards continuing the ACAH program, and future funds will be allocated contingent upon availability.*

Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.

The City will continue to allocate funding to support predevelopment funding for affordable housing projects using its existing local sources, to help relieve the costs associated with the entitlement process especially for emerging and BIPOC affordable developers. The City will also identify and secure low-cost debt products for affordable housing development. To this end, the City has applied to HUD for Section 108 authority to leverage its CDBG allocation to provide low interest debt for affordable housing. Because Section 108 are hard loans that require repayment, the repayments could be revolved to support ongoing pipeline. The City will use a data-informed approach to target its resources towards both high-opportunity and historically marginalized/redlined areas. The city will also target resources to support the growth of emerging and BIPOC affordable developers.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME and Section 108 funds, and other local, State, and federal funds as available*

Timeline: *The City applied to HUD for Section 108 authority in 2022 and will seek to use these funds starting in 2023, pending HUD approval.*

Objective: *As suitable funding and projects become available, predevelopment funding and low-cost debt products will be made available for affordable housing development.*

Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing.

Affordable housing developers indicated during outreach that competing with market-rate developers for sites posed a barrier on their ability to acquire sites for development. The City typically provides gap financing commitments during predevelopment, with funds provided at construction finance closing; acquisition is an eligible cost for reimbursement by the City's funding. While directly funding acquisition presents an earlier, riskier, and less efficient investment of the City's limited funds, in recognition of this critical need the City will consider the implementation of a leveraged acquisition fund to allow for faster and more efficient acquisition transactions. The City will also study the creation of debt and/or equity funds to support small site housing projects. If feasible and funding is available, this new fund may be similar in nature to the City and County of San Francisco's Small Sites Program, which relies on non-governmental funding for acquisition and rehabilitation, that is later taken out by City funds. The City will also assess the feasibility of raising the Council authorization threshold for site acquisition to enable the faster purchase of sites.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available to leverage philanthropic and other outside resources.*

Timeline: *Conversations with Community Development Financial Institutions (CDFIs) and other funders have been ongoing since 2021, but any fund will require a significant stream of new City subsidy to support takeout of acquisition loans. The City will further explore this item in 2023, pending the passage of Measure U.*

Objective: *By the end of the Housing Element Cycle, the City will be able to report on the practicality of a leveraged acquisition fund, as well as the* feasibility and appropriateness of a small sites fund.

Action 3.3.15: Continue and expand density bonus incentives.

The City will continue to implement Chapter 17.107, Density Bonus and Incentive Procedure, which was updated and adopted by the City Council on April 19, 2022. The Density Bonus Ordinance offers developers density bonuses in exchange for the provision of affordable housing and provides:

- Greater certainty to project applicants about the City's implementation of the State Density Bonus Law, density bonuses, and incentives for affordable housing;
- Clarifying and accessible language that aligns the ordinance with the City's existing density bonus application intake and regulatory agreement requirements, including clear timelines and a list of all required information;
- Offers an opportunity to streamline the production of affordable housing; and
- Ensures affordability of both rental and homeownership units and prevents potential displacement of existing tenants.

To ensure that the Chapter 17.107 remains compliant with state law, and to solicit additional ideas for incentives and expansion of the density bonus program, the City will review the density bonus program mid-cycle, bring necessary amendments to conform to state law, and solicit feedback from Planning Commission and City Council on additional incentives that could be included in the local density bonus program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *In 2025, bring forward informational report to Planning Commission and City Council on effectiveness of City's density bonus program and in 2026 return with proposed amendments to ensure conformity with state law and incorporated any recommended policy changes.*

Objective: *Significantly expand the City's density bonus program and increase production of density bonus projects to match housing need.*

Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund.

The real estate transfer tax, also called a Real Property Transfer Tax (RPTT), is due when a home is sold or gifted. The City will study the impact that the RPTT has on the affordable housing subsidy and the effect on the General Purpose Fund. In the study, the City will explore revisions to the RPTT including:

- Expanding the current progressive tax;
- The impact of reducing or waiving the tax for affordable housing; and/or
- Using a portion of the revised tax rate as a dedicated funding stream for affordable housing. This could provide annual revenues at levels significantly higher than current Impact Fee revenue.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Fund Surcharge for any applicable studies*

Timeline: *Conduct the analysis and provide a recommendation to the City Council and City Administration by Fiscal Year 2023-2024*

Objective: *Complete an analysis by Fiscal Year 2023-2024.*

Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.

The City will continue to work with low-income, grassroots, and BIPOC affordable housing developers to identify barriers that prevent BIPOC and small nonprofit developers from accessing City funding and navigating the permitting process. The city will continue to develop solutions to ensure that the permitting process is transparent, affordable, and accessible for these Emerging Developers, defined by Oakland HCD as "a developer who has less than five (5) years of experience as a developer and/or less than five completed projects." The City has secured a Breakthrough Grant from the Partnership for the Bay's Future that will dedicate a full time fellow to facilitate this work of identifying and breaking down barriers for BIPOC and emerging developers to develop affordable housing in Oakland.

Responsible Agency: *City Administration; Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *San Francisco Foundation, General Plan Surcharge, and permit fees*

Timeline: *The City's Breakthrough Grant Fellow is currently researching and implementing strategies to address this action item from 2022 to 2024.*

Objective: *The proportion of City funding distributed for affordable housing development to low-income, grassroots and BIPOC affordable housing developers will significantly increase by 2031.*

Action 3.3.18: Implement affordable housing investments contained in Measure U

Measure KK, a bond measure passed in 2016, has provided a significant source of funding for anti-displacement and affordable housing preservation projects. The City has allocated nearly all remaining Measure KK bond funds for resident-led and community land trust-supported preservation projects and homeless acquisition projects.

The City successfully sought voter approval in November 2022 to authorize issuance of $850 million in General Obligation Bonds to fund and prioritize affordable housing preservation projects among other purposes. This Affordable Housing and Infrastructure Bond Measure (Measure U) will allocate $350 million towards affordable housing preservation projects.

Responsible Party: *Oakland Department of Housing and Community Development;*

Potential Funding Source: *Measure U Bond Funds*

Timeframe: *As described in Action 3.3.12 and other actions related to the expenditure of affordable housing bond funds, expend the proceeds of Measure U*

Objectives: *Measure U requested authorization for $850 million in General Obligation Bonds with $350 million set-aside for affordable housing. For reference, for the 2016 Infrastructure Bond (Measure KK) where $600 million of General Obligation Bonds were authorized, $100 million was set-aside specifically for affordable housing and anti-displacement projects and supported the new construction of over 700 units, the preservation of 420 units, and the acquisition and conversion of over 400 units. This leverage of subsidy achieved under Measure KK may not be replicable as KK was layered onto projects that also secured County A1 bond funds, which are now also fully allocated. New construction projects that set-aside more than the program minimum (currently 20 percent) of units for extremely-low-income residents will be prioritized, per the City's process for awarding funds to affordable housing developers, through their New Construction Notice of Funding Availability (NOFA). The City will also be able to make substantial funding allocations to the Acquisition and Conversion to Affordable Housing (ACAH) and Preservation NOFAs to acquire and convert additional market rate units to affordable housing, and also preserve the City's existing affordable housing portfolio, extending affordability restrictions, and investing in the rehabilitation of older properties where needed.*

Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program

As part of a mid-cycle evaluation, the City will establish a system to coordinate tracking units with Development Services staff who process permitting, to ensure that as projects are developed, there is adequate capacity available citywide to meet the City's RHNA targets and no net loss requirements. The City will also assess the effectiveness of its AFFH programs (including Action 3.3.6), including sites that develop in higher resource areas.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Mid-cycle (2027)*

Objective: *Identify and monitor adequate sites available for development, and increase the baseline of affordable units in high-resource areas.*

POLICY 3.4. REFORM ZONING AND LAND USE TO ADDRESS COMMUNITY PRIORITIES

Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements.

The City will allow additional building heights and densities in certain corridors and districts. These changes include**:**

- **Zoning for diverse housing types:** As discussed in Action 3.2.1, the City will develop revised zoning standards for a diversity of housing types in lower density neighborhoods, including but not limited to duplexes, triplexes, and fourplexes in zoning districts such as the RD Detached Unit Residential, RM Mixed Housing Type Residential, and RU-1 and RU-2 Urban Residential Zones. Zoning changes will include revised standards for building heights, densities, open space, lot coverage, and setbacks. The City will also reduce minimum lot sizes to facilitate the subdivision of existing lots. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility and potential opportunities for home ownership (split lots and condominiums).
- Elimination of Conditional Use Permits for Density: Under Action 3.4.3, the City will also eliminate all conditionally permitted densities throughout Planning Code to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs.
- Objective Design Standards: Under Action 3.4.8, the City will also develop objective design standards at the neighborhood level to ensure that such missing-middle housing is designed in a manner that is compatible with existing residential housing forms in these zoning districts.
- **Increased Heights and Densities along Corridors:** The current building height map and permitted densities along key corridors such as International, Foothill, College, Claremont, and MacArthur Boulevards does not always allow residential projects to meet their full potential. Consistent with the housing sites map, the City will undertake zoning map revisions to allow increased heights and densities. The City will also increase heights and densities on interior residential streets within close walking distance of key corridors.
- **Increased Heights and Densities in Transit-proximate areas**: Alongside efforts to increase missing-middle housing (see Action 3.2.1), the City will increase allowed height and density in areas in close proximity to high-capacity transit, including areas near Rockridge BART and International Boulevard BRT Stations.
- **Increased Heights and Densities in Resource-rich areas:** Oakland's high resource neighborhoods are typically lower-density and have historically been exclusive – both economically and racially. Allowing higher density multi-unit buildings in these areas that are rich in services will help increase the competitiveness of affordable housing projects for State

funding, as well as the feasibility of developing significant numbers of housing units within these neighborhoods. Zoning changes will include permitting residential densities above 30 dwelling units per acre by right in designated areas for affordable housing projects and height increases along College and Claremont Avenue. This will help further fair housing objectives by increasing the availability of affordable housing, in high resource areas.

- **Utilizing Senate Bill 10 Provisions:** Under Senate Bill 10 (Weiner) provisions, the City will identify parcels located in transit-rich areas and/or in Racially Concentrated Areas of Affluence (RCAAs) to allow up to ten units of residential density and increased heights, and provide additional opportunity for infill housing within high-resource areas.
- See Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need. Create additional opportunities for development along transit-rich areas and in urban infill sites to significantly increase production of housing to match housing need and to affirmatively further fair housing.*

Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update.

The City is updating the 2023-2031 Housing Element as part of a comprehensive update to the General Plan. The General Plan Update (GPU) is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, as well as preparation of a Racial Equity Impact Analysis, Zoning Code and Map update, and creation of a new Environmental Justice (EJ) Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by the end of 2025.

As part of the LUTE update, the City will study the impact of historic and contemporary zoning restrictions, especially single-family zoning, on ongoing patterns of racial segregation. Existing data on historic zoning patterns highlights the racial disparities in homeownership and rental patterns. The City will utilize this study to direct zoning changes in the LUTE as part of Phase 2 of the GPU.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Study complete by mid-2025*

Objective: *Through this study, inform zoning and land use designation changes to promote inclusive, equitable and diverse housing patterns.*

Action 3.4.3: Revise Conditional Use Permit (CUP) requirements.

Conditional Use Permits (CUPs) are currently required for multi-unit buildings in the RD-2 and RM Zones, which can act as a constraint on development – especially for affordable housing. The City will revise regulations to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs. Under Action 3.4.8, the City will create objective design standards and amend the Planning Code design review procedures to allow for streamlined, ministerial approval. The City will also actively promote and support use of SB 35 to streamline 100 percent affordable housing developments. These revised standards will be implemented alongside changes to Oakland's RD, RM, and RU zones as described in Action 3.2.1.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.4: Revise citywide parking standards.

Parking requirements are a major cost driver in residential development, and often conflict with sustainable development goals that seek to reduce dependence on automobile use. As such, the City recently eliminated residential parking minimums in the downtown area. Continued revisions of Oakland's parking standards, such as elimination of parking minimums within ½ mile of major transit stop and reduction of minimum parking standards in other areas as well as lower parking maximums in downtown and new parking maximums near BART stations will be undertaken through a comprehensive review of existing residential parking standards and the identification of appropriate new standards to match long-term development and environmental goals. Additionally, for mixed-use development projects (commercial on ground floor and residential uses above), the City will revise parking requirements so that additional residential development on these sites is not constrained by any lack of conformance with commercial parking regulations. (See Appendix J for a summary of Zoning changes as well as strategies regarding parking included in Oakland Equitable Climate Action Plan: Transportation and Land Use Action 1.)

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

July 2023

Revise citywide parking standards for all housing types and zones, including but not limited to housing inventory sites, downtown and corridors.

Implement January 1, 2023 the elimination of minimum parking requirements for residential developments within ½ mile of major transit stop to conform with state law and update Planning code by July 2023.

Objective: *Reduce constraints to development to significantly increase production of housing to match housing.*

Action 3.4.5: Revise open space requirements.

Both affordable and market-rate developers have pointed to the relatively high open space standards in Oakland as a constraint to development, especially for higher-density projects. In this context, "open space standard" refers to the city requirement for new housing to feature courtyards, patios, balconies, and other open areas in the development. As noted in Appendix F, Housing Constraints, Oakland's open space requirements vary substantially across zoning districts, but in some cases are more than double the open space requirements seen in comparator jurisdictions. To meet these requirements, each one square foot of private usable open space is considered equivalent to two square feet of required group usable open space and may be so substituted.

To reduce this development constraint, the City will review the open space requirements in zoning designations where minimum usable open space requirements currently exceed 60 square feet of private open space/120 square feet of common open space per unit and revise common and private open space standards for multi-family developments to increase the feasibility of residential projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Revise common and private open space standards for residential developments, and allow flexibility on its onsite location and configuration

Objective: *Significantly reduce existing open space requirements to remove constraints on development and increase production of housing to match housing need.*

Action 3.4.6: Correct zoning district boundaries that cut through parcels.

Oakland's Zoning Map includes many zoning district boundaries that cut through individual parcels – meaning that the same parcel is subject to multiple development standards, which can act as a development constraint. In updating the Zoning Map, the City will correct instances of this occurrence and ensure that zoning district boundaries that affect allowed height and density follow parcel boundaries to the maximum extent feasible to remove inconsistencies and ambiguities.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.7: Capture the diversity of existing built fabric in zoning.

Oakland has a diverse historic urban fabric, some of which no longer conforms to the current Planning Code. To capture and continue this diversity and remove ambiguities, the City will reduce minimum lot sizes and setbacks to facilitate the creation of small-lot developments, as well as legitimize the many existing small-lot neighborhood patterns in West Oakland and other neighborhoods. The City will conduct a comprehensive review of the Planning Code to identify where current development standards have created non-conformities for older built facilities and amend development standards to reduce or eliminate them where appropriate. The City will also provide flexibility in the objective standards to retain and promote the City's vernacular built environment.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Reduce constraints on development to significantly increase production of housing to match housing need.*

Action 3.4.8: Implement objective design standards.

The City currently requires design review for nearly all residential development, which can significantly lengthen the time required for project approval. To reduce the permitting timeline, the City has initiated a process to develop objective design standards to streamline the approval of residential, mixed-use, and commercial building types, with a particular focus on much-needed

affordable housing projects in transit-rich areas. As opposed to "design guidelines," objective design standards will not be subject to interpretation, and will result in faster, more predictable approvals of high-quality development that respects Oakland's history and benefits the local community. Housing development projects will have the ability to utilize the objective design standards that will not require evaluation under the regular design review criteria provided under Planning Code Section 17.136.050, including the existing criteria that the project will "enhance desirable neighborhood characteristics." Project applicants may also choose to instead utilize the regular design review criteria and process in order to have greater flexibility and creativity in design criteria.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, and SB2 Grant for Objective Design Standards*

Timeline: *The City will adopt objective design standards that will be available to all housing development projects by 2024*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.

In January 2022, the City updated its ADU regulations to comply with changes in State law. To address unpermitted units, the new ADU regulations go beyond minimum compliance with State law and establish an expansive legalization process for unpermitted ADUs addressing not only any existing non-compliance issues with the Building Code but the Planning Code as well. The City has also initiated a program to allow pre-approved construction documents for ADUs that creates a more streamlined approval pathway for many homeowners The City will continue to implement this legalization and streamlining of ADU permitting processes. The City will study options to alleviate the burden of the building code on the legalization of unpermitted ADUs.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and Ongoing*

Objective: *Reduce constraints to development to significantly increase production of ADUs to help address housing need.*

Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right

Pursuant to State law, the City is required to permit vacant sites included in two consecutive prior RHNA cycles and non-vacant sites included in at least one prior RHNA to develop with owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. This means that the City cannot require any form of discretionary review or approval for such projects.

The City will create a Housing Sites Overlay Zone to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to build 20 percent or more of the units are affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle)if redeveloped will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay. This action is intended to facilitate housing opportunities in Oakland and to bring attention to those sites that the City intends for housing to be built pursuant to State requirements.

This means that the City cannot require any form of discretionary review or approval for such projects. A proposed project would also not be subject to CEQA and would not be appealable. This would provide greater certainty to projects building at least 20% affordable units that if the project is within the Housing Sites Overlay Zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process. See Appendix J for a summary of the Housing Sites Overlay Zone.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing.

Several school districts and community college districts in California have successfully built affordable housing for educators and/or students on their property. In some cases, this housing was built on district offices and other non-instructional sites. In other cases, housing was carefully co-located with an active school campus. The State has also recently invested hundreds of millions towards student housing on community college property. The City will review OUSD- and Peralta-owned sites to identify, and when practical correct, land use conflicts that would prevent affordable housing development.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2025 with the adoption of the Land Use and Transportation Element*

Objective: *Reduce constraints to development to allow for at least one educator and/or student housing project during the sixth cycle RHNA period.*

POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS

Action 3.5.1: Support community land trusts and other shared equity models.

The City has worked with a variety of community land trusts, including East Bay Permanent Real Estate Cooperative, Sogorea Te', Oakland Community Land Trust, Bay Area Community Land Trust and the Northern California Land Trust to provide affordable housing (including ownership housing). Most significantly, the City created the Acquisition and Conversion to Affordable Housing (ACAH) Program, which has provided funds through Bond Measure KK to community land trusts to acquire and preserve affordable housing units (see Action 3.3.10). Starting in 2019, the ACAH Program was bifurcated into two subprograms to establish a set-aside for community land trusts and limited equity housing cooperatives after Council passed the 2019-21 Budget, which allocated $12 million to the Preservation of Affordable Housing Fund (PAHF). The City will continue to offer the ACAH Program and support community land trusts and limited equity housing cooperatives using additional funding sources. The City is also working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units and will implement these practices going forward. Financial or technical assistance may become available from the Bay Area Housing Finance Agency (BAHFA) or possible State programs. The City will prioritize lower-income residents and residents at risk of displacement while supporting shared equity models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund Surcharge, infrastructure bond funds, HOME, Measure U Bond Funds, CDBG, and other local, State, and federal funding as available*

Timeline: *Funds will be made available to equity affordability models through the City's annual affordable housing NOFAs on an annual or bi-annual basis (2023-2031). The next ACAH NOFA release is anticipated in December 2022.*

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to shared equity affordability models as per current practice.*

Action 3.5.2: Support housing cooperatives, co-living, and cohousing models.

Formal and informal housing cooperatives, co-living and cohousing models in Oakland have traditionally provided an alternative form of affordable housing, including ownership housing. To further support these initiatives, the City will conduct outreach with community-based organizations and other community partners to identify ways the City can support these models, especially for lower-income residents. The City will prioritize lower-income residents and residents at risk of displacement when supporting these alternative housing models. The City will study how the Planning Code and building occupancy standards affect the viability of these models. The Oakland Department of Housing and Community Development will also continue to support cooperatives and community land trusts through its Acquisition and Conversion to Affordable Housing program.

Responsible Agency: *Oakland Department of Housing and Community Development, Oakland Planning and Building Department*

Potential Funding Source: *Impact fees, General Fund Surcharge, Measure U bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Since 2019, the Acquisition and Conversion to Affordable Housing (ACAH) program has included set-asides for coops and community land trusts, based on input received from community stakeholders. $12 million was allocated through the 2019-2021 budget, and the City will continue to implement a significant set-aside in future ACAH NOFAs, which are expected to be issued at least every other year through the 2023-2031 Housing Element cycle*

depending on staffing capacity and funding availability. The next ACAH NOFA is anticipated to be released in December 2022 (see Action 3.3.10). In 2024-2025 the City will study the Planning Code and building occupancy standards as well.

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to housing cooperatives as per current practice. The City will also include cooperatives, co-living and cohousing models in its study of the Planning Code and building occupancy standards.*

Action 3.5.3: Advocate for statewide legislation on social housing.

The City of Oakland recognizes that the statewide housing crisis requires statewide solutions. As such, the City will advocate for social housing legislation under consideration in the State legislature, known as the California Social Housing Act or AB 2053. The Act would establish a California Housing Authority (CHA) to produce and preserve social housing – publicly-owned and mixed-income developments that maintain homes as permanently affordable. In addition, the City will track and advocate for statewide efforts to repeal Article 34 of the State Constitution that directly inhibits the ability of local jurisdictions to meet RHNA goals.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *City legislative advocacy will be funded through the existing general fund-supported contract for State legislative representation services.*

Timeline: *Ongoing, 2023-2031; the City will continue advocacy for social housing and Article 34 repeal legislation until it is adopted.*

Objective: *The State of California will successfully adopt social housing legislation and repeal Article 34.*

Action: 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households.

The City will continue to evaluate the merits of shallow-subsidy acquisition and development models to assist in the construction or preservation of housing for lower-income households, potentially in partnership with other regional agencies including Alameda County and the Bay Area Housing Finance Authority. However, such a program typically involves acquisition of rent-stabilized housing stock, which often enjoy strong protections under Oakland's Rent Adjustment Program. Recent changes to the Rent Adjustment Program Ordinance may provide equal or greater benefit to target households as a shallow subsidy affordable housing program. For this reason, it would make sense to evaluate the impact of these changes before further considering the adoption of a program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *The model could be financed by de minimis appropriations of general fund revenue, with additional ongoing subsidies in the form of property tax abatements.*

Timeline: *By December 2025, the Oakland Department of Housing and Community Development will conduct an analysis of the added benefits a project-based shallow subsidy program may bring, compared to the benefits associated with existing rent stabilization measures.*

Objective: *Use property tax abatements to preserve, improve, or increase the supply of housing available to lower-income households*

Action: 3.5.5: Study Feasibility of Single-Stair Residential Buildings.

Building regulations serve to establish minimum safety standards in construction. Historically, fire and life safety strategies have focused on standards that ensure building occupants are able to safely evacuate a building during an emergency. Modern strategies focus more on containing fires where they occur through sprinkler systems, fire alarms, pressurized stairwells, fire-treated lumber, and similar strategies.

The California Building Code Section 1629 currently requires buildings to provide a minimum of two stairways in buildings exceeding 3 stories or 36 feet, and California Building Code Section 1006.2.1 generally requires two means of egress where the design occupant load exceeds values specified in an accompanying table. In contrast, the City of Seattle allows for building up to six stories to include only one stairway for egress, and many European residential buildings are constructed as tall as ten stories with single-stair access. A single-stair, or vertical shared access, building construction allows for greater flexibility in design, more efficient layouts, and potentially reduced costs. Currently, there are gaps in available data regarding the impact of these building code requirements on increasing construction cost and the safety benefits of requiring a second egress in combination with fire containment strategies.

The City of Oakland cannot unilaterally relax these California Building Code stairway and egress code requirements; change would be required at the state level. Nonetheless, to catalyze discussion on the issue and prepare for implementing future reforms, the City will study current stairway and egress requirements, including consideration of what cost savings could be incurred through revision of the second egress requirement and review of any potential fire safety concerns.

Responsible Agency: *Oakland Planning & Building Department; Oakland Fire Department*

Potential Funding Source: *General Plan Surcharge and permit fees.*

Timeline: *The City will present a report on the topic of existing second egress requirements and the impact of potential reforms to the Oakland Community and Economic Development Committee of City Council by the end of 2024.*

Objective: *Create additional information on single-stair reform that could assist in promoting statewide changes to the California Building Code second egress requirements.*

POLICY 3.6. STREAMLINE THE APPROVAL OF NEW HOUSING

Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.

The City will work with developers and housing stakeholders, particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.8, and/or increasing staffing at the Planning and Building Bureaus to reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.2: Provide increased flexibility in development standards.

The City will provide increased flexibility in development standards, with a focus on smaller infill residential projects, to ensure that these projects can qualify for streamlined permitting without need for variances. The City will also consider increasing staff-level authority, with clear guidelines, to grant minor exceptions without the need for a variance, which can also reduce project timelines and costs. Alongside the efforts described in Actions 3.2.1, this flexibility will increase the capacity of the Planning Bureau to permit a variety of units, more expediently, creating more residential units in traditionally lower-density neighborhoods.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing.

Through the implementation of objective design standards as described in Action 3.4.8, the City will create a ministerial review pathway for qualifying developments based on project size, type, affordability level, and location. Discretionary design review will still be required for some types of projects and where certain adjustments are requested. As part of the entitlement reform process, the City will consider fee subsidies and/or payment deferrals to better accommodate affordable housing projects and increase the financial feasibility of affordable projects (see Action 3.3.9). The City will

work with community partners and affordable housing developers to identify and implement appropriate entitlement reform actions.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.

SB 35 created a streamlined and ministerial approval process for housing projects that meet siting and construction criteria including being located in communities that have failed to meet their RHNA. The City of Oakland was among the 225 jurisdictions that made insufficient progress towards meeting the RHNA for low- and very-low-income housing at the time of the State's most recent determination in 2021 and is therefore subject to the streamlining provisions for proposed development in which 50 percent or more of the units will be affordable. The City provides an SB 35 streamlining checklist to facilitate the development of affordable housing, and will actively promote use of SB 35 streamlining for 100 percent affordable projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.5: Continue one-stop and online permitting services.

Through the Online Permit Center (Accela Citizen Access), property owners are able to apply for and follow the status of their permits online. The City also operates an in-person One-Stop Permit Center, where the counter services of the Planning & Building Department, Oakland Fire Department, and Department of Transportation have been combined in one location to expedite the permitting process. The City will continue to offer both online and in-person permitting services to reduce permitting timelines. The City will also coordinate with affordable housing developers to understand and correct the gaps in these services.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2031*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

POLICY 3.7. EXPAND OPTIONS FOR SPECIAL NEEDS HOUSING

Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.

The City will continue to encourage a wide variety of senior housing opportunities, particularly for lower-income seniors with special needs, through the provision of financial assistance and regulatory incentives as specified in the Planning Code. The City will continue to award points in its consideration of housing funding to projects that serve special needs populations, including seniors and homeless individuals. The City will explore options to expand the amount of financial assistance available to developers of housing for seniors and persons with special needs and will commit to transparent reporting of how special needs units are assisted. Special needs populations may include, but are not limited to, formerly incarcerated individuals, former foster youth, and persons with developmental disabilities.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing 2023-2031; By December 2023, the City will complete an analysis of how the clients served by its funded affordable housing compare to the demographics of Oakland residents, including an analysis of age.*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.2: Provide housing for persons with HIV/AIDS.

The City will continue to provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. The City will enhance outcomes via housing first model under the Alameda County EveryOne Home Plan.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, HOPWA, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.3: Accessible units in new housing developments.

The City of Oakland's Housing Development Services division will uphold and align with State and Federal funding requirements for accessibility standards, which for most new construction projects requires at least double requirements under ADA and State building codes.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to meet the requirements of the Americans with Disabilities Act and the Fair Housing Act, among other local, state, and federal laws to ensure accessible units are included in new housing developments.*

Action 3.7.4: Implement the sponsor-based Housing Assistance Program.

The City will continue to work with the Oakland Housing Authority (OHA) to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service-enriched housing options that increase housing choice for special needs populations. The City will explore options to find more landlords willing to participate in the program.

OHA has its own community and social services arm, the Family and Community Partnerships Department (FCP). FCP educates and assists residents including search assistance and also works closely with owners during the leasing process to remove barriers and identify needed resources. OHA offers an array of Owner Benefits such as vacancy loss, an owner leasing bonus, and repair cost assistance. OHA's operations include two dedicated Owner Services teams and ongoing owner focused activities such as our Owner online Portal, educational webinars and emails, electronic forms options and outreach events such as our Owner Appreciation Day.

Responsible Agency: *Oakland Human Services Department; Oakland Housing Authority*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Between 2023-2031, the City and OHA will promote and encourage OHA landlords to participate in this program through ongoing activities and annual events.*

Objective: *The City will continue to work with the Oakland Housing Authority to support households successfully finding housing.*

Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes.

The City will regularly review household size data from affordable housing application portals and waitlists to ensure that affordable housing production is aligned with community needs. City affordable housing funding priorities will be adjusted as needed to be aligned with demand across the spectrum of unit sizes and housing types. This may include large units suitable for multi-generational families, studios and efficiency units for individuals, and projects with common areas appropriate to seniors, families, or other demographic groups.

Responsible Agency: *Oakland Department of Housing and Community Development; Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *The City will monitor available data from affordable housing application portals to comprehensively evaluate the unit size needs of Oakland residents and adjust NOFA scoring accordingly, to prioritize allocating City funds to projects by 2024. Furthermore, the City will aim to regularly evaluate local household needs prior to NOFA releases. This will be prioritized, but not limited to, the new construction NOFA released approximately every other year to ensure affordable housing production is aligned with community needs.*

Objective: *The City will adjust scoring points as needed to encourage housing typologies that reflect local household needs.*

Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right.

The Oakland Planning Code currently provides for rooming units to be developed at twice the residential density otherwise allowed for regular dwelling units in Neighborhood Center, Community Commercial, Central Business District, Housing and Business Mix, and Transit-Oriented Development Commercial Zones, as well as within the special districts for implementation of the Broadway Valdez, Lake Merritt, and Coliseum Specific Plans. Recent Planning Code amendments similarly allow for efficiency units to be built at twice the density of more typically sized residential dwelling units. The City will expand these provisions to additional zoning districts, including in zones covered by the proposed affordable housing overlay. The City will also revise the Planning Code to permit rooming house facility types more similarly to multifamily residential facilities. These smaller, more modest units are more likely to be a source of naturally occurring affordable housing over the long term, while also allowing new development to align with current demographic trends towards smaller household sizes.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Enable increased production of rooming units and efficiency units.*

Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act.

Farm and agricultural employee housing is a type of employee housing under the Employee Housing Act, California Health and Safety Code Sections 17000 et seq. Section 17021.5 of the Employee Housing Act requires that any employee housing providing accommodations for six or fewer employees shall be deemed a single-family structure with a residential land use designation, and not be subject to any conditional use permit, zoning variance, or other zoning clearance that is not required of a family dwelling of the same type in the same zone. Section 17021.6 of the Employee Housing Act requires employee housing consisting of no more than 36 beds in a group quarters or 12 units designed for use by a single family or household to be deemed an agricultural land use. The City will amend the Oakland Planning Code to modify the definitions of Limited Agricultural Activities, Extensive Agricultural Activities, and One-Family Dwelling Residential Facilities to comply with the Employee Housing Act.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Ensure compliance with the Employee Housing Act.*

Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right.

The Oakland Planning Code currently permits residential care facilities in residential and nonresidential zones if located in single family dwellings. Conditional Use Permits are required for residential care facilities if they are located in any other residential facility type and/or when located on the ground floor of a street fronting building in certain commercial zones. The City will amend the Planning Code to expand where residential care facilities are permitted by right. The amendments will include all residential facility types and those located on the ground floor of a street fronting building. In addition, the City will amend the Planning Code to allow residential care facilities for foster family homes and the elderly within 300 feet of another residential care facility, since the State calls out this exemption in the overconcentration restriction in California Health and Safety Code Section 1520.5.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Enable expansion of residential care facilities by right and allow the exemption of facilities for foster family homes and the elderly in the overconcentration restriction provided in California Health and Safety Code Section 1520.5.*

POLICY 3.8. CONVERT VACANT LAND AND UNITS TO HOUSING

Action 3.8.1: Continue to implement the Vacant Property Tax (VPT).

On November 6, 2018, Oakland voters approved Measure W, the Oakland VPT. The VPT Act establishes an annual tax of $3,000 to $6,000 on vacant property. A property is considered "vacant" if it is "in use less than fifty days in a calendar year," and not subject to any of 10 exemptions. The City

will continue to implement the VPT to encourage active uses on vacant land and regularly monitor the effectiveness of the program. The City will analyze expansion of exemptions to the VPT to reduce the impacts of unintended hardships on nonprofit and affordable housing developers, discussed under Action 3.8.3. As directed by Council, funding from this measure may be spent on homeless services, affordable housing, and illegal dumping cleanup.

Responsible Agency: *Oakland Department of Finance; Department of Human Services; Oakland Planning & Building Department, Oakland Department of Housing and Community Development*

Potential Funding Source: *Self-funding through the vacant property tax*

Timeline: *End of 2023 (Analysis of exemptions will be complete)*

Objective: *Through the vacant parcel tax, seek a 10 percent reduction in vacant parcels by the end of the Housing Element period.*

Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations.

Traditional brick-and-mortar commercial and retail businesses have continued to transition to an Internet-based model, which has been further accelerated by the COVID-19 pandemic. As a result, a significant number of ground-floor commercial and retail spaces in Oakland remain vacant. The City will explore opportunities to promote the conversion of vacant ground floor spaces in certain areas to live/work or other residential use, as may be appropriate in the local context. The City will also explore other opportunities to promote the conversion of vacant office or commercial space to housing, in alignment with the recently passed AB 2011 and SB 6.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2026*

Objective: *Expand the areas where residential space is an allowable ground-floor use.*

Action 3.8.3: Tax vacant residential rental units.

Although housing demand in Oakland remains extremely high, the City experiences a higher vacancy rate than both Alameda County and the Bay Area overall. This results from a variety of factors but may ultimately lead to higher housing costs. Oakland currently has in place vacancy tax on parcels and several types of housing units – including condos, duplexes, and townhome units under separate ownership. The City will consider extending the current vacancy tax to all residential units to encourage active use of residential units and expand the available housing supply.

Responsible Agency: *Oakland Department of Finance*

Potential Funding Source: *General Fund*

Timeline: *Consider by the end of 2026 whether the vacant parcel tax ought to be revised or expanded*

Objective: *Increase the housing stock by ensuring existing units are made available to rent.*

Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.

The City continues to administer the Community Buying Program, which assists Oakland residents in purchasing affordable homes. These properties have been made available through programs like the Oaktown Roots Affordable Homes pilot program and local community land trusts, like the Oakland Community Land Trust and the Bay Area Community Land Trust. These programs will also help promote long-term affordable homeownership, which will also promote the objectives of Policy 5.1.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Department of Finance*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As additional funding is available, continue to convert vacant parcels to affordable housing.*

Action 3.8.5. Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

Partner with the Alameda County Tax Collector to identify tax-defaulted property suitable for development or preservation as affordable housing. Through use of the Chapter 8 tax sale program, make this property available to affordable housing providers, community land trusts, and related organizations, either by encouraging nonprofits to directly acquire through Chapter 8, or by pulling properties from auction to administer through a City program. Oakland Housing & Community Development has secured a full-time fellow through the Breakthrough Grant Program to focus on creating an emerging developer program (Action 3.3.17), and exploring how tax-defaulted properties, among other development and funding opportunities, could be leveraged as an entry point for emerging developers.

Responsible Party: *Oakland Department of Housing and Community Development, Oakland Economic and Workforce Development Department*

Funding: *Contributory value of the land, impact fees, HOME, other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031. Breakthrough Grant fellow completes BIPOC and emerging developer program development in 2023, and will analyze tax-defaulted property program opportunities by end of his term in 2024.*

Objective: *As funding, partners, and suitable parcels become available, tax defaulted properties will become available as affordable housing.*

Goal 4. Address Homelessness and Expand Services for the Unhoused

The City of Oakland is facing an unprecedented humanitarian crisis of residents who are experiencing homelessness. As the United Nations notes in its mandate on the right to adequate housing, the right to adequate housing is more than having a roof over one's head, it is the right to live in safety and dignity in a decent home; HUD Secretary Fudge has declared that "housing is a human right." Goals, policies, and actions in this Housing Action Plan recognize housing as a human right. and that permanent housing is the solution to homelessness. Policies and actions proposed as part of Goal 3 seek to expand affordable housing options. Goal 4 seeks to address homelessness through strategies that enable coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent supportive and deeply affordable housing with resources for long-term support.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Homelessness disproportionately impacts Oakland's BIPOC residents, particularly the city's Black residents. Further, special needs households—including extremely-low-income households—tend to be at greater risk of experiencing homelessness. Addressing homelessness and providing high quality services to the unhoused is also a racial equity issue and must be part of the City's efforts to affirmatively further fair housing. By expanding access to quality homelessness services across Oakland, and seeking to expand transitional housing options in a citywide manner, the City will work to avoid an overconcentration in homelessness and homelessness-related services in disadvantaged neighborhoods. Further, by expanding economic opportunities for the unhoused, Oakland will help those currently unhoused access housing opportunities in a variety of Oakland neighborhoods. This goal, and the policies and actions that implement it, will address fair housing issues as they relate to homelessness in Oakland.

POLICY 4.1 EXPANSION OF HOMELESS SERVICES

Action 4.1.1: Expand, improve, and maintain emergency interim housing.

Since 2018, the City has expanded its supply of emergency interim housing (community cabins, shelter beds, Safe RV parking) by over 1,000 beds/spaces. This increase is almost entirely funded by one-time funds. The City will use local, county, State, and federal funding to maintain these new resources and to improve the effectiveness of these beds in moving people to permanent housing (for example, by adding rapid rehousing exit resources). In addition, the City will continue to expand the interim housing sites and other forms of housing for people experiencing homelessness in the City. The City will ensure that such housing options include supportive services such as rapid rehousing assistance, housing navigation, and access to resources via Coordinated Entry. The City will seek to partner with Alameda County to provide mental health and substance use services in interim sites and will partner with mainstream workforce programs to support on site job training programs. The City will coordinate efficient provision of services and resources from private, nonprofit, local, Alameda County, and State organizations

Responsible Party: *Oakland Human Services Department*

Potential Funding Source: *Measure Q, ESG, State Homeless Housing Assistance and Prevention Funding, various HUD funding sources, CalAIM (through County)*

Timeframe: Expand on the availability of outreach and social services to increase connections to emergency, interim, and *long term* housing supports by 2031

Objectives: *1. Increase the number of people who are experiencing homelessness in Oakland who are sheltered; and 2. Invest in and improve the quality of interim housing programs so that more people exit to permanent housing and more people exit to permanent housing more quickly.*

Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color.

Increasing the number of crisis response beds helps to address the disproportionate rates of unsheltered homelessness among communities of color, especially among African American households. Creating additional facilities in many parts of the city will assist households experiencing homelessness to remain in their communities will reduce the number of African American households who are displaced from Oakland. The City will track data to ensure that African American households are using emergency crisis response beds and exiting to permanent housing at rates that are proportional to their representation in the homeless population. The Centering Racial Equity in Homeless Response System Design (Berkeley, Oakland, Alameda County Continuum of Care published in 2021) outlines suggested investment for scaling to solutions for unsheltered communities of color utilizing recent Point in Time count data.

Responsible Party: *Homelessness Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: The City of Oakland will continue to develop a data informed strategy for increasing equitable investments in homelessness systems to serve people of color by 2031.

Objectives: *Increase and stabilize people while providing opportunities to improve income they need to avoid entering or returning to homelessness.*

Action 4.1.3: Expand health and hygiene facilities and services, and improve access to bathrooms and showers.

Starting in FY 20-21, this intervention has greatly expanded to serve a minimum of 60 curbside sites with porta-potties, handwashing stations, and garbage pick-up. Oakland's Human Services Department has created two new outreach staff positions whose primary role is to support the participating encampments with maintaining the services, cleanliness, and compliance with the Encampment Management Policy. These City staff also support designated site leadership at each encampment site. The site leaders ensure that the porta-potties are used appropriately, and keep the units clean in between the official servicing. City staff provide the site leaders with cleaning supplies and stipends for their work. Per Council directive, the goal is to increase to 100 sites and four City outreach staff.

Responsible Party: *Homeless Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funding, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *More people experiencing unsheltered homelessness have access to services which promote health and dignity.*

Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.

Recognizing that a lack of access to living wage jobs is a significant driver of homelessness in Oakland, the City will work with the Oakland Unified School District (OUSD), higher educational institutions, related nonprofit agencies, business and other partners to create low barrier work opportunities for people who are currently unsheltered. These programs will offer support for development of work-related skills, provide services to address employment barriers specifically targeted to the needs of unhoused residents and increase the co-location and collaboration between providers of homeless assistance and employment programs and services. In addition, the City will work to match small business owners who want to address homelessness with job seekers who are homeless or formerly homeless.

Strategies to include:

- Low barrier work opportunities, for people re-entering the workforce
- Add employment specialist positions in core homeless services/prevention services programs
- Flexible funding pool to support career track training and employment programs
- Benefits advocacy to obtain SSI or other income for which they are eligible

Responsible Party: *Oakland Human Services Department; Economic and Workforce Development Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Increase and expand support for systems navigation, social services, and employment by 2031. Continue development and implementation of low barrier work opportunity programs in partnership with OUSD and other partners by end of 2026. Develop and implement programs to match small business owners with job seekers who are homeless or formerly homeless by end of 2026.

Objectives: *Reduction in the number of households which return to homelessness in the two years after obtaining housing.*

POLICY 4.2 ENCAMPMENT MANAGEMENT AND SHELTER OFFER POLICIES

Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy.

The City of Oakland adopted the 2020 Encampment Management Policy. The purpose of this policy is to protect and serve all Oaklanders, sheltered and unsheltered, and to manage the adverse impacts of homeless encampments by balancing the interests of all residents, focusing encampments actions

on mitigating negative outcomes as they pertain to public safety, public health, and equity outcomes. The City will continue implementing the Encampment Management Policy during the 2023-2031 Housing Element period. The City of Oakland will also continue to scale the appropriate level of public works related services to address debris, garbage and illegal dumping associated with encampments. The City will continue to improve and expand on the development and implementation of Emergency Shelter and crisis response beds in an effort at address and abate conditions at homeless encampments in Oakland. The Encampment Policy will continue to being predicated by an offer of shelter as outlined in City of Oakland Resolution 88077.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: The City of Oakland will continue improving the implementation of the Encampment Management Policy throughout the duration of this Housing Element Period, 2023-2031.

Objectives: *The Encampment Management Policy is intended to connect unsheltered individuals to human services, emergency shelter and long term permanent supportive housing, while executing comprehensive operations focused on managing health and safety conditions of public spaces. The goal is to provide regular and adequate trash collection from encampments, close areas where encampments are not permitted, and ensure that porta-potties and hand-washing stations are serviced regularly as needed and that encampments receive regular deep cleanings so that our unhoused residents are not living in conditions that threaten health and/or safety until fully abated.*

The policy sets forth the following objectives:

Designate high-sensitivity areas, where unmanaged encampments are presumed to cause unreasonably high levels of health and safety impacts due to the nature of the location;

Designate low-sensitivity areas, where enforcement will not be prioritized;

Make findings that will prompt Encampment Management Team intervention; and

Provide guidance on addressing unreasonable health and safety risks, promoting voluntary compliance, and strategies to address non-compliance.

Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator.

Homelessness intersects with multiple departments and agencies, all of which fall under the City Administrator's purview. Leading from the Office of the City Administrator, the Homelessness Division serves as the primary liaison between the City Administrator's Office and internal and external agencies, along with other City departments, regarding the City's homelessness response and provides inter- and intra-agency coordination focusing on the City's management of its unsheltered population. This division directs the program and operational decision-making in division activities; encampment management response teams and task forces; organizes, manages, and directs the review and implementation of the City's major projects. The division serves to

implement best practices, strategic planning in the City's Homeless System, and serve as a connection to local, state, and federal partners.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Design, review, implement and evaluate a strategic planning process in response to homeless services and interventions during *2023—2031*

Objectives: *Lead the implementation, expansion, and strategic coordination of Homeless Response Operations and Service Delivery across City of Oakland departments, and external public and private partners, organizations, and agencies.*

Action 4.2.3: Strengthen interdepartmental Encampment Management Team.

The Encampment Management Team (EMT) is an interdepartmental working group tasked with implementing and administering this policy, consisting of representatives from Oakland's Public Works Department, Human Services Department, Oakland Policy Department, Oakland Fire Department, the City Administrator's Office (CAO), and other consulted departments as necessary (e.g., the Mayor's Office, the City Attorney's Office, Parks and Recreation). The EMT is facilitated by the CAO via the Homelessness Administrator.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *1. The EMT aims to execute duties assigned to their respective departments for the completion of interventions (Health and Safety) prescribed in the 2020 Encampment Management Policy (Health and Hygiene, Deep Cleanings, Partial Closure, and Closure); 2. To channel unsheltered individuals in every encampment to human services, emergency shelter and long term permanent supportive housing; 3. To effectuate the completion of the Encampment Management Policy interventions, each department may promulgate additional specific procedures necessary to effectuate the roles described in this policy under development specific Standard Operating Procedures.*

Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.

The City will increase opportunities for leadership and input from people experiencing homelessness in the design, implementation, and evaluation of encampment management and homeless services. The City of Oakland has formed a Commission on Homelessness that will provide robust opportunity for people with lived experience to inform and contribute to solutions related to individuals experiencing homelessness reaching maximum self-sufficiency. The City will also seek to build trust between law enforcement, social workers, and homeless individuals/families and promote mentorship opportunities for formerly homeless individuals and people recovering from addiction. Further, the City will refine encampment management policies and strategies using qualitative and

quantitative data to assess the experience of encampment for BIPOC residents and will implement culturally specific and anti-racist strategies to better meet the short-term needs of BIPOC unsheltered residents.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Improve and develop mechanisms for individuals with lived experience to provide input to the Commission on Homelessness by 2024. Develop, implement and evaluate opportunities for individuals with lived experience to better interact with law enforcement by 2026. Identify and implement best practices that center race and equity in the strategic response to homelessness by 2031.

Objectives: *Review and make recommendations of existing and new proposals funding homelessness services funded by City of Oakland Measures Q and W.*

Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.

In FY 21-22 the City opened its first co-governed program site. Co-governance is an intervention model where unsheltered residents come to an agreement about how they will live together in a community setting of an encampment. This includes, but is not limited to, selecting site leadership, determining eligibility for participation, developing community expectations for behaviors and for staffing/running the site, holding each other accountable for the agreed upon expectations, and maintaining the health and safety of the community residents. A backbone agency (nonprofit/community-based agency) works alongside residents to support the residents in the design, leadership and operations of the site. The backbone agency is the contracting entity with the City/funder and holds ultimate accountability for ensuring the safety and security of the site. The City, in partnership with unsheltered residents, will continue to refine this model and to expand this model as new sites open.

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Homeless Housing Assistance and Prevention funds, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *Increase the number of interim housing sites which have people experiencing homelessness as partners in site design and operations.*

POLICY 4.3 PROMOTE PERMANENT SUPPORTIVE AND DEEPLY AFFORDABLE HOUSING FOR UNHOUSED COMMUNITIES

Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.

The City will secure and advocate for additional funding for building and operation of permanent supportive and deeply affordable housing for homeless households using a combination of State and federal sources, such as the State Homekey program, the federal HOME-ARP program, and funding from the local Oakland Housing Authority. The City will continue incorporating a preference for City-assisted affordable housing projects that include at least 20 percent of units for vulnerable populations, including but not limited to homeless individuals and families living at or below 30 percent of AMI with additional points awarded in the competitive funding process for projects with units targeting 20 percent of AMI. In addition, the City will increase this homeless set-aside with the issuance of future City funds, awarded through its Notice of Funding Availability (NOFA) programs should operating funding resource availability support the increase. The City will work with residents, service providers, and property owners to ensure adequate and transparent long-term plans for maintenance and service provision within new and existing permanent supportive housing.

The City will also continue pursuing the strategic acquisition of hotel, motel, and dorm facilities by and with nonprofit partners to house unsheltered residents. The City will further work to coordinate Oakland Housing Authority's award process with the City's affordable housing NOFA process and Homekey opportunities. The City will also work with the State and other partners to explore opportunities to expand the supply of extremely-low-income housing for residents that do not require supportive services. These efforts align with the City's HOME-ARP plan that targets HOME-ARP resources to support HUD Qualifying Populations, which include individuals and families who are: experiencing homelessness, at risk of becoming homeless, fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking or human trafficking, at greatest risk of housing instability, and/or needing supportive services or assistance would prevent homelessness.

For example, in September 2022 the City issued a Request for Proposals in advance of for Round 3 State Homekey program funding, and has allocated a total of $35,285,154 from the previous two rounds in local contribution to capital and operating expenses to this program. Through Council approval and in the RFP, the City intends to allocate at least 25 percent of its Round 3 matching funds to projects serving Transition Aged Youth (TAY) clients, through a separate scoring pool for TAY-serving projects. The City is also making a city-owned site, the Clara/Edes parcel, available for Homekey applications. Through Homekey, the City of Oakland partners with experienced housing organizations and service providers to develop and expand housing for people experiencing homelessness or at risk of homelessness. The City will continue to support six projects that have been awarded through past rounds of Homekey. These projects have added 285 units of affordable housing for people experiencing homelessness since 2020 to 2022.

Responsible Party: *Oakland Human Services Department; Oakland Department of Housing and Community Development; Homelessness Division, Office of the City Administrator*

Potential Funding Source: Housing Trust Fund, HOME-ARP, *State Homeless Housing Assistance and Prevention Funds, California Housing and Community Development Department Homekey Funds,*

Timeframe: As funding is available the *City* will continue to apply for competitive state and federal funding throughout this Housing Element period. The *City* will continue to identify ways to expand and finance the ideal matrix deeply affordable housing, permanent supportive housing, below market-rate housing, and strategic acquisitions of hotel, motel and dorm facilities by 2031.

The City is planning to release a New Construction NOFA targeting the production of additional permanent supportive housing (PSH) units in 2023. For example, the 2021-22 New Construction NOFA funded 324 units, XXX121 of which are designated homeless units.
.

The City released the Round 3 Homekey Request for Proposals in 2022 in order to identify projects prior to the State releasing the Homekey Notice of Funding Availability (NOFA) which is expected to be released in Spring 2023. The City will continue to participate in Homekey, if and when future rounds are funded through the State budget.

Objectives: *Secure funding to significantly increase construction and maintenance of permanent supportive and deeply affordable housing to match need for unhoused communities.*

Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis.

The City will utilize statewide streamlining opportunities, such as categorical CEQA exemptions and Program EIRs, and revise the Planning Code to minimize the need for discretionary review with a ministerial option for projects that utilize objective design standards for approval. The City will also identify and eliminate roadblocks in the review of building permit applications to expedite and increase the production of modular developments and other quick-build shelter solutions on private land in Oakland. The City will also work with other public agencies, including Caltrans, to facilitate and streamline more flexible shelter solutions on public land. The City will ensure that smaller units used as permanent housing units are in compliance with the Building Code to mitigate fire and other public safety hazards.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Planning Code changes in 2023; ongoing, 2023-2031*

Objectives: *Significantly increase production of modular developments and other quick-build shelter solutions to match need for unhoused communities.*

Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing.

The City will amend the Planning Code to ensure that transitional housing and supportive housing projects are permitted equivalent to similar permanent residential uses in the appropriate zone.

The City will amend the Planning Code to remove minimum parking requirements for transitional housing. For supportive housing, minimum parking requirements will only apply to employee parking for onsite services, and no minimum parking requirements will apply to the residential units.

The City currently processes supportive housing streamlined projects utilizing Assembly Bill 2162 (2021)/Government Code Section 65651 using the City's multipurpose basic application but has received few applications utilizing this procedure. The first such application was received during the drafting of this Housing Element. To provide greater clarity and encourage the use of this streamlining provision, the City will codify the by right requirements of Government Code Section 65651 into the Oakland Planning Code, and will modify the basic application to identify streamlining under this provision.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of transitional and supportive housing.*

Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist.

California Government Code Section 8698.4 allows the City Council to declare a shelter crisis when a significant number of persons are without the ability to obtain shelter, resulting in a threat to their health and safety. Upon a declaration of a shelter crisis, the city may allow persons unable to obtain housing to occupy designated public facilities, including facilities leased by the city, during the duration of the crisis. Further, upon a declaration of a shelter crisis, the City may apply reasonable local standards and procedures for the design, site development, and operation of homeless shelters and emergency housing that the City adopts by an ordinance reviewed and approved by State HCD, and provisions of any housing, health, habitability, planning and zoning, or safety standards, procedures or laws, as applied to public facilities, may be suspended.

On January 5, 2016, and subsequently on October 6, 2017 and September 30, 2021, the Oakland City Council adopted ordinances (No. 13348, 13456, and 13662 respectively) declaring a shelter crisis in the City of Oakland. These ordinances were adopted pursuant to the authority provided under state law beginning at California Government Code Section 8698. As these conditions continue to persist, the City Council has regularly renewed its declaration of a local public health emergency about the homelessness crisis at each of its regular Council meetings. On May 21, 2019, after review and approval by State HCD, the City Council additional adopted an Ordinance for Emergency Building Standards Amendments to the 2016 California Building Standards Code that incorporated emergency building standards for emergency housing buildings and facilities, including health and safety standards for recreational vehicles, emergency sleeping cabins, membrane structures, and other emergency housing on property owned or leased by the City of Oakland. Statewide building standards for emergency housing were incorporated into the 2019 California Building Code and the 2019 California Residential Code and on December 10, 2019 the City Council passed Ordinance No. 13576 adopting these emergencies housing provisions, including the local amendments previously approved by State HCD. Finally, on June 4, 2019, the City Council adopted an ordinance amending the

Oakland Planning Code Section 17.07.060.A to allow Emergency Shelter Residential Activities and Emergency Housing Facilities on property designated by the City Administrator and owned or leased by the City.

The City will ensure that the authority provided under the City's Shelter Crisis Ordinance and declaration of a local emergency regarding homelessness remains in place until public health and safety concerns no longer persist. The City will review public health and safety conditions prior to the expiration of the emergency ordinance declaring a shelter crisis, a two-year ordinance, and will continue to review conditions every two years to ensure no gap in the authority provided through the emergency declaration of a shelter crisis. The City will also ensure that subsequent amendments of the building code, a process that occurs every three years as the state building code and residential code is revised, will retain these emergency provisions as authorized under State law.

Responsible Party: *Oakland City Council; Oakland City Administrator; Oakland Planning & Building Department.*

Potential Funding Source: *General Fund*

Timeframe: *Ongoing*

Objectives: *Provide additional options for temporary shelter for all persons without the ability to obtain shelter until public health and safety concerns no longer persist.*

Action 4.3.5: Provide development standards for Low Barrier Navigation Centers.

Low Barrier Navigation Centers, pursuant to AB 101, are required to be permitted by right and without any discretionary approval. A Low Barrier Navigation Center is a "Housing First," low barrier, temporary, service-enriched shelter that helps homeless individuals and families to quickly obtain permanent housing. The City will amend the Planning Code to include a definition for "low barrier navigation centers" and ensure that such centers are permitted by right, pursuant to State law.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge*

Timeframe: *Planning Code changes in June-July 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness.*

Action 4.3.6: Expand opportunities for the permitting of Emergency Shelters.

The City will revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide when located on properties owned by churches, temples, synagogues, and other similar institutions approved for Community Assembly Civic Activities. The City will remove any minimum automobile parking requirements for emergency shelters. In other zones where emergency shelters are currently permitted only upon issuance of a major conditional use permit, the City will revise the Oakland Planning Code to require only a minor conditional use permit, which is processed by Planning Department staff and appealable only to the Planning Commission.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan surcharge*

Timeframe: *Planning Code changes in June-July 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness*

Goal 5. Promote Neighborhood Stability and Health

All Oakland residents deserve to live, work, play, and thrive in safe, affordable, healthy, and welcoming communities. In Oakland, this geography of opportunity and health-supporting neighborhoods has been inequitable, with low-income communities and communities of color more likely to live in neighborhoods overburdened by pollution, disinvestment, and other social and environmental injustices. Goals, policies, and actions in the Housing Action Plan can address environmental justice by protecting residential areas from harmful pollution impacts. As the City prioritizes investments, infrastructure, building upon existing community assets, and resources to achieve environmental justice in disinvested areas, the Housing Action Plan seeks to ensure that existing residents can stay in their communities and benefit from these increased resources through opportunities for homeownership (see also Goals 1 and 3).

1. Reduce greenhouse gas emissions in the building sector through the promotion of sustainable design principles, energy efficiency, decarbonization/electrification, and smart growth principles in residential developments.

2. Encourage higher-density, infill, and mixed-use development near transit to reduce reliance on automobiles.

3. Promote adaptation strategies to improve neighborhood and community resilience to climate change in collaboration with local and regional partners.

4. Leverage State and federal resources to assist with the remediation of environmental constraints on potential housing sites.

5. Ensure any addition of housing to neighborhoods at risk of wildfires is accompanied by infrastructure improvements to mitigate the evacuation needs for new residents.

6. Promote an equitable distribution of housing, including affordable housing, throughout the community, while providing opportunities to those that want to remain in existing neighborhood.

7. Ensure that programs support development of both rental and ownership opportunities for affordable and middle-income housing.

Homeownership confers a range of benefits – including greater certainty over housing costs, opportunity to stay in one's chosen neighborhood, the ability to make changes to the living environment, privacy, and the ability to build financial equity. In addition to tangible individual

benefits, homeownership also brings substantial social benefits such as a stronger sense of place and belonging, improved community health and safety, and civic participation.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Oakland has historically experienced patterns of significant inequities – between the hills and the flatlands, west and east, and across race and income. Rising housing costs and displacement pressures continue to disproportionately burden the city's Black population and other people of color, even as historically Black neighborhoods continue to see disinvestment and relatively high rates of poverty – see Appendix D for further context. The City has made great strides to correct these patterns of discrimination—including through the establishment of the Department of Race and Equity to advance racial equity in 2016—but needs to expand its efforts to eliminate racial disparities and discriminatory housing practices. The City will take steps to correct historic and ongoing patterns of discrimination to create a fair and just city through the simultaneous actions of opening up exclusionary neighborhoods (see Policy 3.4) and focusing resources, funds, tenant protections, and support of existing communities in disinvested neighborhoods and ethnic enclaves (see Goals 1, 2, and 3).

Oakland has some of the lowest rates of homeownership among major Bay Area cities, rivaled only by San Francisco. About 60 percent of Oaklanders are renters, and with continuously rising home prices, affordable homeownership remains out of reach for most Oaklanders. This is especially true for the city's working and middle classes, as traditionally blue-collar neighborhoods have become increasingly expensive in recent years. Homeownership is distributed unevenly by race and ethnicity – while most white households own their homes, the majority of BIPOC households are renters. American Indian or Alaska Native (70.8 percent), Hispanic or Latinx (69.4 percent), and Black or African American (67.8 percent) households are especially likely to be renters. A key driver behind these disparities is the legacy of the foreclosure crisis during the Great Recession. During the foreclosure crisis, 1 in 14 Oakland homeowners lost their homes. These foreclosures were highly concentrated in East and West Oakland. See Appendices B and D for more information.

This goal aims to expand opportunities for homeownership, particularly for low-income communities and communities of color. Along with efforts in Goal 1 and Goal 2, increased affordable and middle-income homeownership opportunities will reduce displacement pressures and keep Oaklanders in their homes. Expanding homeownership opportunities will protect both individual families and the social fabric of Oakland's neighborhoods. First-time homebuyer programs can also expand access to historically exclusionary neighborhoods by giving prospective homeowners the resources and tools they need to secure a home in neighborhoods that meet their needs. Community land trusts and other models of maintaining permanently affordable housing, as outlined in Policy 3.5, also provide opportunities to increase rates of affordable homeownership.

In addition to safe, affordable, high-quality housing for all people, a key determinant of equity is a healthy built and natural environment for all people. Such an environment should include a mix of land uses that support jobs, housing, amenities and services, trees and forest canopy, and clean air, water, soil, and sediment. In Oakland, low-income communities and communities of color are more likely to suffer from environmental injustices such as disproportionate exposure to air pollution, toxics and hazardous facilities and substances, contaminated water, and other environmental hazards. These disparities are due to a history of systemic racism and social injustices that influence where these communities live. As the impacts of climate change become more severe, these communities are most likely to be impacted first and hardest. As the City adds more housing stock over the course of this Housing Element period, it is imperative that new development sustains a

healthy environment by working to "reduce the unique or compounded health risks in disadvantaged communities" and is prepared for the heightened impacts of climate change, especially protecting those who are most at risk. As part of this goal, efforts to align affordable housing development with transit—such as through the State's Affordable Housing and Sustainable Communities program—and expand access to high opportunity neighborhoods and good jobs are integral to furthering environmental justice through housing.

POLICY 5.1 SUSTAIN AFFORDABLE FIRST-TIME HOMEOWNERSHIP INCENTIVES

Action 5.1.1: Provide first-time homebuyer programs.

When funding is available, the City has historically provided several first-time homebuyer programs – including the First Time Homebuyer Mortgage Assistance Program (MAP), and the CalHome Program. As funding becomes available—either through State or program-related income—the City will resume these programs. The City also provides first-time homebuyer workshops and promotes workshops hosted by a HUD-approved counseling agency. Although City-sponsored classes are currently suspended due to the COVID-19 pandemic and the absence of funding, the City continues to provide information for other local classes. As we emerge from pandemic restrictions, the City will resume providing in-person workshops in 2023. Finally, the City maintains a list of city-assisted deed-restricted below market rate (BMR) homes for sale to assist potential buyers. The City collects data through public records and the first-time homebuyer programs to assess homebuyers' needs and to identify gaps in the programs.. Further, as part of Action 5.3.3, the City will engage in targeted outreach in partnership with community-based organizations and fair housing services providers to reach the most impacted communities – including Black and Latinx households.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Fund Grants (HCD), program income, city-sourced funds.*

Timeframe: *The City applied for the last several CalHome program NOFAs to secure funding for down payment assistance but was denied. The City will continue to review NOFAs and strategically apply for this assistance when substantiated. The City is already using repayments from previous CalHome and other loan programs to support mortgage assistance.*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the Housing Element cycle.*

Action 5.1.2: Expand access to low-cost financing for home purchase.

Through the first-time homebuyer programs described in Action 5.1.1, the City was able to issue 121 loans totaling approximately $6.8 million during the previous planning period. With appropriate funding, these low-cost financing options have been very effective in promoting affordable homeownership. The City will continue to seek funding for these programs and to refer homebuyers to resources related to other county, State, or federal level funding – including through the Consumer Financial Protection Bureau (CFPB), California Housing Finance Agency (CalHFA), Golden State

Finance Authority (GSFA), Federal Home Loan Bank's (FHLB) WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State Housing Fund Grants (HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data*

Objectives: *If the City of Oakland receives CalHome grants and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

Oakland HCD has traditionally worked with Section 8 voucher holders as part of the first-time homebuyer programs. Furthermore, the Oakland Housing Authority (OHA) offers the Homeownership Program to eligible residents – which permits participants to apply their housing subsidy towards a monthly mortgage payment. As funding and capacity permits, the OHA will continue to offer this program and expand eligibility criteria as feasible. Oakland HCD will also continue to work with voucher holders through first time homebuyer programs. OHA will collect data on residents who make use of the Homeownership Program to understand program participants and existing gaps.

Responsible Party: *OHA; Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD, State Housing Fund Grants (HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on OHA's Homeownership Program*

Objectives: *If funded at historic levels, the City expects to provide 30 low-income Section 8 voucher holders with down payment assistance.*

POLICY 5.2. PROMOTE RESILIENT AND SUSTAINABLE DEVELOPMENT

Action 5.2.1: Protect against smoke and wildfire.

As wildfires become more frequent, it is increasingly important to ensure safe and healthy indoor air quality. The City will require new development follow requirements for indoor air filtration, including the installation of MERV filters, as specified in the California Building Code, and will support property owners in retrofitting their homes to protect inhabitants from wildfire smoke. The City will prioritize retrofits in communities with disproportionate exposure to air pollution and substandard housing. To reduce the impacts of secondhand smoke, the City will explore amendments to the smoking pollution control ordinance to create smoke-free environments within multifamily housing properties. Further, the City will encourage the addition of clean air centers and resilience spaces within residential areas that can provide emergency services in the event of a wildfire.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly improve access to better indoor air quality to protect against smoke and wildfire through methods such as requiring installation of MERV filters in new developments and identifying additional clean air centers and resilience spaces within residential areas.*

Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

Expand and allow community-serving uses such as retail, restaurants, and personal services within areas that are primarily residential, and increase opportunities to add multi-family housing in commercial areas that are well-served by transit. Encourage sustainable transportation choices and improve pedestrian activity with new housing development, by reducing vehicular parking requirements and eliminating parking minimums for residential development within ½ mile of major transit stop (see Action 3.4.4) in new development and/or requiring transit, cyclist, and pedestrian access design features. Work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. Ensure that new transit-oriented development is accompanied by tenant protection policies described in Policy 1.1. Further, the City will support and encourage the development of affordable housing near transit and amenities through its NOFA process, which prioritizes City funding awards to affordable housing projects with better transit access, and by co-applying to State programs such as AHSC and IIG (see Action 5.2.4).

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2023 – 2025 and Ongoing*

Objectives: *Significantly increase infill, transit-oriented development and mixed-use development to meet housing need.*

Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.

The City will study options to provide financial assistance to property owners for the remediation of environmentally contaminated sites, such as former gas stations or auto mechanic shops, which are being developed for housing. Funding priority will go to sites with proposed affordable housing projects.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department; Economic and Workforce Development Department*

Potential Funding Source: *State of California's Equitable Community Revitalization Grant Program, United States Environmental Protection Agency Brownfields Grants program*

Timeframe: *Ongoing, 2023-2031 as funding is available*

Objectives: *As grant and loan funding sources are secured, Oakland will support through technical assistance and financing of characterization and/or remediation of environmentally contaminated sites.*

Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.

The AHSC program, administered by the Strategic Growth Council and implemented by HCD, distributes Statewide Cap-and-Trade funding for affordable housing developments (new construction or renovation) and sustainable transportation infrastructure projects. Successfully implemented, the AHSC program transforms California cities into places where residents can get everywhere they want to go without having to drive. The City of Oakland will apply directly or support partners such as nonprofit and for-profit housing developers, transportation and transit agencies, and joint powers authorities to apply for AHSC grant funding.

Responsible Party: *Oakland Department of Housing and Community Development; DOT; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *The City of Oakland has historically had projects applied to each AHSC round, and expects to have 3-5 projects for the 2023 AHSC NOFA (Round 7). As a jobs and transit center of the region, the City will continue to submit highly qualified projects to this important state funding source each time the source is available in order to secure additional funding for affordable housing in transit-rich service and job centers.*

Objectives: *Significantly increase affordable housing development through application for AHSC funding to meet housing need.*

Action 5.2.5: Encourage earthquake-resilient housing.

As funding becomes available, the City will continue to operate loan programs to help property owners afford the cost of seismic safety programs. In the past, these loan programs have particularly focused on soft story retrofit projects. The City will also continue to implement the City's soft story retrofit ordinance, which requires vulnerable apartment buildings to retrofit soft story areas at risk of collapse.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: FEMA Hazard Mitigation Grant Program, CalOES Prepare California Match program, other sources as available.

Timeframe: *Ongoing, 2023 - 2031*

Objectives: Successfully retrofit all vulnerable soft-story residential buildings at risk of collapse.

Action 5.2.6: Encourage climate-resilient housing.

Consistent with the City's Equitable Climate Action Plan (ECAP) and Ordinance 13632 CMS, all newly constructed buildings in Oakland are prohibited from utilizing methane gas, also referred to as natural gas, or connecting to natural gas infrastructure. The City will continue to support property owners in building electrification, energy efficiency and resilience, and seismic safety retrofits, prioritizing funding in frontline and disadvantaged communities. The City will work with organizations such as the U.S. Green Building Council to recognize exemplary net-zero energy projects with sustainable and resilient design, including passive design and energy- and water-efficient systems. The City will continue to require all projects that meet the Green Building Ordinance for Private Development thresholds comply with green building standards, exceeding CALGreen Standards, and will encourage and promote green features such as durable low-embodied carbon materials, green and cool roofs, grey-water systems, electric vehicle charging stations, and others such features during the permitting and entitlements process. The City will continue to require green building certification under Build It Green's GreenPoint Rated or LEED Certification systems and give preference to projects scoring higher in the Green Point Checklist, or which meet or exceed LEED Gold level, in the affordable housing NOFA scoring process which determines which projects are awarded City funds. The City can promote and expand existing programs to provide education and incentives to property owners and residents who implement water conservation, energy conservation, waste reduction, and resilient landscaping measures. The City will ensure that new housing development within areas subject to flooding associated with sea level rise encourage placement of life safety, mechanical, and electrical systems above flood elevations (i.e., second story or higher). The City will also encourage the addition of community spaces within residential areas that can provide emergency services in the event of a natural disaster or power outage. Recognizing the likely increase over time in power outages due to the impacts of the climate crisis, the City will work across City departments and with relevant agencies such as East Bay Community Energy, to increase community energy resilience such as through deploying or incentivizing onsite energy storage, and supporting the development of neighborhood resilience resources that include clean backup power.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase construction of climate-resilient housing to meet housing need.*

Action 5.2.7: Consider adoption of a disaster reconstruction overlay zone.

The City will consider the adoption of a disaster reconstruction overlay zone to streamline reconstruction following a natural disaster. Such a zone would establish ministerial approvals and streamlined permitting for the reconstruction of homes after a natural disaster, similar to reconstruction zoning created in Santa Rosa following the Santa Rosa Wildfire. This could accelerate reconstruction, require rebuilt homes to adhere to the latest earthquake and fire safety standards, and reduce the impacts of disasters on housing affordability in Oakland.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *State and federal grants, as available*

Timeframe: *2023 - 2027*

Objectives: *Provide greater flexibility to meet housing need in response to potential disasters.*

Action 5.2.8. Encourage new affordable housing in higher resource neighborhoods.

Affordable housing units, including both publicly assisted housing and housing choice vouchers, tend to be concentrated in low resource and high segregation and poverty areas. Higher resource neighborhoods have failed to provide their share of affordable units through low-density zoning that has largely prevented development at the scale necessary for affordability.

To expand where affordable housing units are located, including both publicly assisted housing and housing choice vouchers, the City will encourage further affordable development in higher resource neighborhoods through allowing for higher densities and streamlined approval for affordable projects. In its annual competitions for the award of housing development funds, the City will continue to give points in its competitive New Construction funding processes to projects in areas which help advance desegregation and are located in neighborhoods with strong educational quality. Further efforts may include working with affordable developers to identify appropriate sites in high resource neighborhoods and providing direct outreach and resources to Section 8 voucher holders and landlords to find appropriate housing in higher resource areas (see also Action 3.3.2). Actions 3.2.1 and 3.4.1 will also help increase the availability of housing within higher resource neighborhoods.

As noted below, this is not intended to supplant affordable housing investment in lower resource/high poverty and segregation areas, because these are also areas where residents are often subject to displacement pressures, as well as areas with rich access to transit, service and job centers. However, affordable housing opportunities should be made available throughout the City.

Expanding equitable housing opportunities in higher resource areas will also require Oakland to take on a new challenge: find ways to expand affordable housing opportunities in wildfire-prone Hills neighborhoods. The City will therefore analyze the current evacuation capacity of Hills neighborhoods, assesses infrastructure options to expand that evacuation capacity, and study options to pair affordable housing development in the Hills with corresponding safety-related infrastructure investments. This effort will align with the upcoming changes to the City's Land Use and Transportation Element (LUTE), which is also being revised as part of the City's broader General Plan update.

However, while increasing affordable development in higher-resource neighborhoods is a State priority, it only represents one strategy towards increasing opportunity for historically disadvantaged residents. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. These neighborhoods are also often rich in transit and service resources tailored to community needs. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in Racially or Ethnically

Concentrated Areas of Poverty (R/ECAPs) as outlined in Action 5.2.9. These efforts are also described in Goal 1 and Goal 2. Oakland HCD's New Construction Notice of Funding Availability (NOFA) scoring criteria has recently been modified to balance scoring for higher-resource areas and high performing schools (for family housing) with the goal of increasing investment in areas of the City that have suffered from economic and infrastructural disinvestment, as well as prioritizing affordable housing in areas where low-income residents are especially vulnerable to displacement pressures. Under the current scoring for the allocation of tax-exempt bonds, only high-opportunity areas of Oakland are competitive for funding.

Failing the success of efforts to refine the definition of "high resource" areas to include those rich in transit, job and service accessibility, the City may need to consider adjusting its priorities to focus more investments towards high-opportunity areas in order to continue to be competitive for state funding. However, the City remains concerned about the adverse impacts this would have on the City's anti-gentrification and anti-displacement work, and feels strongly that affordable housing resources are desperately needed in neighborhoods where low income residents are vulnerable to displacement. Lastly, the State relies on TCAC Opportunity Area Maps that designates much of Oakland as "low resource" or "high segregation and poverty." The City strenuously disagrees with these designations that do not recognize the critical role in housing production, jobs creation, and transit connection that Oakland plays for the region. Further, it lags behind the rapid market changes and displacement pressures experienced across the City's transit-, job-, and amenity-rich neighborhoods; this action pursues a more balanced and nuanced investment of resources to support housing across its neighborhoods.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, impact fees, other local, State, and federal funding sources as available*

Timeframe: *Geographic equity is currently incorporated as a scoring element in all NOFAs to prioritize awarding City funds towards projects that support this goal; and will continue to be a focus moving forward. New construction NOFAs will be released approximately every other year.*

Objectives: *The ratio of affordable housing units per acre shall increase by 10 percent more in neighborhoods categorized as "High" or "Highest" opportunity by the California Tax Credit Allocation Committee (TCAC) than the increase in the ratio of affordable housing units per acre in all other neighborhoods .*

Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.

As part of Phase 1 of the GPU, the EJ Element will include policies and actions that will promote equitable access to public facilities, healthy food, safe and sanitary homes, and physical activity; reduce barriers to inclusive engagement and participation in the public decision-making process; and prioritize improvements and programs that address the needs of low-resourced and disproportionately burdened communities in Oakland. These investments will be focused in communities designated through the EJ screening process.

As part of Phase 2 of the GPU, the City will promote complete neighborhoods where residents have safe and convenient access to goods and services on a daily or regular basis—that address unique neighborhood needs, and support physical activity, including walking, bicycling, active transportation, recreation, and active play. The LUTE, OSCAR and the Infrastructure and Capital Facilities elements will include targeted policies and actions for communities designated through the EJ screening process (i.e., low-resourced, traditionally underserved, and disproportionately burdened communities) that focus on:

- Equitable distribution of new beneficial public, civic, and cultural facilities and maintenance of existing facilities
- Appropriate land use designations and zoning to facilitate additional healthcare facilities in areas without sufficient access
- Maintain and improve existing civic and public facilities to ensure safer, more attractive facilities that are responsive to community needs
- Expand access to high-quality open space, pedestrian and bicycling amenities, and increase opportunities for physical activity and recreation spaces

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, other local, State, and federal funding sources as available*

Timeframe: *July 2023 for adoption of EJ Element. End of 2025 for adoption of LUTE, OSCAR, and Infrastructure and Capital Facilities Element*

Objectives: Prioritize improvements in low resourced and traditionally underserved areas in the City to improve fair housing conditions and encourage community preservation, revitalization and, quality of life

Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration.

As noted previously, lower-income housing tends to be concentrated in lower resourced neighborhoods. The City will work to promote mixed-income developments to further reduce the geographic isolation of lower-income units and promote increase neighborhood investment in distressed areas. The City will encourage use of the State Density Bonus program by incentivizing on-site affordable units along with the Density Bonus instead of paying affordable housing impact fees, promote mixed-income development in specific plan areas, and access the CalHFA bond recycling facility for mixed-income projects.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Significantly increase production of mixed-income housing and reduce income-based concentration to match housing need.*

Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.

The Housing Element is a living document that provides a roadmap for the next eight years. As such, the City will actively monitor activities undertaken to meet program objectives pursuant to Annual Progress Report requirements. To ensure accountability, the City will solicit annual feedback from the community through surveys to understand the effectiveness of individual programs. In addition, the City will create a subcommittee of the Planning Commission to bring the progress report of the Housing Element to monitor its performance.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Human Services Department; Oakland Economic & Workforce Development Department; Oakland Public Works Department; DOT; Homeless Division, City Administrator's Office; Sustainability and Resilience Division, City Administrator's Office*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, annual survey and monitoring during the 2023-2031 Housing Element Annual Progress Reporting cycle. By March 2024, create subcommittee of the Planning Commission to monitor the Housing Element.*

Objectives: *Monitor and enforce Housing Element implementation to understand whether individual programs significantly improve Oakland housing conditions and address housing need.*

POLICY 5.3. PROTECT HOMEOWNERS AND TENANTS FROM DISCRIMINATION

Action 5.3.1: Provide fair housing services and outreach.

The City will continue to partner with fair housing service providers operating within Oakland. As most housing discrimination complaints are related to a disability bias, the City will work with fair housing providers to provide additional educational resources in a variety of languages to both tenants and landlords related to disability rights in housing. The City will publicize fair housing services on its website, in City Hall, and in all housing-related programming. The City will also seek additional State and federal funding to assist fair housing providers.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *End of 2023*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.2: Promote awareness of predatory lending practices

Predatory lending practices are a major contributor to racially discriminatory housing patterns and were one of the major factors in the previous decade's foreclosure crisis. To curb these practices, the City will work with fair housing service providers to provide educational materials and workshops

in a variety of languages to inform Oakland residents of best practices. The City will promote fair lending practices to ensure that low-income residents and residents of color have fair access to capital resources needed to acquire and maintain housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *End of 2023*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.

Oakland's Black and Latinx populations experience disproportionately high rates of cost burden and tend to live in neighborhoods with higher rates of overcrowding and other housing issues. The City will work with fair housing service providers to target outreach and programming to Black and Latinx Oaklanders, as well as neighborhoods experiencing high levels of housing issues in parallel with Actions 5.3.1 and 5.3.2. The City will regularly monitor housing issues like cost burden, overcrowding, code enforcement complaints, and substandard housing to understand where the highest need for services exists.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *To determine what neighborhoods that fair housing service providers should target for outreach and programing to assist disproportionately burdened groups.*

4.2 Quantified Objectives

State law requires that quantified objectives be established for new construction, rehabilitation, conservation, and preservation activities that will occur during the Housing Element cycle. Table 4-1 provides Oakland's quantified objectives by income category for the 2023-2031 Housing Element planning period. New construction estimates include units in pipeline projects, projected accessory dwelling units (ADUs), and the minimum remaining RHNA capacity. The remaining RHNA capacity represents development that the City must support beyond pipeline projects and projected ADUs as identified in the Sites Inventory, Appendix C (including potential development projects, 5th cycle RHNA sites, and other new opportunity sites), and through the actions in this Housing Action Plan.

Table 4-1: City of Oakland 2023-2031 Quantified Objectives

Income Category	*New Construction[1]*			*Rehabilitation[2]*	*Conservation/Preservation[3]*
	Pipeline Project	*Projected ADUs*	*Remaining RHNA*		
Very-Low-Income[4]	881	346	2,029	-	84
Extremely-Low-Income[4]	325	346	2,584	-	84
Low-Income	1,499	692	1,559	1,216	502
Moderate-Income	182	594	3,681	-	-
Above-Moderate-Income	10,174	-	1,359	-	-
Total	13,061	1,978	11,212	1,216	670

1. New construction objectives represent the City's RHNA for the Sixth Cycle Housing Element update. Estimates include units from pipeline projects and projected accessory dwelling units (ADUs).
2. Estimates are derived from the City's 2020/2021 Consolidated Annual Performance and Evaluation Report (152 rehabilitated units in 2020/2021, projected over 8-year period).
3. Conservation/preservation estimates include support of the construction, acquisition, and/or preservation of deed restricted affordable housing units each year (640 units total, as described in Action 3.3.6) and down payment assistance for Section 8 voucher holders (30 units total, as described in Action 5.1.3). Units are proportionally distributed based on RHNA allocation among Low-, Very Low-, and Extremely-Low-Income sites.
4. The extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need. Quantified objectives for very-low-income housing includes extremely-low-housing objectives.

0 Executive Summary

Oakland's 2023-2031 Housing Element is a plan that presents goals, policies, and actions to address Oakland's need for more affordable homes and to promote integrated, vibrant communities. By expanding housing options in more affluent neighborhoods and reinvesting in less affluent neighborhoods, the Housing Element will affirmatively further fair housing for all Oaklanders. The Housing Element takes significant action to address urgent community needs, including protecting Oakland residents from displacement, improving Oakland's existing housing stock, expanding affordable housing opportunities, expanding resources for the unhoused, and promoting neighborhood stability and health.

The Housing Element includes five specific goals with associated programs that are priorities for the City of Oakland. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2 and is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices.

Many of Oakland's existing housing programs will be carried forward, but there are many **new actions, that are shown in blue,** that address the city's housing needs that are added to the Housing Element.

GOAL 1: PROTECT OAKLAND RESIDENTS FROM DISPLACEMENT AND PREVENT HOMELESSNESS

The Housing Element protects Oakland tenants from displacement and creates conditions that enable them to remain in their homes and communities.

- Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.
- **Action 1.1.2: Enforce Just Cause for Eviction measures.**
- Action 1.1.3: Enforce and Strengthen Ellis Act protections.
- **Action 1.1.4: Implement tenant relocation measures.**
- **Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.**
- Action 1.1.6: Enhance housing related legal services
- **Action 1.1.7: Expand our ability to enforce rent control to maintain affordability.**
- **Action 1.1.8: Monitor neighborhood displacement**
- **Action 1.1.9: Implement a rental housing registry.**
- Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).
- **Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.**
- **Action 1.1.12: Provide a local preference in affordable housing projects**
- **Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.**

- Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

GOAL 2: PRESERVE AND IMPROVE EXISTING HOUSING STOCK

The Housing Element conserves and improves the affordability of existing housing stock in Oakland and addresses substandard conditions.

- Action 2.1.1: Support home rehabilitation programs.
- Action 2.1.2: Promote healthy homes and lead-safe housing.
- **Action 2.1.3: Conduct proactive rental inspections.**
- Action 2.1.4: Support historic preservation and rehabilitation.
- **Action 2.1.5: Implement universal design strategies**
- **Action 2.1.6: Increase funding for improved indoor air quality.**
- Action 2.2.1: Continue to implement resale controls on assisted housing.
- Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.
- Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.
- Action 2.2.4: Limit condominium conversions.
- Action 2.2.5: Extend local replacement unit provisions.
- **Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.**
- **Action 2.2.7: Provide additional subsidy for residential hotels.**
- **Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.**

GOAL 3: CLOSE THE GAP BETWEEN AFFORDABLE AND MARKET-RATE HOUSING PRODUCTION BY EXPANDING AFFORDABLE HOUSING OPPORTUNITIES

The Housing Element facilitates the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, the Housing Element provides a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. The Housing Element locates new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and removes constraints to affordable housing development.

- **Action 3.1.1: Develop a project-based rental or operating subsidy program for extremely-low-income residents.**
- **Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.**

- **Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs**
- **Action 3.2.2: Promote and protect live/work housing and housing for artists**
- Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.
- **Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs**
- **Action 3.2.5: Reduce constraints to the development of ADUs**
- **Action 3.2.6: Monitor affordability of permitted ADUs**
- **Action 3.2.7: Proactive Short-Term Rental Enforcement**
- Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.
- Action 3.3.2: Expansion of Section 8 vouchers.
- Action 3.3.3: City of Oakland Emergency Rental Assistance Program.
- **Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.**
- **Action 3.3.5: Implement an affordable housing overlay.**
- Action 3.3.6: Access to low-cost financing for development.
- **Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement**
- **Action 3.3.8: Right-sized development fees on market-rate developments**
- **Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.**
- **Action 3.3.10: Consider a citywide Enhanced Infrastructure Financing District (EIFD)**
- **Action 3.3.11: Support innovations by design**
- Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.
- Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.
- **Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing**
- Action 3.3.15: Continue and expand density bonus incentives.
- **Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund**
- Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.
- **Action 3.3.18: Implement affordable housing investments contained in Measure U**
- **Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program**
- **Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements**
- **Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update**
- **Action 3.4.3: Revise Conditional Use Permit (CUP) requirements**

- **Action 3.4.4: Revise citywide parking standards**
- **Action 3.4.5: Revise open space requirements**
- **Action 3.4.6: Correct zoning district boundaries that cut through parcels**
- **Action 3.4.7: Capture the diversity of existing built fabric in zoning**
- **Action 3.4.8: Implement objective design standards**
- Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.
- **Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right**
- **Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing**
- **Action 3.5.1: Support community land trusts and other shared equity model**
- **Action 3.5.2: Support housing cooperatives, co-living, and cohousing models**
- **Action 3.5.3: Advocate for statewide legislation on social housing**
- **Action 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households**
- **Action 3.5.5: Study Feasibility of Single-Stair Residential Buildings**
- **Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders**
- **Action 3.6.2: Provide increased flexibility in development standards**
- **Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing**
- **Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.**
- Action 3.6.5: Continue one-stop and online permitting services.
- **Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.**
- Action 3.7.2: Provide housing for persons with HIV/AIDS.
- Action 3.7.3: Accessible units in new housing developments.
- Action 3.7.4: Implement the sponsor-based Housing Assistance Program.
- **Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes**
- **Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right**
- **Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act**
- **Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right**
- **Action 3.8.1: Continue to implement the Vacant Property Tax (VPT)**
- **Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations**
- **Action 3.8.3: Tax vacant residential rental units**
- Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.
- Action 3.8.5: Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

GOAL 4: ADDRESS HOMELESSNESS AND EXPAND RESOURCES FOR THE UNHOUSED

The Housing Element recognizes housing as a human right and reduces homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

- **Action 4.1.1: Expand, improve, and maintain crisis response beds**
- **Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color**
- **Action 4.1.3: Expand health and hygiene facilities and services and improve access to bathrooms and showers.**
- **Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.**
- **Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy**
- **Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator**
- **Action 4.2.3: Strengthen interdepartmental Encampment Management Team**
- **Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.**
- **Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.**
- **Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.**
- **Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis**
- **Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing**
- **Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist**
- **Action 4.3.5: Provide development standards for low barrier navigation centers**
- Action 4.3.6: Expand opportunities for the permitting of emergency shelters

GOAL 5: PROMOTE NEIGHBORHOOD STABILITY AND HEALTH

The Housing Element promotes resilient development in safe, healthy, and just communities. It also increases resources in disinvested communities and create long-time stability through homeownership opportunities.

- Action 5.1.1: Provide first-time homebuyer programs.
- Action 5.1.2: Expand access to low-cost financing for home purchase.
- Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.
- **Action 5.2.1: Protect against smoke and wildfire.**

- Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.
- **Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.**
- **Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.**
- Action 5.2.5: Encourage earthquake-resilient housing.
- Action 5.2.6: Encourage climate-resilient housing.
- **Action 5.2.7: Consider the adoption of a disaster reconstruction overlay zone**
- **Action 5.2.8: Encourage new affordable housing in higher resource neighborhoods**
- **Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.**
- **Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration**
- Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.
- Action 5.3.1: Provide fair housing services and outreach.
- Action 5.3.2: Promote awareness of predatory lending practices.
- **Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.**

1 Introduction

This Housing Element presents the City of Oakland's strategy and commitment for how it will meet the housing needs of the community over the next 8 years (covering the years 2023-2031). In the face of a crushing regional housing crisis, the task is formidable, but essential: to make quality housing opportunities available to all Oakland residents through the Protection, Preservation, and Production of homes, and to address systemic housing inequity.

Preparation of this Housing Element comes at a time of challenge and uncertainty for many Oaklanders. It comes amid a global pandemic, a renewed call for racial justice after the murder of George Floyd, and economic and global security uncertainty. It comes while Oakland has imposed one of the strongest eviction moratoriums in the State, and it comes at a moment when the world moves closer to the tipping point of irreversible climate change. All of these systemic challenges play a vital role in the current and future shape of housing for individuals and families who call Oakland home.

The actions in this Housing Element also account for Oakland's production of affordable and market rate housing over the previous eight-year Housing Element period. The California legislature has found that the state of California has accumulated an unmet housing backlog of nearly 2,000,000 units and must provide for at least 180,000 new units annually to keep pace with growth through 2025.[1] Over the last eight years, Oakland produced sufficient housing units to meet its share of the overall state-mandated housing production goals. Many other cities throughout the state fell short of their assigned goals, which exacerbates the current housing affordability crisis and creates additional displacement forces on cities like Oakland.

However, Oakland's housing production skewed significantly toward market-rate development and fell short of producing sufficient affordable housing. This Housing Element explores why this occurred and focuses actions on increasing affordable housing production to address this imbalance. The 2023-2031 Housing Element finds that there are sufficient parcels of land under existing zoning regulations to meet the City's assigned eight-year housing production goals, and that these sites are zoned at a sufficiently high density so as to not preclude affordable housing development. Nevertheless, this Housing Element additionally concludes that even if the land is available for housing development, this is only one necessary factor to create an environment where affordable housing is constructed at sufficient levels. Given the shortfall in affordable housing production over the previous eight-year period, there is little reason to expect different results over

[1] See California Government Code Section 65589.5, subdivision (a)(2).

the next eight years unless constraints are removed, incentives are added, and additional funding sources are identified. This Housing Element seeks to do that.

Finally, the Housing Element's actions are also proposed in the context of the longer historical patterns of segregation and exclusion that have resulted in racial and geographic disparities throughout the region and within the City of Oakland. It is not by accident or coincidence that Oakland has historically had more Black residents and more lower income residents than other cities in Alameda County. Nor is it a coincidence that Black, Indigenous, and People of Color (BIPOC) and lower income residents disproportionately live in the Oakland flatlands and disproportionately not in single-family neighborhoods north of Highway 580.

The historic factors that led to this segregation are numerous and can be difficult to untangle, but it is clear that the City has an obligation to undo these patterns of past harms by taking affirmative steps to further fair housing opportunities for all residents. Again, looking at the past eight-year period, it is apparent that the majority of new housing development occurred in neighborhoods targeted for new development such as the Broadway Valdez area, Downtown, West Oakland, and other major transit corridors. These patterns of growth may be appropriate for purposes of creating transit-oriented development and reducing automobile reliance, but without other actions also serve to maintain the existing exclusivity of other neighborhoods. This Housing Element recognizes that the City's obligation to affirmatively further fair housing compels the City to redress the fact that some Oakland neighborhoods were purposefully designed to be exclusive, and preserved that exclusivity through racial covenants, unfair mortgage lending practices, and exclusionary zoning. The Housing Element proposes actions to reverse those trends.

LEARNING FROM THE PAST

What does it mean to call Oakland "home"? Oakland's current housing landscape tells the story of struggle, of systemic forces that have shaped the neighborhood geography of opportunity. To chart an equitable path forward, Oakland's history must be examined and addressed. In particular, Oakland and other governmental entities that influence fair housing choice must affirmatively further fair housing by creating policies that increase affordable housing in high-resource neighborhoods that were formed through exclusionary policies and must also bring additional resources to under-resourced neighborhoods.

The land that is now Oakland is the ancestral home of the Ohlone indigenous group who were stewards of the oak and redwood forests, grasslands, and marshlands that make up the coastal region of central and northern California for thousands of years. The arrival of Spanish missionaries in the 1760s and subsequent periods of Spanish colonization, Mexican settlement, and American urbanization of the Ohlone region greatly shifted the cultural and physical landscape. Nevertheless, this land continues to be of great importance to the Ohlone people.[2]

Oakland has historically been a destination for working people and immigrants who sought out its abundant industrial jobs and relatively affordable neighborhoods. Many of these places, including

[2] Mitchell Schwarzer, *Hella Town: Oakland's History of Development and Disruption*, (Oakland: University of California Press, 2021).

Chinatown, West Oakland, and East Oakland, formed into cultural and ethnic enclaves as a result of segregationist and racially discriminatory policies and practices, including exclusionary single-family zoning (see 'Constraints' chapter for more information).[3] Government-sponsored "white flight" suburbanization during the early 1930s, followed by disinvestment and takings in neighborhoods of color, created socioeconomic and geographic lines that were further delineated by redlining (a federally sanctioned practice during the 1930s of denying mortgages in communities of color) and racially restrictive covenants.[4] In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color. Segregation pressures and private developer interests prevented additional expansions of public housing, and Hope VI initiatives to replace larger public housing projects decreased the overall number of rent-subsidized units, particularly in West Oakland. During the period between 1960 to 1966 alone, 11,800 housing units were razed in Oakland to make room for freeways, BART projects, new public housing, and other urban renewal developments.[5]

Since the late 1990s, Oakland has seen an increase in real estate investment, which has had both positive and negative effects. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process referred to as "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[6] This activity resulted in waves of foreclosures in East and West Oakland. A significant number of these foreclosed properties were then acquired by investors, and once-affordable and stable homes flipped overnight into market-rate rentals. An influx of private capital, in part due to efforts like the City's 10K plan to revitalize the urban core with infill, market-rate housing, has reinvigorated downtown and uptown.[7] The 10K plan aimed to attract new residents, often with higher salaries than existing communities, to spend incomes at commercial establishments downtown. At the same time as this influx, rising housing prices and a lack of new affordable options created waves of residential and commercial gentrification, especially in North and West Oakland and Chinatown, with a growing pattern of displacement in East Oakland.[8] Massive regional job growth, particularly in the technology sector, coupled with the lack of supply

of housing in other cities to keep up, sent waves of new residents to the East Bay in search of more affordable homes.[9] The impacts of lack of regional supply rippled through other residential areas of the city, where communities of color faced greater vulnerability to rising housing costs than white residents.[10] California's Costa Hawkins Law, passed in 1995, also exempted newly constructed units and single-family homes from rent control and effectively banned local vacancy control laws, exacerbating displacement and socioeconomic exclusion in the city.[11] Generational economic and housing discrimination continues to impact Oakland residents: significant disparities remain in home ownership, household incomes, and health outcomes that are tied to race, income, neighborhood poverty level, and housing status, among other social and environmental conditions.[12, 13]

Nowhere has the impacts of these changes been more visible than on Oakland's streets, as homelessness increased by 83 percent from 2017 to 2022.[14] Although the individual causes for homelessness are complex, there are key structural reasons why Oakland has one of the worst homelessness crises in America. These reasons include structural racism, unstable rental markets for tenants, systemic barriers to housing for the formerly incarcerated, a lack of living wage job opportunities, and, above all else, a catastrophic shortage of deeply affordable homes. Another vital truth is that the impacts of homelessness compound over time- the longer someone is homeless, the worse the impacts on physical and mental health, social and family networks, and the ability to find, maintain, and sustain permanent housing.

The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only individual households but also the cultural identity and viability of these communities. From 2000 to 2019, Oakland lost nearly 30 percent of its Black population and significant numbers of long-time Asian Americans residing in ethnic enclaves including Chinatown.[15] The COVID-19 pandemic has highlighted and exacerbated racial and economic disparities in housing security; the pandemic has also shown the public health

consequences of Oakland's housing disparities.[16] The consequence of Oakland's complex history has and continues to shape the city's built environment, including the distribution, types, affordability, and quality of housing in Oakland.

Today, Oakland has grown to be the largest city in Alameda County and the busiest port in Northern California. Neighboring cities include Berkeley and Emeryville to the north, San Leandro to the south, Alameda across the Oakland Estuary, and Piedmont surrounded by Oakland. San Francisco is located just 12 miles west across the San Francisco Bay, connected by Interstate 80 (I-80). Oakland is known for its diverse geography, including 19 miles of bay and estuary coastline to the west, the Oakland/Berkeley Hills to the east, and Lake Merritt, a tidal lagoon located within the city's borders.

CHARTING AN EQUITABLE, INCLUSIVE FUTURE

With the legacy of inequity top of mind, the City has begun planning for a more equitable future. In 2016, the City established the Department of Race and Equity with a mission "to advance the creation of a city where diversity has been maintained, racial disparities have been eliminated, and racial equity has been achieved." The Department of Race and Equity is particularly concerned with making a difference in the determinants of equity that lead to creation of a fair and just society, including housing. In 2018, the department published the Equity Indicators Report, which serves as a baseline quantitative framework that can be used by City staff and community members alike to better understand the impacts of policy on racial groups and measure inequities. In 2022, the City declared racism a public health crisis and in response has provided funding for additional staff in the Department of Race and Equity to track performance and equity progress.

The work of the Department of Race and Equity informs the City of Oakland's Department of Housing and Community Development's (Oakland HCD) 2021-2023 Strategic Action Plan. This plan is informed by past analyses, planning, and accomplishments such as the 2016 "Oakland At Home: Recommendations for Implementing A Roadmap Toward Equity from the Oakland Housing Cabinet," and applies a race and equity lens to the City's housing investments and services in wake of the public health, fiscal, and social crises caused by COVID-19. In practice, this includes:

- transparent and regular reporting on outcomes disaggregated by race;
- Americans with Disabilities Act-compliant, accessible information provided in multiple languages;
- anti-displacement and housing production programs, policies, and initiatives focused on the most impacted vulnerable populations;
- access and opportunity pathways to and for Black, Indigenous, and People of Color (BIPOC) developers, service providers, and other contractors to the resources the City has to offer in the conduct of its housing work.

[16] "City of Oakland HCD 2021-2023 Strategic Action Plan City of Oakland Housing & Community Development Department 2021-2023 Strategic Action Plan." n.d. Accessed May 9, 2022. https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

The 2021-2023 Strategic Action Plan also details a series of specific actions and policies Oakland HCD will pursue as part of a broader strategy to protect residents from displacement, preserve existing affordable housing - both subsidized and unsubsidized, and produce new affordable housing.

Community-based organizations, many of whom have been leading housing justice efforts for decades, are also shaping housing goals rooted in racial equity. Oakland residents, community organizations, developers, and government partners created the Healthy Development Guidelines (HDG) with the intent of establishing a shared vision of a healthy, equitable community. The guidelines promote policies, goals, and development guidelines that strengthen environmental justice, sustainability, health, and racial equity in Oakland. In particular, the guidelines are intended to empower residents to address planning, policy, and public health issues in Oakland, so that no neighborhood or demographic group is unduly burdened by development that exacerbates health disparities, economic inequality, or access to open space. A City Council resolution recognized the guidelines, which commended the coalition for their collaborative and engaging partnership with the community.

The East Oakland Neighborhood Initiative (EONI) is a collaborative partnership between the City of Oakland and CBOs leveraging the Transformative Climate Communities grant administered by California's Strategic Growth Council. The EONI plan is a community-driven plan for a just transition to a regenerative economy for East Oakland, led by frontline communities, to strengthen the health, wealth, and resilience of East Oakland neighborhoods in the face of displacement and climate impacts. The plan is focused on five goals: reduce greenhouse gases, prevent displacement, improve public health, build economic empowerment, and plan "by and with" the community.

Callout: Two of the HDG's goals include enhancing access to affordable housing, particularly for vulnerable populations; preserving existing affordable housing and protecting residents from involuntary displacement.

The East Oakland Neighborhoods Initiative highlights anti-displacement among their plan goals, noting that improvements recommended in the plan must not drive out existing residents by inadvertently increasing the cost of housing. This is achieved in part through local wealth creation, well-crafted policies, and mainstreaming of affordability vehicles.

Goals, Policies, and Actions included in the Housing Action Plan seek to overcome patterns of segregation, foster inclusive communities free from barriers that restrict access to opportunity and housing, and close the gap between market rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households.

The global climate crisis will also have profound impacts on—among other things—housing security and availability in Oakland. To address the climate crisis, the City released the Oakland 2030 Equitable Climate Action Plan (ECAP) in July 2020. The ECAP is the City's strategy to create a future built on justice, equal opportunity, and environmental protection. Among the list of Transportation and Land Use (TLU) actions in the ECAP is TLU-3, "Take Action to Reduce and Prevent Displacement of Residents & Businesses." TLU-3 explicitly links anti-displacement efforts to climate equity action, as the City can only achieve its ECAP goals if Oaklanders are able to fully participate in, and benefit from, climate action without fear of displacement and homelessness.

The City is also undertaking an update to its Land Use and Transportation Element of the General Plan, in tandem with this Housing Element, to promote a land use pattern and policies that will help accelerate and target housing production. Like many other Bay Area cities, nearly every property in Oakland has been developed, with few "greenfield" (not yet developed) sites within its limits or at its borders, meaning that housing development will primarily rely on development and redevelopment of "infill" sites. Within the city limit, there are approximately 29,700 acres (46.4 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks, schools, and an international airport. The Housing Element applies to land within city limits, depicted in Figure 1-1.

Callout: Environmental Justice and Racial Equity Baseline

The Environmental Justice and Racial Equity Baseline, published in March 2022, identifies and details disparities by race and by geography that can be influenced directly or indirectly by the General Plan. The findings in the Environmental Justice and Racial Equity Baseline identify environmental justice and racial equity existing conditions and inform conversations between City staff and members of the public. In parallel with the Housing Element, this baseline will be used as a starting place for policymaking related to environmental justice, safe and sanitary housing, and other community equity issues.

Figure 1-1: Regional Map

I.2 Purpose of the Housing Element

The 2023-2031 Oakland Housing Element is one component of a larger effort: an update to the City of Oakland General Plan. The General Plan Update will create Oakland's 2045 General Plan and is a "once-in-a-generation" opportunity for all Oaklanders to work together to create a visionary blueprint for the city's future over the next 20 years. The Oakland 2045 General Plan will be made up of several "elements" covering a wide range of topics important to the future of Oakland, including environmental justice, land use, transportation, open space, noise, conservation, and safety.

The 2023-2031 Housing Element sets forth the City's housing priorities and goals—as well as its vision for both short- and long-term development—to create a fair and just city. The actions proposed by this Housing Element cover a wide range of housing issues but are largely focused on addressing two major issues: the City's shortfall of housing production and affirmatively undoing past patterns of exclusivity. State law mandates that the Housing Element be updated every eight years to reflect changing conditions, community objectives, and goals. The key components of the Housing Element include an evaluation of whether the City has sufficient zoned capacity to accommodate required housing production at all affordability levels, an assessment of whether the geographic distribution of that capacity will either further entrench or help to ameliorate existing patterns of segregation, and finally a set of programs and policies to address shortfalls and reduce identified constraints to the maintenance, improvement, and development of housing.

HOUSING ELEMENT: COMPONENTS

In California, all cities must adopt a General Plan composed of at least seven elements, including the Housing Element. All cities must also incorporate environmental justice into the General Plan. Oakland has chosen to adopt an Environmental Justice Element while also incorporating environmental justice goals into each element, including the Housing Element. The Oakland Housing Element, in tandem with the rest of the General Plan Update, is designed to assess and shape the community's housing progress and needs.

In accordance with State law, the Housing Element must include:

- A description of outreach conducted in preparation of the element;
- An analysis of progress in implementing the previous Housing Element and effectiveness of its programs and actions;
- An assessment of existing and projected housing needs;
- An analysis of special housing needs, such as those of older adults and people with disabilities;
- An analysis of existing assisted housing units at risk of conversion from affordable to market-rate;
- An analysis and inventory of resources and constraints relevant to meeting housing needs;
- An affirmatively furthering fair housing (AFFH) analysis, which guides the analysis of each set of requirements;

- An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels;
- A program that sets forth specific actions to address housing needs, with identification of responsible agencies and timelines.

REGIONAL HOUSING NEEDS ASSESSMENT (RHNA)

Oakland's Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (State HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then distributes a "fair share" portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, Oakland must identify sites sufficient to accommodate 26,251 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in Table 1-1.

A total of 6,511 units must be affordable to households making less than 50 percent of area median income (AMI), 3,750 units must be affordable to households making between 50 and 80 percent of AMI, 4,457 units must be affordable to households making between 80 and 120 percent of AMI, and 11,533 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in Appendix C.

Table 1-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Income Range*	*Needed Units*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	<$46,287	6,511	24.8%
Extremely-Low-Income (<30% AM part of Very-Low-Income in previous row)[2]	*<$27,772*	*3,256*	-
Low-Income (51-80% AMI)	$27,773-$74,059	3,750	14.3%
Moderate-Income (81-120% AMI)	$74,059-111,089	4,457	17.0%
Above-Moderate-Income (>120% AMI)	>$111,090	11,533	43.9%
Total		**26,251**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

HOUSING ELEMENT: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.

- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.

- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.

- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.

- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.

- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH) requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

ENVIRONMENTAL REVIEW

The General Plan update is being accompanied by an Environmental Impact Report (EIR), which analyzes the potential impacts attributable to the Housing Element Planning Code amendments, as well as the Safety and Environmental Justice Elements and related General Plan and Zoning Map amendments.

1.3 Oakland's Housing Approach

Two important components of the Housing Element include a plan to address Oaklanders' housing needs, and an inventory of sites suitable for housing development at all income levels, based on Oakland's 6th cycle RHNA.

HOUSING ACTION PLAN

This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2. The Housing Action Plan is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices.

The goals include:

1. **Protect Oakland Residents from Displacement and Prevent Homelessness:** Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.

2. **Preserve and Improve Existing Housing Stock:** Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.

3. **Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities:** Facilitate the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, provide a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. Locate new housing to further

access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and remove constraints to affordable housing development.

4. **Address Homelessness and Expand Resources for the Unhoused:** Recognize housing as a human right. Reduce homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

5. **Promote Neighborhood Stability and Health:** Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities.

The goals, policies, and actions form the Housing Action Plan for the 2023-2031 planning period and transform this framework into impactful action.

HOUSING SITES INVENTORY

The Housing Element also presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. To do this, the inventory includes:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units); and

- Opportunity sites where additional development could occur. Opportunity sites were selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected so as to reduce segregation and increase affordable development in high resource neighborhoods, where possible.

Chapter 3 provides a summary of the inventory approach and Appendix C includes the detailed site inventory. While the Housing Sites Inventory documents that Oakland has sufficient zoning capacity to meet Oakland's RHNA requirements, the City's Housing Action Plan includes several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures. A few examples of actions in the Housing Action Plan include:

- Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family dominated neighborhoods (Action 3.2.1);

- Reduce constraints to the development of accessory dwelling units (Action 3.2.5);

- Implement an affordable housing overlay zone that would allow for 100% affordable housing development at any density up to a specified height in most areas where housing is currently permitted (Action 3.3.5);

- Revise development standards, including allowable building heights, densities, open space, and setback requirements (Action 3.4.1);

- Remove conditional use permit requirements for housing in RD-2 and RM zones (Action 3.4.3);

- Implement objective design standards (Action 3.4.8);

- Implement a housing sites overlay zone that would allow all sites included in the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to develop owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households (Action 3.4.10);

- Promote infill, transit-oriented development (TOD), and mixed-use development (Action 5.2.2); and

- Encourage new affordable housing in higher resource neighborhoods (Action 5.2.8)

- Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities (Action 5.2.9)

The Housing Action Plan and Housing Sites Inventory reflects feedback from members of the community and the goals, policies, and actions reflect both local priorities and State obligations.

1.4 Organization and Summary of the Housing Element

The Housing Element is divided into four chapters: an Introduction, a Summary of Public Participation, a Summary of the Housing Sites Inventory, and the Housing Action Plan. In addition, there are several technical appendices that provide extensive detail on a range of topics, including many of the checklist items mandated by state law. This includes an evaluation of the City's 2015-2023 Housing Element, an assessment of housing needs, resources, and constraints, and the comprehensive housing sites inventory. A summary of the findings from each technical appendix is provided in the main body of the Housing Element. It is organized as follows:

- **Chapter 1 – Introduction:** Provides an overview of State requirements, a summary of the organization of the Housing Element, and an explanation of the Housing Element's relationship to the General Plan.

- **Chapter 2 – Public Participation:** Provides a description of the public participation process and a summary of community outreach activities.

- **Chapter 3 – Summary of the Housing Sites Inventory:** Summarizes the City's ability to accommodate the RHNA on available land, and the selection of sites in light of AFFH requirements.

- **Chapter 4 – Housing Action Plan:** Institutes the goals, policies, and actions of the 2023-2031 Housing Element, and provides quantified objectives. The Plan includes five goals: protect Oakland residents from displacement and prevent homelessness; Preserve and improve existing affordable housing stock; Close the gap between affordable and market-rate housing production by expanding affordable housing opportunities; Address homelessness and expand services for the unhoused; and Promote neighborhood stability and health.

- **Appendix A – Evaluation of the 2015-2023 Oakland Housing Element:** Summarizes the City's achievements in implementing goals, policies, and actions under the previous Housing Element. While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Oakland recognizes that more can and should be done to close the gap on affordable housing construction. Oakland further recognizes that many cities in the Bay Area region have failed to meet market rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland.

- **Appendix B – Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify Oakland's housing needs. Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland—Oakland's Black population has decreased from 36 percent in 2000 to 23 percent in 2020. Oakland's rates of homelessness have also significantly increased from 2017-2022 (83 percent), though the rate of increase has decreased from the period of 2019-2022 (23 percent, compared to 47 percent from 2017-2019). Oaklanders of color also disproportionately face lower rates of homeownership, higher housing cost burden, overcrowded conditions, and homelessness. These trends are being compounded by demographic factors such as the rapid aging of the population and continued prevalence of poverty.

- **Appendix C – Sites Inventory:** Outlines the selection and capacity methodology used to identify sites to accommodate the RHNA. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas.

- **Appendix D – Assessment of Fair Housing:** Identifies fair housing issues and solutions to meet Oakland's AFFH mandate. Oakland is incredibly diverse at the City level, but at the neighborhood level, geographic patterns of income segregation and racial/ethnic segregation are clear. Additionally, Oakland has racially and ethnically concentrated areas of poverty localized to four areas in the City. Neighborhoods across Oakland have received varying levels of investment, which is reflected in the unequal opportunities available for communities of color. Additionally, access to economic, educational, and environmental opportunities vary greatly across the City. Comparing access to opportunity with displacement risk and gentrification across the City, areas that are exclusive, stable, or in the advanced stages of gentrification offer the best access to opportunity. Much of the City has gentrified in recent years, leaving residents in the few (predominantly BIPOC) neighborhoods that have not gentrified at risk of displacement. Oakland is further impacted by disproportionate housing needs: overcrowding rates are higher in the City than in the County/Bay Area Region, cost burden rates are high (highest for Black and African-American households and lowest for white households), and homelessness is a major public health crisis in the City. Individuals experiencing homelessness increased 83 percent between 2017 and 2022 and individuals identifying as Black or African American are disproportionately represented in the unhoused population.

    - The goals and actions concluding this appendix have a strong focus on investing in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps (i.e. those neighborhoods with low access to opportunity). These neighborhoods have high concentrations of BIPOC populations.
- **Appendix E – Housing Resources and Opportunities**: Assesses the City's financial and administrative resources available for future housing development. This appendix describes and assesses the resources available for the development, rehabilitation, and preservation of housing in Oakland. The following sections provide an overview of the financial and administrative resources to support the provision of affordable housing. These include Oakland Housing Authority funds, the Affordable Housing Trust Fund, Community Development Block Grant Funds, and other sources of funding. The appendix also describes additional housing resources or considerations relevant for the provision of housing in the city, including publicly-owned and surplus land, as well as utility and service systems to support new housing.

- **Appendix F – Housing Constraints:** Analyzes governmental and non-governmental constraints to the development of housing. Governmental constraints on affordable housing construction include a lack of local and State funding to support the development of affordable housing, a lack of clarity on permit streamlining processes, higher costs for all housing developments due to a lack of City staff capacity. Both market rate and affordable housing also face constraints from development standards and green building standards. Non-governmental constraints on housing development include environmental constraints such as risk of seismic activity, infrastructure needs for infill housing, rising interest rates, and the high cost of land, materials, and labor in Oakland.

- **Appendix G – Opportunities for Energy Conservation:** Presents opportunities to develop housing in a sustainable manner. While electrification is one of the primary ways to reduce the environmental impact of a building and improve energy performance, residential buildings in Oakland face a range of difficulties when pursuing electrification including lack of electrical panel or service capacity, and the extensive renovations and remediations that the retrofitting for electrification might trigger. Residents and property owners in Oakland have access to a variety of resources to assist with and incentivize residential energy conservation including local and state financing programs, and local resources such as solar rebates and incentives, and assistance with conversions of gas stoves to induction cooktops. Low-income Oakland utility customers who qualify can also take advantage of State and Federal Energy Bill assistance and energy efficiency programs.
- **Appendix H – Glossary.** Defines key terms used in the Housing Element.
- **Appendix I – Public Outreach Materials.** Includes meeting materials, outreach and survey summaries.
- **Appendix J – Proposed Rezoning and Height Changes.** Illustrates proposed rezoning and height changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods. The proposed changes are also available as an interactive map.
- **Appendix K – Findings Letter from California Housing and Community Development (State HCD) dated 9/28/22 and Responses.** Provides a brief summary of the changes in response to the State HCD letter and where they were made in the revised draft.
- **Appendix L – Response to Public Comments.** Provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period. Appendix L-1 includes comment letters; Appendix L-2 includes responses.
- **Appendix M –Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites)** The City of Oakland has received a number of housing site recommendations from the public. Some of the sites are in the inventory already (shown in yellow); others have been analyzed for Phase I upzone potential or other applicable zoning changes to facilitate housing development. For sites not included in the inventory, the City will consider land use changes as part of the longer-term General Plan Update.

1.5 Relationship to Other General Plan Elements

State law requires the Housing Element to contain a statement of "the means by which consistency will be achieved with other general plan elements and community goals" (California Government Code, Section 65583(c)(8)). There are two aspects of this analysis: 1) an identification of other General Plan goals, policies, and programs that could affect implementation of the Housing Element or that could be affected by the implementation of the Housing Element, and 2) an identification of actions to ensure consistency between the Housing Element and affected parts of other General Plan elements.

As described above, the City is undergoing a comprehensive update to the General Plan. The General Plan update is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, which are due by the beginning of 2023, as well as preparation of a Racial Equity Impact Assessment, Zoning Code and Map update, and a new Environmental Justice Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by 2025.

The Land Use and Transportation Element (LUTE) of the Oakland General Plan was last comprehensively updated in 1998. The vision and specific policies contained in the LUTE seek to encourage and facilitate the types of infill, re-use, mixed-use, and central city/corridor-oriented residential development that are the focus of the Housing Element and the City's ability to accommodate its regional housing allocation. Most of the housing to be provided in Oakland will result from the development or redevelopment of underutilized and infill parcels. In addition, rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing.

The goals, policies, and programs contained within this Housing Element will also inform the strategies included in the updated LUTE. As the Housing Element will be adopted prior to the LUTE update, the general distribution, location and extent of land uses as well as population density and building intensity standards prescribed by the current Planning Code are used to determine the City's ability to accommodate residential development. Some initial amendments to the Land Use and Transportation Element and Planning Code and initial zoning map changes will be made during Phase I; this will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Anticipated development on these sites is expected to be in compliance with updated policy standards for noise, safety, open space, recreation, and conservation contained in the other General Plan elements.

The policies in the other updated General Plan elements will advance the ability of the City to achieve the objectives contained in the 2023-2031 Housing Element. Likewise, the Housing Element policies will advance the implementation of policies and programs in the other updated General Plan elements. Evaluation of General Plan consistency will be made as part of adoption of the Housing Element. As other elements are updated as part of Phase 2, consistency will be achieved and maintained as part of General Plan adoption and maintained through any General Plan amendments. The City has therefore determined that the updated Housing Element is consistent with the General Plan.

1.6 Sources of Information

In preparing the City's Housing Element, various sources of information were utilized. As a starting point, the Element used ABAG-prepared local data and AFFH package pre-certified by State HCD for use in sixth cycle housing elements, which provides the basis for population and household characteristics and affirmatively furthering fair housing resources. Where necessary, several

additional and more current sources are used to provide reliable updates of the ABAG data package. The sources used in the ABAG data package and many additional sources are listed below. Public input from members of the public, community-based organizations (CBOs), and community leaders, was also a key source of information for this Housing Element. More details on what information was collected from these partners can be found in Chapter 2.

1. ABAG Pre-Certified Housing Needs Data Package, 2021
    a. Federal Financial Institutions Examination Council's (FFIEC) Home Mortgage Disclosure Act loan/application register (LAR) files

2 Public Participation

Inclusive engagement and public participation have been key to the preparation of Oakland's Housing Element. Public participation is an ongoing process that will continue to occur as the General Plan is updated. Outreach completed as part of phase 1 of the update process will continue to inform phase 2 of the General Plan update. All community outreach is conducted through a racial equity lens to identify actions to affirmatively further fair housing, increase community assets, decrease pollution exposure, and improve overall health.

The community engagement effort is composed of an extensive outreach process that seeks to engage stakeholders throughout the community, with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and often most negatively impacted by City policies and represents a diligent effort to include public participation from all economic segments of the community, consistent with outreach requirements under AB 686. All community input shared will be used to "ground truth" data based on peoples' lived experience, inform areas of focus for General Plan elements, and guide development of General Plan policies. Outreach that informed the development of this Housing Element is summarized in the following chapter, and materials used in the outreach process are included in Appendix I. Appendix J provides an overview of public comments and staff responses to illustrate how the revised draft reflect public input received during the public comment period.

2.1 Summary of Community Outreach Activities

GENERAL PLAN UPDATE OUTREACH

The City, based on feedback received from community members, implemented an innovative approach by bringing on two collaborating consultant teams to assist on the General Plan Update. The City partnered with both a Community Consultant Team – Deeply Rooted Collaborative, and a Technical Consultant Team – Dyett and Bhatia, to ensure a planning process that: 1) meets state deadlines and requirements for the GPU, and 2) dedicates significant resources to deep and meaningful community engagement. The Community and Technical Consultants coordinate closely. The team leads meet weekly, and the entire project team meets biweekly to share key findings and provide feedback. Both Community Consultant and Technical Consultant outreach and feedback is incorporated into all components of the Housing Element. This approach aligns with advancing the City's critical mission of creating a just and fair City for all (Oakland Municipal Code Section 2.29.170.1).

Community engagement efforts for the General Plan Update include an extensive and inclusive outreach process, engaging stakeholders throughout the community with additional resources

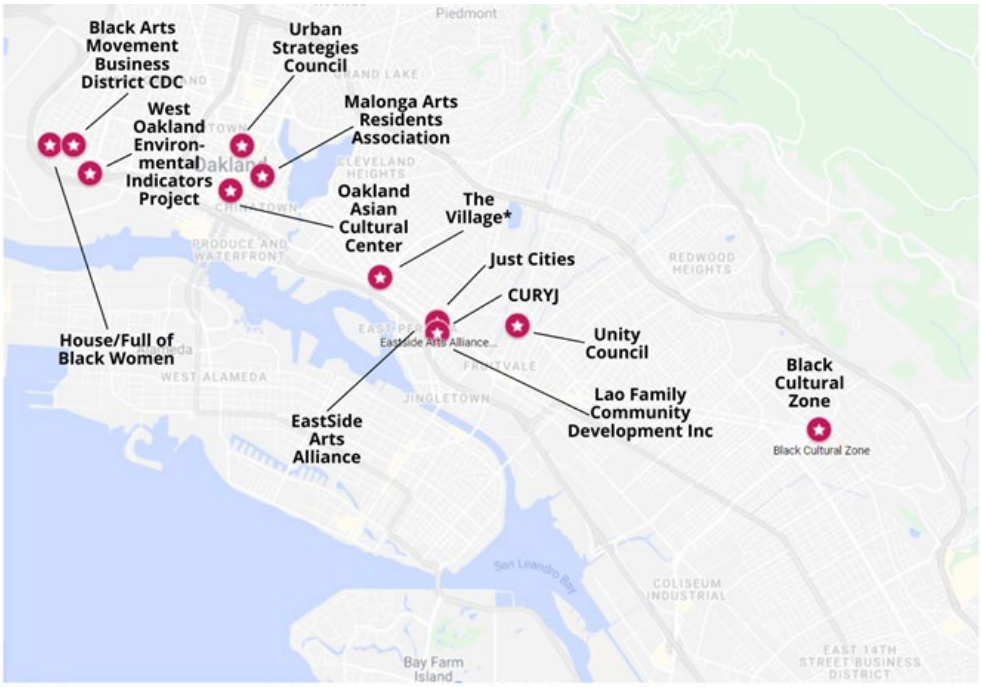
dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and most negatively impacted by City policies.

The Community Consultant Team, Deeply Rooted Collaborative, focuses on engagement with the following key communities and geographic areas:

- Communities: Unhoused; formerly incarcerated; low-income Asian, Pacific Islander, Black, Latinx, multiracial communities including those experiencing environmental injustices

- Outreach Geographies: Fruitvale, West Oakland, East Oakland, Chinatown, Eastlake, San Antonio

Deeply Rooted has three organizations providing central support through the design and coordination of the overall structure for community engagement, providing technical assistance and community education in planning, and administrative support.



- EastSide Arts Alliance | Cultural Programming Partner

- Just Cities | Technical Assistance/Community Education Partner

- Urban Strategies Council | Administrative Partner

The Deeply Rooted Collaborative in partnership with community partners as shown in Figure 2-1. Deeply Rooted's community partner roles are listed in Table 2-1.

Figure 2-1: Deeply Rooted Collaborative

*The Village operates as a network of encampments across Oakland without one address.

Table 2-1: Deeply Rooted Collaborative Community Partner Roles

Community Partner	*Community/ Outreach Geography*
The Black Cultural Zone Community Development Corporation	Black Community | East Oakland
CURYJ	Formerly incarcerated, Black and Latinx | Fruitvale
House/Full of Black Women/ Deep Waters Dance Theater	
Lao Family Community Development, Inc	Southeast Asian American community
Malonga Arts Residents Association (MARA)	Black and Brown communities, and partnership with members in Chinatown
Oakland Asian Cultural Center (OACC)/ API Cultural Center	Asian American community| Chinatown
Unity Council	Latinx community | Fruitvale
The Village in Oakland	Unhoused curbside communities in North Oakland, West Oakland, Downtown, and East Oakland
West Oakland Environmental Indicators Project.	Environmental Justice | West Oakland
Black Arts Movement Business District, CDC (BAMBD, CDC)	West Oakland (Lower Bottoms), Artists, flatland communities of color, those invested in the animation of BAMBD, CDC and its stakeholders

Community Engagement and Outreach Summary

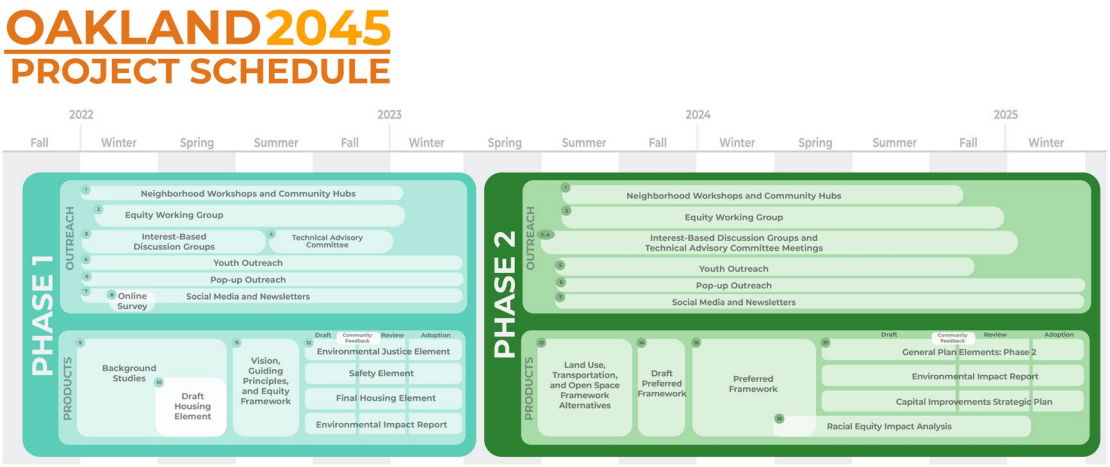
A variety of outreach activities such as workshops, focused discussions, pop-ups, open houses, porch chats, and community hub events are planned throughout the entire process. All community input shared will be used to ground truth data based on peoples' lived experience, inform areas of focus for the update of General Plan elements, and guide development of General Plan policies.

Input related to housing overlaps with many General Plan topic areas and will be incorporated into both the eight-year Housing Element Update as well as into elements with a longer planning horizon, such as the Land Use and Transportation, Environmental Justice, and Safety Elements. A summary of the General Plan update project schedule is provided in Chart 2-1. Information on all community engagement events, including engagement summaries; workshop and townhall presentations, recordings, meeting summaries; and discussion group summaries, are provided via the General Plan Update website at https://www.oaklandca.gov/topics/meetings-and-events. A summary of these engagement activities is described below:

- **Popup and Community Hub Events:** Since November 2021 to March 2022, the GPU Deeply Rooted Collaborative has conducted pop-up events in Eastmont, Fruitvale, San Antonio, Chinatown, West Oakland, and Downtown. For example, in West Oakland these events have been porch-side chats and a pop-up at Hoover Elementary. Engagement has also been integrated into larger community events like the Oakland Asian Cultural Center's (OACC) Asian Pacific New Year Celebration and the Black Joy parade. At these community-embedded events, the team has engaged with over 1,006 people, with a majority being individuals from communities of color. These events sought to hear community concerns, ideas and solutions through interviews and focus group conversations. Community concerns that rose to the top included affordability, displacement, disinvestment, housing quality, pollution (industry and cars), lack of parks, collisions, and illegal dumping.
- **Townhalls**: Two townhalls were held on March 26, 2022, and April 7, 2022. The townhall on March 26, 2022, introduced the General Plan Update process and gathered community input on a vision for the City in 2045, as well as local issues and opportunities that should be addressed in the General Plan. The townhall on April 7, 2022, focused on equity across all issues, with a special focus on EJ and safety priorities in the City.
- **Community Education Workshops:** Two community education workshops were hosted on April 8, 2022, and April 9, 2022, and organized by the Deeply Rooted Collaborative Community Engagement partner to review the past and present policies that led to today's conditions in housing and environmental justice. Over 100 people attended the workshops. Speakers included Oakland unhoused leader Needa Bee (The Village in Oakland), EJ leader Ms. Margaret Gordon (West Oakland Environmental Indicators Project), Margaretta Lin (Just Cities) and Diana Benitez (Just Cities). Attendees shared their frustration regarding ongoing displacement and disinvestment and various community-centered solutions that would bring much needed resources to communities of color in Oakland without displacement.
- **Youth Engagement:** Youth engagement for the GPU will take the form of a Deeply Rooted Fellowship with 15 – 20 fellows. The Fellowship will be a 2-to-3-year commitment and fellows will be provided with a monthly stipend. Planning, design, and training of the

fellowship program will be done in coordination with Y-Plan. Fellows will coordinate with the Oakland Youth Advisory Commission (OYAC) and will be engaged in outreach activities such as community-based events, presentations to the community and schools, and social media outreach. Recruitment began in April 2022. On August 31, 2022, twenty (20) young leaders were selected as inaugural Deeply Rooted (DR) Fellows. These young people will lead DR outreach efforts to engage Oakland's youth in the GPU update. DR Fellow activities will include interviewing and surveying young people about their visions and aspirations for the City; educating elementary, middle and high school students about the OGP; gathering data and conducting research to identify the challenges young people face in the City and their proposed solutions; and, implementing a social media campaign to increase youth awareness of the GPU.

- **Neighborhood Group Meetings:** Staff are working with Neighborhood Service Coordinators to present at Neighborhood Crime Prevention Councils (NCPCs) on topics including housing, environmental justice, industrial lands and safety and natural hazards and receive feedback. Staff have presented at several NCPCs and will continue to engage and obtain feedback. Staff are presenting to other Neighborhood – Community groups, faith-based organizations, and at other community congregation events as well.
- **Equity Working Group:** Convened by the Deeply Rooted Collaborative, the Equity Working Group (EWG) is comprised of 20 diverse community members who will: 1) Identify the major challenges and impacts of the General Plan (housing, safety, environmental justice, land use, transportation, and parks); and 2) Advocate for solutions that advance equitable and healthy communities for Oakland residents. Each member will receive a stipend. 20 EWG members who met the following criteria were selected through an interview process from a total of 66 applicants:
  - Hard to reach communities: People from communities that the City traditionally has trouble engaging with including Indigenous, unhoused, formerly incarcerated, low-income, Asian, Black, Latinx, multiracial, people with disabilities, undocumented, and people experiencing environmental injustices.
  - In target geographic areas of: West Oakland, East Oakland, Chinatown, and Fruitvale.
  - Age diversity: People at different stages of their lives to ensure varied knowledge and experiences.
  - Diversity of gender and sexual orientation: To ensure women's and LGBTQ+ perspectives are included in this process.
  - People who own small businesses in Oakland.



Additional information about the EWG selection process can be found at https://www.oaklandca.gov/news/2022/general-plan-equity-working-group-members-selected.

- **Technical Advisory Committee:** The Technical Advisory Committee (TAC) is comprised of internal City department representatives as well as other Oakland-based, neighboring, and regional governmental agency representatives. The TAC serves to advise on key strategies to address Oakland's big issues related to housing, environmental justice, safety, and other topics; review community input collected at key points in the process; and inform, discuss, and provide technical direction on policies and actions. The second TAC

meeting was held on March 7, 2022 and TAC members provided recommendations for housing strategies/actions for housing production, preservation, and protections.

- **Study Sessions with Official Decision-Making Bodies:** The Planning Commission, City Council, and various boards and commissions are active participants in the GPU and will have opportunities to provide direction at each Stage in the process. The project team will continue to check in with these decision-making bodies at key milestones to ensure that the project remains on the right track in terms of process, direction, and overall vision. Engagement will take the form of study sessions and informational presentations to review products and generate feedback on drafts. The Planning Commission and Special Community & Economic Development Committee met on February 2nd and February 22nd to discuss potential housing site locations and recommended housing strategies and actions.

Chart 2-1: Oakland 2045 Project Schedule

HOUSING ELEMENT OUTREACH

To supplement efforts that were part of the General Plan update, a series of targeted activities related to housing were held prior to the release of the public Draft Housing Element. Additional opportunities for feedback will occur after plan release as well. These efforts are summarized in Chart 2-2 and described below:

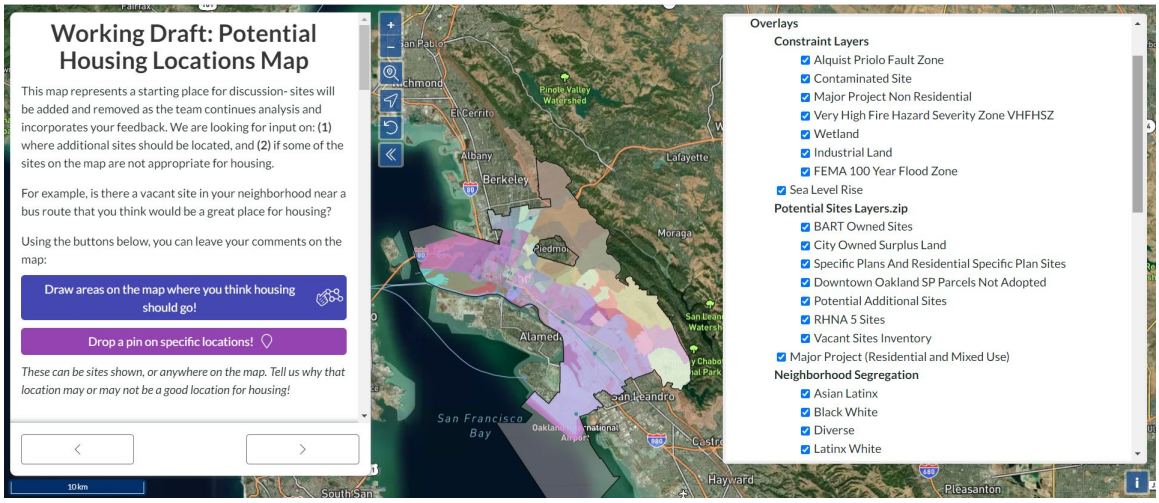
Chart 2-2: Housing Element Outreach Timeline

Housing Workshops: The team hosted four virtual housing workshops on February 10, 2022, February 17, 2022, March 12, 2022, and June 9, 2022 to solicit feedback on the Draft Housing Element. Approximately 200 people participated in these three virtual workshops. The first workshop provided background information on the General Plan, the Housing Element, and housing sites inventory requirements. Workshop 2 sought to gather input on potential housing programs. Workshop 3 focused on community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. Workshop 4 was held on June 9, 2022, and

sought Oaklanders' input on housing sites and proposed strategies included in a public review Housing Element draft before sending it to the California Department of Housing and Community Development (State HCD). Summaries of these workshops are included in Appendix I.

Discussion Groups: A series of focus group discussions were held on the housing-related topics to solicit targeted feedback from organizations and individuals with direct experience with housing provisions and housing-related services. Discussion participants included organizations that may not have traditionally participated in the past including housing justice advocates, tenant rights organizations, faith-based organizations, and other community organizations.

Summaries of these meetings, including the names of participating groups, are provided in Appendix I; see below for the themes of the discussion groups:



- Focus Group Discussion 1 (February 2, 2022): Housing Sites
- Focus Group Discussion 2 (March 10, 2022): Production, Preservation, and Protections
- Focus Group Discussion 3 (June 8, 2022): Draft Housing Element

Housing Element Update Survey

The Oakland Housing Element Update Survey accompanied the first housing workshop on planning where housing should go. The survey was open from February 11, 2022, through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland.

The interactive map in the survey displayed the initial sites under consideration for the Housing Element and focused on identifying community priorities and recommendations for additional locations. See Figure 2-2 below for a snapshot of the interactive map. As an optional component of the survey, respondents were asked to describe their zip code, and race or ethnicity. The results of this survey guided the selection of sites identified in Chapter 3 and Appendix C, and a summary of the survey's findings is provided in Appendix I.

Figure 2-2: Interactive Map Survey Snapshot- Draft Housing Element Plan Release

The Draft Housing Element was released on May 12, 2022 and was made available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element. Pursuant to AB 215, the city made the first draft available for public review for 32 days between May 12, 2022, to June 13, 2022.

The City also created an interactive Konveio page so the community could read, post comments, and submit questions on the Draft Housing Element and Appendices. During the 30-day mandatory public review period, a fourth Housing Element workshop was held on June 9th to describe the community outreach process and Housing Element content (with particular focus on the Sites Inventory and Housing Action Plan) and provide opportunity for the members of the public to ask questions.

During this initial comment period, the City received 18 letters from Oakland residents and organizations. Staff also sought feedback on the 2023-2031 Draft Housing Element from the Community and Economic Development (CED) Committee of the Oakland City Council on May 24, 2022, and from the Planning Commission on May 18, 2022, and June 1, 2022. City staff incorporated changes to the draft prior to submittal to State HCD where it was feasible to do so within the short time period.

The city provided its draft Housing Element to State HCD for the first 90-day review period on June 30, 2022. The Draft Housing Element (clean and redlined versions) submitted to State HCD is available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element.

EXTENDED PUBLIC REVIEW PERIOD FOR COMMUNITY FEEDBACK

To ensure that the community had enough time to review and comment, the City committed to keeping the first draft of the Housing Element available for public comment during the 90-day State HCD review period, until September 30, 2022. The first Draft Housing Element was available for public review and feedback for a total of 142 days between May 12, 2022, until September 30, 2022.

Staff presented the draft Housing Element to neighborhood and community groups such as Monarch Senior Homes – Satellite Affordable Housing Associates (SAHA) development, East Bay Housing Organizations (EBHO)'s Oakland Committee, Allen Temple Public Ministry's Virtual Townhall, Rockridge Community Planning Council (RCPC) Townhall and the Piedmont Avenue Neighborhood Improvement League (PANIL). Finally, staff conducted study sessions with the City Council and Planning Commission in October to seek additional feedback on the 2023-2031 Draft Housing Element.

Equity Working Group

Between June 2022 and October 2022, the Equity Working Group (EWG) group met eight times to provide feedback and housing policy recommendations on the 2023-2031 Draft Housing Element. EWG members also shared a list of their housing policy recommendations and met with the Directors from the Planning and Building (PBD), Human Services Department (HSD), Oakland Housing and Community Development (Oakland HCD) and the Office of the City Administrator (CAO) and the CAO Homelessness Division to review the policy recommendations.

Response to Public Comments

Appendix L provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period.

Analysis of Impediments to Fair Housing Choice

The assessment of fair housing contained in Appendix D relies in part on outreach done in preparation of Alameda County's 2020 to 2024 Regional Analysis of Impediments to Fair Housing Choice (AI).[17] Historically, Oakland has prepared its own AI every five years as a U.S. Department of Housing and Urban Development (HUD) requirement. However, in 2020, the City joined various Alameda County cities and Housing Authority agencies to complete a regional AI.

A year-long community engagement process for the 2020 to 2024 AI consisted of three meetings and a seven-page survey between June 2019 – November 2019. The survey was translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include racial and ethnic minorities, people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses. Key data from the 2020 to 2024 AI is used in the Assessment of Fair Housing in Appendix D: Affirmatively Furthering Fair Housing.

Housing Element Community Education Materials

The GPU Deeply Rooted in Oakland Partnership is preparing a Housing Element community education summary intended to synthesize the complex and lengthy housing element as well as

[17] Alameda County, "Regional Analysis of Impediments to Fair Housing Choice." February 2020. Accessible at https://cao-94612.s3.amazonaws.com/documents/ALAMEDA-COUNTY-REGIONAL-ANALYSIS-OF-IMPEDIMENTS-TO-FAIR-HOUSING-Final-AI_Combined_2-24-20.pdf

community priorities heard throughout the year of outreach and conversations with Oaklanders (i.e., pop-ups, Equity Working Group, Deeply Rooted Community Partners). This summary will provide a focused look at housing issues and their structural roots, key points, community solutions and what policies were integrated into the element to help address these issues. It will also provide a deep dive into people's history and how it shaped housing quality, access, and opportunity for the following areas: Citywide, Chinatown, East Oakland, West Oakland, and North Oakland. The summary is expected to be released in winter/early spring of 2023.

2.2 Public Participation Themes

Across discussion groups, workshops, EWG meetings, and other community engagement events, several key themes emerged that informed development of this Housing Element Update's goals, policies, and actions. This list is not comprehensive, but the key themes listed below are reflected in the overarching goals identified in Chapter 4: Housing Action Plan. The goals, policies, and actions seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

- **Address Homelessness: "Housing is a Human Right."** A common refrain from participants was that Oakland should recognize housing as a human right and focus on addressing the homelessness crisis. As experts from the National Law Center on Homelessness and Poverty note, "a right to adequate housing is not a requirement that states build free housing for the entire population, rather, it devotes resources and protective measures to prevent homelessness, discrimination, and promote permanent stable housing."[18] Participants expressed distrust with the City and frustration with the current unaffordability of housing and ongoing displacement. They suggested a wide variety of strategies to house the unhoused community, including treating unhoused populations with dignity, stopping the current encampment management policy, more flexible building types, temporary units, permanent supportive housing, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including a moratorium on market rate housing to balance the speed at which housing is built with the need to ensure that new housing is high-quality, affordable, and habitable, partnering with community groups that work with unhoused communities, and creating housing options that include wrap-around services. The Housing Element incorporates this input in the following ways:
  - **Goals:** 1, 2, 3, 4
  - **Policies:** 1.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.7, 4.1, 4.2, 4.3

[18] https://www.kqed.org/news/11801176/what-would-housing-as-a-human-right-look-like-in-california

  - **Actions:** 1.1.1 through 1.1.14, 2.2.1 through 2.2.8, 3.1.1, 3.1.2, 3.3.1 through 3.3.7, 3.3.9, 3.3.11 through 3.3.15, 3.3.17, 3.3.18, 3.5.1 through 3.5.3, 3.6.1, 3.6.2, 3.6.5, 3.7.1, 3.7.2, 3.7.4, 3.7.6, 4.1.1 through 4.1.4, 4.2.1 through 4.2.5, 4.3.1 through 4.3.6

- **Protect Oakland Residents from Displacement and Preserve Existing Affordable Housing.** Over the last two decades, housing costs in Oakland have risen dramatically – meaning many Oakland residents cannot afford to buy or rent a home within their own neighborhood. Participants expressed frustration with increasing displacement pressures while the stock of affordable housing throughout the city decreases, including both subsidized housing and "naturally occurring affordable housing" – or unsubsidized housing that is affordable at market prices. Participants also discussed how Oakland's cultural institutions and history are at risk of loss due to continuing gentrification. To mitigate the pressures of displacement and gentrification, Oakland residents suggested a number of potential anti-displacement strategies, including enhanced rent stabilization measures, stronger just cause for eviction protections, increased enforcement of anti-harassment tenant protections, and historic preservation programs to preserve cultural institutions. Participants also discussed ways to preserve the city's existing affordable housing stock, including the implementation of a Community/Tenant Opportunity to Purchase Act, innovative solutions to maintain permanent affordability like community land trusts, additional acquisition and conversion to affordable housing efforts, live/work preferences for Oakland residents, and programs to physically rehabilitate homes to allow long-time residents to enjoy new community amenities. Participants also pointed to a need for better data collection to ensure accountability and to better understand and target anti-displacement resources. The Housing Element incorporates this input as through the following goals, policies, and actions:

  - **Goals:** 1, 2, 3
  - **Policies:** 1.1, 2.1, 2.2, 3.3, 3.5
  - **Actions:** 1.1.1 through 1.1.14, 2.1.1 through 2.1.6, 2.2.1 through 2.2.8, 3.2.7, 3.3.12, 3.3.18, 3.5.1, 3.5.2, 3.5.4

- **Focus on Building more Housing Affordable to Extremely Low, Very Low, Low, and Moderate Incomes.** Producing new affordable and deeply affordable housing options was identified as a key strategy to prevent displacement. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to build more inclusive neighborhoods add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, inclusionary zoning, changing the zoning to increase density in primarily single-family areas like Rockridge, supporting homeowners in the construction of accessory dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and reducing the amount of discretionary review required for new housing projects. Other recommendations included creating housing commission and neighborhood planning councils for ongoing resident leadership to decide the kind of housing development. The City of Oakland recognizes the need to increase housing supply generally, and, with

priority given to increasing housing affordable to very-low-, low-, and moderate-income households in the following ways:

  - **Goals:** 3
  - **Policies:** 3.1 through 3.8
  - **Actions:** 3.1.1, 3.1.2, 3.2.1 through 3.2.6, 3.3.1 through 3.3.18, 3.4.1, 3.4.3 through 3.4.11, 3.5.1 through 3.5.4, 3.6.1 through 3.6.5, 3.7.4 through 3.7.6

- **Address Housing Quality Issues.** Housing quality issues can have detrimental impacts on people's physical and mental health. Through neighborhood outreach processes, many Oaklanders described housing quality issues they were living with, such as overcrowding, unsafe building conditions, and lack of maintenance, caused by landlord neglect, lack of funds for upkeep or housing burden, or fear of reporting these issues. Community-recommended strategies to address these issues included programs/grants to landlords and homeowners to make repairs; universal design to allow all Oaklanders to remain in their homes as they age, or to help mobility-impaired residents; and tax credits or programs to address other housing habitability concerns, like indoor air quality. The Housing Element addresses housing quality issues in the following ways:
  - **Goals:** 2, 5
  - **Policies:** 2.1, 5.2
  - **Actions:** 2.1.1 through 2.1.6, 3.3.12, 5.2.1, 5.2.5, 5.2.6
- **Keep Oakland Communities Together.** All Oakland neighborhoods deserve high-quality amenities, more affordable housing, and other public investments, especially in areas that have suffered from disinvestment of the past. However, concerns about gentrification and displacement associated with new investment were top of mind for many Oaklanders. Scores of people expressed how difficult it was to pay the rent in light of rising costs. People who have long generational roots in Oakland have been displaced but continue to come to Oakland to be with community and work. This includes a significant loss (30 percent) of Oakland's Black population from 2000 to 2019. As some community members noted, Oakland neighborhoods are like villages where people care for and nurture each other, and displacement means these villages are fragmented, and culture is lost. Oaklanders recommended creative ways to bring back displaced people as homeowners, such as support for co-ops, land trusts, and shared multi-unit buildings. Other creative ways to prevent displacement include creation of cultural district/anti- displacement zones, a human health/socioeconomic impacts analysis to analyze displacement and homeless impacts of market rate projects before the City provides permits or zoning changes. Another way they saw keeping Oakland communities together was through investment to the most impacted communities via municipal reparation to redress Oakland's history of eminent domain and urban renewal and for Black Americans who are descendants of chattel slavery. The Housing Element addresses displacement and cultural preservation in the following ways:
  - **Goals:** 1, 2, 5
  - **Policies:** 1.1, 2.1, 2.2, 3.5, 5.1, 5.3

  - **Actions:** 1.1.1 through 1.1.14, 2.1.4, 2.2.1 through 2.2.8, 3.2.2, 3.3.8, 3.3.12, 3.3.18, 3.5.1 through 3.5.4, 5.1.1 through 5.1.3, 5.3.1 through 5.3.3

- **Building in Accountability and Success Metrics.** Oaklanders desire more transparency around housing issues and actions in the City, and to be heard by elected officials and City departments stressing the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals. The Housing Elements aims to increase transparency and accountability in the following ways:
  - **Goals:** 1 through 5
  - **Policies:** 1.1, 2.1, 3.2, 3.3, 3.7, 4.1, 4.2, 4.3, 5.1, 5.2
  - **Actions:** 1.1.8, 1.1.9, 2.1.3, 3.2.5, 3.3.13, 3.3.17, 3.7.1, 4.1.2, 4.2.4, 4.3.1, 5.1.1, 5.1.2, 5.1.3, 5.2.11

3 Summary of the Housing Sites Inventory

The Housing Element of the General Plan must include an inventory of land suitable and available for residential development to meet the city's regional housing needs allocation (RHNA) by income level. This inventory is known as the Housing Sites Inventory ("Inventory"). This chapter provides a summary of the full Sites Inventory, available in Appendix C.

3.1 Regional Housing Needs Allocation

As required by State housing law, all California cities and counties must plan for the housing needs of all their residents, at various income levels. This number is called the Regional Housing Needs Allocation (RHNA). For the planning period 2023 to 2031 (also known as the 6th housing cycle), Oakland must plan for 26,251 new units, or approximately six percent of the total allocation for the nine-county Bay Area region. Oakland's allocation is a 77.8 percent increase from the prior cycle's allocation of 14,765 new units, but many nearby jurisdictions have been assigned a larger percentage increase than Oakland compared to their prior RHNA allocation. This is in alignment with the regional goal of ensuring all cities and counties are affirmatively furthering fair housing. Table 3-1 shows the income breakdown of the Oakland RHNA with an additional buffer, as recommended by the State, to account for any loss due to reductions in density.

Table 3-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need, pursuant to Government Code Section 65583(a). Although extremely-low-income housing need is not explicitly projected in the RHNA, this group often requires the most subsidy and assistance to generate a sufficient number of housing units.

Source: ABAG, Final RHNA Plan, December 2021

3.2 Capacity to Accommodate the RHNA

Government Code Section 65583.2(c) requires that local jurisdictions determine their realistic capacity for new housing growth by means of a parcel-level analysis of land resources with the potential to accommodate residential uses. Oakland's analysis of potential to accommodate new housing growth has considered physical and regulatory constraints, including: lot area and configuration, environmental factors (e.g. slope, sensitive habitat, flood risk), allowable density, and other development standards such as parking requirements and building height limits.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. This rezoning proposal will unlock new sites that can accommodate affordable housing within high resource neighborhoods. Sites included in the inventory reflect those that are most likely to develop during the planning period and meet the RHNA; sites that are newly made available by one of the rezoning efforts identified in the Housing Action Plan are not considered as part of this inventory since they do not reflect zoning conditions at the beginning of the Housing Element update process.

The Inventory identifies sufficiently zoned land to accommodate the Oakland RHNA at all income levels. The inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units, or ADUs); and

- Opportunity sites where additional development could occur. This includes 1) potential development projects, where projects may be in pre-approval; sites from the previous RHNA cycle that remain available for development; and new opportunity sites, which includes both vacant and non-vacant sites and consists of City-owned sites, sites owned by Bay Area Rapid Transit (BART) or other government agencies, sites located within a specific plan area, and other sites with expressed or potential development interest.

The analysis of nonvacant properties included only those properties with realistic potential for additional development, in light of 1) existing uses on the site; 2) prevailing market conditions; 3) recent development trends; 4) expressed interests in housing development from property owners or developers; and 5) regulatory and/or other incentives to encourage recycling or intensification of existing development.

A summary of capacity by housing units to meet the Oakland RHNA is provided in Table 3-2, below. The complete 2023-2031 Inventory is provided in Table C25 of Appendix C, and can be seen in Figure 3-1 below.

Table 3-2: Summary of Residential Capacity to Accommodate the 2023-2031 Oakland RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income[1]*	*Moderate-Income*	*Above-Moderate-Income*	***Total***
Total Credits	1,978	2,191	776	10,176	**15,261**
Pipeline Projects	*1,206*	*1,499*	*182*	*10,174*	***13,201***
Projected ADUs	*692*	*692*	*594*	*0*	***1,978***
Adequate Sites Alternative	*80*	*0*	*0*	*2*	***82***
Potential Development Projects[3]	413	1,332	194	5,417	**7,167**
Vacant	*203*	*787*	*23*	*1,201*	***2,235***
Non-Vacant	*211*	*545*	*171*	*4,217*	***4,932***
Available 5th Cycle RHNA		714	3,795	688	**5,197**
Vacant		*23*	*566*	*3*	***592***
Non-Vacant		*691*	*3,229*	*685*	***4,605***
New Opportunity Sites		5,498	999	2,456	**8,953**
Vacant		*142*	*200*	*0*	***342***
Non-Vacant		*5,356*	*799*	*2,456*	***8,611***
Total Capacity		**12,127**	**5,764**	**18,737**	**36,578**
6th Cycle RHNA		**10,261**	**4,457**	**11,533**	**26,251**
RHNA + 15% Buffer		***11,801***	***5,126***	***13,263***	***30,189***
Surplus Over RHNA		**1,866**	**1,307**	**7,204**	**10,327**
		118.2%	**129.3%**	**162.5%**	**139.3%**

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).

2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 units.

3. Potential development project totals are reduced by 10% to account for likelihood of pre-application or early-phase planning permits that may not move forward.

Source: City of Oakland, 2022; Dyett & Bhatia, 2022

CREDITS TOWARDS THE RHNA

State HCD Guidance provides that the RHNA can be accommodated by looking at: 1) projects that are currently in the development pipeline; and 2) by considering alternative means of meeting the RHNA, such as projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households.

Pipeline Projects

Pipeline projects are projects that have been approved, permitted, or will receive a Certificate of Occupancy during the projection period (June 30, 2022, to December 15, 2030) and can be credited toward the City's 6th cycle RHNA. Using data from the City's Accela permitting system, 336 pipeline projects with 12,593 units are spread across the city, with the majority in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. Based on the affordability levels or projected rents specified on the project proposal, approximately 21.5 percent of pipeline capacity is affordable for lower-income households, while 1.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. All pipeline projects are shown in Table C-5a and b, and shown in Figure C-2 in Appendix C.

Projected ADUs

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet their RHNA using past building permit approval patterns since 2018. From 2018 to 2021, approximately 247 ADU permits were issued annually in the City of Oakland. Using a conservative estimate, the City anticipates approximately 1,978 ADUs, or approximately 247 average permits per year times eight years.) Annual ADU approvals are shown in Table C-7 in Appendix C. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[19] Projected ADU capacity by affordability level is shown in Appendix C, Table C-8.

Adequate Alternative Sites

According to State HCD, under "limited circumstances" a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[20] Limited circumstances refer to sites that are substantially rehabilitated; located on a foreclosed property or in a multifamily complex of three or more units converted from non-affordable to affordable rental; preserved at levels affordable to low- or very-low-income households with committed assistance; or preservation of mobile home parks through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the 2023-2031 planning period. The affordability of these projects reflects the actual affordability levels pursuant to the regulatory agreements that will maintain such income-restricted units. These sites and their capacity are shown in Appendix C, Table C-9.

[19] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

[20] More specific conditions that sites included under this option must meet are provided by HCD on their website: https://www.hcd.ca.gov/planning-and-community-development/housing-elements/building-blocks/adequate-sites-alternative

OPPORTUNITY SITES

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop. These include both vacant and underutilized land in potential development projects, available 5th Cycle RHNA sites, and new opportunity sites identified as part of this Housing Element cycle.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process, including those in the pre-application stage and those with filed and under review planning permits. Such projects are considered likely to develop. These sites are shown in Appendix C, Table C-14.

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous Housing Element cycles must be zoned at residential densities of at least 30 dwelling units per acre (du/ac) and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower-income households. The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous Housing Element cycles. Specific sites carried over from prior housing cycles are described in more detail in Appendix C, Table C-15.

New Opportunity Sites

New opportunity sites not included in previous Housing Element cycles were identified to meet the City's remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed or potential development interest, including interest determined as part of a community mapping exercise. Capacity of and rationale for nonvacant sites redevelopments can be found in Appendix C, Table C-16.

Site Selection and Capacity

As part of site analysis, a Housing Element also must demonstrate the projected residential development capacity of sites identified that can realistically be achieved. Creation of realistic assumptions involved survey of recently constructed and approved projects by base zone, density, and height; likelihood of residential conversion and infill development rates; and development capacity modifiers such as existing use on a site, and potential development incentives like low assessed value (AV) ratio (when the value of the land is greater than the existing structure) and low floor area ratio (when a building only takes up a small part of a lot.)

To identify adequate sites and determine realistic capacity, a parcel-based analysis was conducted in accordance with the State site requirements for very-low and low-income sites. Sites that were excluded include non-residential projects already in development; sites without much incentive to redevelop; sites that were environmentally constrained by high fire risk, near fault lines, or within a 100-year flood plain; and sites with known contamination. In addition to these considerations, sites that are sought to be designated as capable of accommodating lower-income housing must meet the State-defined standard of

30 du/ac, known as the "default density", and they must be between 0.5 and 10 acres. A robust description of the methodology and full table of realistic capacity is provided in Appendix C.

3.3 Assessing Housing Sites Through a Fair Housing Lens

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in identified Environmental Justice Communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against Affirmatively Furthering Fair Housing (AFFH) criteria, the Housing Element is an important step in achieving an equitable future in Oakland.

As described in Appendix D, the site identification requirement in the context of affirmatively furthering fair housing involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity.[21] Furthermore, this analysis will determine whether programs must be adopted to "make sites available" with appropriate zoning, development standards, and infrastructure capacity to accommodate the new development need.

Chart 3-1 summarizes the process of developing the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. Sites were selected in a manner to further and prioritize investment in historically disadvantaged communities, to decrease displacement pressures, and to increase access to existing higher resourced neighborhoods.[22] More information on each of the steps to identify additional sites for lower-income housing is available in Appendix C.

Chart 3-1: Housing Sites Inventory Development Process

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income

[21] Gov. Code, § 8890.50. subd. (b).

[22] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in lower-income neighborhoods and Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). In parallel with housing development, the City must invest in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—including investments in equitable access to transit, public facilities, food access, and other amenities.

The State and California Fair Housing Task Force use a series of Opportunity maps developed by the Tax Credit Allocation Committee (TCAC) and HCD to define areas of low to high opportunity using a set methodology. These maps, described more fully in Appendix D, indicate that a significant portion of Oakland is considered low resource or high segregation and poverty. As a result, while the RHNA is met for each income category based on pre-established housing sites in the Inventory, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. With the exception of Rockridge BART, which has historically not been available for lower income housing, many of these areas are, in fact, in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines and are suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource.

Most residential capacity at all income levels is located in the low resource and high segregation and poverty areas, largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation and poverty per TCAC's Opportunity Scores. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards, high fire risks, and active pipeline projects. About 70.1 percent of Oakland's highest resource areas are within a Very High Fire Hazard Severity Zone (VHFHSZ), as are about 25.7 percent of the city's high resource areas. Flooding also represents a risk in these areas (.6 percent in highest resource; 6.8 percent in high resource), as do earthquake fault zones (5.0 percent in highest resource; 2.2 percent in high resource) – see Appendix C for additional information. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, they will further increase the proportion of lower-income housing available in these neighborhoods.

Many of these higher resourced neighborhoods currently reflect a historic pattern of exclusionary zoning; to address this, the City is taking action to upzone these areas to further increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods. These reforms would also affirmatively further fair housing by opening up exclusionary neighborhoods, and reducing the exposure to air pollution, toxic and other environmental hazards in environmental justice communities. See Appendix J-1 for more information on these rezoning actions, and Chapter 4: Housing Action Plan for other actions that support affirmatively furthering fair housing. The location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure 3-2 below

Figure 3-2: Housing Sites Access to Opportunity, 2022

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority to ensure that the City meets its requirements to affirmatively further fair housing. Therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in higher resource neighborhoods beyond the preliminary sites inventory – which already met the RHNA in each income category. As discussed in Appendix C, the preliminary sites inventory consisted of active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites without known environmental constraints and near amenities like transit. To identify supplemental sites, the City started with the entire universe of parcels in Oakland, and filtered out sites based on objective physical constraints and opportunity metrics. More information on these constraints and metrics can be found in Appendix C.

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[23] After completing this exercise, an additional 70 potential sites were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 19 parcels were identified as supplemental sites that would further AFFH objectives. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization, local knowledge of the sites, and aerial images of the current state of the property. Figure C-7 in Appendix C maps the locations of these supplemental "AFFH sites."

An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.

These actions, as outlined in the Housing Action Plan (Chapter 4) will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the difficultly associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call that neighborhood home.

[23] A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

4 Housing Action Plan

4.1 Goals, Policies, and Actions

The 2023-2031 Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing.

- Reduce racial segregation and disparities in housing opportunities and outcomes
- Replace segregated living patterns with truly integrated and balanced living patterns
- Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

The five goals are:

Goal 1: Protect Oakland Residents from Displacement and Prevent Homelessness

Goal 2: Preserve and Improve Existing Housing Stock

Goal 3: Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

Goal 4: Address Homelessness and Expand Resources for the Unhoused

Goal 5: Promote Neighborhood Stability and Health

While these five goals provide an overall framework for addressing the multifaceted housing crisis, the policies and actions described in this chapter specify the means for implementing those goals. Actions include both programs currently in operation as well as **new actions** needed to address the city's housing needs.

In addition, the City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation, fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between market-rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each goal below includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low-income households. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing.

In order to provide more immediate housing solutions and stability for existing tenants and unsheltered residents, the City's Housing and Community Development Department (Oakland HCD) has established a balanced approach to investing its available resources, with 25 percent of available resources to

rehabilitation/preservation of existing deed-restricted affordable housing, 25 percent to acquisition and conversion of unsubsidized affordable housing opportunities, and 50 percent dedicated to the new construction of affordable housing with a required homeless set-aside. These funding priorities are outlined in HCD's Strategic Action Plan (2021-2023), found here: https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

The City's Notices of Funding Availability (NOFA) and Request for Proposal (RFP) processes are key for how the City supports many of the goals outlined below. NOFAs and RFPs released by Oakland HCD are competitive application processes for awarding City of Oakland funds for the development of affordable housing. Currently, HCD has three NOFA programs: 1. Acquisition and Conversion to Affordable Housing (ACAH), 2. New Construction of Multifamily Housing, and 3. Acquisition, Rehabilitation, and Preservation of Multifamily Affordable Housing. When funding is available, NOFA are released under the three programs to issue funds for affordable housing projects, which are then reviewed for feasibility and scored based on criteria in each NOFA. Based on ranking, projects are recommended for funding to the Oakland City Council. NOFA scoring is guided by the values centered on advancing racial equity and to prioritize assisting housing projects where the tenants are at risk of displacement and that target assistance towards extremely low income households. In recent years, the City has also implemented its Homekey Program, which uses State Homekey funds to expand housing for people experiencing homelessness or at risk of homelessness. The City chooses Homekey partners via an RFP process seeking proposals for the rapid acquisition and operation of homeless housing .

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The San Francisco Bay Area is decades into an extreme housing crisis, and Oakland is at the center of that crisis. Housing production, and particularly affordable housing production, has not kept pace with the region's economic growth. Because Oakland's rental and housing market has traditionally been less expensive than other Bay Area cities, Oakland residents experience disproportionately high displacement pressure. As a result, many Oakland residents cannot afford to buy or rent a home within their own neighborhood.[24] As households displaced from more expensive Bay Area communities search for more affordable housing options in Oakland and higher-income households continue to move into the city, Oakland's existing residents continue to bear the brunt of the Bay Area's housing crisis.[25] Community investment, including building new housing, is crucial for all Oakland neighborhoods to prevent displacement.[26] With demand outpacing the limited housing supply, competition for finite units and the resulting rising rents creates displacement pressure on low-income residents. Research by the Changing Cities Research Lab at Stanford University and the Federal Reserve Bank of San Francisco on credit score data shows that lower income residents who move from historically Black neighborhoods tend to move to neighborhoods with lower housing values and health scores, suggesting movement under constrained circumstances; over time, fewer of these low-income movers stayed within Oakland or moved into Oakland

as affordable options declined.[27] Rising rents are a factor in increasing rates of homelessness. According to the 2022 Alameda County Point in Time Count, 25 percent of unsheltered Oakland residents report that rent increases were a primary cause of homelessness, in addition to job loss (22 percent) and other money issues (13 percent).[28]

Oakland is committed to enabling renters and owners to stay in their homes and communities, eliminating all involuntary moves out of the city. Goals and policies that are part of a comprehensive protection strategy are designed to prevent displacement and homelessness, and to ensure that low-income renters and homeowners have supports they need to stay in their homes and communities as increased neighborhood investment occurs.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

To meet the City's equity goals and mandate to affirmatively further fair housing, this goal of protecting Oakland residents from displacement and preventing homelessness —including the policies and actions contained within—will advance the City's commitment to reducing racial and economic disparities across Oakland. This goal seeks to protect Oakland renters and owners from displacement pressures and prevent homelessness, both of which disproportionately impact Black, Indigenous, and People of Color (BIPOC) communities throughout Oakland. For example, enhanced tenant protections will crack down on tenant-based racial discrimination in the housing market. This will be particularly important as the eviction moratorium established during the COVID-19 pandemic eventually comes to an end and as further pressure is exerted on the residential rental market.

Rent stabilization and just cause protections also ensure that as more amenities are added to a neighborhood (and it becomes higher resource), the existing residents from diverse backgrounds are able to stay. Residents of historically disinvested neighborhoods should be able to remain in their homes and enjoy the results of improved amenities and increased services. In the long-term, this will enhance access to opportunity for historically marginalized and disadvantaged communities. By pursuing live/work preferences for Oakland residents and taking actions to assist tenants at risk of eviction, Oakland helps tenants avoid displacement or concentration in disadvantaged neighborhoods.

[27] Hwang, Jackelyn, and Vineet Gupta. "Residential and Neighborhood Instability in Oakland." 2021. Available at https://ccrl.stanford.edu/publications/residential-and-neighborhood-instability-in-oakland.

[28] City of Oakland, "Homelessness County & Survey: Comprehensive Report." 2019. Available at https://everyonehome.org/wp-content/uploads/2022/10/2022-Alameda-County-PIT-Report_9.22.22-FINAL-3.pdf

Through more robust data collection efforts, the City will also be able to better identify and correct barriers to opportunity. These efforts include the creation of a rental registry and other displacement measure tracking. More accurate data will also help the City to better target its existing and future housing resources for maximum impact.

POLICY 1.1. TENANT PROTECTIONS AND ANTI-DISPLACEMENT

Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.

The Oakland Rent Adjustment Ordinance (Chapter 8.22, Article I of the Oakland Municipal Code) limits rent increases on covered units (most units built before 1983) based on a formula tied to increases in the Consumer Price Index. In 2022, the City Council adopted an amendment to change the formula used to calculate the annual allowable rent increase to 60 percent of the change in CPI, or 3 percent, whichever is lower. The Rent Adjustment Program (RAP), a division of Oakland Department of Housing and Community Development, will continue to enforce the Rent Adjustment Ordinance.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Revisions to formula to calculate allowable rent increase completed in 2022. Implementation ongoing, 2023-2031.*

Objective: *All tenant rights and protections under applicable City law will be enforced.*

Action 1.1.2: Enforce Just Cause for Eviction measures.

Just Cause for Eviction protections are enforced by the Rent Adjustment Program (RAP) and are contained within Chapter 8.22, Article II of the Oakland Municipal Code. In 2022, the City Council voted to place on the November 2022 ballot an expansion of the Just Cause for Eviction ordinance. In particular, the ballot measures asks: Shall the Measure amending the Just Cause for Eviction Ordinance to: (1) prohibit no-fault evictions of children and educators during the school year; (2) extend eviction protections to tenants in recreational vehicles (RVs), tiny homes on wheels, and newly constructed units except during the first 10 years after issuance of the certificate of occupancy; (3) remove failure to sign a new lease as grounds for eviction; and (4) make other clarifying amendments, be adopted? The City will continue to enforce just cause measures, undertake efforts to ensure the public is aware of revisions if enacted by the voters, and expand tenant protections as feasible—including identifying additional limitations to just causes.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.3: Enforce and Strengthen Ellis Act protections.

The Ellis Act is a statewide law that permits property owners to terminate tenancy when withdrawing residential units from the rental market. Although the City cannot prohibit Ellis Act evictions, it has adopted the Ellis Act Ordinance (Chapter 8.22, Article III of the Oakland Municipal Code) to set specific requirements that must be followed when removing a property to discourage violations of the Act and prevent the displacement of renters. This includes filing withdrawal notices with the Oakland Rent Adjustment Program, and the provision of relocation assistance. Recent efforts to reform or repeal the Ellis Act at the State level have gained significant traction but have not to date been successful. The City has supported those efforts—for example, see City Resolution No. 88571 C.M.S. in support of Assembly Bill 854 (Lee) that would have prohibited a rental housing owner from removing a building from the market pursuant to the Ellis Act unless all owners of the property have held their ownership interest for at least five years. The City continues to hold that reform is necessary to reduce speculator abuse and protect tenants. The City will join neighboring Bay Area cities to advocate for statewide reform to the Ellis Act to stabilize rental housing.

Furthermore, the City's requirements when removing a property through the Ellis Act Ordinance are bolstered by protections under the City's Just Cause for Eviction Ordinance (see Action 1.1.2 above) and Relocation Ordinance (Action 1.1.4 below). The City's newly implemented rental registry (2022) will also help the City monitor Ellis Act-related eviction cases.

The City will continue to enforce the Ellis Act Ordinance and, based on any changes allowed by statewide reform, explore ways to strengthen renter protections—including proactive enforcement of eviction protections—in case of an Ellis Act eviction where feasible.

> **Responsible Party:** *Oakland Department of Housing and Community Development*
>
> **Potential Funding Source:** *Annual Rent Adjustment Fee*
>
> **Timeframe:** *Ellis Act Ordinance Protections are ongoing, 2023-2031; staff will continue to process Ellis findings, which have averaged 25 annually over the past four years, and will continuously seek ways to improve efforts to inform owners and tenants of their rights and obligations under the Ellis Act through robust outreach and counseling. Furthermore, the rental registry will be required as of July 1, 2023 and monitored thereafter. Lastly, the City will engage its legislative lobbyists annually and submit a support letter to the State annually to continue Statewide advocacy efforts.*
>
> **Objective:** *All tenant rights and protections under applicable City and State law will be enforced, and the City will continue to seek ways to improve tenant protections under the related ordinances.*

Action 1.1.4: Implement tenant relocation measures.

On January 16, 2018, the City of Oakland passed the Uniform Residential Tenant Relocation Ordinance (Ord. No. 13468) to establish a uniform schedule of relocation payments which are now extended to tenants evicted when the owner or qualifying relative moves in and for other "no tenant fault" evictions. The Uniform Relocation Ordinance (Ord. No. 13468) requires owners to provide relocation payments to

tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act activity, and condominium conversions. The City will continue to implement and enforce the Ordinance, adjusting base payments for inflation annually on July 1st. Additional relocation payments shall be required for tenant households in rental units that include lower-income, elderly or disabled tenants, and/or minor children.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Ongoing, 2023-2031*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.

The City will implement a tenant right to counsel in Rent Adjustment Program (RAP) proceedings, where qualified tenants who participate in RAP hearings have right to free legal representation within the funding availability restrictions. This includes partnering with nonprofit organizations to provide those services.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: In October, 2022 *Council approved a service provider contract to provide legal representation during RAP proceedings beginning in providing representation services in Fall 2022.*
Objective: *Resources permitting, all tenants participating in RAP proceedings will have access to legal representation. to prevent displacement by preventing unlawful rent increases. (see Action 1.1.6 below).*

Action 1.1.6: Enhance housing related legal services

As funding becomes available, the City will increase housing related legal services, including eviction defense services and legal counseling through community partners. Housing Related legal services will help address displacement risks, eviction defense, and housing instability through legal representation, consultation, and education. T

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Local, State or federal sources as available, and Annual Rent Adjustment Fee*

Timeframe: In July 2022 Council approved a direct grant to a consortium of nonprofit legal service providers to continue eviction protection and other legal services. Other tenant legal service contracts are administered through the Rent Adjustment Program. Staff will continue to *seek funding to ensure services will be ongoing.*

Objective: *Resources permitting, all at risk tenants may seek free legal services from external partners to prevent evictions and housing instability.*

Action 1.1.7: Expand the City's ability to enforce rent control to maintain affordability.

Rent control measures are outlined in Oakland's Rent Adjustment Ordinance and enforced through the Rent Adjustment Program (RAP). Currently, residential rental units are covered by the Rent Adjustment Ordinance if they are within a building built prior to 1983 and there are two or more units in the building. In addition, the City's new rental registry, approved in 2022, will require property owners to report rent and tenancy information to RAP on an annual basis. This new tool will allow the City to better monitor rent control and will help both tenants and owners understand whether their rents comply with Oakland's Rent Adjustment Ordinance. The City will consider how to expand the number of units subject to rent control to maintain affordability.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: *Rent control measures are ongoing, 2023-2031. As of July, 1, 2023, the City's rental registry will require owners of these units to report rent and tenancy information to RAP on an annual basis. With this new tool, staff will be able to better monitor rent control measures.*

Objective: *To the extent permitted by State law, Oakland will use the rental registry to ensure rent control laws are being followed, enabling better renter protections.*

Action 1.1.8: Monitor neighborhood displacement risk factors.

As the effects of the COVID-19 pandemic continue to unfold and eviction moratoriums lift, there is an urgent need to monitor displacement pressures. The City will regularly monitor displacement risk factors—including rising housing costs, rapid demographic changes, neighborhood instability, climate risks, and trends around in- and out-migration across neighborhoods in Oakland—to understand local displacement risk. This data will be used to better target anti-displacement programs and prioritize neighborhoods with a high risk of displacement. This data will also be used to better understand the causes of displacement and help tailor City programs to meet existing housing needs. The City will carry out the bi-annual Resident Mini Pulse Survey on the state of housing security as part of these monitoring efforts.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment fee*

Timeframe: *Ongoing, 2023-2031; conduct Resident Mini Pulse Survey on biannual basis.*

Objective: *The City of Oakland will include displacement-related statistics in a broader housing or community dashboard available on the City website.*

Action 1.1.9: Implement a rental housing registry.

A rental housing registry is a database of rental units within Oakland and will be used to track properties subject to rent control provisions, Just Cause for Eviction measures, and other property-specific policies and requirements. In June 2022, the Oakland City Council adopted Ordinance No. 13695 CMS to establish a rental registry in Oakland. The City will use data collected in the rental housing registry to monitor and understand neighborhood change at a more granular level, to better target anti-displacement policies and ensure that rent increases are compliant under the Rent Adjustment Ordinance.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Annual Rent Adjustment Fee*

Timeframe: Implement the rental registry by 2023, maintain it *ongoing, 2023-2031*

Objective: *By 2023, the City will design and implement a rental housing registry. This registry will cover housing units subject to rent stabilization and/or just cause protections under City law.*

Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).

The TPO (Chapter 8.22, Article V of the Oakland Municipal Code) recognizes tenants' right to live in safe, dignified, harassment-free homes. The TPO deters and makes unlawful harassment by property owners and their agents, including property managers, recognizing that such harassment can frequently force tenants from their homes. The ordinance provides tenants strong legal recourse in the event of such prohibited harassment. On July 21, 2020, the City further amended the TPO to strengthen existing protections and include additional remedies. For example, the amendments established heightened penalties for violations against elderly, disabled, and/or catastrophically ill tenants. The amendments further expanded the ordinance's application to non-profit-owned rental housing and rental units in newly constructed residential properties. City enforcement of the TPO can prevent and remedy violations against tenants, for example by deterring unscrupulous landlords from undertaking "self-help" evictions and securing building and/or citywide relief for tenants. City enforcement therefore is critical to ensuring that Oakland's most marginalized tenants also receive the protections of the TPO.

In October 2020, the Oakland City Attorney launched the Housing Justice Initiative, a housing enforcement unit specifically dedicated to protecting marginalized Oakland tenants through the enforcement of the TPO and other similar or related local and State laws.

Through the Housing Justice Initiative and the work of the City Attorney's existing Neighborhood Law Corps, the City will continue to expand its enforcement of the TPO.

Responsible Party: *Oakland City Attorney*

Potential Funding Source: *Additional grant sources will be pursued.*

Timeframe: *Ongoing, 2023-2031*

Objective: *Tenants' rights and protections under applicable City and State law will be enforced more systematically and on a larger scale over time, with a focus on actions that protect the most marginalized tenants and hold large-scale bad actors to account.*

Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.

Currently, through the Tenant Move Out Ordinance (Chapter 8.22.700, Article VI of the Oakland Municipal Code), Oakland renters have protections from unfair or coercive buyout agreements. Further, State law (SB 330) requires that property developers provide the right to return to low-income renters when a property is demolished and redeveloped, and that the charged rent must be affordable. The City will continue providing awareness of State and local requirements and will enforce affordability requirements in new development projects. Further, pursuant to Action 2.2.5, the City will extend this right beyond the sunset date of SB 330.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *Legal fees associated with case parties involved*

Timeframe: *SB 330 rights will be extended by the end of 2024.*

Objective: *All tenant rights and protections under applicable City and State law will be enforced.*

Action 1.1.12: Provide a local preference in affordable housing projects.

Oakland Municipal Code [Chapter 15.63] grants preference in City-assisted affordable housing projects to (1) Oakland residents displaced due to City actions or no-fault evictions, (2) neighborhood residents, and (3) Oakland residents and workers. All three preferences are applied at initial occupancy, to the extent permitted by other funding sources. After initial occupancy, displaced households and Oakland residents and workers continue to receive priority preference for available units. Oakland's Housing and Community Development Department recently updated its findings to support its preferences and ensure that its preferences may be permitted in County-assisted projects. The City will continue its efforts to streamline the process by which these preferences are applied, including through a regional housing portal and a more robust tracking system for displaced households.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *n/a*

Timeframe: *Ongoing, 2023-2031. While the ability of the City to require its projects to participate in a regional application portal depends in part on the readiness of such portals, the City currently attends regular meetings around the design of a regional portal. The City intends to identify a suitable application portal to partner with by the end of 2024.*

Objective: *The City will continue to apply local preferences in City-assisted affordable housing to the extent allowed by law and the constraints of other involved funding sources. The City will continue to*

identify ways to streamline the administration of its preferences, including through a regional housing portal and a more robust tracking system for displaced households.

Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.

While negotiating development agreements with developers for large scale market-rate and non-residential projects on City land or development agreements requiring complex, multi-phase entitlements, the City will advocate for establishing an appropriate set of standardized community benefits to mitigate any displacement pressures that result from the development. This may include increased levels of required affordable housing units. The City will consult with community-based organizations and residents impacted by developments to evaluate the extent of community benefits required to properly mitigate displacement impacts.

Responsible Party: *Oakland Planning & Building Department, Oakland Department of Housing and Community Development; Economic and Workforce Development Department*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objective: *Significantly reduce displacement pressures through negotiating appropriate community benefits during the development agreements process.*

Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

Keep Oakland Housed, the Shallow Subsidy Pilot (public-private partnerships), Oakland Housing Secure, and the federally funded Emergency Rental Assistance Program (ERAP) are programs that currently help prevent renters from becoming homeless through rental assistance, legal advice, housing counseling, and/or case management. Through these programs, a diverse and vibrant network of providers has been created that work together to provide individualized services to Oakland tenants.

The City will support and align City, Alameda County, and private partners (such as community-based and faith-based organizations that have roots in communities whose members are disproportionately at risk of homelessness) to strengthen their capacity to prevent displacement and respond effectively when people are experiencing a housing crisis. The City will also expand these types of programs and design new ones that identify, assist, and prioritize funding for those who are most at risk of becoming homeless. In addition, the City will continue to make information about tenant protection, anti-displacement, rental assistance, and homelessness services available on the City's website and at City facilities and strive to improve public awareness of these programs. These efforts are especially key in the wake of the COVID-19 crisis and the eventual end of the eviction moratorium. Additional tenant protection actions are included in Actions 1.1.1-1.1.10.

Responsible Party: *Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: Continue implementation of the ERAP program 2022-2023, and *The City of Oakland to issue a Request for Proposals and award a contract to a homeless prevention program provider(s) by mid-2023.*

Objective: *The City of Oakland will continue to implement a homeless prevention program that includes emergency financial assistance, legal support and wrap around services. The program will be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program.*

Goal 2. Preserve and Improve Existing Affordable Housing Stock

Oakland's existing affordable housing stock is an important resource for the city's lower- and moderate-income population. Housing preservation means retaining existing built affordable housing and extending its affordability for current and future tenants. Preventing the loss of valuable existing affordable housing units is a cost-effective way of maintaining this resource as well as keeping existing residents who may be more vulnerable to increasing cost pressures in their homes.

Oakland has numerous preservation policies in place already, including rehabilitation programs for low-income homeowners, demolition and condo conversion restrictions, resale controls to preserve affordability, and regular inspections of City-assisted affordable housing stock. A primary task of City staff will be to enforce and maintain these policies over the coming cycle. In addition, the City has identified areas where it may seek to expand preservation strategies, such as through a proactive inspection program for non-restricted housing stock, environmental remediation programs, and policies to facilitate acquisition of properties by tenants and mission-driven nonprofits. These strategies are described below.

Preservation, improvement, and maintenance also have health and equity co-benefits—addressing housing habitability issues can help to narrow inequitable racial and ethnic gaps in substandard housing conditions and reduce the burden of maintenance challenges for lower-income homeowners. This goal includes policies and actions that conserve and improve existing housing stock.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

This goal sets forth several policies and actions that will advance fair housing in Oakland though actions that physically rehabilitate housing units, reduce displacement by deepening and/or extending affordability, and ensure Oakland residents are able to remain in their communities and enjoy new amenities and benefits. Physical rehabilitation of housing also improves the environmental determinants of health, thereby advancing the City's Environmental Justice goals. As discussed in Appendices B and D, BIPOC residents of Oakland are disproportionately impacted by substandard housing issues. Actions contained within this goal will reduce the prevalence of these substandard housing issues citywide. Universal design strategies will also increase housing access for seniors and people with disabilities.

Actions that preserve the affordability of existing homes play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the displacement pressures in their neighborhoods. These actions range from resale controls to demolition and conversion protections. A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability benefits of homeownership. Historic preservation actions also preserve cultural institutions and history that would otherwise be at risk of loss due to gentrification.

POLICY 2.1 EXISTING HOUSING STOCK IMPROVEMENT

Action 2.1.1: Support home rehabilitation programs.

The City will expand housing rehabilitation assistance to very low- and low-income homeowners to address code violations, repair major building systems in danger of failure, abate lead-based paint hazards, conduct minor home repairs for seniors, and perform or fund emergency repairs. Per the Council-adopted target of 100 percent building electrification by 2040 (Equitable Climate Action Plan (ECAP) Action B-2) and energy resilience for all (ECAP Action A-2), the City will pursue resources to integrate holistic building electrification, onsite renewable energy, and energy storage into these programs where possible, and combining building electrification improvements with other improvements for health, safety, and livability. Per the ECAP, electrification refers to the replacement of methane (aka "natural") gas systems and appliances with efficient, effective, all-electric alternatives, such as heat pumps or induction cooking. Electrification is intended to be permanent: to meet the Council's 2040 target, buildings switching away from gas to efficient electric systems and appliances should not later add gas infrastructure or appliances. Some of the programs currently operated by the City of Oakland or its partners include:

- Home Maintenance & Improvement Program (HMIP) Deferred Loan Program
- Emergency Home Repair Program Loan Program
- Alameda County Minor Home Repair Grant Program
- Lead Hazard Control and Paint Program
- Access Improvement Program
- Oakland CalHome ADU/JADU Loan Program
- Bay Area Regional Energy Network's HomePlus Program and Home Energy Advisor
- TECH Clean California
- California Energy Smart Homes
- Low Income Weatherization Program

The City will engage local partners and fair housing experts to help promote awareness of, and broad participation in, these programs. The City will continue to implement, annually review, and revise, as needed, program guidelines for housing rehabilitation assistance. The City will target resources, as available, to expand opportunities throughout the community, including in lower-income and lower resource areas. The City will also strive to build community capacity and technical know-how by connecting homeowners with local labor to carry out home rehabilitation projects. This assistance will be particularly targeted to neighborhoods experiencing or at severe risk of displacement and gentrification. The City will also commit to explore additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's homeowner rehabilitation programs.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *The City of Oakland Department of Housing and Community Development will continue to accept applications for and serve residents through its established low-income homeowner rehab programs and facilitate access to other resources on an annual basis. The City will also pursue additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's programs. The timing on pursuit of these additional funding sources depends on when such opportunities are available, as State funding streams for home rehabilitation/electrification are unpredictable or trade off with other Housing Element priorities (for example, the CalHome program could fund rehabilitation, but that would potentially mean applying for less money for down payment homebuyer assistance which has no other dedicated funding).*

Objective: *As funding is available, the City of Oakland will continue to fund and operate home rehabilitation programs. At current funding trends, this will allow for approximately 80 rehabilitation projects each year.*

Action 2.1.2: Promote healthy homes and lead-safe housing.

The City will continue, and seek resources to expand, implementation of the Lead-Safe Homes Program to assist low- and moderate-income homeowners with lead paint identification and remediation, prioritizing resources for disadvantaged communities with high rates of asthma. The City will also continue to partner with the Alameda County Community Development Agency's Healthy Homes Department to provide education, lead-safety skills training, and on-site consultations for Oakland property owners and conduct lead poisoning prevention and asthma trigger interventions for Oakland residents. In accordance with Oakland's 2030 Equitable Climate Action Plan, the City will encourage the transition away from natural gas appliances, which has been proven to increase development of asthma in children by 24 percent and which increases risks of fire and explosions. The City will seek resources to integrate electrification, lead abatement, and home rehabilitation activities in order to maximize public health and housing security benefits for frontline Oaklanders. The City will also seek resources and inter-agency partnerships to monitor public health impacts of new programing and requirements.

Responsible Party: *Oakland Department of Housing and Community Development, Residential Lending Division; Sustainability and Resilience Division, City Administrator's Office*

Potential Funding Source: *Community Development Block Grants and potentially other funding sources as available*

Timeline: *Ongoing throughout the 2023-2031 period and beyond*

Objective: *As funding becomes available, the City of Oakland will implement programs to reduce health hazards from lead and natural gas appliances.*

Action 2.1.3: Conduct proactive rental inspections.

The City is adopting a proactive, data-driven housing inspection program for City Council's approval in early 2023 to improve housing habitability conditions among the City's rental stock. Covered rental units will be inspected on a regular basis at designated intervals thereby reducing the likelihood of deterioration and escalation to substandard housing conditions by identifying and targeting exterior and interior code violation early on. The City will continue to monitor and inspect properties in response to a complaint driven process from the public on habitability and blight condition. The City will work with community

partners to develop appropriate enforcement mechanisms, including tenant protection and anti-displacement mechanisms to ensure tenants are not displaced as a result of proactive inspections turning up housing habitability issues and/or raising rents due to the cost of fixing habitability issues. Further, the City will prioritize inspections in areas with older housing stock and health disparities and seek funding to streamline the inspection/rehabilitation process by connecting property-owners to technical and financial assistance for safety and accessibility improvements at the time of inspection. Guidelines are being developed to identify issues that may qualify as delay of enforcement actions to provide property-owners with sufficient time to complete the needed repairs, thereby mitigating displacement of existing tenants and preserving affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Permit fees*

Timeline: *2023*

Objective: *The City will develop a proactive rental inspections program to significantly improve housing safety and quality and address housing needs, particularly in areas with older housing stock and communities experiencing health disparities.*

Action 2.1.4: Support historic preservation and rehabilitation.

The City will support the preservation and rehabilitation of both the existing historic housing stock and adaptively reused non-residential structures through a variety of strategies, including continued implementation of Mills Act Contracts and the Oakland Community Buying Program. The City will support the preservation of historic, archaeological, and tribal cultural resources and their incorporation into project site planning where feasible. As described in Action 3.2.3, the City will also promote adaptive reuse to promote historic preservation.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to implement the Mills Act and the Oakland Community Buying Program to support to help support historic preservation.*

Action 2.1.5: Implement universal design strategies.

The City will initiate community engagement to understand the need for universal design strategies, including with seniors, people experiencing disabilities, and community-based organizations with insight and experience with accessibility issues. The City will consider the adoption of a Universal Design Ordinance, which would help close loopholes, ensure good faith compliance of Americans with Disability Act provisions, ensure that accommodations are built into new developments, and allow Oaklanders to age in place.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees*

Timeline: *2025-2027*

Objective: *The City will consider adopting a Universal Design Ordinance to address housing needs and improve housing conditions for seniors, people experiencing disabilities, and other communities with accessibility issues.*

Action 2.1.6: Increase funding for improved indoor air quality.

The City will seek State, Federal, and other funding sources to provide financial assistance to property owners and very low- and low-income homeowners to offset some of the cost of investing in better ventilation, air filtration systems (e.g., MERV filter systems), and efficient electrification to improve indoor air quality in existing single- and multifamily residential units, with a priority for homes in high air pollution areas such as near freeways. The City will adopt and implement an Existing Building Electrification Roadmap, using an equity-centered approach to transition all homes away from methane (aka "natural") gas systems by 2040. The Roadmap will specify policy strategies, necessary incentives and safety nets, and other steps to avoid increasing housing displacement or energy insecurity in the electrification transition.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office

Potential Funding Source: *State funding such as Technology and Equipment for Clean Heating Initiative, Building Initiative for Low-Emissions Development, and California utility repayment funding. Federal funding is available through the Inflation Reduction Act. Additional sources of funding could include CEQA mitigation funds, philanthropic sources, and other public-private partnerships.*

Timeline: *Identify funding by 2026; bring Existing Building Electrification Roadmap to Council for adoption by end of July 2023*

Objective: *Significantly improve indoor air quality and address housing need in existing single- and multifamily residential buildings.*

POLICY 2.2 PRESERVE THE AFFORDABILITY OF EXISTING HOMES

Action 2.2.1: Continue to implement resale controls on assisted housing.

The City will continue to use financing agreements for both City-assisted ownership and rental development projects to ensure that units remain permanently affordable through covenants running with the land.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: *Ongoing, 2023-2031*

Objectives: *100 percent of City-assisted homeownership and rental units will have their affordability covenants effectively enforced.*

Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.

The City will proactively monitor and enforce affordable housing covenants and will conduct outreach to the owners of assisted units that are at risk of conversion to market-rate housing. The City will prioritize the preservation of units at some level of risk of converting in the next 10 years by actively working with and encouraging the owners of those properties to extend their covenants. Pursuant to law, the City will also engage in required noticing, tenant education, and coordinating with qualified entities.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds*

Timeframe: Program monitoring and enforcement of this program is ongoing, 2023-2031. Furthermore, the City has issued Preservation and Rehabilitation NOFAs on a periodic basis, per funding availability to capture existing affordable units at-risk of conversion to market-rate, and perform rehabilitation work on properties in exchange for extending the term of affordability restrictions. Recent NOFA under this program were released in 2017 ($9.5M) and 2019 ($11M), and the next NOFA release is anticipated in 2023. The City is aiming for approximately $10M in this round, but will likely bolster that amount with the 2022 Bond Measure funding for affordable housing and infrastructure approved by voters.).

Objectives: *As funding becomes available, deed-restricted affordable housing units at risk of losing their affordability will be protected from a loss of affordability protections through extensions of regulatory agreements, and deepening of affordability levels when possible. Currently the City's policy is to allocate approximately 25 percent of available local funding towards Preservation and Rehabilitation NOFA, and future funds will be allocated contingent upon availability.*

Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.

Residential hotels, also referred to as single-room occupancy (SRO) units, provide an important source of naturally occurring, deeply affordable housing in City. As such, Oakland has enacted regulations to limit the demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units. The City has recently amended these regulations (Chapter 17.153 of the Oakland Planning Code) to strengthen protections for residential hotels and will continue to enforce these protections to preserve their affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce Single-Room Occupancy (SRO) regulations to preserve affordability and meet housing needs.*

Action 2.2.4: Limit condominium conversions.

The conversion of rental housing to condominiums provides a risk to the affordability of Oakland's housing stock. The City recently amended its condominium conversion regulations to require replacement rental housing for the conversion of two or more housing units, to remove the provision allowing the generation of conversion rights when the units are offered as rental units for seven or more years, to acknowledge the applicability of the Oakland Just Cause for Eviction Ordinance and the Oakland Rent Adjustment Ordinance, and to afford greater rights and protections to existing tenants. The City will strictly enforce these recently adopted regulations to preserve Oakland's rental housing supply.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Continue to enforce condominium conversion regulations to preserve rental housing supply and prevent displacement.*

Action 2.2.5: Extend local replacement unit provisions.

State law (SB 330) mandates that "protected units" are replaced with comparably affordable units when a residential building is demolished and redeveloped. The City will codify and extend replacement provisions pursuant to State law beyond the established sunset date. The City will require that developers notify existing and prospective tenants of their tenant rights as provided both under SB 330 as well as Oakland's Just Cause for Eviction Notice. The City will require developers to comply with applicable tenant right to refusal provisions. Further, the City will engage in strict monitoring and enforcement of the law to ensure replacement units are provided. This will include active outreach to developers to ensure they are aware of and comply with replacement unit provisions, and the maintenance of a displaced tenant database. The City will require that any demolition proposals include sufficient relocation assistance and right to return to the new replacement units.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Enforcement of SB 330 requirements: Ongoing, 2023-2031. Adoption of Requirements above SB 330: 2024.*

Objectives: *Codify and extend local replacement unit provisions to ensure compliance and prevent displacement.*

Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.

The practice of "house flipping," —acquiring properties, making superficial improvements, and quickly reselling at a higher price—can cause housing costs to increase, leading to higher rates of displacement and increased exclusivity in higher resource neighborhoods. To curb the negative effects of speculation, the City will consider implementing an anti-speculation tax, which would apply a fee when a property is sold shortly after purchase. The City will conduct a market study to understand the potential impacts of such a tax and its appropriateness within Oakland. As discussed in Action 2.2.8, the City will also explore a possible Tenant Opportunity to Purchase/Community Opportunity to Purchase Act.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge for the study; self-funding, if implemented*

Timeframe: *2026*

Objectives: *Study the root causes of unaffordability and displacement and consider possible taxes to prevent displacement and maintain affordability. Looking specifically at the cost to rehabilitate a home and incentivizing the market to maintain neighborhood level affordability through tax incentive or disincentive.*

Action 2.2.7: Provide additional subsidy for residential hotels.

The City will consider allowing owners of residential hotels that agree to restrict occupancy to lower-income residents to transfer development rights to create an endowed source of funding for an internal subsidy for such residents, or for maintenance/facility upgrades that do not increase rents.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2025-2027*

Objectives: *Preserve SROs and meet housing need.*

Action 2.2.8: Investigate a Tenant/Community Opportunity to Purchase Act.

A Tenant/Community Opportunity to Purchase Act, referred to as TOPA/COPA, gives tenants and nonprofit organizations the opportunity to purchase their home when it goes up for sale, thereby preserving that housing unit as affordable. TOPA/COPA policies are under development in multiple Bay Area cities, including Oakland, the neighboring City of Berkeley, East Palo Alto, and San Jose. The City will study the effectiveness of a TOPA/COPA model suited to local conditions, which may include equity-building mechanisms, funding needs and sources, racial equity impact considerations, or other approaches that may

be appropriate to Oakland. Enactment of a TOPA/COPA policy would require City Council review and approval.

Responsible Agency: *City Council; Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Investigate a TOPA/COPA policy and present findings to Oakland City Council for discussion by Fiscal Year 2025. If adopted, implementation will occur at maximum two years after the date of adoption.*

Objective: *Oakland will study by FY2025, and if appropriate, implement a TOPA/COPA policy by 2027 at the latest.*

Goal 3. Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

To address Oakland's ongoing housing crisis, key strategies should focus on closing the gap between market-rate and affordable housing production by prioritizing the preservation of existing housing and developing high-quality and abundant affordable housing for those of the greatest need, including Black, Indigenous, and other People of Color (BIPOC) households.

During the previous RHNA cycle, the City permitted more above-moderate-income housing than required by the RHNA, whereas the City only permitted one affordable housing unit for every eight above-moderate income units. This highlights the need for a concerted effort to increase production of homes that are affordable to very low-, low-, and moderate-income households. While adding housing at every income level can help reduce market competition for existing homes, a primary driver in displacement and homelessness, Oakland also needs more deeply affordable housing. Oakland especially needs housing affordable to extremely-low-income residents and housing that remains permanently affordable. One of the key objectives in expanding affordable housing opportunities and producing more affordable housing is overcoming patterns of discrimination and opening up neighborhoods that have historically been exclusionary to communities of color and low-income residents, while simultaneously refocusing resources and protections towards historically disinvested neighborhoods (see Policy 2.2).

As stated above, the City fell short of meeting its lower- and moderate-income need, which has nearly doubled during the current 6th cycle RHNA. The shortfall is primarily a reflection of the lack of commensurate state and federal subsidies that would be necessary to achieve Oakland's targets for low- and moderate-income households. Public funds for affordable housing would need to be expanded *tenfold* in order to meet these 6th Cycle RHNA targets. Other constraints are discussed in Appendix C. To meet the increased need for affordable housing, the City will identify new funding sources, expand existing programs, and introduce new strategies to close the gap between market-rate and affordable housing production, and further encourage high quality and abundant affordable housing development.

As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. This includes alternative housing models that have the benefit of being more affordable and can meet a wider range of community needs, incomes, and lifestyles, including single room occupancy (SRO) programs; efficiency units (where the kitchen/dining area is segmented off from a combination sleeping/living area); micro units (units usually less than ~250 square feet); and co-housing (private homes clustered around shared space). The City is encouraging these models: recent examples include Oakland's 2018 Residential Hotels Ordinance, the "Nook" microunit project built in 2016, and completion of co-housing project Phoenix Commons in 2016. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability.

Oakland has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, often provide significant opportunities for residential development. Furthermore, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units.

Although housing is largely provided by the private and nonprofit sectors, the City has one major tool to influence development patterns and increase housing development of affordable housing and allow for other housing types: the Planning Code. To ensure that the Planning Code is responsive to housing policies and programs, the City will need specific zoning amendments that meet Oakland's changing needs and remove identified constraints to residential development. The suite of amendments the City will undertake range from short- to long-term solutions, some of which will be carried out alongside the update of the Housing Element and others as part of the comprehensive update to the City's General Plan that includes the Land Use and Transportation Element and will continue through 2025 after the Housing Element adoption.

The length and cost of the residential permitting process—which are ultimately reflected in a unit's selling price—are also generally within the City's control. An onerous and lengthy review process can be one of the most significant barriers to housing construction because some developers may decide that the cost of project review and its potential delays simply overcomes the revenue of new housing, particularly in the case of projects that are only marginally financially feasible and/or profitable. Recognizing that long permitting processes are a statewide issue, a slate of new legislation, including SB 35, SB 330, AB 2162, and SB 1483, has introduced new requirements that are intended to facilitate the production of affordable housing through a streamlined residential permitting process.

The City of Oakland currently operates both an online permit center and an in-person "one-stop" permit center with counter services staffed by the Departments of Planning and Building, Fire, and Transportation. However, there are opportunities to better steward small nonprofit and BIPOC developers, homeowners looking to add additional units, affordable housing developers, and other community partners through the residential permitting process.

This goal will encourage the production of affordable housing and guide development of a more diverse range of housing choices for households of all types, incomes, and special needs; and promote changes to City tools like its permitting procedures and zoning code to make it easier and faster to build affordable housing.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Though Oakland is one of California's most diverse cities overall, there is significant racial segregation between the city's neighborhoods. As a result of past practices such as mortgage redlining, disinvestment in neighborhoods of color, racially restrictive covenants on housing development, exclusionary zoning, destructive urban renewal, highway development and predatory lending in neighborhoods of color, many of Oakland's BIPOC residents live in neighborhoods that lack access to quality amenities or upward mobility. As higher income people move to Oakland, low-income neighborhoods of color are also more susceptible to gentrification and continue to bear infrastructure burdens from the city's increased housing supply. In contrast, some high-resource areas remain disproportionately white in their racial composition because they are zoned primarily for single-family homes, and the absence of lower cost housing types prevents BIPOC and lower-income families from moving to these neighborhoods. See Appendices B and D for additional detail on these patterns of segregation. The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive.

During the outreach process, many community members expressed a desire to see Oakland be more inclusive and retain and strengthen its diversity with a wider array of housing choices. Community members sought more duplexes, fourplexes, cottage courts, and garden apartments throughout the city. These smaller, "missing middle" housing types[29] tend to be more affordable by design—compared to single-family homes—and thus provide additional options for first-time homebuyers, single people, and moderate-income households. These housing types can also increase the housing stock in previously built-out neighborhoods, and as such are an important factor for Oakland to meet its moderate-income RHNA target. Accessory dwelling units – also known as ADUs, granny flats, secondary units, in-law units, and backyard cottages – are another important strategy to increase the supply of housing that is more affordable by design. ADUs offer an alternative for people who want to rent but do not want to live in larger apartment complexes. ADUs tend to be located in lower-density and higher resource neighborhoods that often contain few other rental options that are affordable. As described in Appendix C, the majority of ADUs in Oakland are estimated to have rents affordable to lower-income households. The community also expressed a desire to see increased housing typologies and affordable housing throughout the city, including existing working-class neighborhoods that are currently low-resource due to systemic racism and disinvestment. Efforts specifically aimed at increasing affordable housing production are included in Policy 3.3.

On March 16, 2021[30], the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes—prior to the passage of SB 9.[31] Zoning reform actions under this goal will expand on this direction and help to open up exclusionary neighborhoods. Other housing development reforms—like permit

[29] Missing Middle Housing is a range of house-scale buildings with multiple units (e.g., duplexes, triplexes, fourplexes, cottage courts, and multiplexes) that are compatible in scale and form with detached single-family homes and are located in a walkable neighborhood. More information is available at missingmiddlehousing.com.

[30] March 16, 2021, City Council Resolution to study and consider criteria for allowing four-plexes in areas designated for single family residences: https://oakland.legistar.com/LegislationDetail.aspx?ID=4815334&GUID=C981D0A8-C841-43F1-A33F-12CA0DA76B07&Options=&Search=

[31] SB 9, in effect as of January 1, 2022, permits increased density on single-family lots through duplexes and lot splits.

streamlining and ADU promotion—will also help expand housing options in traditionally exclusionary neighborhoods.

Further, certain segments of the population face greater challenges to finding decent, affordable housing due to special characteristics. Such characteristics may include one's employment and income, family characteristics, disability, or other conditions. Thus, some residents face greater housing cost burden, overcrowding, or other housing problems.

State Housing Element law defines "special needs" groups to include persons with disabilities (including developmental disabilities), the elderly, large households, female-headed households, homeless people, and farmworkers. Many households within these special needs groups also fall within the extremely-low-income category. The special needs of individuals within these groups are wide ranging: in addition to affordable and accessible housing opportunities in proximity to transportation and other services, individuals with disabilities or who are experiencing homelessness may need on-site support and services. Meanwhile, female-headed households benefit from on-site childcare, and universal design elements such as zero-step entrances and single floor living are important considerations for senior housing.

Special needs housing is an important component of Oakland's commitment to just and fair treatment of all individuals. It is critical that housing conditions foster an environment where everyone can participate, prosper, and reach their full potential. Actions contained within this goal will expand funding sources for affordable housing, including bonus points for serving special needs populations, will together allow for the expansion of affordable opportunities for special needs populations in high-opportunity neighborhoods. Actions related to expanding affordable housing options that are accessible to extremely-low-income households are also contained under Policy 3.1.

POLICY 3.1 FACILITATE PRODUCTION OF DEEPLY AFFORDABLE HOUSING[32]

Action 3.1.1. Develop a project-based rental or operating subsidy program for extremely-low-income residents.

Create a capitalized operating subsidy program for extremely-low-income households. This will enable the creation of extremely-low-income housing, which is only possible with the provision of public operating subsidies to ensure financial stability for the property and appropriate support services for the residents.

Responsible Agency: *Oakland Department of Housing and Community Development*

Timeline: *Program will be launched by December 2023*

Potential Funding Source: *State of California Permanent Local Housing Allocation (PLHA), Homeless Housing Assistance & Prevention (HHAP), and any and all other resources that become available for this use.*

Objective: *This program will fund project-based rental or operating subsidy for at least 16 units of extremely-low-income housing per year, for a total of at least 56 extremely-low-income units by 2031.*

Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.

[32] Deeply Affordable housing for persons at 30 percent area median income or below.

The Oakland Housing Authority will continue targeting vouchers to support the development of extremely-low-income Housing through the award of project-based vouchers and/or other Oakland Housing Authority funds.

Responsible Agency: *Oakland Housing Authority*

Timeline: *Ongoing, 2023-2031*

Potential Funding Source: *Federal Section 8 vouchers, VASH vouchers, and/or other Oakland Housing Authority funds.*

Objective: *As vouchers or funds are available, at least 20 percent of units in assisted developments will be deed restricted as extremely-low-income.*

POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS

Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures.

The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) Zones and additional multi-unit housing types in Mixed Housing Type Residential (RM) Zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential lots to 2,000 square feet to remove constraints on lot splitting. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility, neighborhood scale and potential opportunities for homeownership (split lots and condominiums) in parallel with Policy 3.4 and Policy 5.1. See Appendix J for a summary of missing middle zoning amendments.

Under Action 3.4.1, the City will revise development standards, including allowable building heights, densities, open space and setbacks requirements.

Under Action 3.4.8, the City will develop objective design standards at the neighborhood level to ensure that multi-unit neighborhood scale housing types designed in a manner that is compatible with the scale of existing residential housing forms in these zoning districts is permitted ministerially.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *June – July 2023*

Objective: *Significantly increase production of multi-unit housing types (including duplexes, triplexes and fourplexes, along with other multi-unit housing types) in current single-family-dominated neighborhoods to match housing need.*

Action 3.2.2: Promote and protect live/work housing and housing for artists.

The City will update development standards, building codes, and land use regulations to promote artist housing, including joint living and working quarters (JLWQs) in areas where appropriate under the General Plan. The City will encourage employers, trade groups, and arts and cultural districts to provide housing opportunities that are affordable to artists and similar professionals. The City will continue to allow the conversion of existing commercial nonresidential buildings to JLWQs in specific commercial/industrial locations while considering the impacts on nearby viable businesses. The City will support bringing existing, unpermitted JLWQ units in commercial and industrial buildings into compliance with Building Codes and the Planning Code in a way that mitigates displacement of existing tenants and preserves affordability.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase production and protection of live/work housing and housing for artists to match housing need.*

Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.

The City will encourage the reuse and rehabilitation of Oakland's historic building stock to provide additional housing units, safeguard neighborhood character, and preserve the energy embodied in the building's original construction. The City will amend land use regulations and development standards in the Planning Code to reduce constraints on adaptive reuse of commercial buildings for residential use, and help make clear how the Historic Building Code and Alternate Materials and Methods Request (AMMRs) can be used to facilitate the adaptive reuse of older commercial buildings. Reuse in environmentally sensitive areas—including in warehouses adjacent to industrial uses—will consider health and safety impacts prior to approval.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *2025*

Objective: *Significantly increase reuse and rehabilitation of historic commercial buildings for residential use to match housing need.*

Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs.

The City will implement its "ADU Loan Program" to provide deferred loans to low-income homeowners who want to legalize an ADU.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *Funding for an ADU incentive program would include $3 million already awarded from the State of California's CalHome program for a pilot program, and the City would seek ongoing State funding for ADU development in the future.*

Timeframe: *The City's ADU Loan Program opened in Fall 2022 and will offer loans into 2023. As additional funding becomes available, the City will provide additional funding opportunities. For more information on the City's Accessory Dwelling Unit Loan Program (ADULP), see https://www.oaklandca.gov/adulp.*

Objective: *Using the ADU CalHome grant, the City anticipates supporting at least 25 low-income and/or senior households with the cost of legalizing at least 25 Accessory Dwelling Units. This is based on the 25 loans projected for the existing CalHome grant the City has received to help low-income homeowners build ADUs.*

Action 3.2.5: Reduce constraints to the development of ADUs.

On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs that went beyond the minimum requirements of State law. These additional allowances include higher maximum heights allowing for two-story ADUs, reduced setbacks in some zones, larger maximum sizes for detached ADUs, and an introduced ADU amnesty from Planning Code requirements allowing homeowners with existing un-permitted ADUs to legalize them. Also, this zoning update removed setback requirements and allowed additional envelope expansion of existing structures to create livable-size ADUs on "small lots" where ADUs would not be feasible under previous requirements.

The City's current Planning Code already meets the requirements for recently passed ADU state laws under SB 897 and AB 2221. City Staff will work to implement the new requirements for these laws through the City's administrative approval process.

The City will continue to provide pre-approved ADU plans on its website to facilitate reduced applicant cost and expedited review for ADUs. The City will also provide increased staffing capacity for the "one-stop shop" to distribute information to property owners, contractors, and tenants. The City will budget a new staff position for an ADU Specialist whose assignments would include community outreach and education to teach property owners about ADU construction, financing, and landlord responsibilities. The City will also consider developing a database through which property owners can find and hire local workers to build ADUs. The City will comply with State law (including recently passed SB 897 and AB 2221) and Building Code requirements for ADUs, and also study how the implementation of the Building Code may constrain the legalization of unpermitted ADUs. Oakland's Planning & Building Department will take the lead in implementing these efforts, with support as needed from Oakland's Department of Housing and Community Development.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *January 2023 (Comply with 2022 State ADU law requirements); 2023-2024 (One-Stop Shop); by 2025 (Budget a new ADU Specialist position)*

Objective: *Significantly increase production of ADUs to match housing need.*

Action 3.2.6: Monitor Affordability of Permitted ADUs.

Based on a recent online survey conducted by the City as well as data provided by the Association of Bay Area Governments, the Appendix C Sites Inventory estimates that ADUs produced from 2023 to 2031 will have the following projected affordability levels: 35 percent affordable to very-low-income households, 35 percent affordable to low-income households, and 30 percent affordable to moderate-income households. Based on a total projected ADU production of 1,978 units through 2031, the City has estimated that ADU construction will result in the creation of 692 very-low-income units, 692 low-income units, and 593 moderate-income units.

To ensure that Oakland's ADU production aligns with these projections, the City will send a survey to the property owners of ADUs that received a certificate of occupancy within the prior two-year period requesting information on household size and rents charged for these recently constructed ADUs. If the survey identifies a shortfall in the numerical affordability production projections, within six months of the survey report being published the City will provide to the Planning Commission a report summarizing the survey report and identifying additional actions that can be taken to either increase the production of affordable ADUs, and/or proposing other rezoning programs that will enable additional affordable housing production to fill any identified affordable housing production shortfall.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *First survey to be conducted first quarter of 2024. Results to be presented to Planning Commission by end of 2024. Any necessary reforms to ADU regulations and/or rezoning programs to be adopted in 2025. Second survey to be conducted in first quarter 2026.*

Objective: *To match affordability projection included in Table C-8 of Appendix C, produce on average 86.5 very-low-income ADUs, 86.5 low-income ADUs, and 74 moderate-income ADUs per year.*

Action 3.2.7: Proactive Short-Term Rental Enforcement.

With limited exceptions in single-family homes with a CUP for a traditional owner-run bed and breakfast, Oakland's current planning regulations prohibit any rental of an accessory dwelling unit (ADU), single-family home, duplex, apartment/condo, live/work unit, or other dwelling unit for less than 30 consecutive days. In addition, State laws that govern ADUs do not allow for any ADU to be rented as a short-term rental of less than 30 consecutive days. The City's code compliance division reviews zoning code violations on a complaint-driven basis, which has not sufficiently deterred property owners from operating short-term rentals that do not comply with planning regulations. Additionally, code compliance often lacks sufficient evidence to clearly document that an ADU or other dwelling unit is operating as a short-term rental.

In response, the City will pursue additional data collection tools that will allow the City to access information showing addresses of units listed on short-term rental platforms. Upon securing this data, the City will engage in proactive enforcement against property owners who are operating short term rentals in ADUs and in other dwelling units throughout the City.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *Violation Fees, permit fees, transient occupancy tax collection*

Timeframe: *Secure additional data collection tools and begin proactive enforcement in 2023. Complaint-based enforcement is ongoing and would continue, supplemented by the additional data collection tools.*

Objective: *Reduce the number of unauthorized short-term rentals in Oakland by having bi-yearly data scrapes of short-term rental platforms and automatic mailing notifications to owners in violation.*

POLICY 3.3 EXPAND RESOURCES FOR THE CONSTRUCTION OF AFFORDABLE HOMES

Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.

Consistent with the California Surplus Lands Act (SLA) and the Oakland Municipal Code, the City will continue to release land designated as surplus for development of affordable housing and other uses. The City will continue to release one to two surplus sites per year for permanent affordable housing development projects, noticing them via a Notice of Availability (NOA) to local Bay Area affordable housing developers, as well as to all California Housing Finance Agency (CalHFA) housing sponsors, consistent with the SLA. All surplus sites are tracked on the City's website and NOAs are available on the website as well. All surplus sites disposed of pursuant to the SLA will include a minimum of 25 percent affordable units and in many cases will include up to 100 percent affordable units. If the SLA process does not conclude in an affordable housing development for a particular site, the City will issue Request for Proposals (RFP) for its designated surplus properties. If the RFP process results in an agreement with an entity that develops 10 or more residential units on the property, the City will require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233 of the SLA. The City will consider depositing up to 100 percent of net proceeds from such sales or leases to the Affordable Housing Trust Fund. The Planning Bureau provides priority processing for affordable projects that are located on surplus sites. The City will also continue to seek to utilize surplus sites – as well as other City-owned or City-leased properties – for emergency housing programs (e.g., safe RV parking and community cabins) and other community-serving uses prior to disposition under the SLA.

Responsible Agency: *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development, Oakland Planning and Building Department*

Potential Funding Source: *City subsidy*

Timeline: *The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete EIR for rezoning by July 2023.*

Objective: *Issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. Notices will be posted on the City's website and distributed directly to developers, including nonprofit housing providers.*

Action 3.3.2: Expansion of Section 8 vouchers.

The City will continue to participate in the HUD-operated Section 8 Housing Choice Vouchers program, and the City will continue to coordinate with the Oakland Housing Authority to advocate for additional funding from the federal government for more Section 8 rental assistance for very-low-income renters by documenting the need for additional housing vouchers and contacting decision-makers at HUD as appropriate. The City will also advocate for additional funding at the federal level as opportunities such as the American Recovery Act become available. Further, the City will work with nonprofit and community-

based partners to educate property owners throughout the city about housing choice vouchers to encourage greater participation and to increase locational choices for voucher holders (see Action 5.2.8). In 2022, Oakland secured 515 emergency housing vouchers as part of its advocacy to expand the number of housing vouchers for Oakland residents.

Responsible Agency: *Oakland Mayor's Office, Oakland Housing Authority, Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD Section 8 vouchers*

Timeline: *Ongoing, 2023-2031. As part of its landlord education efforts, the Oakland Department of Housing and Community Development will promote voucher acceptance. The Oakland Department of Housing and Community Development hosts multiple landlord education workshops each year that can serve as an opportunity for this promotion. The Mayor's Office will lead federal advocacy during budget discussions with the federal government on an annual basis.*

Objective: *The City of Oakland Housing Authority will increase the number of vouchers being used in proportion with any future federal expansion of Section 8 or similar programs.*

Action 3.3.3: City of Oakland Emergency Rental Assistance Program.

As funding allows, the City will build on the success of the Keep Oakland Housed program (a public-private partnership) and the Federal Emergency Rental Assistance Program (ERAP) to offer homeless prevention services to those most at risk of experiencing housing instability or homelessness including rental assistance grants to distressed tenants, free legal consultation, eviction defense, case management, and employment and financial counseling and other services to increase housing stability and prevention of homelessness. The City will work with community partners to provide these direct services and to advance racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness.

Responsible Party: *Oakland Housing and Community Development Department*

Potential Funding Source: *Federal ERAP funds, private contributions, other local, State, and federal resources as available*

Timeframe: *The City of Oakland allocated over $42 million of Federal and State ERAP funding for emergency rental assistance between 2020-2022 and, if resources are available, will allocate additional ERAP funds to an existing waitlist in 2023. Of the approximately 3,500 Oakland households served by the ERAP program, over 85 percent earned less than 30 percent AMI. The City of Oakland will also issue a Request for Proposals and award a contract of approximately $2.3 million to a collaborative of homelessness prevention program providers by mid-2023.*

Objective: *The City of Oakland will continue to implement a homelessness prevention program that includes emergency financial assistance, legal support and wrap around services. The program will*

be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program with a focus on advancing racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness

Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.

The City will continue to work with development partners including Community Land Trusts, co-ops and emerging developers for possible partnerships involving City land as mentioned in Action 3.5.1 and other community partners on publicly owned sites that may be designated as surplus property. To support Action 3.3.1, the City will assist nonprofit and local developer partners to access public funding and financing to construct and increase the supply of permanently affordable rental units that are designated for extremely-low-income households. In addition, the City will ensure that permanently affordable housing for extremely-low-income households is prioritized where services and needs are accessible by transit or walking. The City will prioritize affordable housing developments that dedicate at least 20 percent of units for extremely-low-income (ELI) or homeless households in accordance with current policies. The Planning Bureau provides priority processing for affordable projects located on surplus sites. The City will review City-owned sites to identify, and, where appropriate, address land use conflicts that would prevent affordable housing development.

Responsible Agency: *Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development; Oakland Human Services Department*

Potential Funding Source: *City subsidy*

Timeline:. *The City will continue to release future NOFAs contingent upon funding and staff availability. The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete rezoning by July 2023.*

Objective: *The City will continue to release future NOFAs contingent upon funding and staff availability. City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. NOFAs, Notices of Availability and/or Requests for Proposals will be posted on the City's website and distributed directly to developers, including nonprofit housing providers and community partners.*

Action 3.3.5: Implement an affordable housing overlay.

The City will create an Affordable Housing Overlay (AHO) to streamline the approval of affordable housing by right. Proposed features of this overlay include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will broadly apply this overlay, except for limitations on designated historic resources as well as areas in the Very High Fire Hazard Severity Zone (VHFHSZ). The City will also study the

possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as the potential for select areas within the VHFHSZ for the overlay to apply. The City will allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay. See Appendix J for a summary of the AHO.

100 percent affordable projects within the AHO zone would be subject to a ministerial approval process. A proposed project would be exempt from CEQA and not appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Objective: *Enable development of additional affordable housing throughout the City, including in higher resource areas.*

Action 3.3.6: Access to low-cost financing for development.

The City currently awards local funding that affordable housing developers leverage to obtain financing for their projects. As funding allows, the City will continue to award funds to affordable housing developers on favorable terms—including simple low interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City will also continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031*

Objective: *Allocate all budgeted local funding sources (approximately $12 million annually starting in 2023) to support the construction, acquisition, and/or preservation of deed restricted affordable housing units each year. With $12 million in local funding forecasted in 2023, at least 80 units could be created or preserved; of these, at least 16 would be set-aside for extremely low-income residents; the creation of extremely low-income units will be constrained by the availability of operating subsidy (see Action 3.1.1). This will result in a total of at least 640 low-income units over the Housing Element period, including 128 extremely-low-income units, which would increase if more local funds are identified or secured such as a new local bond measure dedicated to funding*

affordable housing.

Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.

The City currently relies on development impact fees to provide local funding for affordable housing. A study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary affordable housing requirements. The study will consider the number of units likely to be produced through impact fees versus inclusionary affordable housing requirements and their likely affordability levels; and whether targeted inclusionary housing requirements may increase the provision of affordable housing units in higher-resource neighborhoods.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *By mid-2024, complete a study on targeted inclusionary housing requirements and present to Council.*

Objective: *Ensure implementation of affordable housing impact fees and/or inclusionary housing requirements maximizes production of affordable housing in all areas of the city.*

Action 3.3.8: Right-sized development fees on market-rate developments.

The City levies a number of development impact fees, including for affordable housing, to ensure that new market-rate development pays its fair share toward funding affordable housing, transportation improvements, and capital facilities. The City will regularly monitor its impact fees and ensure that appropriate amounts are set on an annual basis. Pursuant to the Mitigation Fee Act, the City will conduct a comprehensive analysis and make findings every five years for each impact fee along with review of whether to increase fees and if the option of building affordable housing units on-site percentage is set appropriately.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Public Works Department; Department of Transportation (DOT)*

Potential Funding Source: *General Plan Surcharge, permit fees, and Impact Fees*

Timeline: *Ongoing, 2023-2031; initiate next five-year update in 2026*

Objective: *Continue to monitor and adjust impact fees.*

Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Affordable housing developers have pointed to the impact of City fees and the timing of fee payment, including impact fees, building permits, and public art requirements, as constraints to development. The

City currently requires for Affordable Housing Impact Fees only one-half of the amount of impact fees to be paid before permit issuance and the remaining half to be paid before the issuance of Certificate Of Occupancy (COO), while the Transportation and Capital Improvement Impact Fees are paid in full before building permit issuance. The City also defers other fees such as public art and school tax. The City will explore additional ways to increase flexibility in payment timing and potential fee reductions and/or waivers to reduce the burden imposed by the collection of City fees and requirements.

Responsible Agency: *Oakland Planning & Building Department; City Administrator's Office; Oakland Department of Finance; City Attorney's Office*

Potential Funding Source: *Permit fees, and General Fund for any reduction of fees*

Timeline: *Review and update where possible Impact Fee and other payment timing as well as fees charged by mid-2024.*

Objective: *Explore methods to reduce cost burden of City fees and payment timing to significantly increase affordable housing development.*

Action 3.3.10: Citywide Enhanced Infrastructure Financing District (EIFD).

On November 1, 2022, the Oakland City Council enacted a resolution expressing the City's interest in establishing one or more Enhanced Infrastructure Financing Districts (EIFD) to fund affordable housing that affirms the City's commitment to furthering fair housing and infrastructure improvements. The resolution directed the City Administrator to study proposals for the creation and implementation of an EIFD exclusively for East Oakland, exclusively for West Oakland, and a combined East and West Oakland EIFD. Upon completion of this study, the City Administrator is to return to Council with reports and recommendations. The City will consider implementing the EIFD to increase available local funding for affordable housing.

An EIFD is a special taxing district that directs a portion of future property tax growth towards infrastructure expenses, including affordable housing. The Draft Downtown Oakland Specific Plan is also recommending the creation of an EIFD in the downtown area to support the construction of onsite and offsite affordable housing as part of future development in the downtown.

Responsible Agency: *City Administrator's Office; Oakland Department of Finance*

Potential Funding Source: *An EIFD would be a cost-recovering program for any implementation costs.*

Timeline: *By end of 2024, complete studying the implementation of one or more EIFDs and determine proposed EIFD boundaries.*

Objective: *Implement one or more EIFDs to significantly increase affordable housing development and fund infrastructure improvements to match need, if feasible and financially appropriate.*

Action 3.3.11: Support innovations by design.

The City will support and encourage innovations in construction technology to build more housing in less time, more affordably, and with fewer resources by supporting non-traditional construction methods (such as modular and other offsite construction methods). The City will meet with stakeholders periodically to discuss emerging innovations and gather more information to understand and accommodate barriers.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Significantly increase production of housing using construction innovations to match housing need.*

Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.

The ACAH Program provides loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing. The ACAH Program, formerly known as the Site Acquisition Program, was formalized through the passing and issuance of local Measure KK bond funds but continues under other funding sources even as Measure KK funds have all been allocated. With the passage of Bond Measure U, it is expected that funds from this new funding source will continue to support the acquisition and conversion to affordable housing of existing units. The City will continue to issue NOFAs as funding is available and work with borrowers—including local community land trusts—to create new affordable housing units and preserve existing ones. The City will also continue to explore additional funding sources to sustain the ACAH program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available*

Timeline: *The ACAH Program has issued 3 Notices of Funding Availability (NOFA) since the program's inception: in 2017, 2019, and 2020, issuing approximately $45 million to affordable housing developers through the 3 NOFAs. The Oakland Department of Housing and Community Development will continue to release future NOFAs contingent upon funding and staff availability. The next ACAH NOFA release is anticipated in December 2022, and pending City Council approval, staff expect to begin reviewing the next round of ACAH NOFA applications in 2023.*

Objective: *Provide loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing throughout the City of Oakland. Currently the City's policy is to allocate approximately 25 percent of available local funding towards continuing the ACAH program, and future funds will be allocated contingent upon*

availability.

Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.

The City will continue to allocate funding to support predevelopment funding for affordable housing projects using its existing local sources, to help relieve the costs associated with the entitlement process especially for emerging and BIPOC affordable developers. The City will also identify and secure low-cost debt products for affordable housing development. To this end, the City has applied to HUD for Section 108 authority to leverage its CDBG allocation to provide low interest debt for affordable housing. Because Section 108 are hard loans that require repayment, the repayments could be revolved to support ongoing pipeline. The City will use a data-informed approach to target its resources towards both high-opportunity and historically marginalized/redlined areas. The city will also target resources to support the growth of emerging and BIPOC affordable developers.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME and Section 108 funds, and other local, State, and federal funds as available*

Timeline: *The City applied to HUD for Section 108 authority in 2022 and will seek to use these funds starting in 2023, pending HUD approval.*

Objective: *As suitable funding and projects become available, predevelopment funding and low-cost debt products will be made available for affordable housing development.*

Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing.

Affordable housing developers indicated during outreach that competing with market-rate developers for sites posed a barrier on their ability to acquire sites for development. The City typically provides gap financing commitments during predevelopment, with funds provided at construction finance closing; acquisition is an eligible cost for reimbursement by the City's funding. While directly funding acquisition presents an earlier, riskier, and less efficient investment of the City's limited funds, in recognition of this critical need the City will consider the implementation of a leveraged acquisition fund to allow for faster and more efficient acquisition transactions. The City will also study the creation of debt and/or equity funds to support small site housing projects. If feasible and funding is available, this new fund may be similar in nature to the City and County of San Francisco's Small Sites Program, which relies on non-governmental funding for acquisition and rehabilitation, that is later taken out by City funds. The City will also assess the feasibility of raising the Council authorization threshold for site acquisition to enable the faster purchase of sites.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available to leverage philanthropic and other outside resources.*

Timeline: *Conversations with Community Development Financial Institutions (CDFIs) and other funders have been ongoing since 2021, but any fund will require a significant stream of new City subsidy to support takeout of acquisition loans. The City will further explore this item in 2023, pending the passage of Measure U.*

Objective: *By the end of the Housing Element Cycle, the City will be able to report on the practicality of a leveraged acquisition fund, as well as the* feasibility and appropriateness of a small sites fund.

Action 3.3.15: Continue and expand density bonus incentives.

The City will continue to implement Chapter 17.107, Density Bonus and Incentive Procedure, which was updated and adopted by the City Council on April 19, 2022. The Density Bonus Ordinance offers developers density bonuses in exchange for the provision of affordable housing and provides:

- Greater certainty to project applicants about the City's implementation of the State Density Bonus Law, density bonuses, and incentives for affordable housing;
- Clarifying and accessible language that aligns the ordinance with the City's existing density bonus application intake and regulatory agreement requirements, including clear timelines and a list of all required information;
- Offers an opportunity to streamline the production of affordable housing; and
- Ensures affordability of both rental and homeownership units and prevents potential displacement of existing tenants.

To ensure that the Chapter 17.107 remains compliant with state law, and to solicit additional ideas for incentives and expansion of the density bonus program, the City will review the density bonus program mid-cycle, bring necessary amendments to conform to state law, and solicit feedback from Planning Commission and City Council on additional incentives that could be included in the local density bonus program.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *In 2025, bring forward informational report to Planning Commission and City Council on effectiveness of City's density bonus program and in 2026 return with proposed amendments to ensure conformity with state law and incorporated any recommended policy changes.*

Objective: *Significantly expand the City's density bonus program and increase production of density bonus projects to match housing need.*

Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund.

The real estate transfer tax, also called a Real Property Transfer Tax (RPTT), is due when a home is sold or gifted. The City will study the impact that the RPTT has on the affordable housing subsidy and the effect on the General Purpose Fund. In the study, the City will explore revisions to the RPTT including:

- Expanding the current progressive tax;
- The impact of reducing or waiving the tax for affordable housing; and/or
- Using a portion of the revised tax rate as a dedicated funding stream for affordable housing. This could provide annual revenues at levels significantly higher than current Impact Fee revenue.

Responsible Party: *Oakland Department of Finance*

Potential Funding Source: *General Fund Surcharge for any applicable studies*

Timeline: *Conduct the analysis and provide a recommendation to the City Council and City Administration by Fiscal Year 2023-2024*

Objective: *Complete an analysis by Fiscal Year 2023-2024.*

Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.

The City will continue to work with low-income, grassroots, and BIPOC affordable housing developers to identify barriers that prevent BIPOC and small nonprofit developers from accessing City funding and navigating the permitting process. The city will continue to develop solutions to ensure that the permitting process is transparent, affordable, and accessible for these Emerging Developers, defined by Oakland HCD as "a developer who has less than five (5) years of experience as a developer and/or less than five completed projects." The City has secured a Breakthrough Grant from the Partnership for the Bay's Future that will dedicate a full time fellow to facilitate this work of identifying and breaking down barriers for BIPOC and emerging developers to develop affordable housing in Oakland.

Responsible Agency: *City Administration; Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *San Francisco Foundation, General Plan Surcharge, and permit fees*

Timeline: *The City's Breakthrough Grant Fellow is currently researching and implementing strategies to address this action item from 2022 to 2024.*

Objective: *The proportion of City funding distributed for affordable housing development to low-income, grassroots and BIPOC affordable housing developers will significantly increase by 2031.*

Action 3.3.18: Implement affordable housing investments contained in Measure U

Measure KK, a bond measure passed in 2016, has provided a significant source of funding for anti-displacement and affordable housing preservation projects. The City has allocated nearly all remaining Measure KK bond funds for resident-led and community land trust-supported preservation projects and homeless acquisition projects.

The City successfully sought voter approval in November 2022 to authorize issuance of $850 million in General Obligation Bonds to fund and prioritize affordable housing preservation projects among other purposes. This Affordable Housing and Infrastructure Bond Measure (Measure U) will allocate $350 million towards affordable housing preservation projects.

Responsible Party: *Oakland Department of Housing and Community Development;*

Potential Funding Source: *Measure U Bond Funds*

Timeframe: *As described in Action 3.3.12 and other actions related to the expenditure of affordable housing bond funds, expend the proceeds of Measure U*

Objectives: *Measure U requested authorization for $850 million in General Obligation Bonds with $350 million set-aside for affordable housing. For reference, for the 2016 Infrastructure Bond (Measure KK) where $600 million of General Obligation Bonds were authorized, $100 million was set-aside specifically for affordable housing and anti-displacement projects and supported the new construction of over 700 units, the preservation of 420 units, and the acquisition and conversion of over 400 units. This leverage of subsidy achieved under Measure KK may not be replicable as KK was layered onto projects that also secured County A1 bond funds, which are now also fully allocated. New construction projects that set-aside more than the program minimum (currently 20 percent) of units for extremely-low-income residents will be prioritized, per the City's process for awarding funds to affordable housing developers, through their New Construction Notice of Funding Availability (NOFA). The City will also be able to make substantial funding allocations to the Acquisition and Conversion to Affordable Housing (ACAH) and Preservation NOFAs to acquire and convert additional market rate units to affordable housing, and also preserve the City's existing affordable housing portfolio, extending affordability restrictions, and investing in the rehabilitation of older properties where needed.*

Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program

As part of a mid-cycle evaluation, the City will establish a system to coordinate tracking units with Development Services staff who process permitting, to ensure that as projects are developed, there is adequate capacity available citywide to meet the City's RHNA targets and no net loss requirements. The City will also assess the effectiveness of its AFFH programs (including Action 3.3.6), including sites that develop in higher resource areas.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Mid-cycle (2027)*

Objective: *Identify and monitor adequate sites available for development, and increase the baseline of affordable units in high-resource areas.*

POLICY 3.4. REFORM ZONING AND LAND USE TO ADDRESS COMMUNITY PRIORITIES

Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements.

The City will allow additional building heights and densities in certain corridors and districts. These changes include:

- **Zoning for diverse housing types:** As discussed in Action 3.2.1, the City will develop revised zoning standards for a diversity of housing types in lower density neighborhoods, including but not limited to duplexes, triplexes, and fourplexes in zoning districts such as the RD Detached Unit Residential, RM Mixed Housing Type Residential, and RU-1 and RU-2 Urban Residential Zones. Zoning changes will include revised standards for building heights, densities, open space, lot coverage, and setbacks. The City will also reduce minimum lot sizes to facilitate the subdivision of existing lots. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility and potential opportunities for home ownership (split lots and condominiums).
- Elimination of Conditional Use Permits for Density: Under Action 3.4.3, the City will also eliminate all conditionally permitted densities throughout Planning Code to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs.
- Objective Design Standards: Under Action 3.4.8, the City will also develop objective design standards at the neighborhood level to ensure that such missing-middle housing is designed in a manner that is compatible with existing residential housing forms in these zoning districts.
- **Increased Heights and Densities along Corridors:** The current building height map and permitted densities along key corridors such as International, Foothill, College, Claremont, and MacArthur Boulevards does not always allow residential projects to meet their full potential. Consistent with the housing sites map, the City will undertake zoning map revisions to allow increased heights and densities. The City will also increase heights and densities on interior residential streets within close walking distance of key corridors.
- **Increased Heights and Densities in Transit-proximate areas**: Alongside efforts to increase missing-middle housing (see Action 3.2.1), the City will increase allowed height and density in areas in close proximity to high-capacity transit, including areas near Rockridge BART and International Boulevard BRT Stations.
- **Increased Heights and Densities in Resource-rich areas:** Oakland's high resource neighborhoods are typically lower-density and have historically been exclusive – both economically and racially. Allowing higher density multi-unit buildings in these areas that are rich in services will help increase the competitiveness of affordable housing projects for State funding, as well as the feasibility of developing significant numbers of housing units within these neighborhoods. Zoning

changes will include permitting residential densities above 30 dwelling units per acre by right in designated areas for affordable housing projects and height increases along College and Claremont Avenue. This will help further fair housing objectives by increasing the availability of affordable housing, in high resource areas.

- **Utilizing Senate Bill 10 Provisions:** Under Senate Bill 10 (Weiner) provisions, the City will identify parcels located in transit-rich areas and/or in Racially Concentrated Areas of Affluence (RCAAs) to allow up to ten units of residential density and increased heights, and provide additional opportunity for infill housing within high-resource areas.
- See Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need. Create additional opportunities for development along transit-rich areas and in urban infill sites to significantly increase production of housing to match housing need and to affirmatively further fair housing.*

Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update.

The City is updating the 2023-2031 Housing Element as part of a comprehensive update to the General Plan. The General Plan Update (GPU) is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, as well as preparation of a Racial Equity Impact Analysis, Zoning Code and Map update, and creation of a new Environmental Justice (EJ) Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by the end of 2025.

As part of the LUTE update, the City will study the impact of historic and contemporary zoning restrictions, especially single-family zoning, on ongoing patterns of racial segregation. Existing data on historic zoning patterns highlights the racial disparities in homeownership and rental patterns. The City will utilize this study to direct zoning changes in the LUTE as part of Phase 2 of the GPU.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *Study complete by mid-2025*

Objective: *Through this study, inform zoning and land use designation changes to promote inclusive, equitable and diverse housing patterns.*

Action 3.4.3: Revise Conditional Use Permit (CUP) requirements.

Conditional Use Permits (CUPs) are currently required for multi-unit buildings in the RD-2 and RM Zones, which can act as a constraint on development – especially for affordable housing. The City will revise regulations to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs. Under Action 3.4.8, the City will create objective design standards and amend the Planning Code design review procedures to allow for streamlined, ministerial approval. The City will also actively promote and support use of SB 35 to streamline 100 percent affordable housing developments. These revised standards will be implemented alongside changes to Oakland's RD, RM, and RU zones as described in Action 3.2.1.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.4: Revise citywide parking standards.

Parking requirements are a major cost driver in residential development, and often conflict with sustainable development goals that seek to reduce dependence on automobile use. As such, the City recently eliminated residential parking minimums in the downtown area. Continued revisions of Oakland's parking standards, such as elimination of parking minimums within ½ mile of major transit stop and reduction of minimum parking standards in other areas as well as lower parking maximums in downtown and new parking maximums near BART stations will be undertaken through a comprehensive review of existing residential parking standards and the identification of appropriate new standards to match long-term development and environmental goals. Additionally, for mixed-use development projects (commercial on ground floor and residential uses above), the City will revise parking requirements so that additional residential development on these sites is not constrained by any lack of conformance with commercial parking regulations. (See Appendix J for a summary of Zoning changes as well as strategies regarding parking included in Oakland Equitable Climate Action Plan: Transportation and Land Use Action 1.)

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

July 2023

Revise citywide parking standards for all housing types and zones, including but not limited to housing inventory sites, downtown and corridors.

Implement January 1, 2023 the elimination of minimum parking requirements for residential developments within ½ mile of major transit stop to conform with state law and update Planning code by July 2023.

Objective: *Reduce constraints to development to significantly increase production of housing to match housing.*

Action 3.4.5: Revise open space requirements.

Both affordable and market-rate developers have pointed to the relatively high open space standards in Oakland as a constraint to development, especially for higher-density projects. In this context, "open space standard" refers to the city requirement for new housing to feature courtyards, patios, balconies, and other open areas in the development. As noted in Appendix F, Housing Constraints, Oakland's open space requirements vary substantially across zoning districts, but in some cases are more than double the open space requirements seen in comparator jurisdictions. To meet these requirements, each one square foot of private usable open space is considered equivalent to two square feet of required group usable open space and may be so substituted.

To reduce this development constraint, the City will review the open space requirements in zoning designations where minimum usable open space requirements currently exceed 60 square feet of private

open space/120 square feet of common open space per unit and revise common and private open space standards for multi-family developments to increase the feasibility of residential projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Revise common and private open space standards for residential developments, and allow flexibility on its onsite location and configuration

Objective: *Significantly reduce existing open space requirements to remove constraints on development and increase production of housing to match housing need.*

Action 3.4.6: Correct zoning district boundaries that cut through parcels.

Oakland's Zoning Map includes many zoning district boundaries that cut through individual parcels – meaning that the same parcel is subject to multiple development standards, which can act as a development constraint. In updating the Zoning Map, the City will correct instances of this occurrence and ensure that zoning district boundaries that affect allowed height and density follow parcel boundaries to the maximum extent feasible to remove inconsistencies and ambiguities.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.7: Capture the diversity of existing built fabric in zoning.

Oakland has a diverse historic urban fabric, some of which no longer conforms to the current Planning Code. To capture and continue this diversity and remove ambiguities, the City will reduce minimum lot sizes and setbacks to facilitate the creation of small-lot developments, as well as legitimize the many existing small-lot neighborhood patterns in West Oakland and other neighborhoods. The City will conduct a comprehensive review of the Planning Code to identify where current development standards have created non-conformities for older built facilities and amend development standards to reduce or eliminate them where appropriate. The City will also provide flexibility in the objective standards to retain and promote the City's vernacular built environment.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Reduce constraints on development to significantly increase production of housing to match housing need.*

Action 3.4.8: Implement objective design standards.

The City currently requires design review for nearly all residential development, which can significantly lengthen the time required for project approval. To reduce the permitting timeline, the City has initiated a process to develop objective design standards to streamline the approval of residential, mixed-use, and commercial building types, with a particular focus on much-needed affordable housing projects in transit-rich areas. As opposed to "design guidelines," objective design standards will not be subject to interpretation, and will result in faster, more predictable approvals of high-quality development that respects Oakland's history and benefits the local community. Housing development projects will have the ability to utilize the objective design standards that will not require evaluation under the regular design review criteria provided under Planning Code Section 17.136.050, including the existing criteria that the project will "enhance desirable neighborhood characteristics." Project applicants may also choose to instead utilize the regular design review criteria and process in order to have greater flexibility and creativity in design criteria.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, and SB2 Grant for Objective Design Standards*

Timeline: *The City will adopt objective design standards that will be available to all housing development projects by 2024*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.

In January 2022, the City updated its ADU regulations to comply with changes in State law. To address unpermitted units, the new ADU regulations go beyond minimum compliance with State law and establish an expansive legalization process for unpermitted ADUs addressing not only any existing non-compliance issues with the Building Code but the Planning Code as well. The City has also initiated a program to allow pre-approved construction documents for ADUs that creates a more streamlined approval pathway for many homeowners The City will continue to implement this legalization and streamlining of ADU permitting processes. The City will study options to alleviate the burden of the building code on the legalization of unpermitted ADUs.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and Ongoing*

Objective: *Reduce constraints to development to significantly increase production of ADUs to help address housing need.*

Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right

Pursuant to State law, the City is required to permit vacant sites included in two consecutive prior RHNA cycles and non-vacant sites included in at least one prior RHNA to develop with owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. This means that the City cannot require any form of discretionary review or approval for such projects.

The City will create a Housing Sites Overlay Zone to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to build 20 percent or more of the units are affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle)if redeveloped will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay. This action is intended to facilitate housing opportunities in Oakland and to bring attention to those sites that the City intends for housing to be built pursuant to State requirements.

This means that the City cannot require any form of discretionary review or approval for such projects. A proposed project would also not be subject to CEQA and would not be appealable. This would provide greater certainty to projects building at least 20% affordable units that if the project is within the Housing Sites Overlay Zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process. See Appendix J for a summary of the Housing Sites Overlay Zone.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June - July 2023*

Objective: *Reduce constraints to development to significantly increase production of housing to match housing need.*

Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing.

Several school districts and community college districts in California have successfully built affordable housing for educators and/or students on their property. In some cases, this housing was built on district offices and other non-instructional sites. In other cases, housing was carefully co-located with an active school campus. The State has also recently invested hundreds of millions towards student housing on community college property. The City will review OUSD- and Peralta-owned sites to identify, and when practical correct, land use conflicts that would prevent affordable housing development.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2025 with the adoption of the Land Use and Transportation Element*

Objective: *Reduce constraints to development to allow for at least one educator and/or student housing project during the sixth cycle RHNA period.*

POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS

Action 3.5.1: Support community land trusts and other shared equity models.

The City has worked with a variety of community land trusts, including East Bay Permanent Real Estate Cooperative, Sogorea Te', Oakland Community Land Trust, Bay Area Community Land Trust and the Northern California Land Trust to provide affordable housing (including ownership housing). Most significantly, the City created the Acquisition and Conversion to Affordable Housing (ACAH) Program, which has provided funds through Bond Measure KK to community land trusts to acquire and preserve affordable housing units (see Action 3.3.10). Starting in 2019, the ACAH Program was bifurcated into two subprograms to establish a set-aside for community land trusts and limited equity housing cooperatives after Council passed the 2019-21 Budget, which allocated $12 million to the Preservation of Affordable Housing Fund (PAHF). The City will continue to offer the ACAH Program and support community land trusts and limited equity housing cooperatives using additional funding sources. The City is also working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units and will implement these practices going forward. Financial or technical assistance may become available from the Bay Area Housing Finance Agency (BAHFA) or possible State programs. The City will prioritize lower-income residents and residents at risk of displacement while supporting shared equity models.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Impact fees, General Fund Surcharge, infrastructure bond funds, HOME, Measure U Bond Funds, CDBG, and other local, State, and federal funding as available*

Timeline: *Funds will be made available to equity affordability models through the City's annual affordable housing NOFAs on an annual or bi-annual basis (2023-2031). The next ACAH NOFA release is anticipated in December 2022.*

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to shared equity affordability models as per current practice.*

Action 3.5.2: Support housing cooperatives, co-living, and cohousing models.

Formal and informal housing cooperatives, co-living and cohousing models in Oakland have traditionally provided an alternative form of affordable housing, including ownership housing. To further support these initiatives, the City will conduct outreach with community-based organizations and other community partners to identify ways the City can support these models, especially for lower-income residents. The City will prioritize lower-income residents and residents at risk of displacement when supporting these alternative housing models. The City will study how the Planning Code and building occupancy standards affect the viability of these models. The Oakland Department of Housing and Community Development will also continue to support cooperatives and community land trusts through its Acquisition and Conversion to Affordable Housing program.

Responsible Agency: *Oakland Department of Housing and Community Development, Oakland Planning and Building Department*

Potential Funding Source: *Impact fees, General Fund Surcharge, Measure U bond funds, HOME, CDBG, and other local, State, and federal funding as available*

Timeline: *Since 2019, the Acquisition and Conversion to Affordable Housing (ACAH) program has included set-asides for coops and community land trusts, based on input received from community stakeholders. $12 million was allocated through the 2019-2021 budget, and the City will continue to implement a significant set-aside in future ACAH NOFAs, which are expected to be issued at least every other year through the 2023-2031 Housing Element cycle depending on staffing capacity and funding availability. The next ACAH NOFA is anticipated to be released in December 2022 (see Action 3.3.10). In 2024-2025 the City will study the Planning Code and building occupancy standards as well.*

Objective: *Oakland Department of Housing and Community Development will continue to make funds available to housing cooperatives as per current practice. The City will also include cooperatives, co-living and cohousing models in its study of the Planning Code and building occupancy standards.*

Action 3.5.3: Advocate for statewide legislation on social housing.

The City of Oakland recognizes that the statewide housing crisis requires statewide solutions. As such, the City will advocate for social housing legislation under consideration in the State legislature, known as the

California Social Housing Act or AB 2053. The Act would establish a California Housing Authority (CHA) to produce and preserve social housing – publicly-owned and mixed-income developments that maintain homes as permanently affordable. In addition, the City will track and advocate for statewide efforts to repeal Article 34 of the State Constitution that directly inhibits the ability of local jurisdictions to meet RHNA goals.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *City legislative advocacy will be funded through the existing general fund-supported contract for State legislative representation services.*

Timeline: *Ongoing, 2023-2031; the City will continue advocacy for social housing and Article 34 repeal legislation until it is adopted.*

Objective: *The State of California will successfully adopt social housing legislation and repeal Article 34.*

Action: 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households.

The City will continue to evaluate the merits of shallow-subsidy acquisition and development models to assist in the construction or preservation of housing for lower-income households, potentially in partnership with other regional agencies including Alameda County and the Bay Area Housing Finance Authority. However, such a program typically involves acquisition of rent-stabilized housing stock, which often enjoy strong protections under Oakland's Rent Adjustment Program. Recent changes to the Rent Adjustment Program Ordinance may provide equal or greater benefit to target households as a shallow subsidy affordable housing program. For this reason, it would make sense to evaluate the impact of these changes before further considering the adoption of a program.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *The model could be financed by de minimis appropriations of general fund revenue, with additional ongoing subsidies in the form of property tax abatements.*

Timeline: *By December 2025, the Oakland Department of Housing and Community Development will conduct an analysis of the added benefits a project-based shallow subsidy program may bring, compared to the benefits associated with existing rent stabilization measures.*

Objective: *Use property tax abatements to preserve, improve, or increase the supply of housing available to lower-income households*

Action: 3.5.5: Study Feasibility of Single-Stair Residential Buildings.

Building regulations serve to establish minimum safety standards in construction. Historically, fire and life safety strategies have focused on standards that ensure building occupants are able to safely evacuate a building during an emergency. Modern strategies focus more on containing fires where they occur through sprinkler systems, fire alarms, pressurized stairwells, fire-treated lumber, and similar strategies.

The California Building Code Section 1629 currently requires buildings to provide a minimum of two stairways in buildings exceeding 3 stories or 36 feet, and California Building Code Section 1006.2.1 generally requires two means of egress where the design occupant load exceeds values specified in an accompanying table. In contrast, the City of Seattle allows for building up to six stories to include only one stairway for egress, and many European residential buildings are constructed as tall as ten stories with single-stair access. A single-stair, or vertical shared access, building construction allows for greater flexibility in design, more efficient layouts, and potentially reduced costs. Currently, there are gaps in available data regarding the impact of these building code requirements on increasing construction cost and the safety benefits of requiring a second egress in combination with fire containment strategies.

The City of Oakland cannot unilaterally relax these California Building Code stairway and egress code requirements; change would be required at the state level. Nonetheless, to catalyze discussion on the issue and prepare for implementing future reforms, the City will study current stairway and egress requirements, including consideration of what cost savings could be incurred through revision of the second egress requirement and review of any potential fire safety concerns.

Responsible Agency: *Oakland Planning & Building Department; Oakland Fire Department*

Potential Funding Source: *General Plan Surcharge and permit fees.*

Timeline: *The City will present a report on the topic of existing second egress requirements and the impact of potential reforms to the Oakland Community and Economic Development Committee of City Council by the end of 2024.*

Objective: *Create additional information on single-stair reform that could assist in promoting statewide changes to the California Building Code second egress requirements.*

POLICY 3.6. STREAMLINE THE APPROVAL OF NEW HOUSING

Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.

The City will work with developers and housing stakeholders, particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.8, and/or increasing staffing at the Planning and Building Bureaus to

reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.2: Provide increased flexibility in development standards.

The City will provide increased flexibility in development standards, with a focus on smaller infill residential projects, to ensure that these projects can qualify for streamlined permitting without need for variances. The City will also consider increasing staff-level authority, with clear guidelines, to grant minor exceptions without the need for a variance, which can also reduce project timelines and costs. Alongside the efforts described in Actions 3.2.1, this flexibility will increase the capacity of the Planning Bureau to permit a variety of units, more expediently, creating more residential units in traditionally lower-density neighborhoods.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing.

Through the implementation of objective design standards as described in Action 3.4.8, the City will create a ministerial review pathway for qualifying developments based on project size, type, affordability level, and location. Discretionary design review will still be required for some types of projects and where certain adjustments are requested. As part of the entitlement reform process, the City will consider fee subsidies and/or payment deferrals to better accommodate affordable housing projects and increase the financial feasibility of affordable projects (see Action 3.3.9). The City will work with community partners and affordable housing developers to identify and implement appropriate entitlement reform actions.

Responsible Agency: *Oakland Planning & Building Department; Oakland Department of Finance*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2025 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.

SB 35 created a streamlined and ministerial approval process for housing projects that meet siting and construction criteria including being located in communities that have failed to meet their RHNA. The City of Oakland was among the 225 jurisdictions that made insufficient progress towards meeting the RHNA for low- and very-low-income housing at the time of the State's most recent determination in 2021 and is therefore subject to the streamlining provisions for proposed development in which 50 percent or more of the units will be affordable. The City provides an SB 35 streamlining checklist to facilitate the development of affordable housing, and will actively promote use of SB 35 streamlining for 100 percent affordable projects.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 and ongoing*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

Action 3.6.5: Continue one-stop and online permitting services.

Through the Online Permit Center (Accela Citizen Access), property owners are able to apply for and follow the status of their permits online. The City also operates an in-person One-Stop Permit Center, where the counter services of the Planning & Building Department, Oakland Fire Department, and Department of Transportation have been combined in one location to expedite the permitting process. The City will continue to offer both online and in-person permitting services to reduce permitting timelines. The City will also coordinate with affordable housing developers to understand and correct the gaps in these services.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2031*

Objective: *Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.*

POLICY 3.7. EXPAND OPTIONS FOR SPECIAL NEEDS HOUSING

Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.

The City will continue to encourage a wide variety of senior housing opportunities, particularly for lower-income seniors with special needs, through the provision of financial assistance and regulatory incentives as specified in the Planning Code. The City will continue to award points in its consideration of housing funding to projects that serve special needs populations, including seniors and homeless individuals. The City will explore options to expand the amount of financial assistance available to developers of housing for seniors and persons with special needs and will commit to transparent reporting of how special needs units are assisted. Special needs populations may include, but are not limited to, formerly incarcerated individuals, former foster youth, and persons with developmental disabilities.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing 2023-2031; By December 2023, the City will complete an analysis of how the clients served by its funded affordable housing compare to the demographics of Oakland residents, including an analysis of age.*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.2: Provide housing for persons with HIV/AIDS.

The City will continue to provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. The City will enhance outcomes via housing first model under the Alameda County EveryOne Home Plan.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, HOPWA, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to provide bonus scoring points for special needs populations as found in current practices.*

Action 3.7.3: Accessible units in new housing developments.

The City of Oakland's Housing Development Services division will uphold and align with State and Federal funding requirements for accessibility standards, which for most new construction projects requires at least double requirements under ADA and State building codes.

Responsible Agency: *Oakland Department of Housing and Community Development*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *The City will continue to meet the requirements of the Americans with Disabilities Act and the Fair Housing Act, among other local, state, and federal laws to ensure accessible units are included in new housing developments.*

Action 3.7.4: Implement the sponsor-based Housing Assistance Program.

The City will continue to work with the Oakland Housing Authority (OHA) to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service-enriched housing options that increase housing choice for special needs populations. The City will explore options to find more landlords willing to participate in the program.

OHA has its own community and social services arm, the Family and Community Partnerships Department (FCP). FCP educates and assists residents including search assistance and also works closely with owners during the leasing process to remove barriers and identify needed resources. OHA offers an array of Owner Benefits such as vacancy loss, an owner leasing bonus, and repair cost assistance. OHA's operations include two dedicated Owner Services teams and ongoing owner focused activities such as our Owner online Portal, educational webinars and emails, electronic forms options and outreach events such as our Owner Appreciation Day.

Responsible Agency: *Oakland Human Services Department; Oakland Housing Authority*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *Between 2023-2031, the City and OHA will promote and encourage OHA landlords to participate in this program through ongoing activities and annual events.*

Objective: *The City will continue to work with the Oakland Housing Authority to support households successfully finding housing.*

Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes.

The City will regularly review household size data from affordable housing application portals and waitlists to ensure that affordable housing production is aligned with community needs. City affordable housing funding priorities will be adjusted as needed to be aligned with demand across the spectrum of unit sizes and housing types. This may include large units suitable for multi-generational families, studios and efficiency units for individuals, and projects with common areas appropriate to seniors, families, or other demographic groups.

Responsible Agency: *Oakland Department of Housing and Community Development; Planning & Building Department*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available*

Timeline: *The City will monitor available data from affordable housing application portals to comprehensively evaluate the unit size needs of Oakland residents and adjust NOFA scoring accordingly, to prioritize allocating City funds to projects by 2024. Furthermore, the City will aim to regularly evaluate local household needs prior to NOFA releases. This will be prioritized, but not limited to, the new construction NOFA released approximately every other year to ensure affordable housing production is aligned with community needs.*

Objective: *The City will adjust scoring points as needed to encourage housing typologies that reflect local household needs.*

Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right.

The Oakland Planning Code currently provides for rooming units to be developed at twice the residential density otherwise allowed for regular dwelling units in Neighborhood Center, Community Commercial, Central Business District, Housing and Business Mix, and Transit-Oriented Development Commercial Zones, as well as within the special districts for implementation of the Broadway Valdez, Lake Merritt, and Coliseum Specific Plans. Recent Planning Code amendments similarly allow for efficiency units to be built at twice the density of more typically sized residential dwelling units. The City will expand these provisions to additional zoning districts, including in zones covered by the proposed affordable housing overlay. The City will also revise the Planning Code to permit rooming house facility types more similarly to multifamily residential facilities. These smaller, more modest units are more likely to be a source of naturally occurring affordable housing over the long term, while also allowing new development to align with current demographic trends towards smaller household sizes.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 – 2026*

Objective: *Enable increased production of rooming units and efficiency units.*

Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act.

Farm and agricultural employee housing is a type of employee housing under the Employee Housing Act, California Health and Safety Code Sections 17000 et seq. Section 17021.5 of the Employee Housing Act requires that any employee housing providing accommodations for six or fewer employees shall be deemed a single-family structure with a residential land use designation, and not be subject to any conditional use permit, zoning variance, or other zoning clearance that is not required of a family dwelling of the same type in the same zone. Section 17021.6 of the Employee Housing Act requires employee housing consisting of no more than 36 beds in a group quarters or 12 units designed for use by a single family or household to be deemed an agricultural land use. The City will amend the Oakland Planning Code to modify the definitions of Limited Agricultural Activities, Extensive Agricultural Activities, and One-Family Dwelling Residential Facilities to comply with the Employee Housing Act.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Ensure compliance with the Employee Housing Act.*

Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right.

The Oakland Planning Code currently permits residential care facilities in residential and nonresidential zones if located in single family dwellings. Conditional Use Permits are required for residential care facilities if they are located in any other residential facility type and/or when located on the ground floor of a street fronting building in certain commercial zones. The City will amend the Planning Code to expand where residential care facilities are permitted by right. The amendments will include all residential facility types and those located on the ground floor of a street fronting building. In addition, the City will amend the Planning Code to allow residential care facilities for foster family homes and the elderly within 300 feet of another residential care facility, since the State calls out this exemption in the overconcentration restriction in California Health and Safety Code Section 1520.5.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *June-July 2023*

Objective: *Enable expansion of residential care facilities by right and allow the exemption of facilities for foster family homes and the elderly in the overconcentration restriction provided in California Health and Safety Code Section 1520.5.*

POLICY 3.8. CONVERT VACANT LAND AND UNITS TO HOUSING

Action 3.8.1: Continue to implement the Vacant Property Tax (VPT).

On November 6, 2018, Oakland voters approved Measure W, the Oakland VPT. The VPT Act establishes an annual tax of $3,000 to $6,000 on vacant property. A property is considered "vacant" if it is "in use less than fifty days in a calendar year," and not subject to any of 10 exemptions. The City will continue to implement the VPT to encourage active uses on vacant land and regularly monitor the effectiveness of the program. The City will analyze expansion of exemptions to the VPT to reduce the impacts of unintended hardships on nonprofit and affordable housing developers, discussed under Action 3.8.3. As directed by Council, funding from this measure may be spent on homeless services, affordable housing, and illegal dumping cleanup.

Responsible Agency: *Oakland Department of Finance; Department of Human Services; Oakland Planning & Building Department, Oakland Department of Housing and Community Development*

Potential Funding Source: *Self-funding through the vacant property tax*

Timeline: *End of 2023 (Analysis of exemptions will be complete)*

Objective: *Through the vacant parcel tax, seek a 10 percent reduction in vacant parcels by the end of the Housing Element period.*

Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations.

Traditional brick-and-mortar commercial and retail businesses have continued to transition to an Internet-based model, which has been further accelerated by the COVID-19 pandemic. As a result, a significant number of ground-floor commercial and retail spaces in Oakland remain vacant. The City will explore opportunities to promote the conversion of vacant ground floor spaces in certain areas to live/work or other residential use, as may be appropriate in the local context. The City will also explore other opportunities to promote the conversion of vacant office or commercial space to housing, in alignment with the recently passed AB 2011 and SB 6.

Responsible Agency: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeline: *2023 - 2026*

Objective: *Expand the areas where residential space is an allowable ground-floor use.*

Action 3.8.3: Tax vacant residential rental units.

Although housing demand in Oakland remains extremely high, the City experiences a higher vacancy rate than both Alameda County and the Bay Area overall. This results from a variety of factors but may

ultimately lead to higher housing costs. Oakland currently has in place vacancy tax on parcels and several types of housing units – including condos, duplexes, and townhome units under separate ownership. The City will consider extending the current vacancy tax to all residential units to encourage active use of residential units and expand the available housing supply.

Responsible Agency: *Oakland Department of Finance*

Potential Funding Source: *General Fund*

Timeline: *Consider by the end of 2026 whether the vacant parcel tax ought to be revised or expanded*

Objective: *Increase the housing stock by ensuring existing units are made available to rent.*

Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.

The City continues to administer the Community Buying Program, which assists Oakland residents in purchasing affordable homes. These properties have been made available through programs like the Oaktown Roots Affordable Homes pilot program and local community land trusts, like the Oakland Community Land Trust and the Bay Area Community Land Trust. These programs will also help promote long-term affordable homeownership, which will also promote the objectives of Policy 5.1.

Responsible Agency: *Oakland Department of Housing and Community Development; Oakland Department of Finance*

Potential Funding Source: *Development impact fees, HOME, local infrastructure bond, and other local, State, and federal funding as available*

Timeline: *Ongoing, 2023-2031*

Objective: *As additional funding is available, continue to convert vacant parcels to affordable housing.*

Action 3.8.5. Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

Partner with the Alameda County Tax Collector to identify tax-defaulted property suitable for development or preservation as affordable housing. Through use of the Chapter 8 tax sale program, make this property available to affordable housing providers, community land trusts, and related organizations, either by encouraging nonprofits to directly acquire through Chapter 8, or by pulling properties from auction to administer through a City program. Oakland Housing & Community Development has secured a full-time fellow through the Breakthrough Grant Program to focus on creating an emerging developer program (Action 3.3.17), and exploring how tax-defaulted properties, among other development and funding opportunities, could be leveraged as an entry point for emerging developers.

Responsible Party: *Oakland Department of Housing and Community Development, Oakland Economic and Workforce Development Department*

Funding: *Contributory value of the land, impact fees, HOME, other local, State, and federal funds as available*

Timeline: *Ongoing, 2023-2031. Breakthrough Grant fellow completes BIPOC and emerging developer program development in 2023, and will analyze tax-defaulted property program opportunities by end of his term in 2024.*

Objective: *As funding, partners, and suitable parcels become available, tax defaulted properties will become available as affordable housing.*

Goal 4. Address Homelessness and Expand Services for the Unhoused

The City of Oakland is facing an unprecedented humanitarian crisis of residents who are experiencing homelessness. As the United Nations notes in its mandate on the right to adequate housing, the right to adequate housing is more than having a roof over one's head, it is the right to live in safety and dignity in a decent home; HUD Secretary Fudge has declared that "housing is a human right." Goals, policies, and actions in this Housing Action Plan recognize housing as a human right. and that permanent housing is the solution to homelessness. Policies and actions proposed as part of Goal 3 seek to expand affordable housing options. Goal 4 seeks to address homelessness through strategies that enable coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent supportive and deeply affordable housing with resources for long-term support.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Homelessness disproportionately impacts Oakland's BIPOC residents, particularly the city's Black residents. Further, special needs households—including extremely-low-income households—tend to be at greater risk of experiencing homelessness. Addressing homelessness and providing high quality services to the unhoused is also a racial equity issue and must be part of the City's efforts to affirmatively further fair housing. By expanding access to quality homelessness services across Oakland, and seeking to expand transitional housing options in a citywide manner, the City will work to avoid an overconcentration in homelessness and homelessness-related services in disadvantaged neighborhoods. Further, by expanding economic opportunities for the unhoused, Oakland will help those currently unhoused access housing opportunities in a variety of Oakland neighborhoods. This goal, and the policies and actions that implement it, will address fair housing issues as they relate to homelessness in Oakland.

POLICY 4.1 EXPANSION OF HOMELESS SERVICES

Action 4.1.1: Expand, improve, and maintain emergency interim housing.

Since 2018, the City has expanded its supply of emergency interim housing (community cabins, shelter beds, Safe RV parking) by over 1,000 beds/spaces. This increase is almost entirely funded by one-time funds. The City will use local, county, State, and federal funding to maintain these new resources and to improve the effectiveness of these beds in moving people to permanent housing (for example, by adding rapid

rehousing exit resources). In addition, the City will continue to expand the interim housing sites and other forms of housing for people experiencing homelessness in the City. The City will ensure that such housing options include supportive services such as rapid rehousing assistance, housing navigation, and access to resources via Coordinated Entry. The City will seek to partner with Alameda County to provide mental health and substance use services in interim sites and will partner with mainstream workforce programs to support on site job training programs. The City will coordinate efficient provision of services and resources from private, nonprofit, local, Alameda County, and State organizations

Responsible Party: *Oakland Human Services Department*

Potential Funding Source: *Measure Q, ESG, State Homeless Housing Assistance and Prevention Funding, various HUD funding sources, CalAIM (through County)*

Timeframe: Expand on the availability of outreach and social services to increase connections to emergency, interim, and *long term* housing supports by 2031

Objectives: *1. Increase the number of people who are experiencing homelessness in Oakland who are sheltered; and 2. Invest in and improve the quality of interim housing programs so that more people exit to permanent housing and more people exit to permanent housing more quickly.*

Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color.

Increasing the number of crisis response beds helps to address the disproportionate rates of unsheltered homelessness among communities of color, especially among African American households. Creating additional facilities in many parts of the city will assist households experiencing homelessness to remain in their communities will reduce the number of African American households who are displaced from Oakland. The City will track data to ensure that African American households are using emergency crisis response beds and exiting to permanent housing at rates that are proportional to their representation in the homeless population. The Centering Racial Equity in Homeless Response System Design (Berkeley, Oakland, Alameda County Continuum of Care published in 2021) outlines suggested investment for scaling to solutions for unsheltered communities of color utilizing recent Point in Time count data.

Responsible Party: *Homelessness Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: The City of Oakland will continue to develop a data informed strategy for increasing equitable investments in homelessness systems to serve people of color by 2031.

Objectives: *Increase and stabilize people while providing opportunities to improve income they need to avoid entering or returning to homelessness.*

Action 4.1.3: Expand health and hygiene facilities and services, and improve access to bathrooms and showers.

Starting in FY 20-21, this intervention has greatly expanded to serve a minimum of 60 curbside sites with porta-potties, handwashing stations, and garbage pick-up. Oakland's Human Services Department has created two new outreach staff positions whose primary role is to support the participating encampments with maintaining the services, cleanliness, and compliance with the Encampment Management Policy. These City staff also support designated site leadership at each encampment site. The site leaders ensure that the porta-potties are used appropriately, and keep the units clean in between the official servicing. City staff provide the site leaders with cleaning supplies and stipends for their work. Per Council directive, the goal is to increase to 100 sites and four City outreach staff.

Responsible Party: *Homeless Division, Office of the City Administrator; Oakland Human Services Department*

Potential Funding Source: *State Homeless Housing Assistance and Prevention Funding, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *More people experiencing unsheltered homelessness have access to services which promote health and dignity.*

Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.

Recognizing that a lack of access to living wage jobs is a significant driver of homelessness in Oakland, the City will work with the Oakland Unified School District (OUSD), higher educational institutions, related nonprofit agencies, business and other partners to create low barrier work opportunities for people who are currently unsheltered. These programs will offer support for development of work-related skills, provide services to address employment barriers specifically targeted to the needs of unhoused residents and increase the co-location and collaboration between providers of homeless assistance and employment programs and services. In addition, the City will work to match small business owners who want to address homelessness with job seekers who are homeless or formerly homeless.

Strategies to include:

- Low barrier work opportunities, for people re-entering the workforce
- Add employment specialist positions in core homeless services/prevention services programs
- Flexible funding pool to support career track training and employment programs
- Benefits advocacy to obtain SSI or other income for which they are eligible

Responsible Party: *Oakland Human Services Department; Economic and Workforce Development Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Increase and expand support for systems navigation, social services, and employment by 2031. Continue development and implementation of low barrier work opportunity programs in partnership with OUSD and other partners by end of 2026. Develop and implement programs to match small business owners with job seekers who are homeless or formerly homeless by end of 2026.

Objectives: *Reduction in the number of households which return to homelessness in the two years after obtaining housing.*

POLICY 4.2 ENCAMPMENT MANAGEMENT AND SHELTER OFFER POLICIES

Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy.

The City of Oakland adopted the 2020 Encampment Management Policy. The purpose of this policy is to protect and serve all Oaklanders, sheltered and unsheltered, and to manage the adverse impacts of homeless encampments by balancing the interests of all residents, focusing encampments actions on mitigating negative outcomes as they pertain to public safety, public health, and equity outcomes. The City will continue implementing the Encampment Management Policy during the 2023-2031 Housing Element period. The City of Oakland will also continue to scale the appropriate level of public works related services to address debris, garbage and illegal dumping associated with encampments. The City will continue to improve and expand on the development and implementation of Emergency Shelter and crisis response beds in an effort at address and abate conditions at homeless encampments in Oakland. The Encampment Policy will continue to being predicated by an offer of shelter as outlined in City of Oakland Resolution 88077.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: The City of Oakland will continue improving the implementation of the Encampment Management Policy throughout the duration of this Housing Element Period, 2023-2031.

Objectives: *The Encampment Management Policy is intended to connect unsheltered individuals to human services, emergency shelter and long term permanent supportive housing, while executing comprehensive operations focused on managing health and safety conditions of public spaces. The goal is to provide regular and adequate trash collection from encampments, close areas where encampments are not permitted, and ensure that porta-potties and hand-washing stations are serviced regularly as needed and that encampments receive regular deep cleanings so that our unhoused residents are not living in conditions that threaten health and/or safety until fully abated.*

The policy sets forth the following objectives:

Designate high-sensitivity areas, where unmanaged encampments are presumed to cause unreasonably high levels of health and safety impacts due to the nature of the location;

Designate low-sensitivity areas, where enforcement will not be prioritized;

Make findings that will prompt Encampment Management Team intervention; and

Provide guidance on addressing unreasonable health and safety risks, promoting voluntary compliance, and strategies to address non-compliance.

Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator.

Homelessness intersects with multiple departments and agencies, all of which fall under the City Administrator's purview. Leading from the Office of the City Administrator, the Homelessness Division serves as the primary liaison between the City Administrator's Office and internal and external agencies, along with other City departments, regarding the City's homelessness response and provides inter- and intra-agency coordination focusing on the City's management of its unsheltered population. This division directs the program and operational decision-making in division activities; encampment management response teams and task forces; organizes, manages, and directs the review and implementation of the City's major projects. The division serves to implement best practices, strategic planning in the City's Homeless System, and serve as a connection to local, state, and federal partners.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Design, review, implement and evaluate a strategic planning process in response to homeless services and interventions during *2023—2031*

Objectives: *Lead the implementation, expansion, and strategic coordination of Homeless Response Operations and Service Delivery across City of Oakland departments, and external public and private partners, organizations, and agencies.*

Action 4.2.3: Strengthen interdepartmental Encampment Management Team.

The Encampment Management Team (EMT) is an interdepartmental working group tasked with implementing and administering this policy, consisting of representatives from Oakland's Public Works Department, Human Services Department, Oakland Policy Department, Oakland Fire Department, the City Administrator's Office (CAO), and other consulted departments as necessary (e.g., the Mayor's Office, the City Attorney's Office, Parks and Recreation). The EMT is facilitated by the CAO via the Homelessness Administrator.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *1. The EMT aims to execute duties assigned to their respective departments for the completion of interventions (Health and Safety) prescribed in the 2020 Encampment Management Policy (Health and Hygiene, Deep Cleanings, Partial Closure, and Closure); 2. To channel unsheltered individuals in every encampment to human services, emergency shelter and long term permanent supportive housing; 3. To effectuate the completion of the Encampment Management Policy interventions, each department may promulgate additional specific procedures necessary to effectuate the roles described in this policy under development specific Standard Operating Procedures.*

Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.

The City will increase opportunities for leadership and input from people experiencing homelessness in the design, implementation, and evaluation of encampment management and homeless services. The City of Oakland has formed a Commission on Homelessness that will provide robust opportunity for people with lived experience to inform and contribute to solutions related to individuals experiencing homelessness reaching maximum self-sufficiency. The City will also seek to build trust between law enforcement, social workers, and homeless individuals/families and promote mentorship opportunities for formerly homeless individuals and people recovering from addiction. Further, the City will refine encampment management policies and strategies using qualitative and quantitative data to assess the experience of encampment for BIPOC residents and will implement culturally specific and anti-racist strategies to better meet the short-term needs of BIPOC unsheltered residents.

Responsible Party: *Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Local, State, and federal funding, as available*

Timeframe: Improve and develop mechanisms for individuals with lived experience to provide input to the Commission on Homelessness by 2024. Develop, implement and evaluate opportunities for individuals with lived experience to better interact with law enforcement by 2026. Identify and implement best practices that center race and equity in the strategic response to homelessness by 2031.

Objectives: *Review and make recommendations of existing and new proposals funding homelessness services funded by City of Oakland Measures Q and W.*

Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.

In FY 21-22 the City opened its first co-governed program site. Co-governance is an intervention model where unsheltered residents come to an agreement about how they will live together in a community setting of an encampment. This includes, but is not limited to, selecting site leadership, determining eligibility for participation, developing community expectations for behaviors and for staffing/running the site, holding each other accountable for the agreed upon expectations, and maintaining the health and safety of the community residents. A backbone agency (nonprofit/community-based agency) works alongside residents to support the residents in the design, leadership and operations of the site. The backbone agency is the contracting entity with the City/funder and holds ultimate accountability for ensuring the safety and security of the site. The City, in partnership with unsheltered residents, will continue to refine this model and to expand this model as new sites open.

Responsible Party: *Oakland Human Services Department; Homelessness Division, Office of the City Administrator*

Potential Funding Source: *Homeless Housing Assistance and Prevention funds, City General Fund*

Timeframe: *FY 2022-2023 – FY 2024-2025*

Objectives: *Increase the number of interim housing sites which have people experiencing homelessness as partners in site design and operations.*

POLICY 4.3 PROMOTE PERMANENT SUPPORTIVE AND DEEPLY AFFORDABLE HOUSING FOR UNHOUSED COMMUNITIES

Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.

The City will secure and advocate for additional funding for building and operation of permanent supportive and deeply affordable housing for homeless households using a combination of State and federal sources, such as the State Homekey program, the federal HOME-ARP program, and funding from the local Oakland Housing Authority. The City will continue incorporating a preference for City-assisted affordable housing projects that include at least 20 percent of units for vulnerable populations, including but not limited to homeless individuals and families living at or below 30 percent of AMI with additional points awarded in the competitive funding process for projects with units targeting 20 percent of AMI. In addition, the City will increase this homeless set-aside with the issuance of future City funds, awarded through its Notice of Funding Availability (NOFA) programs should operating funding resource availability support the increase. The City will work with residents, service providers, and property owners to ensure adequate and transparent long-term plans for maintenance and service provision within new and existing permanent supportive housing.

The City will also continue pursuing the strategic acquisition of hotel, motel, and dorm facilities by and with nonprofit partners to house unsheltered residents. The City will further work to coordinate Oakland Housing Authority's award process with the City's affordable housing NOFA process and Homekey opportunities. The City will also work with the State and other partners to explore opportunities to expand the supply of extremely-low-income housing for residents that do not require supportive services. These efforts align with the City's HOME-ARP plan that targets HOME-ARP resources to support HUD Qualifying Populations, which include individuals and families who are: experiencing homelessness, at risk of becoming homeless, fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking or human trafficking, at greatest risk of housing instability, and/or needing supportive services or assistance would prevent homelessness.

For example, in September 2022 the City issued a Request for Proposals in advance of for Round 3 State Homekey program funding, and has allocated a total of $35,285,154 from the previous two rounds in local contribution to capital and operating expenses to this program. Through Council approval and in the RFP, the City intends to allocate at least 25 percent of its Round 3 matching funds to projects serving Transition Aged Youth (TAY) clients, through a separate scoring pool for TAY-serving projects. The City is also making a city-owned site, the Clara/Edes parcel, available for Homekey applications. Through Homekey, the City of Oakland partners with experienced housing organizations and service providers to develop and expand housing for people experiencing homelessness or at risk of homelessness. The City will continue to support six projects that have been awarded through past rounds of Homekey. These projects have added 285 units of affordable housing for people experiencing homelessness since 2020 to 2022.

Responsible Party: *Oakland Human Services Department; Oakland Department of Housing and Community Development; Homelessness Division, Office of the City Administrator*

Potential Funding Source: Housing Trust Fund, HOME-ARP, *State Homeless Housing Assistance and Prevention Funds, California Housing and Community Development Department Homekey Funds,*

Timeframe: As funding is available the *City* will continue to apply for competitive state and federal funding throughout this Housing Element period. The *City* will continue to identify ways to expand and finance the ideal matrix deeply affordable housing, permanent supportive housing, below market-rate housing, and strategic acquisitions of hotel, motel and dorm facilities by 2031.

The City is planning to release a New Construction NOFA targeting the production of additional permanent supportive housing (PSH) units in 2023. For example, the 2021-22 New Construction NOFA funded 324 units, XXX121 of which are designated homeless units. .

The City released the Round 3 Homekey Request for Proposals in 2022 in order to identify projects prior to the State releasing the Homekey Notice of Funding Availability (NOFA) which is expected to be released in Spring 2023. The City will continue to participate in Homekey, if and when future rounds are funded through the State budget.

Objectives: *Secure funding to significantly increase construction and maintenance of permanent supportive and deeply affordable housing to match need for unhoused communities.*

Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis.

The City will utilize statewide streamlining opportunities, such as categorical CEQA exemptions and Program EIRs, and revise the Planning Code to minimize the need for discretionary review with a ministerial option for projects that utilize objective design standards for approval. The City will also identify and eliminate roadblocks in the review of building permit applications to expedite and increase the production of modular developments and other quick-build shelter solutions on private land in Oakland. The City will also work with other public agencies, including Caltrans, to facilitate and streamline more flexible shelter solutions on public land. The City will ensure that smaller units used as permanent housing units are in compliance with the Building Code to mitigate fire and other public safety hazards.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards*

Timeframe: *Planning Code changes in 2023; ongoing, 2023-2031*

Objectives: *Significantly increase production of modular developments and other quick-build shelter solutions to match need for unhoused communities.*

Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing.

The City will amend the Planning Code to ensure that transitional housing and supportive housing projects are permitted equivalent to similar permanent residential uses in the appropriate zone.

The City will amend the Planning Code to remove minimum parking requirements for transitional housing. For supportive housing, minimum parking requirements will only apply to employee parking for onsite services, and no minimum parking requirements will apply to the residential units.

The City currently processes supportive housing streamlined projects utilizing Assembly Bill 2162 (2021)/Government Code Section 65651 using the City's multipurpose basic application but has received few applications utilizing this procedure. The first such application was received during the drafting of this Housing Element. To provide greater clarity and encourage the use of this streamlining provision, the City will codify the by right requirements of Government Code Section 65651 into the Oakland Planning Code, and will modify the basic application to identify streamlining under this provision.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan*

Timeframe: *Planning Code changes in 2023*

Objectives: *Reduce barriers to the development of transitional and supportive housing.*

Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist.

California Government Code Section 8698.4 allows the City Council to declare a shelter crisis when a significant number of persons are without the ability to obtain shelter, resulting in a threat to their health and safety. Upon a declaration of a shelter crisis, the city may allow persons unable to obtain housing to occupy designated public facilities, including facilities leased by the city, during the duration of the crisis. Further, upon a declaration of a shelter crisis, the City may apply reasonable local standards and procedures for the design, site development, and operation of homeless shelters and emergency housing that the City adopts by an ordinance reviewed and approved by State HCD, and provisions of any housing, health, habitability, planning and zoning, or safety standards, procedures or laws, as applied to public facilities, may be suspended.

On January 5, 2016, and subsequently on October 6, 2017 and September 30, 2021, the Oakland City Council adopted ordinances (No. 13348, 13456, and 13662 respectively) declaring a shelter crisis in the City of Oakland. These ordinances were adopted pursuant to the authority provided under state law beginning at California Government Code Section 8698. As these conditions continue to persist, the City Council has regularly renewed its declaration of a local public health emergency about the homelessness crisis at each of its regular Council meetings. On May 21, 2019, after review and approval by State HCD, the City Council additional adopted an Ordinance for Emergency Building Standards Amendments to the 2016 California Building Standards Code that incorporated emergency building standards for emergency housing buildings and facilities, including health and safety standards for recreational vehicles, emergency sleeping cabins, membrane structures, and other emergency housing on property owned or leased by the City of Oakland. Statewide building standards for emergency housing were incorporated into the 2019 California Building

Code and the 2019 California Residential Code and on December 10, 2019 the City Council passed Ordinance No. 13576 adopting these emergencies housing provisions, including the local amendments previously approved by State HCD. Finally, on June 4, 2019, the City Council adopted an ordinance amending the Oakland Planning Code Section 17.07.060.A to allow Emergency Shelter Residential Activities and Emergency Housing Facilities on property designated by the City Administrator and owned or leased by the City.

The City will ensure that the authority provided under the City's Shelter Crisis Ordinance and declaration of a local emergency regarding homelessness remains in place until public health and safety concerns no longer persist. The City will review public health and safety conditions prior to the expiration of the emergency ordinance declaring a shelter crisis, a two-year ordinance, and will continue to review conditions every two years to ensure no gap in the authority provided through the emergency declaration of a shelter crisis. The City will also ensure that subsequent amendments of the building code, a process that occurs every three years as the state building code and residential code is revised, will retain these emergency provisions as authorized under State law.

Responsible Party: *Oakland City Council; Oakland City Administrator; Oakland Planning & Building Department.*

Potential Funding Source: *General Fund*

Timeframe: *Ongoing*

Objectives: *Provide additional options for temporary shelter for all persons without the ability to obtain shelter until public health and safety concerns no longer persist.*

Action 4.3.5: Provide development standards for Low Barrier Navigation Centers.

Low Barrier Navigation Centers, pursuant to AB 101, are required to be permitted by right and without any discretionary approval. A Low Barrier Navigation Center is a "Housing First," low barrier, temporary, service-enriched shelter that helps homeless individuals and families to quickly obtain permanent housing. The City will amend the Planning Code to include a definition for "low barrier navigation centers" and ensure that such centers are permitted by right, pursuant to State law.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge*

Timeframe: *Planning Code changes in June-July 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness.*

Action 4.3.6: Expand opportunities for the permitting of Emergency Shelters.

The City will revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide when located on properties owned by churches, temples, synagogues, and other similar institutions approved for Community Assembly Civic Activities. The City will remove any minimum automobile parking requirements for emergency shelters. In other zones where emergency shelters are currently permitted only upon issuance of a major conditional use permit, the City will revise the Oakland Planning Code to require only a minor conditional use permit, which is processed by Planning Department staff and appealable only to the Planning Commission.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan surcharge*

Timeframe: *Planning Code changes in June-July 2023*

Objectives: *Reduce barriers to the development of housing for persons experiencing homelessness*

Goal 5. Promote Neighborhood Stability and Health

All Oakland residents deserve to live, work, play, and thrive in safe, affordable, healthy, and welcoming communities. In Oakland, this geography of opportunity and health-supporting neighborhoods has been inequitable, with low-income communities and communities of color more likely to live in neighborhoods overburdened by pollution, disinvestment, and other social and environmental injustices. Goals, policies, and actions in the Housing Action Plan can address environmental justice by protecting residential areas from harmful pollution impacts. As the City prioritizes investments, infrastructure, building upon existing community assets, and resources to achieve environmental justice in disinvested areas, the Housing Action Plan seeks to ensure that existing residents can stay in their communities and benefit from these increased resources through opportunities for homeownership (see also Goals 1 and 3).

1. Reduce greenhouse gas emissions in the building sector through the promotion of sustainable design principles, energy efficiency, decarbonization/electrification, and smart growth principles in residential developments.

2. Encourage higher-density, infill, and mixed-use development near transit to reduce reliance on automobiles.

3. Promote adaptation strategies to improve neighborhood and community resilience to climate change in collaboration with local and regional partners.

4. Leverage State and federal resources to assist with the remediation of environmental constraints on potential housing sites.

5. Ensure any addition of housing to neighborhoods at risk of wildfires is accompanied by infrastructure improvements to mitigate the evacuation needs for new residents.

6. Promote an equitable distribution of housing, including affordable housing, throughout the community, while providing opportunities to those that want to remain in existing neighborhood.

7. Ensure that programs support development of both rental and ownership opportunities for affordable and middle-income housing.

Homeownership confers a range of benefits – including greater certainty over housing costs, opportunity to stay in one's chosen neighborhood, the ability to make changes to the living environment, privacy, and the ability to build financial equity. In addition to tangible individual benefits, homeownership also brings substantial social benefits such as a stronger sense of place and belonging, improved community health and safety, and civic participation.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Oakland has historically experienced patterns of significant inequities – between the hills and the flatlands, west and east, and across race and income. Rising housing costs and displacement pressures continue to disproportionately burden the city's Black population and other people of color, even as historically Black neighborhoods continue to see disinvestment and relatively high rates of poverty – see Appendix D for further context. The City has made great strides to correct these patterns of discrimination—including through the establishment of the Department of Race and Equity to advance racial equity in 2016—but needs to expand its efforts to eliminate racial disparities and discriminatory housing practices. The City will take steps to correct historic and ongoing patterns of discrimination to create a fair and just city through the simultaneous actions of opening up exclusionary neighborhoods (see Policy 3.4) and focusing resources, funds, tenant protections, and support of existing communities in disinvested neighborhoods and ethnic enclaves (see Goals 1, 2, and 3).

Oakland has some of the lowest rates of homeownership among major Bay Area cities, rivaled only by San Francisco. About 60 percent of Oaklanders are renters, and with continuously rising home prices, affordable homeownership remains out of reach for most Oaklanders. This is especially true for the city's working and middle classes, as traditionally blue-collar neighborhoods have become increasingly expensive in recent years. Homeownership is distributed unevenly by race and ethnicity – while most white households own their homes, the majority of BIPOC households are renters. American Indian or Alaska Native (70.8 percent), Hispanic or Latinx (69.4 percent), and Black or African American (67.8 percent) households are especially likely to be renters. A key driver behind these disparities is the legacy of the foreclosure crisis during the Great Recession. During the foreclosure crisis, 1 in 14 Oakland homeowners lost their homes. These foreclosures were highly concentrated in East and West Oakland. See Appendices B and D for more information.

This goal aims to expand opportunities for homeownership, particularly for low-income communities and communities of color. Along with efforts in Goal 1 and Goal 2, increased affordable and middle-income homeownership opportunities will reduce displacement pressures and keep Oaklanders in their homes. Expanding homeownership opportunities will protect both individual families and the social fabric of Oakland's neighborhoods. First-time homebuyer programs can also expand access to historically exclusionary neighborhoods by giving prospective homeowners the resources and tools they need to secure a home in neighborhoods that meet their needs. Community land trusts and other models of maintaining permanently affordable housing, as outlined in Policy 3.5, also provide opportunities to increase rates of affordable homeownership.

In addition to safe, affordable, high-quality housing for all people, a key determinant of equity is a healthy built and natural environment for all people. Such an environment should include a mix of land uses that support jobs, housing, amenities and services, trees and forest canopy, and clean air, water, soil, and sediment. In Oakland, low-income communities and communities of color are more likely to suffer from environmental injustices such as disproportionate exposure to air pollution, toxics and hazardous facilities and substances, contaminated water, and other environmental hazards. These disparities are due to a history of systemic racism and social injustices that influence where these communities live. As the impacts of climate change become more severe, these communities are most likely to be impacted first and hardest. As the City adds more housing stock over the course of this Housing Element period, it is imperative that new development sustains a healthy environment by working to "reduce the unique or compounded health risks in disadvantaged communities" and is prepared for the heightened impacts of climate change, especially protecting those who are most at risk. As part of this goal, efforts to align affordable housing development with transit—such as through the State's Affordable Housing and Sustainable Communities

program—and expand access to high opportunity neighborhoods and good jobs are integral to furthering environmental justice through housing.

POLICY 5.1 SUSTAIN AFFORDABLE FIRST-TIME HOMEOWNERSHIP INCENTIVES

Action 5.1.1: Provide first-time homebuyer programs.

When funding is available, the City has historically provided several first-time homebuyer programs – including the First Time Homebuyer Mortgage Assistance Program (MAP), and the CalHome Program. As funding becomes available—either through State or program-related income—the City will resume these programs. The City also provides first-time homebuyer workshops and promotes workshops hosted by a HUD-approved counseling agency. Although City-sponsored classes are currently suspended due to the COVID-19 pandemic and the absence of funding, the City continues to provide information for other local classes. As we emerge from pandemic restrictions, the City will resume providing in-person workshops in 2023. Finally, the City maintains a list of city-assisted deed-restricted below market rate (BMR) homes for sale to assist potential buyers. The City collects data through public records and the first-time homebuyer programs to assess homebuyers' needs and to identify gaps in the programs.. Further, as part of Action 5.3.3, the City will engage in targeted outreach in partnership with community-based organizations and fair housing services providers to reach the most impacted communities – including Black and Latinx households.

Responsible Party: *Oakland Department of Housing and Community Development – Housing Development Services*

Potential Funding Source: *State Housing Fund Grants (HCD), program income, city-sourced funds.*

Timeframe: *The City applied for the last several CalHome program NOFAs to secure funding for down payment assistance but was denied. The City will continue to review NOFAs and strategically apply for this assistance when substantiated. The City is already using repayments from previous CalHome and other loan programs to support mortgage assistance.*

Objectives: *If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the Housing Element cycle.*

Action 5.1.2: Expand access to low-cost financing for home purchase.

Through the first-time homebuyer programs described in Action 5.1.1, the City was able to issue 121 loans totaling approximately $6.8 million during the previous planning period. With appropriate funding, these low-cost financing options have been very effective in promoting affordable homeownership. The City will continue to seek funding for these programs and to refer homebuyers to resources related to other county, State, or federal level funding – including through the Consumer Financial Protection Bureau (CFPB), California Housing Finance Agency (CalHFA), Golden State Finance Authority (GSFA), Federal Home

Loan Bank's (FHLB) WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *State Housing Fund Grants (HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data*

Objectives: *If the City of Oakland receives CalHome grants and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.*

Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

Oakland HCD has traditionally worked with Section 8 voucher holders as part of the first-time homebuyer programs. Furthermore, the Oakland Housing Authority (OHA) offers the Homeownership Program to eligible residents – which permits participants to apply their housing subsidy towards a monthly mortgage payment. As funding and capacity permits, the OHA will continue to offer this program and expand eligibility criteria as feasible. Oakland HCD will also continue to work with voucher holders through first time homebuyer programs. OHA will collect data on residents who make use of the Homeownership Program to understand program participants and existing gaps.

Responsible Party: *OHA; Oakland Department of Housing and Community Development*

Potential Funding Source: *HUD, State Housing Fund Grants (HCD)*

Timeframe: *Ongoing as funding is available, 2023-2031; Annual reporting on OHA's Homeownership Program*

Objectives: *If funded at historic levels, the City expects to provide 30 low-income Section 8 voucher holders with down payment assistance.*

POLICY 5.2. PROMOTE RESILIENT AND SUSTAINABLE DEVELOPMENT

Action 5.2.1: Protect against smoke and wildfire.

As wildfires become more frequent, it is increasingly important to ensure safe and healthy indoor air quality. The City will require new development follow requirements for indoor air filtration, including the installation of MERV filters, as specified in the California Building Code, and will support property owners in retrofitting their homes to protect inhabitants from wildfire smoke. The City will prioritize retrofits in communities with disproportionate exposure to air pollution and substandard housing. To reduce the impacts of secondhand smoke, the City will explore amendments to the smoking pollution control ordinance to create smoke-free environments within multifamily housing properties. Further, the City will encourage the addition of clean air

centers and resilience spaces within residential areas that can provide emergency services in the event of a wildfire.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly improve access to better indoor air quality to protect against smoke and wildfire through methods such as requiring installation of MERV filters in new developments and identifying additional clean air centers and resilience spaces within residential areas.*

Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

Expand and allow community-serving uses such as retail, restaurants, and personal services within areas that are primarily residential, and increase opportunities to add multi-family housing in commercial areas that are well-served by transit. Encourage sustainable transportation choices and improve pedestrian activity with new housing development, by reducing vehicular parking requirements and eliminating parking minimums for residential development within ½ mile of major transit stop (see Action 3.4.4) in new development and/or requiring transit, cyclist, and pedestrian access design features. Work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. Ensure that new transit-oriented development is accompanied by tenant protection policies described in Policy 1.1. Further, the City will support and encourage the development of affordable housing near transit and amenities through its NOFA process, which prioritizes City funding awards to affordable housing projects with better transit access, and by co-applying to State programs such as AHSC and IIG (see Action 5.2.4).

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *2023 – 2025 and Ongoing*

Objectives: *Significantly increase infill, transit-oriented development and mixed-use development to meet housing need.*

Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.

The City will study options to provide financial assistance to property owners for the remediation of environmentally contaminated sites, such as former gas stations or auto mechanic shops, which are being developed for housing. Funding priority will go to sites with proposed affordable housing projects.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department; Economic and Workforce Development Department*

Potential Funding Source: *State of California's Equitable Community Revitalization Grant Program, United States Environmental Protection Agency Brownfields Grants program*

Timeframe: *Ongoing, 2023-2031 as funding is available*

Objectives: *As grant and loan funding sources are secured, Oakland will support through technical assistance and financing of characterization and/or remediation of environmentally contaminated sites.*

Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.

The AHSC program, administered by the Strategic Growth Council and implemented by HCD, distributes Statewide Cap-and-Trade funding for affordable housing developments (new construction or renovation) and sustainable transportation infrastructure projects. Successfully implemented, the AHSC program transforms California cities into places where residents can get everywhere they want to go without having to drive. The City of Oakland will apply directly or support partners such as nonprofit and for-profit housing developers, transportation and transit agencies, and joint powers authorities to apply for AHSC grant funding.

Responsible Party: *Oakland Department of Housing and Community Development; DOT; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *The City of Oakland has historically had projects applied to each AHSC round, and expects to have 3-5 projects for the 2023 AHSC NOFA (Round 7). As a jobs and transit center of the region, the City will continue to submit highly qualified projects to this important state funding source each time the source is available in order to secure additional funding for affordable housing in transit-rich service and job centers.*

Objectives: *Significantly increase affordable housing development through application for AHSC funding to meet housing need.*

Action 5.2.5: Encourage earthquake-resilient housing.

As funding becomes available, the City will continue to operate loan programs to help property owners afford the cost of seismic safety programs. In the past, these loan programs have particularly focused on soft story retrofit projects. The City will also continue to implement the City's soft story retrofit ordinance, which requires vulnerable apartment buildings to retrofit soft story areas at risk of collapse.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: FEMA Hazard Mitigation Grant Program, CalOES Prepare California Match program, other sources as available.

Timeframe: *Ongoing, 2023 - 2031*

Objectives: Successfully retrofit all vulnerable soft-story residential buildings at risk of collapse.

Action 5.2.6: Encourage climate-resilient housing.

Consistent with the City's Equitable Climate Action Plan (ECAP) and Ordinance 13632 CMS, all newly constructed buildings in Oakland are prohibited from utilizing methane gas, also referred to as natural gas, or connecting to natural gas infrastructure. The City will continue to support property owners in building electrification, energy efficiency and resilience, and seismic safety retrofits, prioritizing funding in frontline and disadvantaged communities. The City will work with organizations such as the U.S. Green Building Council to recognize exemplary net-zero energy projects with sustainable and resilient design, including passive design and energy- and water-efficient systems. The City will continue to require all projects that meet the Green Building Ordinance for Private Development thresholds comply with green building standards, exceeding CALGreen Standards, and will encourage and promote green features such as durable low-embodied carbon materials, green and cool roofs, grey-water systems, electric vehicle charging stations, and others such features during the permitting and entitlements process. The City will continue to require green building certification under Build It Green's GreenPoint Rated or LEED Certification systems and give preference to projects scoring higher in the Green Point Checklist, or which meet or exceed LEED Gold level, in the affordable housing NOFA scoring process which determines which projects are awarded City funds. The City can promote and expand existing programs to provide education and incentives to property owners and residents who implement water conservation, energy conservation, waste reduction, and resilient landscaping measures. The City will ensure that new housing development within areas subject to flooding associated with sea level rise encourage placement of life safety, mechanical, and electrical systems above flood elevations (i.e., second story or higher). The City will also encourage the addition of community spaces within residential areas that can provide emergency services in the event of a natural disaster or power outage. Recognizing the likely increase over time in power outages due to the impacts of the climate crisis, the City will work across City departments and with relevant agencies such as East Bay Community Energy, to increase community energy resilience such as through deploying or incentivizing onsite energy storage, and supporting the development of neighborhood resilience resources that include clean backup power.

Responsible Party: *Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023 - 2031*

Objectives: *Significantly increase construction of climate-resilient housing to meet housing need.*

Action 5.2.7: Consider adoption of a disaster reconstruction overlay zone.

The City will consider the adoption of a disaster reconstruction overlay zone to streamline reconstruction following a natural disaster. Such a zone would establish ministerial approvals and streamlined permitting for the reconstruction of homes after a natural disaster, similar to reconstruction zoning created in Santa Rosa following the Santa Rosa Wildfire. This could accelerate reconstruction, require rebuilt homes to adhere to the latest earthquake and fire safety standards, and reduce the impacts of disasters on housing affordability in Oakland.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *State and federal grants, as available*

Timeframe: *2023 - 2027*

Objectives: *Provide greater flexibility to meet housing need in response to potential disasters.*

Action 5.2.8. Encourage new affordable housing in higher resource neighborhoods.

Affordable housing units, including both publicly assisted housing and housing choice vouchers, tend to be concentrated in low resource and high segregation and poverty areas. Higher resource neighborhoods have failed to provide their share of affordable units through low-density zoning that has largely prevented development at the scale necessary for affordability.

To expand where affordable housing units are located, including both publicly assisted housing and housing choice vouchers, the City will encourage further affordable development in higher resource neighborhoods through allowing for higher densities and streamlined approval for affordable projects. In its annual competitions for the award of housing development funds, the City will continue to give points in its competitive New Construction funding processes to projects in areas which help advance desegregation and are located in neighborhoods with strong educational quality. Further efforts may include working with affordable developers to identify appropriate sites in high resource neighborhoods and providing direct outreach and resources to Section 8 voucher holders and landlords to find appropriate housing in higher resource areas (see also Action 3.3.2). Actions 3.2.1 and 3.4.1 will also help increase the availability of housing within higher resource neighborhoods.

As noted below, this is not intended to supplant affordable housing investment in lower resource/high poverty and segregation areas, because these are also areas where residents are often subject to displacement pressures, as well as areas with rich access to transit, service and job centers. However, affordable housing opportunities should be made available throughout the City.

Expanding equitable housing opportunities in higher resource areas will also require Oakland to take on a new challenge: find ways to expand affordable housing opportunities in wildfire-prone Hills neighborhoods. The City will therefore analyze the current evacuation capacity of Hills neighborhoods,

assesses infrastructure options to expand that evacuation capacity, and study options to pair affordable housing development in the Hills with corresponding safety-related infrastructure investments. This effort will align with the upcoming changes to the City's Land Use and Transportation Element (LUTE), which is also being revised as part of the City's broader General Plan update.

However, while increasing affordable development in higher-resource neighborhoods is a State priority, it only represents one strategy towards increasing opportunity for historically disadvantaged residents. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. These neighborhoods are also often rich in transit and service resources tailored to community needs. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs) as outlined in Action 5.2.9. These efforts are also described in Goal 1 and Goal 2. Oakland HCD's New Construction Notice of Funding Availability (NOFA) scoring criteria has recently been modified to balance scoring for higher-resource areas and high performing schools (for family housing) with the goal of increasing investment in areas of the City that have suffered from economic and infrastructural disinvestment, as well as prioritizing affordable housing in areas where low-income residents are especially vulnerable to displacement pressures. Under the current scoring for the allocation of tax-exempt bonds, only high-opportunity areas of Oakland are competitive for funding.

Failing the success of efforts to refine the definition of "high resource" areas to include those rich in transit, job and service accessibility, the City may need to consider adjusting its priorities to focus more investments towards high-opportunity areas in order to continue to be competitive for state funding. However, the City remains concerned about the adverse impacts this would have on the City's anti-gentrification and anti-displacement work, and feels strongly that affordable housing resources are desperately needed in neighborhoods where low income residents are vulnerable to displacement. Lastly, the State relies on TCAC Opportunity Area Maps that designates much of Oakland as "low resource" or "high segregation and poverty." The City strenuously disagrees with these designations that do not recognize the critical role in housing production, jobs creation, and transit connection that Oakland plays for the region. Further, it lags behind the rapid market changes and displacement pressures experienced across the City's transit-, job-, and amenity-rich neighborhoods; this action pursues a more balanced and nuanced investment of resources to support housing across its neighborhoods.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, impact fees, other local, State, and federal funding sources as available*

Timeframe: *Geographic equity is currently incorporated as a scoring element in all NOFAs to prioritize awarding City funds towards projects that support this goal; and will continue to be a focus moving forward. New construction NOFAs will be released approximately every other year.*

Objectives: *The ratio of affordable housing units per acre shall increase by 10 percent more in neighborhoods categorized as "High" or "Highest" opportunity by the California Tax Credit Allocation Committee (TCAC) than the increase in the ratio of affordable housing units per acre in all other neighborhoods .*

Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.

As part of Phase 1 of the GPU, the EJ Element will include policies and actions that will promote equitable access to public facilities, healthy food, safe and sanitary homes, and physical activity; reduce barriers to inclusive engagement and participation in the public decision-making process; and prioritize improvements and programs that address the needs of low-resourced and disproportionately burdened communities in Oakland. These investments will be focused in communities designated through the EJ screening process.

As part of Phase 2 of the GPU, the City will promote complete neighborhoods where residents have safe and convenient access to goods and services on a daily or regular basis—that address unique neighborhood needs, and support physical activity, including walking, bicycling, active transportation, recreation, and active play. The LUTE, OSCAR and the Infrastructure and Capital Facilities elements will include targeted policies and actions for communities designated through the EJ screening process (i.e., low-resourced, traditionally underserved, and disproportionately burdened communities) that focus on:

- Equitable distribution of new beneficial public, civic, and cultural facilities and maintenance of existing facilities
- Appropriate land use designations and zoning to facilitate additional healthcare facilities in areas without sufficient access
- Maintain and improve existing civic and public facilities to ensure safer, more attractive facilities that are responsive to community needs
- Expand access to high-quality open space, pedestrian and bicycling amenities, and increase opportunities for physical activity and recreation spaces

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, other local, State, and federal funding sources as available*

Timeframe: *July 2023 for adoption of EJ Element. End of 2025 for adoption of LUTE, OSCAR, and Infrastructure and Capital Facilities Element*

Objectives: Prioritize improvements in low resourced and traditionally underserved areas in the City to improve fair housing conditions and encourage community preservation, revitalization and, quality of life

Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration.

As noted previously, lower-income housing tends to be concentrated in lower resourced neighborhoods. The City will work to promote mixed-income developments to further reduce the geographic isolation of lower-income units and promote increase neighborhood investment in distressed areas. The City will encourage use of the State Density Bonus program by incentivizing on-site affordable units along with the Density Bonus instead of paying affordable housing impact fees, promote mixed-income development in specific plan areas, and access the CalHFA bond recycling facility for mixed-income projects.

Responsible Party: *Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, 2023-2031*

Objectives: *Significantly increase production of mixed-income housing and reduce income-based concentration to match housing need.*

Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.

The Housing Element is a living document that provides a roadmap for the next eight years. As such, the City will actively monitor activities undertaken to meet program objectives pursuant to Annual Progress Report requirements. To ensure accountability, the City will solicit annual feedback from the community through surveys to understand the effectiveness of individual programs. In addition, the City will create a subcommittee of the Planning Commission to bring the progress report of the Housing Element to monitor its performance.

Responsible Party: *Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Human Services Department; Oakland Economic & Workforce Development Department; Oakland Public Works Department; DOT; Homeless Division, City Administrator's Office; Sustainability and Resilience Division, City Administrator's Office*

Potential Funding Source: *General Plan Surcharge and permit fees*

Timeframe: *Ongoing, annual survey and monitoring during the 2023-2031 Housing Element Annual Progress Reporting cycle. By March 2024, create subcommittee of the Planning Commission to monitor the Housing Element.*

Objectives: *Monitor and enforce Housing Element implementation to understand whether individual programs significantly improve Oakland housing conditions and address housing need.*

POLICY 5.3. PROTECT HOMEOWNERS AND TENANTS FROM DISCRIMINATION

Action 5.3.1: Provide fair housing services and outreach.

The City will continue to partner with fair housing service providers operating within Oakland. As most housing discrimination complaints are related to a disability bias, the City will work with fair housing providers to provide additional educational resources in a variety of languages to both tenants and landlords related to disability rights in housing. The City will publicize fair housing services on its website, in City Hall, and in all housing-related programming. The City will also seek additional State and federal funding to assist fair housing providers.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *End of 2023*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.2: Promote awareness of predatory lending practices

Predatory lending practices are a major contributor to racially discriminatory housing patterns and were one of the major factors in the previous decade's foreclosure crisis. To curb these practices, the City will work with fair housing service providers to provide educational materials and workshops in a variety of languages to inform Oakland residents of best practices. The City will promote fair lending practices to ensure that low-income residents and residents of color have fair access to capital resources needed to acquire and maintain housing.

Responsible Party: *Oakland Department of Housing and Community Development*

Potential Funding Source: *CDBG, general fund, other local, State, and federal funding sources as available*

Timeframe: *End of 2023*

Objectives: *All stated outreach materials will be created and found online no later than the end of 2023.*

Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.

Oakland's Black and Latinx populations experience disproportionately high rates of cost burden and tend to live in neighborhoods with higher rates of overcrowding and other housing issues. The City will work with fair housing service providers to target outreach and programming to Black and Latinx Oaklanders, as well as neighborhoods experiencing high levels of housing issues in parallel with Actions 5.3.1 and 5.3.2.

The City will regularly monitor housing issues like cost burden, overcrowding, code enforcement complaints, and substandard housing to understand where the highest need for services exists.

Responsible Party: *Oakland Department of Housing and Community Development; Oakland Planning & Building Department*

Potential Funding Source: *General Plan Surcharge, permit fees, other local, State, and federal funding sources as available*

Timeframe: *Ongoing, 2023-2031*

Objectives: *To determine what neighborhoods that fair housing service providers should target for outreach and programing to assist disproportionately burdened groups.*

4.2 Quantified Objectives

State law requires that quantified objectives be established for new construction, rehabilitation, conservation, and preservation activities that will occur during the Housing Element cycle. Table 4-1 provides Oakland's quantified objectives by income category for the 2023-2031 Housing Element planning period. New construction estimates include units in pipeline projects, projected accessory dwelling units (ADUs), and the minimum remaining RHNA capacity. The remaining RHNA capacity represents development that the City must support beyond pipeline projects and projected ADUs as identified in the Sites Inventory, Appendix C (including potential development projects, 5th cycle RHNA sites, and other new opportunity sites), and through the actions in this Housing Action Plan.

Table 4-1: City of Oakland 2023-2031 Quantified Objectives

Income Category	*New Construction[1]*			*Rehabilitation[2]*	*Conservation/Preservation[3]*
	Pipeline Project	*Projected ADUs*	*Remaining RHNA*		
Very-Low-Income[4]	881	346	2,029	-	84
Extremely-Low-Income[4]	325	346	2,584	-	84
Low-Income	1,499	692	1,559	1,216	502
Moderate-Income	182	594	3,681	-	-
Above-Moderate-Income	10,174	-	1,359	-	-
Total	13,061	1,978	11,212	1,216	670

1. New construction objectives represent the City's RHNA for the Sixth Cycle Housing Element update. Estimates include units from pipeline projects and projected accessory dwelling units (ADUs).
2. Estimates are derived from the City's 2020/2021 Consolidated Annual Performance and Evaluation Report (152 rehabilitated units in 2020/2021, projected over 8-year period).
3. Conservation/preservation estimates include support of the construction, acquisition, and/or preservation of deed restricted affordable housing units each year (640 units total, as described in Action 3.3.6) and down payment assistance for Section 8 voucher holders (30 units total, as described in Action 5.1.3). Units are proportionally distributed based on RHNA allocation among Low-, Very Low-, and Extremely-Low-Income sites.
4. The extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need. Quantified objectives for very-low-income housing includes extremely-low-housing objectives.

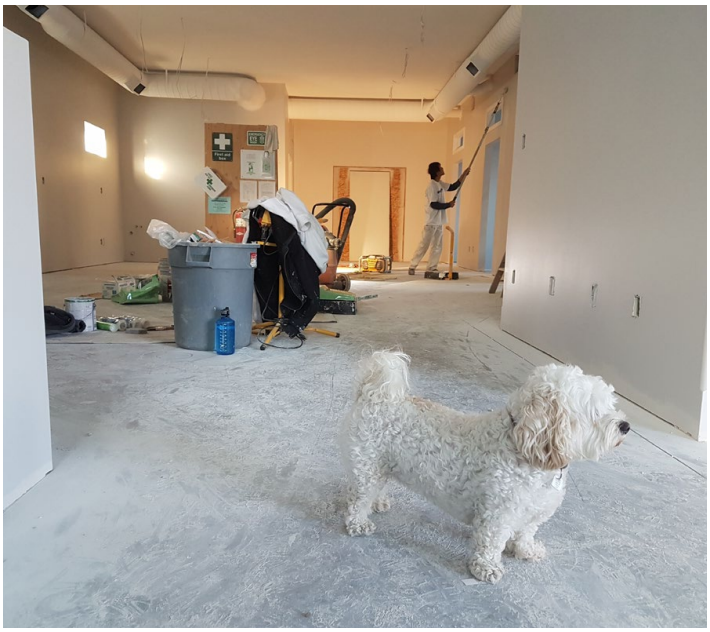
EXECUTIVE SUMMARY

Executive Summary

Oakland's 2023-2031 Housing Element is a plan that presents goals, policies, and actions to address Oakland's need for more affordable homes and to promote integrated, vibrant communities. By expanding housing options in more affluent neighborhoods and reinvesting in less affluent neighborhoods, the Housing Element will affirmatively further fair housing for all Oaklanders. The Housing Element takes significant action to address urgent community needs, including protecting Oakland residents from displacement, improving Oakland's existing housing stock, expanding affordable housing opportunities, expanding resources for the unhoused, and promoting neighborhood stability and health.



The Housing Element includes five specific goals with associated programs that are priorities for the City of Oakland. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2 and is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices.

Many of Oakland's existing housing programs will be carried forward, but there are many **new actions, that are shown in blue**, that address the city's housing needs that are added to the Housing Element.

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The Housing Element protects Oakland tenants from displacement and creates conditions that enable them to remain in their homes and communities.

- Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.
- **Action 1.1.2: Enforce Just Cause for Eviction measures.**
- Action 1.1.3: Enforce and Strengthen Ellis Act protections.
- **Action 1.1.4: Implement tenant relocation measures.**
- **Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.**
- Action 1.1.6: Enhance housing related legal services
- **Action 1.1.7: Expand our ability to enforce rent control to maintain affordability.**
- **Action 1.1.8: Monitor neighborhood displacement**
- **Action 1.1.9: Implement a rental housing registry.**
- Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).
- **Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.**
- **Action 1.1.12: Provide a local preference in affordable housing projects**
- **Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.**
- Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

Goal 2. Preserve and Improve Existing Housing Stock

The Housing Element conserves and improves the affordability of existing housing stock in Oakland and addresses substandard conditions.

- Action 2.1.1: Support home rehabilitation programs.
- Action 2.1.2: Promote healthy homes and lead-safe housing.
- **Action 2.1.3: Conduct proactive rental inspections.**
- Action 2.1.4: Support historic preservation and rehabilitation.
- **Action 2.1.5: Implement universal design strategies**
- **Action 2.1.6: Increase funding for improved indoor air quality.**
- Action 2.2.1: Continue to implement resale controls on assisted housing.
- Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on “at-risk” units.

- Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.
- Action 2.2.4: Limit condominium conversions.
- Action 2.2.5: Extend local replacement unit provisions.
- **Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.**
- **Action 2.2.7: Provide additional subsidy for residential hotels.**
- **Action 2.2.8: Investigate a Tenant/ Community Opportunity to Purchase Act.**

Goal 3. Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

The Housing Element facilitates the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, the Housing Element provides a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. The Housing Element locates new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and removes constraints to affordable housing development.

- **Action 3.1.1: Develop a project-based rental or operating subsidy program for extremely-low-income residents.**
- **Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.**
- **Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/ rowhouses, and ADUs**
- **Action 3.2.2: Promote and protect live/work housing and housing for artists**
- Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.
- **Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs**
- **Action 3.2.5: Reduce constraints to the development of ADUs**
- **Action 3.2.6: Monitor affordability of permitted ADUs**
- **Action 3.2.7: Proactive Short-Term Rental Enforcement**
- Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.
- Action 3.3.2: Expansion of Section 8 vouchers.
- Action 3.3.3: City of Oakland Emergency Rental Assistance Program.
- **Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.**
- **Action 3.3.5: Implement an affordable housing overlay.**

- Action 3.3.6: Access to low-cost financing for development.
- **Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement**
- **Action 3.3.8: Right-sized development fees on market-rate developments**
- **Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.**
- **Action 3.3.10: Consider a citywide Enhanced Infrastructure Financing District (EIFD)**
- **Action 3.3.11: Support innovations by design**
- Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.
- Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.
- **Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/ equity funds for small sites to support site acquisitions for affordable housing**
- Action 3.3.15: Continue and expand density bonus incentives.
- **Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund**
- Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.
- **Action 3.3.18: Implement affordable housing investments contained in Measure U**
- **Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program**
- **Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements**
- **Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update**
- **Action 3.4.3: Revise Conditional Use Permit (CUP) requirements**
- **Action 3.4.4: Revise citywide parking standards**
- **Action 3.4.5: Revise open space requirements**
- **Action 3.4.6: Correct zoning district boundaries that cut through parcels**
- **Action 3.4.7: Capture the diversity of existing built fabric in zoning**
- **Action 3.4.8: Implement objective design standards**

- Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.
- **Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right**
- **Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing**
- **Action 3.5.1: Support community land trusts and other shared equity model**
- **Action 3.5.2: Support housing cooperatives, co-living, and cohousing models**
- **Action 3.5.3: Advocate for statewide legislation on social housing**
- **Action 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households**
- **Action 3.5.5: Study Feasibility of Single-Stair Residential Buildings**
- **Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders**
- **Action 3.6.2: Provide increased flexibility in development standards**
- **Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing**
- **Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.**
- Action 3.6.5: Continue one-stop and online permitting services.
- **Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.**
- Action 3.7.2: Provide housing for persons with HIV/AIDS.
- Action 3.7.3: Accessible units in new housing developments.
- Action 3.7.4: Implement the sponsor-based Housing Assistance Program.
- **Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes**
- **Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right**
- **Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act**
- **Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right**
- **Action 3.8.1: Continue to implement the Vacant Property Tax (VPT)**
- **Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations**
- **Action 3.8.3: Tax vacant residential rental units**
- Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.
- Action 3.8.5: Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

GOAL 4. Address Homelessness and Expand Resources for the Unhoused

The Housing Element recognizes housing as a human right and reduces homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

- **Action 4.1.1: Expand, improve, and maintain crisis response beds**
- **Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color**
- **Action 4.1.3: Expand health and hygiene facilities and services and improve access to bathrooms and showers.**
- **Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.**
- **Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy**
- **Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator**
- **Action 4.2.3: Strengthen interdepartmental Encampment Management Team**
- **Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.**
- **Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.**
- **Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.**

- **Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis**
- **Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing**
- **Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist**
- **Action 4.3.5: Provide development standards for low barrier navigation centers**
- Action 4.3.6: Expand opportunities for the permitting of emergency shelters

GOAL 5: Promote Neighborhood Stability and Health

The Housing Element promotes resilient development in safe, healthy, and just communities. It also increases resources in disinvested communities and create long-time stability through homeownership opportunities.

- Action 5.1.1: Provide first-time homebuyer programs.
- Action 5.1.2: Expand access to low-cost financing for home purchase.
- Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.
- **Action 5.2.1: Protect against smoke and wildfire.**
- Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.
- **Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.**
- **Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.**
- Action 5.2.5: Encourage earthquake-resilient housing.
- Action 5.2.6: Encourage climate-resilient housing.
- **Action 5.2.7: Consider the adoption of a disaster reconstruction overlay zone**
- **Action 5.2.8: Encourage new affordable housing in higher resource neighborhoods**
- **Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.**
- **Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration**
- Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.
- Action 5.3.1: Provide fair housing services and outreach.
- Action 5.3.2: Promote awareness of predatory lending practices.
- **Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.**

01 INTRODUCTION

1.1 Purpose of the Housing Element
1.2 Oakland's Housing Approach
1.3 Organization and Summary of the Housing Element
1.4 Relationship to Other General Plan Elements
1.5 Sources of Information

1. Introduction

This General Plan presents the City of Oakland's strategy and commitment for how it will meet the housing needs of the community over the next 8 years (covering the years 2023-2031). In the face of a crushing regional housing crisis, the task is formidable, but essential: to make quality housing opportunities available to all Oakland residents through the Protection, Preservation, and Production of homes, and to address systemic housing inequity.

Preparation of this Housing Element comes at a time of challenge and uncertainty for many Oaklanders. It comes amid a global pandemic, a renewed call for racial justice after the murder of George Floyd, and economic and global security uncertainty. It comes while Oakland has imposed one of the strongest eviction moratoriums in the State, and it comes at a moment when the world moves closer to the tipping point of irreversible climate change. All of these systemic challenges play a vital role in the current and future shape of housing for individuals and families who call Oakland home.

The actions in this Housing Element also account for Oakland's production of affordable and market rate housing over the previous eight-year Housing Element period. The California legislature has found that the state of California has accumulated an unmet housing backlog of nearly 2,000,000 units and must provide for at least 180,000 new units annually to keep pace with growth through 2025.[1] Over the last eight years, Oakland produced sufficient housing units to meet its share of the overall state-mandated housing production goals. Many other cities throughout the state fell short of their assigned goals, which exacerbates the current housing affordability crisis and creates additional displacement forces on cities like Oakland.

However, Oakland's housing production skewed significantly toward market-rate development and fell short of producing sufficient affordable housing. This Housing Element explores why this occurred and focuses actions on increasing affordable housing production to address this imbalance. The 2023-2031 Housing Element finds that there are sufficient parcels of land under existing zoning regulations to meet the City's assigned eight-year housing production goals, and that these sites are zoned at a sufficiently high density so as to not preclude affordable housing development. Nevertheless, this Housing Element additionally concludes that even if the land is available for housing development, this is only one necessary factor to create an environment where affordable housing is constructed at sufficient levels. Given the shortfall in affordable housing production over the previous eight-year period, there is little reason to expect different results over the next eight years unless constraints are removed, incentives are added, and additional funding sources are identified. This Housing Element seeks to do that.

Finally, the Housing Element's actions are also

1 See California Government Code Section 65589.5, subdivision (a)(2).

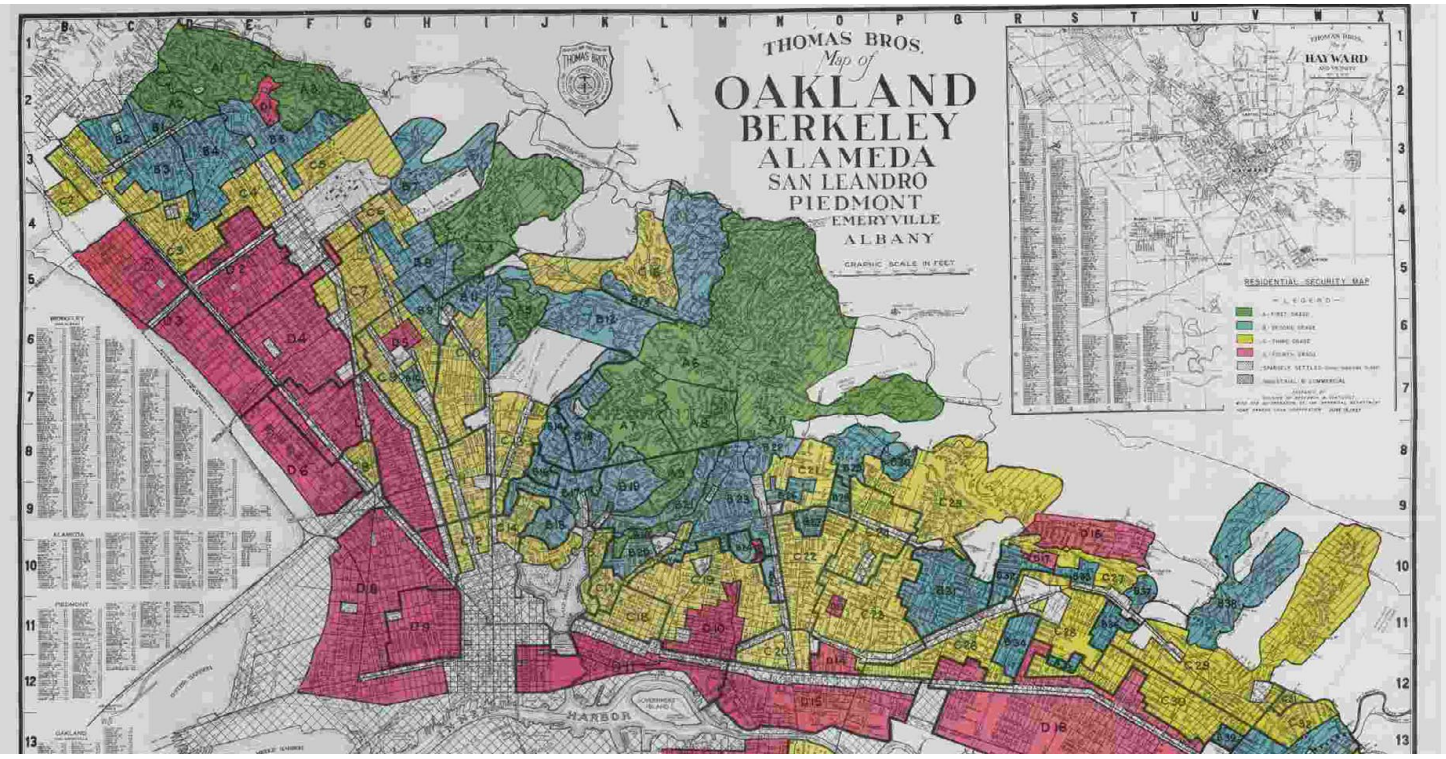
proposed in the context of the longer historical patterns of segregation and exclusion that have resulted in racial and geographic disparities throughout the region and within the City of Oakland. It is not by accident or coincidence that Oakland has historically had more Black residents and more lower income residents than other cities in Alameda County. Nor is it a coincidence that Black, Indigenous, and People of Color (BIPOC) and lower income residents disproportionately live in the Oakland flatlands and disproportionately not in single-family neighborhoods north of Highway 580.

The historic factors that led to this segregation are numerous and can be difficult to untangle, but it is clear that the City has an obligation to undo these patterns of past harms by taking affirmative steps to further fair housing opportunities for all residents. Again, looking at the past eight-year period, it is apparent that the majority of new housing development occurred in neighborhoods targeted for new development such as the Broadway Valdez area, Downtown, West Oakland, and other major transit corridors. These patterns of growth may be appropriate for purposes of creating transit-oriented development and reducing automobile reliance, but without other actions also serve to maintain the existing exclusivity of other neighborhoods. This Housing Element recognizes that the City's obligation to affirmatively further fair housing compels the City to redress the fact that some Oakland neighborhoods were purposefully designed to be exclusive, and preserved that exclusivity through racial covenants, unfair mortgage lending practices, and exclusionary zoning. The Housing Element proposes actions to reverse those trends.

LEARNING FROM THE PAST

What does it mean to call Oakland "home"? Oakland's current housing landscape tells the story of struggle, of systemic forces that have shaped the neighborhood geography of opportunity. To chart an equitable path forward, Oakland's history must be examined and addressed. In particular, Oakland and other governmental entities that influence fair housing choice must affirmatively further fair housing by creating policies that increase affordable housing in high-resource neighborhoods that were formed through exclusionary policies and must also bring additional resources to under-resourced neighborhoods.

The land that is now Oakland is the ancestral home of the Ohlone indigenous group who were stewards of the oak and redwood forests, grasslands, and marshlands that make up the coastal region of central and northern California for thousands of years. The arrival of Spanish missionaries in the 1760s and subsequent periods of Spanish colonization, Mexican settlement, and American urbanization of the Ohlone region greatly shifted the cultural and physical landscape. Nevertheless, this land continues to be of great importance to the Ohlone people.[2]



Oakland has historically been a destination for working people and immigrants who sought out its abundant industrial jobs and relatively affordable neighborhoods. Many of these places, including Chinatown, West Oakland, and East Oakland, formed into cultural and ethnic enclaves as a result of segregationist and racially discriminatory policies and practices, including exclusionary single-family zoning (see 'Constraints' chapter for more information).[3] Government-sponsored "white flight" suburbanization during the early 1930s, followed by disinvestment and takings in neighborhoods of color, created socioeconomic and geographic lines that were further delineated

by redlining (a federally sanctioned practice during the 1930s of denying mortgages in communities of color) and racially restrictive covenants.[4] In the 1950s and 1960s, urban renewal cut through these disinvested areas to build new high-rises and transportation infrastructure that displaced many low-income residents and residents of color. Segregation pressures and private developer interests prevented additional expansions of public housing, and Hope VI initiatives to replace larger public housing projects decreased the overall number of rent-subsidized units, particularly in West Oakland. During the period between 1960 to 1966 alone, 11,800 housing units were razed in Oakland to make room for freeways, BART projects, new public housing, and other urban renewal developments.[5]

Since the late 1990s, Oakland has seen an increase in real estate investment, which has had both positive and negative effects. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process referred to as "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[6] This activity resulted in waves of foreclosures in East and West Oakland. A significant number of these foreclosed properties were then acquired by investors, and once-affordable and stable homes flipped overnight into market-rate rentals. An influx of private capital, in part due to efforts like the City's 10K plan to revitalize the urban core with infill, market-rate housing, has reinvigorated downtown

and uptown.[7] The 10K plan aimed to attract new residents, often with higher salaries than existing communities, to spend incomes at commercial establishments downtown. At the same time as this influx, rising housing prices and a lack of new affordable options created waves of residential and commercial gentrification, especially in North and West Oakland and Chinatown, with a growing pattern of displacement in East Oakland.[8] Massive regional job growth, particularly in the technology sector, coupled with the lack of supply of housing in other cities to keep up, sent waves of new residents to the East Bay in search of more affordable homes.[9] The impacts of lack of regional supply rippled through other residential areas of the city, where communities of color faced greater vulnerability to rising housing costs than white residents.[10] California's Costa Hawkins Law, passed in 1995, also exempted newly constructed units and single-family homes from rent control and effectively banned local vacancy control laws, exacerbating displacement and socioeconomic exclusion in the city.[11] Generational economic and housing discrimination continues to impact Oakland residents: significant disparities remain in home ownership, household incomes, and health outcomes that are tied to race, income, neighborhood poverty level, and housing status, among other social and environmental conditions.[12, 13]

Nowhere has the impacts of these changes been more visible than on Oakland's streets, as homelessness increased by 83 percent from 2017 to 2022.[14] Although the individual causes for homelessness are complex, there are key structural reasons why Oakland has one of the worst homelessness crises in America. These reasons include structural racism, unstable rental markets for tenants, systemic barriers to housing for the formerly incarcerated, a lack of living wage job opportunities, and, above all else, a catastrophic shortage of deeply affordable homes. Another vital truth is that the impacts of homelessness compound over time- the longer someone is homeless, the worse the impacts on physical and mental health, social and family networks, and the ability to find, maintain, and sustain permanent housing.

The direct and indirect displacement of residents in these areas, driven by the heated and inequitable

housing market, threatens not only individual households but also the cultural identity and viability of these communities. From 2000 to 2019, Oakland lost nearly 30 percent of its Black population and significant numbers of long-time Asian Americans residing in ethnic enclaves including Chinatown.[15] The COVID-19 pandemic has highlighted and exacerbated racial and economic disparities in housing security; the pandemic has also shown the public health consequences of Oakland's housing disparities.[16] The consequence of Oakland's complex history has and continues to shape the city's built environment, including the distribution, types, affordability, and quality of housing in Oakland.

Today, Oakland has grown to be the largest city in Alameda County and the busiest port in Northern California. Neighboring cities include Berkeley and Emeryville to the north, San Leandro to the south, Alameda across the Oakland Estuary, and Piedmont surrounded by Oakland. San Francisco is located just 12 miles west across the San Francisco Bay, connected by Interstate 80 (I-80). Oakland is known for its diverse geography, including 19 miles of bay and estuary coastline to the west, the Oakland/Berkeley Hills to the east, and Lake Merritt, a tidal lagoon located within the city's borders.

CHARTING AN EQUITABLE, INCLUSIVE FUTURE

With the legacy of inequity top of mind, the City has begun planning for a more equitable future. In 2016, the City established the Department of Race and Equity with a mission "to advance the creation of a city where diversity has been maintained, racial disparities have been eliminated, and racial equity has been achieved." The Department of Race and Equity is particularly concerned with making a difference in the determinants of equity that lead to creation of a fair and just society, including housing. In 2018, the department published the Equity Indicators Report, which serves as a baseline quantitative framework that can be used by City staff and community members alike to better understand the impacts of policy on racial groups and measure inequities. In 2022, the City declared racism a public health crisis and in response has provided funding for additional staff in the Department of Race and Equity to track performance and equity progress.

The work of the Department of Race and Equity informs the City of Oakland's Department of Housing and Community Development's (Oakland HCD) 2021-2023 Strategic Action Plan. This plan is informed by past analyses, planning, and accomplishments such as the 2016 "Oakland At Home: Recommendations for Implementing A Roadmap Toward Equity from the Oakland Housing Cabinet," and applies a race and equity lens to the City's housing investments and services in wake of the public health, fiscal, and social crises caused by COVID-19. In practice, this includes:

- Transparent and regular reporting on outcomes disaggregated by race;
- Americans with Disabilities Act-compliant, accessible information provided in multiple languages;

15 American Community Survey (ACS) (2014-2018); U.S. Census 2000, 2010; Urban Displacement Project, 2021.

16 "City of Oakland HCD 2021-2023 Strategic Action Plan City of Oakland Housing & Community Development Department 2021-2023 Strategic Action Plan." n.d. Accessed May 9, 2022. https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

- Anti-displacement and housing production programs, policies, and initiatives focused on the most impacted vulnerable populations;
- Access and opportunity pathways to and for Black, Indigenous, and People of Color (BIPOC) developers, service providers, and other contractors to the resources the City has to offer in the conduct of its housing work.

The 2021-2023 Strategic Action Plan also details a series of specific actions and policies Oakland HCD will pursue as part of a broader strategy to protect residents from displacement, preserve existing affordable housing - both subsidized and unsubsidized, and produce new affordable housing.

Community-based organizations, many of whom have been leading housing justice efforts for decades, are also shaping housing goals rooted in racial equity. Oakland residents, community organizations, developers, and government partners created the Healthy Development Guidelines (HDG) with the intent of establishing a shared vision of a healthy, equitable community. The guidelines promote policies, goals, and development guidelines that strengthen environmental justice, sustainability, health, and racial equity in Oakland. In particular, the guidelines are intended to empower residents to address planning, policy, and public health issues in Oakland, so that no neighborhood or demographic group is unduly burdened by development that exacerbates health disparities, economic inequality, or access to open space. A City Council resolution recognized the guidelines, which commended the coalition for their collaborative and engaging partnership with the community.

The East Oakland Neighborhood Initiative (EONI) is a collaborative partnership between the City of Oakland and CBOs leveraging the Transformative Climate Communities grant administered by California's Strategic Growth Council. The EONI plan is a community-driven plan for a just transition to a regenerative economy for East Oakland, led by frontline communities, to strengthen the health, wealth, and resilience of East Oakland neighborhoods in the face of displacement and climate impacts. The plan is focused on five goals: reduce greenhouse gases, prevent displacement, improve public health, build economic empowerment, and plan "by and with" the community.

The East Oakland Neighborhoods Initiative, highlights anti-displacement among their plan goals, noting that improvements recommended in the plan must not drive out existing residents by inadvertently increasing the cost of housing. This is achieved in part through local wealth creation, well-crafted policies, and mainstreaming of affordability vehicles.

Goals, Policies, and Actions included in the Housing Action Plan seek to overcome patterns of segregation, foster inclusive communities free from barriers that restrict access to opportunity and housing, and close the gap between market rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households.

The global climate crisis will also have profound impacts on—among other things—housing security and availability in Oakland. To address the climate crisis, the City released the Oakland 2030 Equitable Climate Action Plan (ECAP) in July 2020. The ECAP is the City's strategy to create a

Healthy Development Guideline Goals

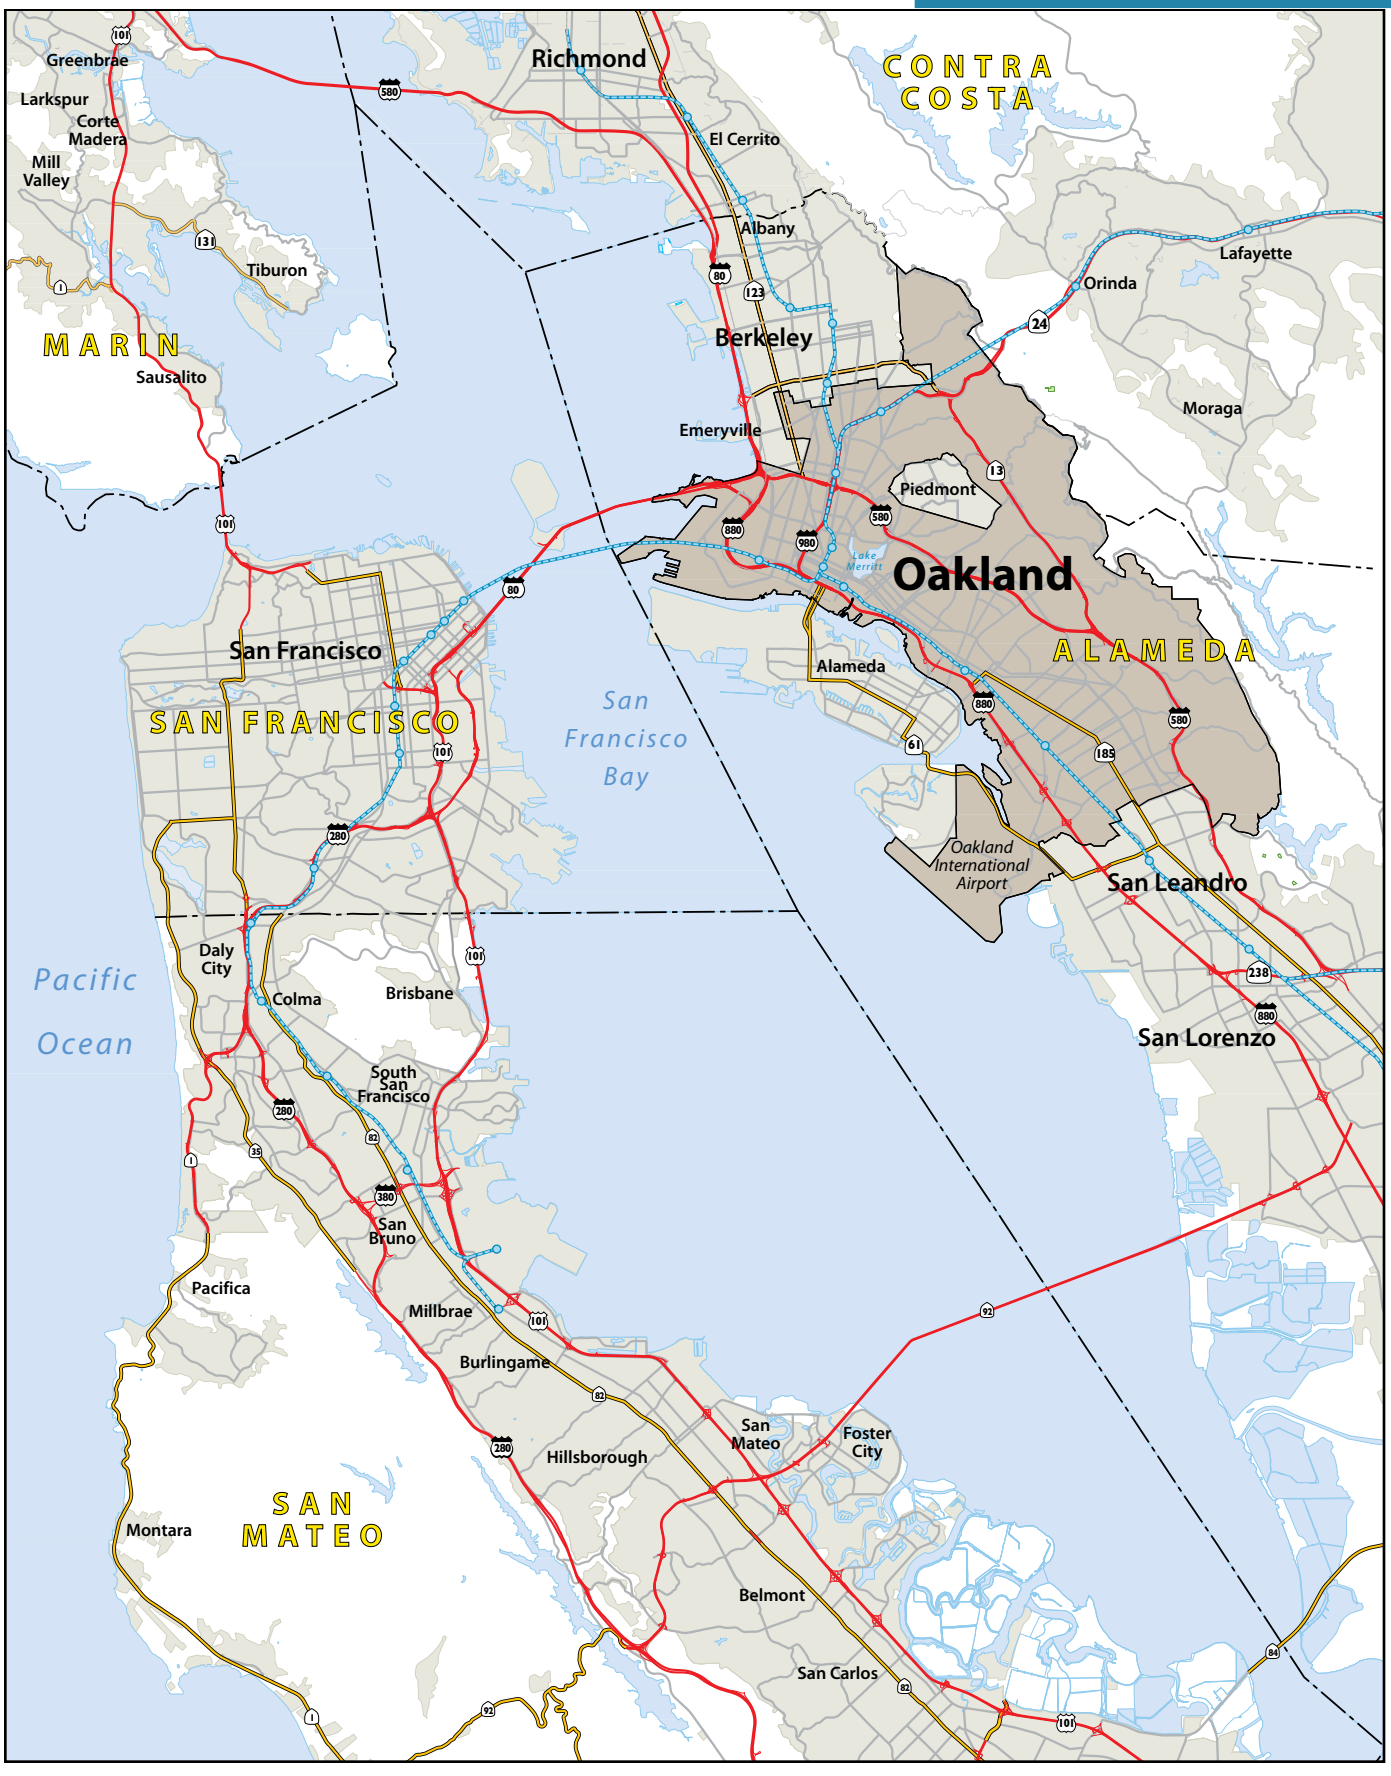
Two of the HDG's goals include enhancing access to affordable housing, particularly for vulnerable populations; preserving existing affordable housing and protecting residents from involuntary displacement.

future built on justice, equal opportunity, and environmental protection. Among the list of Transportation and Land Use (TLU) actions in the ECAP is TLU-3, "Take Action to Reduce and Prevent Displacement of Residents & Businesses." TLU-3 explicitly links anti-displacement efforts to climate equity action, as the City can only achieve its ECAP goals if Oaklanders are able to fully participate in, and benefit from, climate action without fear of displacement and homelessness.

The City is also undertaking an update to its Land Use and Transportation Element of the General Plan, in tandem with this Housing Element, to promote a land use pattern and policies that will help accelerate and target housing production. Like many other Bay Area cities, nearly every property in Oakland has been developed, with few "greenfield" (not yet developed) sites within its limits or at its borders, meaning that housing development will primarily rely on development and redevelopment of "infill" sites. Within the city limit, there are approximately 29,700 acres (46.4 square miles) of land, including residential, commercial, and industrial developments, as well as public facilities, including parks, schools, and an international airport. The Housing Element applies to land within city limits, depicted in **Figure 1-1**.

1.1 Purpose of the Housing Element

TThe 2023-2031 Oakland Housing Element is one component of a larger effort: an update to the City of Oakland General Plan. The General Plan Update will create Oakland's 2045 General Plan and is a "once-in-a-generation" opportunity for all Oaklanders to work together to create a visionary blueprint for the city's future over the next 20 years. The Oakland 2045 General Plan will be made up of several "elements" covering a wide range of topics important to the future of Oakland, including environmental justice, land use, transportation, open space, noise, conservation, and safety.



Environmental Justice and Racial Equity Baseline

The Environmental Justice and Racial Equity Baseline, published in March 2022, identifies and details disparities by race and by geography that can be influenced directly or indirectly by the General Plan. The findings in the Environmental Justice and Racial Equity Baseline identify environmental justice and racial equity existing conditions and inform conversations between City staff and members of the public. In parallel with the Housing Element, this baseline will be used as a starting place for policymaking related to environmental justice, safe and sanitary housing, and other community equity issues.

The 2023-2031 Housing Element sets forth the City's housing priorities and goals—as well as its vision for both short- and long-term development—to create a fair and just city. The actions proposed by this Housing Element cover a wide range of housing issues but are largely focused on addressing two major issues: the City's shortfall of housing production and affirmatively undoing past patterns of exclusivity. State law mandates that the

Figure 1-1: Regional Map

Housing Element be updated every eight years to reflect changing conditions, community objectives, and goals. The key components of the Housing Element include an evaluation of whether the City has sufficient zoned capacity to accommodate required housing production at all affordability levels, an assessment of whether the geographic distribution of that capacity will either further entrench or help to ameliorate existing patterns of segregation, and finally a set of programs and policies to address shortfalls and reduce identified constraints to the maintenance, improvement, and development of housing.

HOUSING ELEMENT: COMPONENTS

In California, all cities must adopt a General Plan composed of at least seven elements, including the Housing Element. All cities must also incorporate environmental justice into the General Plan. Oakland has chosen to adopt an Environmental Justice Element while also incorporating environmental justice goals into each element, including the Housing Element. The Oakland Housing Element, in tandem with the rest of the General Plan Update, is designed to assess and shape the community's housing progress and needs. In accordance with State law, the Housing Element must include:

- A description of outreach conducted in preparation of the element;
- An analysis of progress in implementing the previous Housing Element and effectiveness of its programs and actions;
- An assessment of existing and projected housing needs;
- An analysis of special housing needs, such as those of older adults and people with disabilities;
- An analysis of existing assisted housing units at risk of conversion from affordable to market-rate;
- An analysis and inventory of resources and constraints relevant to meeting housing needs;
- An affirmatively furthering fair housing (AFFH) analysis, which guides the analysis of each set of requirements;
- An inventory of adequate sites suitable for construction of new housing sufficient to meet needs at all economic levels;
- A program that sets forth specific actions to address housing needs, with identification of responsible agencies and timelines.

REGIONAL HOUSING NEEDS ASSESSMENT (RHNA)

Oakland's Housing Element was last updated in 2015 and covered the years 2015-2023. The current Housing Element update reflects the Regional Housing Needs Assessment (RHNA) as determined by the Association of Bay Area Governments (ABAG) for the Sixth Cycle Housing Element update, covering the years 2023-2031. The RHNA is a State-mandated process intended to ensure every city and county plans for enough housing production to accommodate future growth. The State of California Housing and Community Development Department (State HCD) assigns each region of the state an overall RHNA allocation. For the nine-county Bay Area region, ABAG then distributes a "fair share" portion of that allocation to each local jurisdiction. Each city and county must then identify adequate sites with a realistic capacity for development sufficient to meet this RHNA.

For the 2023-2031 period, Oakland must identify sites sufficient to accommodate 26,251 new housing units between 2023 and 2031, with a specific number of units designated as affordable to each income category, as shown in Table 1-1.

A total of 6,511 units must be affordable to households making less than 50 percent of area median income (AMI), 3,750 units must be affordable to households making between 50 and 80 percent of AMI, 4,457 units must be affordable to households making between 80 and 120 percent of AMI, and 11,533 units must be affordable to households making over 120 percent of AMI. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need. More detail on the RHNA allocation process is described in Chapter 3 as well as in **Appendix C**.

Table 1-1: Oakland Regional Housing Needs Assessment, 2023-2031

INCOME LEVEL[1]	INCOME RANGE	NEEDED UNITS	PERCENT OF NEEDED UNITS
Very-Low-Income (0-50% AMI)	<$46,287	6,511	24.8%
Extremely-Low-Income (<30% AM part of Very-Low-Income in previous row)[2]	*<$27,772*	*3,256*	-
Low-Income (51-80% AMI)	$27,773-$74,059	3,750	14.3%
Moderate-Income (81-120% AMI)	$74,059-111,089	4,457	17.0%
Above-Moderate-Income (>120% AMI)	>$111,090	11,533	43.9%
Total		**26,251**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

HOUSING ELEMENT: STATE CHANGES

Various amendments have been made to Housing Element law since adoption of the City's current Housing Element, especially since 2017. Some of the key changes for 6th cycle RHNA and Housing Element update include:

- Assembly Bill (AB) 72 (2017) provides additional authority to State HCD to scrutinize housing elements and enforce housing element noncompliance and other violations of state housing laws.
- AB 879 (2017) and AB 1397 (2017) require additional analysis and justification of sites listed on a local government's housing sites inventory, additional explanation of the realistic capacity of those listed sites, and further scrutiny of governmental and nongovernmental constraints that limit the production of housing.
- AB 686 (2018) requires local governments to Affirmatively Further Fair Housing (AFFH) by including in revised housing elements (1) an assessment of fair housing; (2) equitable distribution of housing to meet the needs of households at all income levels and dismantle segregated living patterns with integrated and balanced living patterns; (3) policies and programs that address fair housing barriers and promote fair housing patterns; and (4) a comprehensive, collaborative, accessible, inclusive, and equity-driven public engagement approach.
- AB 215 (2021) extends the housing element compliance review process by requiring local governments to make draft housing elements available for public review prior to submittal to State HCD rather than conducting concurrent review. The draft must be made publicly available for at least 30 days, and the local government must consider and incorporate public comment for at least 10 business days, before sending the draft to State HCD. AB 215 also increased State HCD's review period of the first draft element submittal from 60 to 90 days and within 60 days of its receipt for a subsequent draft amendment or adoption. However, the January 31, 2023, statutory deadline remains the same, even as these new requirements have significantly added to the time a city needs to complete the overall housing element update process.
- AB 1398 (2021) revises the consequences for local governments that miss the deadline for housing element adoption. Local governments must complete rezoning no later than one year from the statutory deadline for adoption of the housing element if that jurisdiction fails to adopt a housing element that State HCD has found to be in substantial compliance with state law within 120 days of the statutory deadline. The City retains the three-year rezoning period if the housing element is adopted within 120 days of the statutory deadline.
- AB 1304 (2021) clarifies that a public agency has a mandatory duty to comply with existing Housing Element Affirmatively Furthering Fair Housing (AFFH) requirements. AB 1304 revises the items to be included in AFFH analysis and requires that analysis to be done in a specified manner. In addition, the housing inventory must analyze the relationship of the sites identified in the inventory to the city's duty to affirmatively further fair housing.

The contents of this Housing Element comply with these amendments and all other requirements of Housing Element law.

ENVIRONMENTAL REVIEW

The General Plan update is being accompanied by an Environmental Impact Report (EIR), which analyzes the potential impacts attributable to the Housing Element Planning Code amendments, as well as the Safety and Environmental Justice Elements and related General Plan and Zoning Map amendments.

1.2 Oakland's Housing Approach

Two important components of the Housing Element include a plan to address Oaklanders' housing needs, and an inventory of sites suitable for housing development at all income levels, based on Oakland's 6th cycle RHNA.

HOUSING ACTION PLAN

This Housing Element identifies a foundational framework of five overarching goals in Chapter 4: Housing Action Plan to comprehensively address the housing crisis and needs of Oaklanders. The goals seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing. The goals were developed through a careful review of community input from each of the outreach and engagement sessions listed in Chapter 2. The Housing Action Plan is further informed by the comprehensive analysis of housing production capacity, constraints analysis and other topics covered throughout the Housing Element appendices. The goals include:

1. **Protect Oakland Residents from Displacement and Prevent Homelessness:** Protect Oakland tenants from displacement and create conditions that enable them to remain in their homes and communities.

2. **Preserve and Improve Existing Housing Stock:** Conserve and improve the affordability of existing housing stock in Oakland and address substandard conditions.

3. **Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities:** Facilitate the production of housing for extremely low, very low, low, and moderate-income households. In addition to increased production generally, provide a diversity of housing types, ownership opportunities, living arrangements, and features supportive of special needs. Locate new housing to further access to opportunity (while simultaneously investing in and protecting tenants in disinvested communities) and remove constraints to affordable housing development.

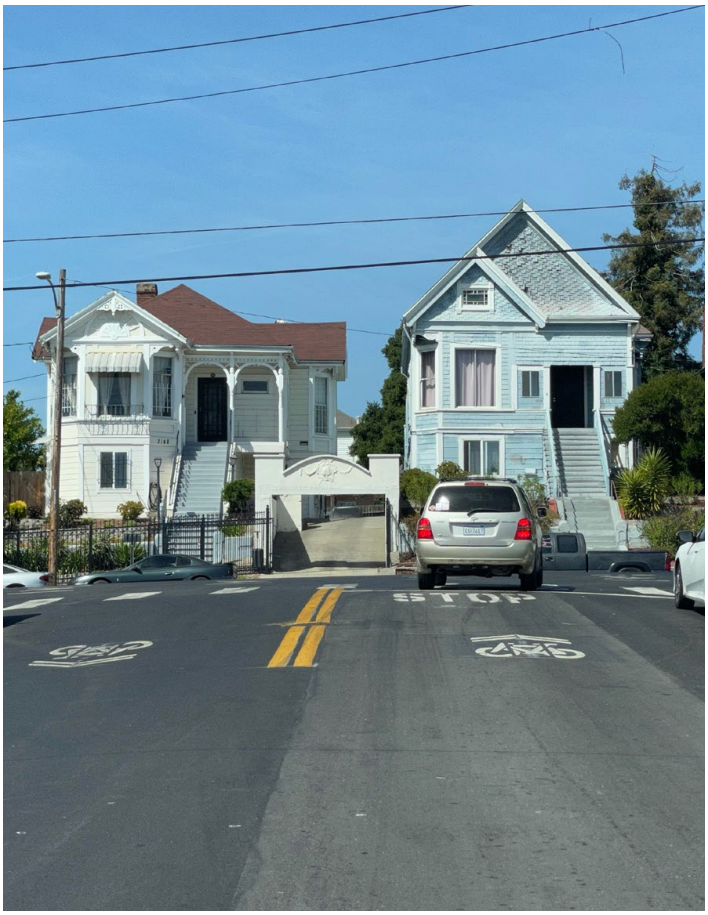
4. **Address Homelessness and Expand Resources for the Unhoused:** Recognize housing as a human right. Reduce homelessness through Housing First approaches and support coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent housing with resources for long-term support.

5. **Promote Neighborhood Stability and Health:** Promote resilient development in safe, healthy, and just communities. Increase resources in disinvested communities and create long-time stability through homeownership opportunities.

The goals, policies, and actions form the Housing Action Plan for the 2023-2031 planning period and transform this framework into impactful action.

HOUSING SITES INVENTORY

The Housing Element also presents an inventory under existing zoning of housing sites suitable for new homes in Oakland at all income levels. The purpose of the inventory is to evaluate whether the City currently has a sufficient number of sites available to meet its RHNA over the next eight years, and to determine whether the distribution of these sites will either further entrench or help to ameliorate existing patterns of segregation. To do this, the inventory includes:



- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units); and

- Opportunity sites where additional development could occur. Opportunity sites were selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected so as to reduce segregation and increase affordable development in high resource neighborhoods, where possible.

Chapter 3 provides a summary of the inventory approach and Appendix C includes the detailed site inventory. While the Housing Sites Inventory documents that Oakland has sufficient zoning capacity to meet Oakland's RHNA requirements, the City's Housing Action Plan includes several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas. These are in addition to the continued enforcement and strengthening of identified tenant protection and anti-displacement measures. A few examples of actions in the Housing Action Plan include:

- Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family dominated neighborhoods (Action 3.2.1);
- Reduce constraints to the development of accessory dwelling units (Action 3.2.5);
- Implement an affordable housing overlay zone that would allow for 100% affordable housing development at any density up to a specified height in most areas where housing is currently permitted (Action 3.3.5);
- Revise development standards, including allowable building heights, densities, open space, and setback requirements (Action 3.4.1);
- Remove conditional use permit requirements for housing in RD-2 and RM zones (Action 3.4.3);
- Implement objective design standards (Action 3.4.8);
- Implement a housing sites overlay zone that would allow all sites included in the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to develop owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households (Action 3.4.10);
- Promote infill, transit-oriented development (TOD), and mixed-use development (Action 5.2.2); and
- Encourage new affordable housing in higher resource neighborhoods (Action 5.2.8)
- Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities (Action 5.2.9)

The Housing Action Plan and Housing Sites Inventory reflects feedback from members of the community and the goals, policies, and actions reflect both local priorities and State obligations.

1.3 Organization and Summary of the Housing Element

The Housing Element is divided into four chapters: an Introduction, a Summary of Public Participation, a Summary of the Housing Sites Inventory, and the Housing Action Plan. In addition, there are several technical appendices that provide extensive detail on a range of topics, including many of the checklist items mandated by state law. This includes an evaluation of the City's 2015-2023 Housing Element, an assessment of housing needs, resources, and constraints, and the comprehensive housing sites inventory. A summary of the findings from each technical appendix is provided in the main body of the Housing Element. It is organized as follows:

- **Chapter 1 – Introduction:** Provides an overview of State requirements, a summary of the organization of the Housing Element, and an explanation of the Housing Element's relationship to the General Plan.
- **Chapter 2 – Public Participation:** Provides a description of the public participation process and a summary of community outreach activities.
- **Chapter 3 – Summary of the Housing Sites Inventory:** Summarizes the City's ability to accommodate the RHNA on available land, and the selection of sites in light of AFFH requirements.
- **Chapter 4 – Housing Action Plan:** Institutes the goals, policies, and actions of the 2023-2031 Housing Element, and provides quantified objectives. The Plan includes five goals: protect Oakland residents from displacement and prevent homelessness; Preserve and improve existing affordable housing stock; Close the gap between affordable and market-rate housing production by expanding affordable housing opportunities; Address homelessness and expand services for the unhoused; and Promote neighborhood stability and health.
- **Appendix A – Evaluation of the 2015-2023 Oakland Housing Element:** Summarizes the City's achievements in implementing goals, policies, and actions under the previous Housing Element. While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Oakland recognizes that more can and should be done to close the gap on affordable housing construction. Oakland further recognizes that many cities in the Bay Area region have failed to meet market rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland.
- **Appendix B – Housing Needs Assessment:** Presents community demographic information, including both population and household data, to identify Oakland's housing needs. Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland—Oakland's Black population has decreased from 36 percent in 2000 to 23 percent in 2020. Oakland's rates of homelessness have also significantly increased from 2017-2022 (83 percent), though the rate of increase has decreased from the period of 2019-2022 (23 percent, compared to 47 percent from 2017-2019). Oaklanders of color also disproportionately face lower rates of homeownership, higher housing cost burden,

overcrowded conditions, and homelessness. These trends are being compounded by demographic factors such as the rapid aging of the population and continued prevalence of poverty.

- **Appendix C – Sites Inventory:** Outlines the selection and capacity methodology used to identify sites to accommodate the RHNA. While the Housing Sites Inventory documents that Oakland does have sufficient zoning capacity to meet Oakland's RHNA requirements, the City has identified in its Housing Action Plan several zoning reforms that would further increase production capacity and unlock opportunity for affordable and missing middle housing in high resource areas.
- **Appendix D – Assessment of Fair Housing:** Identifies fair housing issues and solutions to meet Oakland's AFFH mandate. Oakland is incredibly diverse at the City level, but at the neighborhood level, geographic patterns of income segregation and racial/ethnic segregation are clear. Additionally, Oakland has racially and ethnically concentrated areas of poverty localized to four areas in the City. Neighborhoods across Oakland have received varying levels of investment, which is reflected in the unequal opportunities available for communities of color. Additionally, access to economic, educational, and environmental opportunities vary greatly across the City. Comparing access to opportunity with displacement risk and gentrification across the City, areas that are exclusive, stable, or in the advanced stages of gentrification offer the best access to opportunity. Much of the City has gentrified in recent years, leaving residents in the few (predominantly BIPOC) neighborhoods that have not gentrified at risk of displacement. Oakland is further impacted by disproportionate housing needs: overcrowding rates are higher in the City than in the County/Bay Area Region, cost burden rates are high (highest for Black and African-American households and lowest for white households), and homelessness is a major public health crisis in the City. Individuals experiencing homelessness increased 83 percent between 2017 and 2022 and individuals identifying as Black or African American are disproportionately represented in the unhoused population.
    - The goals and actions concluding this appendix have a strong focus on investing in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps (i.e. those neighborhoods with low access to opportunity). These neighborhoods have high concentrations of BIPOC populations.
- **Appendix E – Housing Resources and Opportunities:** Assesses the City's financial and administrative resources available for future housing development. This appendix describes and assesses the resources available for the development, rehabilitation, and preservation of housing in Oakland. The following sections provide an overview of the financial and administrative resources to support the provision of affordable housing. These include Oakland Housing Authority funds, the Affordable Housing Trust Fund, Community Development Block Grant Funds, and other sources of funding. The appendix also describes additional housing resources or considerations relevant for the provision of housing in the city, including publicly-owned and surplus land, as well as utility and service systems to support new housing.
- **Appendix F – Housing Constraints:** Analyzes governmental and non-governmental constraints to the development of housing. Governmental constraints on affordable housing construction include a lack of local and State funding to support the development of affordable housing, a lack of clarity on permit streamlining processes, higher costs

for all housing developments due to a lack of City staff capacity. Both market rate and affordable housing also face constraints from development standards and green building standards. Non-governmental constraints on housing development include environmental constraints such as risk of seismic activity, infrastructure needs for infill housing, rising interest rates, and the high cost of land, materials, and labor in Oakland.

- **Appendix G – Opportunities for Energy Conservation:** Presents opportunities to develop housing in a sustainable manner. While electrification is one of the primary ways to reduce the environmental impact of a building and improve energy performance, residential buildings in Oakland face a range of difficulties when pursuing electrification including lack of electrical panel or service capacity, and the extensive renovations and remediations that the retrofitting for electrification might trigger. Residents and property owners in Oakland have access to a variety of resources to assist with and incentivize residential energy conservation including local and state financing programs, and local resources such as solar rebates and incentives, and assistance with conversions of gas stoves to induction cooktops. Low-income Oakland utility customers who qualify can also take advantage of State and Federal Energy Bill assistance and energy efficiency programs.
- **Appendix H – Glossary.** Defines key terms used in the Housing Element.
- **Appendix I – Public Outreach Materials.** Includes meeting materials, outreach and survey summaries.
- **Appendix J – Proposed Rezoning and Height Changes.** Illustrates proposed rezoning and height changes to increase housing production capacity and unlock additional opportunities for affordable and “missing middle” housing in high-resource neighborhoods and affirmatively

further fair housing by opening up exclusionary neighborhoods. The proposed changes are also available as an *interactive map*.

- **Appendix K – Findings Letter from California Housing and Community Development (State HCD) dated 9/28/22 and Responses.** Provides a brief summary of the changes in response to the State HCD letter and where they were made in the revised draft.
- **Appendix L – Response to Public Comments.** Provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period. Appendix L-1 includes comment letters; Appendix L-2 includes responses.
- **Appendix M – Recommended Sites for Future Housing (Upzoning/General Plan Update Opportunity Sites).** The City of Oakland has received a number of housing site recommendations from the public. Some of the sites are in the inventory already (shown in yellow); others have been analyzed for Phase I upzone potential or other applicable zoning changes to facilitate housing development. For sites not included in the inventory, the City will consider land use changes as part of the longer-term General Plan Update.

1.4 Relationship to Other General Plan Elements

State law requires the Housing Element to contain a statement of "the means by which consistency will be achieved with other general plan elements and community goals" (California Government Code, Section 65583(c)(8)). There are two aspects of this analysis: 1) an identification of other General Plan goals, policies, and programs that could affect implementation of the Housing Element or that could be affected by the implementation of the Housing Element, and 2) an identification of actions to ensure consistency between the Housing Element and affected parts of other General Plan elements.

As described above, the City is undergoing a comprehensive update to the General Plan. The General Plan update is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, which are due by the beginning of 2023, as well as preparation of a Racial Equity Impact Assessment, Zoning Code and Map update, and a new Environmental Justice Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by 2025.

The Land Use and Transportation Element (LUTE) of the Oakland General Plan was last comprehensively updated in 1998. The vision and specific policies contained in the LUTE seek to encourage and facilitate the types of infill, re-use, mixed-use, and central city/corridor-oriented residential development that are the focus of the Housing Element and the City's ability to accommodate its regional housing allocation. Most of the housing to be provided in Oakland will result from the development or redevelopment of underutilized and infill parcels. In addition, rezoning will occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing.

The goals, policies, and programs contained within this Housing Element will also inform the strategies included in the updated LUTE. As the Housing Element will be adopted prior to the LUTE update, the general distribution, location and extent of land uses as well as population density and building intensity standards prescribed by the current Planning Code are used to determine the City's ability to accommodate residential

development. Some initial amendments to the Land Use and Transportation Element and Planning Code and initial zoning map changes will be made during Phase I; this will allow for upzoning of areas to accommodate additional density on areas near BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Anticipated development on these sites is expected to be in compliance with updated policy standards for noise, safety, open space, recreation, and conservation contained in the other General Plan elements.

The policies in the other updated General Plan elements will advance the ability of the City to achieve the objectives contained in the 2023-2031 Housing Element. Likewise, the Housing Element policies will advance the implementation of policies and programs in the other updated General Plan elements. Evaluation of General Plan consistency will be made as part of adoption of the Housing Element. As other elements are updated as part of Phase 2, consistency will be achieved and maintained as part of General Plan adoption and maintained through any General Plan amendments. The City has therefore determined that the updated Housing Element is consistent with the General Plan.

1.5 Sources of Information

In preparing the City's Housing Element, various sources of information were utilized. As a starting point, the Element used ABAG-prepared local data and AFFH package pre-certified by State HCD for use in sixth cycle housing elements, which provides the basis for population and household characteristics and affirmatively furthering fair housing resources. Where necessary, several additional and more current sources are used to provide reliable updates of the ABAG data package. The sources used in the ABAG data package and many additional sources are listed below. Public input from members of the public, community-based organizations (CBOs), and community leaders, was also a key source of information for this Housing Element. More details on what information was collected from these partners can be found in Chapter 2.

1. ABAG Pre-Certified Housing Needs Data Package, 2021
    a. Federal Financial Institutions Examination Council's (FFIEC) Home Mortgage Disclosure Act loan/ application register (LAR) files
    b. U.S. Census Bureau, Census 2000; Census 2010; American Community Survey 5-Year Data (2005-2009 through 2015-2019)

02 PUBLIC PARTICIPATION

2.1 Summary of Community Outreach Activities

2.2 Public Participation Themes

2. Public Participation

Inclusive engagement and public participation have been key to the preparation of Oakland's Housing Element. Public participation is an ongoing process that will continue to occur as the General Plan is updated. Outreach completed as part of phase 1 of the update process will continue to inform phase 2 of the General Plan update. All community outreach is conducted through a racial equity lens to identify actions to affirmatively further fair housing, increase community assets, decrease pollution exposure, and improve overall health.

The community engagement effort is composed of an extensive outreach process that seeks to engage stakeholders throughout the community, with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and often most negatively impacted by City policies and represents a diligent effort to include public participation from all economic segments of the community, consistent with outreach requirements under AB 686. All community input shared will be used to "ground truth" data based on peoples' lived experience, inform areas of focus for General Plan elements, and guide development of General Plan policies. Outreach that informed the development of this Housing Element is summarized in the following chapter, and materials used in the outreach process are included in Appendix I.

2.1 Summary of Community Outreach Activities

GENERAL PLAN UPDATE OUTREACH

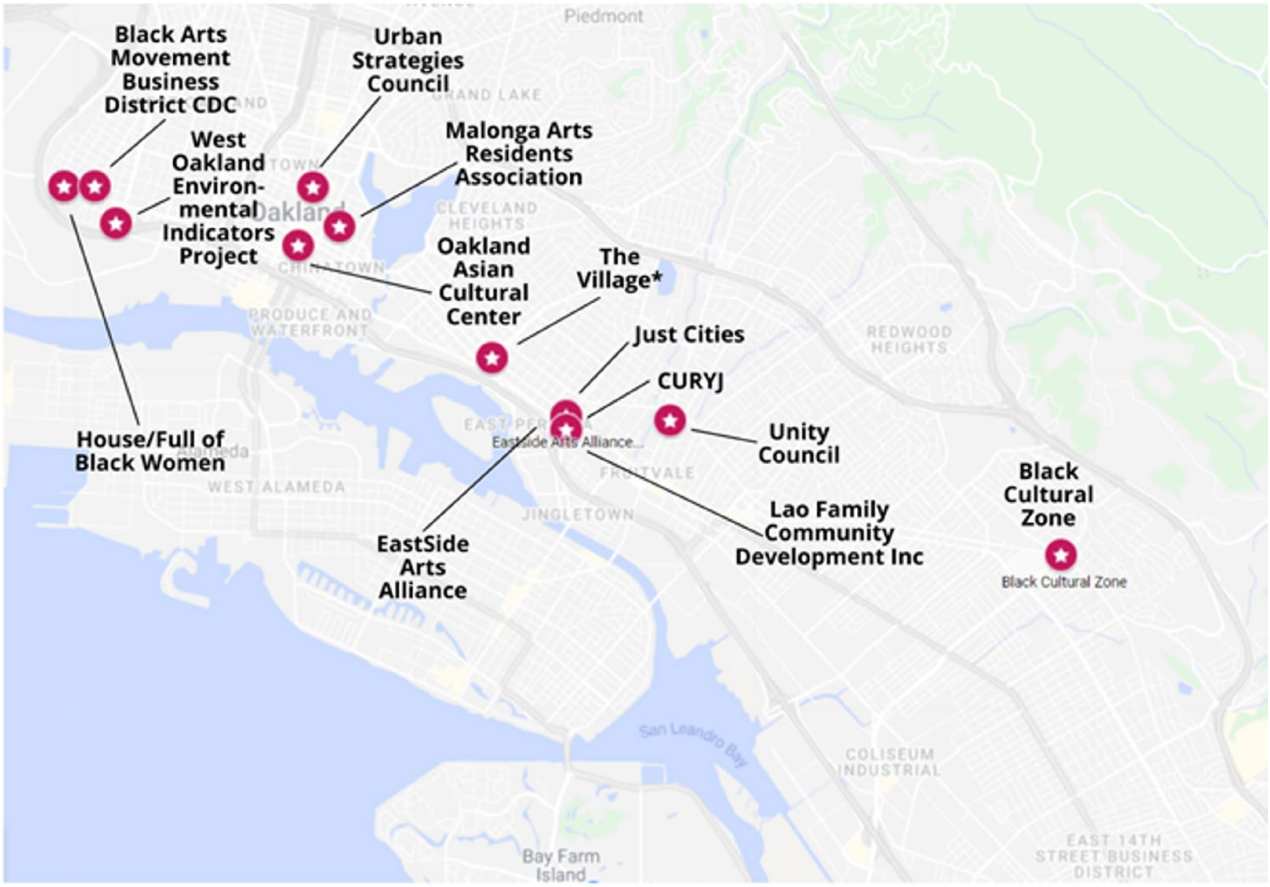
The City, based on feedback received from community members, implemented an innovative approach by bringing on two collaborating consultant teams to assist on the General Plan Update. The City partnered with both a Community Consultant Team – Deeply Rooted Collaborative, and a Technical Consultant Team – Dyett and Bhatia, to ensure a planning process that: 1) meets state deadlines and requirements for the GPU, and 2) dedicates significant resources to deep and meaningful community engagement. The Community and Technical Consultants coordinate closely. The team leads meet weekly, and the entire project team meets biweekly to share key findings

and provide feedback. Both Community Consultant and Technical Consultant outreach and feedback is incorporated into all components of the Housing Element. This approach aligns with advancing the City's critical mission of creating a just and fair City for all (Oakland Municipal Code Section 2.29.170.1).

Community engagement efforts for the General Plan Update include an extensive and inclusive outreach process, engaging stakeholders throughout the community with additional resources dedicated to engaging communities historically underrepresented and excluded from traditional planning processes and most negatively impacted by City policies.

The Community Consultant Team, Deeply Rooted Collaborative, focuses on engagement with the following key communities and geographic areas:

- **Communities:** Unhoused; formerly incarcerated; low-income Asian, Pacific Islander, Black, Latinx, multiracial communities including those experiencing environmental injustices
- **Outreach Geographies:** Fruitvale, West Oakland, East Oakland, Chinatown, Eastlake, San Antonio



Deeply Rooted has three organizations providing central support through the design and coordination of the overall structure for community engagement, providing technical assistance and community education in planning, and administrative support.

- EastSide Arts Alliance | Cultural Programming Partner
- Just Cities | Technical Assistance/Community Education Partner
- Urban Strategies Council | Administrative Partner

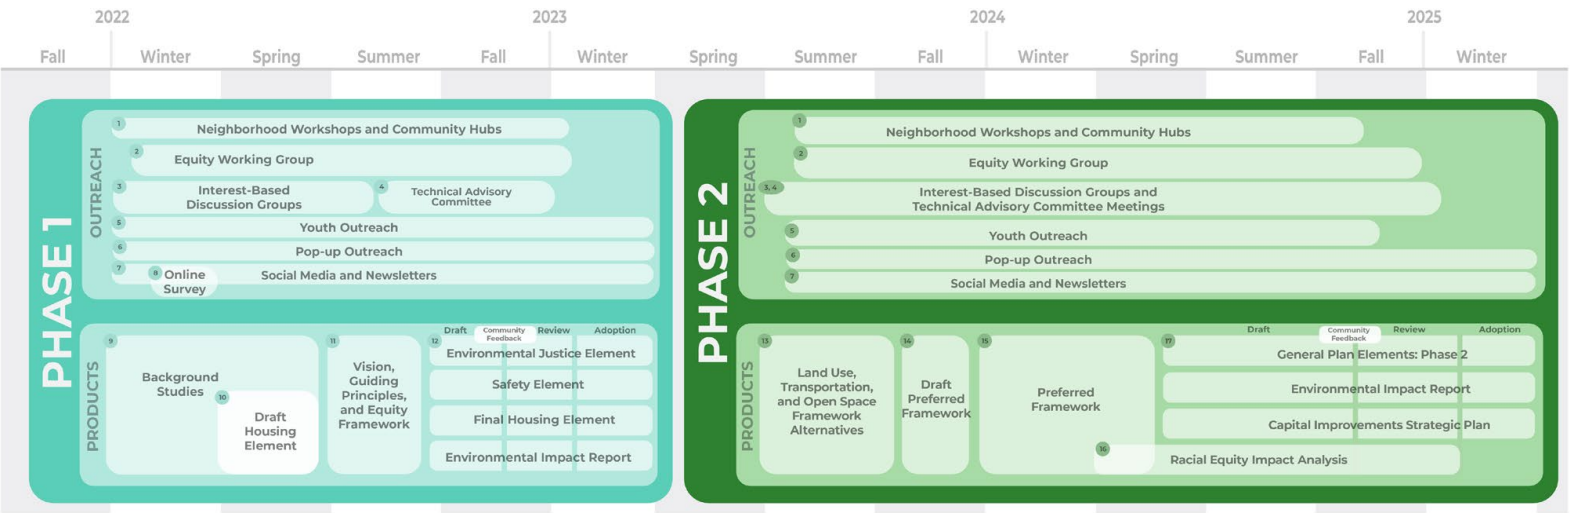
The Deeply Rooted Collaborative in partnership with community partners as shown in **Figure 2-1**. Deeply Rooted's community partner roles are listed in **Table 2-1**.

Figure 2-1: Deeply Rooted Collaborative

*The Village operates as a network of encampments across Oakland without one address.

Table 2-1: Deeply Rooted Collaborative Community Partner Roles

COMMUNITY PARTNER	COMMUNITY / OUTREACH GEOGRAPHY
The Black Cultural Zone Community Development Corporation	Black Community | East Oakland
CURYJ	Formerly incarcerated, Black and Latinx | Fruitvale
House/Full of Black Women/ Deep Waters Dance Theater	
Lao Family Community Development, Inc	Southeast Asian American community
Malonga Arts Residents Association (MARA)	Black and Brown communities, and partnership with members in Chinatown
Oakland Asian Cultural Center (OACC)/ API Cultural Center	Asian American community| Chinatown
Unity Council	Latinx community | Fruitvale
The Village in Oakland	Unhoused curbside communities in North Oakland, West Oakland, Downtown, and East Oakland
West Oakland Environmental Indicators Project.	Environmental Justice | West Oakland
Black Arts Movement Business District, CDC (BAMBD, CDC)	West Oakland (Lower Bottoms), Artists, flatland communities of color, those invested in the animation of BAMBD, CDC and its stakeholders



COMMUNITY ENGAGEMENT AND OUTREACH SUMMARY

A variety of outreach activities such as workshops, focused discussions, pop-ups, open houses, porch chats, and community hub events are planned throughout the entire process. All community input shared will be used to ground truth data based on peoples' lived experience, inform areas of focus for the update of General Plan elements, and guide development of General Plan policies.

Input related to housing overlaps with many General Plan topic areas and will be incorporated into both the eight-year Housing Element Update as well as into elements with a longer planning horizon, such as the Land Use and Transportation, Environmental Justice, and Safety Elements. A summary of the General Plan update project schedule is provided in **Chart 2-1**. Information on all community engagement events, including engagement summaries; workshop and townhall presentations, recordings, meeting summaries; and discussion group summaries, are provided via the General Plan Update website at https://www.oaklandca.gov/topics/meetings-and-events. A summary of these engagement activities is described below:

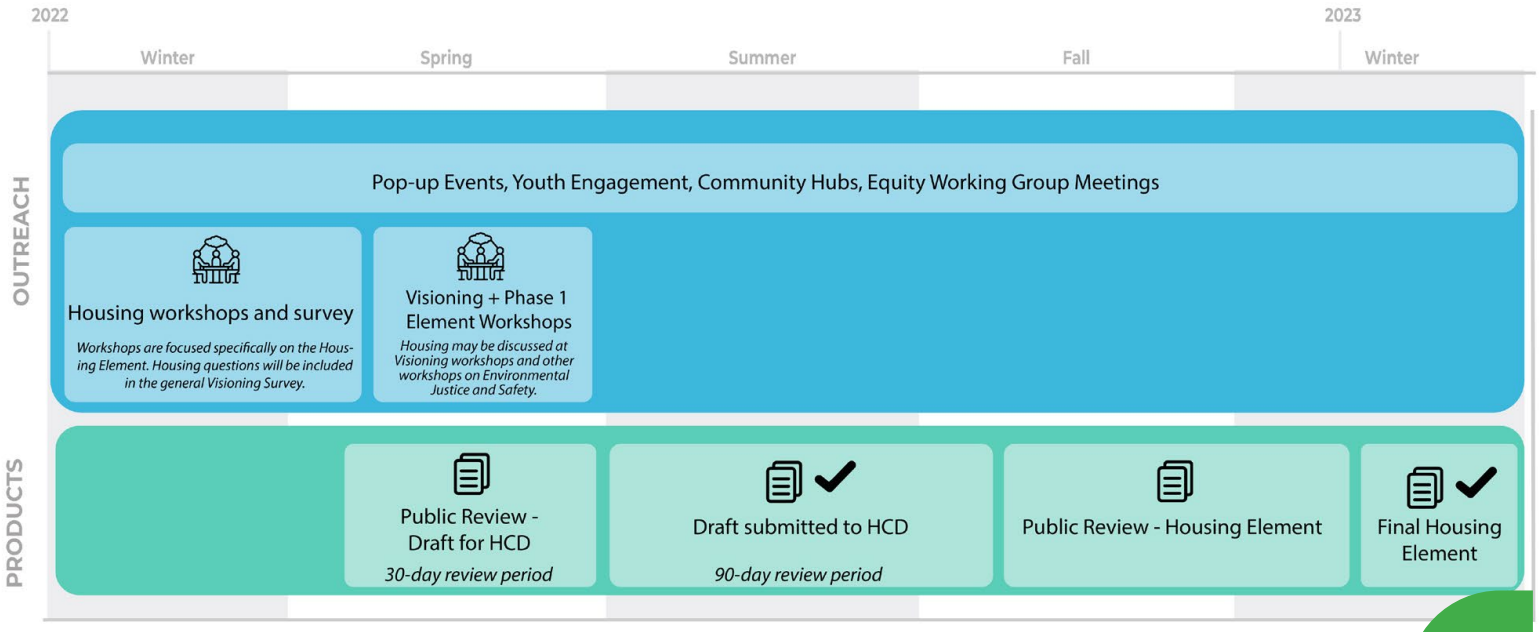
- **Popup and Community Hub Events:** Since November 2021 to March 2022, the GPU Deeply Rooted Collaborative has conducted pop-up events in Eastmont, Fruitvale, San Antonio, Chinatown, West Oakland, and Downtown. For example, in West Oakland these events have been porch-side chats and a pop-up at Hoover Elementary. Engagement has also been integrated into larger community events like the Oakland Asian Cultural Center's (OACC) Asian Pacific New Year Celebration and the Black Joy parade. At these community-embedded events, the team has engaged with over 1,006 people, with a majority being individuals from communities of color. These events sought to hear community concerns, ideas and solutions through interviews and focus group conversations. Community concerns that rose to the top included affordability, displacement, disinvestment, housing quality, pollution (industry and cars), lack of parks, collisions, and illegal dumping.
- **Townhalls:** Two townhalls were held on March 26, 2022, and April 7, 2022. The townhall on March 26, 2022, introduced the General Plan Update process and gathered community input on a vision for the City in 2045, as well as local issues and opportunities that should be

Chart 2-1: Oakland 2045 Project Schedule

addressed in the General Plan. The townhall on April 7, 2022, focused on equity across all issues, with a special focus on EJ and safety priorities in the City.

- **Community Education Workshops:** Two community education workshops were hosted on April 8, 2022, and April 9, 2022, and organized by the Deeply Rooted Collaborative Community Engagement partner to review the past and present policies that led to today's conditions in housing and environmental justice. Over 100 people attended the workshops. Speakers included Oakland unhoused leader Needa Bee (The Village in Oakland), EJ leader Ms. Margaret Gordon (West Oakland Environmental Indicators Project), Margaretta Lin (Just Cities) and Diana Benitez (Just Cities). Attendees shared their frustration regarding ongoing displacement and disinvestment and various community-centered solutions that would bring much needed resources to communities of color in Oakland without displacement.
- **Youth Engagement:** Youth engagement for the GPU will take the form of a Deeply Rooted Fellowship with 15 – 20 fellows. The Fellowship will be a 2-to-3-year commitment and fellows will be provided with a monthly stipend. Planning, design, and training of the fellowship program will be done in coordination with Y-Plan. Fellows will coordinate with the Oakland Youth Advisory Commission (OYAC) and will be engaged in outreach activities such as community-based events, presentations to the community and schools, and social media outreach. Recruitment began in April 2022. On August 31, 2022, twenty (20) young leaders were selected as inaugural Deeply Rooted (DR) Fellows. These young people will lead DR outreach efforts to engage Oakland's youth in the GPU update. DR Fellow activities will include interviewing and surveying young people about their visions and aspirations for the City; educating elementary, middle and high school students about the OGP; gathering data and conducting research to identify the challenges young people face in the City and their proposed solutions; and, implementing a social media campaign to increase youth awareness of the GPU.
- **Neighborhood Group Meetings:** Staff are working with Neighborhood Service Coordinators to present at Neighborhood Crime Prevention Councils (NCPCs) on topics including housing, environmental justice, industrial lands and safety and natural hazards and receive feedback. Staff have presented at several NCPCs and will continue to engage and obtain feedback. Staff are presenting to other Neighborhood – Community groups, faith-based organizations, and at other community congregation events as well.
- **Equity Working Group:** Convened by the Deeply Rooted Collaborative, the Equity Working Group (EWG) is comprised of 20 diverse community members who will: 1) Identify the major challenges and impacts of the General Plan (housing, safety, environmental justice, land use, transportation, and parks); and 2) Advocate for solutions that advance equitable and healthy communities for Oakland residents. Each member will receive a stipend. 20 EWG members who met the following criteria were selected through an interview process from a total of 66 applicants:
    - Hard to reach communities: People from communities that the City traditionally has trouble engaging with including Indigenous, unhoused, formerly incarcerated, low-income, Asian, Black, Latinx, multiracial, people with disabilities, undocumented, and people experiencing environmental injustices.
    - In target geographic areas of: West Oakland, East Oakland, Chinatown, and Fruitvale.
    - Age diversity: People at different stages of their lives to ensure varied knowledge and experiences.

- Diversity of gender and sexual orientation: To ensure women's and LGBTQ+ perspectives are included in this process.
- People who own small businesses in Oakland.



Additional information about the EWG selection process can be found at https://www.oaklandca.gov/news/2022/general-plan-equity-working-group-members-selected.

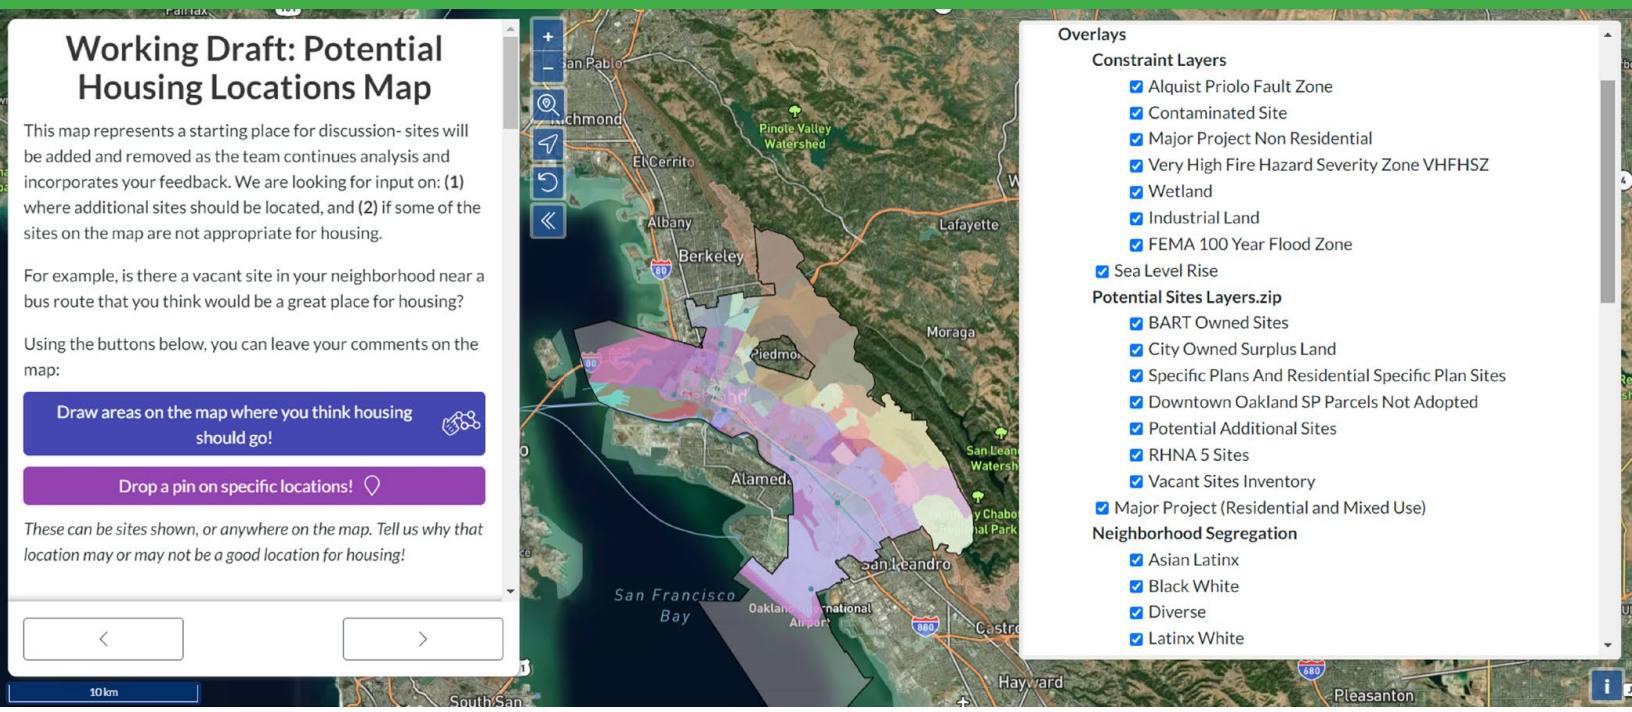
- **Technical Advisory Committee:** The Technical Advisory Committee (TAC) is comprised of internal City department representatives as well as other Oakland-based, neighboring, and regional governmental agency representatives. The TAC serves to advise on key strategies to address Oakland's big issues related to housing, environmental justice, safety, and other topics; review community input collected at key points in the process; and inform, discuss, and provide technical direction on policies and actions. The second TAC meeting was held on March 7, 2022 and TAC members provided recommendations for housing strategies/actions for housing production, preservation, and protections.
- **Study Sessions with Official Decision-Making Bodies:** The Planning Commission, City Council, and various boards and commissions are active participants in the GPU and will have opportunities to provide direction at each Stage in the process. The project team will continue to check in with these decision-making bodies at key milestones to ensure that the project remains on the right track in terms of process, direction, and overall vision. Engagement will take the form of study sessions and informational presentations to review products and generate feedback on drafts. The Planning Commission and Special Community & Economic Development Committee met on February 2nd and February 22nd to discuss potential housing site locations and recommended housing strategies and actions.

HOUSING ELEMENT OUTREACH

To supplement efforts that were part of the General Plan update, a series of targeted activities related to housing were held prior to the release of the public Draft Housing Element. Additional opportunities for feedback will occur after plan release as well. These efforts are summarized in **Chart 2-2** and described below:

Chart 2-2: Housing Element Outreach Timeline

Housing Workshops: The team hosted four virtual housing workshops on February 10, 2022, February 17, 2022, March 12, 2022, and June 9, 2022 to solicit feedback on the Draft Housing Element. Approximately 200 people participated in these three virtual workshops. The first workshop provided background information on the General Plan, the Housing Element, and housing sites inventory requirements. Workshop 2 sought to gather input on potential housing programs. Workshop 3 focused on community input on strategies to preserve existing affordable housing, protect tenants, and prevent displacement. Workshop 4 was held on June 9, 2022, and sought Oaklanders' input on housing sites and proposed strategies included in a public review Housing Element draft before sending it to the California Department of Housing and Community Development (State HCD). Summaries of these workshops are included in Appendix I.



Discussion Groups: A series of focus group discussions were held on the housing-related topics to solicit targeted feedback from organizations and individuals with direct experience with housing provisions and housing-related services. Discussion participants included organizations that may not have traditionally participated in the past including housing justice advocates, tenant rights organizations, faith-based organizations, and other community organizations.

Summaries of these meetings, including the names of participating groups, are provided in Appendix I; see below for the themes of the discussion groups:

- Focus Group Discussion 1 (February 2, 2022): Housing Sites
- Focus Group Discussion 2 (March 10, 2022): Production, Preservation, and Protections
- Focus Group Discussion 3 (June 8, 2022): Draft Housing Element

Figure 2-2: Interactive Map Survey Snapshot - Draft Housing Element Plan Release

Housing Element Update Survey

The Oakland Housing Element Update Survey accompanied the first housing workshop on planning where housing should go. The survey was open from February 11, 2022, through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland.

The interactive map in the survey displayed the initial sites under consideration for the Housing Element and focused on identifying community priorities and recommendations for additional locations. See **Figure 2-2** above for a snapshot of the interactive map. As an optional component of the survey, respondents were asked to describe their zip code, and race or ethnicity. The results of this survey guided the selection of sites identified in Chapter 3 and Appendix C, and a summary of the survey's findings is provided in Appendix I.

The Draft Housing Element was released on May 12, 2022 and was made available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element. Pursuant to AB 215, the city made the first draft available for public review for 32 days between May 12, 2022, to June 13, 2022.

The City also created an interactive Konveio page so the community could read, post comments, and submit questions on the Draft Housing Element and Appendices. During the 30-day mandatory public review period, a fourth Housing Element workshop was held on June 9th to describe the community outreach process and Housing Element content (with particular focus on the Sites Inventory and Housing Action Plan) and provide opportunity for the members of the public to ask questions.

During this initial comment period, the City received 18 letters from Oakland residents and organizations. Staff also sought feedback on the 2023-2031 Draft Housing Element from the Community and Economic Development (CED) Committee of the Oakland City Council on May 24, 2022, and from the Planning Commission on May 18, 2022, and June 1, 2022. City staff incorporated changes to the draft prior to submittal to State HCD where it was feasible to do so within the short time period.

The city provided its draft Housing Element to State HCD for the first 90-day review period on June 30, 2022. The Draft Housing Element (clean and redlined versions) submitted to State HCD is available at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element.

EXTENDED PUBLIC REVIEW PERIOD FOR COMMUNITY FEEDBACK

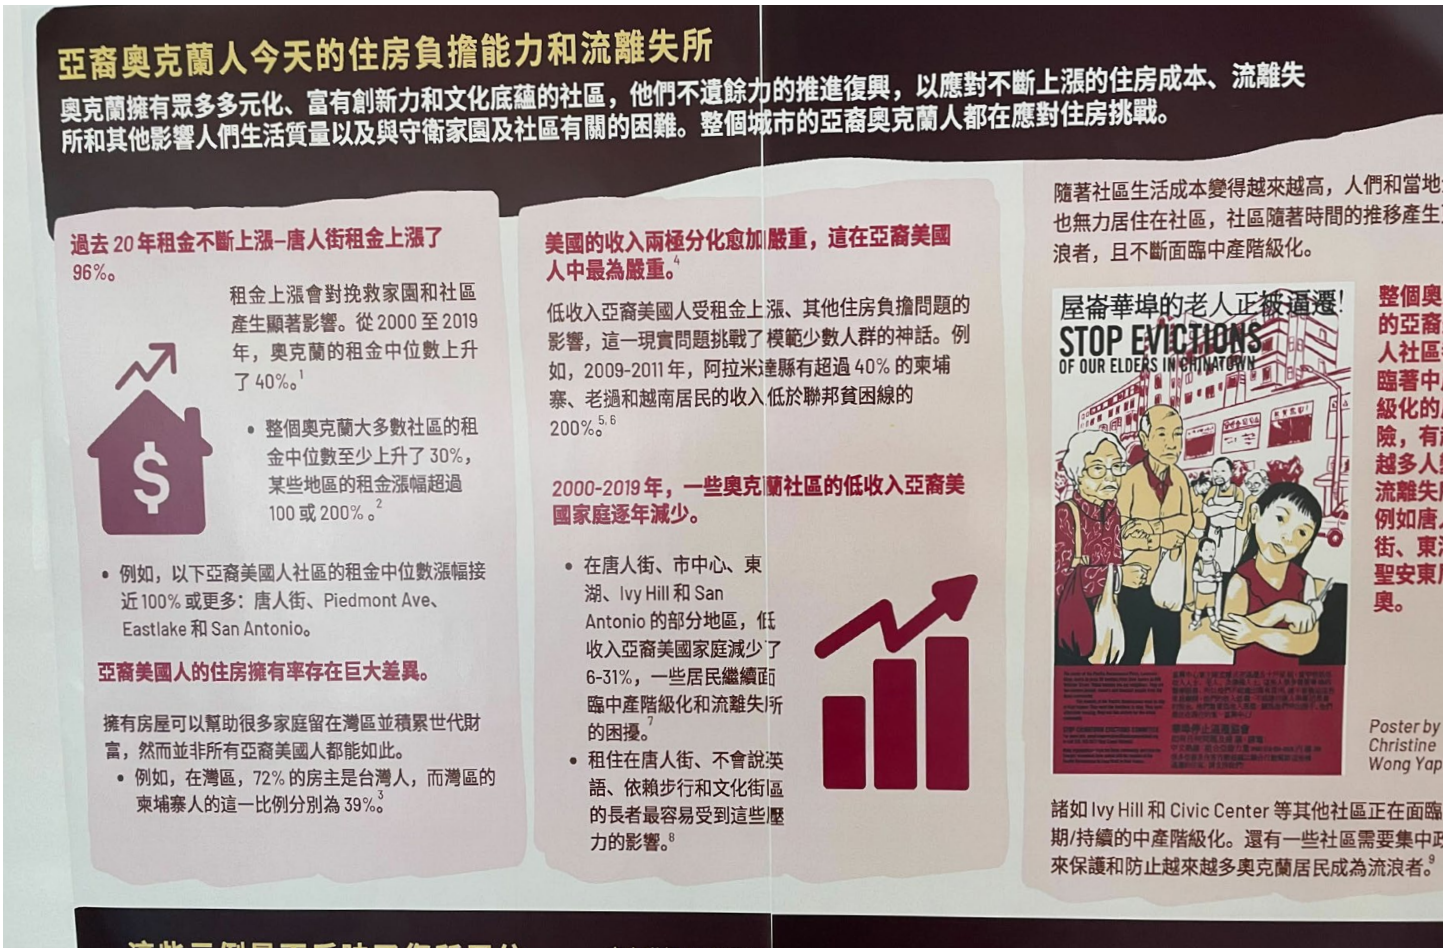
To ensure that the community had enough time to review and comment, the City committed to keeping the first draft of the Housing Element available for public comment during the 90-day State HCD review period, until September 30, 2022. The first Draft Housing Element was available for public review and feedback for a total of 142 days between May 12, 2022, until September 30, 2022.

Staff presented the draft Housing Element to neighborhood and community groups such as Monarch Senior Homes – Satellite Affordable Housing Associates (SAHA) development, East Bay Housing Organizations (EBHO)'s Oakland Committee, Allen Temple Public Ministry's Virtual Townhall, Rockridge Community Planning Council (RCPC) Townhall and the Piedmont Avenue Neighborhood Improvement League (PANIL). Finally, staff conducted study sessions with the City Council and Planning Commission in October to seek additional feedback on the 2023-2031 Draft Housing Element.

Equity Working Group

Between June 2022 and October 2022, the Equity Working Group (EWG) group met eight times to provide feedback and housing policy recommendations on the 2023-2031 Draft Housing Element. EWG members also shared a list of their housing policy recommendations and met with the Directors from the Planning and Building (PBD), Human Services Department (HSD), Oakland Housing and Community Development (Oakland HCD) and the Office of the City Administrator (CAO) and the CAO Homelessness Division to review the policy recommendations.

Response to Public Comments



Appendix L provides an overview of public comments and staff responses, to illustrate how the revised draft reflect public input received during the public comment period.

Analysis of Impediments to Fair Housing Choice

The assessment of fair housing contained in Appendix D relies in part on outreach done in preparation of Alameda County's 2020 to 2024 Regional Analysis of Impediments to Fair Housing Choice (AI).[1] Historically, Oakland has prepared its own AI every five years as a U.S. Department of Housing and Urban Development (HUD) requirement. However, in 2020, the City joined various Alameda County cities and Housing Authority agencies to complete a regional AI.

A year-long community engagement process for the 2020 to 2024 AI consisted of three meetings and a seven-page survey between June 2019 – November 2019. The survey was translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include racial and ethnic minorities, people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses. Key data from the 2020 to 2024 AI is used in the Assessment of Fair Housing in **Appendix D**: Affirmatively Furthering Fair Housing.

1 Alameda County, "Regional Analysis of Impediments to Fair Housing Choice." February 2020. Accessible at *https://cao-94612.s3.amazonaws.com/documents/ALAMEDA-COUNTY-REGIONAL-ANALYSIS-OF-IMPEDIMENTS-TO-FAIR-HOUSING-Final-AI_Combined_2-24-20.pdf*

Housing Element Community Education Materials

The GPU Deeply Rooted Collaborative is preparing Housing Element community education materials that will provide a focused look at housing issues most important to Oaklanders, informed by substantial community outreach. The outreach materials are intended to synthesize a complex, lengthy document into key points and describe how policy changes to help address these issues. These education materials will also provide a deep dive into the historical conditions that have shaped housing quality, access, and opportunity, as well as recommendations for other future City processes (such as Phase 2 of the General Plan Update) that affect housing. These materials are expected to be released in winter/early spring of 2023.

2.2 Public Participation Themes

Across discussion groups, workshops, EWG meetings, and other community engagement events, several key themes emerged that informed development of this Housing Element Update's goals, policies, and actions. This list is not comprehensive, but the key themes listed below are reflected in the overarching goals identified in Chapter 4: Housing Action Plan. The goals, policies, and actions seek to significantly address disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

- **Address Homelessness:** "Housing is a Human Right." A common refrain from participants was that Oakland should recognize housing as a human right and focus on addressing the homelessness crisis. As experts from the National Law Center on Homelessness and Poverty note, "a right to adequate housing is not a requirement that states build free housing for the entire population, rather, it devotes resources and protective measures to prevent homelessness, discrimination, and promote permanent stable housing."[2] Participants expressed distrust with the City and frustration with the current unaffordability of housing and ongoing displacement. They suggested a wide variety of strategies to house the unhoused community, including treating unhoused populations with dignity, stopping the current encampment management policy, more flexible building types, temporary units, permanent supportive housing, RVs/safe parking zones, tiny homes, manufactured housing, and working with the unhoused community to understand their needs and priorities. Participants discussed methods for addressing the homelessness crisis, including a moratorium on market rate housing to balance the speed at which housing is built with the need to ensure that new housing is high-quality, affordable, and habitable, partnering with community groups that work with unhoused communities, and creating housing options that include wrap-around services. The Housing Element incorporates this input in the following ways:

  - **Goals:** 1, 2, 3, 4
  - **Policies:** 1.1, 2.2, 3.1, 3.3, 3.5, 3.6, 3.7, 4.1, 4.2, 4.3
  - **Actions:** 1.1.1 through 1.1.14, 2.2.1 through 2.2.8, 3.1.1, 3.1.2, 3.3.1 through 3.3.7, 3.3.9, 3.3.11 through 3.3.15, 3.3.17, 3.3.18, 3.5.1 through 3.5.3, 3.6.1, 3.6.2, 3.6.5, 3.7.1, 3.7.2, 3.7.4, 3.7.6, 4.1.1 through 4.1.4, 4.2.1 through 4.2.5, 4.3.1 through 4.3.6

- **Protect Oakland Residents from Displacement and Preserve Existing Affordable Housing.** Over the last two decades, housing costs in Oakland have risen dramatically – meaning many Oakland residents cannot afford to buy or rent a home within their own neighborhood. Participants expressed frustration with increasing displacement pressures while the stock of affordable housing throughout the city decreases, including both subsidized housing and "naturally occurring affordable housing" – or unsubsidized housing that is affordable at market prices. Participants also discussed how Oakland's cultural institutions and history are at risk of loss due to continuing gentrification. To mitigate the pressures of displacement and gentrification, Oakland residents suggested a number of potential anti-displacement strategies, including enhanced rent stabilization measures, stronger just cause for eviction protections, increased enforcement of anti-harassment tenant protections, and historic

2 https://www.kqed.org/news/11801176/what-would-housing-as-a-human-right-look-like-in-california

preservation programs to preserve cultural institutions. Participants also discussed ways to preserve the city's existing affordable housing stock, including the implementation of a Community/Tenant Opportunity to Purchase Act, innovative solutions to maintain permanent affordability like community land trusts, additional acquisition and conversion to affordable housing efforts, live/work preferences for Oakland residents, and programs to physically rehabilitate homes to allow long-time residents to enjoy new community amenities. Participants also pointed to a need for better data collection to ensure accountability and to better understand and target anti-displacement resources. The Housing Element incorporates this input as through the following goals, policies, and actions:

- **Goals:** 1, 2, 3
- **Policies:** 1.1, 2.1, 2.2, 3.3, 3.5
- **Actions:** 1.1.1 through 1.1.14, 2.1.1 through 2.1.6, 2.2.1 through 2.2.8, 3.3.12, 3.3.18, 3.5.1, 3.5.2, 3.5.4

- **Focus on Building more Housing Affordable to Extremely Low, Very Low, Low, and Moderate Incomes.** Producing new affordable and deeply affordable housing options was identified as a key strategy to prevent displacement. There were varying opinions about new market rate housing; some participants expressed that the City is currently facing a housing supply shortage, and must add new units of all types, while other participants felt that the City most sorely needs affordable housing and as such should focus explicitly on this type of construction. Groups discussed a wide range of strategies to build more inclusive neighborhoods add more affordable housing units in Oakland, including: legalizing existing nonconforming housing units, inclusionary zoning, changing the zoning to increase density in primarily single-family areas like Rockridge, supporting homeowners in the construction of accessory dwelling units (ADUs), City land acquisitions to build new permanently affordable housing and create community land trusts, and reducing the amount of discretionary review required for new housing projects. Other recommendations included creating housing commission and neighborhood planning councils for ongoing resident leadership to decide the kind of housing development. The City of Oakland recognizes the need to increase housing supply generally, and, with priority given to increasing housing affordable to very-low-, low-, and moderate-income households in the following ways:

  - **Goals:** 3
  - **Policies:** 3.1 through 3.8
  - **Actions:** 3.1.1, 3.1.2, 3.2.1 through 3.2.6, 3.3.1 through 3.3.18, 3.4.1, 3.4.3 through 3.4.11, 3.5.1 through 3.5.4, 3.6.1 through 3.6.5, 3.7.4 through 3.7.6

- **Address Housing Quality Issues.** Housing quality issues can have detrimental impacts on people's physical and mental health. Through neighborhood outreach processes, many Oaklanders described housing quality issues they were living with, such as overcrowding, unsafe building conditions, and lack of maintenance, caused by landlord neglect, lack of funds for upkeep or housing burden, or fear of reporting these issues. Community-recommended strategies to address these issues included programs/grants to landlords and homeowners to make repairs; universal design to allow all Oaklanders to remain in their homes as they age, or to help mobility-impaired residents; and tax credits or programs to address other housing habitability concerns, like indoor air quality. The Housing Element addresses housing quality issues in the following ways:

- **Goals:** 2, 5
- **Policies:** 2.1, 5.2
- **Actions:** 2.1.1 through 2.1.6, 3.3.12, 5.2.1, 5.2.5, 5.2.6

- **Keep Oakland Communities Together.** All Oakland neighborhoods are deserving of high-quality amenities, more affordable housing, and other public investments, especially in areas that have suffered from disinvestment of the past. However, concerns about gentrification and displacement associated with new investment were top of mind for many Oaklanders. Scores of people expressed how difficult it was to pay the rent in light of rising costs. People who have long generational roots in Oakland have been displaced but continue to come to Oakland to be with community and work. This includes a significant loss (30 percent) of Oakland's Black population from 2000 to 2019. As some community members noted, Oakland neighborhoods are like villages where people care for and nurture each other, and displacement means these villages are fragmented, and culture is lost. Oaklanders recommended creative ways to bring back displaced people as homeowners, such as support for co-ops, land trusts, and shared multi-unit buildings. Other creative ways to prevent displacement include creation of cultural district/anti- displacement zones, a human health/socioeconomic impacts analysis to analyze displacement and homeless impacts of market rate projects before the City provides permits or zoning changes. Another way they saw keeping Oakland communities together was through investment to the most impacted communities via municipal reparation to redress Oakland's history of eminent domain and urban renewal and for Black Americans who are descendants of chattel slavery. The Housing Element addresses displacement and cultural preservation in the following ways:
  - **Goals:** 1, 2, 5
  - **Policies:** 1.1, 2.1, 2.2, 3.5, 5.1, 5.3
  - **Actions:** 1.1.1 through 1.1.14, 2.1.4, 2.2.1 through 2.2.8, 3.2.2, 3.3.8, 3.3.12, 3.3.18, 3.5.1 through 3.5.4, 5.1.1 through 5.1.3, 5.3.1 through 5.3.3
- **Building in Accountability and Success Metrics.** Oaklanders desire more transparency around housing issues and actions in the City, and to be heard by elected officials and City departments stressing the importance of setting transparent and data-driven metrics to measure the success of various housing programs, and building in accountability measures to ensure that the City can meet its goals. The Housing Elements aims to increase transparency and accountability in the following ways:
  - **Goals:** 1 through 5
  - **Policies:** 1.1, 2.1, 3.2, 3.3, 3.7, 4.1, 4.2, 4.3, 5.1, 5.2
  - **Actions:** 1.1.8, 1.1.9, 2.1.3, 3.2.5, 3.3.13, 3.3.17, 3.7.1, 4.1.2, 4.2.4, 4.3.1, 5.1.1, 5.1.2, 5.1.3, 5.2.11

03 SUMMARY OF THE HOUSING SITES INVENTORY

3.1 Regional Housing Needs Allocation

3.2 Capacity to Accommodate the RHNA

3.3 Assessing Housing Sites Through a Fair Housing Lens

3. Summary of the Housing Sites Inventory

The Housing Element of the General Plan must include an inventory of land suitable and available for residential development to meet the city's regional housing needs allocation (RHNA) by income level. This inventory is known as the Housing Sites Inventory ("Inventory"). This chapter provides a summary of the full Sites Inventory, available in Appendix C.

3.1 Regional Housing Needs Allocation

As required by State housing law, all California cities and counties must plan for the housing needs of all their residents, at various income levels. This number is called the Regional Housing Needs Allocation (RHNA). For the planning period 2023 to 2031 (also known as the 6th housing cycle), Oakland must plan for 26,251 new units, or approximately six percent of the total allocation for the nine-county Bay Area region. Oakland's allocation is a 77.8 percent increase from the prior cycle's allocation of 14,765 new units, but many nearby jurisdictions have been assigned a larger percentage increase than Oakland compared to their prior RHNA allocation. This is in alignment with the regional goal of ensuring all cities and counties are affirmatively furthering fair housing. **Table 3-1** shows the income breakdown of the Oakland RHNA with an additional buffer, as recommended by the State, to account for any loss due to reductions in density.

Table 3-1: Oakland Regional Housing Needs Assessment, 2023-2031

INCOME LEVEL[1]	NEEDED UNITS	NEEDED UNITS WITH 15% BUFFER	PERCENT OF NEEDED UNITS
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	3,256	3,745	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.
2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need, pursuant to Govern-ment Code Section 65583(a). Although extremely-low-income housing need is not explicitly projected in the RHNA, this group often requires the most subsidy and assistance to generate a sufficient number of housing units.

Source: ABAG, Final RHNA Plan, December 2021

3.2 Capacity to Accommodate the RHNA

Government Code Section 65583.2(c) requires that local jurisdictions determine their realistic capacity for new housing growth by means of a parcel-level analysis of land resources with the potential to accommodate residential uses. Oakland's analysis of potential to accommodate new housing growth has considered physical and regulatory constraints, including: lot area and configuration, environmental factors (e.g. slope, sensitive habitat, flood risk), allowable density, and other development standards such as parking requirements and building height limits.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will also occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. This rezoning proposal will unlock new sites that can accommodate affordable housing within high resource neighborhoods. Sites included in the inventory reflect those that are most likely to develop during the planning period and meet the RHNA; sites that are newly made available by one of the rezoning efforts identified in the Housing Action Plan are not considered as part of this inventory since they do not reflect zoning conditions at the beginning of the Housing Element update process.

The Inventory identifies sufficiently zoned land to accommodate the Oakland RHNA at all income levels. The inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA (such as Accessory Dwelling Units, or ADUs); and
- Opportunity sites where additional development could occur. This includes 1) potential development projects, where projects may be in pre-approval; sites from the previous RHNA cycle that remain available for development; and new opportunity sites, which includes both vacant and non-vacant sites and consists of City-owned sites, sites owned by Bay Area Rapid Transit (BART) or other government agencies, sites located within a specific plan area, and other sites with expressed or potential development interest.

The analysis of nonvacant properties included only those properties with realistic potential for additional development, in light of 1) existing uses on the site; 2) prevailing market conditions; 3) recent development trends; 4) expressed interests in housing development from property owners or developers; and 5) regulatory and/or other incentives to encourage recycling or intensification of existing development.

A summary of capacity by housing units to meet the Oakland RHNA is provided in **Table 3-2**, on the following page. The complete 2023-2031 Inventory is provided in Table C25 of Appendix C, and can be seen in **Figure 3-1**.

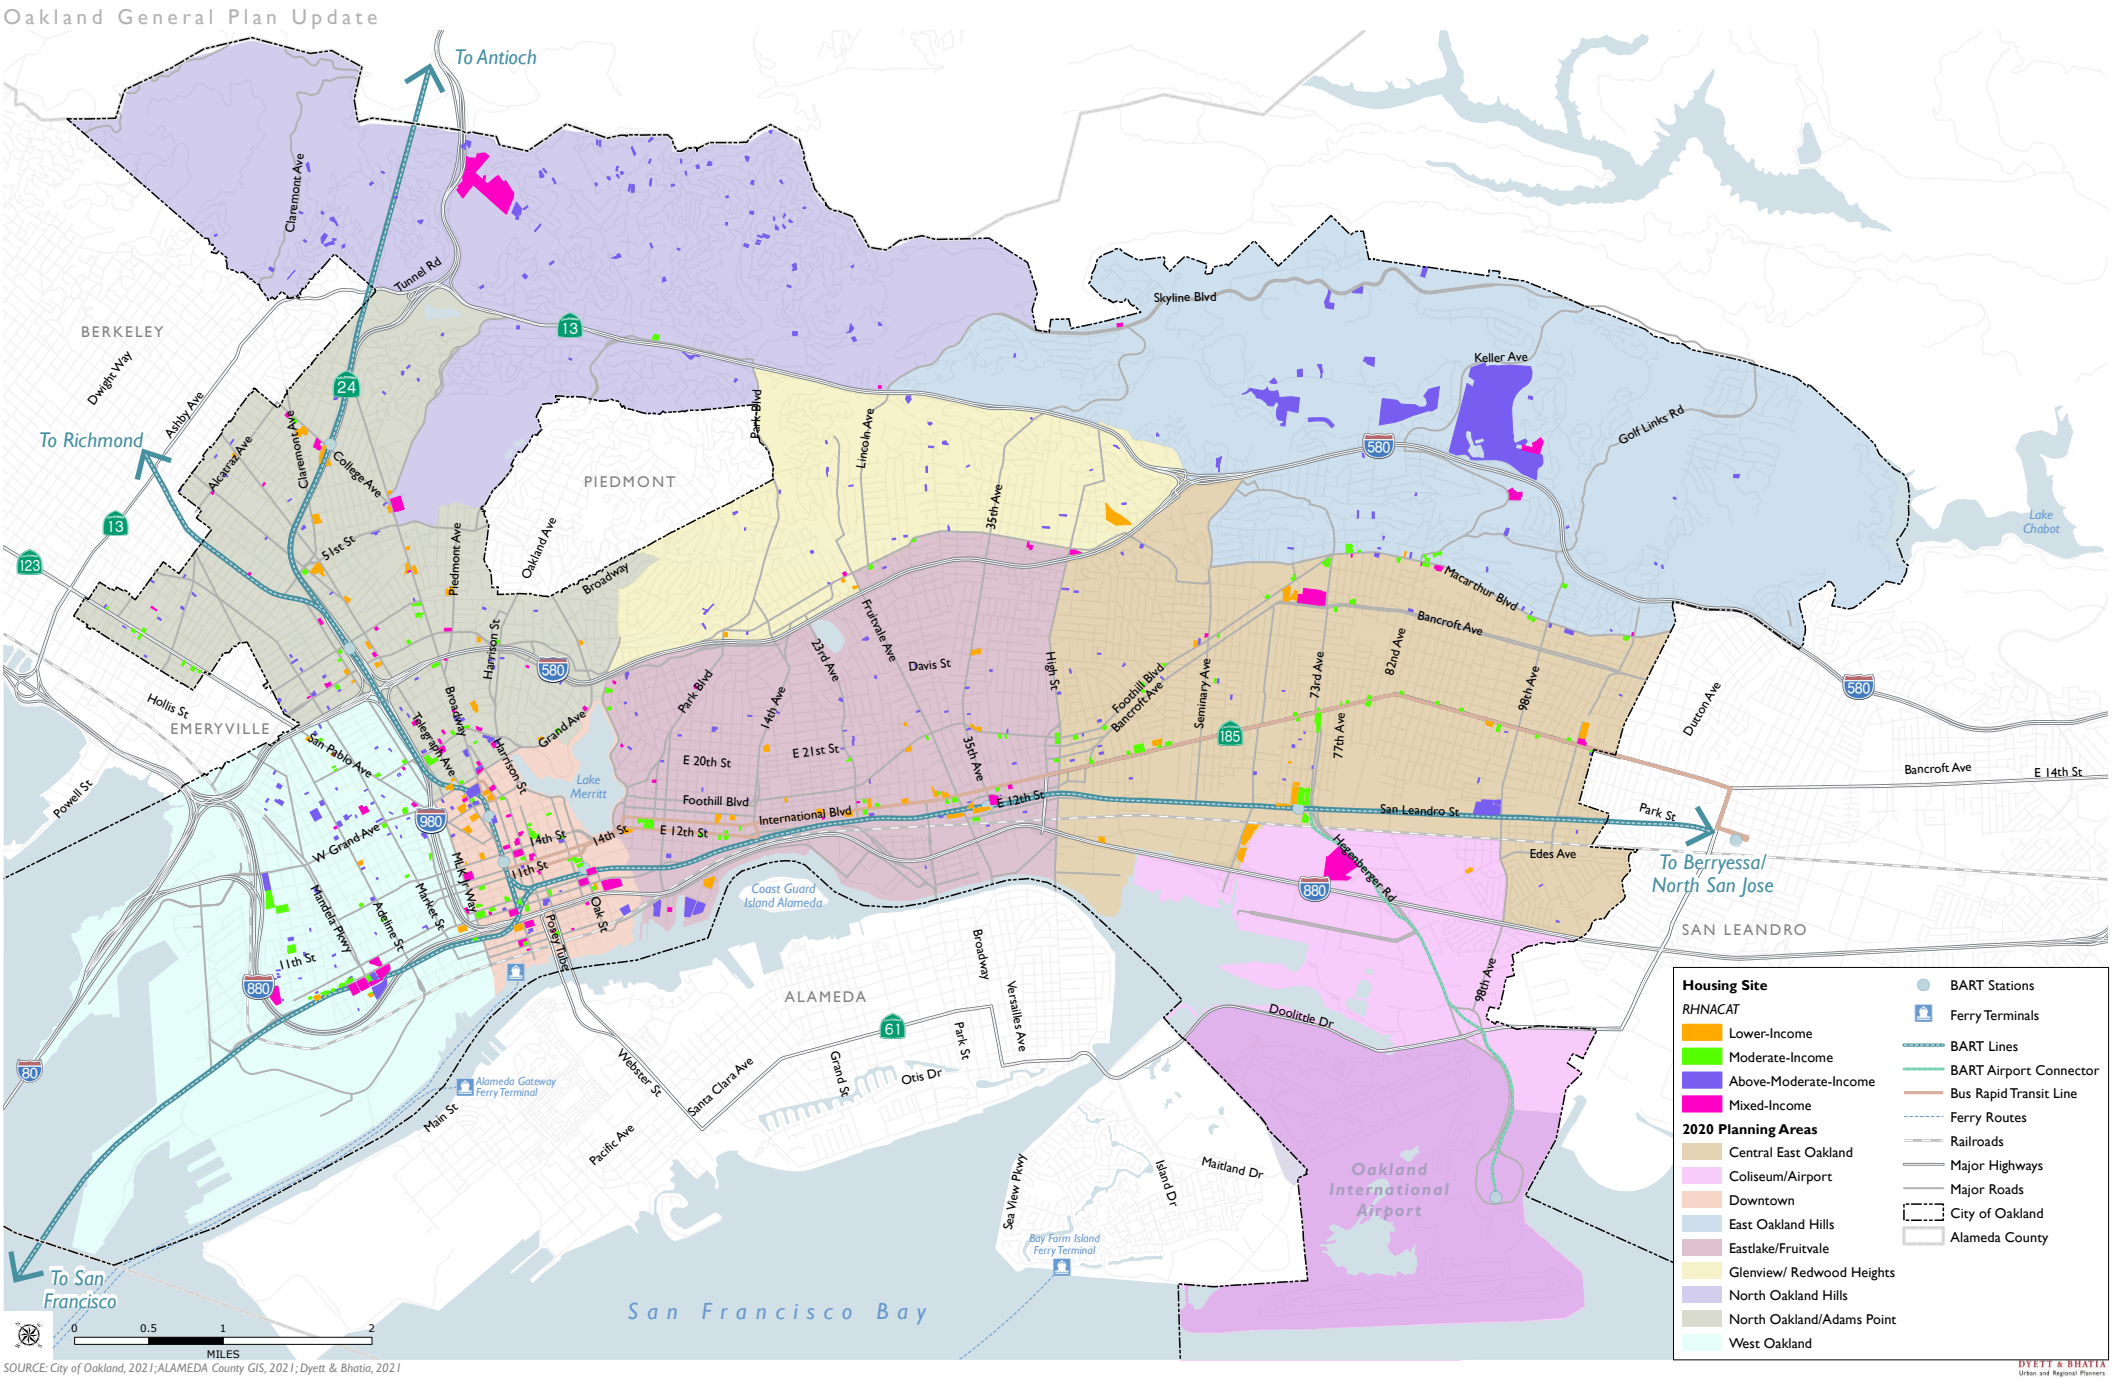


Table 3-2: Summary of Residential Capacity to Accommodate the 2023-2031 Oakland RHNA

	RESIDENTIAL UNITS				
	VERY-LOW-INCOME[1,2]	LOW-INCOME[1]	MODERATE-INCOME	ABOVE-MODERATE-INCOME	TOTAL
Total Credits	1,978	2,191	776	10,176	**15,261**
Pipeline Projects	1,206	1,499	182	10,174	**13,201**
Projected ADUs	692	692	594	0	1,978
Adequate Sites Alternative	80	0	0	2	82
Potential Development Projects	413	1,332	194	5,417	**7,167**
Vacant	203	787	23	1,201	**2,235**
Non-Vacant	211	545	171	4,217	**4,932**
Available 5th Cycle RHNA		714	3,795	688	**5,197**
Vacant		23	566	3	**592**
Non-Vacant		691	3,229	685	**4,605**
New Opportunity Sites		5,498	999	2,456	**8,953**
Vacant		142	200	0	**342**
Non-Vacant		5,356	799	2,456	**8,611**
Total Capacity		**12,127**	**5,764**	**18,737**	**36,578**
6th Cycle RHNA		**10,261**	**4,457**	**11,533**	**26,251**
RHNA + 15% Buffer		**11,801**	**5,126**	**13,263**	**30,189**
Surplus Over RHNA		**1,866**	**1,307**	**7,204**	**10,327**
		118.2%	**129.3%**	**162.5%**	**139.3%**

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).
2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 unit.
3. Potential development project totals are reduced by 10% to account for likelihood of pre-application or early-phase planning permits that may not move forward.

Urban and Regional Planners

CREDITS TOWARDS THE RHNA

State HCD Guidance provides that the RHNA can be accommodated by looking at: 1) projects that are currently in the development pipeline; and 2) by considering alternative means of meeting the RHNA, such as projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households.

Pipeline Projects

Pipeline projects are projects that have been approved, permitted, or will receive a Certificate of Occupancy during the projection period (June 30, 2022, to December 15, 2030) and can be credited toward the City's 6th cycle RHNA. Using data from the City's Accela permitting system, 336 pipeline projects with 12,593 units are spread across the city, with the majority in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. Based on the affordability levels or project-ed rents specified on the project proposal, approximately 21.5 percent of pipeline capacity is affordable for lower-income households, while 1.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. All pipeline projects are shown in Table C-5a and b, and shown in Figure C-2 in Appendix C.

Projected ADUs

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet their RHNA using past building permit approval patterns since 2018. From 2018 to 2021, approximately 247 ADU permits were issued annually in the City of Oakland. Using a conservative estimate, the City anticipates approximately 1,978 ADUs, or approximately 247 average permits per year times eight years.) Annual ADU approvals are shown in Table C-7 in Appendix C. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[1] Projected ADU capacity by affordability level is shown in Appendix C, Table C-8.

Adequate Alternative Sites

According to State HCD, under "limited circumstances" a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[2] Limited circumstances refer to sites that are substantially rehabilitated; located on a foreclosed property or in a multifamily complex of three or more units converted from non-affordable to affordable rental; preserved at levels affordable to low- or very-low-income households with committed assistance; or preservation of mobile home parks through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the 2023-2031 planning period. The affordability of these projects reflects the actual affordability levels pursuant to the regulatory agreements that will maintain such income-restricted units. These sites and their capacity are shown in Appendix C, Table C-9.

---

1 This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU oc-cupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

2 More specific conditions that sites included under this option must meet are provided by HCD on their website: https://www.hcd.ca.gov/planning-and-community-development/housing-elements/building-blocks/adequate-sites-alternative

OPPORTUNITY SITES

Opportunity sites included in the Inventory are those likely to redevelop with housing considering re-cent development patterns as well as a variety of factors that indicate incentives to redevelop. These include both vacant and underutilized land in potential development projects, available 5th Cycle RHNA sites, and new opportunity sites identified as part of this Housing Element cycle.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process, including those in the pre-application stage and those with filed and under review planning permits. Such projects are considered likely to develop. These sites are shown in Appendix C, Table C-14.

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous Housing Element cycles must be zoned at residential densities of at least 30 dwelling units per acre (du/ac) and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower-income households. The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous Housing Element cycles. Specific sites carried over from prior housing cycles are described in more detail in Appendix C, Table C-15.

New Opportunity Sites

New opportunity sites not included in previous Housing Element cycles were identified to meet the City's remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with ex-pressed or potential development interest, including interest determined as part of a community map-ping exercise. Capacity of and rationale for nonvacant sites redevelopments can be found in Appendix C, Table C-16.

Site Selection and Capacity

As part of site analysis, a Housing Element also must demonstrate the projected residential development capacity of sites identified that can realistically be achieved. Creation of realistic assumptions involved survey of recently constructed and approved projects by base zone, density, and height; likelihood of residential conversion and infill development rates; and development capacity modifiers such as existing use on a site, and potential development incentives like low assessed value (AV) ratio (when the value of the land is greater than the existing structure) and low floor area ratio (when a building only takes up a small part of a lot.)

To identify adequate sites and determine realistic capacity, a parcel-based analysis was conducted in accordance with the State site requirements for very-low and low-income sites. Sites that were excluded include non-residential projects already in development; sites without much incentive to redevelop; sites that were environmentally constrained by high fire risk, near fault lines, or within a 100-year flood plain; and sites with known contamination. In addition to these considerations, sites that are sought to be designated as capable of accommodating lower-income housing must meet the State-defined standard of 30 du/ac, known as the "default density", and they must be between 0.5 and 10 acres. A robust description of the methodology and full table of realistic capacity is provided in Appendix C.

3.3 Assessing Housing Sites Through a Fair Housing Lens

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in identified Environmental Justice Communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against Affirmatively Furthering Fair Housing (AFFH) criteria, the Housing Element is an important step in achieving an equitable future in Oakland.

As described in Appendix D, the site identification requirement in the context of affirmatively furthering fair housing involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity. [3]Furthermore, this analysis will determine whether programs must be adopted to "make sites available" with appropriate zoning, development standards, and infrastructure capacity to accommodate the new development need.

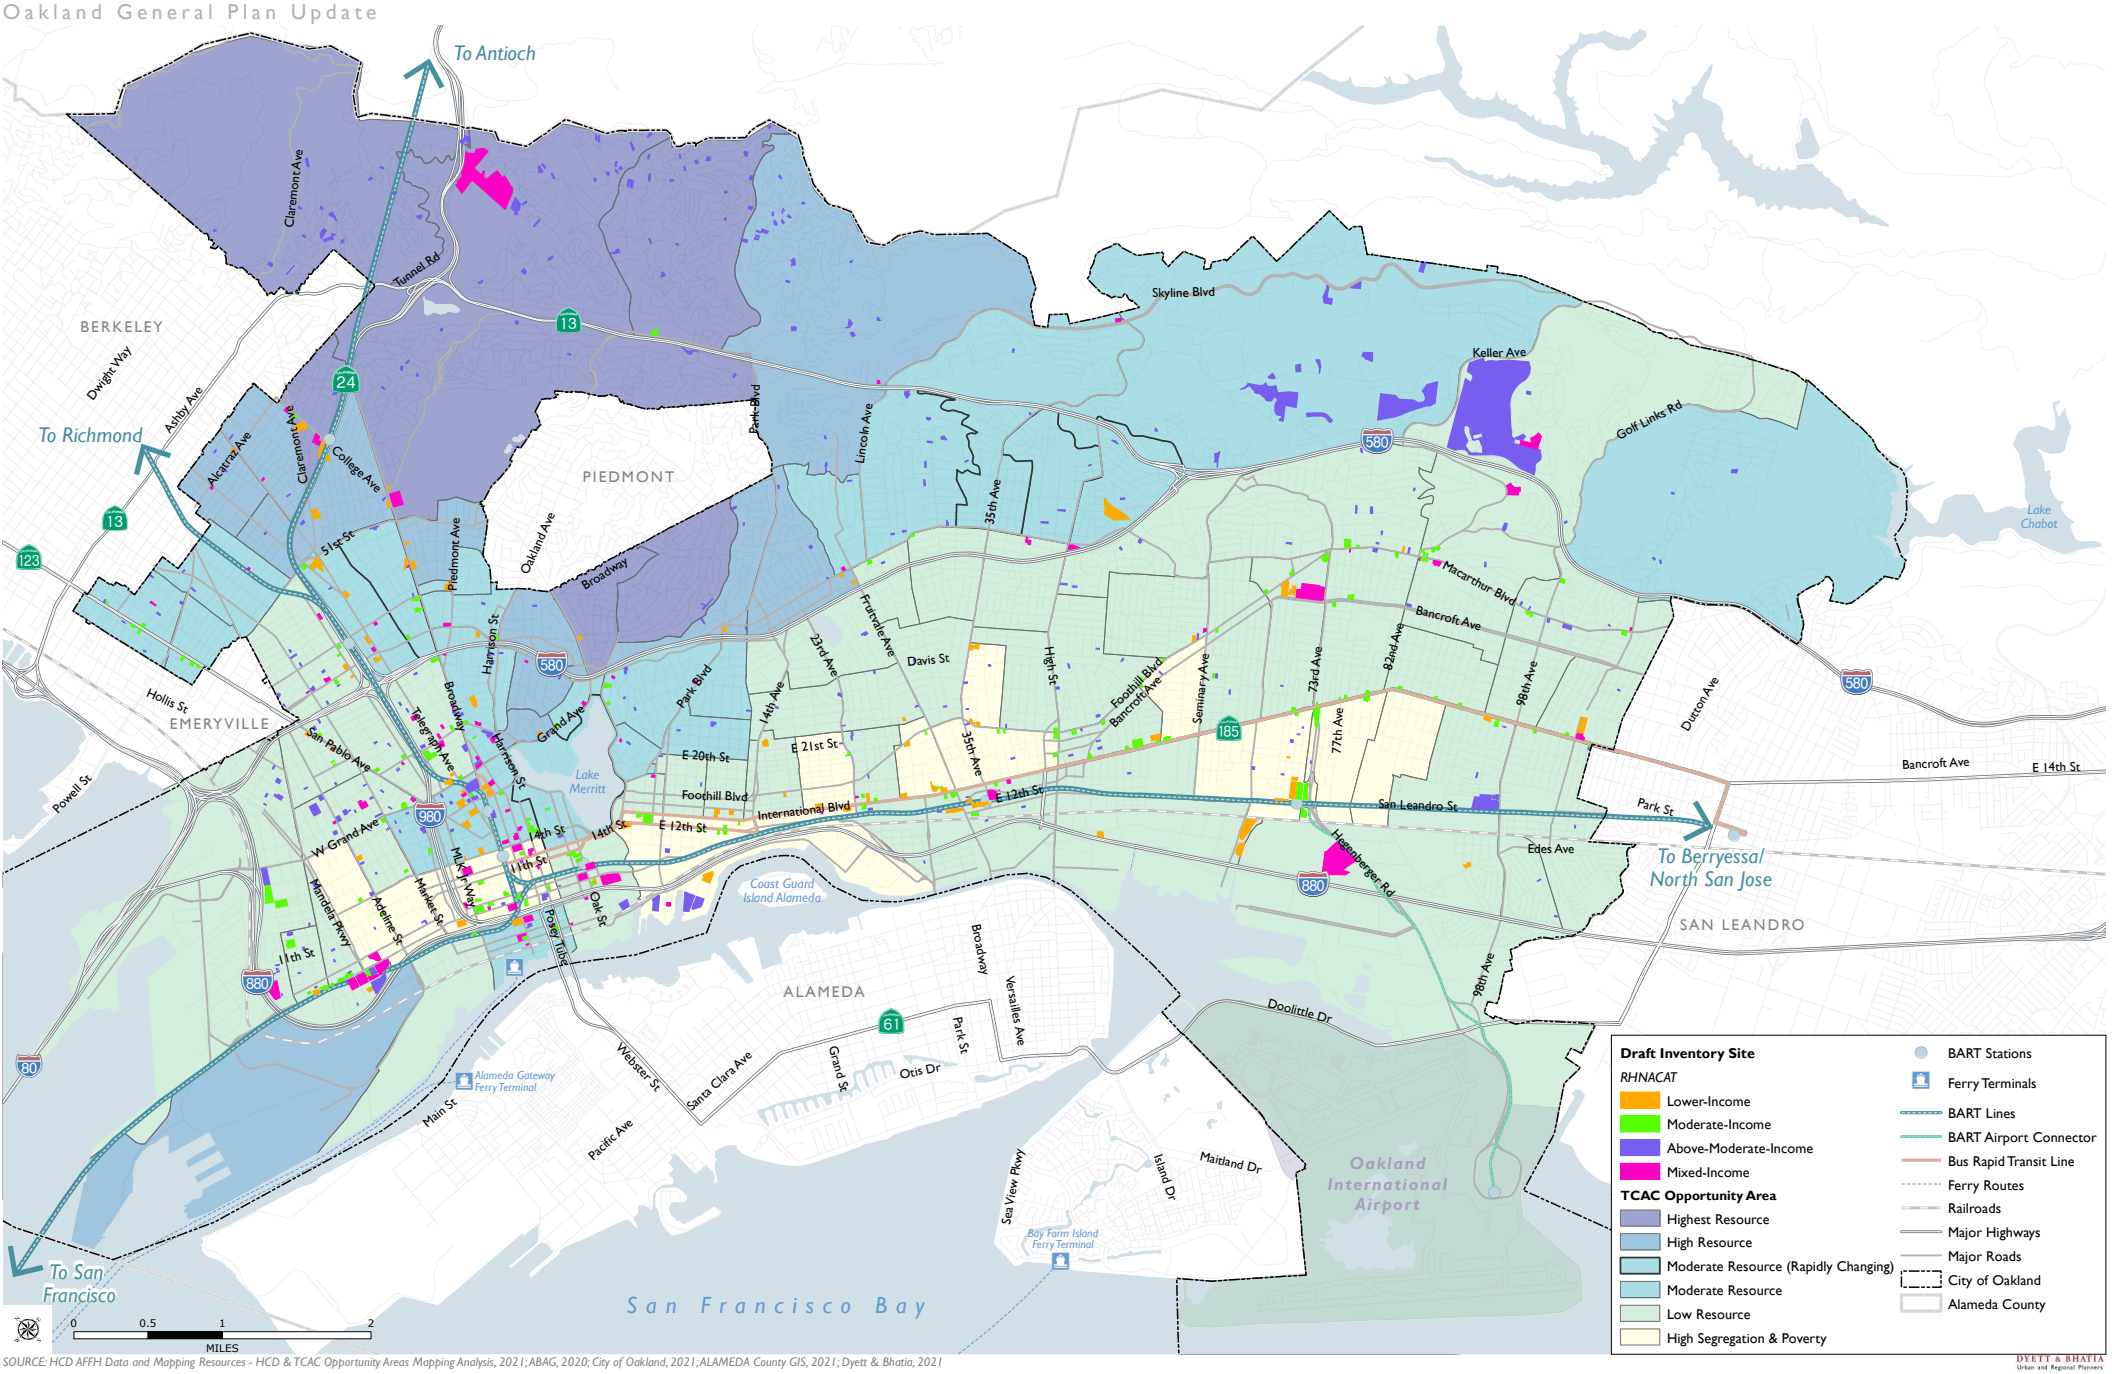
Chart 3-1 summarizes the process of developing the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. Sites were selected in a manner to further and prioritize investment in historically disadvantaged communities, to decrease displacement pressures, and to increase access to existing higher resourced neighborhoods.[4] More information on each of the steps to identify additional sites for lower-income housing is available in Appendix C.

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighbor-hoods to increase opportunity for the existing residents

3 Gov. Code, § 8890.50. subd. (b).

4 To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

Chart 3-1: Housing Sites Inventory Development Process



of those neighborhoods – described further in Appendix D and the Housing Action Plan. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally-specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in lower-income neighborhoods and Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). In parallel with housing development, the City must invest in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—including in-vestments in equitable access to transit, public facilities, food access, and other amenities.

The State and California Fair Housing Task Force use a series of Opportunity maps developed by the Tax Credit Allocation Committee (TCAC) and HCD to define areas of low to high opportunity using a set methodology. These maps, described more fully in Appendix D, indicate that a significant portion of Oakland is considered low resource or high segregation and poverty. As a result, while the RHNA is met for each income category based on pre-established housing sites in the Inventory, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. With the exception of Rockridge BART, which has historically not been available for lower income housing, many of these areas are, in fact, in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines and are suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource.

Most residential capacity at all income levels is located in the low resource and high segregation and poverty areas, largely due to the fact that over 60.0 percent of land in Oakland is considered lower re-source or high segregation and poverty per TCAC's Opportunity Scores. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards, high fire risks, and active pipeline projects. About 70.1 percent of Oak-land's highest resource areas are within a Very High Fire Hazard Severity Zone (VHFHSZ), as are about 25.7 percent of the city's high resource areas. Flooding also represents a risk in these areas (.6 percent in highest resource; 6.8 percent in high resource), as do earthquake fault zones (5.0 percent in highest re-source; 2.2 percent in high resource) – see Appendix C for additional information. It should also be not-ed that ADU projections, which estimate significant numbers of units affordable to lower- and moder-ate-income households, are not included in these estimates. As these units are typically provided in low-er-density and higher resource neighborhoods, they will further increase the proportion of lower-income housing available in these neighborhoods.

Many of these higher resourced neighborhoods currently reflect a historic pattern of exclusionary zoning; to address this, the City is taking action to upzone these areas to further increase housing production ca-pacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods. These reforms would also affirmatively further fair housing by opening up exclusionary neighborhoods, and reducing the exposure to air pollution, toxic and other environmental hazards in environmental justice communities. See Appendix J for more information on these rezoning actions, and Chapter 4: Housing Action Plan for other actions that support affirmatively furthering fair housing. The location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in **Figure 3-2** on the following page.

DYETT & BHATIA
Urban and Regional Planners

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority to ensure that the City meets its requirements to affirmatively further fair housing. Therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in higher resource neighborhoods beyond the preliminary sites inventory – which already met the RHNA in each income category. As discussed in Appendix C, the preliminary sites inventory consisted of active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites without known environmental constraints and near amenities like transit. To identify supplemental sites, the City started with the entire universe of parcels in Oak-land, and filtered out sites based on objective physical constraints and opportunity metrics. More in-formation on these constraints and metrics can be found in Appendix C.

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[5] After completing this exercise, an additional 70 potential sites were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 19 parcels were identified as supplemental sites that would further AFFH objectives. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization, local knowledge of the sites, and aerial images of the current state of the property. Figure C-7 in Appendix C maps the locations of these supplemental "AFFH sites."

An affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies for historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.

These actions, as outlined in the Housing Action Plan (Chapter 4) will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the difficultly associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call that neighborhood home.

5 A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

04 HOUSING ACTION PLAN

4.1 Goals, Policies, and Actions

4. Housing Action Plan

4.1 Goals, Policies, and Actions

The 2023-2031 Housing Element identifies a foundational framework of five overarching goals to comprehensively address the housing crisis and needs of Oaklanders and to affirmatively further fair housing.

- Reduce racial segregation and disparities in housing opportunities and outcomes
- Replace segregated living patterns with truly integrated and balanced living patterns
- Transform racially and ethnically concentrated areas of poverty into areas of opportunity, foster and maintain compliance with civil rights, and affirmatively further fair housing.

The five goals are:

Goal 1: **Protect Oakland Residents from Displacement and Prevent Homelessness**

Goal 2: **Preserve and Improve Existing Housing Stock**

Goal 3: **Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities**

Goal 4: **Address Homelessness and Expand Resources for the Unhoused**

Goal 5: **Promote Neighborhood Stability and Health**

While these five goals provide an overall framework for addressing the multifaceted housing crisis, the policies and actions described in this chapter specify the means for implementing those goals. Actions include both programs currently in operation as well as **new actions** needed to address the city's housing needs.

In addition, the City seeks to combat entrenched patterns of segregation by ensuring its laws, programs, and activities affirmatively further fair housing. This means taking specific actions targeted at overcoming patterns of segregation, fostering inclusive communities free from barriers that restrict access to opportunity and housing, and closing the gap between market-rate & affordable housing by prioritizing preservation and development of housing for those of the greatest need, including Black & Brown households. Each goal below includes a statement of how the programs and actions supporting that goal will help affirmatively further fair housing including but not limited to the promotion of equal access to housing for low -income households. An assessment of patterns of segregation in Oakland can be found in Appendix D Assessment of Fair Housing.

In order to provide more immediate housing solutions and stability for existing tenants and unsheltered residents, the City's Housing and Community Development Department (Oakland HCD) has established a balanced approach to investing its available resources, with 25 percent of available resources to rehabilitation/preservation of existing deed-restricted affordable housing,

25 percent to acquisition and conversion of unsubsidized affordable housing opportunities, and 50 percent dedicated to the new construction of affordable housing with a required homeless set-aside. These funding priorities are outlined in HCD's Strategic Action Plan (2021-2023), found here: https://cao-94612.s3.amazonaws.com/documents/HCD.final.21-21Strategic-Plan.pdf.

The City's Notices of Funding Availability (NOFA) and Request for Proposal (RFP) processes are key for how the City supports many of the goals outlined below. NOFAs and RFPs released by the HCD are competitive application processes for awarding City of Oakland funds for the development of affordable housing. Currently, HCD has three NOFA programs: 1. Acquisition and Conversion to Affordable Housing (ACAH), 2. New Construction of Multifamily Housing, and 3. Acquisition, Rehabilitation, and Preservation of Multifamily Affordable Housing. When funding is available, NOFA are released under the three programs to issue funds for affordable housing projects, which are then reviewed for feasibility and scored based on criteria in each NOFA. Based on ranking, projects are recommended for funding to the Oakland City Council. NOFA scoring is guided by the values centered on advancing racial equity and to prioritize assisting housing projects where the tenants are at risk of displacement and that target assistance towards extremely low income households. In recent years, the City has also implemented its Homekey Program, which uses State Homekey funds to expand housing for people experiencing homelessness or at risk of homelessness. The City chooses Homekey partners via an RFP process seeking proposals for the rapid acquisition and operation of homeless housing.

Goal 1. Protect Oakland Residents from Displacement and Prevent Homelessness

The San Francisco Bay Area is decades into an extreme housing crisis, and Oakland is at the center of that crisis. Housing production, and particularly affordable housing production, has not kept pace with the region's economic growth. Because Oakland's rental and housing market has traditionally been less expensive than other Bay Area cities, Oakland residents experience disproportionately high displacement pressure. As a result, many Oakland residents cannot afford to buy or rent a home within their own neighborhood.[1] As households displaced from more expensive Bay Area communities search for more affordable housing options in Oakland and higher-income households continue to move into the city, Oakland's existing residents continue to bear the brunt of the Bay Area's housing crisis.[2] Community investment, including building new housing, is crucial for all Oakland neighborhoods to prevent

1 Policy Link, "A Roadmap Toward Equity: Housing Solutions for Oakland, California." 2015.

2 Urban Displacement Project, "Mapping Displacement, Gentrification, and Exclusion in the San Francisco Bay Area." 2018. Available at https://www.urbandisplacement.org/maps/sf-bay-area-gentrification-and-displacement/.

displacement.[3] With demand outpacing the limited housing supply, competition for finite units and the resulting rising rents creates displacement pressure on low-income residents. Research by the Changing Cities Research Lab at Stanford University and the Federal Reserve Bank of San Francisco on credit score data shows that lower income residents who move from historically Black neighborhoods tend to move to neighborhoods with lower housing values and health scores, suggesting movement under constrained circumstances; over time, fewer of these low-income movers stayed within Oakland or moved into Oakland as affordable options declined. Rising rents are a factor in increasing rates of homelessness. According to the 2022 Alameda County Point in Time Count, 25 percent of unsheltered Oakland residents report that rent increases were a primary cause of homelessness, in addition to job loss (22 percent) and other money issues (13 percent).

Oakland is committed to enabling renters and owners to stay in their homes and communities, eliminating all involuntary moves out of the city. Goals and policies that are part of a comprehensive protection strategy are designed to prevent displacement and homelessness, and to ensure that low-income renters and homeowners have supports they need to stay in their homes and communities as increased neighborhood investment occurs.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

To meet the City's equity goals and mandate to affirmatively further fair housing, this goal of protecting Oakland residents from displacement and preventing homelessness —including the policies and actions contained within—will advance the City's commitment to reducing racial and economic disparities across Oakland. This goal seeks to protect Oakland renters and owners from displacement pressures and prevent homelessness, both of which disproportionately impact Black, Indigenous, and People of Color (BIPOC) communities throughout Oakland. For example, enhanced tenant protections will crack down on tenant-based racial discrimination in the housing market. This will be particularly important as the eviction moratorium established during the COVID-19 pandemic eventually comes to an end and as further pressure is exerted on the residential rental market.

Rent stabilization and just cause protections also ensure that as more amenities are added to a neighborhood (and it becomes higher resource), the existing residents from diverse backgrounds are able to stay. Residents of historically disinvested neighborhoods should be able to remain in their homes and enjoy the results of improved amenities and increased services. In the long-term, this will enhance access to opportunity for historically marginalized and disadvantaged communities. By pursuing live/work preferences for Oakland residents and taking actions to assist tenants at risk of eviction, Oakland helps tenants avoid displacement or concentration in disadvantaged neighborhoods.

3 *Office of Policy Development and Research, U.S. Department of Housing and Urban Development, "Displacement of Lower-Income Families in Urban Areas Report." May 2018. Available at https://www.huduser.gov/portal/sites/default/files/pdf/DisplacementReport.pdf.*

Through more robust data collection efforts, the City will also be able to better identify and correct barriers to opportunity. These efforts include the creation of a rental registry and other displacement measure tracking. More accurate data will also help the City to better target its existing and future housing resources for maximum impact.

POLICY 1.1. TENANT PROTECTIONS AND ANTI-DISPLACEMENT

Action 1.1.1: Continue to Implement the Rent Adjustment Ordinance.

The Oakland Rent Adjustment Ordinance (Chapter 8.22, Article I of the Oakland Municipal Code) limits rent increases on covered units (most units built before 1983) based on a formula tied to increases in the Consumer Price Index. In 2022, the City Council adopted an amendment to change the formula used to calculate the annual allowable rent increase to 60 percent of the change in CPI, or 3 percent, whichever is lower. The Rent Adjustment Program (RAP), a division of Oakland Department of Housing and Community Development, will continue to enforce the Rent Adjustment Ordinance.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Revisions to formula to calculate allowable rent increase completed in 2022. Implementation ongoing, 2023-2031.

Objective: All tenant rights and protections under applicable City law will be enforced.

Action 1.1.2: Enforce Just Cause for Eviction measures.

Just Cause for Eviction protections are enforced by the Rent Adjustment Program (RAP) and are contained within Chapter 8.22, Article II of the Oakland Municipal Code. In 2022, the City Council voted to place on the November 2022 ballot an expansion of the Just Cause for Eviction ordinance. In particular, the ballot measures asks: Shall the Measure amending the Just Cause for Eviction Ordinance to: (1) prohibit no-fault evictions of children and educators during the school year; (2) extend eviction protections to tenants in recreational vehicles (RVs), tiny homes on wheels, and newly constructed units except during the first 10 years after issuance of the certificate of occupancy; (3) remove failure to sign a new lease as grounds for eviction; and (4) make other clarifying amendments, be adopted? The City will continue to enforce just cause measures, undertake efforts to ensure the public is aware of revisions if enacted by the voters, and expand tenant protections as feasible—including identifying additional limitations to just causes.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Ongoing, 2023-2031

Objective: All tenant rights and protections under applicable City and State law will be enforced.

Action 1.1.3: Enforce and Strengthen Ellis Act protections.

The Ellis Act is a statewide law that permits property owners to terminate tenancy when withdrawing residential units from the rental market. Although the City cannot prohibit Ellis Act evictions, it has adopted the Ellis Act Ordinance (Chapter 8.22, Article III of the Oakland Municipal Code) to set specific requirements that must be followed when removing a property to discourage violations of the Act and prevent the displacement of renters. This includes filing withdrawal notices with the Oakland Rent Adjustment Program, and the provision of relocation assistance. Recent efforts to reform or repeal the Ellis Act at the State level have gained significant traction but have not to date been successful. The City has supported those efforts—for example, see City Resolution

No. 88571 C.M.S. in support of Assembly Bill 854 (Lee) that would have prohibited a rental housing owner from removing a building from the market pursuant to the Ellis Act unless all owners of the property have held their ownership interest for at least five years. The City continues to hold that reform is necessary to reduce speculator abuse and protect tenants. The City will join neighboring Bay Area cities to advocate for statewide reform to the Ellis Act to stabilize rental housing.

Furthermore, the City's requirements when removing a property through the Ellis Act Ordinance are bolstered by protections under the City's Just Cause for Eviction Ordinance (see Action 1.1.2 above) and Relocation Ordinance (Action 1.1.4 below). The City's newly implemented rental registry (2022) will also help the City monitor Ellis Act-related eviction cases.

The City will continue to enforce the Ellis Act Ordinance and, based on any changes allowed by statewide reform, explore ways to strengthen renter protections—including proactive enforcement of eviction protections—in case of an Ellis Act eviction where feasible.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Ellis Act Ordinance Protections are ongoing, 2023-2031; staff will continue to process Ellis findings, which have averaged 25 annually over the past four years, and will continuously seek ways to improve efforts to inform owners and tenants of their rights and obligations under the Ellis Act through robust outreach and counseling. Furthermore, the rental registry will be required as of July 1, 2023 and monitored thereafter. Lastly, the City will engage its legislative lobbyists annually and submit a support letter to the State annually to continue Statewide advocacy efforts.

Objective: All tenant rights and protections under applicable City and State law will be enforced, and the City will continue to seek ways to improve tenant protections under the related ordinances.

Action 1.1.4: Implement tenant relocation measures.

On January 16, 2018, the City of Oakland passed the Uniform Residential Tenant Relocation Ordinance (Ord. No. 13468) to establish a uniform schedule of relocation payments which are now extended to tenants evicted when the owner or qualifying relative moves in and for other "no tenant fault" evictions. The Uniform Relocation Ordinance (Ord. No. 13468) requires owners to provide relocation payments to tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act activity, and condominium conversions. The City will continue to implement and enforce the Ordinance, adjusting base payments for inflation annually on July 1st. Additional relocation payments shall be required for tenant households in rental units that include lower-income, elderly or disabled tenants, and/or minor children.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Ongoing, 2023-2031

Objective: All tenant rights and protections under applicable City and State law will be enforced.

Action 1.1.5: Implement a right to counsel in Rent Adjustment Program proceedings.

The City will implement a tenant right to counsel in Rent Adjustment Program (RAP) proceedings, where qualified tenants who participate in RAP hearings have right to free legal representation within the funding availability restrictions. This includes partnering with nonprofit organizations to provide those services.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: In October, 2022 Council approved a service provider contract to provide legal representation during RAP proceedings beginning in providing representation services in Fall 2022.

Objective: Resources permitting, all tenants participating in RAP proceedings will have access to legal representation to prevent displacement by preventing unlawful rent increases. (see Action 1.1.6 below).

Action 1.1.6: Enhance housing related legal services

As funding becomes available, the City will increase housing related legal services, including eviction defense services and legal counseling through community partners. Housing Related legal services will help address displacement risks, eviction defense, and housing instability through legal representation, consultation, and education.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Local, State or federal sources as available, and Annual Rent Adjustment Fee

Timeframe: In July 2022 Council approved a direct grant to a consortium of nonprofit legal service providers to continue eviction protection and other legal services. Other tenant legal service contracts are administered through the Rent Adjustment Program. Staff will continue to seek funding to ensure services will be ongoing.

Objective: Resources permitting, all at risk tenants may seek free legal services from external partners to prevent evictions and housing instability.

Action 1.1.7: Expand the City's ability to enforce rent control to maintain affordability.

Rent control measures are outlined in Oakland's Rent Adjustment Ordinance and enforced through the Rent Adjustment Program (RAP). Currently, residential rental units are covered by the Rent Adjustment Ordinance if they are within a building built prior to 1983 and there are two or more units in the building. In addition, the City's new rental registry, approved in 2022, will require property owners to report rent and tenancy information to RAP on an annual basis. This new tool will allow the City to better monitor rent control and will help both tenants and owners understand whether their rents comply with Oakland's Rent Adjustment Ordinance. The City will consider how to expand the number of units subject to rent control to maintain affordability.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Rent control measures are ongoing, 2023-2031. As of July, 1, 2023, the City's rental registry will require owners of these units to report rent and tenancy information to RAP on an annual basis. With this new tool, staff will be able to better monitor rent control measures.

Objective: To the extent permitted by State law, Oakland will use the rental registry to ensure rent control laws are being followed, enabling better renter protections.

Action 1.1.8: Monitor neighborhood displacement risk factors.

As the effects of the COVID-19 pandemic continue to unfold and eviction moratoriums lift, there is an urgent need to monitor displacement pressures. The City will regularly monitor displacement risk factors—including rising housing costs, rapid demographic changes, neighborhood instability, climate risks, and trends around in- and out-migration across neighborhoods in Oakland—to understand local displacement risk. This data will be used to better target anti-displacement programs and prioritize neighborhoods with a high risk of displacement. This data will also be used to better understand the causes of displacement and help tailor City programs to meet existing housing needs. The City will carry out the bi-annual Resident Mini Pulse Survey on the state of housing security as part of these monitoring efforts.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment fee

Timeframe: Ongoing, 2023-2031; conduct Resident Mini Pulse Survey on biannual basis.

Objective: The City of Oakland will include displacement-related statistics in a broader housing or community dashboard available on the City website.

Action 1.1.9: Implement a rental housing registry.

A rental housing registry is a database of rental units within Oakland and will be used to track properties subject to rent control provisions, Just Cause for Eviction measures, and other property-specific policies and requirements. In June 2022, the Oakland City Council adopted Ordinance No. 13695 CMS to establish a rental registry in Oakland. The City will use data collected in the rental housing registry to monitor and understand neighborhood change at a more granular level, to better target anti-displacement policies and ensure that rent increases are compliant under the Rent Adjustment Ordinance.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: Annual Rent Adjustment Fee

Timeframe: Implement the rental registry by 2023, maintain it ongoing, 2023-2031

Objective: By 2023, the City will design and implement a rental housing registry. This registry will cover housing units subject to rent stabilization and/or just cause protections under City law.

Action 1.1.10: City Enforcement of the Tenant Protection Ordinance (TPO).

The TPO (Chapter 8.22, Article V of the Oakland Municipal Code) recognizes tenants' right to live in safe, dignified, harassment-free homes. The TPO deters and makes unlawful harassment by property owners and their agents, including property managers, recognizing that such harassment can frequently force tenants from their homes. The ordinance provides tenants strong legal recourse in the event of such prohibited harassment. On July 21, 2020, the City further amended the TPO to strengthen existing protections and include additional remedies. For example, the amendments established heightened penalties for violations against elderly, disabled, and/or catastrophically ill tenants. The amendments further expanded the ordinance's application to non-profit-owned rental housing and rental units in newly constructed residential properties. City enforcement of the TPO can prevent and remedy violations against tenants, for example by deterring unscrupulous landlords from undertaking "self-help" evictions and securing building and/or citywide relief for tenants. City enforcement therefore is critical to ensuring that Oakland's most marginalized tenants also receive the protections of the TPO.

In October 2020, the Oakland City Attorney launched the Housing Justice Initiative, a housing

enforcement unit specifically dedicated to protecting marginalized Oakland tenants through the enforcement of the TPO and other similar or related local and State laws.

Through the Housing Justice Initiative and the work of the City Attorney's existing Neighborhood Law Corps, the City will continue to expand its enforcement of the TPO.

Responsible Party: Oakland City Attorney

Potential Funding Source: Additional grant sources will be pursued.

Timeframe: Ongoing, 2023-2031

Objective: Tenants' rights and protections under applicable City and State law will be enforced more systematically and on a larger scale over time, with a focus on actions that protect the most marginalized tenants and hold large-scale bad actors to account.

Action 1.1.11: Enforce the tenant right to return and protections from coercive buyouts.

Currently, through the Tenant Move Out Ordinance (Chapter 8.22.700, Article VI of the Oakland Municipal Code), Oakland renters have protections from unfair or coercive buyout agreements. Further, State law (SB 330) requires that property developers provide the right to return to low-income renters when a property is demolished and redeveloped, and that the charged rent must be affordable. The City will continue providing awareness of State and local requirements and will enforce affordability requirements in new development projects. Further, pursuant to Action 2.2.5, the City will extend this right beyond the sunset date of SB 330.

Responsible Party: Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: Legal fees associated with case parties involved

Timeframe: SB 330 rights will be extended by the end of 2024.

Objective: All tenant rights and protections under applicable City and State law will be enforced.

Action 1.1.12: Provide a local preference in affordable housing projects.

Oakland Municipal Code [Chapter 15.63] grants preference in City-assisted affordable housing projects to (1) Oakland residents displaced due to City actions or no-fault evictions, (2) neighborhood residents, and (3) Oakland residents and workers. All three preferences are applied at initial occupancy, to the extent permitted by other funding sources. After initial occupancy, displaced households and Oakland residents and workers continue to receive priority preference for available units. Oakland's Housing and Community Development Department recently updated its findings to support its preferences and ensure that its preferences may be permitted in County-assisted projects. The City will continue its efforts to streamline the process by which these preferences are applied, including through a regional housing portal and a more robust tracking system for displaced households.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: n/a

Timeframe: Ongoing, 2023-2031. While the ability of the City to require its projects to participate in a regional application portal depends in part on the readiness of such portals, the City currently attends regular meetings around the design of a regional portal. The City intends to identify a suitable application portal to partner with by the end of 2024.

Objective: The City will continue to apply local preferences in City-assisted affordable housing to the extent allowed by law and the constraints of other involved funding sources. The City will continue to identify ways to streamline the administration of its preferences, including through a regional housing portal and a more robust tracking system for displaced households.

Action 1.1.13: Negotiate for appropriate community benefits during development agreement approvals for major entitlements and use of City land.

While negotiating development agreements with developers for large scale market-rate and non-residential projects on City land or development agreements requiring complex, multi-phase entitlements, the City will advocate for establishing an appropriate set of standardized community benefits to mitigate any displacement pressures that result from the development. This may include increased levels of required affordable housing units. The City will consult with community-based organizations and residents impacted by developments to evaluate the extent of community benefits required to properly mitigate displacement impacts.

Responsible Party: Oakland Planning & Building Department, Oakland Department of Housing and Community Development; Economic and Workforce Development Department

Potential Funding Source: Permit fees

Timeframe: Ongoing, 2023-2031

Objective: Significantly reduce displacement pressures through negotiating appropriate community benefits during the development agreements process.

Action 1.1.14: Protect Oakland residents from displacement and becoming homeless.

Keep Oakland Housed, the Shallow Subsidy Pilot (public-private partnerships), Oakland Housing Secure, and the federally funded Emergency Rental Assistance Program (ERAP) are programs that currently help prevent renters from becoming homeless through rental assistance, legal advice, housing counseling, and/or case management. Through these programs, a diverse and vibrant network of providers has been created that work together to provide individualized services to Oakland tenants.

The City will support and align City, Alameda County, and private partners (such as community-based and faith-based organizations that have roots in communities whose members are disproportionately at risk of homelessness) to strengthen their capacity to prevent displacement and respond effectively when people are experiencing a housing crisis. The City will also expand these types of programs and design new ones that identify, assist, and prioritize funding for those who are most at risk of becoming homeless. In addition, the City will continue to make information about tenant protection, anti-displacement, rental assistance, and homelessness services available on the City's website and at City facilities and strive to improve public awareness of these programs. These efforts are especially key in the wake of the COVID-19 crisis and the eventual end of the eviction moratorium. Additional tenant protection actions are included in Actions 1.1.1-1.1.10.

Responsible Party: Oakland Housing and Community Development Department

Potential Funding Source: Federal ERAP funds, private contributions, other local, State, and federal resources as available

Timeframe: Continue implementation of the ERAP program 2022-2023, and The City of Oakland to issue a Request for Proposals and award a contract to a homeless prevention program provider(s) by mid 2023.

Objective: The City of Oakland will continue to implement a homeless prevention program that includes emergency financial assistance, legal support and wrap around services. The program will be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program.

Goal 2. Preserve and Improve Existing Affordable Housing Stock

Oakland's existing affordable housing stock is an important resource for the city's lower- and moderate-income population. Housing preservation means retaining existing built affordable housing and extending its affordability for current and future tenants. Preventing the loss of valuable existing affordable housing units is a cost-effective way of maintaining this resource as well as keeping existing residents who may be more vulnerable to increasing cost pressures in their homes.

Oakland has numerous preservation policies in place already, including rehabilitation programs for low-income homeowners, demolition and condo conversion restrictions, resale controls to preserve affordability, and regular inspections of City-assisted affordable housing stock. A primary task of City staff will be to enforce and maintain these policies over the coming cycle. In addition, the City has identified areas where it may seek to expand preservation strategies, such as through a proactive inspection program for non-restricted housing stock, environmental remediation programs, and policies to facilitate acquisition of properties by tenants and mission-driven nonprofits. These strategies are described below.

Preservation, improvement, and maintenance also have health and equity co-benefits—addressing housing habitability issues can help to narrow inequitable racial and ethnic gaps in substandard housing conditions and reduce the burden of maintenance challenges for lower-income homeowners. This goal includes policies and actions that conserve and improve existing housing stock.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

This goal sets forth several policies and actions that will advance fair housing in Oakland though actions that physically rehabilitate housing units, reduce displacement by deepening and/or extending affordability, and ensure Oakland residents are able to remain in their communities and enjoy new amenities and benefits. Physical rehabilitation of housing also improves the environmental determinants of health, thereby advancing the City's Environmental Justice goals. As discussed in Appendices B and D, BIPOC residents of Oakland are disproportionately impacted by substandard housing issues. Actions contained within this goal will reduce the prevalence of these substandard housing issues citywide. Universal design strategies will also increase housing access for seniors and people with disabilities.

Actions that preserve the affordability of existing homes play a key role in preventing displacement and allowing lower-income and BIPOC tenants to remain in place despite the displacement pressures in their neighborhoods. These actions range from resale controls to demolition and

conversion protections. A Community Opportunity to Purchase/Tenant Opportunity to Purchase Act, if adopted, would allow for tenants to access the wealth building and stability benefits of homeownership. Historic preservation actions also preserve cultural institutions and history that would otherwise be at risk of loss due to gentrification.

POLICY 2.1 EXISTING HOUSING STOCK IMPROVEMENT

Action 2.1.1: Support home rehabilitation programs.

The City will expand housing rehabilitation assistance to very low- and low-income homeowners to address code violations, repair major building systems in danger of failure, abate lead-based paint hazards, conduct minor home repairs for seniors, and perform or fund emergency repairs. Per the Council-adopted target of 100 percent building electrification by 2040 (Equitable Climate Action Plan (ECAP) Action B-2) and energy resilience for all (ECAP Action A-2), the City will pursue resources to integrate holistic building electrification, onsite renewable energy, and energy storage into these programs where possible, and combining building electrification improvements with other improvements for health, safety, and livability. Per the ECAP, electrification refers to the replacement of methane (aka "natural") gas systems and appliances with efficient, effective, all-electric alternatives, such as heat pumps or induction cooking. Electrification is intended to be permanent: to meet the Council's 2040 target, buildings switching away from gas to efficient electric systems and appliances should not later add gas infrastructure or appliances. Some of the programs currently operated by the City of Oakland or its partners include:

- Home Maintenance & Improvement Program (HMIP) Deferred Loan Program
- Emergency Home Repair Program Loan Program
- Alameda County Minor Home Repair Grant Program
- Lead Hazard Control and Paint Program
- Access Improvement Program
- Oakland CalHome ADU/JADU Loan Program
- Bay Area Regional Energy Network's HomePlus Program and Home Energy Advisor
- TECH Clean California
- California Energy Smart Homes
- Low Income Weatherization Program

The City will engage local partners and fair housing experts to help promote awareness of, and broad participation in, these programs. The City will continue to implement, annually review, and revise, as needed, program guidelines for housing rehabilitation assistance. The City will target resources, as available, to expand opportunities throughout the community, including in lower-income and lower resource areas. The City will also strive to build community capacity and technical know-how by connecting homeowners with local labor to carry out home rehabilitation projects. This assistance will be particularly targeted to neighborhoods experiencing or at severe risk of displacement and gentrification. The City will also commit to explore additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's homeowner rehabilitation programs.

Responsible Party: Oakland Department of Housing and Community Development, Residential Lending Division

Potential Funding Source: Community Development Block Grants and potentially other funding sources as available

Timeline: The City of Oakland Department of Housing and Community Development will continue to accept applications for and serve residents through its established low-income

homeowner rehab programs and facilitate access to other resources on an annual basis. The City will also pursue additional funding sources for rehabilitation work beyond limited CDBG funds, which provides funding for many of Oakland HCD's programs. The timing on pursuit of these additional funding sources depends on when such opportunities are available, as State funding streams for home rehabilitation/electrification are unpredictable or trade off with other Housing Element priorities (for example, the CalHome program could fund rehabilitation, but that would potentially mean applying for less money for down payment homebuyer assistance which has no other dedicated funding).

Objective: As funding is available, the City of Oakland will continue to fund and operate home rehabilitation programs. At current funding trends, this will allow for approximately 80 rehabilitation projects each year.

Action 2.1.2: Promote healthy homes and lead-safe housing.

The City will continue, and seek resources to expand, implementation of the Lead-Safe Homes Program to assist low- and moderate-income homeowners with lead paint identification and remediation, prioritizing resources for disadvantaged communities with high rates of asthma. The City will also continue to partner with the Alameda County Community Development Agency's Healthy Homes Department to provide education, lead-safety skills training, and on-site consultations for Oakland property owners and conduct lead poisoning prevention and asthma trigger interventions for Oakland residents. In accordance with Oakland's 2030 Equitable Climate Action Plan, the City will encourage the transition away from natural gas appliances, which has been proven to increase development of asthma in children by 24 percent and which increases risks of fire and explosions. The City will seek resources to integrate electrification, lead abatement, and home rehabilitation activities in order to maximize public health and housing security benefits for frontline Oaklanders. The City will also seek resources and inter-agency partnerships to monitor public health impacts of new programing and requirements.

Responsible Party: Oakland Department of Housing and Community Development, Residential Lending Division; Sustainability and Resilience Division, City Administrator's Office

Potential Funding Source: Community Development Block Grants and potentially other funding sources as available

Timeline: Ongoing throughout the 2023-2031 period and beyond

Objective: As funding becomes available, the City of Oakland will implement programs to reduce health hazards from lead and natural gas appliances.

Action 2.1.3: Conduct proactive rental inspections.

The City is adopting a proactive, data-driven housing inspection program for City Council's approval in early 2023 to improve housing habitability conditions among the City's rental stock. Covered rental units will be inspected on a regular basis at designated intervals thereby reducing the likelihood of deterioration and escalation to substandard housing conditions by identifying and targeting exterior and interior code violation early on. The City will continue to monitor and inspect properties in response to a complaint driven process from the public on habitability and blight condition. The City will work with community partners to develop appropriate enforcement mechanisms, including tenant protection and anti-displacement mechanisms to ensure tenants are not displaced as a result of proactive inspections turning up housing habitability issues and/or raising rents due to the cost of fixing habitability issues. Further, the City will prioritize inspections in areas with older housing stock and health disparities and seek funding to streamline the inspection/rehabilitation process

by connecting property-owners to technical and financial assistance for safety and accessibility improvements at the time of inspection. Guidelines are being developed to identify issues that may qualify as delay of enforcement actions to provide property-owners with sufficient time to complete the needed repairs, thereby mitigating displacement of existing tenants and preserving affordability.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: Permit fees

Timeline: 2023

Objective: The City will develop a proactive rental inspections program to significantly improve housing safety and quality and address housing needs, particularly in areas with older housing stock and communities experiencing health disparities.

Action 2.1.4: Support historic preservation and rehabilitation.

The City will support the preservation and rehabilitation of both the existing historic housing stock and adaptively reused non-residential structures through a variety of strategies, including continued implementation of Mills Act Contracts and the Oakland Community Buying Program. The City will support the preservation of historic, archaeological, and tribal cultural resources and their incorporation into project site planning where feasible. As described in Action 3.2.3, the City will also promote adaptive reuse to promote historic preservation.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees

Timeline: Ongoing, 2023-2031

Objective: The City will continue to implement the Mills Act and the Oakland Community Buying Program to support to help support historic preservation.

Action 2.1.5: Implement universal design strategies.

The City will initiate community engagement to understand the need for universal design strategies, including with seniors, people experiencing disabilities, and community-based organizations with insight and experience with accessibility issues. The City will consider the adoption of a Universal Design Ordinance, which would help close loopholes, ensure good faith compliance of Americans with Disability Act provisions, ensure that accommodations are built into new developments, and allow Oaklanders to age in place.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees

Timeline: 2025-2027

Objective: The City will consider adopting a Universal Design Ordinance to address housing needs and improve housing conditions for seniors, people experiencing disabilities, and other communities with accessibility issues.

Action 2.1.6: Increase funding for improved indoor air quality.

The City will seek State, Federal, and other funding sources to provide financial assistance to property owners and very low- and low-income homeowners to offset some of the cost of investing in better ventilation, air filtration systems (e.g., MERV filter systems), and efficient electrification to improve indoor air quality in existing single- and multifamily residential units, with a priority for homes in high air pollution areas such as near freeways. The City will adopt and implement an Existing Building Electrification Roadmap, using an equity-centered approach to transition all homes away from methane (aka “natural”) gas systems by 2040. The Roadmap will specify policy strategies, necessary incentives and safety nets, and other steps to avoid increasing housing displacement or energy insecurity in the electrification transition.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office

Potential Funding Source: State funding such as Technology and Equipment for Clean Heating Initiative, Building Initiative for Low-Emissions Development, and California utility repayment funding. Federal funding is available through the Inflation Reduction Act. Additional sources of funding could include CEQA mitigation funds, philanthropic sources, and other public-private partnerships.

Timeline: Identify funding by 2026; bring Existing Building Electrification Roadmap to Council for adoption by end of July 2023

Objective: Significantly improve indoor air quality and address housing need in existing single- and multifamily residential buildings.

POLICY 2.2 PRESERVE THE AFFORDABILITY OF EXISTING HOMES

Action 2.2.1: Continue to implement resale controls on assisted housing.

The City will continue to use financing agreements for both City-assisted ownership and rental development projects to ensure that units remain permanently affordable through covenants running with the land.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds

Timeframe: Ongoing, 2023-2031

Objectives: 100 percent of City-assisted homeownership and rental units will have their affordability covenants effectively enforced.

Action 2.2.2: Enforce, monitor, and preserve affordable housing covenants with an emphasis on "at-risk" units.

The City will proactively monitor and enforce affordable housing covenants and will conduct outreach to the owners of assisted units that are at risk of conversion to market-rate housing. The City will prioritize the preservation of units at some level of risk of converting in the next 10 years by actively working with and encouraging the owners of those properties to extend their covenants. Pursuant to law, the City will also engage in required noticing, tenant education, and coordinating with qualified entities.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: HOME, HUD, CALHFA, County, misc. State/Federal housing programs, AHP private funds

Timeframe: Program monitoring and enforcement of this program is ongoing, 2023-2031. Furthermore, the City has issued Preservation and

Rehabilitation NOFAs on a periodic basis, per funding availability to capture existing affordable units at-risk of conversion to market-rate, and perform rehabilitation work on properties in exchange for extending the term of affordability restrictions. Recent NOFA under this program were released in 2017 ($9.5M) and 2019 ($11M), and the next NOFA release is anticipated in 2023. The City is aiming for approximately $10M in this round, but will likely bolster that amount with the 2022 Bond Measure funding for affordable housing and infrastructure approved by voters.).

Objectives: As funding becomes available, deed-restricted affordable housing units at risk of losing their affordability will be protected from a loss of affordability protections through extensions of regulatory agreements, and deepening of affordability levels when possible. Currently the City's policy is to allocate approximately 25 percent of available local funding towards Preservation and Rehabilitation NOFA, and future funds will be allocated contingent upon availability.

Action 2.2.3: Enforce residential demolition and conversion restrictions for residential hotels.

Residential hotels, also referred to as single-room occupancy (SRO) units, provide an important source of naturally occurring, deeply affordable housing in City. As such, Oakland has enacted regulations to limit the demolition, conversion, and rehabilitation to charge higher rents of existing residential hotel units. The City has recently amended these regulations (Chapter 17.153 of the Oakland Planning Code) to strengthen protections for residential hotels and will continue to enforce these protections to preserve their affordability.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Ongoing, 2023-2031

Objectives: Continue to enforce Single-Room Occupancy (SRO) regulations to preserve affordability and meet housing needs.

Action 2.2.4: Limit condominium conversions.

The conversion of rental housing to condominiums provides a risk to the affordability of Oakland's housing stock. The City recently amended its condominium conversion regulations to require replacement rental housing for the conversion of two or more housing units, to remove the provision allowing the generation of conversion rights when the units are offered as rental units for seven or more years, to acknowledge the applicability of the Oakland Just Cause for Eviction Ordinance and the Oakland Rent Adjustment Ordinance, and to afford greater rights and protections to existing tenants. The City will strictly enforce these recently adopted regulations to preserve Oakland's rental housing supply.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: Permit fees

Timeframe: Ongoing, 2023-2031

Objectives: Continue to enforce condominium conversion regulations to preserve rental housing supply and prevent displacement.

Action 2.2.5: Extend local replacement unit provisions.

State law (SB 330) mandates that "protected units" are replaced with comparably affordable units when a residential building is demolished and redeveloped. The City will codify and extend replacement provisions pursuant to State law beyond the established sunset date. The City will require that developers notify existing and prospective tenants of their tenant rights as provided both under SB 330 as well as Oakland's Just Cause for Eviction Notice. The City will require developers to comply with applicable tenant right to refusal provisions. Further, the City will

engage in strict monitoring and enforcement of the law to ensure replacement units are provided. This will include active outreach to developers to ensure they are aware of and comply with replacement unit provisions, and the maintenance of a displaced tenant database. The City will require that any demolition proposals include sufficient relocation assistance and right to return to the new replacement units.

Responsible Party: Oakland Planning & Building Department; Oakland Department of Housing and Community Development

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Enforcement of SB 330 requirements: Ongoing, 2023-2031. Adoption of Requirements above SB 330: 2024.

Objectives: Codify and extend local replacement unit provisions to ensure compliance and prevent displacement.

Action 2.2.6: Reduce short-term home purchases/sales (i.e., "house flipping") to ensure affordability and prevent displacement.

The practice of "house flipping," —acquiring properties, making superficial improvements, and quickly reselling at a higher price—can cause housing costs to increase, leading to higher rates of displacement and increased exclusivity in higher resource neighborhoods. To curb the negative effects of speculation, the City will consider implementing an anti-speculation tax, which would apply a fee when a property is sold shortly after purchase. The City will conduct a market study to understand the potential impacts of such a tax and its appropriateness within Oakland. As discussed in Action 2.2.8, the City will also explore a possible Tenant Opportunity to Purchase/Community Opportunity to Purchase Act.

Responsible Party: Oakland Department of Finance

Potential Funding Source: General Plan Surcharge for the study; self-funding, if implemented

Timeframe: 2026

Objectives: Study the root causes of unaffordability and displacement and consider possible taxes to prevent displacement and maintain affordability. Looking specifically at the cost to rehabilitate a home and incentivizing the market to maintain neighborhood level affordability through tax incentive or disincentive.

Action 2.2.7: Provide additional subsidy for residential hotels.

The City will consider allowing owners of residential hotels that agree to restrict occupancy to lower-income residents to transfer development rights to create an endowed source of funding for an internal subsidy for such residents, or for maintenance/facility upgrades that do not increase rents.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: 2025-2027

Objectives: Preserve SROs and meet housing need.

Action 2.2.8: Investigate a Tenant/ Community Opportunity to Purchase Act.

A Tenant/Community Opportunity to Purchase Act, referred to as TOPA/COPA, gives tenants and nonprofit organizations the opportunity to purchase their home when it goes up for sale, thereby preserving that housing unit as affordable. TOPA/COPA policies are under development in multiple Bay Area cities, including Oakland, the neighboring City of Berkeley, East Palo Alto, and San Jose. The City will study the effectiveness of a TOPA/COPA model suited to local conditions, which may include equity-building mechanisms, funding needs and sources, racial equity impact considerations, or other approaches that may be appropriate to Oakland. Enactment of a TOPA/COPA policy would require City Council review and approval.

Responsible Agency: City Council; Oakland Department of Housing and Community Development

Potential Funding Source: Impact fees, General Fund, infrastructure bond funds, HOME, CDBG, and other local, State, and federal funding as available

Timeline: Investigate a TOPA/COPA policy and present findings to Oakland City Council for discussion by Fiscal Year 2025. If adopted, implementation will occur at maximum two years after the date of adoption.

Objective: Oakland will study by FY2025, and if appropriate, implement a TOPA/COPA policy by 2027 at the latest.

Goal 3. Close the Gap Between Affordable and Market-Rate Housing Production by Expanding Affordable Housing Opportunities

To address Oakland's ongoing housing crisis, key strategies should focus on closing the gap between market-rate and affordable housing production by prioritizing the preservation of existing housing and developing high-quality and abundant affordable housing for those of the greatest need, including Black, Indigenous, and other People of Color (BIPOC) households.

During the previous RHNA cycle, the City permitted more above-moderate-income housing than required by the RHNA, whereas the City only permitted one affordable housing unit for every eight above-moderate income units. This highlights the need for a concerted effort to increase production of homes that are affordable to very low-, low-, and moderate-income households. While adding housing at every income level can help reduce market competition for existing homes, a primary driver in displacement and homelessness, Oakland also needs more deeply affordable housing. Oakland especially needs housing affordable to extremely-low-income residents and housing that remains permanently affordable. One of the key objectives in expanding affordable housing opportunities and producing more affordable housing is overcoming patterns of discrimination and opening up neighborhoods

that have historically been exclusionary to communities of color and low-income residents, while simultaneously refocusing resources and protections towards historically disinvested neighborhoods (see Policy 2.2).

As stated above, the City fell short of meeting its lower- and moderate-income need, which has nearly doubled during the current 6th cycle RHNA. The shortfall is primarily a reflection of the lack of commensurate state and federal subsidies that would be necessary to achieve Oakland's targets for low- and moderate-income households. Public funds for affordable housing would need to be expanded tenfold in order to meet these 6th Cycle RHNA targets. Other constraints are discussed in Appendix C. To meet the increased need for affordable housing, the City will identify new funding sources, expand existing programs, and introduce new strategies to close the gap between market-rate and affordable housing production, and further encourage high quality and abundant affordable housing development.

As California's housing crisis continues into another decade, new and innovative models for the development and maintenance of permanently affordable housing are needed to overcome these obstacles and meet Oakland's increased housing needs. This includes alternative housing models that have the benefit of being more affordable and can meet a wider range of community needs, incomes, and lifestyles, including single room occupancy (SRO) programs; efficiency units (where the kitchen/dining area is segmented off from a combination sleeping/living area); micro units (units usually less than ~250 square feet); and co-housing (private homes clustered around shared space). The City is encouraging these models: recent examples include Oakland's 2018 Residential Hotels Ordinance, the "Nook" microunit project built in 2016, and completion of co-housing project Phoenix Commons in 2016. Recognizing the limited resources that staff already operate with, the City will welcome models that are community-based and are eligible for external funding. For the next eight years and beyond, the City will cultivate an atmosphere that encourages new approaches to meet Oakland's affordable housing needs. The City will also encourage models that emphasize community ownership of land and housing to promote permanent affordability.

Oakland has very little vacant land available for development and is reliant primarily on reuse of existing sites for development. The vacant parcels that do exist, however, often provide significant opportunities for residential development. Furthermore, vacant residential and commercial buildings and units could provide potential sources of additional housing supply that are not currently available. As part of this goal, the City will enact a variety of strategies to incentivize active residential uses on vacant land and units.

Although housing is largely provided by the private and nonprofit sectors, the City has one major tool to influence development patterns and increase housing development of affordable housing and allow for other housing types: the Planning Code. To ensure that the Planning Code is responsive to housing policies and programs, the City will need specific zoning amendments that meet Oakland's changing needs and remove identified constraints to residential development. The suite of amendments the City will undertake range from short- to long-term solutions, some of which will be carried out alongside the update of the Housing Element and others as part of the comprehensive update to the City's General Plan that includes the Land Use and Transportation Element and will continue through 2025 after the Housing Element adoption.

The length and cost of the residential permitting process—which are ultimately reflected in a unit's selling price—are also generally within the City's control. An onerous and lengthy review process can be one of the most significant barriers to housing construction because some developers may decide that the cost of project review and its potential delays simply overcomes the revenue of new

housing, particularly in the case of projects that are only marginally financially feasible and/or profitable. Recognizing that long permitting processes are a statewide issue, a slate of new legislation, including SB 35, SB 330, AB 2162, and SB 1483, has introduced new requirements that are intended to facilitate the production of affordable housing through a streamlined residential permitting process.

The City of Oakland currently operates both an online permit center and an in-person "one-stop" permit center with counter services staffed by the Departments of Planning and Building, Fire, and Transportation. However, there are opportunities to better steward small nonprofit and BIPOC developers, homeowners looking to add additional units, affordable housing developers, and other community partners through the residential permitting process.

This goal will encourage the production of affordable housing and guide development of a more diverse range of housing choices for households of all types, incomes, and special needs; and promote changes to City tools like its permitting procedures and zoning code to make it easier and faster to build affordable housing.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Though Oakland is one of California's most diverse cities overall, there is significant racial segregation between the city's neighborhoods. As a result of past practices such as mortgage redlining, disinvestment in neighborhoods of color, racially restrictive covenants on housing development, exclusionary zoning, destructive urban renewal, highway development and predatory lending in neighborhoods of color, many of Oakland's BIPOC residents live in neighborhoods that lack access to quality amenities or upward mobility. As higher income people move to Oakland, low-income neighborhoods of color are also more susceptible to gentrification and continue to bear infrastructure burdens from the city's increased housing supply. In contrast, some high-resource areas remain disproportionately white in their racial composition because they are zoned primarily for single-family homes, and the absence of lower cost housing types prevents BIPOC and lower-income families from moving to these neighborhoods. See Appendices B and D for additional detail on these patterns of segregation. The City must work towards breaking down barriers towards accessing high-opportunity neighborhoods for those who choose to live there, while simultaneously investing in "lower resource" neighborhoods. Increasing affordability and expanding the housing types permitted in high-opportunity neighborhoods will be key to ensuring that currently exclusive neighborhoods become inclusive.

During the outreach process, many community members expressed a desire to see Oakland be more inclusive and retain and strengthen its diversity with a wider array of housing choices. Community members sought more duplexes, fourplexes, cottage courts, and garden apartments throughout the city. These smaller, "missing middle" housing types tend to be more affordable by design—compared to single-family homes—and thus provide additional options for first-time homebuyers, single people, and moderate-income households. These housing types can also increase the housing stock in previously built-out neighborhoods, and as such are an important factor for Oakland to meet its moderate-income RHNA target. Accessory dwelling units – also known as ADUs, granny flats, secondary units, in-law units, and backyard cottages – are another important strategy to increase the supply of housing that is more affordable by design. ADUs offer an alternative for people who want to rent but do not want to live in larger apartment complexes. ADUs tend to be located in lower-density and higher resource neighborhoods that often contain few other rental options that are affordable. As described in Appendix C, the majority of ADUs in Oakland are estimated to have rents affordable to lower-income households. The community also expressed a desire to see increased housing typologies and affordable housing throughout

the city, including existing working-class neighborhoods that are currently low-resource due to systemic racism and disinvestment. Efforts specifically aimed at increasing affordable housing production are included in Policy 3.3.

On March 16, 2021 , the City Council directed the Planning Bureau to explore criteria for allowing four units on all residential parcels citywide, including in areas that are zoned to only allow single-family homes—prior to the passage of SB 9. Zoning reform actions under this goal will expand on this direction and help to open up exclusionary neighborhoods. Other housing development reforms—like permit streamlining and ADU promotion—will also help expand housing options in traditionally exclusionary neighborhoods.

Further, certain segments of the population face greater challenges to finding decent, affordable housing due to special characteristics. Such characteristics may include one's employment and income, family characteristics, disability, or other conditions. Thus, some residents face greater housing cost burden, overcrowding, or other housing problems.

State Housing Element law defines "special needs" groups to include persons with disabilities (including developmental disabilities), the elderly, large households, female-headed households, homeless people, and farmworkers. Many households within these special needs groups also fall within the extremely-low-income category. The special needs of individuals within these groups are wide ranging: in addition to affordable and accessible housing opportunities in proximity to transportation and other services, individuals with disabilities or who are experiencing homelessness may need on-site support and services. Meanwhile, female-headed households benefit from on-site childcare, and universal design elements such as zero-step entrances and single floor living are important considerations for senior housing.

Special needs housing is an important component of Oakland's commitment to just and fair treatment of all individuals. It is critical that housing conditions foster an environment where everyone can participate, prosper, and reach their full potential. Actions contained within this goal will expand funding sources for affordable housing, including bonus points for serving special needs populations, will together allow for the expansion of affordable opportunities for special needs populations in high-opportunity neighborhoods. Actions related to expanding affordable housing options that are accessible to extremely-low-income households are also contained under Policy 3.1.

POLICY 3.1 FACILITATE PRODUCTION OF DEEPLY AFFORDABLE HOUSING

Action 3.1.1. Develop a project-based rental or operating subsidy program for extremely-low-income residents.

Create a capitalized operating subsidy program for extremely-low-income households. This will enable the creation of extremely-low-income housing, which is only possible with the provision of public operating subsidies to ensure financial stability for the property and appropriate support services for the residents.

Responsible Agency: Oakland Department of Housing and Community Development

Timeline: Program will be launched by December 2023

Potential Funding Source: State of California Permanent Local Housing Allocation (PLHA), Homeless Housing Assistance & Prevention (HHAP), and any and all other resources that become available for this use.

Objective: This program will fund project-based rental or operating subsidy for at least 16 units of extremely-low-income housing per year, for a total of at least 56 extremely-low-income units by 2031.

Action 3.1.2: Align and target Oakland Housing Authority Section 8 Vouchers for permanent supportive housing and extremely-low-income units.

The Oakland Housing Authority will continue targeting vouchers to support the development of extremely-low-income Housing through the award of project-based vouchers and/or other Oakland Housing Authority funds.

Responsible Agency: Oakland Housing Authority

Timeline: Ongoing, 2023-2031

Potential Funding Source: Federal Section 8 vouchers, VASH vouchers, and/or other Oakland Housing Authority funds.

Objective: As vouchers or funds are available, at least 20 percent of units in assisted developments will be deed restricted as extremely-low-income.

POLICY 3.2 CREATE A MORE DIVERSE MIX OF HOMES TO MEET COMMUNITY NEEDS

Action 3.2.1: Develop zoning standards to encourage missing middle and multi-unit housing types in currently single-family-dominated neighborhoods, including flats, duplexes, triplexes, fourplexes, townhomes/rowhouses, and ADUs.

The City will review and amend the Planning Code and implement objective design standards to encourage missing middle-density housing typologies, including flats, duplexes, multiplexes (triplexes, and fourplexes), bungalow courts, rowhouses/townhomes, and ADUs. The City will work to reduce pre-development costs and expedite the planning approval process for missing middle housing types resulting from both new construction and the conversion of existing structures.

The City will develop zoning standards that allow for two, three, and four units on parcels in Detached Unit Residential (RD) Zones and additional multi-unit housing types in Mixed Housing Type Residential (RM) Zones. The City will also reduce the minimum lot size in Detached Unit Residential and Mixed Housing Type Residential lots to 2,000 square feet to remove constraints on lot splitting. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility, neighborhood scale and potential opportunities for homeownership (split lots and condominiums) in parallel with Policy 3.4 and Policy 5.1. See Appendix J for a summary of missing middle zoning amendments.

Under Action 3.4.1, the City will revise development standards, including allowable building heights, densities, open space and setbacks requirements.

Under Action 3.4.8, the City will develop objective design standards at the neighborhood level to ensure that multi-unit neighborhood scale housing types designed in a manner that is compatible with the scale of existing residential housing forms in these zoning districts is permitted ministerially.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards

Timeframe: June – July 2023

Objective: Significantly increase production of multi-unit housing types (including duplexes, triplexes and fourplexes, along with other multi-unit housing types) in current single-family-dominated neighborhoods to match housing need.

Action 3.2.2: Promote and protect live/work housing and housing for artists.

The City will update development standards, building codes, and land use regulations to promote artist housing, including joint living and working

quarters (JLWQs) in areas where appropriate under the General Plan. The City will encourage employers, trade groups, and arts and cultural districts to provide housing opportunities that are affordable to artists and similar professionals. The City will continue to allow the conversion of existing commercial nonresidential buildings to JLWQs in specific commercial/industrial locations while considering the impacts on nearby viable businesses. The City will support bringing existing, unpermitted JLWQ units in commercial and industrial buildings into compliance with Building Codes and the Planning Code in a way that mitigates displacement of existing tenants and preserves affordability.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees, 2415 fund of the City, SB2 Grant for Objective Design Standards

Timeframe: 2025

Objective: Significantly increase production and protection of live/work housing and housing for artists to match housing need.

Action 3.2.3: Promote flexibility in adaptive reuse to increase the housing stock.

The City will encourage the reuse and rehabilitation of Oakland's historic building stock to provide additional housing units, safeguard neighborhood character, and preserve the energy embodied in the building's original construction. The City will amend land use regulations and development standards in the Planning Code to reduce constraints on adaptive reuse of commercial buildings for residential use, and help make clear how the Historic Building Code and Alternate Materials and Methods Request (AMMRs) can be used to facilitate the adaptive reuse of older commercial buildings. Reuse in environmentally sensitive areas—including in warehouses adjacent to industrial uses—will consider health and safety impacts prior to approval.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards

Timeframe: 2025

Objective: Significantly increase reuse and rehabilitation of historic commercial buildings for residential use to match housing need.

Action 3.2.4: Provide financial incentives for lower-income homeowners to legalize ADUs.

The City will implement its "ADU Loan Program" to provide deferred loans to low-income homeowners who want to legalize an ADU.

Responsible Party: Oakland Planning & Building Department; Oakland Department of Housing and Community Development

Potential Funding Source: Funding for an ADU incentive program would include $3 million already awarded from the State of California's CalHome program for a pilot program, and the City would seek ongoing State funding for ADU development in the future.

Timeframe: The City's ADU Loan Program opened in Fall 2022 and will offer loans into 2023. As additional funding becomes available, the City will provide additional funding opportunities. For more information on the City's Accessory Dwelling Unit Loan Program (ADULP), see https://www.oaklandca.gov/adulp.

Objective: Using the ADU CalHome grant, the City anticipates supporting at least 25 low-income and/or senior households with the cost of legalizing at least 25 Accessory Dwelling Units. This is based on the 25 loans projected for the existing CalHome grant the City has received to help low-income homeowners build ADUs.

Action 3.2.5: Reduce constraints to the development of ADUs.

On January 18, 2022, the City updated its zoning standards related to ADUs to be consistent with State law. The adopted local ordinance clarified and simplified existing requirements and offered additional allowances to encourage creation of ADUs that went beyond the minimum requirements of State law. These additional allowances include higher maximum heights allowing for two-story ADUs, reduced setbacks in some zones, larger maximum sizes for detached ADUs, and an introduced ADU amnesty from Planning Code requirements allowing homeowners with existing un-permitted ADUs to legalize them. Also, this zoning update removed setback requirements and allowed additional envelope expansion of existing structures to create livable-size ADUs on "small lots" where ADUs would not be feasible under previous requirements.

The City's current Planning Code already meets the requirements for recently passed ADU state laws under SB 897 and AB 2221. City Staff will work to implement the new requirements for these laws through the City's administrative approval process.

The City will continue to provide pre-approved ADU plans on its website to facilitate reduced applicant cost and expedited review for ADUs. The City will also provide increased staffing capacity for the "one-stop shop" to distribute information to property owners, contractors, and tenants. The City will budget a new staff position for an ADU Specialist whose assignments would include community outreach and education to teach property owners about ADU construction, financing, and landlord responsibilities. The City will also consider developing a database through which property owners can find and hire local workers to build ADUs. The City will comply with State law (including recently passed SB 897 and AB 2221) and Building Code requirements for ADUs, and also study how the implementation of the Building Code may constrain the legalization of unpermitted ADUs. Oakland's Planning & Building Department will take the lead in implementing these efforts, with support as needed from Oakland's Department of Housing and Community Development.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards

Timeframe: January 2023 (Comply with 2022 State ADU law requirements); 2023-2024 (One-Stop Shop); by 2025 (Budget a new ADU Specialist position)

Objective: Significantly increase production of ADUs to match housing need.

Action 3.2.6: Monitor Affordability of Permitted ADUs.

Based on a recent online survey conducted by the City as well as data provided by the Association of Bay Area Governments, the Appendix C Sites Inventory estimates that ADUs produced from 2023 to 2031 will have the following projected affordability levels: 35 percent affordable to very-low-income households, 35 percent affordable to low-income households, and 30 percent affordable to moderate-income households. Based on a total projected ADU production of 1,978 units through 2031, the City has estimated that ADU construction will result in the creation of 692 very-low-income units, 692 low-income units, and 593 moderate-income units.

To ensure that Oakland's ADU production aligns with these projections, the City will send a survey to the property owners of ADUs that received a

certificate of occupancy within the prior two-year period requesting information on household size and rents charged for these recently constructed ADUs. If the survey identifies a shortfall in the numerical affordability production projections, within six months of the survey report being published the City will provide to the Planning Commission a report summarizing the survey report and identifying additional actions that can be taken to either increase the production of affordable ADUs, and/or proposing other rezoning programs that will enable additional affordable housing production to fill any identified affordable housing production shortfall.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: First survey to be conducted first quarter of 2024. Results to be presented to Planning Commission by end of 2024. Any necessary reforms to ADU regulations and/or rezoning programs to be adopted in 2025. Second survey to be conducted in first quarter 2026.

Objective: To match affordability projection included in Table C-8 of Appendix C, produce on average 86.5 very-low-income ADUs, 86.5 low-income ADUs, and 74 moderate-income ADUs per year.

Action 3.2.7: Proactive Short-Term Rental Enforcement.

With limited exceptions in single-family homes with a CUP for a traditional owner-run bed and breakfast, Oakland's current planning regulations prohibit any rental of an accessory dwelling unit (ADU), single-family home, duplex, apartment/condo, live/work unit, or other dwelling unit for less than 30 consecutive days. In addition, State laws that govern ADUs do not allow for any ADU to be rented as a short-term rental of less than 30 consecutive days. The City's code compliance division reviews zoning code violations on a complaint-driven basis, which has not sufficiently deterred property owners from operating short-term rentals that do not comply with planning regulations. Additionally, code compliance often lacks sufficient evidence to clearly document that an ADU or other dwelling unit is operating as a short-term rental.

In response, the City will pursue additional data collection tools that will allow the City to access information showing addresses of units listed on short-term rental platforms. Upon securing this data, the City will engage in proactive enforcement against property owners who are operating short term rentals in ADUs and in other dwelling units throughout the City.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: Violation Fees, permit fees, transient occupancy tax collection

Timeframe: Secure additional data collection tools and begin proactive enforcement in 2023.

Complaint-based enforcement is ongoing and would continue, supplemented by the additional data collection tools.

Objective: Reduce the number of unauthorized short-term rentals in Oakland by having bi-yearly data scrapes of short-term rental platforms and automatic mailing notifications to owners in violation.

POLICY 3.3 EXPAND RESOURCES FOR THE CONSTRUCTION OF AFFORDABLE HOMES

Action 3.3.1: Sale or ground-lease of City-owned property for affordable housing.

Consistent with the California Surplus Lands Act (SLA) and the Oakland Municipal Code, the City will continue to release land designated as surplus for development of affordable housing and other uses. The City will continue to release one to two surplus sites per year for permanent affordable housing development projects, noticing them via a Notice of Availability (NOA) to local Bay Area affordable housing developers, as well as to all California Housing Finance Agency (CalHFA) housing sponsors, consistent with the SLA. All surplus sites are tracked on the City's website and NOAs are available on the website as well. All surplus sites disposed of pursuant to the SLA will include a minimum of 25 percent affordable units and in many cases will include up to 100 percent affordable units. If the SLA process does not conclude in an affordable housing development for a particular site, the City will issue Request for Proposals (RFP) for its designated surplus properties. If the RFP process results in an agreement with an entity that develops 10 or more residential units on the property, the City will require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233 of the SLA. The City will consider depositing up to 100 percent of net proceeds from such sales or leases to the Affordable Housing Trust Fund. The Planning Bureau provides priority processing for affordable projects that are located on surplus sites. The City will also continue to seek to utilize surplus sites – as well as other City-owned or City-leased properties – for emergency housing programs (e.g., safe RV parking and community cabins) and other community-serving uses prior to disposition under the SLA.

Responsible Agency: Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development, Oakland Planning and Building Department

Potential Funding Source: City subsidy

Timeline: The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete EIR for rezoning by July 2023.

Objective: Issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. Notices will be posted on the City's website and distributed directly to developers, including nonprofit housing providers.

Action 3.3.2: Expansion of Section 8 vouchers.

The City will continue to participate in the HUD-operated Section 8 Housing Choice Vouchers program, and the City will continue to coordinate with the Oakland Housing Authority to advocate for additional funding from the federal government for more Section 8 rental assistance for very-low-income renters by documenting the need for additional housing vouchers and contacting decision-makers at HUD as appropriate. The City will also advocate for additional funding at the federal level as opportunities such as the American Recovery Act become available. Further, the City

will work with nonprofit and community-based partners to educate property owners throughout the city about housing choice vouchers to encourage greater participation and to increase locational choices for voucher holders (see Action 5.2.8). In 2022, Oakland secured 515 emergency housing vouchers as part of its advocacy to expand the number of housing vouchers for Oakland residents.

Responsible Agency: Oakland Mayor's Office, Oakland Housing Authority, Oakland Department of Housing and Community Development

Potential Funding Source: HUD Section 8 vouchers

Timeline: Ongoing, 2023-2031. As part of its landlord education efforts, the Oakland Department of Housing and Community Development will promote voucher acceptance. The Oakland Department of Housing and Community Development hosts multiple landlord education workshops each year that can serve as an opportunity for this promotion. The Mayor's Office will lead federal advocacy during budget discussions with the federal government on an annual basis.

Objective: The City of Oakland Housing Authority will increase the number of vouchers being used in proportion with any future federal expansion of Section 8 or similar programs.

Action 3.3.3: City of Oakland Emergency Rental Assistance Program.

As funding allows, the City will build on the success of the Keep Oakland Housed program (a public-private partnership) and the Federal Emergency Rental Assistance Program (ERAP) to offer homeless prevention services to those most at risk of experiencing housing instability or homelessness including rental assistance grants to distressed tenants, free legal consultation, eviction defense, case management, and employment and financial counseling and other services to increase housing stability and prevention of homelessness. The City will work with community partners to provide these direct services and to advance racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness.

Responsible Party: Oakland Housing and Community Development Department

Potential Funding Source: Federal ERAP funds, private contributions, other local, State, and federal resources as available

Timeframe: The City of Oakland allocated over $42 million of Federal and State ERAP funding for emergency rental assistance between 2020-2022 and, if resources are available, will allocate additional ERAP funds to an existing waitlist in 2023. Of the approximately 3,500 Oakland households served by the ERAP program, over 85 percent earned less than 30 percent AMI. The City of Oakland will also issue a Request for Proposals and award a contract of approximately $2.3 million to a collaborative of homelessness prevention program providers by mid-2023.

Objective: The City of Oakland will continue to implement a homelessness prevention program that includes emergency financial assistance, legal support and wrap around services. The program will be an extension of previous homeless prevention programs such as Keep Oakland Housed, Oakland Housing Secure, and the Emergency Rental Assistance Program with a focus on advancing racial equity by removing barriers to long-term housing for Black, veteran, formerly incarcerated, and other Oakland residents most likely to experience homelessness

Action 3.3.4: Development of permanent housing affordable to extremely-low-income (ELI) households on public land.

The City will continue to work with development partners including Community Land Trusts, co-ops

and emerging developers for possible partnerships involving City land as mentioned in Action 3.5.1 and other community partners on publicly owned sites that may be designated as surplus property. To support Action 3.3.1, the City will assist nonprofit and local developer partners to access public funding and financing to construct and increase the supply of permanently affordable rental units that are designated for extremely-low-income households. In addition, the City will ensure that permanently affordable housing for extremely-low-income households is prioritized where services and needs are accessible by transit or walking. The City will prioritize affordable housing developments that dedicate at least 20 percent of units for extremely-low-income (ELI) or homeless households in accordance with current policies. The Planning Bureau provides priority processing for affordable projects located on surplus sites. The City will review City-owned sites to identify, and, where appropriate, address land use conflicts that would prevent affordable housing development.

Responsible Agency: Oakland Economic & Workforce Development Department; Oakland Department of Housing and Community Development; Oakland Human Services Department

Potential Funding Source: City subsidy

Timeline:. The City will continue to release future NOFAs contingent upon funding and staff availability. The City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year for permanent affordable housing with preference for ELI or homeless households. Complete rezoning by July 2023.

Objective: The City will continue to release future NOFAs contingent upon funding and staff availability. City will issue Notices of Availability and/or Requests for Proposals consistent with the SLA on at least one to two City-owned surplus sites each year, and advance affordable housing projects underway to completion. NOFAs, Notices of Availability and/or Requests for Proposals will be posted on the City's website and distributed directly to developers, including nonprofit housing providers and community partners.

Action 3.3.5: Implement an affordable housing overlay.

The City will create an Affordable Housing Overlay (AHO) to streamline the approval of affordable housing by right. Proposed features of this overlay include ministerial approval of 100 percent affordable housing projects, increased height and density allowances, waiver of parking requirements, and reduction of zoning barriers. The City will broadly apply this overlay, except for limitations on designated historic resources as well as areas in the Very High Fire Hazard Severity Zone (VHFHSZ). The City will also study the possibility of extending the streamlined approval provisions of the affordable housing overlay to mixed income projects that qualify for the super density bonus and/or other strategies to augment the City's density bonus program, as well as the potential for select areas within the VHFHSZ for the overlay to apply. The City will allow SROs and Rooming Houses by right in areas subject to the prospective affordable housing overlay. See Appendix J for a summary of the AHO.

100 percent affordable projects within the AHO zone would be subject to a ministerial approval process. A proposed project would be exempt from CEQA and not appealable. This would provide greater certainty to affordable housing developers that if the project is within the AHO zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June - July 2023

Objective: Enable development of additional affordable housing throughout the City, including in higher resource areas.

Action 3.3.6: Access to low-cost financing for development.

The City currently awards local funding that affordable housing developers leverage to obtain financing for their projects. As funding allows, the City will continue to award funds to affordable housing developers on favorable terms—including simple low interest rate, payment of principal and interest due from excess cash flow from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City will also continue to work with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. Further, the City will also continue to coordinate with developers to help ensure that they qualify for additional funding from county, State, and federal sources.

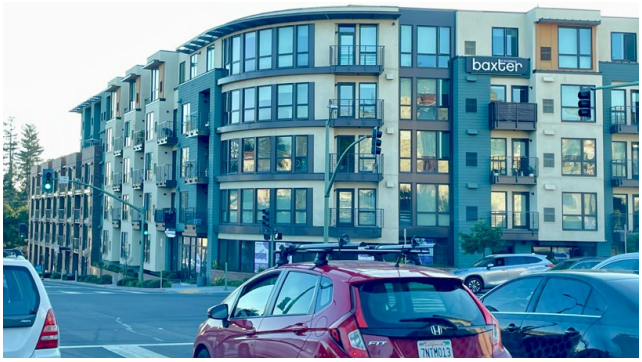
Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available

Timeline: Ongoing, 2023-2031

Objective: Allocate all budgeted local funding sources (approximately $12 million annually starting in 2023) to support the construction, acquisition, and/or preservation of deed restricted affordable housing units each year. With $12 million in local funding forecasted in 2023, at least 80 units could be created or preserved; of these, at least 16 would be set-aside for extremely low-income residents; the creation of extremely low-income units will be constrained by the availability of operating subsidy (see Action 3.1.1). This will result in a total of at least 640 low-income units over the Housing Element period, including 128 extremely-low-income units, which would increase if more local funds are identified or secured such as a new local bond measure dedicated to funding affordable housing.

Action 3.3.7: Study the targeted implementation of an inclusionary housing requirement.



The City currently relies on development impact fees to provide local funding for affordable housing. A study is underway as part of the five-year impact fee update to assess the benefits of impact fees versus inclusionary affordable housing requirements. The study will consider the number of units likely to be produced through impact fees versus inclusionary affordable housing requirements and their likely affordability levels; and whether targeted inclusionary housing requirements may increase the provision of affordable housing units in higher-resource neighborhoods.

Responsible Agency: Oakland Planning & Building Department; Oakland Department of Housing and Community Development

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: By mid-2024, complete a study on targeted inclusionary housing requirements and present to Council.

Objective: Ensure implementation of affordable housing impact fees and/or inclusionary housing requirements maximizes production of affordable housing in all areas of the city.

Action 3.3.8: Right-sized development fees on market-rate developments.

The City levies a number of development impact fees, including for affordable housing, to ensure that new market-rate development pays its fair share toward funding affordable housing, transportation improvements, and capital facilities. The City will regularly monitor its impact fees and ensure that appropriate amounts are set on an annual basis. Pursuant to the Mitigation Fee Act, the City will conduct a comprehensive analysis and make findings every five years for each impact fee along with review of whether to increase fees and if the option of building affordable housing units on-site percentage is set appropriately.

Responsible Agency: Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Public Works Department; Department of Transportation (DOT)

Potential Funding Source: General Plan Surcharge, permit fees, and Impact Fees

Timeline: Ongoing, 2023-2031; initiate next five-year update in 2026

Objective: Continue to monitor and adjust impact fees.

Action 3.3.9: Adjusting or waiving City fees and payment timing for affordable housing developments.

Affordable housing developers have pointed to the impact of City fees and the timing of fee payment, including impact fees, building permits, and public art requirements, as constraints to development. The City currently requires for Affordable Housing Impact Fees only one-half of the amount of impact fees to be paid before permit issuance and the remaining half to be paid before the issuance of Certificate Of Occupancy (COO), while the Transportation and Capital Improvement Impact Fees are paid in full before building permit issuance. The City also defers other fees such as public art and school tax. The City will explore additional ways to increase flexibility in payment timing and potential fee reductions and/or waivers to reduce the burden imposed by the collection of City fees and requirements.

Responsible Agency: Oakland Planning & Building Department; City Administrator's Office; Oakland Department of Finance; City Attorney's Office

Potential Funding Source: Permit fees, and General Fund for any reduction of fees

Timeline: Review and update where possible Impact Fee and other payment timing as well as fees charged by mid-2024.

Objective: Explore methods to reduce cost burden of City fees and payment timing to significantly increase affordable housing development.

Action 3.3.10: Citywide Enhanced Infrastructure Financing District (EIFD).

On November 1, 2022, the Oakland City Council enacted a resolution expressing the City's interest in establishing one or more Enhanced Infrastructure Financing Districts (EIFD) to fund affordable housing that affirms the City's commitment to furthering fair housing and infrastructure improvements. The resolution directed the City Administrator to study proposals for the creation and implementation of an EIFD exclusively for East Oakland, exclusively for West Oakland, and a combined East and West Oakland EIFD. Upon completion of this study, the City Administrator is to return to Council with reports and recommendations. The City will consider implementing the EIFD to increase available local funding for affordable housing.

An EIFD is a special taxing district that directs a portion of future property tax growth towards infrastructure expenses, including affordable housing. The Draft Downtown Oakland Specific Plan is also recommending the creation of an EIFD in the downtown area to support the construction

of onsite and offsite affordable housing as part of future development in the downtown.

Responsible Agency: City Administrator's Office; Oakland Department of Finance

Potential Funding Source: An EIFD would be a cost-recovering program for any implementation costs.

Timeline: By end of 2024, complete studying the implementation of one or more EIFDs and determine proposed EIFD boundaries.

Objective: Implement one or more EIFDs to significantly increase affordable housing development and fund infrastructure improvements to match need, if feasible and financially appropriate.

Action 3.3.11: Support innovations by design.

The City will support and encourage innovations in construction technology to build more housing in less time, more affordably, and with fewer resources by supporting non-traditional construction methods (such as modular and other offsite construction methods). The City will meet with stakeholders periodically to discuss emerging innovations and gather more information to understand and accommodate barriers.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023

Objective: Significantly increase production of housing using construction innovations to match housing need.

Action 3.3.12: Continue the Acquisition and Conversion to Affordable Housing (ACAH) Program.

The ACAH Program provides loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing. The ACAH Program, formerly known as the Site Acquisition Program, was formalized through the passing and issuance of local Measure KK bond funds but continues under other funding sources even as Measure KK funds have all been allocated. With the passage of Bond Measure U, it is expected that funds from this new funding source will continue to support the acquisition and conversion to affordable housing of existing units. The City will continue to issue NOFAs as funding is available and work with borrowers—including local community land trusts—to create new affordable housing units and preserve existing ones. The City will also continue to explore additional funding sources to sustain the ACAH program.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available

Timeline: The ACAH Program has issued 3 Notices of Funding Availability (NOFA) since the program's inception: in 2017, 2019, and 2020, issuing approximately $45 million to affordable housing developers through the 3 NOFAs. The Oakland Department of Housing and Community Development will continue to release future NOFAs contingent upon funding and staff availability. The next ACAH NOFA release is anticipated in December 2022, and pending City Council approval, staff expect to begin reviewing the next round of ACAH NOFA applications in 2023.

Objective: Provide loans to eligible borrowers for acquisition- and rehabilitation-related costs associated with protecting and preserving long term affordable housing throughout the City of Oakland. Currently the City's policy is to allocate approximately 25 percent of available local funding towards continuing the ACAH program, and future funds will be allocated contingent upon availability.

Action 3.3.13: Expand availability of predevelopment funding and low-cost debt products for affordable housing development.

The City will continue to allocate funding to support predevelopment funding for affordable housing projects using its existing local sources, to help relieve the costs associated with the entitlement process especially for emerging and BIPOC affordable developers. The City will also identify and secure low-cost debt products for affordable housing development. To this end, the City has applied to HUD for Section 108 authority to leverage its CDBG allocation to provide low interest debt for affordable housing. Because Section 108 are hard loans that require repayment, the repayments could be revolved to support ongoing pipeline. The City will use a data-informed approach to target its resources towards both high-opportunity and historically marginalized/redlined areas. The city will also target resources to support the growth of emerging and BIPOC affordable developers.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, local infrastructure bond funds, HOME and Section 108 funds, and other local, State, and federal funds as available

Timeline: The City applied to HUD for Section 108 authority in 2022 and will seek to use these funds starting in 2023, pending HUD approval.

Objective: As suitable funding and projects become available, predevelopment funding and low-cost debt products will be made available for affordable housing development.

Action 3.3.14: Evaluate the creation of a leveraged acquisition fund or debt/equity funds for small sites to support site acquisitions for affordable housing.

Affordable housing developers indicated during outreach that competing with market-rate developers for sites posed a barrier on their ability to acquire sites for development. The City typically provides gap financing commitments during predevelopment, with funds provided at construction finance closing; acquisition is an eligible cost for reimbursement by the City's funding. While directly funding acquisition presents an earlier, riskier, and less efficient investment of the City's limited funds, in recognition of this critical need the City will consider the implementation of a leveraged acquisition fund to allow for faster and more efficient acquisition transactions. The City will also study the creation of debt and/or equity funds to support small site housing projects. If feasible and funding is available, this new fund may be similar in nature to the City and County of San Francisco's Small Sites Program, which relies on non-governmental funding for acquisition and rehabilitation, that is later taken out by City funds. The City will also assess the feasibility of raising the Council authorization threshold for site acquisition to enable the faster purchase of sites.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, local infrastructure bond funds, HOME funds, and other local, State, and federal funds as available to leverage philanthropic and other outside resources.

Timeline: Conversations with Community Development Financial Institutions (CDFIs) and other funders have been ongoing since 2021, but any fund will require a significant stream of new City subsidy to support takeout of acquisition loans. The City will further explore this item in 2023, pending the passage of Measure U.

Objective: By the end of the Housing Element Cycle, the City will be able to report on the practicality of a leveraged acquisition fund, as well as the feasibility and appropriateness of a small sites fund.

Action 3.3.15: Continue and expand density bonus incentives.

The City will continue to implement Chapter 17.107, Density Bonus and Incentive Procedure, which was updated and adopted by the City Council on April 19, 2022. The Density Bonus Ordinance offers developers density bonuses in exchange for the provision of affordable housing and provides:

- Greater certainty to project applicants about the City's implementation of the State Density Bonus Law, density bonuses, and incentives for affordable housing;
- Clarifying and accessible language that aligns the ordinance with the City's existing density bonus application intake and regulatory agreement requirements, including clear timelines and a list of all required information;
- Offers an opportunity to streamline the production of affordable housing; and
- Ensures affordability of both rental and homeownership units and prevents potential displacement of existing tenants.

To ensure that the Chapter 17.107 remains compliant with state law, and to solicit additional ideas for incentives and expansion of the density bonus program, the City will review the density bonus program mid-cycle, bring necessary amendments to conform to state law, and solicit feedback from Planning Commission and City Council on additional incentives that could be included in the local density bonus program.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: In 2025, bring forward informational report to Planning Commission and City Council on effectiveness of City's density bonus program and in 2026 return with proposed amendments to ensure conformity with state law and incorporated any recommended policy changes.

Objective: Significantly expand the City's density bonus program and increase production of density bonus projects to match housing need.

Action 3.3.16: Analyze the Real Estate Transfer Tax structure and its current effect on the Affordable Housing subsidy and the effect on the General Purpose Fund.

The real estate transfer tax, also called a Real Property Transfer Tax (RPTT), is due when a home is sold or gifted. The City will study the impact that the RPTT has on the affordable housing subsidy and the effect on the General Purpose Fund. In the study, the City will explore revisions to the RPTT including:

- Expanding the current progressive tax;
- The impact of reducing or waiving the tax for affordable housing; and/or
- Using a portion of the revised tax rate as a dedicated funding stream for affordable housing. This could provide annual revenues at levels significantly higher than current Impact Fee revenue.

Responsible Party: Oakland Department of Finance

Potential Funding Source: General Fund Surcharge for any applicable studies

Timeline: Conduct the analysis and provide a recommendation to the City Council and City Administration by Fiscal Year 2023-2024

Objective: Complete an analysis by Fiscal Year 2023-2024.

Action 3.3.17: Support low-income, grassroots, and BIPOC affordable housing developers.

The City will continue to work with low-income, grassroots, and BIPOC affordable housing developers to identify barriers that prevent BIPOC and small nonprofit developers from accessing City funding and navigating the permitting process. The city will continue to develop solutions to ensure that the permitting process is transparent, affordable, and accessible for these Emerging Developers, defined by Oakland HCD as "a developer who has less than five (5) years of experience as a developer and/or less than five completed projects." The City has secured a Breakthrough Grant from the Partnership for the Bay's Future that will dedicate a full time fellow to facilitate this work of identifying and breaking down barriers for BIPOC and emerging developers to develop affordable housing in Oakland.

Responsible Agency: City Administration; Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: San Francisco Foundation, General Plan Surcharge, and permit fees

Timeline: The City's Breakthrough Grant Fellow is currently researching and implementing strategies to address this action item from 2022 to 2024.

Objective: The proportion of City funding distributed for affordable housing development to low-income, grassroots and BIPOC affordable housing developers will significantly increase by 2031.

Action 3.3.18: Implement affordable housing investments contained in Measure U

Measure KK, a bond measure passed in 2016, has provided a significant source of funding for anti-displacement and affordable housing preservation projects. The City has allocated nearly all remaining Measure KK bond funds for resident-led and community land trust-supported preservation projects and homeless acquisition projects.

The City successfully sought voter approval in November 2022 to authorize issuance of $850 million in General Obligation Bonds to fund and prioritize affordable housing preservation projects among other purposes. This Affordable Housing and Infrastructure Bond Measure (Measure U) will allocate $350 million towards affordable housing preservation projects.

Responsible Party: Oakland Department of Housing and Community Development;

Potential Funding Source: Measure U Bond Funds

Timeframe: As described in Action 3.3.12 and other actions related to the expenditure of affordable housing bond funds, expend the proceeds of Measure U

Objectives: Measure U requested authorization for $850 million in General Obligation Bonds with $350 million set-aside for affordable housing. For reference, for the 2016 Infrastructure Bond (Measure KK) where $600 million of General Obligation Bonds were authorized, $100 million was set-aside specifically for affordable housing and anti-displacement projects and supported the new construction of over 700 units, the preservation of 420 units, and the acquisition and conversion of over 400 units. This leverage of subsidy achieved under Measure KK may not be replicable as KK was layered onto projects that also secured County A1 bond funds, which are now also fully allocated. New construction projects that set-aside more than the program minimum (currently 20 percent) of units for extremely-low-income residents will be prioritized, per the City's process for awarding funds to affordable housing developers, through their New Construction Notice of Funding Availability (NOFA). The City will also be able to make substantial funding allocations to the Acquisition and Conversion to Affordable

Housing (ACAH) and Preservation NOFAs to acquire and convert additional market rate units to affordable housing, and also preserve the City's existing affordable housing portfolio, extending affordability restrictions, and investing in the rehabilitation of older properties where needed.

Action 3.3.19: Sites Inventory and Fair Housing Accomplishments Tracking Program

As part of a mid-cycle evaluation, the City will establish a system to coordinate tracking units with Development Services staff who process permitting, to ensure that as projects are developed, there is adequate capacity available citywide to meet the City's RHNA targets and no net loss requirements. The City will also assess the effectiveness of its AFFH programs (including Action 3.3.6), including sites that develop in higher resource areas.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: Mid-cycle (2027)

Objective: Identify and monitor adequate sites available for development, and increase the baseline of affordable units in high-resource areas.

POLICY 3.4. REFORM ZONING AND LAND USE TO ADDRESS COMMUNITY PRIORITIES

Action 3.4.1: Revise development standards, including allowable building heights, densities, open space and setback requirements.

The City will allow additional building heights and densities in certain corridors and districts. These changes include:

- **Zoning for diverse housing types:** As discussed in Action 3.2.1, the City will develop revised zoning standards for a diversity of housing types in lower density neighborhoods, including but not limited to duplexes, triplexes, and fourplexes in zoning districts such as the RD Detached Unit Residential, RM Mixed Housing Type Residential, and RU-1 and RU-2 Urban Residential Zones. Zoning changes will include revised standards for building heights, densities, open space, lot coverage, and setbacks. The City will also reduce minimum lot sizes to facilitate the subdivision of existing lots. The City will permit a variety of building types (attached, detached, bungalow courts) to maximize flexibility and potential opportunities for home ownership (split lots and condominiums).
- **Elimination of Conditional Use Permits for Density:** Under Action 3.4.3, the City will also eliminate all conditionally permitted densities throughout Planning Code to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs.
- **Objective Design Standards:** Under Action 3.4.8, the City will also develop objective design standards at the neighborhood level to ensure that such missing-middle housing is designed in a manner that is compatible with existing residential housing forms in these zoning districts.

- **Increased Heights and Densities along Corridors:** The current building height map and permitted densities along key corridors such as International, Foothill, College, Claremont, and MacArthur Boulevards does not always allow residential projects to meet their full potential. Consistent with the housing sites map, the City will undertake zoning map revisions to allow increased heights and densities. The City will also increase heights and densities on interior residential streets within close walking distance of key corridors.
- **Increased Heights and Densities in Transit-proximate areas:** Alongside efforts to increase missing-middle housing (see Action 3.2.1), the City will increase allowed height and density in areas in close proximity to high-capacity transit, including areas near Rockridge BART and International Boulevard BRT Stations.
- **Increased Heights and Densities in Resource-rich areas:** Oakland's high resource neighborhoods are typically lower-density and have historically been exclusive – both economically and racially. Allowing higher density multi-unit buildings in these areas that are rich in services will help increase the competitiveness of affordable housing projects for State funding, as well as the feasibility of developing significant numbers of housing units within these neighborhoods. Zoning changes will include permitting residential densities above 30 dwelling units per acre by right in designated areas for affordable housing projects and height increases along College and Claremont Avenue. This will help further fair housing objectives by increasing the availability of affordable housing, in high resource areas.
- Utilizing Senate Bill 10 Provisions: Under Senate Bill 10 (Weiner) provisions, the City will identify parcels located in transit-rich areas and/or in Racially Concentrated Areas of Affluence (RCAAs) to allow up to ten units of residential density and increased heights, and provide additional opportunity for infill housing within high-resource areas.
- See Appendix J for the City's proposed rezoning changes to increase housing production capacity and unlock additional opportunities for affordable and "missing middle" housing in high-resource neighborhoods and affirmatively further fair housing by opening up exclusionary neighborhoods such as Rockridge, Trestle Glen, and Crocker Highlands.

  Responsible Agency: Oakland Planning & Building Department

  Potential Funding Source: General Plan Surcharge and permit fees

  Timeline: June-July 2023

  Objective: Reduce constraints to development to significantly increase production of housing to match housing need. Create additional opportunities for development along transit-rich areas and in urban infill sites to significantly increase production of housing to match housing need and to affirmatively further fair housing.

Action 3.4.2: Study the Relationship Between Zoning and Racial Segregation as Part of the Phase 2 General Plan Update.

The City is updating the 2023-2031 Housing Element as part of a comprehensive update to the General Plan. The General Plan Update (GPU) is undertaken in two phases in order to meet deadlines mandated by State law. Phase 1 focuses on updates to the Housing and Safety Elements, as well as preparation of a Racial Equity Impact Analysis, Zoning Code and Map update, and creation of a new Environmental Justice (EJ) Element. Subsequently, Phase 2 will include the update of the Land Use and Transportation (LUTE) Element; Open Space, Conservation and Recreation (OSCAR) Element; Noise Element, and the creation of a new Infrastructure and Facilities Element which are slated to be completed by the end of 2025.

As part of the LUTE update, the City will study the impact of historic and contemporary zoning restrictions, especially single-family zoning, on ongoing patterns of racial segregation. Existing data on historic zoning patterns highlights the racial disparities in homeownership and rental patterns. The City will utilize this study to direct zoning changes in the LUTE as part of Phase 2 of the GPU.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: Study complete by mid-2025

Objective: Through this study, inform zoning and land use designation changes to promote inclusive, equitable and diverse housing patterns.

Action 3.4.3: Revise Conditional Use Permit (CUP) requirements.

Conditional Use Permits (CUPs) are currently required for multi-unit buildings in the RD-2 and RM Zones, which can act as a constraint on development – especially for affordable housing. The City will revise regulations to permit multi-unit buildings according to objective criteria such as by building type and development size, without subjecting multi-unit residential projects to CUPs. Under Action 3.4.8, the City will create objective design standards and amend the Planning Code design review procedures to allow for streamlined, ministerial approval. The City will also actively promote and support use of SB 35 to streamline 100 percent affordable housing developments. These revised standards will be implemented alongside changes to Oakland's RD, RM, and RU zones as described in Action 3.2.1.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023

Objective: Reduce constraints to development to significantly increase production of housing to match housing need.

Action 3.4.4: Revise citywide parking standards.

Parking requirements are a major cost driver in residential development, and often conflict with sustainable development goals that seek to reduce dependence on automobile use. As such, the City recently eliminated residential parking minimums in the downtown area. Continued revisions of Oakland's parking standards, such as elimination of parking minimums within ½ mile of major transit stop and reduction of minimum parking standards in other areas as well as lower parking maximums in downtown and new parking maximums near BART stations will be undertaken through a comprehensive review of existing residential parking standards and the identification of appropriate new standards to match long-term development and environmental goals. Additionally, for mixed-use development projects (commercial on ground floor and residential uses above), the City will revise parking requirements so that additional residential development on these sites is not constrained by any lack of conformance with commercial parking regulations. (See Appendix J for a summary of Zoning changes as well as strategies regarding parking included in Oakland Equitable Climate Action Plan: Transportation and Land Use Action 1.)

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June - July 2023

July 2023

Revise citywide parking standards for all housing types and zones, including but not limited to housing inventory sites, downtown and corridors.

Implement January 1, 2023 the elimination of minimum parking requirements for residential developments within ½ mile of major transit stop to conform with state law and update Planning code by July 2023.

Objective: Reduce constraints to development to significantly increase production of housing to match housing.

Action 3.4.5: Revise open space requirements.

Both affordable and market-rate developers have pointed to the relatively high open space standards in Oakland as a constraint to development, especially for higher-density projects. In this context, "open space standard" refers to the city requirement for new housing to feature courtyards, patios, balconies, and other open areas in the development. As noted in Appendix F, Housing Constraints, Oakland's open space requirements vary substantially across zoning districts, but in some cases are more than double the open space requirements seen in comparator jurisdictions. To meet these requirements, each one square foot of private usable open space is considered equivalent to two square feet of required group usable open space and may be so substituted.

To reduce this development constraint, the City will review the open space requirements in zoning designations where minimum usable open space requirements currently exceed 60 square feet of private open space/120 square feet of common open space per unit and revise common and private open space standards for multi-family developments to increase the feasibility of residential projects.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June - July 2023

Revise common and private open space standards for residential developments, and allow flexibility on its onsite location and configuration

Objective: Significantly reduce existing open space requirements to remove constraints on development and increase production of housing to match housing need.

Action 3.4.6: Correct zoning district boundaries that cut through parcels.

Oakland's Zoning Map includes many zoning district boundaries that cut through individual parcels – meaning that the same parcel is subject to multiple development standards, which can act as a development constraint. In updating the Zoning Map, the City will correct instances of this occurrence and ensure that zoning district boundaries that affect allowed height and density follow parcel boundaries to the maximum extent feasible to remove inconsistencies and ambiguities.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2025

Objective: Reduce constraints to development to significantly increase production of housing to match housing need.

Action 3.4.7: Capture the diversity of existing built fabric in zoning.

Oakland has a diverse historic urban fabric, some of which no longer conforms to the current Planning Code. To capture and continue this diversity and remove ambiguities, the City will reduce minimum lot sizes and setbacks to facilitate the creation of small-lot developments, as well as legitimize the many existing small-lot neighborhood patterns in West Oakland and other neighborhoods. The City will conduct a comprehensive review of the Planning Code to identify where current development standards have created non-conformities for older built facilities and amend development standards to reduce or eliminate them where appropriate. The City will also provide flexibility in the objective standards to retain and promote the City's vernacular built environment.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2026

Objective: Reduce constraints on development to significantly increase production of housing to match housing need.

Action 3.4.8: Implement objective design standards.

The City currently requires design review for nearly all residential development, which can significantly lengthen the time required for project approval. To reduce the permitting timeline, the City has initiated a process to develop objective design standards to streamline the approval of residential, mixed-use, and commercial building types, with a particular focus on much-needed affordable housing projects in transit-rich areas. As opposed to "design guidelines," objective design standards will not be subject to interpretation, and will result in faster, more predictable approvals of high-quality development that respects Oakland's history and benefits the local community. Housing development projects will have the ability to utilize the objective design standards that will not require evaluation under the regular design review criteria provided under Planning Code Section 17.136.050, including the existing criteria that the project will "enhance desirable neighborhood characteristics." Project applicants may also choose to instead utilize the regular design review criteria and process in order to have greater flexibility and creativity in design criteria.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees, and SB2 Grant for Objective Design Standards

Timeline: The City will adopt objective design standards that will be available to all housing development projects by 2024

Objective: Reduce constraints to development to significantly increase production of housing to match housing need.

Action 3.4.9: Implement new ADU standards that streamline approvals and address unpermitted units.

In January 2022, the City updated its ADU regulations to comply with changes in State law. To address unpermitted units, the new ADU regulations go beyond minimum compliance with State law and establish an expansive legalization process for unpermitted ADUs addressing not only any existing non-compliance issues with the Building Code but the Planning Code as well. The City has also initiated a program to allow pre-approved construction documents for ADUs that creates a more streamlined approval pathway for many homeowners The City will continue to implement this legalization and streamlining of ADU permitting processes. The City will study options to alleviate the burden of the building code on the legalization of unpermitted ADUs.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 and Ongoing

Objective: Reduce constraints to development to significantly increase production of ADUs to help address housing need.

Action 3.4.10: Implement a Housing Sites Overlay Zone to permit sites included in the Housing Sites Inventory to develop with affordable housing by right

Pursuant to State law, the City is required to permit vacant sites included in two consecutive prior RHNA cycles and non-vacant sites included in at least one prior RHNA to develop with owner-occupied and rental multifamily uses by right for developments in which 20 percent or more of the units are affordable to lower-income households. This means that the City cannot require any form of discretionary review or approval for such projects.

The City will create a Housing Sites Overlay Zone to permit sites identified in the 4th and 5th RHNA cycles as part of the Housing Element's Housing Sites Inventory (identified in Table C-26 in Appendix C) to build 20 percent or more of the units are affordable to lower-income households to be subject to by-right approval. In addition, the City will also look at ways to incentivize developers to build affordable housing on newly included sites identified through the 6th RHNA cycle in the Housing Sites Overlay. All parcels within the Housing Sites Overlay Zone (whether they were in the 4th or 5th cycles or new in the 6th RHNA cycle) if redeveloped will be required to be developed as a majority-residential use. A 100% non-residential use will not be allowed in this overlay. This action is intended facilitate housing opportunities in Oakland and to bring attention to those sites that the City intends for housing to be built pursuant to State requirements.

This means that the City cannot require any form of discretionary review or approval for such projects. A proposed project would also not be subject to CEQA and would not be appealable. This would provide greater certainty to projects building at least 20% affordable units that if the project is within the Housing Sites Overlay Zone and meets the objective design standards and zoning criteria listed in the Planning Code, the project will be approved and not held up through an appeal process. See Appendix J for a summary of the Housing Sites Overlay Zone.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June - July 2023

Objective: Reduce constraints to development to significantly increase production of housing to match housing need.

Action 3.4.11: Promote educator and/or student housing on public land by reviewing the zoning and General Plan designations of Oakland Unified School District (OUSD) and Peralta Community College District-owned sites for consistency with housing.

Several school districts and community college districts in California have successfully built affordable housing for educators and/or students on their property. In some cases, this housing was built on district offices and other non-instructional sites. In other cases, housing was carefully co-located with an active school campus. The State has also recently invested hundreds of millions towards student housing on community college property. The City will review OUSD- and Peralta-owned sites to identify, and when practical correct, land use conflicts that would prevent affordable housing development.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2025 with the adoption of the Land Use and Transportation Element

Objective: Reduce constraints to development to allow for at least one educator and/or student housing project during the sixth cycle RHNA period.

POLICY 3.5. EXPLORE INNOVATIVE AND ALTERNATIVE HOUSING MODELS

Action 3.5.1: Support community land trusts and other shared equity models.

The City has worked with a variety of community land trusts, including East Bay Permanent Real Estate Cooperative, Sogorea Te', Oakland Community Land Trust, Bay Area Community Land Trust and the Northern California Land Trust to provide affordable housing (including ownership housing). Most significantly, the City created the Acquisition and Conversion to Affordable Housing (ACAH) Program, which has provided funds through Bond Measure KK to community land trusts to acquire and preserve affordable housing units (see Action 3.3.10). Starting in 2019, the ACAH Program was bifurcated into two subprograms to establish a set-aside for community land trusts and limited equity housing cooperatives after Council passed the 2019-21 Budget, which allocated $12 million to the Preservation of Affordable Housing Fund (PAHF). The City will continue to offer the ACAH Program and support community land trusts and limited equity housing cooperatives using additional funding sources. The City is also working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units and will implement these practices going forward. Financial or technical assistance may become available from the Bay Area Housing Finance Agency (BAHFA) or possible State programs. The City will prioritize lower-income residents and residents at risk of displacement while supporting shared equity models.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Impact fees, General Fund Surcharge, infrastructure bond funds, HOME, Measure U Bond Funds, CDBG, and other local, State, and federal funding as available

Timeline: Funds will be made available to equity affordability models through the City's annual affordable housing NOFAs on an annual or bi-annual basis (2023-2031). The next ACAH NOFA release is anticipated in December 2022.

Objective: Oakland Department of Housing and Community Development will continue to make funds available to shared equity affordability models as per current practice.

Action 3.5.2: Support housing cooperatives, co-living, and cohousing models.

Formal and informal housing cooperatives, co-living and cohousing models in Oakland have traditionally provided an alternative form of affordable housing, including ownership housing. To further support these initiatives, the City will conduct outreach with community-based organizations and other community partners to identify ways the City can support these models, especially for lower-income residents. The City will prioritize lower-income residents and residents at risk of displacement when supporting these alternative housing models. The City will study how the Planning Code and building occupancy standards affect the viability of these models. The Oakland Department of Housing and Community Development will also continue to support cooperatives and community land trusts through its Acquisition and Conversion to Affordable Housing program.

Responsible Agency: Oakland Department of Housing and Community Development, Oakland Planning and Building Department

Potential Funding Source: Impact fees, General Fund Surcharge, Measure U bond funds, HOME, CDBG, and other local, State, and federal funding as available

Timeline: Since 2019, the Acquisition and Conversion to Affordable Housing (ACAH) program

has included set-asides for coops and community land trusts, based on input received from community stakeholders. $12 million was allocated through the 2019-2021 budget, and the City will continue to implement a significant set-aside in future ACAH NOFAs, which are expected to be issued at least every other year through the 2023-2031 Housing Element cycle depending on staffing capacity and funding availability. The next ACAH NOFA is anticipated to be released in December 2022 (see Action 3.3.10). In 2024-2025 the City will study the Planning Code and building occupancy standards as well.

Objective: Oakland Department of Housing and Community Development will continue to make funds available to housing cooperatives as per current practice. The City will also include cooperatives, co-living and cohousing models in its study of the Planning Code and building occupancy standards.

Action 3.5.3: Advocate for statewide legislation on social housing.

The City of Oakland recognizes that the statewide housing crisis requires statewide solutions. As such, the City will advocate for social housing legislation under consideration in the State legislature, known as the California Social Housing Act or AB 2053. The Act would establish a California Housing Authority (CHA) to produce and preserve social housing – publicly-owned and mixed-income developments that maintain homes as permanently affordable. In addition, the City will track and advocate for statewide efforts to repeal Article 34 of the State Constitution that directly inhibits the ability of local jurisdictions to meet RHNA goals.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: City legislative advocacy will be funded through the existing general fund-supported contract for State legislative representation services.

Timeline: Ongoing, 2023-2031; the City will continue advocacy for social housing and Article 34 repeal legislation until it is adopted.

Objective: The State of California will successfully adopt social housing legislation and repeal Article 34.

Action: 3.5.4: Monitor and consider adopting shallow subsidy programs for lower-income households.

The City will continue to evaluate the merits of shallow-subsidy acquisition and development models to assist in the construction or preservation of housing for lower-income households, potentially in partnership with other regional agencies including Alameda County and the Bay Area Housing Finance Authority. However, such a program typically involves acquisition of rent-stabilized housing stock, which often enjoy strong protections under Oakland's Rent Adjustment Program. Recent changes to the Rent Adjustment Program Ordinance may provide equal or greater benefit to target households as a shallow subsidy affordable housing program. For this reason, it would make sense to evaluate the impact of these changes before further considering the adoption of a program.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: The model could be financed by de minimis appropriations of general fund revenue, with additional ongoing subsidies in the form of property tax abatements.

Timeline: By December 2025, the Oakland Department of Housing and Community Development will conduct an analysis of the added benefits a project-based shallow subsidy program may bring, compared to the benefits associated with existing rent stabilization measures.

Objective: Use property tax abatements to preserve, improve, or increase the supply of housing available to lower-income households

Action: 3.5.5: Study Feasibility of Single-Stair Residential Buildings.

Building regulations serve to establish minimum safety standards in construction. Historically, fire and life safety strategies have focused on standards that ensure building occupants are able to safely evacuate a building during an emergency. Modern strategies focus more on containing fires where they occur through sprinkler systems, fire alarms, pressurized stairwells, fire-treated lumber, and similar strategies.

The California Building Code Section 1629 currently requires buildings to provide a minimum of two stairways in buildings exceeding 3 stories or 36 feet, and California Building Code Section 1006.2.1 generally requires two means of egress where the design occupant load exceeds values specified in an accompanying table. In contrast, the City of Seattle allows for building up to six stories to include only one stairway for egress, and many European residential buildings are constructed as tall as ten stories with single-stair access. A single-stair, or vertical shared access, building construction allows for greater flexibility in design, more efficient layouts, and potentially reduced costs. Currently, there are gaps in available data regarding the impact of these building code requirements on increasing construction cost and the safety benefits of requiring a second egress in combination with fire containment strategies.

The City of Oakland cannot unilaterally relax these California Building Code stairway and egress code requirements; change would be required at the state level. Nonetheless, to catalyze discussion on the issue and prepare for implementing future reforms, the City will study current stairway and egress requirements, including consideration of what cost savings could be incurred through revision of the second egress requirement and review of any potential fire safety concerns.

Responsible Agency: Oakland Planning & Building Department; Oakland Fire Department

Potential Funding Source: General Plan Surcharge and permit fees.

Timeline: The City will present a report on the topic of existing second egress requirements and the impact of potential reforms to the Oakland Community and Economic Development Committee of City Council by the end of 2024.

Objective: Create additional information on single-stair reform that could assist in promoting statewide changes to the California Building Code second egress requirements.

POLICY 3.6. STREAMLINE THE APPROVAL OF NEW HOUSING

Action 3.6.1: Streamline the City permitting process, especially for low-income and nonprofit builders.

The City will work with developers and housing stakeholders, particularly low-income and nonprofit builders, to review current processes and fees to identify actions to reduce costs and streamline the planning approval and building permit processes for small infill development. These actions could involve developing simplified CEQA compliance through qualified exemptions, implementing objective design standards as described in Action 3.4.8, and/or increasing staffing at the Planning and Building Bureaus to reduce permit processing time. The City will regularly review and update its website to improve navigation and make information such as fee schedules, application forms, zoning ordinances, and other information available on the City's website, along with other educational information to facilitate the permit process.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2025 and ongoing

Objective: Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.

Action 3.6.2: Provide increased flexibility in development standards.

The City will provide increased flexibility in development standards, with a focus on smaller infill residential projects, to ensure that these projects can qualify for streamlined permitting without need for variances. The City will also consider increasing staff-level authority, with clear guidelines, to grant minor exceptions without the need for a variance, which can also reduce project timelines and costs. Alongside the efforts described in Actions 3.2.1, this flexibility will increase the capacity of the Planning Bureau to permit a variety of units, more expediently, creating more residential units in traditionally lower-density neighborhoods.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2025 and ongoing

Objective: Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.

Action 3.6.3: Expand by-right approvals and implement entitlement reform for affordable housing.

Through the implementation of objective design standards as described in Action 3.4.8, the City will create a ministerial review pathway for qualifying developments based on project size, type, affordability level, and location. Discretionary design review will still be required for some types of projects and where certain adjustments are requested. As part of the entitlement reform process, the City will consider fee subsidies and/or payment deferrals to better accommodate affordable housing projects and increase the financial feasibility of affordable projects (see Action 3.3.9). The City will work with community partners and affordable housing developers to identify and implement appropriate entitlement reform actions.

Responsible Agency: Oakland Planning & Building Department; Oakland Department of Finance

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2025 and ongoing

Objective: Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.

Action 3.6.4: Continue SB 35 streamlining and encourage projects to use it.

SB 35 created a streamlined and ministerial approval process for housing projects that meet siting and construction criteria including being located in communities that have failed to meet their RHNA. The City of Oakland was among the 225 jurisdictions that made insufficient progress towards meeting the RHNA for low- and very-low-income housing at the time of the State's most recent determination in 2021 and is therefore subject to the streamlining provisions for proposed development in which 50 percent or more of the units will be affordable. The City provides an SB 35 streamlining checklist to facilitate the development of affordable housing, and will actively promote use of SB 35 streamlining for 100 percent affordable projects.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 and ongoing

Objective: Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.

Action 3.6.5: Continue one-stop and online permitting services.

Through the Online Permit Center (Accela Citizen Access), property owners are able to apply for and follow the status of their permits online.

The City also operates an in-person One-Stop Permit Center, where the counter services of the Planning & Building Department, Oakland Fire Department, and Department of Transportation have been combined in one location to expedite the permitting process. The City will continue to offer both online and in-person permitting services to reduce permitting timelines. The City will also coordinate with affordable housing developers to understand and correct the gaps in these services.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2031

Objective: Significantly increase production of housing projects, specifically by low-income and nonprofit builders, to match housing need.

POLICY 3.7. EXPAND OPTIONS FOR SPECIAL NEEDS HOUSING

Action 3.7.1: Incentivize the development of senior housing and provide financial assistance to developers of housing for seniors and persons with special needs.

The City will continue to encourage a wide variety of senior housing opportunities, particularly for lower-income seniors with special needs, through the provision of financial assistance and regulatory incentives as specified in the Planning Code. The City will continue to award points in its consideration of housing funding to projects that serve special needs populations, including seniors and homeless individuals. The City will explore options to expand the amount of financial assistance available to developers of housing for seniors and persons with special needs and will commit to transparent reporting of how special needs units are assisted. Special needs populations may include, but are not limited to, formerly incarcerated individuals, former foster youth, and persons with developmental disabilities.

Responsible Agency: Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available

Timeline: Ongoing 2023-2031; By December 2023, the City will complete an analysis of how the clients served by its funded affordable housing compare to the demographics of Oakland residents, including an analysis of age.

Objective: The City will continue to provide bonus scoring points for special needs populations as found in current practices.

Action 3.7.2: Provide housing for persons with HIV/AIDS.

The City will continue to provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. The City will enhance outcomes via housing first model under the Alameda County EveryOne Home Plan.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, HOME, HOPWA, local infrastructure bond funds, and other local, State, and federal funding as available

Timeline: Ongoing, 2023-2031

Objective: The City will continue to provide bonus scoring points for special needs populations as found in current practices.

Action 3.7.3: Accessible units in new housing developments.

The City of Oakland's Housing Development Services division will uphold and align with State and Federal funding requirements for accessibility standards, which for most new construction projects requires at least double requirements under ADA and State building codes.

Responsible Agency: Oakland Department of Housing and Community Development

Potential Funding Source: Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available

Timeline: Ongoing, 2023-2031

Objective: The City will continue to meet the requirements of the Americans with Disabilities Act and the Fair Housing Act, among other local, state, and federal laws to ensure accessible units are included in new housing developments.

Action 3.7.4: Implement the sponsor-based Housing Assistance Program.

The City will continue to work with the Oakland Housing Authority (OHA) to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service-enriched housing options that increase housing choice for special needs populations. The City will explore options to find more landlords willing to participate in the program.

OHA has its own community and social services arm, the Family and Community Partnerships Department (FCP). FCP educates and assists residents including search assistance and also works closely with owners during the leasing process to remove barriers and identify needed resources. OHA offers an array of Owner Benefits such as vacancy loss, an owner leasing bonus, and repair cost assistance. OHA's operations include two dedicated Owner Services teams and ongoing owner focused activities such as our Owner online Portal, educational webinars and emails, electronic forms options and outreach events such as our Owner Appreciation Day.

Responsible Agency: Oakland Human Services Department; Oakland Housing Authority

Potential Funding Source: Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available

Timeline: Between 2023-2031, the City and OHA will promote and encourage OHA landlords to participate in this program through ongoing activities and annual events.

Objective: The City will continue to work with the Oakland Housing Authority to support households successfully finding housing.

Action 3.7.5: Encourage a range of unit sizes for affordable housing that matches local household needs and family sizes.

The City will regularly review household size data from affordable housing application portals and waitlists to ensure that affordable housing production is aligned with community needs. City affordable housing funding priorities will be adjusted as needed to be aligned with demand across the spectrum of unit sizes and housing types. This may include large units suitable for multi-generational families, studios and efficiency units for individuals, and projects with common areas appropriate to seniors, families, or other demographic groups.

Responsible Agency: Oakland Department of Housing and Community Development; Planning & Building Department

Potential Funding Source: Development impact fees, HOME, local infrastructure bond funds, and other local, State, and federal funding as available

Timeline: The City will monitor available data from affordable housing application portals to comprehensively evaluate the unit size needs of Oakland residents and adjust NOFA scoring accordingly, to prioritize allocating City funds to projects by 2024. Furthermore, the City will aim to regularly evaluate local household needs prior to NOFA releases. This will be prioritized, but not limited to, the new construction NOFA released approximately every other year to ensure affordable housing production is aligned with community needs.

Objective: The City will adjust scoring points as needed to encourage housing typologies that reflect local household needs.

Action 3.7.6: Expand areas where rooming units and efficiency units are permitted by right.

The Oakland Planning Code currently provides for rooming units to be developed at twice the residential density otherwise allowed for regular dwelling units in Neighborhood Center, Community Commercial, Central Business District, Housing and Business Mix, and Transit-Oriented Development Commercial Zones, as well as within the special districts for implementation of the Broadway Valdez, Lake Merritt, and Coliseum Specific Plans. Recent Planning Code amendments similarly allow for efficiency units to be built at twice the density of more typically sized residential dwelling units. The City will expand these provisions to additional zoning districts, including in zones covered by the proposed affordable housing overlay. The City will also revise the Planning Code to permit rooming house facility types more similarly to multifamily residential facilities. These smaller, more modest units are more likely to be a source of naturally occurring affordable housing over the long term, while also allowing new development to align with current demographic trends towards smaller household sizes.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 – 2026

Objective: Enable increased production of rooming units and efficiency units.

Action 3.7.7: Amend Planning Code to comply with the Employee Housing Act.

Farm and agricultural employee housing is a type of employee housing under the Employee Housing Act, California Health and Safety Code Sections 17000 et seq. Section 17021.5 of the Employee Housing Act requires that any employee housing providing accommodations for six or fewer employees shall be deemed a single-family structure with a residential land use designation, and not be subject to any conditional use permit, zoning variance, or other zoning clearance that is not required of a family dwelling of the same type in the same zone. Section 17021.6 of the Employee Housing Act requires employee housing consisting of no more than 36 beds in a group quarters or 12 units designed for use by a single family or household to be deemed an agricultural land use. The City will amend the Oakland Planning Code to modify the definitions of Limited Agricultural Activities, Extensive Agricultural Activities, and One-Family Dwelling Residential Facilities to comply with the Employee Housing Act.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June-July 2023

Objective: Ensure compliance with the Employee Housing Act.

Action 3.7.8: Expand areas where Residential Care Facilities are permitted by right.

The Oakland Planning Code currently permits residential care facilities in residential and nonresidential zones if located in single family dwellings. Conditional Use Permits are required for residential care facilities if they are located in any other residential facility type and/or when located on the ground floor of a street fronting building in certain commercial zones. The City will amend the Planning Code to expand where residential care facilities are permitted by right. The amendments will include all residential facility types and those located on the ground floor of a street fronting building. In addition, the City will amend the Planning Code to allow residential care facilities for foster family homes and the elderly within 300 feet of another residential care facility, since the State calls out this exemption in the overconcentration restriction in California Health and Safety Code Section 1520.5.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: June-July 2023

Objective: Enable expansion of residential care facilities by right and allow the exemption of facilities for foster family homes and the elderly in the overconcentration restriction provided in California Health and Safety Code Section 1520.5.

POLICY 3.8. CONVERT VACANT LAND AND UNITS TO HOUSING

Action 3.8.1: Continue to implement the Vacant Property Tax (VPT).

On November 6, 2018, Oakland voters approved Measure W, the Oakland VPT. The VPT Act establishes an annual tax of $3,000 to $6,000 on vacant property. A property is considered "vacant" if it is "in use less than fifty days in a calendar year," and not subject to any of 10 exemptions. The City will continue to implement the VPT to encourage active uses on vacant land and regularly monitor the effectiveness of the program. The City will analyze expansion of exemptions to the VPT to reduce the impacts of unintended hardships on nonprofit and affordable housing developers, discussed under Action 3.8.3. As directed by Council, funding from this measure may be spent on homeless services, affordable housing, and illegal dumping cleanup.

Responsible Agency: Oakland Department of Finance; Department of Human Services; Oakland Planning & Building Department, Oakland Department of Housing and Community Development

Potential Funding Source: Self-funding through the vacant property tax

Timeline: End of 2023 (Analysis of exemptions will be complete)

Objective: Through the vacant parcel tax, seek a 10 percent reduction in vacant parcels by the end of the Housing Element period.

Action 3.8.2: Encourage the conversion of vacant ground floor commercial space to residential uses in appropriate locations.

Traditional brick-and-mortar commercial and retail businesses have continued to transition to an Internet-based model, which has been further accelerated by the COVID-19 pandemic. As a result, a significant number of ground-floor commercial

and retail spaces in Oakland remain vacant. The City will explore opportunities to promote the conversion of vacant ground floor spaces in certain areas to live/work or other residential use, as may be appropriate in the local context. The City will also explore other opportunities to promote the conversion of vacant office or commercial space to housing, in alignment with the recently passed AB 2011 and SB 6.

Responsible Agency: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeline: 2023 - 2026

Objective: Expand the areas where residential space is an allowable ground-floor use.

Action 3.8.3: Tax vacant residential rental units.

Although housing demand in Oakland remains extremely high, the City experiences a higher vacancy rate than both Alameda County and the Bay Area overall. This results from a variety of factors but may ultimately lead to higher housing costs. Oakland currently has in place vacancy tax on parcels and several types of housing units – including condos, duplexes, and townhome units under separate ownership. The City will consider extending the current vacancy tax to all residential units to encourage active use of residential units and expand the available housing supply.

Responsible Agency: Oakland Department of Finance

Potential Funding Source: General Fund

Timeline: Consider by the end of 2026 whether the vacant parcel tax ought to be revised or expanded

Objective: Increase the housing stock by ensuring existing units are made available to rent.

Action 3.8.4: Continue the Oakland Community Buying Program and support scattered site acquisition efforts.

The City continues to administer the Community Buying Program, which assists Oakland residents in purchasing affordable homes. These properties have been made available through programs like the Oaktown Roots Affordable Homes pilot program and local community land trusts, like the Oakland Community Land Trust and the Bay Area Community Land Trust. These programs will also help promote long-term affordable homeownership, which will also promote the objectives of Policy 5.1.

Responsible Agency: Oakland Department of Housing and Community Development; Oakland Department of Finance

Potential Funding Source: Development impact fees, HOME, local infrastructure bond, and other local, State, and federal funding as available

Timeline: Ongoing, 2023-2031

Objective: As additional funding is available, continue to convert vacant parcels to affordable housing.

Action 3.8.5. Partner with Alameda County Tax Collector to redevelop tax defaulted properties.

Partner with the Alameda County Tax Collector to identify tax-defaulted property suitable for development or preservation as affordable housing. Through use of the Chapter 8 tax sale program, make this property available to affordable housing providers, community land trusts, and related organizations, either by encouraging nonprofits to directly acquire through Chapter 8, or by pulling properties from auction to administer through a City program. Oakland Housing & Community Development has secured a full-time fellow through the Breakthrough Grant Program to

focus on creating an emerging developer program (Action 3.3.17), and exploring how tax-defaulted properties, among other development and funding opportunities, could be leveraged as an entry point for emerging developers.

Responsible Party: Oakland Department of Housing and Community Development, Oakland Economic and Workforce Development Department

Funding: Contributory value of the land, impact fees, HOME, other local, State, and federal funds as available

Timeline: Ongoing, 2023-2031. Breakthrough Grant fellow completes BIPOC and emerging developer program development in 2023, and will analyze tax-defaulted property program opportunities by end of his term in 2024.

Objective: As funding, partners, and suitable parcels become available, tax defaulted properties will become available as affordable housing.

Goal 4. Address Homelessness and Expand Services for the Unhoused

The City of Oakland is facing an unprecedented humanitarian crisis of residents who are experiencing homelessness. As the United Nations notes in its mandate on the right to adequate housing, the right to adequate housing is more than having a roof over one's head, it is the right to live in safety and dignity in a decent home; HUD Secretary Fudge has declared that "housing is a human right." Goals, policies, and actions in this Housing Action Plan recognize housing as a human right. and that permanent housing is the solution to homelessness. Policies and actions proposed as part of Goal 3 seek to expand affordable housing options. Goal 4 seeks to address homelessness through strategies that enable coordination across the spectrum, from homelessness prevention to transitional housing/shelter and services to permanent supportive and deeply affordable housing with resources for long-term support.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Homelessness disproportionately impacts Oakland's BIPOC residents, particularly the city's Black residents. Further, special needs households—including extremely-low-income

households—tend to be at greater risk of experiencing homelessness. Addressing homelessness and providing high quality services to the unhoused is also a racial equity issue and must be part of the City's efforts to affirmatively further fair housing. By expanding access to quality homelessness services across Oakland, and seeking to expand transitional housing options in a citywide manner, the City will work to avoid an overconcentration in homelessness and homelessness-related services in disadvantaged neighborhoods. Further, by expanding economic opportunities for the unhoused, Oakland will help those currently unhoused access housing opportunities in a variety of Oakland neighborhoods. This goal, and the policies and actions that implement it, will address fair housing issues as they relate to homelessness in Oakland.

POLICY 4.1 EXPANSION OF HOMELESS SERVICES

Action 4.1.1: Expand, improve, and maintain crisis response beds.

Since 2018, the City has expanded its supply of emergency interim housing (community cabins, shelter beds, Safe RV parking) by over 1,000 beds/spaces. This increase is almost entirely funded by one-time funds. The City will use local, county, State, and federal funding to maintain these new resources and to improve the effectiveness of these beds in moving people to permanent housing (for example, by adding rapid rehousing exit resources). In addition, the City will continue to expand the interim housing sites and other forms of housing for people experiencing homelessness in the City. The City will ensure that such housing options include supportive services such as rapid rehousing assistance, housing navigation, and access to resources via Coordinated Entry. The City will seek to partner with Alameda County to provide mental health and substance use services in interim sites and will partner with mainstream workforce programs to support on site job training programs. The City will coordinate efficient provision of services and resources from private, nonprofit, local, Alameda County, and State organizations

Responsible Party: Oakland Human Services Department

Potential Funding Source: Measure Q, ESG, State Homeless Housing Assistance and Prevention Funding, various HUD funding sources, CalAIM (through County)

Timeframe: Expand on the availability of outreach and social services to increase connections to emergency, interim, and long term housing supports by 2031

Objectives: 1. Increase the number of people who are experiencing homelessness in Oakland who are sheltered; and 2. Invest in and improve the quality of interim housing programs so that more people exit to permanent housing and more people exit to permanent housing more quickly.

Action 4.1.2: Expand, improve, and maintain crisis response beds, especially for unsheltered communities of color.

Increasing the number of crisis response beds helps to address the disproportionate rates of unsheltered homelessness among communities of color, especially among African American households. Creating additional facilities in many parts of the city will assist households experiencing homelessness to remain in their communities will reduce the number of African American households who are displaced from Oakland. The City will track data to ensure that African American households are using emergency crisis response beds and exiting to permanent housing at rates that are proportional to their representation in the homeless population. The Centering Racial Equity in Homeless Response System Design (Berkeley, Oakland, Alameda County Continuum of Care published in 2021) outlines suggested investment for scaling to solutions for unsheltered communities of color utilizing recent Point in Time count data.

Responsible Party: Homelessness Division, Office of the City Administrator; Oakland Human Services Department

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: The City of Oakland will continue to develop a data informed strategy for increasing equitable investments in homelessness systems to serve people of color by 2031.

Objectives: Increase and stabilize people while providing opportunities to improve income they need to avoid entering or returning to homelessness.

Action 4.1.3: Expand health and hygiene facilities and services, and improve access to bathrooms and showers.

Starting in FY 20-21, this intervention has greatly expanded to serve a minimum of 60 curbside sites with porta-potties, handwashing stations, and garbage pick-up. Oakland's Human Services Department has created two new outreach staff positions whose primary role is to support the participating encampments with maintaining the services, cleanliness, and compliance with the Encampment Management Policy. These City staff also support designated site leadership at each encampment site. The site leaders ensure that the porta-potties are used appropriately, and keep the units clean in between the official servicing. City staff provide the site leaders with cleaning supplies and stipends for their work. Per Council directive, the goal is to increase to 100 sites and four City outreach staff.

Responsible Party: Homeless Division, Office of the City Administrator; Oakland Human Services Department

Potential Funding Source: State Homeless Housing Assistance and Prevention Funding, City General Fund

Timeframe: FY 2022-2023 – FY 2024-2025

Objectives: More people experiencing unsheltered homelessness have access to services which promote health and dignity.

Action 4.1.4: Provide needed support and income to people who have been homeless so they can avoid returning to homelessness.

Recognizing that a lack of access to living wage jobs is a significant driver of homelessness in Oakland, the City will work with the Oakland Unified School District (OUSD), higher educational institutions, related nonprofit agencies, business and other partners to create low barrier work opportunities for people who are currently unsheltered. These programs will offer support for development of work-related skills, provide services to address employment barriers specifically targeted to the needs of unhoused residents and increase the co-location and collaboration between providers of homeless assistance and employment programs and services. In addition, the City will work to match small business owners who want to address homelessness with job seekers who are homeless or formerly homeless.

Strategies to include:

- Low barrier work opportunities, for people rentering the workforce
- Add employment specialist positions in core homeless services/prevention services programs
- Flexible funding pool to support career track training and employment programs
- Benefits advocacy to obtain SSI or other income for which they are eligible

Responsible Party: Oakland Human Services Department; Economic and Workforce Development Department; Homelessness Division, Office of the City Administrator

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: Increase and expand support

for systems navigation, social services, and employment by 2031. Continue development and implementation of low barrier work opportunity programs in partnership with OUSD and other partners by end of 2026. Develop and implement programs to match small business owners with job seekers who are homeless or formerly homeless by end of 2026.

Objectives: Reduction in the number of households which return to homelessness in the two years after obtaining housing.

POLICY 4.2 ENCAMPMENT MANAGEMENT AND SHELTER OFFER POLICIES

Action 4.2.1: Enhance operations of the City's 2020 Encampment Management Policy.

The City of Oakland adopted the 2020 Encampment Management Policy. The purpose of this policy is to protect and serve all Oaklanders, sheltered and unsheltered, and to manage the adverse impacts of homeless encampments by balancing the interests of all residents, focusing encampments actions on mitigating negative outcomes as they pertain to public safety, public health, and equity outcomes. The City will continue implementing the Encampment Management Policy during the 2023-2031 Housing Element period. The City of Oakland will also continue to scale the appropriate level of public works related services to address debris, garbage and illegal dumping associated with encampments. The City will continue to improve and expand on the development and implementation of Emergency Shelter and crisis response beds in an effort at address and abate conditions at homeless encampments in Oakland. The Encampment Policy will continue to being predicated by an offer of shelter as outlined in City of Oakland Resolution 88077.

Responsible Party: Homelessness Division, Office of the City Administrator

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: The City of Oakland will continue improving the implementation of the Encampment Management Policy throughout the duration of this Housing Element Period, 2023-2031.

Objectives: The Encampment Management Policy is intended to connect unsheltered individuals to human services, emergency shelter and long term permanent supportive housing, while executing comprehensive operations focused on managing health and safety conditions of public spaces. The goal is to provide regular and adequate trash collection from encampments, close areas where encampments are not permitted, and ensure that porta-potties and hand-washing stations are serviced regularly as needed and that encampments receive regular deep cleanings so that our unhoused residents are not living in conditions that threaten health and/or safety until fully abated.

The policy sets forth the following objectives:

- Designate high-sensitivity areas, where unmanaged encampments are presumed to cause unreasonably high levels of health and safety impacts due to the nature of the location;
- Designate low-sensitivity areas, where enforcement will not be prioritized;
- Make findings that will prompt Encampment Management Team intervention; and
- Provide guidance on addressing unreasonable health and safety risks, promoting voluntary compliance, and strategies to address non-compliance.

Action 4.2.2: Lead strategic homelessness response operations and homeless services from the Homelessness Division, Office of the City Administrator.

Homelessness intersects with multiple departments and agencies, all of which fall under the City Administrator's purview. Leading from the Office of the City Administrator, the Homelessness Division serves as the primary liaison between the City Administrator's Office and internal and external agencies, along with other City departments, regarding the City's homelessness response and provides inter- and intra-agency coordination focusing on the City's management of its unsheltered population. This division directs the program and operational decision-making in division activities; encampment management response teams and task forces; organizes, manages, and directs the review and implementation of the City's major projects. The division serves to implement best practices, strategic planning in the City's Homeless System, and serve as a connection to local, state, and federal partners.

Responsible Party: Homelessness Division, Office of the City Administrator

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: Design, review, implement and evaluate a strategic planning process in response to homeless services and interventions during 2023—2031

Objectives: Lead the implementation, expansion, and strategic coordination of Homeless Response Operations and Service Delivery across City of Oakland departments, and external public and private partners, organizations, and agencies.

Action 4.2.3: Strengthen interdepartmental Encampment Management Team.

The Encampment Management Team (EMT) is an interdepartmental working group tasked with implementing and administering this policy, consisting of representatives from Oakland's Public Works Department, Human Services Department, Oakland Policy Department, Oakland Fire Department, the City Administrator's Office (CAO), and other consulted departments as necessary (e.g., the Mayor's Office, the City Attorney's Office, Parks and Recreation). The EMT is facilitated by the CAO via the Homelessness Administrator.

Responsible Party: Homelessness Division, Office of the City Administrator

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: Ongoing, 2023-2031

Objectives: 1. The EMT aims to execute duties assigned to their respective departments for the completion of interventions (Health and Safety) prescribed in the 2020 Encampment Management Policy (Health and Hygiene, Deep Cleanings, Partial Closure, and Closure); 2. To channel unsheltered individuals in every encampment to human services, emergency shelter and long term permanent supportive housing; 3. To effectuate the completion of the Encampment Management Policy interventions, each department may promulgate additional specific procedures necessary to effectuate the roles described in this policy under development specific Standard Operating Procedures.

Action 4.2.4: Increase the oversight of homelessness strategies, investments, outcomes, and encampment operations with Commission on Homelessness.

The City will increase opportunities for leadership and input from people experiencing homelessness in the design, implementation, and evaluation of encampment management and homeless

services. The City of Oakland has formed a Commission on Homelessness that will provide robust opportunity for people with lived experience to inform and contribute to solutions related to individuals experiencing homelessness reaching maximum self-sufficiency. The City will also seek to build trust between law enforcement, social workers, and homeless individuals/families and promote mentorship opportunities for formerly homeless individuals and people recovering from addiction. Further, the City will refine encampment management policies and strategies using qualitative and quantitative data to assess the experience of encampment for BIPOC residents and will implement culturally specific and anti-racist strategies to better meet the short-term needs of BIPOC unsheltered residents.

Responsible Party: Homelessness Division, Office of the City Administrator

Potential Funding Source: Local, State, and federal funding, as available

Timeframe: Improve and develop mechanisms for individuals with lived experience to provide input to the Commission on Homelessness by 2024. Develop, implement and evaluate opportunities for individuals with lived experience to better interact with law enforcement by 2026. Identify and implement best practices that center race and equity in the strategic response to homelessness by 2031.

Objectives: Review and make recommendations of existing and new proposals funding homelessness services funded by City of Oakland Measures Q and W.

Action 4.2.5: Expand co-governance and partnerships with unsheltered residents in the design and delivery of homelessness services.

In FY 21-22 the City opened its first co-governed program site. Co-governance is an intervention model where unsheltered residents come to an agreement about how they will live together in a community setting of an encampment. This includes, but is not limited to, selecting site leadership, determining eligibility for participation, developing community expectations for behaviors and for staffing/running the site, holding each other accountable for the agreed upon expectations, and maintaining the health and safety of the community residents. A backbone agency (nonprofit/community-based agency) works alongside residents to support the residents in the design, leadership and operations of the site. The backbone agency is the contracting entity with the City/funder and holds ultimate accountability for ensuring the safety and security of the site. The City, in partnership with unsheltered residents, will continue to refine this model and to expand this model as new sites open.

Responsible Party: Oakland Human Services Department; Homelessness Division, Office of the City Administrator

Potential Funding Source: Homeless Housing Assistance and Prevention funds, City General Fund

Timeframe: FY 2022-2023 – FY 2024-2025

Objectives: Increase the number of interim housing sites which have people experiencing homelessness as partners in site design and operations.

POLICY 4.3 PROMOTE PERMANENT SUPPORTIVE AND DEEPLY AFFORDABLE HOUSING FOR UNHOUSED COMMUNITIES

Action 4.3.1: Finance the construction and maintenance of permanent supportive and deeply affordable housing for homeless households to expand the supply of deeply affordable and supportive housing for Oakland's most vulnerable residents.

The City will secure and advocate for additional funding for building and operation of permanent supportive and deeply affordable housing for homeless households using a combination of State and federal sources, such as the State Homekey program, the federal HOME-ARP program, and funding from the local Oakland Housing Authority. The City will continue incorporating a preference for City-assisted affordable housing projects that include at least 20 percent of units for vulnerable populations, including but not limited to homeless individuals and families living at or below 30 percent of AMI with additional points awarded in the competitive funding process for projects with units targeting 20 percent of AMI. In addition, the City will increase this homeless set-aside with the issuance of future City funds, awarded through its Notice of Funding Availability (NOFA) programs should operating funding resource availability support the increase. The City will work with residents, service providers, and property owners to ensure adequate and transparent long-term plans for maintenance and service provision within new and existing permanent supportive housing.

The City will also continue pursuing the strategic acquisition of hotel, motel, and dorm facilities by and with nonprofit partners to house unsheltered residents. The City will further work to coordinate Oakland Housing Authority's award process with the City's affordable housing NOFA process and Homekey opportunities. The City will also work with the State and other partners to explore opportunities to expand the supply of extremely-low-income housing for residents that do not require supportive services. These efforts align with the City's HOME-ARP plan that targets HOME-ARP resources to support HUD Qualifying Populations, which include individuals and families who are: experiencing homelessness, at risk of becoming homeless, fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking or human trafficking, at greatest risk of housing instability, and/or needing supportive services or assistance would prevent homelessness.

For example, in September 2022 the City issued a Request for Proposals in advance of for Round 3 State Homekey program funding, and has allocated a total of $35,285,154 from the previous two rounds in local contribution to capital and operating expenses to this program. Through Council approval and in the RFP, the City intends to allocate at least 25 percent of its Round 3 matching funds to projects serving Transition Aged Youth (TAY) clients, through a separate scoring pool for TAY-serving projects. The City is also making a city-owned site, the Clara/Edes parcel, available for Homekey applications. Through Homekey, the City of Oakland partners with experienced housing organizations and service providers to develop and expand housing for people experiencing homelessness or at risk

of homelessness. The City will continue to support six projects that have been awarded through past rounds of Homekey. These projects have added 285 units of affordable housing for people experiencing homelessness since 2020 to 2022.

Responsible Party: Oakland Human Services Department; Oakland Department of Housing and Community Development; Homelessness Division, Office of the City Administrator

Potential Funding Source: Housing Trust Fund, HOME-ARP, State Homeless Housing Assistance and Prevention Funds, California Housing and Community Development Department Homekey Funds,

Timeframe: As funding is available the City will continue to apply for competitive state and federal funding throughout this Housing Element period. The City will continue to identify ways to expand and finance the ideal matrix deeply affordable housing, permanent supportive housing, below market-rate housing, and strategic acquisitions of hotel, motel and dorm facilities by 2031.

The City is planning to release a New Construction NOFA targeting the production of additional permanent supportive housing (PSH) units in 2023. For example, the 2021-22 New Construction NOFA funded 324 units, XXX121 of which are designated homeless units. .

The City released the Round 3 Homekey Request for Proposals in 2022 in order to identify projects prior to the State releasing the Homekey Notice of Funding Availability (NOFA) which is expected to be released in Spring 2023. The City will continue to participate in Homekey, if and when future rounds are funded through the State budget.

Objectives: Secure funding to significantly increase construction and maintenance of permanent supportive and deeply affordable housing to match need for unhoused communities.

Action 4.3.2: Streamline approval for modular developments to provide quality shelter quickly to address the scale of the crisis.

The City will utilize statewide streamlining opportunities, such as categorical CEQA exemptions and Program EIRs, and revise the Planning Code to minimize the need for discretionary review with a ministerial option for projects that utilize objective design standards for approval. The City will also identify and eliminate roadblocks in the review of building permit applications to expedite and increase the production of modular developments and other quick-build shelter solutions on private land in Oakland. The City will also work with other public agencies, including Caltrans, to facilitate and streamline more flexible shelter solutions on public land. The City will ensure that smaller units used as permanent housing units are in compliance with the Building Code to mitigate fire and other public safety hazards.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees, SB2 Grant for Objective Design Standards

Timeframe: Planning Code changes in 2023; ongoing, 2023-2031

Objectives: Significantly increase production of modular developments and other quick-build shelter solutions to match need for unhoused communities.

Action 4.3.3: Remove regulatory constraints to the development of transitional housing and supportive housing.

The City will amend the Planning Code to ensure that transitional housing and supportive housing projects are permitted equivalent to similar permanent residential uses in the appropriate zone.

The City will amend the Planning Code to remove minimum parking requirements for transitional housing. For supportive housing, minimum parking requirements will only apply to employee parking for onsite services, and no minimum parking requirements will apply to the residential units.

The City currently processes supportive housing streamlined projects utilizing Assembly Bill 2162 (2021)/Government Code Section 65651 using the City's multipurpose basic application but has received few applications utilizing this procedure. The first such application was received during the drafting of this Housing Element. To provide greater clarity and encourage the use of this streamlining provision, the City will codify the by right requirements of Government Code Section 65651 into the Oakland Planning Code, and will modify the basic application to identify streamlining under this provision.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan

Timeframe: Planning Code changes in 2023

Objectives: Reduce barriers to the development of transitional and supportive housing.

Action 4.3.4: Ensure that the authority provided by the City's Shelter Crisis Ordinance and Declaration of a Local Emergency regarding Homelessness remains in place until public health and safety concerns no longer persist.

California Government Code Section 8698.4 allows the City Council to declare a shelter crisis when a significant number of persons are without the ability to obtain shelter, resulting in a threat to their health and safety. Upon a declaration of a shelter crisis, the city may allow persons unable to obtain housing to occupy designated public facilities, including facilities leased by the city, during the duration of the crisis. Further, upon a declaration of a shelter crisis, the City may apply reasonable local standards and procedures for the design, site development, and operation of homeless shelters and emergency housing that the City adopts by an ordinance reviewed and approved by State HCD, and provisions of any housing, health, habitability, planning and zoning, or safety standards, procedures or laws, as applied to public facilities, may be suspended.

On January 5, 2016, and subsequently on October 6, 2017 and September 30, 2021, the Oakland City Council adopted ordinances (No. 13348, 13456, and 13662 respectively) declaring a shelter crisis in the City of Oakland. These ordinances were adopted pursuant to the authority provided under state law beginning at California Government Code Section 8698. As these conditions continue to persist, the City Council has regularly renewed its declaration of a local public health emergency about the homelessness crisis at each of its regular Council meetings. On May 21, 2019, after review and approval by State HCD, the City Council additional adopted an Ordinance for Emergency Building Standards Amendments to the 2016 California Building Standards Code that incorporated emergency building standards for emergency housing buildings and facilities, including health and safety standards for recreational vehicles, emergency

sleeping cabins, membrane structures, and other emergency housing on property owned or leased by the City of Oakland. Statewide building standards for emergency housing were incorporated into the 2019 California Building Code and the 2019 California Residential Code and on December 10, 2019 the City Council passed Ordinance No. 13576 adopting these emergencies housing provisions, including the local amendments previously approved by State HCD. Finally, on June 4, 2019, the City Council adopted an ordinance amending the Oakland Planning Code Section 17.07.060.A to allow Emergency Shelter Residential Activities and Emergency Housing Facilities on property designated by the City Administrator and owned or leased by the City.

The City will ensure that the authority provided under the City's Shelter Crisis Ordinance and declaration of a local emergency regarding homelessness remains in place until public health and safety concerns no longer persist. The City will review public health and safety conditions prior to the expiration of the emergency ordinance declaring a shelter crisis, a two-year ordinance, and will continue to review conditions every two years to ensure no gap in the authority provided through the emergency declaration of a shelter crisis. The City will also ensure that subsequent amendments of the building code, a process that occurs every three years as the state building code and residential code is revised, will retain these emergency provisions as authorized under State law.

Responsible Party: Oakland City Council; Oakland City Administrator; Oakland Planning & Building Department.

Potential Funding Source: General Fund

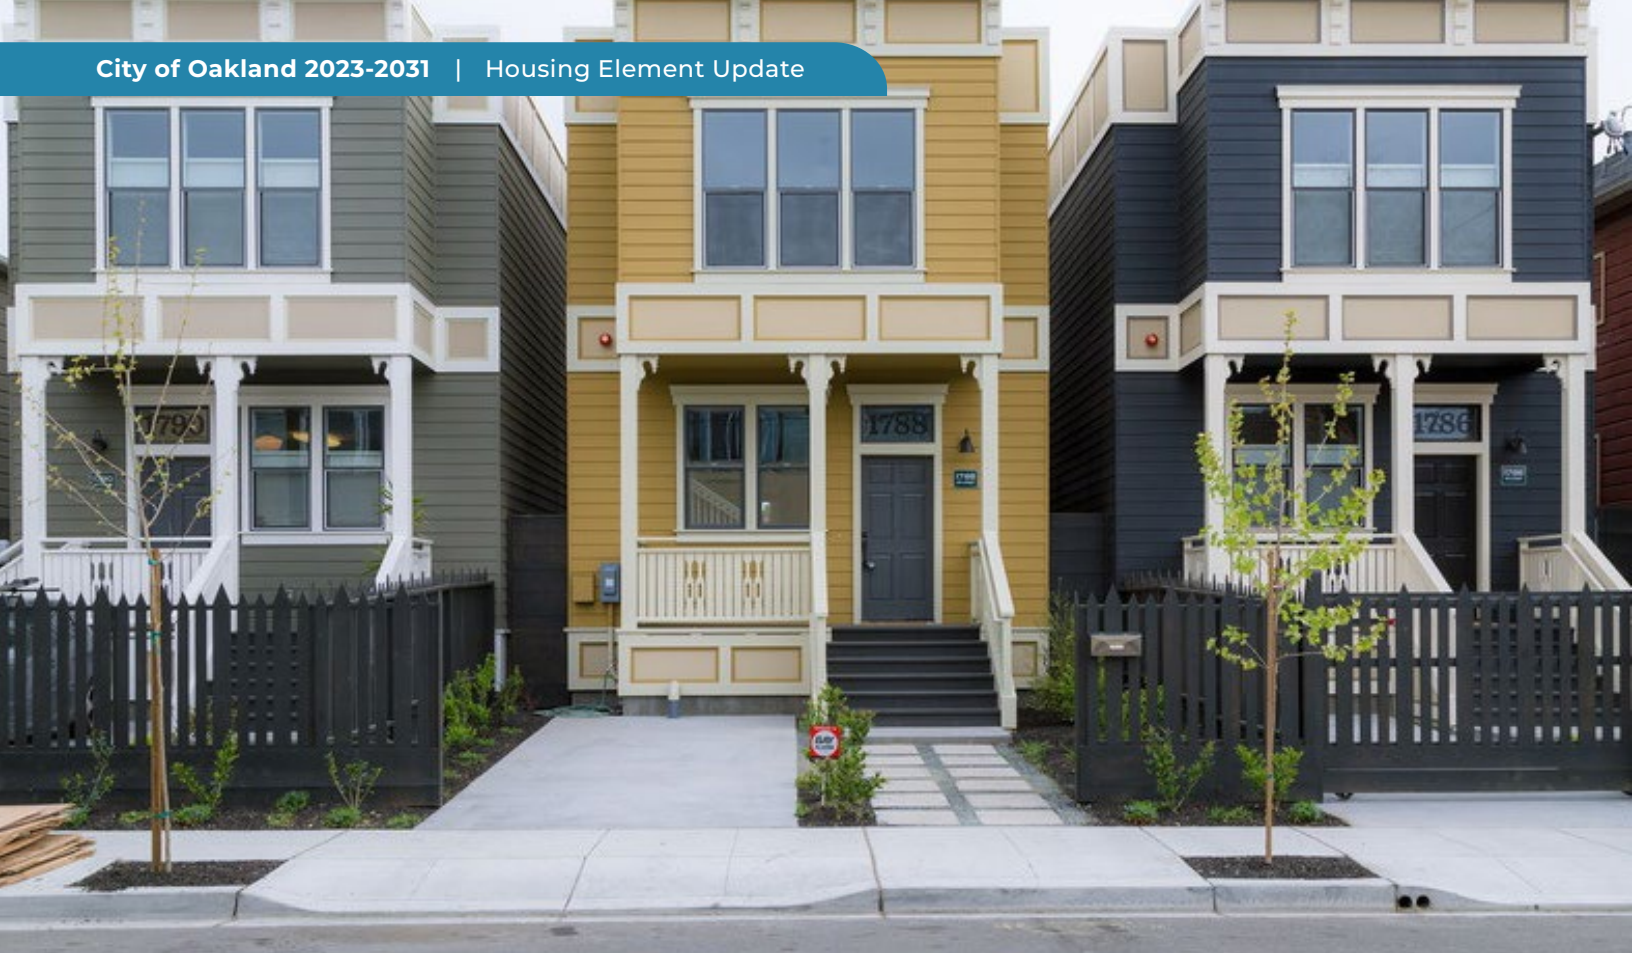
Timeframe: Ongoing

Objectives: Provide additional options for temporary shelter for all persons without the ability to obtain shelter until public health and safety concerns no longer persist.

Action 4.3.5: Provide development standards for Low Barrier Navigation Centers.

Low Barrier Navigation Centers, pursuant to AB 101, are required to be permitted by right and without any discretionary approval. A Low Barrier Navigation Center is a "Housing First," low barrier, temporary, service-enriched shelter that helps homeless individuals and families to quickly obtain permanent housing. The City will amend the Planning Code to include a definition for "low barrier navigation centers" and ensure that such centers are permitted by right, pursuant to State law.

Responsible Party: Oakland Planning & Building Department



Potential Funding Source: General Plan Surcharge

Timeframe: Planning Code changes in June-July 2023

Objectives: Reduce barriers to the development of housing for persons experiencing homelessness.

Action 4.3.6: Expand opportunities for the permitting of Emergency Shelters.

The City will revise the Oakland Planning Code to permit by right, without discretionary review, emergency shelters citywide when located on properties owned by churches, temples, synagogues, and other similar institutions approved for Community Assembly Civic Activities. The City will remove any minimum automobile

parking requirements for emergency shelters. In other zones where emergency shelters are currently permitted only upon issuance of a major conditional use permit, the City will revise the Oakland Planning Code to require only a minor conditional use permit, which is processed by Planning Department staff and appealable only to the Planning Commission.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan surcharge

Timeframe: Planning Code changes in June-July 2023

Objectives: Reduce barriers to the development of housing for persons experiencing homelessness

Goal 5. Promote Neighborhood Stability and Health

All Oakland residents deserve to live, work, play, and thrive in safe, affordable, healthy, and welcoming communities. In Oakland, this geography of opportunity and health-supporting neighborhoods has been inequitable, with low-income communities and communities of color more likely to live in neighborhoods overburdened by pollution, disinvestment, and other social and environmental injustices. Goals, policies, and actions in the Housing Action Plan can address environmental justice by protecting residential areas from harmful pollution impacts. As the City prioritizes investments, infrastructure, building upon existing community assets, and resources to achieve environmental justice in disinvested areas, the Housing Action Plan seeks to ensure that existing residents can stay in their communities and benefit from these increased resources through opportunities for homeownership (see also Goals 1 and 3).

1. Reduce greenhouse gas emissions in the building sector through the promotion of sustainable design principles, energy efficiency, decarbonization/electrification, and smart growth principles in residential developments.
2. Encourage higher-density, infill, and mixed-use development near transit to reduce reliance on automobiles.
3. Promote adaptation strategies to improve neighborhood and community resilience to climate change in collaboration with local and regional partners.
4. Leverage State and federal resources to assist with the remediation of environmental constraints on potential housing sites.
5. Ensure any addition of housing to neighborhoods at risk of wildfires is accompanied by infrastructure improvements to mitigate the evacuation needs for new residents.
6. Promote an equitable distribution of housing, including affordable housing, throughout the community, while providing opportunities to those that want to remain in existing neighborhood.
7. Ensure that programs support development of both rental and ownership opportunities for affordable and middle-income housing.

Homeownership confers a range of benefits – including greater certainty over housing costs, opportunity to stay in one's chosen neighborhood, the ability to make changes to the living environment, privacy, and the ability to build financial equity. In addition to tangible individual benefits, homeownership also brings substantial social benefits such as a stronger sense of place and belonging, improved community health and safety, and civic participation.

HOW THIS GOAL AFFIRMATIVELY FURTHERS FAIR HOUSING

Oakland has historically experienced patterns of significant inequities – between the hills and the flatlands, west and east, and across race and income. Rising housing costs and displacement pressures continue to disproportionately burden the city's Black population and other people of color, even as historically Black neighborhoods continue to see disinvestment and relatively high rates of poverty – see Appendix D for further context. The City has made great strides to correct these patterns of discrimination—including through the establishment of the Department of Race and Equity to advance racial equity in 2016—but needs to expand its efforts to eliminate racial disparities and discriminatory housing practices. The City will take steps to correct historic and ongoing patterns of discrimination to create a fair and just city through the simultaneous actions of opening up exclusionary neighborhoods (see Policy 3.4) and focusing resources, funds, tenant protections, and support of existing communities in disinvested neighborhoods and ethnic enclaves (see Goals 1, 2, and 3).

Oakland has some of the lowest rates of homeownership among major Bay Area cities, rivaled only by San Francisco. About 60 percent of Oaklanders are renters, and with continuously rising home prices, affordable homeownership remains out of reach for most Oaklanders. This is especially true for the city's working and middle classes, as traditionally blue-collar neighborhoods have become increasingly expensive in recent years. Homeownership is distributed unevenly by race and ethnicity – while most white households own their homes, the majority of BIPOC households are renters. American Indian or Alaska Native (70.8 percent), Hispanic or Latinx (69.4 percent), and Black or African American (67.8 percent) households are especially likely to be renters. A key driver behind these disparities is the legacy of the foreclosure crisis during the Great Recession. During the foreclosure crisis, 1 in

14 Oakland homeowners lost their homes. These foreclosures were highly concentrated in East and West Oakland. See Appendices B and D for more information.

This goal aims to expand opportunities for homeownership, particularly for low-income communities and communities of color. Along with efforts in Goal 1 and Goal 2, increased affordable and middle-income homeownership opportunities will reduce displacement pressures and keep Oaklanders in their homes. Expanding homeownership opportunities will protect both individual families and the social fabric of Oakland's neighborhoods. First-time homebuyer programs can also expand access to historically exclusionary neighborhoods by giving prospective homeowners the resources and tools they need to secure a home in neighborhoods that meet their needs. Community land trusts and other models of maintaining permanently affordable housing, as outlined in Policy 3.5, also provide opportunities to increase rates of affordable homeownership.

In addition to safe, affordable, high-quality housing for all people, a key determinant of equity is a healthy built and natural environment for all people. Such an environment should include a mix of land uses that support jobs, housing, amenities and services, trees and forest canopy, and clean air, water, soil, and sediment. In Oakland, low-income communities and communities of color are more likely to suffer from environmental injustices such as disproportionate exposure to air pollution, toxics and hazardous facilities and substances, contaminated water, and other environmental hazards. These disparities are due to a history of systemic racism and social injustices that influence where these communities live. As the impacts of climate change become more severe, these communities are most likely to be impacted first and hardest. As the City adds more housing stock over the course of this Housing Element period, it is imperative that new development sustains a healthy environment by working to "reduce the unique or compounded health risks in disadvantaged communities" and is prepared for the heightened impacts of climate change, especially protecting those who are most at risk. As part of this goal, efforts to align affordable housing development with transit—such as through the State's Affordable Housing and Sustainable Communities program—and expand access to high opportunity neighborhoods and good jobs are integral to furthering environmental justice through housing.

POLICY 5.1 SUSTAIN AFFORDABLE FIRST-TIME HOMEOWNERSHIP INCENTIVES

Action 5.1.1: Provide first-time homebuyer programs.

When funding is available, the City has historically provided several first-time homebuyer programs – including the First Time Homebuyer Mortgage Assistance Program (MAP), and the CalHome Program. As funding becomes available—either through State or program-related income—the City will resume these programs. The City also provides first-time homebuyer workshops and promotes workshops hosted by a HUD-approved counseling agency. Although City-sponsored classes are currently suspended due to the COVID-19 pandemic and the absence of funding, the City continues to provide information for other local classes. As we emerge from pandemic restrictions, the City will resume providing in-person workshops in 2023. Finally, the City maintains a list of city-assisted deed-restricted below market rate (BMR) homes for sale to assist potential buyers. The City collects data through public records and the first-time homebuyer programs to assess homebuyers' needs and to identify gaps in the programs.. Further, as part of Action 5.3.3, the City will engage in targeted outreach in partnership with community-based organizations and fair housing services providers to reach the most impacted communities – including Black and Latinx households.

Responsible Party: Oakland Department of Housing and Community Development – Housing Development Services

Potential Funding Source: State Housing Fund Grants (HCD), program income, city-sourced funds.

Timeframe: The City applied for the last several CalHome program NOFAs to secure funding for down payment assistance but was denied. The City will continue to review NOFAs and strategically apply for this assistance when substantiated. The City is already using repayments from previous CalHome and other loan programs to support mortgage assistance.

Objectives: If the City of Oakland receives CalHome and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the Housing Element cycle.

Action 5.1.2: Expand access to low-cost financing for home purchase.

Through the first-time homebuyer programs described in Action 5.1.1, the City was able to issue 121 loans totaling approximately $6.8 million during the previous planning period. With appropriate funding, these low-cost financing options have been very effective in promoting affordable homeownership. The City will continue to seek funding for these programs and to refer homebuyers to resources related to other county, State, or federal level funding – including through the Consumer Financial Protection Bureau (CFPB), California Housing Finance Agency (CalHFA), Golden State Finance Authority (GSFA), Federal Home Loan Bank's (FHLB) WISH Program, Alameda County AC Boost, and Alameda County Mortgage Credit Certificate.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: State Housing Fund Grants (HCD)

Timeframe: Ongoing as funding is available, 2023-2031; Annual reporting on first time homebuyer program data

Objectives: If the City of Oakland receives CalHome grants and other homeownership funding at historic rates, the City expects to support a total of 160 low- and moderate-income households with home purchases over the next Housing Element cycle.

Action 5.1.3: Provide paths to homeownership for Section 8 voucher holders.

Oakland HCD has traditionally worked with Section 8 voucher holders as part of the first-time homebuyer programs. Furthermore, the Oakland Housing Authority (OHA) offers the Homeownership Program to eligible residents – which permits participants to apply their housing subsidy towards a monthly mortgage payment. As funding and capacity permits, the OHA will continue to offer this program and expand eligibility criteria as feasible. Oakland HCD will also continue to work with voucher holders through first time homebuyer programs. OHA will collect data on residents who make use of the Homeownership Program to understand program participants and existing gaps.

Responsible Party: OHA; Oakland Department of Housing and Community Development

Potential Funding Source: HUD, State Housing Fund Grants (HCD)

Timeframe: Ongoing as funding is available, 2023-2031; Annual reporting on OHA's Homeownership Program

Objectives: If funded at historic levels, the City expects to provide 30 low-income Section 8 voucher holders with down payment assistance.

POLICY 5.2. PROMOTE RESILIENT AND SUSTAINABLE DEVELOPMENT

Action 5.2.1: Protect against smoke and wildfire.

As wildfires become more frequent, it is increasingly important to ensure safe and healthy indoor air quality. The City will require new development follow requirements for indoor air filtration, including the installation of MERV filters, as specified in the California Building Code, and will support property owners in retrofitting their homes to protect inhabitants from wildfire smoke. The City will prioritize retrofits in communities with disproportionate exposure to air pollution and substandard housing. To reduce the impacts of secondhand smoke, the City will explore amendments to the smoking pollution control ordinance to create smoke-free environments within multifamily housing properties. Further, the City will encourage the addition of clean air centers and resilience spaces within residential areas that can provide emergency services in the event of a wildfire.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Ongoing, 2023 - 2031

Objectives: Significantly improve access to better indoor air quality to protect against smoke and wildfire through methods such as requiring installation of MERV filters in new developments and identifying additional clean air centers and resilience spaces within residential areas.

Action 5.2.2: Promote infill, transit-oriented development (TOD), and mixed-use development.

Expand and allow community-serving uses such as retail, restaurants, and personal services within areas that are primarily residential, and increase opportunities to add multi-family housing in commercial areas that are well-served by transit. Encourage sustainable transportation choices and improve pedestrian activity with new housing development, by reducing vehicular parking requirements and eliminating parking minimums for residential development within ½ mile of major transit stop (see Action 3.4.4) in new development and/or requiring transit, cyclist, and pedestrian access design features. Work with Bay Area Rapid Transit (BART) to rezone and facilitate development of high-density multifamily and mixed-use housing on BART-owned sites within the City, per AB 2923. Ensure that new transit-oriented development is accompanied by tenant protection policies described in Policy 1.1. Further, the City will support and encourage the development of affordable housing near transit and amenities through its NOFA process, which prioritizes City funding awards to affordable housing projects with better transit access, and by co-applying to State programs such as AHSC and IIG (see Action 5.2.4).

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: 2023 – 2025 and Ongoing

Objectives: Significantly increase infill, transit-oriented development and mixed-use development to meet housing need.

Action 5.2.3: Study options to provide financing for the remediation of environmentally contaminated sites, with priority for affordable projects.

The City will study options to provide financial assistance to property owners for the remediation of environmentally contaminated sites, such as former gas stations or auto mechanic shops, which are being developed for housing. Funding priority will go to sites with proposed affordable housing projects.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department; Economic and Workforce Development Department

Potential Funding Source: State of California's Equitable Community Revitalization Grant Program, United States Environmental Protection Agency Brownfields Grants program

Timeframe: Ongoing, 2023-2031 as funding is available

Objectives: As grant and loan funding sources are secured, Oakland will support through technical assistance and financing of characterization and/or remediation of environmentally contaminated sites.

Action 5.2.4: Secure funding from the State's Affordable Housing and Sustainable Communities (AHSC) Program.

The AHSC program, administered by the Strategic Growth Council and implemented by HCD, distributes Statewide Cap-and-Trade funding for affordable housing developments (new construction or renovation) and sustainable transportation infrastructure projects. Successfully implemented, the AHSC program transforms California cities into places where residents can get everywhere they want to go without having to drive. The City of Oakland will apply directly or support partners such as nonprofit and for-profit housing developers, transportation and transit agencies, and joint powers authorities to apply for AHSC grant funding.

Responsible Party: Oakland Department of Housing and Community Development; DOT; Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: The City of Oakland has historically had projects applied to each AHSC round, and expects to have 3-5 projects for the 2023 AHSC NOFA (Round 7). As a jobs and transit center of the region, the City will continue to submit highly qualified projects to this important state funding source each time the source is available in order to secure additional funding for affordable housing in transit-rich service and job centers.

Objectives: Significantly increase affordable housing development through application for AHSC funding to meet housing need.

Action 5.2.5: Encourage earthquake-resilient housing.

As funding becomes available, the City will continue to operate loan programs to help property owners afford the cost of seismic safety programs. In the past, these loan programs have particularly focused on soft story retrofit projects. The City will also continue to implement the City's soft story retrofit ordinance, which requires vulnerable apartment buildings to retrofit soft story areas at risk of collapse.

Responsible Party: Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: FEMA Hazard Mitigation Grant Program, CalOES Prepare California Match program, other sources as available.

Timeframe: Ongoing, 2023 - 2031

Objectives: Successfully retrofit all vulnerable soft-story residential buildings at risk of collapse.

Action 5.2.6: Encourage climate-resilient housing.

Consistent with the City's Equitable Climate Action Plan (ECAP) and Ordinance 13632 CMS, all newly constructed buildings in Oakland are prohibited from utilizing methane gas, also referred to as natural gas, or connecting to natural gas infrastructure. The City will continue to support property owners in building electrification, energy efficiency and resilience, and seismic safety retrofits, prioritizing funding in frontline and

disadvantaged communities. The City will work with organizations such as the U.S. Green Building Council to recognize exemplary net-zero energy projects with sustainable and resilient design, including passive design and energy- and water-efficient systems. The City will continue to require all projects that meet the Green Building Ordinance for Private Development thresholds comply with green building standards, exceeding CALGreen Standards, and will encourage and promote green features such as durable low-embodied carbon materials, green and cool roofs, grey-water systems, electric vehicle charging stations, and others such features during the permitting and entitlements process. The City will continue to require green building certification under Build It Green's GreenPoint Rated or LEED Certification systems and give preference to projects scoring higher in the Green Point Checklist, or which meet or exceed LEED Gold level, in the affordable housing NOFA scoring process which determines which projects are awarded City funds. The City can promote and expand existing programs to provide education and incentives to property owners and residents who implement water conservation, energy conservation, waste reduction, and resilient landscaping measures. The City will ensure that new housing development within areas subject to flooding associated with sea level rise encourage placement of life safety, mechanical, and electrical systems above flood elevations (i.e., second story or higher). The City will also encourage the addition of community spaces within residential areas that can provide emergency services in the event of a natural disaster or power outage. Recognizing the likely increase over time in power outages due to the impacts of the climate crisis, the City will work across City departments and with relevant agencies such as East Bay Community Energy, to increase community energy resilience such as through deploying or incentivizing onsite energy storage, and supporting the development of neighborhood resilience resources that include clean backup power.

Responsible Party: Sustainability and Resilience Division, City Administrator's Office; Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Ongoing, 2023 - 2031

Objectives: Significantly increase construction of climate-resilient housing to meet housing need.

Action 5.2.7: Consider adoption of a disaster reconstruction overlay zone.

The City will consider the adoption of a disaster reconstruction overlay zone to streamline reconstruction following a natural disaster. Such a zone would establish ministerial approvals and streamlined permitting for the reconstruction of homes after a natural disaster, similar to reconstruction zoning created in Santa Rosa following the Santa Rosa Wildfire. This could accelerate reconstruction, require rebuilt homes to adhere to the latest earthquake and fire safety standards, and reduce the impacts of disasters on housing affordability in Oakland.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: State and federal grants, as available

Timeframe: 2023 - 2027

Objectives: Provide greater flexibility to meet housing need in response to potential disasters.

Action 5.2.8. Encourage new affordable housing in higher resource neighborhoods.

Affordable housing units, including both publicly assisted housing and housing choice vouchers, tend to be concentrated in low resource and high segregation and poverty areas. Higher resource neighborhoods have failed to provide their share of affordable units through low-density zoning that has largely prevented development at the scale necessary for affordability.

To expand where affordable housing units are located, including both publicly assisted housing and housing choice vouchers, the City will encourage further affordable development in higher resource neighborhoods through allowing for higher densities and streamlined approval for affordable projects. In its annual competitions for the award of housing development funds, the City will continue to give points in its competitive New Construction funding processes to projects in areas which help advance desegregation and are located in neighborhoods with strong educational quality. Further efforts may include working with affordable developers to identify appropriate sites in high resource neighborhoods and providing direct outreach and resources to Section 8 voucher holders and landlords to find appropriate housing in higher resource areas (see also Action 3.3.2). Actions 3.2.1 and 3.4.1 will also help increase the availability of housing within higher resource neighborhoods.

As noted below, this is not intended to supplant affordable housing investment in lower resource/high poverty and segregation areas, because these are also areas where residents are often subject to displacement pressures, as well as areas with rich access to transit, service and job centers. However, affordable housing opportunities should be made available throughout the City.

Expanding equitable housing opportunities in higher resource areas will also require Oakland to take on a new challenge: find ways to expand affordable housing opportunities in wildfire-prone Hills neighborhoods. The City will therefore analyze the current evacuation capacity of Hills neighborhoods, assesses infrastructure options to expand that evacuation capacity, and study options to pair affordable housing development in the Hills with corresponding safety-related infrastructure investments. This effort will align with the upcoming changes to the City's Land Use and Transportation Element (LUTE), which is also being revised as part of the City's broader General Plan update.

However, while increasing affordable development in higher-resource neighborhoods is a State priority, it only represents one strategy towards increasing opportunity for historically disadvantaged residents. Many Oakland residents want to remain in the neighborhoods that they call home, and may not want to move to "higher-resource" areas which tend to be predominantly white and higher-income. Many existing ethnic enclaves offer resources like culturally specific grocery stores, churches, language services, or other key access points that could be difficult to find elsewhere. These neighborhoods are also often rich in transit and service resources tailored to community needs. Thus, efforts to increase access to exclusive neighborhoods must also be coupled with investment, cultural preservation, and anti-displacement efforts in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs) as outlined in Action 5.2.9. These efforts are also described in Goal 1 and Goal 2. Oakland HCD's New Construction Notice of Funding Availability (NOFA) scoring criteria has recently been modified to balance scoring for higher-resource areas and high performing schools (for family housing) with the goal of increasing investment in areas of the City that have suffered from economic and infrastructural disinvestment, as well as prioritizing affordable housing in areas where low-income residents are especially vulnerable to displacement pressures. Under the current scoring for the allocation of tax-exempt bonds, only high-opportunity areas of Oakland are competitive for funding.

Failing the success of efforts to refine the definition of "high resource" areas to include those rich in transit, job and service accessibility, the City may need to consider adjusting its priorities to focus more investments towards high-opportunity areas in order to continue to be competitive for state funding. However, the City remains concerned about the adverse impacts this would have on the City's anti-gentrification and anti-displacement work, and feels strongly that affordable housing resources are desperately needed in neighborhoods where low income residents are vulnerable to displacement. Lastly, the State relies on TCAC Opportunity Area Maps that designates much of

Oakland as "low resource" or "high segregation and poverty." The City strenuously disagrees with these designations that do not recognize the critical role in housing production, jobs creation, and transit connection that Oakland plays for the region. Further, it lags behind the rapid market changes and displacement pressures experienced across the City's transit-, job-, and amenity-rich neighborhoods; this action pursues a more balanced and nuanced investment of resources to support housing across its neighborhoods.

Responsible Party: Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees, impact fees, other local, State, and federal funding sources as available

Timeframe: Geographic equity is currently incorporated as a scoring element in all NOFAs to prioritize awarding City funds towards projects that support this goal; and will continue to be a focus moving forward. New construction NOFAs will be released approximately every other year.

Objectives: The ratio of affordable housing units per acre shall increase by 10 percent more in neighborhoods categorized as "High" or "Highest" opportunity by the California Tax Credit Allocation Committee (TCAC) than the increase in the ratio of affordable housing units per acre in all other neighborhoods .

Action 5.2.9: Prioritize improvements to meet the needs of low-resourced and disproportionately burdened communities.

As part of Phase 1 of the GPU, the EJ Element will include policies and actions that will promote equitable access to public facilities, healthy food, safe and sanitary homes, and physical activity; reduce barriers to inclusive engagement and participation in the public decision-making process; and prioritize improvements and programs that address the needs of low-resourced and disproportionately burdened communities in Oakland. These investments will be focused in communities designated through the EJ screening process.

As part of Phase 2 of the GPU, the City will promote complete neighborhoods where residents have safe and convenient access to goods and services on a daily or regular basis—that address unique neighborhood needs, and support physical activity, including walking, bicycling, active transportation, recreation, and active play. The LUTE, OSCAR and the Infrastructure and Capital Facilities elements will include targeted policies and actions for communities designated through the EJ screening process (i.e., low-resourced, traditionally underserved, and disproportionately burdened communities) that focus on:

- Equitable distribution of new beneficial public, civic, and cultural facilities and maintenance of existing facilities
- Appropriate land use designations and zoning to facilitate additional healthcare facilities in areas without sufficient access
- Maintain and improve existing civic and public facilities to ensure safer, more attractive facilities that are responsive to community needs
- Expand access to high-quality open space, pedestrian and bicycling amenities, and increase opportunities for physical activity and recreation spaces

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees, other local, State, and federal funding sources as available

Timeframe: July 2023 for adoption of EJ Element. End of 2025 for adoption of LUTE, OSCAR, and Infrastructure and Capital Facilities Element

Objectives: Prioritize improvements in low resourced and traditionally underserved areas in the City to improve fair housing conditions and encourage community preservation, revitalization and, quality of life

Action 5.2.10: Promote the development of mixed-income housing to reduce income-based concentration.

As noted previously, lower-income housing tends to be concentrated in lower resourced neighborhoods. The City will work to promote mixed-income developments to further reduce the geographic isolation of lower-income units and promote increase neighborhood investment in distressed areas. The City will encourage use of the State Density Bonus program by incentivizing on-site affordable units along with the Density Bonus instead of paying affordable housing impact fees, promote mixed-income development in specific plan areas, and access the CalHFA bond recycling facility for mixed-income projects.

Responsible Party: Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Ongoing, 2023-2031

Objectives: Significantly increase production of mixed-income housing and reduce income-based concentration to match housing need.

Action 5.2.11: Provide accountability measures for housing programs, including annual monitoring.

The Housing Element is a living document that provides a roadmap for the next eight years. As such, the City will actively monitor activities undertaken to meet program objectives pursuant to Annual Progress Report requirements. To ensure accountability, the City will solicit annual feedback from the community through surveys to understand the effectiveness of individual programs. In addition, the City will create a subcommittee of the Planning Commission to bring the progress report of the Housing Element to monitor its performance.

Responsible Party: Oakland Planning & Building Department; Oakland Department of Housing and Community Development; Oakland Human Services Department; Oakland Economic & Workforce Development Department; Oakland Public Works Department; DOT; Homeless Division, City Administrator's Office; Sustainability and Resilience Division, City Administrator's Office

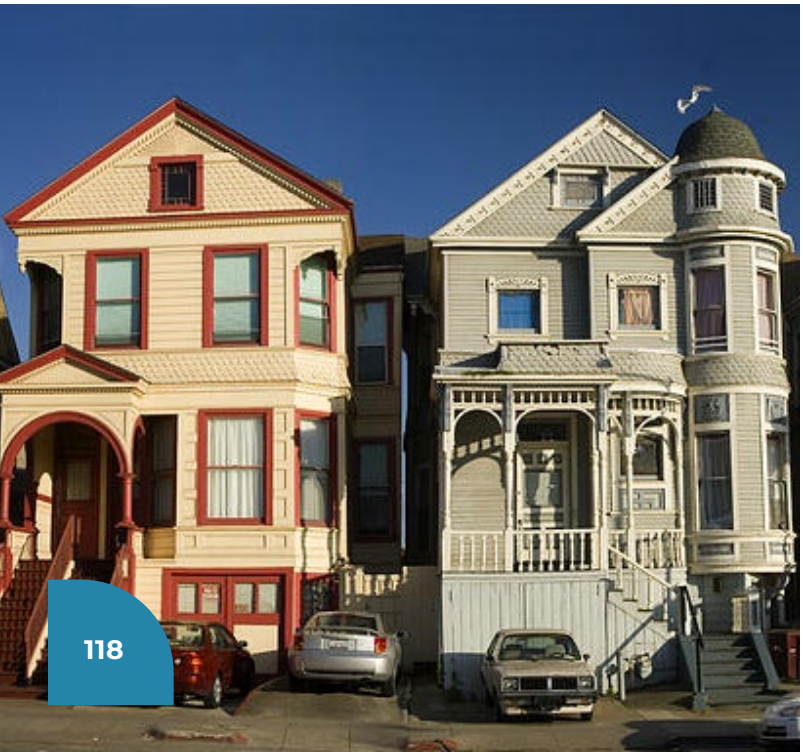
Potential Funding Source: General Plan Surcharge and permit fees

Timeframe: Ongoing, annual survey and monitoring during the 2023-2031 Housing Element Annual Progress Reporting cycle. By March 2024, create subcommittee of the Planning Commission to monitor the Housing Element.

Objectives: Monitor and enforce Housing Element implementation to understand whether individual programs significantly improve Oakland housing conditions and address housing need.

POLICY 5.3. PROTECT HOMEOWNERS AND TENANTS FROM DISCRIMINATION

Action 5.3.1: Provide fair housing services and outreach.



The City will continue to partner with fair housing service providers operating within Oakland. As most housing discrimination complaints are related to a disability bias, the City will work with fair housing providers to provide additional educational resources in a variety of languages to both tenants and landlords related to disability rights in housing. The City will publicize fair housing services on its website, in City Hall, and in all housing-related programming. The City will also seek additional State and federal funding to assist fair housing providers.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: CDBG, general fund, other local, State, and federal funding sources as available

Timeframe: End of 2023

Objectives: All stated outreach materials will be created and found online no later than the end of 2023.

Action 5.3.2: Promote awareness of predatory lending practices

Predatory lending practices are a major contributor to racially discriminatory housing patterns and were one of the major factors in the previous decade's foreclosure crisis. To curb these practices, the City will work with fair housing service providers to provide educational materials and workshops in a variety of languages to inform Oakland residents of best practices. The City will promote fair lending practices to ensure that low-income residents and residents of color have fair access to capital resources needed to acquire and maintain housing.

Responsible Party: Oakland Department of Housing and Community Development

Potential Funding Source: CDBG, general fund, other local, State, and federal funding sources as available

Timeframe: End of 2023

Objectives: All stated outreach materials will be created and found online no later than the end of 2023.

Action 5.3.3: Provide targeted outreach and support to disproportionately burdened groups and areas.

Oakland's Black and Latinx populations experience disproportionately high rates of cost burden and tend to live in neighborhoods with higher rates of overcrowding and other housing issues. The City will work with fair housing service providers to target outreach and programming to Black and Latinx Oaklanders, as well as neighborhoods experiencing high levels of housing issues in parallel with Actions 5.3.1 and 5.3.2. The City will regularly monitor housing issues like cost burden, overcrowding, code enforcement complaints, and substandard housing to understand where the highest need for services exists.

Responsible Party: Oakland Department of Housing and Community Development; Oakland Planning & Building Department

Potential Funding Source: General Plan Surcharge, permit fees, other local, State, and federal funding sources as available

Timeframe: Ongoing, 2023-2031

Objectives: To determine what neighborhoods that fair housing service providers should target for outreach and programing to assist disproportionately burdened groups.

4.2 Quantified Objectives

State law requires that quantified objectives be established for new construction, rehabilitation, conservation, and preservation activities that will occur during the Housing Element cycle. **Table 4-1** provides Oakland's quantified objectives by income category for the 2023-2031 Housing Element planning period. New construction estimates include units in pipeline projects, projected accessory dwelling units (ADUs), and the minimum remaining RHNA capacity. The remaining RHNA capacity represents development that the City must support beyond pipeline projects and projected ADUs as identified in the Sites Inventory, Appendix C (including potential development projects, 5th cycle RHNA sites, and other new opportunity sites), and through the actions in this Housing Action Plan.

Table 4-1: City of Oakland 2023-2031 Quantified Objectives

	NEW CONSTRUCTION[1]				
INCOME CATEGORY	PIPELINE PROJECT	PROJECTED ADUs	REMAINING RHNA	REHABILITATION[2]	CONSERVATION/ PRESERVATION[3]
Very-Low-Income[4]	881	346	2,029	-	84
Extremely-Low-Income[4]	*325*	*346*	2,584	-	84
Low-Income	1,499	692	1,559	1,216	502
Moderate-Income	182	594	3,681	-	-
Above-Moderate-Income	10,174	-	1,359	-	-
Total	**13,061**	**1,978**	**11,212**	**1,216**	**670**

1. New construction objectives represent the City's RHNA for the Sixth Cycle Housing Element update. Estimates include units from pipeline projects and projected accessory dwelling units (ADUs).
2. Estimates are derived from the City's 2020/2021 Consolidated Annual Performance and Evaluation Report (152 rehabilitated units in 2020/2021, projected over 8-year period).
3. Conservation/preservation estimates include support of the construction, acquisition, and/or preservation of deed restricted affordable housing units each year (640 units total, as described in Action 3.3.6) and down payment assistance for Section 8 voucher holders (30 units total, as described in Action 5.1.3). Units are proportionally distributed based on RHNA allocation among Low-, Very Low-, and Extremely-Low-Income sites.
4. The extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need. Quantified objectives for very-low-income housing includes extremely-low-housing objectives.
