SUBJECT: CITY OF OAKLAND REVISED 2023-2031 HOUSING ELEMENT SUBMITTAL

Dear Mr. McDougall,

The City of Oakland is pleased to submit the Revised Public Hearing Draft Housing Element for the 2023-2031 planning period for the department of Housing and Community Development's (HCD) second review.

In accordance with AB 215, the revised Public Hearing Draft Housing Element was posted on the project website at https://www.oaklandca.gov/topics/oakland-general-plan-2045-housing-element on November 29, 2022, and a notice was emailed to all individuals and organizations that have requested project updates. We appreciate HCD staff making themselves available to discuss and provide feedback on six separate video conference calls after the City received the findings letter on September 28, 2022.

The City of Oakland is accelerating its adoption schedule by three months to reduce potential risks to grant funding and loss of local control approval. To enable this, the City is requesting an expedited review of its second draft submittal in order to meet the January 31, 2023, deadline.

The revised submittal for HCD's 60-day review includes both clean and redlined versions of the revised submittal as PDF and Word Documents and the public input received between November 29, 2022 – December 6, 2022. We have also mailed a printed copy of the clean version of Oakland's revised 2023-2031 Housing Element.

Some key updates to the revised 2023-2031 Housing Element include:

- *Public Input received during the November 29, 2022 – December 6, 2022, Public Review Period*: Attached are the seven comment letters received after the November 29th publication of the revised Public Hearing Draft Housing Element.
- *(NEW) Executive Summary:* Provides a summary narrative outlining goals and actions in the 2023-2031 Housing Element.

December 5, 2022

RE: PUBLIC COMMENT FOR SUBMITTAL RE: Housing Element draft on Dec 7th 2022
1. We need an equity study BEFORE proposing TOPA/COPA legislation
2. Negative impacts of TOPA/COPA on the minority community
3. TOPA/COPA is the new/next form of property theft of Black Property Owners
4. SB-1079 has already been creating problems similar to TOPA/COPA, even through Nancy Skinner had the 'best of intentions' as a legislator in our own community

Dear Housing Policy Staff,

The "Tenant Opportunity to Purchase Act (**TOPA**) AND 'Community Opportunity" to Purchase Act (**COPA**) is being sold as a way to prevent gentrification and minority displacement. Contrary to these claims, **after DECADES of TOPA in Washington DC, a study found DC has had the most gentrifying neighborhoods across the country with 20,000 black residents displaced**. https://dcist.com/story/19/03/19/d-c-has-had-the-most-gentrifying-neighborhoods-in-the-country-study-finds/ (also attached below).

My family and neighbors are extremely concerned that **TOPA/COPA would PREVENT West Oakland, East and Deep East Oakland (flatland) minorities and particularly black owners from keeping black properties in historically black communities in blac hands.** Why should a black owner be PREVENTED from bequeathing her OWN home to a family member or neighbor? Passing properties directly to those who similarly endure discrimination is a strong tradition that arose as a result of redlining and housing discrimination and segregation and deed restrictions, when banks refused to offer mortgage loans to minorities. **TOPA/COPA** would undermine long-standing community tools that evolved into tradition, designed to instead steal generational wealth by acquiring their property as well as the equity built into it. To us, this is another clear example of "**dispossession through legislation**", a known tactic frequently levied against minority communities. From the Urban Renewal housing policy that displaced people to Berkeley's inception of racist single-family exclusionary zoning that segregated people across the country, there is a long line of supposedly "helpful" housing policies that hurt and rob black families of generational wealth. Word is spreading amongst our informed community members. We are most ALARMED that **TOPA/COPA is the next scheme similarly impacting our community to what redlining did.** We are seeing more legislation being slickly crafted. It is reminding us of the fairy tale where the juicy apple and the unsuspecting sleeping beauty is seduced by a solution to the housing stock and affordability problem, designed as a fix but is really a harm.

An <u>Equity Study</u> on the impacts of TOPA/COPA is <u>absolutely</u> necessary BEFORE this legislation is proposed and it should be properly discussed in communities with public comment and awareness devoted to it, not just the marketing scheme language used by political operatives and promoters of this legislation to push it through in their usual fashion to acquire support for measures by the loudest who are usually first to seek most benefits from these oppressive legislative acts and housing pyramid schemes.

Please consider the historical wrongs in Black communities related to government and housing, especially the building of wealth and Black property ownership . The diabolical ways society targeted Black wealth, from the 1980s crack epidemic, using property equity to secure high-cost bails and over-incarcerated family owners, as well as the more recent 2009 housing bubble where mortgage and finance professionals targeted Blacks with loans they knew they couldn't pay). For context to the equity issues at hand, please refer to books such as Richard Rothstein's **Color of Law,** Mehrsa Baradaran's **The Color of Money: Black Banks and the Racial Wealth Gap** and Keeanga-Yamahtta Taylor's **Race for Profit: How Banks and the Real Estate Industry Undermined Black Homeownership**.

<u>We DEMAND data before legislating harmful housing policies that would repeat the historical theft of wealth and community</u>.

<u>Our community has these specific concerns regarding TOPA/COPA:</u>

1. **TOPA/COPA would dismantle a common pathway to Black homeownership:**
   TOPA/COPA would give 'first dibs' to special interest housing developers and prevent minority residents from directly selling to someone of our choosing. **TOPA/COPA** does nothing to increase investment in historically black communities. nor does it outline ways to build black wealth. In fact, homes in the hands of historical Black families typically have some equity value and this absorbs and extracts those values. The legal practices of segregation and redlining were supported by lending institutions failing to offer mortgage loans to minorities, denying wealth-building opportunities whites enjoy and support. Black residents who were able to obtain and sustain real estate passed it on to family and community members, often bequeathing homes below market price and providing seller carry-back loans with favorable terms, especially when banks refused to lend to us. When elders pass on their homes, they support their family legacies for the next generation in doing so. It is not uncommon to wait years for our family ready to buy to come up with downpayments and locate a bank that would loan to them. Homes in the Black community don't just have monetary value -- they represent our independence and ability to thrive and be free. They're where we celebrate family birthdays, take care of our loved ones, and are passed on to maintain the equity values within our community, that help them raise Black families, educate their children, create memories and thrive in old age. **TOPA/COPA** undermines these traditional pathways to homeownership for people of color by giving 'right of first refusal' to special interest developers over family members and long-time minority residents. This is more than just within Black communities; Hispanic/Latino, AAPI, LGBTQ+ communities and those divided and comforted by

ethnicity, religious persuasion and culturally aligned safe spaces exist all around us for these very reasons. Families purchase and hold their properties so that they can sustain and avoid racial discriminatory practices and treatment. From swastikas. cross burnings, telling unwelcome races to 'go home' using other symbols of hate and intolerance, our communities are considered safe spaces for these reasons.

2. **TOPA/COPA targets properties in historically segregated areas and robs Black historical wealth.** **TOPA/COPA** targets "Naturally Occurring Affordable Housing (NOAH)" that are in historically segregated areas, often poor areas around Bay Area Rapid Transit (BART) stations, where highways and other destructive developments were instituted to divide cities. The creation of BART stations occurred during well-documented abusive eminent domain actions committed by the cities against minority residents considerations. Minority residents were never adequately compensated for loss of property via eminent domain where BART stations and railways were constructed. This was another silent criminal of wealth and equity theft by eminent domain, e.g. legislative actions with 'the greater good's intentions'. A largely disproportionate number of properties around BART that are now being targeted by **TOPA/COPA** for acquisitions and currently owned by multicultural and predominantly Black residents, in the Oakland flatlands and areas within zip codes predominantly occupied by ethnic minorities. According to the **Greenlining Institute**, **Americans of Color have 61% of their wealth in home equity**. Home equity is often used to fund college educations and take care of medical bills and our old age/elderly. **TOPA/COPA** would do irreparable and irreversible damage to the fabric of these minority communities by legislatively providing a false promise to give frequently non-family blood relative member tenants opportunity to purchase, when essentially all that tenant is doing is being the front for the land trust which is about to use this very legislation to steal the equity out of the home property owners spent a lifetime building. These historical environmental designs end up stolen under the guise of creating *affordable housing*. This is something that reparations is being discussed RIGHT NOW in the study developed by the California Task Force to Study and Develop Reparation Proposals for African Americans. Before that discussion is barely being approached, **TOPA/COPA** legislation is being determined by these very same communities that have already seen more than a CENTURY of harmful equity extraction. Further, while many communities were left out of the economic booms of industry, including tech and dotcom, we see former Black communities like East Palo Alto, decimated by legislative actions that liquidated Black homeownership and property wealth equity. **Ms. Beradaran's comments are clear in the discussions I'm speaking about. raising the difference between good and bad credit, segregation patterns, financial risk tools and discriminatory lending practices where the disparate impact exists between minorities and white credit markets and restricted credit markets/Bank InEquities and Exclusion from Mainstream Credit Systems: https://www.hup.harvard.edu/catalog.php?isbn=9780674237476**

3. **When you displace Black homeowners, you displace Black tenants and Black Families.** Due to segregation, minority residents were not welcomed in many neighborhoods. There are Black neighborhoods and white neighborhoods. Black owners rent out to Black family and community members, taking care of our own. When you target Black property owners, you target Black tenants. When you remove Black homeowners, you remove Black tenants. **TOPA/COPA** causes me as a Black female to ask "who's actually selling/buying these properties? 'What are their demographics in race, income, etc. Tich, white, wealthy, many of them out of area LLCs and

Corporations have been documented as the primary buyers of single family home properties in the SF Bay Area. These are **NOT** the targets of the properties being targeted/promoting **TOPA/COPA** in our communities.
https://www.sfchronicle.com/projects/2022/bay-area-housing-power-players/

4. **SB1079** has already created unintended consequences similar to **TOPA/COPA**, even as our representative, California 9th District State Senator Nancy Skinner had the 'best of intentions'. A story published on August 25, 2022 by Erin Baldassari in KQED's online edition speaks about ***how non-profits used a legal loophole to flip homes for a profit***. I'll include the link in the footnotes that references this story. Ironically, the story features an image of Oakland D3 Councilmember Carroll Fife in the article in front of the house on Magnolia Street featured in the community activist effort "Moms4Housing" that gave CM Fife rise to the very seat she represents in our West Oakland community. What these housing-promoting legislators don't seem to take into account is that many black families are victimized by their well-intentioned legislation. They simply don't help us. When asked, many families candidly share if they simply provided the knowledge, information, tools and supportive guidance on how to responsibly purchase, finance and build equity in their lives property, they can and do sustain. These individuals and families acquired property using tools via the federal government under programs such as FHA/CalFHA, VA and the myriad of programs supported by federal and state supported programs. These supportive groups should be able to do work without targeting poor minority property owners. Opportunists, in the form of mortgage investors, nonprofit organizations and do-gooders, see black community property owners as *low-hanging fruit* and a means to an end for their objectives to purchase their properties. And in the process, while the devaluing of their neighborhoods. As Andre Perry's *Know Your Price* articulates and the recent media highlighting the actions of the national appraisal system process shows across the country the practices of minorities having to 'whitewash' their interiors in appraisal preparations,to disguise that their homes are owned by minorities to avoid creating disparities in home valuations. When provided guidance, financial education without the strings attached for third-parties, minority community members can sustain their homes. I'm living proof of that. Legislation that find it necessary to provide more than simple education and financial support that many property owners, especially seniors, can not more easily find themselves, is a trap and a danger. Right now, we live in a support-less system that is used as a bait-and-switch on how they can use their homes for THEIR FUTURE, and sadly, reverse mortgages and other practices have become the usual result, frequently too late to undo the damage. Legislation, and not just the shifty intentions of nonprofits that are turning communities into demographic wastelands where reverse migration has consistently shown in the census year after year, leaves us with communities with histories that have historical context that are stolen and erased, similar to 1921 Tulsa, OK Greenwood District (Black Wall Street). West Oakland was once a prosperous black community known for the Seventh Street District and the Black Panther Party. It has lost its history and every day that history is further diluted by outward migration, divestment and failure to reparate these communities that continue to be targeted, year after year.

As a responsible, care-filled human, I am astute enough to review this with my own eyes, heart and mind. I've seen how government with good intentions do not see TOPA/COPA as a solution to the problems of housing in communities of color, especially without carve-outs and segments of the already harmed, historically protected communities that need to be identified, preserved and landmarked as preserved CULTURALLY. These communities are more than people's homes and it would be a mistake to just use them as opportunities to purchase using legislation that has been shown to be historically HARMFUL to communities of color, not HELPFUL in repatriating minorities into their communities that have been stolen from them by actions that are everything from building freeways to environmental poisoning to promotions by real estate hucksters marketing them as the new great place to raise a family and a cat or dog.

Please work with our community and our Race and Equity Department to conduct an INDEPENDENT Equity Study BEFORE proposing any TOPA/COPA legislation.

Sincerely,

Carol Wyatt

After DECADES of TOPA in Washington DC, a study found DC has had the most gentrifying neighborhoods across the country with 20,000 black residents displaced.

--

D.C. Has Had the Most Gentrifying Neighborhoods In The Country, Study Finds

MAR 19, 2019, 4:21 PM
Cordilia James

D.C. is one of the most gentrified cities in the country, study says.

When it comes to the intensity of gentrification across the country—at least over the first 13 years of the 21st century—the District tops the list.

D.C. had the highest percentage of gentrifying neighborhoods in the country between 2000 and 2013, according to a study from the National Community Reinvestment Coalition, a group that works to

“increase the flow of private capital into traditionally underserved communities.” It estimates that around 20,000 black residents were displaced over that period.
The study, which was first reported on by the Washington Post, identified more than 1,000 neighborhoods in 935 cities and towns across the country where gentrification occurred during that time frame. Rapidly rising rents, property values, and taxes forced more than 135,000 residents to move away in 230 of those neighborhoods.
These neighborhoods for each city were considered eligible for gentrification if they were in the lower 40 percent of home values and family incomes in the area (the study used a type of census data that characterizes urban areas beyond just their physical borders). When the study began, half of the neighborhoods in D.C. were considered eligible for gentrification, which the study defines as a force that happens when “lower-income neighborhoods receive massive levels of new investment, adding amenities, raising home values and bringing in new upper-income residents [which] can lead to cultural displacement.”
By 2013, 41 percent of those neighborhoods were gentrified.
Black residents, in particular, have struggled to stay in D.C. Once known as Chocolate City, the D.C. population used to be 71.1 percent black in 1970. By 2015, that number had dropped to 48.3 percent. The study showed that D.C. was one of four cities that had the highest percentage of black displacement when adjusted for the number of gentrified neighborhoods it has, along with Richmond, Charlottesville, and New Orleans.
While D.C. was the most gentrified city by percentage of eligible neighborhoods that experienced gentrification, New York City was the most gentrified by sheer volume. Both cities were among the seven cities in the country that accounted for nearly half the amount of gentrification nationally, including Los Angeles, Philadelphia, Baltimore, San Diego, and Chicago.
The period that the study examined coincided with significant population growth in D.C. for the first time in decades, particularly amid the region’s comparatively stable economy during the Great Recession. While that growth has slowed somewhat in recent years, housing costs have continued to rise and make affordable housing increasingly scarce.
“The tens of thousands who have migrated to the Washington, D.C., over the last five years live in a city that rolled out the proverbial red carpet for their arrival. Infrastructure has been altered, public property has been privatized, the will of voters has been rescinded, minority-owned businesses have been shuttered and the bodies of people of color have been stopped and frisked to accommodate and enhance the respective presence and comfort of newcomers,” Sabiyha Prince, an activist with the group Empower DC, wrote in an essay accompanying the report.
Last year, one group of residents sued the city over its housing and renewal policies

EAST BAY FOR EVERYONE

December 4, 2022

Director Wiliam Gilchrist
Department of Planning and Building
City of Oakland
350 Frank Ogawa Plaza
Oakland, CA 94610

RE: Revised Draft Housing Element 6th Cycle (2023-2031) dated 11/29/22

Dear Director Gilchrist,

We write to provide comments on Oakland's Revised Draft Housing Element for the 6th Planning Cycle (2023 - 2031) released on November 29, 2022 ("Revised Draft").

Overall we are pleased with the direction of the Revised Draft and appreciate the incorporation of many of the comments from the East Bay for Everyone, YIMBY Law, HAC, Greenbelt Alliance and East Bay YIMBY letter dated October 14, 2022.

The Missing Middle Program is significantly improved by reductions in setbacks, reductions in parking requirements, and increase in allowable density for high-resource areas like Rockridge and Adams Point. We are also happy to see an increase in commercial corridor heights along Claremont and College as well as the inclusion of additional, more viable opportunity sites in Rockridge.

We are also encouraged to see the City of Oakland commit to studying single exit aka "single stair" reform. We disagree, however, that the City of Oakland is unable to implement changes at the local level. The City of Seattle, for example, has adopted local building code changes for a single exit up to five stories that meet NFPA 101 mitigation requirements, including a maximum of four units per floor, automatic sprinklers, one hour-rated walls around the core and half hour-rated walls between units. Oakland could similarly adopt amendments to its local code or establish an alternative means and methods process for four story single stair structures.

We offer the following comments on the Revised Draft:

1. For Missing Middle Housing, we appreciate the reduction of off-street parking requirements to 0.5 in residential areas and zero in the ½ mile radius of major transit stops, but we believe it would be more productive if zero-parking missing middle were allowed across significant transit corridors, rather than merely near BART stations, BRT stops, and

the (rare) intersection of two bus corridors each with up to 15-minute peak headways. We propose instead zero parking requirements within ½ mile radius of bus stops of lines running with at least 30-minute peak headways, which would allow not only Telegraph, Broadway, San Pablo, and MacArthur, but also Grand.

We also suggest a planned check-in midway through the planning period to examine whether missing middle standards are in fact being used at scale, and to amend further if not.

2. Table C-17 "Lower- Income Projects on Small Sites 2018 - 2021" describes projects less than ½ acre developed as low-income housing. Three of the five projects identified in this table are acquisition projects, including Project Homekey sites. Acquisition of sites for low-income housing less than ½ acre is an important goal for preserving and creating affordability but it does not address the underlying need for deeper analysis of building low-income housing on small sites as required under HCD guidance.

   The purpose of additional analysis for low-income housing development for small sites less than ½ acre is to identify that the jurisdiction has a track record of developing new construction of low-income housing on such sites. This is important because smaller sites are difficult to finance through the Tax Credit Allocation Committee and other funding sources. Small sites are also more difficult to construct due to parking, circulation, second egress and other requirements. Please remove the acquisition sites and provide additional analysis of Oakland might pursue additional policy changes, including single stair reform, to increase the viability of low-income housing development on small sites.
3. We appreciate the broad reduction to parking standards in a range of zones, not just residential-only, reflecting Oakland's Transit First policy and climate goals. In light of recent counterproductive proposals of parking garages or overparked apartment complexes in transit-oriented areas of Oakland, this direction could be enhanced by:
   a. Applying revised CBD parking maximums to apply equally to a ½-mile radius of all major transit stops;
   b. Making new paid parking, structured or surface (as opposed to off-street parking serving another use) require conditional use permits; and
   c. Require all structured parking be built to be convertible to non-parking uses in the future; currently their standard angled floors make it impossible to do anything else without demolishing.
4. We appreciate and are excited at the proposal to remove CUP requirements for small commercial establishments in residential zones (Accessory Commercial Units) and, in food deserts, for grocery stores. However, we suggest careful objective definition of "food desert," and to err on the side of an expansive definition, such as the USDA half-mile standard (as opposed to a 1-mile standard).

Thank you for considering these comments. We appreciate the City of Oakland's ongoing efforts to refine and deliver a compliant and equitable Housing Element.

Sincerely,

John Minot

November 29, 2022

Dear Ed,

I purchased the Dreyer's site in Rockridge in February 2020, just before the Covid shutdown, with the intent of turning it into a non-profit Jewish Community Campus serving the entire East Bay community. The property consists of ten parcels, anchored by the Dreyer's building at 5901 College Avenue. The property includes assessor's parcel numbers 014-126800901, 014-126801101, 014-126801200, 014- 126801300, 014-126803900, 014-126803800, 014-126803600, 014-126803501, 014-126803201, and 014-126803000. In October 2020, the Jewish Community Center of the East Bay and several non-profit Jewish organizations began actively using the site as community space.

We had contacted the City with questions regarding the development of the Jewish Community Center in January 2022 but did not receive a response. We formally submitted a development application online for a Conditional Use Permit on November 2, 2022, for day care, after school, and community assembly for religious services that will operate in the existing Dreyer's and old Yoshi's buildings. The existing retail spaces on College Avenue will remain as tenants and no changes are proposed on the College Avenue frontage. We have met several times with RCPC and the Chabot neighbors and are building strong relationships there.

The draft Housing Element has now earmarked the site as a site for affordable housing and was added as a supplemental site to achieve Affirmatively Further Fair Housing. However, the Housing Element says that in identifying the Affirmatively Further Fair Housing sites that staff excluded sites with uses that serve the community. As such, we ask that the staff remove our properties from the city's affordable housing opportunity sites because it is currently, and will continue to be, a site that serves the community. It is understandable that staff was unaware of this, but we ask that it be corrected immediately.

Thank you and I look forward to providing a wonderful non-profit community center to Oakland and the East Bay.

Sincerely,

Moses Libitzky
Principal

Subject: Please remove TOPA/COPA from Oakland's Housing Element Draft (on p. 66)

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

12/5/2022

Please remove TOPA/COPA from Oakland's Housing Element Draft (on p. 66)

I am strongly opposed to TOPA and COPA. Under TOPA/COPA, people would be prevented from taking care of their families during financial hardships.

As an example, my husband and I recently purchased a home from a local couple who needed to sell a property IMMEDIATELY due to a financial emergency. The couple had to sell quickly because they own a local restaurant that suffered during COVID-19 shelter-in-place closures. We were able to accommodate their 3-week quick sale requirement because, fortunately, there are no TOPA/COPA restrictions in place. TOPA/COPA's extended time delays and onerous red tape would have made such quick sales impossible. Under TOPA/COPA, this couple would have lost their family business, been forced into bankruptcy, and they and their young children would have been displaced onto the streets. How can the city even consider such a harmful policy as TOPA/COPA when it invasively interferes with the personal and financial lives of residents?!

These residents had done nothing wrong, yet TOPA/COPA restrictions would have made them HOMELESS!

TOPA/COPA would also disadvantage local residents looking to purchase. It would have denied us fair and equal access to housing in favor of TOPA/COPA developers. I can't imagine being in a contract and having to wait a year or longer while who knows how many TOPA/COPA developers take turns interfering with the purchase, which is stressful enough as it is. We are not outside speculators. TOPA/COPA holds both local buyers and sellers hostage to red tape and protracted time delays.

We strongly oppose TOPA/COPA. TOPA/COPA doesn't take into account the normal up and downs and frequent financial hardships that families endure. This is a horrible idea that harms local residents and families like ours.

Sincerely,

Nha Vu

Subject: November 2022 Revised Draft Housing Element

Dear General Plan Team:

Oakland Heritage Alliance is still studying the revised November, 2022 draft Housing Element, including the appendices, so the following comments are preliminary and subject to future modification and expansion.

A. Housing Element main document.

1. The 11/22 draft now commits the City to specific zoning revisions in specific areas, such as Action 3.2.1's provision for reducing minimum lot sizes in Detached Unit and Mixed Housing Type Residential Zones to 2000 ft.^{2}. These kinds of provisions are appropriate to state in general terms as part of a General Plan element and/or as proposals for consideration, but when presented with the draft's level of specificity causes the draft to read more as a zoning ordinance rather than a general plan element. Such levels of specificity should be normally reserved for the zoning amendments. Related to this, the preliminary draft zoning amendments in Appendix J should be understood as just that – a preliminary draft that the City has not yet committed to. **Action 3.4.1, Bullet 8 regarding Appendix J should reflect this by adding "preliminary draft" before "proposal".**

2. It is our understanding that an Environmental Impact Report (EIR) will be prepared for the zoning amendments implementing the Housing Element, rather than for the Housing Element itself. Therefore, **what will be the environmental review determination for the Housing Element?** If the Housing Element includes specific upzoning provisions, such as discussed above, an EIR or at a least negative declaration would appear necessary.

3. Action 3.4.3 states that, among other things, Action 3.4.8 will "create objective design review standards and… allow for streamlined ministerial approval". However, Action 3.4.8 actually provides only for objective design standards and says nothing about ministerial approval. **The term "ministerial approval" needs to be explained.** It often

means over the counter approval, with no public notification, review or appeal. But **there still needs to be public notification and review to help ensure that staff application of objective standards is performed correctly.** OHA reviews numerous design review applications and has found many cases where existing zoning standards and/or design review criteria were not applied correctly or fell through the cracks.

In addition, "ministerial approval" indicates that such projects are exempt from environmental review. Such projects if located in historic areas could adversely impact the architectural integrity of these areas, which would normally constitute a "significant effect" under the California Environmental Quality Act (CEQA). **Therefore, if no project level environmental review will be conducted for ministerial projects, the environmental impacts of such projects must be considered as part of the Housing Element** which enables the projects, or at least in conjunction with the zoning amendments to implement the Housing Element. **If no EIR or negative declaration will be prepared for the Housing Element, Housing Element provisions such as requiring ministerial approval of projects must be presented with sufficient generality and caveats to clearly communicate that these provisions are subject to the zoning amendments or other follow up regulatory action that receives environmental review.**

4. **Use alpha-numeric designations to facilitate reference, rather than bullets**, especially for provisions that are part of the Goal/Policy/Action statements such as Actions 3.4.1, 4.1.4 and 5.2.9.

B. Specific problematic provisions in Appendix J.

1. **Retain the existing two-tiered height limit system of wall height plus greater roof height in all zones.** For some zones, Appendix J proposes to replace the two-tiered system with a single overall height limit. Retaining the two-tiered system in residential zones is important in order to minimize the visual bulk of larger buildings, especially if there is no discretionary design review.

2. In many residential zones, reductions in front setbacks are proposed. **Front setback reductions should not be applied if the reduced setbacks are less than the prevailing front setback of the block face.** Otherwise new development will literally "stick out" and architecturally disrupt the streetscape. Existing provisions that allow reduced setbacks for new construction or front additions where adjacent buildings already have reduced setbacks should continue to be relied on.

3. **Retain the conditional use permit requirements for projects with five or more regular units**, since projects with five or more regular units allowed by right are eligible for a density bonus under the State Density Bonus Law that can trigger waivers and concessions for height limits, setbacks and other standards, potentially resulting in architectural disruptions to existing neighborhoods. If more density is desired, provide it in the form of more accessory dwelling units (ADUs) (which don't count toward the five

unit bonus trigger), especially ADUs within existing buildings. Some or all of the ADUs could be designated as deed-restricted affordable, accomplishing the State Density Bonus Law objective.

4. **Table 2 – Commercial Zone Height Limits.** Retain existing height limits in Areas of Primary and Secondary Importance (APIs and ASIs). In most cases, the existing limits were structured to avoid out-of-scale new buildings.

5. **Figure 3 – Downtown Oakland Specific Plan (DOSP) proposed height changes**. This map essentially preempts the height limit discussion that has been ongoing for five years as part of the DOSP and is intimately tied into other important DOSP initiatives, such as the transferable development rights and zoning incentive programs. The Housing Element zoning amendments should defer to the DOSP regarding height limits within the DOSP area.

6. **Affordable Housing Overlay (AHO) zone**. It is good that the AHO zone would not apply to City, state and federal historic landmarks and the height additions would not apply to APIs. However, in addition, the AHO should not apply to APIs and ASIs, since the unlimited residential density provision will make all parcels eligible for the State Density Bonus Law. As discussed in Item B.3 above, this would enable greater heights than otherwise allowed, incentivizing disruption of APIs and ASIs architecturally, and potentially incentivizing demolition.

   If unlimited density is desired in APIs and ASIs as part of the AHO program, it should be limited within APIs and ASIs to units within existing buildings, at least in lower density zones, and to no more than four regular units per parcel, plus perhaps unlimited ADUs.

   The AHO height changes for the DOSP area should be considered as part of the DOSP process, rather than as part of the Housing Element. The Housing Element can include a provision stating this.

Thank you for the opportunity to comment. Please contact Christopher Buckley at (510) 523–0411 or cbuckleyaicp@att.net or Naomi Schiff at (510) 835–1819 or Naomi@17th.com if you would like to discuss these comments.

Sincerely,

Mary Harper

EAST BAY FOR EVERYONE

December 4, 2022

Director Wiliam Gilchrist
Department of Planning and Building
City of Oakland
350 Frank Ogawa Plaza
Oakland, CA 94610

RE: Revised Draft Housing Element 6th Cycle (2023-2031) dated 11/29/22

Dear Director Gilchrist,

We write to provide comments on Oakland's Revised Draft Housing Element for the 6th Planning Cycle (2023 - 2031) released on November 29, 2022 ("Revised Draft").

Overall we are pleased with the direction of the Revised Draft and appreciate the incorporation of many of the comments from the East Bay for Everyone, YIMBY Law, HAC, Greenbelt Alliance and East Bay YIMBY letter dated October 14, 2022.

The Missing Middle Program is significantly improved by reductions in setbacks, reductions in parking requirements, and increase in allowable density for high-resource areas like Rockridge and Adams Point. We are also happy to see an increase in commercial corridor heights along Claremont and College as well as the inclusion of additional, more viable opportunity sites in Rockridge.

We are also encouraged to see the City of Oakland commit to studying single exit aka "single stair" reform. We disagree, however, that the City of Oakland is unable to implement changes at the local level. The City of Seattle, for example, has adopted local building code changes for a single exit up to five stories that meet NFPA 101 mitigation requirements, including a maximum of four units per floor, automatic sprinklers, one hour-rated walls around the core and half hour-rated walls between units. Oakland could similarly adopt amendments to its local code or establish an alternative means and methods process for four story single stair structures.

We offer the following comments on the Revised Draft:

1. For Missing Middle Housing, we appreciate the reduction of off-street parking requirements to 0.5 in residential areas and zero in the ½ mile radius of major transit stops, but we believe it would be more productive if zero-parking missing middle were allowed across significant transit corridors, rather than merely near BART stations, BRT stops, and

the (rare) intersection of two bus corridors each with up to 15-minute peak headways. We propose instead zero parking requirements within ½ mile radius of bus stops of lines running with at least 30-minute peak headways, which would allow not only Telegraph, Broadway, San Pablo, and MacArthur, but also Grand.

We also suggest a planned check-in midway through the planning period to examine whether missing middle standards are in fact being used at scale, and to amend further if not.

2. Table C-17 "Lower- Income Projects on Small Sites 2018 - 2021" describes projects less than ½ acre developed as low-income housing. Three of the five projects identified in this table are acquisition projects, including Project Homekey sites. Acquisition of sites for low-income housing less than ½ acre is an important goal for preserving and creating affordability but it does not address the underlying need for deeper analysis of building low-income housing on small sites as required under HCD guidance.

   The purpose of additional analysis for low-income housing development for small sites less than ½ acre is to identify that the jurisdiction has a track record of developing new construction of low-income housing on such sites. This is important because smaller sites are difficult to finance through the Tax Credit Allocation Committee and other funding sources. Small sites are also more difficult to construct due to parking, circulation, second egress and other requirements. Please remove the acquisition sites and provide additional analysis of Oakland might pursue additional policy changes, including single stair reform, to increase the viability of low-income housing development on small sites.
3. We appreciate the broad reduction to parking standards in a range of zones, not just residential-only, reflecting Oakland's Transit First policy and climate goals. In light of recent counterproductive proposals of parking garages or overparked apartment complexes in transit-oriented areas of Oakland, this direction could be enhanced by:
   a. Applying revised CBD parking maximums to apply equally to a ½-mile radius of all major transit stops;
   b. Making new paid parking, structured or surface (as opposed to off-street parking serving another use) require conditional use permits; and
   c. Require all structured parking be built to be convertible to non-parking uses in the future; currently their standard angled floors make it impossible to do anything else without demolishing.
4. We appreciate and are excited at the proposal to remove CUP requirements for small commercial establishments in residential zones (Accessory Commercial Units) and, in food deserts, for grocery stores. However, we suggest careful objective definition of "food desert," and to err on the side of an expansive definition, such as the USDA half-mile standard (as opposed to a 1-mile standard).

Thank you for considering these comments. We appreciate the City of Oakland's ongoing efforts to refine and deliver a compliant and equitable Housing Element.

Sincerely,

John Minot

November 29, 2022

Dear Ed,

I purchased the Dreyer's site in Rockridge in February 2020, just before the Covid shutdown, with the intent of turning it into a non-profit Jewish Community Campus serving the entire East Bay community. The property consists of ten parcels, anchored by the Dreyer's building at 5901 College Avenue. The property includes assessor's parcel numbers 014-126800901, 014-126801101, 014-126801200, 014- 126801300, 014-126803900, 014-126803800, 014-126803600, 014-126803501, 014-126803201, and 014-126803000. In October 2020, the Jewish Community Center of the East Bay and several non-profit Jewish organizations began actively using the site as community space.

We had contacted the City with questions regarding the development of the Jewish Community Center in January 2022 but did not receive a response. We formally submitted a development application online for a Conditional Use Permit on November 2, 2022, for day care, after school, and community assembly for religious services that will operate in the existing Dreyer's and old Yoshi's buildings. The existing retail spaces on College Avenue will remain as tenants and no changes are proposed on the College Avenue frontage. We have met several times with RCPC and the Chabot neighbors and are building strong relationships there.

The draft Housing Element has now earmarked the site as a site for affordable housing and was added as a supplemental site to achieve Affirmatively Further Fair Housing. However, the Housing Element says that in identifying the Affirmatively Further Fair Housing sites that staff excluded sites with uses that serve the community. As such, we ask that the staff remove our properties from the city's affordable housing opportunity sites because it is currently, and will continue to be, a site that serves the community. It is understandable that staff was unaware of this, but we ask that it be corrected immediately.

Thank you and I look forward to providing a wonderful non-profit community center to Oakland and the East Bay.

Sincerely,

Moses Libitzky
Principal

Subject: November 2022 Revised Draft Housing Element

Dear General Plan Team:

Oakland Heritage Alliance is still studying the revised November, 2022 draft Housing Element, including the appendices, so the following comments are preliminary and subject to future modification and expansion.

A. Housing Element main document.

1. The 11/22 draft now commits the City to specific zoning revisions in specific areas, such as Action 3.2.1's provision for reducing minimum lot sizes in Detached Unit and Mixed Housing Type Residential Zones to 2000 ft.^{2}. These kinds of provisions are appropriate to state in general terms as part of a General Plan element and/or as proposals for consideration, but when presented with the draft's level of specificity causes the draft to read more as a zoning ordinance rather than a general plan element. Such levels of specificity should be normally reserved for the zoning amendments. Related to this, the preliminary draft zoning amendments in Appendix J should be understood as just that – a preliminary draft that the City has not yet committed to. **Action 3.4.1, Bullet 8 regarding Appendix J should reflect this by adding "preliminary draft" before "proposal".**

2. It is our understanding that an Environmental Impact Report (EIR) will be prepared for the zoning amendments implementing the Housing Element, rather than for the Housing Element itself. Therefore, **what will be the environmental review determination for the Housing Element?** If the Housing Element includes specific upzoning provisions, such as discussed above, an EIR or at a least negative declaration would appear necessary.

3. Action 3.4.3 states that, among other things, Action 3.4.8 will "create objective design review standards and… allow for streamlined ministerial approval". However, Action 3.4.8 actually provides only for objective design standards and says nothing about ministerial approval. **The term "ministerial approval" needs to be explained.** It often

means over the counter approval, with no public notification, review or appeal. But **there still needs to be public notification and review to help ensure that staff application of objective standards is performed correctly.** OHA reviews numerous design review applications and has found many cases where existing zoning standards and/or design review criteria were not applied correctly or fell through the cracks.

In addition, "ministerial approval" indicates that such projects are exempt from environmental review. Such projects if located in historic areas could adversely impact the architectural integrity of these areas, which would normally constitute a "significant effect" under the California Environmental Quality Act (CEQA). **Therefore, if no project level environmental review will be conducted for ministerial projects, the environmental impacts of such projects must be considered as part of the Housing Element** which enables the projects, or at least in conjunction with the zoning amendments to implement the Housing Element. **If no EIR or negative declaration will be prepared for the Housing Element, Housing Element provisions such as requiring ministerial approval of projects must be presented with sufficient generality and caveats to clearly communicate that these provisions are subject to the zoning amendments or other follow up regulatory action that receives environmental review.**

4. **Use alpha-numeric designations to facilitate reference, rather than bullets**, especially for provisions that are part of the Goal/Policy/Action statements such as Actions 3.4.1, 4.1.4 and 5.2.9.

B. Specific problematic provisions in Appendix J.

1. **Retain the existing two-tiered height limit system of wall height plus greater roof height in all zones.** For some zones, Appendix J proposes to replace the two-tiered system with a single overall height limit. Retaining the two-tiered system in residential zones is important in order to minimize the visual bulk of larger buildings, especially if there is no discretionary design review.

2. In many residential zones, reductions in front setbacks are proposed. **Front setback reductions should not be applied if the reduced setbacks are less than the prevailing front setback of the block face.** Otherwise new development will literally "stick out" and architecturally disrupt the streetscape. Existing provisions that allow reduced setbacks for new construction or front additions where adjacent buildings already have reduced setbacks should continue to be relied on.

3. **Retain the conditional use permit requirements for projects with five or more regular units**, since projects with five or more regular units allowed by right are eligible for a density bonus under the State Density Bonus Law that can trigger waivers and concessions for height limits, setbacks and other standards, potentially resulting in architectural disruptions to existing neighborhoods. If more density is desired, provide it in the form of more accessory dwelling units (ADUs) (which don't count toward the five

unit bonus trigger), especially ADUs within existing buildings. Some or all of the ADUs could be designated as deed-restricted affordable, accomplishing the State Density Bonus Law objective.

4. **Table 2 – Commercial Zone Height Limits.** Retain existing height limits in Areas of Primary and Secondary Importance (APIs and ASIs). In most cases, the existing limits were structured to avoid out-of-scale new buildings.

5. **Figure 3 – Downtown Oakland Specific Plan (DOSP) proposed height changes**. This map essentially preempts the height limit discussion that has been ongoing for five years as part of the DOSP and is intimately tied into other important DOSP initiatives, such as the transferable development rights and zoning incentive programs. The Housing Element zoning amendments should defer to the DOSP regarding height limits within the DOSP area.

6. **Affordable Housing Overlay (AHO) zone**. It is good that the AHO zone would not apply to City, state and federal historic landmarks and the height additions would not apply to APIs. However, in addition, the AHO should not apply to APIs and ASIs, since the unlimited residential density provision will make all parcels eligible for the State Density Bonus Law. As discussed in Item B.3 above, this would enable greater heights than otherwise allowed, incentivizing disruption of APIs and ASIs architecturally, and potentially incentivizing demolition.

   If unlimited density is desired in APIs and ASIs as part of the AHO program, it should be limited within APIs and ASIs to units within existing buildings, at least in lower density zones, and to no more than four regular units per parcel, plus perhaps unlimited ADUs.

   The AHO height changes for the DOSP area should be considered as part of the DOSP process, rather than as part of the Housing Element. The Housing Element can include a provision stating this.

Thank you for the opportunity to comment. Please contact Christopher Buckley at (510) 523–0411 or cbuckleyaicp@att.net or Naomi Schiff at (510) 835–1819 or Naomi@17th.com if you would like to discuss these comments.

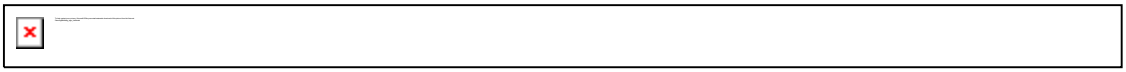
Oakland Planning Department,

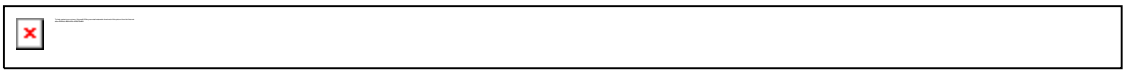
While the changes to the Oakland 2045 General Plan are commendable, I am disappointed that some of the most resource and transit rich neighborhoods in Oakland are not being upzoned significantly.



While Rockridge and North Oakland are being targeted (rightly) for additional housing density, the MacArthur Blvd Corridor in East Oakland (near Laurel and Dimond) neighborhoods are not being targeted for almost any additional density. This corridor is well served by numerous local and transbay bus lines, has abundant high-quality employment, food/grocery, park and school options but is currently almost exclusively single family only zoned. Housing built close to 580 is far away from the WUI and fire danger and would be a prime candidate to increase density in, so that all parts of Oakland affirmatively further fair housing.

I respectfully ask that the City of Oakland provide more access for residents who are not millionaires to live above 580 by providing housing options in these neighborhoods that are more than just single family only residences.

Respectfully,



Ryan Lester

GENERAL PLAN UPDATE

Housing Element Public Hearing Draft Released!

Housing Element Public Hearing Draft Available for Public Review!

The City of Oakland has released the **2023-2031 Housing Element Public Hearing Draft**. This revised draft of the Housing Element addresses community feedback received from June 2022 to mid-October 2022 and fulfills requirements for compliance with state law.

The Public Hearing Draft includes several new components:

1. An executive summary
2. A substantially updated Chapter 4: Housing Action Plan
3. Appendix J: Proposed Rezoning Changes
4. Appendix K: City of Oakland Response to the Findings Letter from State HCD, dated 9/28/22
5. Appendix L: Response to Public Comments.

The Housing Element Public Hearing Draft is also being shared with State Housing and Community Development (State HCD) department today. Pursuant to AB 215, the Housing Element Public Hearing Draft will be formally submitted to State HCD on December 7, 2022, after the seven-day public review period (Nov. 30 to Dec. 6). Comment letters received prior to the formal submittal will be included in the formal submittal package. Comment letters received after the formal submittal will be forwarded to State HCD at the time the comments are received.

After the seven-day public review period, the public can continue to provide feedback on the Housing Element Public Hearing Draft **until December 29, 2022**. Comment letters received after December 6, 2022 will be forwarded to State HCD at the time the comments are received and will be included as a supplemental document to the agenda reports for the Planning Commission and City Council public hearings beginning in January 2023.

Please see the project milestone dates below for an overview of the process moving forward:

- November 29, 2022 – Publication of Public Hearing Draft Housing Element
- November 30, 2022 - December 6, 2022 – Seven-day public review period, pursuant to AB 215
- December 7, 2022 – Submittal to State HCD
- December 29, 2022 – End of the comment period for the Housing Element Public Hearing Draft
- January 2023 – Public Hearings for Housing Element Adoption (Dates TBD)

How to Comment on the Housing Element

There are several ways to comment on the 2023-2031 Housing Element before it is adopted by City Council in early 2023:

1. Email feedback to: generalplan@oaklandca.gov
2. Participate in community events posted on our website
3. Attend upcoming public hearings at the Planning Commission and City Council on the Housing Element, beginning in January 2023. An email will be sent out when the public hearing dates are scheduled.

Questions?

For more information and to find out how to get involved, visit the General Plan Update website or please contact Lakshmi Rajagopalan at generalplan@oaklandca.gov.

The Planning & Building Department oversees the regulations for the City's growth and development. Through reviewing project plans, enforcing local ordinances, developing neighborhood plans, and responding to public concerns, we work to create a built environment that supports the health and welfare of all Oaklanders.

Subject: Housing Element Feedback -- Fact Checking TOPA program in Washington DC

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Dear Housing and Community Department,

I am writing to provide feedback for the Housing Element draft and express concerns about the Tenant Opportunity to Purchase Act, often referred to as TOPA. When TOPA was brought up to residents in neighborhood meetings, Washington DC was frequently referenced as having had TOPA for over 40 years where it was claimed to be "wildly successful". **The below fact check of the Washington DC TOPA program suggests otherwise**.

TOPA has been in Washington DC since 1980 and has not widely spread across the country during this time because there are serious problems with it. In fact, Washington DC started to unwind TOPA. The DC council voted to defund TOPA and removed properties from TOPA restrictions, including single-family homes, condos and single-unit townhomes. The DC council took these actions after it deliberated and reviewed TOPA's underperformance over 40 years. Many DC residents showed up at the council to provide hours of public testimony in opposition to TOPA.

The so-called “Tenant Opportunity” to Purchase Act (TOPA) is a False Promise. The bureaucratic and ineffective TOPA program strips affordable housing funds from efficient approaches that directly help tenants and homeless residents. DC prioritizes 3 effective housing programs over TOPA as is reflected in the funding budget each year:

1. Rental assistance to directly help low-income tenants.
2. Down Payment Assistance to directly help tenants purchase homes (first time homebuyer program).
3. Shelter programs with supportive services like drug treatment for homeless residents.

Serving as our nation’s capital, Washington DC (DC) had special access to vast funding and became a perfect Petri dish for testing many housing ideas. The city collected performance metric on different housing approaches over many years and allocates funds based on tangible outcomes. The DC Local Affordable Housing budget is an astounding $291 Million for last year, Fiscal Year 2020. In 2020, DC devoted about 50% of its total affordable housing budget toward **rental assistance** while TOPA only received approximately 5%. Downpayment assistance and homeless shelter programs received more priority and funding than the ineffective TOPA program.

Local Funding for DC’s Main Affordable Housing Programs

In millions of FY 2020 dollars

	FY 2017 Actual	FY 2018 Actual	FY 2019 Approved	FY 2020 Approved
Department of Housing and Community Development	25.8	25.0	25.5	22.7
Housing Preservation Fund	--	10.6	10.4	11.8
Housing Production Trust Fund [HPTF]	107.3	103.9	102.4	115.6
DC Housing Authority Subsidy [Rental Assistance]	54.1	82	109.9	141.2
Total	**187.2**	**196.4**	**222.7**	**291.3**

Rental Assistance is ~ 50% of **Total 2020 budget**, TOPA is ~ 5%.

Note: Department of Housing and Community Development figures exclude Preservation Fund, which is included separately on the table.
DC Housing Authority Subsidy figure includes Permanent Supportive Housing and excludes Public Safety.
Source: Fiscal Year 2017-2020 Budget and Financial Plans; Office of the Chief Financial Officer via CFO info; information provided by the Mayor’s Budget Office and Council Budget Office.

During the 40+ years that TOPA has been in Washington DC (DC), it was so inefficient that the people administering the program avoided collecting data and could not produce the performance numbers required in formal city reports. The TOPA program in DC can not produce data before 2002, lacks data stretching decades and also recently failed to be forthcoming with data in official fiscal audit and budget oversight reports.

Performance metrics for various Affordable Housing Programs in Washington DC

10. Inclusionary Zoning (IZ)

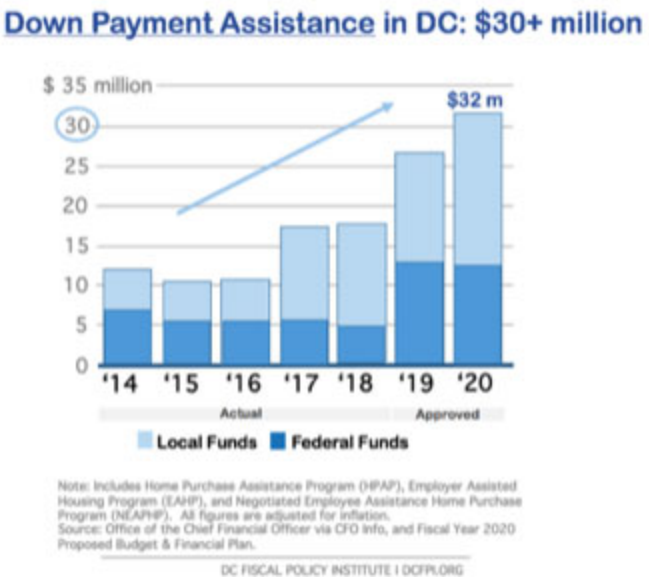
Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of IZ units available for occupancy	No	149	134	252

11. Down Payment Assistance

Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of Employer Assisted Housing Program (EAHP) completed applications received by Administrators	No	New in 2020	New in 2020	New in 2020
Number of Home Purchase Assistance Program (HPAP) completed applications received by Administrators	No	767	904	1305

12. Affordable Housing Project Financing

Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of affordable housing projects closed	No	28	28	18
Number of affordable units preserved through the Housing Preservation Fund	No	New in 2020	New in 2020	New in 2020
Number of financial applications submitted	No	48	64	71
Number of total affordable housing units preserved through TOPA acquisition assistance program	No	Not Available	Data Forthcoming	Data Forthcoming



Performance metrics for TOPA lacks transparency in measurable outcomes. The TOPA program lacks official data stretching decades. TOPA recently lists "Data Forthcoming" for multiple years unlike other affordable housing programs in fiscal report.

Source: Fiscal Year 2021 Budget and Financial Plans – Congressional submission – Government of the District of Columbia

TOPA data is spotty or highly selective, unlike effective affordable programs which submit concrete numbers annually. What little TOPA data available is often not in formal financial review and disclosure reports, is selectively presented out of context. The people administering TOPA in DC still choose not to collect TOPA outcome data — they do not track completed sale to tenants because the rate is so poor and instead choose only to report TOPA notices. TOPA gets very little funding in DC due to its poor performance over decades.

The below graphs show DC spent over $150 million on rental assistance in FY 2021 and over $30 million in the prior year for downpayment assistance to promote home ownership. By contrast, TOPA received only a small fraction of the Housing Production Trust Fund (HPTF). The approved budget for TOPA in FY2021 is a mere $10 million out of the $100 million in the Housing Production Trust Fund. The local total affordable housing budget is around $300 million annually in DC for the last few years.

DC HOMELESS PROGRAMS: DC pours tens of millions to provide temporary and long term affordable housing to individuals, families and youths. It also emphasizes mental health services, addiction counseling and improving outreach and public restroom access for homeless citizens. Our local cities have a historic budget deficit. It does not make sense for Berkeley or Oakland to waste $10-15 million taxpayer dollars each and every year on TOPA at the cost of supporting more effective homeless programs. Our homeless residents do not even have a roof over their heads and should be prioritized.

Homeless Services for FY 2020

SUMMARY

Adds the following for individuals:

- $15.9 million for new Permanent Supportive Housing (PSH) units and $737,000 for additional Targeted Affordable Housing units for individuals. While this is a significant investment, it falls short of the need.
- Nearly $36 million for shelter repairs and shelter replacement.

Adds the following for families:

- $6.3 million for 180 new PSH slots, fully meeting the need for PSH among families.
- $5.1 million for 203 new TAH slots. This is well below the number of families experiencing homelessness who need long-term housing help.
- $11.2 million for operating Short-Term Family Housing.

Adds the following for youth:

$1.7 million for 50 PSH spots, $2.1 million for 50 transitional beds, and $1.3 million for 60 shelter beds.

Also includes:

- $7.9 million for Emergency Rental Assistance Program (ERAP), a small increase from last year.
- $400,000 to improve public restroom access.
- $200,000 to develop a new strategic plan for housing for survivors of domestic violence.
- $3.7 million to replace federal funding that is expiring for street outreach to people with high needs.
- $21,600 for stipends for homeless residents who are members of the Interagency Council on Homelessness Consumer Work Group.

The proposed local TOPA legislation is much more problematic and restrictive than TOPA in DC, and thus much more worrisome for Bay Area residents. TOPA has **forced deed restrictions that is being sold using the benign sounding "permanently affordable" euphemism.** Unlike unencumbered properties, these forced deed restrictions would drop property values by hundreds and thousands of dollars, wiping out life long savings for many seniors and leaving them bereft of the means to pay for medical expenses and care for themselves in retirement. In practice, these restrictions would also make it difficult to maintain homes in habitable conditions which is especially detrimental to resident renters.

As is historically consistent, housing programs with heavy government regulation and management such as the TOPA program or Public Housing Projects has resulted in poor outcomes for residents. In DC, poorly managed Public Housing Projects led to dilapidated buildings with leaky plumbing, hazardous lead, rodent infestations and toxic mold which have sickened families and sent many children to hospitals. An estimated 7000+ of DCs' 8000+ housing units are severely deteriorated, requiring HUD to take over management. Many social or public housing projects across the country experienced similar deteriorated living conditions. The local TOPA program would be the most convoluted and heavily regulated government run social housing program, which does not bode well for our Bay Area cities or residents.

Another Affordable Housing lesson in DC worth mentioning is the potential for misuse of public fund by trusted officials in the name of affordable housing and helping homeless residents. An auditor in DC had to issue a subpoena seeking documents during an investigation. The auditor was repeatedly stonewalled by bureaucrats and only eventually obtained the needed data from a concerned whistle blower. The subsequent DC audit report found "…the (government housing) agency appeared to have a hands-off approach to projects once they had been selected for funding." There was a lack of accountability in measurable outcomes and insufficient transparency in the use of public money for housing. As a result, DC Council member Elissa Silverman introduced a bill, the Housing Production Trust Fund Transparency Amendment Act of 2019 that would require DC's Department of Housing and Community Development (DHCD) to make information more public for increased transparency.

TOPA utterly failed in Washington DC. The Richmond city council unanimously rejected it unanimously in 2019 due to numerous concerns. We do NOT want TOPA and COPA either.

Sincerely,

Tuan Ngo

RE: PUBLIC COMMENT FOR SUBMITTAL RE: Housing Element draft on Dec 7th 2022
1. We need an equity study BEFORE proposing TOPA/COPA legislation
2. Negative impacts of TOPA/COPA on the minority community
3. TOPA/COPA is the new/next form of property theft of Black Property Owners
4. SB-1079 has already been creating problems similar to TOPA/COPA, even through Nancy Skinner had the 'best of intentions' as a legislator in our own community

Dear Housing Policy Staff,

The "Tenant Opportunity to Purchase Act (**TOPA**) AND 'Community Opportunity" to Purchase Act (**COPA**) is being sold as a way to prevent gentrification and minority displacement. Contrary to these claims, **after DECADES of TOPA in Washington DC, a study found DC has had the most gentrifying neighborhoods across the country with 20,000 black residents displaced**. https://dcist.com/story/19/03/19/d-c-has-had-the-most-gentrifying-neighborhoods-in-the-country-study-finds/ (also attached below).

My family and neighbors are extremely concerned that **TOPA/COPA would PREVENT West Oakland, East and Deep East Oakland (flatland) minorities and particularly black owners from keeping black properties in historically black communities in blac hands.** Why should a black owner be PREVENTED from bequeathing her OWN home to a family member or neighbor? Passing properties directly to those who similarly endure discrimination is a strong tradition that arose as a result of redlining and housing discrimination and segregation and deed restrictions, when banks refused to offer mortgage loans to minorities. **TOPA/COPA** would undermine long-standing community tools that evolved into tradition, designed to instead steal generational wealth by acquiring their property as well as the equity built into it. To us, this is another clear example of "**dispossession through legislation**", a known tactic frequently levied against minority communities. From the Urban Renewal housing policy that displaced people to Berkeley's inception of racist single-family exclusionary zoning that segregated people across the country, there is a long line of supposedly "helpful" housing policies that hurt and rob black families of generational wealth. Word is spreading amongst our informed community members. We are most ALARMED that **TOPA/COPA is the next scheme similarly impacting our community to what redlining did.** We are seeing more legislation being slickly crafted. It is reminding us of the fairy tale where the juicy apple and the unsuspecting sleeping beauty is seduced by a solution to the housing stock and affordability problem, designed as a fix but is really a harm.

An <u>Equity Study</u> on the impacts of TOPA/COPA is <u>absolutely</u> necessary BEFORE this legislation is proposed and it should be properly discussed in communities with public comment and awareness devoted to it, not just the marketing scheme language used by political operatives and promoters of this legislation to push it through in their usual fashion to acquire support for measures by the loudest who are usually first to seek most benefits from these oppressive legislative acts and housing pyramid schemes.

Please consider the historical wrongs in Black communities related to government and housing, especially the building of wealth and Black property ownership . The diabolical ways society targeted Black wealth, from the 1980s crack epidemic, using property equity to secure high-cost bails and over-incarcerated family owners, as well as the more recent 2009 housing bubble where mortgage and finance professionals targeted Blacks with loans they knew they couldn't pay). For context to the equity issues at hand, please refer to books such as Richard Rothstein's **Color of Law,** Mehrsa Baradaran's **The Color of Money: Black Banks and the Racial Wealth Gap** and Keeanga-Yamahtta Taylor's **Race for Profit: How Banks and the Real Estate Industry Undermined Black Homeownership**.

<u>We DEMAND data before legislating harmful housing policies that would repeat the historical theft of wealth and community</u>.

<u>Our community has these specific concerns regarding TOPA/COPA:</u>

1. **TOPA/COPA would dismantle a common pathway to Black homeownership:**
   TOPA/COPA would give 'first dibs' to special interest housing developers and prevent minority residents from directly selling to someone of our choosing. **TOPA/COPA** does nothing to increase investment in historically black communities. nor does it outline ways to build black wealth. In fact, homes in the hands of historical Black families typically have some equity value and this absorbs and extracts those values. The legal practices of segregation and redlining were supported by lending institutions failing to offer mortgage loans to minorities, denying wealth-building opportunities whites enjoy and support. Black residents who were able to obtain and sustain real estate passed it on to family and community members, often bequeathing homes below market price and providing seller carry-back loans with favorable terms, especially when banks refused to lend to us. When elders pass on their homes, they support their family legacies for the next generation in doing so. It is not uncommon to wait years for our family ready to buy to come up with downpayments and locate a bank that would loan to them. Homes in the Black community don't just have monetary value -- they represent our independence and ability to thrive and be free. They're where we celebrate family birthdays, take care of our loved ones, and are passed on to maintain the equity values within our community, that help them raise Black families, educate their children, create memories and thrive in old age. **TOPA/COPA** undermines these traditional pathways to homeownership for people of color by giving 'right of first refusal' to special interest developers over family members and long-time minority residents. This is more than just within Black communities; Hispanic/Latino, AAPI, LGBTQ+ communities and those divided and comforted by

ethnicity, religious persuasion and culturally aligned safe spaces exist all around us for these very reasons. Families purchase and hold their properties so that they can sustain and avoid racial discriminatory practices and treatment. From swastikas. cross burnings, telling unwelcome races to 'go home' using other symbols of hate and intolerance, our communities are considered safe spaces for these reasons.

2. **TOPA/COPA targets properties in historically segregated areas and robs Black historical wealth.** **TOPA/COPA** targets "Naturally Occurring Affordable Housing (NOAH)" that are in historically segregated areas, often poor areas around Bay Area Rapid Transit (BART) stations, where highways and other destructive developments were instituted to divide cities. The creation of BART stations occurred during well-documented abusive eminent domain actions committed by the cities against minority residents considerations. Minority residents were never adequately compensated for loss of property via eminent domain where BART stations and railways were constructed. This was another silent criminal of wealth and equity theft by eminent domain, e.g. legislative actions with 'the greater good's intentions'. A largely disproportionate number of properties around BART that are now being targeted by **TOPA/COPA** for acquisitions and currently owned by multicultural and predominantly Black residents, in the Oakland flatlands and areas within zip codes predominantly occupied by ethnic minorities. According to the **Greenlining Institute**, **Americans of Color have 61% of their wealth in home equity**. Home equity is often used to fund college educations and take care of medical bills and our old age/elderly. **TOPA/COPA** would do irreparable and irreversible damage to the fabric of these minority communities by legislatively providing a false promise to give frequently non-family blood relative member tenants opportunity to purchase, when essentially all that tenant is doing is being the front for the land trust which is about to use this very legislation to steal the equity out of the home property owners spent a lifetime building. These historical environmental designs end up stolen under the guise of creating *affordable housing*. This is something that reparations is being discussed RIGHT NOW in the study developed by the California Task Force to Study and Develop Reparation Proposals for African Americans. Before that discussion is barely being approached, **TOPA/COPA** legislation is being determined by these very same communities that have already seen more than a CENTURY of harmful equity extraction. Further, while many communities were left out of the economic booms of industry, including tech and dotcom, we see former Black communities like East Palo Alto, decimated by legislative actions that liquidated Black homeownership and property wealth equity. **Ms. Beradaran's comments are clear in the discussions I'm speaking about. raising the difference between good and bad credit, segregation patterns, financial risk tools and discriminatory lending practices where the disparate impact exists between minorities and white credit markets and restricted credit markets/Bank InEquities and Exclusion from Mainstream Credit Systems: https://www.hup.harvard.edu/catalog.php?isbn=9780674237476**

3. **When you displace Black homeowners, you displace Black tenants and Black Families.** Due to segregation, minority residents were not welcomed in many neighborhoods. There are Black neighborhoods and white neighborhoods. Black owners rent out to Black family and community members, taking care of our own. When you target Black property owners, you target Black tenants. When you remove Black homeowners, you remove Black tenants. **TOPA/COPA** causes me as a Black female to ask "who's actually selling/buying these properties? 'What are their demographics in race, income, etc. Tich, white, wealthy, many of them out of area LLCs and

Corporations have been documented as the primary buyers of single family home properties in the SF Bay Area. These are **NOT** the targets of the properties being targeted/promoting **TOPA/COPA** in our communities.
https://www.sfchronicle.com/projects/2022/bay-area-housing-power-players/

4. **SB1079** has already created unintended consequences similar to **TOPA/COPA**, even as our representative, California 9th District State Senator Nancy Skinner had the 'best of intentions'. A story published on August 25, 2022 by Erin Baldassari in KQED's online edition speaks about ***how non-profits used a legal loophole to flip homes for a profit***. I'll include the link in the footnotes that references this story. Ironically, the story features an image of Oakland D3 Councilmember Carroll Fife in the article in front of the house on Magnolia Street featured in the community activist effort "Moms4Housing" that gave CM Fife rise to the very seat she represents in our West Oakland community. What these housing-promoting legislators don't seem to take into account is that many black families are victimized by their well-intentioned legislation. They simply don't help us. When asked, many families candidly share if they simply provided the knowledge, information, tools and supportive guidance on how to responsibly purchase, finance and build equity in their lives property, they can and do sustain. These individuals and families acquired property using tools via the federal government under programs such as FHA/CalFHA, VA and the myriad of programs supported by federal and state supported programs. These supportive groups should be able to do work without targeting poor minority property owners. Opportunists, in the form of mortgage investors, nonprofit organizations and do-gooders, see black community property owners as *low-hanging fruit* and a means to an end for their objectives to purchase their properties. And in the process, while the devaluing of their neighborhoods. As Andre Perry's *Know Your Price* articulates and the recent media highlighting the actions of the national appraisal system process shows across the country the practices of minorities having to 'whitewash' their interiors in appraisal preparations,to disguise that their homes are owned by minorities to avoid creating disparities in home valuations. When provided guidance, financial education without the strings attached for third-parties, minority community members can sustain their homes. I'm living proof of that. Legislation that find it necessary to provide more than simple education and financial support that many property owners, especially seniors, can not more easily find themselves, is a trap and a danger. Right now, we live in a support-less system that is used as a bait-and-switch on how they can use their homes for THEIR FUTURE, and sadly, reverse mortgages and other practices have become the usual result, frequently too late to undo the damage. Legislation, and not just the shifty intentions of nonprofits that are turning communities into demographic wastelands where reverse migration has consistently shown in the census year after year, leaves us with communities with histories that have historical context that are stolen and erased, similar to 1921 Tulsa, OK Greenwood District (Black Wall Street). West Oakland was once a prosperous black community known for the Seventh Street District and the Black Panther Party. It has lost its history and every day that history is further diluted by outward migration, divestment and failure to reparate these communities that continue to be targeted, year after year.

As a responsible, care-filled human, I am astute enough to review this with my own eyes, heart and mind. I've seen how government with good intentions do not see TOPA/COPA as a solution to the problems of housing in communities of color, especially without carve-outs and segments of the already harmed, historically protected communities that need to be identified, preserved and landmarked as preserved CULTURALLY. These communities are more than people's homes and it would be a mistake to just use them as opportunities to purchase using legislation that has been shown to be historically HARMFUL to communities of color, not HELPFUL in repatriating minorities into their communities that have been stolen from them by actions that are everything from building freeways to environmental poisoning to promotions by real estate hucksters marketing them as the new great place to raise a family and a cat or dog.

Please work with our community and our Race and Equity Department to conduct an INDEPENDENT Equity Study BEFORE proposing any TOPA/COPA legislation.

Sincerely,

Carol Wyatt

After DECADES of TOPA in Washington DC, a study found DC has had the most gentrifying neighborhoods across the country with 20,000 black residents displaced.

--

D.C. Has Had the Most Gentrifying Neighborhoods In The Country, Study Finds

MAR 19, 2019, 4:21 PM
Cordilia James

D.C. is one of the most gentrified cities in the country, study says.

When it comes to the intensity of gentrification across the country—at least over the first 13 years of the 21st century—the District tops the list.

D.C. had the highest percentage of gentrifying neighborhoods in the country between 2000 and 2013, according to a study from the National Community Reinvestment Coalition, a group that works to

“increase the flow of private capital into traditionally underserved communities.” It estimates that around 20,000 black residents were displaced over that period.
The study, which was first reported on by the Washington Post, identified more than 1,000 neighborhoods in 935 cities and towns across the country where gentrification occurred during that time frame. Rapidly rising rents, property values, and taxes forced more than 135,000 residents to move away in 230 of those neighborhoods.
These neighborhoods for each city were considered eligible for gentrification if they were in the lower 40 percent of home values and family incomes in the area (the study used a type of census data that characterizes urban areas beyond just their physical borders). When the study began, half of the neighborhoods in D.C. were considered eligible for gentrification, which the study defines as a force that happens when “lower-income neighborhoods receive massive levels of new investment, adding amenities, raising home values and bringing in new upper-income residents [which] can lead to cultural displacement.”
By 2013, 41 percent of those neighborhoods were gentrified.
Black residents, in particular, have struggled to stay in D.C. Once known as Chocolate City, the D.C. population used to be 71.1 percent black in 1970. By 2015, that number had dropped to 48.3 percent. The study showed that D.C. was one of four cities that had the highest percentage of black displacement when adjusted for the number of gentrified neighborhoods it has, along with Richmond, Charlottesville, and New Orleans.
While D.C. was the most gentrified city by percentage of eligible neighborhoods that experienced gentrification, New York City was the most gentrified by sheer volume. Both cities were among the seven cities in the country that accounted for nearly half the amount of gentrification nationally, including Los Angeles, Philadelphia, Baltimore, San Diego, and Chicago.
The period that the study examined coincided with significant population growth in D.C. for the first time in decades, particularly amid the region’s comparatively stable economy during the Great Recession. While that growth has slowed somewhat in recent years, housing costs have continued to rise and make affordable housing increasingly scarce.
“The tens of thousands who have migrated to the Washington, D.C., over the last five years live in a city that rolled out the proverbial red carpet for their arrival. Infrastructure has been altered, public property has been privatized, the will of voters has been rescinded, minority-owned businesses have been shuttered and the bodies of people of color have been stopped and frisked to accommodate and enhance the respective presence and comfort of newcomers,” Sabiyha Prince, an activist with the group Empower DC, wrote in an essay accompanying the report.
Last year, one group of residents sued the city over its housing and renewal policies

Please remove TOPA/COPA from Oakland's Housing Element Draft (on p. 66)

I am strongly opposed to TOPA and COPA. Under TOPA/COPA, people would be prevented from taking care of their families during financial hardships.

As an example, my husband and I recently purchased a home from a local couple who needed to sell a property IMMEDIATELY due to a financial emergency. The couple had to sell quickly because they own a local restaurant that suffered during COVID-19 shelter-in-place closures. We were able to accommodate their 3-week quick sale requirement because, fortunately, there are no TOPA/COPA restrictions in place. TOPA/COPA's extended time delays and onerous red tape would have made such quick sales impossible. Under TOPA/COPA, this couple would have lost their family business, been forced into bankruptcy, and they and their young children would have been displaced onto the streets. How can the city even consider such a harmful policy as TOPA/COPA when it invasively interferes with the personal and financial lives of residents?!

These residents had done nothing wrong, yet TOPA/COPA restrictions would have made them HOMELESS!

TOPA/COPA would also disadvantage local residents looking to purchase. It would have denied us fair and equal access to housing in favor of TOPA/COPA developers. I can't imagine being in a contract and having to wait a year or longer while who knows how many TOPA/COPA developers take turns interfering with the purchase, which is stressful enough as it is. We are not outside speculators. TOPA/COPA holds both local buyers and sellers hostage to red tape and protracted time delays.

We strongly oppose TOPA/COPA. TOPA/COPA doesn't take into account the normal up and downs and frequent financial hardships that families endure. This is a horrible idea that harms local residents and families like ours.

Sincerely,

Nha Vu

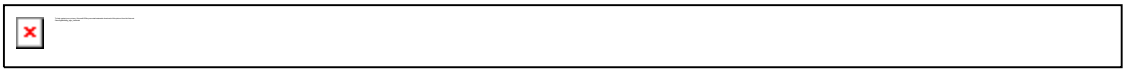
Oakland Planning Department,

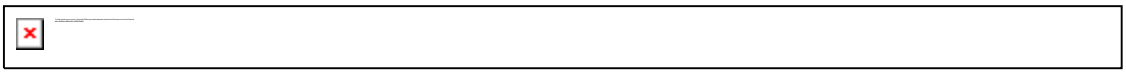
While the changes to the Oakland 2045 General Plan are commendable, I am disappointed that some of the most resource and transit rich neighborhoods in Oakland are not being upzoned significantly.



While Rockridge and North Oakland are being targeted (rightly) for additional housing density, the MacArthur Blvd Corridor in East Oakland (near Laurel and Dimond) neighborhoods are not being targeted for almost any additional density. This corridor is well served by numerous local and transbay bus lines, has abundant high-quality employment, food/grocery, park and school options but is currently almost exclusively single family only zoned. Housing built close to 580 is far away from the WUI and fire danger and would be a prime candidate to increase density in, so that all parts of Oakland affirmatively further fair housing.

I respectfully ask that the City of Oakland provide more access for residents who are not millionaires to live above 580 by providing housing options in these neighborhoods that are more than just single family only residences.

Respectfully,



Ryan Lester

GENERAL PLAN UPDATE

Housing Element Public Hearing Draft Released!

Housing Element Public Hearing Draft Available for Public Review!

The City of Oakland has released the **2023-2031 Housing Element Public Hearing Draft**. This revised draft of the Housing Element addresses community feedback received from June 2022 to mid-October 2022 and fulfills requirements for compliance with state law.

The Public Hearing Draft includes several new components:

1. An executive summary
2. A substantially updated Chapter 4: Housing Action Plan
3. Appendix J: Proposed Rezoning Changes
4. Appendix K: City of Oakland Response to the Findings Letter from State HCD, dated 9/28/22
5. Appendix L: Response to Public Comments.

The Housing Element Public Hearing Draft is also being shared with State Housing and Community Development (State HCD) department today. Pursuant to AB 215, the Housing Element Public Hearing Draft will be formally submitted to State HCD on December 7, 2022, after the seven-day public review period (Nov. 30 to Dec. 6). Comment letters received prior to the formal submittal will be included in the formal submittal package. Comment letters received after the formal submittal will be forwarded to State HCD at the time the comments are received.

After the seven-day public review period, the public can continue to provide feedback on the Housing Element Public Hearing Draft **until December 29, 2022**. Comment letters received after December 6, 2022 will be forwarded to State HCD at the time the comments are received and will be included as a supplemental document to the agenda reports for the Planning Commission and City Council public hearings beginning in January 2023.

Please see the project milestone dates below for an overview of the process moving forward:

- November 29, 2022 – Publication of Public Hearing Draft Housing Element
- November 30, 2022 - December 6, 2022 – Seven-day public review period, pursuant to AB 215
- December 7, 2022 – Submittal to State HCD
- December 29, 2022 – End of the comment period for the Housing Element Public Hearing Draft
- January 2023 – Public Hearings for Housing Element Adoption (Dates TBD)

How to Comment on the Housing Element

There are several ways to comment on the 2023-2031 Housing Element before it is adopted by City Council in early 2023:

1. Email feedback to: generalplan@oaklandca.gov
2. Participate in community events posted on our website
3. Attend upcoming public hearings at the Planning Commission and City Council on the Housing Element, beginning in January 2023. An email will be sent out when the public hearing dates are scheduled.

Subject: Housing Element Feedback -- Fact Checking TOPA program in Washington DC

[EXTERNAL] This email originated outside of the City of Oakland. Please do not click links or open attachments unless you recognize the sender and expect the message.

Dear Housing and Community Department,

I am writing to provide feedback for the Housing Element draft and express concerns about the Tenant Opportunity to Purchase Act, often referred to as TOPA. When TOPA was brought up to residents in neighborhood meetings, Washington DC was frequently referenced as having had TOPA for over 40 years where it was claimed to be "wildly successful". **The below fact check of the Washington DC TOPA program suggests otherwise**.

TOPA has been in Washington DC since 1980 and has not widely spread across the country during this time because there are serious problems with it. In fact, Washington DC started to unwind TOPA. The DC council voted to defund TOPA and removed properties from TOPA restrictions, including single-family homes, condos and single-unit townhomes. The DC council took these actions after it deliberated and reviewed TOPA's underperformance over 40 years. Many DC residents showed up at the council to provide hours of public testimony in opposition to TOPA.

The so-called “Tenant Opportunity” to Purchase Act (TOPA) is a False Promise. The bureaucratic and ineffective TOPA program strips affordable housing funds from efficient approaches that directly help tenants and homeless residents. DC prioritizes 3 effective housing programs over TOPA as is reflected in the funding budget each year:

1. Rental assistance to directly help low-income tenants.
2. Down Payment Assistance to directly help tenants purchase homes (first time homebuyer program).
3. Shelter programs with supportive services like drug treatment for homeless residents.

Serving as our nation’s capital, Washington DC (DC) had special access to vast funding and became a perfect Petri dish for testing many housing ideas. The city collected performance metric on different housing approaches over many years and allocates funds based on tangible outcomes. The DC Local Affordable Housing budget is an astounding $291 Million for last year, Fiscal Year 2020. In 2020, DC devoted about 50% of its total affordable housing budget toward **rental assistance** while TOPA only received approximately 5%. Downpayment assistance and homeless shelter programs received more priority and funding than the ineffective TOPA program.

Local Funding for DC’s Main Affordable Housing Programs

In millions of FY 2020 dollars

	FY 2017 Actual	FY 2018 Actual	FY 2019 Approved	FY 2020 Approved
Department of Housing and Community Development	25.8	25.0	25.5	22.7
Housing Preservation Fund	--	10.6	10.4	11.8
Housing Production Trust Fund [HPTF]	107.3	103.9	102.4	115.6
DC Housing Authority Subsidy [Rental Assistance]	54.1	82	109.9	141.2
Total	**187.2**	**196.4**	**222.7**	**291.3**

Rental Assistance is ~ 50% of **Total 2020 budget**, TOPA is ~ 5%.

Note: Department of Housing and Community Development figures exclude Preservation Fund, which is included separately on the table.
DC Housing Authority Subsidy figure includes Permanent Supportive Housing and excludes Public Safety.
Source: Fiscal Year 2017-2020 Budget and Financial Plans; Office of the Chief Financial Officer via CFO info; information provided by the Mayor’s Budget Office and Council Budget Office.

During the 40+ years that TOPA has been in Washington DC (DC), it was so inefficient that the people administering the program avoided collecting data and could not produce the performance numbers required in formal city reports. The TOPA program in DC can not produce data before 2002, lacks data stretching decades and also recently failed to be forthcoming with data in official fiscal audit and budget oversight reports.

Performance metrics for various Affordable Housing Programs in Washington DC

10. Inclusionary Zoning (IZ)

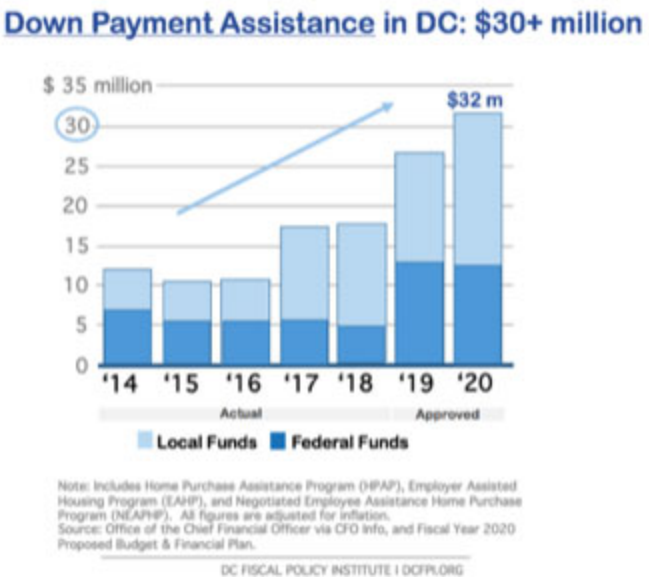
Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of IZ units available for occupancy	No	149	134	252

11. Down Payment Assistance

Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of Employer Assisted Housing Program (EAHP) completed applications received by Administrators	No	New in 2020	New in 2020	New in 2020
Number of Home Purchase Assistance Program (HPAP) completed applications received by Administrators	No	767	904	1305

12. Affordable Housing Project Financing

Measure	New Measure/ Benchmark Year	FY 2017 Actual	FY 2018 Actual	FY 2019 Actual
Number of affordable housing projects closed	No	28	28	18
Number of affordable units preserved through the Housing Preservation Fund	No	New in 2020	New in 2020	New in 2020
Number of financial applications submitted	No	48	64	71
Number of total affordable housing units preserved through TOPA acquisition assistance program	No	Not Available	Data Forthcoming	Data Forthcoming



Performance metrics for TOPA lacks transparency in measurable outcomes. The TOPA program lacks official data stretching decades. TOPA recently lists "Data Forthcoming" for multiple years unlike other affordable housing programs in fiscal report.

Source: Fiscal Year 2021 Budget and Financial Plans – Congressional submission – Government of the District of Columbia

TOPA data is spotty or highly selective, unlike effective affordable programs which submit concrete numbers annually. What little TOPA data available is often not in formal financial review and disclosure reports, is selectively presented out of context. The people administering TOPA in DC still choose not to collect TOPA outcome data — they do not track completed sale to tenants because the rate is so poor and instead choose only to report TOPA notices. TOPA gets very little funding in DC due to its poor performance over decades.

The below graphs show DC spent over $150 million on rental assistance in FY 2021 and over $30 million in the prior year for downpayment assistance to promote home ownership. By contrast, TOPA received only a small fraction of the Housing Production Trust Fund (HPTF). The approved budget for TOPA in FY2021 is a mere $10 million out of the $100 million in the Housing Production Trust Fund. The local total affordable housing budget is around $300 million annually in DC for the last few years.

DC HOMELESS PROGRAMS: DC pours tens of millions to provide temporary and long term affordable housing to individuals, families and youths. It also emphasizes mental health services, addiction counseling and improving outreach and public restroom access for homeless citizens. Our local cities have a historic budget deficit. It does not make sense for Berkeley or Oakland to waste $10-15 million taxpayer dollars each and every year on TOPA at the cost of supporting more effective homeless programs. Our homeless residents do not even have a roof over their heads and should be prioritized.

Homeless Services for FY 2020

SUMMARY

Adds the following for individuals:

- $15.9 million for new Permanent Supportive Housing (PSH) units and $737,000 for additional Targeted Affordable Housing units for individuals. While this is a significant investment, it falls short of the need.
- Nearly $36 million for shelter repairs and shelter replacement.

Adds the following for families:

- $6.3 million for 180 new PSH slots, fully meeting the need for PSH among families.
- $5.1 million for 203 new TAH slots. This is well below the number of families experiencing homelessness who need long-term housing help.
- $11.2 million for operating Short-Term Family Housing.

Adds the following for youth:

$1.7 million for 50 PSH spots, $2.1 million for 50 transitional beds, and $1.3 million for 60 shelter beds.

Also includes:

- $7.9 million for Emergency Rental Assistance Program (ERAP), a small increase from last year.
- $400,000 to improve public restroom access.
- $200,000 to develop a new strategic plan for housing for survivors of domestic violence.
- $3.7 million to replace federal funding that is expiring for street outreach to people with high needs.
- $21,600 for stipends for homeless residents who are members of the Interagency Council on Homelessness Consumer Work Group.

The proposed local TOPA legislation is much more problematic and restrictive than TOPA in DC, and thus much more worrisome for Bay Area residents. TOPA has **forced deed restrictions that is being sold using the benign sounding "permanently affordable" euphemism.** Unlike unencumbered properties, these forced deed restrictions would drop property values by hundreds and thousands of dollars, wiping out life long savings for many seniors and leaving them bereft of the means to pay for medical expenses and care for themselves in retirement. In practice, these restrictions would also make it difficult to maintain homes in habitable conditions which is especially detrimental to resident renters.

As is historically consistent, housing programs with heavy government regulation and management such as the TOPA program or Public Housing Projects has resulted in poor outcomes for residents. In DC, poorly managed Public Housing Projects led to dilapidated buildings with leaky plumbing, hazardous lead, rodent infestations and toxic mold which have sickened families and sent many children to hospitals. An estimated 7000+ of DCs' 8000+ housing units are severely deteriorated, requiring HUD to take over management. Many social or public housing projects across the country experienced similar deteriorated living conditions. The local TOPA program would be the most convoluted and heavily regulated government run social housing program, which does not bode well for our Bay Area cities or residents.

Another Affordable Housing lesson in DC worth mentioning is the potential for misuse of public fund by trusted officials in the name of affordable housing and helping homeless residents. An auditor in DC had to issue a subpoena seeking documents during an investigation. The auditor was repeatedly stonewalled by bureaucrats and only eventually obtained the needed data from a concerned whistle blower. The subsequent DC audit report found "…the (government housing) agency appeared to have a hands-off approach to projects once they had been selected for funding." There was a lack of accountability in measurable outcomes and insufficient transparency in the use of public money for housing. As a result, DC Council member Elissa Silverman introduced a bill, the Housing Production Trust Fund Transparency Amendment Act of 2019 that would require DC's Department of Housing and Community Development (DHCD) to make information more public for increased transparency.

TOPA utterly failed in Washington DC. The Richmond city council unanimously rejected it unanimously in 2019 due to numerous concerns. We do NOT want TOPA and COPA either.

Sincerely,

Tuan Ngo

Appendix A: Evaluation of the 2015-2023 Oakland Housing Element

This appendix looks back on the City's 2015-2023 Housing Element to analyze how the City fared in meeting its housing needs over the eight-year period. It additionally evaluates what has worked, what has not, and whether adjustments and new programs may be needed. It also includes an evaluation of the Housing Element's cumulative impacts on special needs. The full plan of action for the current eight-year Housing Element cycle is outlined in Chapter 4, the Housing Action Plan.

The City's previous Housing Element was adopted December 9, 2014, and covered the period from January 31, 2015, to January 31, 2023. ~~State law (~~California Government Code Section 65588~~[(a])~~ requires jurisdictions to review their housing elements to evaluate:

- The appropriateness of the housing goals, objectives, and policies in contributing to the attainment of the state housing goal;
- The effectiveness of the housing element in attainment of the community's housing goals and objectives;
- The progress in implementation of the housing element; and,
- The effectiveness of the housing element programs on the special needs population.

The City's Regional Housing Needs Allocation (RHNA) for the previous Housing Element planning period was 14,765 new housing units between 2014 and 2022. Of these housing units, 2,059 should be affordable to very low-income households, 2,075 should be affordable to low-income households, and 2,815 should be affordable to moderate income households. More information about the City's progress in meeting its RHNA over the past eight years is provided below, while additional information on the RHNA process generally and Oakland's allocation for the upcoming eight-year period is provided in Appendix C: the Housing Sites Inventory.

While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Oakland recognizes that more can and should be done to close the gap on affordable housing construction. Oakland further recognizes that many cities in the Bay Area region have failed to meet market-rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland. Nonetheless, the distribution of unit production in Oakland indicates that current funding sources and land use incentives for affordable housing production remain insufficient to meet Oakland's affordable housing

production goals. In its strategic plan, the Oakland Department of Housing and Community Development estimated that annual investment in affordable housing is roughly $100 million/year less than required to keep pace with Oakland's affordable housing targets.

The 2015-2023 Housing Element outlined seven housing goals with 46 policies and 131 policy actions to be taken to achieve those goals. Some actions do not have discrete timelines and are better suited as higher-level policies. ~~Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions.~~ While the majority of these actions have been evaluated as effective, there is still a clear gap in meeting the housing needs of some special needs groups – especially those experiencing homelessness and extremely-low-income households. Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions, as well as to adequately meet the needs of special needs groups during the 2023-2031 period.

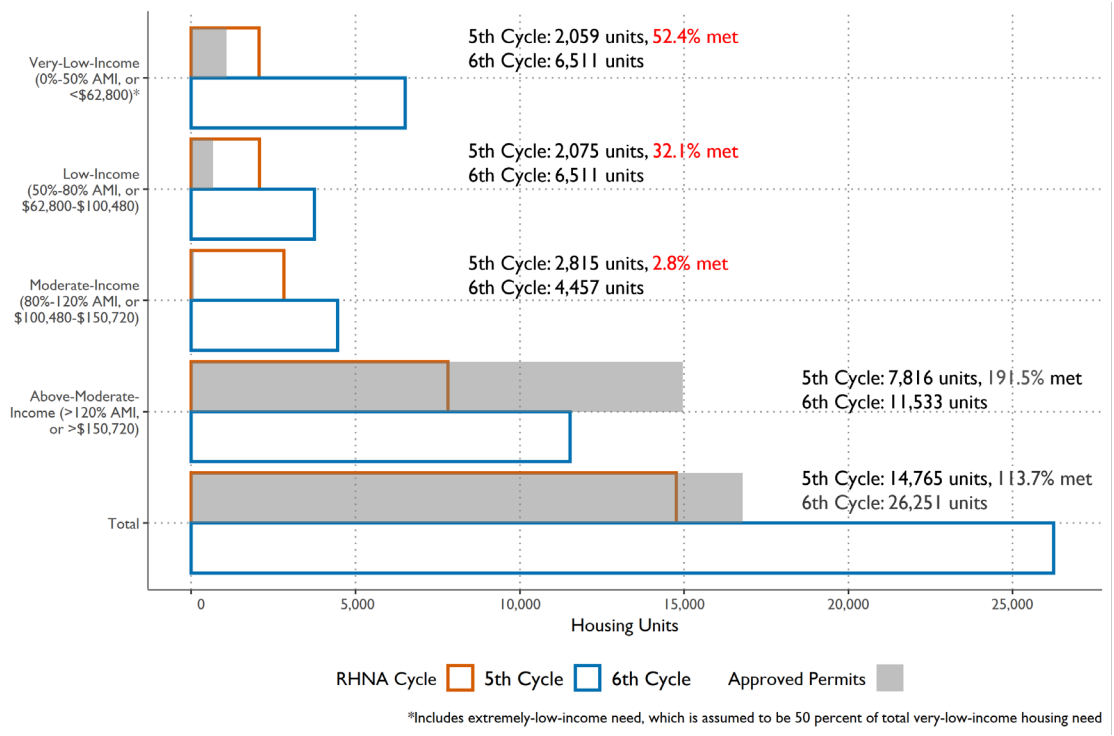
~~This appendix provides an evaluation of the City's previous Housing Element pursuant to State requirements, including the element's cumulative impact on special needs groups.~~

~~The City's previous Housing Element was adopted December 9, 2014, and covered the period from January 31, 2015, to January 31, 2023.~~ ~~California Government Code Section 65588(a) requires cities and counties to review their housing elements to evaluate:~~

- ~~The appropriateness of housing goals, objectives, and policies;~~
- ~~The effectiveness of the housing element in the attainment of the community's housing goals and objectives; and~~
- ~~The progress in implementation of the housing element.~~

A.1 Regional Housing Need Allocation Progress



During the 2015-2023 Housing Element period, Oakland's Regional Housing Need Allocation (RHNA) was 14,~~629~~765 housing units across all income levels. The City identified sites capable of accommodating a total of 18,009 units (123.1 percent of the RHNA). Capacity was derived from four groups: units constructed between January 1, 2014 and March 27, 2014, units receiving planning approvals, units planned, and additional capacity on opportunity sites. ~~Approximately~~During the planning period, approximately 21.1 percent of ~~parcels identified to meet the~~ 5th cycle ~~RHNA~~sites inventory parcels developed with about 3,511 residential units~~ during the planning period~~. Most of Oakland's progress toward meeting its 5th cycle RHNA occurred on sites not identified as opportunity sites in the previous Housing Element.

While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Above-moderate-income permitting during the period reached nearly double the RHNA, and approximately nine above-moderate-income units were permitted for every ~~one~~ affordable unit. These numbers largely reflect the strong market conditions and high housing prices present since recovery from the Great Recession, ~~along with~~increased interest by developers to invest in Oakland, and Oakland's fairly permissive regulatory environment, ~~that have~~which together enabled market-rate development. ~~It~~The imbalance in market and affordable housing construction also~~ of course~~ reflects the significant shortfall in funding sources and other incentives available for below market-rate housing~~, and~~. This disparity presents a serious equity issue in ~~terms~~the number of ~~the~~homes available ~~housing stock~~at different affordability levels. The COVID-19 pandemic is also likely to have a lasting impact on available City resources and housing needs in Oakland – including changes in building patterns and preferences that may increase development costs.

Unfortunately, recent studies have shown that the RHNA process asks cities to plan for more than 10 times the amount of subsidized housing than can be funded with existing funding

sources, which must cover escalating land, construction, and labor costs.[1] Further, in line with State objectives, the City prioritizes deeper affordability when funding is available, hence the lack of moderate-income units during the previous planning period. Nonetheless, Oakland recognizes that more can and should be done to close the gap on affordable housing construction. ~~Oakland further recognizes that many cities in the Bay Area region have failed to meet market rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland. The Housing Element process is thus critical in ensuring all California cities are doing their part.~~

Chart A-1: Progress Towards Meeting the RHNA, 2015-~~2020~~2021

Source: State HCD, 5th Cycle Annual Progress Report Permit Summary, 2021; ABAG, Final RHNA Plan, December 2021

In the seven years between 2015 and 2021, the City permitted a total of 1,079 very-low-income units (including extremely-low-income units), 666 low-income units, 78 moderate-

[1] Paavo et al., A Flawed Law: Reforming California's Housing Element (2019), UCLA Lewis Center for Regional Policy Studies, available at https://www.lewis.ucla.edu/research/flawed-law-reforming-california-housing-element/ (last accessed March 30, 2022).

income units, and 14,966 above-moderate-income units.[2] These numbers reflect affordability provided specifically through deed restrictions that guarantee the units will remain affordable to the specified income category for years to come, but does not take into account newly constructed units that may naturally be affordable to lower income households, nor does it reflect existing units that may become affordable to lower income families due to market conditions and unit age. See **Chart A-1** for a comparison of approval rates to the 5th cycle RHNA, as well as a comparison to the increased 6th cycle allocation.

The Bay Area has been in the midst of an acute housing shortage or "crisis" since the end of the Great Recession (late 2009), which has continued unabated as of early 2022. The roots of the crisis lie in the significant mismatch between housing demand and housing production. This is reflected in dramatically increasing housing costs for renters and homebuyers, and increasing overcrowding and homelessness. As is discussed in Appendices B and F, the affordability gap for moderate- and lower-income residents—the gap between existing housing costs and affordable housing costs—is continuing to grow. ~~It~~This gap is ~~in part~~partly exacerbated by the high costs of development and the limited amount of State and local funding for affordable housing ~~– as well as~~, including income disparity, the impacts of the tech sector and regional market forces in the Bay Area, and the COVID-19 pandemic, among other regional, State, and national factors. Other local factors, including City permitting processes and neighborhood sentiment have also contributed to constrained housing production rates. However, as noted in Appendix F, the City has permitted lower-income housing at rates comparable to other cities in Alameda County. To further address the housing crisis, the City passed Measure KK in 2016 to help fund affordable housing development – the revenues generated from this bond have already been spent and fully allocated. Further, the Affordable Housing Impact Fee was passed in 2016, and the Race and Equity Department was formed to address racial disparities in Oakland.

A.2 Evaluation of Goals, Policies, and Actions

ASSESSMENT OF GOALS AND POLICIES

The 2015-2023 Housing Element outlined seven housing goals with 46 policies and 131 policy actions to be taken to achieve those goals. The accomplishments of the goals and policies of the previous Housing Element is summarized in **Table A-1** below. This is a high-level analysis meant to inform broad changes in the City's goals and policies, and the 2023-2031 Housing Element carries forward and consolidates goals and policies where appropriate.

ASSESSMENT OF ACTIONS

The policy actions contained within the previous Housing Element—131 in total—~~includes~~include several duplicative or overlapping actions. Some actions do not have discrete

[2] State HCD counts new housing units issued a building permit for purposes of assessing progress towards meeting RHNA. Prior to 2017, annual progress reports did not include "certificate of occupancy" as a reporting category. Thus, accurate counts of housing built during the 5th Cycle RHNA are not available.

timelines and are better suited as higher-level policies. Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions. A detailed assessment of each housing action is provided in **Table A-2** below. The evaluation is based on input from a variety of City departments and agencies – including Oakland Housing and Community Development (Oakland HCD), the Planning and Building Department, the Human Services Department, and Oakland Public Works.

While housing actions are individually evaluated in Table A-2, the Housing Element must also assess the cumulative impact of housing actions on special needs groups. Goal 6, and all policies contained within it, addresses fair housing issues and promotes actions to meet the housing needs of statutorily protected groups, many of which are considered "special needs." Further, policies 2.5, 2.6, 2.9, and 5.4 directly address a variety of special housing needs such as seniors, large families, extremely-low-income household, and persons experiencing homelessness. There are over 20 actions directly aimed at special needs groups – including persons experiencing homelessness, persons with a disability, the elderly, female-headed households, extremely-low-income households, and persons with HIV/AIDs.[3]

While the majority of these actions have been evaluated as effective, there is still a clear gap in meeting the housing needs of some special needs groups – especially those experiencing homelessness and extremely-low-income households. As indicated in Appendix B, the housing crisis has continued throughout the 2015 to 2023 period and rates of homelessness have drastically increased. Appendix F provides an assessment of the constraints to housing production and identifies potential reasons why the City fell short of meeting its RHNA. While discrete City actions may be effective, more comprehensive steps must be taken to encourage the production of emergency shelters and transitional and supportive housing, as well as housing affordable to lower-income groups. The Permanent Access to Housing (PATH) Framework to address homelessness represents one such approach that the City should continue to implement.[4] Other steps the City will take to adequately meet the needs of special needs groups during the 2023-2031 period are described in the Housing Action Plan.

[3] Actions related to special needs groups include the following: 2.5.1, 2.5.2, 2.5.3, 2.6.1, 2.9.1, 2.9.2, 2.9.3, 2.9.4, 2.9.5, 2.9.6, 2.9.7, 2.9.8, 3.1.2, 4.3.2, 4.3.3, 5.4.1, 6.1.1, 6.1.2, 6.1.3, 6.1.4, 6.2.1, 6.2.2, and 6.4.3.

[4] The PATH Framework is the City's updated five-year approach to address homelessness in Oakland, based on the following themes: 1. Prevention strategies to keep people from becoming homeless; 2. Emergency strategies to shelter and rehouse households and improve health and safety on the street and; 3. Creation of affordable, extremely low income and permanent supportive housing units prioritized for households experiencing homelessness. More information is available on the City's website: https://www.oaklandca.gov/resources/learn-more-about-our-homelessness-strategy.

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Goal 1 – Provide Adequate Sites Suitable for Housing for All Income Groups	
Policy 1.1 – Priority Development Areas Housing Program. The City will target development and marketing resources in Priority Development Areas (PDAs), and in areas for which Specific Plans have been completed or are underway. (See also Policy 7.3~~.~~.)	While Oakland met its overall housing production goals, it did not meet the 5th Cycle RHNA for lower- and moderate-income households. During this period, the City implemented a number of actions to encourage residential development at all income levels. This includes the adoption of the Priority Development Areas, expedited review processes, development along International Boulevard with multiple affordable projects, micro-living units proposed in the Draft Downtown Oakland Specific Plan, residential development in specific plans, and encouragement of alternative housing like ADUs, manufactured housing, and live/work units. Because a significant portion of development occurred on sites that were not identified as opportunity sites in the 5th Cycle, the City has maintained an adequate supply of land to meet its 5th Cycle RHNA. Appendix C identifies additional sites for Oakland's 6th Cycle RHNA. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing Solutions for Oakland, California," particularly additional production strategies.
Policy 1.2 – Availability of Land. Maintain an adequate supply of land to meet the regional housing share under the ABAG Regional Housing Needs Allocation (RHNA).	
Policy 1.3 – Appropriate Locations and Densities for Housing. The City's Strategic Planning Division initiated five Specific Plans and one Area Plan during the 2007-2014 Housing Element period, which will further the housing location and density objectives contained in the recently completed residential and commercial zoning update. The Lake Merritt Station Area (Specific) Plan, Broadway Valdez Specific Plan, West Oakland Specific Plan, Coliseum Area Specific Plan, and Central Estuary Area Plan included extensive community outreach processes and have resulted in specific zoning proposals. These Specific and Area Plans will facilitate the construction of nearly 17,000 new housing units in the City of Oakland. The completion of the Specific and Area Plans will provide these substantial housing gains in two respects: environmental clearance and community buy-in for future housing projects. Each planning process involved extensive community participation which culminated with significant community buy-in to the policies and development framework outlined in the plans, thus minimizing possible community opposition to future housing development projects.	
Policy 1.4 – Secondary Units. Support the construction of secondary units in single-family zones and recognize these units as an important source of affordable housing.	
Policy 1.5 – Manufactured Housing. Provide for the inclusion of manufactured housing in appropriate locations.	
Policy 1.6 – Adaptive Reuse.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Encourage the re-use of industrial and commercial buildings for joint living quarters and working spaces.	
Policy 1.7 – Regional Housing Needs. The City of Oakland will strive to meet its fair share of housing needed in the Bay Area region.	
Goal 2 – Promote the Development of Adequate Housing for Low- and Moderate-Income Households	
Policy 2.1 – Affordable Housing Development Programs. Provide financing for the development of affordable housing for low- and moderate-income households. The City's financing programs will promote a mix of housing types, including homeownership, multifamily rental housing, and housing for seniors and persons with special needs.	The City has encouraged and promoted affordable housing development through a combination of incentives and funding. City efforts include the release of Notices of Funding Availability (NOFAs), predevelopment loans to non-profits, Oakland Housing Authority resources, first-time homebuyer programs, the Community Buying Program, and other loans. Impact fees, including the Jobs/Housing and Affordable Housing Impact Fee, provide funding to the Affordable Housing Trust Fund. Through the 5th cycle RHNA, there will have been approximately $150 million in total expenditures on these efforts. However, despite these efforts, the amount of financial resources available for affordable housing has been inadequate to meet the need for low- and moderate-income households. Other City incentives include density bonus provisions, impact fee waivers, promotion of City-owned property, geographic equity and quality in NOFA scoring, as well as promoting community
Policy 2.2 – Affordable Homeownership Opportunities. Develop and promote programs and mechanisms to expand opportunities for lower-income households to become homeowners.	
Policy 2.3 – Density Bonus Program. Continue to refine and implement programs to permit projects to exceed the maximum allowable density set by zoning, if they include units set aside for occupancy by very-low-, low-, and moderate-income households and/or seniors.	
Policy 2.4 – Permanently Affordable Homeownership. Develop mechanisms for ensuring that assisted homeownership developments remain permanently affordable to lower-income households to promote a mix of incomes.	
Policy 2.5 – Seniors and Other Special Needs. Assist and promote the development of housing with appropriate supportive services for seniors and other persons with special needs.	
Policy 2.6 – Large Families. Encourage the development of affordable rental and ownership housing units that can accommodate large families.	
Policy 2.7 – Expand Local Funding Sources.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Increase local resources to support affordable housing development and develop new sources of funding.	land trusts, resale controls, and providing rental assistance. The City also provides funding for special needs housing and implements the PATH strategy for homelessness. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing Solutions for Oakland, California," particularly producing affordable housing for those living at 15 percent AMI and exploring additional funding sources, such as a regional housing bond and home preservation fund.
Policy 2.8 – Rental Assistance. Increase the availability of rental assistance for very-low-income households.	
Policy 2.9 – PATH Strategy for the Homeless. Expand the City's Permanent Access to Housing (PATH) Plan to prevent and end homelessness and increase housing opportunities to the homeless through acquisition, rehabilitation and construction of housing, master leasing and short-term financial assistance	
Policy 2.10 – Promote an Equitable Distribution of Affordable Housing throughout the Community. The City will undertake a number of efforts to distribute assisted housing widely throughout the community and avoid the over-concentration of assisted housing in any particular neighborhood, in order to provide a more equitable distribution of households by income and by race and ethnicity.	
Policy 2.11 – Affordable Housing Preference for Oakland Residents and Workers. Implement the policy enacted by the City Council in 2008 granting a preference to Oakland residents and Oakland workers to buy or rent affordable housing units assisted by City of Oakland funds provided through its annual Notice of Funding Availability (NOFA) process.	
Goal 3 – Remove Constraints to the Availability and Affordability of Housing for All Income Groups	
Policy 3.1 – Expedite and Simplify Permit Processes. Continue to implement permit processes that facilitate the provision of housing and annually review and revise permit approval processes.	The City has undertaken a number of efforts to remove housing constraints. Rectified governmental constraints include aligning City regulations pursuant to State law (e.g., reasonable accommodation, transitional/supportive housing permitting, and emergency shelter permitting), prioritizing affordable housing applications, one-stop permitting, development impact fees, and reliance on specific plan EIRs to expedite review. Although the City still implements a discretionary
Policy 3.2 – Flexible Zoning Standards. Allow flexibility in the application of zoning, building, and other regulations.	
Policy 3.3 – Development Fees and Site Improvement Requirements. Reduce the cost of development through reasonable and predictable fees, and improvement of project review standards.	
Policy 3.4 – Intergovernmental Coordination.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Promote intergovernmental coordination in review and approval of residential development proposals when more than one governmental agency has jurisdiction.	design review process, it is currently developing objective design standards. The City continues to engage in community outreach, including with East Bay Housing Organizations (EBHO), the Non-Profit Housing Association of Northern California, the Oakland Property Acquisition Collective, and Bay Area For All Table.
Policy 3.5 – Financing Costs. Reduce financing costs for affordable housing development.	
Policy 3.6 – Environmental Constraints. Explore programs and funding sources to assist with the remediation of soil contamination on sites that maybe redeveloped for housing.	
Policy 3.7 – Community Outreach and Education. Increase public acceptance and understanding of affordable development and related issues through community outreach.	
Goal 4 – Conserve and Improve Older Housing and Neighborhoods	
Policy 4.1 – Housing Rehabilitation Loan Programs. Provide a variety of loan programs to assist with the rehabilitation of owner-occupied and rental housing for very-low- and low-income households.	The City continues to offer rehabilitation loans to lower- and moderate-income households through multiple programs—such as the Home Maintenance and Improvement Program (HMIP)—and responds to housing maintenance issues through Code Enforcement Services. Other conservation and improvement efforts include the Community Buying Program, Mills Act Contracts, residential hotel (SRO) preservation requirements, and the Uniform Residential Tenant Relocation Ordinance. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing
Policy 4.2 – Blight Abatement. To improve housing and neighborhood conditions, the City should abate blighting conditions through a combination of code enforcement, financial assistance, and public investment.	
Policy 4.3 – Housing Preservation and Rehabilitation. Support the preservation and rehabilitation of existing housing stock with an emphasis on housing occupied by senior citizens, people with disabilities, and low-income populations. Encourage the relocation of structurally sound housing units scheduled for demolition to compatible neighborhoods when appropriate land can be found. Assist senior citizens and people with disabilities with housing rehabilitation so that they may remain in their homes. Continue to implement the Mills Act program.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Policy 4.4 – Anti-Displacement of City of Oakland Residents. The City will consider strengthening existing policies and introducing new policies or policy terms to current City policies to help prevent displacement of current Oakland residents and to preserve existing housing affordable to low-income residents, including both publicly -assisted and non-assisted housing that currently has affordable rents.	Solutions for Oakland, California," particularly to address and prevent displacement, passing a seismic retrofit requirement with anti-displacement terms, amendment of the condo conversion ordinance, improved habitability conditions, and incentivization of property owners to contribute to voluntary housing solutions.
Goal 5 – Preserve Affordable Rental Housing	
Policy 5.1 – Preservation of At-Risk Housing. Seek to preserve the affordability of subsidized rental housing for lower-income households that may be at-risk of converting to market-rate housing.	There was no conversion of identified "at-risk" units during the period, although one project was destroyed by a fire. The City also continued to provide financial assistance for affordable development and preservation, including through Oakland Housing Authority resources. Other major programs include the Rent-Adjustment Program, the Just Cause for Eviction Ordinance, the Tenant Protection Ordinance, residential hotel (SRO) preservation requirements, limits on conversion of residential to non-residential uses, and limits on condo conversions.
Policy 5.2 – Support for Assisted Projects with Capital Needs. Work with owners of assisted projects that have substantial needs for capital improvements to maintain the use of the properties as decent affordable housing.	
Policy 5.3 – Rent Adjustment Program. Continue to administer programs to protect existing tenants from unreasonable rent increases.	
Policy 5.4 – Preservation of Single Room Occupancy Hotels. Seek mechanisms for protecting and improving the existing stock of residential hotels, which provide housing of last resort for extremely-low-income households.	
Policy 5.5 – Limitations on Conversion of Residential Property to Non-Residential Use. Continue to use regulatory controls to limit the loss of housing units due to their conversion to non-residential use.	
Policy 5.6 – Limitations on Conversion of Rental Housing to Condominiums. Continue to use regulatory controls to limit the loss of rental housing units due to their conversion to condominiums.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Policy 5.7 – Preserve and Improve Existing Oakland Housing Authority-Owned Housing. Continue to preserve and improve existing Oakland Housing Authority-owned rental housing.	
Goal 6 – Promote Equal Housing Opportunity	
Policy 6.1 – Fair Housing Actions. Actively support efforts to provide education and counseling regarding housing discrimination, to investigate discrimination complaints, and to pursue enforcement when necessary. Provide a one-stop resource center to address all housing issues faced by Oakland residents.	During the period, the City continued to work with the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa: Just Cause, and ECHO Fair Housing to provide fair housing services. Other effective actions related to equal housing opportunity include the Oakland Fair Chance Ordinance, publishing disability access and Affirmative Fair Marketing Procedures & Guidelines on the City's website, reasonable accommodation procedures, Community Credit Needs Assessments, and the Housing Element Annual Progress Report. The City's Department of Housing and Community Development's Community Development & Engagement section also provides resources.
Policy 6.2 – Reasonable Accommodations. Provide reasonable accommodations to persons with disabilities in access to public facilities, programs, and services.	
Policy 6.3 – Promote Regional Efforts to Expand Housing Choice. Encourage future regional housing allocations by ABAG to avoid over-concentration of low-income housing in communities with high percentages of such housing.	
Policy 6.4 – Fair Lending. Work to promote fair lending practices throughout the City to ensure that low-income and minority residents have fair access to capital resources needed to acquire and maintain housing.	
Policy 6.5 – Accountability. Work to promote accountability by City to the policies it has slated in the Housing Element.	
Goal 7 – Promote Sustainable Development and Sustainable Communities	
Policy 7.1 – Sustainable Residential Development Programs. In conjunction with the City's adopted Energy and Climate Action Plan (ECAP), develop and promote programs to foster the incorporation of sustainable design principles, energy efficiency and smart growth principles into residential developments. Offer education and technical assistance regarding sustainable development to project applicants.	The City continues to operate the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). Other actions related to sustainability include the promotion of solar energy, collaborations with Energy Upgrade California in Alameda County, Bay Area Regional Energy Network (BayREN), and East
Policy 7.2 – Minimize Energy and Water Consumption.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Encourage the incorporation of energy conservation design features in existing and future residential development beyond minimum standards required by State building code.	Bay Energy Watch (EBEW), and the promotion of mixed-use development, transit-oriented development, and development in PDAs. In 2016, the City released the "Resilient Oakland Playbook," while in July 2020, the City Council adopted the Equitable Climate Action Plan. Further, in 2021 the City adopted a new 2021-2026 Local Hazard Mitigation Plan.
Policy 7.3 – Encourage Development that reduces Carbon Emissions. Continue to direct development toward existing communities and encourage infill development at densities that are higher than—but compatible with—the surrounding communities. Encourage development in close proximity to transit, and with a mix of land uses in the same zoning district, or on the same site, so as to reduce the number and frequency of trips made by automobile.	
Policy 7.4 – Minimize Environmental Impacts from New Housing. Work with developers to encourage construction of new housing that, where feasible, reduces the footprint of the building and landscaping, preserves green spaces, and supports ecological systems.	
Policy 7.5 – Climate Adaptation and Neighborhood Resiliency. Continue to study the potential local effects of climate change in collaboration with local and regional partners, such as BCDC. Identify potential adaptation strategies to improve community resilience to climate change, and integrate these strategies in new development, where appropriate.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
GOAL 1: Provide Adequate Sites Suitable for Housing for All Income Groups						
POLICY 1.1: Priority Development Areas - Housing Program						
ACTION 1.1.1	*Site Identification*. Conduct an inventory of vacant and underutilized land within the City's PDAs including the MacArthur BART Station Area, West Oakland, Downtown/Jack London Square Area, Fruitvale/Dimond Area, Eastmont Town Center Area, and the Coliseum BART Station Area, identify sites suitable for housing, including estimates of the number of housing units that those sites can accommodate, and make that information available to developers through a variety of media.	Bureau of Planning	Keep updated inventory on the City's website, 2016-2023	The City has not yet conducted an inventory of vacant and underutilized land within the City's Priority Development Areas (PDA). The PDA designations were updated in 2019. The updated PDAs were adopted by the MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. The 2020 Adopted Priority Development Areas (PDAs) map is available on the City's website: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 In addition, these updated PDAs can also be found on MTC's website: https://mtc.ca.gov/planning/land-use/priority-development-areas-pdas	Directing new development within Oakland's designated PDAs remains an effective method to bring transit, jobs, and housing together with the overarching goals of increasing housing options and reducing greenhouse gas emissions. This action is an effective method of targeting development and marketing resources in Priority Development Areas (PDAs).	The action is appropriate to the Housing Element. In addition, in recognition of the need to affirmatively further fair housing by creating housing opportunities within formerly exclusionary neighborhoods, the Housing Action Plan (Chapter 4) proposes actions that also expand housing opportunities more broadly.
ACTION 1.1.2	*Expedited Review*.	Bureau of Planning &	Ongoing, 2015-23	From 2015-2021, Planners in the Bureau of Planning processed planning	The policy is effective. Between	The action is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Continue to expedite the permit and entitlement process for housing developments with more than 50 units in the Downtown by assigning them to specialized planners, for priority permit processing, management tracking of applications, and scheduling of public hearings for completed applications.	Bureau of Building		entitlement applications, including for larger developments in Downtown Oakland. In 2016, two new staff were added to the Bureau of Planning to help process entitlements more quickly.	2018-2021 (the period during which State HCD has required that jurisdictions report the number of units issued a completed entitlement for the Annual Progress Report), the City entitled 14 projects with more than 50 units in the Downtown area, or about 3,135 units. In addition, from 2018-2021, 2,323 units were completed in Downtown in developments with more than 50 units. Data from the 2015-2017 period is not readily available due to changes in	meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					reporting requirements.	
ACTION 1.1.3	*Streamline Environmental Review*. Advocate for new strategies to streamline the environmental review process under the California Environmental Quality Act (CEQA).	Bureau of Planning	Ongoing, 2015-23	1) In July 2015, the City of Oakland released a revised set of Standard Conditions of Approval, which are requirements applied to development projects that have the effect of reducing potential environmental impacts, thereby streamlining environmental review; 2) The City continues to rely on the EIRs adopted for recent Specific Plans as well as the Land Use and Transportation Element of the General Plan when reviewing the CEQA impacts of individual developments; in many cases, CEQA requirements are met by the Specific Plan EIR, which has the effect of streamlining the environmental review process; 3) Staff participated with the State Office of Planning and Research as AB 743 rulemaking proceeded, to replace Level of Service CEQA thresholds with more contemporary methodologies for evaluating potential transportation impacts during the CEQA process. Staff submitted written comments and	The action is effective.	The action is appropriate to meet Housing Element goals. The Housing Action Plan (Chapter 4) proposes additional actions to streamline environmental review, including through the creation of ministerial permitting processes and adoption of objective design standards. See Action 3.3.5 (Affordable Housing Overlay), Action 3.4.2 (Revise

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				• Maintaining the Catalyst Project Sites for readiness and support in bringing them to fruition.		
ACTION 1.1.5	*Consider expanding the existing Micro-living quarters pilot program to the entire Downtown and Jack London Square PDA.* Micro-living quarters are defined in the Oakland Planning Code as "a multiple-tenant building with an average net-floor area of 175 square feet but a minimum size of 150 square feet. Bathroom facilities are included within each living quarter but cooking facilities are not allowed within each living quarter. A shared kitchen is required on each floor, the maximum number units are not prescribed but the size of the units and the FAR shall dictate the limits." Currently, these facilities may only be located in the Broadway Valdez Commercial Zone, ~~DBV~~D-BV-	Bureau of Planning	2015-2020	~~Micro-units are included in the Land Use and Urban Form chapter of the Final Draft Downtown Oakland Specific Plan. As of December 2021, the draft zoning to implement the Downtown Oakland Specific Plan is underway and includes regulations for micro-units.~~ Recent revision to the California Building Code has now allowed for the construction of smaller residential unit sizes. As such, the City of Oakland has focused on expanding incentives for the construction of efficiency dwelling units. In November 2021, City Council approved the Construction Innovation Ordinance, which allows for the provision of efficiency units in residential facilities at twice the otherwise maximum allowable density, similar to the existing standards for rooming units. In the Downtown area, rooming house facilities also remain a permitted facility type. Rooming units are similar to micro-living quarters in	~~The policy is still under development, therefore, there is no way to evaluate its effectiveness.~~Efficiency units are an effective way of creating affordability by design. While the program is new, the City has heard expressed interest in the model from applicants. The micro-living program was ultimately not included in the proposed Downtown Oakland Specific Plan.	~~Micro-units are a housing product type that will help to meet the significant demand for housing.~~With the changes to building code and expanded allowance for efficiency and rooming units, the micro-living quarter building type is no longer needed to meet the goal of permitting "affordable by design" small, high-density units.

	2 and a small area of the D-BV-3 south of Bay Place and are permitted upon the granting of a Conditional Use Permit.			that units have shared kitchens instead of individual ones.		
POLICY 1.2: Availability of Land						
ACTION 1.2.1	*Land Inventory (Opportunity Sites).* Develop a list of vacant and underutilized sites potentially suitable for higher density housing, particularly affordable housing, and distribute that list to developers and nonprofit housing providers upon request. The availability of the site inventory will be posted on the City's website after the City Council adopts the Housing Element.	Bureau of Planning	Post to City's website within 90 days of adoption and final certification (by HCD) of Housing Element	The City's Detailed Land Inventory can be found on Section 4 and Appendix C of the 2015-2023 Housing Element, which continues to be posted to the City's web page: https://www.oaklandca.gov/resources/read-the-2015-2023-housing-element.	This action is an effective method of maintaining an adequate supply of land to meet the regional housing share under the ABAG Regional Housing Needs Allocation (RHNA).	The action is appropriate to the Housing Element.
POLICY 1.3: Appropriate Locations and Densities for Housing						
ACTION 1.3.1	*Broadway Valdez Specific Plan (BVSP).* Track progress on the approval and completion of the 1,800 housing units	Bureau of Planning	Ongoing, 2015-23	The Broadway Valdez Specific Plan (BVSP) has far exceeded its original goal of enabling the approval and completion of 1,800 new housing units. As of ~~December 2021~~June 2022,	The Broadway Valdez Specific Plan was very effective in incentivizing	The action is appropriate to the Housing Element. The City will

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	included in the development program for the Broadway Valdez Specific Plan (BVSP).			, there are a total of 4,091 housing units in various stages of completion within the Broadway Valdez District Specific Plan area: Built (Completed) = 2,194 housing units Under Construction = 450 housing units Building Permit Filed = 728 housing units Approved, but no building permits = 322 housing units Applied for, but not yet approved = 397 housing units The City posts updated maps of proposed projects and developments under construction to the City's Specific Plan website. See "Broadway Valdez Map" at: ~~https://www.oaklandca.gov/resources/view-the-broadway-valdez-specific-plan-map~~https://www.oaklandca.gov/resources/view-the-broadway-valdez-specific-plan-map	housing with an EIR that helped to expedite housing approval as well as letting developers know what the City and the community wanted for this area. The development program that was created for the plan allowed for flexibility with the EIR that different uses could be changed out without having to change the EIR. The number of housing units originally planned for the area was 1,800 units and 2,149 ~~unit~~units have already been built so far. With the additional units under	continue to track progress on the approval and completion of housing units within the BVSP. No further related actions are proposed under the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					construction, filed for building permits, approved with planning permits, and applied for planning permits there will be a total of 4,091 units.	
ACTION 1.3.2	*Lake Merritt Station Area Plan (LMSAP).* Track progress on the approval and completion of the 4,900 housing units included in the development program for the Lake Merritt Station Area (Specific) Plan (LMSAP).	Bureau of Planning	Ongoing, 2015-23	The City continues to track the progress of new, residential Major Projects in the Lake Merritt Station Area. As of 2021, a total of 1,591 new dwelling units have been approved, including: 1,230 market-rate units, 44 moderate-income units, 138 low-income units, 120 very-low-income units, and 59 extremely-low-income units. For more information, please refer to the City's Major Development Projects List: ~~https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list~~ https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list	The action is an effective method of tracking progress on the approval and completion of the 4,900 housing units included in the development program for the Lake Merritt Station Area (Specific) Plan (LMSAP). While the City has not yet achieved the goal of 4,900 units in the plan area, housing is in various stages of	The action is appropriate to the Housing Element. The City will continue to track progress on the approval and completion of housing units within the LMSAP. No further related actions are proposed under the 2023-2031 Housing Element.

	program for the Coliseum Area Specific Plan (CASP).			https://www.oaklandca.gov/resources/read-the-general-plan-amendments-for-the-coliseum-area-specific-plan	5,000 housing units included in the development program for the Coliseum Area Specific Plan (CASP).	
ACTION 1.3.5	*Central Estuary Area Plan (CEAP).* Track progress on the approval and completion of the 400 housing units included in the development program for the Central Estuary Area Plan (CEAP).	Bureau of Planning	Ongoing, 2015-23	The Planning Bureau's interactive major projects GIS map (and associated major projects list) catalogues developments that have at least 25 units or have at least 10,000 sq. ft. total Residential Floor Area ~~that~~, which includes projects in the Central Estuary area. The interactive map is available at: ~~https://oakgis.maps.arcgis.com/apps/webappviewer/index.html?id=e1357dbaeffc473caa57b1227a7a7739~~ https://oakgis.maps.arcgis.com/apps/webappviewer/index.html?id=e1357dbaeffc473caa57b1227a7a7739	Permitting housing in the non-industrial areas of the Central Estuary is an important mechanism to deliver much-needed housing.	Build out of housing in the non-industrial areas of the Central Estuary is an important mechanism to deliver much-needed housing.
ACTION 1.3.6	*Promote new housing opportunities in the Estuary Area.* With the resolution of the legal challenges to the Brooklyn Basin project (formerly Oak-to-Ninth),	Bureau of Planning	Ongoing, 2015-23	Progress continued on the development of 465 units of affordable housing serving households between 0-60% of AMI in the Brooklyn Basin development, which will include 3,100 total new units as well as commercial and open space. The	The City's efforts to promote housing opportunities in the Central Estuary Area have borne fruit in the 2015-	The objective dovetailed appropriately with the City's Central Estuary Area Plan.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	new housing is scheduled to be built in the timeframe of the 2015-2023 Housing Element where former industrial uses predominated.			affordable units include 258 Project-Based Section 8 vouchers for all phases from the Oakland Housing Authority (OHA), which jointly owns the land with the City. The master developer has proposed adding another 600 units of market-rate housing to the overall project (as well as marina space). This request was heard at the March 23, 2022 Design Review Committee meeting. Support for the proposal to add 600 housing units moved forward and will be heard by the Planning Commission. Construction of the 211 affordable units on Parcel F completed in December 2020 and achieved 100% occupancy in 2021. The Parcel F projects included 101 units of family housing (Paseo Estero) and 110 units of senior housing (Vista Estero). MidPen Housing Corporation, Oakland Housing Authority, and the City entered into a Lease Disposition and Development Agreement on Project 3 (Foon Lok West) on Parcel A in 2019, and closed their loan for the 130-unit	2023 cycle. 3,100 units of housing, including 465 units of affordable housing, are planned, underway, or completed in the Brooklyn Basin development. The City has carried out extensive efforts, including planning and zoning updates, environmental remediation, and direct financial assistance, to provide mixed-income housing in an amenities-rich environment. The City's policies and programs have been highly effective.	As the Brooklyn Basin development nears completion, this goal should be revised in future housing element cycles.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Project 3 and started construction in July 2020, and construction continued throughout 2021. MidPen ~~is assemblinghas~~ assembled its financing for Project 4's (Foon Lok East) remaining 124 units of family housing, and ~~pending awards from the new California Housing Accelerator Fund, is projected to commence~~commenced construction in 2022. With regards to market-rate housing development of Brooklyn Basin, at the end of 2021: Parcels B, C, D, G, H and J are fully entitled (for a total of 1,843 entitled units; of the entitled units, 241 are constructed and occupied).		
POLICY 1.4: Secondary Units						
ACTION 1.4.1	*Secondary Unit – Parking Solutions.* Explore parking solutions (tandem parking, compact parking spaces, etc.) for secondary units to enable more secondary units as part of a Planning Code update of the City's parking regulations. Explore the option of eliminating the existing requirement for a	Bureau of Planning	2014-2017	The majority of ADUs created in Oakland do not require additional parking because they are located within the 1/2-mile of transit. Tandem parking is also allowed. This has been positive for most areas, except for areas in the Very High Fire Hazard Severity Zone (VHFHSZ) where lots are steep and often do not have off-street parking, streets are narrow, and reliance on cars is very high. Any additional cars that ADUs bring are	The ADU program has been very effective in creating additional units of housing without adding additional off-street parking spaces. The number of ADUs permitted	The goals of this portion of the ADU ordinance are appropriate in creating additional housing units without the burden of additional parking in transit-rich areas

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	separate non-tandem parking space.			forced to park on the narrow streets creating emergency access issues and prompting additional resources for enforcement of the no-parking rules.	annually can be found in the City's Housing Element Annual Progress Reports (see Table A3 for APRs 2015-2017, and Tables A and A2 for APRs 2018-2021), which are posted to the City's webpage: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports	where car ownership can be optional. This preserves valuable lot space for housing or as valuable open space instead of using it for parking. However, in VHFHSZ and S-9 Zone where roads are narrow and public transit is lacking, off-street parking or replacement of lost parking is required in some areas, consistent with State law.
ACTION 1.4.2	*Secondary Unit – Setback Solutions.* Explore relaxing the current prohibition on Secondary Units in the rear setback. If these zoning changes are	Bureau of Planning	2014-2017	The City has been approving ADUs with the regularly required side and rear setbacks according to State law requirements. Existing structures that are converted or rebuilt to ADUs in the same place and to the same	The ADU program has been very effective in creating additional units by converting existing structures	The ADU policy regarding the setbacks is appropriate in creating additional

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	implemented it will allow Secondary Units in the side and rear setback, as long as the structure doesn't exceed existing size limits and can meet all the same standards that allow a garage or accessory structure in the same location.			dimensions are allowed to remain in their current footprint without complying with any setbacks. Newly built ADUs are only required to comply with 4' side and rear setbacks, which is significantly less than regularly required by local zoning regulations. A recent ordinance amendment further reduces this setback to 3 feet in some cases.	on a lot to ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. In addition, the 4' required setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.	housing by allowing to convert existing structures on a lot into ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. Otherwise, the required 4' setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.
POLICY 1.5: Manufactured Housing						
ACTION 1.5.1	*Factory-Built Housing.* Continue to implement City-adopted regulations that allow manufactured housing	Bureau of Planning	Ongoing, 2015-23	The City continues to permit factory-built housing in all residential & commercial districts.	Factory-built manufactured housing becomes more common	With the ~~improved process~~code changes, it is

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	in single-family residential districts.			In November 2021, City Council approved the Construction Innovation Ordinance, which amends the Planning Code to allow residential occupancy of recreational vehicles, mobile homes, and manufactured homes in all zoning districts where residential uses are permitted.	with the ease of construction and the improved appearance and variety of designs.	appropriate to allow for construction in any zone where single-family residences are permitted.
POLICY 1.6: Adaptive Reuse						
ACTION 1.6.1	*Live/Work Conversions*. Allow the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Bureau of Planning	Ongoing, 2015-23	~~In 2021, the~~The City continues to permit live/work conversions~~. Thereby,~~ thereby allowing the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Live/work conversions continue to be permitted in Oakland. The State Building Code has been adopted by the City to be applied more uniformly as in other cities.	Given Oakland's extensive stock of formerly industrial and commercial buildings, live/work conversions are appropriate. The Housing Action Plan (Chapter 4) proposes an action (Action 3.2.2) to update and promote live/work and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						work/live units in Oakland.
POLICY 1.7: Regional Housing Needs						
ACTION 1.7.1	*Accommodate 14,765 New Housing Units.* Designate sufficient sites, use the City's regulatory powers, and provide financial assistance to accommodate at least 14,765 new dwelling units between January 2014 and June 2023. This sum represents the City's share of the Bay Area region's housing needs as estimated by the Association of Bay Area Governments (ABAG). The City will encourage the construction of at least 6,919 units for very-low-,	Bureau of Planning	Ongoing, 2015-23	In addition to housing developments which are under construction, approved, or in pre-approval, the 2015-2023 Housing Element identified sites with the capacity and the zoning regulations to allow more units than the Regional Housing Needs Allocation for Oakland. Table A2 in Annual Progress Reports provides details on building starts for each calendar year. See also the City's Land Inventory posted to the City's web page: http://www2.oaklandnet.com/oakca1/groups/ceda/documents/policy/oak051104.pdf	The City has effectively met its RHNA housing allocation for total number of units to be built, but it has not met the goal of the percentage of affordable units and exceeded the number of market-rate units built.	~~The policy is~~ While the goals of this action are appropriate to the Housing Element~~.~~, the proposed action is too broad and is not carried forward as a listed action in the 2023-2031 Housing Element. Chapter 3 and Appendix C provide

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	low-, and moderate-income households.					information on the adequacy of existing zoning in Oakland to accommodate its current Regional Housing Needs, while the Housing Action Plan (Chapter 4) includes a number of actions that the City will implement to ensure additional housing can be constructed during the eight-year planning period, with a focus on missing middle and affordable housing.
GOAL 2: Promote the Development of Adequate Housing for Low- and Moderate-Income Households						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 2.1: Affordable Housing Development Programs						
ACTION 2.1.1	*New Construction and Substantial Rehabilitation Housing Development Program.* Issue annual Notice of Funding Availability (NOFA) for the competitive allocation of affordable housing funds. Points will be assigned for addressing City priorities to ensure that funds are used to further policy objectives.	DHCD – Housing Development Services	Ongoing, 2015-23	From 2015-2021, the City has continued to issue NOFA funds pursuant to funding being available. The City released one Notice of Funding Availability (NOFA) in 2021 for New Construction of Multifamily Affordable Housing, with a funding pot of approximately $15-20 million. Unlike the 2020 New Construction NOFA, which was limited to "Pipeline" projects—projects that had applied for funding in a previous NOFA round—the latest NOFA, for which applications were due in January 2022, was open for all applicants for new rental housing proposals. The City also made funding commitments to projects that applied for funding under a NOFA for Acquisition and Conversion to Affordable Housing (ACAH) of existing non-deed restricted projects that was released in late 2020. The City of Oakland will have spent approximately $150 million on affordable housing for the 2015-2023 Housing Element. More information about City NOFAs is available here:	The City's NOFAs are effective as the primary method of delivering affordable housing.	This program is highly appropriate and fully consistent with the Housing Element. In future Housing Element cycles, it may be advisable to clarify that NOFAs may be released on a more or less frequent basis than annually, to the extent that funding is available.

				https://www.oaklandca.gov/resources/nofa-opportunities		
ACTION 2.1.2	*Housing Predevelopment Loan and Grant Program.* Provide loans to nonprofit housing organizations for predevelopment expenses such as preparation of applications for outside funding.	DHCD – Housing Development Services	Ongoing, 2015-23	From 2015-2021, the City has continued to provide predevelopment loans to nonprofit housing organizations for predevelopment expenses. No new projects applied for or received predevelopment loans in 2021.	The City's predevelopment loan program is effective in facilitating predevelopment activities for the construction of affordable housing. Staff may seek adjustments to the maximum loan amount and other terms to increase its effectiveness.	The program is fully appropriate for the development of affordable housing.
ACTION 2.1.3	*Utilize Public Housing Resources for New Development.* Work with the Oakland Housing Authority to increase housing choices for low-income families by utilizing Making Transitions Work (MTW) voucher flexibilities toward the development of new	Oakland Housing Authority	Ongoing, 2015-23	In 2015, under MTW authority, Oakland Housing Authority (OHA) promoted development of affordable housing stock by property acquisition, pre-development and permanent loans to create new units of affordable housing and rehabilitate existing units of affordable housing. ~~During this year~~In addition, in 2015 OHA completed construction on Lakeside	This action has been an effective means of collaborating with the Oakland Housing Authority to maximize the benefit of housing vouchers.	The action is fully appropriate for the expansion of affordable housing opportunities, as long as "public housing" refers to "affordable housing" and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	affordable housing for extremely-low-, very-low-, low-, and moderate-income households.			Senior and placed 91 new units in service. Between 2016 and 2018, no public housing resources were utilized for new development activities. The OHA has continued to assist a number of affordable housing developments. In FY 2021, OHA completed construction on the first two phases of Brooklyn Basin closed financing and started construction on Project 3, known as Foon Lok West. An additional 53 units were rehabilitated in OHA's existing project-based portfolio. • Brooklyn Basin - OHA in partnership with the City of Oakland and MidPen Housing Corporation is developing 465 units of affordable housing for low-income families and seniors as part of the Brooklyn Basin master planned community. • In FY 2021, Project 3, known as Foon Lok West, which includes 130 units for families	OHA's affordable housing development activity over the past ten years has been strategic, significant and impactful. OHA has developed on its own, or partnered with nine different affordable housing developers, on fifteen major projects adding 1,922 units of new affordable housing since 2008 with a combined total development cost of over $763M. OHA's capital contribution to these projects ($92M) represents 12% of the overall financing required. In addition to providing capital directly to these	not a specific "public housing" program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and formerly homeless households (65 assisted with PBVs) closed all financing and started construction. • Construction was completed on 211 units (132 assisted with PBVs) at Projects 1 and 2, known as Paseo Estero and Vista Estero. Lease up was completed in 2021 and 101 family units (50 of which are PBV) were leased in Paseo Estero and 110 senior housing units (82 of which are served with PBVs) were leased. • 285 12th Street - OHA is partnering with the East Bay Asian Local Development Corporation (EBALDC) to construct affordable housing to include 65 units and 3,500 square feet of commercial space. The site is currently vacant and centrally located in downtown Oakland near several BART stations. OHA has committed to providing PBVs for 16 units. The project received NEPA clearance during FY 2021.	projects, OHA awarded 719 project-based vouchers (PBVs) using MTW flexibility, which were used to leverage $75M in additional private debt financing. OHA's capital contribution and award of PBVs together contributed approximately 22% of the total cost for fifteen major projects. OHA strategically purchased the land on 13 of the 15 projects to ensure that the housing will remain in reach of a stable public agency committed to the preservation of	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				• 500 Lake Park Avenue – OHA is partnering with EAH Housing to construct a 53-unit affordable housing building with 2,900 square feet of retail space at 500 Lake Park Avenue in the Grand Lake district of Oakland. The project received NEPA clearance in FY 2021. Also, during FY 2021, OHA acquired the land and provided a loan to EAH to continue funding predevelopment activities for the project. • 6946 Foothill Blvd - OHA and its affiliate OHI conducted predevelopment planning to rehabilitate and preserve 65 units of affordable housing using low-income housing tax credits. • 7526 MacArthur Blvd Repositioning – OHA conducted a feasibility study on developing affordable housing on an OHA-owned vacant parcel at 7526 MacArthur Boulevard in order to meet Oakland's need for	affordable housing in perpetuity. The disposition of 1,615 units of scattered site public housing at the beginning of the decade has proved especially fortuitous as the value of this real estate combined with low-income housing tax credits (LIHTC) and MTW flexibilities, will allow OHA to facilitate future building and redevelopment of new units within these sites at a fraction of the typical cost to develop. As a direct result of OHA's development activities, over 421

	City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family homes for re-sale, lease-to-own, or for rent and if financially viable and operational capacity exists, will partner with community land trusts or otherwise incorporate resale restrictions to preserve affordability for Oakland residents (see also Action 4.3.4).	Center/Strategic Initiatives	beginning 2014-15	development and sale to moderate-income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021, the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the 2015-2021 period there were 18 units developed and closed. Also see Actions 2.2.4 and 4.3.4.	properties to new construction single-family dwelling for larger households.	capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a ~~boot~~boost of subsidy may be needed to maintain feasibility of future projects using this model.
ACTION 2.2.3	*Foreclosure Mitigation Pilot Loan Program.* Given that the City's foreclosure crisis is currently (2014) impacting long-time Oakland homeowners, the	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	While the City no longer funds the Foreclosure Mitigation Pilot Loan Program, the City continued operation of its an Anti-Displacement Program (Oakland Housing Secure [OHS]-Homeowner Assistance) from October	The demand for this service, particularly emergency mortgage assistance, far	The scope of Oakland Housing Secure (OHS) to support homeowners is important work,

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	City has been engaging in new innovative strategies, such as launching a comprehensive program connecting door-to-door outreach with legal and housing counseling services, City escalation with bank officials, and the development of new loan fund programs. In addition, the City has been working on the development of a distressed mortgage notes program in order to purchase delinquent mortgage notes, modify loans of qualified homeowners, assist homeowners who are not able to receive modifications with alternative housing solutions, and then dispose of vacant properties to result in new affordable homeownership opportunities.			2020 through September 30, 2021. Centro Legal de la Raza (program administrator) along with Housing and Economic Rights Advocates (HERA) provided emergency financial assistance to homeowners, legal representation, consultations, workshops, outreach, education, and other services to prevent foreclosure of property. Thirty-two homeowners received financial assistance and 498 homeowners benefitted from other services offered through OHS. This program is closed out as of September 2021. No new funding has been identified for FY 2021/22 and forward.	exceeded resources available. Legal representation successfully resolved legal matters for more than 50% of homeowners, who also reported improved housing stability through: avoiding an eviction, avoiding homelessness, or securing time and/or money to maintain housing. However, Centro Legal reported that mortgage services are slow and difficult to deal with, as if little has changed since the foreclosure crisis. During the COVID-19 pandemic, the City's focus has been on keeping	though this was one time funding that ended in September 2021. The City, HERA, Central Legal De La Raza and other agencies provide support for homeowners and renters, and rental assistance work continues under the City's Keep Oakland Housed (KOH) program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					renters housed using Federal Relief funds.	
ACTION 2.2.4	*Community Buying Program.* The Community Buying Program seeks to assist Oakland residents (either those people who have lost their homes to foreclosure or tenants residing in foreclosed properties or who have been unable to compete with all cash investors on the open market) to purchase properties from the Scattered-Site Single Family Acquisition and Rehabilitation Program (Action 2.2.2 above) or other similar foreclosed housing. Should public funds be utilized, the City would assure the long-term affordability of these properties through the use of effective resale restrictions in partnership with nonprofit organizations with sufficient operational	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for development and sale to moderate income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021 the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the 2015-2021 period there were 18 units developed and closed. See also Actions 2.2.2 and 4.3.4.	The program has been effective at turning blighted properties to new construction single-family dwelling for larger households.	The mechanism to clear liens and use developer capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a boot of subsidy may be needed to maintain feasibility of future projects using this model.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	capacity, including possibly local community land trusts. Assistance to Oakland residents could include the use of loan products such as the Federal Housing Authority 203K loan or other funds available to the City, such as housing rehabilitation or down-payment assistance funds. In addition, the program will build upon the National Community Stabilization Trust's First Look program.					
ACTION 2.2.5	*Home Preservation Loan Program.* The Home Preservation Loan Fund Program will provide up to $50,000 in forgivable loan funds for distressed homeowners.	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	This program provided financial assistance to 20 households between 2015 and 2016. Since 2016, the program has been administered by Housing and Economic Rights Advocates (HERA). Funding for this program has been variable – no funding was available in 2017 and 2020, although funding was available through the National Fair Housing Alliance in 2018 and 2019.	Effective with sufficient funding – no funds provided in 2021.	Appropriate if and when furnished with appropriate resources to deliver on expected outcome. In the future, this action should be combined with Action 2.2.3 and renamed as

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Funding for this program was not available in 2021. However, as reported in Action 2.2.3, emergency financial assistance (grants) were provided to 32 homeowners in 2021 through OHS. This program is closed with no funding available for 2022.		Keep Oakland Housed (KOH).
POLICY 2.3: Density Bonus Program						
ACTION 2.3.1	*Density Bonus Ordinance.* Continue to implement the City's density bonus ordinance. The City permits density bonuses not exceeding 35 percent for projects that provide at least: • Ten percent (10%) of the total Dwelling Units of a Residential Housing Development for Lower Income Households; or • Five percent (5%) of the total Dwelling Units of a Residential Housing Development for	Bureau of Planning	Ongoing, 2015-23	Although Density Bonus applications beyond 100 percent affordable housing developments were relatively rare in the earlier portion of the reporting time period, applications picked up after 2017, after the City's Affordable Housing Impact Fee came into effect. The Impact Fee included an alternative for incorporating affordable units on-site and adjacent to market-rate developments, and resulted in a modest uptick in Density Bonus applicants. Between 2018-2021 (the period during which State HCD has required that jurisdictions report the number of approved or permitted density bonus projects for the Annual Progress Report) 33 projects were approved, 10 were permitted, and 8 were completed as the result of a density bonus.	The City has effectively updated its procedures and ordinances to ensure the orderly application of the Density Bonus law.	The Density Bonus is a is a provision of State law and does not require a local enabling ordinance. The City has regularly updated its local ordinance to be consistent with State law.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	Very Low Income Households; or • A Senior Citizen Housing Development; or • Ten percent (10%) of the total Dwelling Units in a common interest development as defined in Section 1351 of the California Civil Code, for persons and families of Moderate Income, provided that all units in the development are offered to the public for purchase.					
POLICY 2.4: Permanently Affordable Homeownership						
ACTION 2.4.1	*Community Land Trust Program.* Continue support of existing Community Land Trust Programs. Support expansion of land trusts if land values make it	DHCD	Ongoing support and expansion of Land Trust as	From 2015-2021, the City has worked with a variety of community land trusts, including Oakland Community Land Trust, Bay Area Community Land Trust and the Northern Community Land Trust to provide affordable housing (including ownership housing).	This program is effective in promoting homeownership opportunities for very-low-income and low-income	DHCD will continue to support the efforts and capacity of the land trusts as resources are

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	financially feasible. Ownership of the land by a community-based land trust ensures that the housing remains permanently affordable.		funds are available.	Most significantly, the City created the Acquisition and Conversion to Affordable Housing Program, which provides funds to community land trusts to acquire and preserve affordable housing units. Through this program, the City has provided Bond Measure KK funding in the amount of $8 million to 5 community land trust projects for a total of 58 units. In addition, approximately $5 million is currently committed to 4 other community land trust projects that are anticipated to close in 2022.	homebuyers. The City is working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units.	available and if programming is feasible.
ACTION 2.4.2	*Resale Controls*. Continue to utilize financing agreements for City-assisted ownership development projects to ensure that units remain permanently affordable through covenants running with the land.	DHCD	Ongoing, 2015-23	The City continues to record long-term affordability restrictions that run with the land on all City-assisted affordable development projects, both rental and ownership.	Resale controls are a critical and effective tool for ensuring that affordable homeownership units remain affordable.	Resale controls are a fundamental component of the City's affordable homeownership program.
POLICY 2.5: Seniors and Other Special Needs						
ACTION 2.5.1	*Housing Development Program.* Provide financial assistance to developers of housing for	DHCD – Housing Development Services	Ongoing, 2015-23	Housing Development Services continues to circulate a NOFA each year if funding is available, for affordable housing new construction, acquisition and conversion to	The City's NOFAs are an effective means of providing financial assistance to properties	The policy is appropriate to the housing element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	seniors and persons with special needs.			affordable housing, and rehabilitation/preservation of existing affordable housing. The New Construction and Acquisition/Rehabilitation NOFAs awards up to five points for rental projects serving special needs populations, and up to ten points for projects containing Permanent Supportive Housing Units for homeless households. The City's Acquisition and Conversion to Affordable Housing NOFA awards up to two points to projects that house vulnerable populations, including seniors.	housing seniors and persons with special needs, achieving the goal as stated in the Housing Element's policy guidance.	
ACTION 2.5.2	*Housing For Persons With HIV/AIDS.* Provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. Enhance outcomes	DHCD; Community Housing Services (DHS)	Ongoing, 2015-23	Throughout the period, the HOPWA (Housing Opportunities for Persons with AIDS) program continued to provide housing assistance. In FY 2020-2021 alone, the HOPWA program provided housing assistance to more than 169 persons living with HIV/AIDS and their families utilizing the housing first model. Seven persons with HIV/AIDS obtained permanent housing. Information and referral services were provided to approximately 772 households for HIV/AIDS housing and other services. 53 persons living with HIV/AIDS	The HOPWA Program is an effective program providing housing assistance & supportive services to persons living with HIV and AIDS experiencing homelessness.	The Human Services Department will continue to serve persons living with HIV and AIDS through HOPWA funding.

	via housing first model under the Alameda County EveryOne Home Plan.			received supportive services. 2 new units of HOPWA housing were completed, increasing the Oakland HOPWA housing inventory to over 290 units, with 116 in stewardship.		
ACTION 2.5.3	*Accessible Units in New Federally -Assisted Housing.* All housing assisted with Federal funds (such as HOME and CDBG) must comply with HUD's accessibility requirements, which require that five percent of all units be made accessible for persons with mobility limitations, and an additional two percent be made accessible for persons with sensory limitations (sight, hearing). The City will ensure that these requirements are met in all projects that receive Federal funds from the City as part of project review and funding approval.	DHCD – Housing Development Services	Ongoing, 2015-23	The City of Oakland's Housing Development Services unit continues to enforce federal requirements for accessible housing for all projects receiving federal funding assistance. City staff began tracking this data during the 2015-2021 Housing Element period through the Housing & Community Development Department's City Data Services database system and will continue to do so moving forward.	This program is effective.	This program is appropriate for the Housing Element.
POLICY 2.6: Large Families						
ACTION 2.6.1	*Housing Development Program.*	DHCD – Housing	Ongoing, 2015-23	Since 2017, the City's New Construction of Multifamily Affordable	The policy is an effective means of	The goal is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Provide points in competitive funding allocations for projects that include a higher proportion of units with three (3) or more bedrooms. The City will award points in the ranking process for projects with an average number of bedrooms exceeding the minimum specified in the program guidelines.	Development Services		Housing NOFA requires that at least 15% of units in a family project have three or more bedrooms, and awards up to five points to rental projects that exceed this threshold, and up to nine points to ownership projects that exceed this threshold. Projects with affordable units that can accommodate larger families include the Fruitvale Transit Village, Estrella Vista, Redwood Hill Homes, 94th & International, Civic Center TOD, Mural Apartments, and 11th & Jackson.	ensuring that City-assisted affordable units are constructed for large families.	the housing element. Goal may need revision to include 2-bedroom units in next cycle.
POLICY 2.7: Expand Local Funding Sources						
ACTION 2.7.1	*Jobs/Housing Impact Fee.* Continue to implement the City's existing Jobs/Housing Impact Fee by collecting fees from new office and warehouse/distribution facilities.	DHCD	Ongoing, 2015-23	Data on the Jobs/Housing Impact Fee is reported in the Impact Fees Annual Report. Impact fee reports are available here: https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports Between FY 2016-2021, about $10,123,162 has been collected/paid towards the Jobs/Housing Impact Fee, while $23,209,708 has been assessed.	The policy is an effective means of generating funds for affordable housing.	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Collected funds go into the Affordable Housing Trust Fund. In accordance with Sections 15.72.050 and 15.74.050 of the Oakland Municipal Code (OMC), the Oakland Planning and Building Department (PBD) has calculated increases to the Affordable Housing, Transportation and Capital Improvement impact fees for FY 2021-22. Under the OMC, the City Administrator may adopt adjustments to these fees for inflation commencing July 1, 2021. As of January 2022, fees remain the same. In order for the fee increases to go into effect the City Administrator's authorization is required.		
ACTION 2.7.2	*Consider Implementing Mandatory and/or Voluntary Options for Developer Contributions to Affordable Housing Development by Conducting a Nexus Study and Economic Feasibility Study for Affordable Housing.* The City is committed to equitable development	DHCD; Bureau of Planning	Complete nexus study by December 31, 2014	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. ~~In~~On December 24, 2021 the City completed the Annual Report for Fiscal Year ~~Ended~~Ending June 30, 2021. See this link for the report: ~~https://cao-94612.s3.amazonaws.com/documents~~	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional	This program to find additional sources of funding for affordable housing is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Citywide—with a focus on Specific Plan Areas, Priority Development Areas (PDAs) and large development projects—that provides housing for a range of economic levels to ensure the development of thriving, vibrant and complete communities. The Nexus Study and Economic Feasibility Study will provide documentation of what level of development impact fees are supportable, if at all, by quantifying the impacts of development and establishing whether there is a reasonable relationship between the amount of the fees to be imposed on new developments and the impact created by the new developments. Mandatory options for developer contributions will include the study of a housing impact fee or affordable housing			~~/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf~~https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports Since the Affordable Housing Impact Fees went into effect on September 1, 2016 – $17,584,503 has been paid and $33,895,450 in revenue has been assessed but not due yet, for a total accessed amount of $51,479,953. For Fiscal Year 2020-2021 (ending on 6/30/21), $4,430,250 has been paid for the Affordable Housing Impact Fee; and $15,688,799 was revenue assessed, but not due yet (due to the program's schedule for payments). City of Oakland Impact Fee Annual Reports and related documents covering Affordable Housing, Jobs/Housing, Transportation, and Capital Improvements can be found here: ~~https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports~~ https://www.oaklandca.gov/document	$33,895,450 to be collected once the developments are under construction and completed.

	set-asides for newly constructed ownership housing. Voluntary options for developer contributions will include the study of bonuses and incentives such as Housing Overlay Zones. The RFP released July 8, 2014 requires that the contractor do an analysis of residential development costs and the market for both rental and owner-occupied housing in Oakland.			s/city-of-oakland-annual-impact-fee-reports As stated in Action 3.3.9, the City will review and update where possible Impact Fee and other payment timing as well as fees charged by mid-2024.		
ACTION 2.7.3	*Sale of City-Owned Property for Housing. Solicit Requests for Proposals (RFPs) from interested developers to construct housing on City-owned sites*. RFPs will be posted on the City's website and distributed directly to developers, including nonprofit housing providers. In disposing of City-owned surplus properties, the City will give first consideration to affordable housing	DHCD	Ongoing, 2015-23	The City advanced the development of 1,285 units of housing, 515 of which are affordable units, on City and former Redevelopment land through five projects since 2018, all of which are completed (Fruitvale IIA, 2016 Telegraph and 1150 Clay St), under construction (95th and International and Fruitvale IIB) or under active Disposition and Development Agreements: • Fruitvale Transit Village IIA, 94 affordable units • 2016 Telegraph, 30 market-rate units	The City followed-through on commitments to issue calls for proposals on key City-owned development sites; solicited proposals from a broad audience of developers, including nonprofit housing providers; and prioritized affordable housing	The policy is consistent with the Surplus Land Act and appropriate to the Housing Element. ~~Policy~~The policy may need revision to include an option for ground lease rather than sale.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	developers per the California Surplus Lands Act, Government Code 54220 et seq. If the City does not agree to price and terms with an affordable housing developer and disposes of the surplus land to an entity that develops 10 or more residential units on the property, the City shall require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233. For those sites that are sold without affordable housing requirements, the City should consider depositing 25% of the proceeds of such sales to the Affordable Housing Trust Fund.			• 1150 Clay St, 288 market-rate units • 95th and Intl. Blvd., 57 affordable units • Fruitvale Transit Village IIB, 181 affordable units • 3050 Intl. Blvd., 75 affordable units • 12th St. Remainder Parcel, 360 units (108 affordable) The City also issued Requests for Proposals/Notices of Availability (RFPs/NOAs) for seven City-owned sites between 2018 and 2021 and advanced development projects on each of these sites for approximately 1,000 or more additional housing units, many of which will be affordable. Additionally, the City is negotiating with the African American Sports and Entertainment Group for disposition and development of the City's 50% interest in the 120-acre Oakland Coliseum sports complex, co-owned with Alameda County. • 3823-3829 Wood St, 170 units • 3823-3829 MLK Jr. Way, 76 units	production. Several viable projects are advancing and will deliver a significant number of new housing units. The City has additional sites in its pipeline that expects to release in coming years.	City staff has determined that this program is effective and will continue to advance current development projects and issue additional RFPs/NOAs in the years ahead.

				• 73rd & Foothill, 120 units • Barcelona parcel, units TBD • Clara & Edes Homekey, 82 units (proposed) • 36th & Foothill Homekey, 124 units (proposed) • 1911 Telegraph, up to 540 units (proposed) • Coliseum, units TBD		
ACTION 2.7.4	*Utilize 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them into the Affordable Housing Trust Fund (aka "Boomerang Funds").* The State statutes governing the dissolution of redevelopment agencies and the wind-down of redevelopment activities provide for the distribution of former tax-increment funding to taxing entities. The City of Oakland is one of a number of taxing entities that will benefit from Oakland's Redevelopment	DHCD	Beginning in 2015 and ongoing, 2015-23	The City continues to allocate 25% of Boomerang Funds to the Affordable Housing Trust Fund. These funds are combined with other affordable housing funding and issued through competitive NOFAs.	The policy is a highly effective means of designating funds for affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Agency dissolution. The distribution of property tax will be from the Redevelopment Property Tax Trust Fund (RPTTF) and includes funds not needed by successor agencies to fulfill enforceable obligations. Additionally, there will be distributions to taxing entities sales proceeds and other revenues from the use or disposition of assets of what are now called "successor agencies" (former redevelopment agencies). These funds are called "boomerang funds" and represent a windfall in property tax revenue to the City of Oakland. In late 2013, the City of Oakland committed to setting aside 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them into the Affordable Housing Trust Fund. Starting in 2015,					

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	the Affordable Housing Trust fund will begin to receive boomerang funds on an annual basis.					
POLICY 2.8: Rental Assistance						
ACTION 2.8.1	*Expansion of Section 8 Vouchers.* Work with the Oakland Housing Authority (OHA) to obtain additional funding from the federal government for more Section 8 rental assistance for very-low-income renters through documentation of need for additional housing vouchers and contacting decision-makers at HUD if appropriate.	Housing Authority	Ongoing, 2015-23	During 2015, OHA awarded 21 units with project-based voucher assistance for low-income families and households with special needs. The awards were made to Redwood Hill Townhomes and 3706 San Pablo Avenue. OHA received a new allocation of 44 Section 8 vouchers for the Northgate Terrace development to serve additional low-income families. However, since 2016 Section 8 cannot be expanded without additional funding from the federal government, which has not occurred; nor is any funding anticipated in the foreseeable future. In 2021, OHA received an allocation of 515 Emergency Housing Vouchers (EHVs). After receipt of the award, the Executive Director quickly assigned staff to an interdepartmental team to manage and oversee distribution,	This program is effective. The OHA does their best to apply for and allocate these vouchers.	This program is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				placement and utilization of EHVs. With the same urgency, OHA staff led the effort to execute a county-wide Memorandum of Understanding (MOU) to memorialize the important, inter-jurisdictional collaboration to lease approximately 864 Emergency Housing Vouchers. OHA awarded 49 FYI Foster Youth to Independence (FYI) vouchers, ~~that~~which will be effective March 2022.		
ACTION 2.8.2	*City of Oakland Rental Assistance Program.* Support a continued partnership between the City of Oakland and a non-profit agency to provide up to $5,000 in rental assistance grants to distressed tenants impacted by the foreclosure crisis.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing as funds are available, 2015-23	The City partnered with Seasons of Sharing to provide rental assistance and utility assistances to low- and moderate-income Oaklanders and seniors impacted by the foreclosure crisis. This program started in 2013 with three dedicated staff, Seasons of Sharing and 3 Community Groups. The program ended in 2019 due to decreased resources. Note that Oakland Housing Secure, Keep Oakland Housed, and Emergency Rental Assistance Program superseded this program, as discussed in Action 2.2.3 and 2.2.5.	When operated with sufficient staff and fund resources, the program served close to 90 Oakland residents per year.	Households earning 50% or less of median income, especially those earning 40% or less are most likely to require rental assistance. With the appropriate level of resources this program is appropriate based on the need of the community.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 2.9: PATH Strategy for the Homeless						
ACTION 2.9.1	*Provide outreach programs to those who are homeless or in danger of becoming homeless.* The City will continue to provide the Homeless Mobile Outreach Program (HMOP), which provides outreach services to people living in homeless encampments. In addition to providing food and survival supplies, counseling and case management, the HMOP strives to encourage those living in these encampments to access available programs for housing and other necessary assistance to aid in attaining more stable living situations. The City will also continue to encourage outreach as part of the services of providers who are funded through City's PATH Strategy to end homelessness.	DHS	Ongoing, 2015-23	Under the City of Oakland Permanent Access To Housing (PATH) Strategy, Homeless Mobile Outreach Program (HMOP), regular outreach is conducted to assess the needs of unsheltered persons in encampments, transition aged youth (TAY), and the general homeless population to not only assess their needs but also to also provide the intervention necessary to direct homeless/unsheltered persons to housing options, health services and other human services. In early 2021, the City's Homeless Mobile Outreach Program (HMOP) was expanded substantially, doubling FTE staff to 10 front line workers, and amended the scope of work to reflect the City's priorities more explicitly. In so doing, the make of the outreach team is as follows: • Specialist Mobile Outreach (SMO): Three teams of up to 3 staff members principally tasked with engagement and support for unsheltered homeless individuals and	DHS staff believe that this program is effective given its accomplishments during this planning period.	The PATH Strategy will continue to operate to serve the homeless population in Oakland.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	homelessness by providing emergency loans or grants for first and last month's rent for renters, security deposits, counseling, legal assistance, advocacy and other prevention services for those dealing with default and delinquency rental housing issues. Prevention services and programs will be funded under the City's adopted PATH Strategy to end homelessness. The City will investigate the possibility of establishing a funding source for an expanded rapid rehousing program both as a means to keep individuals and families at risk of falling into homelessness, as well as to improve the City's ability to rapidly rehouse those who do fall into homelessness; this could include short term and medium term rental subsidies.			OHA) & intensive case management (funded by the City of Oakland) to multiple populations experiencing homelessness in Oakland. OPRI served a total of 159 participants in FY 2020-2021. This included people living in encampments (46), people living in encampments with serious mental illness (19), seniors (8), re-entry clients (29) households with children (Abode) (7), Transitional Age Youth (23) and family households (BFWC) (10) including children (BFWC) (19). Between FY 2014-2018. 519 households were served by OPRI and 431 clients were served between FY 2018-2021. In FY 2019-2020 the OPRI Collaboration expanded to include a family services provider, serving 20-40 families per year with housing subsidies and case management. In addition, the City of Oakland funds programs that help formerly homeless individuals maintain housing such as Lifelong Medical Care Services in the California and Harrison Hotels.	during this planning period.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 2.9.3	*Provide shelter programs to the homeless and special needs populations.* The City will continue to fund programs that are in line with the City's PATH Strategy to end homelessness. These agencies will provide housing and/or housing services that result in an outcome of obtaining and maintaining stable permanent housing for the homeless and near homeless population of Oakland. PATH is inclusive of the special needs populations such as those with HIV/AIDS, mental illness, and victims of domestic violence.	DHS	Ongoing, 2015-23	The City has continued to fund programs in line with the PATH Strategy. The current status of shelters ~~include~~includes the following: Crossroads Shelter Crossroads Shelter, funded by ESG, CDBG, and Measure Q continued to be significantly impacted by the COVID-19 pandemic throughout FY 2020-2021. Although there was no interruption to the shelter being open 365 days per year, maximum occupancy was reduced by 24 single adult beds to accommodate CDC guidelines for physical distancing/decompression. The shelter maximum occupancy went from 123 single adults, and five family units (allowing for families to share rooms, dependent upon the composition of each family), to a single bed maximum of 99 and a family maximum of five households (with no interfamily unit sharing). A total of 471 unduplicated individuals utilized the Crossroads shelter during FY 2020-2021, with 67 households exited to Permanent Housing, and 12 to Transitional Housing (with another 69	DHS staff believe that this program is effective given its accomplishments during this planning period.	DHS staff will continue to provide this service as resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				accommodate CDC guidelines for physical distancing/decompression. A total of 234 persons experiencing homelessness utilized the emergency shelter, with 6 individuals exited to Permanent Housing, and 2 to Transitional Housing (with another 13 to temporary stays with friends/family). Society of Saint Vincent de Paul – FY 20-21 Occupancy Totals: Max # of beds available nightly: 45 Max # annual bed nights available: 16,425 Actual bed nights provided: 15,681; 96% <u>Family Matters Shelter</u> Family Matters Shelter is operated by East Oakland Community Project (EOCP) and provides an emergency family shelter with 72 emergency shelter beds for 20-25 literally homeless families at any time. During FY 2020-2021, a total of 117 individuals were served which included 59 children. In FY 2020-2021 the City		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				also provided 107 spaces of safe RV parking which served 171 people.		
ACTION 2.9.4	*Provide transitional housing programs to those who are ready to transition to independent living.* The City will continue to fund and support as part of its PATH Strategy, transitional housing programs with services to homeless singles, families and homeless youth. By providing housing with services for up to 24 months, the program's tenants are prepared for more stable and permanent housing. Services provided assist the tenants with issues that prevent them from obtaining or returning to self-sufficiency.	DHS	Ongoing, 2015-23	The City has continued to provide transitional housing and supportive services to individuals (including single adults), youth, and families. Community Cabins were established to provide individuals living in encampments with a specific location where they can stay temporarily. Residents are housed in temporary structures. Each site serves up to 40 individuals at a time for up to 6 months. Services included wash stations, portable toilets, garbage pickup, and housing navigation (case management) services. Program goals are to increase health and safety of residents, to connect residents with mainstream services and the mainstream homeless response system, and to end the unsheltered status of residents. The pilot program began in December 2017 with the opening of the first site at 6Th & Castro (known as Castro Community Cabins). In May 2018, a	DHS staff believe that this program is effective given its accomplishments during this planning period.	Department of Human Services will continue to support transitional housing programs while working to help families and individuals gain access to permanent housing. This program will continue as resources are available.

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				second site was opened at 27th & Northgate (known as Northgate Community Cabins). The 6th and Castro site was closed in January 2019, two more programs opened during the 2018/19 operating year; Lake Merritt Community Cabins in October 2018, and Miller Community Cabins in January 2019. Three more sites opened in FY 19/20, Mandela Parkway North, Mandela Parkway South, and Oak St. Community Cabins. As of March 2020, the Lake Merritt Community Cabins were decommissioned and currently five sites are operating Citywide. In response to the COVID-19 pandemic approximately 10-12 beds are taken offline to afford single occupancy units for those who are medically fragile. The reduction of maximum occupancy in leads to approximately 182 beds total available. In addition, the 2020-2021 FY led to significant reduction in positive outcomes as a result of the multitude of challenges presented during the global pandemic including but not limited to; staffing shortages, COVID-exposures and infections,		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				shelter in place, eviction moratoriums, reduced housing availability, etc. The data below is presented for FY 2020/2021: • 428 unduplicated clients served • 253 of those have been homeless one year or longer • 72 exited to permanent housing locations • 121 exited to transitional housing/temporary locations		
ACTION 2.9.5	*Support development of permanent housing affordable to extremely-low-income households.* The City will continue to seek ways to provide permanent housing affordable to extremely low income households, by supporting funding from the state and federal levels. The City will also take actions to address barriers to the development of such housing. The City will continue to participate in	DHCD	Ongoing, 2015-23	The City of Oakland's NOFA for New Construction of Multifamily Affordable Housing includes a threshold requirement that 20% of units be affordable to Extremely Low-Income Households. Projects may be awarded additional points for exceeding this threshold (up to five points for rental projects, and up to 12 points for ownership projects). Rental projects can receive additional points for serving people with special needs (5 points) and for offering permanent supportive housing units for the formerly homeless (5 points).	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	the Alameda County-wide efforts that have evolved from a County-Wide Continuum of Care Council to the Alameda County EveryOne Home Plan, a road map for ending homelessness.			The City also coordinates its scoring criteria and funding pipeline with the Oakland Housing Authority, which awards Section 8 rental subsidies, in order to further support the creation of units affordable to extremely-low-income households. The City also continues to participate in the Alameda County-wide efforts under the EveryOne Home Plan, a road map for ending homelessness. The City will continue to seek ways to provide permanent housing affordable to extremely low-income households, by supporting funding from the state and federal levels, and take actions to address barriers to the development of such housing.		
ACTION 2.9.6	*Coordinate actions and policies that affect the extremely low income population of Alameda County.* The City will continue to participate in the Alameda County-wide efforts that have evolved from a County-wide Continuum of Care Council to the Alameda County EveryOne Home	DHCD; DHS	Ongoing, 2015-23	The City continues to participate in the Alameda County-wide efforts under County's Racial Equity Systems Modeling and Home Together plan. The Racial Equity System Modeling was completed in 2019. The City also issued its own five-year framework to address homelessness in 2019. The City has been a strong partner with Everyone Home and Alameda County in the development and implementation of a Coordinated	DHS and DHCD Staff believe that this policy goal is effective to publicly state the City's involvement and support of regional efforts.	DHS and DHCD will continue to support collaboration among City Departments and other regional, State and federal efforts.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Plan. The EveryOne Home Plan is a coordinated regional response seeking to streamline use of the county's resources and build capacity to attract funding from federal, state and philanthropic sources. The City will also participate in the County-Wide system redesign process.			Entry System for homeless services. Coordinated Entry is a standardized method to connect people experiencing homelessness to the resources available in a community. Coordinated entry processes help communities prioritize housing assistance based on vulnerability and the severity of housing barriers to ensure that people who need assistance the most receive it in a timely manner.		
ACTION 2.9.7	*Advocate for policies beneficial to the extremely low income and homeless populations of Oakland.* The City continues to advocate for an expansion of Federal funding for the Section 8 program "Moving to Work" as implemented by the Housing Authority under the title "Making Transitions Work" Program (both with the same acronym MTW). The City is an active partner in the implementation of a county-wide housing and services plan (EveryOne Home Plan) for extremely	DHCD; DHS	Ongoing, 2015-23	Oakland began providing Coordinated Entry for literally homeless families in the fall of 2015. Coordinated entry for all homeless populations in Oakland began in the fall of 2017 and is managed by the County as of FY 2020-2021. DHS continues to participate in monthly calls of West Coast cities, led by the U.S. Interagency Council on Homelessness. These calls provide opportunities for sharing and learning about new innovative and effective practices to address homelessness as a City jurisdiction. DHS continues to work closely with the County and CoC to address homelessness locally. DHS also maintains memberships and/or supports the following agencies:	DHS staff believe that this policy goal is effective to publicly state the City's involvement and support of Citywide efforts.	DHS will continue to support collaboration among City Departments and with other City agencies including the Oakland Housing Authority.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	low income and homeless persons.			National Alliance to End Homelessness; Housing California; Corporation for Supportive Housing; East Bay Housing Organizations; and other federal and State initiatives to end homelessness.		
ACTION 2.9.8	*Sponsor-based Housing Assistance Program.* Work with the Oakland Housing Authority to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service enriched housing options that increase housing choice for special needs populations.	Oakland Housing Authority	Ongoing, 2015-23	The OPRI program, which began in 2010, has successfully housed 650 formerly homeless Oakland residents with subsidies provided by the Oakland Housing Authority (OHA) and services and program administration contracted by the City of Oakland. The COVID-19 pandemic greatly impacted the OPRI program in different facets. There was a decrease in the number of exits/step downs due to the need to remain housed under shelter in place conditions. There was also a decrease in youth participants due to extensions to exits from foster care. Lastly, the loss of jobs and economic impacts of the pandemic were experienced by OPRI clients. However, overtime participants have been able to secure housing, find full time employment, enroll back in	The action is fully effective.	The action is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				school and obtain support needed to address mental and emotional needs.		
POLICY 2.10: Promote an Equitable Distribution of Affordable Housing throughout the Community						
ACTION 2.10.1	*Provide Incentives for Location of City-Assisted Developments in Areas of Low Concentration of Poverty.* In its annual competitions for the award of housing development funds, the City will give preference to projects in areas with low concentrations of poverty.	DHCD – Housing Development Services	Ongoing, 2015-23	The City's New Construction of Multifamily Affordable Housing NOFA awards points to projects that help advance geographic equity (5 points) and are located in neighborhoods with strong educational quality (5 points).	The action is a necessary but not sufficient tool for advancing geographic equity.	The action is appropriate to Housing Element goals.
POLICY 2.11: Affordable Housing Preference for Oakland Residents and Workers						
ACTION 2.11.1	*Oakland Resident and Worker Housing Preference Policy Resolution.* Continue to give first preference to households with at least one member who qualifies as a City of Oakland resident or worker. All other households will get second preference. There is no minimum length ~~or~~of residency or employment in Oakland to qualify for the	DHCD	Ongoing enforcement, 2015-23	The City of Oakland continues to monitor the marketing plans and waitlist preferences of affordable housing to ensure that Oakland residents and workers are given preference. The City also continues to ensure that this standard was met for the First-Time Homebuyer Mortgage Assistance Program. In 2016 the City updated a displaced person preference and a neighborhood preference. The City is	The policy is fully effective.	The policy is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	resident or worker preference. The owner, developer, or leasing agent of each housing development will be required to verify residency and/or employment by collecting a Certification of Eligibility with the required documentation. The preference policy will be applied only if and to the extent that other funding sources for the housing project permit such a policy.			pursuing Alameda County approval for the application of Oakland's resident preference for Measure A1 Funded Affordable Housing Developments.		
GOAL 3: Remove Constraints to the Availability and Affordability of Housing for All Income Groups						
POLICY 3.1: Expedite and Simplify Permit Processes						
ACTION 3.1.1	*Allow Multifamily Housing.* Continue to allow multifamily housing by right (no conditional use permit required) in specified residential zones and by conditional use permit in specified commercial zones.	Bureau of Planning	Ongoing, 2015-23	Continuing through 2021, multifamily housing continues to be permitted in Oakland.	Oakland's Planning Code has permitted multifamily housing, particularly on certain commercial streets, for decades. The zoning is effective: there have been numerous	Multifamily housing development is a long-standing policy of the City of Oakland, and that is an appropriate policy to enact the Oakland General Plan's policy of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					multifamily developments built in Oakland.	concentrating new multifamily housing on the commercial streets and corridors. Staff is looking to make further changes to City regulations to expand opportunities for "missing middle" housing by permitting additional densities in single-family zones.
ACTION 3.1.2	*Special Needs Housing.* Pursuant to Government Code Section 65583(a)(5), transitional and supportive housing must be considered a residential use of property and must be subject only to those restrictions that apply to other residential dwellings of the same type in the same zone. The City of	Bureau of Planning	Transitional and Supportive Housing review and update: By December 2015	The City's Planning Code continued to permit transitional housing in compliance with State law and allows emergency shelters by right in limited segments of the Residential Mixed Use, Urban Residential, Neighborhood Center, Community Commercial, Broadway Retail Frontage District Interim Combining Zone, Medical Center, Housing and Business Mix, and the CIX-1, CIX-2, IG, and IO Industrial	The zoning text amendments to the definitions for transitional and supportive housing will facilitate clarity during the development review process for these types of activities.	The legislation was prepared in response to State law, and is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Oakland amended its Planning Code in July 2014 to comply with this provision. The City's Planning Code will be evaluated and amended as appropriate for consistency with these requirements. Pursuant to Government Code Section 65583 and 65589.5, City of Oakland will allow emergency shelters by-right as indicated in the Oakland Planning Code Section 17.103.015.		Allowing Emergency Shelters By-Right: Ongoing, 2015-23	zones as codified by Ordinance No. 13248 (adopted July 15, 2014). Further, the Reasonable Accommodations policy and procedure formalized the process for persons with disabilities to seek exceptions to the zoning rules to promote equal access to housing.	Permitting emergency shelters by right assists with providing housing opportunities for Oakland's homeless population.	
ACTION 3.1.3	*Discretionary Permits.* Continue to implement discretionary permit processes (design review, conditional use permits, etc.) in a manner that includes explicit approval criteria and approval procedures that facilitate the development of multifamily and special needs housing in appropriate areas of the City.	Bureau of Planning	Ongoing, 2015-23	The Planning and Building Department continues to issue discretionary design review permits for all new housing, except for Accessory Dwelling Units (ADU's) which are issued ministerially over the counter. For Special Needs housing, in 2016, the Planning and Zoning Division adopted amendments to the Oakland Planning Code ensuring that transitional and supportive housing is treated in the same manner as other housing facilities in the same zone.	Planning staff routinely ~~uses~~use the design review and other checklists when approving projects, and will continue to do so. These checklists are given to the public in advance of a project application, so	To ensure a consistent set of design principles which apply to new residential development citywide, it is appropriate to have standard checklists for staff to review projects. It is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				The City's reasonable accommodations procedure was also adopted in 2014, providing flexibility in the application of the Planning Code for individuals with a disability. While the Bureau of Planning manages a few residential development entitlements under SB330 and prioritizes processing of affordable housing and all residential development applications, efforts to streamline review are challenged by the lack of objective design guidelines and adequate staffing to process applications efficiently and effectively.	they are also a tool for informing applicants about the standards and expectations of the City Planning division. If the City Council adopts the proposed ordinance to clarify that transitional and supportive housing (for six people or fewer) is a residential use, then applicants for transitional and supportive housing would not be required to obtain a conditional use permit, if their facility houses less than six people. While the Bureau prioritizes processing of residential development	amend the Oakland Planning Code to specifically clarify that the provisions of SB2 with regards to transitional and supportive housing apply to the Oakland Planning Code. The City is looking to make further types of housing subject to ministerial approval upon adoption of Objective Design Standards in late 2022/early 2023.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					application, lack of objective design guidelines and lack of adequate staffing limit the ability to further achieve this goal.	
ACTION 3.1.4	*"One-Stop" Permit Process.* Continue the "one-stop" permit process that provides coordinated, comprehensive, and accurate review of residential development applications. Ensure coordination between different City departments, provide for parallel review of different permits associated with projects, and provide project coordinator services to expedite project review when needed.	Bureau of Planning	Ongoing, 2015-23	This process was implemented within the Bureaus of Planning and Building throughout the period. In 2021, the City launched a "Re-Imagining One Stop Permitting" (ROSP) initiative to coordinate and align permitting processes across several City departments, including: Planning and Building, Oakland Department of Transportation, and Oakland Public Works. This effort was implemented in early 2022.	This action is an effective method of providing coordinated, comprehensive, and accurate review of residential development applications.	The action is appropriate to the housing element.
ACTION 3.1.5	*Assign Priority to Affordable Housing*. Continue to assign priority to the review of affordable housing projects through an	Bureau of Planning	Ongoing, 2015-23	The City continued to implement this process during the planning period. Permit applications for affordable housing developments, as with other multifamily projects, are "deemed complete" within 30 days of submittal.	Planning staff coordinates with the City's Housing staff on design review and land use permitting	Planning staff is appropriately assigning priority to affordable housing projects, when

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	expedited review process and other techniques.			The City processed its first SB35 affordable housing case in 2018, which waives discretionary review for proposals that meet certain criteria, and has continued to process cases under SB35. In 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process. In 2021, the City has prioritized the review of entitlements for affordable housing above most other types of applications. The City currently expedites residential applications in accordance with SB35.	details for affordable housing projects.	they are submitted for entitlements.
ACTION 3.1.6	*Expedite Environmental Review.* Reduce the time and cost of environmental review by using CEQA exemptions, the City's Standard Conditions of Approval, and focused and tiered Environmental Impact Reports, as appropriate.	Bureau of Planning	Ongoing, 2015-23	Oakland uses CEQA exemptions for development projects, where appropriate. See detailed response in Action 1.1.3. In January 2022, new ADU legislation was adopted by City Council to synchronize our regulations with those of the State. In 2019, the City amended the Planning Code to allow emergency	The City is continually evaluating its standards, procedures and permit process to allow development of multifamily, market-rate and affordable	City staff considers streamlined environmental review, within the restrictions of CEQA, to be an appropriate ongoing project for staff.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				shelter facilities to be constructed without discretionary review to greatly speed up the process. Reliance on Specific Plan EIRs (such as the Broadway Valdez Specific Plan EIR) for residential and other development applications effectively streamlines environmental review for desired development.	housing, within the restrictions of CEQA.	
ACTION 3.1.7	*Secondary Units.* Continue to encourage the construction of new secondary units and the legalization of existing non-conforming secondary units to bring those units into compliance with current zoning and building standards.	Bureau of Planning	2015-2016	The City has continually adopted new ADU regulations to remain in compliance with State law. Between 2016-2021 (the period during which State HCD has required that jurisdictions report the number of ADUs permitted for the Annual Progress Report) 1,049 ADUs were permitted. In 2021 alone, the City permitted 274 ADUs. Most recently, a proposal went before City Council on December 21, 2021 and was adopted in January 2022 to allow additional building envelope expansion for "small lots," additional height limits to create two-story ADUs, provisions for reduced setbacks, amnesty and enforcement delay	This action has been effective in ensuring there are no local constraints to ADU development. Since the new proposal has not been adopted yet, it is not yet possible to evaluate its effects. It is important to acknowledge that wealthier residents have more resources to create	The proposed ordinance amendments together with the project review streamlining requirement and private and public ADU assistance initiatives are appropriate to support the goals of the Housing Element. Expansion of the private and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				program for currently un-permitted ADUs, and a number of other proposals designed to make creation of ADUs more affordable and more accessible to different income groups. In addition, a new City program administered by Oakland HCD was created to assist lower-income applicants with legalizing their existing un-permitted units. This program has secured a $3M State grant to create more ADUs that are safe to inhabit. Also, a privately-funded program Keys to Equity is helping lower-income applicants—many of whom are Black, Indigenous, and people of color (BIPOC) residents—to build ADUs to either provide a rental income or provide for multi-generational households and remain in the community.	ADUs in general, so additional support for lower-income residents is necessary for equitable distribution of the benefits this new ADU policy will create.	public programs to support the ADU applicants would further enhance access to ADUs for applicants of all income groups.
POLICY 3.2: Flexible Zoning Standards						
ACTION 3.2.1	*Alternative Building Code Standards.* Continue the use of alternative accommodations and equivalent facilitation of the California Building Codes	Bureau of Planning	Ongoing, 2015-23	The City continues to search and to utilize alternative building code standards to remove any constraints to availability and affordability of housing. In 2021, the City allowed	This action is effective.	This action is appropriate; the City will continue to review processes and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	to address the special housing needs of persons with disabilities and to facilitate the rehabilitation of older dwelling units. (See Actions 4.1.1 and 4.1.2 for housing rehabilitation actions and Action 6.2.1 for reasonable accommodations for persons with disabilities).			strawbale construction as alternative construction.		procedures to allow for alternative construction methods.
ACTION 3.2.2	*Planned Unit Development Zoning.* Maintain the provisions in the Planning Code for planned unit developments on sites where the strict application of zoning standards could make development less feasible. Consider reducing the minimum lot area requirement for residential planned unit developments (PUD).	Bureau of Planning	Ongoing, 2015-23	While the City of Oakland has a PUD permit, it does not have PUD zoning. The PUD permit allows for the application of flexible development standards; staff educates applicants about this flexibility and applicants are encouraged to take advantage of these regulations, to ease entitlement of very large development projects that would otherwise be difficult to entitle. During this time period, the PUD permit has been used to maximize residential development at Oak Knoll, Brooklyn Basin, Mandela Station, Lake Merritt BART TOD, Jack London Square, 500 Kirkham, and MacArthur BART. In addition, applicants are currently taking advantage of these regulations for proposals, including Howard Terminal and CCA.	PUD regulations relax standards to allow for ease of delivery of residential development. This policy is effective for entitlement of large sites.	This is an appropriate for easing delivery of large numbers of residential units through a small set of entitlements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 3.2.3	*Flexible Parking Standards.* Study and consider implementing reductions in the parking standards in any future Planning Code revisions. Consider expanding the reduced open space requirements as stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.116.110D) citywide.	Bureau of Planning	2014-2017	In 2015, City staff began public outreach through community meetings to propose new parking standards. In 2016, the City adopted new parking standards, including no parking required in the Central Business District and innovative parking reduction methods in other parts of the city. In 2019, the City reduced the parking requirements for multifamily projects further simplifying the process. Also in 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process.	The action is effective.	The action is appropriate
ACTION 3.2.4	*Reduced Open Space Requirements.* Consider expanding the reduced open space requirements as stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.101C.050B) citywide.	Bureau of Planning	2014-2017	In 2020, the Draft Downtown Oakland Specific Plan was released, including policies and actions for improving existing open space and parks, as well as allowing publicly accessibly open space to satisfy open space requirements (rather than private open space requirements) and allowing developers to contribute to	These changes have not yet been adopted but are anticipated to be considered in late 2022 to remove constraints to the development of housing and	This is an appropriate step to remove constraints to the development of housing. As described under "Status of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				off-site open space to provide greater flexibility to meet open space requirements. The zoning regulations that will implement the Downtown Oakland Specific Plan are in development, to be adopted along with the Plan in 2022, and will include open space standards, however, study of significant changes to the DOSP area's open space development requirements will be completed as a near-term implementation step.	encourage provision of publicly accessible open space, which contributes to more livable neighborhoods for lower-income residents.	Implementation, " this program is being considered for expansion into the DOSP area. This action is appropriate for the DOSP area and for further consideration in additional zoning areas.
POLICY 3.3: Development Fees and Site Improvement Requirements						
ACTION 3.3.1	*Project Review Process and Development Agreements.* Continue to require only those on- and off-site improvements necessary to meet the needs of projects and to mitigate significant on- and off-site environmental impacts.	Bureau of Planning	Ongoing, 2015-23	This action is limited in its application but can be very effective. Development Agreements (DA) can allow for delivery of increased and/or expanded affordability for residential projects. There ~~are~~have been no newly adopted DAs since before 2015. There are three DA applications currently under review, including an amendment to the Brooklyn Basin DA.	This policy has the potential to be very effective, depending on policy maker discretion. Staff is currently seeking to boost residential affordability through DA applications.	This action is still appropriate for the 2023-2031 Housing Element period.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 3.3.2	*Development Impact Fees.* Consider transportation, capital improvement and housing impact fees to mitigate impacts on City infrastructure and services while balancing the costs to support new development. The City will be issuing a Request for Proposals (RFP) during the Housing Element planning period for an impact fee study that will consider transportation, infrastructure, and affordable housing. The RFP released July 8, 2014 requires that the contractor do an analysis of residential development costs and the market for both rental and owner-occupied housing in Oakland. (See also Action 2.7.2.)	Bureau of Planning	Ongoing, 2015-23	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. ~~In~~On December 24, 2021, the City completed the Annual Report for Fiscal Year Ended June 30, 2020. See this link for the report: https://cao-94612.s3.amazonaws.com/documents/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf On December 24, 2021, the City completed and published the 5-Year Impact Fee Review and Update.	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional $33,895,450 to be collected once the developments are under construction and completed.	This program is appropriate for the Housing Element
POLICY 3.4: Intergovernmental Coordination						
ACTION 3.4.1	*Multiple Agency Reviews.* Continue to coordinate multiple agency reviews of residential development	Bureau of Planning	Ongoing, 2015-23	The City continues to coordinate multiple agency reviews of residential development proposals when more than one level of government is	HDS has generally been effective at coordinating among different	This policy is appropriate.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	proposals when more than one level of government is required for project review.			required for project review. When possible, we time the release of our Notice of Funding Available (NOFAs) to be consistent with the timeline of State and federal programs.	governmental agencies in reviewing residential developments.	
ACTION 3.4.2	*Allocation of Project-based Section 8 Units.* Reduce costs and achieve greater cost effectiveness by allocating project-based vouchers, when possible, using an existing competitive process initiated by the City of Oakland, as funding and other program consideration allows.	Oakland Housing Authority	Ongoing, 2015-23	Per this policy, the Oakland Housing Authority matches its scoring criteria for allocation of Project-Based Vouchers (PBV) to the City's scoring criteria for NOFA applications. See www.oakha.org for the Annual MTW FY 2021 report - Activity #06-03 discusses allocation of project-based vouchers through existing competitive processes. Appendix C shows allocations of project-based vouchers across all projects. As of FY 2021, there are 5,135 PBV units allocated. See Action 5.1.4 for more information about voucher allocations.	The policy is an effective means of promoting intergovernmental coordination and maximizing the benefit of voucher subsidies.	The policy is appropriate to Housing Element goals.
POLICY 3.5: Financing Costs						
ACTION 3.5.1	*Access to Low-Cost Financing for Development.* Continue to assist affordable housing developers in obtaining financing for their	DHCD – Housing Development Services	Ongoing, 2015-23	City funds awarded to affordable housing developers are offered on favorable terms, including a 3% simple interest rate, payment of principal and interest due from excess cash flow	The policy is a core component of the City's strategy to provide housing to	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	projects. (See actions under Policy 2.1.)			from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City works with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. The City also coordinates with developers to help ensure that they qualify for additional funding from county, state, and federal sources. For more information about NOFA funds committed recently, please see Action 2.1.1.	low-income households.	
ACTION 3.5.2	*Access to Low-Cost Financing for Home Purchase.* Continue to implement homebuyer assistance programs for low- and moderate-income households. (See Action 2.2.1.)	DHCD – Housing Development Services	Ongoing, 2015-23	The City continued to operate First-Time Homebuyer Programs as funding was available (either through State funding or through program-related income). In 2021, the MAP program made one loan with the last $15,000 of program funds to assist a first-time homebuyer. In 2015-2021, the programs issued 121 loans totaling $6,782,346. See also Action 2.2.1.	The programs are very effective in assisting low- and moderate-income homebuyers to acquire homes, in slowing the effects of gentrification, and in providing equitable opportunities for ownership and wealth-building	The goals are achieved when down payment assistance is provided to assist low- and moderate-income buyers with low access to assets and credit to secure long term affordable

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					among disadvantaged communities.	housing through ownership, the greater community benefits by retaining a diversity of homeowners including those earning low- to moderate-incomes.
POLICY 3.6: Environmental Constraints						
ACTION 3.6.1	*Remediation of Soil Contamination.* Explore possible funding sources and other ways to assist prospective housing developers in addressing soil contamination on potential housing sites. If appropriate funding can be identified, develop and implement a remediation assistance program.	Housing & Community Development	Investigate potential funding sources	There has been no new action since 2015. The City no longer operates the EPA's Revolving Loan Program due to a lack of staffing and currently identified environmentally -challenged small infill brownfield sites that would qualify for the program. However, the City can re-apply for the program when staffing and sufficient qualifying opportunities are available. As private development projects are proposed, City staff will explore the needs and possibly apply for assessment and cleanup grants for eligible sites, as needed. Other	The policy does not outline a clear plan of action. City staff have carried out or assisted with environmental remediation on an ad hoc basis.	The goal is appropriate but does not delineate a clear program or funding stream for implementation.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				potential funding sources such as the Leaking Underground Storage Tank Fund can also be evaluated for applicability on a site-by-site basis.		
POLICY 3.7: Community Outreach and Education						
ACTION 3.7.1	*Community Outreach Program.* Continue to periodically meet with housing advocacy groups and neighborhood organizations to educate the public on affordable housing and reduce community opposition to affordable housing developments.	Bureau of Planning; Housing & Community Development	Ongoing, 2015-23	The City has continued to regularly attend meetings with East Bay Housing Organizations (EBHO), a local membership organization that conducts advocacy and policy work for affordable housing. It has also held ad hoc meetings with stakeholders about new housing programs and policies as needed. Affordable housing project sponsors are typically required to act as the lead organization in conducting outreach on specific projects, providing evidence of community support as a condition of receiving local and federal funds. The City has also engaged in direct outreach on specific projects on occasion as needed.	While quantitative data is not available to evaluate the effectiveness of community outreach, experience suggests that it has been an effective means of generating support for affordable housing.	While advocacy is an important tool for achieving Housing Element goals, it may not be properly suited to City staff to carry out such goals. The action may need to be refined to clarify role of City.
GOAL 4: Conserve and Improve Older Housing and Neighborhoods						
POLICY 4.1: Housing Rehabilitation Loan Programs						
ACTION 4.1.1	*Rehabilitation Loan Programs for Owner-Occupied Housing.*	DHCD – Residential	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent	The action is an effective means of repairing housing	The action is appropriate; it is aligned with the

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Provide loans for correction of code violations, repair to major building systems in danger of failure, abatement of lead-based paint hazards, minor home repairs for seniors, and emergency repairs, using the following programs: • HMIP Deferred Loan Program • Alameda County Minor Home Repair Grant Program • Emergency Home Repair Program • Lead Hazard Control and Paint Program • Neighborhood Housing Rehabilitation Program • Access Improvement Program • Weatherization and Energy Retrofit Loan Program	Lending Services		on availability of funding for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and Access Improvement Program for disabled homeowners, though existing Rehabilitation Programs.	in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.	Housing Element and preserving and protecting the City's existing housing stock.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.1.2	*Rehabilitation Loans for Owner-Occupied Buildings With 2 To 4 Units.* Use the City's HMIP Loan Program for owner-occupied buildings of 1-4 units. In structures with 2 to 4 units, the rental units may also be rehabilitated using funds from this program.	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent on availability of funding for the correction of major code violations/deficiencies, emergency repairs, and lead-based paint abatement, though existing Rehabilitation Programs.	The policy is an effective means of repairing housing in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.	The policy is appropriate for repairing housing in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.
POLICY 4.2: Blight Abatement						
ACTION 4.2.1	*Anti-Blight Programs*. Implement a variety of programs to reduce blighting conditions that can lead to disinvestment and deterioration of the housing stock. These include enforcement of blight regulations, graffiti abatement, boarding up of vacant buildings, and a Clean Oakland Program.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to neighbor complaints of property maintenance.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.2	*Housing Code Enforcement.* Enforce housing codes to ensure decent, safe, and sanitary housing conditions. Orders to abate will be followed up with additional actions. The City may correct deficiencies itself and then place a lien against the property for the cost of the repairs.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to tenant complaints of housing maintenance.	Given current methods of program execution, at the moment only the most egregious cases need enforcement efforts. The Bureau is moving toward a proactive rental program to conserve/improve the older housing stocks.	The Building Services Department will continue this program and continue to look for more effective and efficient methods of addressing housing violations in the city.
ACTION 4.2.3	*Problem Properties Program.* City Staff will resolve public nuisance housing through joint enforcement actions of Code Enforcement, Police, Fire, and Alameda County Department of Environmental Health. Enforcement actions will include financial penalties and incentives.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to complaints of property and housing maintenance issues that involve abatement interference with contractors on problem properties.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.4	*Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program.* The City of Oakland's Foreclosed and Defaulted Residential Property Registration, and Abatement Program (O.M.C. 8.54) requires owners or the beneficiary and/or trustee pursuing property foreclosure and/or their agents to register, inspect, and potentially maintain their residential properties to protect the health and safety, livability, appearance and social fabric of our neighborhoods. Code Enforcement ~~pro-actively~~proactively monitors registered properties for trespassers, blight, pollutants, and vectors. Enforcement actions include financial penalties for un-maintained properties or registration violations.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	In 2015—since the Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program was strengthened to include defaulted properties in the fall of 2012—over 3,000 foreclosed or defaulted properties were registered (with 700 remaining active). The City continues to operate this program, although the number of registered properties decreased significantly over the period. In 2021, about 31 foreclosed or defaulted properties were registered.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.5	*Tax Default Properties Program.* City staff will continue to work with the Alameda County Tax Collector, to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The program takes advantage of the City's right of first refusal to purchase such properties. This program allows for City to leverage its investment of Code Enforcement dollars by targeting third party purchases to small local developers of vacant problem properties. The goal of this program is to quickly rehabilitate housing stock for resale to affordable housing qualified applicants.	Bureau of Building	Ongoing, 2015-23	During this period, City staff supported the Alameda County Tax Collector in its efforts to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The City encouraged and supported, where possible, non-profit partners to exercise their right of first refusal to purchase and rehabilitate such properties. The goal of these actions was to facilitate the rehabilitation and reuse of existing, distressed housing stock. The City does not intend to exercise its own right of first refusal and take title to such properties, so as to avoid complications and delays that may arise from public ownership and focus limited City resources on other higher-impact housing actions. In January 2022, DHCD received a Breakthrough Grant from San Francisco Foundation to support a fellow and a community partner in creating an emerging developer program, part of which would look at the tax defaulted properties as a potential source of projects for emerging developers.	The City conducted a pilot program to purchase and rehabilitate tax defaulted properties with a non-profit partner beginning in 2012. Since that time, however, the City has continued to pull properties from auction but has not consistently followed through in purchasing and rehabilitating the subject properties due to lack of resources, loss of institutional memory and other factors.	Acquisition and rehabilitation of distressed properties benefits when driven by small, nimble and focused actors. It is more appropriate at this time that the City defer to, encourage and, where possible, support its partners in purchasing tax defaulted properties rather than itself purchasing such properties.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.6	*Investor-owned Property Registration, Inspection and Maintenance Program.* The City of Oakland's Investor-owned Residential Property (IORP) Registration, Inspection and Rehabilitation Program (O.M.C. 8.58). In order to address the decline of neighborhood livability and health and safety problems that have arisen from high levels of foreclosure activity in Oakland, the Oakland City Council passed an ordinance designed to address issues of deferred maintenance or property neglect associated with properties in the foreclosure process. This program requires non-owner occupant buyers of properties that have a default or foreclosure history to register and arrange for an inspection by Building Services. A City inspector will then assess whether the property	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	Designed to manage the downstream effects of foreclosure, the IORP program was implemented in March of 2013 to enforce the registration, City inspection, and abatement requirements contained in OMC 8.58. The majority of violations found during these inspections have been related to blight and vandalism incurred during the foreclosure process and unpermitted work performed by the former owner or the investor that purchased the property with the intent to re-sell. In 2021, about 19 investor-owned properties were registered.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	conditions meet the local building or housing codes or whether blight abatement or rehabilitation work is needed. If the property is found to be in violation of City code requirements, the inspector will work with the new owner on an abatement plan.					
POLICY 4.3: Housing Preservation and Rehabilitation						
ACTION 4.3.1	*Historic Residential Building Relocation.* Notify the public of the opportunity to purchase and relocate a residential building, prior to its demolition for a public improvement project.	Bureau of Planning	Ongoing, 2015-23	Historic Preservation Element Policy 3.7, 'Property Relocation Rather Demolition,' recommends 'reasonable efforts to relocate the properties to an acceptable site' and references relocation effort as a 'standard condition of approval for... removal of any residential building' at the time the Historic Preservation Element was written. Requirements include advertising buildings' availability and contributing what would have been the cost of demolition toward the move. Work is entirely in the private sector as there are no City funds available to support these efforts financially. The main obstacles include finding available land, purchasing that	In 2015 three houses were moved to new sites where they continued in low-density residential use. Availability of land was by chance, where nearby owners happened to have sites. Two houses were displaced by Children's Hospital expansion and one in Fruitvale was accepted by an owner whose	Building moves occur very rarely, unless there is a major dislocation such as the 980 freeway construction that sent houses to both Preservation Park (museum and office uses) and to Oak Center (residential) under Redevelopment'

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				land, and approving a complicated array of permits quickly.	previous building had burned. Since then, there have been several efforts to relocate houses in West Oakland and the Broadway Valdez Specific Plan area, but development pressure seems too great to find available move-on sites or get the older buildings incorporated into new high-density development projects.	s auspices in the 1980s. This is an appropriate way to conserve housing stock, but will never affect a large number of units unless large amounts of land somehow become available. Regardless, the City will continue to keep this policy under the auspices of the Planning and Building Department.
ACTION 4.3.2	*Housing Repairs for Seniors and People with Disabilities.* Support home repair program offered by a local nonprofit organization to assist low-income seniors and people with disabilities to remain independent by rehabilitating their homes.	DHCD – Community Development Block Grant Program	Consider funding program in next Housing Element Program Round	The City continued to provide rehabilitation loans and grants to moderate-, low-, and extremely-low-income homeowners including seniors and people with disabilities for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and accessibility modifications.	This program has been effective in assisting senior citizens and people with disabilities with housing rehabilitation so that they may	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Citywide services are contingent upon award of funding.			Program availability is contingent on funding availability. A program specifically targeting only low-income seniors would require additional funding sources for implementation.	remain in their homes.	
ACTION 4.3.3	*Access Improvement Program.* Provide grants to owners of rental and owner-occupied housing to make accessibility modifications to accommodate persons with disabilities.	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide Access Improvement grants to low- and extremely-low-income homeowners and tenants contingent of funding availability. Grant funds are designated for accessibility modifications to accommodate persons with disabilities.	This program has been effective.	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.
ACTION 4.3.4	*Scattered-site Single Family Acquisition and Rehabilitation Program.* City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for development and sale to moderate income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021, the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the period 2015-2021 there were 18 units developed and closed.	The program has been effective at turning blighted properties to new construction single-family dwelling for larger households.	The mechanism to clear liens and use developer capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	homes for re-sale, lease-to-own, or for rent (see also Action 2.2.2).			In 2021, the Oakland Community Land Trust was awarded $4,050,000 for three projects totaling 22 units and a Scattered Site Single Family Lease to Own Project, dedicated to the creation and preservation of affordable housing. The funds are available thanks to the 2016 voter-approved City Bond Measure KK. Oakland Community Land Trust (OakCLT) and the Bay Area Community Land Trust (BACLT) will develop four projects that preserve affordable housing for 28 Oakland households earning up to 80 percent of Area Median Income (AMI), or $73,100 for a single-person household. See also Actions 2.2.2 and 2.2.4.		to steep development cost increases; a ~~boot~~boost of subsidy may be needed to maintain feasibility of future projects using this model.
ACTION 4.3.5	*Continuing Implementation of Mills Act Contracts.* The City will continue to offer several Mills Act contracts a year to stimulate the restoration and maintenance of designated historic properties through	Bureau of Planning	Ongoing, 2015-23	Owners receive a property tax reduction in exchange for a long-term contract to put the property's tax savings into the rehabilitation of the building. The program was adopted as a recommended action of the West Oakland and Central City East Redevelopment Plans, though it is not restricted to those areas. The property	As of 2021, the fourteenth year of the program, there are about 92 residential properties (out of 97 properties total) with recorded Mills Act	This program is an appropriate and popular way to conserve and create housing stock, though it will never affect a vast number of units. Program

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	property tax reductions, as authorized by State law.			must be a Designated Historic Property. The designation by Landmarks Board often occurs concurrently with the Mills Act application. Oakland's first Mills Act contracts were recorded in 2008.	contracts. The largest number are in Council Districts 2 and 3, where Oakland's oldest and largest buildings are concentrated. The City ordinance establishes annual caps on tax revenue reductions, and the practical limit on new contracts is usually about ten a year. The tax assessment formula established by State law favors recent buyers with high assessments over longtime owners. Building rehabilitation is assisted not only by the Mills Act tax savings, but by the eligibility of	participation requires a fairly high level of planning and building sophistication and long-term commitment and follow-through. Work under the Mills Act has included seismic strengthening, reversal of inappropriate alterations, residential conversion of commercial and industrial buildings, and restoration and reactivation of a large blighted and abandoned former rest home near the 580 freeway.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					historically designated properties to use the performance-based California Historical Building Code.	
ACTION 4.3.6	*Rehabilitating Public Housing.* Focus investment of Oakland Housing Authority's Making Transitions Work funds into rehabilitating current public housing or project-based voucher units in order to increase housing options for low-income families, improve the quality of housing for families, and improve the neighborhoods and communities surrounding the housing.	Oakland Housing Authority	Ongoing, 2015-23	OHA continued to rehabilitate affordable housing units during the period. Oakland Housing Authority (OHA) also plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. OHA intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers.	This policy action is effective. During the State's economic and foreclosure crisis, OHA preserved 1,615 former public housing units by moving the 249 properties onto the Section 8 Project Based rental assistance program through HUD's Section 18 Disposition process, which dramatically increased the operating revenue to the properties allowing for their on-going	This policy action is appropriate to the housing element. With HUD defunding the operating funds for both maintaining and rehabilitating public housing inventory, OHA has pursued multiple strategies such as Section 8 disposition and RAD conversion to convert and preserve affordable housing stock to more financially

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				OHA uses MTW funding flexibility to address deferred maintenance in its PBV portfolio, OAHPI, and typically averages between 50-75 major unit rehabilitations annually, both preserving and improving this housing stock. In FY 2021, OHA continued the substantial rehabilitation of the following affordable housing projects: • Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. • Harrison Towers was also approved for disposition and during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax	replacement and restoration. A long outstanding disposition application that was originally submitted in 2010 was revamped, resubmitted, and approved in FY 2019 to dispose of 253 units of public housing across three senior sites and planning for the extensive rehabilitation was ongoing during the FY. Following that model, during FY 2019 OHA planned for the conversion of 261 public housing units in mixed finance developments and plans were created to convert to RAD Section 8 Vouchers beginning in late	viable programs with more flexible financing options.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022.	2019. These strategic moves have positioned the agency to be successful through future funding challenges allowing the agency to be less reliant on threatened funding streams and to generate revenue to sustain the agency going forward.	
ACTION 4.3.7	*Proactive Rental Inspection Policy.* Develop new policy to require registration and inspection of existing City market-rate rental units to confirm code compliance and habitability.	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Safe Housing Inspection Pilot Program (SHIP) concluded in 2016 – proactively inspecting approximately 1,200 rental units in 140 buildings. In 2021, the program development process is almost completed for implementation to inspect 20% of all rental units.	The program will be implemented upon approval from the City Council.	The program will be implemented upon approval from the City Council.
ACTION 4.3.8	*Mitigate Loss of Units Demolished by Public or Private Actions.*	DHCD; Bureau of Planning	Program implementation	Planning Code Section 17.102.230, which requires a Conditional Use Permit and the provision of replacement units if Residential Hotel	This action has been effective in preventing demolition of	This action is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Consider developing a new policy to comply with the spirit of Government Code 65583(c)(4) that states: "Conserve and improve the condition of the existing affordable housing stock, which may include addressing ways to mitigate the loss of dwelling units demolished by public or private action."		beginning 2015	Units are converted or demolished, was not changed in 2021. In 2021-2022, the Planning & Building Department has been in the process of updating the City's existing Density Bonus Ordinance in compliance with State law (California Government Code Sections 65915 through 65918). This includes a provision clarifying implementation of required replacement units in density bonus projects when existing rent-controlled or affordable units will be demolished. In addition, in 2021, the Planning Bureau updated its basic application form to include questions for all applicants (regardless of the type of project they are applying for) about whether there are existing tenants and/or affordable units on site, and whether any tenants will be displaced due to the project. See also Action 5.4.1.	Residential Hotel units. In addition, implementing the new provisions of State Density Bonus law and updating the basic application for projects is effective by alerting Staff of existing conditions and the applicants of requirements for the replacement of affordable and rent controlled units.	
ACTION 4.3.9	*Seismic Safety Retrofit Policy.*	DHCD; Bureau of Planning	Program implement ation	Two applications for FEMA Hazard Mitigation Grant Program (HMGP) funding were applied for in 2016 and	Both SHOP and ESHOP have been very effective,	Both programs are closely aligned to City

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Develop and explore funding sources for a new seismic retrofit policy, coupled with tenant protections, to preserve about 14,000 soft story housing units in Oakland's flatland neighborhoods at risk for destruction in a major earthquake. A low interest loan fund may be possible through combining available public monies with private capital or alternatively through issuing a new bond, which would require voter approval.		beginning 2015	$4.5MM for each was awarded in 2018, providing 9MM total in administrative and project cost reimbursement for two seismic retrofit programs: Earthquake-Safe Homes Program (ESHP: One- to four-unit owner-occupied homes) and Safer Housing for Oakland Program (SHOP: Five plus unit soft story apartment buildings). The programs provide up to 75% reimbursement to owners after retrofit completion. Both programs close in March 2022. A new application for additional HMGP funds for SHOP ~~is being~~was submitted in Spring of 2022, to re-fund the program for an additional 3 years.	even with the challenges introduced in 2020 by COVID-related health and financial instability and associated contact restrictions. In just over 3 years, SHOP expects to retrofit 39 buildings affecting 586 households. ESHP will retrofit 121 buildings affecting 145 households. Both programs together have made housing for 707 Oakland households safer and more stable.	priorities of preserving existing units and keeping residents safely and affordably housed. Most single-family owners would not be able to retrofit without assistance, especially if foundation work is required. Those that are the least likely to be able to afford to retrofit, will also be the least able to find temporary housing, rebuild, and recover financially in the event of earthquake damage. Most soft-story building owners

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						are in lower-income areas and all are restricted by rent control, with tenants who have similar displacement and recovery challenges as homeowners. Apartment building owners may struggle to finance what is now a mandatory retrofit required by City ordinance and many are non-compliant or applying for an extension due to financial hardship. Without financial assistance, the buildings could

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						remain at risk, or the financial burden of the required seismic retrofits is likely to be passed to tenants in the form of reduced property maintenance and rent increase due to capital improvement pass-through.
POLICY 4.4: Anti-Displacement of City of Oakland Residents						
ACTION 4.4.1	*Consider Developing a Standard City Tenant Relocation Policy and Fund City Program Operations.* The City has a number of ordinances that have tenant relocation assistance requirements, including under code enforcement activities, condo conversions, Ellis Act, Just Cause for evictions, and SRO conversions. City of Oakland	DHCD – Housing Assistance Center/Strategic Initiatives	FY 2014-15	The City continued to enforce the Uniform Residential Tenant Relocation Ordinance adopted in 2018. The City continued to fund a program providing advisory and financial assistance to tenants displaced as a result of a code compliance action, including paying relocation benefits in the case that a property owner does not meet their obligations, subject to availability of funds. City staff also operate a program to assist low-income and low-asset small property owners who are	The policy has been fully implemented and is effective.	The policy is appropriate to Housing Element goals. Since the policy has been fully adopted, this item should be revised in future cycles to focus on maintenance or identify new goals.

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	will consider 1) establishing one standard policy across tenant relocation requirements, such as code enforcement, condo conversions, Ellis Act, Just Cause for evictions and SRO conversions, 2) explore new strategies to fund and recover relocation costs, and 3) allocate and fund adequate staffing to monitor relocation programs and recover costs from responsible landlords.			required to pay relocation benefits resulting from an owner or relative move-in but would face a financial hardship to do so.		
GOAL 5: Preserve Affordable Rental Housing						
POLICY 5.1: Preservation of At-Risk Housing						
ACTION 5.1.1	*Monitoring and Preservation.* Monitor the status of federally assisted projects to identify those at-risk of converting to market-rate housing. Monitoring will include analysis of HUD data, a survey of building owners and managers to determine the likelihood that a building will convert, and	DHCD – Policy and Programs	Annual, 2015-23; City will identify projects at highest-risk each year (that could convert within the	The City is not aware of any restricted affordable units that converted to market-rate, and did not receive advance notice of an intent to terminate use restrictions on assisted housing. Staff have not had capacity to research or monitor the conversion of such units.	The policy is effective, but only rarely needed. Please note that staff have not had capacity to research or monitor the conversion of such units.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	consultation with the California Housing Partnership Corporation. Under California State Law, owners must provide tenants and the City with 12 months advance notice of an intent to terminate use restrictions on assisted housing.		next 24 months)			
ACTION 5.1.2	*Contact With Owners of At-Risk Buildings.* Contact owners to advise them of notification requirements under State law, to offer to assist them in pursuing higher Section 8 rents from HUD, and to encourage them to work with the City to facilitate preservation purchases of their properties by interested parties.	DHCD – Policy and Programs	Annual, 2015-2023; City will identify projects at highest - risk each year (that could convert within the next 24 months)	See Action 5.1.1; In 2021, staff did not have capacity to research or monitor the conversion of such units. Five properties were listed as "At-Risk" or questionable in Table 3-54 of the 2015-2023 Housing Element: • Lottie Johnson Apts (970 14th St) • San Pablo Suites (2551 San Pablo Ave) • Santana Apts (2220 10th Ave) • Taylor Methodist (1080 14th St) • The Claridge Hotel (634 15th St) Of these properties, San Pablo Suites was destroyed in 2017 due to fire. The	The policy is effective. A new search for at-risk properties will need to be identified in the next cycle.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Claridge Hotel is classified as a residential hotel and is thus now subject to the City of Oakland's Ordinance No. 13509 regulating the demolition, conversion, and rehabilitation of residential hotels. Santana Apartments is owned by Mercy Housing, a nonprofit affordable housing developer committed to preserving affordable housing. Although CTCAC affordability requirements will expire before 2023, the property also has a Ground Lease with affordability restrictions through 2067. Lottie Johnson Apartments and Taylor Methodist are both funded by HUD. A HUD representative confirmed via email on 3/19/2020 that neither property should be considered at risk.		
ACTION 5.1.3	*Financial Assistance for Preservation Projects.* Award preference points under the City's Housing Development Program for funding for projects that preserve existing rental	DHCD – Housing Development Services	Ongoing, 2015-23	The City of Oakland has continued to commit funds to projects that apply for its NOFA for the Acquisition, Rehabilitation, and Preservation of Multifamily Affordable Housing.	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	housing that is at risk of loss to the affordable housing supply. Support applications for Federal, State and private funding for preservation.					
ACTION 5.1.4	*Project Based Section 8 Assistance.* Collaborate with the Oakland Housing Authority to secure project-based Section 8 assistance to preserve at-risk housing both to enhance affordability and to provide additional income that can leverage private capital for repairs and improvements.	DHCD – Housing Development Services; Oakland Housing Authority	Ongoing, 2015-23	While development of new affordable housing has been an ongoing strategy within OHA to fulfill the MTW objective to increase housing choice, OHA leadership recognized that the decline of utilization within the housing choice voucher (HCV) program required a faster response than building new units. At the start of the decade in late 2009, OHA had 273 project-based voucher (PBV) units and in FY 2019 this number has grown to 3,463 committed or leased and 5,246 allocated overall which is about 40% of the MTW voucher allocation. This growth was expedited by the disposition of 1,615 public housing units in 2010, and two Requests For Qualifications (RFQs) issued in 2017 to award project-based voucher subsidies to existing units and single room occupancy (SRO) apartments to serve specialized populations. The RFQs received a huge response from existing	The policy is effective. The strategy to allocate PBV subsidies through various methodologies has proved important and strategic to preserve affordable units for households served through the program as the housing market continues to remain expensive.	As the decline of HCV utilization and increasingly competitive and expensive housing market spurred the need to attach subsidy to the units themselves using PBVs.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				owners and along with awarding PBVs to projects receiving funding through the City of Oakland competitive NOFA process and OHA's new development projects, OHA has awarded thousands of PBVs which has helped offset the declining utilization within the HCV program and ensures long term affordability of these units. In FY 2019, OHA leased 388 additional PBV units and has many in the pipeline to allow us to continue to serve the maximum number of families possible. Additionally, in FY 2019 OHA was approved to dispose of 253 units of senior public housing through Section 18 disposition and planning for this major renovation continued with implementation of the disposition targeted for FY 2020. This new disposition will bring the total number of disposed units to 1,868. During 2021, OHA leased and/or contracted 213 new PBV units. The leased and contracted units consisted of new construction as well as previously conditionally awarded units, which included completing the environmental clearances, Housing		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Quality Standards (HQS) inspections and in-place tenant eligibility determination for sites previously awarded through two Requests for Qualifications (RFQ) issued in FY 2017. Furthermore, 95th and International (27 units), second phase of Acts Cyrene Apartments, which was not planned for FY 2021, entered into an Agreement to enter into a Housing Assistance Payment contract during the FY. In FY 2021, OHA had 4,462 PBV assisted units under contract as of the beginning of the FY and placed under contract an additional 213 PBVs during the FY, bringing the total under contract to 4,675. OHA's overall allocation of PBVs, which includes conditional awards, the pending disposition of Harrison Senior and units to be converted using RAD is 5,285 (14 are PBV VASH for Lake Park), which is approximately 40 percent of the voucher portfolio.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 5.1.5	*Local Non-traditional Housing.* Oakland Housing Authority will use Making Transitions Work funds to provide the appropriate financial and other interventions necessary to preserve at-risk affordable housing and to expand the population of families served in local, non-traditional OHA programs.	Oakland Housing Authority	Ongoing, 2015-23	OHA administered existing programs and continued implementation of new local programs during the period. Existing programs such as the Sponsor Based Housing Assistance Program (SBHAP) offered housing assistance to 1) chronically homeless individuals from encampments, 2) formerly incarcerated individuals recently released from San Quentin prison, and 3) emancipated foster youth exiting the juvenile justice system. The Parents and Children Together (PACT) program evolved from a program serving primarily mothers exiting the criminal justice system to a citywide family unification program that includes any parent exiting the Santa Rita County Jail system that is enrolled in a reentry program designed and facilitated by the Alameda County Sherriff's Office (ACSO). In FY 2021, OHA served an average of 13 families through PACT. The Building Bridges (BB) initiative provides housing assistance to underserved populations, continued	This policy action is effective. Throughout the previous decade, OHA has developed innovative local programs to meet the diverse needs of Oakland and served 673 families on average per month in 2010. This number has increased to 1,081 families per month served on average through local non-traditional programs made possible through MTW flexibility.	The policy is appropriate to Housing Element goals. With multiple factors squeezing the supply of affordable housing during this decade, Oakland saw a marked increase in homelessness and certain populations being especially hard hit by the housing crisis. Using MTW flexibility, OHA began strategic partnerships with City and county agencies to promote systems alignment by breaking down silos, to provide targeted housing

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				operations in FY 2021, but experienced some challenges with staff turnover and decreased utilization. Additionally, Oakland's plan to renovate a large site remained on hold due to COVID-19 delays and shifting priorities. This program seeks to extend and leverage existing support through systems alignment to increase the chance of sustained success and long-term positive outcomes for these families. The BB SRO program has a capacity, when all sites are renovated and ready, to serve 289 families through a service-enriched SRO model. The shared housing and transitional housing units are reserved ~~to~~for house veterans, homeless and foster youth. The BB CalWORKs program is designed to provide local housing assistance for one to two years for Alameda County Social Services Agency (ACSSA) clients who are actively engaged in a plan to achieve self-sufficiency. Specifically, the program serves employable, formerly homeless CalWORKs clients with the goal of stabilizing the housing and improving outcomes for families and children. During FY 2021, OHA		resources alongside supportive services from these agencies to extend the runway of support and leverage funding more effectively, building on a platform of stable housing. With the launch of the Building Bridges initiative in 2017, OHA provided additional housing assistance funding for marginally served populations such as emancipated foster youth, CalWORKs working families, homeless

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				housed families referred from ACSSA, averaging 24 families assisted per month, a 12% increase over FY 2020. BB THP+ is a short-term program designed to extend the runway of assistance and help create a pathway to economic stability for people exiting the foster care system. OHA utilized the County of Alameda's 2017 RFP as the competitive selection process to award housing assistance funding to First Place for Youth (FPY). The award of funding resulted in an executed contract between OHA and FPY to provide rental housing assistance for low-income THP+ participants for up to five years. The service provider assists program participants through direct referral. The program capacity can serve up to 50 families per month and in FY 2021 OHA served 25 families per month, a 12% increase over FY 2020. BB-Key To Home (BB-KTH) is a new program where OHA partnered with the Oakland Affordable Housing Preservation Initiative (OAHPI),		veterans and the elderly, to supplement the resources being provided by state and local funding sources. These programs in FY 2019 are adding 190 families served in Oakland. These programs would not be possible without the authority and flexibility granted through the MTW demonstration. The MTW demonstration was set to expire in 2018 and OHA's leadership via a national Steering Committee of a few MTW agencies, led

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Alameda County Health Care Services (HCSA) and Abode Services to provide property-based housing assistance to up to 23 families through a new local housing assistance pilot program. The program provided a coordinated exit for families with children out of Project Roomkey interim housing into more long-term supportive housing managed by a third-party homeless service provider and property manager contracted by OAHPI. The program served an average of 5 families per month during FY 2021.		negotiations with HUD on behalf of all 39 MTW agencies nationwide, to successfully extend the contract with HUD as is, until 2028. This was critical to enable OHA to continue to provide uninterrupted service to its many families served through local non-traditional programs using MTW flexibilities.
POLICY 5.2: Support for Assisted Projects with Capital Needs						
ACTION 5.2.1	*Advocacy for State and Federal Financing.* Actively work to identify and secure State and Federal funding to provide for capital needs of older	DHCD – Policy and Programs	Ongoing, 2015-23	Significant changes to how competitive State funding is scored and prioritized has resulted in challenges for City projects and are at odds with City priorities. Specifically, the 4% tax credit and tax-exempt bond program,	The policy is effective and critical to producing and preserving	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	assisted projects. The City will notify property owners of available state and federal funding options and provide technical assistance in applying for such funds.			which is the lead funding vehicle for large affordable housing developments administered by the California Debt Limit Allocation Committee (CDLAC) and Tax Credit Allocation Committee (TCAC) shifted from being essentially over-the-counter to a competitive resource in recent years. The agencies have undergone significant scoring revisions that disadvantage Oakland, such as the emphasis on high opportunity neighborhoods (under which Oakland's census tracts are considered vastly low opportunity), or the penalization of high-cost cities under the tie-breaker scoring. The City has remained actively engaged in each scoring iteration, in coordination with other high cost cities and affordable housing developers. Whenever possible, the City advocates for increased funding at the State and federal level for affordable housing. The City regularly consults with affordable housing developers to ensure that the timing and dollar amount of City funding is aligned with county, State, and federal funding program requirements. This helps	affordable housing.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				ensure that City funds are leveraged maximally against other funding sources. The City of Oakland acts as the Local Reviewing Agency for any affordable housing applying for Low Income Housing Tax Credits in Oakland. The City of Oakland also acts as a co-applicant with developers seeking funds through California's Affordable Housing and Sustainable Communities (AHSC) program, Infill Infrastructure Grant (IIG) program, and Transformative Climate Communities (TCC) program. These programs are generally oriented towards new construction.		
ACTION 5.2.2	*Funding for Capital Needs – Preservation and Rehabilitation Programs for Rental Housing (not owner-occupied, buildings).* Provide loans through a competitive funding process for the rehabilitation of affordable rental housing for those buildings with existing	DHCD – Housing Development Services	Ongoing, 2015-23	Sources of funding include Bond Measure KK ($100 million towards housing programs) and Alameda County Measure A-1 (almost $55 million towards housing). City NOFAs for the Acquisition, Rehabilitation, & Preservation of Multifamily Affordable Housing enable buildings with existing City regulatory agreements to apply for funding.	The policy is effective in preserving and improving the City's stock of affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	City regulatory agreements. The goal of this program is to correct code deficiencies and ensure affordability for low-income households. The City will develop this for acquisition, rehabilitation, and preservation of rental housing. The rental housing eligible for this program will have City regulatory restrictions from funding sources such as CDBG and HOME Funds.			Oakland Housing & Community Development issued its Strategic Action Plan (SAP) to outline its immediate strategies for investment for 2021-2023. In accordance with the SAP strategies, Oakland HCD has deployed its production funding through several NOFA rounds to support the generation of the New Construction pipeline, the acquisition and conversion of existing buildings through the Acquisition and Conversion to Affordable Housing program, and the preservation and extending affordability through a Preservation and Rehabilitation program. Oakland HCD also aggressively pursued competitive Homekey funding from the State to immediately acquire and create the homeless housing units that are so desperately needed across the City and region. Across all programs, funds are deployed in a competitive manner with an emphasis on prioritizing projects that reach deeper affordability and, in more recent NOFAs, reflect racial equity goals for the department and City.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 5.3: Rent Adjustment Program						
ACTION 5.3.1	*Rent Adjustment Ordinance.* Continue to implement the Rent Adjustment program (Chapter 8.22 of the Oakland Municipal Code) that limits rent increases on units covered by the Ordinance based on a formula tied to increases in the Consumer Price Index.	DHCD – Rent Adjustment Board	Ongoing, 2015-23	Since 2015, the Rent Adjustment Program continued to implement the policies limiting rent increases on units covered by the Rent Adjustment Ordinance. In 2017, numerous changes were made to Oakland's Rent Adjustment and Just Cause ordinances that create more protection for tenants and facilitate improved enforcement and data collection such as owner move-in certifications, revisions to relocation provisions when owners move back into units, and noticing requirements. In addition, voter approved Measure JJ increased the number of units covered by the Just Cause ordinance and requires landlords to petition for increases that exceed CPI.	The policy is effective in preventing displacement of existing tenants.	The policy is appropriate to Housing Element goals.
ACTION 5.3.2	*Just Cause for Eviction Ordinance.* Continue to implement the Just Cause for Eviction program (Chapter 8.22 of the Oakland Municipal Code) that limits evictions of residential tenants to	DHCD – Rent Adjustment Board	Ongoing, 2015-23	The Rent Adjustment Program continued to enforce the Just Cause for Eviction Ordinance.	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	specified causes and provides remedies.					
ACTION 5.3.3	*Ellis Act Protections Ordinance.* Continue to implement the adopted tenant protections (Chapter 8.22 of the Oakland Municipal Code) when landlords remove residential rental units from the rental housing market pursuant to the Ellis Act (Cal. Gov't Code. §7060, et seq.).	DHCD – Rent Adjustment Board	Ongoing, 2015-23	In 2020, amendments to the Tenant Protection Ordinance, Rent Adjustment Program Ordinance, and Just Cause for Eviction Ordinance were adopted which strengthened protections for vulnerable tenants. Development of regulations to implement these amendments were approved by the City Council in 2021.	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.
POLICY 5.4: Preservation of Single Room Occupancy Hotels						
ACTION 5.4.1	*Residential Hotel Conversion/Demolition Protections.* Continue to require, through the Planning Code, a Conditional Use Permit to convert a residential hotel facility to non-residential use (other than to a commercial hotel) or to demolish a residential hotel.	Bureau of Planning	Ongoing, 2015-23	The City continues the implementation of Planning Code Chapter 17.153 – regulations adopted in 2018 that protect Residential Hotels as an important housing typology. The regulations require a Conditional Use Permit and replacement units for any demolition or conversion of a Residential Hotel Unit. The Bureau of Planning continues to work with Residential Hotel property owners to create a Residential Hotel registry, so the City can monitor any proposed changes to these buildings to ensure they align with regulations.	This program has been effective in retaining Residential Hotel units.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				In addition, $14 million from the City's Measure KK bond proceeds for affordable housing is being targeted to the acquisition of SRO properties for use serving extremely-low-income and homeless households.		
POLICY 5.5: Limitations on Conversion of Residential Property to Non-Residential Use						
ACTION 5.5.1	*Residential Property Conversion Ordinance.* Continue to require a Conditional Use Permit prior to converting a residential use to a nonresidential use in a non-residential zone. The City will review existing conditional use permit requirements to determine if revisions to the process are needed to reduce the potential for conversion of residential uses.	Bureau of Planning	Ongoing, 2015-23	In 2018, the City of Oakland strengthened regulations in Planning Code Section 17.102.230 restricting conversion of residential uses to non-residential uses.	This program has been effective in limiting the conversion of residential uses to non-residential uses.	The policy is appropriate to Housing Element goals.
POLICY 5.6: Limitations on Conversion of Rental Housing to Condominiums						
ACTION 5.6.1	*Condominium Conversion Ordinance.* The City will review the existing Condominium Conversion Ordinance and	Bureau of Planning	FY 2014-15	In February 2020, the Condo Conversion regulations were updated to make it harder to convert rental units to condominiums without replacement units being built.	This has been effective in reducing the number of condo	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	consider changes that: 1) considers an annual conversion cap, 2) eliminates the exemption for 2-4 unit buildings in the non-Impact Areas, 3) creates opportunities for tenant purchase and affordable homeownership for low to moderate income households, and 4) has strong tenant protection measures. Changes to this ordinance may only be made if adopted by the City Council and following appropriate public notice and debate.				conversions taking place.	
POLICY 5.7: Preserve and Improve Existing Oakland Housing Authority-Owned Housing						
ACTION 5.7.1	*Rehabilitation of Public Housing Units.* Utilize funding flexibilities provided by the Making Transitions Work program to rehabilitate and modernize existing public housing or project-based voucher units in order to increase housing options for low-income	Oakland Housing Authority	Ongoing, 2015-23	In 2018, the Bureau of Planning began working with OHA to develop a streamlined process for renovating existing affordable housing units and increasing density on existing OHA-owned properties. New state regulations, including SB 330, will facilitate processing of OHA applications once received by the City of Oakland. Further, the programs	This policy action is effective.	This is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	families and to ensure that OHA provides upgraded, high-quality units that are comparable or better than the market-rate properties surrounding them.			noted below do not require MTW funding, but are traditional HUD methods for rehabilitating public housing. OHA uses MTW funding flexibility to rehabilitate approximately 50-75 units annually in its PBV portfolio. The public housing portfolio maintained over 98% occupancy rate overall and staff aggressively pursued applicants on the waitlists to fill any open vacancies. In FY 2021, OHA continued the substantial rehabilitation of Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. There are 76 units in Oak Grove North including a manager's unit and 75 units in Oak Grove South including a manager's unit. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. The units in Oak Grove North and South had a status of "Demo/Dispo" during the disposition and renovation/rehabilitation process. At the end of FY 2021, interior rehabilitation at Oak Grove North had		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				been completed and residents had moved back in while exterior work was continuing. At Oak Grove South, interior rehabilitation was in progress and residents were still relocated away from the building. Harrison Towers was also approved for disposition and during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022. OHA plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. The RAD program was signed into law in 2011 and further amended in 2014, and is administered under guidance from PIH Notice 2019-23 and all further revisions. OHA		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers.		
GOAL 6: Promote Equal Housing Opportunity						
POLICY 6.1: Fair Housing Actions						
ACTION 6.1.1	*Funding for Fair Housing Organizations.* Provide funding for organizations that provide outreach, counseling, education, and investigation of fair housing and anti-discrimination laws. Specific areas of focus will include race, ethnicity, family status, and disability. Fair housing organizations respond to inquiries from those who	DHCD – CDBG Programs	Ongoing, 2015-23	Since 2015, the City has provided funding supporting the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa:Just Cause, and ECHO Fair Housing to provide fair housing related legal services, fair housing counseling, tenant-landlord mediation, outreach, education, info & referral, intake, assessment, fair housing investigations of discrimination, fair housing testing, and fair housing audits benefitting	The action has proven to be an effective resource in addressing housing discrimination. Each year the City funds fair housing organizations at approximately $261,475 among 4 fair housing agencies. Starting	The action is a critical tool for addressing housing discrimination and promoting equal opportunity to housing. This action is in line with the City of Oakland's Race and Equity work

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	believe they may have been victims of discrimination, and disseminate information through billboard campaigns, workshops, public service announcements and other media.			low- and moderate-income households. This includes CDBG funds. In FY 2020/21 and 2021/22, a pilot program under the Oakland Fair Chance Ordinance was implemented that prohibits rental housing providers in Oakland from advertising that applicants with criminal history will not be considered, inquiring about criminal history in rental applications, or relying on criminal history in making rental determinations. Affordable housing providers such as public housing or HUD-assisted housing providers may screen only when required to under federal or State law.	in FY 2020/21 and 2021/22 a two-year allocation was added for the Fair Chance Ordinance program. Annually the fair housing program benefits approximately 1,300 low- and moderate-income Oaklanders with fair housing issues. About 30-40 fair housing clients per year are able to preserve existing housing through the fair housing services. Fair Chance ordinance, while a pilot program is producing low numbers assisting 10 clients in year one of the pilot program.	and is further supported by findings in the 2020-20-25 Alameda County Regional Analysis of Impediments to Fair Housing Choice. Segregation between white and minority residents has increased in the last decade; number of Black residents in Oakland are decreasing; overall minority residents are being displaced; homelessness has increased by over 42% since 2017; minority households (especially Black and those of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						Hispanic ethnicity have highest rate of disproportionate housing needs. There are many more statistics to support the appropriateness of this program.
ACTION 6.1.2	*Housing Search Assistance for People with Disabilities.* Seek to provide funding to organizations that assist persons with disabilities to locate accessible and affordable housing.	DHCD – CDBG Programs	Ongoing, 2015-23	The City no longer contracts for housing search assistance and counseling, since 2013. The former Housing Resource Center staff, now a part of the Department of Housing and Community Development's Community Development & Engagement section provided information and referral and kept updated resources for drop-in clients in need of housing search services. Due to limited staff and resource to support this work and due to the COVID-19 state of emergency, focus of services offered has shifted to keeping residents housed through the provision of relocation financial assistance to eligible residents per Oakland Municipal Code Section 15.60;	When fully resourced, this program is successful in assisting Oaklanders in finding safe and affordable housing suitable for each household's needs, within means of each household; assisting in making sure all Oaklanders have safe and affordable housing. Housing search assistance is still a need, particularly for	Oakland has experienced numerous shifts in its residential pattern in the years since the Great Recession of 2008. With a current population of 440,981, Oakland's population has grown by approximately 13% compared to the 2010 Oakland population count. Oakland's

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				anti-displacement services; and Emergency Rental Assistance services.	persons with disabilities.	central housing needs center on lack of affordable housing, high incidence of housing cost burden, particularly among extremely-low- and very-low-income renter populations, increasing degrees of homelessness and lack of housing and critical services for homeless and special needs at-risk populations, and increasing displacement and gentrification pressures that have occurred

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						over the past decade.
ACTION 6.1.3	*Affirmative Fair Marketing.* Require all recipients of funds for housing development to market their projects in accordance with written fair marketing guidelines, including measures to reach households otherwise unlikely to apply for housing due to its location or character.	DHCD – Policy and Programs	Ongoing, 2015-23	Most recent Affirmative Fair Marketing Procedures & Guidelines are posted on the City's website for owners and managing agents of housing assisted by the City, ensuring there is no discrimination against potential tenants or purchasers on basis of race, color, religion, sex, physical or mental disability, familial status (presence of child under age of 18 and pregnant women), national origin, ancestry, age, marital status, sexual orientation, gender identity or expression, having Acquired Immune Deficiency Syndrome (AIDS) or AIDS related conditions (ARC), source of income, any arbitrary basis, or any other status protected by federal, State or local law.	The policy is a highly effective means of ensuring access to affordable housing for underrepresented groups. This policy is effective in that in underscores the City's compliance with federal regulations.	The policy is fully consistent with the goal of promoting equal housing opportunity. Required for any unit of general local government (UGLG) for federally-assisted housing with five or more units.
ACTION 6.1.4	*Housing Assistance Center.* Continue to support the Housing Assistance Centers' efforts to improve access to housing information and services for Oakland residents and small rental property owners and	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	The Housing Assistance Center (HAC), launched in 2014 as a one stop housing services center serving residents with housing needs, allowing vulnerable residents to go to one place to address housing needs and questions. Since then, HAC transitioned to the Housing Resource	Programs are very successful in serving Oaklanders who are most vulnerable to becoming homeless, helping to Keep Oakland	As part of the Department of Housing & Community Development Strategic Plan, these efforts support

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	managers. The goal is to provide a one-stop housing services center that can assist with referrals, including accessing affordable housing and homeless shelter placements. The Housing Assistance Center is also partnering with other public and private agencies to improve access to additional housing resources and services available to Oakland residents.			Center (HRC), providing less counseling and housing search, providing more information and referral in addition to code compliance related relocation and anti-displacement services. Since 2020, HRC, now part of the Department of Housing and Community Development's Community Development & Engagement section, also administers the Emergency Rental Assistance Program (ERAP) funded by U.S. Treasury and State Rental Assistance Programs for the City's Keep Oakland Housed (KOH) programs.	Housed through rental assistance, anti-displacement, relocation services and other services supporting this effort.	Preservation and Protection Objectives of the "3-P" approach of Protection, Preservation and Production.
POLICY 6.2: Reasonable Accommodations						
ACTION 6.2.1	*Incorporate Reasonable Accommodations into City Programs and Policies.* The City's ADA Programs Division will continue to ensure that requirements for accessibility are met throughout the City's programs.	City Manager, Office of ADA Compliance	Ongoing, 2015-23	The City's reasonable accommodations procedure was adopted in 2014, and the City has continued to implement its policy that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of the City, or be subjected to discrimination directly or through contractual, licensing, or other arrangements, by the City and that the City shall adhere to U.S. Department of	Reasonable accommodations are an effective tool for ensuring access to housing. The City actively enforces policies for reasonable accommodations in City-assisted affordable housing. Greater communication	Reasonable accommodations are a fundamental tool in ensuring housing access. The policy may need to be revised in future cycles to reflect enforcement by HCD rather than

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Justice regulations implementing Title II of the ADA.	between HCD and the ADA Programs Division may be advised.	ADA Programs Division.
ACTION 6.2.2	*Publicize and Implement Reasonable Accommodations Policy and Procedures.* Implement the City's Reasonable Accommodations policy and procedure for individuals with a disability, when flexibility is necessary to eliminate barriers to housing opportunities.	Zoning Administrator	Ongoing, 2015-23	The ADA Programs Division serves as the Citywide ADA Title II Coordinator and oversees the implementation of reasonable policy modifications in all City programs, including housing programs. The Division publishes information about City disability access policies on its website: https://www.oaklandca.gov/topics/americans-with-disabilities-act-ada-services The Division provides technical assistance as needed for the nondiscriminatory administration of the City's housing programs, investigates complaints, and assists in resolution. The Division completed an update to the City's Programmatic ADA Self-Evaluation which included an analysis of housing-related programs and is actively supporting the newly appointed Departmental Access Coordinators in the Housing and	The Reasonable Accommodations ordinance, (adopted in July 2014) was developed with the assistance of the City's ADA Programs staff and thoroughly vetted by representatives from the Disability Rights of California organization, therefore, the ordinance is effective in providing people with disabilities fair access to housing.	The Reasonable Accommodations ordinance, (adopted in July 2014) was developed with the assistance of the City's ADA Programs staff and thoroughly vetted by representatives from the Disability Rights of California organization.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Community Development Department in fulfilling the Department's obligations for compliance with disability civil rights laws, including the attendance of the Departmental Access Coordinators at quarterly meetings/trainings on specific aspects of the ADA and related laws, and ongoing technical assistance. The Division is also assisting with the development of the online Rental Assistance Program applications for purposes of ensuring full WCAG 2.0 AA compliance.		
POLICY 6.3: Promote Regional Efforts to Expand Housing Choice						
ACTION 6.3.1	*Regional Housing Needs Allocation.* Actively participate in future Regional Housing Needs Allocation (RHNA) processes to promote an allocation plan that seeks to reduce concentrations of low-income people and low-income housing, and to provide a broader range of housing choices throughout the region.	DHCD – Policy and Programs	Ongoing, 2015-23	In 2021, City Staff continued to participate in the Plan Bay Area 2050 development process.	Participating in the Plan Bay Area 2050 process has been helpful, but MTC/ABAG did not follow some of the recommendations that Oakland wrote in their letter.	The policy is appropriate to Housing Element goals.
POLICY 6.4: Fair Lending						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 6.4.1	*Community Credit Needs Assessment.* Conduct regular assessments of community credit needs, including credit needs for housing. To conduct the assessment, the City will review reports from the federal government and nonprofit consumer organizations on lending patterns in Oakland and the availability of residential credit.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	Oakland HCD conducts periodic assessments of community credit needs, including credit needs for housing. The assessment involves reviews of lending patterns in Oakland and the availability of residential credit. In 2021, no Community Credit Needs Assessments were scheduled. Assessments have been performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018, the Linked Banking Ordinance requirements were waived when Treasury selected the new Fiscal Services vendor. In 2017 after a series of meetings, City Council amended the Linked Banking Ordinance to expand the survey questions and to require improvement plans for banks surveyed that fell short in various criteria. In past years, HCD budgeted approximately $20,000 for a periodic Nexus study to determine the community's credit needs. In addition, at the initiation of Treasury's periodic RFP for fiscal services, Oakland HCD staff releases a survey to local brick and mortar banks to request lending practices data, and staff collates this	The program effectiveness has declined since Treasure may opt to waive the program's requirements for vendors, since the majority of credit provided to the community is no longer through the surveyed brick and mortar banks, and since few banks chose to respond to the program surveys in the last few survey cycles. There may be more effective ways to gauge community credit availability and the equitability of local lending practices.	Over the years, the appropriateness of the program has declined since today's local brick and mortar banks supply only a fraction of the mortgage credit in comparison to the prior decades. The internet and the proliferation of non-bank mortgage lending options have expanded consumer options to seek credit and are not captured in the banking practices studies.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				data for Treasury's review as part of the Linked Banking Program. In 2021 neither activity was scheduled. See also Action 6.4.2.		
ACTION 6.4.2	*Community Reinvestment Activities Linked to Banking.* Actively support efforts to ensure that banks meet and exceed their responsibilities for community reinvestment. Limit a bank's eligibility to participate in City-assisted lending programs to institutions that provide reasonable levels (fair share) of investment within Oakland, including home mortgages and financing for housing development.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	In the period 2015-2021, assessments were performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018, the list of lenders eligible to participate in City-assisted lending programs was updated, and no lenders were excluded due to Linked Banking Ordinance requirements. The City-assisted lending programs were not funded in subsequent years. In 2021 no Community Reinvestment Activities Linked to Banking were used to limit bank eligibility to participate in City-assisted first-time homebuyer lending programs. See also Action 6.4.1.	The program effectiveness has declined since the majority of credit provided to the community is not provided through local brick and mortar banks.	In past years, HCD budgeted approximately $20,000 for a periodic Nexxus study to determine the community's credit needs. Separately, at the time of Treasury's periodic RFP for fiscal services, HCD would survey local brick and mortar banks for their lending practices and collate this data for review as part of the Linked Banking Program. In

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						2021 neither activity was scheduled. The appropriateness has declined since today's local brick and mortar banks supply only a fraction of the mortgage credit in comparison to the prior decades. The internet and the proliferation of non-bank mortgage lending options have expanded consumer options and are not captured in the banking practices studies.
ACTION 6.4.3	*Community Outreach and Predatory Lending Controls.* Discourage the practice of predatory lending which falls	DHCD – Housing Assistance Center/Strate	Ongoing, 2015-23	The City of Oakland provides resource information on predatory lending on its website:	The Department of Housing and Community Development	This program is effective and will be continued into the next

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	most heavily on low-income seniors and minorities, by financially supporting nonprofit organizations that investigate such practices, referring complaints to the appropriate legal authority, and providing consumer information on how to avoid predatory lending. Outreach efforts by non-profit organizations will include door-to-door outreach and funding legal services on foreclosure counseling and prevention.	gic Initiatives; Financial Services Agency, Treasury Division		https://www.oaklandca.gov/resources/predatory-lending Community outreach around predatory lending practices is not contracted by the City. However, agencies such as HERA, Consumer Credit Counseling and other agencies provide outreach and services around predatory lending. To encourage more resilient and informed buyers in our community, the City's Homeownership Programs provides monthly homebuyer education to prospective buyers. The curriculum informs potential buyers on the homebuying process, puts them in touch with assistance resources including the City's assistance programs as well as other area benefits and assistance, and introduces them to community lenders, real estate professionals, and HUD-certified housing counselors. In 2020 the City enrolled 224 students and issued certificates of completion to 97 class attendees before the live workshops were discontinued due to	Strategic Initiatives Section has been effective in implementing predatory lending prevention strategies	Housing Element planning period 2023-2031. In future Housing Element cycles, this measure should be combined with Action 2.2.3.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				the COVID-19 pandemic. In March 2020, the City switched strategies to referring homebuyers to our local partners certified to provide HUD-certified Homebuyer Education using remote live classes and online education. As described in Action 6.1.4 "Housing Resource Center", the City of Oakland's Housing Resource Center provides assistance to residents who may be victims of foreclosure and predatory lending. In many cases, the Center refers such cases to Housing & Economic Rights Advocates (HERA).		
POLICY 6.5: Accountability						
ACTION 6.5.1	*Housing Element Annual Progress Report.* Submit, on an annual basis by April 1, a report to the California Department of Housing and Community Development on progress made by the City of Oakland on policies adopted in the 2015-2023 Housing Element (as required by state law). The City will also conduct	Planning Bureau; DHCD – Policy and Programs	On an annual basis by April 1	The Housing Element Annual Progress Report (APR) is due to the Department of Housing and Community Development (HCD) and the Governor's Office of Planning and Research (OPR) by April 1st each year. The City has continued to submit APRs during the period, and APRs from previous years can be found on the City's website, here: https://www.oaklandca.gov/document	This policy is an effective tool to promote accountability by the City to the policies it has slated in the Housing Element.	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	annual public hearings before the Planning Commission and City Council to review and consider the Annual Progress Report within 30 days of its submittal to the State of California, and will post copies of the report on the City's website.			s/housing-element-annual-progress-reports		
GOAL 7: Promote Sustainable Development and Sustainable Communities						
POLICY 7.1: Sustainable Residential Development Programs						
ACTION 7.1.1	*Promote Green Building Design for Private Development.* Continue to foster the design and building of durable, low-maintenance dwellings and make optimum use of existing infrastructure through an expanded physical and internet-based Green Building Resource Center. Design features, such as "green roofs", tree planting, open space devoted to food production and electric vehicle charging stations,	Bureau of Building	Ongoing, 2015-23	Since 2015, the City continued to staff the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). The website continues to provide information to developers: (www.oaklandgreenbuilding.com). The City encourages participation in the Energy Upgrade California in Alameda County program by providing handouts at the Green Building Resource Center and on the website.	The City's planning and building staff enforce the Oakland Green Building Ordinance. The City's adopted Energy and Climate Action Plan encourages the construction of new and largely renovated buildings with energy efficient techniques and materials.	The City is committed to promoting Green Building for private development, this action is appropriate for the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	among others, are all supported by the ECAP for private housing development.					
ACTION 7.1.2	*Green Building Standards.* Continue to require all new residential construction, and single-family additions and alterations to demonstrate compliance with an approved green building standard. Consider revising the Green Building Ordinance for Private Development to include multi-family additions and alterations. Increase enforcement of green building and building energy codes.	Bureau of Building	Ongoing, 2015-23	Since 2015, green building standards are required for projects which meet the thresholds in the Green Building ordinance, in both the small project design review process, and for the regular design review applications (known as "planning entitlements"). All new buildings must now have some level of readiness for plug-in electric vehicle (PEV) charging, exceeding CalGreen standards.	The policy is effective.	The action is appropriate to meet Housing Element goals.
ACTION 7.1.3	*Require Green Building Design requirements for City-funded Development.* All City-funded housing developments require certification under BuildItGreen.org's GreenPoint Rated or LEED certifications systems.	Bureau of Building	Ongoing, 2015-23	The City adopted its Green Building ordinance in October 2010, and has continued to regularly apply it to multifamily affordable housing development. In the City's NOFA, new development and rehabilitation projects must meet a minimum score in each Green Point Checklist category. Projects scoring higher in the Green	The policy is effective.	The action is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Point Checklist evaluation, or which achieve LEED Gold level or higher are given preference in the NOFA scoring process.		
POLICY 7.2: Minimize Energy and Water Consumption						
ACTION 7.2.1	*Energy-Efficiency and Weatherization Programs.* Pursue opportunities, in partnership with regional, state, and utility partners when appropriate, to augment existing or create new residential energy programs, and market these programs to minimize consumption of energy throughout the community, through conservation and efficiency. Such programs may include Property-Based Energy Financing, Right-sizing of Energy Equipment Guidelines, green building standards within existing housing rehabilitation programs, Weatherization and Energy Retrofit Loan Program, Renter-Occupied Residential Energy Program,	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	The City helped launch and is a participant in the Bay Area Regional Energy Network (BayREN), also funded by PG&E utility ratepayers, to enhance delivery of their programs within Oakland. This includes the Home Upgrade and Advanced Home Upgrade programs (part of Energy Upgrade California), and Bay Area Multifamily Building Enhancements Program (BAMBE). These programs serve more than 1,000 units per year in reducing energy and water consumption of homes in Oakland. The City works directly with the California Youth Energy Services (CYES) program, subsidized by PG&E, which provides vocational building energy training to Oakland youth and serves at least 200 Oakland homes annually, including renters and focusing primarily on lower-income residents, with energy efficiency and conservation measures each Summer. More than 20 Property	These approaches have combined to create a highly effective approach to energy efficiency and conservation in existing buildings.	These programs are an appropriate method of implementing the relevant goals on reducing energy cost burdens for residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Energy Upgrade California, and adoption of Energy Improvement at Time of Sale Ordinance.			Assessed Clean Energy (PACE) financing programs are currently operating in the City, providing financing on the property tax bill for residences and businesses to conduct energy and water efficiency projects, install renewable energy systems, and install electric vehicle charging equipment. The City is also working with EBCE and BayREN to install clean electric technologies in homes and businesses to replace natural gas systems, utilizing a combination of State and regional funding sources to lower the costs of installing heat pump water heaters, heat pump space heating and cooling systems, and induction cooktops. The City has initiated a lending program for induction cooktops to expand awareness of and access to such new technologies. Finally, the City is using its Measure KK infrastructure bond funding, along with federal CARES Act funding, to install a wide array of efficient energy systems in municipal buildings.		
ACTION 7.2.2	*Alternative Energy Production.*	Bureau of Planning; Bureau of	Ongoing, 2015-23	The City of Oakland has continued to issue permits for a high number of residential solar PV systems, passing	The policies and programs have generated	This continues to be an appropriate

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Continue to review plans for residential construction, taking into account building orientation, street layout, lot design, planting, and street tree configuration, with the intent of maximizing solar access and cooling opportunities. Assist the public to generate renewable energy by posting information on the City website that offers content created by the City and links to web pages hosted by other organizations. Examples of materials include: a solar energy generation calculator, and a guide about proper maintenance and disposal of solar and other renewable energy generation systems. Provide information about solar and renewable energy incentives and resources in conjunction with all residential rehabilitation projects. Continue to be a municipal policy leader by	Building; Environmental Services (PWA)		more than 8,200 installations and more than 49 MW of installed solar capacity as of September 2021. The most significant source of renewable energy production serving Oakland comes as a result of the City's participation in East Bay Community Energy (EBCE), a community choice aggregator serving most of Alameda County. EBCE became the default electricity provider for all residences in Oakland in 2018, providing a minimum of 85% carbon free electricity. This electricity is generated from hydroelectric dams, solar PV, concentrated solar power, wind turbines, and geothermal energy sources. In addition, EBCE is serving 100 percent carbon free electricity to all accounts who elect to receive it in Oakland, including all municipal accounts of the City of Oakland. Oakland will receive a portion of power from the Scott Haggerty Wind Center project, a 57 MW renewable energy facility opened in Livermore in 2021. The generation of renewable energy from the EBCE program far exceeds local solar PV production, and will serve as the primary means of	significant progress in building and operating renewable energy systems in support of homes. The approach is effective.	method of expanding renewable energy systems, although pairing with some elements of energy storage and resilience are likely warranted in future Housing Elements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	providing streamlined and advanced permitting processes, and by actively sharing Oakland's solar permitting Best Practices with others.			ensuring high levels of alternative energy production for the foreseeable future.		
ACTION 7.2.3	*Facilitate a Community Solar Program.* Encourage and collaborate with local partners to launch a community solar program, to increase local use of renewable energy, including solar-thermal energy to produce heat and hot water.	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	Multiple community solar options now exist for Oakland ratepayers, including options with East Bay Community Energy and independently through developments in the private energy marketplace. Additionally, the City is worked with the Oakland EcoBlock project team, a pilot project of various academic and industry partners, to facilitate a shared solar approach to neighborhood-scale retrofits of solar PV in existing neighborhoods. This effort was recently funded $5 million by the California Energy Commission.	This approach has been effective in providing residents options for accessing renewable energy, regardless of home ownership or site conditions.	With the availability of renewable energy products through CCAs (East Bay Community Energy) and IOUs (Pacific Gas and Electric), the sole focus on community solar is no longer an appropriate means of providing the intended access.
ACTION 7.2.4	*Technical Assistance.* Continue to educate applicants and residents about the advantages of energy conservation and provide technical assistance	Bureau of Building	Ongoing, 2015-23	The City continues to collaborate with East Bay Energy Watch (EBEW) and the Bay Area Regional Energy Network (BayREN), working directly with program implementers and PG&E to enhance local program delivery, and	The program is an effective way to partner with East Bay Municipal Utility District, the water provider to	The organization of this action remains relevant and appropriate for facilitating partnerships to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	to help new construction or remodeling projects achieve superior levels of energy efficiency.			participating on the EBEW Strategic Advisory Committee. In July 2020, the City Council adopted the Equitable Climate Action Plan (ECAP), a ten-year strategic and policy plan to reduce energy consumption and expedite the transition away from fossil fuel use. This Plan contains policies to expand and deepen energy efficiency, renewable energy, decarbonization, and electric vehicle programs and reduce energy cost burden for all members of the community. In December 2020, the City Council passed a requirement for newly constructed buildings to be all-electric design, eliminating natural gas connections in such buildings. These efforts, in addition to ongoing energy programs, serve to reduce energy use among Oaklanders and facilitate the transition to cleaner energy sources.	the City, and has made demonstrable reduction to potable water use in the City.	lead to water use reductions in residential settings.
ACTION 7.2.5	*Promote Water Conservation and Efficiency.* Expand promotion of water conservation and efficiency practices such as water-efficient landscaping,	Bureau of Planning; Bureau of Building; Environment	Ongoing, 2015-23	Efforts to educate residents and commercial tenants about the advantages of energy efficiency and water conservation through EBMUD and Stopwaste continued through the period, as well as education via EBEW	The program is an effective way to partner with East Bay Municipal Utility District, the water provider to	The organization of this action remains relevant and appropriate for facilitating partnerships to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	irrigation, lawn replacement, rainwater collection, greywater systems, and the installation of water efficient fixtures and plumbing. In affordable housing developments, this will reduce utility bills, freeing up more resources to pay rent or a mortgage.	al Services (PWA)		and the BayREN programs. Oakland City Council passed the Civic Bay Friendly Landscape Ordinance to require water efficiency in all public landscaping projects.	the City, and has made demonstrable reduction to potable water use in the City.	lead to water use reductions in residential settings.
POLICY 7.3: Encourage Development that reduces Carbon Emissions						
ACTION 7.3.1	*Mixed Use Development Incentives.* Provide development incentives for construction projects that mix land uses, build compactly, and ensure safe and inviting pedestrian corridors. Allowing uses in close proximity to one another encourages walking and bicycling, instead of automotive trips.	Bureau of Planning	Ongoing, 2015-23	With the update of the commercial and residential zoning districts in the City, and with the success of new private development applications in adopted Specific Plan areas (Broadway Valdez, Lake Merritt BART, West Oakland), the City continues to encourage development of mixed-use buildings in commercial areas. Specific Plans, with their certified EIRs, are considered an incentive for the construction of new housing. The current Specific planning process for the Downtown Oakland Specific Plan, continued work on the Final EIR, Final Plan, Zoning, and meetings on a Zoning Incentive Program as part of the implementation. The Draft Plan and	The Specific Plans have been very effective in providing an incentive with certified EIRs and development programs for developers to build housing in an expedited manner.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				DEIR documents can be found here: https://www.oaklandca.gov/documents/draft-dosp-eir		
ACTION 7.3.2	*Transit-Oriented Development.* Evaluate the existing S-15 Transit Oriented Development zone, and consider if its development standards for areas near transit stations or major transit nodes are allowing for higher density housing with commercial development in close proximity to BART in ways that improve neighborhood livability. Develop and require transit-oriented performance criteria for associated miles traveled and transportation mode share.	Bureau of Planning	2014-2017	Construction is now complete of Phase 5 of "MacArthur Station" at the BART parking lot, including a 260-foot tall building with 402 market-rate and affordable residential units. Panoramic Interests is seeking building permits related to the approved 500 Kirkham project located two blocks southeast of the West Oakland BART Station (and in the S-15 zone). In 2016, "Mural" by BRIDGE housing was completed at MacArthur BART, with 90 affordable units. The City previously adopted revisions to the transportation analysis using Vehicle Miles Traveled (VMT), instead of Level of Service, as directed by AB 743 (see Action 1.1.3). BART and its developer are seeking entitlement of transit-oriented development (including both market-rate and affordable housing) surrounding the Lake Merritt BART Station.	This action is effective. During the planning period, 402 market-rate and affordable units were constructed through Phase 5 of the MacArthur Station project, and 1,032 residential units were approved for the 500 Kirkham site, located two blocks southeast of the West Oakland BART Station.	This action is appropriate for the Housing Element.
ACTION 7.3.3	*Implement SB 375 provisions, direct new housing to be built in Priority Development Areas.*	Bureau of Planning	Ongoing, 2015-23	Priority Development Area (PDA) site Inventories were updated in 2019. The Association of Bay Area Governments (ABAG) and Metropolitan	"Plan Bay Area" was adopted in July, 2013.	The City will continue to encourage new housing

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Implement the provisions of State Bill (SB) 375 and regional agency rule-making, following their adoption. The City will continue to encourage mixed-use, infill, and transit development in designated Priority Development Areas. (See also Policy 1.1).			Transportation Commission (MTC) allowed for modifications of existing PDAs to occur at the administrative level. Planning staff recommended changes to existing PDAs and submitted the proposal to ABAG and MTC on September 16th, 2019. The updated PDAs were adopted by the MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. See “2019 Proposed PDA map” for a map of existing PDAs following this year’s update and “2019 Proposed PDA Map Showing Changes to Existing PDAs” for a map outlining the changes. Both maps can be found online: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 These updated PDAs can also be found on MTC's website: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1	The action is effective. Updating the PDA site inventory allows the City to apply for affordable housing development grants for projects located in PDAs.	development in Priority Development Area (PDA's) as identified in "Plan Bay Area." This action will be continued into the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 7.3.4	*Integrate Land Use and Transportation Planning in Major Residential Projects.* Require the integration of land use and transportation planning and consideration of Greenhouse Gas (GHG) reduction opportunities in each planning, major development project, and planning effort undertaken by the City.	Bureau of Planning	Ongoing, 2015-23	The City effectively implements this action through the application of the Equitable Climate Action Plan (ECAP) checklist and requirement for compliance with transportation demand management (TDM) measures. This applies to all major project case files.	The action is effective.	The action is appropriate.
ACTION 7.3.5	*Encourage New Housing at a Range of Prices.* Actively promote the construction of housing at a range of price levels near transit hubs and corridors in balance with local employment opportunities to meet the needs of Oakland's workforce. Consider adoption of a transit-oriented development affordability policy, including preservation of existing affordability.	Bureau of Planning	Ongoing, 2015-23	The City, in concert with various agencies and organizations, has continued to promote the construction and preservation of housing at a range of price levels near transit hubs and corridors: • Predevelopment activities continued at Lakehouse Commons, a 91-unit affordable development within the Lake Merritt Station Area. • Rehabilitation continued and was nearly completed at Frank G Mar Apartments, an existing 119-unit affordable housing development located	The City has successfully advanced policies on a somewhat ad hoc basis to encourage high-density housing at a range of income levels near transit stations. A more comprehensive uniform policy may be warranted for future Housing Element cycles.	Dense development near transit is a primary tool for reducing carbon emissions.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				within the Lake Merritt Station Area Plan. • Construction began at Fruitvale Transit Village Phase II-B, a 181-unit affordable development adjacent to the Fruitvale BART station. Construction is expected to be complete in 2023.		
POLICY 7.4: Minimize Environmental Impacts from New Housing						
ACTION 7.4.1	*Compact Building Design.* Work with developers to encourage, where feasible, buildings to grow vertically rather than horizontally and to incorporate structured parking rather than surface parking, to preserve and encourage ground-level open space.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	This design standard continues to be recommended in the City's design guidelines for multi-family buildings on commercial corridors. See website: https://www.oaklandca.gov/documents/design-guidelines-for-commercial-and-corridor-areas	This program has been effective in encouraging maximizing use of sites.	The policy is appropriate to Housing Element goals.
ACTION 7.4.2	*Waste Reduction.* Continue to review and enforce adequate recycling and organic matter allocation areas. Encourage, where feasible, multifamily developments to comply	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to meet with applicants to advise on the space allocated in buildings and on grounds. Section 9 of the City's Basic Application for Development Review requires applicants to provide sufficient space for the storage and collection of recyclable and organic materials to comply with SB 1383 and Ordinance	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	with the City's Zero Waste Plan.			No. 11807 – Recycling Space Allocation Requirements. Planning staff continues to review the recycling ordinance requirements at building permit plan check.		
ACTION 7.4.3	*Foster Healthy Indoor Air Quality.* Encourage, where feasible, the use of zero-VOC materials to improve indoor air quality (e.g., paints, adhesives). Require measures to reduce the impact of air pollution on new housing (e.g., air filters).	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to apply its Standard Conditions of Approval for planning entitlements, as well as enforced regulations in the Green Building Ordinance, each of which improve indoor air quality, with techniques such as requiring the installation of air filters with prescribed MERV ratings.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.4	*Recycled, Reclaimed or Renewable content of Building Materials.* Encourage, where feasible, the use of environmentally preferable building materials. Encourage, where feasible, the re-use of building materials to reduce construction waste.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to enforce the Oakland Green Building Ordinance, with provisions for the use of building materials with recycled content in the construction of new multifamily housing, through the application of the Green Point Rated and the LEED for Homes checklists.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.5	*Re-Use and Rehabilitation of Historic Materials.* Encourage the reuse and rehabilitation of the City's	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City encourages the reuse and rehabilitation of the City's historic building stock, using Policy D6.2 of the Land Use and Transportation Element	Planning staff consistently encourages applicants to	Existing buildings support "naturally

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	historic building stock, using Policy D6.2 of the Land Use and Transportation Element of the Oakland General Plan as a guide, to increase neighborhood character and to preserve the energy embodied in the building's original construction.			and the entire Historic Preservation Element of the Oakland General Plan as guides, to maintain and enhance neighborhood character and to preserve the energy and design integrity embodied in the buildings' original construction.	retain and rehabilitate existing buildings, citing a smoother review process, savings of time and money, California Historical Building Code and other code accommodations for existing buildings, the City's pioneering 1978 publication Rehab Right, and deterrents including the demolition regulations in the Planning Code. Residential and work-live adaptive reuse of commercial and industrial buildings continues, often facilitated by use of the Historical Building Code.	occurring affordable housing." Growing environmental concerns support the slogan "The greenest building is the one that is already built."

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 7.4.6	*Encourage Food Production in Open Space Areas.* Encourage the inclusion of food-producing gardens, including rooftop gardens, in private development, where appropriate, with consideration of Bay Friendly landscaping principles.	Bureau of Planning	Ongoing, 2015-23	In 2014, the City of Oakland adopted new urban agriculture regulations as a way for Oakland residents to provide more healthy food to their families and communities. In addition, allowing more urban farming has beautified vacant lots and fostered a sense of community in local neighborhoods, especially in respect to Community Gardens. The City Council adoption of amendments to the City's Agricultural Regulations advanced Oakland's sustainable food system goals.	The policy is effective.	The action is appropriate to meet Housing Element goals.
POLICY 7.5: Climate Adaptation and Neighborhood Resiliency						
ACTION 7.5.1	*Climate Change and the Planning Process.* Consider qualitative and quantitative information regarding the potential effects of climate change during the project plan review process. Consider Oakland Planning Code amendments to limit certain vulnerable land uses (i.e. emergency, affordable, senior, or assisted living housing) in areas identified as vulnerable to climate	Bureau of Planning	Ongoing, 2015-23	In 2021, the City adopted a new 2021-2026 Local Hazard Mitigation Plan, which identifies priority actions to address the effects of natural hazards, including climate change. Also, in 2016, the City released the "Resilient Oakland Playbook" which includes a goal to "reduce current and future climate and seismic risks." Further, the Bureau of Planning was co-Chair, with the Oakland Sustainability office, on a multi-agency Sea Level Rise working group; the final report was issued in Fall 2017. See: http://www2.oaklandnet.com/oakca1/	This approach is an effective way to document the role that climate action and resiliency planning are having on providing safe and affordable housing at all income levels.	The organization of this section remains relevant and appropriate for ensuring that local climate and resilience planning are supporting broad housing targets.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	change. Consider design review requirements for buildings to improve climate resiliency.			groups/pwa/documents/report/oak068799.pdf Beyond these efforts, the City revised its scoring criteria for its Capital Improvements Program (CIP) to score sustainability and resiliency in all capital projects in 2019. The City requires all staff reports to evaluate sustainability opportunities as part of project review and presentation to City Council. Additional climate adaptation and resilience programs and policies were adopted as part of the City Council's adoption of the Equitable Climate Action Plan (ECAP) in July 2020, including the establishment of Resilience Hubs and Spaces, improved analysis of climate adaptation, and improved communication and coordination tools for neighborhood resilience.		
ACTION 7.5.2	*Climate Adaptation Strategies.* Communicate information about potential local climate impacts to neighborhoods and developers, and encourage participation in	Bureau of Planning; Bureau of Building; Environmental Services (PWA)	Ongoing, 2015-23	In July 2020, Oakland City Council unanimously voted to adopt the 2030 Equitable Climate Action Plan (ECAP). The 2030 ECAP establishes actions that the City and its partners will take to equitably reduce Oakland's climate emissions and adapt to a changing	The approach has been moderately effective in demonstrating the need for climate adaptation strategies to be	The approach is appropriate, although the goals, objectives, policies, and programs would benefit from a

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	the development of climate adaptation strategies to improve project and neighborhood resiliency; consider including notification of climate-related vulnerabilities at time-of-sale for properties in especially vulnerable areas.			climate. The ECAP was developed pursuant to City Council's adopted 2030 greenhouse gas emission reduction target of 56% relative to 2005 levels, as well as Oaklands 2018 Climate Emergency and Just Transition Resolution. Oakland's City Council also adopted a 2045 Carbon Neutrality Goal, calling for a dramatic reduction in Oakland's greenhouse gas emissions and "deep decarbonization" of the building and transportation sectors by 2045. The new 2030 ECAP is rooted in equity and a deep community engagement process: it identifies ambitious actions we can take to combat climate change while also ensuring that frontline communities – those that have been harmed by environmental injustice and who are likely to be hurt first and worst by the impacts of climate change – will benefit first and foremost from climate action. The City is focusing its attention especially on actions that will result in cleaner air, improved economic security, good green jobs, and more resilient communities, while also	made in support of housing policy.	more expansive description and focus on those elements of climate change with the potential to impact housing supply and quality, as well as resident health and safety.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				minimizing our contribution to climate change. To find updates on ECAP implementation, please visit the Sustainability Page, where all ECAP-related topics and resources are listed and updated: https://www.oaklandca.gov/topics/sustainable-oakland-1 Climate adaptation strategies are also included in the City's Resilient Oakland Playbook, and Sea level Rise Road Map. The City was the focus of a 2018 effort by the All Bay Collective to identify climate adaptation strategies for the neighborhoods adjacent to San Leandro Bay in East Oakland. The City is also working with community groups in the East Oakland Neighborhoods Initiative (EONI) to implement a Transformative Climate Communities grant from the Strategic Growth Council to further identify climate adaptation strategies for East Oakland.		

Appendix A: Evaluation of the 2015-2023 Oakland Housing Element

This appendix looks back on the City's 2015-2023 Housing Element to analyze how the City fared in meeting its housing needs over the eight-year period. It additionally evaluates what has worked, what has not, and whether adjustments and new programs may be needed. It also includes an evaluation of the Housing Element's cumulative impacts on special needs. The full plan of action for the current eight-year Housing Element cycle is outlined in Chapter 4, the Housing Action Plan.

The City's previous Housing Element was adopted December 9, 2014, and covered the period from January 31, 2015, to January 31, 2023. ~~State law (~~California Government Code Section 65588~~[~~(a~~])~~) requires jurisdictions to review their housing elements to evaluate:

- The appropriateness of the housing goals, objectives, and policies in contributing to the attainment of the state housing goal;
- The effectiveness of the housing element in attainment of the community's housing goals and objectives;
- The progress in implementation of the housing element; and,
- The effectiveness of the housing element programs on the special needs population.

The City's Regional Housing Needs Allocation (RHNA) for the previous Housing Element planning period was 14,765 new housing units between 2014 and 2022. Of these housing units, 2,059 should be affordable to very low-income households, 2,075 should be affordable to low-income households, and 2,815 should be affordable to moderate income households. More information about the City's progress in meeting its RHNA over the past eight years is provided below, while additional information on the RHNA process generally and Oakland's allocation for the upcoming eight-year period is provided in Appendix C: the Housing Sites Inventory.

While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Oakland recognizes that more can and should be done to close the gap on affordable housing construction. Oakland further recognizes that many cities in the Bay Area region have failed to meet market-rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland. Nonetheless, the distribution of unit production in Oakland indicates that current funding sources and land use incentives for affordable housing production remain insufficient to meet Oakland's affordable housing production goals. In its strategic plan, the Oakland Department of Housing and Community Development estimated that annual investment

in affordable housing is roughly $100 million/year less than required to keep pace with Oakland's affordable housing targets.

The 2015-2023 Housing Element outlined seven housing goals with 46 policies and 131 policy actions to be taken to achieve those goals. Some actions do not have discrete timelines and are better suited as higher-level policies. ~~Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions.~~ While the majority of these actions have been evaluated as effective, there is still a clear gap in meeting the housing needs of some special needs groups – especially those experiencing homelessness and extremely-low-income households. Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions, as well as to adequately meet the needs of special needs groups during the 2023-2031 period.

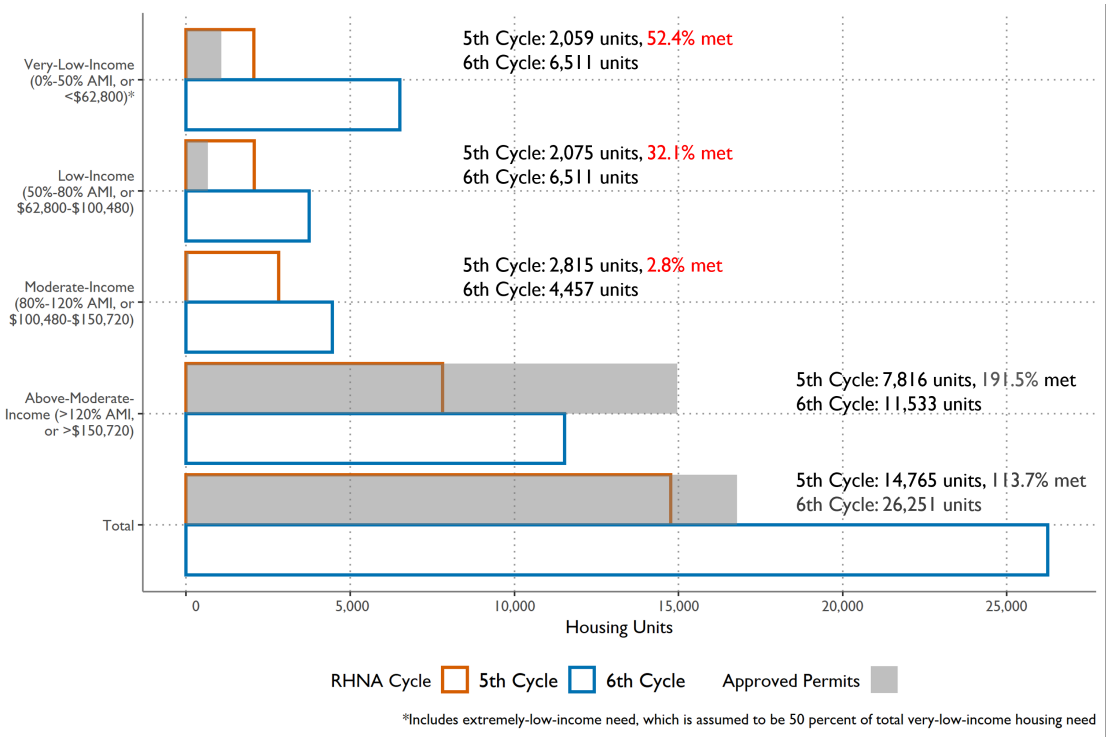
~~This appendix provides an evaluation of the City's previous Housing Element pursuant to State requirements, including the element's cumulative impact on special needs groups.~~

~~The City's previous Housing Element was adopted December 9, 2014, and covered the period from January 31, 2015, to January 31, 2023.~~ ~~California Government Code Section 65588(a) requires cities and counties to review their housing elements to evaluate:~~

- ~~The appropriateness of housing goals, objectives, and policies;~~
- ~~The effectiveness of the housing element in the attainment of the community's housing goals and objectives; and~~
- ~~The progress in implementation of the housing element.~~

A.1 Regional Housing Need Allocation Progress



During the 2015-2023 Housing Element period, Oakland's Regional Housing Need Allocation (RHNA) was 14,~~629~~765 housing units across all income levels. The City identified sites capable of accommodating a total of 18,009 units (123.1 percent of the RHNA). Capacity was derived from four groups: units constructed between January 1, 2014 and March 27, 2014, units receiving planning approvals, units planned, and additional capacity on opportunity sites. ~~Approximately~~During the planning period, approximately 21.1 percent of ~~parcels identified to meet the~~ 5th cycle ~~RHNA~~sites inventory parcels developed with about 3,511 residential units ~~during the planning period~~. Most of Oakland's progress toward meeting its 5th cycle RHNA occurred on sites not identified as opportunity sites in the previous Housing Element.

While the City was able to meet its above-moderate-income RHNA, it fell short of meeting its lower- and moderate-income goals. Above-moderate-income permitting during the period reached nearly double the RHNA, and approximately nine above-moderate-income units were permitted for every ~~one~~ affordable unit. These numbers largely reflect the strong market conditions and high housing prices present since recovery from the Great Recession, ~~along with~~increased interest by developers to invest in Oakland, and Oakland's fairly permissive regulatory environment, ~~that have~~which together enabled market-rate development. ~~It~~The imbalance in market and affordable housing construction also ~~of course~~ reflects the significant shortfall in funding sources and other incentives available for below market-rate housing~~, and~~. This disparity presents a serious equity issue in ~~terms~~the number of ~~the~~homes available ~~housing stock~~at different affordability levels. The COVID-19 pandemic is also likely to have a lasting impact on available City resources and housing needs in Oakland – including changes in building patterns and preferences that may increase development costs.

Unfortunately, recent studies have shown that the RHNA process asks cities to plan for more than 10 times the amount of subsidized housing than can be funded with existing funding sources, which

must cover escalating land, construction, and labor costs.[1] Further, in line with State objectives, the City prioritizes deeper affordability when funding is available, hence the lack of moderate-income units during the previous planning period. Nonetheless, Oakland recognizes that more can and should be done to close the gap on affordable housing construction. ~~Oakland further recognizes that many cities in the Bay Area region have failed to meet market rate development goals and continue to prohibit housing at densities that can support affordable housing, both of which have contributed to exacerbated regional inequality, a protraction of the housing crisis, and very likely has catalyzed gentrification and displacement in Oakland. The Housing Element process is thus critical in ensuring all California cities are doing their part.~~

Chart A-1: Progress Towards Meeting the RHNA, 2015-~~2020~~2021

Source: State HCD, 5th Cycle Annual Progress Report Permit Summary, 2021; ABAG, Final RHNA Plan, December 2021

In the seven years between 2015 and 2021, the City permitted a total of 1,079 very-low-income units (including extremely-low-income units), 666 low-income units, 78 moderate-income units, and 14,966 above-moderate-income units.[2] These numbers reflect affordability provided specifically

[1] Paavo et al., A Flawed Law: Reforming California's Housing Element (2019), UCLA Lewis Center for Regional Policy Studies, available at https://www.lewis.ucla.edu/research/flawed-law-reforming-california-housing-element/ (last accessed March 30, 2022).

[2] State HCD counts new housing units issued a building permit for purposes of assessing progress towards meeting RHNA. Prior to 2017, annual progress reports did not include "certificate of occupancy" as a reporting category. Thus, accurate counts of housing built during the 5th Cycle RHNA are not available.

through deed restrictions that guarantee the units will remain affordable to the specified income category for years to come, but does not take into account newly constructed units that may naturally be affordable to lower income households, nor does it reflect existing units that may become affordable to lower income families due to market conditions and unit age. See **Chart A-1** for a comparison of approval rates to the 5th cycle RHNA, as well as a comparison to the increased 6th cycle allocation.

The Bay Area has been in the midst of an acute housing shortage or "crisis" since the end of the Great Recession (late 2009), which has continued unabated as of early 2022. The roots of the crisis lie in the significant mismatch between housing demand and housing production. This is reflected in dramatically increasing housing costs for renters and homebuyers, and increasing overcrowding and homelessness. As is discussed in Appendices B and F, the affordability gap for moderate- and lower-income residents—the gap between existing housing costs and affordable housing costs—is continuing to grow. ItThis gap is in partpartly exacerbated by the high costs of development and the limited amount of State and local funding for affordable housing— as well as, including income disparity, the impacts of the tech sector and regional market forces in the Bay Area, and the COVID-19 pandemic, among other regional, State, and national factors. Other local factors, including City permitting processes and neighborhood sentiment have also contributed to constrained housing production rates. However, as noted in Appendix F, the City has permitted lower-income housing at rates comparable to other cities in Alameda County. To further address the housing crisis, the City passed Measure KK in 2016 to help fund affordable housing development – the revenues generated from this bond have already been spent and fully allocated. Further, the Affordable Housing Impact Fee was passed in 2016, and the Race and Equity Department was formed to address racial disparities in Oakland.

A.2 Evaluation of Goals, Policies, and Actions

ASSESSMENT OF GOALS AND POLICIES

The 2015-2023 Housing Element outlined seven housing goals with 46 policies and 131 policy actions to be taken to achieve those goals. The accomplishments of the goals and policies of the previous Housing Element is summarized in **Table A-1** below. This is a high-level analysis meant to inform broad changes in the City's goals and policies, and the 2023-2031 Housing Element carries forward and consolidates goals and policies where appropriate.

ASSESSMENT OF ACTIONS

The policy actions contained within the previous Housing Element—131 in total—includesinclude several duplicative or overlapping actions. Some actions do not have discrete timelines and are better suited as higher-level policies. Chapter 4: Housing Action Plan maintains effective actions that are appropriate to the Housing Element and aims to consolidate related actions. A detailed assessment of each housing action is provided in **Table A-2** below. The evaluation is based on input from a variety of City departments and agencies – including Oakland Housing and Community Development (Oakland HCD), the Planning and Building Department, the Human Services Department, and Oakland Public Works.

While housing actions are individually evaluated in Table A-2, the Housing Element must also assess the cumulative impact of housing actions on special needs groups. Goal 6, and all policies contained within it, addresses fair housing issues and promotes actions to meet the housing needs of statutorily protected groups, many of which are considered "special needs." Further, policies 2.5, 2.6, 2.9, and 5.4 directly address a variety of special housing needs such as seniors, large families, extremely-low-income household, and persons experiencing homelessness. There are over 20 actions directly aimed at special needs groups – including persons experiencing homelessness, persons with a disability, the elderly, female-headed households, extremely-low-income households, and persons with HIV/AIDs.[3]

While the majority of these actions have been evaluated as effective, there is still a clear gap in meeting the housing needs of some special needs groups – especially those experiencing homelessness and extremely-low-income households. As indicated in Appendix B, the housing crisis has continued throughout the 2015 to 2023 period and rates of homelessness have drastically increased. Appendix F provides an assessment of the constraints to housing production and identifies potential reasons why the City fell short of meeting its RHNA. While discrete City actions may be effective, more comprehensive steps must be taken to encourage the production of emergency shelters and transitional and supportive housing, as well as housing affordable to lower-income groups. The Permanent Access to Housing (PATH) Framework to address homelessness represents one such approach that the City should continue to implement.[4] Other steps the City will take to adequately meet the needs of special needs groups during the 2023-2031 period are described in the Housing Action Plan.

[3] Actions related to special needs groups include the following: 2.5.1, 2.5.2, 2.5.3, 2.6.1, 2.9.1, 2.9.2, 2.9.3, 2.9.4, 2.9.5, 2.9.6, 2.9.7, 2.9.8, 3.1.2, 4.3.2, 4.3.3, 5.4.1, 6.1.1, 6.1.2, 6.1.3, 6.1.4, 6.2.1, 6.2.2, and 6.4.3.

[4] The PATH Framework is the City's updated five-year approach to address homelessness in Oakland, based on the following themes: 1. Prevention strategies to keep people from becoming homeless; 2. Emergency strategies to shelter and rehouse households and improve health and safety on the street and; 3. Creation of affordable, extremely low income and permanent supportive housing units prioritized for households experiencing homelessness. More information is available on the City's website: https://www.oaklandca.gov/resources/learn-more-about-our-homelessness-strategy.

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Goal 1 – Provide Adequate Sites Suitable for Housing for All Income Groups	
Policy 1.1 – Priority Development Areas Housing Program. The City will target development and marketing resources in Priority Development Areas (PDAs), and in areas for which Specific Plans have been completed or are underway. (See also Policy 7.3~~.~~.)	While Oakland met its overall housing production goals, it did not meet the 5th Cycle RHNA for lower- and moderate-income households. During this period, the City implemented a number of actions to encourage residential development at all income levels. This includes the adoption of the Priority Development Areas, expedited review processes, development along International Boulevard with multiple affordable projects, micro-living units proposed in the Draft Downtown Oakland Specific Plan, residential development in specific plans, and encouragement of alternative housing like ADUs, manufactured housing, and live/work units. Because a significant portion of development occurred on sites that were not identified as opportunity sites in the 5th Cycle, the City has maintained an adequate supply of land to meet its 5th Cycle RHNA. Appendix C identifies additional sites for Oakland's 6th Cycle RHNA. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing Solutions for Oakland, California," particularly additional production strategies.
Policy 1.2 – Availability of Land. Maintain an adequate supply of land to meet the regional housing share under the ABAG Regional Housing Needs Allocation (RHNA).	
Policy 1.3 – Appropriate Locations and Densities for Housing. The City's Strategic Planning Division initiated five Specific Plans and one Area Plan during the 2007-2014 Housing Element period, which will further the housing location and density objectives contained in the recently completed residential and commercial zoning update. The Lake Merritt Station Area (Specific) Plan, Broadway Valdez Specific Plan, West Oakland Specific Plan, Coliseum Area Specific Plan, and Central Estuary Area Plan included extensive community outreach processes and have resulted in specific zoning proposals. These Specific and Area Plans will facilitate the construction of nearly 17,000 new housing units in the City of Oakland. The completion of the Specific and Area Plans will provide these substantial housing gains in two respects: environmental clearance and community buy-in for future housing projects. Each planning process involved extensive community participation which culminated with significant community buy-in to the policies and development framework outlined in the plans, thus minimizing possible community opposition to future housing development projects.	
Policy 1.4 – Secondary Units. Support the construction of secondary units in single-family zones and recognize these units as an important source of affordable housing.	
Policy 1.5 – Manufactured Housing. Provide for the inclusion of manufactured housing in appropriate locations.	
Policy 1.6 – Adaptive Reuse.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Encourage the re-use of industrial and commercial buildings for joint living quarters and working spaces.	
Policy 1.7 – Regional Housing Needs. The City of Oakland will strive to meet its fair share of housing needed in the Bay Area region.	
Goal 2 – Promote the Development of Adequate Housing for Low- and Moderate-Income Households	
Policy 2.1 – Affordable Housing Development Programs. Provide financing for the development of affordable housing for low- and moderate-income households. The City's financing programs will promote a mix of housing types, including homeownership, multifamily rental housing, and housing for seniors and persons with special needs.	The City has encouraged and promoted affordable housing development through a combination of incentives and funding. City efforts include the release of Notices of Funding Availability (NOFAs), predevelopment loans to non-profits, Oakland Housing Authority resources, first-time homebuyer programs, the Community Buying Program, and other loans. Impact fees, including the Jobs/Housing and Affordable Housing Impact Fee, provide funding to the Affordable Housing Trust Fund. Through the 5th cycle RHNA, there will have been approximately $150 million in total expenditures on these efforts. However, despite these efforts, the amount of financial resources available for affordable housing has been inadequate to meet the need for low- and moderate-income households. Other City incentives include density bonus provisions, impact fee waivers, promotion of City-owned property, geographic equity and quality in NOFA scoring, as well as promoting community
Policy 2.2 – Affordable Homeownership Opportunities. Develop and promote programs and mechanisms to expand opportunities for lower-income households to become homeowners.	
Policy 2.3 – Density Bonus Program. Continue to refine and implement programs to permit projects to exceed the maximum allowable density set by zoning, if they include units set aside for occupancy by very-low-, low-, and moderate-income households and/or seniors.	
Policy 2.4 – Permanently Affordable Homeownership. Develop mechanisms for ensuring that assisted homeownership developments remain permanently affordable to lower-income households to promote a mix of incomes.	
Policy 2.5 – Seniors and Other Special Needs. Assist and promote the development of housing with appropriate supportive services for seniors and other persons with special needs.	
Policy 2.6 – Large Families. Encourage the development of affordable rental and ownership housing units that can accommodate large families.	
Policy 2.7 – Expand Local Funding Sources.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Increase local resources to support affordable housing development and develop new sources of funding.	land trusts, resale controls, and providing rental assistance. The City also provides funding for special needs housing and implements the PATH strategy for homelessness. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing Solutions for Oakland, California," particularly producing affordable housing for those living at 15 percent AMI and exploring additional funding sources, such as a regional housing bond and home preservation fund.
Policy 2.8 – Rental Assistance. Increase the availability of rental assistance for very-low-income households.	
Policy 2.9 – PATH Strategy for the Homeless. Expand the City's Permanent Access to Housing (PATH) Plan to prevent and end homelessness and increase housing opportunities to the homeless through acquisition, rehabilitation and construction of housing, master leasing and short-term financial assistance	
Policy 2.10 – Promote an Equitable Distribution of Affordable Housing throughout the Community. The City will undertake a number of efforts to distribute assisted housing widely throughout the community and avoid the over-concentration of assisted housing in any particular neighborhood, in order to provide a more equitable distribution of households by income and by race and ethnicity.	
Policy 2.11 – Affordable Housing Preference for Oakland Residents and Workers. Implement the policy enacted by the City Council in 2008 granting a preference to Oakland residents and Oakland workers to buy or rent affordable housing units assisted by City of Oakland funds provided through its annual Notice of Funding Availability (NOFA) process.	
Goal 3 – Remove Constraints to the Availability and Affordability of Housing for All Income Groups	
Policy 3.1 – Expedite and Simplify Permit Processes. Continue to implement permit processes that facilitate the provision of housing and annually review and revise permit approval processes.	The City has undertaken a number of efforts to remove housing constraints. Rectified governmental constraints include aligning City regulations pursuant to State law (e.g., reasonable accommodation, transitional/supportive housing permitting, and emergency shelter permitting), prioritizing affordable housing applications, one-stop permitting, development impact fees, and reliance on specific plan EIRs to expedite review. Although the City still implements a discretionary
Policy 3.2 – Flexible Zoning Standards. Allow flexibility in the application of zoning, building, and other regulations.	
Policy 3.3 – Development Fees and Site Improvement Requirements. Reduce the cost of development through reasonable and predictable fees, and improvement of project review standards.	
Policy 3.4 – Intergovernmental Coordination.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Promote intergovernmental coordination in review and approval of residential development proposals when more than one governmental agency has jurisdiction.	design review process, it is currently developing objective design standards. The City continues to engage in community outreach, including with East Bay Housing Organizations (EBHO), the Non-Profit Housing Association of Northern California, the Oakland Property Acquisition Collective, and Bay Area For All Table.
Policy 3.5 – Financing Costs. Reduce financing costs for affordable housing development.	
Policy 3.6 – Environmental Constraints. Explore programs and funding sources to assist with the remediation of soil contamination on sites that maybe redeveloped for housing.	
Policy 3.7 – Community Outreach and Education. Increase public acceptance and understanding of affordable development and related issues through community outreach.	
Goal 4 – Conserve and Improve Older Housing and Neighborhoods	
Policy 4.1 – Housing Rehabilitation Loan Programs. Provide a variety of loan programs to assist with the rehabilitation of owner-occupied and rental housing for very-low- and low-income households.	The City continues to offer rehabilitation loans to lower- and moderate-income households through multiple programs—such as the Home Maintenance and Improvement Program (HMIP)—and responds to housing maintenance issues through Code Enforcement Services. Other conservation and improvement efforts include the Community Buying Program, Mills Act Contracts, residential hotel (SRO) preservation requirements, and the Uniform Residential Tenant Relocation Ordinance. This priority area was also identified in the 2015 report, "A Roadmap Towards Equity: Housing
Policy 4.2 – Blight Abatement. To improve housing and neighborhood conditions, the City should abate blighting conditions through a combination of code enforcement, financial assistance, and public investment.	
Policy 4.3 – Housing Preservation and Rehabilitation. Support the preservation and rehabilitation of existing housing stock with an emphasis on housing occupied by senior citizens, people with disabilities, and low-income populations. Encourage the relocation of structurally sound housing units scheduled for demolition to compatible neighborhoods when appropriate land can be found. Assist senior citizens and people with disabilities with housing rehabilitation so that they may remain in their homes. Continue to implement the Mills Act program.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Policy 4.4 – Anti-Displacement of City of Oakland Residents. The City will consider strengthening existing policies and introducing new policies or policy terms to current City policies to help prevent displacement of current Oakland residents and to preserve existing housing affordable to low-income residents, including both publicly -assisted and non-assisted housing that currently has affordable rents.	Solutions for Oakland, California," particularly to address and prevent displacement, passing a seismic retrofit requirement with anti-displacement terms, amendment of the condo conversion ordinance, improved habitability conditions, and incentivization of property owners to contribute to voluntary housing solutions.
Goal 5 – Preserve Affordable Rental Housing	
Policy 5.1 – Preservation of At-Risk Housing. Seek to preserve the affordability of subsidized rental housing for lower-income households that may be at-risk of converting to market-rate housing.	There was no conversion of identified "at-risk" units during the period, although one project was destroyed by a fire. The City also continued to provide financial assistance for affordable development and preservation, including through Oakland Housing Authority resources. Other major programs include the Rent-Adjustment Program, the Just Cause for Eviction Ordinance, the Tenant Protection Ordinance, residential hotel (SRO) preservation requirements, limits on conversion of residential to non-residential uses, and limits on condo conversions.
Policy 5.2 – Support for Assisted Projects with Capital Needs. Work with owners of assisted projects that have substantial needs for capital improvements to maintain the use of the properties as decent affordable housing.	
Policy 5.3 – Rent Adjustment Program. Continue to administer programs to protect existing tenants from unreasonable rent increases.	
Policy 5.4 – Preservation of Single Room Occupancy Hotels. Seek mechanisms for protecting and improving the existing stock of residential hotels, which provide housing of last resort for extremely-low-income households.	
Policy 5.5 – Limitations on Conversion of Residential Property to Non-Residential Use. Continue to use regulatory controls to limit the loss of housing units due to their conversion to non-residential use.	
Policy 5.6 – Limitations on Conversion of Rental Housing to Condominiums. Continue to use regulatory controls to limit the loss of rental housing units due to their conversion to condominiums.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Policy 5.7 – Preserve and Improve Existing Oakland Housing Authority-Owned Housing. Continue to preserve and improve existing Oakland Housing Authority-owned rental housing.	
Goal 6 – Promote Equal Housing Opportunity	
Policy 6.1 – Fair Housing Actions. Actively support efforts to provide education and counseling regarding housing discrimination, to investigate discrimination complaints, and to pursue enforcement when necessary. Provide a one-stop resource center to address all housing issues faced by Oakland residents.	During the period, the City continued to work with the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa: Just Cause, and ECHO Fair Housing to provide fair housing services. Other effective actions related to equal housing opportunity include the Oakland Fair Chance Ordinance, publishing disability access and Affirmative Fair Marketing Procedures & Guidelines on the City's website, reasonable accommodation procedures, Community Credit Needs Assessments, and the Housing Element Annual Progress Report. The City's Department of Housing and Community Development's Community Development & Engagement section also provides resources.
Policy 6.2 – Reasonable Accommodations. Provide reasonable accommodations to persons with disabilities in access to public facilities, programs, and services.	
Policy 6.3 – Promote Regional Efforts to Expand Housing Choice. Encourage future regional housing allocations by ABAG to avoid over-concentration of low-income housing in communities with high percentages of such housing.	
Policy 6.4 – Fair Lending. Work to promote fair lending practices throughout the City to ensure that low-income and minority residents have fair access to capital resources needed to acquire and maintain housing.	
Policy 6.5 – Accountability. Work to promote accountability by City to the policies it has slated in the Housing Element.	
Goal 7 – Promote Sustainable Development and Sustainable Communities	
Policy 7.1 – Sustainable Residential Development Programs. In conjunction with the City's adopted Energy and Climate Action Plan (ECAP), develop and promote programs to foster the incorporation of sustainable design principles, energy efficiency and smart growth principles into residential developments. Offer education and technical assistance regarding sustainable development to project applicants.	The City continues to operate the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). Other actions related to sustainability include the promotion of solar energy, collaborations with Energy Upgrade California in Alameda County, Bay Area Regional Energy Network (BayREN), and East
Policy 7.2 – Minimize Energy and Water Consumption.	

Table A-1: City Progress Report – Evaluating Goals and Policies Since 2015 (Based on 2015-2023 Oakland Housing Element)

Goals/Policies	*Accomplishments*
Encourage the incorporation of energy conservation design features in existing and future residential development beyond minimum standards required by State building code.	Bay Energy Watch (EBEW), and the promotion of mixed-use development, transit-oriented development, and development in PDAs. In 2016, the City released the "Resilient Oakland Playbook," while in July 2020, the City Council adopted the Equitable Climate Action Plan. Further, in 2021 the City adopted a new 2021-2026 Local Hazard Mitigation Plan.
Policy 7.3 – Encourage Development that reduces Carbon Emissions. Continue to direct development toward existing communities and encourage infill development at densities that are higher than—but compatible with—the surrounding communities. Encourage development in close proximity to transit, and with a mix of land uses in the same zoning district, or on the same site, so as to reduce the number and frequency of trips made by automobile.	
Policy 7.4 – Minimize Environmental Impacts from New Housing. Work with developers to encourage construction of new housing that, where feasible, reduces the footprint of the building and landscaping, preserves green spaces, and supports ecological systems.	
Policy 7.5 – Climate Adaptation and Neighborhood Resiliency. Continue to study the potential local effects of climate change in collaboration with local and regional partners, such as BCDC. Identify potential adaptation strategies to improve community resilience to climate change, and integrate these strategies in new development, where appropriate.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
GOAL 1: Provide Adequate Sites Suitable for Housing for All Income Groups						
POLICY 1.1: Priority Development Areas - Housing Program						
ACTION 1.1.1	*Site Identification*. Conduct an inventory of vacant and underutilized land within the City's PDAs including the MacArthur BART Station Area, West Oakland, Downtown/Jack London Square Area, Fruitvale/Dimond Area, Eastmont Town Center Area, and the Coliseum BART Station Area, identify sites suitable for housing, including estimates of the number of housing units that those sites can accommodate, and make that information available to developers through a variety of media.	Bureau of Planning	Keep updated inventory on the City's website, 2016-2023	The City has not yet conducted an inventory of vacant and underutilized land within the City's Priority Development Areas (PDA). The PDA designations were updated in 2019. The updated PDAs were adopted by the MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. The 2020 Adopted Priority Development Areas (PDAs) map is available on the City's website: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 In addition, these updated PDAs can also be found on MTC's website: https://mtc.ca.gov/planning/land-use/priority-development-areas-pdas	Directing new development within Oakland's designated PDAs remains an effective method to bring transit, jobs, and housing together with the overarching goals of increasing housing options and reducing greenhouse gas emissions. This action is an effective method of targeting development and marketing resources in Priority Development Areas (PDAs).	The action is appropriate to the Housing Element. In addition, in recognition of the need to affirmatively further fair housing by creating housing opportunities within formerly exclusionary neighborhoods, the Housing Action Plan (Chapter 4) proposes actions that also expand housing opportunities more broadly.
ACTION 1.1.2	*Expedited Review*.	Bureau of Planning &	Ongoing, 2015-23	From 2015-2021, Planners in the Bureau of Planning processed planning	The policy is effective. Between	The action is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Continue to expedite the permit and entitlement process for housing developments with more than 50 units in the Downtown by assigning them to specialized planners, for priority permit processing, management tracking of applications, and scheduling of public hearings for completed applications.	Bureau of Building		entitlement applications, including for larger developments in Downtown Oakland. In 2016, two new staff were added to the Bureau of Planning to help process entitlements more quickly.	2018-2021 (the period during which State HCD has required that jurisdictions report the number of units issued a completed entitlement for the Annual Progress Report), the City entitled 14 projects with more than 50 units in the Downtown area, or about 3,135 units. In addition, from 2018-2021, 2,323 units were completed in Downtown in developments with more than 50 units. Data from the 2015-2017 period is not readily available due to changes in	meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					reporting requirements.	
ACTION 1.1.3	*Streamline Environmental Review*. Advocate for new strategies to streamline the environmental review process under the California Environmental Quality Act (CEQA).	Bureau of Planning	Ongoing, 2015-23	1) In July 2015, the City of Oakland released a revised set of Standard Conditions of Approval, which are requirements applied to development projects that have the effect of reducing potential environmental impacts, thereby streamlining environmental review; 2) The City continues to rely on the EIRs adopted for recent Specific Plans as well as the Land Use and Transportation Element of the General Plan when reviewing the CEQA impacts of individual developments; in many cases, CEQA requirements are met by the Specific Plan EIR, which has the effect of streamlining the environmental review process; 3) Staff participated with the State Office of Planning and Research as AB 743 rulemaking proceeded, to replace Level of Service CEQA thresholds with more contemporary methodologies for evaluating potential transportation impacts during the CEQA process. Staff submitted written comments and	The action is effective.	The action is appropriate to meet Housing Element goals. The Housing Action Plan (Chapter 4) proposes additional actions to streamline environmental review, including through the creation of ministerial permitting processes and adoption of objective design standards. See Action 3.3.5 (Affordable Housing Overlay), Action 3.4.2 (Revise

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				attended workshops, for a streamlined approach to the review of transportation impacts, and began to work on implementing those revisions to the transportation analysis using VMT, instead of LOS, as directed AB 743; and 4) On October 17, 2016, the City of Oakland updated its CEQA Thresholds of Significance Guidelines related to transportation impacts to implement the directive from Senate Bill 743 (Steinberg 2013) to modify local environmental review processes by removing automobile delay as a significant impact on the environment pursuant to CEQA. The new CEQA thresholds help streamline the environmental review process for new infill housing development.		CUP Requirements), Action 3.4.7 (Objective Design Standards), Action 3.6.3 (Entitlement Reform), Action 3.6.4 (SB 35 Streamlining), Action 4.3.2 (Modular Development Streamlining)
ACTION 1.1.4	*International Blvd. Community Revitalization Without Displacement Incentive.* An inter-departmental City team is working with residents, businesses, community groups, the County and other public agencies, foundations,	Department of Housing & Community Development (DHCD) – Housing Assistance Center/Strategic Initiatives	Policy development starting 2014-15	The City continued its work to revitalize the International Boulevard corridor while also working to increase the availability of affordable housing along the corridor. The following affordable housing projects have completed construction	This initiative has been an effective means to improve International Blvd. Corridor's housing, economic development, health, transportation, and public safety	The initiative is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	private industry and other partners to improve International Blvd. Corridor's housing, economic development, health, transportation, and public safety conditions, as well as to develop strategies to prevent the displacement of long-time residents and small businesses. Key parts from the City's award-wining International Boulevard Transit Oriented Development Plan will be implemented.			or are currently underway along this corridor: • Camino 23, a 37-unit affordable development at 1245 23rd Avenue and International Boulevard, completed construction in 2019. • Casa Arabella, a 94-unit affordable development adjacent to the Fruitvale BART station and International Boulevard corridor, completed construction in 2019. • Fruitvale Transit Village Phase II-B, a 181-unit affordable development also adjacent to the Fruitvale BART station, is currently under construction. • Ancora Place, a 77-unit affordable development located at 2227 International Blvd, received a commitment of $4.8 million in City funds, was awarded $11,740,653 in Multifamily Housing Program (MHP) funds and $5,602,112 in Infill Infrastructure Grant (IIG) funds from the California	conditions, as well as to develop strategies that prevent the displacement of long-time residents and small businesses.

				stakeholders on projects, outreach, and small business sustainability. • Establishing a community governance model to help stabilize neighborhoods and ensure that Oakland remains a city for all. • Implementing the BRT Business Assistance Program and Sustainability Fund to mitigate the displacement of long-term small businesses, which conducted outreach to over 1,1151 businesses along the BRT route, providing technical assistance to 874 businesses, and 2 Business Assistance Grants. • Supporting HOPE Collaborative with implementation of specific segment of the Elmhurst Healthy Neighborhood Plan developed through a community process. • Continuing to work with partners to increase development of affordable housing.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				• Maintaining the Catalyst Project Sites for readiness and support in bringing them to fruition.		
ACTION 1.1.5	*Consider expanding the existing Micro-living quarters pilot program to the entire Downtown and Jack London Square PDA.* Micro-living quarters are defined in the Oakland Planning Code as "a multiple-tenant building with an average net-floor area of 175 square feet but a minimum size of 150 square feet. Bathroom facilities are included within each living quarter but cooking facilities are not allowed within each living quarter. A shared kitchen is required on each floor, the maximum number units are not prescribed but the size of the units and the FAR shall dictate the limits." Currently, these facilities may only be located in the Broadway Valdez Commercial Zone, ~~DBV~~D-BV-	Bureau of Planning	2015-2020	~~Micro-units are included in the Land Use and Urban Form chapter of the Final Draft Downtown Oakland Specific Plan. As of December 2021, the draft zoning to implement the Downtown Oakland Specific Plan is underway and includes regulations for micro-units.~~ Recent revision to the California Building Code has now allowed for the construction of smaller residential unit sizes. As such, the City of Oakland has focused on expanding incentives for the construction of efficiency dwelling units. In November 2021, City Council approved the Construction Innovation Ordinance, which allows for the provision of efficiency units in residential facilities at twice the otherwise maximum allowable density, similar to the existing standards for rooming units. In the Downtown area, rooming house facilities also remain a permitted facility type. Rooming units are similar to micro-living quarters in	~~The policy is still under development, therefore, there is no way to evaluate its effectiveness.~~Efficiency units are an effective way of creating affordability by design. While the program is new, the City has heard expressed interest in the model from applicants. The micro-living program was ultimately not included in the proposed Downtown Oakland Specific Plan.	~~Micro-units are a housing product type that will help to meet the significant demand for housing.~~With the changes to building code and expanded allowance for efficiency and rooming units, the micro-living quarter building type is no longer needed to meet the goal of permitting "affordable by design" small, high-density units.

	2 and a small area of the D-BV-3 south of Bay Place and are permitted upon the granting of a Conditional Use Permit.			that units have shared kitchens instead of individual ones.		
POLICY 1.2: Availability of Land						
ACTION 1.2.1	*Land Inventory (Opportunity Sites).* Develop a list of vacant and underutilized sites potentially suitable for higher density housing, particularly affordable housing, and distribute that list to developers and nonprofit housing providers upon request. The availability of the site inventory will be posted on the City's website after the City Council adopts the Housing Element.	Bureau of Planning	Post to City's website within 90 days of adoption and final certification (by HCD) of Housing Element	The City's Detailed Land Inventory can be found on Section 4 and Appendix C of the 2015-2023 Housing Element, which continues to be posted to the City's web page: https://www.oaklandca.gov/resources/read-the-2015-2023-housing-element.	This action is an effective method of maintaining an adequate supply of land to meet the regional housing share under the ABAG Regional Housing Needs Allocation (RHNA).	The action is appropriate to the Housing Element.
POLICY 1.3: Appropriate Locations and Densities for Housing						
ACTION 1.3.1	*Broadway Valdez Specific Plan (BVSP).* Track progress on the approval and completion of the 1,800 housing units	Bureau of Planning	Ongoing, 2015-23	The Broadway Valdez Specific Plan (BVSP) has far exceeded its original goal of enabling the approval and completion of 1,800 new housing units. As of ~~December 2021~~June 2022,	The Broadway Valdez Specific Plan was very effective in incentivizing	The action is appropriate to the Housing Element. The City will

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	included in the development program for the Broadway Valdez Specific Plan (BVSP).			, there are a total of 4,091 housing units in various stages of completion within the Broadway Valdez District Specific Plan area: Built (Completed) = 2,194 housing units Under Construction = 450 housing units Building Permit Filed = 728 housing units Approved, but no building permits = 322 housing units Applied for, but not yet approved = 397 housing units The City posts updated maps of proposed projects and developments under construction to the City's Specific Plan website. See "Broadway Valdez Map" at: ~~https://www.oaklandca.gov/resources/view-the-broadway-valdez-specific-plan-map~~https://www.oaklandca.gov/resources/view-the-broadway-valdez-specific-plan-map	housing with an EIR that helped to expedite housing approval as well as letting developers know what the City and the community wanted for this area. The development program that was created for the plan allowed for flexibility with the EIR that different uses could be changed out without having to change the EIR. The number of housing units originally planned for the area was 1,800 units and 2,149 ~~unit~~units have already been built so far. With the additional units under	continue to track progress on the approval and completion of housing units within the BVSP. No further related actions are proposed under the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					construction, filed for building permits, approved with planning permits, and applied for planning permits there will be a total of 4,091 units.	
ACTION 1.3.2	*Lake Merritt Station Area Plan (LMSAP).* Track progress on the approval and completion of the 4,900 housing units included in the development program for the Lake Merritt Station Area (Specific) Plan (LMSAP).	Bureau of Planning	Ongoing, 2015-23	The City continues to track the progress of new, residential Major Projects in the Lake Merritt Station Area. As of 2021, a total of 1,591 new dwelling units have been approved, including: 1,230 market-rate units, 44 moderate-income units, 138 low-income units, 120 very-low-income units, and 59 extremely-low-income units. For more information, please refer to the City's Major Development Projects List: ~~https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list~~ https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list	The action is an effective method of tracking progress on the approval and completion of the 4,900 housing units included in the development program for the Lake Merritt Station Area (Specific) Plan (LMSAP). While the City has not yet achieved the goal of 4,900 units in the plan area, housing is in various stages of	The action is appropriate to the Housing Element. The City will continue to track progress on the approval and completion of housing units within the LMSAP. No further related actions are proposed under the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					development and is anticipated to be constructed in the 6th cycle~~,~~.	
ACTION 1.3.3	*West Oakland Specific Plan.* Track progress on the approval and completion of the 5,360 housing units included in the development program for the West Oakland Specific Plan (WOSP).	Bureau of Planning	Ongoing, 2015-23	The City continues to track the progress of new, residential Major Projects in the West Oakland Specific Plan (WOSP). As of 2021, a total of 2,442 new dwelling units have been approved, including: 1,819 market-rate units, 156 moderate-income units, 64 low-income units, 300 very-low-income units, and 103 extremely-low-income units. For more information, please refer to the City's Major Development Projects List: ~~https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list~~https://www.oaklandca.gov/resources/download-the-city-of-oakland-major-development-projects-list	The action is an effective method of tracking progress on the approval and completion of the 5,360 housing units included in the development program for the West Oakland Specific Plan (WOSP).	The action is appropriate to the Housing Element. The City will continue to track progress on the approval and completion of housing units within the WOSP. No further related actions are proposed under the 2023-2031 Housing Element.
ACTION 1.3.4	*Coliseum Area Specific Plan (CASP).* Track progress on the approval and completion of the 5,000 housing units included in the development	Bureau of Planning	Ongoing, 2015-23	The City continues to post updated maps of proposed projects and developments under construction to the City's Specific Plan website. See "Project Status Map and Brochure for the Coliseum Area Specific Plan" at:	The action is an effective method of tracking progress on the approval and completion of the	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	program for the Coliseum Area Specific Plan (CASP).			https://www.oaklandca.gov/resources/read-the-general-plan-amendments-for-the-coliseum-area-specific-plan	5,000 housing units included in the development program for the Coliseum Area Specific Plan (CASP).	
ACTION 1.3.5	*Central Estuary Area Plan (CEAP).* Track progress on the approval and completion of the 400 housing units included in the development program for the Central Estuary Area Plan (CEAP).	Bureau of Planning	Ongoing, 2015-23	The Planning Bureau's interactive major projects GIS map (and associated major projects list) catalogues developments that have at least 25 units or have at least 10,000 sq. ft. total Residential Floor Area ~~that~~, which includes projects in the Central Estuary area. The interactive map is available at: ~~https://oakgis.maps.arcgis.com/apps/webappviewer/index.html?id=e1357dbaeffc473caa57b1227a7a7739~~ https://oakgis.maps.arcgis.com/apps/webappviewer/index.html?id=e1357dbaeffc473caa57b1227a7a7739	Permitting housing in the non-industrial areas of the Central Estuary is an important mechanism to deliver much-needed housing.	Build out of housing in the non-industrial areas of the Central Estuary is an important mechanism to deliver much-needed housing.
ACTION 1.3.6	*Promote new housing opportunities in the Estuary Area.* With the resolution of the legal challenges to the Brooklyn Basin project (formerly Oak-to-Ninth),	Bureau of Planning	Ongoing, 2015-23	Progress continued on the development of 465 units of affordable housing serving households between 0-60% of AMI in the Brooklyn Basin development, which will include 3,100 total new units as well as commercial and open space. The	The City's efforts to promote housing opportunities in the Central Estuary Area have borne fruit in the 2015-	The objective dovetailed appropriately with the City's Central Estuary Area Plan.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	new housing is scheduled to be built in the timeframe of the 2015-2023 Housing Element where former industrial uses predominated.			affordable units include 258 Project-Based Section 8 vouchers for all phases from the Oakland Housing Authority (OHA), which jointly owns the land with the City. The master developer has proposed adding another 600 units of market-rate housing to the overall project (as well as marina space). This request was heard at the March 23, 2022 Design Review Committee meeting. Support for the proposal to add 600 housing units moved forward and will be heard by the Planning Commission. Construction of the 211 affordable units on Parcel F completed in December 2020 and achieved 100% occupancy in 2021. The Parcel F projects included 101 units of family housing (Paseo Estero) and 110 units of senior housing (Vista Estero). MidPen Housing Corporation, Oakland Housing Authority, and the City entered into a Lease Disposition and Development Agreement on Project 3 (Foon Lok West) on Parcel A in 2019, and closed their loan for the 130-unit	2023 cycle. 3,100 units of housing, including 465 units of affordable housing, are planned, underway, or completed in the Brooklyn Basin development. The City has carried out extensive efforts, including planning and zoning updates, environmental remediation, and direct financial assistance, to provide mixed-income housing in an amenities-rich environment. The City's policies and programs have been highly effective.	As the Brooklyn Basin development nears completion, this goal should be revised in future housing element cycles.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Project 3 and started construction in July 2020, and construction continued throughout 2021. MidPen ~~is assemblinghas assembled~~ its financing for Project 4's (Foon Lok East) remaining 124 units of family housing, and ~~pending awards from the new California Housing Accelerator Fund, is projected to commence~~commenced construction in 2022. With regards to market-rate housing development of Brooklyn Basin, at the end of 2021: Parcels B, C, D, G, H and J are fully entitled (for a total of 1,843 entitled units; of the entitled units, 241 are constructed and occupied).		
POLICY 1.4: Secondary Units						
ACTION 1.4.1	*Secondary Unit – Parking Solutions.* Explore parking solutions (tandem parking, compact parking spaces, etc.) for secondary units to enable more secondary units as part of a Planning Code update of the City's parking regulations. Explore the option of eliminating the existing requirement for a	Bureau of Planning	2014-2017	The majority of ADUs created in Oakland do not require additional parking because they are located within the 1/2-mile of transit. Tandem parking is also allowed. This has been positive for most areas, except for areas in the Very High Fire Hazard Severity Zone (VHFHSZ) where lots are steep and often do not have off-street parking, streets are narrow, and reliance on cars is very high. Any additional cars that ADUs bring are	The ADU program has been very effective in creating additional units of housing without adding additional off-street parking spaces. The number of ADUs permitted	The goals of this portion of the ADU ordinance are appropriate in creating additional housing units without the burden of additional parking in transit-rich areas

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	separate non-tandem parking space.			forced to park on the narrow streets creating emergency access issues and prompting additional resources for enforcement of the no-parking rules.	annually can be found in the City's Housing Element Annual Progress Reports (see Table A3 for APRs 2015-2017, and Tables A and A2 for APRs 2018-2021), which are posted to the City's webpage: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports	where car ownership can be optional. This preserves valuable lot space for housing or as valuable open space instead of using it for parking. However, in VHFHSZ and S-9 Zone where roads are narrow and public transit is lacking, off-street parking or replacement of lost parking is required in some areas, consistent with State law.
ACTION 1.4.2	*Secondary Unit – Setback Solutions.* Explore relaxing the current prohibition on Secondary Units in the rear setback. If these zoning changes are	Bureau of Planning	2014-2017	The City has been approving ADUs with the regularly required side and rear setbacks according to State law requirements. Existing structures that are converted or rebuilt to ADUs in the same place and to the same	The ADU program has been very effective in creating additional units by converting existing structures	The ADU policy regarding the setbacks is appropriate in creating additional

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	implemented it will allow Secondary Units in the side and rear setback, as long as the structure doesn't exceed existing size limits and can meet all the same standards that allow a garage or accessory structure in the same location.			dimensions are allowed to remain in their current footprint without complying with any setbacks. Newly built ADUs are only required to comply with 4' side and rear setbacks, which is significantly less than regularly required by local zoning regulations. A recent ordinance amendment further reduces this setback to 3 feet in some cases.	on a lot to ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. In addition, the 4' required setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.	housing by allowing to convert existing structures on a lot into ADUs without any setbacks if they are converted or rebuilt in the same place and to the same dimensions. Otherwise, the required 4' setbacks make construction of newly built ADUs feasible on almost any residential lot and remove significant barriers to ADU production.
POLICY 1.5: Manufactured Housing						
ACTION 1.5.1	*Factory-Built Housing.* Continue to implement City-adopted regulations that allow manufactured housing	Bureau of Planning	Ongoing, 2015-23	The City continues to permit factory-built housing in all residential & commercial districts.	Factory-built manufactured housing becomes more common	With the ~~improved process~~code changes, it is

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	in single-family residential districts.			In November 2021, City Council approved the Construction Innovation Ordinance, which amends the Planning Code to allow residential occupancy of recreational vehicles, mobile homes, and manufactured homes in all zoning districts where residential uses are permitted.	with the ease of construction and the improved appearance and variety of designs.	appropriate to allow for construction in any zone where single-family residences are permitted.
POLICY 1.6: Adaptive Reuse						
ACTION 1.6.1	*Live/Work Conversions*. Allow the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Bureau of Planning	Ongoing, 2015-23	~~In 2021, the~~The City continues to permit live/work conversions~~. Thereby,~~ thereby allowing the conversion of existing industrial and commercial buildings to joint live/work units in specific commercial and industrial locations while considering the impacts on nearby viable businesses.	Live/work conversions continue to be permitted in Oakland. The State Building Code has been adopted by the City to be applied more uniformly as in other cities.	Given Oakland's extensive stock of formerly industrial and commercial buildings, live/work conversions are appropriate. The Housing Action Plan (Chapter 4) proposes an action (Action 3.2.2) to update and promote live/work and

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						work/live units in Oakland.
POLICY 1.7: Regional Housing Needs						
ACTION 1.7.1	*Accommodate 14,765 New Housing Units.* Designate sufficient sites, use the City's regulatory powers, and provide financial assistance to accommodate at least 14,765 new dwelling units between January 2014 and June 2023. This sum represents the City's share of the Bay Area region's housing needs as estimated by the Association of Bay Area Governments (ABAG). The City will encourage the construction of at least 6,919 units for very-low-,	Bureau of Planning	Ongoing, 2015-23	In addition to housing developments which are under construction, approved, or in pre-approval, the 2015-2023 Housing Element identified sites with the capacity and the zoning regulations to allow more units than the Regional Housing Needs Allocation for Oakland. Table A2 in Annual Progress Reports provides details on building starts for each calendar year. See also the City's Land Inventory posted to the City's web page: http://www2.oaklandnet.com/oakca1/groups/ceda/documents/policy/oak051104.pdf	The City has effectively met its RHNA housing allocation for total number of units to be built, but it has not met the goal of the percentage of affordable units and exceeded the number of market-rate units built.	~~The policy is~~ While the goals of this action are appropriate to the Housing Element~~.~~, the proposed action is too broad and is not carried forward as a listed action in the 2023-2031 Housing Element. Chapter 3 and Appendix C provide

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	low-, and moderate-income households.					information on the adequacy of existing zoning in Oakland to accommodate its current Regional Housing Needs, while the Housing Action Plan (Chapter 4) includes a number of actions that the City will implement to ensure additional housing can be constructed during the eight-year planning period, with a focus on missing middle and affordable housing.
GOAL 2: Promote the Development of Adequate Housing for Low- and Moderate-Income Households						

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
POLICY 2.1: Affordable Housing Development Programs						
ACTION 2.1.1	*New Construction and Substantial Rehabilitation Housing Development Program.* Issue annual Notice of Funding Availability (NOFA) for the competitive allocation of affordable housing funds. Points will be assigned for addressing City priorities to ensure that funds are used to further policy objectives.	DHCD – Housing Development Services	Ongoing, 2015-23	From 2015-2021, the City has continued to issue NOFA funds pursuant to funding being available. The City released one Notice of Funding Availability (NOFA) in 2021 for New Construction of Multifamily Affordable Housing, with a funding pot of approximately $15-20 million. Unlike the 2020 New Construction NOFA, which was limited to "Pipeline" projects—projects that had applied for funding in a previous NOFA round—the latest NOFA, for which applications were due in January 2022, was open for all applicants for new rental housing proposals. The City also made funding commitments to projects that applied for funding under a NOFA for Acquisition and Conversion to Affordable Housing (ACAH) of existing non-deed restricted projects that was released in late 2020. The City of Oakland will have spent approximately $150 million on affordable housing for the 2015-2023 Housing Element. More information about City NOFAs is available here:	The City's NOFAs are effective as the primary method of delivering affordable housing.	This program is highly appropriate and fully consistent with the Housing Element. In future Housing Element cycles, it may be advisable to clarify that NOFAs may be released on a more or less frequent basis than annually, to the extent that funding is available.

	affordable housing for extremely-low-, very-low-, low-, and moderate-income households.			Senior and placed 91 new units in service. Between 2016 and 2018, no public housing resources were utilized for new development activities. The OHA has continued to assist a number of affordable housing developments. In FY 2021, OHA completed construction on the first two phases of Brooklyn Basin closed financing and started construction on Project 3, known as Foon Lok West. An additional 53 units were rehabilitated in OHA's existing project-based portfolio. • Brooklyn Basin - OHA in partnership with the City of Oakland and MidPen Housing Corporation is developing 465 units of affordable housing for low-income families and seniors as part of the Brooklyn Basin master planned community. • In FY 2021, Project 3, known as Foon Lok West, which includes 130 units for families	OHA's affordable housing development activity over the past ten years has been strategic, significant and impactful. OHA has developed on its own, or partnered with nine different affordable housing developers, on fifteen major projects adding 1,922 units of new affordable housing since 2008 with a combined total development cost of over $763M. OHA's capital contribution to these projects ($92M) represents 12% of the overall financing required. In addition to providing capital directly to these	not a specific "public housing" program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and formerly homeless households (65 assisted with PBVs) closed all financing and started construction. • Construction was completed on 211 units (132 assisted with PBVs) at Projects 1 and 2, known as Paseo Estero and Vista Estero. Lease up was completed in 2021 and 101 family units (50 of which are PBV) were leased in Paseo Estero and 110 senior housing units (82 of which are served with PBVs) were leased. • 285 12th Street - OHA is partnering with the East Bay Asian Local Development Corporation (EBALDC) to construct affordable housing to include 65 units and 3,500 square feet of commercial space. The site is currently vacant and centrally located in downtown Oakland near several BART stations. OHA has committed to providing PBVs for 16 units. The project received NEPA clearance during FY 2021.	projects, OHA awarded 719 project-based vouchers (PBVs) using MTW flexibility, which were used to leverage $75M in additional private debt financing. OHA's capital contribution and award of PBVs together contributed approximately 22% of the total cost for fifteen major projects. OHA strategically purchased the land on 13 of the 15 projects to ensure that the housing will remain in reach of a stable public agency committed to the preservation of	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				• 500 Lake Park Avenue – OHA is partnering with EAH Housing to construct a 53-unit affordable housing building with 2,900 square feet of retail space at 500 Lake Park Avenue in the Grand Lake district of Oakland. The project received NEPA clearance in FY 2021. Also, during FY 2021, OHA acquired the land and provided a loan to EAH to continue funding predevelopment activities for the project. • 6946 Foothill Blvd - OHA and its affiliate OHI conducted predevelopment planning to rehabilitate and preserve 65 units of affordable housing using low-income housing tax credits. • 7526 MacArthur Blvd Repositioning – OHA conducted a feasibility study on developing affordable housing on an OHA-owned vacant parcel at 7526 MacArthur Boulevard in order to meet Oakland's need for	affordable housing in perpetuity. The disposition of 1,615 units of scattered site public housing at the beginning of the decade has proved especially fortuitous as the value of this real estate combined with low-income housing tax credits (LIHTC) and MTW flexibilities, will allow OHA to facilitate future building and redevelopment of new units within these sites at a fraction of the typical cost to develop. As a direct result of OHA's development activities, over 421

	City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family homes for re-sale, lease-to-own, or for rent and if financially viable and operational capacity exists, will partner with community land trusts or otherwise incorporate resale restrictions to preserve affordability for Oakland residents (see also Action 4.3.4).	Center/Strategic Initiatives	beginning 2014-15	development and sale to moderate-income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021, the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the 2015-2021 period there were 18 units developed and closed. Also see Actions 2.2.4 and 4.3.4.	properties to new construction single-family dwelling for larger households.	capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a ~~boot~~boost of subsidy may be needed to maintain feasibility of future projects using this model.
ACTION 2.2.3	*Foreclosure Mitigation Pilot Loan Program.* Given that the City's foreclosure crisis is currently (2014) impacting long-time Oakland homeowners, the	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	While the City no longer funds the Foreclosure Mitigation Pilot Loan Program, the City continued operation of its an Anti-Displacement Program (Oakland Housing Secure [OHS]-Homeowner Assistance) from October	The demand for this service, particularly emergency mortgage assistance, far	The scope of Oakland Housing Secure (OHS) to support homeowners is important work,

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	City has been engaging in new innovative strategies, such as launching a comprehensive program connecting door-to-door outreach with legal and housing counseling services, City escalation with bank officials, and the development of new loan fund programs. In addition, the City has been working on the development of a distressed mortgage notes program in order to purchase delinquent mortgage notes, modify loans of qualified homeowners, assist homeowners who are not able to receive modifications with alternative housing solutions, and then dispose of vacant properties to result in new affordable homeownership opportunities.			2020 through September 30, 2021. Centro Legal de la Raza (program administrator) along with Housing and Economic Rights Advocates (HERA) provided emergency financial assistance to homeowners, legal representation, consultations, workshops, outreach, education, and other services to prevent foreclosure of property. Thirty-two homeowners received financial assistance and 498 homeowners benefitted from other services offered through OHS. This program is closed out as of September 2021. No new funding has been identified for FY 2021/22 and forward.	exceeded resources available. Legal representation successfully resolved legal matters for more than 50% of homeowners, who also reported improved housing stability through: avoiding an eviction, avoiding homelessness, or securing time and/or money to maintain housing. However, Centro Legal reported that mortgage services are slow and difficult to deal with, as if little has changed since the foreclosure crisis. During the COVID-19 pandemic, the City's focus has been on keeping	though this was one time funding that ended in September 2021. The City, HERA, Central Legal De La Raza and other agencies provide support for homeowners and renters, and rental assistance work continues under the City's Keep Oakland Housed (KOH) program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					renters housed using Federal Relief funds.	
ACTION 2.2.4	*Community Buying Program.* The Community Buying Program seeks to assist Oakland residents (either those people who have lost their homes to foreclosure or tenants residing in foreclosed properties or who have been unable to compete with all cash investors on the open market) to purchase properties from the Scattered-Site Single Family Acquisition and Rehabilitation Program (Action 2.2.2 above) or other similar foreclosed housing. Should public funds be utilized, the City would assure the long-term affordability of these properties through the use of effective resale restrictions in partnership with nonprofit organizations with sufficient operational	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for development and sale to moderate income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021 the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the 2015-2021 period there were 18 units developed and closed. See also Actions 2.2.2 and 4.3.4.	The program has been effective at turning blighted properties to new construction single-family dwelling for larger households.	The mechanism to clear liens and use developer capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due to steep development cost increases; a boot of subsidy may be needed to maintain feasibility of future projects using this model.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	capacity, including possibly local community land trusts. Assistance to Oakland residents could include the use of loan products such as the Federal Housing Authority 203K loan or other funds available to the City, such as housing rehabilitation or down-payment assistance funds. In addition, the program will build upon the National Community Stabilization Trust's First Look program.					
ACTION 2.2.5	*Home Preservation Loan Program.* The Home Preservation Loan Fund Program will provide up to $50,000 in forgivable loan funds for distressed homeowners.	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	This program provided financial assistance to 20 households between 2015 and 2016. Since 2016, the program has been administered by Housing and Economic Rights Advocates (HERA). Funding for this program has been variable – no funding was available in 2017 and 2020, although funding was available through the National Fair Housing Alliance in 2018 and 2019.	Effective with sufficient funding – no funds provided in 2021.	Appropriate if and when furnished with appropriate resources to deliver on expected outcome. In the future, this action should be combined with Action 2.2.3 and renamed as

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Funding for this program was not available in 2021. However, as reported in Action 2.2.3, emergency financial assistance (grants) were provided to 32 homeowners in 2021 through OHS. This program is closed with no funding available for 2022.		Keep Oakland Housed (KOH).
POLICY 2.3: Density Bonus Program						
ACTION 2.3.1	*Density Bonus Ordinance.* Continue to implement the City's density bonus ordinance. The City permits density bonuses not exceeding 35 percent for projects that provide at least: • Ten percent (10%) of the total Dwelling Units of a Residential Housing Development for Lower Income Households; or • Five percent (5%) of the total Dwelling Units of a Residential Housing Development for	Bureau of Planning	Ongoing, 2015-23	Although Density Bonus applications beyond 100 percent affordable housing developments were relatively rare in the earlier portion of the reporting time period, applications picked up after 2017, after the City's Affordable Housing Impact Fee came into effect. The Impact Fee included an alternative for incorporating affordable units on-site and adjacent to market-rate developments, and resulted in a modest uptick in Density Bonus applicants. Between 2018-2021 (the period during which State HCD has required that jurisdictions report the number of approved or permitted density bonus projects for the Annual Progress Report) 33 projects were approved, 10 were permitted, and 8 were completed as the result of a density bonus.	The City has effectively updated its procedures and ordinances to ensure the orderly application of the Density Bonus law.	The Density Bonus is a is a provision of State law and does not require a local enabling ordinance. The City has regularly updated its local ordinance to be consistent with State law.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Very Low Income Households; or • A Senior Citizen Housing Development; or • Ten percent (10%) of the total Dwelling Units in a common interest development as defined in Section 1351 of the California Civil Code, for persons and families of Moderate Income, provided that all units in the development are offered to the public for purchase.					
POLICY 2.4: Permanently Affordable Homeownership						
ACTION 2.4.1	*Community Land Trust Program.* Continue support of existing Community Land Trust Programs. Support expansion of land trusts if land values make it	DHCD	Ongoing support and expansion of Land Trust as	From 2015-2021, the City has worked with a variety of community land trusts, including Oakland Community Land Trust, Bay Area Community Land Trust and the Northern Community Land Trust to provide affordable housing (including ownership housing).	This program is effective in promoting homeownership opportunities for very-low-income and low-income	DHCD will continue to support the efforts and capacity of the land trusts as resources are

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	financially feasible. Ownership of the land by a community-based land trust ensures that the housing remains permanently affordable.		funds are available.	Most significantly, the City created the Acquisition and Conversion to Affordable Housing Program, which provides funds to community land trusts to acquire and preserve affordable housing units. Through this program, the City has provided Bond Measure KK funding in the amount of $8 million to 5 community land trust projects for a total of 58 units. In addition, approximately $5 million is currently committed to 4 other community land trust projects that are anticipated to close in 2022.	homebuyers. The City is working with a technical assistance provider to determine best practices for land trust ownership units and cooperative units.	available and if programming is feasible.
ACTION 2.4.2	*Resale Controls*. Continue to utilize financing agreements for City-assisted ownership development projects to ensure that units remain permanently affordable through covenants running with the land.	DHCD	Ongoing, 2015-23	The City continues to record long-term affordability restrictions that run with the land on all City-assisted affordable development projects, both rental and ownership.	Resale controls are a critical and effective tool for ensuring that affordable homeownership units remain affordable.	Resale controls are a fundamental component of the City's affordable homeownership program.
POLICY 2.5: Seniors and Other Special Needs						
ACTION 2.5.1	*Housing Development Program.* Provide financial assistance to developers of housing for	DHCD – Housing Development Services	Ongoing, 2015-23	Housing Development Services continues to circulate a NOFA each year if funding is available, for affordable housing new construction, acquisition and conversion to	The City's NOFAs are an effective means of providing financial assistance to properties	The policy is appropriate to the housing element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	seniors and persons with special needs.			affordable housing, and rehabilitation/preservation of existing affordable housing. The New Construction and Acquisition/Rehabilitation NOFAs awards up to five points for rental projects serving special needs populations, and up to ten points for projects containing Permanent Supportive Housing Units for homeless households. The City's Acquisition and Conversion to Affordable Housing NOFA awards up to two points to projects that house vulnerable populations, including seniors.	housing seniors and persons with special needs, achieving the goal as stated in the Housing Element's policy guidance.	
ACTION 2.5.2	*Housing For Persons With HIV/AIDS.* Provide housing and associated supportive services for persons with HIV/AIDS through a combination of development of new housing, project-based assistance in existing affordable housing developments; and tenant-based assistance to allow households to find their own housing in the private market. Enhance outcomes	DHCD; Community Housing Services (DHS)	Ongoing, 2015-23	Throughout the period, the HOPWA (Housing Opportunities for Persons with AIDS) program continued to provide housing assistance. In FY 2020-2021 alone, the HOPWA program provided housing assistance to more than 169 persons living with HIV/AIDS and their families utilizing the housing first model. Seven persons with HIV/AIDS obtained permanent housing. Information and referral services were provided to approximately 772 households for HIV/AIDS housing and other services. 53 persons living with HIV/AIDS	The HOPWA Program is an effective program providing housing assistance & supportive services to persons living with HIV and AIDS experiencing homelessness.	The Human Services Department will continue to serve persons living with HIV and AIDS through HOPWA funding.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	via housing first model under the Alameda County EveryOne Home Plan.			received supportive services. 2 new units of HOPWA housing were completed, increasing the Oakland HOPWA housing inventory to over 290 units, with 116 in stewardship.		
ACTION 2.5.3	*Accessible Units in New Federally -Assisted Housing.* All housing assisted with Federal funds (such as HOME and CDBG) must comply with HUD's accessibility requirements, which require that five percent of all units be made accessible for persons with mobility limitations, and an additional two percent be made accessible for persons with sensory limitations (sight, hearing). The City will ensure that these requirements are met in all projects that receive Federal funds from the City as part of project review and funding approval.	DHCD – Housing Development Services	Ongoing, 2015-23	The City of Oakland's Housing Development Services unit continues to enforce federal requirements for accessible housing for all projects receiving federal funding assistance. City staff began tracking this data during the 2015-2021 Housing Element period through the Housing & Community Development Department's City Data Services database system and will continue to do so moving forward.	This program is effective.	This program is appropriate for the Housing Element.
POLICY 2.6: Large Families						
ACTION 2.6.1	*Housing Development Program.*	DHCD – Housing	Ongoing, 2015-23	Since 2017, the City's New Construction of Multifamily Affordable	The policy is an effective means of	The goal is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Provide points in competitive funding allocations for projects that include a higher proportion of units with three (3) or more bedrooms. The City will award points in the ranking process for projects with an average number of bedrooms exceeding the minimum specified in the program guidelines.	Development Services		Housing NOFA requires that at least 15% of units in a family project have three or more bedrooms, and awards up to five points to rental projects that exceed this threshold, and up to nine points to ownership projects that exceed this threshold. Projects with affordable units that can accommodate larger families include the Fruitvale Transit Village, Estrella Vista, Redwood Hill Homes, 94th & International, Civic Center TOD, Mural Apartments, and 11th & Jackson.	ensuring that City-assisted affordable units are constructed for large families.	the housing element. Goal may need revision to include 2-bedroom units in next cycle.
POLICY 2.7: Expand Local Funding Sources						
ACTION 2.7.1	*Jobs/Housing Impact Fee.* Continue to implement the City's existing Jobs/Housing Impact Fee by collecting fees from new office and warehouse/distribution facilities.	DHCD	Ongoing, 2015-23	Data on the Jobs/Housing Impact Fee is reported in the Impact Fees Annual Report. Impact fee reports are available here: https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports Between FY 2016-2021, about $10,123,162 has been collected/paid towards the Jobs/Housing Impact Fee, while $23,209,708 has been assessed.	The policy is an effective means of generating funds for affordable housing.	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Collected funds go into the Affordable Housing Trust Fund. In accordance with Sections 15.72.050 and 15.74.050 of the Oakland Municipal Code (OMC), the Oakland Planning and Building Department (PBD) has calculated increases to the Affordable Housing, Transportation and Capital Improvement impact fees for FY 2021-22. Under the OMC, the City Administrator may adopt adjustments to these fees for inflation commencing July 1, 2021. As of January 2022, fees remain the same. In order for the fee increases to go into effect the City Administrator's authorization is required.		
ACTION 2.7.2	*Consider Implementing Mandatory and/or Voluntary Options for Developer Contributions to Affordable Housing Development by Conducting a Nexus Study and Economic Feasibility Study for Affordable Housing.* The City is committed to equitable development	DHCD; Bureau of Planning	Complete nexus study by December 31, 2014	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. ~~In~~On December 24, 2021 the City completed the Annual Report for Fiscal Year ~~Ended~~Ending June 30, 2021. See this link for the report: ~~https://cao-94612.s3.amazonaws.com/documents~~	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional	This program to find additional sources of funding for affordable housing is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Citywide—with a focus on Specific Plan Areas, Priority Development Areas (PDAs) and large development projects—that provides housing for a range of economic levels to ensure the development of thriving, vibrant and complete communities. The Nexus Study and Economic Feasibility Study will provide documentation of what level of development impact fees are supportable, if at all, by quantifying the impacts of development and establishing whether there is a reasonable relationship between the amount of the fees to be imposed on new developments and the impact created by the new developments. Mandatory options for developer contributions will include the study of a housing impact fee or affordable housing			~~/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf~~https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports Since the Affordable Housing Impact Fees went into effect on September 1, 2016 – $17,584,503 has been paid and $33,895,450 in revenue has been assessed but not due yet, for a total accessed amount of $51,479,953. For Fiscal Year 2020-2021 (ending on 6/30/21), $4,430,250 has been paid for the Affordable Housing Impact Fee; and $15,688,799 was revenue assessed, but not due yet (due to the program's schedule for payments). City of Oakland Impact Fee Annual Reports and related documents covering Affordable Housing, Jobs/Housing, Transportation, and Capital Improvements can be found here: ~~https://www.oaklandca.gov/documents/city-of-oakland-annual-impact-fee-reports~~ https://www.oaklandca.gov/document	$33,895,450 to be collected once the developments are under construction and completed.

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	set-asides for newly constructed ownership housing. Voluntary options for developer contributions will include the study of bonuses and incentives such as Housing Overlay Zones. The RFP released July 8, 2014 requires that the contractor do an analysis of residential development costs and the market for both rental and owner-occupied housing in Oakland.			s/city-of-oakland-annual-impact-fee-reports As stated in Action 3.3.9, the City will review and update where possible Impact Fee and other payment timing as well as fees charged by mid-2024.		
ACTION 2.7.3	*Sale of City-Owned Property for Housing. Solicit Requests for Proposals (RFPs) from interested developers to construct housing on City-owned sites*. RFPs will be posted on the City's website and distributed directly to developers, including nonprofit housing providers. In disposing of City-owned surplus properties, the City will give first consideration to affordable housing	DHCD	Ongoing, 2015-23	The City advanced the development of 1,285 units of housing, 515 of which are affordable units, on City and former Redevelopment land through five projects since 2018, all of which are completed (Fruitvale IIA, 2016 Telegraph and 1150 Clay St), under construction (95th and International and Fruitvale IIB) or under active Disposition and Development Agreements: • Fruitvale Transit Village IIA, 94 affordable units	The City followed-through on commitments to issue calls for proposals on key City-owned development sites; solicited proposals from a broad audience of developers, including nonprofit housing providers; and prioritized affordable housing	The policy is consistent with the Surplus Land Act and appropriate to the Housing Element. ~~Policy~~The policy may need revision to include an option for ground lease rather than sale.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	developers per the California Surplus Lands Act, Government Code 54220 et seq. If the City does not agree to price and terms with an affordable housing developer and disposes of the surplus land to an entity that develops 10 or more residential units on the property, the City shall require the entity to provide at least 15 percent of the developed units at an affordable housing cost or affordable rent to specified income groups, as required by Government Code Section 54233. For those sites that are sold without affordable housing requirements, the City should consider depositing 25% of the proceeds of such sales to the Affordable Housing Trust Fund.			• 2016 Telegraph, 30 market-rate units • 1150 Clay St, 288 market-rate units • 95th and Intl. Blvd., 57 affordable units • Fruitvale Transit Village IIB, 181 affordable units • 3050 Intl. Blvd., 75 affordable units • 12th St. Remainder Parcel, 360 units (108 affordable) The City also issued Requests for Proposals/Notices of Availability (RFPs/NOAs) for seven City-owned sites between 2018 and 2021 and advanced development projects on each of these sites for approximately 1,000 or more additional housing units, many of which will be affordable. Additionally, the City is negotiating with the African American Sports and Entertainment Group for disposition and development of the City's 50% interest in the 120-acre Oakland Coliseum sports complex, co-owned with Alameda County. • 3823-3829 Wood St, 170 units	production. Several viable projects are advancing and will deliver a significant number of new housing units. The City has additional sites in its pipeline that expects to release in coming years.	City staff has determined that this program is effective and will continue to advance current development projects and issue additional RFPs/NOAs in the years ahead.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				• 3823-3829 MLK Jr. Way, 76 units • 73rd & Foothill, 120 units • Barcelona parcel, units TBD • Clara & Edes Homekey, 82 units (proposed) • 36th & Foothill Homekey, 124 units (proposed) • 1911 Telegraph, up to 540 units (proposed) • Coliseum, units TBD		
ACTION 2.7.4	*Utilize 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them into the Affordable Housing Trust Fund (aka "Boomerang Funds").* The State statutes governing the dissolution of redevelopment agencies and the wind-down of redevelopment activities provide for the distribution of former tax-increment funding to taxing entities. The City of Oakland is one of a number of taxing entities	DHCD	Beginning in 2015 and ongoing, 2015-23	The City continues to allocate 25% of Boomerang Funds to the Affordable Housing Trust Fund. These funds are combined with other affordable housing funding and issued through competitive NOFAs.	The policy is a highly effective means of designating funds for affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	that will benefit from Oakland's Redevelopment Agency dissolution. The distribution of property tax will be from the Redevelopment Property Tax Trust Fund (RPTTF) and includes funds not needed by successor agencies to fulfill enforceable obligations. Additionally, there will be distributions to taxing entities sales proceeds and other revenues from the use or disposition of assets of what are now called "successor agencies" (former redevelopment agencies). These funds are called "boomerang funds" and represent a windfall in property tax revenue to the City of Oakland. In late 2013, the City of Oakland committed to setting aside 25% of the funds distributed to the City as a taxing entity under the Redevelopment dissolution and deposit them

	into the Affordable Housing Trust Fund. Starting in 2015, the Affordable Housing Trust fund will begin to receive boomerang funds on an annual basis.					
POLICY 2.8: Rental Assistance						
ACTION 2.8.1	*Expansion of Section 8 Vouchers.* Work with the Oakland Housing Authority (OHA) to obtain additional funding from the federal government for more Section 8 rental assistance for very-low-income renters through documentation of need for additional housing vouchers and contacting decision-makers at HUD if appropriate.	Housing Authority	Ongoing, 2015-23	During 2015, OHA awarded 21 units with project-based voucher assistance for low-income families and households with special needs. The awards were made to Redwood Hill Townhomes and 3706 San Pablo Avenue. OHA received a new allocation of 44 Section 8 vouchers for the Northgate Terrace development to serve additional low-income families. However, since 2016 Section 8 cannot be expanded without additional funding from the federal government, which has not occurred; nor is any funding anticipated in the foreseeable future. In 2021, OHA received an allocation of 515 Emergency Housing Vouchers (EHVs). After receipt of the award, the Executive Director quickly assigned	This program is effective. The OHA does their best to apply for and allocate these vouchers.	This program is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				staff to an interdepartmental team to manage and oversee distribution, placement and utilization of EHVs. With the same urgency, OHA staff led the effort to execute a county-wide Memorandum of Understanding (MOU) to memorialize the important, inter-jurisdictional collaboration to lease approximately 864 Emergency Housing Vouchers. OHA awarded 49 FYI Foster Youth to Independence (FYI) vouchers, ~~that~~which will be effective March 2022.		
ACTION 2.8.2	*City of Oakland Rental Assistance Program.* Support a continued partnership between the City of Oakland and a non-profit agency to provide up to $5,000 in rental assistance grants to distressed tenants impacted by the foreclosure crisis.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing as funds are available, 2015-23	The City partnered with Seasons of Sharing to provide rental assistance and utility assistances to low- and moderate-income Oaklanders and seniors impacted by the foreclosure crisis. This program started in 2013 with three dedicated staff, Seasons of Sharing and 3 Community Groups. The program ended in 2019 due to decreased resources. Note that Oakland Housing Secure, Keep Oakland Housed, and Emergency Rental Assistance Program superseded this program, as discussed in Action 2.2.3 and 2.2.5.	When operated with sufficient staff and fund resources, the program served close to 90 Oakland residents per year.	Households earning 50% or less of median income, especially those earning 40% or less are most likely to require rental assistance. With the appropriate level of resources this program is appropriate based on the

						need of the community.
POLICY 2.9: PATH Strategy for the Homeless						
ACTION 2.9.1	*Provide outreach programs to those who are homeless or in danger of becoming homeless.* The City will continue to provide the Homeless Mobile Outreach Program (HMOP), which provides outreach services to people living in homeless encampments. In addition to providing food and survival supplies, counseling and case management, the HMOP strives to encourage those living in these encampments to access available programs for housing and other necessary assistance to aid in attaining more stable living situations. The City will also continue to encourage outreach as part of the services of providers who are funded through	DHS	Ongoing, 2015-23	Under the City of Oakland Permanent Access To Housing (PATH) Strategy, Homeless Mobile Outreach Program (HMOP), regular outreach is conducted to assess the needs of unsheltered persons in encampments, transition aged youth (TAY), and the general homeless population to not only assess their needs but also to also provide the intervention necessary to direct homeless/unsheltered persons to housing options, health services and other human services. In early 2021, the City's Homeless Mobile Outreach Program (HMOP) was expanded substantially, doubling FTE staff to 10 front line workers, and amended the scope of work to reflect the City's priorities more explicitly. In so doing, the make of the outreach team is as follows: • Specialist Mobile Outreach (SMO): Three teams of up to 3 staff members principally tasked with engagement and	DHS staff believe that this program is effective given its accomplishments during this planning period.	The PATH Strategy will continue to operate to serve the homeless population in Oakland.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				model and supportive actions to increase the health and welfare of encampments and the surrounding community. In 2021, through such outreach efforts approximately 17,914 units of harm reduction supplies including food, water, blankets, fire extinguishers, flashlights, socks, etc. were distributed, that allowed the provision of street-based services to 895 unduplicated, unsheltered persons living in homeless encampments, in their vehicles or on the streets. Over 4,493 units of duplicated outreach and intensive case management efforts were provided to the 895 unduplicated unsheltered persons. From the outreach services to the unsheltered, 43 individuals successfully exited homelessness to positive housing destinations including permanent housing, transitional housing, shelters, and respite.		
ACTION 2.9.2	*Support programs that help prevent renters from becoming homeless.*	DHCD; DHS	Ongoing, 2015-23	The Oakland PATH Rehousing Initiative (OPRI) Program is a partnership with the Oakland Housing Authority, the City of Oakland & several homeless	DHS staff believe that this program is effective given its	~~,~~ DHS continues to provide this service as

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	The City will support organizations that operate programs that prevent homelessness by providing emergency loans or grants for first and last month's rent for renters, security deposits, counseling, legal assistance, advocacy and other prevention services for those dealing with default and delinquency rental housing issues. Prevention services and programs will be funded under the City's adopted PATH Strategy to end homelessness. The City will investigate the possibility of establishing a funding source for an expanded rapid rehousing program both as a means to keep individuals and families at risk of falling into homelessness, as well as to improve the City's ability to rapidly rehouse those who do fall into homelessness; this could include short term			service provider agencies. OPRI provides housing subsidies (funded by OHA) & intensive case management (funded by the City of Oakland) to multiple populations experiencing homelessness in Oakland. OPRI served a total of 159 participants in FY 2020-2021. This included people living in encampments (46), people living in encampments with serious mental illness (19), seniors (8), re-entry clients (29) households with children (Abode) (7), Transitional Age Youth (23) and family households (BFWC) (10) including children (BFWC) (19). Between FY 2014-2018. 519 households were served by OPRI and 431 clients were served between FY 2018-2021. In FY 2019-2020 the OPRI Collaboration expanded to include a family services provider, serving 20-40 families per year with housing subsidies and case management. In addition, the City of Oakland funds programs that help formerly homeless individuals maintain housing such as	accomplishments during this planning period.	resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				year, maximum occupancy was reduced by 45 single adult beds to accommodate CDC guidelines for physical distancing/decompression. A total of 234 persons experiencing homelessness utilized the emergency shelter, with 6 individuals exited to Permanent Housing, and 2 to Transitional Housing (with another 13 to temporary stays with friends/family). Society of Saint Vincent de Paul – FY 20-21 Occupancy Totals: Max # of beds available nightly: 45 Max # annual bed nights available: 16,425 Actual bed nights provided: 15,681; 96% <u>Family Matters Shelter</u> Family Matters Shelter is operated by East Oakland Community Project (EOCP) and provides an emergency family shelter with 72 emergency shelter beds for 20-25 literally homeless families at any time. During FY 2020-2021, a total of 117 individuals were served which included		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				59 children. In FY 2020-2021 the City also provided 107 spaces of safe RV parking which served 171 people.		
ACTION 2.9.4	*Provide transitional housing programs to those who are ready to transition to independent living.* The City will continue to fund and support as part of its PATH Strategy, transitional housing programs with services to homeless singles, families and homeless youth. By providing housing with services for up to 24 months, the program's tenants are prepared for more stable and permanent housing. Services provided assist the tenants with issues that prevent them from obtaining or returning to self-sufficiency.	DHS	Ongoing, 2015-23	The City has continued to provide transitional housing and supportive services to individuals (including single adults), youth, and families. Community Cabins were established to provide individuals living in encampments with a specific location where they can stay temporarily. Residents are housed in temporary structures. Each site serves up to 40 individuals at a time for up to 6 months. Services included wash stations, portable toilets, garbage pickup, and housing navigation (case management) services. Program goals are to increase health and safety of residents, to connect residents with mainstream services and the mainstream homeless response system, and to end the unsheltered status of residents. The pilot program began in December 2017 with the opening of the first site at 6Th & Castro (known as Castro	DHS staff believe that this program is effective given its accomplishments during this planning period.	Department of Human Services will continue to support transitional housing programs while working to help families and individuals gain access to permanent housing. This program will continue as resources are available.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Community Cabins). In May 2018, a second site was opened at 27th & Northgate (known as Northgate Community Cabins). The 6th and Castro site was closed in January 2019, two more programs opened during the 2018/19 operating year; Lake Merritt Community Cabins in October 2018, and Miller Community Cabins in January 2019. Three more sites opened in FY 19/20, Mandela Parkway North, Mandela Parkway South, and Oak St. Community Cabins. As of March 2020, the Lake Merritt Community Cabins were decommissioned and currently five sites are operating Citywide. In response to the COVID-19 pandemic approximately 10-12 beds are taken offline to afford single occupancy units for those who are medically fragile. The reduction of maximum occupancy in leads to approximately 182 beds total available. In addition, the 2020-2021 FY led to significant reduction in positive outcomes as a result of the multitude of challenges presented during the global pandemic including but not limited to; staffing shortages, COVID-exposures and infections,		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				shelter in place, eviction moratoriums, reduced housing availability, etc. The data below is presented for FY 2020/2021: • 428 unduplicated clients served • 253 of those have been homeless one year or longer • 72 exited to permanent housing locations • 121 exited to transitional housing/temporary locations		
ACTION 2.9.5	*Support development of permanent housing affordable to extremely-low-income households.* The City will continue to seek ways to provide permanent housing affordable to extremely low income households, by supporting funding from the state and federal levels. The City will also take actions to address barriers to the development of such housing. The City will continue to participate in	DHCD	Ongoing, 2015-23	The City of Oakland's NOFA for New Construction of Multifamily Affordable Housing includes a threshold requirement that 20% of units be affordable to Extremely Low-Income Households. Projects may be awarded additional points for exceeding this threshold (up to five points for rental projects, and up to 12 points for ownership projects). Rental projects can receive additional points for serving people with special needs (5 points) and for offering permanent supportive housing units for the formerly homeless (5 points).	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	the Alameda County-wide efforts that have evolved from a County-Wide Continuum of Care Council to the Alameda County EveryOne Home Plan, a road map for ending homelessness.			The City also coordinates its scoring criteria and funding pipeline with the Oakland Housing Authority, which awards Section 8 rental subsidies, in order to further support the creation of units affordable to extremely-low-income households. The City also continues to participate in the Alameda County-wide efforts under the EveryOne Home Plan, a road map for ending homelessness. The City will continue to seek ways to provide permanent housing affordable to extremely low-income households, by supporting funding from the state and federal levels, and take actions to address barriers to the development of such housing.		
ACTION 2.9.6	*Coordinate actions and policies that affect the extremely low income population of Alameda County.* The City will continue to participate in the Alameda County-wide efforts that have evolved from a County-wide Continuum of Care Council to the Alameda County EveryOne Home	DHCD; DHS	Ongoing, 2015-23	The City continues to participate in the Alameda County-wide efforts under County's Racial Equity Systems Modeling and Home Together plan. The Racial Equity System Modeling was completed in 2019. The City also issued its own five-year framework to address homelessness in 2019. The City has been a strong partner with Everyone Home and Alameda County in the development and implementation of a Coordinated	DHS and DHCD Staff believe that this policy goal is effective to publicly state the City's involvement and support of regional efforts.	DHS and DHCD will continue to support collaboration among City Departments and other regional, State and federal efforts.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Plan. The EveryOne Home Plan is a coordinated regional response seeking to streamline use of the county's resources and build capacity to attract funding from federal, state and philanthropic sources. The City will also participate in the County-Wide system redesign process.			Entry System for homeless services. Coordinated Entry is a standardized method to connect people experiencing homelessness to the resources available in a community. Coordinated entry processes help communities prioritize housing assistance based on vulnerability and the severity of housing barriers to ensure that people who need assistance the most receive it in a timely manner.		
ACTION 2.9.7	*Advocate for policies beneficial to the extremely low income and homeless populations of Oakland.* The City continues to advocate for an expansion of Federal funding for the Section 8 program "Moving to Work" as implemented by the Housing Authority under the title "Making Transitions Work" Program (both with the same acronym MTW). The City is an active partner in the implementation of a county-wide housing and services plan (EveryOne Home Plan) for extremely	DHCD; DHS	Ongoing, 2015-23	Oakland began providing Coordinated Entry for literally homeless families in the fall of 2015. Coordinated entry for all homeless populations in Oakland began in the fall of 2017 and is managed by the County as of FY 2020-2021. DHS continues to participate in monthly calls of West Coast cities, led by the U.S. Interagency Council on Homelessness. These calls provide opportunities for sharing and learning about new innovative and effective practices to address homelessness as a City jurisdiction. DHS continues to work closely with the County and CoC to address homelessness locally. DHS also maintains memberships and/or supports the following agencies:	DHS staff believe that this policy goal is effective to publicly state the City's involvement and support of Citywide efforts.	DHS will continue to support collaboration among City Departments and with other City agencies including the Oakland Housing Authority.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	low income and homeless persons.			National Alliance to End Homelessness; Housing California; Corporation for Supportive Housing; East Bay Housing Organizations; and other federal and State initiatives to end homelessness.		
ACTION 2.9.8	*Sponsor-based Housing Assistance Program.* Work with the Oakland Housing Authority to assist households that otherwise might not qualify for or be successful in the traditional Public Housing and/or Section 8 programs by partnering with agencies to provide service enriched housing options that increase housing choice for special needs populations.	Oakland Housing Authority	Ongoing, 2015-23	The OPRI program, which began in 2010, has successfully housed 650 formerly homeless Oakland residents with subsidies provided by the Oakland Housing Authority (OHA) and services and program administration contracted by the City of Oakland. The COVID-19 pandemic greatly impacted the OPRI program in different facets. There was a decrease in the number of exits/step downs due to the need to remain housed under shelter in place conditions. There was also a decrease in youth participants due to extensions to exits from foster care. Lastly, the loss of jobs and economic impacts of the pandemic were experienced by OPRI clients. However, overtime participants have been able to secure housing, find full time employment, enroll back in	The action is fully effective.	The action is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				school and obtain support needed to address mental and emotional needs.		
POLICY 2.10: Promote an Equitable Distribution of Affordable Housing throughout the Community						
ACTION 2.10.1	*Provide Incentives for Location of City-Assisted Developments in Areas of Low Concentration of Poverty.* In its annual competitions for the award of housing development funds, the City will give preference to projects in areas with low concentrations of poverty.	DHCD – Housing Development Services	Ongoing, 2015-23	The City's New Construction of Multifamily Affordable Housing NOFA awards points to projects that help advance geographic equity (5 points) and are located in neighborhoods with strong educational quality (5 points).	The action is a necessary but not sufficient tool for advancing geographic equity.	The action is appropriate to Housing Element goals.
POLICY 2.11: Affordable Housing Preference for Oakland Residents and Workers						
ACTION 2.11.1	*Oakland Resident and Worker Housing Preference Policy Resolution.* Continue to give first preference to households with at least one member who qualifies as a City of Oakland resident or worker. All other households will get second preference. There is no minimum length ~~or~~of residency or employment in Oakland to qualify for the	DHCD	Ongoing enforcement, 2015-23	The City of Oakland continues to monitor the marketing plans and waitlist preferences of affordable housing to ensure that Oakland residents and workers are given preference. The City also continues to ensure that this standard was met for the First-Time Homebuyer Mortgage Assistance Program. In 2016 the City updated a displaced person preference and a neighborhood preference. The City is	The policy is fully effective.	The policy is consistent with the objective of providing housing for Oakland residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	resident or worker preference. The owner, developer, or leasing agent of each housing development will be required to verify residency and/or employment by collecting a Certification of Eligibility with the required documentation. The preference policy will be applied only if and to the extent that other funding sources for the housing project permit such a policy.			pursuing Alameda County approval for the application of Oakland's resident preference for Measure A1 Funded Affordable Housing Developments.		
GOAL 3: Remove Constraints to the Availability and Affordability of Housing for All Income Groups						
POLICY 3.1: Expedite and Simplify Permit Processes						
ACTION 3.1.1	*Allow Multifamily Housing.* Continue to allow multifamily housing by right (no conditional use permit required) in specified residential zones and by conditional use permit in specified commercial zones.	Bureau of Planning	Ongoing, 2015-23	Continuing through 2021, multifamily housing continues to be permitted in Oakland.	Oakland's Planning Code has permitted multifamily housing, particularly on certain commercial streets, for decades. The zoning is effective: there have been numerous	Multifamily housing development is a long-standing policy of the City of Oakland, and that is an appropriate policy to enact the Oakland General Plan's policy of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					multifamily developments built in Oakland.	concentrating new multifamily housing on the commercial streets and corridors. Staff is looking to make further changes to City regulations to expand opportunities for "missing middle" housing by permitting additional densities in single-family zones.
ACTION 3.1.2	*Special Needs Housing.* Pursuant to Government Code Section 65583(a)(5), transitional and supportive housing must be considered a residential use of property and must be subject only to those restrictions that apply to other residential dwellings of the same type in the same zone. The City of	Bureau of Planning	Transitional and Supportive Housing review and update: By December 2015	The City's Planning Code continued to permit transitional housing in compliance with State law and allows emergency shelters by right in limited segments of the Residential Mixed Use, Urban Residential, Neighborhood Center, Community Commercial, Broadway Retail Frontage District Interim Combining Zone, Medical Center, Housing and Business Mix, and the CIX-1, CIX-2, IG, and IO Industrial	The zoning text amendments to the definitions for transitional and supportive housing will facilitate clarity during the development review process for these types of activities.	The legislation was prepared in response to State law, and is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Oakland amended its Planning Code in July 2014 to comply with this provision. The City's Planning Code will be evaluated and amended as appropriate for consistency with these requirements. Pursuant to Government Code Section 65583 and 65589.5, City of Oakland will allow emergency shelters by-right as indicated in the Oakland Planning Code Section 17.103.015.		Allowing Emergency Shelters By-Right: Ongoing, 2015-23	zones as codified by Ordinance No. 13248 (adopted July 15, 2014). Further, the Reasonable Accommodations policy and procedure formalized the process for persons with disabilities to seek exceptions to the zoning rules to promote equal access to housing.	Permitting emergency shelters by right assists with providing housing opportunities for Oakland's homeless population.	
ACTION 3.1.3	*Discretionary Permits.* Continue to implement discretionary permit processes (design review, conditional use permits, etc.) in a manner that includes explicit approval criteria and approval procedures that facilitate the development of multifamily and special needs housing in appropriate areas of the City.	Bureau of Planning	Ongoing, 2015-23	The Planning and Building Department continues to issue discretionary design review permits for all new housing, except for Accessory Dwelling Units (ADU's) which are issued ministerially over the counter. For Special Needs housing, in 2016, the Planning and Zoning Division adopted amendments to the Oakland Planning Code ensuring that transitional and supportive housing is treated in the same manner as other housing facilities in the same zone.	Planning staff routinely ~~uses~~use the design review and other checklists when approving projects, and will continue to do so. These checklists are given to the public in advance of a project application, so	To ensure a consistent set of design principles which apply to new residential development citywide, it is appropriate to have standard checklists for staff to review projects. It is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				The City's reasonable accommodations procedure was also adopted in 2014, providing flexibility in the application of the Planning Code for individuals with a disability. While the Bureau of Planning manages a few residential development entitlements under SB330 and prioritizes processing of affordable housing and all residential development applications, efforts to streamline review are challenged by the lack of objective design guidelines and adequate staffing to process applications efficiently and effectively.	they are also a tool for informing applicants about the standards and expectations of the City Planning division. If the City Council adopts the proposed ordinance to clarify that transitional and supportive housing (for six people or fewer) is a residential use, then applicants for transitional and supportive housing would not be required to obtain a conditional use permit, if their facility houses less than six people. While the Bureau prioritizes processing of residential development	amend the Oakland Planning Code to specifically clarify that the provisions of SB2 with regards to transitional and supportive housing apply to the Oakland Planning Code. The City is looking to make further types of housing subject to ministerial approval upon adoption of Objective Design Standards in late 2022/early 2023.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					application, lack of objective design guidelines and lack of adequate staffing limit the ability to further achieve this goal.	
ACTION 3.1.4	*"One-Stop" Permit Process.* Continue the "one-stop" permit process that provides coordinated, comprehensive, and accurate review of residential development applications. Ensure coordination between different City departments, provide for parallel review of different permits associated with projects, and provide project coordinator services to expedite project review when needed.	Bureau of Planning	Ongoing, 2015-23	This process was implemented within the Bureaus of Planning and Building throughout the period. In 2021, the City launched a "Re-Imagining One Stop Permitting" (ROSP) initiative to coordinate and align permitting processes across several City departments, including: Planning and Building, Oakland Department of Transportation, and Oakland Public Works. This effort was implemented in early 2022.	This action is an effective method of providing coordinated, comprehensive, and accurate review of residential development applications.	The action is appropriate to the housing element.
ACTION 3.1.5	*Assign Priority to Affordable Housing*. Continue to assign priority to the review of affordable housing projects through an	Bureau of Planning	Ongoing, 2015-23	The City continued to implement this process during the planning period. Permit applications for affordable housing developments, as with other multifamily projects, are "deemed complete" within 30 days of submittal.	Planning staff coordinates with the City's Housing staff on design review and land use permitting	Planning staff is appropriately assigning priority to affordable housing projects, when

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	expedited review process and other techniques.			The City processed its first SB35 affordable housing case in 2018, which waives discretionary review for proposals that meet certain criteria, and has continued to process cases under SB35. In 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process. In 2021, the City has prioritized the review of entitlements for affordable housing above most other types of applications. The City currently expedites residential applications in accordance with SB35.	details for affordable housing projects.	they are submitted for entitlements.
ACTION 3.1.6	*Expedite Environmental Review.* Reduce the time and cost of environmental review by using CEQA exemptions, the City's Standard Conditions of Approval, and focused and tiered Environmental Impact Reports, as appropriate.	Bureau of Planning	Ongoing, 2015-23	Oakland uses CEQA exemptions for development projects, where appropriate. See detailed response in Action 1.1.3. In January 2022, new ADU legislation was adopted by City Council to synchronize our regulations with those of the State. In 2019, the City amended the Planning Code to allow emergency	The City is continually evaluating its standards, procedures and permit process to allow development of multifamily, market-rate and affordable	City staff considers streamlined environmental review, within the restrictions of CEQA, to be an appropriate ongoing project for staff.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				shelter facilities to be constructed without discretionary review to greatly speed up the process. Reliance on Specific Plan EIRs (such as the Broadway Valdez Specific Plan EIR) for residential and other development applications effectively streamlines environmental review for desired development.	housing, within the restrictions of CEQA.	
ACTION 3.1.7	*Secondary Units.* Continue to encourage the construction of new secondary units and the legalization of existing non-conforming secondary units to bring those units into compliance with current zoning and building standards.	Bureau of Planning	2015-2016	The City has continually adopted new ADU regulations to remain in compliance with State law. Between 2016-2021 (the period during which State HCD has required that jurisdictions report the number of ADUs permitted for the Annual Progress Report) 1,049 ADUs were permitted. In 2021 alone, the City permitted 274 ADUs. Most recently, a proposal went before City Council on December 21, 2021 and was adopted in January 2022 to allow additional building envelope expansion for "small lots," additional height limits to create two-story ADUs, provisions for reduced setbacks, amnesty and enforcement delay	This action has been effective in ensuring there are no local constraints to ADU development. Since the new proposal has not been adopted yet, it is not yet possible to evaluate its effects. It is important to acknowledge that wealthier residents have more resources to create	The proposed ordinance amendments together with the project review streamlining requirement and private and public ADU assistance initiatives are appropriate to support the goals of the Housing Element. Expansion of the private and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				program for currently un-permitted ADUs, and a number of other proposals designed to make creation of ADUs more affordable and more accessible to different income groups. In addition, a new City program administered by Oakland HCD was created to assist lower-income applicants with legalizing their existing un-permitted units. This program has secured a $3M State grant to create more ADUs that are safe to inhabit. Also, a privately-funded program Keys to Equity is helping lower-income applicants—many of whom are Black, Indigenous, and people of color (BIPOC) residents—to build ADUs to either provide a rental income or provide for multi-generational households and remain in the community.	ADUs in general, so additional support for lower-income residents is necessary for equitable distribution of the benefits this new ADU policy will create.	public programs to support the ADU applicants would further enhance access to ADUs for applicants of all income groups.
POLICY 3.2: Flexible Zoning Standards						
ACTION 3.2.1	*Alternative Building Code Standards.* Continue the use of alternative accommodations and equivalent facilitation of the California Building Codes	Bureau of Planning	Ongoing, 2015-23	The City continues to search and to utilize alternative building code standards to remove any constraints to availability and affordability of housing. In 2021, the City allowed	This action is effective.	This action is appropriate; the City will continue to review processes and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	to address the special housing needs of persons with disabilities and to facilitate the rehabilitation of older dwelling units. (See Actions 4.1.1 and 4.1.2 for housing rehabilitation actions and Action 6.2.1 for reasonable accommodations for persons with disabilities).			strawbale construction as alternative construction.		procedures to allow for alternative construction methods.
ACTION 3.2.2	*Planned Unit Development Zoning.* Maintain the provisions in the Planning Code for planned unit developments on sites where the strict application of zoning standards could make development less feasible. Consider reducing the minimum lot area requirement for residential planned unit developments (PUD).	Bureau of Planning	Ongoing, 2015-23	While the City of Oakland has a PUD permit, it does not have PUD zoning. The PUD permit allows for the application of flexible development standards; staff educates applicants about this flexibility and applicants are encouraged to take advantage of these regulations, to ease entitlement of very large development projects that would otherwise be difficult to entitle. During this time period, the PUD permit has been used to maximize residential development at Oak Knoll, Brooklyn Basin, Mandela Station, Lake Merritt BART TOD, Jack London Square, 500 Kirkham, and MacArthur BART. In addition, applicants are currently taking advantage of these regulations for proposals, including Howard Terminal and CCA.	PUD regulations relax standards to allow for ease of delivery of residential development. This policy is effective for entitlement of large sites.	This is an appropriate for easing delivery of large numbers of residential units through a small set of entitlements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 3.2.3	*Flexible Parking Standards.* Study and consider implementing reductions in the parking standards in any future Planning Code revisions. Consider expanding the reduced open space requirements as stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.116.110D) citywide.	Bureau of Planning	2014-2017	In 2015, City staff began public outreach through community meetings to propose new parking standards. In 2016, the City adopted new parking standards, including no parking required in the Central Business District and innovative parking reduction methods in other parts of the city. In 2019, the City reduced the parking requirements for multifamily projects further simplifying the process. Also in 2019, the City amended the Planning Code to allow emergency shelter facilities to be constructed without discretionary review to greatly speed up the process.	The action is effective.	The action is appropriate
ACTION 3.2.4	*Reduced Open Space Requirements.* Consider expanding the reduced open space requirements as stated in the Broadway Valdez District zoning regulations (codified in Planning Code Section 17.101C.050B) citywide.	Bureau of Planning	2014-2017	In 2020, the Draft Downtown Oakland Specific Plan was released, including policies and actions for improving existing open space and parks, as well as allowing publicly accessibly open space to satisfy open space requirements (rather than private open space requirements) and allowing developers to contribute to	These changes have not yet been adopted but are anticipated to be considered in late 2022 to remove constraints to the development of housing and	This is an appropriate step to remove constraints to the development of housing. As described under "Status of

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				off-site open space to provide greater flexibility to meet open space requirements. The zoning regulations that will implement the Downtown Oakland Specific Plan are in development, to be adopted along with the Plan in 2022, and will include open space standards, however, study of significant changes to the DOSP area's open space development requirements will be completed as a near-term implementation step.	encourage provision of publicly accessible open space, which contributes to more livable neighborhoods for lower-income residents.	Implementation, " this program is being considered for expansion into the DOSP area. This action is appropriate for the DOSP area and for further consideration in additional zoning areas.
POLICY 3.3: Development Fees and Site Improvement Requirements						
ACTION 3.3.1	*Project Review Process and Development Agreements.* Continue to require only those on- and off-site improvements necessary to meet the needs of projects and to mitigate significant on- and off-site environmental impacts.	Bureau of Planning	Ongoing, 2015-23	This action is limited in its application but can be very effective. Development Agreements (DA) can allow for delivery of increased and/or expanded affordability for residential projects. There ~~are~~have been no newly adopted DAs since before 2015. There are three DA applications currently under review, including an amendment to the Brooklyn Basin DA.	This policy has the potential to be very effective, depending on policy maker discretion. Staff is currently seeking to boost residential affordability through DA applications.	This action is still appropriate for the 2023-2031 Housing Element period.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 3.3.2	*Development Impact Fees.* Consider transportation, capital improvement and housing impact fees to mitigate impacts on City infrastructure and services while balancing the costs to support new development. The City will be issuing a Request for Proposals (RFP) during the Housing Element planning period for an impact fee study that will consider transportation, infrastructure, and affordable housing. The RFP released July 8, 2014 requires that the contractor do an analysis of residential development costs and the market for both rental and owner-occupied housing in Oakland. (See also Action 2.7.2.)	Bureau of Planning	Ongoing, 2015-23	On May 3, 2016, the City Council adopted the Affordable Housing Impact Fees Ordinance. Development projects submitting building permit applications on or after September 1, 2016, are subject to the fees. ~~In~~On December 24, 2021, the City completed the Annual Report for Fiscal Year Ended June 30, 2020. See this link for the report: https://cao-94612.s3.amazonaws.com/documents/Annual-Impact-Fee-Report-FY-20-21-122421-corrected-page-numbers.pdf On December 24, 2021, the City completed and published the 5-Year Impact Fee Review and Update.	This program has been effective in collecting $17,584,503 in affordable Housing Impact Fees since 2016 and accessing a total of $51,479,953 with an expected additional $33,895,450 to be collected once the developments are under construction and completed.	This program is appropriate for the Housing Element
POLICY 3.4: Intergovernmental Coordination						
ACTION 3.4.1	*Multiple Agency Reviews.* Continue to coordinate multiple agency reviews of residential development	Bureau of Planning	Ongoing, 2015-23	The City continues to coordinate multiple agency reviews of residential development proposals when more than one level of government is	HDS has generally been effective at coordinating among different	This policy is appropriate.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	proposals when more than one level of government is required for project review.			required for project review. When possible, we time the release of our Notice of Funding Available (NOFAs) to be consistent with the timeline of State and federal programs.	governmental agencies in reviewing residential developments.	
ACTION 3.4.2	*Allocation of Project-based Section 8 Units.* Reduce costs and achieve greater cost effectiveness by allocating project-based vouchers, when possible, using an existing competitive process initiated by the City of Oakland, as funding and other program consideration allows.	Oakland Housing Authority	Ongoing, 2015-23	Per this policy, the Oakland Housing Authority matches its scoring criteria for allocation of Project-Based Vouchers (PBV) to the City's scoring criteria for NOFA applications. See www.oakha.org for the Annual MTW FY 2021 report - Activity #06-03 discusses allocation of project-based vouchers through existing competitive processes. Appendix C shows allocations of project-based vouchers across all projects. As of FY 2021, there are 5,135 PBV units allocated. See Action 5.1.4 for more information about voucher allocations.	The policy is an effective means of promoting intergovernmental coordination and maximizing the benefit of voucher subsidies.	The policy is appropriate to Housing Element goals.
POLICY 3.5: Financing Costs						
ACTION 3.5.1	*Access to Low-Cost Financing for Development.* Continue to assist affordable housing developers in obtaining financing for their	DHCD – Housing Development Services	Ongoing, 2015-23	City funds awarded to affordable housing developers are offered on favorable terms, including a 3% simple interest rate, payment of principal and interest due from excess cash flow	The policy is a core component of the City's strategy to provide housing to	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	projects. (See actions under Policy 2.1.)			from operations after payment of operating costs, senior debt, reserves and developer fee, and a 55-year loan term. The City works with affordable developers to set loan terms in a way that will help maximize their ability to leverage funding from banks and other lending agencies. The City also coordinates with developers to help ensure that they qualify for additional funding from county, state, and federal sources. For more information about NOFA funds committed recently, please see Action 2.1.1.	low-income households.	
ACTION 3.5.2	*Access to Low-Cost Financing for Home Purchase.* Continue to implement homebuyer assistance programs for low- and moderate-income households. (See Action 2.2.1.)	DHCD – Housing Development Services	Ongoing, 2015-23	The City continued to operate First-Time Homebuyer Programs as funding was available (either through State funding or through program-related income). In 2021, the MAP program made one loan with the last $15,000 of program funds to assist a first-time homebuyer. In 2015-2021, the programs issued 121 loans totaling $6,782,346. See also Action 2.2.1.	The programs are very effective in assisting low- and moderate-income homebuyers to acquire homes, in slowing the effects of gentrification, and in providing equitable opportunities for ownership and wealth-building	The goals are achieved when down payment assistance is provided to assist low- and moderate-income buyers with low access to assets and credit to secure long term affordable

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					among disadvantaged communities.	housing through ownership, the greater community benefits by retaining a diversity of homeowners including those earning low- to moderate-incomes.
POLICY 3.6: Environmental Constraints						
ACTION 3.6.1	*Remediation of Soil Contamination.* Explore possible funding sources and other ways to assist prospective housing developers in addressing soil contamination on potential housing sites. If appropriate funding can be identified, develop and implement a remediation assistance program.	Housing & Community Development	Investigate potential funding sources	There has been no new action since 2015. The City no longer operates the EPA's Revolving Loan Program due to a lack of staffing and currently identified environmentally -challenged small infill brownfield sites that would qualify for the program. However, the City can re-apply for the program when staffing and sufficient qualifying opportunities are available. As private development projects are proposed, City staff will explore the needs and possibly apply for assessment and cleanup grants for eligible sites, as needed. Other	The policy does not outline a clear plan of action. City staff have carried out or assisted with environmental remediation on an ad hoc basis.	The goal is appropriate but does not delineate a clear program or funding stream for implementation.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				potential funding sources such as the Leaking Underground Storage Tank Fund can also be evaluated for applicability on a site-by-site basis.		
POLICY 3.7: Community Outreach and Education						
ACTION 3.7.1	*Community Outreach Program.* Continue to periodically meet with housing advocacy groups and neighborhood organizations to educate the public on affordable housing and reduce community opposition to affordable housing developments.	Bureau of Planning; Housing & Community Development	Ongoing, 2015-23	The City has continued to regularly attend meetings with East Bay Housing Organizations (EBHO), a local membership organization that conducts advocacy and policy work for affordable housing. It has also held ad hoc meetings with stakeholders about new housing programs and policies as needed. Affordable housing project sponsors are typically required to act as the lead organization in conducting outreach on specific projects, providing evidence of community support as a condition of receiving local and federal funds. The City has also engaged in direct outreach on specific projects on occasion as needed.	While quantitative data is not available to evaluate the effectiveness of community outreach, experience suggests that it has been an effective means of generating support for affordable housing.	While advocacy is an important tool for achieving Housing Element goals, it may not be properly suited to City staff to carry out such goals. The action may need to be refined to clarify role of City.
GOAL 4: Conserve and Improve Older Housing and Neighborhoods						
POLICY 4.1: Housing Rehabilitation Loan Programs						
ACTION 4.1.1	*Rehabilitation Loan Programs for Owner-Occupied Housing.*	DHCD – Residential	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent	The action is an effective means of repairing housing	The action is appropriate; it is aligned with the

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Provide loans for correction of code violations, repair to major building systems in danger of failure, abatement of lead-based paint hazards, minor home repairs for seniors, and emergency repairs, using the following programs: • HMIP Deferred Loan Program • Alameda County Minor Home Repair Grant Program • Emergency Home Repair Program • Lead Hazard Control and Paint Program • Neighborhood Housing Rehabilitation Program • Access Improvement Program • Weatherization and Energy Retrofit Loan Program	Lending Services		on availability of funding for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and Access Improvement Program for disabled homeowners, though existing Rehabilitation Programs.	in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.	Housing Element and preserving and protecting the City's existing housing stock.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.1.2	*Rehabilitation Loans for Owner-Occupied Buildings With 2 To 4 Units.* Use the City's HMIP Loan Program for owner-occupied buildings of 1-4 units. In structures with 2 to 4 units, the rental units may also be rehabilitated using funds from this program.	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide rehabilitation loans to moderate- and low-income homeowners contingent on availability of funding for the correction of major code violations/deficiencies, emergency repairs, and lead-based paint abatement, though existing Rehabilitation Programs.	The policy is an effective means of repairing housing in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.	The policy is appropriate for repairing housing in danger of major code violations/deficiencies, and prevents health risks, community deterioration, and blight.
POLICY 4.2: Blight Abatement						
ACTION 4.2.1	*Anti-Blight Programs*. Implement a variety of programs to reduce blighting conditions that can lead to disinvestment and deterioration of the housing stock. These include enforcement of blight regulations, graffiti abatement, boarding up of vacant buildings, and a Clean Oakland Program.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to neighbor complaints of property maintenance.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.2	*Housing Code Enforcement.* Enforce housing codes to ensure decent, safe, and sanitary housing conditions. Orders to abate will be followed up with additional actions. The City may correct deficiencies itself and then place a lien against the property for the cost of the repairs.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to tenant complaints of housing maintenance.	Given current methods of program execution, at the moment only the most egregious cases need enforcement efforts. The Bureau is moving toward a proactive rental program to conserve/improve the older housing stocks.	The Building Services Department will continue this program and continue to look for more effective and efficient methods of addressing housing violations in the city.
ACTION 4.2.3	*Problem Properties Program.* City Staff will resolve public nuisance housing through joint enforcement actions of Code Enforcement, Police, Fire, and Alameda County Department of Environmental Health. Enforcement actions will include financial penalties and incentives.	Bureau of Building	Ongoing, 2015-23	Code Enforcement Services continues to respond to complaints of property and housing maintenance issues that involve abatement interference with contractors on problem properties.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for additional resources and the department is beginning to add more staff with help from the City's general fund.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.4	*Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program.* The City of Oakland's Foreclosed and Defaulted Residential Property Registration, and Abatement Program (O.M.C. 8.54) requires owners or the beneficiary and/or trustee pursuing property foreclosure and/or their agents to register, inspect, and potentially maintain their residential properties to protect the health and safety, livability, appearance and social fabric of our neighborhoods. Code Enforcement ~~pro-actively~~proactively monitors registered properties for trespassers, blight, pollutants, and vectors. Enforcement actions include financial penalties for un-maintained properties or registration violations.	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	In 2015—since the Foreclosed and Defaulted Residential Property Registration, Inspection and Maintenance Program was strengthened to include defaulted properties in the fall of 2012—over 3,000 foreclosed or defaulted properties were registered (with 700 remaining active). The City continues to operate this program, although the number of registered properties decreased significantly over the period. In 2021, about 31 foreclosed or defaulted properties were registered.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.5	*Tax Default Properties Program.* City staff will continue to work with the Alameda County Tax Collector, to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The program takes advantage of the City's right of first refusal to purchase such properties. This program allows for City to leverage its investment of Code Enforcement dollars by targeting third party purchases to small local developers of vacant problem properties. The goal of this program is to quickly rehabilitate housing stock for resale to affordable housing qualified applicants.	Bureau of Building	Ongoing, 2015-23	During this period, City staff supported the Alameda County Tax Collector in its efforts to auction properties that are both tax defaulted and that have extensive Code Enforcement liens. The City encouraged and supported, where possible, non-profit partners to exercise their right of first refusal to purchase and rehabilitate such properties. The goal of these actions was to facilitate the rehabilitation and reuse of existing, distressed housing stock. The City does not intend to exercise its own right of first refusal and take title to such properties, so as to avoid complications and delays that may arise from public ownership and focus limited City resources on other higher-impact housing actions. In January 2022, DHCD received a Breakthrough Grant from San Francisco Foundation to support a fellow and a community partner in creating an emerging developer program, part of which would look at the tax defaulted properties as a potential source of projects for emerging developers.	The City conducted a pilot program to purchase and rehabilitate tax defaulted properties with a non-profit partner beginning in 2012. Since that time, however, the City has continued to pull properties from auction but has not consistently followed through in purchasing and rehabilitating the subject properties due to lack of resources, loss of institutional memory and other factors.	Acquisition and rehabilitation of distressed properties benefits when driven by small, nimble and focused actors. It is more appropriate at this time that the City defer to, encourage and, where possible, support its partners in purchasing tax defaulted properties rather than itself purchasing such properties.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.2.6	*Investor-owned Property Registration, Inspection and Maintenance Program.* The City of Oakland's Investor-owned Residential Property (IORP) Registration, Inspection and Rehabilitation Program (O.M.C. 8.58). In order to address the decline of neighborhood livability and health and safety problems that have arisen from high levels of foreclosure activity in Oakland, the Oakland City Council passed an ordinance designed to address issues of deferred maintenance or property neglect associated with properties in the foreclosure process. This program requires non-owner occupant buyers of properties that have a default or foreclosure history to register and arrange for an inspection by Building Services. A City inspector will then assess whether the property	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	Designed to manage the downstream effects of foreclosure, the IORP program was implemented in March of 2013 to enforce the registration, City inspection, and abatement requirements contained in OMC 8.58. The majority of violations found during these inspections have been related to blight and vandalism incurred during the foreclosure process and unpermitted work performed by the former owner or the investor that purchased the property with the intent to re-sell. In 2021, about 19 investor-owned properties were registered.	The program is effective with the proper resources.	The City's Building Services department will continue the programs and look for improvement to the program.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	conditions meet the local building or housing codes or whether blight abatement or rehabilitation work is needed. If the property is found to be in violation of City code requirements, the inspector will work with the new owner on an abatement plan.					
POLICY 4.3: Housing Preservation and Rehabilitation						
ACTION 4.3.1	*Historic Residential Building Relocation.* Notify the public of the opportunity to purchase and relocate a residential building, prior to its demolition for a public improvement project.	Bureau of Planning	Ongoing, 2015-23	Historic Preservation Element Policy 3.7, 'Property Relocation Rather Demolition,' recommends 'reasonable efforts to relocate the properties to an acceptable site' and references relocation effort as a 'standard condition of approval for... removal of any residential building' at the time the Historic Preservation Element was written. Requirements include advertising buildings' availability and contributing what would have been the cost of demolition toward the move. Work is entirely in the private sector as there are no City funds available to support these efforts financially. The main obstacles include finding available land, purchasing that	In 2015 three houses were moved to new sites where they continued in low-density residential use. Availability of land was by chance, where nearby owners happened to have sites. Two houses were displaced by Children's Hospital expansion and one in Fruitvale was accepted by an owner whose	Building moves occur very rarely, unless there is a major dislocation such as the 980 freeway construction that sent houses to both Preservation Park (museum and office uses) and to Oak Center (residential) under Redevelopment'

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				land, and approving a complicated array of permits quickly.	previous building had burned. Since then, there have been several efforts to relocate houses in West Oakland and the Broadway Valdez Specific Plan area, but development pressure seems too great to find available move-on sites or get the older buildings incorporated into new high-density development projects.	s auspices in the 1980s. This is an appropriate way to conserve housing stock, but will never affect a large number of units unless large amounts of land somehow become available. Regardless, the City will continue to keep this policy under the auspices of the Planning and Building Department.
ACTION 4.3.2	*Housing Repairs for Seniors and People with Disabilities.* Support home repair program offered by a local nonprofit organization to assist low-income seniors and people with disabilities to remain independent by rehabilitating their homes.	DHCD – Community Development Block Grant Program	Consider funding program in next Housing Element Program Round	The City continued to provide rehabilitation loans and grants to moderate-, low-, and extremely-low-income homeowners including seniors and people with disabilities for the correction of major code violations/deficiencies, emergency repairs, lead-based paint abatement, and accessibility modifications.	This program has been effective in assisting senior citizens and people with disabilities with housing rehabilitation so that they may	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Citywide services are contingent upon award of funding.			Program availability is contingent on funding availability. A program specifically targeting only low-income seniors would require additional funding sources for implementation.	remain in their homes.	
ACTION 4.3.3	*Access Improvement Program.* Provide grants to owners of rental and owner-occupied housing to make accessibility modifications to accommodate persons with disabilities.	DHCD – Residential Lending Services	Ongoing, 2015-23	The City continued to provide Access Improvement grants to low- and extremely-low-income homeowners and tenants contingent of funding availability. Grant funds are designated for accessibility modifications to accommodate persons with disabilities.	This program has been effective.	The policy is appropriate to Housing Element goals in supporting seniors and disabled homeowners.
ACTION 4.3.4	*Scattered-site Single Family Acquisition and Rehabilitation Program.* City staff and non-profit partners have developed the Oakland Community Buying Program that will address vacant or abandoned housing due to foreclosures or property tax liens. Startup funds for this program have been identified. Funding will be used to provide long term affordability of new housing developed. The final housing products will be single family	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Oakland Community Buying Program acquired 26 sites in 2017 and of those, 24 were placed for development and sale to moderate income homebuyers through the Oaktown Roots Affordable Homes pilot program. In calendar year 2021, the Oaktown Roots pilot program received 5 applications. Six households completed purchases of newly built single-family homes that were previously blighted lots. One additional home is nearly complete, and 5 parcels remain to be developed. In the period 2015-2021 there were 18 units developed and closed.	The program has been effective at turning blighted properties to new construction single-family dwelling for larger households.	The mechanism to clear liens and use developer capital to create single-family dwellings remains feasible, however will need review if development costs continue to rise faster than incomes in the area. In 2021 the feasibility was reduced due

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	homes for re-sale, lease-to-own, or for rent (see also Action 2.2.2).			In 2021, the Oakland Community Land Trust was awarded $4,050,000 for three projects totaling 22 units and a Scattered Site Single Family Lease to Own Project, dedicated to the creation and preservation of affordable housing. The funds are available thanks to the 2016 voter-approved City Bond Measure KK. Oakland Community Land Trust (OakCLT) and the Bay Area Community Land Trust (BACLT) will develop four projects that preserve affordable housing for 28 Oakland households earning up to 80 percent of Area Median Income (AMI), or $73,100 for a single-person household. See also Actions 2.2.2 and 2.2.4.		to steep development cost increases; a ~~boot~~boost of subsidy may be needed to maintain feasibility of future projects using this model.
ACTION 4.3.5	*Continuing Implementation of Mills Act Contracts.* The City will continue to offer several Mills Act contracts a year to stimulate the restoration and maintenance of designated historic properties through	Bureau of Planning	Ongoing, 2015-23	Owners receive a property tax reduction in exchange for a long-term contract to put the property's tax savings into the rehabilitation of the building. The program was adopted as a recommended action of the West Oakland and Central City East Redevelopment Plans, though it is not restricted to those areas. The property	As of 2021, the fourteenth year of the program, there are about 92 residential properties (out of 97 properties total) with recorded Mills Act	This program is an appropriate and popular way to conserve and create housing stock, though it will never affect a vast number of units. Program

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	property tax reductions, as authorized by State law.			must be a Designated Historic Property. The designation by Landmarks Board often occurs concurrently with the Mills Act application. Oakland's first Mills Act contracts were recorded in 2008.	contracts. The largest number are in Council Districts 2 and 3, where Oakland's oldest and largest buildings are concentrated. The City ordinance establishes annual caps on tax revenue reductions, and the practical limit on new contracts is usually about ten a year. The tax assessment formula established by State law favors recent buyers with high assessments over longtime owners. Building rehabilitation is assisted not only by the Mills Act tax savings, but by the eligibility of	participation requires a fairly high level of planning and building sophistication and long-term commitment and follow-through. Work under the Mills Act has included seismic strengthening, reversal of inappropriate alterations, residential conversion of commercial and industrial buildings, and restoration and reactivation of a large blighted and abandoned former rest home near the 580 freeway.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					historically designated properties to use the performance-based California Historical Building Code.	
ACTION 4.3.6	*Rehabilitating Public Housing.* Focus investment of Oakland Housing Authority's Making Transitions Work funds into rehabilitating current public housing or project-based voucher units in order to increase housing options for low-income families, improve the quality of housing for families, and improve the neighborhoods and communities surrounding the housing.	Oakland Housing Authority	Ongoing, 2015-23	OHA continued to rehabilitate affordable housing units during the period. Oakland Housing Authority (OHA) also plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. OHA intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers.	This policy action is effective. During the State's economic and foreclosure crisis, OHA preserved 1,615 former public housing units by moving the 249 properties onto the Section 8 Project Based rental assistance program through HUD's Section 18 Disposition process, which dramatically increased the operating revenue to the properties allowing for their on-going	This policy action is appropriate to the housing element. With HUD defunding the operating funds for both maintaining and rehabilitating public housing inventory, OHA has pursued multiple strategies such as Section 8 disposition and RAD conversion to convert and preserve affordable housing stock to more financially

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				OHA uses MTW funding flexibility to address deferred maintenance in its PBV portfolio, OAHPI, and typically averages between 50-75 major unit rehabilitations annually, both preserving and improving this housing stock. In FY 2021, OHA continued the substantial rehabilitation of the following affordable housing projects: • Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. • Harrison Towers was also approved for disposition and during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax	replacement and restoration. A long outstanding disposition application that was originally submitted in 2010 was revamped, resubmitted, and approved in FY 2019 to dispose of 253 units of public housing across three senior sites and planning for the extensive rehabilitation was ongoing during the FY. Following that model, during FY 2019 OHA planned for the conversion of 261 public housing units in mixed finance developments and plans were created to convert to RAD Section 8 Vouchers beginning in late	viable programs with more flexible financing options.

				Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022.	2019. These strategic moves have positioned the agency to be successful through future funding challenges allowing the agency to be less reliant on threatened funding streams and to generate revenue to sustain the agency going forward.	
ACTION 4.3.7	*Proactive Rental Inspection Policy.* Develop new policy to require registration and inspection of existing City market-rate rental units to confirm code compliance and habitability.	DHCD – Housing Assistance Center/Strategic Initiatives	Program implementation beginning 2014-15	The Safe Housing Inspection Pilot Program (SHIP) concluded in 2016 – proactively inspecting approximately 1,200 rental units in 140 buildings. In 2021, the program development process is almost completed for implementation to inspect 20% of all rental units.	The program will be implemented upon approval from the City Council.	The program will be implemented upon approval from the City Council.
ACTION 4.3.8	*Mitigate Loss of Units Demolished by Public or Private Actions.*	DHCD; Bureau of Planning	Program implementation	Planning Code Section 17.102.230, which requires a Conditional Use Permit and the provision of replacement units if Residential Hotel	This action has been effective in preventing demolition of	This action is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Consider developing a new policy to comply with the spirit of Government Code 65583(c)(4) that states: "Conserve and improve the condition of the existing affordable housing stock, which may include addressing ways to mitigate the loss of dwelling units demolished by public or private action."		beginning 2015	Units are converted or demolished, was not changed in 2021. In 2021-2022, the Planning & Building Department has been in the process of updating the City's existing Density Bonus Ordinance in compliance with State law (California Government Code Sections 65915 through 65918). This includes a provision clarifying implementation of required replacement units in density bonus projects when existing rent-controlled or affordable units will be demolished. In addition, in 2021, the Planning Bureau updated its basic application form to include questions for all applicants (regardless of the type of project they are applying for) about whether there are existing tenants and/or affordable units on site, and whether any tenants will be displaced due to the project. See also Action 5.4.1.	Residential Hotel units. In addition, implementing the new provisions of State Density Bonus law and updating the basic application for projects is effective by alerting Staff of existing conditions and the applicants of requirements for the replacement of affordable and rent controlled units.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 4.3.9	*Seismic Safety Retrofit Policy.* Develop and explore funding sources for a new seismic retrofit policy, coupled with tenant protections, to preserve about 14,000 soft story housing units in Oakland's flatland neighborhoods at risk for destruction in a major earthquake. A low interest loan fund may be possible through combining available public monies with private capital or alternatively through issuing a new bond, which would require voter approval.	DHCD; Bureau of Planning	Program implementation beginning 2015	Two applications for FEMA Hazard Mitigation Grant Program (HMGP) funding were applied for in 2016 and $4.5MM for each was awarded in 2018, providing 9MM total in administrative and project cost reimbursement for two seismic retrofit programs: Earthquake-Safe Homes Program (ESHP: One- to four-unit owner-occupied homes) and Safer Housing for Oakland Program (SHOP: Five plus unit soft story apartment buildings). The programs provide up to 75% reimbursement to owners after retrofit completion. Both programs close in March 2022. A new application for additional HMGP funds for SHOP ~~is being~~was submitted in Spring of 2022, to re-fund the program for an additional 3 years.	Both SHOP and ESHOP have been very effective, even with the challenges introduced in 2020 by COVID-related health and financial instability and associated contact restrictions. In just over 3 years, SHOP expects to retrofit 39 buildings affecting 586 households. ESHP will retrofit 121 buildings affecting 145 households. Both programs together have made housing for 707 Oakland households safer and more stable.	Both programs are closely aligned to City priorities of preserving existing units and keeping residents safely and affordably housed. Most single-family owners would not be able to retrofit without assistance, especially if foundation work is required. Those that are the least likely to be able to afford to retrofit, will also be the least able to find temporary housing, rebuild, and recover financially in the event of earthquake

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						damage. Most soft-story building owners are in lower-income areas and all are restricted by rent control, with tenants who have similar displacement and recovery challenges as homeowners. Apartment building owners may struggle to finance what is now a mandatory retrofit required by City ordinance and many are non-compliant or applying for an extension due to financial hardship. Without

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						financial assistance, the buildings could remain at risk, or the financial burden of the required seismic retrofits is likely to be passed to tenants in the form of reduced property maintenance and rent increase due to capital improvement pass-through.
POLICY 4.4: Anti-Displacement of City of Oakland Residents						
ACTION 4.4.1	*Consider Developing a Standard City Tenant Relocation Policy and Fund City Program Operations.* The City has a number of ordinances that have tenant relocation assistance requirements, including under code enforcement activities, condo	DHCD – Housing Assistance Center/Strategic Initiatives	FY 2014-15	The City continued to enforce the Uniform Residential Tenant Relocation Ordinance adopted in 2018. The City continued to fund a program providing advisory and financial assistance to tenants displaced as a result of a code compliance action, including paying relocation benefits in the case that a property owner does not meet their obligations, subject to availability of	The policy has been fully implemented and is effective.	The policy is appropriate to Housing Element goals. Since the policy has been fully adopted, this item should be revised in future cycles to focus on

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

	conversions, Ellis Act, Just Cause for evictions, and SRO conversions. City of Oakland will consider 1) establishing one standard policy across tenant relocation requirements, such as code enforcement, condo conversions, Ellis Act, Just Cause for evictions and SRO conversions, 2) explore new strategies to fund and recover relocation costs, and 3) allocate and fund adequate staffing to monitor relocation programs and recover costs from responsible landlords.			funds. City staff also operate a program to assist low-income and low-asset small property owners who are required to pay relocation benefits resulting from an owner or relative move-in but would face a financial hardship to do so.		maintenance or identify new goals.
GOAL 5: Preserve Affordable Rental Housing						
POLICY 5.1: Preservation of At-Risk Housing						
ACTION 5.1.1	*Monitoring and Preservation.* Monitor the status of federally assisted projects to identify those at-risk of converting to market-rate housing. Monitoring will include analysis of HUD data, a survey of building owners	DHCD – Policy and Programs	Annual, 2015-23; City will identify projects at highest-risk each year (that could	The City is not aware of any restricted affordable units that converted to market-rate, and did not receive advance notice of an intent to terminate use restrictions on assisted housing. Staff have not had capacity to research or monitor the conversion of such units.	The policy is effective, but only rarely needed. Please note that staff have not had capacity to research or monitor the	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and managers to determine the likelihood that a building will convert, and consultation with the California Housing Partnership Corporation. Under California State Law, owners must provide tenants and the City with 12 months advance notice of an intent to terminate use restrictions on assisted housing.		convert within the next 24 months)		conversion of such units.	
ACTION 5.1.2	*Contact With Owners of At-Risk Buildings.* Contact owners to advise them of notification requirements under State law, to offer to assist them in pursuing higher Section 8 rents from HUD, and to encourage them to work with the City to facilitate preservation purchases of their properties by interested parties.	DHCD – Policy and Programs	Annual, 2015-2023; City will identify projects at highest - risk each year (that could convert within the next 24 months)	See Action 5.1.1; In 2021, staff did not have capacity to research or monitor the conversion of such units. Five properties were listed as "At-Risk" or questionable in Table 3-54 of the 2015-2023 Housing Element: • Lottie Johnson Apts (970 14th St) • San Pablo Suites (2551 San Pablo Ave) • Santana Apts (2220 10th Ave) • Taylor Methodist (1080 14th St) • The Claridge Hotel (634 15th St)	The policy is effective. A new search for at-risk properties will need to be identified in the next cycle.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Of these properties, San Pablo Suites was destroyed in 2017 due to fire. The Claridge Hotel is classified as a residential hotel and is thus now subject to the City of Oakland's Ordinance No. 13509 regulating the demolition, conversion, and rehabilitation of residential hotels. Santana Apartments is owned by Mercy Housing, a nonprofit affordable housing developer committed to preserving affordable housing. Although CTCAC affordability requirements will expire before 2023, the property also has a Ground Lease with affordability restrictions through 2067. Lottie Johnson Apartments and Taylor Methodist are both funded by HUD. A HUD representative confirmed via email on 3/19/2020 that neither property should be considered at risk.		
ACTION 5.1.3	*Financial Assistance for Preservation Projects.* Award preference points under the City's Housing	DHCD – Housing Development Services	Ongoing, 2015-23	The City of Oakland has continued to commit funds to projects that apply for its NOFA for the Acquisition,	The policy is effective.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Development Program for funding for projects that preserve existing rental housing that is at risk of loss to the affordable housing supply. Support applications for Federal, State and private funding for preservation.			Rehabilitation, and Preservation of Multifamily Affordable Housing.		
ACTION 5.1.4	*Project Based Section 8 Assistance.* Collaborate with the Oakland Housing Authority to secure project-based Section 8 assistance to preserve at-risk housing both to enhance affordability and to provide additional income that can leverage private capital for repairs and improvements.	DHCD – Housing Development Services; Oakland Housing Authority	Ongoing, 2015-23	While development of new affordable housing has been an ongoing strategy within OHA to fulfill the MTW objective to increase housing choice, OHA leadership recognized that the decline of utilization within the housing choice voucher (HCV) program required a faster response than building new units. At the start of the decade in late 2009, OHA had 273 project-based voucher (PBV) units and in FY 2019 this number has grown to 3,463 committed or leased and 5,246 allocated overall which is about 40% of the MTW voucher allocation. This growth was expedited by the disposition of 1,615 public housing units in 2010, and two Requests For Qualifications (RFQs) issued in 2017 to award project-based voucher subsidies to existing units and single room	The policy is effective. The strategy to allocate PBV subsidies through various methodologies has proved important and strategic to preserve affordable units for households served through the program as the housing market continues to remain expensive.	As the decline of HCV utilization and increasingly competitive and expensive housing market spurred the need to attach subsidy to the units themselves using PBVs.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				occupancy (SRO) apartments to serve specialized populations. The RFQs received a huge response from existing owners and along with awarding PBVs to projects receiving funding through the City of Oakland competitive NOFA process and OHA's new development projects, OHA has awarded thousands of PBVs which has helped offset the declining utilization within the HCV program and ensures long term affordability of these units. In FY 2019, OHA leased 388 additional PBV units and has many in the pipeline to allow us to continue to serve the maximum number of families possible. Additionally, in FY 2019 OHA was approved to dispose of 253 units of senior public housing through Section 18 disposition and planning for this major renovation continued with implementation of the disposition targeted for FY 2020. This new disposition will bring the total number of disposed units to 1,868. During 2021, OHA leased and/or contracted 213 new PBV units. The leased and contracted units consisted of new construction as well as		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				previously conditionally awarded units, which included completing the environmental clearances, Housing Quality Standards (HQS) inspections and in-place tenant eligibility determination for sites previously awarded through two Requests for Qualifications (RFQ) issued in FY 2017. Furthermore, 95th and International (27 units), second phase of Acts Cyrene Apartments, which was not planned for FY 2021, entered into an Agreement to enter into a Housing Assistance Payment contract during the FY. In FY 2021, OHA had 4,462 PBV assisted units under contract as of the beginning of the FY and placed under contract an additional 213 PBVs during the FY, bringing the total under contract to 4,675. OHA's overall allocation of PBVs, which includes conditional awards, the pending disposition of Harrison Senior and units to be converted using RAD is 5,285 (14 are PBV VASH for Lake Park),		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				which is approximately 40 percent of the voucher portfolio.		
ACTION 5.1.5	*Local Non-traditional Housing.* Oakland Housing Authority will use Making Transitions Work funds to provide the appropriate financial and other interventions necessary to preserve at-risk affordable housing and to expand the population of families served in local, non-traditional OHA programs.	Oakland Housing Authority	Ongoing, 2015-23	OHA administered existing programs and continued implementation of new local programs during the period. Existing programs such as the Sponsor Based Housing Assistance Program (SBHAP) offered housing assistance to 1) chronically homeless individuals from encampments, 2) formerly incarcerated individuals recently released from San Quentin prison, and 3) emancipated foster youth exiting the juvenile justice system. The Parents and Children Together (PACT) program evolved from a program serving primarily mothers exiting the criminal justice system to a citywide family unification program that includes any parent exiting the Santa Rita County Jail system that is enrolled in a reentry program designed and facilitated by the Alameda County Sherriff's Office (ACSO). In FY 2021, OHA served an average of 13 families through PACT.	This policy action is effective. Throughout the previous decade, OHA has developed innovative local programs to meet the diverse needs of Oakland and served 673 families on average per month in 2010. This number has increased to 1,081 families per month served on average through local non-traditional programs made possible through MTW flexibility.	The policy is appropriate to Housing Element goals. With multiple factors squeezing the supply of affordable housing during this decade, Oakland saw a marked increase in homelessness and certain populations being especially hard hit by the housing crisis. Using MTW flexibility, OHA began strategic partnerships with City and county agencies to promote systems alignment by breaking down

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				The Building Bridges (BB) initiative provides housing assistance to underserved populations, continued operations in FY 2021, but experienced some challenges with staff turnover and decreased utilization. Additionally, Oakland's plan to renovate a large site remained on hold due to COVID-19 delays and shifting priorities. This program seeks to extend and leverage existing support through systems alignment to increase the chance of sustained success and long-term positive outcomes for these families. The BB SRO program has a capacity, when all sites are renovated and ready, to serve 289 families through a service-enriched SRO model. The shared housing and transitional housing units are reserved ~~to~~for house veterans, homeless and foster youth. The BB CalWORKs program is designed to provide local housing assistance for one to two years for Alameda County Social Services Agency (ACSSA) clients who are actively engaged in a plan to achieve self-sufficiency. Specifically, the program serves employable, formerly homeless CalWORKs clients		silos, to provide targeted housing resources alongside supportive services from these agencies to extend the runway of support and leverage funding more effectively, building on a platform of stable housing. With the launch of the Building Bridges initiative in 2017, OHA provided additional housing assistance funding for marginally served populations such as emancipated foster youth, CalWORKs

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				with the goal of stabilizing the housing and improving outcomes for families and children. During FY 2021, OHA housed families referred from ACSSA, averaging 24 families assisted per month, a 12% increase over FY 2020. BB THP+ is a short-term program designed to extend the runway of assistance and help create a pathway to economic stability for people exiting the foster care system. OHA utilized the County of Alameda's 2017 RFP as the competitive selection process to award housing assistance funding to First Place for Youth (FPY). The award of funding resulted in an executed contract between OHA and FPY to provide rental housing assistance for low-income THP+ participants for up to five years. The service provider assists program participants through direct referral. The program capacity can serve up to 50 families per month and in FY 2021 OHA served 25 families per month, a 12% increase over FY 2020.		working families, homeless veterans and the elderly, to supplement the resources being provided by state and local funding sources. These programs in FY 2019 are adding 190 families served in Oakland. These programs would not be possible without the authority and flexibility granted through the MTW demonstration. The MTW demonstration was set to expire in 2018 and OHA's leadership via a national Steering Committee of a

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				BB-Key To Home (BB-KTH) is a new program where OHA partnered with the Oakland Affordable Housing Preservation Initiative (OAHPI), Alameda County Health Care Services (HCSA) and Abode Services to provide property-based housing assistance to up to 23 families through a new local housing assistance pilot program. The program provided a coordinated exit for families with children out of Project Roomkey interim housing into more long-term supportive housing managed by a third-party homeless service provider and property manager contracted by OAHPI. The program served an average of 5 families per month during FY 2021.		few MTW agencies, led negotiations with HUD on behalf of all 39 MTW agencies nationwide, to successfully extend the contract with HUD as is, until 2028. This was critical to enable OHA to continue to provide uninterrupted service to its many families served through local non-traditional programs using MTW flexibilities.
POLICY 5.2: Support for Assisted Projects with Capital Needs						
ACTION 5.2.1	*Advocacy for State and Federal Financing.* Actively work to identify and secure State and Federal	DHCD – Policy and Programs	Ongoing, 2015-23	Significant changes to how competitive State funding is scored and prioritized has resulted in challenges for City projects and are at odds with City	The policy is effective and critical to producing and	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	funding to provide for capital needs of older assisted projects. The City will notify property owners of available state and federal funding options and provide technical assistance in applying for such funds.			priorities. Specifically, the 4% tax credit and tax-exempt bond program, which is the lead funding vehicle for large affordable housing developments administered by the California Debt Limit Allocation Committee (CDLAC) and Tax Credit Allocation Committee (TCAC) shifted from being essentially over-the-counter to a competitive resource in recent years. The agencies have undergone significant scoring revisions that disadvantage Oakland, such as the emphasis on high opportunity neighborhoods (under which Oakland's census tracts are considered vastly low opportunity), or the penalization of high-cost cities under the tie-breaker scoring. The City has remained actively engaged in each scoring iteration, in coordination with other high cost cities and affordable housing developers. Whenever possible, the City advocates for increased funding at the State and federal level for affordable housing. The City regularly consults with affordable housing developers to ensure that the timing and dollar amount of City funding is aligned with	preserving affordable housing.	

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				county, State, and federal funding program requirements. This helps ensure that City funds are leveraged maximally against other funding sources. The City of Oakland acts as the Local Reviewing Agency for any affordable housing applying for Low Income Housing Tax Credits in Oakland. The City of Oakland also acts as a co-applicant with developers seeking funds through California's Affordable Housing and Sustainable Communities (AHSC) program, Infill Infrastructure Grant (IIG) program, and Transformative Climate Communities (TCC) program. These programs are generally oriented towards new construction.		
ACTION 5.2.2	*Funding for Capital Needs – Preservation and Rehabilitation Programs for Rental Housing (not owner-occupied, buildings).* Provide loans through a competitive funding process for the rehabilitation of	DHCD – Housing Development Services	Ongoing, 2015-23	Sources of funding include Bond Measure KK ($100 million towards housing programs) and Alameda County Measure A-1 (almost $55 million towards housing). City NOFAs for the Acquisition, Rehabilitation, & Preservation of Multifamily Affordable Housing enable buildings with existing	The policy is effective in preserving and improving the City's stock of affordable housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	affordable rental housing for those buildings with existing City regulatory agreements. The goal of this program is to correct code deficiencies and ensure affordability for low-income households. The City will develop this for acquisition, rehabilitation, and preservation of rental housing. The rental housing eligible for this program will have City regulatory restrictions from funding sources such as CDBG and HOME Funds.			City regulatory agreements to apply for funding. Oakland Housing & Community Development issued its Strategic Action Plan (SAP) to outline its immediate strategies for investment for 2021-2023. In accordance with the SAP strategies, Oakland HCD has deployed its production funding through several NOFA rounds to support the generation of the New Construction pipeline, the acquisition and conversion of existing buildings through the Acquisition and Conversion to Affordable Housing program, and the preservation and extending affordability through a Preservation and Rehabilitation program. Oakland HCD also aggressively pursued competitive Homekey funding from the State to immediately acquire and create the homeless housing units that are so desperately needed across the City and region. Across all programs, funds are deployed in a competitive manner with an emphasis on prioritizing projects that reach deeper affordability and, in more recent

				NOFAs, reflect racial equity goals for the department and City.		
POLICY 5.3: Rent Adjustment Program						
ACTION 5.3.1	*Rent Adjustment Ordinance.* Continue to implement the Rent Adjustment program (Chapter 8.22 of the Oakland Municipal Code) that limits rent increases on units covered by the Ordinance based on a formula tied to increases in the Consumer Price Index.	DHCD – Rent Adjustment Board	Ongoing, 2015-23	Since 2015, the Rent Adjustment Program continued to implement the policies limiting rent increases on units covered by the Rent Adjustment Ordinance. In 2017, numerous changes were made to Oakland's Rent Adjustment and Just Cause ordinances that create more protection for tenants and facilitate improved enforcement and data collection such as owner move-in certifications, revisions to relocation provisions when owners move back into units, and noticing requirements. In addition, voter approved Measure JJ increased the number of units covered by the Just Cause ordinance and requires landlords to petition for increases that exceed CPI.	The policy is effective in preventing displacement of existing tenants.	The policy is appropriate to Housing Element goals.
ACTION 5.3.2	*Just Cause for Eviction Ordinance.* Continue to implement the Just Cause for Eviction program (Chapter 8.22 of the Oakland Municipal Code) that limits evictions of	DHCD – Rent Adjustment Board	Ongoing, 2015-23	The Rent Adjustment Program continued to enforce the Just Cause for Eviction Ordinance.	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	residential tenants to specified causes and provides remedies.					
ACTION 5.3.3	*Ellis Act Protections Ordinance.* Continue to implement the adopted tenant protections (Chapter 8.22 of the Oakland Municipal Code) when landlords remove residential rental units from the rental housing market pursuant to the Ellis Act (Cal. Gov't Code. §7060, et seq.).	DHCD – Rent Adjustment Board	Ongoing, 2015-23	In 2020, amendments to the Tenant Protection Ordinance, Rent Adjustment Program Ordinance, and Just Cause for Eviction Ordinance were adopted which strengthened protections for vulnerable tenants. Development of regulations to implement these amendments were approved by the City Council in 2021.	The policy is an effective form of tenant protection in rental housing.	The policy is appropriate to Housing Element goals.
POLICY 5.4: Preservation of Single Room Occupancy Hotels						
ACTION 5.4.1	*Residential Hotel Conversion/Demolition Protections.* Continue to require, through the Planning Code, a Conditional Use Permit to convert a residential hotel facility to non-residential use (other than to a commercial hotel) or to demolish a residential hotel.	Bureau of Planning	Ongoing, 2015-23	The City continues the implementation of Planning Code Chapter 17.153 – regulations adopted in 2018 that protect Residential Hotels as an important housing typology. The regulations require a Conditional Use Permit and replacement units for any demolition or conversion of a Residential Hotel Unit. The Bureau of Planning continues to work with Residential Hotel property owners to create a Residential Hotel registry, so the City can monitor any proposed	This program has been effective in retaining Residential Hotel units.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				changes to these buildings to ensure they align with regulations. In addition, $14 million from the City's Measure KK bond proceeds for affordable housing is being targeted to the acquisition of SRO properties for use serving extremely-low-income and homeless households.		
POLICY 5.5: Limitations on Conversion of Residential Property to Non-Residential Use						
ACTION 5.5.1	*Residential Property Conversion Ordinance.* Continue to require a Conditional Use Permit prior to converting a residential use to a nonresidential use in a non-residential zone. The City will review existing conditional use permit requirements to determine if revisions to the process are needed to reduce the potential for conversion of residential uses.	Bureau of Planning	Ongoing, 2015-23	In 2018, the City of Oakland strengthened regulations in Planning Code Section 17.102.230 restricting conversion of residential uses to non-residential uses.	This program has been effective in limiting the conversion of residential uses to non-residential uses.	The policy is appropriate to Housing Element goals.
POLICY 5.6: Limitations on Conversion of Rental Housing to Condominiums						
ACTION 5.6.1	*Condominium Conversion Ordinance.*	Bureau of Planning	FY 2014-15	In February 2020, the Condo Conversion regulations were updated to make it harder to convert rental	This has been effective in reducing the	The policy is appropriate to

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	The City will review the existing Condominium Conversion Ordinance and consider changes that: 1) considers an annual conversion cap, 2) eliminates the exemption for 2-4 unit buildings in the non-Impact Areas, 3) creates opportunities for tenant purchase and affordable homeownership for low to moderate income households, and 4) has strong tenant protection measures. Changes to this ordinance may only be made if adopted by the City Council and following appropriate public notice and debate.			units to condominiums without replacement units being built.	number of condo conversions taking place.	Housing Element goals.
POLICY 5.7: Preserve and Improve Existing Oakland Housing Authority-Owned Housing						
ACTION 5.7.1	*Rehabilitation of Public Housing Units.* Utilize funding flexibilities provided by the Making Transitions Work program to rehabilitate and modernize existing public housing or	Oakland Housing Authority	Ongoing, 2015-23	In 2018, the Bureau of Planning began working with OHA to develop a streamlined process for renovating existing affordable housing units and increasing density on existing OHA-owned properties. New state regulations, including SB 330, will	This policy action is effective.	This is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	project-based voucher units in order to increase housing options for low-income families and to ensure that OHA provides upgraded, high-quality units that are comparable or better than the market-rate properties surrounding them.			facilitate processing of OHA applications once received by the City of Oakland. Further, the programs noted below do not require MTW funding, but are traditional HUD methods for rehabilitating public housing. OHA uses MTW funding flexibility to rehabilitate approximately 50-75 units annually in its PBV portfolio. The public housing portfolio maintained over 98% occupancy rate overall and staff aggressively pursued applicants on the waitlists to fill any open vacancies. In FY 2021, OHA continued the substantial rehabilitation of Oak Grove North and Oak Grove South – a 151-unit senior housing development comprised of two buildings. There are 76 units in Oak Grove North including a manager's unit and 75 units in Oak Grove South including a manager's unit. The project was converted to a tax credit partnership with 149 project-based vouchers through a HUD approved disposition. The units in Oak Grove North and South had a status of "Demo/Dispo" during the disposition		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and renovation/rehabilitation process. At the end of FY 2021, interior rehabilitation at Oak Grove North had been completed and residents had moved back in while exterior work was continuing. At Oak Grove South, interior rehabilitation was in progress and residents were still relocated away from the building. Harrison Towers was also approved for disposition and during FY 2021 continued predevelopment activities. Changes to the State of California's tax-exempt bond allocation procedures in late 2020 have resulted in delays in securing the bonds and 4% Low Income Housing Tax Credits necessary to finance the critical repairs and seismic upgrades to the building. The revised projected closing date is 4th quarter 2022. OHA plans on converting some mixed-finance properties with public housing units to Rental Assistance Demonstration (RAD) Project Based vouchers. The RAD program was signed into law in 2011 and further		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				amended in 2014, and is administered under guidance from PIH Notice 2019-23 and all further revisions. OHA intends to use the RAD program to provide a more stable financing platform than public housing in order to facilitate any future re-financings of the included redeveloped mixed income properties and also to streamline property management and asset management processes for these projects. During FY 2021, OHA held an initial RAD tenant meeting for Lion Creek Crossing Phases 1-4, which include a total of 157 public housing units that may be converted to project-based vouchers.		
GOAL 6: Promote Equal Housing Opportunity						
POLICY 6.1: Fair Housing Actions						
ACTION 6.1.1	*Funding for Fair Housing Organizations.* Provide funding for organizations that provide outreach, counseling, education, and investigation of fair housing and anti-discrimination laws. Specific areas of focus will include race, ethnicity, family status,	DHCD – CDBG Programs	Ongoing, 2015-23	Since 2015, the City has provided funding supporting the East Bay Community Law Center and its Fair Housing partner agencies: Centro Legal, Causa Justa:Just Cause, and ECHO Fair Housing to provide fair housing related legal services, fair housing counseling, tenant-landlord mediation, outreach, education, info & referral, intake, assessment, fair	The action has proven to be an effective resource in addressing housing discrimination. Each year the City funds fair housing organizations at approximately	The action is a critical tool for addressing housing discrimination and promoting equal opportunity to housing. This action is in line

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and disability. Fair housing organizations respond to inquiries from those who believe they may have been victims of discrimination, and disseminate information through billboard campaigns, workshops, public service announcements and other media.			housing investigations of discrimination, fair housing testing, and fair housing audits benefitting low- and moderate-income households. This includes CDBG funds. In FY 2020/21 and 2021/22, a pilot program under the Oakland Fair Chance Ordinance was implemented that prohibits rental housing providers in Oakland from advertising that applicants with criminal history will not be considered, inquiring about criminal history in rental applications, or relying on criminal history in making rental determinations. Affordable housing providers such as public housing or HUD-assisted housing providers may screen only when required to under federal or State law.	$261,475 among 4 fair housing agencies. Starting in FY 2020/21 and 2021/22 a two-year allocation was added for the Fair Chance Ordinance program. Annually the fair housing program benefits approximately 1,300 low- and moderate-income Oaklanders with fair housing issues. About 30-40 fair housing clients per year are able to preserve existing housing through the fair housing services. Fair Chance ordinance, while a pilot program is producing low numbers assisting 10 clients in year	with the City of Oakland's Race and Equity work and is further supported by findings in the 2020-20-25 Alameda County Regional Analysis of Impediments to Fair Housing Choice. Segregation between white and minority residents has increased in the last decade; number of Black residents in Oakland are decreasing; overall minority residents are being displaced; homelessness has increased by over 42% since 2017; minority

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					one of the pilot program.	households (especially Black and those of Hispanic ethnicity have highest rate of disproportionate housing needs. There are many more statistics to support the appropriateness of this program.
ACTION 6.1.2	*Housing Search Assistance for People with Disabilities.* Seek to provide funding to organizations that assist persons with disabilities to locate accessible and affordable housing.	DHCD – CDBG Programs	Ongoing, 2015-23	The City no longer contracts for housing search assistance and counseling, since 2013. The former Housing Resource Center staff, now a part of the Department of Housing and Community Development's Community Development & Engagement section provided information and referral and kept updated resources for drop-in clients in need of housing search services. Due to limited staff and resource to support this work and due to the COVID-19 state of emergency, focus of services offered has shifted to keeping residents housed through the provision of relocation financial	When fully resourced, this program is successful in assisting Oaklanders in finding safe and affordable housing suitable for each household's needs, within means of each household; assisting in making sure all Oaklanders have safe and affordable housing. Housing	Oakland has experienced numerous shifts in its residential pattern in the years since the Great Recession of 2008. With a current population of 440,981, Oakland's population has grown by approximately 13% compared to the 2010

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

				assistance to eligible residents per Oakland Municipal Code Section 15.60; anti-displacement services; and Emergency Rental Assistance services.	search assistance is still a need, particularly for persons with disabilities.	Oakland population count. Oakland's central housing needs center on lack of affordable housing, high incidence of housing cost burden, particularly among extremely-low- and very-low-income renter populations, increasing degrees of homelessness and lack of housing and critical services for homeless and special needs at-risk populations, and increasing displacement and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						gentrification pressures that have occurred over the past decade.
ACTION 6.1.3	*Affirmative Fair Marketing.* Require all recipients of funds for housing development to market their projects in accordance with written fair marketing guidelines, including measures to reach households otherwise unlikely to apply for housing due to its location or character.	DHCD – Policy and Programs	Ongoing, 2015-23	Most recent Affirmative Fair Marketing Procedures & Guidelines are posted on the City's website for owners and managing agents of housing assisted by the City, ensuring there is no discrimination against potential tenants or purchasers on basis of race, color, religion, sex, physical or mental disability, familial status (presence of child under age of 18 and pregnant women), national origin, ancestry, age, marital status, sexual orientation, gender identity or expression, having Acquired Immune Deficiency Syndrome (AIDS) or AIDS related conditions (ARC), source of income, any arbitrary basis, or any other status protected by federal, State or local law.	The policy is a highly effective means of ensuring access to affordable housing for underrepresented groups. This policy is effective in that in underscores the City's compliance with federal regulations.	The policy is fully consistent with the goal of promoting equal housing opportunity. Required for any unit of general local government (UGLG) for federally-assisted housing with five or more units.
ACTION 6.1.4	*Housing Assistance Center.* Continue to support the Housing Assistance Centers' efforts to improve access to housing information and	DHCD – Housing Assistance Center/Strategic Initiatives	Ongoing, 2015-23	The Housing Assistance Center (HAC), launched in 2014 as a one stop housing services center serving residents with housing needs, allowing vulnerable residents to go to one place	Programs are very successful in serving Oaklanders who are most vulnerable to	As part of the Department of Housing & Community Development

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	services for Oakland residents and small rental property owners and managers. The goal is to provide a one-stop housing services center that can assist with referrals, including accessing affordable housing and homeless shelter placements. The Housing Assistance Center is also partnering with other public and private agencies to improve access to additional housing resources and services available to Oakland residents.			to address housing needs and questions. Since then, HAC transitioned to the Housing Resource Center (HRC), providing less counseling and housing search, providing more information and referral in addition to code compliance related relocation and anti-displacement services. Since 2020, HRC, now part of the Department of Housing and Community Development's Community Development & Engagement section, also administers the Emergency Rental Assistance Program (ERAP) funded by U.S. Treasury and State Rental Assistance Programs for the City's Keep Oakland Housed (KOH) programs.	becoming homeless, helping to Keep Oakland Housed through rental assistance, anti-displacement, relocation services and other services supporting this effort.	Strategic Plan, these efforts support Preservation and Protection Objectives of the "3-P" approach of Protection, Preservation and Production.
POLICY 6.2: Reasonable Accommodations						
ACTION 6.2.1	*Incorporate Reasonable Accommodations into City Programs and Policies.* The City's ADA Programs Division will continue to ensure that requirements for accessibility are met throughout the City's programs.	City Manager, Office of ADA Compliance	Ongoing, 2015-23	The City's reasonable accommodations procedure was adopted in 2014, and the City has continued to implement its policy that no qualified individual with a disability shall, on the basis of disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of the City, or be subjected to discrimination directly or through	Reasonable accommodations are an effective tool for ensuring access to housing. The City actively enforces policies for reasonable accommodations in City-assisted	Reasonable accommodations are a fundamental tool in ensuring housing access. The policy may need to be revised in future cycles to reflect

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				contractual, licensing, or other arrangements, by the City and that the City shall adhere to U.S. Department of Justice regulations implementing Title II of the ADA.	affordable housing. Greater communication between HCD and the ADA Programs Division may be advised.	enforcement by HCD rather than ADA Programs Division.
ACTION 6.2.2	*Publicize and Implement Reasonable Accommodations Policy and Procedures.* Implement the City's Reasonable Accommodations policy and procedure for individuals with a disability, when flexibility is necessary to eliminate barriers to housing opportunities.	Zoning Administrator	Ongoing, 2015-23	The ADA Programs Division serves as the Citywide ADA Title II Coordinator and oversees the implementation of reasonable policy modifications in all City programs, including housing programs. The Division publishes information about City disability access policies on its website: https://www.oaklandca.gov/topics/americans-with-disabilities-act-ada-services The Division provides technical assistance as needed for the nondiscriminatory administration of the City's housing programs, investigates complaints, and assists in resolution. The Division completed an update to the City's Programmatic ADA Self-Evaluation which included an analysis of housing-related programs	The Reasonable Accommodations ordinance, (adopted in July 2014) was developed with the assistance of the City's ADA Programs staff and thoroughly vetted by representatives from the Disability Rights of California organization, therefore, the ordinance is effective in providing people with disabilities fair access to housing.	The Reasonable Accommodations ordinance, (adopted in July 2014) was developed with the assistance of the City's ADA Programs staff and thoroughly vetted by representatives from the Disability Rights of California organization.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and is actively supporting the newly appointed Departmental Access Coordinators in the Housing and Community Development Department in fulfilling the Department's obligations for compliance with disability civil rights laws, including the attendance of the Departmental Access Coordinators at quarterly meetings/trainings on specific aspects of the ADA and related laws, and ongoing technical assistance. The Division is also assisting with the development of the online Rental Assistance Program applications for purposes of ensuring full WCAG 2.0 AA compliance.		
POLICY 6.3: Promote Regional Efforts to Expand Housing Choice						
ACTION 6.3.1	*Regional Housing Needs Allocation.* Actively participate in future Regional Housing Needs Allocation (RHNA) processes to promote an allocation plan that seeks to reduce concentrations of low-income people and low-income housing, and to provide a broader range of	DHCD – Policy and Programs	Ongoing, 2015-23	In 2021, City Staff continued to participate in the Plan Bay Area 2050 development process.	Participating in the Plan Bay Area 2050 process has been helpful, but MTC/ABAG did not follow some of the recommendations that Oakland wrote in their letter.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	housing choices throughout the region.					
POLICY 6.4: Fair Lending						
ACTION 6.4.1	*Community Credit Needs Assessment.* Conduct regular assessments of community credit needs, including credit needs for housing. To conduct the assessment, the City will review reports from the federal government and nonprofit consumer organizations on lending patterns in Oakland and the availability of residential credit.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	Oakland HCD conducts periodic assessments of community credit needs, including credit needs for housing. The assessment involves reviews of lending patterns in Oakland and the availability of residential credit. In 2021, no Community Credit Needs Assessments were scheduled. Assessments have been performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018, the Linked Banking Ordinance requirements were waived when Treasury selected the new Fiscal Services vendor. In 2017 after a series of meetings, City Council amended the Linked Banking Ordinance to expand the survey questions and to require improvement plans for banks surveyed that fell short in various criteria. In past years, HCD budgeted approximately $20,000 for a periodic Nexus study to determine the community's credit needs. In addition, at the initiation of Treasury's periodic	The program effectiveness has declined since Treasure may opt to waive the program's requirements for vendors, since the majority of credit provided to the community is no longer through the surveyed brick and mortar banks, and since few banks chose to respond to the program surveys in the last few survey cycles. There may be more effective ways to gauge community credit availability and the equitability of local lending practices.	Over the years, the appropriateness of the program has declined since today's local brick and mortar banks supply only a fraction of the mortgage credit in comparison to the prior decades. The internet and the proliferation of non-bank mortgage lending options have expanded consumer options to seek credit and are not captured in the banking

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				RFP for fiscal services, Oakland HCD staff releases a survey to local brick and mortar banks to request lending practices data, and staff collates this data for Treasury's review as part of the Linked Banking Program. In 2021 neither activity was scheduled. See also Action 6.4.2.		practices studies.
ACTION 6.4.2	*Community Reinvestment Activities Linked to Banking.* Actively support efforts to ensure that banks meet and exceed their responsibilities for community reinvestment. Limit a bank's eligibility to participate in City-assisted lending programs to institutions that provide reasonable levels (fair share) of investment within Oakland, including home mortgages and financing for housing development.	DHCD – Policy and Programs; Financial Services Agency, Treasury Division	Ongoing, 2015-23	In the period 2015-2021, assessments were performed in response to Treasury's 2017 RFP for Fiscal Service providers. In 2018, the list of lenders eligible to participate in City-assisted lending programs was updated, and no lenders were excluded due to Linked Banking Ordinance requirements. The City-assisted lending programs were not funded in subsequent years. In 2021 no Community Reinvestment Activities Linked to Banking were used to limit bank eligibility to participate in City-assisted first-time homebuyer lending programs. See also Action 6.4.1.	The program effectiveness has declined since the majority of credit provided to the community is not provided through local brick and mortar banks.	In past years, HCD budgeted approximately $20,000 for a periodic Nexxus study to determine the community's credit needs. Separately, at the time of Treasury's periodic RFP for fiscal services, HCD would survey local brick and mortar banks for their lending practices and collate this

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
						data for review as part of the Linked Banking Program. In 2021 neither activity was scheduled. The appropriateness has declined since today's local brick and mortar banks supply only a fraction of the mortgage credit in comparison to the prior decades. The internet and the proliferation of non-bank mortgage lending options have expanded consumer options and are not captured in the banking practices studies.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 6.4.3	*Community Outreach and Predatory Lending Controls.* Discourage the practice of predatory lending which falls most heavily on low-income seniors and minorities, by financially supporting nonprofit organizations that investigate such practices, referring complaints to the appropriate legal authority, and providing consumer information on how to avoid predatory lending. Outreach efforts by non-profit organizations will include door-to-door outreach and funding legal services on foreclosure counseling and prevention.	DHCD – Housing Assistance Center/Strategic Initiatives; Financial Services Agency, Treasury Division	Ongoing, 2015-23	The City of Oakland provides resource information on predatory lending on its website: https://www.oaklandca.gov/resources/predatory-lending Community outreach around predatory lending practices is not contracted by the City. However, agencies such as HERA, Consumer Credit Counseling and other agencies provide outreach and services around predatory lending. To encourage more resilient and informed buyers in our community, the City's Homeownership Programs provides monthly homebuyer education to prospective buyers. The curriculum informs potential buyers on the homebuying process, puts them in touch with assistance resources including the City's assistance programs as well as other area benefits and assistance, and introduces them to community lenders, real estate professionals, and HUD-certified housing counselors. In 2020 the City enrolled 224 students	The Department of Housing and Community Development Strategic Initiatives Section has been effective in implementing predatory lending prevention strategies	This program is effective and will be continued into the next Housing Element planning period 2023-2031. In future Housing Element cycles, this measure should be combined with Action 2.2.3.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				and issued certificates of completion to 97 class attendees before the live workshops were discontinued due to the COVID-19 pandemic. In March 2020, the City switched strategies to referring homebuyers to our local partners certified to provide HUD-certified Homebuyer Education using remote live classes and online education. As described in Action 6.1.4 "Housing Resource Center", the City of Oakland's Housing Resource Center provides assistance to residents who may be victims of foreclosure and predatory lending. In many cases, the Center refers such cases to Housing & Economic Rights Advocates (HERA).		
POLICY 6.5: Accountability						
ACTION 6.5.1	*Housing Element Annual Progress Report.* Submit, on an annual basis by April 1, a report to the California Department of Housing and Community Development on progress made by the City of Oakland on policies adopted in the	Planning Bureau; DHCD – Policy and Programs	On an annual basis by April 1	The Housing Element Annual Progress Report (APR) is due to the Department of Housing and Community Development (HCD) and the Governor's Office of Planning and Research (OPR) by April 1st each year. The City has continued to submit APRs during the period, and APRs from previous years can be found on the	This policy is an effective tool to promote accountability by the City to the policies it has slated in the Housing Element.	The action is appropriate to the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	2015-2023 Housing Element (as required by state law). The City will also conduct annual public hearings before the Planning Commission and City Council to review and consider the Annual Progress Report within 30 days of its submittal to the State of California, and will post copies of the report on the City's website.			City's website, here: https://www.oaklandca.gov/documents/housing-element-annual-progress-reports		
GOAL 7: Promote Sustainable Development and Sustainable Communities						
POLICY 7.1: Sustainable Residential Development Programs						
ACTION 7.1.1	*Promote Green Building Design for Private Development.* Continue to foster the design and building of durable, low-maintenance dwellings and make optimum use of existing infrastructure through an expanded physical and internet-based Green Building Resource Center. Design features, such as "green roofs", tree planting,	Bureau of Building	Ongoing, 2015-23	Since 2015, the City continued to staff the Green Building Resource Center, and enforces the Oakland Green Building Ordinance (first adopted in 2010). The website continues to provide information to developers: (www.oaklandgreenbuilding.com). The City encourages participation in the Energy Upgrade California in Alameda County program by providing handouts at the Green Building Resource Center and on the website.	The City's planning and building staff enforce the Oakland Green Building Ordinance. The City's adopted Energy and Climate Action Plan encourages the construction of new and largely renovated buildings with	The City is committed to promoting Green Building for private development, this action is appropriate for the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	open space devoted to food production and electric vehicle charging stations, among others, are all supported by the ECAP for private housing development.				energy efficient techniques and materials.	
ACTION 7.1.2	*Green Building Standards.* Continue to require all new residential construction, and single-family additions and alterations to demonstrate compliance with an approved green building standard. Consider revising the Green Building Ordinance for Private Development to include multi-family additions and alterations. Increase enforcement of green building and building energy codes.	Bureau of Building	Ongoing, 2015-23	Since 2015, green building standards are required for projects which meet the thresholds in the Green Building ordinance, in both the small project design review process, and for the regular design review applications (known as "planning entitlements"). All new buildings must now have some level of readiness for plug-in electric vehicle (PEV) charging, exceeding CalGreen standards.	The policy is effective.	The action is appropriate to meet Housing Element goals.
ACTION 7.1.3	*Require Green Building Design requirements for City-funded Development.* All City-funded housing developments require certification under	Bureau of Building	Ongoing, 2015-23	The City adopted its Green Building ordinance in October 2010, and has continued to regularly apply it to multifamily affordable housing development. In the City's NOFA, new development and rehabilitation	The policy is effective.	The action is appropriate to meet Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	BuildItGreen.org's GreenPoint Rated or LEED certifications systems.			projects must meet a minimum score in each Green Point Checklist category. Projects scoring higher in the Green Point Checklist evaluation, or which achieve LEED Gold level or higher are given preference in the NOFA scoring process.		
POLICY 7.2: Minimize Energy and Water Consumption						
ACTION 7.2.1	*Energy-Efficiency and Weatherization Programs.* Pursue opportunities, in partnership with regional, state, and utility partners when appropriate, to augment existing or create new residential energy programs, and market these programs to minimize consumption of energy throughout the community, through conservation and efficiency. Such programs may include Property-Based Energy Financing, Right-sizing of Energy Equipment Guidelines, green building standards within existing housing rehabilitation programs, Weatherization	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	The City helped launch and is a participant in the Bay Area Regional Energy Network (BayREN), also funded by PG&E utility ratepayers, to enhance delivery of their programs within Oakland. This includes the Home Upgrade and Advanced Home Upgrade programs (part of Energy Upgrade California), and Bay Area Multifamily Building Enhancements Program (BAMBE). These programs serve more than 1,000 units per year in reducing energy and water consumption of homes in Oakland. The City works directly with the California Youth Energy Services (CYES) program, subsidized by PG&E, which provides vocational building energy training to Oakland youth and serves at least 200 Oakland homes annually, including renters and focusing primarily on	These approaches have combined to create a highly effective approach to energy efficiency and conservation in existing buildings.	These programs are an appropriate method of implementing the relevant goals on reducing energy cost burdens for residents.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and Energy Retrofit Loan Program, Renter-Occupied Residential Energy Program, Energy Upgrade California, and adoption of Energy Improvement at Time of Sale Ordinance.			lower-income residents, with energy efficiency and conservation measures each Summer. More than 20 Property Assessed Clean Energy (PACE) financing programs are currently operating in the City, providing financing on the property tax bill for residences and businesses to conduct energy and water efficiency projects, install renewable energy systems, and install electric vehicle charging equipment. The City is also working with EBCE and BayREN to install clean electric technologies in homes and businesses to replace natural gas systems, utilizing a combination of State and regional funding sources to lower the costs of installing heat pump water heaters, heat pump space heating and cooling systems, and induction cooktops. The City has initiated a lending program for induction cooktops to expand awareness of and access to such new technologies. Finally, the City is using its Measure KK infrastructure bond funding, along with federal CARES Act funding, to install a wide array of efficient energy systems in municipal buildings.		

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 7.2.2	*Alternative Energy Production.* Continue to review plans for residential construction, taking into account building orientation, street layout, lot design, planting, and street tree configuration, with the intent of maximizing solar access and cooling opportunities. Assist the public to generate renewable energy by posting information on the City website that offers content created by the City and links to web pages hosted by other organizations. Examples of materials include: a solar energy generation calculator, and a guide about proper maintenance and disposal of solar and other renewable energy generation systems. Provide information about solar and renewable energy incentives and resources in conjunction with all residential rehabilitation	Bureau of Planning; Bureau of Building; Environmental Services (PWA)	Ongoing, 2015-23	The City of Oakland has continued to issue permits for a high number of residential solar PV systems, passing more than 8,200 installations and more than 49 MW of installed solar capacity as of September 2021. The most significant source of renewable energy production serving Oakland comes as a result of the City's participation in East Bay Community Energy (EBCE), a community choice aggregator serving most of Alameda County. EBCE became the default electricity provider for all residences in Oakland in 2018, providing a minimum of 85% carbon free electricity. This electricity is generated from hydroelectric dams, solar PV, concentrated solar power, wind turbines, and geothermal energy sources. In addition, EBCE is serving 100 percent carbon free electricity to all accounts who elect to receive it in Oakland, including all municipal accounts of the City of Oakland. Oakland will receive a portion of power from the Scott Haggerty Wind Center project, a 57 MW renewable energy facility opened in Livermore in 2021. The generation of renewable	The policies and programs have generated significant progress in building and operating renewable energy systems in support of homes. The approach is effective.	This continues to be an appropriate method of expanding renewable energy systems, although pairing with some elements of energy storage and resilience are likely warranted in future Housing Elements.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	projects. Continue to be a municipal policy leader by providing streamlined and advanced permitting processes, and by actively sharing Oakland's solar permitting Best Practices with others.			energy from the EBCE program far exceeds local solar PV production, and will serve as the primary means of ensuring high levels of alternative energy production for the foreseeable future.		
ACTION 7.2.3	*Facilitate a Community Solar Program.* Encourage and collaborate with local partners to launch a community solar program, to increase local use of renewable energy, including solar-thermal energy to produce heat and hot water.	Environmental Services (PWA), with input from all agencies	Ongoing, 2015-23	Multiple community solar options now exist for Oakland ratepayers, including options with East Bay Community Energy and independently through developments in the private energy marketplace. Additionally, the City is worked with the Oakland EcoBlock project team, a pilot project of various academic and industry partners, to facilitate a shared solar approach to neighborhood-scale retrofits of solar PV in existing neighborhoods. This effort was recently funded $5 million by the California Energy Commission.	This approach has been effective in providing residents options for accessing renewable energy, regardless of home ownership or site conditions.	With the availability of renewable energy products through CCAs (East Bay Community Energy) and IOUs (Pacific Gas and Electric), the sole focus on community solar is no longer an appropriate means of providing the intended access.
ACTION 7.2.4	*Technical Assistance.* Continue to educate applicants and residents about the advantages of	Bureau of Building	Ongoing, 2015-23	The City continues to collaborate with East Bay Energy Watch (EBEW) and the Bay Area Regional Energy Network (BayREN), working directly with	The program is an effective way to partner with East Bay Municipal	The organization of this action remains relevant and appropriate

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	energy conservation and provide technical assistance to help new construction or remodeling projects achieve superior levels of energy efficiency.			program implementers and PG&E to enhance local program delivery, and participating on the EBEW Strategic Advisory Committee. In July 2020, the City Council adopted the Equitable Climate Action Plan (ECAP), a ten-year strategic and policy plan to reduce energy consumption and expedite the transition away from fossil fuel use. This Plan contains policies to expand and deepen energy efficiency, renewable energy, decarbonization, and electric vehicle programs and reduce energy cost burden for all members of the community. In December 2020, the City Council passed a requirement for newly constructed buildings to be all-electric design, eliminating natural gas connections in such buildings. These efforts, in addition to ongoing energy programs, serve to reduce energy use among Oaklanders and facilitate the transition to cleaner energy sources.	Utility District, the water provider to the City, and has made demonstrable reduction to potable water use in the City.	for facilitating partnerships to lead to water use reductions in residential settings.
ACTION 7.2.5	*Promote Water Conservation and Efficiency.* Expand promotion of water conservation and efficiency	Bureau of Planning; Bureau of Building;	Ongoing, 2015-23	Efforts to educate residents and commercial tenants about the advantages of energy efficiency and water conservation through EBMUD	The program is an effective way to partner with East Bay Municipal	The organization of this action remains relevant and appropriate

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	practices such as water-efficient landscaping, irrigation, lawn replacement, rainwater collection, greywater systems, and the installation of water efficient fixtures and plumbing. In affordable housing developments, this will reduce utility bills, freeing up more resources to pay rent or a mortgage.	Environmental Services (PWA)		and Stopwaste continued through the period, as well as education via EBEW and the BayREN programs. Oakland City Council passed the Civic Bay Friendly Landscape Ordinance to require water efficiency in all public landscaping projects.	Utility District, the water provider to the City, and has made demonstrable reduction to potable water use in the City.	for facilitating partnerships to lead to water use reductions in residential settings.
POLICY 7.3: Encourage Development that reduces Carbon Emissions						
ACTION 7.3.1	*Mixed Use Development Incentives.* Provide development incentives for construction projects that mix land uses, build compactly, and ensure safe and inviting pedestrian corridors. Allowing uses in close proximity to one another encourages walking and bicycling, instead of automotive trips.	Bureau of Planning	Ongoing, 2015-23	With the update of the commercial and residential zoning districts in the City, and with the success of new private development applications in adopted Specific Plan areas (Broadway Valdez, Lake Merritt BART, West Oakland), the City continues to encourage development of mixed-use buildings in commercial areas. Specific Plans, with their certified EIRs, are considered an incentive for the construction of new housing. The current Specific planning process for the Downtown Oakland Specific Plan, continued work on the Final EIR, Final Plan, Zoning, and meetings on a Zoning	The Specific Plans have been very effective in providing an incentive with certified EIRs and development programs for developers to build housing in an expedited manner.	The policy is appropriate to Housing Element goals.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				Incentive Program as part of the implementation. The Draft Plan and DEIR documents can be found here: https://www.oaklandca.gov/documents/draft-dosp-eir		
ACTION 7.3.2	*Transit-Oriented Development.* Evaluate the existing S-15 Transit Oriented Development zone, and consider if its development standards for areas near transit stations or major transit nodes are allowing for higher density housing with commercial development in close proximity to BART in ways that improve neighborhood livability. Develop and require transit-oriented performance criteria for associated miles traveled and transportation mode share.	Bureau of Planning	2014-2017	Construction is now complete of Phase 5 of "MacArthur Station" at the BART parking lot, including a 260-foot tall building with 402 market-rate and affordable residential units. Panoramic Interests is seeking building permits related to the approved 500 Kirkham project located two blocks southeast of the West Oakland BART Station (and in the S-15 zone). In 2016, "Mural" by BRIDGE housing was completed at MacArthur BART, with 90 affordable units. The City previously adopted revisions to the transportation analysis using Vehicle Miles Traveled (VMT), instead of Level of Service, as directed by AB 743 (see Action 1.1.3). BART and its developer are seeking entitlement of transit-oriented development (including both market-rate and affordable housing) surrounding the Lake Merritt BART Station.	This action is effective. During the planning period, 402 market-rate and affordable units were constructed through Phase 5 of the MacArthur Station project, and 1,032 residential units were approved for the 500 Kirkham site, located two blocks southeast of the West Oakland BART Station.	This action is appropriate for the Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
ACTION 7.3.3	*Implement SB 375 provisions, direct new housing to be built in Priority Development Areas.* Implement the provisions of State Bill (SB) 375 and regional agency rule-making, following their adoption. The City will continue to encourage mixed-use, infill, and transit development in designated Priority Development Areas. (See also Policy 1.1).	Bureau of Planning	Ongoing, 2015-23	Priority Development Area (PDA) site Inventories were updated in 2019. The Association of Bay Area Governments (ABAG) and Metropolitan Transportation Commission (MTC) allowed for modifications of existing PDAs to occur at the administrative level. Planning staff recommended changes to existing PDAs and submitted the proposal to ABAG and MTC on September 16th, 2019. The updated PDAs were adopted by the MTC and ABAG executive bodies on July 16, 2020. These updated designations are comprised of relatively minor modifications to existing PDAs that went through extensive community processes in previous years. See “2019 Proposed PDA map” for a map of existing PDAs following this year’s update and “2019 Proposed PDA Map Showing Changes to Existing PDAs” for a map outlining the changes. Both maps can be found online: https://www.oaklandca.gov/documents/priority-development-areas-pdas-1 These updated PDAs can also be found on MTC's website:	"Plan Bay Area" was adopted in July, 2013. The action is effective. Updating the PDA site inventory allows the City to apply for affordable housing development grants for projects located in PDAs.	The City will continue to encourage new housing development in Priority Development Area (PDA's) as identified in "Plan Bay Area." This action will be continued into the 2023-2031 Housing Element.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				https://www.oaklandca.gov/documents/priority-development-areas-pdas-1		
ACTION 7.3.4	*Integrate Land Use and Transportation Planning in Major Residential Projects.* Require the integration of land use and transportation planning and consideration of Greenhouse Gas (GHG) reduction opportunities in each planning, major development project, and planning effort undertaken by the City.	Bureau of Planning	Ongoing, 2015-23	The City effectively implements this action through the application of the Equitable Climate Action Plan (ECAP) checklist and requirement for compliance with transportation demand management (TDM) measures. This applies to all major project case files.	The action is effective.	The action is appropriate.
ACTION 7.3.5	*Encourage New Housing at a Range of Prices.* Actively promote the construction of housing at a range of price levels near transit hubs and corridors in balance with local employment opportunities to meet the needs of Oakland's workforce. Consider adoption of a transit-oriented development affordability policy, including	Bureau of Planning	Ongoing, 2015-23	The City, in concert with various agencies and organizations, has continued to promote the construction and preservation of housing at a range of price levels near transit hubs and corridors: • Predevelopment activities continued at Lakehouse Commons, a 91-unit affordable development within the Lake Merritt Station Area. • Rehabilitation continued and was nearly completed at Frank G Mar Apartments, an	The City has successfully advanced policies on a somewhat ad hoc basis to encourage high-density housing at a range of income levels near transit stations. A more comprehensive uniform policy may be warranted for future Housing Element cycles.	Dense development near transit is a primary tool for reducing carbon emissions.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	preservation of existing affordability.			existing 119-unit affordable housing development located within the Lake Merritt Station Area Plan. • Construction began at Fruitvale Transit Village Phase II-B, a 181-unit affordable development adjacent to the Fruitvale BART station. Construction is expected to be complete in 2023.		
POLICY 7.4: Minimize Environmental Impacts from New Housing						
ACTION 7.4.1	*Compact Building Design.* Work with developers to encourage, where feasible, buildings to grow vertically rather than horizontally and to incorporate structured parking rather than surface parking, to preserve and encourage ground-level open space.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	This design standard continues to be recommended in the City's design guidelines for multi-family buildings on commercial corridors. See website: https://www.oaklandca.gov/documents/design-guidelines-for-commercial-and-corridor-areas	This program has been effective in encouraging maximizing use of sites.	The policy is appropriate to Housing Element goals.
ACTION 7.4.2	*Waste Reduction.* Continue to review and enforce adequate recycling and organic matter allocation areas. Encourage, where feasible, multifamily developments to comply	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to meet with applicants to advise on the space allocated in buildings and on grounds. Section 9 of the City's Basic Application for Development Review requires applicants to provide sufficient space for the storage and collection of	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	with the City's Zero Waste Plan.			recyclable and organic materials to comply with SB 1383 and Ordinance No. 11807 – Recycling Space Allocation Requirements. Planning staff continues to review the recycling ordinance requirements at building permit plan check.		and the new Specific Plans.
ACTION 7.4.3	*Foster Healthy Indoor Air Quality.* Encourage, where feasible, the use of zero-VOC materials to improve indoor air quality (e.g., paints, adhesives). Require measures to reduce the impact of air pollution on new housing (e.g., air filters).	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to apply its Standard Conditions of Approval for planning entitlements, as well as enforced regulations in the Green Building Ordinance, each of which improve indoor air quality, with techniques such as requiring the installation of air filters with prescribed MERV ratings.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.4	*Recycled, Reclaimed or Renewable content of Building Materials.* Encourage, where feasible, the use of environmentally preferable building materials. Encourage, where feasible, the re-use of building materials to reduce construction waste.	Bureau of Planning; Bureau of Building	Ongoing, 2015-23	The City continues to enforce the Oakland Green Building Ordinance, with provisions for the use of building materials with recycled content in the construction of new multifamily housing, through the application of the Green Point Rated and the LEED for Homes checklists.	The effectiveness of this action has not been calculated.	The policy is still appropriate for the types of new development envisioned by the City's Planning Code and the new Specific Plans.
ACTION 7.4.5	*Re-Use and Rehabilitation of Historic Materials.*	Bureau of Planning;	Ongoing, 2015-23	The City encourages the reuse and rehabilitation of the City's historic	Planning staff consistently	Existing buildings

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	Encourage the reuse and rehabilitation of the City's historic building stock, using Policy D6.2 of the Land Use and Transportation Element of the Oakland General Plan as a guide, to increase neighborhood character and to preserve the energy embodied in the building's original construction.	Bureau of Building		building stock, using Policy D6.2 of the Land Use and Transportation Element and the entire Historic Preservation Element of the Oakland General Plan as guides, to maintain and enhance neighborhood character and to preserve the energy and design integrity embodied in the buildings' original construction.	encourages applicants to retain and rehabilitate existing buildings, citing a smoother review process, savings of time and money, California Historical Building Code and other code accommodations for existing buildings, the City's pioneering 1978 publication Rehab Right, and deterrents including the demolition regulations in the Planning Code. Residential and work-live adaptive reuse of commercial and industrial buildings continues, often facilitated by use	support "naturally occurring affordable housing." Growing environmental concerns support the slogan "The greenest building is the one that is already built."

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
					of the Historical Building Code.	
ACTION 7.4.6	*Encourage Food Production in Open Space Areas.* Encourage the inclusion of food-producing gardens, including rooftop gardens, in private development, where appropriate, with consideration of Bay Friendly landscaping principles.	Bureau of Planning	Ongoing, 2015-23	In 2014, the City of Oakland adopted new urban agriculture regulations as a way for Oakland residents to provide more healthy food to their families and communities. In addition, allowing more urban farming has beautified vacant lots and fostered a sense of community in local neighborhoods, especially in respect to Community Gardens. The City Council adoption of amendments to the City's Agricultural Regulations advanced Oakland's sustainable food system goals.	The policy is effective.	The action is appropriate to meet Housing Element goals.
POLICY 7.5: Climate Adaptation and Neighborhood Resiliency						
ACTION 7.5.1	*Climate Change and the Planning Process.* Consider qualitative and quantitative information regarding the potential effects of climate change during the project plan review process. Consider Oakland Planning Code amendments to limit certain vulnerable land uses (i.e. emergency, affordable, senior, or assisted living	Bureau of Planning	Ongoing, 2015-23	In 2021, the City adopted a new 2021-2026 Local Hazard Mitigation Plan, which identifies priority actions to address the effects of natural hazards, including climate change. Also, in 2016, the City released the "Resilient Oakland Playbook" which includes a goal to "reduce current and future climate and seismic risks." Further, the Bureau of Planning was co-Chair, with the Oakland Sustainability office, on a multi-agency Sea Level Rise working group; the final report was issued in	This approach is an effective way to document the role that climate action and resiliency planning are having on providing safe and affordable housing at all income levels.	The organization of this section remains relevant and appropriate for ensuring that local climate and resilience planning are supporting broad housing targets.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	housing) in areas identified as vulnerable to climate change. Consider design review requirements for buildings to improve climate resiliency.			Fall 2017. See: http://www2.oaklandnet.com/oakca1/groups/pwa/documents/report/oak068799.pdf Beyond these efforts, the City revised its scoring criteria for its Capital Improvements Program (CIP) to score sustainability and resiliency in all capital projects in 2019. The City requires all staff reports to evaluate sustainability opportunities as part of project review and presentation to City Council. Additional climate adaptation and resilience programs and policies were adopted as part of the City Council's adoption of the Equitable Climate Action Plan (ECAP) in July 2020, including the establishment of Resilience Hubs and Spaces, improved analysis of climate adaptation, and improved communication and coordination tools for neighborhood resilience.		
ACTION 7.5.2	*Climate Adaptation Strategies.* Communicate information about potential local climate impacts to neighborhoods	Bureau of Planning; Bureau of Building; Environment	Ongoing, 2015-23	In July 2020, Oakland City Council unanimously voted to adopt the 2030 Equitable Climate Action Plan (ECAP). The 2030 ECAP establishes actions that the City and its partners will take to	The approach has been moderately effective in demonstrating the need for climate	The approach is appropriate, although the goals, objectives, policies, and

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
	and developers, and encourage participation in the development of climate adaptation strategies to improve project and neighborhood resiliency; consider including notification of climate-related vulnerabilities at time-of-sale for properties in especially vulnerable areas.	al Services (PWA)		equitably reduce Oakland's climate emissions and adapt to a changing climate. The ECAP was developed pursuant to City Council's adopted 2030 greenhouse gas emission reduction target of 56% relative to 2005 levels, as well as Oaklands 2018 Climate Emergency and Just Transition Resolution. Oakland's City Council also adopted a 2045 Carbon Neutrality Goal, calling for a dramatic reduction in Oakland's greenhouse gas emissions and "deep decarbonization" of the building and transportation sectors by 2045. The new 2030 ECAP is rooted in equity and a deep community engagement process: it identifies ambitious actions we can take to combat climate change while also ensuring that frontline communities – those that have been harmed by environmental injustice and who are likely to be hurt first and worst by the impacts of climate change – will benefit first and foremost from climate action. The City is focusing its attention especially on actions that will result in cleaner air, improved economic	adaptation strategies to be made in support of housing policy.	programs would benefit from a more expansive description and focus on those elements of climate change with the potential to impact housing supply and quality, as well as resident health and safety.

Table A-2: City Progress Report – Evaluating Housing Actions Since 2015 (Based on 2015-2023 Oakland Housing Element)

No.	*Description*	*Responsibility*	*Timeframe*	*Status of Implementation*	*Effectiveness of Action*	*Appropriateness of Action*
				security, good green jobs, and more resilient communities, while also minimizing our contribution to climate change. To find updates on ECAP implementation, please visit the Sustainability Page, where all ECAP-related topics and resources are listed and updated: https://www.oaklandca.gov/topics/sustainable-oakland-1 Climate adaptation strategies are also included in the City's Resilient Oakland Playbook, and Sea level Rise Road Map. The City was the focus of a 2018 effort by the All Bay Collective to identify climate adaptation strategies for the neighborhoods adjacent to San Leandro Bay in East Oakland. The City is also working with community groups in the East Oakland Neighborhoods Initiative (EONI) to implement a Transformative Climate Communities grant from the Strategic Growth Council to further identify climate adaptation strategies for East Oakland.		

Appendix B: Housing Needs Assessment

This chapter contains a comprehensive assessment of the various factors that influence and affect the City's housing needs, an essential part of developing appropriate and responsive housing policies and programs. The needs assessment addresses the following topic areas:

- Population Characteristics (age, race, ethnicity)
- Household Characteristics (household size and composition, and income)
- Special Needs Groups (including extremely low-income residents; older adults; people with disabilities; large families; female-headed households; people experiencing homelessness; undocumented immigrants; and farmworkers)
- Housing Costs and Overcrowding and Tenure (cost burden, overcrowding rates)
- Housing Stock Characteristics (including tenure and ownership, overcrowding and housing stock conditions, cost burden, vacancy, permits by income)
- Housing Costs and Affordability (including housing affordability by household income, and owner/renter costs)
- Assisted Housing at Risk of Conversion (the status of assisted low-income rental units that are "at risk" of conversion to market rent status)

Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland—Oakland's Black population has decreased from 36 percent in 2000 to 23 percent in 2020. Oakland's rates of homelessness have also significantly increased from 2017-2022 (83 percent), though the rate of increase has decreased from the period of 2019-2022 (23 percent, compared to 47 percent from 2017-2019). Oaklanders of color also disproportionately face lower rates of homeownership, higher housing cost burden, overcrowded conditions, and homelessness. These trends are being compounded by demographic factors such as rapid aging of the population, and continued prevalence of poverty.

Field Code Changed

~~This appendix~~Appendix B outlines Oakland's existing housing needs and identifies those characteristics that may have significant impacts on housing needs in the community, including anticipated population and household growth. The appendix analyzes population and housing characteristics, identifies special housing needs among certain population groups, evaluates housing conditions, and provides other important information to support the goals, policies, and programs to meet the needs of current and future Oakland residents. This assessment is essential for developing a successful strategy to meet a variety of housing needs in the city. Both local and regional changes since the previous Housing Element are assessed to provide the full scope of housing needs. Analysis in each of the sections below informs the housing programs and policies provided in the element. A more thorough analysis of socioeconomic and housing trends as they relate to affirmatively furthering fair housing—including patterns of segregation and racial discrimination—are provided in Appendix D.

The Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) has produced Local Housing Needs Data packets for jurisdictions in the ABAG-MTC region that have been pre-approved by the State Department of Housing and Community Development (HCD). These data packets largely rely on 2015-2019 five-year American Community Survey (ACS) and 2013-2017 Department of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS) estimates, among other sources. Where the ABAG-MTC data packet does not provide sufficient information, alternate data sources are used.

B.1 Population Characteristics

According to the U.S. Census, Oakland had a population of 440,646 as of 2020 and was the eighth largest city in California. The population of Oakland makes up 26.0% of the population of Alameda County and has continued to grow in recent years. However, Oakland's overall population growth has been inconsistent. Prior to 1980, Oakland experienced three decades of population decline. Beginning around 1990, the Bay Area as a whole became a focal point of significant economic development and investment in the technology sector. By the late 1990s, Oakland became an attractive target for investment and, in part, a respite from higher rents and home prices present throughout the region. By the early 2000s, significant growth without significant regional housing production resulted in severe constraints on housing throughout the region. The 2008-2009 Great Recession and foreclosure crisis saw a brief decline in housing demand, with catastrophic impacts for affected residents, but population growth picked up throughout the economic recovery and has continued to date. Oakland's 2020 population represents an increase by nearly 50,000 from 390,724 in 2010, making Oakland one of the top 10 cities in terms of overall population growth between 2010 and 2020. But over a longer time span, since 2000, Oakland's population has increased by 8.5 percent, below that of the regional growth rate of 14.8 percent. Table B-1 shows Oakland's population estimate data from the California Department of Finance (DOF), compiled by ABAG-MTC. Appendix D, Figure D-19, Gentrification and Displacement Census Tract Typologies, provides important additional context to Oakland's population characteristics.

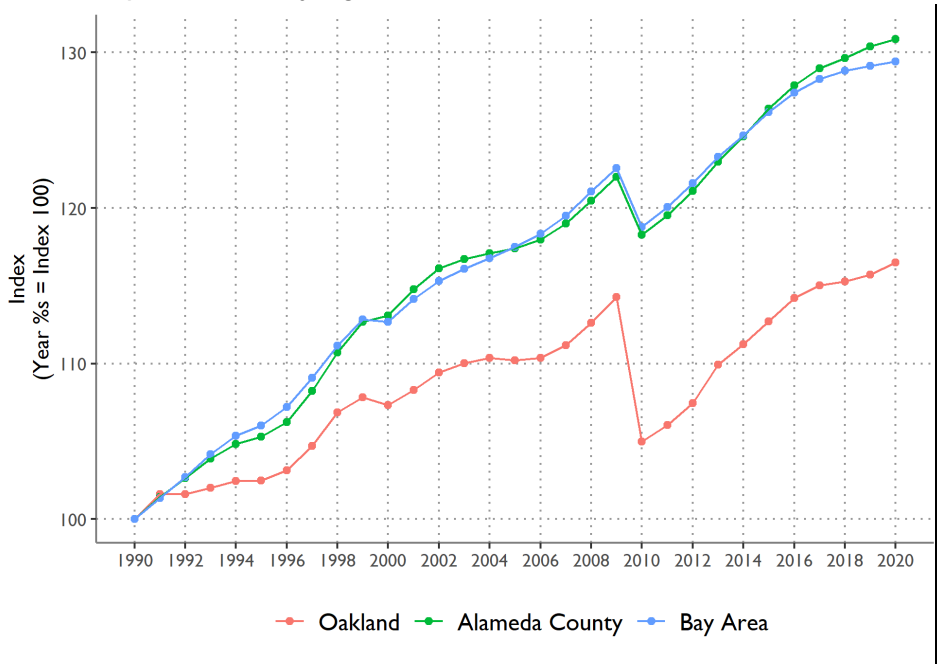

Table B-1: Oakland Population, 2010-2020

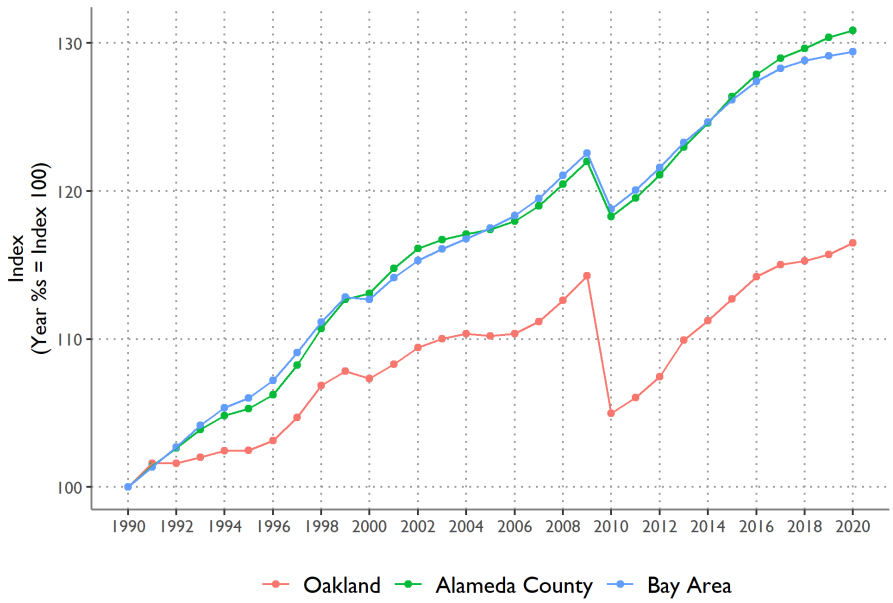
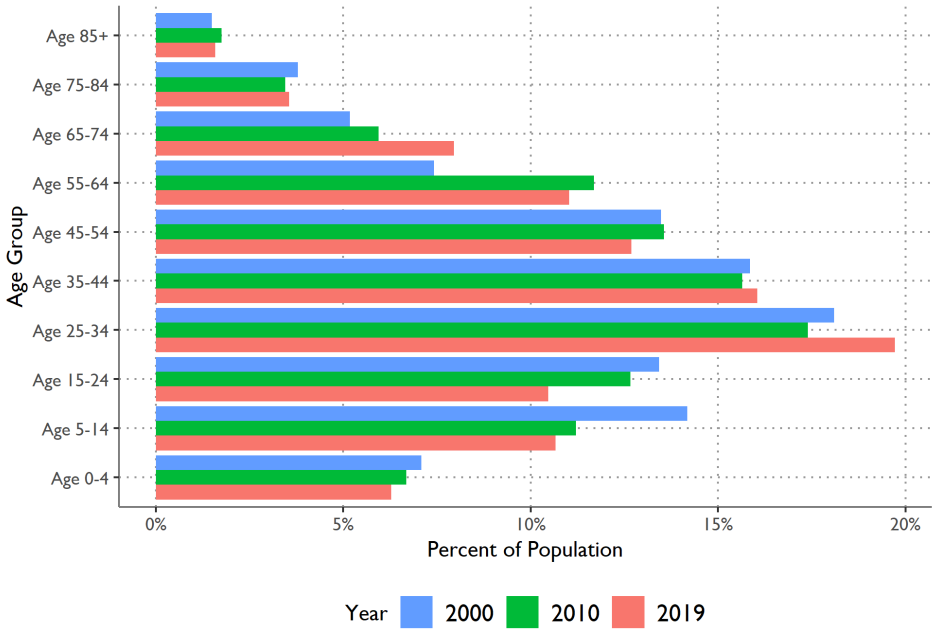


2000	*2005*	*2010*	*2015*	*2020*
399,566	410,189	390,724	419,571	433,697

Source: ABAG-MTC Housing Needs Data Workbook, 2021

ABAG-MTC has also provided DOF estimates of population growth indexed to the population in the year 1990 for Oakland and surrounding regions. Shown in Chart B-1, these data points represent the population growth in each of the geographies relative to their populations in 1990. The break between 2009 and 2010 is due to the differences between population estimates in 2009 and census counts in 2010. DOF uses the decennial census to benchmark subsequent population estimates. As evidenced in the plot, Oakland has seen a lower relative growth rate than both Alameda County and the Bay Area during the 1990 to 2020 period.

Chart B-1: Population Growth by Region, 1990-2020



Source: ABAG-MTC Housing Needs Data Workbook, 2021

POPULATION BY AGE

Current and future housing needs are usually determined in part by the age characteristics of a community's residents. Each age group has distinct lifestyles, family type and size, incomes, and housing preferences. Consequently, evaluating the age characteristics of a community is important in determining its housing needs.

According to the 2019 ACS five-year estimates, the city's median age is 36.5 years, which is slightly—1.1 years—younger than Alameda County's median age of 37.6 years. In recent years, Oakland's median age has increased slightly but largely plateaued, from 33.3 years in 2000 to 36.2 years in 2010. Oakland's 2019 median age is below that of San Francisco (38.2 years) but about the same as San Jose (36.7 years). Like other Bay Area cities, Oakland's median age is below that of the national median – 38.1 years. Census tracts in the Oakland Hills tend to have older populations, while areas in North Oakland, West Oakland, Fruitvale, and East Oakland tend to have younger populations. Despite Oakland's relatively young population, Chart B-2 confirms that groups ages 65 and over in Oakland are nonetheless growing to hold a larger share of the overall population; 10.46 percent of the population was age 65 and over in 2000 compared to 13.11 percent in 2019.

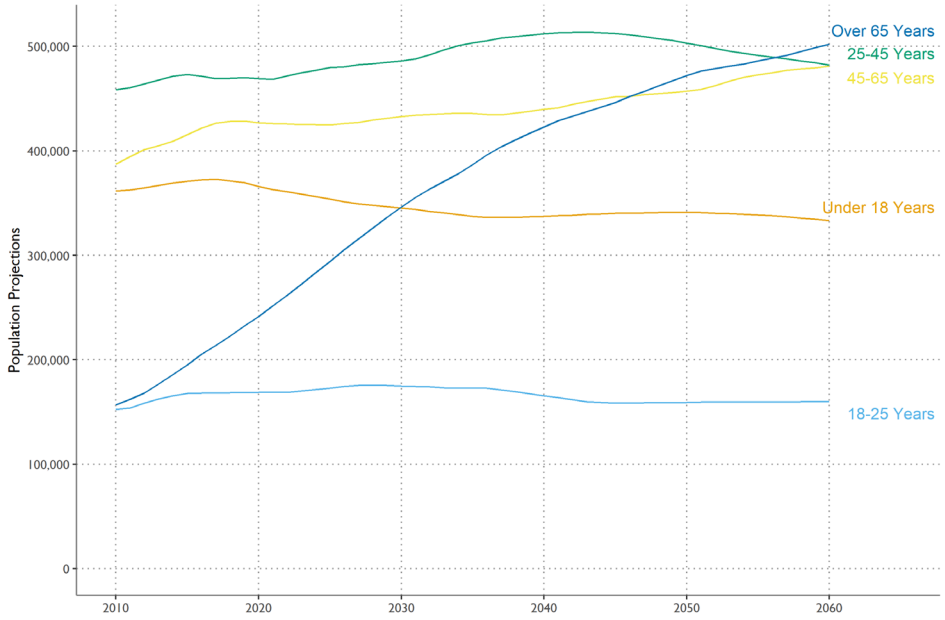


Chart B-2: Oakland Population by Age, 2000-2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001)

The increase in Oakland's senior population reflects national and State trends towards longer lifespans and dramatically reduced birth rates, compared to previous decades. This trend is likely to continue, and will increase the need for housing specifically designed for seniors. Chart B-3 below presents the projected growth of the population by age in Alameda County – it is clear that the need for senior housing will only continue to grow in the upcoming decades.

Chart B-3: Alameda County Age Projections, 2010-2060

Source: California Department of Finance, P-2B County Population Projections, 2019 Baseline

RACE AND ETHNICITY

Oakland has experienced significant racial demographic changes in recent years that City leaders and members of the public alike, particularly Black residents, have described as alarming. Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland. A full assessment of patterns of segregation and other geographic racial disparities in Oakland is provided in Appendix D.

Since 2000, Oakland's non-Hispanic Black or African American population has decreased by 41,390, resulting in its share of population decreasing from 36.26 percent to 23.23 percent. This decrease makes the non-Hispanic Black or African American population no longer the largest single racial group in the city; it is now third behind non-Hispanic white (28.28 percent) and Hispanic or Latinx (27.04 percent) populations. Both the non-Hispanic white and Hispanic or Latinx populations have continued to grow in their total numbers and in their share of the city's overall population since 2000. Table B-2 presents the racial and ethnic composition of the City of Oakland's population in 2000, 2010, and 2019, as reported in the ABAG-MTC data sets, which are based on the U.S. Census (for 2000 and 2010) and on American Community Survey five-year data (for 2019).

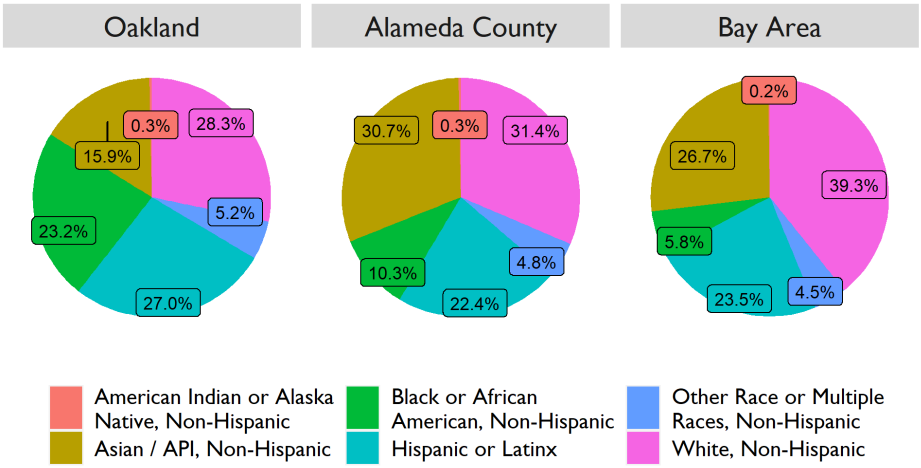

Table B-2: Oakland Population by Race/Ethnicity, 2000-2019

Racial/Ethnic Group	*2000*		*2010*		*2019*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
American Indian or Alaska Native, Non-Hispanic	1,471	0.38%	1,214	0.31%	1,455	0.34%
Asian / API, Non-Hispanic	62,259	16.11%	67,208	17.20%	67,432	15.86%
Black or African American, Non-Hispanic	140,139	36.26%	106,637	27.29%	98,749	23.23%
White, Non-Hispanic	93,953	24.31%	101,308	25.93%	120,225	28.28%
Other Race or Multiple Races, Non-Hispanic	1,229	0.32%	15,289	3.91%	22,294	5.24%
Hispanic or Latinx	87,467	22.63%	99,068	25.35%	114,942	27.04%
Total	**386,518**	**100%**	**390,724**	**100%**	**425,097**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Chart B-4 compares race/ethnicity of Oakland's population to the county and the broader Bay Area. Generally, Oakland has a larger share of Hispanic or Latinx and non-Hispanic Black or African American residents than does the county or Bay Area generally; however, it should be noted that Oakland's Black or African American population has significantly declined over the past two decades. As Oakland's Black or African population has declined, the city's Hispanic or Latinx, non-Hispanic white, and non-Hispanic other/multiple race populations have grown significantly during the period. This is a trend that has continued since at least 1990 with several potential causes. Some Black or African American families may have moved to suburban locations to purchase less costly homes, while others may have been displaced due to rapidly increasing housing costs and residential instability. Further, the significant decrease after 2010 may have been exacerbated by the foreclosure crisis following the Great Recession – which had its epicenter in Oakland's historically Black or African American neighborhoods, including areas of West and East Oakland. In general, California's housing crisis continues to disproportionately impact cities like Oakland, and these impacts are unevenly distributed by race – particularly for the city's Black or African American population. Further discussion of the racial/ethnic dimensions of displacement in Oakland is provided in Appendix D.

Chart B-4: Race/Ethnicity by Region, 2019

B.3 Household Characteristics

HOUSEHOLD SIZE

Compared to Alameda County and the Bay Area as a whole, Oakland has a significantly higher percentage of single adult households and a smaller portion of three to four-person households. This trend was noted in Oakland's 2015-2023 Housing Element and was speculated to be due, in part, to a relatively low proportion of housing units with more than two bedrooms compared to surrounding jurisdictions. According to ACS five-year estimates data, the average household size in Oakland in 2019 was 2.58, a slight increase from 2.47 in 2010. Oakland's average is lower than the average for Alameda County as a whole (2.82). As seen in Table B-3, the share of Oakland's population in 2019 living in a one-person household (33.28 percent) was greater than that of Alameda County (24.44 percent) and the Bay Area as a whole (24.7 percent). However, two-person households account for approximately the same percentage of households in Oakland at 30.89 percent compared to Alameda County (30.46 percent) and the Bay Area overall (31.89 percent). Instead, Oakland has a smaller share of households of three to four persons (26.44 percent) than either the county (34.26 percent) or the Bay Area (32.64 percent).

Table B-3: Households by Household Size by Region, 2019

Household Size	Oakland		Alameda County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
1-Person Household	54,048	33.28%	141,077	24.44%	674,587	24.70%
2-Person Household	50,169	30.89%	175,799	30.46%	871,002	31.89%
3-4-Person Household	42,938	26.44%	197,714	34.26%	891,588	32.64%
5-Person or More Household	15,264	9.40%	62,587	10.84%	294,257	10.77%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

HOUSEHOLD TYPES

A summary of household types in the City of Oakland, Alameda County, and the Bay Area is provided in Table B-4. A family household is a household consisting of two or more people residing together and related by birth, marriage, or adoption. A non-family household consists of a householder living alone (a one-person household) or where the householder shares the home exclusively with people to whom they are not related. According to the ACS data (2015-2019) as analyzed by ABAG-MTC, the greatest share (35.52 percent) of households in Oakland are married-couple family households followed closely behind by single-person households (33.28 percent). Overall, family households account for 54.52 percent of households in Oakland, which is much less than Alameda County (66.65 percent) as well as the Bay Area (66.43 percent). However, Oakland has a greater share of single-parent households (19.0 percent) than either Alameda County (16.05 percent) or the Bay Area (15.19 percent).

Table B-4: Household Types by Region, 2019

Household Types	Oakland		Alameda County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
Female-Headed Family Households	21,717	13.37%	64,165	11.12%	283,770	10.39%
Male-headed Family Households	9,149	5.63%	28,432	4.93%	131,105	4.80%
Married-couple Family Households	57,696	35.52%	292,079	50.60%	1,399,714	51.24%
Other Non-Family Households	19,809	12.20%	51,424	8.91%	242,258	8.87%
Single-person Households	54,048	33.28%	141,077	24.44%	674,587	24.70%
Total	**162,419**	**100%**	**577,177**	**100%**	**2,731,434**	**100%**

HOUSEHOLD INCOME

Household income is one of the most significant factors affecting housing choice and opportunity. Income largely determines a household's ability to purchase or rent housing. While higher-income households have more discretionary income to spend on housing, lower- and moderate-income households are limited in the range of housing they can afford. Typically, as household income decreases, cost burdens and overcrowding increase.

For the purpose of evaluating housing affordability, housing need, and eligibility for housing assistance, income levels are defined by guidelines adopted each year by the California Department of Housing and Community Development (State HCD). For Alameda County, the applicable annual Area Median Income (AMI) for a family of four in 2021 is $125,600. This is an increase of 34.3 percent from the 2014 median income of $93,500. The United States Department of Housing and Urban Development (HUD) has defined the following income categories for Alameda County, based on the median income for a household of four persons for 2021:

- Extremely-low income: 30 percent of AMI and below ($0 to $41,100)
- Very-low income: 31 to 50 percent of AMI ($41,101 to $68,500)
- Low-income: 51 to 80 percent of AMI ($68,501 to $109,600)
- Moderate-income: 81 to 120 percent of AMI ($109,601 to $150,700)
- Above-moderate income: 120 percent or more of AMI ($150,701 or more)

Table B-5 shows the HUD definitions for Alameda County's maximum annual income level for each income group, adjusted by household size. For the purposes of defining income limits, HUD combines Alameda County with Contra Costa County in the "Oakland-Fremont, CA HUD Metro Fair Market Rent (FMR) Area." This data is used when determining a household's eligibility for federal, state, or local housing assistance and used when calculating the maximum affordable housing payment for renters and buyers.

Table B-5: HCD Income Levels by Household Size in Alameda County, 2021

	Maximum Income Level				
Household Size	*Extremely Low*	*Very Low*	*Low*	***Median***	*Moderate*
1 Person	$28,800	$47,950	$76,750	**$87,900**	$105,500
2 Persons	$32,900	$54,800	$87,700	**$100,500**	$120,550
3 Persons	$37,000	$61,650	$98,650	**$113,050**	$135,650
4 Persons	$41,100	$68,500	$109,600	**$125,600**	$150,700
5 Persons	$44,400	$74,000	$118,400	**$135,650**	$162,750
6 Persons	$47,700	$79,500	$127,150	**$145,700**	$174,800
7 Persons	$51,000	$84,950	$135,950	**$155,750**	$186,850
8 Persons	$54,300	$90,450	$144,700	**$165,800**	$198,900

Source: HUD Income Limits 2021

The ABAG-MTC Housing Needs Data Workbook for 2021 divides Oakland's population by HUD income levels. The Data Workbook relies on data from the HUD Comprehensive Housing Affordability Strategy 2013-2017 release. This income data is based on the ACS 2013-2017 estimates, and thus does not align exactly with categories assigned to the 2021 HUD established income levels. Table B-6 provides this data. While Alameda County and the Bay Area overall have relatively similar distributions of households at each income level, Oakland has a greater share of households that made less than 100 percent of AMI (58.56 percent) than either the county (47.33 percent) or the Bay Area (47.7 percent). In fact, nearly a quarter of households in Oakland (23.42 percent) made between zero and 30 percent of AMI.

Table B-6: Households by Household Income Level by Region, 2021

	Oakland		*Alameda County*		*Bay Area*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	37,345	23.42%	88,383	15.53%	396,952	14.70%
31%-50% of AMI	22,159	13.90%	63,850	11.22%	294,189	10.89%
51-80% of AMI	20,120	12.62%	66,130	11.62%	350,599	12.98%
81%-100% of AMI	13,750	8.62%	51,000	8.96%	245,810	9.10%
>100% of AMI	66,075	41.44%	299,735	52.67%	1,413,483	52.33%
Total	**159,449**	**100%**	**569,098**	**100%**	**2,701,033**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.4 Employment Characteristics

According to data from the ABAG-MTC Housing Needs Data Workbook (2021), which relies on the ACS 2019 five-year estimates, there are 225,010 persons among the civilian population in the labor force in the City of Oakland. As seen in Table B-7, the largest industry represented among Oakland workers is Health and Educational Services (33.55 percent). Oakland, Alameda County, and the Bay Area overall have relatively similar distributions of the share of workers in each industry.

Table B-7: Employment by Industry by Region, 2019

	Oakland		*Alameda County*		*Bay Area*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Agriculture & Natural Resources	1,089	0.48%	3,129	0.36%	30,159	0.75%
Construction	13,630	6.06%	45,984	5.33%	226,029	5.62%
Financial & Professional Services	55,210	24.54%	223,957	25.97%	1,039,526	25.83%
Health & Educational Services	75,490	33.55%	259,953	30.14%	1,195,343	29.70%
Information	8,231	3.66%	30,599	3.55%	160,226	3.98%
Manufacturing, Wholesale, & Transportation	30,050	13.35%	150,214	17.42%	670,251	16.66%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.5 Special Needs Groups

Certain groups have greater difficulty in finding suitable affordable housing due to their special needs and circumstances. This may be a result of employment and income, family characteristics, disability, or household characteristics. Consequently, certain residents in the City of Oakland may experience more instances of housing cost burdens, overcrowding, or other housing problems. The categories of special needs addressed in this Element include:

- Extremely-low-income households
- Elderly households
- Persons with disabilities, including developmental disabilities
- Large households
- Female-headed households
- Persons experiencing homelessness
- Undocumented immigrants
- Farmworkers

EXTREMELY-LOW-INCOME RESIDENTS

California State housing laws ~~requires~~require local governments to address the needs of "Extremely-Low-Income" populations, which refers to households with incomes below 30 percent of the Area Median Income (AMI) for the community. In addition to those families making less than 30 percent of AMI, the Federal Poverty Level (FPL) is a threshold established by the federal government that remains constant throughout the country (and thus does not correspond to AMI). Federal statistics can also help the City quantify the extent of the extremely-low income population. The federal government defines poverty as a minimum level of income (adjusted for household size and composition) necessary to meet basic food, shelter, and clothing needs. For 2021, the FPL for a family of four is $26,500, which is less than the $41,100 threshold for 30 percent of AMI. This means that some households that qualify as extremely low-income in Oakland are not considered as living below the FPL. This is indicative of the higher cost of living in Oakland and the Bay Area overall as compared to other areas of the country.

As seen in Table B-8, 23.42 percent of Oakland residents fall below 30 percent of AMI. This data, from the ABAG-MTC Housing Needs Data Workbook (2021), is based on the HUD CHAS ACS tabulation 2013-2017 release. About one-third of both non-Hispanic Black or African American (35.11 percent) and Asian/Pacific Islander (API) (33.63 percent) households in Oakland fall below 30 percent of AMI. While the data is aggregated in the ABAG-MTC data workbook, when disaggregated the proportion of extremely-low-income non-Hispanic Pacific Islanders is lower (22.9 percent) while the proportion of extremely-low-income non-Hispanic Asians is slightly higher (33.9 percent). Households that identify as Hispanic or Latinx, American Indian or Alaska Native (non-Hispanic), some other race or multiple races (non-Hispanic), and White (non-Hispanic) have a prevalence of 24.54 percent, 24.36 percent, and 9.59 percent, respectively, of those who are below 30 percent of AMI. White (non-Hispanic) and some other race or multiple races have the lowest prevalence of extremely-low-income households.

Table B-8: Oakland Household Income Distribution by Race/Ethnicity, 2013-2017

Racial/Ethnic Group	*0%-30% of AMI*	*31%-50% of AMI*	*51%-80% of AMI*	*81%-100% of AMI*	*>100% of AMI*	*Total*
American Indian or Alaska Native, Non-Hispanic	24.36%	18.81%	11.50%	18.94%	26.39%	100%
Asian/API, Non-Hispanic	33.63%	13.73%	10.27%	8.14%	34.23%	100%
Black or African American, Non-Hispanic	35.11%	17.66%	13.70%	8.35%	25.19%	100%
White, Non-Hispanic	9.59%	7.47%	9.49%	8.28%	65.17%	100%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

According to ACS 2019 five-year estimates, Oakland has a poverty rate of 16.7 percent. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If a family's total income is less than the family's threshold, then that family and every individual in it is considered in poverty. Oakland's poverty rate is much higher than the rate of 9.9 percent in Alameda County overall. Poverty rates have dropped in Oakland and Alameda County overall since 2014, from 21.0 percent and 12.9 percent, respectively. Table B-9 displays the poverty status by race among Oakland residents. Poverty is highest among those who identify as Black or African American (23.77 percent) and lowest among those who identify as non-Hispanic White (7.71 percent).

As further described in Appendix D – Assessment of Fair Housing, racially/ethnically concentrated areas of poverty in Oakland are primarily clustered in/around Downtown and West Oakland, in/around Fruitvale/Jingletown, and further south along International Boulevard near the Coliseum. Further, ACS 2019 five-year estimates also geographically distinguish income in the past 12 months below poverty level by race and ethnicity. The Black or African American alone population that lives below the poverty level is primarily clustered in West Oakland, Downtown, and a few tracts in East Oakland along MacArthur Freeway and adjacent to Lake Merritt. The Asian alone population that is living below poverty level is primarily clustered in Downtown, particularly in Chinatown, in addition to parts of East Oakland in/around Fruitvale/Jingletown and further south along International Boulevard near the Coliseum. The Hispanic or Latinx population that is living below poverty level is primarily clustered in West Oakland and in East Oakland along MacArthur Freeway and in/around the Eastmont and Elmhurst neighborhoods.

As described in Table B-26, extremely low-income residents are significantly less likely than higher-income Oakland households to be homeowners~~(~~: 15.56 percent are homeowners~~,~~ and 84.44 percent are renters~~.) While~~. In contrast, Table B-24 shows that 40.7 percent of overall Oakland households are homeowners and 59.3 percent are renters. Extremely-Low-Income ~~household are less likely to be cost burdened compared to all income groups (16.5 percent, as compared to 20 percent), they are~~ households are also much more likely to be either cost burdened or severely cost burdened ~~(61.10 percent, as compared to 20.50 percent), as shown in Table B-31a~~. A cost burden and extreme cost burden is defined as paying more than 30 percent and more than 50 percent of one's household income on housing costs, respectively. Table B-31a shows that 61.1 percent of Extremely Low Income

households in Oakland are severely cost burdened and an additional 16.5 percent are cost burdened, meaning that 77.6 percent of extremely low income households in Oakland experience some degree of cost burden. In comparison, 20.5 percent of overall Oakland households are severely cost burdened and 20.1 percent of overall Oakland households are cost burdened, for a total of 40.6 percent of Oakland households experiencing some degree of cost burden, as defined.

As indicated in Appendix A, Evaluation of the 2015-2023 Housing Element, The City of Oakland's NOFA for New Construction of Multifamily Affordable Housing includes a threshold requirement that 20% percent of units be affordable to Extremely Low-Income Households. The City coordinates its scoring criteria and funding pipeline with the Oakland Housing Authority, which awards Section 8 rental subsidies, in order to further support the creation of units affordable to extremely-low-income households. The City also continues to participate in the Alameda County-wide efforts under the EveryOne Home Plan, a road map for ending homelessness. Policies and actions in the Housing Action Plan, including ~~(x, y, and z)~~Policy 3.1 (and actions 3.1.1-3.1.2); actions 3.3.4; 3.3.6; and 3.3.18; and Policy 4.3 (and actions 4.3.1-4.3.6), will continue to seek ways to provide permanent housing affordable to extremely low-income households, by supporting funding from the state and federal levels, and take actions to address barriers to the development of such housing.

Table B-9: Oakland Poverty Status by Race, 2015-2019

Racial/Ethnic Group	*Percent Below Federal Poverty Line*
Black or African American (Hispanic and Non-Hispanic)	23.77%
American Indian or Alaska Native (Hispanic and Non-Hispanic)	21.81%
Hispanic or Latinx	20.62%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	19.93%
Asian / API (Hispanic and Non-Hispanic)	17.19%
White (Hispanic and Non-Hispanic)	9.56%
White, Non-Hispanic	7.71%

ELDERLY RESIDENTS

Elderly residents have many different housing needs, depending on their age, level of income, current tenure status, cultural background, and health status. Elderly households may need assistance with personal and financial affairs, networks of care to provide services and daily assistance, and even possible architectural design features that would accommodate disabilities that would help ensure continued independent living. Table B-10 shows the distribution of Oakland residents aged 65 and over by racial group compared to the population of other age groups. The majority of those aged 65 and over in Oakland identify as some other race or multiple races (36.86 percent), followed by Asian or Asian Pacific Islander (28.91 percent), and Black or African American (25.10 percent). In Oakland, the proportion of those 65 and older who are either Asian or Black or African American is much greater than it is among younger age groups. In contrast, the proportion of younger residents who identify as White is greater among younger age groups.

Table B-10: Oakland Senior and Youth Population by Race, 2021

	Age 0-17		*Age 18-64*		*Age 65+*	
Race	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*

Source: ABAG-MTC Housing Needs Data Workbook, 2021

One of the potential elderly housing needs that may require a specific governmental response is low incomes among older adults. As seen in Table B-11, according to the ABAG-MTC Housing Data Needs Workbook, 31.95 percent of older adults aged 62 and over in Oakland have an income below 30 percent of AMI~~,~~ (see "Extremely-Low-Income Residents" discussion above), which is higher than the rate of 23.42 percent found among the overall population in Oakland. As they age, older adults may face additional housing costs to ensure their homes remain accessible and to eliminate threats to health and safety. Like all lower income residents, many older adult residents may be facing overpayment problems or are unable to find affordable rental units at all. As seen in Table B-11, senior renters are much more likely to fall into the extremely low-income (zero to 30 percent of AMI) or very low-income (31 to 50 percent of AMI) categories than seniors who own their homes. Strikingly, among renters aged 62 and over, 54.84 percent are considered extremely low-income.

Table B-11: Oakland Senior Households[1] by Income and Tenure, 2021

	Owner Occupied		*Renter Occupied*		*All Senior Households*	
Income Group	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	2,925	14.10%	8,865	54.84%	11,790	31.95%

Notes:

1. For the purposes of this table, ABAG-MTC considers senior households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Table B-12 shows the percentage of those senior households at each income level that spend less than 30 percent of their income on housing costs, between 30 and 50 percent of their income on housing costs, and more than 50 percent of their income on housing costs. Those senior households

considered extremely low-income (making less than 30 percent of AMI) are the group most likely to be spending more than 50 percent of their overall household income on housing costs at 51.02 percent.

Table B-12: Oakland Cost-Burdened Senior Households[1] by Income Level, 2021

Percent of Income Used for Housing Costs	*0%-30% of AMI*	*31%-50% of AMI*	*51%-80% of AMI*	*81%-100% of AMI*	*>100% of AMI*
<30% of Income	28.88%	40.44%	51.15%	65.20%	85.75%
30%-50% of Income	20.10%	29.96%	30.11%	18.36%	11.66%
>50% of Income	51.02%	29.60%	18.74%	16.44%	2.59%
Total	**100%**	**100%**	**100%**	**100%**	**100%**

Notes:
1. For the purposes of this table, ABAG-MTC considers senior households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Other potential elderly housing needs that may require a specific governmental response include:

- **Assisted living facilities**. Assisted living facilities provide elderly residents with the opportunity to maintain an independent housing unit while receiving needed medical services and social support. Congregate care facilities include housing with medical and health services.
- **Relocation assistance**. Some elderly residents need assistance in relocating to a dwelling that better suits their space and income needs.
- **Mobility impairment**. Mobility-impaired elderly residents requiring special accessibility features in their dwelling units. Mobility impairment may require that special accessibility features be included in the design and construction of a home. Mobility impairment can also create a need for a living arrangement that includes health, meals, cleaning, and/or other services as part of the housing package. A number of living arrangements are possible, from senior citizen developments with individual dwelling units to assisted living facilities to 24-hour support services. Table B-13 shows the prevalence of different types of disabilities among seniors over age 65 in Oakland. The most prevalent type of disability is ambulatory difficulty, experienced by 25.0 percent of Oakland seniors. An ambulatory difficulty refers to a mobility impairment that causes significant difficulty walking or climbing stairs.

Table B-13: Oakland Seniors (Age 65 and Over) by Type of Disability, 2019

Disability	*Percentage of Seniors*
With an ambulatory difficulty[1]	25.0%
With an independent living difficulty[2]	17.93%
With a hearing difficulty[3]	14.03%
With a self-care difficulty[4]	10.59%
With a cognitive difficulty[5]	11.77%
With a vision difficulty[6]	7.95%

Notes:

1. Ambulatory difficulty refers to having serious difficulty walking or climbing stairs.
2. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.
3. Hearing difficulty refers to those who are deaf or have serious difficulty hearing.
4. Self-care difficulty refers to having difficulty bathing or dressing.
5. Cognitive difficulty refers to having difficulty remembering, concentrating or making decisions due to a physical, mental, or emotional problem.
6. Vision difficulty refers to those who are blind or have serious difficulty seeing.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Senior Housing

Oakland presently has 80 senior housing facilities with a capacity to house 5,385 individuals (Table B-14). Thus, there is capacity for senior housing facilities to house approximately 10 percent of Oakland's senior population. However, many senior households may prefer to stay in their existing residences well into retirement. Senior housing may be most attractive to the oldest cohort (85 years and older), and the capacity to house 5,385 individuals may be adequate for current populations in that cohort. However, the City will continue to support the construction of senior housing, particularly near services such as shopping, medical care, and recreation, to prepare for the aging population.

PERSONS WITH DISABILITIES

Persons with disabilities have physical or mental impairments that require special housing designed for self-sufficiency. According to 2019 American Community Survey estimates compiled by ABAG, 49,362 persons (11.7 percent of the non-institutionalized population) in Oakland had a disability. This proportion is slightly higher than that of Alameda County (9.2 percent) and the Bay Area (9.6 percent) as illustrated in Chart B-5.

Chart B-5: Persons with Disabilities by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (California Employment Development Department, Local Area Unemployment Statistics (LAUS), Sub-county areas monthly updates, 2010-2021).

Disability can further be broken down into six categories. The Census Bureau provides the following definitions for these disability types:

- Hearing difficulty: deaf or has serious difficulty hearing;
- Vision difficulty: blind or has serious difficulty seeing even with glasses;
- Cognitive difficulty: has serious difficulty concentrating, remembering, or making decisions;
- Ambulatory difficulty: has serious difficulty walking or climbing stairs;
- Self-care difficulty: has difficulty dressing or bathing; and
- Independent-living difficulty: has difficulty doing errands alone such as visiting a doctor's office or shopping.

These disability types are counted separately and are not mutually exclusive, as an individual may report more than one disability; thus, these counts should not be summed. Table B-15 provides a breakdown of Oakland's adult population by disability type. The most prevalent disability was ambulatory difficulty at 6.05 percent.

Table B-15: Oakland Disability by Type, 2019

Disability	*Percentage of the Civilian Non-Institutionalized Population Aged 18 and Over*
With an ambulatory difficulty	6.05%
With a cognitive difficulty	4.91%
With an independent living difficulty	4.61%
With a self-care difficulty	2.72%
With a hearing difficulty	2.80%
With a vision difficulty	2.32%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Further, residents with disabilities may have more difficulty in finding employment. In Oakland, according to 2019 ACS estimates compiled by ABAG, approximately 14.2 percent of the civilian non-institutionalized population 18 years to 64 years in the labor force with a disability were unemployed, while only 5.6 percent of those with no disability were unemployed. The census considers individuals to not be in the labor force if they are not employed and are either not available to take a job or are not looking for one. This category typically includes discouraged workers, students, retired workers, stay-at-home parents, and seasonal workers in an off season who are not looking for work.

Given the barriers faced by persons with disabilities, the provision of affordable and barrier-free housing is essential to meet their housing needs. As described in Appendix D, there are a greater proportion of persons with disabilities living in some tracts in Downtown Oakland, including Chinatown, plus a tract in West Oakland and a tract in the Piedmont Ave neighborhood. There are two approaches to housing design for residents with disabilities: adaptability and accessibility. Adaptable housing is a design concept in which a dwelling unit contains design features that allow for accessibility and use by mobility-impaired individuals with only minor modifications. An accessible unit has the actual special features installed in the house (grab bars, special cabinetry). To address these needs, the State requires design or accessibility modifications, such as access ramps, wider doorways, assist bars in bathrooms, lower cabinets, elevators, and the acceptance of service animals.

Developmental Disabilities

Since January 2011, per SB 812 as codified in Section 65583, housing elements are required to address the housing needs of individuals with a developmental disability within the community. The analysis must include an estimate of the number of persons with developmental disabilities, an assessment of the housing need, and a discussion of potential resources. According to Section 4512 of the Welfare and Institutions Code a "developmental disability" means a disability that originates before an individual attains age 18 years, continues—or can be expected to continue—indefinitely, and constitutes a substantial disability for that individual, which includes intellectual disability, cerebral palsy, epilepsy, and autism. This term shall also include disabling conditions found to be

closely related to intellectual disability or to require treatment similar to that required for individuals with an intellectual disability, but shall not include other disabling conditions that are solely physical in nature.

Many developmentally-disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

The California Department of Developmental Services (DDS) is responsible for overseeing the coordination and delivery of services to more than 330,000 Californians with developmental disabilities including cerebral palsy, intellectual disability, Down Syndrome, autism, epilepsy, and related conditions through a network of 21 regional centers and state-operated facilities.

DDS consumer data compiled by ABAG provides an estimate of the number of Oakland residents with a developmental disability. Table B-16 shows that the vast majority of residents with a developmental disability (82.01 percent) live in the home of a parent/family/guardian. Further, approximately 6.3 percent (3,111 persons) of the population that has a developmental disability is under the age of 18, while the remaining 93.7 percent (46,251 persons) is over 18 years old.

Table B-16: Oakland Population with Developmental Disabilities by Residence, 2020[1]

Residence Type	*Number*	*Percent*
Home of Parent/Family/Guardian	2,689	82.01%
Community Care Facility	168	5.12%
Independent/Supported Living	306	9.33%
Intermediate Care Facility	1	0.03%
Foster/Family Home	57	1.74%
Other	58	1.77%
Total	**3,279**	**100%**

1. The California Department of Developmental Services provides ZIP code level counts. To get jurisdiction-level estimates, ZIP code counts were crosswalked to jurisdictions using census block population counts from Census 2010 SF1 to determine the share of a ZIP code to assign to a given jurisdiction. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Developmental Services, Consumer Count by California ZIP Code and Residence Type, 2020)

There are a number of housing types appropriate for people living with a development disability: rent-subsidized homes, licensed and unlicensed single-family homes, inclusionary housing, Section 8 vouchers, special programs for home purchase, HUD housing, and SB 962 homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the types of considerations that are important in serving this need group. Incorporating barrier-free design in all~~,~~ new multifamily housing (as required by California and federal fair housing laws) is especially important to provide the widest range of choices for disabled residents. Special consideration should also be given to the affordability of housing, as people with disabilities may be living on a fixed income.

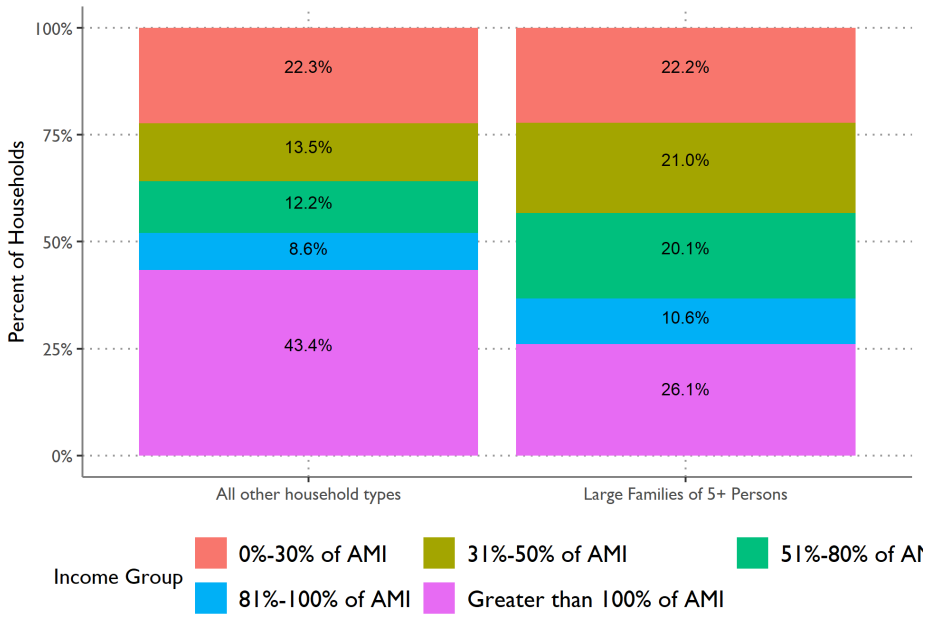
LARGE FAMILIES

Large families are those households of five or more related individuals. The special need of this group is for housing of sufficient size and number of bedrooms that would prevent overcrowding. Cost is an important consideration, as many large families do not have sufficient income to afford larger homes or apartments. At 9.40 percent of all households, Oakland has a slightly lower proportion of large family households than the county (10.8 percent) and the Bay Area region (10.8 percent). As shown in Table B-17, the 2019 American Community Survey reported 15,264 large households with five or more members, including 6,210 owner-occupied households and 9,054 renter-occupied households. About 9.38 percent of owner-occupied households and 9.41 percent of renter-occupied households were considered large households.

Table B-17: Oakland Household Size by Tenure, 2019

	Owner-Occupied		*Renter-Occupied*	
Housing Type	*Number*	*Percent*	*Number*	*Percent*
1 Person Household	17,620	26.63%	36,428	37.85%
2 Person Household	22,047	33.32%	28,122	29.22%
3 Person Household	11,668	17.63%	13,488	14.01%
4 Person Household	8,632	13.04%	9,150	9.51%
5 Or More Person Household	6,210	9.38%	9,054	9.41%
Total	**66,177**	**100%**	**96,242**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009)



In addition to household income, cost burden can be used to determine the extent of housing needs for large-family households. Cost burden indicates that a household is paying between 30 percent and 50 percent of their income towards rent, while severe cost burden indicates that a household is paying over 50 percent of their income towards rent. As shown in Table B-18, about 42.97 percent of large families experience some level of cost burden (either regular or severe). Similarly, 42.13 percent of all other household types experience cost burden. However, as illustrated in Chart B-6, a greater proportion of large families have incomes that are less than 100% of AMI compared to all other household types in Oakland.

Table B-18: Oakland Cost Burden by Household Size, 2013-2017

	Large Family (5+ Persons)		*All Other Household Types*	
Income Category	*Number*	*Percent*	*Number*	*Percent*
No Cost Burden	7,210	57.03%	83,625	57.86%
Cost Burden	3,004	23.76%	29,995	20.75%
Severe Cost Burden	2,429	19.21%	30,900	21.38%
Total	**12,643**	**100%**	**144,520**	**100%**

FEMALE-HEADED HOUSEHOLDS

Female-headed families, including those with children, are identified as a special needs group, because they are more likely to be low-income and face difficulty in finding affordable housing. This can be attributed in part to the systemic gender pay gap, and single women with children may particularly face housing discrimination when searching for a home. In Oakland, there is also a greater proportion of female-headed households with children in West Oakland and the downtown area. As shown in Table B-19 there are 21,717 female-headed households and 9,149 male-headed households in Oakland. These groups constitute 13.37 percent and 5.63 percent, respectively, of Oakland's total number of households. Female-headed households represented about 10.91 percent of owner-occupied households and 15.06 percent of renter-occupied households.

Table B-19: Oakland Household Type by Tenure, 2019

	Owner-Occupied		Renter-Occupied	
Household Type[1]	*Number*	*Percent*	*Number*	*Percent*
Married-Couple Family Households	33,183	50.14%	24,513	25.47%
Female-Headed Family Households	**7,223**	**10.91%**	**14,494**	**15.06%**
Male-Headed Family Households	**3,400**	**5.14%**	**5,749**	**5.97%**
Householders Living Alone	17,620	26.63%	36,428	37.85%
Other Non-Family Household	4,751	7.18%	15,058	15.65%

1. For data from the Census Bureau, a "family household" is a household where two or more people are related by birth, marriage, or adoption. "Non-family households" are households of one person living alone, as well as households where none of the people are related to each other.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25011)

Of the 21,717 female-headed households in Oakland, about 59.5 percent had children under 18 years. Table B-20 below shows that of these, 39.72 percent were under the poverty line, compared to only 11.49 percent of female-headed households without children. This demonstrates that female-headed households with children are more likely to have greater housing needs and face difficulties in finding affordable housing. Additional information on female-headed households, including households with children, is provided in Appendix D.

Table B-20: Oakland Female-Headed Households by Poverty Status[1], 2019

	Households With Children		Households Without Children	
Poverty Level	*Number*	*Percent*	*Number*	*Percent*
Above Poverty Level	7,786	60.28%	7,789	88.51%
Below Poverty Level	5,131	39.72%	1,011	11.49%

1. The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income.

PERSONS EXPERIENCING HOMELESSNESS

A common method to assess the number of homeless persons in a jurisdiction is through a Point-in-Time (PIT) Count. The PIT Count is a biennial census of sheltered and unsheltered persons in a Continuum of Care (CoC) completed over a 24-hour period in the last 10 days of January. The unsheltered PIT Count is conducted ~~annually~~biannually in Alameda County and is a requirement to receive homeless assistance funding from HUD. The PIT Count does not function as a comprehensive analysis and should be considered in the context of other key data sources when assessing the state of homelessness in a community. Due to COVID-19, no point in time count was conducted in 2021. As of the time of this report, the delayed point in time count took place on February 23, 2022, and a full report was published in late summer 2022.

According to HUD, a CoC is a "a community plan to organize and deliver housing and services to meet the specific needs of people who are homeless as they move to stable housing and maximize self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness." Each Bay Area County is its own CoC. In Alameda County, EveryOne Home oversees the CoC Program. The

goals of the Everyone Home Plan include preventing homelessness and other housing crises; increasing permanent housing opportunities for homeless and high-risk households; provide wrap-around services to ensure housing stability and quality of life; and measuring success and reporting outcomes.

Table B-21 provides an estimate of the homeless population by household type and shelter status in Alameda County. According to the 2022 PIT Count, there were 7,135 unsheltered homeless persons and 2,612 sheltered persons in Alameda County.

Table B-21: Homelessness by Household Type and Shelter Status in Alameda County, 2022

Shelter Status	*People in Households Composed Solely of Children Under 18*	*People in Households with Adults and Children*	*People in Households without Children Under 18*	***Total***
Sheltered	9	522	2,081	**2,612**
Unsheltered	88	322	6,725	**7,135**

~~*Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2012)*~~*Source:) EveryOneHome Point-in-Time Count, 2022*

The PIT Count can be further divided by race or ethnicity, which can illuminate whether homelessness has a disproportionate racial impact within a community. The data from HUD on Hispanic/Latinx ethnicity for individuals experiencing homelessness does not specify racial group identity. Accordingly, individuals in either ethnic group identity category (Hispanic/Latinx or non-Hispanic/Latinx) could be of any racial background.

The racial/ethnic breakdown of Alameda County's homeless population is shown in Table B-22. Notably, those who identify as Black or African American (Hispanic and non-Hispanic) represent 43 percent of the unhoused population in the county, but only 10 percent of the overall population. Additionally, those identify as American Indian or Alaska Native (Hispanic and non-Hispanic) are also represented disproportionately among the unhoused population, as they make up 4 percent of homeless Alameda County residents but only 1 percent of its overall population. Asian/API, White, and those who identify as some other race or multiple races are all underrepresented among the homeless population compared to their share of the overall population. Further, those who identify as Hispanic/Latinx are also slightly overrepresented among the unhoused.

Table B-22: Racial/Ethnic Group Share of General and Homeless Population in Alameda County, 2022

Racial/Ethnic Group	*Share of Homeless Population*	*Share of Overall Population*
American Indian or Alaska Native (Hispanic and Non-Hispanic)	4%	1%
Asian / API (Hispanic and Non-Hispanic)	5%	332%
Black or African American (Hispanic and Non-Hispanic)	43%	10%
White (Hispanic and Non-Hispanic)	39%	34%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	7%	22%

Hispanic/Latinx	25%	23%
Non-Hispanic/Latinx	75%	77%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2019)

Per ~~HCD's~~HCD's requirements, jurisdictions also need to supplement county-level data with local estimates of people experiencing homelessness. The 2022 PIT Count summary identified 5,055 persons experiencing homelessness in the City of Oakland on the night of February 23, 2022, making up approximately 52 percent of the county's unhoused population. This is an increase of 984 people (24 percent) from the 4,071 unhoused individuals who were counted in the 2019 count. A comparison of Oakland and Alameda County's unhoused population is described in Table B-23, and a description of Oakland's unhoused population by location and household type for 2022 and 2019 is described in Table B-24. As shown in Table B-24, of the 5,055 persons experiencing homelessness in the City of Oakland, 1,718 were sheltered and 3,337 were unsheltered. In 2019, 861 of the 4,071 individuals experiencing homelessness were sheltered, and in 2017, 859 of the 2,761 individuals experiencing homelessness were sheltered.

Table B-23: Homeless Population in Oakland and Alameda County, 2022

Jurisdiction	*2015*	*2017*	*2019*	*2022*
Oakland	2,191	2,761	4,071	5,055
Alameda County	4,040	5,629	8,022	9,747

The Permanent Access to Housing (PATH) Framework, which is Oakland's five-year plan to address homelessness, identifies the following as the main drivers of homelessness in the city:

- Structural racism
- Insufficient controls on the rental housing market that create vulnerability and housing instability for tenants
- Insufficient housing units that are affordable to households with the lowest incomes, including particularly those whose incomes are below 20 percent of AMI
- Systemic barriers that often prevent residents who are returning home from incarceration from living with family members and/or accessing both public and private rental housing and employment opportunities
- Inadequate pay and benefits for many of the jobs that are available in the community, and insufficient access to quality employment opportunities that pay wages that meet the cost of housing

Homelessness in Oakland remains a humanitarian crisis that has only been exacerbated by the COVID-19 pandemic. However, even prior to COVID-19, rapidly increasing housing costs, increased residential instability, and the lack of available affordable housing and supportive services contributed to this significant increase. Homelessness also impacts Oakland residents unequally by race/ethnicity – as discussed further in Appendix D, the vast majority of unhoused Oakland residents are Black (about 59 percent, based on 2022 PIT data). The data also does not capture those living in more precarious housing situations, including people temporarily living with friends or family members, "couch surfing," or living in a vehicle not captured during the PIT Count.

The PATH Framework organizes strategies to address homelessness under three major themes:

1. Prevention strategies to keep people from becoming homeless;
2. Emergency strategies to shelter and rehouse households and improve health and safety on the street and;
3. Creation of affordable, extremely-low-income, and permanent supportive housing units prioritized for households experiencing homelessness.

According to 2020 Homeless Management Information System (HMIS) data, the Oakland, Berkeley/Alameda County Continuum of Care contains 2,032 total year-round beds, including 1,383 emergency shelter beds. Additional actions the City takes to provide shelter and permanent supportive housing for unhoused people, as well as potential constraints, are discussed in Appendix F. Further prioritization of permanent housing policies in the PATH Framework should be adopted to fully meet the needs of unhoused residents. Th actions are described in the Housing Action Plan.

UNDOCUMENTED IMMIGRANTS

It should be noted that there is a significant undocumented population in Oakland that may or may not be captured in DOF's population data. While undocumented immigrants are typically counted in annual American Community Surveys and decennial Census reports, this data is incomplete and it can be difficult to estimate the exact number of undocumented immigrants who live in Oakland. The Migration Policy Institute (MPI) estimates that as of 2019 there are 107,000 undocumented or unauthorized immigrants living in Alameda County, about 1.0 percent of the national total

(11,047,000 people) or about 3.9 percent of the State's total (2,739,000 people).[1] A 2015 study found that East Oakland in particular is home to a significant number of undocumented or unauthorized immigrants – about 17.0 percent of East Oakland's population were considered unauthorized compared to 6.0 percent of Alameda County's population.[2] According to the study "almost 70 percent of the unauthorized who are at least five years old do not speak English well, often limiting their social and economic status. For example, the unauthorized are often among the working and poor – those who work full-time but toil in low-wage industries with limited chances of economic mobility and limited access to employer-based health insurance." Further, East Oakland's undocumented or unauthorized population is predominantly Latino, compared to higher proportions of unauthorized East and South Asian immigrants throughout the county.

Undocumented immigrants are particularly at risk of housing precarity and exploitation due to their legal status and fear of repercussion. Further, a number of federal rental assistance programs—including public housing, Housing Choice Vouchers, and Section 8 project-based rental assistance—are not available to unauthorized immigrants. However, other federal grant-funded and other housing assistance programs (including HUD homeless assistance and Keep Oakland Housed) do not require the verification of immigrant status.

FARMWORKERS

Farmworkers are traditionally defined as people whose primary incomes are earned through permanent or seasonal agricultural labor. Farmworkers are generally considered to have special housing needs due to their limited income and the often unstable nature of their employment. In addition, farmworker households tend to have high rates of poverty, live disproportionately in housing that is in the poorest condition, have extremely high rates of overcrowding, and have low homeownership rates. Given the high rate of urbanization in Oakland, along with changes in local agriculture industries, farmworker residents are likely to be permanent, rather than migrant farmworkers. The special housing needs among the permanent farmworker population are for the same type of financial assistance that other low-income residents would require.

Although farmworkers still represent a special housing need in many communities, the advent of mechanization in harvesting crops, new planting techniques, and changes in the types of crops grown have substantially reduced the overall number of farmworkers and the proportion of migrant farmworkers. Oakland is also located in a highly urbanized area of the Bay Area with no working farms within or adjacent to the city limits, which limits the presence of farmworkers in the city.

In Alameda County, there has been a decrease in the number of seasonal and permanent farmworkers. According to the U.S. Department of Agriculture (USDA) Census of Farmworkers, between 2002 and 2017 Alameda County experienced a 22.0 percent decrease in the number of seasonal farmworkers (i.e., those that have worked on a farm 150 days or less) and a 47.1 percent decrease in the number of permanent farmworkers. In 2017, there were 593 farmworkers in total in Alameda County. See Chart B-7 for these trends.

Chart B-7: Farm Labor in Alameda County, 2002-2017

*Farm workers are considered seasonal if they work on a farm less than 150 days in a year,while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

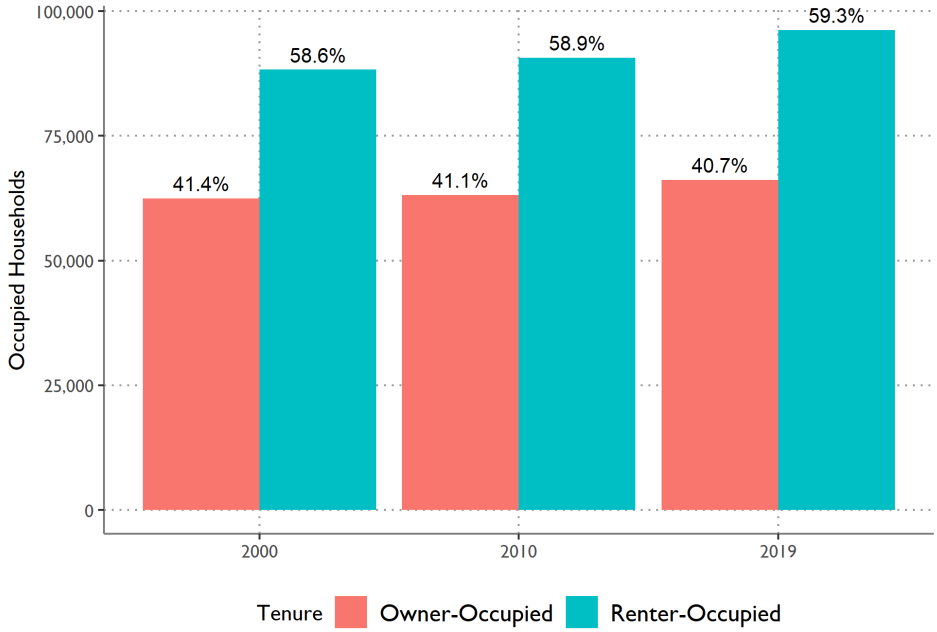
Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor)

In the local setting, estimating the size of the agricultural labor force can be especially problematic due to undercounts and inconsistent definitions across government agencies. According to the Census ACS five-year estimates, there were 1,089 Oakland residents employed in the "agriculture, forestry, fishing and hunting" industry in 2019 – about 0.5 percent of the labor force. This is similar to Alameda County (0.4 percent) and the Bay Area (0.7 percent). Determining the breakdown by seasonal and permanent workers can be even more difficult. Data from the California Department of Education provides one local estimate by also tracking the student population of migrant workers, available in Table B-~~23~~25. However, no schools in Oakland have reported any migrant worker students in the four years documented here by ABAG-MTC. Alameda County has seen a slight decrease over the course of these four years from 874 to 790 students and the Bay Area overall has seen a steady decrease from 4,630 to 3,976 students.

Table B-~~23~~25: Migrant Worker Student Population[1] by Region, 2016-2020

Academic Year	*Oakland*	*Alameda County*	*Bay Area*
2016-2017	0	874	4,630
2017-2018	0	1,037	4,607
2018-2019	0	785	4,075
2019-2020	0	790	3,976

1. The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.



Source: ABAG-MTC Housing Needs Data Workbook (California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data, Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

B.6 Housing Stock Characteristics

HOUSING TENURE

Most households in Oakland are renters. The percentage of renter-occupied households in Oakland increased modestly from 58.6 percent to 59.3 between 2010 and 2019, despite the significant increase in absolute renter and homeowner population. There were 88,301 renter-occupied units and 62,849 owner-occupied units in 2000, 90,649 renter-occupied units and 63,142 owner-occupied units in 2010, and 96,242 renter-occupied units and 66,177 owner-occupied units in 2019. Owner-occupied housing units tend to be congregated in the Oakland Hills and parts of North Oakland, while significantly more housing units are renter-occupied in West Oakland, Downtown, and East Oakland.

Chart B-8: Oakland Household Tenure, 2000 – 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, Census 2000 SF1, Table H04; U.S. Census Bureau, Census 2010 SF1, Table H04; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

Oakland's household tenure differs from patterns seen in the county and the larger Bay Area, reflecting its status as a big city. As shown in Table B-~~24~~26, 53.5 percent of Alameda County households and 56.1 percent of Bay Area households lived in owner-occupied homes, compared to 40.7 percent of Oakland households. Looking at other large Bay Area cities, San Francisco has lower rates of ownership housing compared to Oakland, while San Jose and Fremont have significantly higher ownership rates.

Table B-~~24~~26: Household Tenure by Region, 2019

	Owner-Occupied		*Renter-Occupied*	
Region	*Number*	*Percent*	*Number*	*Percent*
Oakland	66,177	40.7%	96,242	59.3%
Alameda County	308,891	53.5%	268,286	46.5%
San Francisco	136,239	37.6%	226,115	62.4%
San Jose	184,600	56.8%	140,514	43.2%
Fremont	45,912	60.1%	29,775	39.9%
Bay Area	1,531,955	56.1%	1,199,479	43.9%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

Racial and ethnic disparities in tenure exist in Oakland, shown in Table B-~~25~~27. Households considered to be non-Hispanic white are almost evenly split between owners and renters, while households considered to be American Indian or Alaskan native of any ethnicity, Black or African American of any ethnicity, other race or multiple races of any ethnicity, and Hispanic or Latinx are largely renters. American Indian or Alaskan native households of any ethnicity have the highest renter-occupied rates at 70.83 percent as of 2019. Racial and ethnic income disparities shown in Table B-8 above may also contribute to these disparities in tenure, since renters are more likely to be lower income than are homeowners.

Table B-~~25~~27: Oakland Housing Tenure by Race/Ethnicity, 2019

	Owner-Occupied		*Renter-Occupied*	
Racial/Ethnic Group[1]	*Number*	*Percent*	*Number*	*Percent*
American Indian or Alaska Native (Hispanic and Non-Hispanic)	390	29.17%	947	70.83%
Asian / API (Hispanic and Non-Hispanic)	11,094	42.78%	14,838	57.22%
Black or African American (Hispanic and Non-Hispanic)	13,904	32.17%	29,322	67.83%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	7,479	29.32%	18,033	70.68%
White (Hispanic and Non-Hispanic)	33,310	50.16%	33,102	49.84%
Hispanic or Latinx	8,881	30.62%	20,124	69.38%
White, Non-Hispanic	30,030	52.10%	27,612	47.90%

2. ~~1.~~ For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here.

The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labeled "Hispanic and Non-Hispanic" are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003(A-I))

Disparities in tenure are also apparent across different income levels, as might be expected. As ownership is typically more costly than renting, lower-income households are often renters. In Oakland, the majority of lower-income households—those making less than 80 percent of AMI—are renters, while the majority of households making above 100 percent of AMI are owners. See Table B-~~26~~28 for the complete breakdown by income group. This indicates that homeownership is likely out of reach for many lower-income households. Considering the disproportionate racial/ethnic share of renters in Oakland, especially among American Indian or Alaska native, Black or African American and Hispanic or Latinx households, and the significant share of Black or African American and Asian households with income below 30 percent of AMI (Table B-8), this highlights a need to target both economic as well as racial/ethnic disparities to affirmatively further fair housing, which will be further discussed in Appendix D.

Table B-~~26~~28: Oakland Housing Tenure by Income Level, 2019

	Owner-Occupied		*Renter-Occupied*	
Income Group[1]	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	5,810	15.56%	31,535	84.44%
31%-50% of AMI	6,069	27.39%	16,090	72.61%
51%-80% of AMI	6,950	34.54%	13,170	65.46%
81%-100% of AMI	5,360	38.98%	8,390	61.02%
Greater than 100% of AMI	39,210	59.34%	26,865	40.66%

1. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Alameda Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Rates of homeownership also typically depend on the type of housing available. Most detached single-family homes are owner-occupied; see Table B-~~27~~29. However, a significant share of these units—slightly less than one quarter—are renter-occupied. Further, about 55.79 percent of attached single-family homes are occupied by renters. Nearly all of Oakland's multifamily housing stock is renter-occupied. Meeting affordability needs, especially for renters, must consider the type of housing available to residents.

Table B-~~27~~29: Oakland Housing Tenure by Housing Type, 2019

	Owner-Occupied		*Renter-Occupied*	
Housing Type	*Number*	*Percent*	*Number*	*Percent*
Detached Single-Family Homes	52,515	75.08%	17,432	24.92%
Attached Single-Family Homes	3,700	44.21%	4,670	55.79%
Multi-Family Housing	9,601	11.51%	73,826	88.49%
Mobile Homes	334	53.70%	288	46.30%
Boat, RV, Van, or Other	27	50.94%	26	49.06%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25032)

HOUSING TYPE

During the 2010 to 2020 period, housing development in Oakland was primarily multifamily, although there was an increase in housing units of all types. Using DOF estimates provided by ABAG-MTC, Table B-~~28~~30 shows that Oakland added 564 single family detached homes in the 2010s; however, given the large pre-existing base, this was less than one percent increase. Single family attached housing stock grew by 2.41 percent, although only 155 units were added. The bulk of the housing increase—4,774 housing units—was in five-plus unit multifamily housing types. The number of total units has increased by 3.39 percent over this period driven primarily by the addition of attached single-family homes and multifamily housing consisting of five-plus units.

Table B-~~28~~30: Oakland Housing Type Trends, 2010 – 2020

	2010		2020		Percent Change
Building Type	*Number*	*Percent*	*Number*	*Percent*	*(2010 – 2020)*
Single-Family Home: Detached	73,904	43.55%	74,468	42.44%	0.76%
Single-Family Home: Attached	6,842	4.03%	7,007	3.99%	2.41%
Multifamily Housing: Two to Four Units	32,600	19.21%	32,844	18.72%	0.75%
Multifamily Housing: Five-plus Units	55,809	32.88%	60,583	34.53%	8.55%
Mobile Homes	555	0.33%	555	0.32%	0.00%
Totals	**169,710**	**100%**	**175,457**	**100%**	**3.39%**

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Finance, E-5 series)

OVERCROWDED HOUSEHOLDS

According to the U.S. Census, overcrowding occurs where there are more than 1.01 persons per room (excluding bathrooms and kitchens) in an occupied housing unit and severe overcrowding occurs when there are more than 1.5 persons per room. Overcrowding typically occurs when there is an inadequate supply of affordable housing. As shown in Table B-~~29~~31, 13,653 out of 162,419 housing units in Oakland were either overcrowded or severely overcrowded (8.41 percent). This is slightly higher than the rate in Alameda County (7.87 percent) and the Bay Area (6.9 percent). While the entire city experiences some level of overcrowding higher than the region, the highest tract-level rates of overcrowding occur in ~~the southwestern part of~~parts of East and Deep East Oakland, particularly in census tracts along International Boulevard.

Table B-~~29~~31: Overcrowding[1] Severity by Region, 2013-2017

	Not Overcrowded		Overcrowded		Severely Overcrowded	
Region	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Oakland	148,766	91.59%	7,432	4.58%	6,221	3.83%
Alameda County	531,752	92.13%	29,007	5.03%	16,418	2.84%
Bay Area	2,543,056	93.10%	115,696	4.24%	72,682	2.66%

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Further, renters tend to experience overcrowding more often than owners. As shown in Chart B-9, about 11.5 percent of renter-occupied households experience some level of overcrowding while only 3.9 percent of owner-occupied households do. Rates of severe overcrowding are nearly triple among renters than they are among owners.

Chart B-9: Oakland Overcrowding by Tenure and Severity, 2013-2017

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

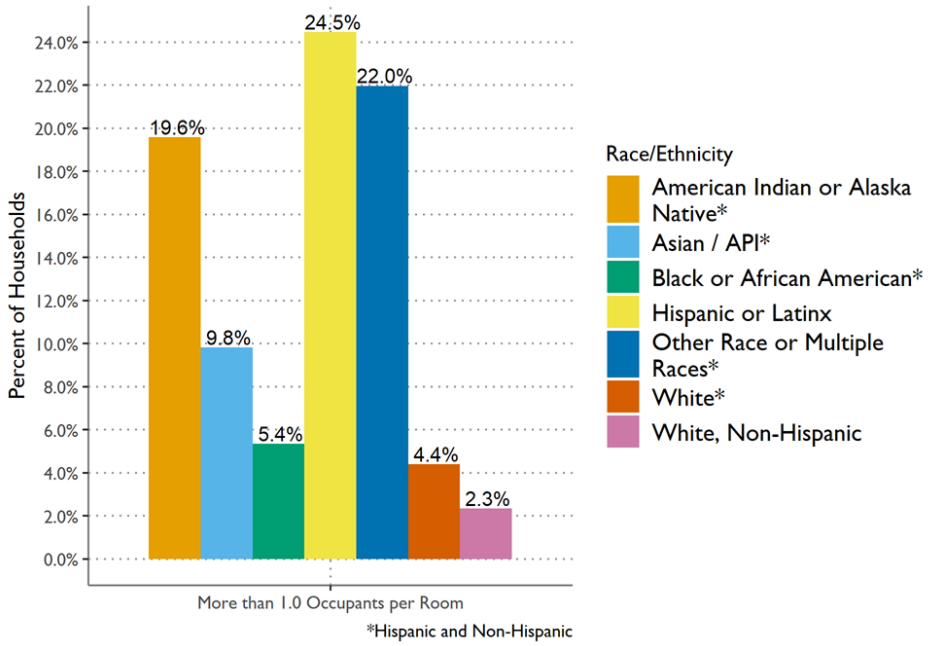
Since renters are more likely to be lower income than homeowners, they may experience higher rates of overcrowding. Lower-income households in Oakland (those making less than 80 percent of AMI), generally tend to have higher rates of overcrowding. For instance, as shown in Table B-~~30~~32, among extremely-low-income households (i.e., those making less than 30 percent of AMI) 6.48 percent are considered overcrowded and 5.51 percent are severely overcrowded. Households with higher incomes (i.e., those making greater than 100 percent of AMI) are 1.88 percent overcrowded and 1.53 percent severely overcrowded.

Table B-~~30~~32: Overcrowding[1] by Income Level and Severity in Oakland, 2013-2017

Income Group[2]	*Overcrowded*	*Severely Overcrowded*
0%-30% of AMI	6.48%	5.51%
31%-50% of AMI	8.69%	5.42%
51%-80% of AMI	7.30%	4.24%
81%-100% of AMI	5.41%	3.52%
Greater than 100% of AMI	1.88%	1.53%

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

2. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.



Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Like tenure, rates of overcrowding are unevenly distributed by race/ethnicity. Chart B-10 below demonstrates the breakdown of overcrowding within various racial/ethnic groups in Oakland. According to the ABAG-MTC data workbook, "Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here."[3] In addition, "[t]he racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labeled 'Hispanic and Non-~~Hispanic~~'Hispanic' are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units."[4]

When compared across racial and ethnic groups, overcrowding is most prevalent among Hispanic or Latinx households, other race or multiple race households of any ethnicity, and for American Indian or Alaska Native households of any ethnicity as 24.5 percent, 22.0 percent, and 19.6 percent of each group experiences overcrowding, respectively. In Oakland, majority Asian American communities like Saint Elizabeth, San Antonio, and East Peralta, have a higher overcrowding rate (10 percent) than the city as a whole (8 percent).[5] Overcrowding rates are low for non-Hispanic white households (2.3 percent).

COST BURDEN

Cost burden, or overpayment, is defined as monthly ~~shelter~~housing costs in excess of 30 percent of a household's income. Severe cost burden is defined as paying over 50 percent of household income for ~~shelter~~housing costs. ~~Shelter~~Housing cost is defined as the monthly owner costs (mortgages, deed of trust, contracts to purchase or similar debts on the property and taxes, insurance on the property, and utilities) or the gross rent (contract rent plus the estimated monthly cost of utilities). HUD Comprehensive Housing Affordability Strategy (CHAS) data provides estimates of cost burden by tenure and income category. Estimates use the HUD Area Median Family Income (HAMFI) to determine overpayment. HAMFI is the median family income calculated by HUD for each jurisdiction in order to determine Fair Market Rents (FMRs) and income limits for HUD programs. HAMFI is not necessarily equivalent to other median income calculations due to a series of adjustments made by HUD.

According to 2013-2017 CHAS estimates, a total of 32,479 households experience cost burden (20.10 percent) while an additional 33,050 households experience severe cost burden (20.50 percent). The means that nearly half of all Oakland households experience some level of cost burden. Of the 65,529 households experiencing some level of cost burden, 14,119 of them are considered moderate- or above-moderate-income and 51,410 are considered lower-income. This indicates that housing affordability is particularly out of reach for lower-income households in Oakland.

Further, renters are particularly impacted by cost burden since renters are limited to the rental market while owners can build equity with their homes. Renters in Oakland tend to have higher rates of cost burden than owners – for instance, 46.5 percent of all renters experience some level of cost burden while only 31.8 percent of owners do. Rates are further unevenly distributed between renters and owners by income level, as evident in Table B-~~31a~~33a below. As described in Appendix D, the highest rates of cost burden are experienced by non-Hispanic Black or African American and Hispanic or Latinx households, with a general geographic concentrations in East Oakland, as well as some tracts in the Jack London District and Grand-Lake neighborhood. Additional context on cost burden as it relates to racial equity is provided in Appendix D.

Table B-~~31a~~33a: Oakland Cost-Burdened Households by Income and Tenure, 2013-2017[1]

	Renters		*Owners*		*Total Households[2]*	
Income Category	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Extremely-Low-Income (Under 30% HAMFI[3])						
No Cost Burden/Not Computed	6,765	23.10%	1,110	18.90%	7,875	22.40%
Cost Burden	4,980	17%	835	14.20%	5,815	16.50%
Severe Cost Burden	17,575	59.90%	3,935	66.90%	21,510	61.10%
Very-Low-Income (30% - 50% HAMFI)						
No Cost Burden/Not Computed	4,055	26.10%	2,080	36.30%	6,135	28.80%
Cost Burden	6,810	43.80%	1,340	23.40%	8,150	38.30%
Severe Cost Burden	4,690	30.20%	2,315	40.40%	7,005	32.90%
Low-Income (50% - 80% HAMFI)						
No Cost Burden/Not Computed	6,470	53.50%	3,160	48.80%	9,630	51.90%
Cost Burden	4,780	39.50%	1,640	25.30%	6,420	34.60%
Severe Cost Burden	840	6.90%	1,670	25.80%	2,510	13.50%
All Lower-Income (Under 80% HAMFI)						
No Cost Burden/Not Computed	17,290	30.40%	6,350	35.10%	23,640	31.50%
Cost Burden	16,570	29.10%	3,815	21.10%	20,385	27.20%
Severe Cost Burden	23,105	40.60%	7,920	43.80%	31,025	41.30%
Moderate- and Above-Moderate-Income (Over 80% HAMFI)						
No Cost Burden/Not Computed	34,200	86.90%	38,120	80.90%	72,320	83.70%
Cost Burden	4,724	12%	7,370	15.60%	12,094	14%
Severe Cost Burden	415	1.10%	1,610	3.40%	2,025	2.30%
All Income Groups						
No Cost Burden/Not Computed	51,490	53.50%	44,470	68.20%	95,960	59.40%
Cost Burden	21,294	22.10%	11,185	17.20%	32,479	20.10%
Severe Cost Burden	23,520	24.40%	9,530	14.60%	33,050	20.50%

1. According to HUD, households spending 30 percent or less of their income on housing expenses have no cost burden, households spending 31 to 50 percent of their income have cost burden, and households spending 51 percent or more of their income have severe cost burden.
2. Discrepancies in sums are due to rounding errors.
3. HUD Area Median Family Income (HAMFI).

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

Table B-~~31b~~33b summarizes cost burden severity in Oakland compared to Alameda County and the region. Cost burden in Alameda County and the Bay Area region are comparable; cost burden in Oakland is higher than in the County and region. In particular, more Oakland households are severely cost-burdened than in the County or region.

Table B-~~31b~~33b: Cost Burden Severity by Region, 2015-2019

	No Cost Burden		*Cost Burden*		*Severe Cost Burden*	
Region	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Oakland	88,832	54.69%	35,183	21.66%	33,949	20.90%
Alameda County	350,326	62.06%	117,618	20.83%	96,579	17.11%
Bay Area	1,684,831	63.06%	539,135	20.18%	447,802	16.76%

1. Percentages do not add to 100 percent as each jurisdiction includes households for which data is not computed

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau American Community Survey 5-Year Data (2015-2019), Table B25070, B25091)

HOUSING VACANCY

Housing vacancy rates provide one metric to assess the balance between the supply and demand of housing in a region. Low vacancy rates occur when demand outpaces the supply of housing, while high vacancy rates indicate an oversupply of housing. Housing costs also tend to be higher with low vacancy rates. Estimates from the 2015-2019 ACS compiled by ABAG-MTC indicate that 10,881 (6.7 percent) out of the 162,419 housing units in Oakland were vacant, which is higher than in the county (5.4 percent) but about equivalent to the entire Bay Area, as shown in Table B-~~32~~34.

Table B-~~32~~34: Oakland Vacant Units by Type, 2019

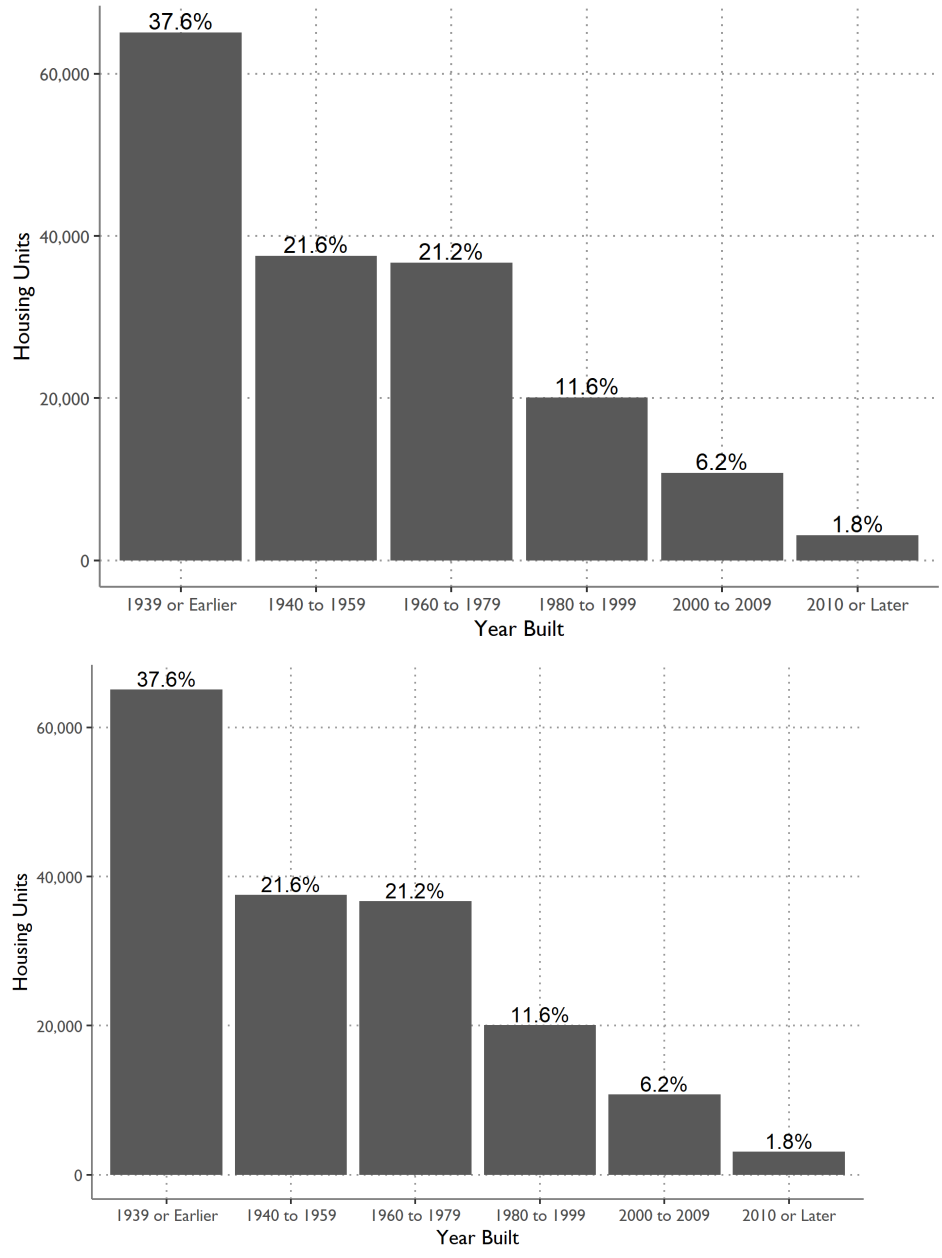
Vacancy Status	*Oakland*	*Alameda County*	*Bay Area*
For Rent	2,457	7,998	41,117
For Sale	458	1,961	10,057
For Seasonal, Recreational, or Occasional Use	637	3,892	37,301
Other Vacant	6,208	13,569	61,722
Rented, Not Occupied	571	1,517	10,647
Sold, Not Occupied	550	1,982	11,816
Total Vacant Housing Units	**10,881 (6.7%)**	**30,919 (5.4%)**	**172,660 (6.3%)**

Source: ABAG-MTC Housing Needs Data Workbook (American Community Survey 5-Year Data (2015-2019), Table B25004)

HOUSING PERMITS BY INCOME

Using data provided in the City's Annual Progress Report, the number of building permits issued from 2015 to 2021 is available by income group. In total, 16,789 building permits were issued during this period, or about 113.7 percent of the 5th cycle RHNA. Most of this development has been permitted at the higher income ranges, with 14,966 units permitted for above-moderate-income households – this translates to nearly nine above-moderate-income permits for every lower-income permit. Only 1,079 very-low-income units (52.4 percent) were permitted, 666 low-income units (32.1 percent) were permitted, and 78 moderate-income units (2.8 percent) were permitted. See Table B-~~33~~35 for the proportion of the RHNA for the period within which these permits were issued.

Table B-~~33~~35: Oakland Housing Permitting, 2015 – 2021



Income Group	*Number of Permits*	*Percent of 5th Cycle RHNA Met*
Very-Low-Income	1,079	52.4%
Low-Income	666	32.1%
Moderate-Income	78	2.8%
Above-Moderate-Income	14,966	191.5%
Total	**16,789**	**113.7%**

Source: City of Oakland, Housing Element Annual Progress Report, 2021

HOUSING STOCK CONDITIONS

The condition of the housing stock, including the age of buildings and units that may be in substandard condition, is also an important consideration in a community's housing needs. In Oakland, about 80.4 percent of the housing stock was constructed prior to 1980 and is over 40 years old. About 8.0 percent of the housing stock has been constructed since 2000, with only 1.8 percent constructed since 2010. See Chart B-11 for the age of Oakland's housing stock as of 2019.

Chart B-11: Age of Oakland Housing Stock, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25034)

A high proportion of older buildings, especially those built more than 30 years ago, may indicate that ~~substantial~~substandard housing conditions may be an issue. Housing is considered substandard when physical conditions are determined to be below the minimum standards of living, as defined by Government Code Section 17920.3. A building is considered substandard if any of the following conditions exist:

- Inadequate sanitation
- Structural hazards
- Nuisances
- Faulty weather protection
- Fire, safety, or health hazards
- Inadequate building materials
- Inadequate maintenance
- Inadequate exit facilities
- Hazardous wiring, plumbing or mechanical equipment
- Improper occupation for living, sleeping, cooking, or dining purposes
- Inadequate structural resistance to horizontal forces
- Any building not in compliance with Government Code Section 13143.2

Any household living in substandard conditions in considered in need of assistance, even if they are not actively seeking alternative housing arrangements. Estimating the number of substandard units can be difficult, but the lack of certain infrastructure and utilities can often be an indicator of substandard conditions. According to the 2018 Oakland Equity Indicators Report, 1.36 percent of housing units in zip codes that were more than 60 percent non-White reported housing habitability complaints, compared to 0.67 percent of housing units in zip codes that were more than 60 percent White. In addition, according to 2019 ACS estimates compiled by ABAG-MTC, as shown in Table B-34, about 0.28 percent of owners lack complete kitchen facilities while 1.91 percent of renters do. Further, approximately 0.2 percent of owners lack complete plumbing facilities while 1.02 percent of renters do. In total, there are 837 occupied housing units with incomplete plumbing facilities and 3,514 units with incomplete kitchen facilities. During outreach, Oakland residents also discussed the prevalence of mold and lead, both of which pose major habitability issues.

Further, the City's Building Bureau's Code Enforcement division summarizes inspections for blight, housing, and zoning-related issues. During Fiscal Year 2020 – 2021, there were 5,575 blight and building maintenance complaints in Oakland. While the City has not carried out a census of substandard housing, based on known substandard housing issues from the Building Bureau's documented housing complaints, approximately 3.5 percent of the City's housing stock is likely substandard. As discussed in the Housing Action Plan Action 2.1.3, the City is moving to a proactive enforcement framework to better address issues of substandard housing – particularly as these issues disproportionately impact BIPOC communities.

Oakland's Code Enforcement estimates the number of units in need of major rehabilitation and replacement based on an assessment of the number of units being assigned red-tag ~~(~~status or declared unsafe ~~declaration)~~ for structural reasons or other hazards generated by fire or other incidents such as vehicle impact. These numbers will change with issuance of permits to demolish or to repair. Based on estimates from 2021 and 2022, the number is estimated at 10 buildings (or approximately 50 units) per year, since the real estate market is relatively active with short supply of housing. ~~A slower market tends to leave more units in need of rehabilitation and replacement.~~Additionally, around 2,600 units are estimated to be in need of moderate to substantial rehabilitation or repair. These units are in structures that show major damage such as missing siding, holes in the roof or a roof that is listing, a tilted or cracked foundation, or missing windows or doors.

Table B-34: Oakland Substandard Housing Issues, 2019

Building Amenity	*Owner*	*Renter*
Incomplete Kitchen Facilities	0.28%	1.91%
Incomplete Plumbing Facilities	0.20%	1.02%

B.7 Housing Costs and Affordability

Several housing market characteristics—such as high levels of cost burden or overcrowding—may indicate high housing costs and a lack of affordability within a community. This section summarizes housing costs in Oakland and assesses the extent to which housing is affordable for residents of the city.

HOUSING AFFORDABILITY BY HOUSEHOLD INCOME

Housing affordability can be estimated by comparing the cost of renting or owning a home in Oakland with the maximum affordable housing costs to households at different income levels. In evaluating affordability, the maximum affordable price or cost refers to the maximum amount that could be afforded by households in the upper range of their respective income category. Households in the lower end of each category can afford less in comparison. The maximum affordable home and rental prices for residents of Oakland by different income households and unit size (bedrooms) are shown in Table B-~~35~~37. HCD has estimated the 2021 Alameda County AMI for a family of four to be $125,600, which is about a 34.3 percent increase from the 2014 AMI estimate of $93,500.

Table B-~~35~~37: Oakland Housing Affordability by Income Group, 2021

		Affordable Monthly Payment[2]		*Utilities[3]*		*Housing Costs*	*Maximum Affordable Price*	
Household Size	*AMI Limits[1]*	*Renter*	*Owner*	*Renter*	*Owner*	*Taxes & Insurance[4]*	*Renter*	*Owner[5]*
Extremely-Low-Income (<30% AMI)								
1 Person (Studio)	$28,800	$720	$720	$180	$180	$252	$541	$76,121
2 Person (1 Bedroom)	$32,900	$823	$823	$196	$196	$288	$627	$89,380
3 Person (2 Bedroom)	$37,000	$925	$925	$221	$221	$324	$704	$100,197
4 Person (3 Bedroom)	$41,100	$1,028	$1,028	$254	$254	$360	$773	$109,036
5 Person (4 Bedroom)	$44,400	$1,110	$1,110	$309	$309	$389	$802	$108,839
Very-Low-Income (31%-50% AMI)								
1 Person (Studio)	$47,950	$1,199	$1,199	$180	$180	$420	$1,019	$158,113

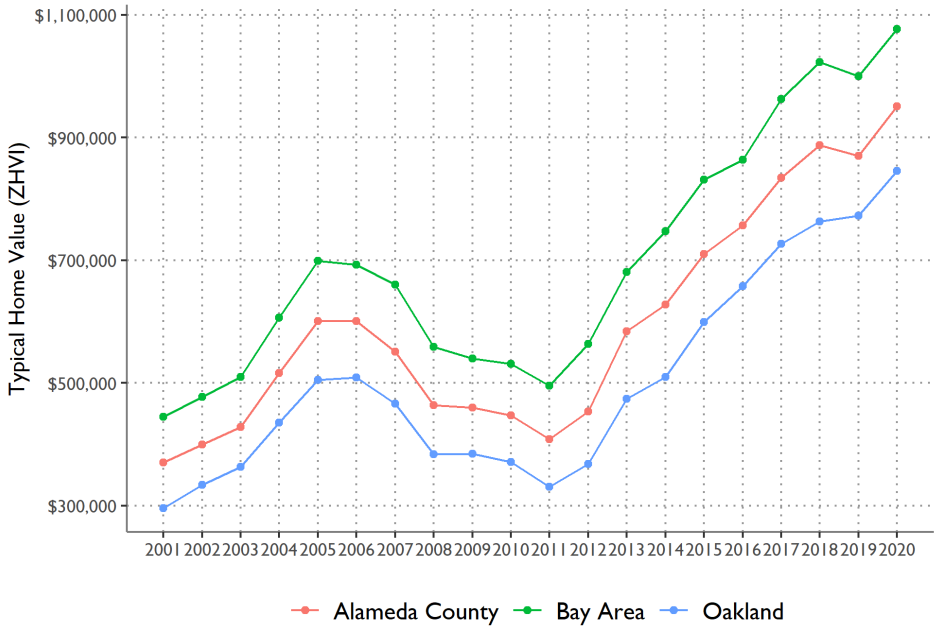
4 Person (3 Bedroom)	$68,500	$1,713	$1,713	$254	$254	$599	$1,458	$226,714
5 Person (4 Bedroom)	$74,000	$1,850	$1,850	$309	$309	$648	$1,542	$235,751
Low-Income (51%-80% AMI)								
1 Person (Studio)	$76,750	$1,919	$1,919	$180	$180	$672	$1,739	$281,595
2 Person (1 Bedroom)	$87,700	$2,193	$2,193	$196	$196	$767	$1,997	$324,471
3 Person (2 Bedroom)	$98,650	$2,466	$2,466	$221	$221	$863	$2,245	$364,642
4 Person (3 Bedroom)	$109,600	$2,740	$2,740	$254	$254	$959	$2,486	$402,835
5 Person (4 Bedroom)	$118,400	$2,960	$2,960	$309	$309	$1,036	$2,652	$426,251
Moderate-Income (81%-120% AMI)								
1 Person (Studio)	$105,500	$2,638	$3,077	$180	$180	$1,077	$2,458	$480,363
2 Person (1 Bedroom)	$120,550	$3,014	$3,516	$196	$196	$1,231	$2,818	$551,262
3 Person (2 Bedroom)	$135,650	$3,391	$3,956	$221	$221	$1,385	$3,170	$620,105
4 Person (3 Bedroom)	$150,700	$3,768	$4,395	$254	$254	$1,538	$3,513	$686,848
5 Person (4 Bedroom)	$162,750	$4,069	$4,747	$309	$309	$1,661	$3,760	$732,813

1. AMI limits based on 2021 HCD State Income Limits for Alameda County, other assumptions are derived from Zillow estimates (as of October 4, 2021) and the National Association of Realtors. The 2021 Alameda County AMI is $125,600.

2. Affordable monthly payment for renters and owners is assumed to be one-twelfth of 30% of median income applicable for the number of bedrooms. The exception is moderate-income owners, whose affordable payment is assumed to be is one-twelfth of 35% of median income applicable for the number of bedrooms as specified by HCD, pursuant to HSC 50052.5(b)(4).

3 Utilities are estimated according to the 2021 Alameda County Housing Authority Utility Allowance Schedule. Estimates are based on the combined average cost of gas and electric heating, cooking and water heating, as well as other electric, water, trash collection, sewer, air conditioning, refrigeration and range/microwave across all unit types [i.e., elevator/high-rise/apartment/walk-up (multi-family), detached house/single family dwelling, mobile/manufactured home, row house/townhouse & semi-detached/duplex]. Costs are assumed equivalent for owners and renters.

4. Taxes and insurance are assumed to be 35% of monthly affordable housing costs for owners.



5. Assumed 30-year amortization, 2.82% interest rate, 6.0% down payment and closing costs equal to 2% of the sale price.

Source: HCD State Income Limits, 2021; Alameda Housing Authority Utility Allowance Schedule, 2021; Zillow Mortgage Rates, October 2021; National Association of Realtors Research Group, Downpayment Expectations & Hurdles to Homeownership, April 2020; Dyett & Bhatia, 2021

OWNERSHIP COSTS

Like many cities in the Bay Area, housing costs in Oakland have continued to rise over the last two decades. Home values are tracked using the Zillow Home Value Index (ZHVI) as compiled by ABAG-MTC, which is a smoothed, seasonally adjusted measure of the typical value for homes in the 35th to 65th percentile range. The regional ZHVI estimate is a household-weighted average of county-level ZHVI files, where household counts are yearly estimates from DOF's E-5 series. As demonstrated in Chart B-12, home values did decline as steeply in Oakland as they did in Alameda County and the Bay Area following the 2008 financial collapse. Home values in 2014 surpassed the previous high of just over $500,000 in 2005, and have risen continually since, to reach over $800,000 in 2020. These are, however, lower than that for the county as well as the Bay Area region.

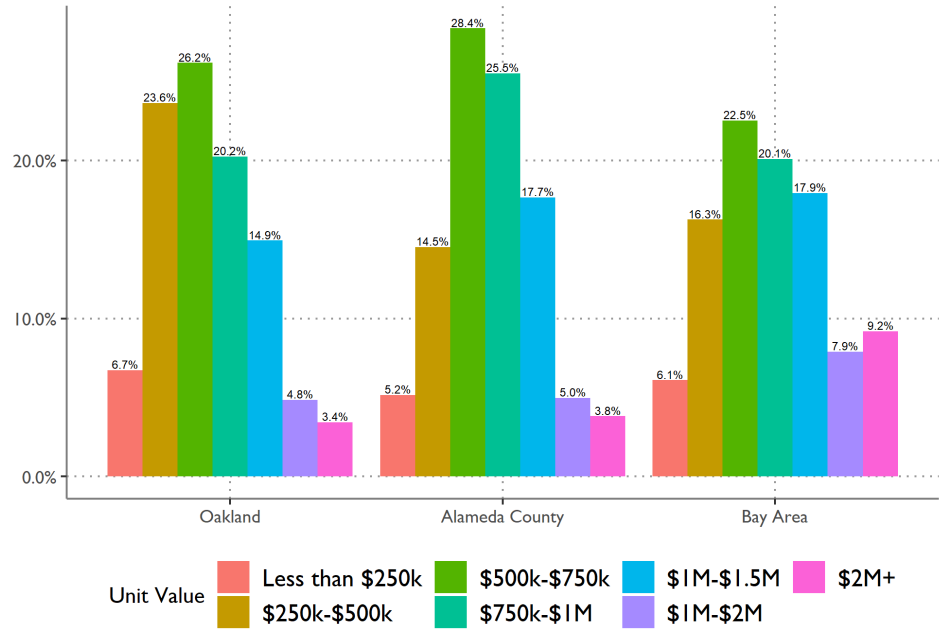


Chart B-12: Zillow Home Value Index (ZHVI) by Region, 2001 – ~~2021~~2020

Source: ABAG-MTC Housing Needs Data Workbook (Zillow, ZHVI December 31, 2001 – December 31, 2020)

In addition to the ZHVI, the ABAG-MTC data worksheet provides estimates of home values for owner-occupied units based on the 2019 ACS. Shown in Chart B-13, this data confirms the disparity in home value across region as indicated by the ZHVI. While the ZHVI estimates the typical household is valued over $800,000, the ACS indicates that the majority of units (about 56.5 percent) are actually valued below $750,000. There is a similar distribution of home values in the county, while the Bay Area has more even distributions by unit value. Alameda County does skew towards lower unit values while the Bay Area tends to skew towards higher unit values. The ZHVI is better aligned with these regional estimates. Given that housing costs have only risen since the 2019 ACS, the 2020 ZHVI is used to estimate housing value in Oakland, although it should be noted that this may slightly overestimate housing cost.

Chart B-13: Owner-Occupied Unit Values by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25075)

The ZHVI tracks a variety of types of owner-occupied housing units, including both single-family homes and condominiums. Table B-~~36~~38 provides a breakdown of the ZHVI by housing type and size between 2010 and 2020. In total, housing value has increased by about 127.20 percent between 2010 and 2020. Two-bedroom units in particular have seen a relatively high increase in value by about 146.30 percent during the period. As of 2020, the highest value housing type in Oakland is a five-plus bedroom housing unit at $1,563,444.

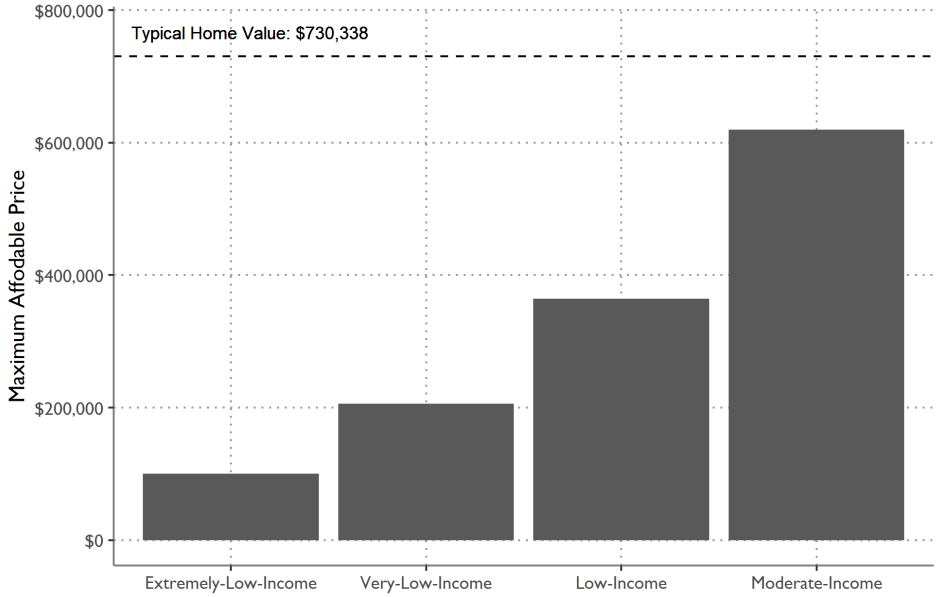

Table B-~~36~~38: Oakland Zillow Home Value Index (ZHVI), 2010 - 2020

Housing Type	*December 2010 ZHVI*	*December 2020 ZHVI*	*Percent Change (2010 – 2020)*
Single-Family	393,624	903,784	**129.60%**
Condo	303,492	663,528	**118.60%**
1 Bedroom	238,093	573,501	**140.90%**
2 Bedroom	296,481	730,338	**146.30%**
3 Bedroom	436,005	966,329	**121.60%**
4 Bedroom	619,683	1,325,654	**113.90%**
5+ Bedrooms	638,487	1,563,444	**144.90%**
Total	**373,381**	**848,356**	**127.20%**

Source: Zillow Home Value Index, December 31, 2010 and December 31, 2020

Given the ZHVI estimates provided in Table B-36 and housing affordability levels from Table B-35 it is apparent that no lower-income household can afford a home at an appropriate size. Some larger households may be able to afford units that have fewer bedrooms, which would lead to overcrowding. For instance, a three-person moderate-income household would be able to afford a $620,105 unit, which would be sufficient to purchase only a one-bedroom unit per the ZHVI. This demonstrates an affordability gap for lower-income households in the city, as such households generally would not be able to afford to buy a home without significant subsidy. Increased housing production for a range of housing types would also help to increase affordability, but this analysis shows that housing in a market like that of the Bay Area is only generally affordable to moderate- or higher-income households. Chart B-14 visualizes the affordability gap for the typical household, which is defined as a three-person household living in a two-bedroom housing unit.

Chart B-14: Ownership Affordability Gap for the Typical Household, 2021

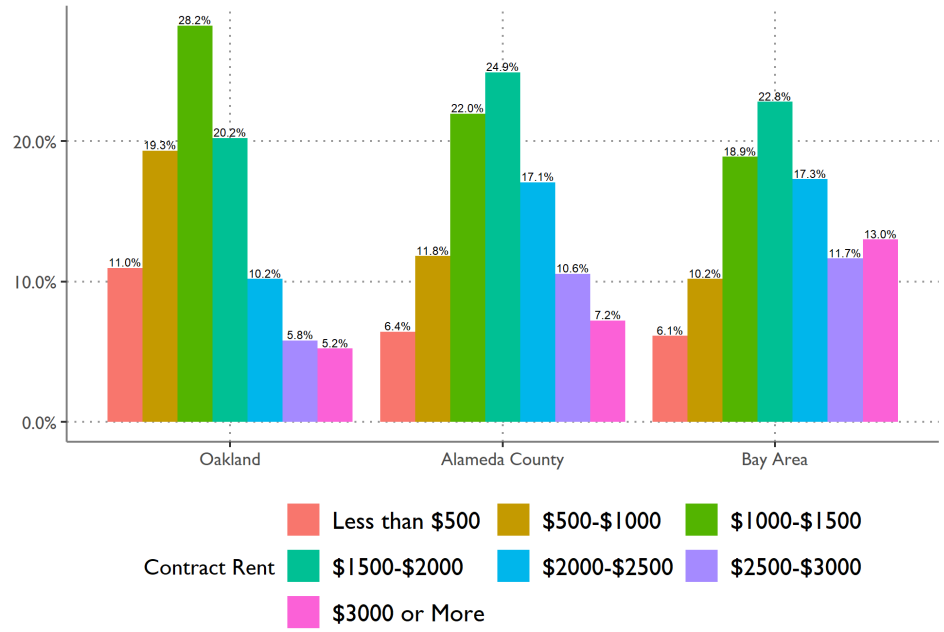
Source: Zillow Home Value Index, December 31, 2020; Dyett & Bhatia, 2021

RENTER COSTS

In 2019, according to ACS estimates provided by ABAG-MTC, the median contract rent in Oakland was $1,345. According to the Census, contract rent is the monthly rent agreed upon regardless of any furnishings, utilities or services that may be included. Data regarding contract rent excludes units for which no cash rent is paid. Table B-~~37~~39 illustrates that rent in Oakland is significantly lower than in the county and in the Bay Area during the same year. Rents in Oakland experiences increases between the 2009 and 2015 period, increasing by about 16.5 percent. This is lower from the county and Bay Area, which saw median contract rent increases by 19.4 percent and 20.4 percent, respectively. However, between 2015 and 2019 rent costs spiked in Oakland—increasing by about

26.4 percent—while the county and Bay Area saw even more dramatic increases, 30.9 percent, and 28.4 percent respectively.

Table B-~~37~~39: Median Contract Rent[1] by Region, 2009 – 2019



Jurisdiction	*2009 Median Contract Rent*	*2015 Median Contract Rent*	*2019 Median Contract Rent*
Oakland	$913	$1,064	$1,345
Alameda County	$1,083	$1,293	$1,692
Bay Area	$1,196	$1,440	$1,849

1. County and regional counts are weighted averages of jurisdiction median using rental unit counts from the relevant year.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data releases, starting with 2005-2009 through 2015-2019, B25058, B25056 (for unincorporated areas))

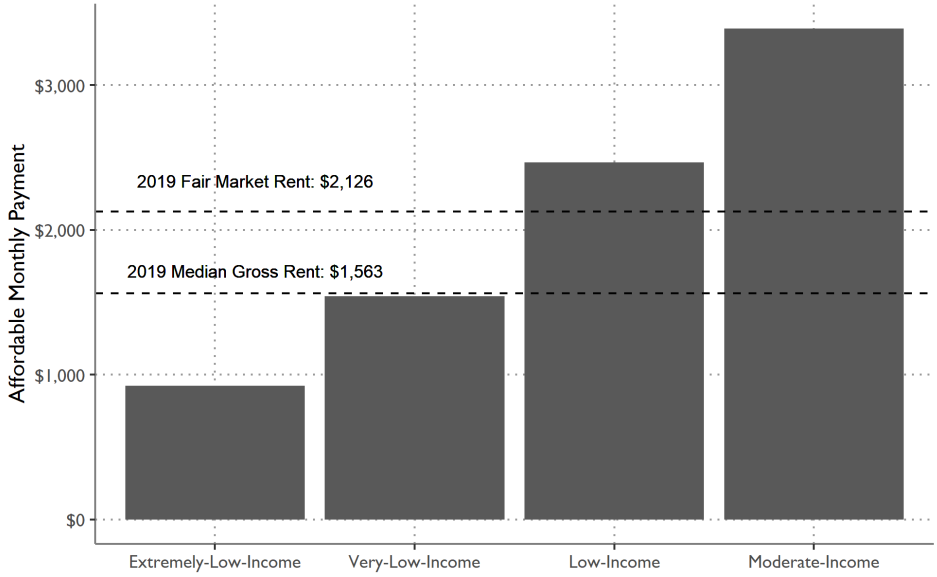
The distribution of contract rent by region is also provided in the ABAG-MTC data workbook. As demonstrated in Chart B-15, most (58.5 percent) renter-occupied units in Oakland have contract rents below $1,500. This differs from the county, where 40.2 percent of units have contract rents below $1,500, and the Bay Area, where 35.2 percent of units are below that threshold. Further, 17.8 percent of the county rental stock and 24.7 percent of the Bay Area rental stock have contract rents above $2,500 while only 11 percent of Oakland's rental stock exceeds that amount. Thus, rents have risen at slower pace in the city than in the surrounding region, and Oakland remains a relatively affordable option for renters when compared to the county or Bay Area.

Chart B-15: Contract Rents for Renter-Occupied Units by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25056)

As rents have risen in the city, it has become increasingly more difficult for lower-income households to afford units in a suitably sized housing unit. Table B-~~38~~40 provides estimated median monthly gross rents in Oakland by number of bedrooms. Unlike contract rent which is the monthly rent agreed upon regardless of any furnishings, utilities, or services that may be included; gross rent includes additional costs for utilities and fuels.

Table B-~~38~~40: Oakland Monthly Gross Rental Rates, 2019



Number of Bedrooms	*2019 Median Monthly Gross Rent*
0	$979
1	$1,328
2	$1,563
3	$1,796
4	$2,095
5 or more	$2,270

Source: American Community Survey 5-Year Data (2015-2019)

According to ACS gross rental estimates (i.e., including utilities and other costs) from Table B-38 above and monthly affordable payments presented in Table B-35, extremely-low-income and very-low-income households in Oakland would not be able to afford to rent an appropriately sized unit.

However, larger extremely-low-income households could afford to a rent a unit with fewer bedrooms – for instance, a four-person household could afford to rent a studio. A very-low-income three-person household could afford to rent a one-bedroom unit. This mismatch may be one of the causes behind the city's relatively high rate of overcrowding. All other income levels, including low-income households, would be able to afford to rent an appropriately sized unit. Chart B-16 demonstrates this affordability gap for the typical extremely-low-income and very-low-income household, which may require subsidies to ensure housing affordability.

Chart B-16: Rental Affordability Gap for the Typical Household, 2019

Note: The typical household is a three-person, two-bedroom housing unit.
Median gross rent includes all monthly housing costs for renters, per the ACS.
Fair market rents are determined by HUD based on a local rent survey in the Oakland-Fremont Metro area.

Source: American Community Survey 5-Year Data (2015-2019); HUD, Fair Market Rent, 2019

B.8 Assisted Housing at Risk of Conversion

State Housing Element law requires that communities identify the status of assisted low-income rental units that are "at risk" of conversion to market rent status within ten years of the statutory mandated update of the Housing Element (from January 2023 to January 2031 for this Housing Element). The California Housing Partnership (CHP) estimates that there are 12,979 assisted low-income units in Oakland. Table B-~~39~~41 shows that while most units in Oakland are at low risk of conversion, there are 216 units at moderate risk and 42 units at high risk. The proportion of assisted units facing some level of risk is lower in the city (2.0 percent) than in the county (4.3 percent) the Bay Area region as a whole (5.1 percent). While California Housing Partnership's Preservation Database is the State's most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing, this database does not

include all deed-restricted affordable units in the state. Consequently, there may be at-risk assisted units in a jurisdiction that are not captured in this data table.

Table B-~~39~~41: Summary of Assisted Units at Risk of Conversion, 2022

	Oakland[2]		*Alameda County*			*Bay Area*
Risk Level[1]	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Low	12,721	98.0%	26,150	95.7%	127,484	94.9%
Moderate	216	1.7%	757	2.8%	3,175	2.4%
High	42	0.3%	334	1.2%	2,720	2.0%
Very High	0	0.0%	91	0.3%	919	0.7%

1. California Housing Partnership uses the following categories for assisted housing developments in its database:
   - Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.
   - Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
   - High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
   - Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
2. Risk levels in Oakland have been modified from CHP's findings to reflect local knowledge – including that the Hotel Oakland is not at risk of conversion to market rate.

Source: City of Oakland, 2022; California Housing Partnership Preservation Database, February 2022

Per HCD guidance, local jurisdictions must also list the specific affordable housing developments at risk of converting to market rate uses to supplement the aggregate numbers provided in Table B-39. The assisted housing inventory is available in Table B-~~40~~42 below.

1. According to the Oakland Housing Authority, this property is not at risk of conversion to market rate housing.

Source: City of Oakland, 2022; California Housing Partnership Preservation Database, February 2022

COST ANALYSIS

State law requires the analysis of at-risk housing to identify "the total cost of producing new rental housing that is comparable in size and rent levels, to replace the units that could change from low-income use, and an estimated cost of preserving the assisted housing developments."[6] The typical development cost of affordable housing projects in Oakland is about $553,121 per unit, based on average projected development costs per unit provided in recent California Tax Credit Allocation Committee (TCAC) project tax credit applications; see Table B-~~41.~~43. Please note that the table below features a mix of rehabilitation and new construction projects, with new construction projects representing higher costs per unit. The most recent project costs are more indicative of the escalated construction costs that projects are experiencing, with each year adding approximately 5% to construction costs. If the 258 units identified as facing some level of risk converted to market rate housing during the 10-year period were to be replaced, the total replacement cost would be ~~about~~at least $142,705,218, but likely must more with escalation.

Table B-~~41~~43: Affordable Housing Development Costs in Oakland, 2017-2020

Project Name	*TCAC Application Year*	*Per Unit Cost*[1]
Posada de Colores Apartments	2017	$298,295
E.E. Cleveland Manor	2017	$276,427
Fruitvale Transit Village II-A	2017	$566,418
Lake Merritt Apartments	2017	$483,393
Camino 23	2017	$649,002
Embark Apartments	2017	$514,918
San Pablo Hotel	2018	$305,768
Westlake Christian Terrace West	2018	$336,289
Brooklyn Basin Family Housing Project 1_4%	2018	$673,804
Brooklyn Basin Family Housing Project 1_9%	2018	$679,952
Empyrean Harrison Renovation	2018	$437,971
Madison Park Apartments	2018	$407,128
Oakland International	2018	$340,026

The cost of ~~preservation for the typical~~conversion from market rate to affordable housing ~~project~~ can be estimated by finding the difference between fair market rent and affordable rent, but typically requires additional resources to support acquisition, deferred maintenance, and rehabilitation, as well as service connection and other important operational costs. As shown in Table B-35, the affordable monthly rental payment for an extremely-low-income, four-person household and a very-low-income, four-person household in Oakland is $1,028 and $1,713 respectively. In fiscal year 2021, the HUD Fair Market Rent (FMR), or gross rent estimate, in the Oakland-Fremont, CA HUD Metro FMR area for a three-bedroom unit was $3,196. The difference between these two prices is the "affordability gap," which is about $2,168 and $1,483 for the two income levels in Oakland. Given the affordability gap for extremely-low-income households, the total cost of preserving all 258 at-risk units (assuming they are all extremely-low-income units) would be approximately $559,344 per month or $6,712,128 per year. This translates to a cost of $67,121,280 over the 10-year period, or $260,160 per unit. Thus, preservation costs in Oakland are significantly lower than replacement costs but opportunities for such projects are restricted by what the market offers, and does not produce new residential units.

RESOURCES FOR PRESERVATION

~~There are two~~The primary resources available for preserving at-risk units ~~– public agencies, nonprofit housing corporations, and tenant groups; and~~come from public financing ~~or subsidy programs~~agencies. Preservation is implemented by mission-driven entities that committed to affordabilit restrictions. California HCD maintains a current list of all "qualified entities" across the state, which are nonprofit or for-profit organizations or individuals that agree to maintain the long-term affordability of affordable housing developments. Table B-4244 provides the list of all qualified entities for Alameda County. The City would work with a subset of these organizations that are active in Oakland to preserve the housing units in danger of conversion, with focus on preserving the City's existing portfolio, as well as and expanding preservation opportunities by acquiring and converting market rate properties to affordable housing. Additional housing resources, including funding sources, that the City utilizes are discussed further in Appendix E.

Table B-~~42~~44: Qualified Entities in Alameda County

Qualified Entity	*City*	*Contact*
Housing Authority of City of Alameda	Alameda	(510) 747-4300
Housing Authority of the City of Livermore	Livermore	(925) 447-3600
Housing Authority of County of Alameda	Hayward	(510) 538-8876

Appendix B: Housing Needs Assessment

This chapter contains a comprehensive assessment of the various factors that influence and affect the City's housing needs, an essential part of developing appropriate and responsive housing policies and programs. The needs assessment addresses the following topic areas:

- Population Characteristics (age, race, ethnicity)
- Household Characteristics (household size and composition, and income)
- Special Needs Groups (including extremely low-income residents; older adults; people with disabilities; large families; female-headed households; people experiencing homelessness; undocumented immigrants; and farmworkers)
- Housing Costs and Overcrowding and Tenure (cost burden, overcrowding rates)
- Housing Stock Characteristics (including tenure and ownership, overcrowding and housing stock conditions, cost burden, vacancy, permits by income)
- Housing Costs and Affordability (including housing affordability by household income, and owner/renter costs)
- Assisted Housing at Risk of Conversion (the status of assisted low-income rental units that are "at risk" of conversion to market rent status)

Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland—Oakland's Black population has decreased from 36 percent in 2000 to 23 percent in 2020. Oakland's rates of homelessness have also significantly increased from 2017-2022 (83 percent), though the rate of increase has decreased from the period of 2019-2022 (23 percent, compared to 47 percent from 2017-2019). Oaklanders of color also disproportionately face lower rates of homeownership, higher housing cost burden, overcrowded conditions, and homelessness. These trends are being compounded by demographic factors such as rapid aging of the population, and continued prevalence of poverty.

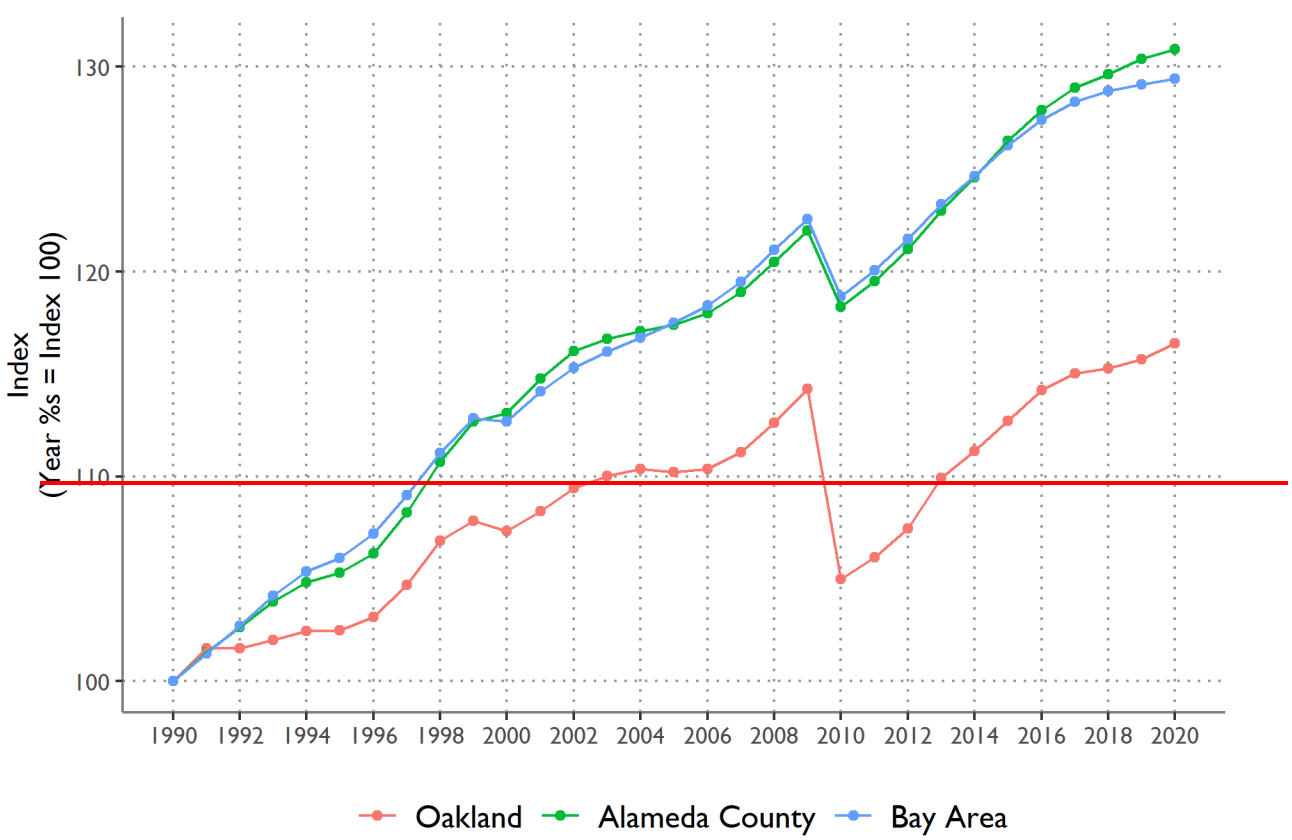
~~This appendix~~Appendix B outlines Oakland's existing housing needs and identifies those characteristics that may have significant impacts on housing needs in the community, including anticipated population and household growth. The appendix analyzes population and housing characteristics, identifies special housing needs among certain population groups, evaluates housing conditions, and provides other important information to support the goals, policies, and programs to meet the needs of current and future Oakland residents. This assessment is essential for developing a successful strategy to meet a variety of housing needs in the city. Both local and regional changes since the previous Housing Element are assessed to provide the full scope of housing needs. Analysis in each of the sections below informs the housing programs and policies provided in the element. A more thorough analysis of socioeconomic and housing trends as they relate to affirmatively furthering fair housing—including patterns of segregation and racial discrimination—are provided in Appendix D.

The Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) has produced Local Housing Needs Data packets for jurisdictions in the ABAG-MTC region that have been pre-approved by the State Department of Housing and Community Development (HCD). These data packets largely rely on 2015-2019 five-year American Community Survey (ACS) and 2013-2017 Department of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS) estimates, among other sources. Where the ABAG-MTC data packet does not provide sufficient information, alternate data sources are used.

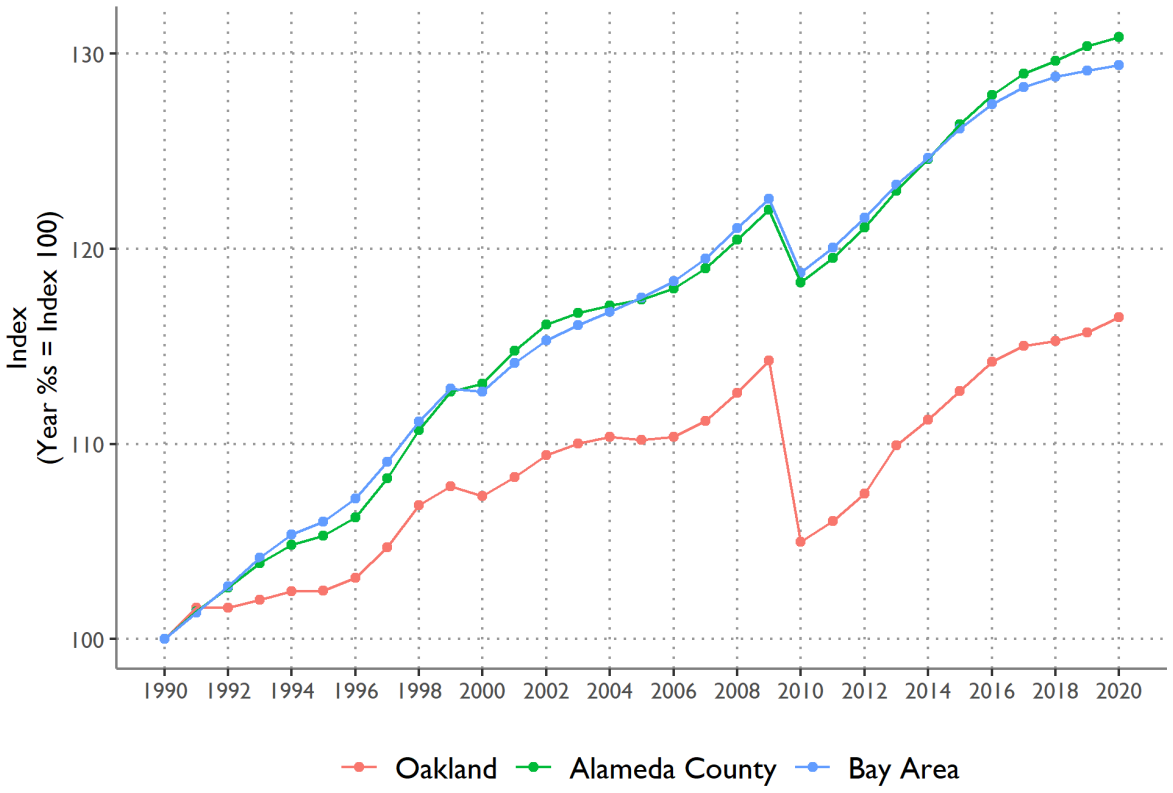
B.1 Population Characteristics

According to the U.S. Census, Oakland had a population of 440,646 as of 2020 and was the eighth largest city in California. The population of Oakland makes up 26.0% of the population of Alameda County and has continued to grow in recent years. However, Oakland's overall population growth has been inconsistent. Prior to 1980, Oakland experienced three decades of population decline. Beginning around 1990, the Bay Area as a whole became a focal point of significant economic development and investment in the technology sector. By the late 1990s, Oakland became an attractive target for investment and, in part, a respite from higher rents and home prices present throughout the region. By the early 2000s, significant growth without significant regional housing production resulted in severe constraints on housing throughout the region. The 2008-2009 Great Recession and foreclosure crisis saw a brief decline in housing demand, with catastrophic impacts for affected residents, but population growth picked up throughout the economic recovery and has continued to date. Oakland's 2020 population represents an increase by nearly 50,000 from 390,724 in 2010, making Oakland one of the top 10 cities in terms of overall population growth between 2010 and 2020. But over a longer time span, since 2000, Oakland's population has increased by 8.5 percent, below that of the regional growth rate of 14.8 percent. Table B-1 shows Oakland's population estimate data from the California Department of Finance (DOF), compiled by ABAG-MTC. Appendix D, Figure D-19, Gentrification and Displacement Census Tract Typologies, provides important additional context to Oakland's population characteristics.

Table B-1: Oakland Population, 2010-2020



2000	*2005*	*2010*	*2015*	*2020*
399,566	410,189	390,724	419,571	433,697

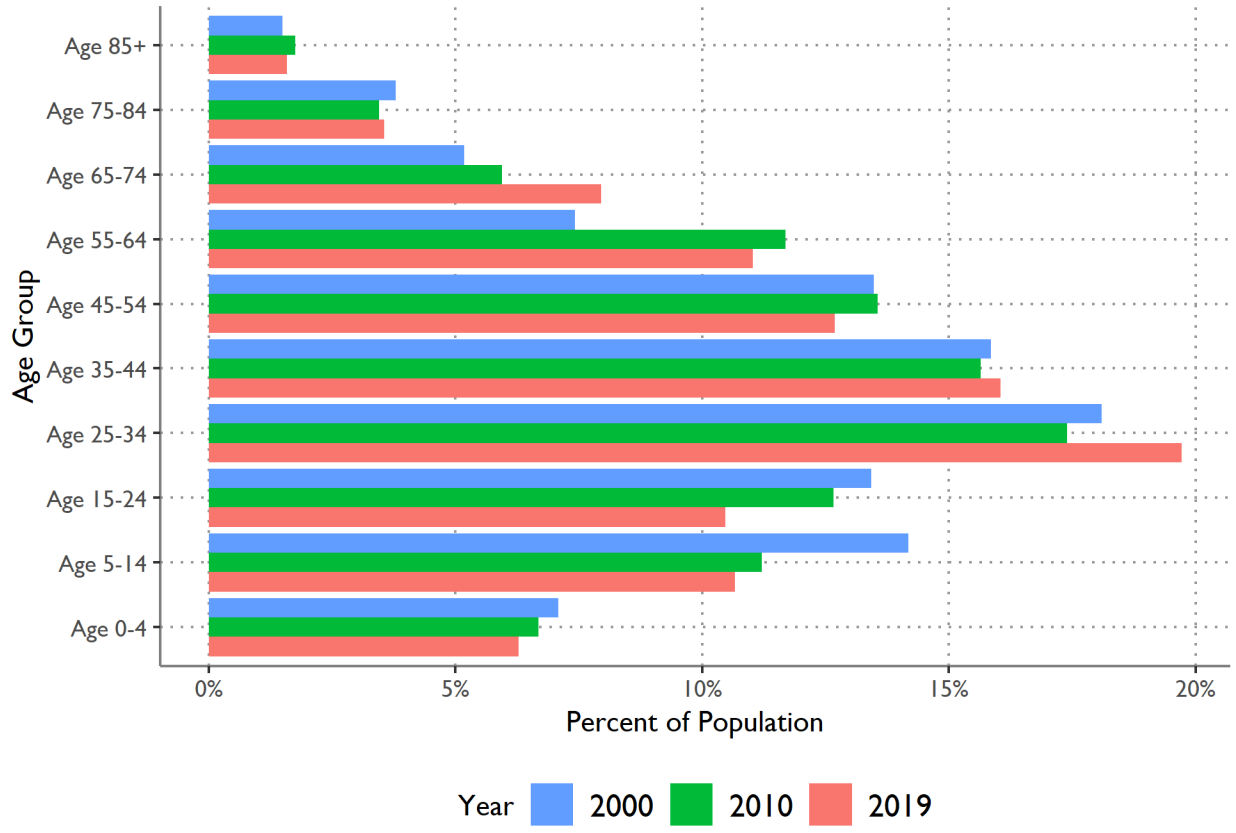


Source: ABAG-MTC Housing Needs Data Workbook, 2021

ABAG-MTC has also provided DOF estimates of population growth indexed to the population in the year 1990 for Oakland and surrounding regions. Shown in Chart B-1, these data points represent the population

growth in each of the geographies relative to their populations in 1990. The break between 2009 and 2010 is due to the differences between population estimates in 2009 and census counts in 2010. DOF uses the decennial census to benchmark subsequent population estimates. As evidenced in the plot, Oakland has seen a lower relative growth rate than both Alameda County and the Bay Area during the 1990 to 2020 period.

Chart B-1: Population Growth by Region, 1990-2020



Source: ABAG-MTC Housing Needs Data Workbook, 2021

POPULATION BY AGE

Current and future housing needs are usually determined in part by the age characteristics of a community's residents. Each age group has distinct lifestyles, family type and size, incomes, and housing preferences. Consequently, evaluating the age characteristics of a community is important in determining its housing needs.

According to the 2019 ACS five-year estimates, the city's median age is 36.5 years, which is slightly—1.1 years—younger than Alameda County's median age of 37.6 years. In recent years, Oakland's median age has increased slightly but largely plateaued, from 33.3 years in 2000 to 36.2 years in 2010. Oakland's 2019 median age is below that of San Francisco (38.2 years) but about the same as San Jose (36.7 years). Like other Bay Area cities, Oakland's median age is below that of the national median – 38.1 years. Census tracts in the Oakland Hills tend to have older populations, while areas in North Oakland, West Oakland, Fruitvale, and East Oakland tend to have younger populations. Despite Oakland's relatively young population, Chart B-2 confirms that groups ages 65 and over in Oakland are nonetheless growing to hold a larger share of the overall population; 10.46 percent of the population was age 65 and over in 2000 compared to 13.11 percent in 2019.

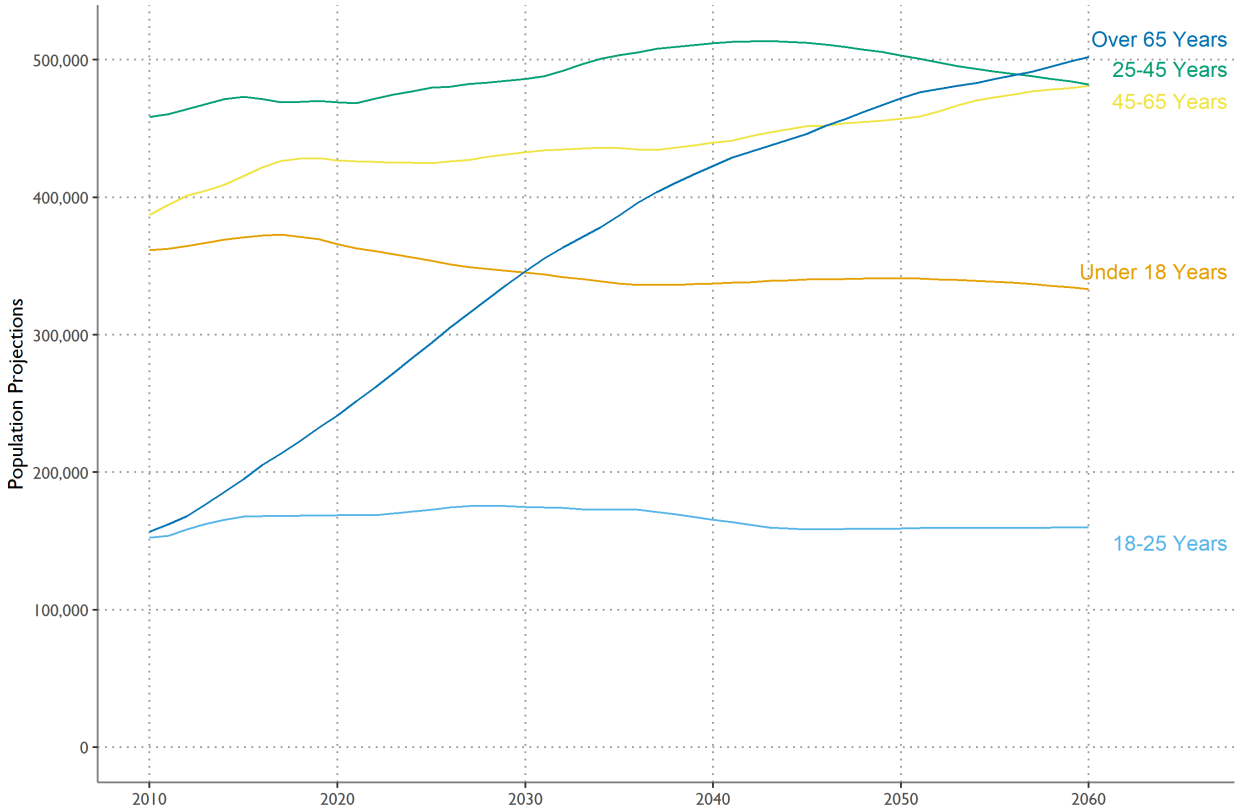


Chart B-2: Oakland Population by Age, 2000-2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001)

The increase in Oakland's senior population reflects national and State trends towards longer lifespans and dramatically reduced birth rates, compared to previous decades. This trend is likely to continue, and will increase the need for housing specifically designed for seniors. Chart B-3 below presents the projected growth of the population by age in Alameda County – it is clear that the need for senior housing will only continue to grow in the upcoming decades.

Chart B-3: Alameda County Age Projections, 2010-2060

Source: California Department of Finance, P-2B County Population Projections, 2019 Baseline

RACE AND ETHNICITY

Oakland has experienced significant racial demographic changes in recent years that City leaders and members of the public alike, particularly Black residents, have described as alarming. Since at least the 1940s, Oakland has had a significantly higher percentage of Black, Indigenous, and People of Color (BIPOC) residents than other cities of a similar size in California. BIPOC communities in Oakland have historically faced patterns of discrimination and segregation, as well as neighborhood disinvestment, throughout the 20th century continuing into the 21st century. In recent years, many of these same communities now bear a disproportionate impact of the State's housing crisis and are increasingly at risk of displacement from Oakland. A full assessment of patterns of segregation and other geographic racial disparities in Oakland is provided in Appendix D.

Since 2000, Oakland's non-Hispanic Black or African American population has decreased by 41,390, resulting in its share of population decreasing from 36.26 percent to 23.23 percent. This decrease makes the non-Hispanic Black or African American population no longer the largest single racial group in the city; it is now third behind non-Hispanic white (28.28 percent) and Hispanic or Latinx (27.04 percent) populations. Both the non-Hispanic white and Hispanic or Latinx populations have continued to grow in their total numbers and in their share of the city's overall population since 2000. Table B-2 presents the racial and ethnic composition of the City of Oakland's population in 2000, 2010, and 2019, as reported in the ABAG-MTC data sets, which are based on the U.S. Census (for 2000 and 2010) and on American Community Survey five-year data (for 2019).

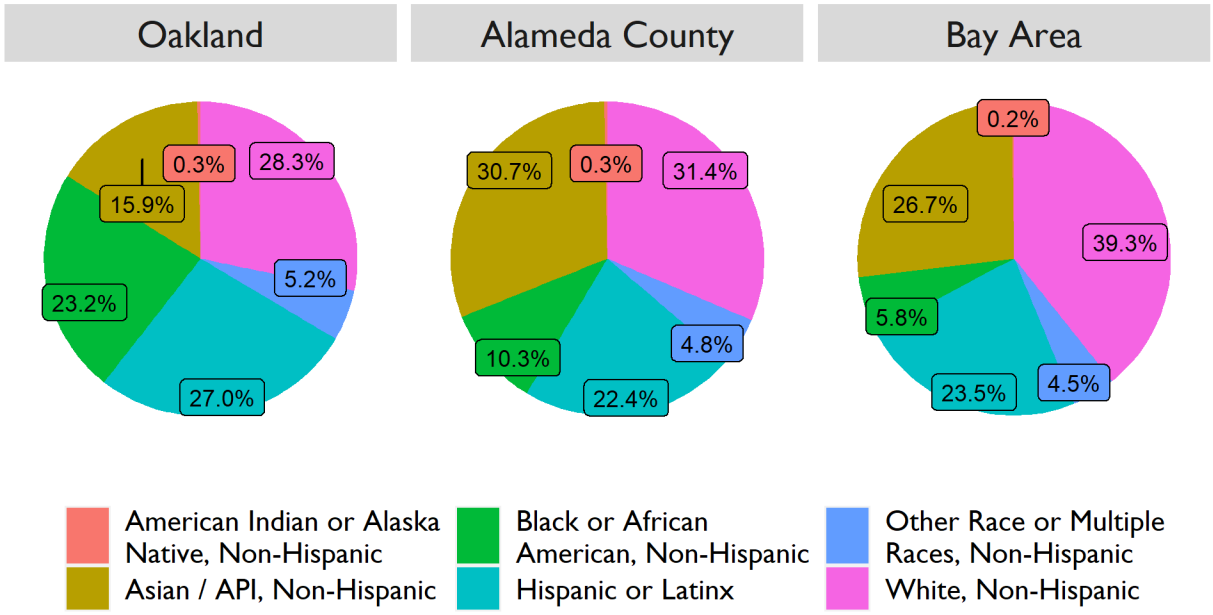

Table B-2: Oakland Population by Race/Ethnicity, 2000-2019

Racial/Ethnic Group	*2000*		*2010*		*2019*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
American Indian or Alaska Native, Non-Hispanic	1,471	0.38%	1,214	0.31%	1,455	0.34%
Asian / API, Non-Hispanic	62,259	16.11%	67,208	17.20%	67,432	15.86%
Black or African American, Non-Hispanic	140,139	36.26%	106,637	27.29%	98,749	23.23%
White, Non-Hispanic	93,953	24.31%	101,308	25.93%	120,225	28.28%
Other Race or Multiple Races, Non-Hispanic	1,229	0.32%	15,289	3.91%	22,294	5.24%
Hispanic or Latinx	87,467	22.63%	99,068	25.35%	114,942	27.04%
Total	**386,518**	**100%**	**390,724**	**100%**	**425,097**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Chart B-4 compares race/ethnicity of Oakland's population to the county and the broader Bay Area. Generally, Oakland has a larger share of Hispanic or Latinx and non-Hispanic Black or African American residents than does the county or Bay Area generally; however, it should be noted that Oakland's Black or African American population has significantly declined over the past two decades. As Oakland's Black or African population has declined, the city's Hispanic or Latinx, non-Hispanic white, and non-Hispanic other/multiple race populations have grown significantly during the period. This is a trend that has continued since at least 1990 with several potential causes. Some Black or African American families may have moved to suburban locations to purchase less costly homes, while others may have been displaced due to rapidly increasing housing costs and residential instability. Further, the significant decrease after 2010 may have been exacerbated by the foreclosure crisis following the Great Recession – which had its epicenter in Oakland's historically Black or African American neighborhoods, including areas of West and East Oakland. In general, California's housing crisis continues to disproportionately impact cities like Oakland, and these impacts are unevenly distributed by race – particularly for the city's Black or African American population. Further discussion of the racial/ethnic dimensions of displacement in Oakland is provided in Appendix D.

Chart B-4: Race/Ethnicity by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B03002)

B.3 Household Characteristics

HOUSEHOLD SIZE

Compared to Alameda County and the Bay Area as a whole, Oakland has a significantly higher percentage of single adult households and a smaller portion of three to four-person households. This trend was noted in Oakland's 2015-2023 Housing Element and was speculated to be due, in part, to a relatively low proportion of housing units with more than two bedrooms compared to surrounding jurisdictions. According to ACS five-year estimates data, the average household size in Oakland in 2019 was 2.58, a slight increase from 2.47 in 2010. Oakland's average is lower than the average for Alameda County as a whole (2.82). As seen in Table B-3, the share of Oakland's population in 2019 living in a one-person household (33.28 percent) was greater than that of Alameda County (24.44 percent) and the Bay Area as a whole (24.7 percent). However, two-person households account for approximately the same percentage of households in Oakland at 30.89 percent compared to Alameda County (30.46 percent) and the Bay Area overall (31.89 percent). Instead, Oakland has a smaller share of households of three to four persons (26.44 percent) than either the county (34.26 percent) or the Bay Area (32.64 percent).

Table B-3: Households by Household Size by Region, 2019

Household Size	Oakland		Alameda County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
1-Person Household	54,048	33.28%	141,077	24.44%	674,587	24.70%
2-Person Household	50,169	30.89%	175,799	30.46%	871,002	31.89%
3-4-Person Household	42,938	26.44%	197,714	34.26%	891,588	32.64%

HOUSEHOLD TYPES

A summary of household types in the City of Oakland, Alameda County, and the Bay Area is provided in Table B-4. A family household is a household consisting of two or more people residing together and related by birth, marriage, or adoption. A non-family household consists of a householder living alone (a one-person household) or where the householder shares the home exclusively with people to whom they are not related. According to the ACS data (2015-2019) as analyzed by ABAG-MTC, the greatest share (35.52 percent) of households in Oakland are married-couple family households followed closely behind by single-person households (33.28 percent). Overall, family households account for 54.52 percent of households in Oakland, which is much less than Alameda County (66.65 percent) as well as the Bay Area (66.43 percent). However, Oakland has a greater share of single-parent households (19.0 percent) than either Alameda County (16.05 percent) or the Bay Area (15.19 percent).

Table B-4: Household Types by Region, 2019

Household Types	Oakland		Alameda County		Bay Area	
	Number	Percent	Number	Percent	Number	Percent
Female-Headed Family Households	21,717	13.37%	64,165	11.12%	283,770	10.39%
Male-headed Family Households	9,149	5.63%	28,432	4.93%	131,105	4.80%
Married-couple Family Households	57,696	35.52%	292,079	50.60%	1,399,714	51.24%
Other Non-Family Households	19,809	12.20%	51,424	8.91%	242,258	8.87%
Single-person Households	54,048	33.28%	141,077	24.44%	674,587	24.70%

HOUSEHOLD INCOME

Household income is one of the most significant factors affecting housing choice and opportunity. Income largely determines a household's ability to purchase or rent housing. While higher-income households have more discretionary income to spend on housing, lower- and moderate-income households are limited in the range of housing they can afford. Typically, as household income decreases, cost burdens and overcrowding increase.

For the purpose of evaluating housing affordability, housing need, and eligibility for housing assistance, income levels are defined by guidelines adopted each year by the California Department of Housing and Community Development (State HCD). For Alameda County, the applicable annual Area Median Income (AMI) for a family of four in 2021 is $125,600. This is an increase of 34.3 percent from the 2014 median

income of $93,500. The United States Department of Housing and Urban Development (HUD) has defined the following income categories for Alameda County, based on the median income for a household of four persons for 2021:

- Extremely-low income: 30 percent of AMI and below ($0 to $41,100)
- Very-low income: 31 to 50 percent of AMI ($41,101 to $68,500)
- Low-income: 51 to 80 percent of AMI ($68,501 to $109,600)
- Moderate-income: 81 to 120 percent of AMI ($109,601 to $150,700)
- Above-moderate income: 120 percent or more of AMI ($150,701 or more)

Table B-5 shows the HUD definitions for Alameda County's maximum annual income level for each income group, adjusted by household size. For the purposes of defining income limits, HUD combines Alameda County with Contra Costa County in the "Oakland-Fremont, CA HUD Metro Fair Market Rent (FMR) Area." This data is used when determining a household's eligibility for federal, state, or local housing assistance and used when calculating the maximum affordable housing payment for renters and buyers.

Table B-5: HCD Income Levels by Household Size in Alameda County, 2021

	Maximum Income Level				
Household Size	*Extremely Low*	*Very Low*	*Low*	***Median***	*Moderate*
1 Person	$28,800	$47,950	$76,750	**$87,900**	$105,500
2 Persons	$32,900	$54,800	$87,700	**$100,500**	$120,550
3 Persons	$37,000	$61,650	$98,650	**$113,050**	$135,650
4 Persons	$41,100	$68,500	$109,600	**$125,600**	$150,700
5 Persons	$44,400	$74,000	$118,400	**$135,650**	$162,750
6 Persons	$47,700	$79,500	$127,150	**$145,700**	$174,800
7 Persons	$51,000	$84,950	$135,950	**$155,750**	$186,850
8 Persons	$54,300	$90,450	$144,700	**$165,800**	$198,900

Source: HUD Income Limits 2021

The ABAG-MTC Housing Needs Data Workbook for 2021 divides Oakland's population by HUD income levels. The Data Workbook relies on data from the HUD Comprehensive Housing Affordability Strategy 2013-2017 release. This income data is based on the ACS 2013-2017 estimates, and thus does not align exactly with categories assigned to the 2021 HUD established income levels. Table B-6 provides this data. While Alameda County and the Bay Area overall have relatively similar distributions of households at each income level, Oakland has a greater share of households that made less than 100 percent of AMI (58.56 percent) than either the county (47.33 percent) or the Bay Area (47.7 percent). In fact, nearly a quarter of households in Oakland (23.42 percent) made between zero and 30 percent of AMI.

Table B-6: Households by Household Income Level by Region, 2021

	Oakland		*Alameda County*		*Bay Area*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	37,345	23.42%	88,383	15.53%	396,952	14.70%
31%-50% of AMI	22,159	13.90%	63,850	11.22%	294,189	10.89%
51-80% of AMI	20,120	12.62%	66,130	11.62%	350,599	12.98%
81%-100% of AMI	13,750	8.62%	51,000	8.96%	245,810	9.10%
>100% of AMI	66,075	41.44%	299,735	52.67%	1,413,483	52.33%
Total	**159,449**	**100%**	**569,098**	**100%**	**2,701,033**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.4 Employment Characteristics

According to data from the ABAG-MTC Housing Needs Data Workbook (2021), which relies on the ACS 2019 five-year estimates, there are 225,010 persons among the civilian population in the labor force in the City of Oakland. As seen in Table B-7, the largest industry represented among Oakland workers is Health and Educational Services (33.55 percent). Oakland, Alameda County, and the Bay Area overall have relatively similar distributions of the share of workers in each industry.

Table B-7: Employment by Industry by Region, 2019

	Oakland		*Alameda County*		*Bay Area*	
	Number	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Agriculture & Natural Resources	1,089	0.48%	3,129	0.36%	30,159	0.75%
Construction	13,630	6.06%	45,984	5.33%	226,029	5.62%
Financial & Professional Services	55,210	24.54%	223,957	25.97%	1,039,526	25.83%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

B.5 Special Needs Groups

Certain groups have greater difficulty in finding suitable affordable housing due to their special needs and circumstances. This may be a result of employment and income, family characteristics, disability, or household characteristics. Consequently, certain residents in the City of Oakland may experience more instances of housing cost burdens, overcrowding, or other housing problems. The categories of special needs addressed in this Element include:

- Extremely-low-income households
- Elderly households
- Persons with disabilities, including developmental disabilities
- Large households
- Female-headed households
- Persons experiencing homelessness
- Undocumented immigrants
- Farmworkers

EXTREMELY-LOW-INCOME RESIDENTS

California State housing laws ~~requires~~require local governments to address the needs of "Extremely-Low-Income" populations, which refers to households with incomes below 30 percent of the Area Median Income (AMI) for the community. In addition to those families making less than 30 percent of AMI, the Federal Poverty Level (FPL) is a threshold established by the federal government that remains constant throughout the country (and thus does not correspond to AMI). Federal statistics can also help the City quantify the extent of the extremely-low income population. The federal government defines poverty as a minimum level of income (adjusted for household size and composition) necessary to meet basic food, shelter, and clothing needs. For 2021, the FPL for a family of four is $26,500, which is less than the $41,100 threshold for 30 percent of AMI. This means that some households that qualify as extremely low-income in Oakland are not considered as living below the FPL. This is indicative of the higher cost of living in Oakland and the Bay Area overall as compared to other areas of the country.

As seen in Table B-8, 23.42 percent of Oakland residents fall below 30 percent of AMI. This data, from the ABAG-MTC Housing Needs Data Workbook (2021), is based on the HUD CHAS ACS tabulation 2013-2017 release. About one-third of both non-Hispanic Black or African American (35.11 percent) and Asian/Pacific Islander (API) (33.63 percent) households in Oakland fall below 30 percent of AMI. While the data is aggregated in the ABAG-MTC data workbook, when disaggregated the proportion of extremely-low-income non-Hispanic Pacific Islanders is lower (22.9 percent) while the proportion of extremely-low-income non-Hispanic Asians is slightly higher (33.9 percent). Households that identify as Hispanic or Latinx, American Indian or Alaska Native (non-Hispanic), some other race or multiple races (non-Hispanic), and White (non-Hispanic) have a prevalence of 24.54 percent, 24.36 percent, and 9.59 percent, respectively, of those who are below 30 percent of AMI. White (non-Hispanic) and some other race or multiple races have the lowest prevalence of extremely-low-income households.

Table B-8: Oakland Household Income Distribution by Race/Ethnicity, 2013-2017

Racial/Ethnic Group	*0%-30% of AMI*	*31%-50% of AMI*	*51%-80% of AMI*	*81%-100% of AMI*	*>100% of AMI*	*Total*
American Indian or Alaska Native, Non-Hispanic	24.36%	18.81%	11.50%	18.94%	26.39%	100%
Asian/API, Non-Hispanic	33.63%	13.73%	10.27%	8.14%	34.23%	100%
Black or African American, Non-Hispanic	35.11%	17.66%	13.70%	8.35%	25.19%	100%
White, Non-Hispanic	9.59%	7.47%	9.49%	8.28%	65.17%	100%
Other Race or Multiple Races, Non-Hispanic	20.05%	13.78%	12.69%	7.44%	46.05%	100%

All Households	23.42%	13.90%	12.62%	8.62%	41.44%	**100%**

Source: ABAG-MTC Housing Needs Data Workbook, 2021

According to ACS 2019 five-year estimates, Oakland has a poverty rate of 16.7 percent. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If a family's total income is less than the family's threshold, then that family and every individual in it is considered in poverty. Oakland's poverty rate is much higher than the rate of 9.9 percent in Alameda County overall. Poverty rates have dropped in Oakland and Alameda County overall since 2014, from 21.0 percent and 12.9 percent, respectively. Table B-9 displays the poverty status by race among Oakland residents. Poverty is highest among those who identify as Black or African American (23.77 percent) and lowest among those who identify as non-Hispanic White (7.71 percent).

As further described in Appendix D – Assessment of Fair Housing, racially/ethnically concentrated areas of poverty in Oakland are primarily clustered in/around Downtown and West Oakland, in/around Fruitvale/Jingletown, and further south along International Boulevard near the Coliseum. Further, ACS 2019 five-year estimates also geographically distinguish income in the past 12 months below poverty level by race and ethnicity. The Black or African American alone population that lives below the poverty level is primarily clustered in West Oakland, Downtown, and a few tracts in East Oakland along MacArthur Freeway and adjacent to Lake Merritt. The Asian alone population that is living below poverty level is primarily clustered in Downtown, particularly in Chinatown, in addition to parts of East Oakland in/around Fruitvale/Jingletown and further south along International Boulevard near the Coliseum. The Hispanic or Latinx population that is living below poverty level is primarily clustered in West Oakland and in East Oakland along MacArthur Freeway and in/around the Eastmont and Elmhurst neighborhoods.

As described in Table B-26, extremely low-income residents are significantly less likely than higher-income Oakland households to be homeowners ~~(~~; 15.56 percent are homeowners~~,~~ and 84.44 percent are renters~~.)~~ ~~While~~. In contrast, Table B-24 shows that 40.7 percent of overall Oakland households are homeowners and 59.3 percent are renters. Extremely-Low-Income ~~household are less likely to be cost burdened compared to all income groups (16.5 percent, as compared to 20 percent), they are~~ households are also much more likely to be either cost burdened or severely cost burdened ~~(61.10 percent, as compared to 20.50 percent), as shown in Table B-31a~~. A cost burden and extreme cost burden is defined as paying more than 30 percent and more than 50 percent of one's household income on housing costs, respectively. Table B-31a shows that 61.1 percent of Extremely Low Income households in Oakland are severely cost burdened and an additional 16.5 percent are cost burdened, meaning that 77.6 percent of extremely low income households in Oakland experience some degree of cost burden. In comparison, 20.5 percent of overall Oakland

households are severely cost burdened and 20.1 percent of overall Oakland households are cost burdened, for a total of 40.6 percent of Oakland households experiencing some degree of cost burden, as defined.

As indicated in Appendix A, Evaluation of the 2015-2023 Housing Element, The City of Oakland's NOFA for New Construction of Multifamily Affordable Housing includes a threshold requirement that 20~~%~~ percent of units be affordable to Extremely Low-Income Households. The City coordinates its scoring criteria and funding pipeline with the Oakland Housing Authority, which awards Section 8 rental subsidies, in order to further support the creation of units affordable to extremely-low-income households. The City also continues to participate in the Alameda County-wide efforts under the EveryOne Home Plan, a road map for ending homelessness. Policies and actions in the Housing Action Plan, including ~~(x, y, and z)~~Policy 3.1 (and actions 3.1.1-3.1.2); actions 3.3.4; 3.3.6; and 3.3.18; and Policy 4.3 (and actions 4.3.1-4.3.6), will continue to seek ways to provide permanent housing affordable to extremely low-income households, by supporting funding from the state and federal levels, and take actions to address barriers to the development of such housing.

Table B-9: Oakland Poverty Status by Race, 2015-2019

Racial/Ethnic Group	*Percent Below Federal Poverty Line*
Black or African American (Hispanic and Non-Hispanic)	23.77%
American Indian or Alaska Native (Hispanic and Non-Hispanic)	21.81%
Hispanic or Latinx	20.62%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	19.93%
Asian / API (Hispanic and Non-Hispanic)	17.19%
White (Hispanic and Non-Hispanic)	9.56%
White, Non-Hispanic	7.71%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

ELDERLY RESIDENTS

Elderly residents have many different housing needs, depending on their age, level of income, current tenure status, cultural background, and health status. Elderly households may need assistance with personal and financial affairs, networks of care to provide services and daily assistance, and even possible architectural design features that would accommodate disabilities that would help ensure continued independent living. Table B-10 shows the distribution of Oakland residents aged 65 and over by racial group compared to the population of other age groups. The majority of those aged 65 and over in Oakland identify as some other race or multiple races (36.86 percent), followed by Asian or Asian Pacific Islander (28.91 percent), and Black or African American (25.10 percent). In Oakland, the proportion of those 65 and older who are either Asian or Black or African American is much greater than it is among younger age groups. In contrast, the proportion of younger residents who identify as White is greater among younger age groups.

Table B-10: Oakland Senior and Youth Population by Race, 2021

	Age 0-17		*Age 18-64*		*Age 65+*	
Race	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
American Indian or Alaska Native (Hispanic and Non-Hispanic)	1,118	1.32%	2,283	0.80%	431	0.77%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

One of the potential elderly housing needs that may require a specific governmental response is low incomes among older adults. As seen in Table B-11, according to the ABAG-MTC Housing Data Needs Workbook, 31.95 percent of older adults aged 62 and over in Oakland have an income below 30 percent of AMI~~,~~ (see "Extremely-Low-Income Residents" discussion above), which is higher than the rate of 23.42 percent found among the overall population in Oakland. As they age, older adults may face additional housing costs to ensure their homes remain accessible and to eliminate threats to health and safety. Like all lower income residents, many older adult residents may be facing overpayment problems or are unable to find affordable rental units at all. As seen in Table B-11, senior renters are much more likely to fall into the extremely low-income (zero to 30 percent of AMI) or very low-income (31 to 50 percent of AMI) categories than seniors who own their homes. Strikingly, among renters aged 62 and over, 54.84 percent are considered extremely low-income.

Table B-11: Oakland Senior Households[1] by Income and Tenure, 2021

	Owner Occupied		*Renter Occupied*		*All Senior Households*	
Income Group	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	2,925	14.10%	8,865	54.84%	11,790	31.95%

Notes:

1. For the purposes of this table, ABAG-MTC considers senior households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Table B-12 shows the percentage of those senior households at each income level that spend less than 30 percent of their income on housing costs, between 30 and 50 percent of their income on housing costs, and more than 50 percent of their income on housing costs. Those senior households considered extremely low-income (making less than 30 percent of AMI) are the group most likely to be spending more than 50 percent of their overall household income on housing costs at 51.02 percent.

Table B-12: Oakland Cost-Burdened Senior Households[1] by Income Level, 2021

Percent of Income Used for Housing Costs	*0%-30% of AMI*	*31%-50% of AMI*	*51%-80% of AMI*	*81%-100% of AMI*	*>100% of AMI*
<30% of Income	28.88%	40.44%	51.15%	65.20%	85.75%
30%-50% of Income	20.10%	29.96%	30.11%	18.36%	11.66%
>50% of Income	51.02%	29.60%	18.74%	16.44%	2.59%
Total	**100%**	**100%**	**100%**	**100%**	**100%**

Notes:

1. For the purposes of this table, ABAG-MTC considers senior households to be those with a householder who is aged 62 or older.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Other potential elderly housing needs that may require a specific governmental response include:

- **Assisted living facilities**. Assisted living facilities provide elderly residents with the opportunity to maintain an independent housing unit while receiving needed medical services and social support. Congregate care facilities include housing with medical and health services.
- **Relocation assistance**. Some elderly residents need assistance in relocating to a dwelling that better suits their space and income needs.
- **Mobility impairment**. Mobility-impaired elderly residents requiring special accessibility features in their dwelling units. Mobility impairment may require that special accessibility features be included in the design and construction of a home. Mobility impairment can also create a need for a living arrangement that includes health, meals, cleaning, and/or other services as part of the housing package. A number of living arrangements are possible, from senior citizen developments with individual dwelling units to assisted living facilities to 24-hour support services. Table B-13 shows the prevalence of different types of disabilities among seniors over age 65 in Oakland. The most prevalent type of disability is ambulatory difficulty, experienced by 25.0 percent of Oakland seniors. An ambulatory difficulty refers to a mobility impairment that causes significant difficulty walking or climbing stairs.

Table B-13: Oakland Seniors (Age 65 and Over) by Type of Disability, 2019

Disability	*Percentage of Seniors*
With an ambulatory difficulty[1]	25.0%
With an independent living difficulty[2]	17.93%
With a hearing difficulty[3]	14.03%
With a self-care difficulty[4]	10.59%
With a cognitive difficulty[5]	11.77%
With a vision difficulty[6]	7.95%

Notes:

1. Ambulatory difficulty refers to having serious difficulty walking or climbing stairs.
2. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.
3. Hearing difficulty refers to those who are deaf or have serious difficulty hearing.
4. Self-care difficulty refers to having difficulty bathing or dressing.
5. Cognitive difficulty refers to having difficulty remembering, concentrating or making decisions due to a physical, mental, or emotional problem.

6. Vision difficulty refers to those who are blind or have serious difficulty seeing.

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Senior Housing

Oakland presently has 80 senior housing facilities with a capacity to house 5,385 individuals (Table B-14). Thus, there is capacity for senior housing facilities to house approximately 10 percent of Oakland's senior population. However, many senior households may prefer to stay in their existing residences well into retirement. Senior housing may be most attractive to the oldest cohort (85 years and older), and the capacity to house 5,385 individuals may be adequate for current populations in that cohort. However, the City will continue to support the construction of senior housing, particularly near services such as shopping, medical care, and recreation, to prepare for the aging population.

PERSONS WITH DISABILITIES

Persons with disabilities have physical or mental impairments that require special housing designed for self-sufficiency. According to 2019 American Community Survey estimates compiled by ABAG, 49,362 persons (11.7 percent of the non-institutionalized population) in Oakland had a disability. This proportion is slightly higher than that of Alameda County (9.2 percent) and the Bay Area (9.6 percent) as illustrated in Chart B-5.

Chart B-5: Persons with Disabilities by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (California Employment Development Department, Local Area Unemployment Statistics (LAUS), Sub-county areas monthly updates, 2010-2021).

Disability can further be broken down into six categories. The Census Bureau provides the following definitions for these disability types:

- Hearing difficulty: deaf or has serious difficulty hearing;
- Vision difficulty: blind or has serious difficulty seeing even with glasses;
- Cognitive difficulty: has serious difficulty concentrating, remembering, or making decisions;
- Ambulatory difficulty: has serious difficulty walking or climbing stairs;
- Self-care difficulty: has difficulty dressing or bathing; and
- Independent-living difficulty: has difficulty doing errands alone such as visiting a doctor's office or shopping.

These disability types are counted separately and are not mutually exclusive, as an individual may report more than one disability; thus, these counts should not be summed. Table B-15 provides a breakdown of Oakland's adult population by disability type. The most prevalent disability was ambulatory difficulty at 6.05 percent.

Table B-15: Oakland Disability by Type, 2019

Disability	*Percentage of the Civilian Non-Institutionalized Population Aged 18 and Over*
With an ambulatory difficulty	6.05%
With a cognitive difficulty	4.91%
With an independent living difficulty	4.61%
With a self-care difficulty	2.72%
With a hearing difficulty	2.80%
With a vision difficulty	2.32%

Source: ABAG-MTC Housing Needs Data Workbook, 2021

Further, residents with disabilities may have more difficulty in finding employment. In Oakland, according to 2019 ACS estimates compiled by ABAG, approximately 14.2 percent of the civilian non-institutionalized population 18 years to 64 years in the labor force with a disability were unemployed, while only 5.6 percent of those with no disability were unemployed. The census considers individuals to not be in the labor force if they are not employed and are either not available to take a job or are not looking for one. This category typically includes discouraged workers, students, retired workers, stay-at-home parents, and seasonal workers in an off season who are not looking for work.

Given the barriers faced by persons with disabilities, the provision of affordable and barrier-free housing is essential to meet their housing needs. As described in Appendix D, there are a greater proportion of persons with disabilities living in some tracts in Downtown Oakland, including Chinatown, plus a tract in West Oakland and a tract in the Piedmont Ave neighborhood. There are two approaches to housing design for residents with disabilities: adaptability and accessibility. Adaptable housing is a design concept in which a dwelling unit contains design features that allow for accessibility and use by mobility-impaired individuals with only minor modifications. An accessible unit has the actual special features installed in the house (grab bars, special cabinetry). To address these needs, the State requires design or accessibility modifications, such as access ramps, wider doorways, assist bars in bathrooms, lower cabinets, elevators, and the acceptance of service animals.

Developmental Disabilities

Since January 2011, per SB 812 as codified in Section 65583, housing elements are required to address the housing needs of individuals with a developmental disability within the community. The analysis must include an estimate of the number of persons with developmental disabilities, an assessment of the housing need, and a discussion of potential resources. According to Section 4512 of the Welfare and Institutions Code a "developmental disability" means a disability that originates before an individual attains age 18 years, continues—or can be expected to continue—indefinitely, and constitutes a substantial disability for that individual, which includes intellectual disability, cerebral palsy, epilepsy, and autism. This term shall also include disabling conditions found to be closely related to intellectual disability or to require treatment similar to that required for individuals with an intellectual disability, but shall not include other disabling conditions that are solely physical in nature.

Many developmentally-disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

The California Department of Developmental Services (DDS) is responsible for overseeing the coordination and delivery of services to more than 330,000 Californians with developmental disabilities including cerebral palsy, intellectual disability, Down Syndrome, autism, epilepsy, and related conditions through a network of 21 regional centers and state-operated facilities.

DDS consumer data compiled by ABAG provides an estimate of the number of Oakland residents with a developmental disability. Table B-16 shows that the vast majority of residents with a developmental disability (82.01 percent) live in the home of a parent/family/guardian. Further, approximately 6.3 percent (3,111 persons) of the population that has a developmental disability is under the age of 18, while the remaining 93.7 percent (46,251 persons) is over 18 years old.

Table B-16: Oakland Population with Developmental Disabilities by Residence, 2020[1]

Residence Type	*Number*	*Percent*
Home of Parent/Family/Guardian	2,689	82.01%
Community Care Facility	168	5.12%
Independent/Supported Living	306	9.33%
Intermediate Care Facility	1	0.03%
Foster/Family Home	57	1.74%
Other	58	1.77%
Total	**3,279**	**100%**

1. The California Department of Developmental Services provides ZIP code level counts. To get jurisdiction-level estimates, ZIP code counts were crosswalked to jurisdictions using census block population counts from Census 2010 SF1 to determine the share of a ZIP code to assign to a given jurisdiction. Independent living difficulty refers to having difficulty doing errands alone due to a physical, mental, or emotional problem.

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Developmental Services, Consumer Count by California ZIP Code and Residence Type, 2020)

There are a number of housing types appropriate for people living with a development disability: rent-subsidized homes, licensed and unlicensed single-family homes, inclusionary housing, Section 8 vouchers, special programs for home purchase, HUD housing, and SB 962 homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the types of considerations that are important in serving this need group. Incorporating barrier-free design in all~~,~~ new multifamily housing (as required by California and federal fair housing laws) is especially important to provide the widest range of choices for disabled residents. Special consideration should also be given to the affordability of housing, as people with disabilities may be living on a fixed income.

LARGE FAMILIES

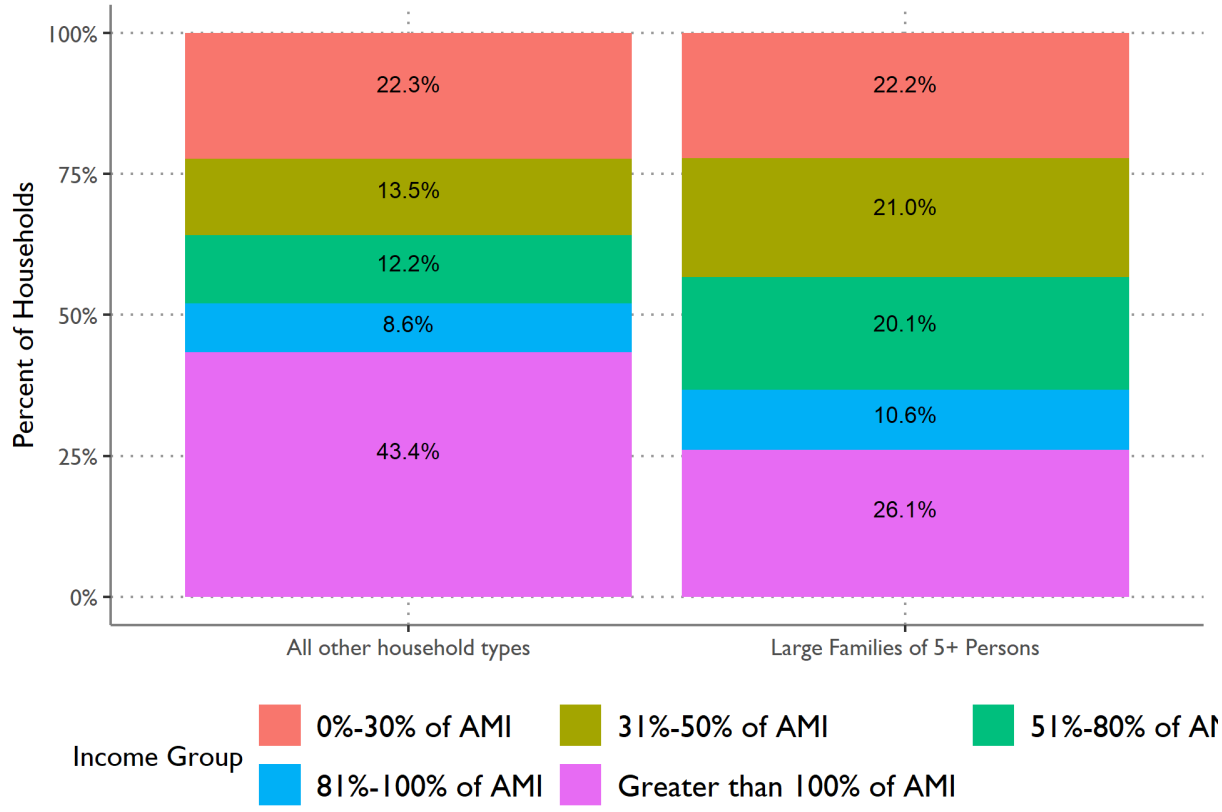
Large families are those households of five or more related individuals. The special need of this group is for housing of sufficient size and number of bedrooms that would prevent overcrowding. Cost is an important

consideration, as many large families do not have sufficient income to afford larger homes or apartments. At 9.40 percent of all households, Oakland has a slightly lower proportion of large family households than the county (10.8 percent) and the Bay Area region (10.8 percent). As shown in Table B-17, the 2019 American Community Survey reported 15,264 large households with five or more members, including 6,210 owner-occupied households and 9,054 renter-occupied households. About 9.38 percent of owner-occupied households and 9.41 percent of renter-occupied households were considered large households.

Table B-17: Oakland Household Size by Tenure, 2019

	Owner-Occupied		*Renter-Occupied*	
Housing Type	*Number*	*Percent*	*Number*	*Percent*
1 Person Household	17,620	26.63%	36,428	37.85%
2 Person Household	22,047	33.32%	28,122	29.22%
3 Person Household	11,668	17.63%	13,488	14.01%
4 Person Household	8,632	13.04%	9,150	9.51%
5 Or More Person Household	6,210	9.38%	9,054	9.41%
Total	**66,177**	**100%**	**96,242**	**100%**

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009)



In addition to household income, cost burden can be used to determine the extent of housing needs for large-family households. Cost burden indicates that a household is paying between 30 percent and 50 percent of their income towards rent, while severe cost burden indicates that a household is paying over 50 percent of their income towards rent. As shown in Table B-18, about 42.97 percent of large families experience some level of cost burden (either regular or severe). Similarly, 42.13 percent of all other household types experience cost burden. However, as illustrated in Chart B-6, a greater proportion of large families have incomes that are less than 100% of AMI compared to all other household types in Oakland.

Table B-18: Oakland Cost Burden by Household Size, 2013-2017

	Large Family (5+ Persons)		*All Other Household Types*	
Income Category	*Number*	*Percent*	*Number*	*Percent*
No Cost Burden	7,210	57.03%	83,625	57.86%
Cost Burden	3,004	23.76%	29,995	20.75%
Severe Cost Burden	2,429	19.21%	30,900	21.38%
Total	**12,643**	**100%**	**144,520**	**100%**

FEMALE-HEADED HOUSEHOLDS

Female-headed families, including those with children, are identified as a special needs group, because they are more likely to be low-income and face difficulty in finding affordable housing. This can be attributed in part to the systemic gender pay gap, and single women with children may particularly face housing discrimination when searching for a home. In Oakland, there is also a greater proportion of female-headed households with children in West Oakland and the downtown area. As shown in Table B-19 there are 21,717 female-headed households and 9,149 male-headed households in Oakland. These groups constitute 13.37 percent and 5.63 percent, respectively, of Oakland's total number of households. Female-headed households represented about 10.91 percent of owner-occupied households and 15.06 percent of renter-occupied households.

Table B-19: Oakland Household Type by Tenure, 2019

	Owner-Occupied		Renter-Occupied	
Household Type[1]	*Number*	*Percent*	*Number*	*Percent*
Married-Couple Family Households	33,183	50.14%	24,513	25.47%
Female-Headed Family Households	**7,223**	**10.91%**	**14,494**	**15.06%**
Male-Headed Family Households	**3,400**	**5.14%**	**5,749**	**5.97%**
Householders Living Alone	17,620	26.63%	36,428	37.85%
Other Non-Family Household	4,751	7.18%	15,058	15.65%

1. For data from the Census Bureau, a "family household" is a household where two or more people are related by birth, marriage, or adoption. "Non-family households" are households of one person living alone, as well as households where none of the people are related to each other.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25011)

Of the 21,717 female-headed households in Oakland, about 59.5 percent had children under 18 years. Table B-20 below shows that of these, 39.72 percent were under the poverty line, compared to only 11.49 percent of female-headed households without children. This demonstrates that female-headed households with children are more likely to have greater housing needs and face difficulties in finding affordable housing. Additional information on female-headed households, including households with children, is provided in Appendix D.

Table B-20: Oakland Female-Headed Households by Poverty Status[1], 2019

	Households With Children		Households Without Children	
Poverty Level	*Number*	*Percent*	*Number*	*Percent*
Above Poverty Level	7,786	60.28%	7,789	88.51%
Below Poverty Level	5,131	39.72%	1,011	11.49%

1. The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17012)

PERSONS EXPERIENCING HOMELESSNESS

A common method to assess the number of homeless persons in a jurisdiction is through a Point-in-Time (PIT) Count. The PIT Count is a biennial census of sheltered and unsheltered persons in a Continuum of Care (CoC) completed over a 24-hour period in the last 10 days of January. The unsheltered PIT Count is conducted ~~annually~~biannually in Alameda County and is a requirement to receive homeless assistance funding from HUD. The PIT Count does not function as a comprehensive analysis and should be considered in the context of other key data sources when assessing the state of homelessness in a community. Due to COVID-19, no point in time count was conducted in 2021. As of the time of this report, the delayed point in time count took place on February 23, 2022, and a full report was published in late summer 2022.

According to HUD, a CoC is a "a community plan to organize and deliver housing and services to meet the specific needs of people who are homeless as they move to stable housing and maximize self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness." Each Bay Area County is its own CoC. In Alameda County, EveryOne Home oversees the CoC Program. The goals of the Everyone

Home Plan include preventing homelessness and other housing crises; increasing permanent housing opportunities for homeless and high-risk households; provide wrap-around services to ensure housing stability and quality of life; and measuring success and reporting outcomes.

Table B-21 provides an estimate of the homeless population by household type and shelter status in Alameda County. According to the 2022 PIT Count, there were 7,135 unsheltered homeless persons and 2,612 sheltered persons in Alameda County.

Table B-21: Homelessness by Household Type and Shelter Status in Alameda County, 2022

Shelter Status	*People in Households Composed Solely of Children Under 18*	*People in Households with Adults and Children*	*People in Households without Children Under 18*	***Total***
Sheltered	9	522	2,081	**2,612**
Unsheltered	88	322	6,725	**7,135**

~~*Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2012)*~~*Source:) EveryOneHome Point-in-Time Count, 2022*

The PIT Count can be further divided by race or ethnicity, which can illuminate whether homelessness has a disproportionate racial impact within a community. The data from HUD on Hispanic/Latinx ethnicity for individuals experiencing homelessness does not specify racial group identity. Accordingly, individuals in either ethnic group identity category (Hispanic/Latinx or non-Hispanic/Latinx) could be of any racial background.

The racial/ethnic breakdown of Alameda County's homeless population is shown in Table B-22. Notably, those who identify as Black or African American (Hispanic and non-Hispanic) represent 43 percent of the unhoused population in the county, but only 10 percent of the overall population. Additionally, those identify as American Indian or Alaska Native (Hispanic and non-Hispanic) are also represented disproportionately among the unhoused population, as they make up 4 percent of homeless Alameda County residents but only 1 percent of its overall population. Asian/API, White, and those who identify as some other race or multiple races are all underrepresented among the homeless population compared to their share of the overall population. Further, those who identify as Hispanic/Latinx are also slightly overrepresented among the unhoused.

Table B-22: Racial/Ethnic Group Share of General and Homeless Population in Alameda County, 2022

Racial/Ethnic Group	*Share of Homeless Population*	*Share of Overall Population*
American Indian or Alaska Native (Hispanic and Non-Hispanic)	4%	1%
Asian / API (Hispanic and Non-Hispanic)	5%	332%
Black or African American (Hispanic and Non-Hispanic)	43%	10%
White (Hispanic and Non-Hispanic)	39%	34%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	7%	22%
Hispanic/Latinx	25%	23%

Non-Hispanic/Latinx	75%	77%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports, 2019)

Per ~~HCD's~~HCD's requirements, jurisdictions also need to supplement county-level data with local estimates of people experiencing homelessness. The 2022 PIT Count summary identified 5,055 persons experiencing homelessness in the City of Oakland on the night of February 23, 2022, making up approximately 52 percent of the county's unhoused population. This is an increase of 984 people (24 percent) from the 4,071 unhoused individuals who were counted in the 2019 count. A comparison of Oakland and Alameda County's unhoused population is described in Table B-23, and a description of Oakland's unhoused population by location and household type for 2022 and 2019 is described in Table B-24. As shown in Table B-24, of the 5,055 persons experiencing homelessness in the City of Oakland, 1,718 were sheltered and 3,337 were unsheltered. In 2019, 861 of the 4,071 individuals experiencing homelessness were sheltered, and in 2017, 859 of the 2,761 individuals experiencing homelessness were sheltered.

Table B-23: Homeless Population in Oakland and Alameda County, 2022

Jurisdiction	*2015*	*2017*	*2019*	*2022*
Oakland	2,191	2,761	4,071	5,055
Alameda County	4,040	5,629	8,022	9,747

Persons in Families	135	17%
Single Individuals	661	83%

Source: EveryOneHome Point-In-Time Count, 2019 and 2022

The Permanent Access to Housing (PATH) Framework, which is Oakland's five-year plan to address homelessness, identifies the following as the main drivers of homelessness in the city:

- Structural racism

- Insufficient controls on the rental housing market that create vulnerability and housing instability for tenants
- Insufficient housing units that are affordable to households with the lowest incomes, including particularly those whose incomes are below 20 percent of AMI
- Systemic barriers that often prevent residents who are returning home from incarceration from living with family members and/or accessing both public and private rental housing and employment opportunities
- Inadequate pay and benefits for many of the jobs that are available in the community, and insufficient access to quality employment opportunities that pay wages that meet the cost of housing

Homelessness in Oakland remains a humanitarian crisis that has only been exacerbated by the COVID-19 pandemic. However, even prior to COVID-19, rapidly increasing housing costs, increased residential instability, and the lack of available affordable housing and supportive services contributed to this significant increase. Homelessness also impacts Oakland residents unequally by race/ethnicity – as discussed further in Appendix D, the vast majority of unhoused Oakland residents are Black (about 59 percent, based on 2022 PIT data). The data also does not capture those living in more precarious housing situations, including people temporarily living with friends or family members, "couch surfing," or living in a vehicle not captured during the PIT Count.

The PATH Framework organizes strategies to address homelessness under three major themes:

1. Prevention strategies to keep people from becoming homeless;

2. Emergency strategies to shelter and rehouse households and improve health and safety on the street and;

3. Creation of affordable, extremely-low-income, and permanent supportive housing units prioritized for households experiencing homelessness.

According to 2020 Homeless Management Information System (HMIS) data, the Oakland, Berkeley/Alameda County Continuum of Care contains 2,032 total year-round beds, including 1,383 emergency shelter beds. Additional actions the City takes to provide shelter and permanent supportive housing for unhoused people, as well as potential constraints, are discussed in Appendix F. Further prioritization of permanent housing policies in the PATH Framework should be adopted to fully meet the needs of unhoused residents. Th actions are described in the Housing Action Plan.

UNDOCUMENTED IMMIGRANTS

It should be noted that there is a significant undocumented population in Oakland that may or may not be captured in DOF's population data. While undocumented immigrants are typically counted in annual American Community Surveys and decennial Census reports, this data is incomplete and it can be difficult to estimate the exact number of undocumented immigrants who live in Oakland. The Migration Policy Institute (MPI) estimates that as of 2019 there are 107,000 undocumented or unauthorized immigrants living in Alameda County, about 1.0 percent of the national total (11,047,000 people) or about 3.9 percent

of the State's total (2,739,000 people).[1] A 2015 study found that East Oakland in particular is home to a significant number of undocumented or unauthorized immigrants – about 17.0 percent of East Oakland's population were considered unauthorized compared to 6.0 percent of Alameda County's population.[2] According to the study "almost 70 percent of the unauthorized who are at least five years old do not speak English well, often limiting their social and economic status. For example, the unauthorized are often among the working and poor – those who work full-time but toil in low-wage industries with limited chances of economic mobility and limited access to employer-based health insurance." Further, East Oakland's undocumented or unauthorized population is predominantly Latino, compared to higher proportions of unauthorized East and South Asian immigrants throughout the county.

Undocumented immigrants are particularly at risk of housing precarity and exploitation due to their legal status and fear of repercussion. Further, a number of federal rental assistance programs—including public housing, Housing Choice Vouchers, and Section 8 project-based rental assistance—are not available to unauthorized immigrants. However, other federal grant-funded and other housing assistance programs (including HUD homeless assistance and Keep Oakland Housed) do not require the verification of immigrant status.

FARMWORKERS

Farmworkers are traditionally defined as people whose primary incomes are earned through permanent or seasonal agricultural labor. Farmworkers are generally considered to have special housing needs due to their limited income and the often unstable nature of their employment. In addition, farmworker households tend to have high rates of poverty, live disproportionately in housing that is in the poorest condition, have extremely high rates of overcrowding, and have low homeownership rates. Given the high rate of urbanization in Oakland, along with changes in local agriculture industries, farmworker residents are likely to be permanent, rather than migrant farmworkers. The special housing needs among the permanent farmworker population are for the same type of financial assistance that other low-income residents would require.

Although farmworkers still represent a special housing need in many communities, the advent of mechanization in harvesting crops, new planting techniques, and changes in the types of crops grown have substantially reduced the overall number of farmworkers and the proportion of migrant farmworkers. Oakland is also located in a highly urbanized area of the Bay Area with no working farms within or adjacent to the city limits, which limits the presence of farmworkers in the city.

In Alameda County, there has been a decrease in the number of seasonal and permanent farmworkers. According to the U.S. Department of Agriculture (USDA) Census of Farmworkers, between 2002 and 2017 Alameda County experienced a 22.0 percent decrease in the number of seasonal farmworkers (i.e., those that have worked on a farm 150 days or less) and a 47.1 percent decrease in the number of permanent farmworkers. In 2017, there were 593 farmworkers in total in Alameda County. See Chart B-7 for these trends.

Chart B-7: Farm Labor in Alameda County, 2002-2017

*Farm workers are considered seasonal if they work on a farm less than 150 days in a year,while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

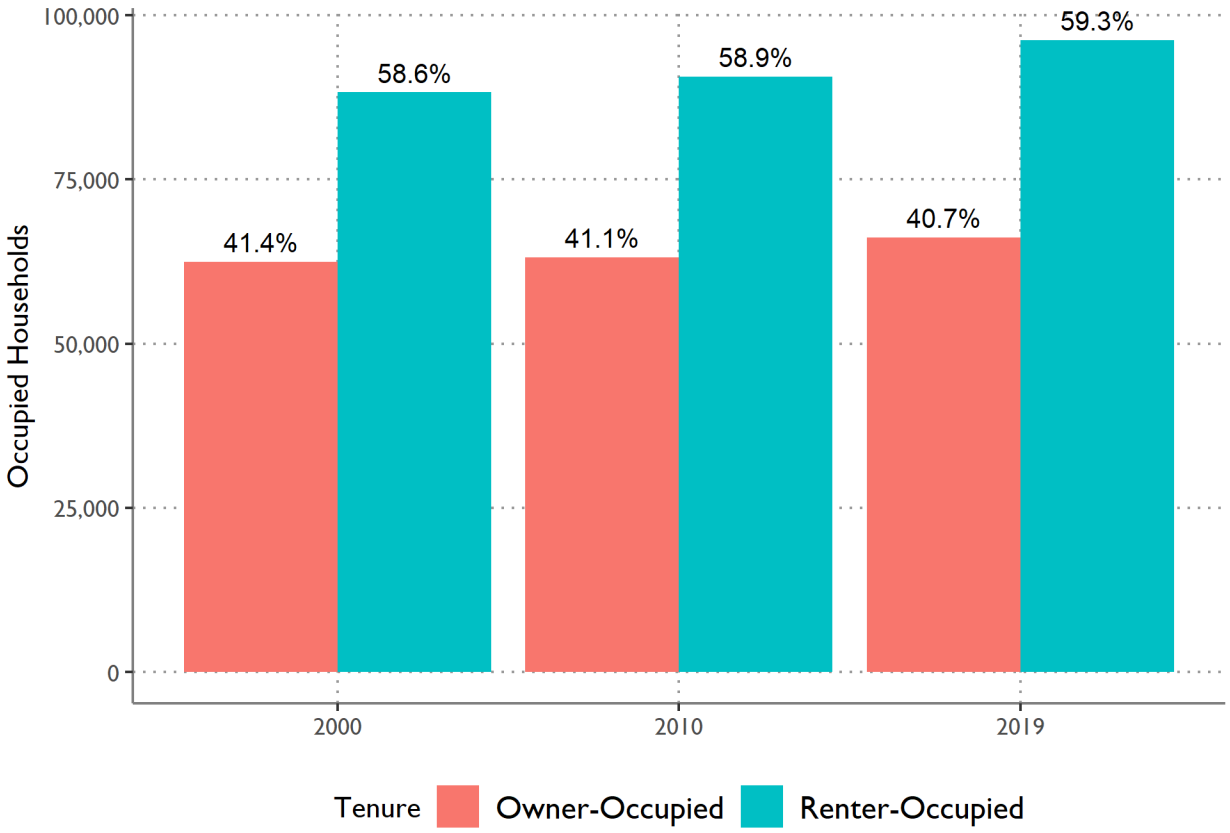
Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor)

In the local setting, estimating the size of the agricultural labor force can be especially problematic due to undercounts and inconsistent definitions across government agencies. According to the Census ACS five-year estimates, there were 1,089 Oakland residents employed in the "agriculture, forestry, fishing and hunting" industry in 2019 – about 0.5 percent of the labor force. This is similar to Alameda County (0.4 percent) and the Bay Area (0.7 percent). Determining the breakdown by seasonal and permanent workers can be even more difficult. Data from the California Department of Education provides one local estimate by also tracking the student population of migrant workers, available in Table B-~~23~~25. However, no schools in Oakland have reported any migrant worker students in the four years documented here by ABAG-MTC. Alameda County has seen a slight decrease over the course of these four years from 874 to 790 students and the Bay Area overall has seen a steady decrease from 4,630 to 3,976 students.

Table B-~~23~~25: Migrant Worker Student Population[1] by Region, 2016-2020

Academic Year	*Oakland*	*Alameda County*	*Bay Area*
2016-2017	0	874	4,630
2017-2018	0	1,037	4,607
2018-2019	0	785	4,075
2019-2020	0	790	3,976

1. The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.



Source: ABAG-MTC Housing Needs Data Workbook (California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data, Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

B.6 Housing Stock Characteristics

HOUSING TENURE

Most households in Oakland are renters. The percentage of renter-occupied households in Oakland increased modestly from 58.6 percent to 59.3 between 2010 and 2019, despite the significant increase in absolute renter and homeowner population. There were 88,301 renter-occupied units and 62,849 owner-occupied units in 2000, 90,649 renter-occupied units and 63,142 owner-occupied units in 2010, and 96,242 renter-occupied units and 66,177 owner-occupied units in 2019. Owner-occupied housing units tend to be congregated in the Oakland Hills and parts of North Oakland, while significantly more housing units are renter-occupied in West Oakland, Downtown, and East Oakland.

Chart B-8: Oakland Household Tenure, 2000 – 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, Census 2000 SF1, Table H04; U.S. Census Bureau, Census 2010 SF1, Table H04; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

Oakland's household tenure differs from patterns seen in the county and the larger Bay Area, reflecting its status as a big city. As shown in Table B-~~24~~26, 53.5 percent of Alameda County households and 56.1 percent of Bay Area households lived in owner-occupied homes, compared to 40.7 percent of Oakland households. Looking at other large Bay Area cities, San Francisco has lower rates of ownership housing compared to Oakland, while San Jose and Fremont have significantly higher ownership rates.

Table B-~~24~~26: Household Tenure by Region, 2019

	Owner-Occupied		*Renter-Occupied*	
Region	*Number*	*Percent*	*Number*	*Percent*
Oakland	66,177	40.7%	96,242	59.3%
Alameda County	308,891	53.5%	268,286	46.5%
San Francisco	136,239	37.6%	226,115	62.4%
San Jose	184,600	56.8%	140,514	43.2%
Fremont	45,912	60.1%	29,775	39.9%
Bay Area	1,531,955	56.1%	1,199,479	43.9%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003)

Racial and ethnic disparities in tenure exist in Oakland, shown in Table B-~~25~~27. Households considered to be non-Hispanic white are almost evenly split between owners and renters, while households considered to be American Indian or Alaskan native of any ethnicity, Black or African American of any ethnicity, other race or multiple races of any ethnicity, and Hispanic or Latinx are largely renters. American Indian or Alaskan native households of any ethnicity have the highest renter-occupied rates at 70.83 percent as of 2019. Racial and ethnic income disparities shown in Table B-8 above may also contribute to these disparities in tenure, since renters are more likely to be lower income than are homeowners.

Table B-~~25~~27: Oakland Housing Tenure by Race/Ethnicity, 2019

	Owner-Occupied		*Renter-Occupied*	
Racial/Ethnic Group[1]	*Number*	*Percent*	*Number*	*Percent*
American Indian or Alaska Native (Hispanic and Non-Hispanic)	390	29.17%	947	70.83%
Asian / API (Hispanic and Non-Hispanic)	11,094	42.78%	14,838	57.22%
Black or African American (Hispanic and Non-Hispanic)	13,904	32.17%	29,322	67.83%
Other Race or Multiple Races (Hispanic and Non-Hispanic)	7,479	29.32%	18,033	70.68%
White (Hispanic and Non-Hispanic)	33,310	50.16%	33,102	49.84%
Hispanic or Latinx	8,881	30.62%	20,124	69.38%
White, Non-Hispanic	30,030	52.10%	27,612	47.90%

2. ~~1.~~ For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here.

The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labeled "Hispanic and Non-Hispanic" are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003(A-I))

Disparities in tenure are also apparent across different income levels, as might be expected. As ownership is typically more costly than renting, lower-income households are often renters. In Oakland, the majority of lower-income households—those making less than 80 percent of AMI—are renters, while the majority of households making above 100 percent of AMI are owners. See Table B-~~26~~28 for the complete breakdown by income group. This indicates that homeownership is likely out of reach for many lower-income households. Considering the disproportionate racial/ethnic share of renters in Oakland, especially among American Indian or Alaska native, Black or African American and Hispanic or Latinx households, and the significant share of Black or African American and Asian households with income below 30 percent of AMI (Table B-8), this highlights a need to target both economic as well as racial/ethnic disparities to affirmatively further fair housing, which will be further discussed in Appendix D.

Table B-~~26~~28: Oakland Housing Tenure by Income Level, 2019

	Owner-Occupied		*Renter-Occupied*	
Income Group[1]	*Number*	*Percent*	*Number*	*Percent*
0%-30% of AMI	5,810	15.56%	31,535	84.44%
31%-50% of AMI	6,069	27.39%	16,090	72.61%
51%-80% of AMI	6,950	34.54%	13,170	65.46%
81%-100% of AMI	5,360	38.98%	8,390	61.02%
Greater than 100% of AMI	39,210	59.34%	26,865	40.66%

1. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Alameda Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Rates of homeownership also typically depend on the type of housing available. Most detached single-family homes are owner-occupied; see Table B-~~27~~29. However, a significant share of these units—slightly less than one quarter—are renter-occupied. Further, about 55.79 percent of attached single-family homes are occupied by renters. Nearly all of Oakland's multifamily housing stock is renter-occupied. Meeting affordability needs, especially for renters, must consider the type of housing available to residents.

Table B-~~27~~29: Oakland Housing Tenure by Housing Type, 2019

	Owner-Occupied		*Renter-Occupied*	
Housing Type	*Number*	*Percent*	*Number*	*Percent*
Detached Single-Family Homes	52,515	75.08%	17,432	24.92%
Attached Single-Family Homes	3,700	44.21%	4,670	55.79%
Multi-Family Housing	9,601	11.51%	73,826	88.49%
Mobile Homes	334	53.70%	288	46.30%
Boat, RV, Van, or Other	27	50.94%	26	49.06%

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25032)

HOUSING TYPE

During the 2010 to 2020 period, housing development in Oakland was primarily multifamily, although there was an increase in housing units of all types. Using DOF estimates provided by ABAG-MTC, Table B-~~28~~30 shows that Oakland added 564 single family detached homes in the 2010s; however, given the large pre-existing base, this was less than one percent increase. Single family attached housing stock grew by 2.41 percent, although only 155 units were added. The bulk of the housing increase—4,774 housing units—was in five-plus unit multifamily housing types. The number of total units has increased by 3.39 percent over this period driven primarily by the addition of attached single-family homes and multifamily housing consisting of five-plus units.

Table B-~~28~~30: Oakland Housing Type Trends, 2010 – 2020

	2010		*2020*		*Percent Change*
Building Type	*Number*	*Percent*	*Number*	*Percent*	*(2010 – 2020)*
Single-Family Home: Detached	73,904	43.55%	74,468	42.44%	0.76%
Single-Family Home: Attached	6,842	4.03%	7,007	3.99%	2.41%
Multifamily Housing: Two to Four Units	32,600	19.21%	32,844	18.72%	0.75%
Multifamily Housing: Five-plus Units	55,809	32.88%	60,583	34.53%	8.55%
Mobile Homes	555	0.33%	555	0.32%	0.00%

Source: ABAG-MTC Housing Needs Data Workbook (California Department of Finance, E-5 series)

OVERCROWDED HOUSEHOLDS

According to the U.S. Census, overcrowding occurs where there are more than 1.01 persons per room (excluding bathrooms and kitchens) in an occupied housing unit and severe overcrowding occurs when there are more than 1.5 persons per room. Overcrowding typically occurs when there is an inadequate supply of affordable housing. As shown in Table B-~~29~~31, 13,653 out of 162,419 housing units in Oakland were either overcrowded or severely overcrowded (8.41 percent). This is slightly higher than the rate in Alameda County (7.87 percent) and the Bay Area (6.9 percent). While the entire city experiences some level of overcrowding higher than the region, the highest tract-level rates of overcrowding occur in ~~the southwestern part of~~parts of East and Deep East Oakland, particularly in census tracts along International Boulevard.

Table B-~~29~~31: Overcrowding[1] Severity by Region, 2013-2017

	Not Overcrowded		*Overcrowded*		*Severely Overcrowded*	
Region	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Oakland	148,766	91.59%	7,432	4.58%	6,221	3.83%
Alameda County	531,752	92.13%	29,007	5.03%	16,418	2.84%
Bay Area	2,543,056	93.10%	115,696	4.24%	72,682	2.66%

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Further, renters tend to experience overcrowding more often than owners. As shown in Chart B-9, about 11.5 percent of renter-occupied households experience some level of overcrowding while only 3.9 percent of owner-occupied households do. Rates of severe overcrowding are nearly triple among renters than they are among owners.

Chart B-9: Oakland Overcrowding by Tenure and Severity, 2013-2017

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

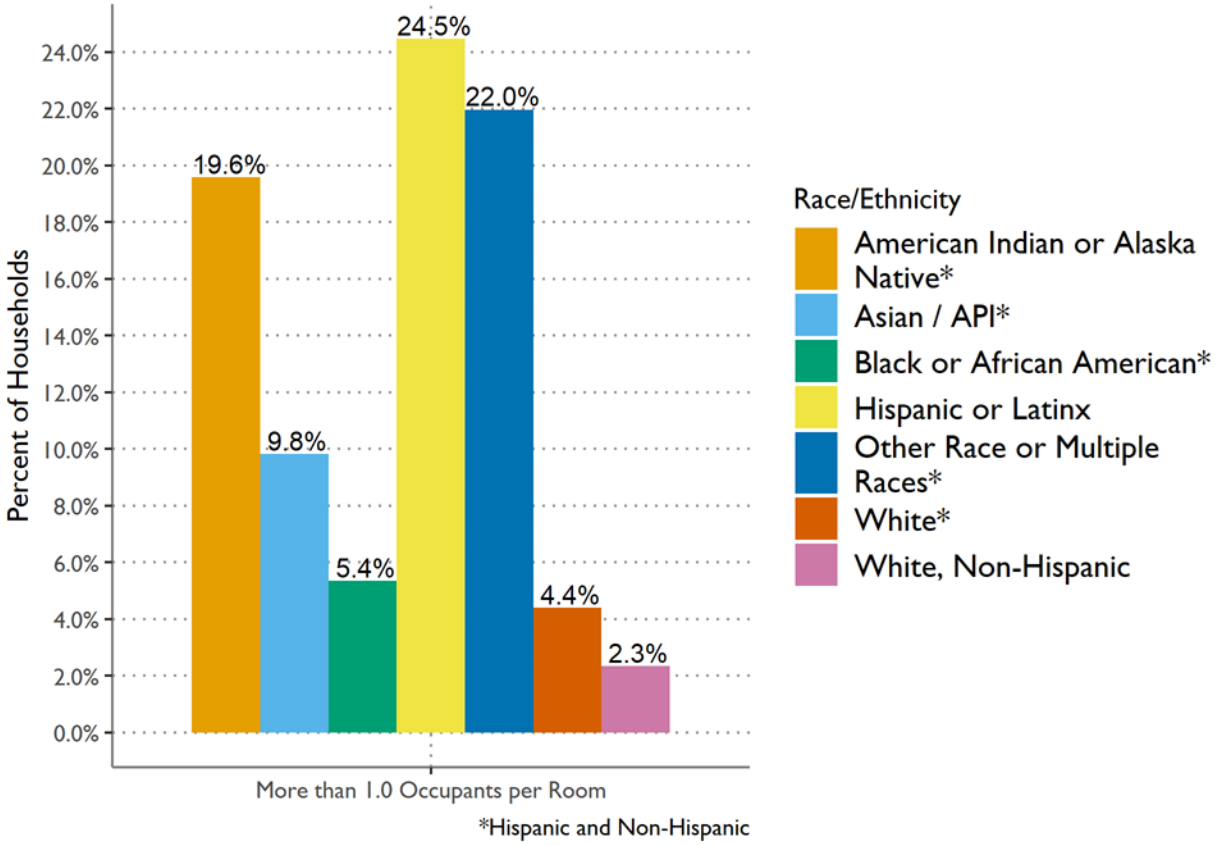
Since renters are more likely to be lower income than homeowners, they may experience higher rates of overcrowding. Lower-income households in Oakland (those making less than 80 percent of AMI), generally tend to have higher rates of overcrowding. For instance, as shown in Table B-~~30~~32, among extremely-low-income households (i.e., those making less than 30 percent of AMI) 6.48 percent are considered overcrowded and 5.51 percent are severely overcrowded. Households with higher incomes (i.e., those making greater than 100 percent of AMI) are 1.88 percent overcrowded and 1.53 percent severely overcrowded.

Table B-~~30~~32: Overcrowding[1] by Income Level and Severity in Oakland, 2013-2017

Income Group[2]	*Overcrowded*	*Severely Overcrowded*
0%-30% of AMI	6.48%	5.51%
31%-50% of AMI	8.69%	5.42%
51%-80% of AMI	7.30%	4.24%
81%-100% of AMI	5.41%	3.52%
Greater than 100% of AMI	1.88%	1.53%

1. The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

2. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this table are based on the HUD metro area where this jurisdiction is located.



Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Like tenure, rates of overcrowding are unevenly distributed by race/ethnicity. Chart B-10 below demonstrates the breakdown of overcrowding within various racial/ethnic groups in Oakland. According to the ABAG-MTC data workbook, "Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here."[3] In addition, "[t]he racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labeled 'Hispanic and Non-~~Hispanic~~'Hispanic' are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units."[4]

When compared across racial and ethnic groups, overcrowding is most prevalent among Hispanic or Latinx households, other race or multiple race households of any ethnicity, and for American Indian or Alaska Native households of any ethnicity as 24.5 percent, 22.0 percent, and 19.6 percent of each group experiences overcrowding, respectively. In Oakland, majority Asian American communities like Saint Elizabeth, San Antonio, and East Peralta, have a higher overcrowding rate (10 percent) than the city as a whole (8 percent).[5] Overcrowding rates are low for non-Hispanic white households (2.3 percent).

Chart B-10: Oakland Overcrowding by Race/Ethnicity, 2015-2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25014)

COST BURDEN

Cost burden, or overpayment, is defined as monthly ~~shelter~~housing costs in excess of 30 percent of a household's income. Severe cost burden is defined as paying over 50 percent of household income for ~~shelter~~housing costs. ~~Shelter~~Housing cost is defined as the monthly owner costs (mortgages, deed of trust, contracts to purchase or similar debts on the property and taxes, insurance on the property, and utilities) or the gross rent (contract rent plus the estimated monthly cost of utilities). HUD Comprehensive Housing Affordability Strategy (CHAS) data provides estimates of cost burden by tenure and income category. Estimates use the HUD Area Median Family Income (HAMFI) to determine overpayment. HAMFI is the median family income calculated by HUD for each jurisdiction in order to determine Fair Market Rents (FMRs) and income limits for HUD programs. HAMFI is not necessarily equivalent to other median income calculations due to a series of adjustments made by HUD.

According to 2013-2017 CHAS estimates, a total of 32,479 households experience cost burden (20.10 percent) while an additional 33,050 households experience severe cost burden (20.50 percent). The means that nearly half of all Oakland households experience some level of cost burden. Of the 65,529 households experiencing some level of cost burden, 14,119 of them are considered moderate- or above-moderate-income and 51,410 are considered lower-income. This indicates that housing affordability is particularly out of reach for lower-income households in Oakland.

Further, renters are particularly impacted by cost burden since renters are limited to the rental market while owners can build equity with their homes. Renters in Oakland tend to have higher rates of cost burden than owners – for instance, 46.5 percent of all renters experience some level of cost burden while only 31.8 percent of owners do. Rates are further unevenly distributed between renters and owners by income level, as evident in Table B-~~31a~~33a below. As described in Appendix D, the highest rates of cost burden are experienced by non-Hispanic Black or African American and Hispanic or Latinx households, with a general geographic concentrations in East Oakland, as well as some tracts in the Jack London District and Grand-Lake neighborhood. Additional context on cost burden as it relates to racial equity is provided in Appendix D.

Table B-~~31a~~33a: Oakland Cost-Burdened Households by Income and Tenure, 2013-2017[1]

	Renters		*Owners*		*Total Households[2]*	
Income Category	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Extremely-Low-Income (Under 30% HAMFI[3])						
No Cost Burden/Not Computed	6,765	23.10%	1,110	18.90%	7,875	22.40%
Cost Burden	4,980	17%	835	14.20%	5,815	16.50%
Severe Cost Burden	17,575	59.90%	3,935	66.90%	21,510	61.10%
Very-Low-Income (30% - 50% HAMFI)						
No Cost Burden/Not Computed	4,055	26.10%	2,080	36.30%	6,135	28.80%
Cost Burden	6,810	43.80%	1,340	23.40%	8,150	38.30%
Severe Cost Burden	4,690	30.20%	2,315	40.40%	7,005	32.90%
Low-Income (50% - 80% HAMFI)						
No Cost Burden/Not Computed	6,470	53.50%	3,160	48.80%	9,630	51.90%
Cost Burden	4,780	39.50%	1,640	25.30%	6,420	34.60%
Severe Cost Burden	840	6.90%	1,670	25.80%	2,510	13.50%
All Lower-Income (Under 80% HAMFI)						
No Cost Burden/Not Computed	17,290	30.40%	6,350	35.10%	23,640	31.50%
Cost Burden	16,570	29.10%	3,815	21.10%	20,385	27.20%
Severe Cost Burden	23,105	40.60%	7,920	43.80%	31,025	41.30%
Moderate- and Above-Moderate-Income (Over 80% HAMFI)						
No Cost Burden/Not Computed	34,200	86.90%	38,120	80.90%	72,320	83.70%
Cost Burden	4,724	12%	7,370	15.60%	12,094	14%
Severe Cost Burden	415	1.10%	1,610	3.40%	2,025	2.30%
All Income Groups						
No Cost Burden/Not Computed	51,490	53.50%	44,470	68.20%	95,960	59.40%
Cost Burden	21,294	22.10%	11,185	17.20%	32,479	20.10%
Severe Cost Burden	23,520	24.40%	9,530	14.60%	33,050	20.50%

1. According to HUD, households spending 30 percent or less of their income on housing expenses have no cost burden, households spending 31 to 50 percent of their income have cost burden, and households spending 51 percent or more of their income have severe cost burden.
2. Discrepancies in sums are due to rounding errors.
3. HUD Area Median Family Income (HAMFI).

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

Table B-~~31b~~33b summarizes cost burden severity in Oakland compared to Alameda County and the region. Cost burden in Alameda County and the Bay Area region are comparable; cost burden in Oakland is higher than in the County and region. In particular, more Oakland households are severely cost-burdened than in the County or region.

Table B-~~31b~~33b: Cost Burden Severity by Region, 2015-2019

	No Cost Burden		*Cost Burden*		*Severe Cost Burden*	
Region	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Oakland	88,832	54.69%	35,183	21.66%	33,949	20.90%
Alameda County	350,326	62.06%	117,618	20.83%	96,579	17.11%
Bay Area	1,684,831	63.06%	539,135	20.18%	447,802	16.76%

1. Percentages do not add to 100 percent as each jurisdiction includes households for which data is not computed

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau American Community Survey 5-Year Data (2015-2019), Table B25070, B25091)

HOUSING VACANCY

Housing vacancy rates provide one metric to assess the balance between the supply and demand of housing in a region. Low vacancy rates occur when demand outpaces the supply of housing, while high vacancy rates indicate an oversupply of housing. Housing costs also tend to be higher with low vacancy rates. Estimates from the 2015-2019 ACS compiled by ABAG-MTC indicate that 10,881 (6.7 percent) out of the 162,419 housing units in Oakland were vacant, which is higher than in the county (5.4 percent) but about equivalent to the entire Bay Area, as shown in Table B-~~32~~34.

Table B-~~32~~34: Oakland Vacant Units by Type, 2019

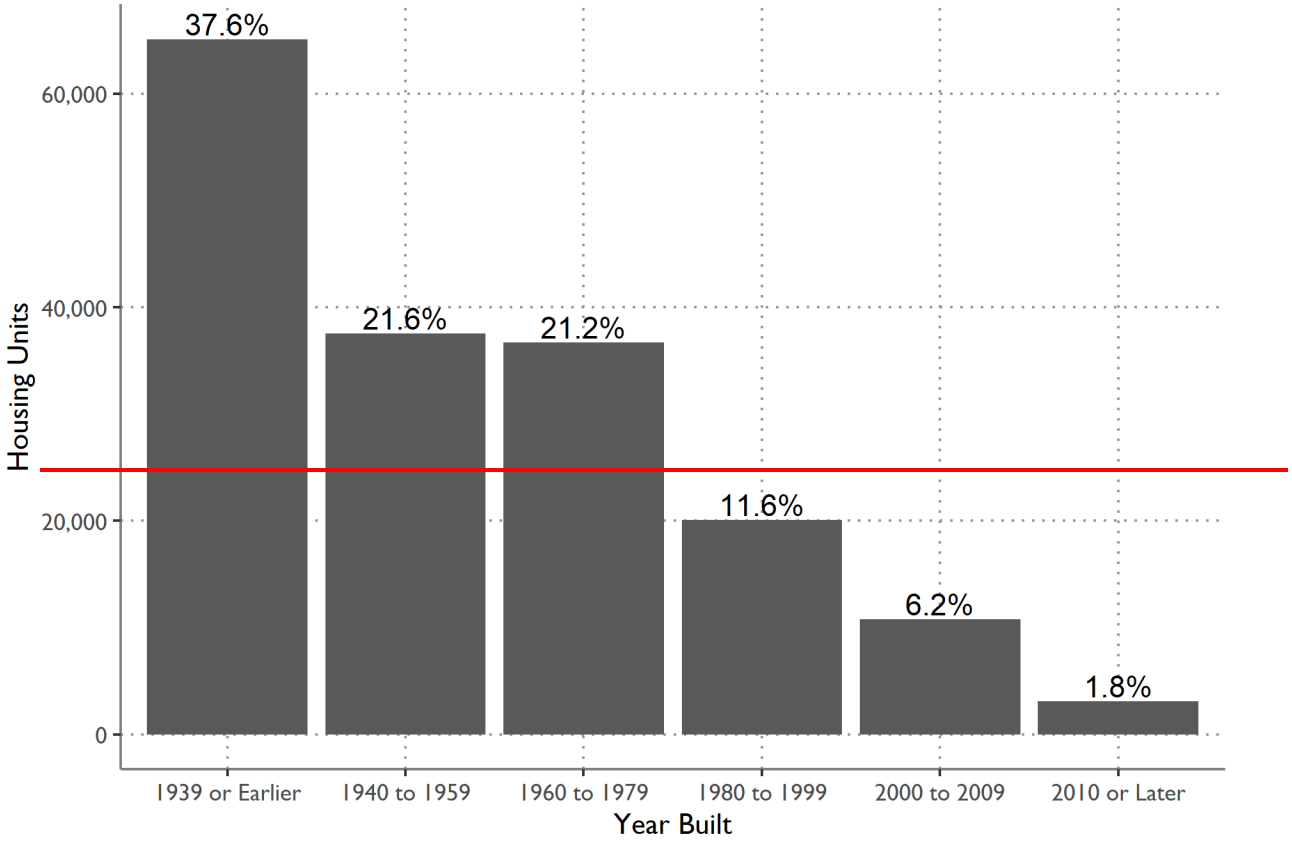
Vacancy Status	*Oakland*	*Alameda County*	*Bay Area*
For Rent	2,457	7,998	41,117
For Sale	458	1,961	10,057
For Seasonal, Recreational, or Occasional Use	637	3,892	37,301
Other Vacant	6,208	13,569	61,722
Rented, Not Occupied	571	1,517	10,647
Sold, Not Occupied	550	1,982	11,816
Total Vacant Housing Units	**10,881 (6.7%)**	**30,919 (5.4%)**	**172,660 (6.3%)**

Source: ABAG-MTC Housing Needs Data Workbook (American Community Survey 5-Year Data (2015-2019), Table B25004)

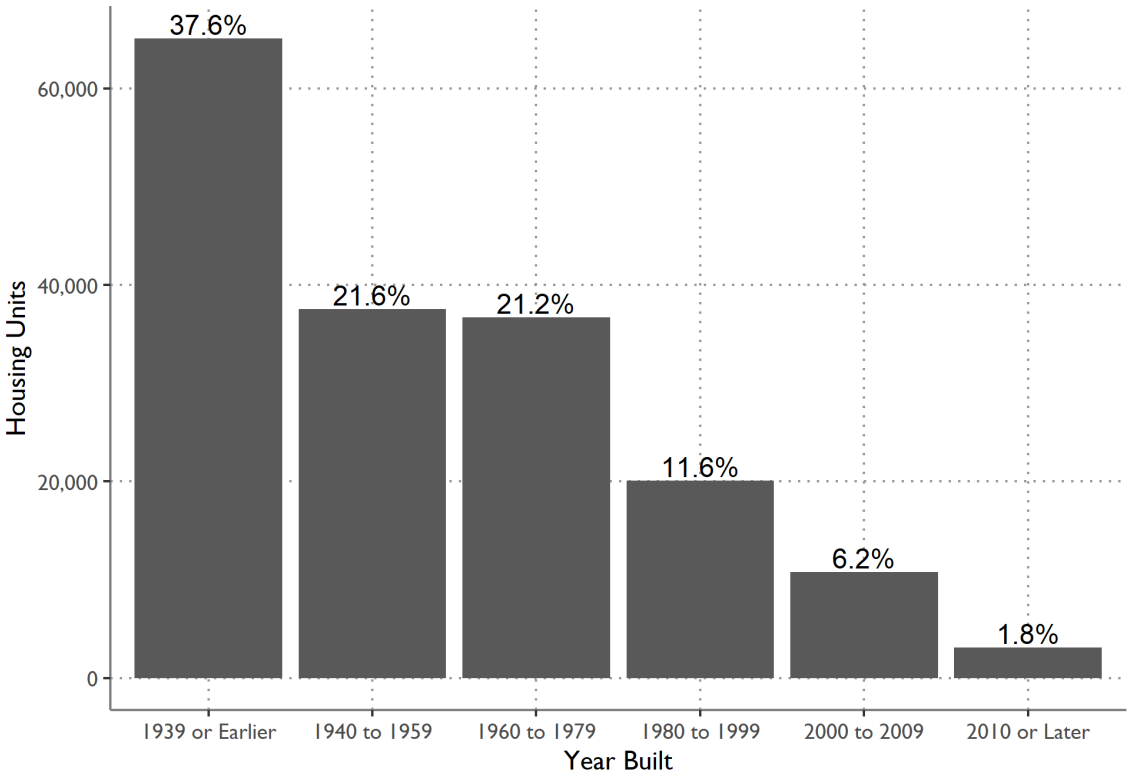
HOUSING PERMITS BY INCOME

Using data provided in the City's Annual Progress Report, the number of building permits issued from 2015 to 2021 is available by income group. In total, 16,789 building permits were issued during this period, or about 113.7 percent of the 5th cycle RHNA. Most of this development has been permitted at the higher income ranges, with 14,966 units permitted for above-moderate-income households – this translates to nearly nine above-moderate-income permits for every lower-income permit. Only 1,079 very-low-income units (52.4 percent) were permitted, 666 low-income units (32.1 percent) were permitted, and 78 moderate-income units (2.8 percent) were permitted. See Table B-~~33~~35 for the proportion of the RHNA for the period within which these permits were issued.

Table B-~~33~~35: Oakland Housing Permitting, 2015 – 2021



Income Group	*Number of Permits*	*Percent of 5th Cycle RHNA Met*
Very-Low-Income	1,079	52.4%
Low-Income	666	32.1%
Moderate-Income	78	2.8%
Above-Moderate-Income	14,966	191.5%
Total	**16,789**	**113.7%**



Source: City of Oakland, Housing Element Annual Progress Report, 2021

HOUSING STOCK CONDITIONS

The condition of the housing stock, including the age of buildings and units that may be in substandard condition, is also an important consideration in a community's housing needs. In Oakland, about 80.4 percent of the housing stock was constructed prior to 1980 and is over 40 years old. About 8.0 percent of the housing stock has been constructed since 2000, with only 1.8 percent constructed since 2010. See Chart B-11 for the age of Oakland's housing stock as of 2019.

Chart B-11: Age of Oakland Housing Stock, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25034)

A high proportion of older buildings, especially those built more than 30 years ago, may indicate that ~~substantial~~substandard housing conditions may be an issue. Housing is considered substandard when physical conditions are determined to be below the minimum standards of living, as defined by Government Code Section 17920.3. A building is considered substandard if any of the following conditions exist:

- Inadequate sanitation
- Structural hazards
- Nuisances
- Faulty weather protection
- Fire, safety, or health hazards
- Inadequate building materials
- Inadequate maintenance
- Inadequate exit facilities
- Hazardous wiring, plumbing or mechanical equipment
- Improper occupation for living, sleeping, cooking, or dining purposes
- Inadequate structural resistance to horizontal forces
- Any building not in compliance with Government Code Section 13143.2

Any household living in substandard conditions in considered in need of assistance, even if they are not actively seeking alternative housing arrangements. Estimating the number of substandard units can be difficult, but the lack of certain infrastructure and utilities can often be an indicator of substandard conditions. According to the 2018 Oakland Equity Indicators Report, 1.36 percent of housing units in zip codes that were more than 60 percent non-White reported housing habitability complaints, compared to 0.67 percent of housing units in zip codes that were more than 60 percent White. In addition, according to 2019 ACS estimates compiled by ABAG-MTC, as shown in Table B-34, about 0.28 percent of owners lack complete kitchen facilities while 1.91 percent of renters do. Further, approximately 0.2 percent of owners lack complete plumbing facilities while 1.02 percent of renters do. In total, there are 837 occupied housing units with incomplete plumbing facilities and 3,514 units with incomplete kitchen facilities. During outreach, Oakland residents also discussed the prevalence of mold and lead, both of which pose major habitability issues.

Further, the City's Building Bureau's Code Enforcement division summarizes inspections for blight, housing, and zoning-related issues. During Fiscal Year 2020 – 2021, there were 5,575 blight and building maintenance complaints in Oakland. While the City has not carried out a census of substandard housing, based on known substandard housing issues from the Building Bureau's documented housing complaints, approximately 3.5 percent of the City's housing stock is likely substandard. As discussed in the Housing Action Plan Action 2.1.3, the City is moving to a proactive enforcement framework to better address issues of substandard housing – particularly as these issues disproportionately impact BIPOC communities.

Oakland's Code Enforcement estimates the number of units in need of major rehabilitation and replacement based on an assessment of the number of units being assigned red-tag ~~(~~status or declared unsafe ~~declaration)~~ for structural reasons or other hazards generated by fire or other incidents such as

vehicle impact. These numbers will change with issuance of permits to demolish or to repair. Based on estimates from 2021 and 2022, the number is estimated at 10 buildings (or approximately 50 units) per year, since the real estate market is relatively active with short supply of housing. ~~A slower market tends to leave more units in need of rehabilitation and replacement.~~Additionally, around 2,600 units are estimated to be in need of moderate to substantial rehabilitation or repair. These units are in structures that show major damage such as missing siding, holes in the roof or a roof that is listing, a tilted or cracked foundation, or missing windows or doors.

Table B-34: Oakland Substandard Housing Issues, 2019

Building Amenity	*Owner*	*Renter*
Incomplete Kitchen Facilities	0.28%	1.91%
Incomplete Plumbing Facilities	0.20%	1.02%

B.7 Housing Costs and Affordability

Several housing market characteristics—such as high levels of cost burden or overcrowding—may indicate high housing costs and a lack of affordability within a community. This section summarizes housing costs in Oakland and assesses the extent to which housing is affordable for residents of the city.

HOUSING AFFORDABILITY BY HOUSEHOLD INCOME

Housing affordability can be estimated by comparing the cost of renting or owning a home in Oakland with the maximum affordable housing costs to households at different income levels. In evaluating affordability, the maximum affordable price or cost refers to the maximum amount that could be afforded by households in the upper range of their respective income category. Households in the lower end of each category can afford less in comparison. The maximum affordable home and rental prices for residents of Oakland by different income households and unit size (bedrooms) are shown in Table B-~~35~~37. HCD has estimated the 2021 Alameda County AMI for a family of four to be $125,600, which is about a 34.3 percent increase from the 2014 AMI estimate of $93,500.

Table B-~~35~~37: Oakland Housing Affordability by Income Group, 2021

		Affordable Monthly Payment[2]		*Utilities[3]*		*Housing Costs*	*Maximum Affordable Price*

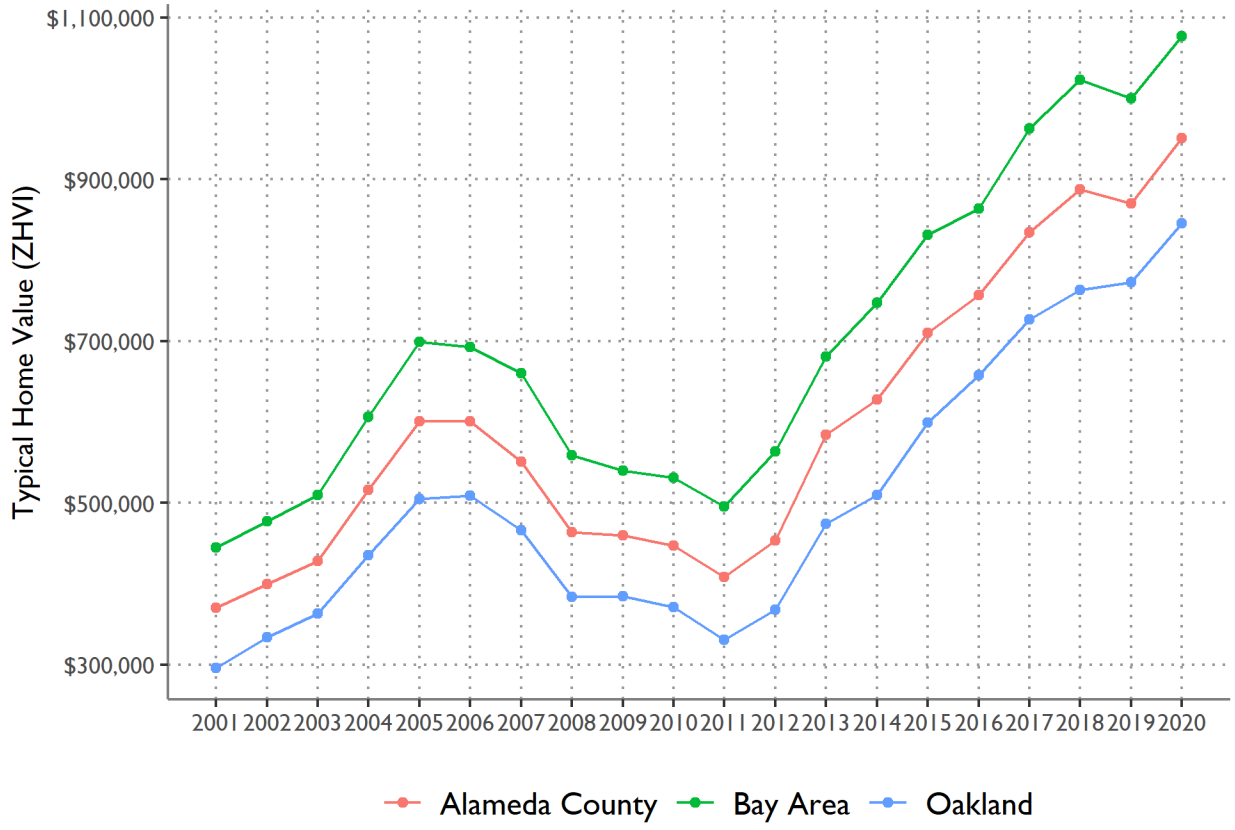
1 Person (Studio)	$105,500	$2,638	$3,077	$180	$180	$1,077	$2,458	$480,363
2 Person (1 Bedroom)	$120,550	$3,014	$3,516	$196	$196	$1,231	$2,818	$551,262
3 Person (2 Bedroom)	$135,650	$3,391	$3,956	$221	$221	$1,385	$3,170	$620,105
4 Person (3 Bedroom)	$150,700	$3,768	$4,395	$254	$254	$1,538	$3,513	$686,848
5 Person (4 Bedroom)	$162,750	$4,069	$4,747	$309	$309	$1,661	$3,760	$732,813

1. AMI limits based on 2021 HCD State Income Limits for Alameda County, other assumptions are derived from Zillow estimates (as of October 4, 2021) and the National Association of Realtors. The 2021 Alameda County AMI is $125,600.

2. Affordable monthly payment for renters and owners is assumed to be one-twelfth of 30% of median income applicable for the number of bedrooms. The exception is moderate-income owners, whose affordable payment is assumed to be is one-twelfth of 35% of median income applicable for the number of bedrooms as specified by HCD, pursuant to HSC 50052.5(b)(4).

3 Utilities are estimated according to the 2021 Alameda County Housing Authority Utility Allowance Schedule. Estimates are based on the combined average cost of gas and electric heating, cooking and water heating, as well as other electric, water, trash collection, sewer, air conditioning, refrigeration and range/microwave across all unit types [i.e., elevator/high-rise/apartment/walk-up (multi-family), detached house/single family dwelling, mobile/manufactured home, row house/townhouse & semi-detached/duplex]. Costs are assumed equivalent for owners and renters.

4. Taxes and insurance are assumed to be 35% of monthly affordable housing costs for owners.



5. Assumed 30-year amortization, 2.82% interest rate, 6.0% down payment and closing costs equal to 2% of the sale price.

Source: HCD State Income Limits, 2021; Alameda Housing Authority Utility Allowance Schedule, 2021; Zillow Mortgage Rates, October 2021; National Association of Realtors Research Group, Downpayment Expectations & Hurdles to Homeownership, April 2020; Dyett & Bhatia, 2021

OWNERSHIP COSTS

Like many cities in the Bay Area, housing costs in Oakland have continued to rise over the last two decades. Home values are tracked using the Zillow Home Value Index (ZHVI) as compiled by ABAG-MTC, which is a smoothed, seasonally adjusted measure of the typical value for homes in the 35th to 65th percentile range. The regional ZHVI estimate is a household-weighted average of county-level ZHVI files, where household counts are yearly estimates from DOF's E-5 series. As demonstrated in Chart B-12, home values did decline as steeply in Oakland as they did in Alameda County and the Bay Area following the 2008 financial collapse. Home values in 2014 surpassed the previous high of just over $500,000 in 2005, and have risen continually since, to reach over $800,000 in 2020. These are, however, lower than that for the county as well as the Bay Area region.

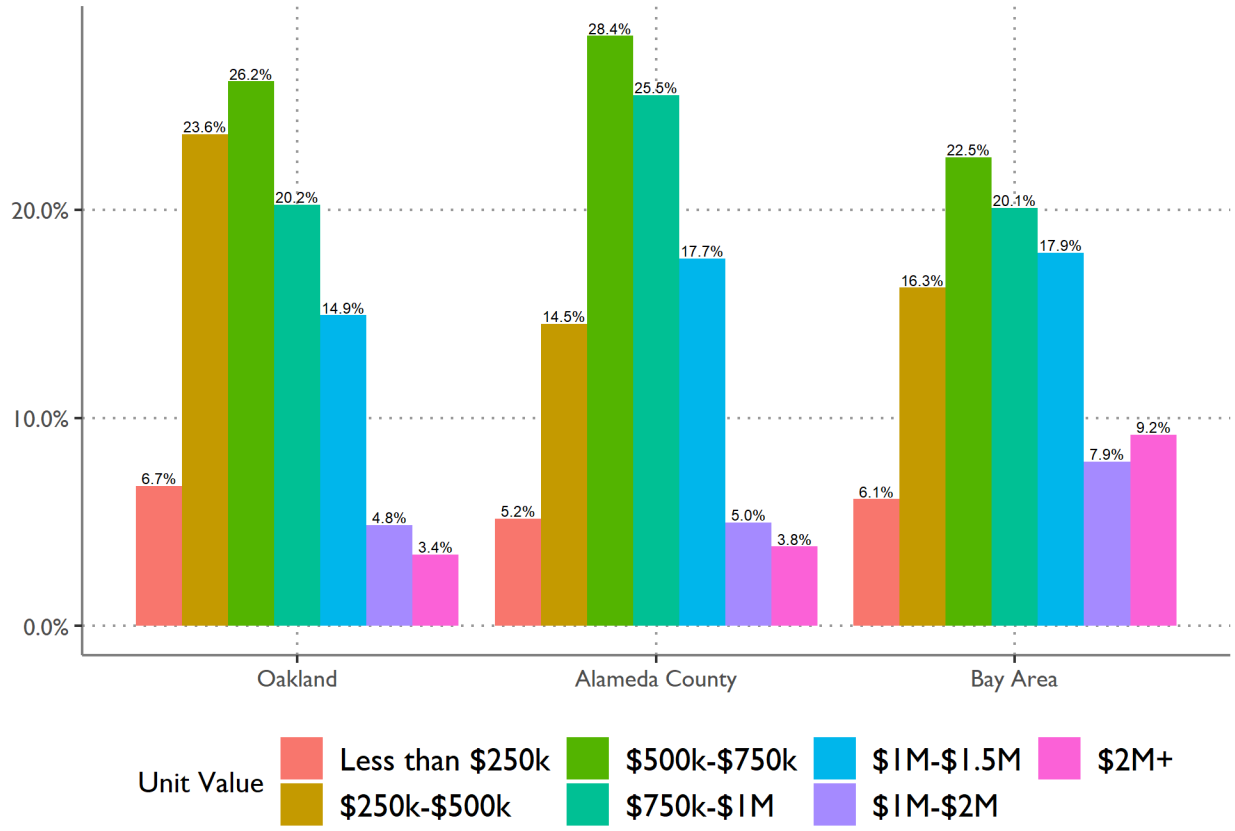


Chart B-12: Zillow Home Value Index (ZHVI) by Region, 2001 – ~~2021~~2020

Source: ABAG-MTC Housing Needs Data Workbook (Zillow, ZHVI December 31, 2001 – December 31, 2020)

In addition to the ZHVI, the ABAG-MTC data worksheet provides estimates of home values for owner-occupied units based on the 2019 ACS. Shown in Chart B-13, this data confirms the disparity in home value across region as indicated by the ZHVI. While the ZHVI estimates the typical household is valued over $800,000, the ACS indicates that the majority of units (about 56.5 percent) are actually valued below $750,000. There is a similar distribution of home values in the county, while the Bay Area has more even distributions by unit value. Alameda County does skew towards lower unit values while the Bay Area tends to skew towards higher unit values. The ZHVI is better aligned with these regional estimates. Given that housing costs have only risen since the 2019 ACS, the 2020 ZHVI is used to estimate housing value in Oakland, although it should be noted that this may slightly overestimate housing cost.

Chart B-13: Owner-Occupied Unit Values by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25075)

The ZHVI tracks a variety of types of owner-occupied housing units, including both single-family homes and condominiums. Table B-~~36~~38 provides a breakdown of the ZHVI by housing type and size between 2010 and 2020. In total, housing value has increased by about 127.20 percent between 2010 and 2020. Two-bedroom units in particular have seen a relatively high increase in value by about 146.30 percent during the period. As of 2020, the highest value housing type in Oakland is a five-plus bedroom housing unit at $1,563,444.

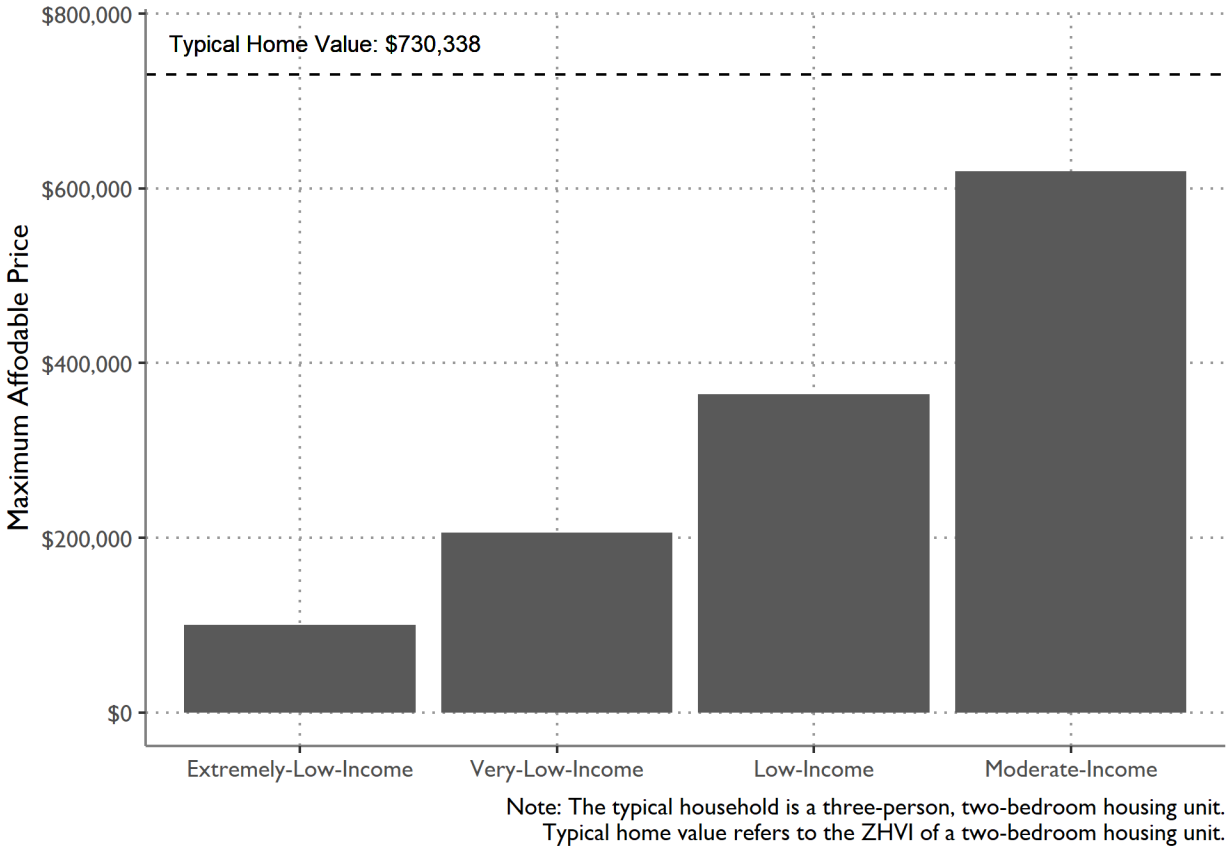

Table B-~~36~~38: Oakland Zillow Home Value Index (ZHVI), 2010 - 2020

Housing Type	*December 2010 ZHVI*	*December 2020 ZHVI*	*Percent Change (2010 – 2020)*
Single-Family	393,624	903,784	**129.60%**
Condo	303,492	663,528	**118.60%**
1 Bedroom	238,093	573,501	**140.90%**
2 Bedroom	296,481	730,338	**146.30%**
3 Bedroom	436,005	966,329	**121.60%**
4 Bedroom	619,683	1,325,654	**113.90%**
5+ Bedrooms	638,487	1,563,444	**144.90%**
Total	**373,381**	**848,356**	**127.20%**

Source: Zillow Home Value Index, December 31, 2010 and December 31, 2020

Given the ZHVI estimates provided in Table B-36 and housing affordability levels from Table B-35 it is apparent that no lower-income household can afford a home at an appropriate size. Some larger households may be able to afford units that have fewer bedrooms, which would lead to overcrowding. For instance, a three-person moderate-income household would be able to afford a $620,105 unit, which would be sufficient to purchase only a one-bedroom unit per the ZHVI. This demonstrates an affordability gap for lower-income households in the city, as such households generally would not be able to afford to buy a home without significant subsidy. Increased housing production for a range of housing types would also help to increase affordability, but this analysis shows that housing in a market like that of the Bay Area is only generally affordable to moderate- or higher-income households. Chart B-14 visualizes the affordability gap for the typical household, which is defined as a three-person household living in a two-bedroom housing unit.

Chart B-14: Ownership Affordability Gap for the Typical Household, 2021

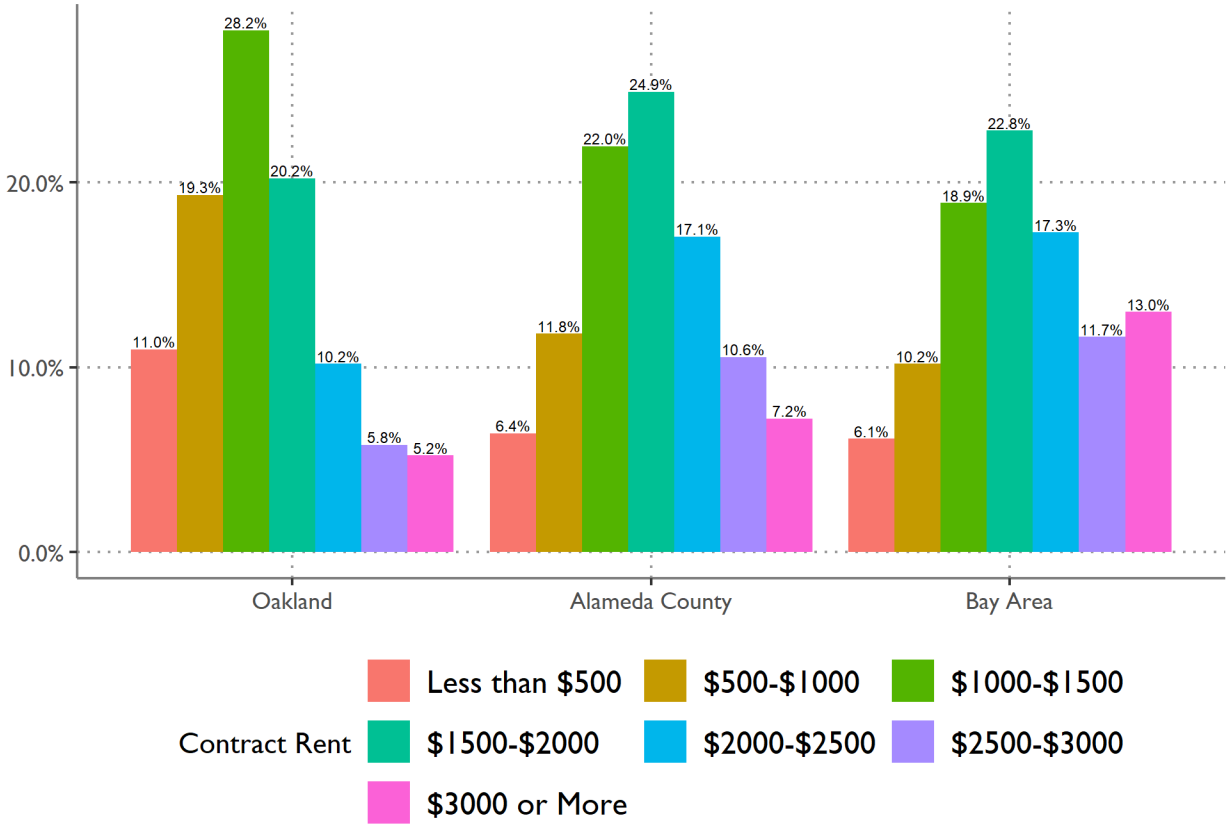
Source: Zillow Home Value Index, December 31, 2020; Dyett & Bhatia, 2021

RENTER COSTS

In 2019, according to ACS estimates provided by ABAG-MTC, the median contract rent in Oakland was $1,345. According to the Census, contract rent is the monthly rent agreed upon regardless of any furnishings, utilities or services that may be included. Data regarding contract rent excludes units for which no cash rent is paid. Table B-~~37~~39 illustrates that rent in Oakland is significantly lower than in the county and in the Bay Area during the same year. Rents in Oakland experiences increases between the 2009 and 2015 period, increasing by about 16.5 percent. This is lower from the county and Bay Area, which saw median contract rent increases by 19.4 percent and 20.4 percent, respectively. However, between 2015 and

2019 rent costs spiked in Oakland—increasing by about 26.4 percent—while the county and Bay Area saw even more dramatic increases, 30.9 percent, and 28.4 percent respectively.

Table B-~~37~~39: Median Contract Rent[1] by Region, 2009 – 2019



Jurisdiction	*2009 Median Contract Rent*	*2015 Median Contract Rent*	*2019 Median Contract Rent*
Oakland	$913	$1,064	$1,345
Alameda County	$1,083	$1,293	$1,692
Bay Area	$1,196	$1,440	$1,849

1. County and regional counts are weighted averages of jurisdiction median using rental unit counts from the relevant year.

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data releases, starting with 2005-2009 through 2015-2019, B25058, B25056 (for unincorporated areas))

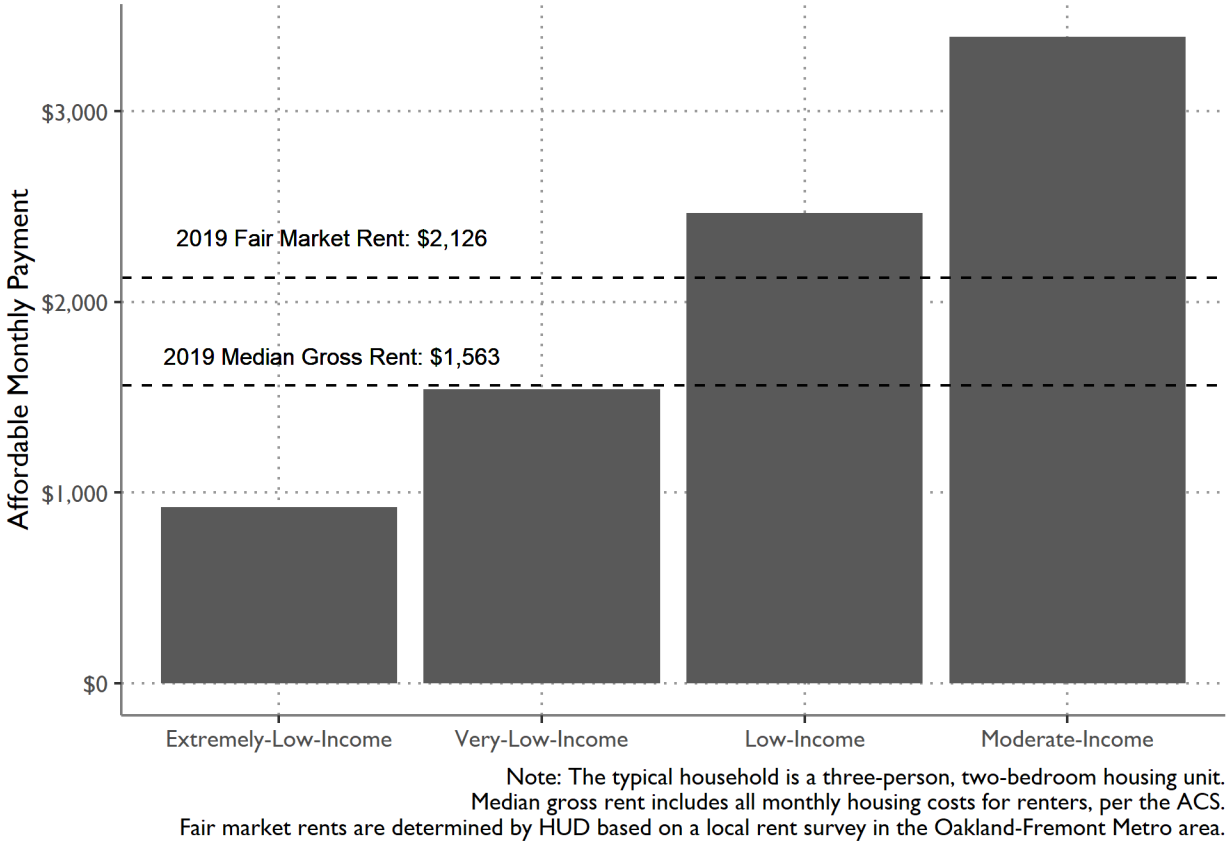
The distribution of contract rent by region is also provided in the ABAG-MTC data workbook. As demonstrated in Chart B-15, most (58.5 percent) renter-occupied units in Oakland have contract rents below $1,500. This differs from the county, where 40.2 percent of units have contract rents below $1,500, and the Bay Area, where 35.2 percent of units are below that threshold. Further, 17.8 percent of the county rental stock and 24.7 percent of the Bay Area rental stock have contract rents above $2,500 while only 11 percent of Oakland's rental stock exceeds that amount. Thus, rents have risen at slower pace in the city than in the surrounding region, and Oakland remains a relatively affordable option for renters when compared to the county or Bay Area.

Chart B-15: Contract Rents for Renter-Occupied Units by Region, 2019

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25056)

As rents have risen in the city, it has become increasingly more difficult for lower-income households to afford units in a suitably sized housing unit. Table B-~~38~~40 provides estimated median monthly gross rents in Oakland by number of bedrooms. Unlike contract rent which is the monthly rent agreed upon regardless of any furnishings, utilities, or services that may be included; gross rent includes additional costs for utilities and fuels.

Table B-~~38~~40: Oakland Monthly Gross Rental Rates, 2019



Number of Bedrooms	*2019 Median Monthly Gross Rent*
0	$979
1	$1,328
2	$1,563
3	$1,796
4	$2,095
5 or more	$2,270

Source: American Community Survey 5-Year Data (2015-2019)

According to ACS gross rental estimates (i.e., including utilities and other costs) from Table B-38 above and monthly affordable payments presented in Table B-35, extremely-low-income and very-low-income households in Oakland would not be able to afford to rent an appropriately sized unit. However, larger

extremely-low-income households could afford to a rent a unit with fewer bedrooms – for instance, a four-person household could afford to rent a studio. A very-low-income three-person household could afford to rent a one-bedroom unit. This mismatch may be one of the causes behind the city's relatively high rate of overcrowding. All other income levels, including low-income households, would be able to afford to rent an appropriately sized unit. Chart B-16 demonstrates this affordability gap for the typical extremely-low-income and very-low-income household, which may require subsidies to ensure housing affordability.

Chart B-16: Rental Affordability Gap for the Typical Household, 2019

Note: The typical household is a three-person, two-bedroom housing unit.
Median gross rent includes all monthly housing costs for renters, per the ACS.
Fair market rents are determined by HUD based on a local rent survey in the Oakland-Fremont Metro area.

Source: American Community Survey 5-Year Data (2015-2019); HUD, Fair Market Rent, 2019

B.8 Assisted Housing at Risk of Conversion

State Housing Element law requires that communities identify the status of assisted low-income rental units that are "at risk" of conversion to market rent status within ten years of the statutory mandated update of the Housing Element (from January 2023 to January 2031 for this Housing Element). The California Housing Partnership (CHP) estimates that there are 12,979 assisted low-income units in Oakland. Table B-~~39~~41 shows that while most units in Oakland are at low risk of conversion, there are 216 units at moderate risk and 42 units at high risk. The proportion of assisted units facing some level of risk is lower in the city (2.0 percent) than in the county (4.3 percent) the Bay Area region as a whole (5.1 percent). While California Housing Partnership's Preservation Database is the State's most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing, this database does not include all deed-restricted affordable units in the state. Consequently, there may be at-risk assisted units in a jurisdiction that are not captured in this data table.

Table B-~~39~~41: Summary of Assisted Units at Risk of Conversion, 2022

	Oakland[2]		*Alameda County*		*Bay Area*	
Risk Level[1]	*Number*	*Percent*	*Number*	*Percent*	*Number*	*Percent*
Low	12,721	98.0%	26,150	95.7%	127,484	94.9%
Moderate	216	1.7%	757	2.8%	3,175	2.4%
High	42	0.3%	334	1.2%	2,720	2.0%
Very High	0	0.0%	91	0.3%	919	0.7%

1. California Housing Partnership uses the following categories for assisted housing developments in its database:
   - Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.
   - Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
   - High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
   - Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.
2. Risk levels in Oakland have been modified from CHP's findings to reflect local knowledge – including that the Hotel Oakland is not at risk of conversion to market rate.

Source: City of Oakland, 2022; California Housing Partnership Preservation Database, February 2022

Per HCD guidance, local jurisdictions must also list the specific affordable housing developments at risk of converting to market rate uses to supplement the aggregate numbers provided in Table B-39. The assisted housing inventory is available in Table B-~~40~~42 below.

1. According to the Oakland Housing Authority, this property is not at risk of conversion to market rate housing.

Source: City of Oakland, 2022; California Housing Partnership Preservation Database, February 2022

COST ANALYSIS

State law requires the analysis of at-risk housing to identify "the total cost of producing new rental housing that is comparable in size and rent levels, to replace the units that could change from low-income use, and an estimated cost of preserving the assisted housing developments."[6] The typical development cost of affordable housing projects in Oakland is about $553,121 per unit, based on average projected development costs per unit provided in recent California Tax Credit Allocation Committee (TCAC) project tax credit applications; see Table B-~~41.~~43. Please note that the table below features a mix of rehabilitation and new construction projects, with new construction projects representing higher costs per unit. The most recent project costs are more indicative of the escalated construction costs that projects are experiencing, with each year adding approximately 5% to construction costs. If the 258 units identified as facing some level of risk converted to market rate housing during the 10-year period were to be replaced, the total replacement cost would be ~~about~~at least $142,705,218, but likely must more with escalation.

Table B-~~41~~43: Affordable Housing Development Costs in Oakland, 2017-2020

Source: California Tax Credit Allocation Committee, Project Staff Reports 2017-2020

The cost of ~~preservation for the typical~~conversion from market rate to affordable housing ~~project~~ can be estimated by finding the difference between fair market rent and affordable rent, but typically requires additional resources to support acquisition, deferred maintenance, and rehabilitation, as well as service connection and other important operational costs. As shown in Table B-35, the affordable monthly rental payment for an extremely-low-income, four-person household and a very-low-income, four-person household in Oakland is $1,028 and $1,713 respectively. In fiscal year 2021, the HUD Fair Market Rent (FMR), or gross rent estimate, in the Oakland-Fremont, CA HUD Metro FMR area for a three-bedroom unit was $3,196. The difference between these two prices is the "affordability gap," which is about $2,168 and $1,483 for the two income levels in Oakland. Given the affordability gap for extremely-low-income households, the total cost of preserving all 258 at-risk units (assuming they are all extremely-low-income units) would be approximately $559,344 per month or $6,712,128 per year. This translates to a cost of $67,121,280 over the 10-year period, or $260,160 per unit. Thus, preservation costs in Oakland are significantly lower than replacement costs but opportunities for such projects are restricted by what the market offers, and does not produce new residential units.

RESOURCES FOR PRESERVATION

~~There are two~~The primary resources available for preserving at-risk units ~~– public agencies, nonprofit housing corporations, and tenant groups; and~~come from public financing ~~or subsidy programs~~agencies. Preservation is implemented by mission-driven entities that committed to affordabilit restrictions. California HCD maintains a current list of all "qualified entities" across the state, which are nonprofit or for-profit organizations or individuals that agree to maintain the long-term affordability of affordable housing developments. Table B-~~42~~44 provides the list of all qualified entities for Alameda County. The City would work with a subset of these organizations that are active in Oakland to preserve the housing units in danger of conversion, with focus on preserving the City's existing portfolio, as well as and expanding preservation opportunities by acquiring and converting market rate properties to affordable housing. Additional housing resources, including funding sources, that the City utilizes are discussed further in Appendix E.

Table B-~~42~~44: Qualified Entities in Alameda County

Qualified Entity	*City*	*Contact*
Housing Authority of City of Alameda	Alameda	(510) 747-4300

This appendix presents the inventory of sites suitable for residential development in Oakland to meet the 2023-2031 Regional Housing Needs Allocation (RHNA), as determined by the State Department of Housing and Community Development (State HCD), and summarized in Chapter 3. The sites inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA; and
- Opportunity sites where additional development could occur.

The following sections explore the capacity of these two major groups, as well as the various subgroups contained within each. The complete Housing Sites Inventory (Inventory) is included at the end of this appendix (see Table C-~~25~~26), as well as a map of sites identified in the Inventory (see Figure C-1).

The RHNA is a critical component of State housing law that mandates all California cities and counties plan for the housing needs of its residents. Under the RHNA mandate, State HCD, in collaboration with the Association of Bay Area Governments (ABAG), first determines the total number of new homes the nine-county Bay Area needs, and how affordable those homes need to be, in order to meet the housing needs of people at all income levels. For the planning period running from January 31, 2023, to January 31, 2031, State HCD determined that the Bay Area region must plan for 441,176 new housing units. After receiving this regional determination, ABAG was responsible for developing a RHNA Methodology for distributing a share of the region's housing need to each city and county in the region. The RHNA Methodology must meet five objectives specified in State law, which include promoting infill development and socioeconomic equity, promoting improved intraregional jobs-housing relationships, and affirmatively further fair housing. The RHNA Methodology also must be consistent with the forecasted development pattern from Plan Bay Area 2050.

In accordance with Government Code Section 65584, the final RHNA plan was adopted by ABAG's Executive Board on December 16, 2021 and was approved by State HCD on January 27, 2022.[1] The RHNA plan distributes regional housing need across jurisdictions by the following income categories:

- Very-low-income - less than 50 percent of the county median income.
- Low-income - between 51 and 80 percent of the county median income.
- Moderate-income - between 81 and 120 percent of the county median income.
- Above-moderate-income - greater than 120 percent of the county median income.

[1] More information on the Bay Area RHNA process is available on ABAG's website: https://abag.ca.gov/our-work/housing/rhna-regional-housing-needs-allocation. The Final RHNA Plan is available at the following link: https://abag.ca.gov/sites/default/files/documents/2021-12/Final_RHNA_Allocation_Report_2023-2031-approved_0.pdf

The 2023-2031, or 6th cycle, RHNA identifies an overall need of 26,251 new units in Oakland, a nearly 77.8 percent increase from the prior cycle's allocation of 14,765 new units. Oakland's RHNA is about 6.0 percent of the nine-county Bay Area allocation of 441,176 units. The region's total RHNA increased by nearly 135.0 percent since the previous cycle, partly due to changes in methodology that now address existing needs such as housing cost burdens, overcrowding, and vacancy. The increase in Oakland's RHNA is mostly driven by the overall regional increase, although a smaller portion is due to the 6th Cycle RHNA methodology's emphasis on proximity to jobs and higher resource areas,[2] as well as the share of future growth projected by Plan Bay Area.[3] To meet the 6th cycle RHNA, Oakland would need to produce an average of 3,281 units annually.

Table C-1 shows the income breakdown of the RHNA. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need, or about 3,256 units during the planning period.

Table C-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

To meet "no net loss" requirements, an additional 15 percent buffer beyond the RHNA is assumed in each income category (see Table C-1). No net loss requirements (Government Code Section 65863) ensure that adequate sites are maintained throughout the planning period to accommodate the remaining RHNA by income category. To ensure that sufficient capacity exists throughout the planning period, State HCD recommends that jurisdictions create a buffer of at least 15 percent

[2] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

[3] The Final Plan Bay Area 2050, adopted by MTC-ABAG on October 21, 2021, is the region's official long-range plan. More information on Plan Bay Area 2050 is available at the following link: https://www.planbayarea.org/finalplan2050

more capacity than required or project site capacity at less than the maximum density to allow for some reductions in density at a project level. The City is employing a combination buffer and reduced capacity strategy to remain compliant with no net loss provisions.

C.1 Sites Inventory Overview

Oakland's 2023-2031 Housing Sites Inventory identifies sufficiently zoned land to accommodate the RHNA at all income levels. Total capacity is derived from both site-specific approaches—including pipeline projects and opportunity sites—as well as non-site-specific projections of accessory dwelling units (ADUs), discussed further below. In addition to providing adequate capacity to meet the RHNA, a buffer of at least 15.0 percent was identified in each income category to ensure that the City can meet the no net loss requirement pursuant to State law. See Table C-2 below for a summary of Oakland's residential capacity and ability to accommodate the 2023-2031 RHNA. The complete 2023-2031 Inventory is provided in Table C-~~25~~26 at the end of the appendix and in Figure C-1 below.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will also occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Sites included in the inventory reflect those that are most likely to develop during the planning period; as the development potential of sites newly made available by one of these rezoning efforts is difficult to project, these new sites are not considered as part of this inventory.

Table C-2: Summary of Residential Capacity to Accommodate the 2023-2031 RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income[1]*	*Moderate-Income*	*Above-Moderate-Income*	***Total***
Total Credits	1,~~985~~978	~~1,936~~2,191	~~760~~776	~~9,718~~10,176	~~**14,399**~~**15,121**

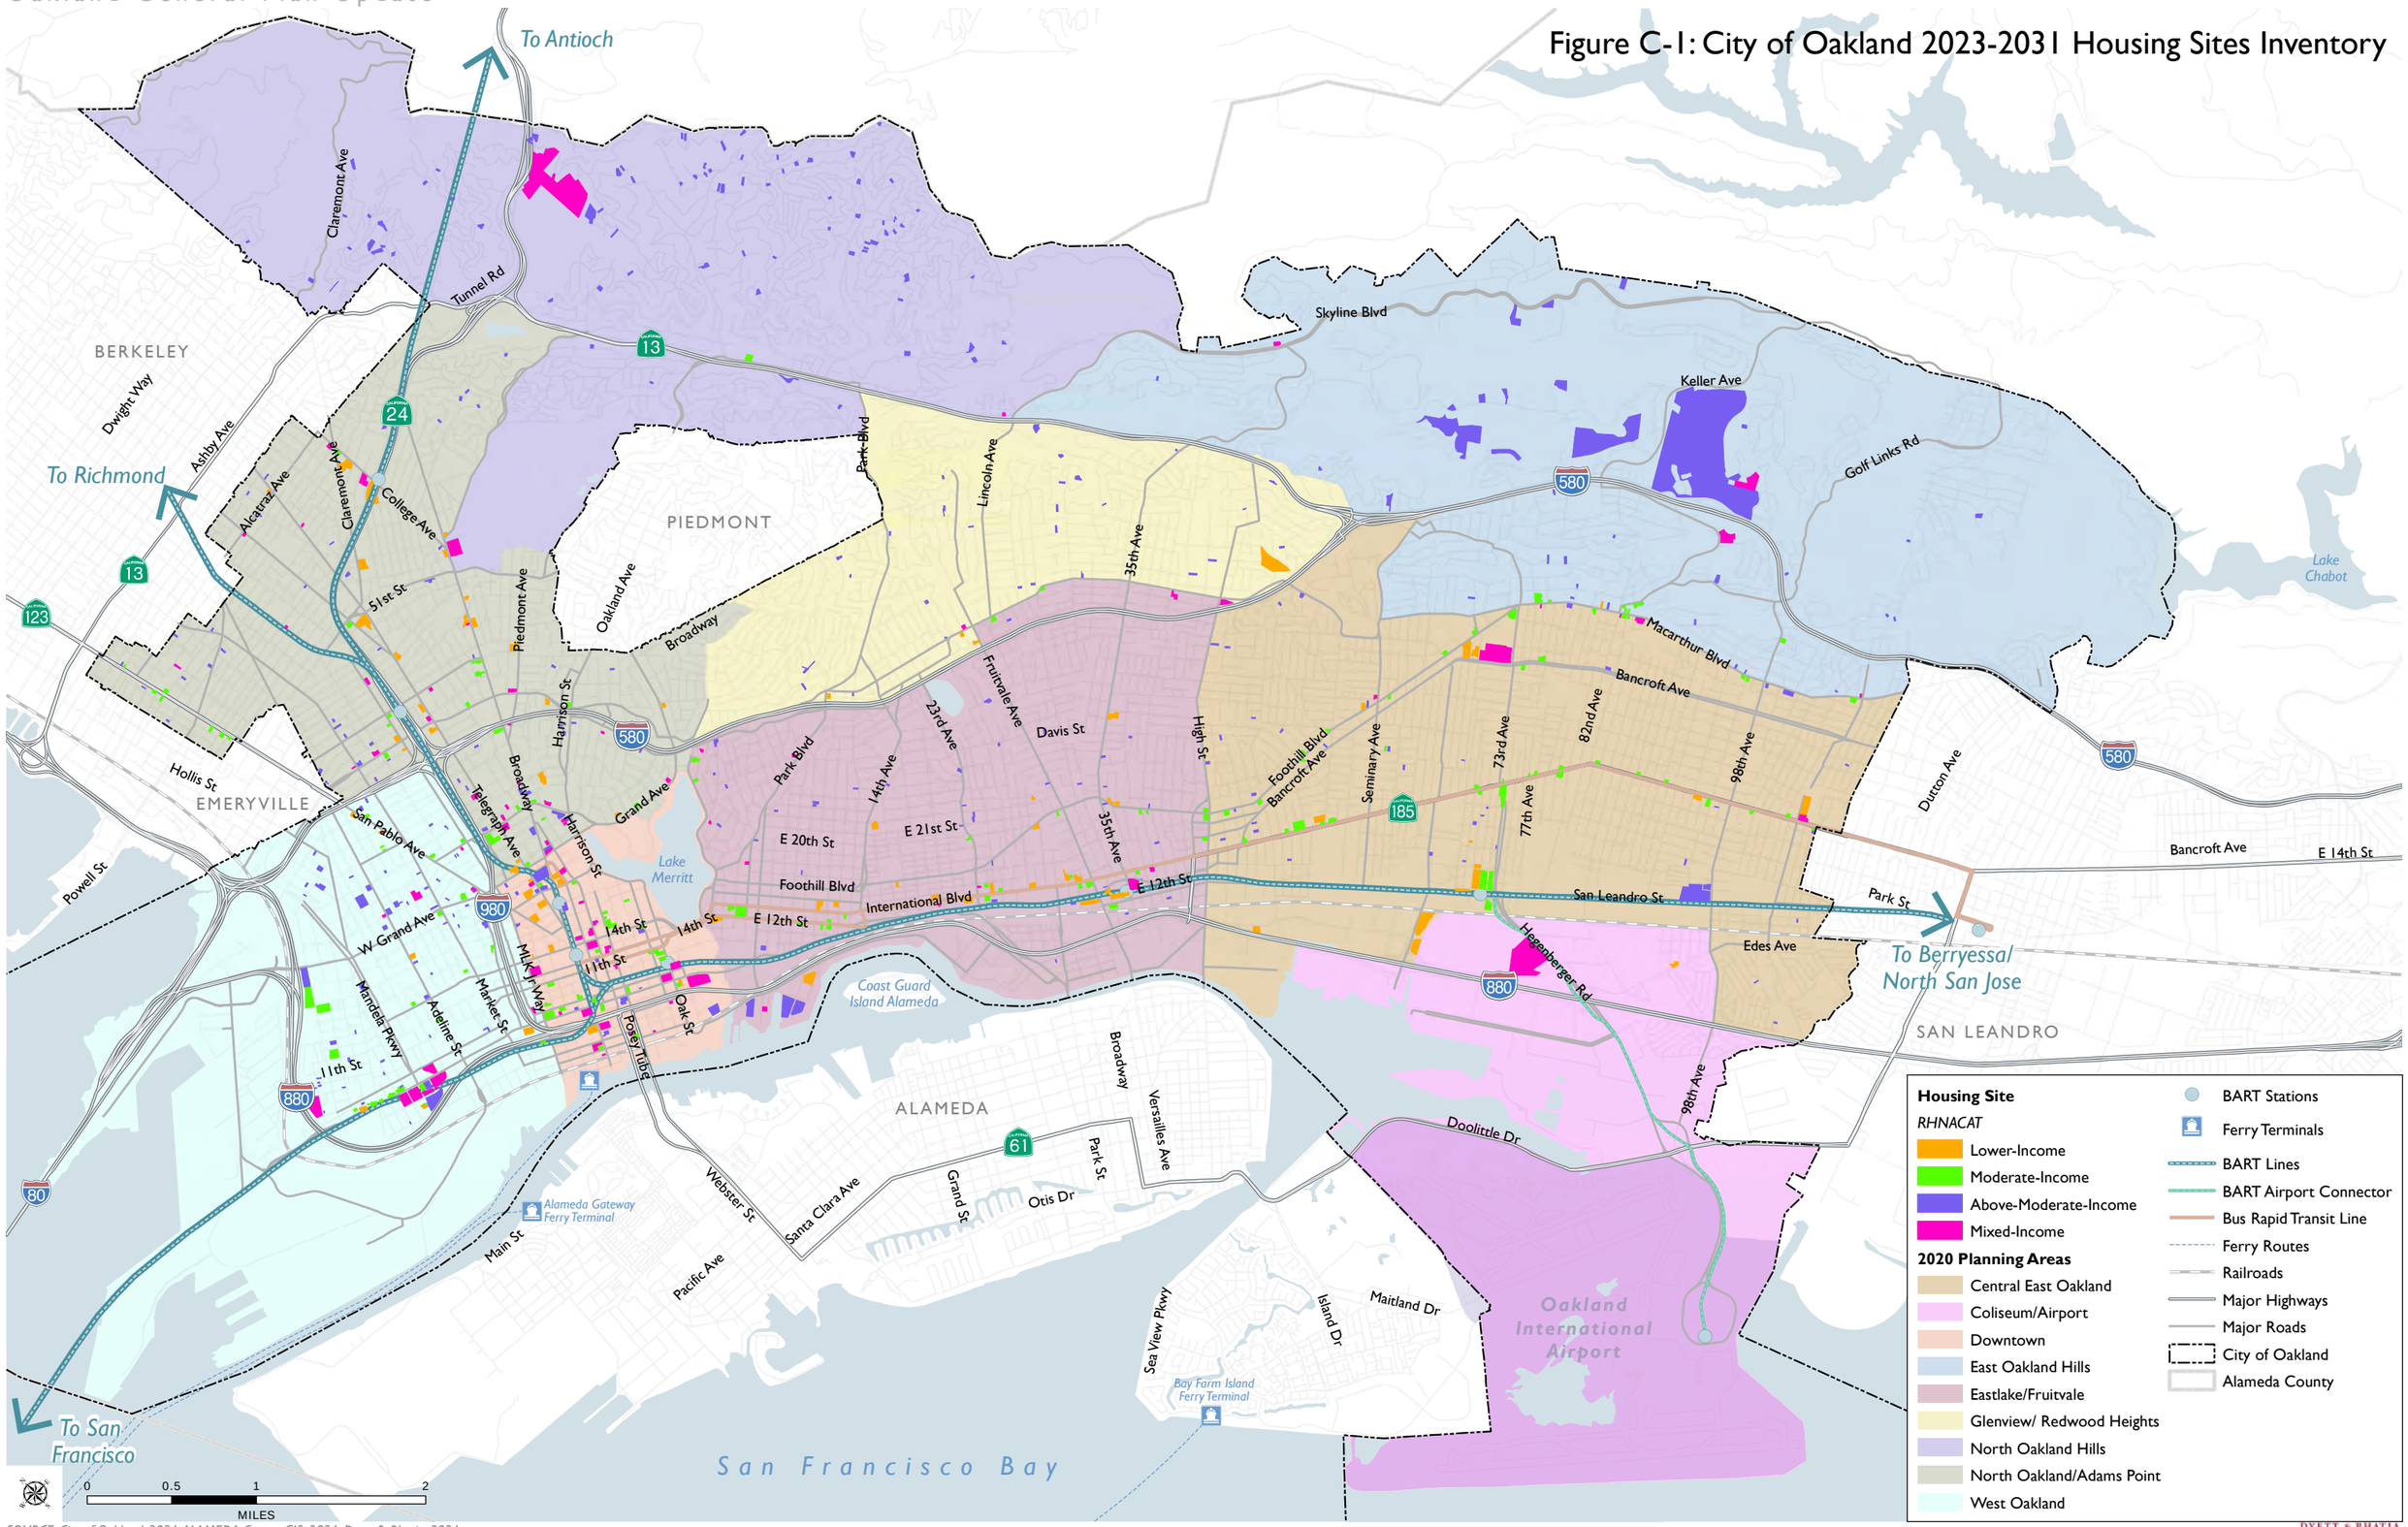
Total Capacity		~~**11,862**~~**12,127**	**5,~~746~~764**	**18,~~666~~737**	**36,~~274~~628**
6th Cycle RHNA		**10,261**	**4,457**	**11,533**	**26,251**
RHNA + 15% Buffer		***11,801***	***5,126***	***13,263***	***30,189***
Surplus Over RHNA		**1,~~601~~866**	**1,~~289~~307**	**7,~~133~~204**	**10,~~023~~377**
		~~**(115.6%)**~~**118.2%**	~~**(128.9%)**~~**129.3%**	~~**(161.8%)**~~**162.5%**	~~**(138.2%)**~~**139.5%**



1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).

2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 units.

3. Potential development project totals are reduced by 10% to account for likelihood of pre-application or early-phase planning permits that may not move forward.

Figure C-1: City of Oakland 2023-2031 Housing Sites Inventory

SOURCE: City of Oakland, 2021; ALAMEDA County GIS, 2021; Dyett & Bhatia, 2021

DYETT & BHATIA
Urban and Regional Planners

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, it should be noted that increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan (Chapter 4). This includes investments in new affordable housing projects, which can help reduce displacement pressures in those neighborhoods and allow long-time residents to remain in their communities. As discussed in Chapter ~~3~~2, community feedback regularly expressed the opinion that existing Oakland residents may want to remain in their current neighborhoods and may not want to relocate to higher-resource areas that may not provide resources available in ethnic enclaves such as culturally specific grocery stores, churches, and other neighborhood amenities. Therefore, efforts to increase access to exclusive neighborhoods should also be paired with investing in and preserving the culture in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). Efforts taken to ensure that the Inventory remains compliant with the City's AFFH mandate are described further in Section C.4 below.

C.2 Credit Towards RHNA

Before identifying the availability of land to accommodate the city's 6thth Cycle RHNA, State HCD Guidance provides that the RHNA can be accommodated by looking at both projects that are currently in the development pipeline and by considering alternative means of meeting the RHNA.

Projects that have been approved, permitted, or receive a Certificate of Occupancy during the projection period (June 30, 2022 to December 15, 2030) can be credited toward the 6th cycle RHNA. It should be noted that the projection period differs from the planning period – while the planning period is the time between housing element due dates, the projection period is the time period for which the regional housing need is calculated.

According to State HCD, in order to credit units that are affordable to very-low-, low-, and moderate-income households toward the RHNA, a jurisdiction must demonstrate the units are affordable based on at least one of the following:

- Actual sales prices;
- Actual rents; or
- Subsidies, financing, or other mechanisms that ensure affordability (e.g., the development used funding from the state Multifamily Housing Program, federal HOME program, or low-income housing tax credits).

Pursuant to Government Code Section 65583.1, a variety of alternative methods may also be used to satisfy the RHNA. This includes projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households. This

section discusses the capacity of each method to credit residential development towards the RHNA, summarized in Table C-3 below.

Table C-3: Credit Towards the 2023-2031 RHNA

	Very-Low-Income	*Low-Income*	*Moderate-Income*	*Above-Moderate-Income*	***Total (units)***
6th Cycle RHNA	*6,511*	*3,750*	*4,457*	*11,533*	***26,251***

Source: ABAG, Final RHNA Plan, December 2021; City of Oakland, 2022

PIPELINE PROJECTS

Pipeline projects are those projects that have already received an approved planning permit~~;~~ that have not yet applied for a building permit~~,~~; are currently seeking a building permit~~,~~; or have already received an approved building permit~~;~~ and will likely be completed during the projection period. Where there are pipeline projects located on Inventory sites, actual proposed densities and affordability levels are reflected. Unit affordability levels within a project are proposed by the developer and then reviewed by both the Planning and Building Department and Oakland HCD to assess whether the unit mix conforms with State law and local regulations, as related to density bonus projects. Other projects that have applied for planning approval, submitted a pre-application, or are otherwise under review are discussed as opportunity sites below.

Pipeline projects are spread across the city, with the majority of new capacity in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. See Figure C-2 for the location and affordability of these pipeline projects. The affordability of pipeline units was determined based on the affordability levels or projected rents specified on the project proposal as approved by the City. Approximately ~~21.5~~20.9 percent of pipeline capacity is affordable for lower-income households, while ~~1~~5.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. Table C-~~4~~5a below provides information on each pipeline project that have received entitlements but have not yet applied for a building permit, Table C-~~5~~5b provides information on pipeline projects that have received entitlements and are actively seeking a building permit or have been issued a permit, and Table C-6 provides a summary of the residential capacity of one- and two-unit pipeline projects. The full list of one- and two-unit pipeline projects is available in the full Inventory in Table C-~~25~~26.

The status of pipeline projects is pulled directly from the City's Accela permitting system. "Approved" and "Approved-Pending Appeal" have received entitlement and approval from City Council. Projects designated "Approved-Pending Appeal" should be considered approved, as Oakland's appeal period is only ten days after issuance – this designation is maintained to retain ~~consistent with the City's records.~~ consistency with the City's records. While there are various planning approval statuses, as shown in Table C-4, this sites inventory only includes projects that

are Approved and Approved-Pending Appeal for maximum likelihood of development. For building permits, all projects are considered highly likely to be completed within the planning period, especially as expired permits can be reinstated up to three years after issuance. A survey of projects approved in 2015 shows that 98.6 percent of these projects were built in eight years. Thus, realistic capacity for pipeline projects is taken directly from provided from building permit applications. Other pre-application and early-stage projects with planning permits are described in 'Potential Development Projects.'

Expected completion dates are estimates provided by Planning staff based on typical project timelines. ; all pipeline projects are estimated to be available within the Housing Element planning period (completed by 2031). Pipeline projects with lower income units (including extremely-low, very-low, low-, and moderate-income units) have either been entitled as a density bonus project, which requires lower-income unit affordability as part of development approval and construction concurrently with market rate units; or have deed restriction agreements either in progress or in place. Housing Action Plan 3.3.19 establishes a coordination system to coordinate tracking units with Development Services staff to ensure that as projects are developed, there is adequate capacity available citywide to meet RHNA targets and no net loss requirements.

Table C-4: Planning and Building Permit Descriptions

Type of Permit	*Permit Status*	*Description*
Planning Permit	Approved	Planning entitlement was approved by Planning Commission and/or City Council.
	Approved - Pending Appeal	Project was approved by Planning Commission and/or City Council. The City's appeal period is only 10-days following issuance of planning approval. Projects with this status that are over 10 days past the approval status date should be considered approved. This status is maintained to retain consistency with the City's record keeping.
	Assigned	Project application was submitted and assigned to a Planner for review.
	Complete	Project or application is complete and moving forward for review by Planning Commission and/or City Council.
	Extended	Project application received planning approval from Planning Commission or zoning entitlements, but permit expired and applicant requested an extension.
	Filed	Project application was submitted to the City by applicant and fees are paid.
	Incomplete	Project was assigned to a Planner, but application lacked sufficient information to process or partial fees were paid and application status was changed from "Under Review" to "Incomplete."
	Under Review	Planner is reviewing the project application.
Building Permit	Permit Reinstated, Reinstated	After building permits are issued, the permit will become inactive if no inspection activity initiated by the applicant occurs for 180 days and the permit will expire after 730 days of inactivity as per California Building Code. Permits may become inactive or expire due to factors such as construction delays, labor or supply shortages, and/or the scale of the project itself. Once the applicant pays a fee to the City, the City will reinstate an active building permit.
	Permit Issued, Issued	The permit is approved and active. The applicant can begin construction and schedule inspection anytime they are ready.
	Permit Expired	The building permit is expired. Building permits expire if no inspection activity initiated by the applicant occurs for 730 days, as per California Building Code. Issued permits may be reinstated for up to 3 years in increments of 6 months to 1 year. Requests after 3 years require further review due to code changes, impact fees, etc.
	Application Inactive	The building permit application is considered inactive after 180 days of no activity from the applicant, due to issues such as insufficient documentation, payment of fees, etc. Permit applications may be reinstated for up to 3 years in increments of 6 months to 1 year. Requests after 3 years require further review due to code changes, impact fees, etc.
	On Hold - Fee Due	The issuance of the permit is on hold, requiring applicant action to address payment of fees. Once fees are paid and the applicant meets all the documentation requirements, the building permit will be issued.
	Permit on Hold	The issuance of the permit is on hold requiring applicant action to address issues such as insufficient documentation, payment of fees, or missing required submittals from applicant including regulatory agreements, Construction Management Plans, recycling requirement, etc.
	Plan Review in Progress	The application has been referred to Building Bureau Engineers for review. This is one of the required reviews that occurs during the standard building permit application review process, prior to approving the application and issuing the building permit.
	Final Check - On Hold	The last step prior to building permit issuance is Final Check by the City and it is on hold due to incomplete status for one or more of the following: verification of stamped plans, required standard reviews by City, fees paid, required submittals from applicant, etc.

1. **Please see Table C-4 for Planning Permit Status Description**
2. **"Density Bonus" indicates the project is entitled to include lower and moderate-income units, and a regulatory agreement is pending. Density Bonus Projects must provide the agreed-upon number of lower and moderate-income units and are required to maintain those units' affordability as part of development approval and must construct the units concurrently with market rate units. "Density Bonus Regulatory Agreement Recorded" indicates there is an agreement on record.**

Urban and Regional Planners

PROJECTED ~~ADUS~~ACCESSORY DWELLING UNITS

Since 2017, the State has continued to pass and implement laws that have removed obstacles to the construction of Accessory Dwelling Units (ADUs) and increased their development potential. Like other California cities, Oakland has continued to amend its Planning Code to remain compliant with new ADU development regulations. The City has seen continued interest in ADU development and has continued to approve building permits for ADU development.

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet the RHNA. To determine the potential of ADU development during the 6th cycle, the City has analyzed building permit approval patterns since 2018. Table C-7 below shows ADU permits issued from 2018 to 2021, during which an average of approximately 247 permits were issued annually. Over the course of the upcoming eight-year planning period, the City anticipates the development of ADUs at least at the same pace as recent approvals, or 1,978 total ADUs (about 247 average permits per year times eight years). This is a conservative estimate, which is likely impacted by the drop in ADU approvals during the onset of the COVID-19 pandemic—as evidenced by the drop off between 2019 and 2020—and does not account for potential increased development capacity as restrictive regulations continue to be eased.

Table C-7: Annual ADU Approvals, 2018-2021

Year	*ADU Building Permits Issued*
2018	252
2019	289
2020	174
2021	274
Total Units Permitted	**989**
Annual Average	**247.25**
Projected ADU Development (2023-2031)	**1,978**

Source: State HCD, Annual Progress Reports, 2018-2021

As an alternative housing model, ADUs can often be a potential source of affordable housing. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[4] According to the survey, all ADUs are considered affordable to moderate- or lower-income households. Although the survey had limited responses to the question regarding monthly rent, it provides useful local information on ADU affordability in Oakland and is used to estimate the breakdown of projection affordability. To ensure that affordability projects are realistic, the affordability breakdown is further modified based on regional technical assistance provided by ABAG. Table C-8 below summarizes the estimated proportion of ADUs affordable to each income level and the projected number of ADUs by affordability during the planning period. Housing Action Plan actions also seek to implement new ADU standards that streamline approvals to address unpermitted units (Action 3.4.9), provide financial incentives for lower-income

[4] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

homeowners to legalize ADUs (Action 3.2.4); reduce constraints to development of ADUs (Action 3.2.5); and monitor affordability of permitted ADUs (Action 3.2.6).

Table C-8: Projected ADU Capacity by Affordability Level, 2023-2031

ADEQUATE SITES ALTERNATIVE

According to State HCD, under limited circumstances a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[5] These limited circumstances include sites that are:

- Substantially rehabilitated;
- Located on a foreclosed property or in a multifamily rental or ownership housing complex of three or more units that are converted from non-affordable to affordable rental;
- Units in a motel, hotel, or hostel that are converted from nonresidential to residential and made available for people experiencing homelessness as part of a long-term recovery response to COVID-19;
- Preserved at levels affordable to low- or very-low-income households, where the local government has provided those units with committed assistance; ~~and~~or
- Preservation of mobile home park through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the 2023-2031 planning period. Table C-9a below presents ~~these~~ projects in which the City has committed assistance through a legally enforceable agreement such that the projects can be used to meet the RHNA. As indicated in the footnotes, the City will provide committed assistance for the duration of the RHNA period, and funds are indicated in the "Funding Sources" column. Both properties represent

[5] Further specific conditions that sites included under this option must meet are provided by State HCD on their website: https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/adequate-sites-alternative.shtml

conversions of hotels to permanent housing for Oaklanders experiencing homelessness, largely funded by Project Homekey grants. The affordability of these projects reflects the actual affordability levels pursuant to the regulatory agreements that will maintain such income-restricted units. ~~Table C-9b includes information demonstrating these projects meet requirements for adequate sites.~~

The City anticipates that additional units will be created through the 2023-2031 planning period through further opportunities for preservation and rehabilitation Notices of Funding Availability, Acquisition and Conversion to Affordable Housing (ACAH) Program Notices of Funding Availability, and future Project Homekey grants. However, only projects that already have committed assistance at the time of this Housing Element's adoption can be utilized under the Adequate Sites Alternative requirements.

				Total	**80**	**0**	**0**	**2**
				Percent of RHNA	**1.2%**	**0.0%**	**0.0%**	**0.02%**

1. Per FY2023 MTW Annual Plan, OHA plans to fund a local capitalized operating agreement for a 15-year term for project Homekey funding recipients. Project opening dates are projected to be November 2022.
2. Project sponsors BACS and Memar Properties, Inc. are under contract to purchase the property by March 31, 2022.
3. Above-moderate-income units include manager's units.

C.3 Availability of Land to Address the Remaining RHNA

Oakland has very few vacant or "greenfield" sites available for additional housing. Further, development is constrained by environmental conditions—including wildfire risk in the hills and hazards in and near industrial lands—as discussed in Appendix F. However, the City has a long track record of encouraging infill and high density projects, and there are many opportunities for these types of projects across Oakland. This section provides an overview of the Inventory's residential capacity beyond the RHNA credits described above, as well as a discussion of the methodology behind realistic capacity assumptions and opportunity site selection. Table C-10 below summarizes the residential capacity available on opportunity sites. The complete 2023-2031 Inventory is provided in Table C-~~25~~26 at the end of the appendix and in Figure C-1 above.

Table C-10: Summary of Opportunity Site Residential Capacity

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).

2. Remaining housing need is the difference between the RHNA and the units credited towards the RHNA through pipeline projects, ADU projections, and adequate alternative sites.

3. Capacity shortfall/surplus is the difference between the remaining housing need and the total residential capacity of opportunity sites.

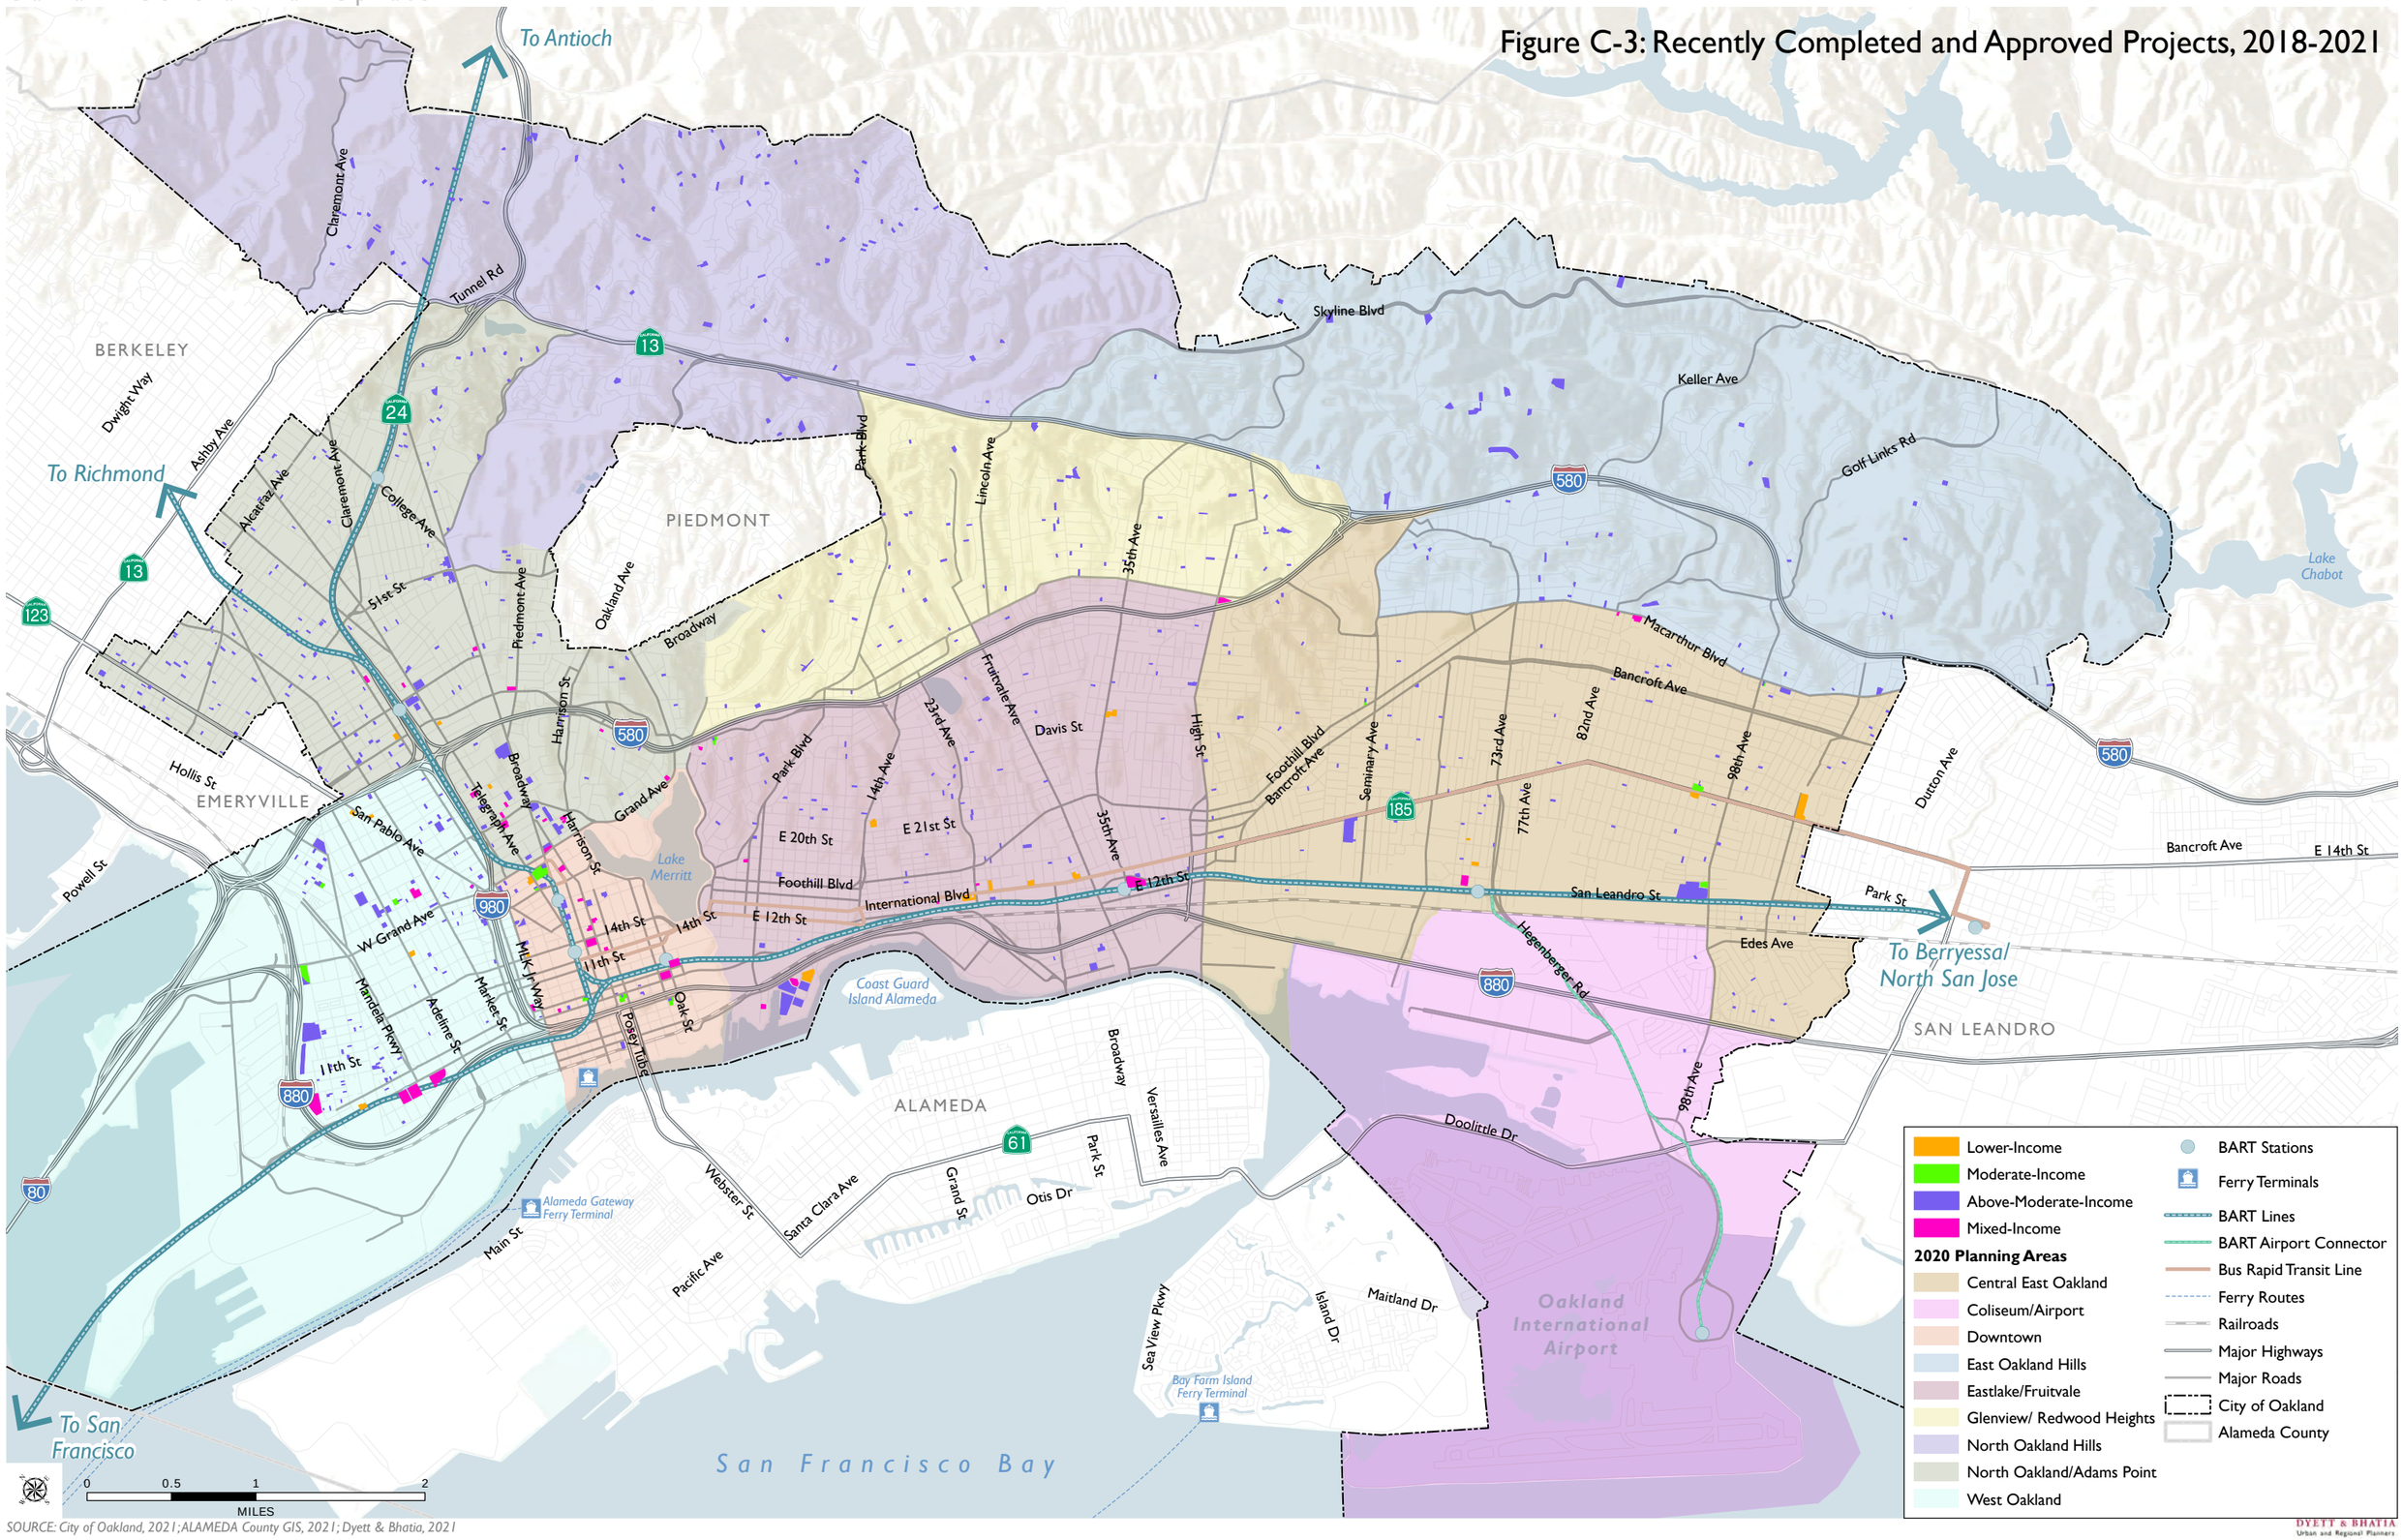
SITE DEVELOPMENT CAPACITY

Government Code Section 65583.2(c) requires, as part of the analysis of available sites, a local government to demonstrate the projected residential development capacity of the sites identified in the housing element can realistically be achieved. In order to calculate realistic capacity in Oakland, a survey of recently constructed and approved projects from 2018 through 2021 was conducted to understand current and ongoing residential development patterns. Completed projects were derived from 2018-2020 Annual Progress Reports (APRs) and Accela records pulled in March 2022 for completed and entitled projects in 2021. This includes some pipeline projects.

The amount of density provided in each project was compared to the maximum density as allowed by the applicable zoning designation, and then stated as a percentage of meeting the maximum allowable density. Densities are calculated as dwelling units per acre (du/ac). Each project is assigned to its appropriate Planning Area, which is derived from the Oakland Department of Transportation (OakDOT) Geographic Equity Toolbox. The locations of projects included in the survey are shown in Figure C-3 below.

Table C-~~11~~11a below summarizes the results of this survey and provides realistic capacity estimates for opportunity sites included in the Inventory. Pipeline development projects provide a snapshot of larger projects developed and approved from 2018-2021, and a full table of all projects included in the survey (including completed projects) is shown in Exhibit 1 of this appendix. Realistic capacity is based on the average percentage of maximum permitted density met by developments within Planning Areas by base zone and height area. If a height area of a particular base zone has no recent development history, the average percent of maximum density met for the entire base zone within that Planning Area is assumed. If there is no development history for a base zone within a Planning Area, the average percent of maximum density met of related or similar base zones within the Planning Area is assumed. Finally, if there is no comparable development history within the Planning Area, citywide averages for the base zone and height area are assumed. If development history shows that projects typically exceed the maximum permitted density, then realistic capacity is capped at that maximum density.



Realistic capacities provided in Table C-~~11~~11a are applied to sites that do not otherwise include active development applications. These sites are also subject to *additional* capacity modifiers, as shown in Table C-13.

The presence of a development application is the strongest indicator that a site will be developed with housing during the planning period. Development projects listed in as "potential projects", at a minimum, have submitted for a formal entitlement application or for pre-application review (a Preliminary Review Procedure (PRP) application or an SB 330 preliminary application). Where a site has an ongoing pre-application or planning permit application, ~~requested densities and affordability for the project are used. Further,~~or where ~~additional capacity information is available for a site, such as~~ there is expressed developer interest or preliminary discussions, ~~these assumptions are used to~~ a modifier of 0.9 is applied to densities and affordability for the to approximate realistic capacity.

As described in Appendix F: Constraints, Oakland permits housing in almost all zones, with the exception of some industrial zones. Within some commercial zones, such as CN-1, CN-2, CN-3,

CC-1, CC-2, CC-3, and some D-BV zones, 100 percent residential projects may be limited to maintain ground floor commercial in commercial districts. Despite this conditioning, several projects in commercial zones have developed from 2018 to 2021, and realistic capacity assumptions reflect the densities of completed and approved projects in each Oakland neighborhood. Of all pipeline development sites, approximately 25 percent of all project units are within these commercial zones, with many projects far exceeding the maximum capacity, as shown in Table C-11. In addition, future development on parcels within the Housing Sites Overlay Zone will be required to include a majority residential use,and will not allow a 100% non-residential use in this overlay.

1. Same density regulations as abutting RH, RD, or RM Zone. When there is more than one of these abutting zones, then the regulations of the zone allowing the greatest density shall apply.

2. Density is limited to one unit per lot for parcels less than 4,000 sq. ft. in base zones RM-2 through RM-4. If a parcel in the RM-2 and RM-3 Zones is larger than 4,000 sq. ft., then two units per lot are permitted ~~in base zones RM-2 and RM-3~~ by right, while 17.42 du/ac is permitted in RM-2 with a Conditional Use Permit (CUP) and 29.04 du/ac is permitted in RM-3 with a CUP. If a parcel in the RM-4 Zone is larger than 4,000 sq. ft., up to four units are permitted by right, while 39.6 du/ac is permitted in RM-4 with a CUP. In the case of base zones RM-2, RM-3, and RM-4 below 4,000 sq. ft. assume the site will develop at the maximum allowed unit per lot if the average percent of density met is above 50 percent – otherwise assume development is not feasible. In the case of base zone RM-4 above 4,000 sq. ft., apply the percentage of density met to the permitted 39.6 du/ac.

Non-Residential to Residential Conversion

Oakland permits residential development on a number of commercial and other non-residential base zones. The City has a substantial track record of encouraging and facilitating the conversion of non-residential uses to residential or mixed uses. See Table C-~~12~~12a for a summary of parcels that converted from existing non-residential uses during the 5th cycle planning period, based on use changes between historic 2014-2015 and 2021 Alameda County Assessor parcel data.[6] The locations of these conversions are provided in Figure C-4. Based on residential unit counts provided in the 2021 Assessor data, there are about 8,487 residential units located on converted parcels. These parcels are not included in the Inventory but are rather provided to demonstrate that additional conversions from non-residential to residential uses are likely during the planning period. ~~Add note about pipeline %. Approximately x units in the pipeline (table x) are on sites that result from conversion to nonresidential to residential units.~~

6. Assessors data does not provide information on what affordability level these uses were converted to.

Table C-~~12~~12a: Summary of Non-Residential to Residential Conversion, 2014-2021

Conversion Type	*Number of Converted Parcels*	*Number of Residential Units*
Commercial to Residential	481	6,649
Commercial to Residential Mixed-Use	16	720
Industrial to Residential	87	766
Industrial to Residential Mixed-Use	1	24
Institutional to Residential	28	328

Mixed-Use and Infill Development

The City has a significant track record of encouraging mixed-use and infill development. According to APRs submitted to State HCD, all new development in Oakland since 2018 is considered infill development. As noted in Table C-12, which provides a list of completed and approved[7] projects from 2018 to 2021, about 744 units developed on parcels that converted from solely non-residential uses to mixed residential uses.

A sample of projects that converted from an existing commercial or industrial use to a residential use are shown below in table C-16a.

[7] Includes one pre-application project

DYETT & BHATIA
Urban and Regional Planners

Development Capacity Modifiers

As noted previously, Oakland's RHNA has increased by nearly 77.8 percent between the 5th and 6th RHNA cycles. However, the City fell short of meeting its lower- and moderate-income housing need during the planning cycle, and many sites included in the 5th cycle housing inventory did not develop with housing. An analysis from the UCLA Lewis Center confirmed that Oakland was on track to develop no more than about 21.0 percent of the sites identified during the 5th RHNA cycle as opportunity sites.[8] However, on those sites that were developed, the number of units developed was three times higher than anticipated as the realistic capacity. Further, a significant amount of residential development—nearly 73.0 percent of all residential development in Oakland—occurred on sites that were *not* identified as opportunity sites. These data reflect the challenges in predicting where development will occur but also show that Oakland's development standards generally allow for higher density development than anticipated.

Nonetheless, the City of Oakland has and continues to undertake a robust effort to identify those sites, with the assistance of community input, that provide the best opportunity for development for the upcoming 6th RHNA Cycle. Further, to meet this increased housing need and increase capacity citywide, the City is committing to a number of actions meant to streamline the development process and incentivize affordable housing development. This includes the implementation of objective design standards, increased permitted densities in historically lower density and higher resource areas, revisions to restrictive development standards, and other zoning reforms expected to increase density overall – as described in the Housing Action Plan. Despite these efforts, the development capacity of opportunity sites should be discounted to account for falling short of previous RHNA goals.

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop, as discussed above. While Table C-11 accounts for land use controls and typical densities of residential projects, it is likely that not every site selected in the Inventory will develop with housing during the planning period and that some housing projects will occur on sites not considered in the Inventory. To account for this fact, additional development capacity modifiers are applied to all opportunity sites to discount total residential capacity. This means that other opportunity sites are subject to both realistic capacity modifiers (Table C-11) as well as development capacity modifiers (Table C-13). Development capacity modifiers are derived from the existing use of a site, as well as its assessed value (AV) ratio and floor area ratio (FAR). When a site has a low AV ratio or FAR, it indicates that the site is underutilized and has potential to redevelop – especially in Oakland, where demand for housing is extremely high. Sites with pre-applications Table C-13 below summarizes the percentage modifiers applied to opportunity sites. ~~These modifiers are not applied to sites with ongoing pre-application or planning permit applications, or have other indications of capacity, as these sites have a very high likelihood of development during the planning period.~~

[8] Kapur et al., "What Gets Built on Sites that Cities 'Make Available' for Housing." *UCLA Lewis Center for Regional Policy Studies*. August 2021. Available at https://www.lewis.ucla.edu/research/what-gets-built-on-sites-that-cities-make-available-for-housing/.

Table C-13: Development Capacity Modifiers

Existing Use/Site Type	*AV Ratio*	*FAR*	*Capacity Modifier*
Pre-Application/Early-Stage Planning Application[1]			90%
Vacant	-	-	90%
Non-Vacant	Low (<0.5)	Low (<0.5)	80%
	Low (<0.5)	Medium to High (>0.5)	60%
	Medium (Between 0.5 and 1.0)	Low to High (>0.0)	40%

1. This modifier is applied to "Potential Project" totals in Table C-1, as the capacity likelihood would not be site-specific

Source: Dyett & Bhatia, 2022

OPPORTUNITY SITE SELECTION

To identify adequate sites and determine realistic capacity for the 2023-2031 Inventory, a parcel-based analysis of properties within City limits was conducted using Alameda County Assessor data supplemented with information from the City. This analysis was carried out in accordance with the framework provided by the 2020 State HCD Housing Element Site Inventory Guidebook. This section outlines how sites were selected, as well as the assumed affordability level of those sites.

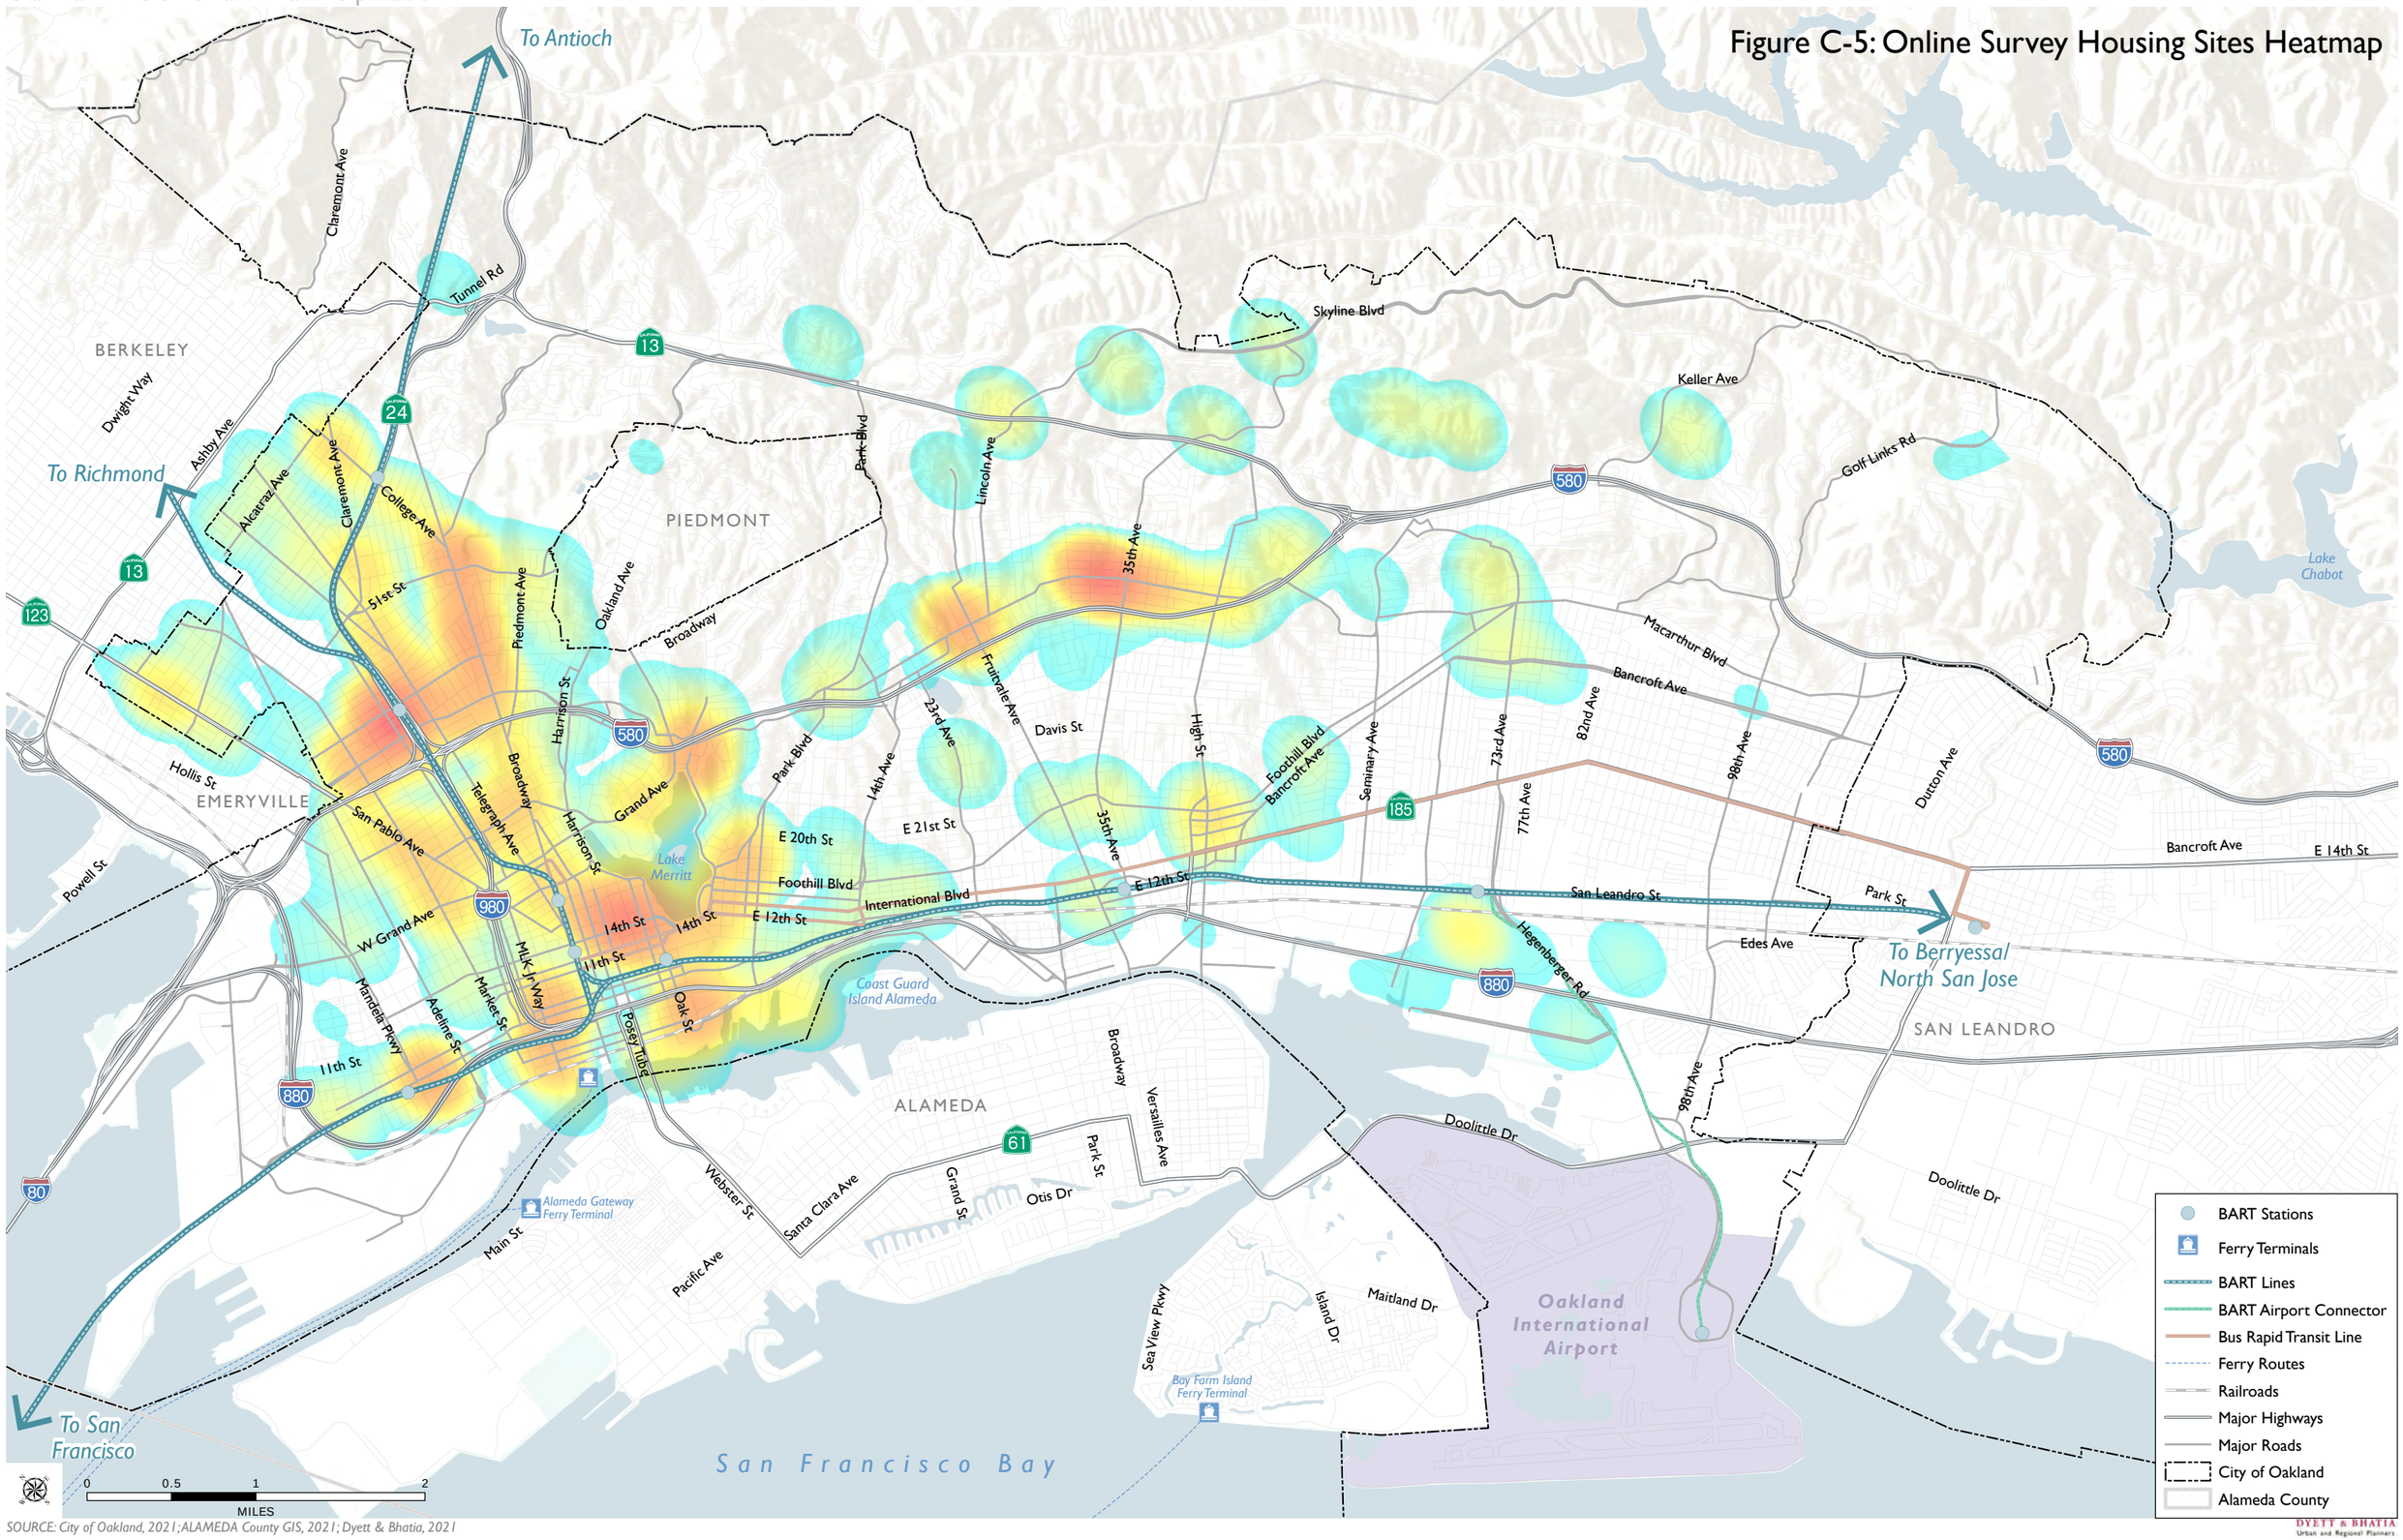
Non-residential pipeline projects, completed projects, and those under construction but likely to be completed prior to the start of the projection period are excluded from consideration, as these sites are unlikely to develop with additional housing over the next eight years. Sites that are very small and not viable for lot consolidation (i.e., less than 0.1 acres with no common ownership across adjacent parcels) are also excluded.

The remaining vacant and non-vacant sites were then considered as potential sites to include in the Inventory. Non-vacant opportunity sites include those with an existing use that is likely to discontinue during the planning period, those with expressed developer interest, and those generally underutilized or developed with low intensity, such as underperforming strip commercial uses, warehouses, sites with mixed-use potential, and sites located in specific plans that encourage higher density development.

Sites are primarily considered underutilized based on their AV ratio and FAR. A low AV ratio, which is typically anything below 1.0, means that the land is worth substantially more than the improvements built on top of it – indicating that there is a strong incentive for the property owner to redevelop with new uses than can command higher rents or sales prices. Similarly, a low FAR indicates that building area of the structure is small compared to the entire site, which indicates potential for redevelopment at higher intensities. When available, building age was also considered in evaluating underutilized sites. Further, the existing uses and location of sites in relationship to current development patterns were also considered.

Environmental constraints were also considered in site selection. Sites located in the Alquist-Priolo fault zone, 100-year flood hazard areas mapped by Federal Emergency Management Agency (FEMA), and Very High Fire Hazard Severity Zones (VHFHSZ) were excluded from inclusion in the Inventory. Contaminated sites and those with known hazards were excluded for lower-income projects. However, environmentally constrained sites were not excluded if they contain planned projects with environmental mitigation provisions already factored into development costs or if a developer has shown interest in development. Further, environmentally constrained City- or publicly-owned sites that have been deemed feasible for residential development are also included. There are no other known environmental constraints that could substantially impact housing development on identified sites during the planning period.

Opportunity sites were also selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected as to reduce segregation and increase affordable development in high resource neighborhoods, where possible. Sites located in Priority Development Areas (PDAs) and near transit were also prioritized for lower-income housing. A full analysis of the sites inventory as it relates to fair housing is provided in Section C.4 and Appendix D.



Housing Site Selection Engagement

Extensive community outreach was conducted in identifying sites appropriate to include in the Inventory. The initial pool of sites was provided by City staff and supplemented with suggestions made by Oakland City Councilmembers, community members, and housing organizations. These sites included both vacant sites and non-vacant sites with additional development capacity.

During the four Housing Element workshops, which were open to the public, Oakland residents provided suggestions for housing sites throughout the city. The first housing workshop was focused on sites and was accompanied by an online interactive mapping survey where residents could select specific sites for housing. The survey was open from February 11, 2022, through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland. Feedback from the first focus group meeting—which had an emphasis on housing sites—was also incorporated. Sites selected as part of the survey are noted in Table C-25 below.

Respondents to the online interactive mapping tool and survey wrote enthusiastically about a variety of areas located around Oakland appropriate for housing through 1,275 individual survey comments. Areas included surface parking lots, underutilized sites near transit, and areas with high resources that would be appropriate for housing. In selecting specific locations, respondents most frequently selected sites near downtown, along Broadway and near the Rockridge Bay Area Rapid Transit (BART~~),~~) station, in lower Dimond, and along Macarthur Boulevard in Upper Dimond/Redwood Heights. Through 701 individual comments, respondents mentioned a variety of sites including empty/vacant lots, surface parking lots, potential sites near transit, and high resources areas. See Figure C-5 for a heat map of suggested housing sites provided via the online survey.

Figure C-5: Online Survey Housing Sites Heatmap

Housing Site Affordability

For a site to be designated as capable of accommodating development for lower-income households, Government Code Section 65583.2(c)(3) requires that such sites in urban jurisdictions allow for at least 30 du/ac, known as the "default density." In metropolitan counties, such as Alameda County, zoning that allows for residential density of at least 30 du/ac is considered appropriate to accommodate the economies of scale needed to produce affordable housing. In this Housing Element, all vacant and non-vacant sites identified to accommodate lower-income units are located in zoning designations that permit at least 30 du/ac. The only exceptions to this are pipeline projects and other potential development projects that include affordable units and are located in a lower density designation.

Sites that are permitted to develop with at least 30 du/ac but are not otherwise appropriate for lower-income housing (e.g., are located above environmental constraints, are assumed to develop below 30 du/ac, or do not meet State HCD size parameters) are used to meet the moderate-income RHNA. Other sites that permit medium densities below 30 du/ac are also considered suitable for moderate-income housing, as are larger sites in the RM-2 and RM-3 base zones since these projects are likely to develop with mixed uses that can support moderate-income housing. All other sites in the RH-1 through RH-4, RD-1, RD-2, and RM-1 base zones are considered appropriate for above-moderate-income housing, as are smaller sites in the RM-2 to RM-4 base zones.

Finally, a number of sites—including those with pre-applications indicating a mixed-income development and other potential projects—are likely to develop at a variety of income levels. Where specific information has been provided by the developer on affordability levels and total capacity, these estimates are used to approximate realistic capacity. (with a 0.9 capacity modifier, as described above). Where specific affordability levels and capacity have not been provided, the affordability breakdown is assumed to be as follows – 24.0 percent lower-income, 2.0 percent moderate-income, and 74.0 percent above-moderate-income. This breakdown is derived from the average affordability of mixed-income projects surveyed in Figure C-3. Larger opportunity sites (i.e., those larger than 10 acres) with high potential capacities are also assumed to develop as mixed-income.

As discussed further below, a mixture of incomes is also assumed on larger (i.e., greater than 10 acres) City- and publicly-owned sites to avoid an overconcentration of affordable housing. Further, many of these sites are in lower resource or high segregation and poverty neighborhoods. These larger City-owned sites are assumed to develop with a higher proportion of affordable housing (30.0 percent lower-income, 20.0 percent moderate-income, and 50.0 percent above-moderate-income) than other mixed-income sites due to the prioritization of affordable housing projects on City-owned land. Following Council direction and City priorities, City-owned land should be prioritized for uses that maximize the production of affordable housing; the disposition of such sites should follow a transparent and accountable public process that is inclusive of Oakland's many diverse communities; and projects should adhere to certain green building standards and local hire requirements. Additional prioritization efforts are outlined in the Housing Action Plan. City- and publicly-owned sites between 0.5 and 10 acres in size are assumed to accommodate 100 percent affordable housing, and City-owned parcels have either been declared "surplus" or are otherwise are planned for housing development – see Appendix E for more details.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process. This includes projects ranging from the pre-application stage to those with filed and under review planning permits. ~~Such projects are considered likely to develop, and the actual project densities and affordability provided in those applications are assumed here. In the case where a pre-application project does not specify capacity or affordability, or proposes development that exceeds the permitted density, realistic capacity assumptions as described above are applied.~~ As these projects have not yet received entitlement, they cannot be credited towards the RHNA. However, a pre-application or an application for a planning permit indicates developer interest and that a site is likely to redevelop with housing. Where a potential project is on non-vacant land, this is counted towards the reliance on non-vacant sites.

The presence of a development application is the strongest indicator that a site will be developed with housing during the planning period. Development projects listed in as "potential projects", at a minimum, have submitted for a formal entitlement application or for pre-application review (a Preliminary Review Procedure (PRP) application or an SB 330 preliminary application). As noted above, 98.6 percent of planning projects approved in 2015 developed as housing over an eight-year period. While there is no available data on how many pre-application or early-phase planning application projects receive an 'approved' status, the total inventory applies a modifier of 0.9 to densities and affordability drawn from the pre-application or planning permit application to approximate realistic capacity. This capacity modifier is applied to the "Potential Projects" total as shown in Table C-1, as it would not apply to any one site.

Distribution of unit affordability is taken from applications. In the case where a pre-application project does not specify capacity or affordability, or proposes development that exceeds the permitted density, realistic capacity assumptions as described above are applied.

These projects are derived from Accela records pulled in March 2022 and are provided in Table C-14 below. Actions in the Housing Action Plan support development of these potential sites through streamlining the permitting process (Action 3.6.1); expanding by-right approvals and implementation of entitlement reform (Action 3.6.3); continuing online permitting (Action 3.6.5); providing access to low-cost financing for development (Action 3.3.6); adjusting or waiving City fees and payment timing for affordable housing developments (Action 3.3.9); and expanding the availability of predevelopment finding and low-debt products for affordable housing development (Action 3.3.13).

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 Housing Element period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous ~~housing element~~Housing Element cycles must be zoned at residential densities of at least 30 du/ac and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households. This applies to non-vacant sites included in at least one prior cycle and vacant sites included in two or more consecutive cycles. These requirements do not apply to the moderate- and above-moderate-income RHNA.

The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous ~~housing element~~Housing Element cycles. There are six vacant parcels that were included in both the 4th and 5th ~~housing element~~Housing Element cycles (APNs 044 501400603, 044 501400500, 012 098602501, 032 208405100, 043 462000102, 023 047602101, 010 077202001, 032 208405100). One of these parcels (APN 012 098602501) is part of a pipeline project and may be carried forward. Of the remaining five parcels, ~~two~~three parcels (APNs 044 501400603, 044 501400500) are part of a single City-owned surplus site that is currently subject to a Homekey proposal at City Council direction for a 124-unit modular development. ~~An additional parcel (APN 032 208405100) is part of a different City-owned surplus site currently subject to a Homekey proposal at City Council direction for 124-unit affordable modular development.~~ The remaining two sites are located in high resource areas that permit development over 30 du/ac and will be subject to by right zoning provisions as part of this Housing Element's Housing Action Plan to allow development with at least 20 percent affordable housing~~.~~ (Action 3.4.10).

There are 27 non-vacant parcels included in at least one prior RHNA housing element cycle (APNs 001 016900100, 001 017100200, 025 073300802, 025 073300803, 008 062403700, 041 416402403, 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702, 016 142402205, 003 003900300, 002 005500200, 010 078001508, 004 007700300, 006 001702200, 006 001702100, 006 001702000, 006 001701800, 006 001701900). Twelve of these parcels are part of pipeline projects and may be carried forward (APNs 010 078001508, 004 007700300, 006 001702200, 006 001702100, 006 001702000, 006 001701800, 006 001701900, 001 016900100, 001 017100200, 025 073300802, 025 073300803, 008 062403700, 041 416402403, 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702, 016 142402205, 003 003900300, 002 005500200, 008 062403700) and an additional four parcels are included as part of active permit applications or pre-applications (APNs 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702). Two parcels (APNs 025 073300802, 025 073300803) are City-owned surplus sites with priority for affordable housing production, and an additional site (APN 041 416402403) is owned by BART. All but two of the remaining sites are located in higher resource areas. These sites are permitted to develop over 30 du/ac and will also become subject to by right zoning provisions as part of this Housing Element's Housing Action Plan.

There are also several moderate- and above-moderate-income RHNA sites included in the inventory that were included in previous ~~housing element~~Housing Element cycles. Realistic capacity and development likelihood assumptions as described above are used to estimate the capacity of available 5th cycle sites included in the 6th cycle Inventory. Table C-15 provides a summary of development capacity for available 5th cycle RHNA sites by Planning Area. Specific sites carried over from the 4th and 5th ~~housing element~~Housing Element cycles are noted in Table C-~~25~~26.

Table C-15: Development Capacity of Available 5th Cycle RHNA Sites, 2022

New Opportunity Sites

New opportunity sites not included in previous ~~housing element~~Housing Element cycles were identified to meet the remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed or potential development interest. ~~These sites, along with the rest of the Inventory, can be found in Table C-25 at the end of this appendix.~~As most of these sites have lower FAR and AV ratios, appropriate capacity modifiers as described in Table C-13 are also applied to these sites, including vacant sites

City-owned sites are deemed appropriate for lower-income housing as they are prioritized for development that maximizes the production of affordable housing and typically support the densities required.[9,10]

[9] The City-owned Barcelona Parcel (APN 048 687000200) is assumed to develop as mixed-income in line with the medium density development scenario. See: https://cao-94612.s3.amazonaws.com/documents/Barcelona-Parcel-Analysis-PPT-10-30-19-FINAL.PDF

[10] As noted previously, there are a number of market rate units assumed on City-owned land due to a mixed-income assumption on sites larger than 10 acres. This is to ensure that affordable units are not overconcentrated in any one

Similarly, BART-owned sites are permitted to develop at high densities pursuant to AB 2923, which mandates a baseline density of 75 du/ac.[11] When developed with lower-income housing, these sites are also permitted to undergo a streamlined approval process pursuant to SB 35. BART has also reviewed property sites and designated them appropriate to include in the inventory.

Oakland's major specific plan areas also provide opportunities for higher-density residential development. The West Oakland Specific Plan (WOSP), the Lake Merritt Station Area Plan (LMSAP), the Broadway Valdez District Specific Plan (BVDSP), and the Draft Downtown Oakland Specific Plan (DOSP) in particular contain a number of opportunity sites. Many of the sites in these areas are parking lots, as shown in Table C-16a. These projects are also more likely to redevelop, as they may "tier" off the specific plan environmental impact reports. All of the sites below are also subject to capacity modifiers as described in Table C-13.

Other opportunity sites include those suggested by community members and members of the Oakland City Council, those likely to redevelop during the planning period due to current use obsolescence, and sites owned by faith-based organizations that are likely to be developed in partnership with the Local Initiatives Support Coalition (LISC).[12] LISC and other faith-based organizations have submitted interest in residential development, and details of the projects are provided in Table C-16a when available. The development capacity of these new opportunity sites is summarized in Table C-~~16~~16a below.

~~Table C-16: Development Capacity of New Opportunity Sites, 2022~~

	~~Total Residential Capacity (units)[1]~~		
~~Site Type[1]~~	~~Lower-Income~~	~~Moderate-Income~~	~~Above-Moderate-Income~~
~~Vacant~~	~~1,241~~	~~227~~	~~1,832~~

~~BART-Owned~~	~~633~~	~~0~~	~~0~~
~~WOSP~~	~~31~~	~~157~~	~~0~~
~~LMSAP~~	~~54~~	~~0~~	~~0~~
~~BVSP[2]~~	~~-~~	~~-~~	~~-~~
~~DOSP~~	~~768~~	~~201~~	~~420~~
~~LISC Faith-Based Projects~~	~~252~~	~~56~~	~~19~~

project or geographic location. Further, although City Council provided direction to prioritize 100% affordable development in the December 2018 Public Lands Policy resolution, no specific City policy has yet been implemented to enforce this provision. The City will utilize public land to maximize the production of affordable housing – which may include mixed-income projects that can produce more total units than a 100% affordable project would be able to.

[11] These projects meet the default density of 30 du/ac and are prioritized for affordable housing projects, and are thus assumed to appropriate to accommodate lower-income development.

[12] Through the Alameda County Housing Development Capacity Building Program, Bay Area LISC provides targeted technical assistance, training, and tailored grant resources to support a cohort of faith-based landowners to develop affordable housing on their properties. The roster of projects currently in the program was provided by LISC during the community outreach process, and includes residential capacity and affordability levels for each project.

	Total Residential Capacity (units)[1]		
Site Type[1]	Lower Income	Moderate Income	Above Moderate Income
Potential Development Projects	1,866	211	6,525
Total Development Capacity (units)	**7,227**	**1,191**	**8,260**

1. Sites may be contained in multiple categories, therefore unit counts should not be summed. Does not include the capacity of 5th cycle RHNA sites or pipeline projects. Potential development projects are included in the totals.
2. Opportunity sites located in the BVSP were all included in the 5th cycle RHNA.

Source: City of Oakland, 2022; Dyett & Bhatia, 2022Sites owned by the City are shown in Table C-16b. Action 3.3.1 in the Housing Action Plan notes will continue to release land designated as surplus for development of affordable housing and other uses. The City will continue to release one to two surplus sites per year, noticing them via a Notice of Availability (NOA) to local Bay Area affordable housing developers, as well as to all California Housing Finance Agency (CalHFA) housing sponsors. All surplus sites are tracked on the City's website and NOAs are available on the website as well. All surplus sites disposed of pursuant to the SLA will include a minimum of 25 percent affordable units and in many cases will include up to 100 percent affordable units.

OTHER CONSIDERATIONS

In addition to realistic capacity and density provisions, there are several other considerations that should be factored into site selection and capacity. This section provides an assessment of Oakland's 2023-2031 Inventory in light of these factors.

Site Size

State HCD has established parameters for the size of lower-income sites in view of feasibility considerations. Parcels that are less than 0.5 acres in size are generally not considered suitable for lower-income housing development as they may not support the number of units necessary to be competitive and to access scarce funding resources. Parcels that are larger than 10.0 acres in size are also not considered suitable, as they made lead to an over concentration of affordable housing or make the project infeasible. These parameters do not apply to sites selected for moderate- or above-moderate-income housing. There have been a number of recent projects with lower-income units that have been permitted on parcels smaller than 0.5 acres in recent years. These projects, as reported in the City's Annual Progress Reports, are provided in Table C-17 below. Further, on November 16, 2021, the City updated its zoning regulations to authorize residential occupancy of recreational vehicles (RVs), mobile homes, and manufactured homes on private property in all areas where housing is permitted. While these housing options may not meet State HCD's parameters for site size, they provide an additional avenue through which housing for extremely-low-income and unhoused residents can be provided.

2. Residential capacity not related to non-vacant sites.

Source: State HCD, Annual Progress Reports, 2018-2021; City of Oakland, 2022

There are 81 parcels in the inventory smaller than 0.5 acres selected to accommodate lower-income units (only including those parcels not part of a pipeline project). However, 34 of these parcels are part of sites that are larger than 0.5 acres in total. An additional 27 of these parcels are considered potential projects due to either an active permit application or pre-application – these proposals explicitly include provisions for lower-income units and provide indication that a developer has interest in developing the site. An additional five sites are owned by BART and will be prioritized for affordable development, two sites are owned by faith-based organizations that have expressed interest in development, on one site there is active loan interest from Oakland HCD, and finally

one site is the location of the Piedmont Place Homekey site. There are eight remaining parcels smaller than 0.5, (APNs 013 110802401, 023 047602101, 026 083402201, 014 124000901, 010 077202001, 011 083600101, 026 083500601, 016 142402205) which are considered appropriate for lower-income housing (approximately 137 units, with sites estimates ranging from approximately 25 to 59 percent of the maximum capacity) since they are located in high or highest resource TCAC designations and are in close proximity to transit and other amenities, both of which will increase the financial feasibility of development on these sites. These sites were identified in the prior RHNA cycle; all eight of these sites are permitted to develop with at least 30 du/ac and will permit at least 20 percent of units to be affordable by right. There are 3 parcels larger than 10.0 acres that have been identified to accommodate lower-income units (not including parcels that are part of an active pipeline project). Two parcels are part of the same pre-application project (APNs 048H752400101 and 048H752300900, Record ID – ZP210085), which consists of a subdivision of 67 lots for single-family homes and one 131-unit mixed-income multifamily development. It is assumed that 24.0 percent of the 131-unit project will be suitable for lower-income households. This project includes eight parcels in total across about 39.0 acres. The second parcel (APN 042 432800116) is owned by the City and consists of an empty lot next to the Operation HomeBase Site.[13] This is a surplus lands site that is part of the Coliseum City project and subject to exclusive negotiations with the African American Sports and Entertainment Group. It is assumed to develop at a mix of income levels so as to not concentrate lower-income units. Further, there is an additional site consisting of multiple parcels (APNs 039 329900300, 039 329900202, 039 329102200, 039 329900102) which is about 10.6 acres consisting of opportunity areas in and around the Eastmont Mall, including parking lots. Since the site is large it is assumed to develop with a mix of incomes. Information about mixed-income affordability mix is found on p. C-46.

Reliance on Non-Vacant Sites

State law requires that if non-vacant sites are relied upon to accommodate more than 50 percent of the RHNA for lower-income households, then a housing element must provide findings based on substantial evidence that the existing use does not constitute an impediment to development and that it will likely be discontinued during the planning period. Per State HCD guidance, the sum of lower-income RHNA capacity on vacant sites and other alternatives not related to capacity on non-vacant sites should be used to determine this percentage. ~~Just over 50~~Over 52 percent of the lower-income RHNA capacity is met through vacant sites and other alternatives, see Table C-18.

[13] Operation HomeBase is a COVID-19 isolation trailer program located on Hegenberger Road in East Oakland. Operation HomeBase provides a safe place for high-risk people to self-isolate and maintain their safety and health.

Table C-18: Lower-Income Reliance on Non-Vacant Sites

Adjustment Factor	*Number of Lower-Income Units*
Pipeline Projects	2,~~711~~705
ADU Capacity[1]	1,~~324~~384
Adequate Sites Alternative	~~80~~82
Capacity on Vacant Sites	1,~~264~~154
Total Capacity[2]	**5,~~185~~325**
Oakland Lower Income RHNA	**10,261**
RHNA on Non-Vacant Sites	**10,261 – 5,~~185= 5,076~~578= 4,936**
Percentage of Lower-Income RHNA Accommodated on Non-Vacant Sites	**~~5,076~~4,936/10,261 = ~~49.5~~48.1%**

1. Affordable to lower-income households.
2. Residential capacity not related to non-vacant sites.

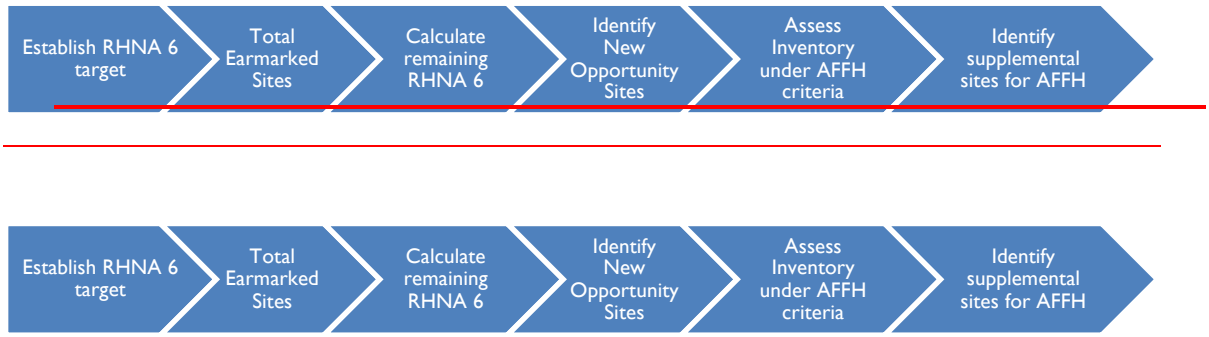
Replacement Housing Requirements

The Housing Crisis Act of 2019 mandates that new residential development must replace any demolished residential units on a one-to-one ratio. Further, new development must also replace "protected units" subject to rent or price control with comparable affordable units and provide displaced tenants with a right of return. All sites included in the inventory with existing units are likely to develop at a higher capacity than is currently available on the site, including pipeline projects. There are no known sites with lower-income or protected units that will be demolished contained in the Inventory.

C.4 Fair Housing Assessment of the Inventory

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in Environmental Justice[14] ~~communities~~Communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory against AFFH criteria and ongoing



[14] SB 1000 requires Cities to identify low-income communities that are disproportionately affected by environmental pollution and other hazards that can lead to negative health effects, exposure, or environmental degradation. While State law refers to these as "disadvantaged communities," the City of Oakland has opted to use the term "environmental justice communities," in line with recommendations from the California Environmental Justice Alliance. For more information, see: California Environmental Justice Alliance/PlaceWorks, SB 1000 Implementation Toolkit: Planning for Healthy Communities, October 2017, available for download at http://www.caleja.org/sb1000-toolkit.

environmental justice efforts, the Housing Element is an important step in achieving an equitable future in Oakland.

In the context of AFFH, the site identification requirement involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty (R/ECAPs) into areas of opportunity. To achieve these ends, the Housing Element must identify improved or exacerbated conditions and the isolation of the RHNA (i.e., geographic concentration of units by income category. Traditionally, this assessment is conducted using the opportunity areas mapped by State HCD/TCAC—as described further in Appendix D—and other AFFH factors. While these factors are important considerations – they are not the final decision factor in site selection, especially as statewide mapping efforts may not always match the lived experience of residents. For instance, as can be seen in Figure C-8 below, industrial areas with very low population densities in West Oakland are considered "high resource."

Chart C-1 summarizes the development process of the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. In the subsequent sections, the methodology for each step is explained.

Chart C-1: Housing Sites Inventory Development Process

Establish RHNA 6 target
Total Earmarked Sites
Calculate remaining RHNA 6
Identify New Opportunity Sites
Assess Inventory under AFFH criteria
Identify supplemental sites for AFFH

ESTABLISH RHNA TARGET

As discussed in Section C.1, the RHNA for the 2023-2031 cycle is 26,251 units. The City has determined that a 15.0 percent buffer will be adequate to ensure that the housing inventory will meet the requirement of the no net loss rule. In total, the 6th cycle RHNA with the 15.0 percent buffer is a target of 30,189 units – 7,488 very-low-income, 4,313 low-income, 5,126 moderate-income, and 13,263 above-moderate-income units. This also includes a target of 3,744 extremely-low-income units, which is assumed to be half of very-low-income need.

PRELIMINARY SITES INVENTORY

The initial sites considered for inclusion in the Inventory were active pipeline projects, projects with expressed developer interest, and other City- and community-identified underutilized sites

without known environmental constraints and near amenities like transit. These "earmarked" housing sites either displayed potential for development or were otherwise vetted as appropriate for additional housing development.

As shown in Table C-19, earmarked sites—comprised of those that can be credited toward RHNA and those still available from the 5th cycle inventory—met 74.6 percent of the 6th cycle RHNA target. An additional 16,682 units located on new opportunity sites were identified (using the methodology described in Section C.3 above) to meet the remaining 6,167 units still needed to meet the target and create a significant buffer. By income level, the overall total of earmarked and new opportunity sites results in a surplus capacity of 1,601 very-low- and low-income units, 1,289 moderate-income units, and 7,133 above-moderate-income units. However, the proportion of lower-income capacity provided in moderate to highest resource areas falls below the average for the total sites inventory.

Table C-19: Preliminary Housing Sites Inventory

Housing Site Type	*Very-Low- and Low-Income*	*Moderate-Income*	*Above-Moderate-Income*	***Total (units)***
RHNA Credits[1]	~~3,921~~4,169	~~760~~776	~~9,718~~10,176	~~14,399~~**15,121**
RHNA 5 Sites	714	3,795	688	5,197
Potential Projects/New Opportunity Sites	7,~~227~~244	1,~~191~~193	~~8,260~~7,873	16,~~686~~310
Percent of Capacity in Moderate to Highest Resource Tracts[2]	~~34.7~~37%	~~29.9~~25%	~~60~~39%	~~63.0~~36.3%

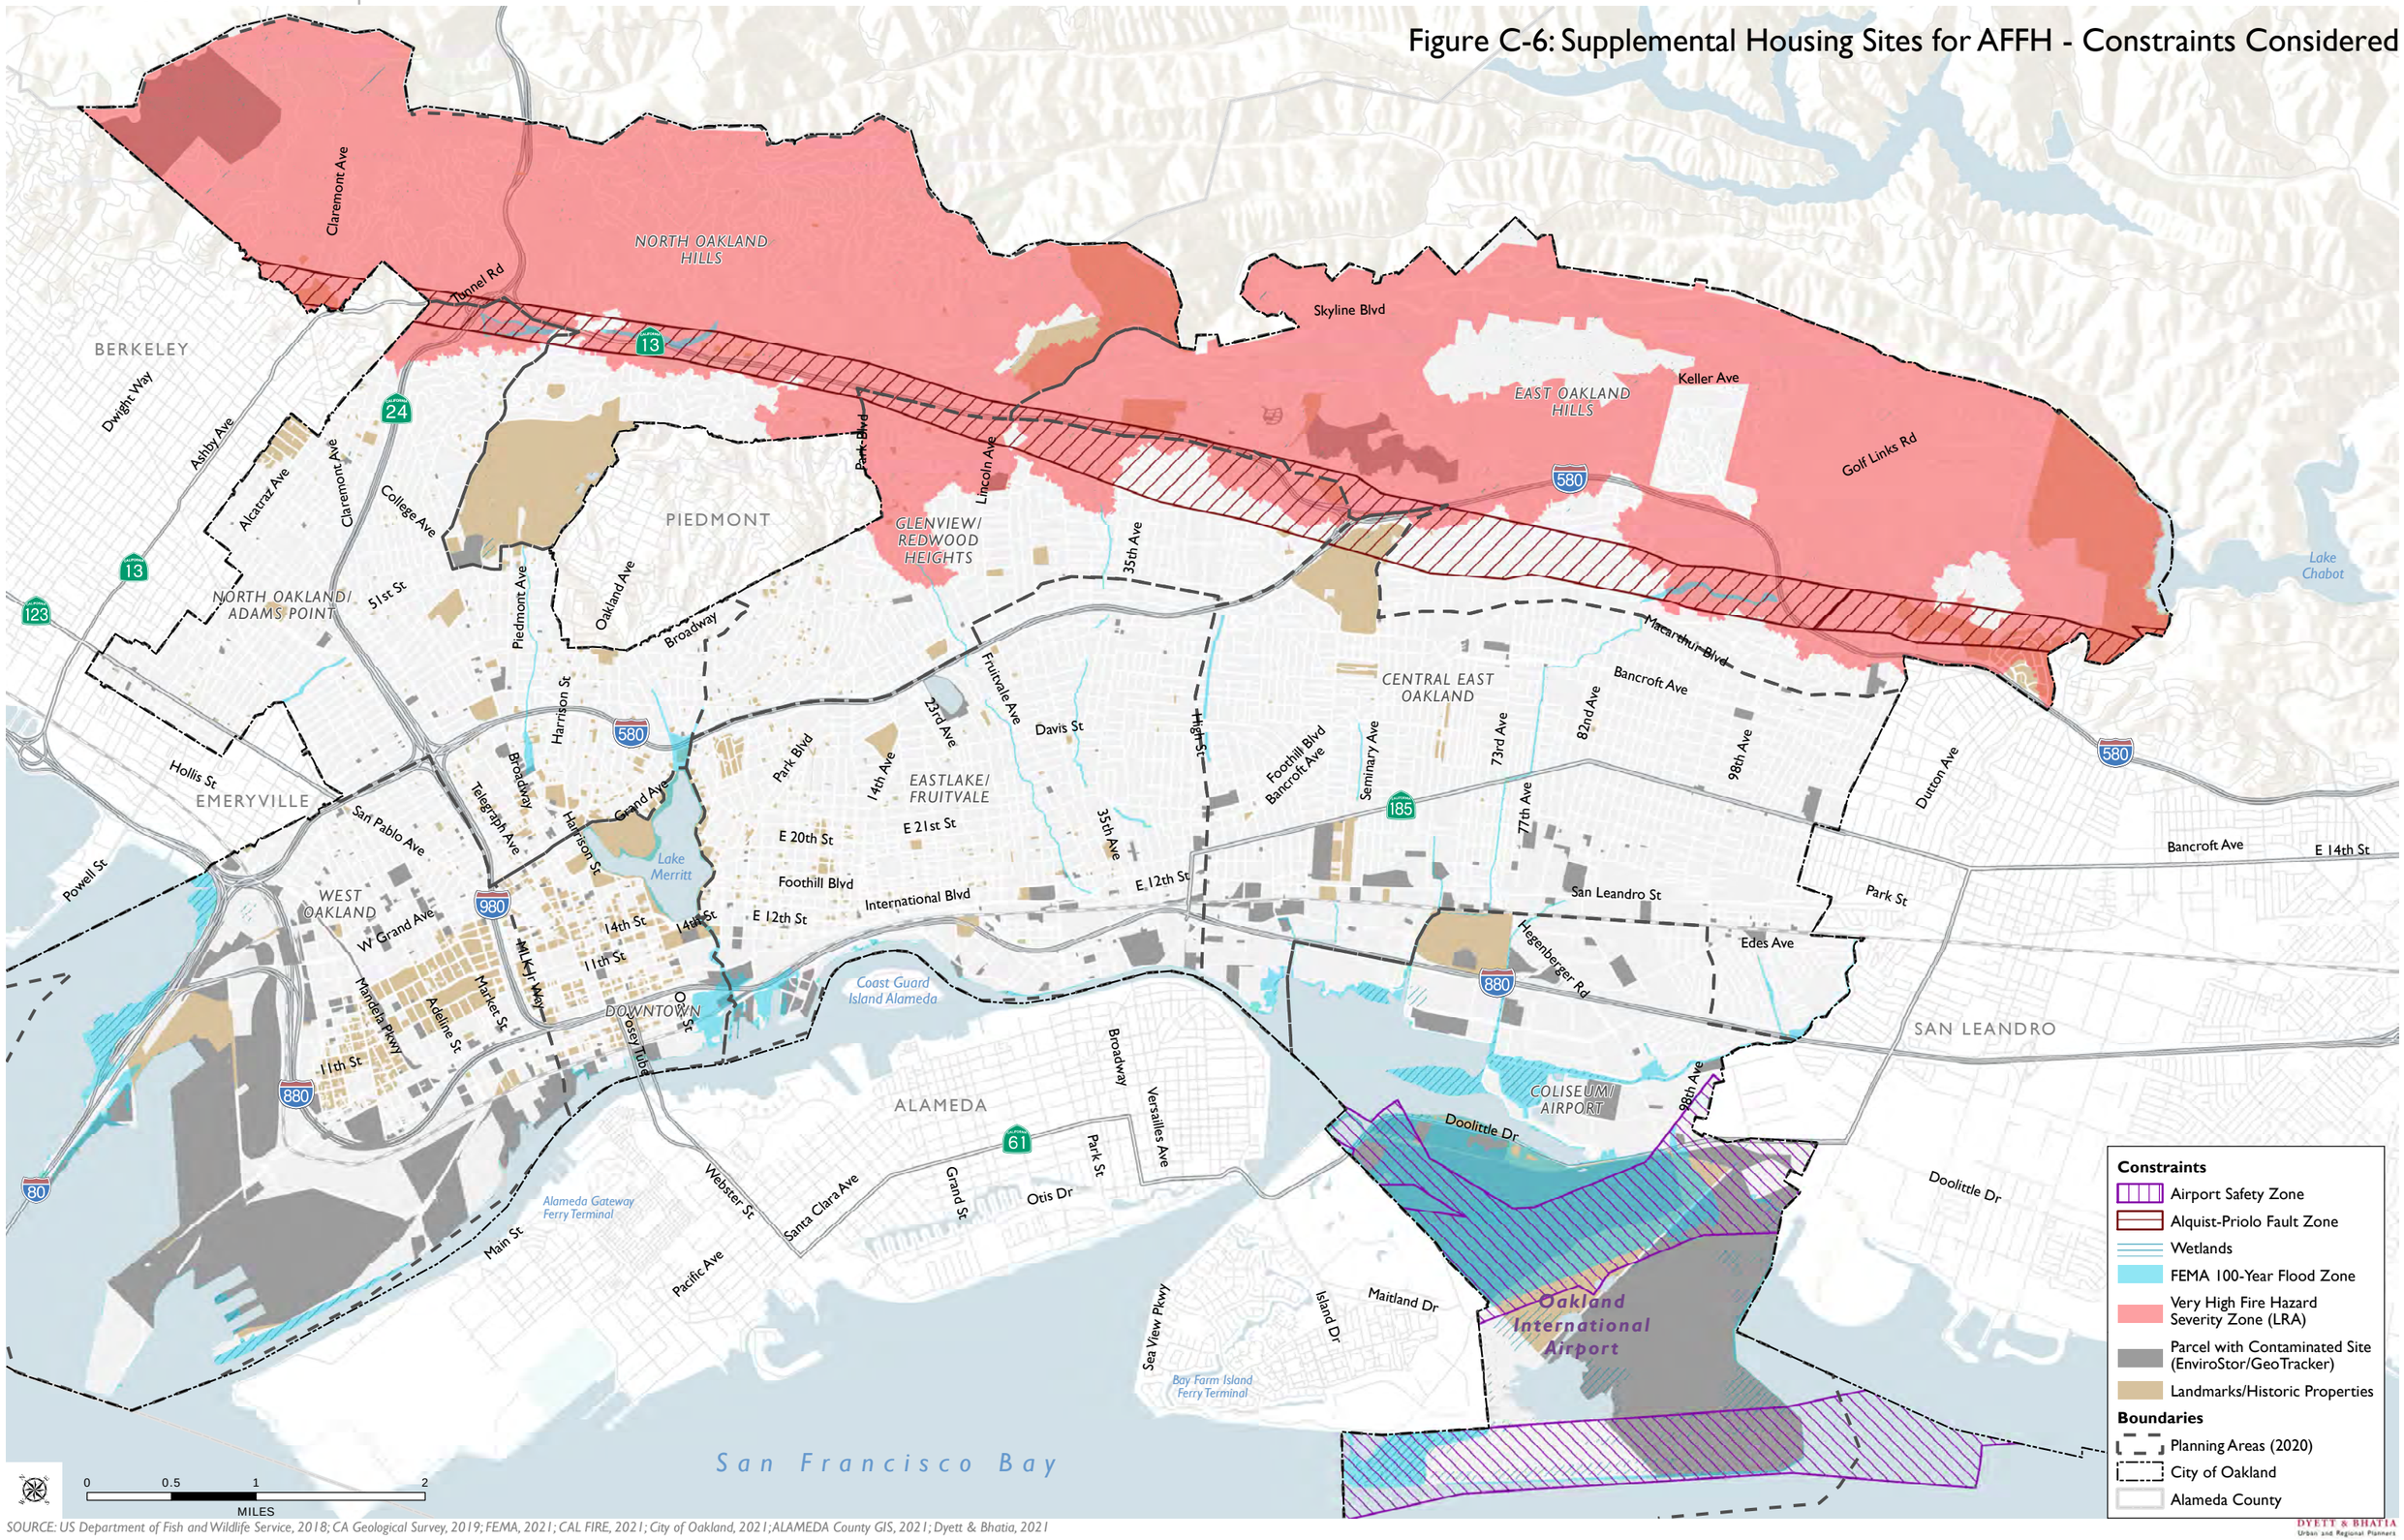
1. Includes pipeline projects, projected ADUs, and adequate sites alternative projects.
2. Census tract resource levels are derived from TCAC Opportunity Maps.

Source: Dyett & Bhatia, 2022

AFFH ASSESSMENT OF PRELIMINARY SITES INVENTORY

While the RHNA is met for each income category based on these pre-established housing sites, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. As discussed further in Appendix D, the California Fair Housing Task Force Opportunity maps developed by TCAC and State HCD indicate that a significant portion (about 60.0 percent) of Oakland is considered low resource or high segregation and poverty. However, many of these areas are in fact thriving communities in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines, and are generally suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource. It should also be noted that investment in "lower resource" neighborhoods, including through affordable housing projects, should not be discouraged in neighborhoods that have been traditionally disinvested in – including neighborhoods like West and East Oakland. The City should also invest in affordable housing in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—in parallel with other investments in equitable access to transit, public facilities, food access, and other amenities.

Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies[15] for communities in historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.



SUPPLEMENTAL SITES TO ACHIEVE AFFH

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority; therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in these neighborhoods.

Starting from the entire universe of parcels in Oakland, sites were filtered out based on objective physical constraints and opportunity metrics. As discussed earlier, opportunity sites were selected based on their vacancy status, AV ratio, and FAR. Constrained sites—including those in the Alquist-Priolo fault zone, 100-year flood hazard areas mapped by FEMA, VHFHSZ identified by the California Department of Forestry and Fire Protection (CAL FIRE), and contaminated sites or those with known hazards (identified in EnviroStor or GeoTracker)—were removed from consideration. Further, sites smaller than 0.5 acres and larger than 10 acres in size were removed from consideration per State HCD guidance, as were sites with existing uses that serve the community (e.g., community health centers and grocery stores) and those that are not appropriate for housing development (e.g., industrial). Sites already included in the preliminary sites inventory were also excluded. Figure C-6 provides the considerations applied in filtering for viable sites.

[15] Place-based strategies address the physical, social, structural and economic conditions of a community that affect the well-being of the children, families and individuals who live there. Place-based strategies include any effort to enhance the livability and quality of life in a given community. An important purpose of place-based strategies is to develop local solutions to poverty and inequality by addressing community-level problems such as limited employment opportunities, poor housing, under-resourced schools, social isolation and poor or fragmented service provisions that lead to gaps or duplication of effort. For more information, see: Rood, S. and McGroder, S. "Promoting Place-Based Strategies to Address Poverty: Exploring the Governor's Role." *National Governors Association*, 2017. Available at https://www.ddcf.org/globalassets/17-0118-nga-place-based-strategies-to-address-poverty-issue-brief.pdf.

Figure C-6: Supplemental Housing Sites for AFFH - Constraints Considered

SOURCE: US Department of Fish and Wildlife Service, 2018; CA Geological Survey, 2019; FEMA, 2021; CAL FIRE, 2021; City of Oakland, 2021; ALAMEDA County GIS, 2021; Dyett & Bhatia, 2021

DYETT & BHATIA
Urban and Regional Planners

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[16] After completing this exercise, an additional 74 potential parcels were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 19 parcels were identified as supplemental sites that would further the objectives of AFFH. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization factors, local knowledge of the sites, and aerial images of the current state of the property. Three parcels in the Rockridge area will be upzoned and encourage to develop with residential Uses under actions in the Housing Action Plan. Figure C-7 maps the locations of these supplemental "AFFH sites," which are listed in Table C-20 below and identified in Table C-25.

Table C-20: Supplemental AFFH Sites

012 100200900,	4225 BROADWAY OAKLAND 94611	0.15	8	Moderate Resource/Moderate Resource (Rapidly Changing)	Underutilized commercial site with previous development interest and adjacent to a potential residential project.

[16] A transit-rich area is defined by MTC as one in which 50 percent of the area is within one half-mile of the following: an existing rail station or ferry terminal (with bus or rail service); a bus stop with peak service frequency of 15 minutes or less; and a planned rail station or planned ferry terminal (with bus or rail service) in the most recently adopted fiscally-constrained Regional Transportation Plan.

APN(s)	*Address*	*Acres*	*Lower-Income Capacity*	*TCAC Opportunity Area*	*Justification for Inclusion*
008 064503301, 008 064500901, 008 064502805	525 21ST ST OAKLAND 94612	1.3	137	Moderate Resource	Group of underutilized and low-density office/commercial, adjacent to new high-density multifamily development.
013 109902600, 013 109902501, 013 109902800	4400 TELEGRAPH AVE OAKLAND 94609	0.6	24	Moderate Resource	Group of underutilized commercial/retail
012 097601502	380 W MACARTHUR BLVD OAKLAND 94609	1.1	17	Moderate Resource (Rapidly Changing)	Former AAA building across from Mosswood Park - temporarily used by Kaiser, and has high housing potential
14122902103	5354 CLAREMONT AVE	1.70		High Resource	Dialysis clinic; large parking lot. Demonstrated public and decisionmaker interest.
14126604701	5727 COLLEGE AVE	1.7		Highest Resource	Larger parcel, medium FAR , proximity to BART
048A706901000	6209 COLLEGE AVE	0.5		High Resource	Medium FAR and comparatively lower AV ratio
14124200600	5050 BROADWAY	4.5	189	Highest Resource	Large vacant parcel near shopping center and other multifamily housing. Demonstrated public and decisionmaker interest.

IMPROVED OR EXACERBATED CONDITIONS

As noted in the previous section, sites were selected in a manner to both further invest in historically disadvantaged communities and decrease displacement pressures, and to provide additional access to existing higher resourced neighborhoods. The breakdown of residential capacity by resource area and other AFFH considerations is included in Table C-21 below, and the location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure C-8.

Most residential capacity at all income levels in located in the low resource and high segregation and poverty areas, as shown in Table C-21. This is largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation and poverty. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards and fire risks, limited densities reflected in recent development patterns, and active pipeline projects. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, they will likely further increase the proportion of lower-income housing available in these neighborhoods.

~~An~~As supported by sites analysis in Appendix D, section D.5, an affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. These actions, as ~~outline~~outlined in the Housing Action Plan, will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the ~~difficultly~~difficulty associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call ~~that neighborhood~~those neighborhoods home.

Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia, 2022

Much of the land in Oakland designated high or highest resource is located within the Alquist Priolo fault Zone or Very High Fire Hazard Severity Zone (VHFHSZ~~))~~, and is therefore not suitable for higher-density residential development. For instance, Table C-22 shows that 70.1 percent of the City's highest resource and 25.7 percent of the high resource areas are located within the VHFHSZ. The Oakland Hills fire of 1991 was at its time the most damaging fire in California history. It should be noted that the constraints listed in Table C-22 may overlap, and therefore percentages should not be summed. However, this table also does not include all of the environmental constraints, such as steep slopes or landslide areas. The balance of access to opportunity with environmental constraints, both in terms of development feasibility and safety for lower-income projects, was a key factor in creating the Inventory.

Table C-22: Opportunity Area Constraints, 2021

		Percent of Land Constrained		
Opportunity Area	*Percent of Citywide Area*[1]	*100-Year Flood Zone*	*Alquist Priolo Zone*	*VHFHSZ*
Highest Resource	10.1%	0.6%	5.0%	70.1%
High Resource	9.2%	6.8%	2.2%	25.7%
Moderate Resource (Rapidly Changing)	2.4%	14.0%	13.5%	9.3%
Moderate Resource	17.0%	0.7%	5.5%	53.8%
Low Resource	53.6%	8.8%	1.4%	5.0%
High Segregation & Poverty	7.7%	**4.1%**	0.0%	0.0%

1. Based on parcel acreage – does not include rights-of-way.

Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia, 2022

Recent City Council direction to explore more diverse housing typologies in traditionally single-family neighborhoods—including fourplexes—as well as recent State laws like SB 9 will also help to promote affordable housing options in higher resource neighborhoods. Efforts to further encourage both the provision of affordable housing in higher resource areas and provide investments to lower resource neighborhoods through place-based strategies are further outlined in the Housing Action Plan.

Lower-Income Financial Feasibility

During outreach, affordable housing developers indicated that an evaluation of sites selected for lower-income housing with consideration to State funding requirements would be a useful tool to identify and facilitate affordable housing development on those sites. Scoring guidelines for the nine percent Low Income Housing Tax Credit Program provided by the California Tax Credit Allocation Committee (TCAC) are summarized in Table C-23. Credits provided by TCAC ~~area~~area a popular funding mechanism in the construction of affordable housing, and prioritize the development of affordable housing in neighborhoods with existing access to opportunity. Further information on TCAC opportunity areas is available in Appendix D.

Table C-23: TCAC Scoring Guidelines, 2022

Site & Service Amenities	*Points*	*Criteria*
Transit	3	The site is within 0.5 miles of a bus rapid transit station, light rail station, commuter rail station, ferry terminal, bus station, or public bus stop.
	4	The site is within 0.33 miles of the above.
	5	The site is within 0.5 miles of the above, with service at least every 30 minutes during the hours of 7-9 a.m. and 4-6 p.m. Monday through Friday.
	6	The site is within 0.33 miles of the above.
	7	The site is within 0.33 miles of the above and the project's density exceeds 25 du/ac.
Public Park	2	The site is within 0.75 miles of a public park or a community center accessible to the general public.[1]
	3	The site is within 0.5 miles of the above.[1]
Book-Lending Public Library	2	The site is within 1 mile of a book-lending public library that also allows for inter-branch lending when in a multi-branch system.
	3	The site is within 0.5 miles of the above.
Full-Scale Grocery Store, Supermarket, Neighborhood Market, or Farmers' Market	1	The site is within 1 mile of a weekly farmers' market on the list of Certified Farmers' Markets by the California Department of Food and Agriculture and operating at least 5 months in a calendar year.
	2	The site is within 0.5 miles of the above.
	3	• The site is within 0.5 miles of a neighborhood market of 5,000 gross interior square feet or more where staples, fresh meat, and fresh produce are sold; or • The site is within 1.5 miles of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
	4	• The site is within 0.25 miles of a neighborhood market of 5,000 gross interior square feet or more where staples, fresh meat, and fresh produce are sold; or • The site is within 1 mile of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
	5	The site is within 0.5 miles of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
Public Elementary	2	The site is within 0.75 miles of a public elementary school; 1 mile of a public middle school; or 1.5 miles of a public high school, and the site is within the attendance area of that school.

Site & Service Amenities	*Points*	*Criteria*
Middle, or High School	3	The site is within 0.25 miles of a public elementary school; 0.5 miles of a public middle school; or 1 mile of a public high school, and the site is within the attendance area of that school.
Medical Clinic or Hospital	2	The site is within 1 mile of a qualifying medical clinic with a physician, physician's assistant, or nurse practitioner onsite for a minimum of 40 hours each week, or hospital (not merely a private doctor's office).
	3	The site is within 0.5 miles of the above.
Highest or High Resources Area	8	The site is located in a census tract designated on the TCAC/State HCD Opportunity Area Map as Highest or High Resource.

1. A public park shall not include 1) school grounds unless there is a bona fide, formal joint-use agreement between the jurisdiction responsible for the park's/recreation facilities and the school district or private school providing availability to the general public of the school grounds and/or facilities. 2) greenbelts or pocket parks, or 3) open space preserves or biking parkways unless there is a trailhead or designated access point within the specified distance.

Source: TCAC, Nine Percent Application, 2022

Table C-24 below provides an estimate of the points available for the nine percent TCAC application for lower-income sites contained in the Inventory. Point estimates are derived from nine percent TCAC application scoring guidelines as listed in Table C-23 above. Points are only estimated for lower-income sites that do not already have a pipeline or potential development project. It should be noted that points are only estimated for site-related amenities and do not reflect the full scope of available points. Further, provided point totals are only estimates and may not reflect actual point allocations for specific projects. Finally, while sites with lower scores may be less competitive for State funding, this does not mean that they do not have the zoned capacity to accommodate lower-income housing. It should be noted that TCAC scoring guidelines make it difficult to secure funding for needed affordable housing projects in Oakland's lower-income neighborhoods. The lack of access to the amenities that score well is due to historic racism and public/private disinvestment. Actions the City will take to increase the financial feasibility of development in historically disinvested neighborhoods are provided in the Housing Action Plan.

1. Derived from ABAG-MTC's 2021 Existing and Planned dataset, which relies on General Transit Feed Specification (GTFS) data for stop location and frequency.

2. TCAC neighborhood market definitions do not match Oakland's Food Facilities dataset definitions, which groups facilities below 3,000 sq. ft., between 3,000 sq. ft. and 10,000 sq. ft., and above 10,000 sq. ft. Certified farmers' markets match TCAC definitions exactly. "Neighborhood markets" and "Supermarkets" were approximated as follows:

- Neighborhood Markets (TCAC definition is at least 5,000 sq. ft.) – a review of Yelp entries for "Grocery" or "Fruits & Veggies" was conducted. This better aligns with the Food Facilities dataset and helps capture stores about 1,000 sq. ft. in size that sell fresh fruits and vegetables—including those located in Chinatown. Note that this category may include some supermarkets or larger grocery stores.
- Supermarket (TCAC definition is at least 25,000 sq. ft.) – Oakland Food Facilities that have the description "Food Market Over 10,000 SqFt." There are about 30 such locations in Oakland. Based on limited parcel-level spot-checking, the average size of a supermarket in Oakland is likely less than 25,000 sq. ft. Note that some of these locations may also be included in the neighborhood market level.

3. There are a total of 32 points available.

ISOLATION OF THE RHNA

While seeking to locate lower-income sites in higher resource areas to the extent practical given the extensive environmental constraints, the Inventory actively seeks to reduce geographic concentration of housing by income. This is done in two ways – by locating sites of all income levels throughout the city, and by assuming mixed-income developments on larger sites. This ensures that households are not segregated by income either within a neighborhood or within a specific project. Dispersing housing types of varying affordability levels throughout the city will help reduce historic patterns of geographic concentration by income. ADUs—although not explicitly reflected in Table C-21 or Figure C-8—provide an additional strategy to promote dispersed housing and to ensure that more affordable housing options are available in lower-density neighborhoods, which also tend to be higher resource. As discussed in Section C.2, ADUs in Oakland tend to be affordable to lower- and moderate-income households. The sites inventory by resource area by neighborhood are included in Table C-25.

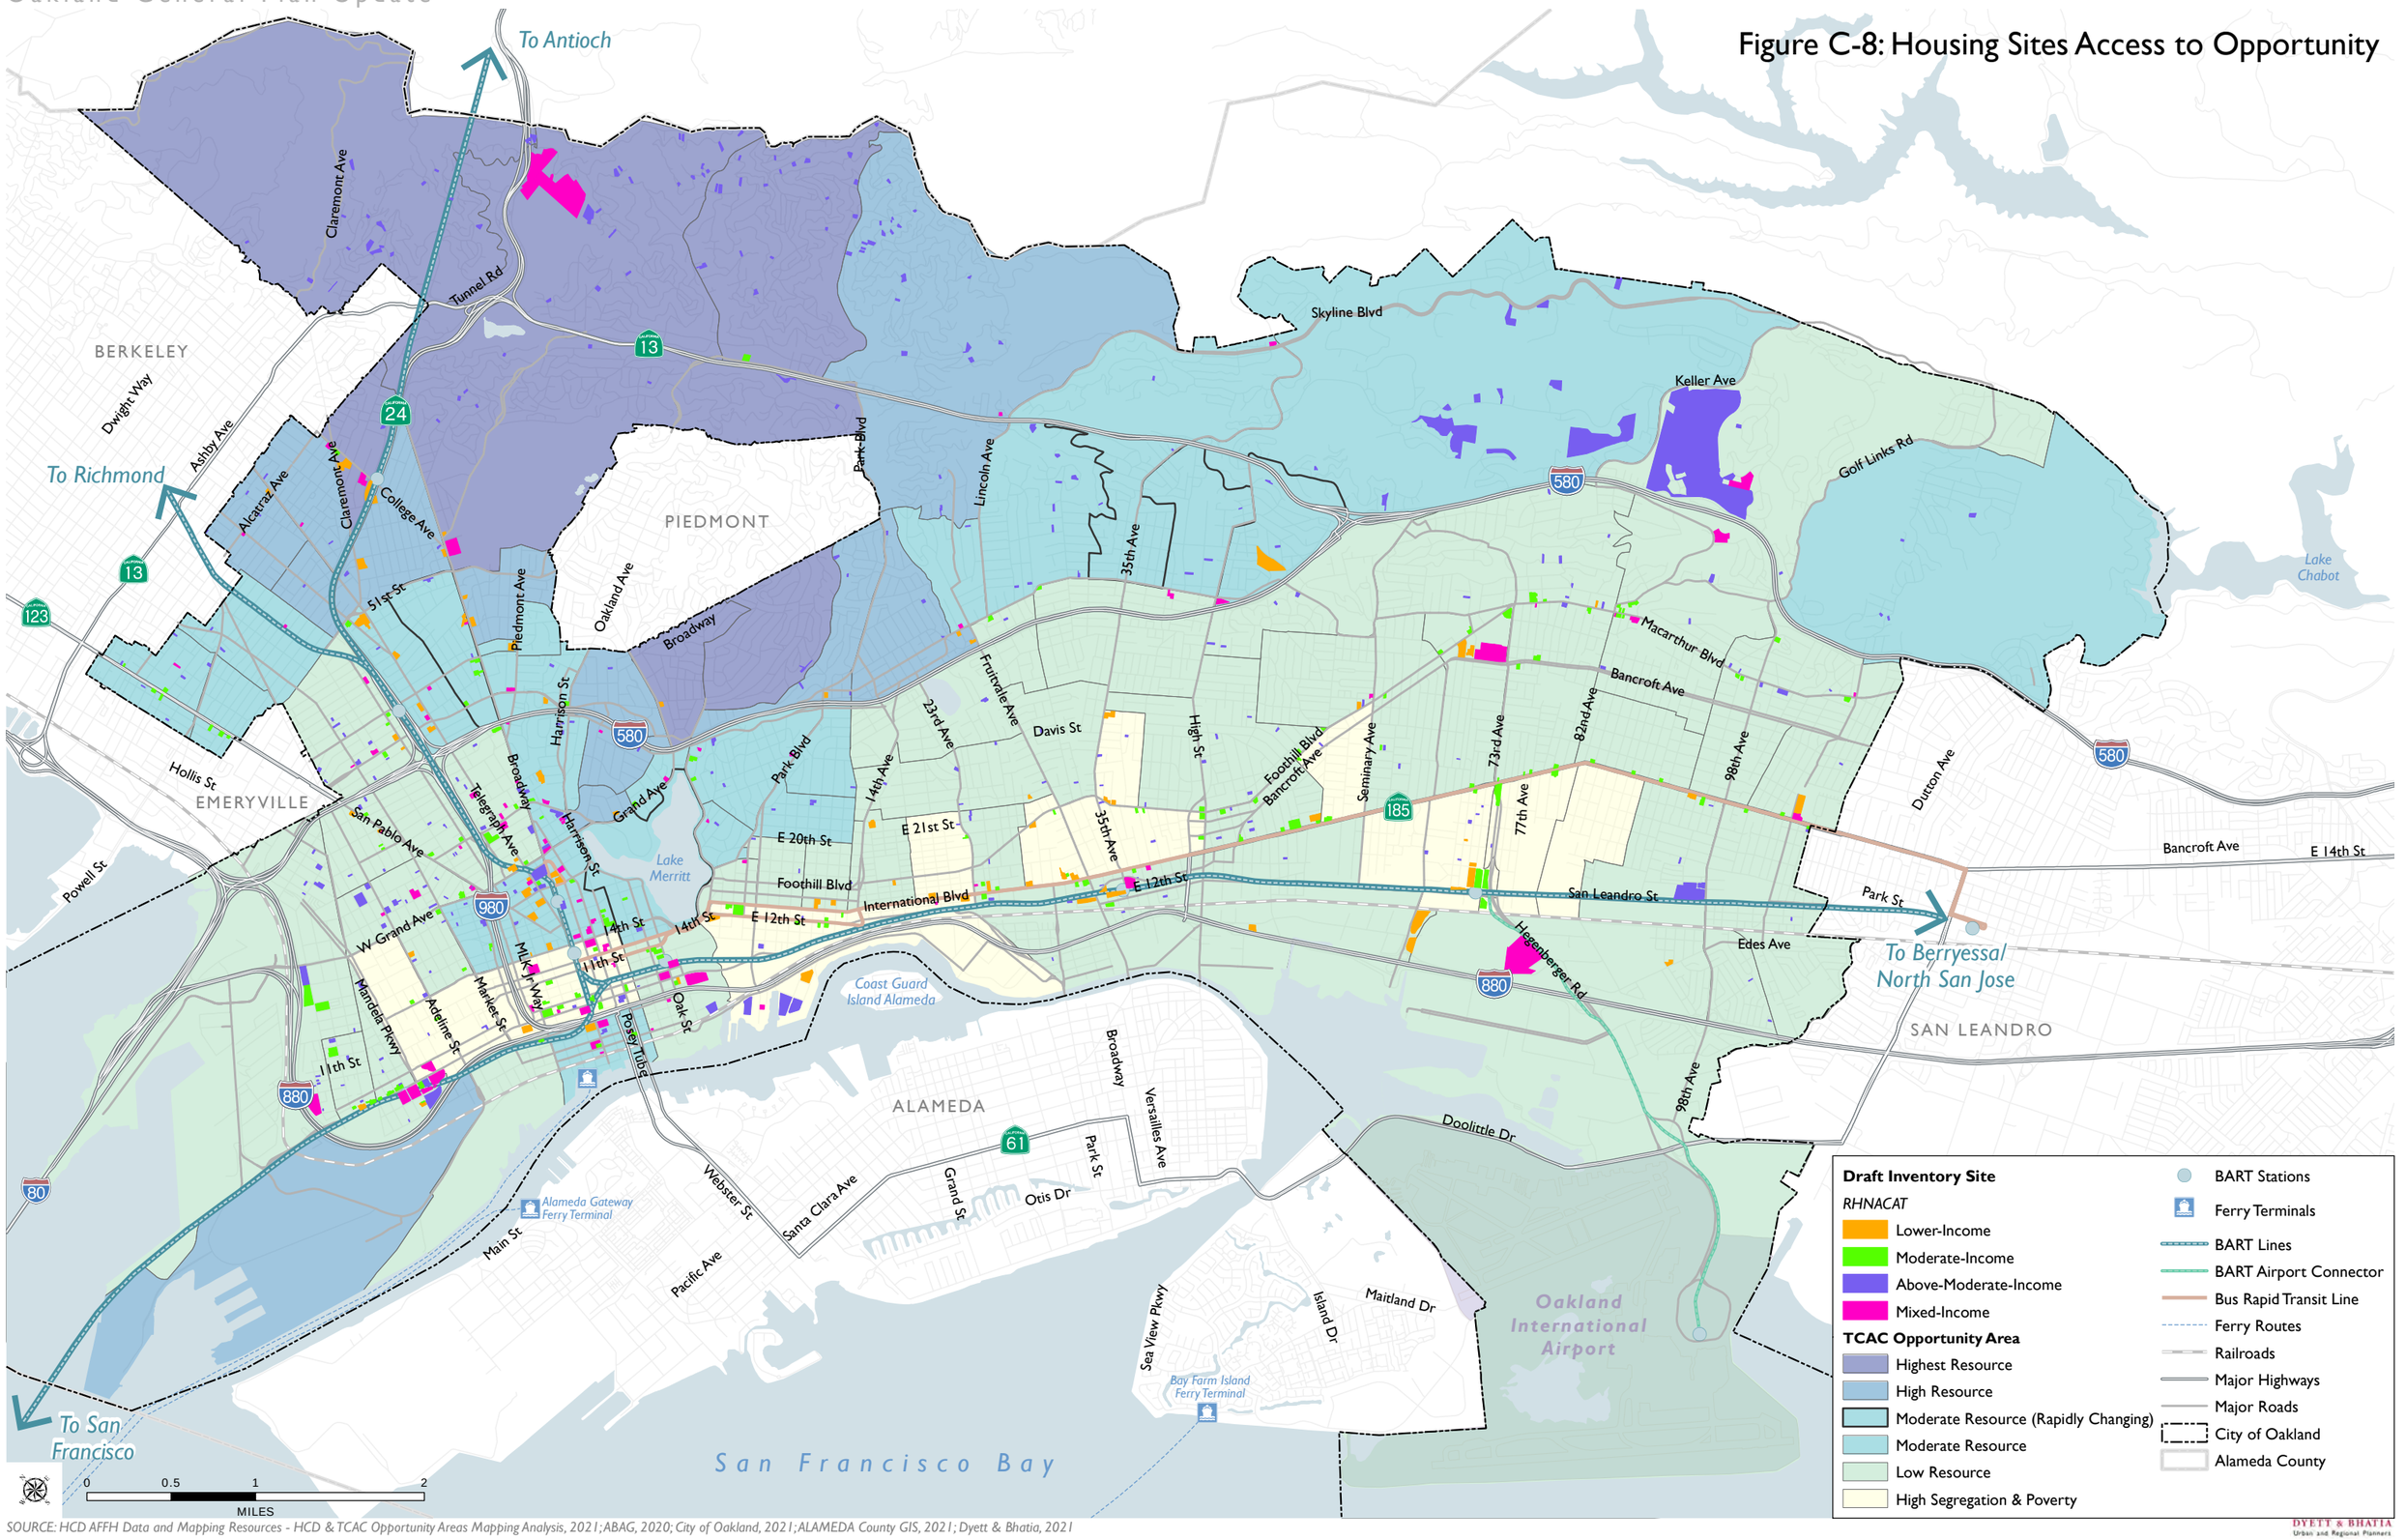

Table C-25: Housing Units by TCAC Resource Area, by Neighborhood

The full Sites Inventory is provided in Table C-26. Table B includes sites, primarily in moderate or higher-resourced areas, that will be upzoned, as described in Appendix J. Rezoning results in around 650 units more than the realistic capacities predicted for the prior zoning designations, for a total of nearly 1,700 units (shown in Table B of Table C-26). Appendix M includes a list of sites identified by the community that will be considered for rezoning as part of Phase 2; sites included in the current Inventory are highlighted in yellow.

New Sites Inventory Table: 11/29/2022

Table C-26. Table C: Zone Descriptions

General Plan Residential Zone	*Residential Zoning Designation*	*Description*
Hillside Residential	RH-1, RH-2, RH-3, RH-4	The intent of the Hillside Residential (RH) Zones is to create, maintain, and enhance residential areas that are primarily characterized by detached, single unit structures on hillside lots.
Detached Unit Residential	RD-1, RD-2	The intent of the Detached Unit Residential (RD) Zones is to create, maintain, and enhance residential areas primarily characterized by detached, single-unit structures.
Mixed Housing Type	RM-1, RM-2, RM-3, RM-4	The intent of the Mixed Housing Type Residential (RM) Zones is to create, maintain, and enhance residential areas typically located near the City's major arterials and characterized by a mix of single-family homes, townhouses, small multi-unit buildings, and neighborhood businesses where appropriate.
Urban Residential	RU-1, RU-2, RU-3, RU-4, RU-5	The intent of the Urban Residential (RU) Zones is to create, maintain, and enhance areas of the City that are appropriate for multi-unit, mid-rise or high-rise residential structures in locations with good access to transportation and other services.
High-Rise Apartment Residential	R-80	The intent of the High-Rise Apartment Residential (R-80) Zone is to create, preserve, and enhance areas for high-rise apartment living at high densities in desirable settings, and is typically appropriate to areas near major shopping and community centers and rapid transit stations.
Neighborhood Center Commercial	CN-1, CN-2, CN-3, CN-4	1. CN-1 Neighborhood Commercial Zone - 1. The intent of the CN-1 zone is to maintain and enhance vibrant commercial districts with a wide range of retailestablishments serving both short and long term needs in attractive settings oriented to pedestrian comparison shopping. 2. CN-2 Neighborhood Commercial Zone - 2. The intent of the CN-2 zone is to enhance the character of established neighborhood commercial centers that have a compact, vibrant pedestrian environment. 3. CN-3 Neighborhood Commercial Zone - 3. The intent of the CN-3 zone is to create, improve, and enhance areas neighborhood commercial centers that have a compact, vibrant pedestrian environment. 4. CN-4 Neighborhood Commercial Zone - 4. The intent of the CN-4 zone is to accommodate a broad range of low impact, retail, and service
Community Commercial	CC-1, CC-2, CC-3	1.CC-1 Community Commercial Zone - 1. The CC-1 zone is intended to create, maintain, and enhance shopping centers and malls with a wide range of consumer businesses. 2.CC-2 Community Commercial Zone - 2. The CC-2 zone is intended to create, maintain, and enhance areas with a wide range of commercial businesses with direct frontage and access along the City's corridors and commercial areas. 3.CC-3 Community Commercial Zone - 3. The CC-3 zone is intended to create, maintain, and enhance areas with heavy commercial and service activities
Community Thoroughfare Commercial	C-40	The C-40 zone is intended to create, preserve, and enhance areas with a wide range of both retail and wholesale establishments serving both short and long term needs in convenient locations, and is typically appropriate along major thoroughfares.
Community Shopping Commercial	C-45	The C-45 zone is intended to create, preserve, and enhance areas with a wide range of both retail and wholesale establishments serving both long and short term needs in compact locations oriented toward pedestrian comparison shopping, and is typically appropriate to commercial clusters near intersections of major thoroughfares
Central Business District	CBD-R, CBD-P, CBD-C, CBD-X	1. CBD-R Central Business District Residential Zone. The intent of the CBD-R zone is to create, maintain, and enhance areas of the Central Business District appropriate for residential development with small-scaled compatible ground-level commercial uses. 2. CBD-P Central Business District Pedestrian Retail Commercial Zone. The intent of the CBD-P zone is to create, maintain, and enhance areas of the Central Business District for ground-level, pedestrian-oriented, active storefront uses. Upper story spaces are intended to be available for a wide range of office and residential activities. 3. CBD-C Central Business District General Commercial Zone. The intent of the CBD-C zone is to create, maintain, and enhance areas of the Central Business District appropriate for a wide range of ground-floor office and other commercial activities. Upper-story spaces are intended to be available for a wide range of residential and office or other commercial activities. 4. CBD-X Central Business District Mixed Commercial Zone. The intent of the CBD-X zone is to designate areas of the Central Business District appropriate for a wide range of upper story and ground level residential, commercial, and compatible light industrial activity.
Housing and Business Mix Commercial	HBX-1, HBX-2, HBX-3, HBX-4	Housing and Business Mix 1 (HBX-1) Zone The HBX-1 zone is intended to provide development standards that provide for the compatible coexistence of industrial and heavy commercial activities and development. This zone recognizes the equal importance of housing and business. Housing and Business Mix 2 (HBX-2) Zone. The HBX-2 zone is intended to provide development standards for areas that have a mix of industrial, certain commercial and medium to high density residential development. This zone recognizes the equal importance of housing and business. Housing and Business Mix 3 (HBX-3) Zone. The HBX-3 zone is intended to provide development standards for areas that have a mix of industrial, heavy commercial and higher density residential development. This zone is intended to promote housing with a strong presence of commercial and industrial activities.
Civic Center Commercial	S-2	The S-2 zone is intended to create, preserve, and enhance areas devoted primarily to major public and quasi-public facilities and auxiliary uses, and is typically appropriate to portions of the Oakland Central District and to outlying areas of public facilities

Transit-Oriented Development Commercial	S-15, S-15W	The S-15 zone is intended to create, preserve and enhance areas devoted primarily to serve multiple nodes of transportation and to feature high-density residential, commercial, and mixed-use developments to encourage a balance of pedestrian-oriented activities, transit opportunities, and concentrated development; and encourage a safe and pleasant pedestrian environment near transit stations by allowing a mixture of residential, civic, commercial, and light industrial activities, allowing for amenities such as benches, kiosks, lighting, and outdoor cafes; and by limiting conflicts between vehicles and pedestrians, and is typically appropriate around transit centers such as Bay Area Rapid Transit (BART) stations, AC Transit centers, and other transportation nodes
Wood Street District	D-WS-1 – D-WS-9	This zone is intended to create an active, pedestrian oriented, mixed-use, urban community in the area generally bounded by 10th Street, Wood Street, West Grand Avenue and Frontage Road/I-880.
Broadway Valdez District Commercial	D-BV-1, D-BV-2, D-BV-3, D-BV-4	
Central Estuary District Zones	D-CE-1 – D-CE-6	D-CE-1 Central Estuary District Commercial Zone – 1 (Embarcadero Cove). The D-CE-1 zone is intended to create, maintain, and enhance areas of the Central Estuary that have a mix of marine, office and other commercial uses. D-CE-2 Central Estuary District Commercial Zone – 2 (High Street Retail). The D-CE-2 zone is intended to create, maintain, and enhance areas of the Central Estuary with a wide range of commercial uses with direct street frontage and access to the freeway. D-CE-3 Central Estuary District Mix Zone – 3 (Jingletown/Elmwood). The D-CE-3 zone is intended to create, preserve, and enhance areas of the Central Estuary that have a mix of industrial, heavy commercial and residential development. This zone is intended to promote housing with a strong presence of commercial and industrial activities. D-CE-4 Central Estuary District Mix Zone – 4 (Mixed Use Triangle). The D-CE-4 zone is intended to create, maintain and enhance areas of the Central Estuary that have a mix of industrial and heavy commercial activities. Higher density residential development is also appropriate in this zone. D-CE-5 Central Estuary District Industrial Zone – 5 (Food Industry Cluster/High St. Warehouse Wedge/Tidewater South). The D-CE-5 zone is intended to create, preserve, and enhance areas of the Central Estuary that are appropriate for a wide variety of heavy commercial and industrial establishments. Uses with greater off-site impacts may be permitted provided they meet specific performance standards. D-CE-6 Central Estuary District Industrial Zone – 6 (Con Agra/Owens Brockway/Tidewater North). The D-CE-6 zone is intended to create, preserve and enhance areas of the Central Estuary that are appropriate for a wide variety of businesses and related commercial and industrial establishments that may have the potential to generate off-site impacts, such as noise, light/glare, odor, and traffic. This zone allows industrial and manufacturing uses, transportation facilities, warehousing and distribution, and similar related supporting uses. Uses that may inhibit such uses, or the expansion thereof, are prohibited. This district is applied to areas with good freeway, rail, seaport, and/or airport access.
Lake Merritt Station Area District	D-LM-1 – D-LM-5	D-LM-1 Lake Merritt Station Area District Mixed Residential - 1 Zone. The intent of the D-LM-1 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for high-density residential development with compatible Commercial Activities. D-LM-2 Lake Merritt Station Area District Pedestrian Commercial - 2 Zone. The intent of the D-LM-2 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District for ground-level, pedestrian-oriented, active storefront uses. OAKLAND Oakland, California, Planning Code Page 533 Upper story spaces are intended to be available for a wide range of Office and Residential Activities. D-LM-3 Lake Merritt Station Area District General Commercial - 3 Zone. The intent of the D-LM-3 Zone is to create, maintain, and enhance areas of the Lake Merritt Station Area Plan District appropriate for a wide range of ground-floor Commercial Activities. Upper-story spaces are intended to be available for a wide range of Residential, Office, or other Commercial Activities. D-LM-4 Lake Merritt Station Area District Mixed Commercial - 4 Zone. The intent of the D-LM-4 Zone is to designate areas of the Lake Merritt Station Area Plan District appropriate for a wide range of Residential, Commercial, and compatible Light Industrial Activities. D-LM-5 Lake Merritt Station Area District Institutional - 5 Zone. The intent of the DLM-5 Zone is to create, preserve, and enhance areas devoted primarily to major public and quasi-public facilities and auxiliary uses

Coliseum Area District	D-CO-1 – D-CO-6	D-CO-1 Coliseum Area Transit Oriented Development District Zone-1 (Coliseum BART/ San Leandro Street). The D-CO-1 Zone is intended to create, preserve and enhance areas devoted primarily to serve multiple nodes of transportation and to feature high-density residential, commercial, and mixed-use developments, to encourage a balance of pedestrian-oriented activities, transit opportunities, and concentrated development; and encourage a safe and pleasant pedestrian environment near transit stations by allowing a mixture of residential, civic, commercial, and light industrial activities. D-CO-2 Coliseum Area Commercial District Zone-2 (Coliseum District). The DCO-2 Zone is intended to create, maintain and enhance areas that allow a broad mixture of residential, retail, commercial, office, and light industrial uses, and serve as region-drawing centers of sports, entertainment, and business activities. D-CO-3 Coliseum Area Commercial District Zone-3 (Oakport South / Hegenberger Road). The D-CO-3 Zone is intended to create, maintain and enhance areas suitable for a wide variety of retail, commercial, and industrial operations along the Oakport Street and Hegenberger Road corridors, and in region-drawing centers of commercial, and light industrial activities. D-CO-4 Coliseum Area Commercial District Zone-4 (Edgewater North / Waterfront). The D-CO-4 Zone is intended to create, maintain and enhance a mix of activities on or near the Northwest Edgewater Drive waterfront. This zone allows for the consideration of housing, if shown to be compatible in an area with a strong presence of commercial and industrial activities. D-CO-5 Coliseum Area Commercial Industrial Mix District Zone-5 (Edgewater South / Pardee Drive). The D-CO-5 Zone is intended to create, preserve, and enhance areas near Pardee Drive and within the southern portion of the Airport Business Park that are appropriate for a wide variety of office, commercial, industrial, and logistics activities. D-CO-6 Coliseum Area Commercial Industrial Mix District Zone-6 (Oakport North). The D-CO-6 Zone is intended to apply to commercial, industrial and institutional areas with strong locational advantages that make possible the attraction of higher intensity commercial and light industrial land uses and development types.
Oak Knoll District	D-OK-1 – D-OK-7	D-OK-1 Oak Knoll District Residential Zone - 1. The D-OK-1 Zone is intended to create, maintain, and enhance areas suitable for low-density single-family home development that responds to the site's topography and includes appropriate landscaping. D-OK-2 Oak Knoll District Residential Zone - 2. The D-OK-2 Zone is intended to create, maintain, and enhance areas suitable for medium-low density single-family homes. 3. D-OK-3 Oak Knoll District Residential Zone – The D-OK-3 Zone is intended to create, maintain, and enhance areas suitable for medium-density residential units, such as townhomes. D-OK-4 Oak Knoll District Commercial Zone - 4. The D-OK-4 Zone is intended to create, maintain, and enhance areas that provide neighborhood-serving retail, such as supermarkets, banks, cafes, and dry-cleaners. Ground floor commercial uses and upper story office uses are encouraged in this zone.

This appendix presents the inventory of sites suitable for residential development in Oakland to meet the 2023-2031 Regional Housing Needs Allocation (RHNA), as determined by the State Department of Housing and Community Development (State HCD), and summarized in Chapter 3. The sites inventory is divided into two major groups:

- Sites where development is underway or approved (known as "pipeline projects") or otherwise can be credited to meet the RHNA; and
- Opportunity sites where additional development could occur.

The following sections explore the capacity of these two major groups, as well as the various subgroups contained within each. The complete Housing Sites Inventory (Inventory) is included at the end of this appendix (see Table C-~~25~~26), as well as a map of sites identified in the Inventory (see Figure C-1).

The RHNA is a critical component of State housing law that mandates all California cities and counties plan for the housing needs of its residents. Under the RHNA mandate, State HCD, in collaboration with the Association of Bay Area Governments (ABAG), first determines the total number of new homes the nine-county Bay Area needs, and how affordable those homes need to be, in order to meet the housing needs of people at all income levels. For the planning period running from January 31, 2023, to January 31, 2031, State HCD determined that the Bay Area region must plan for 441,176 new housing units. After receiving this regional determination, ABAG was responsible for developing a RHNA Methodology for distributing a share of the region's housing need to each city and county in the region. The RHNA Methodology must meet five objectives specified in State law, which include promoting infill development and socioeconomic equity, promoting improved intraregional jobs-housing relationships, and affirmatively further fair housing. The RHNA Methodology also must be consistent with the forecasted development pattern from Plan Bay Area 2050.

In accordance with Government Code Section 65584, the final RHNA plan was adopted by ABAG's Executive Board on December 16, 2021 and was approved by State HCD on January 27, 2022.[1] The RHNA plan distributes regional housing need across jurisdictions by the following income categories:

- Very-low-income - less than 50 percent of the county median income.
- Low-income - between 51 and 80 percent of the county median income.
- Moderate-income - between 81 and 120 percent of the county median income.
- Above-moderate-income - greater than 120 percent of the county median income.

[1] More information on the Bay Area RHNA process is available on ABAG's website: https://abag.ca.gov/our-work/housing/rhna-regional-housing-needs-allocation. The Final RHNA Plan is available at the following link: https://abag.ca.gov/sites/default/files/documents/2021-12/Final_RHNA_Allocation_Report_2023-2031-approved_0.pdf

The 2023-2031, or 6th cycle, RHNA identifies an overall need of 26,251 new units in Oakland, a nearly 77.8 percent increase from the prior cycle's allocation of 14,765 new units. Oakland's RHNA is about 6.0 percent of the nine-county Bay Area allocation of 441,176 units. The region's total RHNA increased by nearly 135.0 percent since the previous cycle, partly due to changes in methodology that now address existing needs such as housing cost burdens, overcrowding, and vacancy. The increase in Oakland's RHNA is mostly driven by the overall regional increase, although a smaller portion is due to the 6th Cycle RHNA methodology's emphasis on proximity to jobs and higher resource areas,[2] as well as the share of future growth projected by Plan Bay Area.[3] To meet the 6th cycle RHNA, Oakland would need to produce an average of 3,281 units annually.

Table C-1 shows the income breakdown of the RHNA. The RHNA does not specifically break down the need for extremely-low-income households. As provided by State law, the housing needs of extremely-low-income households, or those making less than 30 percent of area median income (AMI), is estimated as 50 percent of the very-low-income housing need, or about 3,256 units during the planning period.

Table C-1: Oakland Regional Housing Needs Assessment, 2023-2031

Income Level[1]	*Needed Units*	*Needed Units with 15% Buffer*	*Percent of Needed Units*
Very-Low-Income (0-50% AMI)	6,511	7,488	24.8%
Extremely-Low-Income (<30% AMI; part of Very-Low-Income in previous row)[2]	*3,256*	*3,745*	-
Low-Income (51-80% AMI)	3,750	4,313	14.3%
Moderate-Income (81-120% AMI)	4,457	5,126	17.0%
Above-Moderate-Income (>120% AMI)	11,533	13,263	43.9%
Total	**26,251**	**30,189**	**100.0%**

1. Income levels were determined by county median household income based on 2014-2018 American Community Survey data (Table B19013). The median income in Alameda County during this period was $92,574.

2. Extremely-low-income housing need is assumed to be 50 percent of very-low-income housing need.

Source: ABAG, Final RHNA Plan, December 2021

To meet "no net loss" requirements, an additional 15 percent buffer beyond the RHNA is assumed in each income category (see Table C-1). No net loss requirements (Government Code Section 65863) ensure that adequate sites are maintained throughout the planning period to accommodate the remaining RHNA by income category. To ensure that sufficient

[2] To quantify access to opportunity at the neighborhood level, State HCD and the California Tax Credit Allocation Committee (TCAC) convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health.

[3] The Final Plan Bay Area 2050, adopted by MTC-ABAG on October 21, 2021, is the region's official long-range plan. More information on Plan Bay Area 2050 is available at the following link: https://www.planbayarea.org/finalplan2050

capacity exists throughout the planning period, State HCD recommends that jurisdictions create a buffer of at least 15 percent more capacity than required or project site capacity at less than the maximum density to allow for some reductions in density at a project level. The City is employing a combination buffer and reduced capacity strategy to remain compliant with no net loss provisions.

C.1 Sites Inventory Overview

Oakland's 2023-2031 Housing Sites Inventory identifies sufficiently zoned land to accommodate the RHNA at all income levels. Total capacity is derived from both site-specific approaches—including pipeline projects and opportunity sites—as well as non-site-specific projections of accessory dwelling units (ADUs), discussed further below. In addition to providing adequate capacity to meet the RHNA, a buffer of at least 15.0 percent was identified in each income category to ensure that the City can meet the no net loss requirement pursuant to State law. See Table C-2 below for a summary of Oakland's residential capacity and ability to accommodate the 2023-2031 RHNA. The complete 2023-2031 Inventory is provided in Table C-~~25~~26 at the end of the appendix and in Figure C-1 below.

Based on the City's current General Plan and zoning regulations, there is sufficient capacity to accommodate its RHNA allocation with a buffer. In addition, rezoning will also occur in select areas to accommodate additional density such as parcels around BART stations, along transit corridors, and in existing residential neighborhoods to allow for "missing middle" housing. Sites included in the inventory reflect those that are most likely to develop during the planning period; as the development potential of sites newly made available by one of these rezoning efforts is difficult to project, these new sites are not considered as part of this inventory.

Table C-2: Summary of Residential Capacity to Accommodate the 2023-2031 RHNA

	Residential Units				
	Very-Low-Income[1,2]	*Low-Income[1]*	*Moderate-Income*	*Above-Moderate-Income*	***Total***

		~~**(115.6%)**~~**118.2%**	~~**(128.9%)**~~**129.3%**	~~**(161.8%)**~~**162.5%**	~~**(138.2%)**~~**139.5%**

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).

2. Extremely-low-income housing need is assumed to be 50% of the total very-low-income housing need, or about 3,256 units.

3. Potential development project totals are reduced by 10% to account for likelihood of pre-application or early-phase planning permits that may not move forward.

Figure C-1: City of Oakland 2023-2031 Housing Sites Inventory

Source: City of Oakland, 2022; Dyett & Bhatia, 2022

The Inventory was developed in a manner consistent with the City's mandate to affirmatively further fair housing (AFFH), pursuant to State law. Given the City's inability to meet the 5th cycle RHNA for lower- and moderate-income households (see Appendix A), an emphasis was placed on locating sites appropriate for these income groups – particularly in higher resource areas. However, it should be noted that increasing access to existing high resource neighborhoods represents just one strategy to increase access to opportunity for lower-income households – the City is also committed to investing in "lower resource" neighborhoods to increase opportunity for the existing residents of those neighborhoods – described further in Appendix D and the Housing Action Plan (Chapter 4). This includes investments in new affordable housing projects, which can help reduce displacement pressures in those neighborhoods and allow long-time residents to remain in their communities. As discussed in Chapter ~~3~~2, community feedback regularly expressed the opinion that existing Oakland residents may want to remain in their current neighborhoods and may not want to relocate to higher-resource areas that may not provide resources available in ethnic enclaves such as culturally specific grocery stores, churches, and other neighborhood amenities. Therefore, efforts to increase access to exclusive neighborhoods should also be paired with investing in and preserving the culture in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). Efforts taken to ensure that the Inventory remains compliant with the City's AFFH mandate are described further in Section C.4 below.

C.2 Credit Towards RHNA

Before identifying the availability of land to accommodate the city's 6th[th] Cycle RHNA, State HCD Guidance provides that the RHNA can be accommodated by looking at both projects that are currently in the development pipeline and by considering alternative means of meeting the RHNA.

Projects that have been approved, permitted, or receive a Certificate of Occupancy during the projection period (June 30, 2022 to December 15, 2030) can be credited toward the 6th cycle RHNA. It should be noted that the projection period differs from the planning period – while the planning period is the time between housing element due dates, the projection period is the time period for which the regional housing need is calculated.

According to State HCD, in order to credit units that are affordable to very-low-, low-, and moderate-income households toward the RHNA, a jurisdiction must demonstrate the units are affordable based on at least one of the following:

- Actual sales prices;
- Actual rents; or
- Subsidies, financing, or other mechanisms that ensure affordability (e.g., the development used funding from the state Multifamily Housing Program, federal HOME program, or low-income housing tax credits).

Pursuant to Government Code Section 65583.1, a variety of alternative methods may also be used to satisfy the RHNA. This includes projected accessory dwelling units (ADUs) and a limited number of rehabilitated, converted, or preserved units affordable to lower-income households. This section discusses the capacity of each method to credit residential development towards the RHNA, summarized in Table C-3 below.

Table C-3: Credit Towards the 2023-2031 RHNA

	Very-Low-Income	*Low-Income*	*Moderate-Income*	*Above-Moderate-Income*	***Total (units)***
6th Cycle RHNA	*6,511*	*3,750*	*4,457*	*11,533*	***26,251***

PIPELINE PROJECTS

Pipeline projects are those projects that have already received an approved planning permit~~,~~ that have not yet applied for a building permit~~,~~; are currently seeking a building permit~~,~~; or have already received an approved building permit~~,~~ and will likely be completed during the projection period. Where there are pipeline projects located on Inventory sites, actual proposed densities and affordability levels are reflected. Unit affordability levels within a project are proposed by the developer and then reviewed by both the Planning and Building Department and Oakland HCD to assess whether the unit mix conforms with State law and local regulations, as related to density bonus projects. Other projects that have applied for planning approval, submitted a pre-application, or are otherwise under review are discussed as opportunity sites below.

Pipeline projects are spread across the city, with the majority of new capacity in the Downtown, West Oakland, Eastlake/Fruitvale, and North Oakland/Adams Point areas. See Figure C-2 for the location and affordability of these pipeline projects. The affordability of pipeline units was determined based on the affordability levels or projected rents specified on the project proposal as approved by the City. Approximately ~~21.5~~20.9 percent of pipeline capacity is affordable for lower-income households, while ~~1~~5.3 percent is affordable for moderate-income households. The remainder is assumed to be affordable for above-moderate-income households. Table C-~~4~~5a below provides information on each pipeline project that have received entitlements but have not yet applied for a building permit, Table C-~~5~~5b provides information on pipeline projects that have received entitlements and are actively seeking a building permit or have been issued a permit, and Table C-6 provides a summary of the residential capacity of one- and two-unit pipeline projects. The full list of one- and two-unit pipeline projects is available in the full Inventory in Table C-~~25~~26.

The status of pipeline projects is pulled directly from the City's Accela permitting system. "Approved" and "Approved-Pending Appeal" have received entitlement and approval from City Council. Projects designated "Approved-Pending Appeal" should be considered approved, as Oakland's appeal period is only ten days after issuance – this designation is maintained to retain ~~consistent with the City's records.~~ consistency with the City's records. While there are various planning approval statuses, as shown in Table C-4, this sites inventory only includes projects that are Approved and Approved-Pending Appeal for maximum likelihood of development. For building permits, all projects are considered highly likely to be completed within the planning period, especially as expired permits can be reinstated up to three years after issuance. A survey of projects approved in 2015 shows that 98.6 percent of these projects were built in eight years. Thus, realistic capacity for pipeline projects is taken directly from provided from building permit applications. Other pre-application and early-stage projects with planning permits are described in 'Potential Development Projects.'

Expected completion dates are estimates provided by Planning staff based on typical project timelines~~.~~ ; all pipeline projects are estimated to be available within the Housing Element planning period (completed by 2031). Pipeline projects with lower income units (including extremely-low, very-low, low-, and moderate-income units) have either been entitled as a density bonus project, which requires lower-income unit affordability as part of development approval and construction concurrently with market rate units; or have deed restriction agreements either in progress or in place. Housing Action Plan 3.3.19 establishes a coordination system to coordinate tracking units with Development Services staff to ensure that as projects are developed, there is adequate capacity available citywide to meet RHNA targets and no net loss requirements.

Type of Permit	Permit Status	Description
Planning Permit	Approved	Planning entitlement was approved by Planning Commission and/or City Council.
	Approved - Pending Appeal	Project was approved by Planning Commission and/or City Council. The City's appeal period is only 10-days following issuance of planning approval. Projects with this status that are over 10 days past the approval status date should be considered approved. This status is maintained to retain consistency with the City's record keeping.
	Assigned	Project application was submitted and assigned to a Planner for review.
	Complete	Project or application is complete and moving forward for review by Planning Commission and/or City Council.
	Extended	Project application received planning approval from Planning Commission or zoning entitlements, but permit expired and applicant requested an extension.
	Filed	Project application was submitted to the City by applicant and fees are paid.
	Incomplete	Project was assigned to a Planner, but application lacked sufficient information to process or partial fees were paid and application status was changed from "Under Review" to "Incomplete."
	Under Review	Planner is reviewing the project application.
Building Permit	Permit Reinstated, Reinstated	After building permits are issued, the permit will become inactive if no inspection activity initiated by the applicant occurs for 180 days and the permit will expire after 730 days of inactivity as per California Building Code. Permits may become inactive or expire due to factors such as construction delays, labor or supply shortages, and/or the scale of the project itself. Once the applicant pays a fee to the City, the City will reinstate an active building permit.
	Permit Issued, Issued	The permit is approved and active. The applicant can begin construction and schedule inspection anytime they are ready.
	Permit Expired	The building permit is expired. Building permits expire if no inspection activity initiated by the applicant occurs for 730 days, as per California Building Code. Issued permits may be reinstated for up to 3 years in increments of 6 months to 1 year. Requests after 3 years require further review due to code changes, impact fees, etc.
	Application Inactive	The building permit application is considered inactive after 180 days of no activity from the applicant, due to issues such as insufficient documentation, payment of fees, etc. Permit applications may be reinstated for up to 3 years in increments of 6 months to 1 year. Requests after 3 years require further review due to code changes, impact fees, etc.
	On Hold - Fee Due	The issuance of the permit is on hold, requiring applicant action to address payment of fees. Once fees are paid and the applicant meets all the documentation requirements, the building permit will be issued.
	Permit on Hold	The issuance of the permit is on hold requiring applicant action to address issues such as insufficient documentation, payment of fees, or missing required submittals from applicant including regulatory agreements, Construction Management Plans, recycling requirement, etc.
	Plan Review in Progress	The application has been referred to Building Bureau Engineers for review. This is one of the required reviews that occurs during the standard building permit application review process, prior to approving the application and issuing the building permit.
	Final Check - On Hold	The last step prior to building permit issuance is Final Check by the City and it is on hold due to incomplete status for one or more of the following: verification of stamped plans, required standard reviews by City, fees paid, required submittals from applicant, etc.

1. **Please see Table C-4 for Planning Permit Status Description**
2. **"Density Bonus" indicates the project is entitled to include lower and moderate-income units, and a regulatory agreement is pending. Density Bonus Projects must provide the agreed-upon number of lower and moderate-income units and are required to maintain those units as part of development approval and must construct the units concurrently with market rate units. "Density Bonus Regulatory Agreement Recorded" indicates there is an agreement on record.**

1. Please see Table C-4 for Planning Permit Status Description
2. "Density Bonus" indicates the project is entitled to include lower and moderate-income units, and a regulatory agreement is pending. Density Bonus Projects must provide the agreed-upon number of lower and moderate-income units and are required to maintain thos affordability as part of development approval and must construct the units concurrently with market rate units. "Density Bonus Regulatory Agreement Recorded" indicates there is an agreement on record.

Figure C-2: Pipeline Projects

PROJECTED ~~ADUS~~ACCESSORY DWELLING UNITS

Since 2017, the State has continued to pass and implement laws that have removed obstacles to the construction of Accessory Dwelling Units (ADUs) and increased their development potential. Like other California cities, Oakland has continued to amend its Planning Code to remain compliant with new ADU development regulations. The City has seen continued interest in ADU development and has continued to approve building permits for ADU development.

Cities may consider the development potential of ADUs or junior ADUs (JADUs) to meet the RHNA. To determine the potential of ADU development during the 6th cycle, the City has analyzed building permit approval patterns since 2018. Table C-7 below shows ADU permits issued from 2018 to 2021, during which an average of approximately 247 permits were issued annually. Over the course of the upcoming eight-year planning period, the City anticipates the development of ADUs at least at the same pace as recent approvals, or 1,978 total ADUs (about 247 average permits per year times eight years). This is a conservative estimate, which is likely impacted by the drop in ADU approvals during the onset of the COVID-19 pandemic—as evidenced by the drop off between 2019 and 2020—and does not account for potential increased development capacity as restrictive regulations continue to be eased.

Table C-7: Annual ADU Approvals, 2018-2021

Year	*ADU Building Permits Issued*
2018	252
2019	289
2020	174

Projected ADU Development (2023-2031)	**1,978**

Source: State HCD, Annual Progress Reports, 2018-2021

As an alternative housing model, ADUs can often be a potential source of affordable housing. To estimate affordability during the projection period, the City used the results of its recent online survey of ADU owners.[4] According to the survey, all ADUs are considered affordable to moderate- or lower-income households. Although the survey had limited responses to the question regarding monthly rent, it provides useful local information on ADU affordability in Oakland and is used to estimate the breakdown of projection affordability. To ensure that affordability projects are realistic, the affordability breakdown is further modified based on regional technical assistance provided by ABAG. Table C-8 below summarizes the estimated proportion of ADUs affordable to each income level and the projected number of ADUs by affordability during the planning period. Housing Action Plan actions also seek to implement

[4] This survey was conducted in preparation of the "Oakland ADU Initiative: Existing Conditions and Barriers Report," which was published January 2020 and revised June 2020. There were 56 responses to the question "How much does the current ADU occupant pay in rent per month? If the occupant is staying in the ADU for free, then mark $0."

new ADU standards that streamline approvals to address unpermitted units (Action 3.4.9), provide financial incentives for lower-income homeowners to legalize ADUs (Action 3.2.4); reduce constraints to development of ADUs (Action 3.2.5); and monitor affordability of permitted ADUs (Action 3.2.6).

Table C-8: Projected ADU Capacity by Affordability Level, 2023-2031

Income Level	*Local Affordability Breakdown*	*Regional Affordability Breakdown*	*Modified Affordability Breakdown*	***Projected ADU Capacity***
Very-Low-Income	45.9%	30.0%	35.0%	**692**
Low-Income	45.9%	30.0%	35.0%	**692**
Moderate-Income	8.1%	30.0%	30.0%	**593**
Above-Moderate-Income	0.0%	10.0%	0.0%	**0**
Total Units	**100.0%**	**100.0%**	**100.0%**	**1,978**

Source: Oakland ADU Initiative, Existing Conditions and Barriers Report, January 2020 (Revised June 2020); ABAG, Technical Assistance – Using ADUs to Satisfy RHNA, 2022; State HCD, Annual Progress Reports, 2018-2021

ADEQUATE SITES ALTERNATIVE

According to State HCD, under limited circumstances a local government may credit up to 25 percent of their adequate sites requirement per income category through existing units.[5] These limited circumstances include sites that are:

- Substantially rehabilitated;
- Located on a foreclosed property or in a multifamily rental or ownership housing complex of three or more units that are converted from non-affordable to affordable rental;
- Units in a motel, hotel, or hostel that are converted from nonresidential to residential and made available for people experiencing homelessness as part of a long-term recovery response to COVID-19;
- Preserved at levels affordable to low- or very-low-income households, where the local government has provided those units with committed assistance; ~~and~~or
- Preservation of mobile home park through acquired spaces.

According to Oakland HCD's 2021-2023 Strategic Action Plan, the City has acquired and converted and/or preserved 600 affordable units between 2018 and 2020. As an ongoing City strategy, there are a number of units that the City will convert and/or preserve during the

[5] Further specific conditions that sites included under this option must meet are provided by State HCD on their website: https://www.hcd.ca.gov/community-development/building-blocks/site-inventory-analysis/adequate-sites-alternative.shtml

2023-2031 planning period. Table C-9a below presents ~~these~~ projects in which the City has committed assistance through a legally enforceable agreement such that the projects can be used to meet the RHNA. As indicated in the footnotes, the City will provide committed assistance for the duration of the RHNA period, and funds are indicated in the "Funding Sources" column. Both properties represent conversions of hotels to permanent housing for Oaklanders experiencing homelessness, largely funded by Project Homekey grants. The affordability of these projects reflects the actual affordability levels pursuant to the regulatory agreements that will maintain such income-restricted units. ~~Table C-9b includes information demonstrating these projects meet requirements for adequate sites.~~

The City anticipates that additional units will be created through the 2023-2031 planning period through further opportunities for preservation and rehabilitation Notices of Funding Availability, Acquisition and Conversion to Affordable Housing (ACAH) Program Notices of Funding Availability, and future Project Homekey grants. However, only projects that already have committed assistance at the time of this Housing Element's adoption can be utilized under the Adequate Sites Alternative requirements.

1. Per FY2023 MTW Annual Plan, OHA plans to fund a local capitalized operating agreement for a 15-year term for project Homekey funding recipients. Project opening dates are projected to be November 2022.

2. Project sponsors BACS and Memar Properties, Inc. are under contract to purchase the property by March 31, 2022.

3. Above-moderate-income units include manager's units.

C.3 Availability of Land to Address the Remaining RHNA

Oakland has very few vacant or "greenfield" sites available for additional housing. Further, development is constrained by environmental conditions—including wildfire risk in the hills and hazards in and near industrial lands—as discussed in Appendix F. However, the City has a long track record of encouraging infill and high density projects, and there are many opportunities for these types of projects across Oakland. This section provides an overview of the Inventory's residential capacity beyond the RHNA credits described above, as well as a discussion of the methodology behind realistic capacity assumptions and opportunity site selection. Table C-10 below summarizes the residential capacity available on opportunity sites. The complete 2023-2031 Inventory is provided in Table C-~~25~~26 at the end of the appendix and in Figure C-1 above.

Table C-10: Summary of Opportunity Site Residential Capacity

	Very-Low-Income[1]	*Low-Income*[1]	*Moderate-Income*	*Above-Moderate-Income*	***Total Units***

1. Low- and very-low-income capacity on opportunity sites is consolidated per default density assumptions as described in Government Code Section 65583.2(c)(3).
2. Remaining housing need is the difference between the RHNA and the units credited towards the RHNA through pipeline projects, ADU projections, and adequate alternative sites.
3. Capacity shortfall/surplus is the difference between the remaining housing need and the total residential capacity of opportunity sites.

SITE DEVELOPMENT CAPACITY

Government Code Section 65583.2(c) requires, as part of the analysis of available sites, a local government to demonstrate the projected residential development capacity of the sites identified in the housing element can realistically be achieved. In order to calculate realistic capacity in Oakland, a survey of recently constructed and approved projects from 2018 through 2021 was conducted to understand current and ongoing residential development patterns. Completed projects were derived from 2018-2020 Annual Progress Reports (APRs) and Accela records pulled in March 2022 for completed and entitled projects in 2021. This includes some pipeline projects.

The amount of density provided in each project was compared to the maximum density as allowed by the applicable zoning designation, and then stated as a percentage of meeting the maximum allowable density. Densities are calculated as dwelling units per acre (du/ac). Each project is assigned to its appropriate Planning Area, which is derived from the Oakland Department of Transportation (OakDOT) Geographic Equity Toolbox. The locations of projects included in the survey are shown in Figure C-3 below.

Table C-~~11~~11a below summarizes the results of this survey and provides realistic capacity estimates for opportunity sites included in the Inventory. Pipeline development projects provide a snapshot of larger projects developed and approved from 2018-2021, and a full table of all projects included in the survey (including completed projects) is shown in Exhibit 1 of this appendix. Realistic capacity is based on the average percentage of maximum permitted density met by developments within Planning Areas by base zone and height area. If a height area of a particular base zone has no recent development history, the average percent of maximum density met for the entire base zone within that Planning Area is assumed. If there is no development history for a base zone within a Planning Area, the average percent of maximum density met of related or similar base zones within the Planning Area is assumed. Finally, if there is no comparable development history within the Planning Area, citywide averages for the base zone and height area are assumed. If development history shows that projects typically exceed the maximum permitted density, then realistic capacity is capped at that maximum density.

Realistic capacities provided in Table C-~~11~~11a are applied to sites that do not otherwise include active development applications. These sites are also subject to *additional* capacity modifiers, as shown in Table C-13.

The presence of a development application is the strongest indicator that a site will be developed with housing during the planning period. Development projects listed in as "potential projects", at a minimum, have submitted for a formal entitlement application or for pre-application review (a Preliminary Review Procedure (PRP) application or an SB 330 preliminary application). Where a site has an ongoing pre-application or planning permit application, ~~requested densities and affordability for the project are used. Further,~~or where ~~additional capacity information is available for a site, such as~~ there is expressed developer interest or preliminary discussions, ~~these assumptions are used to~~ a modifier of 0.9 is applied to densities and affordability for the to approximate realistic capacity.

As described in Appendix F: Constraints, Oakland permits housing in almost all zones, with the exception of some industrial zones. Within some commercial zones, such as CN-1, CN-2, CN-3, CC-1, CC-2, CC-3, and some D-BV zones, 100 percent residential projects may be limited to maintain ground floor commercial in commercial districts. Despite this conditioning, several projects in commercial zones have developed from 2018 to 2021, and realistic capacity assumptions reflect the densities of completed and approved projects in each Oakland neighborhood. Of all pipeline development sites, approximately 25 percent of all project units are within these commercial zones, with many projects far exceeding the maximum capacity, as shown in Table C-11. In addition, future development on parcels within the Housing Sites Overlay Zone will be required to include a majority residential use,and will not allow a 100% non-residential use in this overlay.

1. Same density regulations as abutting RH, RD, or RM Zone. When there is more than one of these abutting zones, then the regulations of the zone allowing the greatest density shall apply.

2. Density is limited to one unit per lot for parcels less than 4,000 sq. ft. in base zones RM-2 through RM-4. If a parcel in the RM-2 and RM-3 Zones is larger than 4,000 sq. ft., then two units per lot are permitted ~~in base zones RM-2 and RM-3~~ by right, while 17.42 du/ac is permitted in RM-2 with a Conditional Use Permit (CUP) and 29.04 du/ac is permitted in RM-3 with a CUP. If a parcel in the RM-4 Zone is larger than 4,000 sq. ft., up to four units are permitted by right, while 39.6 du/ac is permitted in RM-4 with a CUP. In the case of base zones RM-2, RM-3, and RM-4 below 4,000 sq. ft. assume the site will develop at the maximum allowed unit per lot if the average percent of density met is above 50 percent – otherwise assume development is not feasible. In the case of base zone RM-4 above 4,000 sq. ft., apply the percentage of density met to the permitted 39.6 du/ac.

Non-Residential to Residential Conversion

Oakland permits residential development on a number of commercial and other non-residential base zones. The City has a substantial track record of encouraging and facilitating the conversion of non-residential uses to residential or mixed uses. See Table C-~~12~~12a for a summary of parcels that converted from existing non-residential uses during the 5th cycle planning period, based on use changes between historic 2014-2015 and 2021 Alameda County Assessor parcel data.[6] The locations of these conversions are provided in Figure C-4. Based on residential unit counts provided in the 2021 Assessor data, there are about 8,487 residential units located on converted parcels. These parcels are not included in the Inventory but are rather provided to demonstrate that additional conversions from non-residential to residential uses are likely during the planning period. ~~Add note about pipeline %. Approximately x units in the pipeline (table x) are on sites that result from conversion to nonresidential to residential units.~~

6. Assessors data does not provide information on what affordability level these uses were converted to.

Appendix C: Sites Inventory

Table C-~~12~~12a: Summary of Non-Residential to Residential Conversion, 2014-2021

Conversion Type	*Number of Converted Parcels*	*Number of Residential Units*
Commercial to Residential	481	6,649
Commercial to Residential Mixed-Use	16	720
Industrial to Residential	87	766
Industrial to Residential Mixed-Use	1	24
Institutional to Residential	28	328

Mixed-Use and Infill Development

The City has a significant track record of encouraging mixed-use and infill development. According to APRs submitted to State HCD, all new development in Oakland since 2018 is considered infill development. As noted in Table C-12, which provides a list of completed and approved[7] projects from 2018 to 2021, about 744 units developed on parcels that converted from solely non-residential uses to mixed residential uses.

A sample of projects that converted from an existing commercial or industrial use to a residential use are shown below in table C-16a.

[7] Includes one pre-application project

Development Capacity Modifiers

As noted previously, Oakland's RHNA has increased by nearly 77.8 percent between the 5th and 6th RHNA cycles. However, the City fell short of meeting its lower- and moderate-income housing need during the planning cycle, and many sites included in the 5th cycle housing inventory did not develop with housing. An analysis from the UCLA Lewis Center confirmed that Oakland was on track to develop no more than about 21.0 percent of the sites identified during the 5th RHNA cycle as opportunity sites.[8] However, on those sites that were developed, the number of units developed was three times higher than anticipated as the realistic capacity. Further, a significant amount of residential development—nearly 73.0 percent of all residential development in Oakland—occurred on sites that were *not* identified as opportunity sites. These data reflect the challenges in predicting where development will occur but also show that Oakland's development standards generally allow for higher density development than anticipated.

Nonetheless, the City of Oakland has and continues to undertake a robust effort to identify those sites, with the assistance of community input, that provide the best opportunity for development for the upcoming 6th RHNA Cycle. Further, to meet this increased housing need and increase capacity citywide, the City is committing to a number of actions meant to streamline the development process and incentivize affordable housing development. This includes the implementation of objective design standards, increased permitted densities in historically lower density and higher resource areas, revisions to restrictive development standards, and other zoning reforms expected to increase density overall – as described in the Housing Action Plan. Despite these efforts, the development capacity of opportunity sites should be discounted to account for falling short of previous RHNA goals.

Opportunity sites included in the Inventory are those likely to redevelop with housing considering recent development patterns as well as a variety of factors that indicate incentives to redevelop, as discussed above. While Table C-11 accounts for land use controls and typical densities of residential projects, it is likely that not every site selected in the Inventory will develop with housing during the planning period and that some housing projects will occur on sites not considered in the Inventory. To account for this fact, additional development capacity modifiers are applied to all opportunity sites to discount total residential capacity. This means that other opportunity sites are subject to both realistic capacity modifiers (Table C-11) as well as development capacity modifiers (Table C-13). Development capacity modifiers are derived from the existing use of a site, as well as its assessed value (AV) ratio and floor area ratio (FAR). When a site has a low AV ratio or FAR, it indicates that the site is underutilized and has potential to redevelop – especially in Oakland, where demand for housing is extremely high. Sites with pre-applications Table C-13 below summarizes the percentage modifiers applied to opportunity sites. ~~These modifiers are not applied to sites with ongoing pre-application or planning permit applications, or have other~~

[8] Kapur et al., "What Gets Built on Sites that Cities 'Make Available' for Housing." *UCLA Lewis Center for Regional Policy Studies.* August 2021. Available at https://www.lewis.ucla.edu/research/what-gets-built-on-sites-that-cities-make-available-for-housing/.

~~indications of capacity, as these sites have a very high likelihood of development during the planning period.~~

Table C-13: Development Capacity Modifiers

Existing Use/Site Type	*AV Ratio*	*FAR*	*Capacity Modifier*
Pre-Application/Early-Stage Planning Application[1]			90%
Vacant	-	-	90%
Non-Vacant	Low (<0.5)	Low (<0.5)	80%
	Low (<0.5)	Medium to High (>0.5)	60%
	Medium (Between 0.5 and 1.0)	Low to High (>0.0)	40%

1. This modifier is applied to "Potential Project" totals in Table C-1, as the capacity likelihood would not be site-specific

Source: Dyett & Bhatia, 2022

OPPORTUNITY SITE SELECTION

To identify adequate sites and determine realistic capacity for the 2023-2031 Inventory, a parcel-based analysis of properties within City limits was conducted using Alameda County Assessor data supplemented with information from the City. This analysis was carried out in accordance with the framework provided by the 2020 State HCD Housing Element Site Inventory Guidebook. This section outlines how sites were selected, as well as the assumed affordability level of those sites.

Non-residential pipeline projects, completed projects, and those under construction but likely to be completed prior to the start of the projection period are excluded from consideration, as these sites are unlikely to develop with additional housing over the next eight years. Sites that are very small and not viable for lot consolidation (i.e., less than 0.1 acres with no common ownership across adjacent parcels) are also excluded.

The remaining vacant and non-vacant sites were then considered as potential sites to include in the Inventory. Non-vacant opportunity sites include those with an existing use that is likely to discontinue during the planning period, those with expressed developer interest, and those generally underutilized or developed with low intensity, such as underperforming strip commercial uses, warehouses, sites with mixed-use potential, and sites located in specific plans that encourage higher density development.

Sites are primarily considered underutilized based on their AV ratio and FAR. A low AV ratio, which is typically anything below 1.0, means that the land is worth substantially more than the improvements built on top of it – indicating that there is a strong incentive for the property owner to redevelop with new uses than can command higher rents or sales prices. Similarly, a low FAR indicates that building area of the structure is small compared to the

entire site, which indicates potential for redevelopment at higher intensities. When available, building age was also considered in evaluating underutilized sites. Further, the existing uses and location of sites in relationship to current development patterns were also considered.

Environmental constraints were also considered in site selection. Sites located in the Alquist-Priolo fault zone, 100-year flood hazard areas mapped by Federal Emergency Management Agency (FEMA), and Very High Fire Hazard Severity Zones (VHFHSZ) were excluded from inclusion in the Inventory. Contaminated sites and those with known hazards were excluded for lower-income projects. However, environmentally constrained sites were not excluded if they contain planned projects with environmental mitigation provisions already factored into development costs or if a developer has shown interest in development. Further, environmentally constrained City- or publicly-owned sites that have been deemed feasible for residential development are also included. There are no other known environmental constraints that could substantially impact housing development on identified sites during the planning period.

Opportunity sites were also selected in a manner consistent with the City's mandate to affirmatively further fair housing. Housing sites, especially lower-income sites, were selected as to reduce segregation and increase affordable development in high resource neighborhoods, where possible. Sites located in Priority Development Areas (PDAs) and near transit were also prioritized for lower-income housing. A full analysis of the sites inventory as it relates to fair housing is provided in Section C.4 and Appendix D.

Housing Site Selection Engagement

Extensive community outreach was conducted in identifying sites appropriate to include in the Inventory. The initial pool of sites was provided by City staff and supplemented with suggestions made by Oakland City Councilmembers, community members, and housing organizations. These sites included both vacant sites and non-vacant sites with additional development capacity.

During the four Housing Element workshops, which were open to the public, Oakland residents provided suggestions for housing sites throughout the city. The first housing workshop was focused on sites and was accompanied by an online interactive mapping survey where residents could select specific sites for housing. The survey was open from February 11, 2022, through March 7, 2022, received 480 individual responses, and generated a total of 1,976 unique map responses. It included two interactive mapping questions regarding potential locations for future housing in the city of Oakland. Feedback from the first focus group meeting—which had an emphasis on housing sites—was also incorporated. Sites selected as part of the survey are noted in Table C-25 below.

Respondents to the online interactive mapping tool and survey wrote enthusiastically about a variety of areas located around Oakland appropriate for housing through 1,275 individual survey comments. Areas included surface parking lots, underutilized sites near transit, and areas with high resources that would be appropriate for housing. In selecting specific locations, respondents most frequently selected sites near downtown, along Broadway and near the Rockridge Bay Area Rapid Transit (BART~~),~~) station, in lower Dimond, and along

Macarthur Boulevard in Upper Dimond/Redwood Heights. Through 701 individual comments, respondents mentioned a variety of sites including empty/vacant lots, surface parking lots, potential sites near transit, and high resources areas. See Figure C-5 for a heat map of suggested housing sites provided via the online survey.

Housing Site Affordability

For a site to be designated as capable of accommodating development for lower-income households, Government Code Section 65583.2(c)(3) requires that such sites in urban jurisdictions allow for at least 30 du/ac, known as the "default density." In metropolitan counties, such as Alameda County, zoning that allows for residential density of at least 30 du/ac is considered appropriate to accommodate the economies of scale needed to produce affordable housing. In this Housing Element, all vacant and non-vacant sites identified to accommodate lower-income units are located in zoning designations that permit at least 30 du/ac. The only exceptions to this are pipeline projects and other potential development projects that include affordable units and are located in a lower density designation.

Sites that are permitted to develop with at least 30 du/ac but are not otherwise appropriate for lower-income housing (e.g., are located above environmental constraints, are assumed to develop below 30 du/ac, or do not meet State HCD size parameters) are used to meet the moderate-income RHNA. Other sites that permit medium densities below 30 du/ac are also considered suitable for moderate-income housing, as are larger sites in the RM-2 and RM-3 base zones since these projects are likely to develop with mixed uses that can support moderate-income housing. All other sites in the RH-1 through RH-4, RD-1, RD-2, and RM-1 base zones are considered appropriate for above-moderate-income housing, as are smaller sites in the RM-2 to RM-4 base zones.

Finally, a number of sites—including those with pre-applications indicating a mixed-income development and other potential projects—are likely to develop at a variety of income levels. Where specific information has been provided by the developer on affordability levels and total capacity, these estimates are used to approximate realistic capacity~~.~~ (with a 0.9 capacity modifier, as described above). Where specific affordability levels and capacity have not been provided, the affordability breakdown is assumed to be as follows – 24.0 percent lower-income, 2.0 percent moderate-income, and 74.0 percent above-moderate-income. This breakdown is derived from the average affordability of mixed-income projects surveyed in Figure C-3. Larger opportunity sites (i.e., those larger than 10 acres) with high potential capacities are also assumed to develop as mixed-income.

As discussed further below, a mixture of incomes is also assumed on larger (i.e., greater than 10 acres) City- and publicly-owned sites to avoid an overconcentration of affordable housing. Further, many of these sites are in lower resource or high segregation and poverty neighborhoods. These larger City-owned sites are assumed to develop with a higher proportion of affordable housing (30.0 percent lower-income, 20.0 percent moderate-income, and 50.0 percent above-moderate-income) than other mixed-income sites due to the prioritization of affordable housing projects on City-owned land. Following Council direction and City priorities, City-owned land should be prioritized for uses that maximize the production of affordable housing; the disposition of such sites should follow a transparent and accountable public process that is inclusive of Oakland's many diverse communities; and projects should adhere to certain green building standards and local hire requirements. Additional prioritization efforts are outlined in the Housing Action Plan. City- and publicly-owned sites between 0.5 and 10 acres in size are assumed to accommodate 100 percent

affordable housing, and City-owned parcels have either been declared "surplus" or are otherwise are planned for housing development – see Appendix E for more details.

Potential Development Projects

While pipeline projects are those that have received planning approval or are in the building permit process, there are also a number of other potential projects at various stages in the planning process. This includes projects ranging from the pre-application stage to those with filed and under review planning permits. ~~Such projects are considered likely to develop, and the actual project densities and affordability provided in those applications are assumed here. In the case where a pre-application project does not specify capacity or affordability, or proposes development that exceeds the permitted density, realistic capacity assumptions as described above are applied.~~ As these projects have not yet received entitlement, they cannot be credited towards the RHNA. However, a pre-application or an application for a planning permit indicates developer interest and that a site is likely to redevelop with housing. Where a potential project is on non-vacant land, this is counted towards the reliance on non-vacant sites.

The presence of a development application is the strongest indicator that a site will be developed with housing during the planning period. Development projects listed in as "potential projects", at a minimum, have submitted for a formal entitlement application or for pre-application review (a Preliminary Review Procedure (PRP) application or an SB 330 preliminary application). As noted above, 98.6 percent of planning projects approved in 2015 developed as housing over an eight-year period. While there is no available data on how many pre-application or early-phase planning application projects receive an 'approved' status, the total inventory applies a modifier of 0.9 to densities and affordability drawn from the pre-application or planning permit application to approximate realistic capacity. This capacity modifier is applied to the "Potential Projects" total as shown in Table C-1, as it would not apply to any one site.

Distribution of unit affordability is taken from applications. In the case where a pre-application project does not specify capacity or affordability, or proposes development that exceeds the permitted density, realistic capacity assumptions as described above are applied.

These projects are derived from Accela records pulled in March 2022 and are provided in Table C-14 below. Actions in the Housing Action Plan support development of these potential sites through streamlining the permitting process (Action 3.6.1); expanding by-right approvals and implementation of entitlement reform (Action 3.6.3); continuing online permitting (Action 3.6.5); providing access to low-cost financing for development (Action 3.3.6); adjusting or waiving City fees and payment timing for affordable housing developments (Action 3.3.9); and expanding the availability of predevelopment finding and low-debt products for affordable housing development (Action 3.3.13).

Available 5th Cycle RHNA Sites

There are a number of opportunity sites selected as part of the 5th cycle RHNA that did not develop over the 2015-2023 Housing Element period and are still available for housing. Pursuant to Government Code Section 65583.2(c), sites identified to accommodate a portion of Oakland's lower-income RHNA that were also contained in previous ~~housing element~~Housing Element cycles must be zoned at residential densities of at least 30 du/ac and must also be rezoned to allow for residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households. This applies to non-vacant sites included in at least one prior cycle and vacant sites included in two or more consecutive cycles. These requirements do not apply to the moderate- and above-moderate-income RHNA.

The proposed Inventory contains sites identified to accommodate a portion of Oakland's housing need for lower-income households that were included during the previous ~~housing element~~Housing Element cycles. There are six vacant parcels that were included in both the 4th and 5th ~~housing element~~Housing Element cycles (APNs 044 501400603, 044 501400500, 012 098602501, 032 208405100, 043 462000102, 023 047602101, 010 077202001, 032 208405100). One of these parcels (APN 012 098602501) is part of a pipeline project and may be carried forward. Of the remaining five parcels, ~~two~~three parcels (APNs 044 501400603, 044 501400500) are part of a single City-owned surplus site that is currently subject to a Homekey proposal at City Council direction for a 124-unit modular development. ~~An additional parcel (APN 032 208405100) is part of a different City-owned surplus site currently subject to a Homekey proposal at City Council direction for 124-unit affordable modular development.~~ The remaining two sites are located in high resource areas that permit development over 30 du/ac and will be subject to by right zoning provisions as part of this Housing Element's Housing Action Plan to allow development with at least 20 percent affordable housing~~.~~ (Action 3.4.10).

There are 27 non-vacant parcels included in at least one prior RHNA housing element cycle (APNs 001 016900100, 001 017100200, 025 073300802, 025 073300803, 008 062403700, 041 416402403, 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702, 016 142402205, 003 003900300, 002 005500200, 010 078001508, 004 007700300, 006 001702200, 006 001702100, 006 001702000, 006 001701800, 006 001701900). Twelve of these parcels are part of pipeline projects and may be carried forward (APNs 010 078001508, 004 007700300, 006 001702200, 006 001702100, 006 001702000, 006 001701800, 006 001701900, 001 016900100, 001 017100200, 025 073300802, 025 073300803, 008 062403700, 041 416402403, 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702, 016 142402205, 003 003900300, 002 005500200, 008 062403700) and an additional four parcels are included as part of active permit applications or pre-applications (APNs 008 066700503, 010 079800307, 025 071900701, 013 110802401, 001 020901500, 026 083402201, 002 002700609, 014 124000901, 008 062100807, 011 083600101, 026 083500601, 025 072000702). Two parcels (APNs 025 073300802, 025 073300803) are City-owned surplus sites with priority

for affordable housing production, and an additional site (APN 041 416402403) is owned by BART. All but two of the remaining sites are located in higher resource areas. These sites are permitted to develop over 30 du/ac and will also become subject to by right zoning provisions as part of this Housing Element's Housing Action Plan.

There are also several moderate- and above-moderate-income RHNA sites included in the inventory that were included in previous ~~housing element~~Housing Element cycles. Realistic capacity and development likelihood assumptions as described above are used to estimate the capacity of available 5th cycle sites included in the 6th cycle Inventory. Table C-15 provides a summary of development capacity for available 5th cycle RHNA sites by Planning Area. Specific sites carried over from the 4th and 5th ~~housing element~~Housing Element cycles are noted in Table C-~~25~~26.

New Opportunity Sites

New opportunity sites not included in previous ~~housing element~~Housing Element cycles were identified to meet the remaining RHNA. These sites include both vacant and non-vacant sites and consist of City-owned sites, sites owned by BART, sites located within a specific plan area, and other sites with expressed or potential development interest. ~~These sites, along with the rest of the Inventory, can be found in Table C-25 at the end of this appendix.~~As most of these sites have lower FAR and AV ratios, appropriate capacity modifiers as described in Table C-13 are also applied to these sites, including vacant sites

City-owned sites are deemed appropriate for lower-income housing as they are prioritized for development that maximizes the production of affordable housing and typically support the densities required.[9,10]

Similarly, BART-owned sites are permitted to develop at high densities pursuant to AB 2923, which mandates a baseline density of 75 du/ac.[11] When developed with lower-income housing, these sites are also permitted to undergo a streamlined approval process pursuant to SB 35. BART has also reviewed property sites and designated them appropriate to include in the inventory.

Oakland's major specific plan areas also provide opportunities for higher-density residential development. The West Oakland Specific Plan (WOSP), the Lake Merritt Station Area Plan (LMSAP), the Broadway Valdez District Specific Plan (BVDSP), and the Draft Downtown Oakland Specific Plan (DOSP) in particular contain a number of opportunity sites. Many of the sites in these areas are parking lots, as shown in Table C-16a. These projects are also more likely to redevelop, as they may "tier" off the specific plan environmental impact reports. All of the sites below are also subject to capacity modifiers as described in Table C-13.

Other opportunity sites include those suggested by community members and members of the Oakland City Council, those likely to redevelop during the planning period due to current use obsolescence, and sites owned by faith-based organizations that are likely to be developed in partnership with the Local Initiatives Support Coalition (LISC).[12] LISC and other faith-based organizations have submitted interest in residential development, and details of the projects are provided in Table C-16a when available. The development capacity of these new opportunity sites is summarized in Table C-~~16~~16a below.

~~**Table C-16: Development Capacity of New Opportunity Sites, 2022**~~

	~~*Total Residential Capacity (units)*~~[1]		
~~*Site Type*~~[1]	~~*Lower-Income*~~	~~*Moderate-Income*~~	~~*Above-Moderate-Income*~~
~~Vacant~~	~~1,241~~	~~227~~	~~1,832~~

[9] The City-owned Barcelona Parcel (APN 048 687000200) is assumed to develop as mixed-income in line with the medium density development scenario. See: https://cao-94612.s3.amazonaws.com/documents/Barcelona-Parcel-Analysis-PPT-10-30-19-FINAL.PDF

[10] As noted previously, there are a number of market rate units assumed on City-owned land due to a mixed-income assumption on sites larger than 10 acres. This is to ensure that affordable units are not overconcentrated in any one project or geographic location. Further, although City Council provided direction to prioritize 100% affordable development in the December 2018 Public Lands Policy resolution, no specific City policy has yet been implemented to enforce this provision. The City will utilize public land to maximize the production of affordable housing – which may include mixed-income projects that can produce more total units than a 100% affordable project would be able to.

[11] These projects meet the default density of 30 du/ac and are prioritized for affordable housing projects, and are thus assumed to appropriate to accommodate lower-income development.

[12] Through the Alameda County Housing Development Capacity Building Program, Bay Area LISC provides targeted technical assistance, training, and tailored grant resources to support a cohort of faith-based landowners to develop affordable housing on their properties. The roster of projects currently in the program was provided by LISC during the community outreach process, and includes residential capacity and affordability levels for each project.

Site Type[1]	Total Residential Capacity (units)[1] Lower-Income	Moderate-Income	Above-Moderate-Income
City-Owned	1,949	361	1,151
BART-Owned	633	0	0
WOSP	31	157	0
LMSAP	54	0	0
BVSP[2]	-	-	-
DOSP	768	201	420
LISC Faith-Based Projects	252	56	19
Potential Development Projects	1,866	211	6,525
Total Development Capacity (units)	**7,227**	**1,191**	**8,260**

1. Sites may be contained in multiple categories, therefore unit counts should not be summed. Does not include the capacity of 5th cycle RHNA sites or pipeline projects. Potential development projects are included in the totals.

2. Opportunity sites located in the BVSP were all included in the 5th cycle RHNA.

*Source: City of Oakland, 2022; Dyett & Bhatia, 2022*Sites owned by the City are shown in Table C-16b. Action 3.3.1 in the Housing Action Plan notes will continue to release land designated as surplus for development of affordable housing and other uses. The City will continue to release one to two surplus sites per year, noticing them via a Notice of Availability (NOA) to local Bay Area affordable housing developers, as well as to all California Housing Finance Agency (CalHFA) housing sponsors. All surplus sites are tracked on the City's website and NOAs are available on the website as well. All surplus sites disposed of pursuant to the SLA will include a minimum of 25 percent affordable units and in many cases will include up to 100 percent affordable units.

OTHER CONSIDERATIONS

In addition to realistic capacity and density provisions, there are several other considerations that should be factored into site selection and capacity. This section provides an assessment of Oakland's 2023-2031 Inventory in light of these factors.

Site Size

State HCD has established parameters for the size of lower-income sites in view of feasibility considerations. Parcels that are less than 0.5 acres in size are generally not considered suitable for lower-income housing development as they may not support the number of units necessary to be competitive and to access scarce funding resources. Parcels that are larger than 10.0 acres in size are also not considered suitable, as they made lead to an over concentration of affordable housing or make the project infeasible. These parameters do not apply to sites selected for moderate- or above-moderate-income housing. There have been a number of recent projects with lower-income units that have been permitted on parcels smaller than 0.5 acres in recent years. These projects, as reported in the City's Annual Progress Reports, are provided in Table C-17 below. Further, on November 16, 2021, the City updated its zoning regulations to authorize residential occupancy of recreational vehicles (RVs), mobile homes, and manufactured homes on private property in all areas where housing is permitted. While these housing options may not meet State HCD's parameters for site size, they provide an additional avenue through which housing for extremely-low-income and unhoused residents can be provided.

1. Affordable to lower-income households.

2. Residential capacity not related to non-vacant sites.

Source: State HCD, Annual Progress Reports, 2018-2021; City of Oakland, 2022

There are 81 parcels in the inventory smaller than 0.5 acres selected to accommodate lower-income units (only including those parcels not part of a pipeline project). However, 34 of these parcels are part of sites that are larger than 0.5 acres in total. An additional 27 of these parcels are considered potential projects due to either an active permit application or pre-application – these proposals explicitly include provisions for lower-income units and

provide indication that a developer has interest in developing the site. An additional five sites are owned by BART and will be prioritized for affordable development, two sites are owned by faith-based organizations that have expressed interest in development, on one site there is active loan interest from Oakland HCD, and finally one site is the location of the Piedmont Place Homekey site. There are eight remaining parcels smaller than 0.5, (APNs 013 110802401, 023 047602101, 026 083402201, 014 124000901, 010 077202001, 011 083600101, 026 083500601, 016 142402205) which are considered appropriate for lower-income housing (approximately 137 units, with sites estimates ranging from approximately 25 to 59 percent of the maximum capacity) since they are located in high or highest resource TCAC designations and are in close proximity to transit and other amenities, both of which will increase the financial feasibility of development on these sites. These sites were identified in the prior RHNA cycle; all eight of these sites are permitted to develop with at least 30 du/ac and will permit at least 20 percent of units to be affordable by right. There are 3 parcels larger than 10.0 acres that have been identified to accommodate lower-income units (not including parcels that are part of an active pipeline project). Two parcels are part of the same pre-application project (APNs 048H752400101 and 048H752300900, Record ID – ZP210085), which consists of a subdivision of 67 lots for single-family homes and one 131-unit mixed-income multifamily development. It is assumed that 24.0 percent of the 131-unit project will be suitable for lower-income households. This project includes eight parcels in total across about 39.0 acres. The second parcel (APN 042 432800116) is owned by the City and consists of an empty lot next to the Operation HomeBase Site.[13] This is a surplus lands site that is part of the Coliseum City project and subject to exclusive negotiations with the African American Sports and Entertainment Group. It is assumed to develop at a mix of income levels so as to not concentrate lower-income units. Further, there is an additional site consisting of multiple parcels (APNs 039 329900300, 039 329900202, 039 329102200, 039 329900102) which is about 10.6 acres consisting of opportunity areas in and around the Eastmont Mall, including parking lots. Since the site is large it is assumed to develop with a mix of incomes. Information about mixed-income affordability mix is found on p. C-46.

Reliance on Non-Vacant Sites

State law requires that if non-vacant sites are relied upon to accommodate more than 50 percent of the RHNA for lower-income households, then a housing element must provide findings based on substantial evidence that the existing use does not constitute an impediment to development and that it will likely be discontinued during the planning period. Per State HCD guidance, the sum of lower-income RHNA capacity on vacant sites and other alternatives not related to capacity on non-vacant sites should be used to determine this percentage. ~~Just over 50~~Over 52 percent of the lower-income RHNA capacity is met through vacant sites and other alternatives, see Table C-18.

[13] Operation HomeBase is a COVID-19 isolation trailer program located on Hegenberger Road in East Oakland. Operation HomeBase provides a safe place for high-risk people to self-isolate and maintain their safety and health.

Table C-18: Lower-Income Reliance on Non-Vacant Sites

Adjustment Factor	*Number of Lower-Income Units*
Pipeline Projects	2,~~711~~705
ADU Capacity[1]	1,~~324~~384
Adequate Sites Alternative	~~80~~82
Capacity on Vacant Sites	1,~~264~~154
Total Capacity[2]	**5,~~185~~325**
Oakland Lower Income RHNA	**10,261**
RHNA on Non-Vacant Sites	**10,261 – 5,~~185~~ = 5,~~076~~578 = 4,936**
Percentage of Lower-Income RHNA Accommodated on Non-Vacant Sites	**~~5,076~~4,936/10,261 = ~~49.5~~48.1%**

1. Affordable to lower-income households.
2. Residential capacity not related to non-vacant sites.

Source: Dyett & Bhatia, 2022

Replacement Housing Requirements

The Housing Crisis Act of 2019 mandates that new residential development must replace any demolished residential units on a one-to-one ratio. Further, new development must also replace "protected units" subject to rent or price control with comparable affordable units and provide displaced tenants with a right of return. All sites included in the inventory with existing units are likely to develop at a higher capacity than is currently available on the site, including pipeline projects. There are no known sites with lower-income or protected units that will be demolished contained in the Inventory.

C.4 Fair Housing Assessment of the Inventory

The City of Oakland is committed to ensuring that all of its actions are "fair and just" and further racial equity in Oakland. At the same time, the Environmental Justice Element of the General Plan seeks to address equity issues—including adequate provision and support of affordable, healthy homes—in Environmental Justice[14] ~~communities~~Communities. As explored in the Environmental Justice and Racial Equity Baseline (March 2022), there are many factors that contribute to the livability of a healthy community, ranging from physical aspects of the natural and built environment to less tangible aspects like historic, socioeconomic, and cultural settings and conditions. By assessing the housing sites inventory

[14] SB 1000 requires Cities to identify low-income communities that are disproportionately affected by environmental pollution and other hazards that can lead to negative health effects, exposure, or environmental degradation. While State law refers to these as "disadvantaged communities," the City of Oakland has opted to use the term "environmental justice communities," in line with recommendations from the California Environmental Justice Alliance. For more information, see: California Environmental Justice Alliance/PlaceWorks, SB 1000 Implementation Toolkit: Planning for Healthy Communities, October 2017, available for download at http://www.caleja.org/sb1000-toolkit.

against AFFH criteria and ongoing environmental justice efforts, the Housing Element is an important step in achieving an equitable future in Oakland.

In the context of AFFH, the site identification requirement involves not only an analysis of site capacity to accommodate the RHNA, but also whether the identified sites serve the purpose of replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty (R/ECAPs) into areas of opportunity. To achieve these ends, the Housing Element must identify improved or exacerbated conditions and the isolation of the RHNA (i.e., geographic concentration of units by income category. Traditionally, this assessment is conducted using the opportunity areas mapped by State HCD/TCAC—as described further in Appendix D—and other AFFH factors. While these factors are important considerations – they are not the final decision factor in site selection, especially as statewide mapping efforts may not always match the lived experience of residents. For instance, as can be seen in Figure C-8 below, industrial areas with very low population densities in West Oakland are considered "high resource."

Chart C-1 summarizes the development process of the housing sites inventory and demonstrates how the inventory meets the criteria for AFFH. In the subsequent sections, the methodology for each step is explained.

Chart C-1: Housing Sites Inventory Development Process

ESTABLISH RHNA TARGET

As discussed in Section C.1, the RHNA for the 2023-2031 cycle is 26,251 units. The City has determined that a 15.0 percent buffer will be adequate to ensure that the housing inventory will meet the requirement of the no net loss rule. In total, the 6th cycle RHNA with the 15.0 percent buffer is a target of 30,189 units – 7,488 very-low-income, 4,313 low-income, 5,126 moderate-income, and 13,263 above-moderate-income units. This also includes a target of 3,744 extremely-low-income units, which is assumed to be half of very-low-income need.

PRELIMINARY SITES INVENTORY

The initial sites considered for inclusion in the Inventory were active pipeline projects, projects with expressed developer interest, and other City- and community-identified

underutilized sites without known environmental constraints and near amenities like transit. These "earmarked" housing sites either displayed potential for development or were otherwise vetted as appropriate for additional housing development.

As shown in Table C-19, earmarked sites—comprised of those that can be credited toward RHNA and those still available from the 5th cycle inventory—met 74.6 percent of the 6th cycle RHNA target. An additional 16,682 units located on new opportunity sites were identified (using the methodology described in Section C.3 above) to meet the remaining 6,167 units still needed to meet the target and create a significant buffer. By income level, the overall total of earmarked and new opportunity sites results in a surplus capacity of 1,601 very-low- and low-income units, 1,289 moderate-income units, and 7,133 above-moderate-income units. However, the proportion of lower-income capacity provided in moderate to highest resource areas falls below the average for the total sites inventory.

Table C-19: Preliminary Housing Sites Inventory

Housing Site Type	*Very-Low- and Low-Income*	*Moderate-Income*	*Above-Moderate-Income*	***Total (units)***
RHNA Credits[1]	~~3,921~~4,169	~~760~~776	~~9,718~~10,176	~~14,399~~**15,121**
RHNA 5 Sites	714	3,795	688	5,197
Potential Projects/New Opportunity Sites	7,~~227~~244	1,~~191~~193	~~8,260~~7,873	16,~~686~~310
Percent of Capacity in Moderate to Highest Resource Tracts[2]	~~34.7~~37%	~~29.9~~25%	~~60~~39%	~~63.0~~36.3%

1. Includes pipeline projects, projected ADUs, and adequate sites alternative projects.
2. Census tract resource levels are derived from TCAC Opportunity Maps.

AFFH ASSESSMENT OF PRELIMINARY SITES INVENTORY

While the RHNA is met for each income category based on these pre-established housing sites, lower-income capacity in "moderate" to "highest" resource neighborhoods remained relatively low. As discussed further in Appendix D, the California Fair Housing Task Force Opportunity maps developed by TCAC and State HCD indicate that a significant portion (about 60.0 percent) of Oakland is considered low resource or high segregation and poverty. However, many of these areas are in fact thriving communities in close proximity to Bay Area Rapid Transit (BART) and Alameda-Contra Costa Transit District (AC Transit) lines, and are generally suitable to develop at the densities typically required for lower-income projects. For example, much of the Downtown area—which permits some of the highest densities in the city—is considered low to moderate resource. It should also be noted that investment in "lower resource" neighborhoods, including through affordable housing projects, should not be discouraged in neighborhoods that have been traditionally disinvested in – including neighborhoods like West and East Oakland. The City should also invest in affordable housing in lower resource neighborhoods with a focus on improving opportunity and outcomes for existing residents—especially historically marginalized BIPOC communities—in parallel

with other investments in equitable access to transit, public facilities, food access, and other amenities.

Providing opportunity for lower-income households must be a multipronged approach – the provision of affordable housing in areas that are already higher resourced must be coupled with continued investments in place-based strategies[15] for communities in historically marginalized neighborhoods. As outlined in Appendix D, the production of affordable housing and other strategies that enhance opportunity and housing security where lower-income residents already live—including gentrifying neighborhoods that face significant displacement pressures—must complement strategies to locate additional affordable housing in existing high-opportunity areas.

SUPPLEMENTAL SITES TO ACHIEVE AFFH

Increased provision of affordable housing in existing higher resource neighborhoods is a State priority; therefore, the City undertook the additional effort to locate suitable supplemental sites appropriate for lower-income development in these neighborhoods.

Starting from the entire universe of parcels in Oakland, sites were filtered out based on objective physical constraints and opportunity metrics. As discussed earlier, opportunity sites were selected based on their vacancy status, AV ratio, and FAR. Constrained sites—including those in the Alquist-Priolo fault zone, 100-year flood hazard areas mapped by FEMA, VHFHSZ identified by the California Department of Forestry and Fire Protection (CAL FIRE), and contaminated sites or those with known hazards (identified in EnviroStor or GeoTracker)—were removed from consideration. Further, sites smaller than 0.5 acres and larger than 10 acres in size were removed from consideration per State HCD guidance, as were sites with existing uses that serve the community (e.g., community health centers and grocery stores) and those that are not appropriate for housing development (e.g., industrial). Sites already included in the preliminary sites inventory were also excluded. Figure C-6 provides the considerations applied in filtering for viable sites.

[15] Place-based strategies address the physical, social, structural and economic conditions of a community that affect the well-being of the children, families and individuals who live there. Place-based strategies include any effort to enhance the livability and quality of life in a given community. An important purpose of place-based strategies is to develop local solutions to poverty and inequality by addressing community-level problems such as limited employment opportunities, poor housing, under-resourced schools, social isolation and poor or fragmented service provisions that lead to gaps or duplication of effort. For more information, see: Rood, S. and McGroder, S. "Promoting Place-Based Strategies to Address Poverty: Exploring the Governor's Role." *National Governors Association*, 2017. Available at https://www.ddcf.org/globalassets/17-0118-nga-place-based-strategies-to-address-poverty-issue-brief.pdf.

Figure C-6: Map of constraints considered

From this list of sites filtered by physical suitability characteristics, other important decision factors were applied, including: sites within moderate to highest resource TCAC Opportunity Areas, within Priority Development Areas (PDAs), within a half-mile of a BART station, and within a "transit-rich" area as defined by the Metropolitan Transportation Commission (MTC).[16] After completing this exercise, an additional 74 potential parcels were identified – generally in the North Oakland/Adams Point, Eastlake/Fruitvale, Glenview/Redwood Heights, North Oakland Hills, and Downtown areas. Among these, 19 parcels were identified as supplemental sites that would further the objectives of AFFH. Feasibility of future residential development on these additional sites were "ground-truthed" by City staff based on underutilization factors, local knowledge of the sites, and aerial images of the current state of the property. Three parcels in the Rockridge area will be upzoned and encourage to develop with residential Uses under actions in the Housing Action Plan. Figure C-7 maps the locations of these supplemental "AFFH sites," which are listed in Table C-20 below and identified in Table C-25.

Table C-20: Supplemental AFFH Sites

APN(s)	*Address*	*Acres*	*Lower-Income Capacity*	*TCAC Opportunity Area*	*Justification for Inclusion*
013 115400905	514 SHATTUCK AVE OAKLAND 94609	2.6	182	Moderate Resource	Underutilized commercial area

Figure C-7: Supplemental Housing Sites – AFFH Sites

IMPROVED OR EXACERBATED CONDITIONS

As noted in the previous section, sites were selected in a manner to both further invest in historically disadvantaged communities and decrease displacement pressures, and to provide additional access to existing higher resourced neighborhoods. The breakdown of residential capacity by resource area and other AFFH considerations is included in Table C-21 below, and the location of all sites contained in the Inventory compared to TCAC opportunity areas are provided in Figure C-8.

Most residential capacity at all income levels in located in the low resource and high segregation and poverty areas, as shown in Table C-21. This is largely due to the fact that over 60.0 percent of land in Oakland is considered lower resource or high segregation and poverty. The high and highest resource neighborhoods carry a relatively small portion of the total unit allocation – influenced by environmental constraints present in the Oakland Hills including fault zone hazards and fire risks, limited densities reflected in recent development patterns, and active pipeline projects. It should also be noted that ADU projections, which estimate significant numbers of units affordable to lower- and moderate-income households, are not included in these estimates. As these units are typically provided in lower-density and higher resource neighborhoods, they will likely further increase the proportion of lower-income housing available in these neighborhoods.

~~An~~As supported by sites analysis in Appendix D, section D.5, an affirmative effort was made to locate affordable housing in higher resource neighborhoods to reduce patterns of exclusion and segregation, and the City remains committed to increasing opportunity in neighborhoods that have experienced historic disinvestment. These actions, as ~~outline~~outlined in the Housing Action Plan, will ensure that lower-income housing does not become concentrated in neighborhoods without active efforts to provide the needed place-based strategies to let historic Oakland neighborhoods thrive. Further, rezoning actions included in the Housing Action Plan will increase the number of sites viable for lower-income housing in high resource neighborhoods; however, since the City is able to meet the RHNA under existing zoning and due to the ~~difficultly~~difficulty associated with projecting the affordability and capacity of sites newly made available for housing during the planning period, sites resulting from these actions are not considered in the sites inventory. Further, the City remains committed to enacting strong tenant protections and anti-displacement strategies to ensure that the same market forces that promote market rate development in gentrifying neighborhoods do not lead to the displacement of residents who call ~~that neighborhood~~those neighborhoods home.

Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Much of the land in Oakland designated high or highest resource is located within the Alquist Priolo fault Zone or Very High Fire Hazard Severity Zone (VHFHSZ~~)~~), and is therefore not suitable for higher-density residential development. For instance, Table C-22 shows that 70.1 percent of the City's highest resource and 25.7 percent of the high resource areas are located within the VHFHSZ. The Oakland Hills fire of 1991 was at its time the most damaging fire in California history. It should be noted that the constraints listed in Table C-22 may overlap, and therefore percentages should not be summed. However, this table also does not include all of the environmental constraints, such as steep slopes or landslide areas. The balance of access to opportunity with environmental constraints, both in terms of development feasibility and safety for lower-income projects, was a key factor in creating the Inventory.

Table C-22: Opportunity Area Constraints, 2021

		Percent of Land Constrained		
Opportunity Area	*Percent of Citywide Area*[1]	*100-Year Flood Zone*	*Alquist Priolo Zone*	*VHFHSZ*
Highest Resource	10.1%	0.6%	5.0%	70.1%
High Resource	9.2%	6.8%	2.2%	25.7%
Moderate Resource (Rapidly Changing)	2.4%	14.0%	13.5%	9.3%
Moderate Resource	17.0%	0.7%	5.5%	53.8%
Low Resource	53.6%	8.8%	1.4%	5.0%
High Segregation & Poverty	7.7%	**4.1%**	0.0%	0.0%

1. Based on parcel acreage – does not include rights-of-way.

Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia, 2022

Recent City Council direction to explore more diverse housing typologies in traditionally single-family neighborhoods—including fourplexes—as well as recent State laws like SB 9 will also help to promote affordable housing options in higher resource neighborhoods. Efforts to further encourage both the provision of affordable housing in higher resource areas and provide investments to lower resource neighborhoods through place-based strategies are further outlined in the Housing Action Plan.

Lower-Income Financial Feasibility

During outreach, affordable housing developers indicated that an evaluation of sites selected for lower-income housing with consideration to State funding requirements would be a useful tool to identify and facilitate affordable housing development on those sites. Scoring guidelines for the nine percent Low Income Housing Tax Credit Program provided by the California Tax Credit Allocation Committee (TCAC) are summarized in Table C-23. Credits provided by TCAC ~~area~~are a popular funding mechanism in the construction of affordable housing, and prioritize the development of affordable housing in neighborhoods with existing access to opportunity. Further information on TCAC opportunity areas is available in Appendix D.

Table C-23: TCAC Scoring Guidelines, 2022

Site & Service Amenities	*Points*	*Criteria*
Transit	3	The site is within 0.5 miles of a bus rapid transit station, light rail station, commuter rail station, ferry terminal, bus station, or public bus stop.
	4	The site is within 0.33 miles of the above.
	5	The site is within 0.5 miles of the above, with service at least every 30 minutes during the hours of 7-9 a.m. and 4-6 p.m. Monday through Friday.
	6	The site is within 0.33 miles of the above.
	7	The site is within 0.33 miles of the above and the project's density exceeds 25 du/ac.
Public Park	2	The site is within 0.75 miles of a public park or a community center accessible to the general public.[1]
	3	The site is within 0.5 miles of the above.[1]
Book-Lending Public Library	2	The site is within 1 mile of a book-lending public library that also allows for inter-branch lending when in a multi-branch system.
	3	The site is within 0.5 miles of the above.
Full-Scale Grocery Store, Supermarket, Neighborhood Market, or Farmers' Market	1	The site is within 1 mile of a weekly farmers' market on the list of Certified Farmers' Markets by the California Department of Food and Agriculture and operating at least 5 months in a calendar year.
	2	The site is within 0.5 miles of the above.
	3	• The site is within 0.5 miles of a neighborhood market of 5,000 gross interior square feet or more where staples, fresh meat, and fresh produce are sold; or • The site is within 1.5 miles of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
	4	• The site is within 0.25 miles of a neighborhood market of 5,000 gross interior square feet or more where staples, fresh meat, and fresh produce are sold; or • The site is within 1 mile of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
	5	The site is within 0.5 miles of a full-scale grocery store/supermarket of at least 25,000 gross interior square feet where staples, fresh meat, and fresh produce are sold.
Public Elementary	2	The site is within 0.75 miles of a public elementary school; 1 mile of a public middle school; or 1.5 miles of a public high school, and the site is within the attendance area of that school.

Site & Service Amenities	*Points*	*Criteria*
Middle, or High School	3	The site is within 0.25 miles of a public elementary school; 0.5 miles of a public middle school; or 1 mile of a public high school, and the site is within the attendance area of that school.
Medical Clinic or Hospital	2	The site is within 1 mile of a qualifying medical clinic with a physician, physician's assistant, or nurse practitioner onsite for a minimum of 40 hours each week, or hospital (not merely a private doctor's office).
	3	The site is within 0.5 miles of the above.
Highest or High Resources Area	8	The site is located in a census tract designated on the TCAC/State HCD Opportunity Area Map as Highest or High Resource.

1. A public park shall not include 1) school grounds unless there is a bona fide, formal joint-use agreement between the jurisdiction responsible for the park's/recreation facilities and the school district or private school providing availability to the general public of the school grounds and/or facilities. 2) greenbelts or pocket parks, or 3) open space preserves or biking parkways unless there is a trailhead or designated access point within the specified distance.

Source: TCAC, Nine Percent Application, 2022

Table C-24 below provides an estimate of the points available for the nine percent TCAC application for lower-income sites contained in the Inventory. Point estimates are derived from nine percent TCAC application scoring guidelines as listed in Table C-23 above. Points are only estimated for lower-income sites that do not already have a pipeline or potential development project. It should be noted that points are only estimated for site-related amenities and do not reflect the full scope of available points. Further, provided point totals are only estimates and may not reflect actual point allocations for specific projects. Finally, while sites with lower scores may be less competitive for State funding, this does not mean that they do not have the zoned capacity to accommodate lower-income housing. It should be noted that TCAC scoring guidelines make it difficult to secure funding for needed affordable housing projects in Oakland's lower-income neighborhoods. The lack of access to the amenities that score well is due to historic racism and public/private disinvestment. Actions the City will take to increase the financial feasibility of development in historically disinvested neighborhoods are provided in the Housing Action Plan.

1. Derived from ABAG-MTC's 2021 Existing and Planned dataset, which relies on General Transit Feed Specification (GTFS) data for stop location and frequency.

2. TCAC neighborhood market definitions do not match Oakland's Food Facilities dataset definitions, which groups facilities below 3,000 sq. ft., between 3,000 sq. ft. and 10,000 sq. ft., and above 10,000 sq. ft. Certified farmers' markets match TCAC definitions exactly. "Neighborhood markets" and "Supermarkets" were approximated as follows:

- Neighborhood Markets (TCAC definition is at least 5,000 sq. ft.) – a review of Yelp entries for "Grocery" or "Fruits & Veggies" was conducted. This better aligns with the Food Facilities dataset and helps capture stores about 1,000 sq. ft. in size that sell fresh fruits and vegetables—including those located in Chinatown. Note that this category may include some supermarkets or larger grocery stores.
- Supermarket (TCAC definition is at least 25,000 sq. ft.) – Oakland Food Facilities that have the description "Food Market Over 10,000 SqFt." There are about 30 such locations in Oakland. Based on limited parcel-level spot-checking, the average size of a supermarket in Oakland is likely less than 25,000 sq. ft. Note that some of these locations may also be included in the neighborhood market level.

3. There are a total of 32 points available.

ISOLATION OF THE RHNA

While seeking to locate lower-income sites in higher resource areas to the extent practical given the extensive environmental constraints, the Inventory actively seeks to reduce geographic concentration of housing by income. This is done in two ways – by locating sites of all income levels throughout the city, and by assuming mixed-income developments on larger sites. This ensures that households are not segregated by income either within a neighborhood or within a specific project. Dispersing housing types of varying affordability levels throughout the city will help reduce historic patterns of geographic concentration by income. ADUs—although not explicitly reflected in Table C-21 or Figure C-8—provide an additional strategy to promote dispersed housing and to ensure that more affordable housing options are available in lower-density neighborhoods, which also tend to be higher resource. As discussed in Section C.2, ADUs in Oakland tend to be affordable to lower- and moderate-income households. The sites inventory by resource area by neighborhood are included in Table C-25.

Figure C-8: Housing Sites Access to Opportunity, 2022

The full Sites Inventory is provided in Table C-26. Table B includes sites, primarily in moderate or higher-resourced areas, that will be upzoned, as described in Appendix J. Rezoning results in around 650 units more than the realistic capacities predicted for the prior zoning designations, for a total of nearly 1,700 units (shown in Table B of Table C-26). Appendix M includes a list of sites identified by the community that will be considered for rezoning as part of Phase 2; sites included in the current Inventory are highlighted in yellow.

Appendix D: Assessment of Fair Housing

This chapter contains an assessment of factors contributing to fair housing in Oakland and a program of goals and actions to further address fair housing needs. Among the topics covered are:

- Fair housing enforcement and outreach
- Segregation and integration
- Racially and ethnically concentrated areas of poverty and affluence
- Disparities in access to opportunity; and
- Disproportionate housing needs and displacement risk

Oakland is well-served by fair housing providers~~, but the City~~ and ~~Alameda County are limited by insufficient funding related~~is well-equipped to provide fair housing enforcement and outreach capacity. Oakland is incredibly diverse at the City level, but at the neighborhood level, geographic patterns of income segregation and racial/ethnic segregation are clear. Additionally, Oakland has racially and ethnically concentrated areas of poverty localized to four areas in the City. Neighborhoods across Oakland have received varying levels of investment, rendering varying levels of opportunity for protected classes. While access to transit may be enjoyed by all protected classes[1], access to economic, educational, and environmental opportunities vary greatly across the City. Comparing access to opportunity with displacement risk and gentrification across the City, areas that are exclusive, stable, or in the advanced stages of gentrification offer the best access to opportunity. Much of the City has gentrified in recent years, leaving residents in the few (predominantly Black, Indigenous, and people of color (BIPOC) neighborhoods that have not gentrified at risk of displacement. Oakland is further impacted by disproportionate housing needs: overcrowding rates are higher in the City than in the County/Bay Area Region, cost burden rates are high (highest for Black and African-American households and lowest for white households), and homelessness is a major public health crisis in the City. Individuals experiencing homelessness increased ~~47~~83 percent between 2017 and ~~2019 (the last time a point-in-time count was conducted)~~2022 and individuals identifying as Black or African American are disproportionately represented in the unhoused population.

The goals and actions concluding this appendix have a strong focus on investing in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps (i.e. those neighborhoods with low access to opportunity). These neighborhoods have high concentrations of BIPOC populations.

[1] Fair housing laws aim to ensure that people have access to housing and the resources attached to place of residence regardless of their race, national origin, family status, religion, sex, or disability, often referred to as protected classes.

The purpose of this assessment is to identify fair housing issues and segregated living patterns in the City of Oakland and replace them with integrated, equitable living patterns to transform racially and ethnically concentrated areas of poverty into areas of opportunity. While Oakland is an incredibly diverse city centrally located within a region rich in opportunities and cultural, education, and natural resources, its residents do not enjoy equal access to these opportunities and resources. Recent research shows that the Oakland is the 14th most racially segregated major city in the United States.[2] Community amenities and access to opportunities are inherently spatial in nature and are not always readily accessible or attainable to all due to the different types of social, cultural, and economic barriers in our society. Ensuring that sites for housing, particularly lower income units, are not concentrated in areas of high segregation and poverty requires jurisdictions to invest in communities experiencing limited access to opportunity and plan for housing with regards to the accessibility of various opportunities including jobs, transportation, good education, and health services.

In recognition of the importance of addressing fair housing issues, California Assembly Bill (AB) 686, passed in 2018, amended California Government Code Section 65583 to require all public agencies to affirmatively further fair housing (AFFH). AB 686 defined "affirmatively further fair housing" to mean "taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity" for BIPOC individuals, persons with disabilities, and other protected classes. AB 686 requires an assessment of fair housing in the Housing Element which includes the following components: a summary of fair housing issues and assessment of the City's fair housing enforcement and outreach capacity; an analysis of segregation patterns and disparities in access to opportunities, an assessment of contributing factors, and an identification of fair housing goals and actions.

This appendix chapter relies on data from the U.S. Census American Community Survey (ACS) five-year Estimates, the California Department of Housing and Community Development (State HCD) AFFH Data and Mapping Tool, and the County of Alameda Regional Analysis of Impediments to Fair Housing Choice (AI) for fiscal years 2020/21-2024-25.

While in the past Oakland has produced its own AI, it joined the rest of the Alameda County starting in 2020. The 2020 Alameda County AI identified impediments to fair housing using a combination of data and community engagement. Community engagement consisted of three meetings and a seven-page survey, translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include Black, Indigenous, and People of Color (BIPOC), people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses.

D.1 Fair Housing Enforcement and Capacity

FAIR HOUSING SERVICES

Fair housing services are essential to the AFFH mission. They ensure that housing options are accessible to protected groups, including those based on race, color, gender, religion, national origin, familial status, disability, age, marital status, ancestry, source of income, sexual orientation, genetic information, or other arbitrary factors. Fair housing services help Oakland residents understand and protect their right to access housing.

Oakland is well-equipped to provide fair housing enforcement and outreach capacity. The City allocates approximately $260,000 annually in CDBG funds to fair housing providers to support housing discrimination testing, housing counseling, information/referral services, legal representation, tenant/landlord mediation, counseling, and other services. A summary of the numerous local, regional, and statewide organizations that provide fair housing-related services in Oakland is provided below.

Local and Regional Fair Housing Providers

Bay Area Legal Aid provides low-income clients with free civil legal assistance, including legal advice and counsel, effective referrals, and legal representation. They serve seven counties: Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, and Santa Clara. While they offer assistance for a variety of issues, their housing assistance includes landlord-tenant matters, subsidized and public housing issues, unlawful evictions, foreclosures, habitability, enforcement of fair housing laws, and issues surrounding homelessness.

Centro Legal de la Raza assists Alameda County residents with issues surrounding immigrants' rights, tenant's rights, and workers' rights. Their tenants' rights services include eviction defense representation, "Know Your Rights" trainings for buildings, and affirmative housing litigation.

The East Bay Community Law Center (EBCLC) focuses on resolving legal challenges in the East Bay caused by poverty and racial injustice. Housing is one dimension of their work, with a focus on defending eviction lawsuits brought against low-income tenants, as well as enforcement of local rent and eviction control ordinances. Their attorneys and advocates can assist with:

- Defense of Eviction/Unlawful Detainer cases
- Section 8/Housing Authority termination hearings
- Rent board hearings
- General counseling on tenants' rights
- Assistance to individuals to represent themselves
- Public outreach/education trainings
- Rental Assistance program consultations and referrals

EBCLC additionally conducts one to three fair housing tests per year.

The Eden Council for Hope and Opportunity (ECHO) Housing provides fair housing services to residents of several cities in Alameda County, including Oakland. They also serve Contra Costa County and

Monterey County. ECHO Housing provides counseling, investigation, mediation, enforcement, and education through their Fair Housing Program. They also conduct fair housing tests. They provide services and education in Spanish and have a live "language line" to assist users who speak languages other than English. They have also conducted outreach and advertised in Spanish. Instances of housing discrimination can be reported to any of ECHO's program offices or filed directly with the U.S. Department of Housing and Urban Development's (HUD) Region IX Office of Fair Housing and Equal Opportunity (FHEO) or California Department of Fair Employment and Housing (DFEH).

The Eviction Defense Center provides free and low-cost legal services to low-income Alameda County residents facing eviction.

The Family Violence Law Center (FVLC) provides free legal assistance to survivors in Alameda County with services including eviction prevention and defense, assistance with landlord/tenant disputes, fair housing advocacy, and information on tenants' rights.

Statewide Fair Housing Providers

Housing and Economic Rights Advocates (HERA) is a statewide non-profit legal service and advocacy organization that provides financial counseling to individuals and community education workshops, and trains service providers and other professionals. Issues they specialize in include abusive mortgage servicing, problems with homeowner associations, foreclosure, escrow, predatory lending, and discriminatory financial services and consumer transactions.

DFEH is the statewide agency charged with enforcing California's civil rights laws. In particular, DFEH is responsible for enforcing state fair housing laws that make it illegal to discriminate because of a protected characteristic in all aspects of the housing business, including renting or leasing, sales, mortgage lending and insurance, advertising, practices such as restrictive covenants, and new construction. Discrimination complaints are referred from the City to DFEH. DFEH then dual-files fair housing cases with FHEO, as part of the Fair Housing Assistance Program.

Oakland Housing Authority

The Oakland Housing Authority (OHA) has a series of policies and processes in place for both public housing developments as well as in its Section 8 program to affirmatively further fair housing and civil rights through all of its programs, including educating its residents on how to file a discrimination complaint, how to request for reasonable accommodations, and ensuring residents with limited English proficiency can access the help they need.

Through its orientation process, OHA ensures that all residents are fully aware of all applicable civil rights laws. If a resident believes they have suffered any form of discrimination, OHA will provide the resident with all necessary paperwork, offer to assist the resident in completing the form and refer the resident to both HUD FHEO and DFEH.

OHA actively encourages any resident to make a request for an exception, change or adjustment to a rule, policy, practice or service because of a disability. OHA will treat any such request as a request for a reasonable accommodation. OHA will provide forms and/or guidance to the requestor on the information necessary to make the request. OHA will review and assess requests for reasonable accommodations on a case-by-case basis, taking into all available factors.

OHA follows HUD's December 19, 2003 guidance designed to assist housing authorities comply with Title VI of the Civil Rights Act of 1964. OHA recognizes that for many applicants and residents, English is not

their primary language and they have a limited ability to read, write, speak or understand English. Language for LEP Persons can be a barrier to accessing important benefits. OHA's automated phone service provides menu options in English, Cantonese, Spanish, and Vietnamese. To assist walk-in clients, OHA uses a telephone interpretation service enabling them to serve clients in over 150 languages. All vital documents (such as waitlist application and opening notices) are translated from English into Cantonese, Spanish and Vietnamese. Oral translation, where reasonable, will be provided for other LEP clients.

FAIR HOUSING LAWS AND REGULATIONS

Oakland complies with federal and State fair housing laws, and its City-specific rental housing laws help protect residents from being displaced or suffer from unfair rent increases. The City also allocates funding to fair housing service providers to assist residents with legal issues related to fair housing. OHA complies with these laws in their provision of subsidized housing by educating residents about and assisting them with discrimination issues, supporting requests for reasonable accommodation for persons with disabilities, and making efforts to assist those with limited English proficiency. Key federal, State, and local fair housing laws are summarized below.

Federal Fair Housing Act of 1968

The Fair Housing Act of 1968 prohibits discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex. The Act was subsequently amended to additionally prohibit such discrimination on the basis of familial status and disability. In 2015, HUD issued a rule to Affirmatively Further Fair Housing. While that rule was subsequently rescinded, California Assembly Bill 686 (2018) ensured that California jurisdictions would maintain an obligation to Affirmatively Further Fair Housing.

California Fair Employment and Housing Act (FEHA)

FEHA prohibits discrimination and harassment in all aspects of housing including sales and rentals, evictions, terms and conditions, mortgage loans and insurance, and land use and zoning. It also requires housing providers to make reasonable accommodations in rules and practices to permit persons with disabilities to use and enjoy a dwelling and to allow persons with disabilities to make reasonable modifications of the premises.

Americans with Disabilities Act (ADA)

The ADA requires all new or altered facilities subject to the ADA to be readily accessible to and usable by people with disabilities. Covered entities must comply with the Department's ADA regulations, including the ADA Standards for Accessible Design.

Oakland Rental Housing Laws

In 1980, the Oakland City Council passed its first rent control ordinance, which established the Housing, Residential Rent Arbitration and Relocation Board and the Rent Adjustment Program. Since then, the program has amended many times. The current ordinance, Oakland Municipal Code Section 8.22.010 *et seq.*, regulates most residential rent increases in Oakland. Additionally, in 2002, the Oakland voters passed the Just Cause for Eviction Ordinance, requiring a property owner to prove one of the eleven just causes before they could evict a tenant (See Oakland Municipal Code Section 8.22.300 *et seq.*) Together these laws are intended to maintain affordable housing, preserve community diversity, prevent illegal rent increases and evictions, and encourage investment in rental property in Oakland.

The Rent Adjustment Program Board is a quasi-judicial body, composed of seven members appointed by the Mayor and confirmed by the City Council. The Board hears appeals and enacts regulations and policies to further the administration of the Oakland Rent Ordinance and Just Cause for Eviction Ordinance.

Rent Adjustment Program staff provides information and counseling to property owners and tenants, conducts administrative hearings and mediations, collects eviction data, and administers the Ellis Act, the Tenant Protection Ordinance, and the Uniform Relocation Ordinance.

Under the Rent Adjustment Program, property owners of covered units must give every tenant a "Notice to Tenants of the Residential Rent Adjustment Program" form. When tenants move into a covered unit, the initial notice must be served in English, Spanish, and Chinese. Subsequent Rent Adjustment Program Notices must also be served with every rent increase. If a property owner fails to serve the notice at the beginning of the tenancy, they must wait at least six months after serving the notice to serve a rent increase notice. An owner can increase the rent on a covered unit only once in a 12-month period. The first increase cannot be effective any earlier than 12 months after the tenant moves into the unit. An owner may increase the rent based on the annual allowable consumer price index (CPI) without seeking approval from the Rent Adjustment Program. Every March, the Rent Adjustment Program publishes the allowable CPI increase for the next fiscal year. Any rent increase not based on the CPI, or banking increases based on the owner choosing not to increase rent in previous years, is void and unenforceable unless first approved by the Rent Adjustment Program. An owner can additionally petition to seek a rent increase based on capital improvements as a pass-through, uninsured repair costs, increased housing service costs, fair return, and additional occupants. A tenant may also file a petition to contest current and prior rent increases. The Rent Adjustment Ordinance prohibits any rent increase that would be greater than 10% in one year, or 30% over any five years of a tenancy.

The Just Cause for Eviction Ordinance imposes additional requirements beyond state law prior to the eviction of tenants. A property owner must follow state and local law to the letter to evict a tenant successfully. A property owner's failure to comply with state and local laws may entitle a tenant to substantial damages. Rent Adjustment Program staff are available to help parties understand their rights and responsibilities but do not provide legal advice to property owners or tenants.

The Just Cause for Eviction Ordinance applies to most rental units in Oakland, including single family residences, owner-occupied duplexes and triplexes, units owned and operated by another government agency, and new construction of units or buildings where a Certificate of Occupancy was issued before December 31, 1995. The Just Cause Ordinance adds the following requirement to state law procedures for evictions (Oakland Municipal Code Section 8.22.360 D):

In the Notice to Quit or Notice of Termination, and in the Summons and Complaint, the property owner must specify one or more of the just causes for eviction, and allege that the eviction is in good faith. The property owner must also send a copy of the notice to the Rent Adjustment Program. Neither the sale nor the foreclosure of property is a just cause listed in the Just Cause for Eviction Ordinance.

In November 2022, the City passed ballot Measure V, which extends just cause legal protections to more properties in Oakland. Measure V changes the cutoff date so that tenants who live in buildings built within the last 10 years (on a rolling cutoff) will have just cause protections. Measure V will also expand eviction protections to categories of housing legalized by the city last year: tiny homes on wheels and recreational vehicles, if those units are rented to a tenant by a landlord. Measure V also adds special eviction protections for school-age children or educators who are being evicted for "no-fault" reasons during the school year.

The Uniform Relocation Ordinance, Oakland Municipal Code Section 8.22.800, requires owners to provide tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act, and condominium conversions with relocation payments. Except for temporary code compliance displacements, which require the payment of actual temporary housing expenses, the payment amount depends on the size of the unit and adjusts for inflation annually on July 1st. The base payment amounts until June 30, ~~2022~~2023, are:

- $7,~~443.23~~669.78 per studio/one-bedroom unit
- $9,~~165.82~~439.73 per two-bedroom unit
- $11,~~314.06~~652.17 per three- or more-bedroom unit.

Tenant households in rental units that include lower income, elderly, or disabled tenants, and/or minor children are entitled to a single additional relocation payment of $2,500 per unit from the owner.

On November 5, 2014, the Oakland City Council adopted the Tenant Protection Ordinance (TPO), which prohibits various harassing behaviors against tenants by owners and their agents (for example, property managers and contractors) – thereby bolstering existing laws and leases that protect tenants. The TPO creates remedies that can be enforced by private civil right of action. Among other things, the Tenant Protection Ordinance prohibits conduct that may coerce a tenant to vacate a rental unit involuntarily.

On July 21, 2020, the TPO was further amended to strengthen the protections of the existing TPO and expand its application to non-profit owned rental housing and rental units in newly constructed residential property. The TPO prohibits property owners and their agents from engaging in bad faith in any of the following conduct.

1. Disruption of services to the rental unit.
2. Failure to perform repairs and maintenance.
3. Failure to exercise due diligence when completing repairs or follow appropriate industry protocols.
4. Abuse the owner's right of access to the rental unit.
5. Remove personal property, furnishings, or any other items without the prior written consent of the tenant, except when authorized by law.
6. Threaten to report a tenant or their known associates to law enforcement based on their perceived or actual immigration status.
7. Influence a tenant to vacate through fraud, intimidation or coercion.
8. Offer payments to a tenant to vacate more than once in six (6) months if the tenant has stated in writing that they do not want to receive such offers.
9. Try to intimidate a tenant into accepting a buyout.
10. Threaten the tenant or their guests, by word or gesture, with physical harm.
11. Interfere with a tenant's right to quiet use and enjoyment of the rental unit.
12. Refuse to accept or acknowledge receipt of a tenant's lawful rent payment.

13. Refuse to cash a rent check or money order for over thirty (30) days unless a written receipt for payment has been provided to the tenant.
14. Interfere with a tenant's right to privacy, including unnecessarily inquiring into a tenant's immigration status.
15. Unilaterally imposing new material terms of tenancy.
16. Removing a housing service for purpose of causing the tenant to vacate.
17. Commit violations of certain state laws, including discrimination prohibited under the Unruh Civil Rights Act and illegal lockouts and utility shutoffs prohibited by other laws.
18. Misrepresent to a tenant that they are required to vacate their unit.
19. Force a tenant to vacate their rental unit and reregister in order to avoid classification as a tenant.
20. Other repeated acts or omissions of such significance as to substantially interfere with or disturb the comfort, repose, peace, or quiet of any person lawfully entitled to occupancy.

In November 2022, the City passed ballot Measure V, which extends just cause legal protections to more properties in Oakland. Measure V changes the cutoff date so that tenants who live in buildings built within the last 10 years (on a rolling cutoff) will have just cause protections. Measure V will also expand eviction protections to categories of housing legalized by the city last year: tiny homes on wheels and recreational vehicles, if those units are rented to a tenant by a landlord. Measure V also adds special eviction protections for school-age children or educators who are being evicted for "no-fault" reasons during the school year.

OAKLAND CITY ATTORNEY FAIR HOUSING ENFORCEMENT ACTIONS

Oakland City Attorney Barbara J. Parker and the members of the office recognize that housing is a human right. ~~We~~They therefore strive to protect and advance Oakland residents' right to safe, secure, and dignified housing. Within the City of Oakland government, the City Attorney is uniquely empowered to: (1) bring lawsuits to address housing rights violations on behalf of the People of the State of California and/or the City of Oakland; (2) secure court orders to improve living conditions; (3) stop harassment; and (4) craft new and amended city laws and policies for the Council's consideration to address gaps in local fair housing law and enforcement.

The Office of the City Attorney (OCA) often partners with civil society legal advocates to pursue justice for Oakland's historically and currently marginalized communities. OCA's housing enforcement actions can prevent the imminent displacement and potential homelessness of marginalized tenants and force landlords to provide the safe, secure, and dignified housing that tenants deserve and that the law requires. These tenants are disproportionately low-income Black, Latinx, Asian and Pacific Islander, and other residents of color.

Three affirmative litigation units in OCA contribute to the City's fair housing efforts: the Neighborhood Law Corps (NLC), the Community Lawyering and Civil Rights Unit (CLCR), and the Housing Justice Initiative Unit (HJI).

Since the City Attorney founded the NLC in 2002, it has engaged directly with Oakland communities to address some of the most challenging life, health, and safety problems that Oakland's neighborhoods face,

including tenant harassment, and the NLC historically spearheaded OCA's efforts to secure justice for tenants.

Launched in 2016, the CLCR works to advance rights for historically and currently marginalized communities in Oakland to achieve racial, economic, and environmental justice by enforcing, strengthening, and drafting laws that are responsive to those communities' needs.

In October 2020, the City Attorney launched HJI,[3] a housing enforcement unit specifically dedicated to protecting marginalized Oakland tenants through enforcement of Oakland's Tenant Protection Ordinance (TPO) and other similar or related local and State laws.[4]

OCA prioritizes enforcing the rights of low-income communities and communities of color, especially Black and Latinx residents, who have suffered and continue to suffer disproportionate harms due to the ongoing housing crisis. OCA's housing justice goals include utilizing housing policy and enforcement as a means to further racial, economic, and environmental justice generally, and also to specifically prevent wrongful displacement of marginalized tenants from Oakland.

Community Lawyering and Civil Rights Enforcement (CLCR)

The City Attorney launched this unit to prioritize affirmative litigation and other actions and initiatives to secure justice and equity for all Oakland residents and workers, and to fight abuse, predation, and discrimination against historically or currently marginalized communities. CLCR's affirmative housing-related work has also included actions against or advocacy directed at the federal government where appropriate.

Many of CLCR's cases and initiatives have positively impacted housing justice. For instance, CLCR joined a coalition of close to a dozen other cities and counties statewide to litigate a multi-decade case against lead paint companies that had sold their harmful products for interior residential use for much of the 20th century. Interior lead paint disproportionately harmed and harms Black, Latinx, and low-income Oaklanders, who are more likely to live in older and more lead-burdened housing stock.

CLCR also joined other local governments in a case against the pharmaceutical industry for its contributions to the opioid crisis; that crisis has been a significant driver of homelessness in Oakland, a status disproportionately experienced by Black Oaklanders, and opioids are a significant barrier to unhoused people becoming housed. CLCR also submitted regulatory and administrative feedback to protect housing rights, such as by advocating that HUD refrain from promulgating any rule that separates family members in Oakland-based HUD housing on the basis of immigration status.

CLCR also has pursued other litigation to address historical, present, and future impacts of redlining, restrictive covenants, predatory mortgage lending, fair housing, and livable land issues that impact Oakland's Black, Latinx and other residents of color. For example, in 2015 the City of Oakland sued Wells Fargo for its racially discriminatory mortgage lending practices that violated the Fair Housing Act and California's Fair Employment and Housing Act and preyed upon Black and Latinx Oaklanders, contributing to widespread foreclosures, loss of tax revenue, and other harms. While the City was disappointed that the Ninth Circuit en banc reversed the initial panel's decision, hindering our ability to ensure that the letter and spirit of the Fair Housing Act was upheld in that case, our work to advance fair

[3] www.housingjusticeoakland.org

[4] The Oakland City Attorney's Office received two generous grants from the San Francisco Foundation to advance racial equity through the development of HJI and expansion of City Attorney tenant protection enforcement. (See June 30, 2020 City Council Resolution #88186. Legistar File #20-0484. Available at https://bit.ly/3yy9VoD.)

housing and hold bad actors accountable for their racially discriminatory practices is not over; indeed, it has only begun.

OCA also recognizes more broadly that housing intersects with environmental, economic, and racial justice, and so CLCR's other work focused on those areas also supports fair housing efforts. For example, CLCR is working to improve climate change adaptation and address pollution in Oakland, which disproportionately impacts residents of color and the habitability of Oakland's flatlands.

Neighborhood Law Corps (NLC) and Housing Justice Initiative (HJI)

In addition to the extreme housing affordability crisis in Oakland, marginalized tenants are frequently displaced from their homes when their landlords illegally coerce them to leave. This is especially true for low-income, long-term tenants who live in rent-controlled units and single room occupancy hotels (SROs). Prices and supply incentivize some unscrupulous landlords to harass their tenants to pressure them to leave – for example, by forcing tenants to live without heat in winter. Once a landlord forces tenants to leave, they can sell properties or raise rents to market-rate for significant profit. This is particularly true in neighborhoods that have experienced or are experiencing dramatic gentrification and displacement.

The NLC and HJI have helped to preserve some naturally occurring affordable housing units where low-income tenants of color were at imminent risk of displacement due to unlawful landlord harassment. For example, in 2015, the NLC filed its first TPO lawsuit to vindicate the rights of the very low-income tenants of a 96-unit SRO in downtown Oakland. As a result of OCA's lawsuit, the property was sold to a nonprofit developer with a court order requiring preservation of the building as affordable housing for at least 55 years.[5]

And in 2016, the NLC filed a lawsuit to prevent the new owners of a 39-unit SRO in Oakland's Chinatown from wrongfully displacing the long-term, low-income, and predominantly monolingual Chinese tenants. The owners' declared purpose was to attract a new, market-rate demographic by renovating the building and displacing the existing tenants. The owners' campaign of harassment included failing to restore four of seven communal bathrooms for nine months. The case resulted in a $1,000,000 settlement and permanent injunction against the owners, a resounding victory for the tenants who were able to stay in their homes.[6] The building is now owned by a nonprofit, and includes commercial space used by a locally-owned restaurant and incubator for immigrant and refugee food entrepreneurs.

Advancing Fair Housing During the COVID-19 Pandemic

Keeping people housed during the COVID-19 pandemic is essential to furthering fair housing. The City of Oakland recognizes that the same communities that are facing insecure housing are also disproportionately impacted by COVID-19, as evidenced by Oakland's declaration of a local health emergency for Black and Latinx residents, many of whom have not had a safe space to isolate or quarantine during the pandemic.[7]

Since the outbreak of COVID-19, OCA has filed multiple lawsuits and sent dozens of demand letters covering hundreds of units in response to landlords violating tenants' rights, including their rights to safe housing and to be free of harassment and discrimination. Almost all of these enforcement actions involved protecting the rights of low-income renters of color. For example, OCA successfully secured emergency restraining orders against landlords engaging in illegal self-help evictions such as lockouts that threatened their tenants' ability to safely shelter in place. The tenants in these cases included Latinx immigrants and elderly, disabled Black residents.

As another example, OCA prevailed in a lawsuit against the owners of a prominent local real estate business for systematically violating the rights of their tenants. The defendants rented units in severely substandard conditions, including units never intended or approved for residential use, to tenants who were predominantly low-income immigrants, among them tenants whose primary language is not English. This predatory business model allowed the owners to exploit tenants desperate to find affordable housing. After trial, the court ordered the defendants to pay millions of dollars in civil penalties and attorney's fees for their egregious violations of tenants' rights. The court also issued a citywide order prohibiting the owners from operating any of their Oakland residential properties in violation of local or State laws.[8] The court concluded that "there is no question that…[the judgment will deter defendants and] will likely have a broad effect in the city as whole as well as other communities. The case thus undoubtedly advanced the public interest."

FAIR HOUSING COMPLAINTS AND VIOLATIONS

Housing discrimination complaints are one source for evaluating fair housing issues in a community. FHEO and DFEH are charged with implementing and enforcing fair housing protections. Local fair housing cases may be forwarded to either agency, depending on the basis of discrimination. However, many cases are resolved on the local level.

In Alameda County, 20 FHEO complaints were filed in 2020, 75 percent were related to a disability bias, 10 percent were related to a racial bias, and 10 percent were related to a familial status bias (HCD AFFH Data Viewer, 2020). The number of housing discrimination complaints has decreased since 2010, when 64 complaints were filed in Alameda County. As in 2020, most complaints in 2010 were related to disability bias (47 percent) while 20 percent were related to a racial bias, and 14 percent were related to a familial status bias. A report from ECHO and East Bay Community Law Center on complaints brought to them from 2015-2019 show that the largest share of complaints (more than 40 percent) in Alameda County are from the City of Oakland, yet Oakland only makes up 26 percent of the population of Alameda County. Consistent with HCD data, most complaints are related to a disability bias. Nearly 50 percent of cases brought to these local fair housing organizations were resolved with counseling.

ISSUES RELATED TO ENFORCEMENT AND OUTREACH CAPACITY

Impediments to addressing fair housing issues in Oakland specifically (and across Alameda County) include lack of local fair housing outreach and enforcement from both private (nonprofit) and public organizations, lack of resources for fair housing agencies and organizations, and lack of federal, State and local funding for affordable housing. The 2020 Analysis of Impediments to Fair Housing (AI) reports that State and federal funding for affordable housing in Alameda County has declined by 80 percent since 2008.

D.2 Segregation and Integration

Segregation can be defined as the separation across space of one or more groups of people from each other on the basis of their group identity such as race, color, religion, sex, income, familial status, national origin, or having a disability or a particular type of disability. Segregation can occur at the neighborhood level and can also occur between cities within the larger region. It can occur in various spaces, such as within workplaces, schools, or places of worship. This analysis is focused on residential segregation.

In contrast to segregation, integration can be generally defined as a condition in which there is not a high concentration of a particular group identity. While integration in some contexts shows a breaking from prior trends of exclusion, and thus a laudatory outcome, measures of integration may also be evidence of areas formerly segregated that have now become integrated as a result of gentrification and displacement. This section analyzes these patterns of segregation, as well as patterns of integration.

Oaklanders take great pride in the city's immense diversity. Compared to the nation and the diverse Bay Area, Oakland stands out as home to people of a wide variety of backgrounds. However, recent research shows that the Oakland is the 14th most racially segregated major city in the United States. Analyzing 2020 Census data, the Othering and Belonging Institute of Berkeley found that six of the ten most segregated Black neighborhoods in the Bay Area, and four of the of the five most segregated Latino neighborhoods, are located in Oakland. Overall, Oakland is the most racially segregated city in the Bay Area in terms of segregation of people between neighborhoods within the city.

Like many other U.S. cities, segregation is Oakland has been shaped by local, county, State and federal government policies and practices that created unfair conditions for BIPOC communities. As described in the Introduction and in Appendix F: Constraints, current disparities in access to opportunity, health, and wealth building are the result of centuries of intentional policies and practices designed to uphold systems, power, and wealth undergirded by racial discrimination. In the 1930s, Oakland lenders adopted the federally sanctioned practice of refusing to insure mortgages in and near neighborhoods predominantly made up of communities of color. These areas were rated as "D", or "Hazardous," and color-coded as red on lending maps. Residents of these "redlined" neighborhoods, including West Oakland and East Oakland, were denied access to credit, resulting in a cycle of disinvestment and poverty. To prevent their own neighborhoods from being redlined, private developers, realtors, and homeowners were encouraged to write racially restrictive covenants into their deeds that further inhibited residents of color from moving into these areas. Redlined neighborhoods were further damaged by "urban renewal" projects led by ~~the~~ Oakland ~~Planning Commission~~decisionmakers in the 1960s and 1970s. Private properties, primarily in redlined areas, were deemed "blighted" and demolished to make way for freeways and new development. Communities in these areas, such as West Oakland and Chinatown, were displaced and those who remained found themselves next to freeways and other pollution-generating land uses. Zoning was used to designate some areas as residential, either with single-family homes or multi-family homes, and others as industrial.[9] This kept property values higher for white residents in more affluent areas. A segregation map published in 1960 by Sociologist Dr. Floyd Hunter showed that the three zones where Black people resided included zoning for industrial use around residential areas, while the six zones ~~were~~where they did not reside were mostly "A" or single-family zoned, with no industrial use. The racialized concentration of wealth and

[9] Fergison, P. "Head for the Hills: Race and Property Value in Oakland" (thesis, University of California at Santa Barbara, 2018), 35.

poverty in Oakland generated through these extractive, exclusionary tactics plays out spatially, with many communities of color having the least access to wealth- and health-building resources, and white communities having the most access.[10]

In the late 1990s, Oakland became an attractive target for real estate investment, spurred in part by the 10K Initiative that proposed scattered market-rate housing across downtown. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process called "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[11] These targeted practices resulted in enormous waves of foreclosures in East and West Oakland. Data from the Urban Strategies Council shows that 93 percent of foreclosed properties then acquired by investors were located in these neighborhoods.[12] At the same time, a strengthening Bay Area jobs market led to waves of residential and commercial gentrification, especially in North and West Oakland. The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities.

Despite policies aimed to eliminate racial bias and discrimination, economic and racial segregation continues to increase in the United States. According to data from the National Bureau of Economic Research, over the past 40 years, economic inequality in the United States has returned to levels last seen in the 1920s.[13] Although explicit racial discrimination or legally recognized segregation is not practiced or condoned ~~in~~by the City of Oakland today, the consequences of this history remains~~,~~ and can be traced on today's maps of racial/ethnic population concentrations and concentrations of poverty.

~~Public and private~~Private housing discrimination (that continues to this day) also contributes to patterns of segregation within a community. Although racial and ethnic segregation is perhaps the most common and well-known form, other protected classes may also experience segregation. This section explores patterns and trends of segregation based on race and ethnicity, disability, familial status, and income level in Oakland. These groups are not mutually exclusive, and there may be considerable overlap across each protected class.

RACE AND ETHNICITY

Regional

Racial and ethnic patterns of segregation in Oakland should be understood within the context of both current regional segregation patterns as well as changing regional and local demographics. As shown in Table D-1, the population of Alameda County has increased by 10.2 percent between 2010 and 2020, with a projected increase of about 12.3 percent between 2020 and 2040, according to California Department of

Finance. While the Hispanic group led county growth in numbers (representing an increase in 49,079 people from 2010 to 2020), non-Hispanic multiracial was the fastest-growing group. This group will continue to be the fastest-growing group through 2040, followed by American Indians and Alaska Natives. Over two-thirds of the Alameda County population is something other than non-Hispanic white; however, as of 2020, non-Hispanic whites represent the largest share of the population at about 33.5 percent, followed by non-Hispanic Asians (26.4 percent) and Hispanics of any race (23.4 percent).

Table D-1: Population Growth by Race/Ethnicity, Alameda County, 2010 - 2040

Race/Ethnicity	Population			Percent Change	
	2010	2020	2040 Forecast	2010-2020	2020-2040
White (NH)	519,672	559,571	616,233	7.7%	10.1%
Black (NH)	185,710	191,801	208,955	3.3%	8.9%
American Indian or Alaska Native (NH)	4,299	4,846	6,174	12.7%	27.4%
Asian (NH)	395,859	441,271	479,809	11.5%	8.7%
Native Hawaiian or Pacific Islander (NH)	12,421	13,465	13,879	8.4%	3.1%
Multiracial (NH)	57,199	70,261	96,567	22.8%	37.4%
Hispanic/Latinx (any race)	341,561	390,640	456,149	14.4%	16.8%
Total	**1,516,721**	**1,671,855**	**1,877,766**	**10.2%**	**12.3%**

Note: NH refers to non-Hispanic.

Source: California Department of Finance, Table P-2D County Population by Total Hispanic and Non-Hispanic Race (2010-2060)

Regionally, the San Francisco Bay Area experiences notable racial segregation patterns. ABAG-MTC's AFFH Segregation Report, prepared in collaboration with the UC Merced Urban Policy Lab, found that white residents in the region are significantly more segregated from other racial and income groups, though white isolation has decreased since 2010. The highest levels of racial segregation occur between Black and white populations. The Othering and Belonging Institute at UC Berkeley additionally found that seven of the nine Bay Area counties were more segregated in 2020 than they were in either 1980 or 1990, but also that racial residential segregation appears to have peaked around the year 2000 and has generally declined since. However, compared to cities in other parts of California, Bay Area jurisdictions have more neighborhood level segregation between residents from different racial groups, and there is more racial segregation between Bay Area cities compared to other regions in the state.

Local

Oakland has a majority-BIPOC population (71.7 percent) according to 2019 ACS five-year estimates (Table D-2), and Oakland's share of BIPOC individuals is greater than the region at large. However, population growth between 2010 and 2019, which was 8.8 percent overall, was largely driven by an increase in the non-

Hispanic white population (with an increase of 18,917 people from 2010-2019), followed by the Hispanic/Latinx population (with an increase of 15,874 people). The fastest-growing group during that timeframe was some other race or two or more races (45.8 percent). While the non-Hispanic Black or African American population represented the largest share of the population in 2010, by 2019 it had declined 7.4 percent and was no longer the plurality. As described later in the Displacement Risk section of this chapter, this population decline was in part a result of the Black population being displaced as housing costs in the area increased. As of 2019, non-Hispanic whites were the plurality at 28.3 percent, followed by the Hispanic or Latinx population at 27 percent. Non-Hispanic Black or African Americans composed 23.2 percent of the population in 2019. Population projections by race and ethnicity are unavailable at the city level as they have not been prepared by the Department of Finance, the Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) or Alameda County.

Table D-2: Population Growth by Race/Ethnicity, Oakland, 2010 - 2019

Race/Ethnicity	Population		Percent Change
	2010	2019	2010-2019
White	101,308	120,225	18.7%
Black or African American	106,637	98,749	-7.4%
American Indian and Alaska Native	1,214	1,455	19.9%
Asian	65,127	65,195	0.1%
Native Hawaiian/Other Pacific Islander	2,081	2,237	7.5%
Some other race/Two or more races	15,289	22,294	45.8%
Hispanic or Latinx	99,068	114,942	16.0%
Total	**390,724**	**425,097**	8.8%

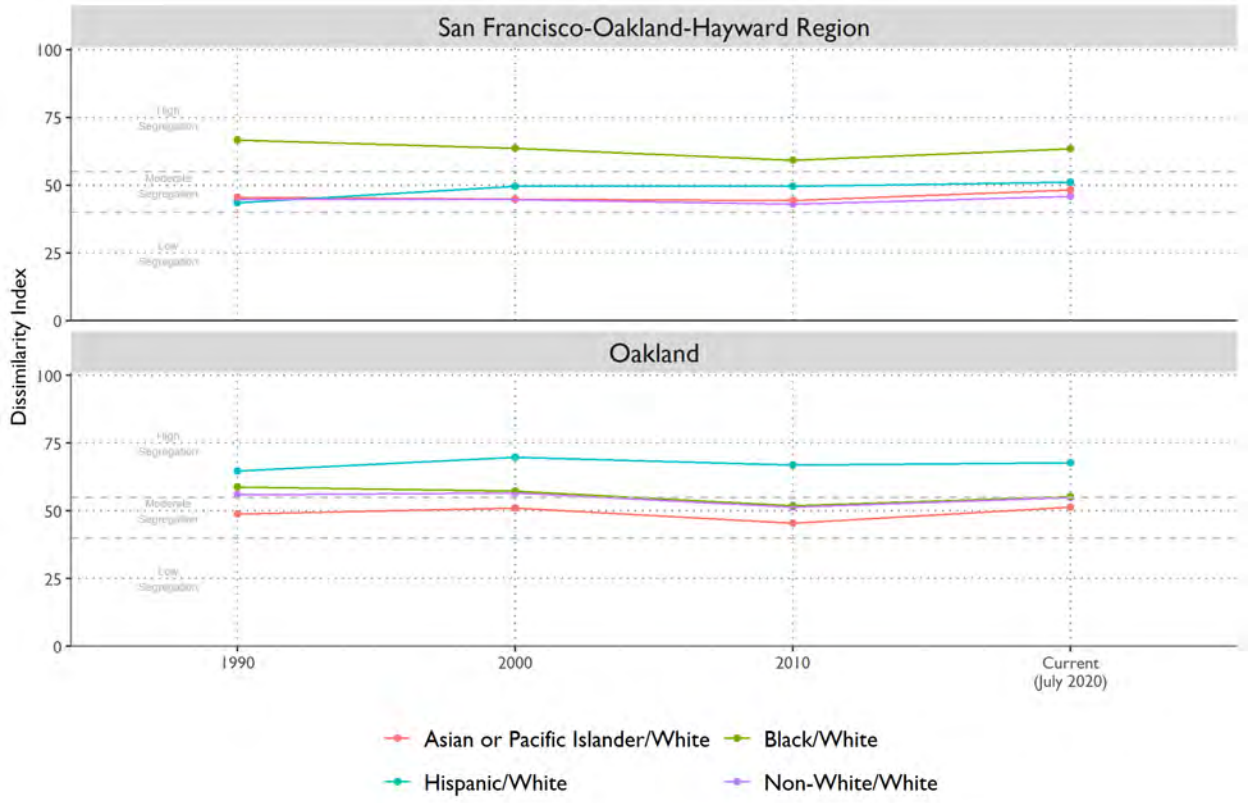
Dissimilarity and Isolation Indices by Race/Ethnicity

To examine the distribution of racial and ethnic groups in a jurisdiction, HUD developed the Dissimilarity Index. The Dissimilarity Index measures the degree to which two groups are evenly distributed across a geographic area and is commonly used for assessing residential segregation between two groups. The Dissimilarity Index uses values ranging from 0 to 100, where higher numbers indicate a higher degree of segregation among the two groups measured. Dissimilarity Index values between 0 and 39.99 generally indicate low segregation, values between 40 and 54.99 generally indicate moderate segregation, and values between 55 and 100 generally indicate a high level of segregation. Dissimilarity Index values compare racial and ethnic groups against the distribution of non-Hispanic white residents in a community and do not directly measure segregation between BIPOC groups. Chart D-1 provides the Dissimilarity Index trends from 1990 to 2020 for Oakland and the San Francisco-Oakland-Hayward Region.

Within Oakland, the dissimilarity index shows moderate or high segregation for all racial groups as compared to the non-Hispanic white population. All indices within the city are above 50 as of 2020. There is moderate segregation between the white and Asian/Pacific Islander population. Segregation between the Black and white populations is borderline moderate-high. In both comparisons, segregation decreased slightly from 2000 to 2010, then increased slightly from 2010 to 2020. Segregation between the Hispanic and white populations is high and has remained consistent for the last 20 years.



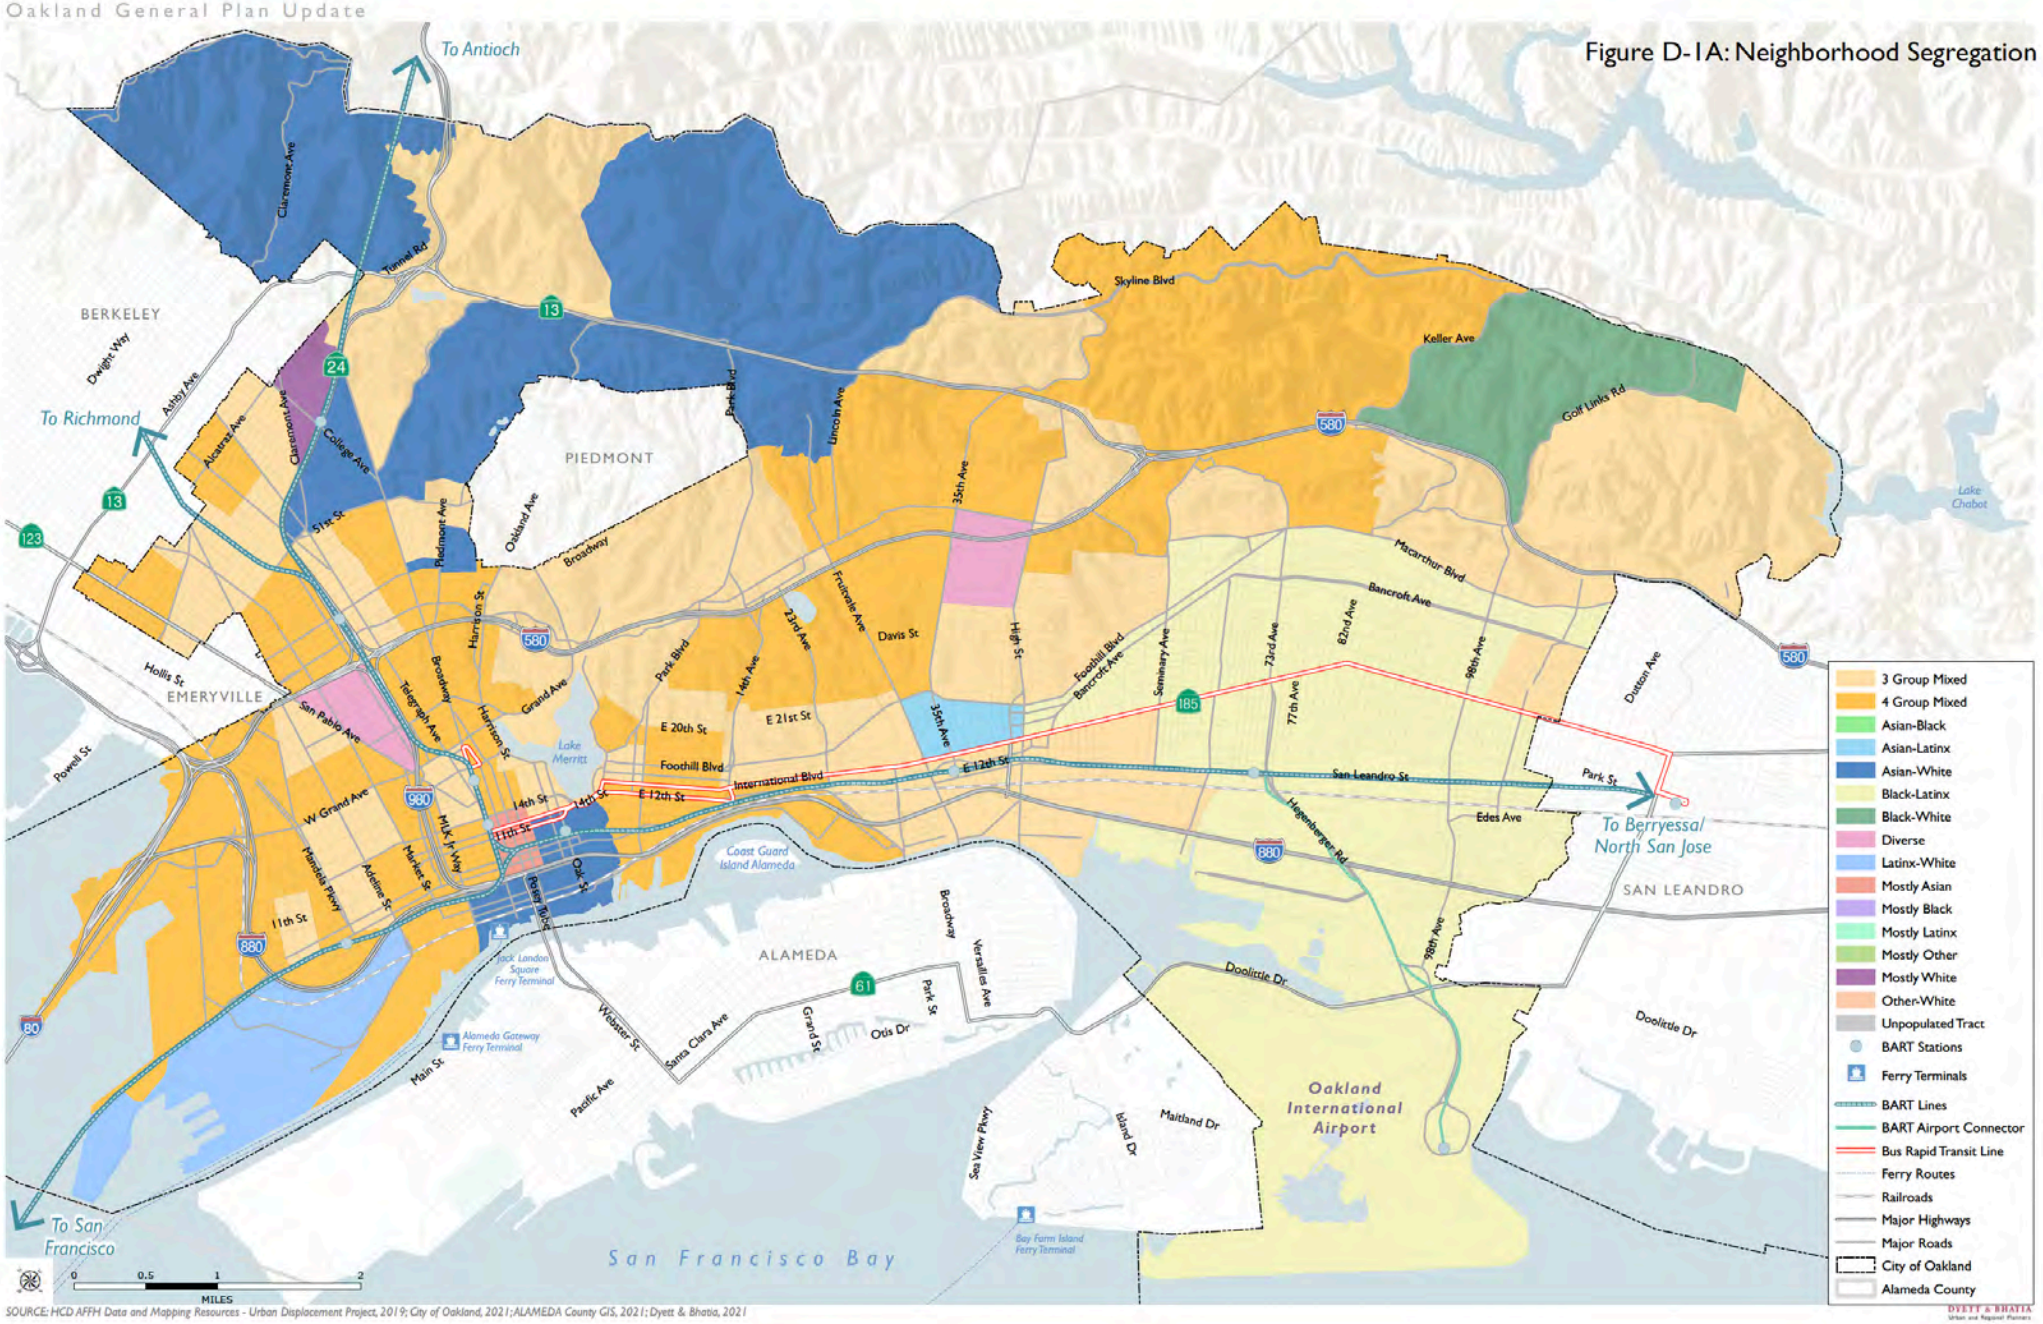
Within the San Francisco-Oakland-Hayward region, segregation between non-white and white groups is lower than within the city of Oakland, scoring less than 50 since 1990 (in Oakland, this number has remained consistently above 50). Since 1990, there has been moderate segregation between all groups in the region, except between the Black and white population, for which it has been consistently higher. Segregation between Hispanic and white groups is notably higher in Oakland than in the region at large, which typically scores 50 or lower. Within the last 10 years, segregation overall has increased slightly in Oakland and in the region, except between the white/Hispanic comparison group, for which it has remained consistent.

ABAG-MTC also produced a dissimilarity index comparing Oakland with the entire nine-county Bay Area. Segregation between white and non-white groups in the nine-county region is notably lower than in Oakland and the San Francisco-Oakland-Hayward region. Also, Oakland's dissimilarity index indicated a higher degree of segregation between Latinx and white populations than any of the 104 jurisdictions analyzed. Overall, Oakland's dissimilarity index indicated one of the highest levels of segregation between white populations and BIPOC populations in the entire Bay Area region.

The ABAG-MTC report also included an isolation index for Oakland and the nine-county Bay Area Region. An isolation index compares each neighborhood's composition to the city's demographics as a whole.

This index ranges from 0 to 1. Higher values indicate that a particular group is more isolated from other groups. Isolation indices indicate the potential for contact between different groups. The index can be interpreted as the experience of the average member of that group. For example, if the isolation index is 0.65 for Latinx residents in a city, then the average Latinx resident in that city lives in a neighborhood that is 65 percent. Latinx residents are the most isolated racial group in the City, and they are less isolated in the region. The Black/African American population is also more isolated within the City than the region, and their isolation index has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020. The isolation index for white populations has fallen from 2000 to 2020 and is somewhat lower within the City than within the Bay Area.

Chart D-1: Racial Dissimilarity Index for the Region and Oakland



Source: HUD, AFFHT0006 Table 12, July 2020

The Dissimilarity Index may not capture the nuances in patterns of segregation between BIPOC communities. Further, the Dissimilarity Index is only available at the citywide level. The Urban Displacement Project (UDP) at UC Berkeley has created neighborhood segregation typologies that identify which racial/ethnic groups have more than 10 percent representation within a given census tract. The typologies consider five racial/ethnic groups, including Black, Latinx, White, Asian and Other. As seen in Figure D-1A, the majority of tracts in Oakland are identified as either 3 or 4 Group Mix. However, there's a cluster of tracts in the northeast section of the city are classified as Asian-white and a cluster of tracts in the southwest section classified as Black-Latinx. Across the city, only two tracts are considered Diverse according to this methodology. Figure D-1B more acutely visualizes segregation in Oakland, showing which census tracts are predominantly Asian, Hispanic, African American, and White (no tracts were predominantly Native American/American Indian). Predominant population is classified into three levels, noting where the census tract population for that group is at least 50 percent greater than the other groups (predominant), 10-50 percent greater (sizeable), and less than 10 percent greater (slim). The Asian population is predominant in the Chinatown area with decreasing margins in surrounding tracts in Downtown and east beyond Lake Merritt; the Hispanic population is predominant in Fruitvale with decreasing margins in adjacent tracts in East Oakland; the African American population is predominant in both West Oakland and the Oak Knolls area in East Oakland, with decreasing margins in surrounding tracts; and the white population is predominant in the North Oakland Hills, Rockridge, and immediately south of Piedmont with decreasing margins in surrounding tracts. Only one tract in East Oakland (Bancroft/Havenscourt) does not have a predominant population.

In contrast, the ESRI 2018 Diversity Index (Figure D-2) classifies many tracts as Higher Diversity and a handful of tracts as Lower Diversity. Most of the tracts on the higher end of the diversity index are consistent with those classified by UDP as Diverse or 3 or 4 Group Mix. Many tracts located in the northeast section of the city fall on the lower end of the diversity index, consistent with the UDP neighborhood segregation findings.

Other Relevant Factors: Loan Denial Rates by Race/Ethnicity

Chart D-2 below traces loan denial rates for home purchase and improvement loans between 2012 to 2020 for all census tracts in Oakland and Alameda County. Denial rates have remained relatively stable and generally lower than 25 percent in the County, with Asian and white applicants consistently on the lower end, and Black applicants consistently on the higher end. In 2018, denial rates increased for all groups in the County, but have since decreased. Despite the decrease, denial rates have remained higher for the Hispanic and American Indian/Alaska Native groups. Oakland-based denial rates are similar to the County's rates on average, but with more variability for the American Indian/Alaska Native and Native Hawaiian/Other Pacific Islander groups. Both groups comprise much smaller shares of the Oakland population than other racial/ethnic groups, which might mean fewer loan applications, and thus have a larger impact on the data. Denial rates are generally higher for the American Indian/Alaska Native population in Oakland compared to the County overall, while they are generally lower for the Native Hawaiian/Other Pacific Islander population in Oakland compared to the County overall. Denial rates are consistently lowest for the white population.

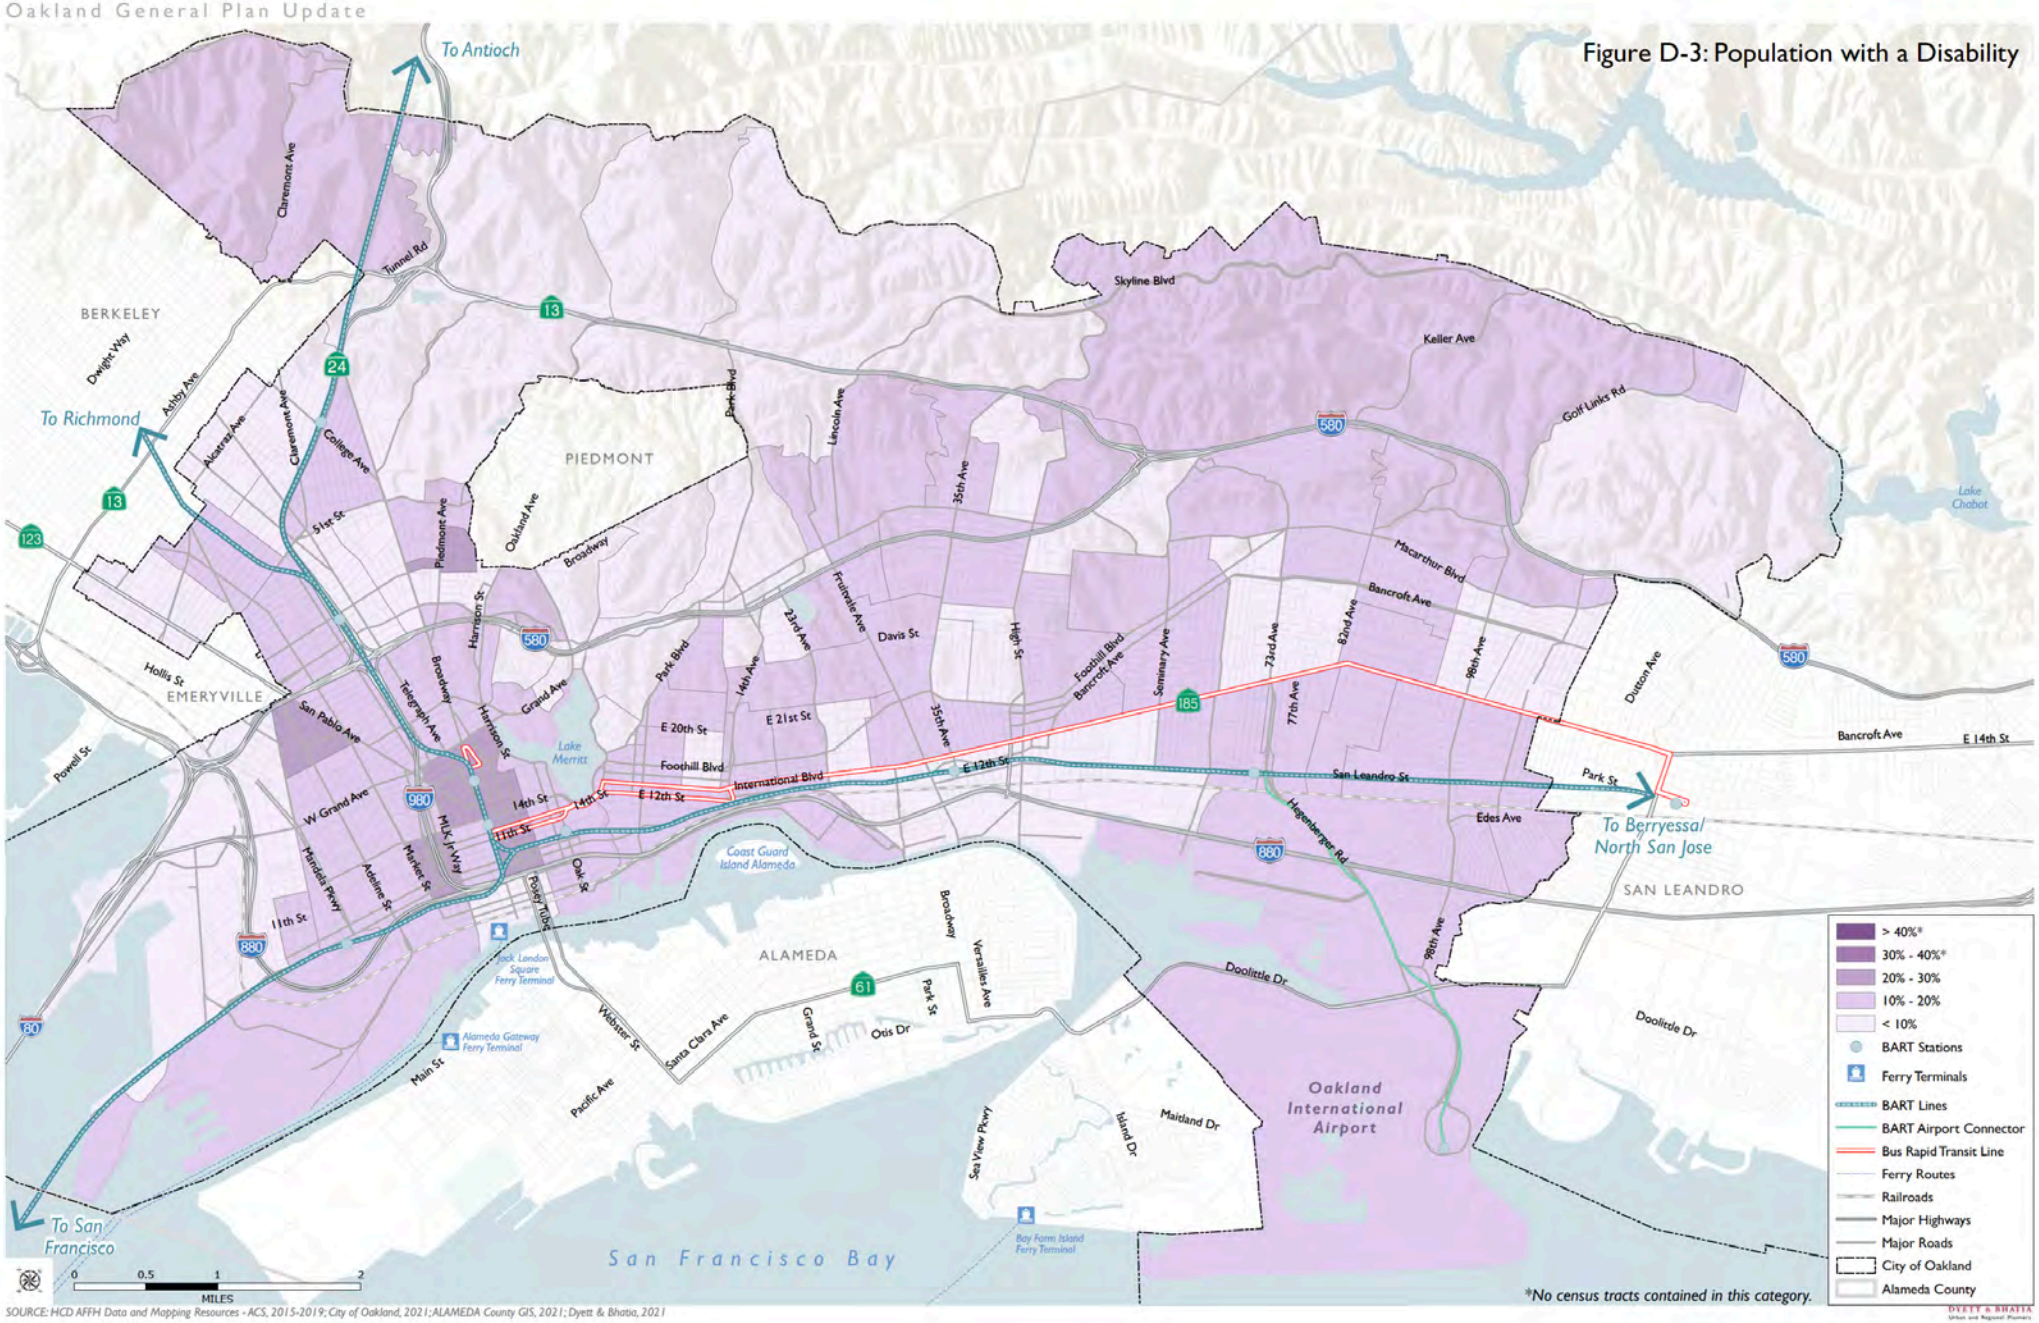
Source: Home Mortgage Disclosure Act Data, 2012-2020



PERSONS WITH DISABILITIES

According to the 2019 ACS five-year estimates, approximately 49,362 or 11.7 percent of Oakland residents were living with a disability. This is slightly higher than in Alameda County (9.2 percent) and in the Bay Area (9.6 percent).

Per 2019 ACS five-year estimates compiled by HCD, Figure D-3 indicates that there is a moderate concentration of people living with a disability (20-30 percent) in some tracts in Downtown Oakland, including Chinatown, plus a tract in West Oakland and a tract in the Piedmont Ave neighborhood. Otherwise, there is a dispersal of persons with disabilities throughout the city. According to the 2020 AI, persons with disabilities are overrepresented in publicly assisted housing (which, as indicated on upcoming Figure D-20, is concentrated in Downtown Oakland.)

Given the barriers faced by persons with disabilities, the provision of affordable and barrier-free housing is essential to meet their housing needs. There are two approaches to housing design for residents with disabilities: adaptability and accessibility. Adaptable housing is a design concept in which a dwelling unit contains design features that allow for accessibility and use by mobility-impaired individuals with only minor modifications. An accessible unit has the actual special features installed in the house (grab bars, special cabinetry). To address these needs, the State requires design or accessibility modifications, such as access ramps, wider doorways, assist bars in bathrooms, lower cabinets, elevators, and the acceptance of service animals. Appendix B, Housing Needs, further addresses details about the population with disabilities in Oakland as well as their housing needs.

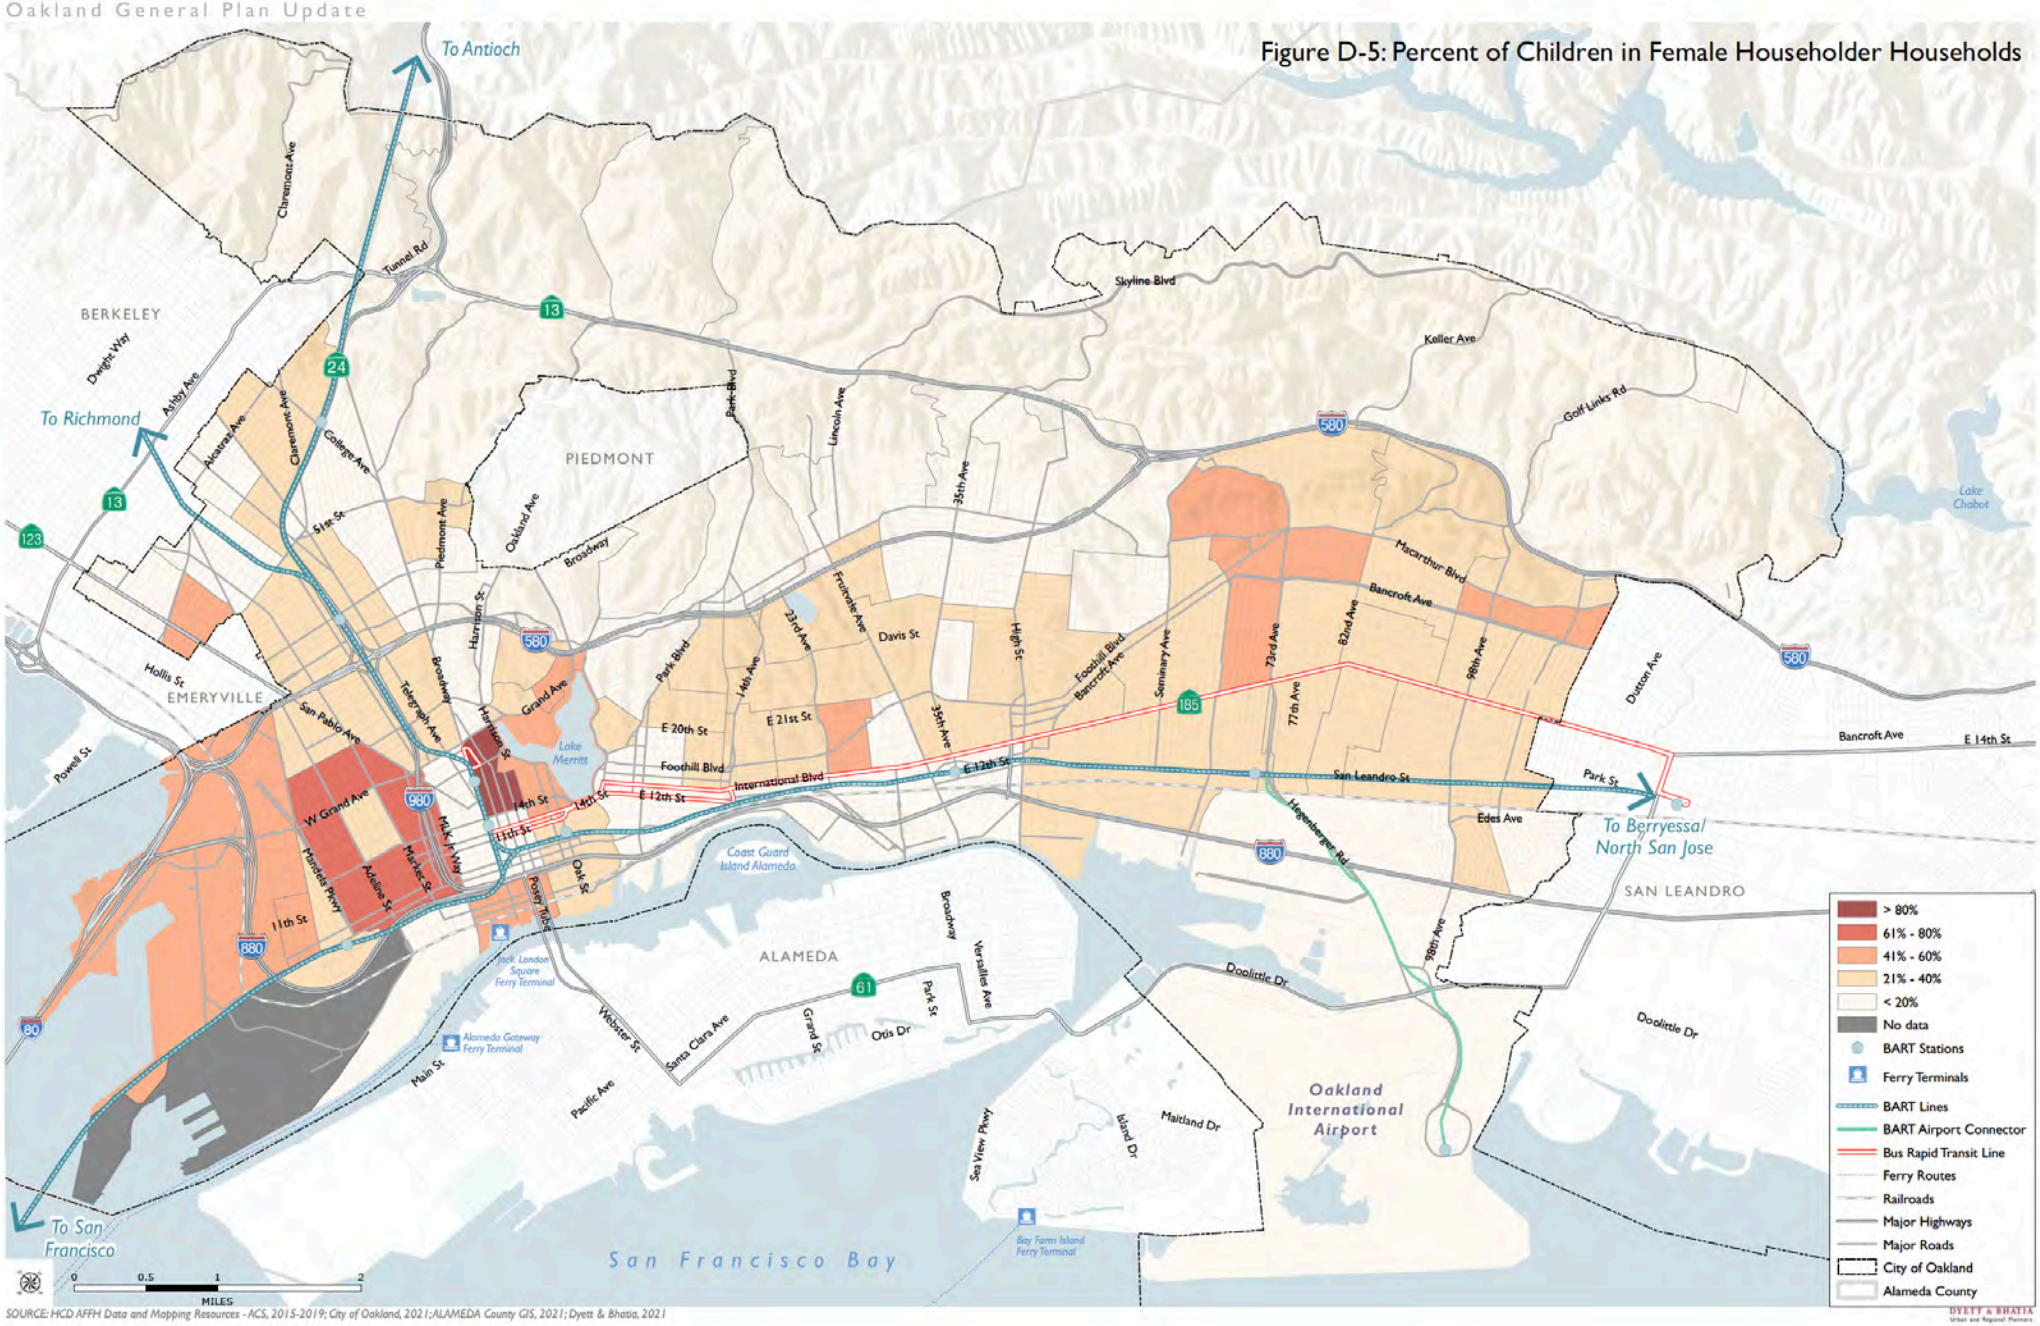
FAMILIAL STATUS

Discriminatory housing practices based on familial status, including discrimination against families with children, may influence where families are able to live and lead to geographic concentrations within a jurisdiction. Female householders with children may especially be targets of discrimination. Table D-3 indicates that more than half of all children in Oakland (60.8 percent) are living in married-couple family households. There are 25,112 children (29.8 percent) living in female-headed households.

Table D-3: Children Under 18 Years in Oakland Households, 2019



Household Type	Number	Percent
Married-Couple	51,201	60.8%
Male Householder, No Spouse Present	7,174	8.5%
Female Householder, No Spouse Present	25,112	29.8%
Other	707	0.8%
Total	**84,194**	**100.0%**

Note: All households with children are considered family households.

Source: U.S. Census Bureau, 2019 American Community Survey 5-Year Estimates (TableID: S0901)

Figures D-4 through D-6 below indicate there are patterns of geographic concentration based on familial status. Figure D-4 shows that the proportion of children in married-couple families tends to be higher in the eastern part of the city, adjacent to and in the hills, plus some scattered concentrations along the western edge of the city. Figure D-5, on the other hand, indicates that there is a higher proportion of children in female householder households in West Oakland and in one specific tract in the downtown area. There is a higher percentage of adults living alone (Figure D-6) in the downtown area, as well as in other mixed-use neighborhoods north and south of downtown, and surrounding Lake Merritt. Additionally, in one tract near Mills College more than 20 percent of adults live alone.

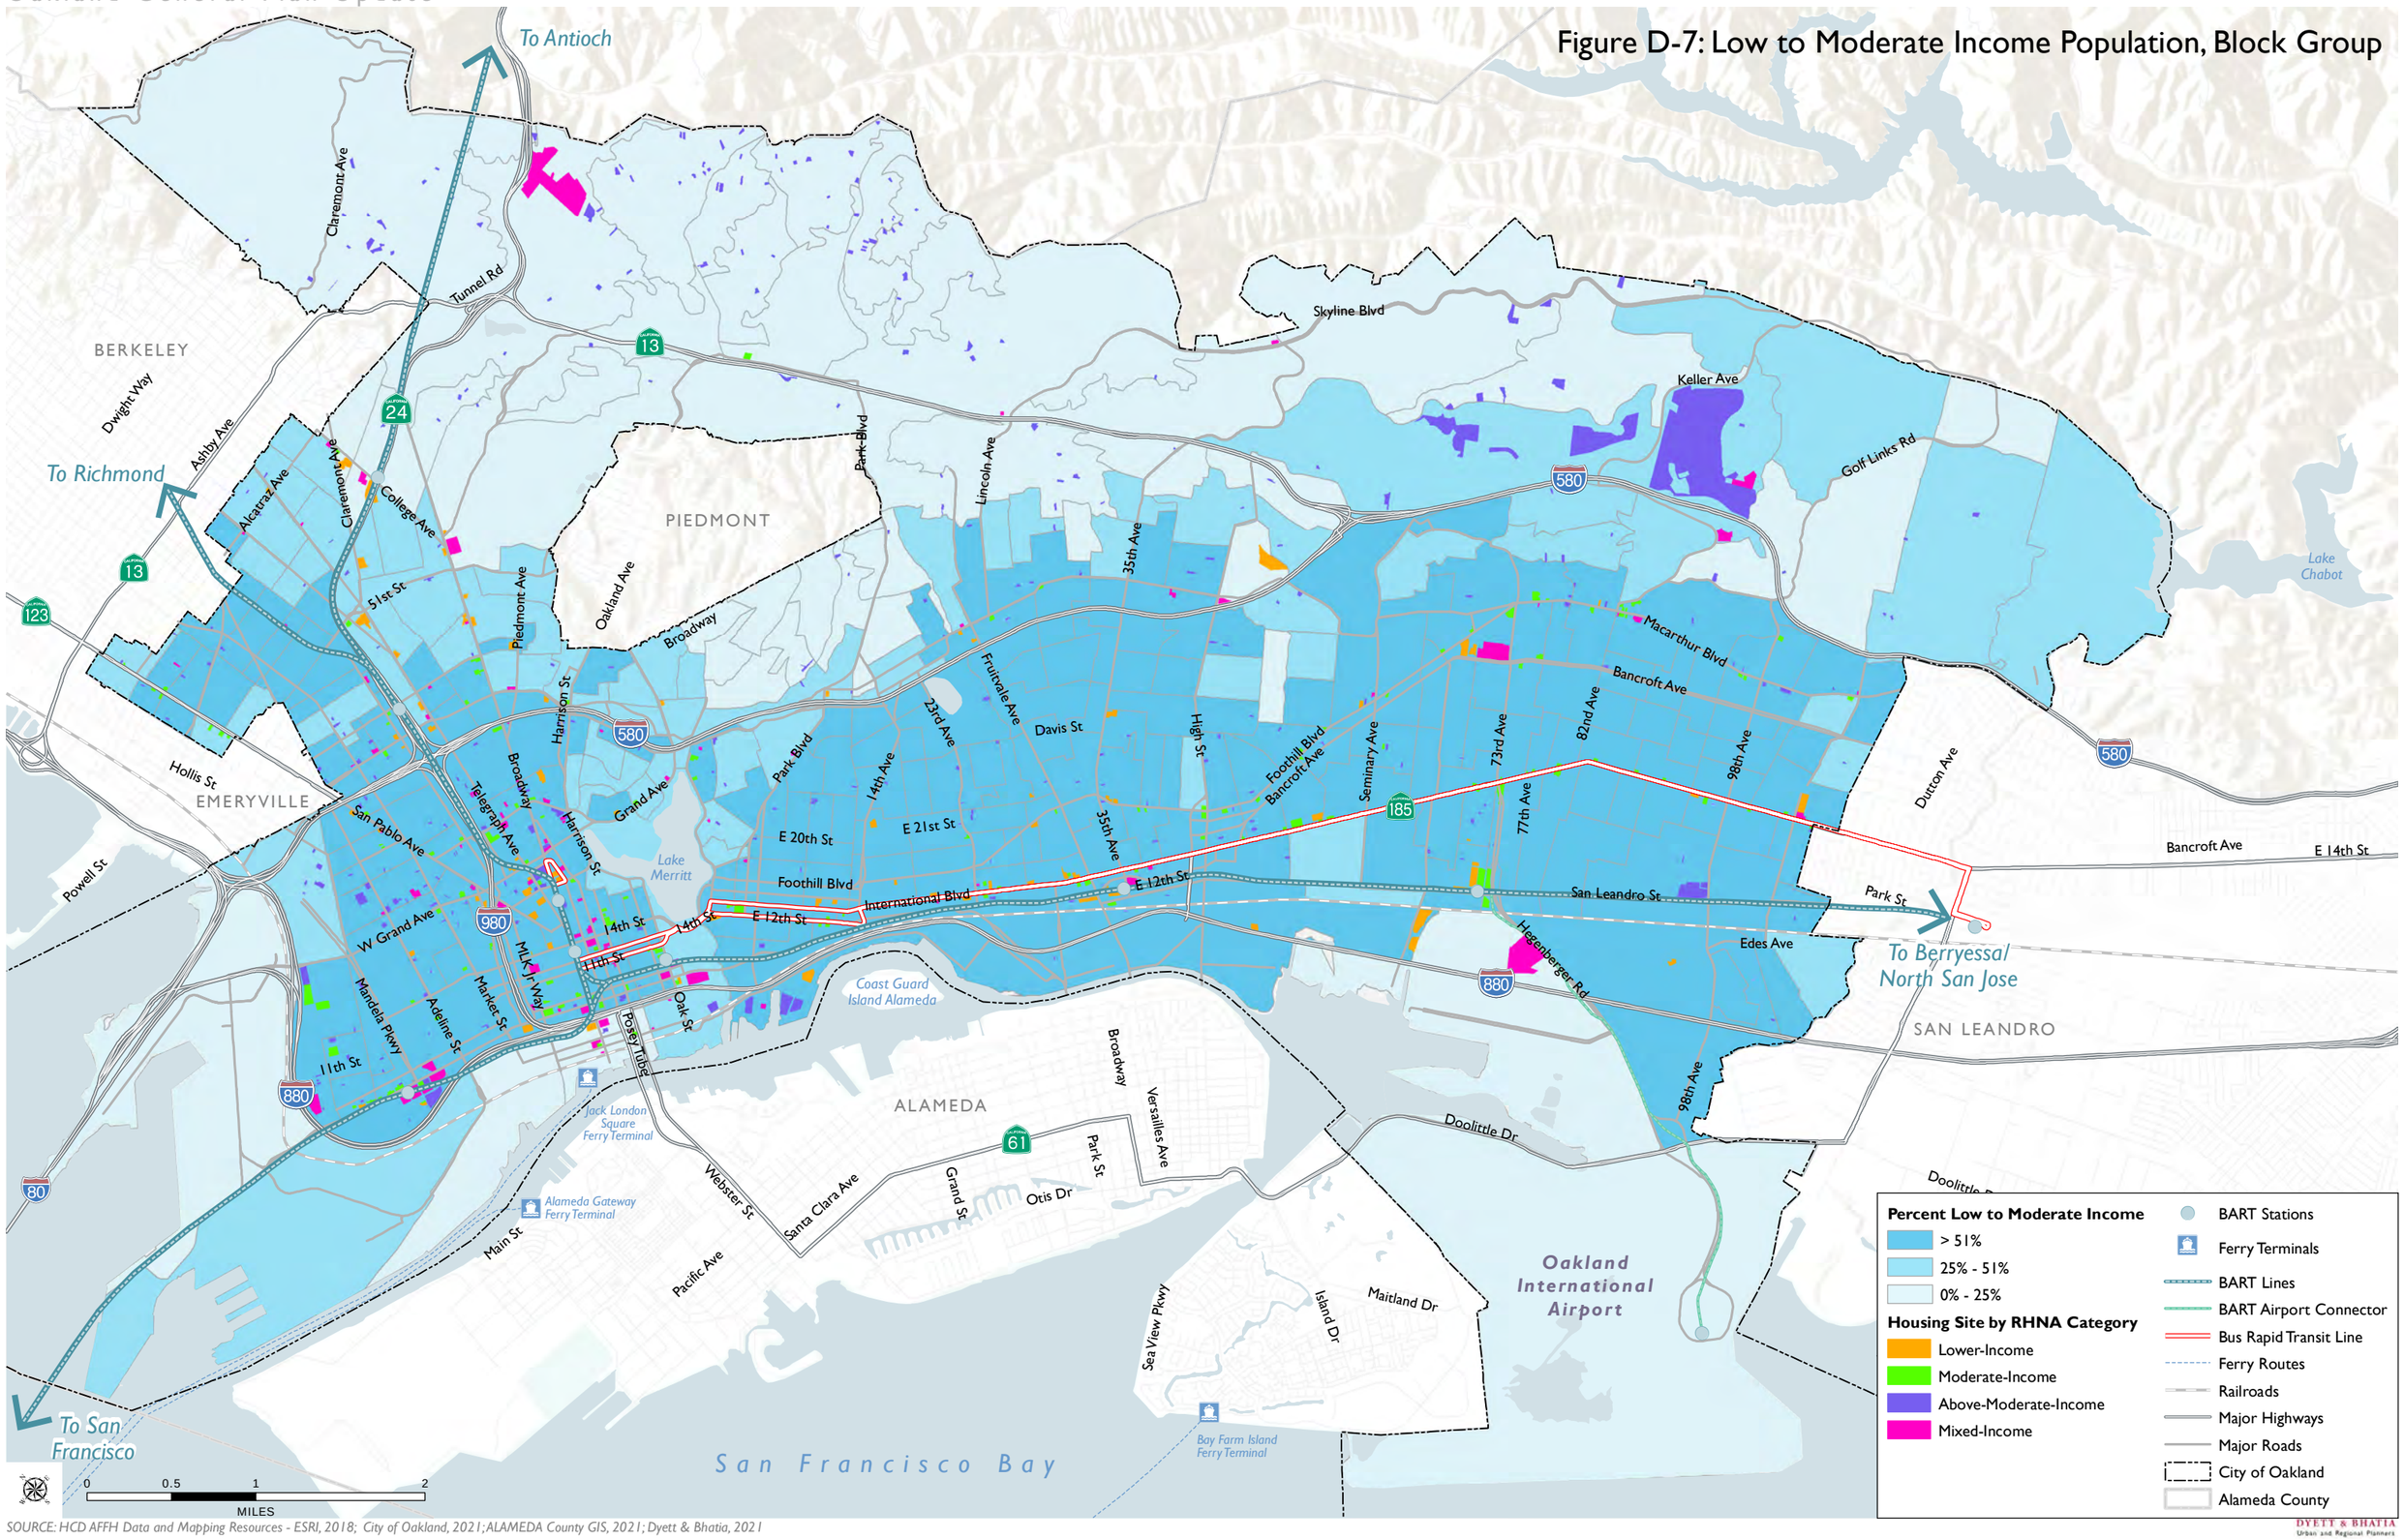
INCOME LEVEL



Geographic concentration by income, including concentration of poverty, is another type of segregation that exists in Oakland. HUD defines low income as 50-80 percent area median income (AMI), and moderate as 80-120 percent AMI. An LMI area (where low- or moderate-income individuals are concentrated) is a census tract or block group where over 51 percent of the population is LMI. Figure D-7 illustrates income segregation across Oakland with the distribution of LMI block groups in 2018. Except for the Port and the Laney College area, LMI block groups in Oakland formed almost a continuous spine through the flatlands. The North Hills and block groups immediately south of the City of Piedmont had the lowest concentrations of LMI individuals, and the South Hills had no tracts where over 50 percent of the population is LMI.

Compared to other Bay Area jurisdictions on average, Oakland in 2015 had a significantly higher rate of between-neighborhood segregation for very low-income individuals, while its segregation rates for other income groups (low, moderate, and above moderate) were similar compared to the region; also, when comparing lower-income individuals to higher-income individuals using a dissimilarity index, income segregation was higher in Oakland than the Bay Area region.[14]

Changing poverty rates over time can provide an insight into the economic wellbeing of households and individuals in Oakland. According to ACS five-year estimates, the poverty rate for individuals in Oakland decreased from 21 percent in 2014 to 16.7 percent in 2019. The poverty rate is higher for families with children in Oakland: 24.5 percent in 2014 and 19.9 percent in 2019. A decrease in the poverty rate during this timeframe was a trend in Alameda County, as well, with 12.9 percent living in poverty in 2014 and 9.9 percent in 2019. Figure 3-8 demonstrates the spatial decrease in poverty from 2014 to 2019, with higher poverty tracts reclassified into lower poverty categories. No tracts had more than 40 percent of the population living in poverty in 2019, while nine tracts did in 2014 (Eastmont, Fitchburg, East Peralta, one tract in San Antonio, one in Downtown, and four in West Oakland). In two cases, tracts with more than 40 percent living in poverty went down to as low as 10-20 percent living in poverty (one tract in West Oakland and the East Peralta tract), which prompts further investigation. While this might be partly a result of a rebounding economy post-Great Recession, it may also signify displacement, which is explored later in this chapter. It is also important to note that poverty disproportionately impacts Oakland residents by race and ethnicity. As shown in Table D-4, all racial and ethnic groups except for white and Native Hawaiian and Pacific Islander populations face higher than average poverty rates.

D.3 Racially/Ethnically Concentrated Areas of Poverty and Affluence

Racially or ethnically concentrated areas of poverty (R/ECAPs) are defined by HUD as census tracts with a non-white population of 50 percent or more, and a poverty rate that exceeds 40 percent or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever is lower. It serves as a measure of neighborhoods that are experiencing both high racial and ethnic concentration as well as high rates of poverty. The 2020 AI notes that displacement, lack of public and private investment in specific neighborhoods, and the type and location of affordable housing all contribute to R/ECAPs. In Oakland (Figure D-9), there are four clusters of R/ECAPs: in/around Downtown and West Oakland, in/around Fruitvale/Jingletown, and two along International Boulevard near the Coliseum.

Recalling Figure D-1B, which shows where predominant concentrations of various racial/ethnic groups live in Oakland, individual R/ECAPs can be linked to census tracts with predominant populations of each of the largest non-Hispanic white racial/ethnic groups in Oakland: Black/African American (West Oakland), Asian (Downtown-Chinatown), and Hispanic/Latinx (Fruitvale/East Oakland). In Oakland, 37 percent of R/ECAP residents are Hispanic, 37 percent are black, 15 percent are Asian or Pacific Islander, and 11 percent fall within other racial categories. According to the 2020 AI, about 13 percent of Oakland's population lives in R/ECAPs.

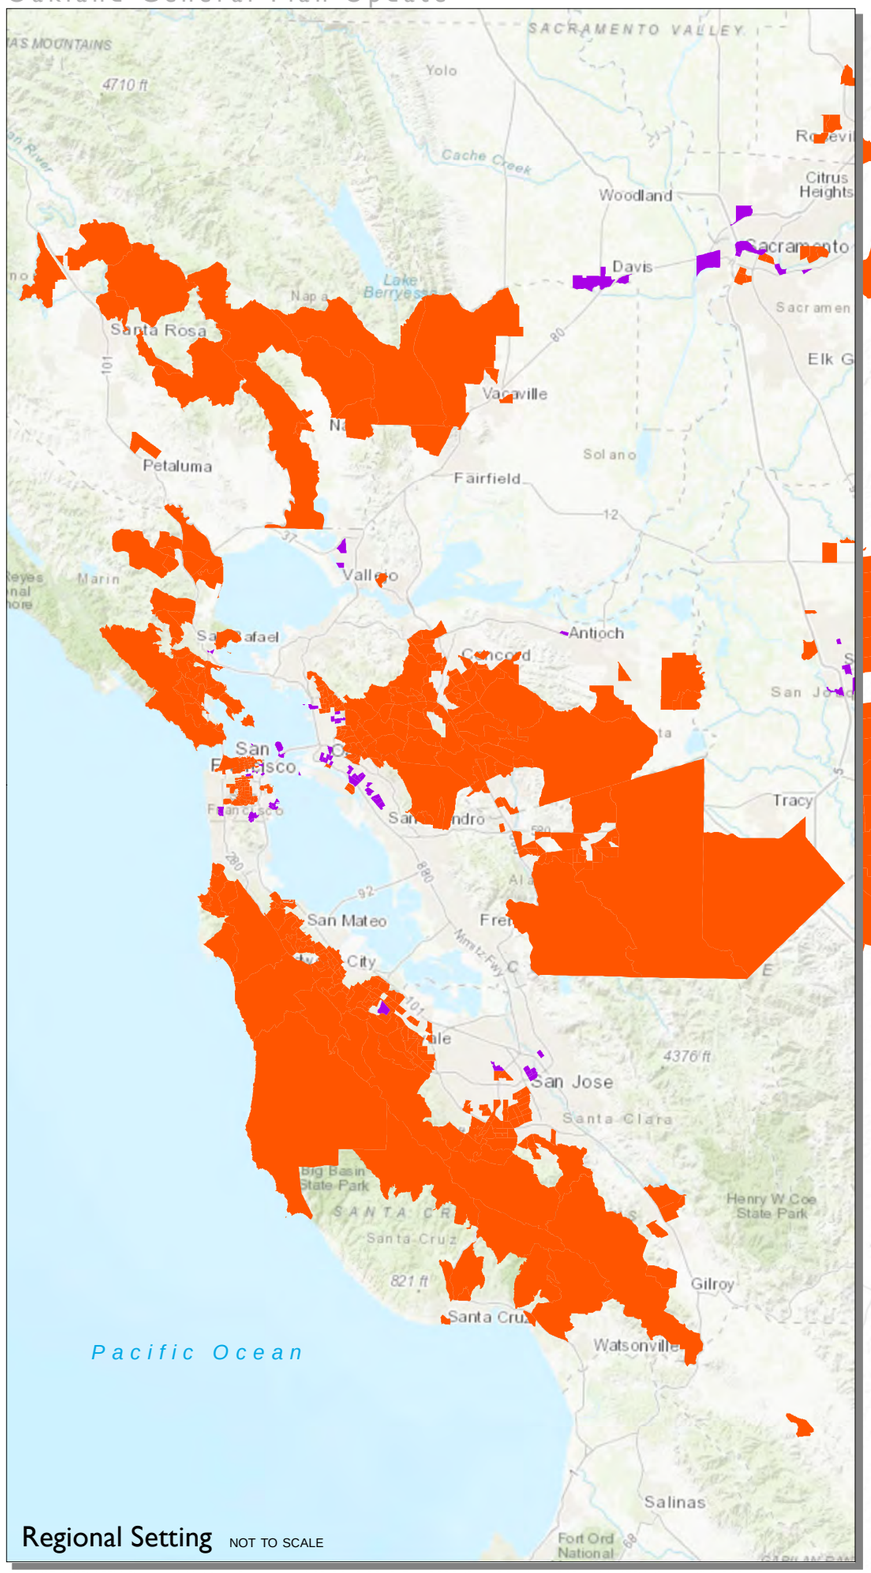

Figure D-9 also shows R/ECAPs throughout the region. R/ECAPs in nearby jurisdictions include, but are not limited to, five tracts in Berkeley surrounding the UC Berkeley campus (which, as noted in the 2020 AI, is likely skewed by no- or low-income students), and a few in San Francisco. There are none in the neighboring Cities of Alameda, Emeryville, or San Leandro. Oakland has more R/ECAPs than any of its neighboring jurisdictions, and the majority of R/ECAPs in Alameda County. In the Bay Area region, there is a more even distribution of races within R/ECAPs: 19 percent are white, 23 percent are black, 29 percent are Hispanic, and 26 percent are Asian or Pacific Islander.

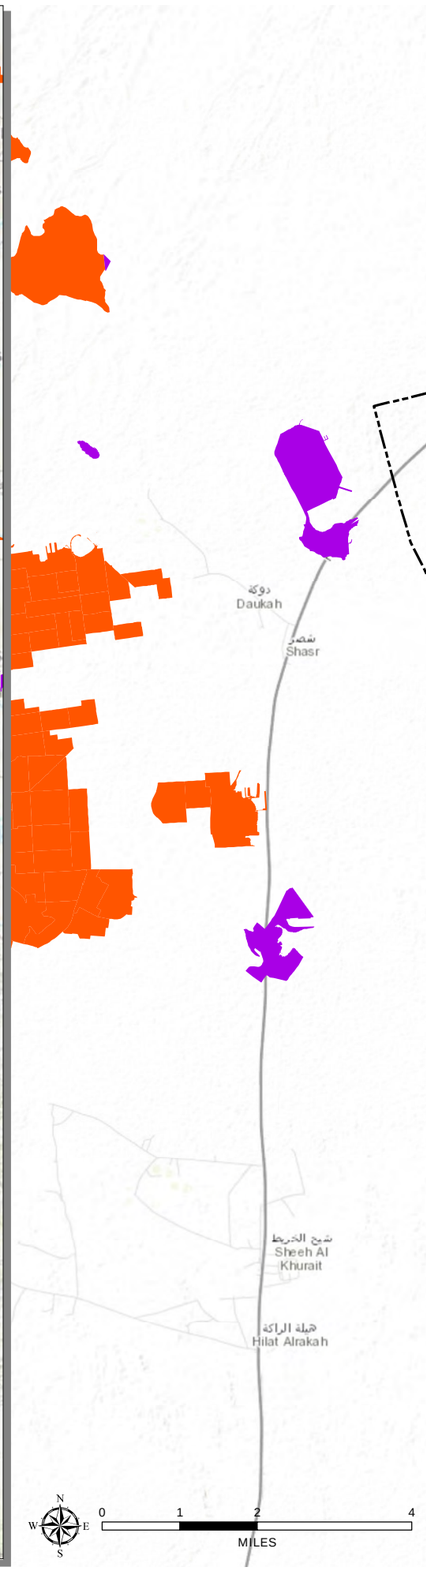
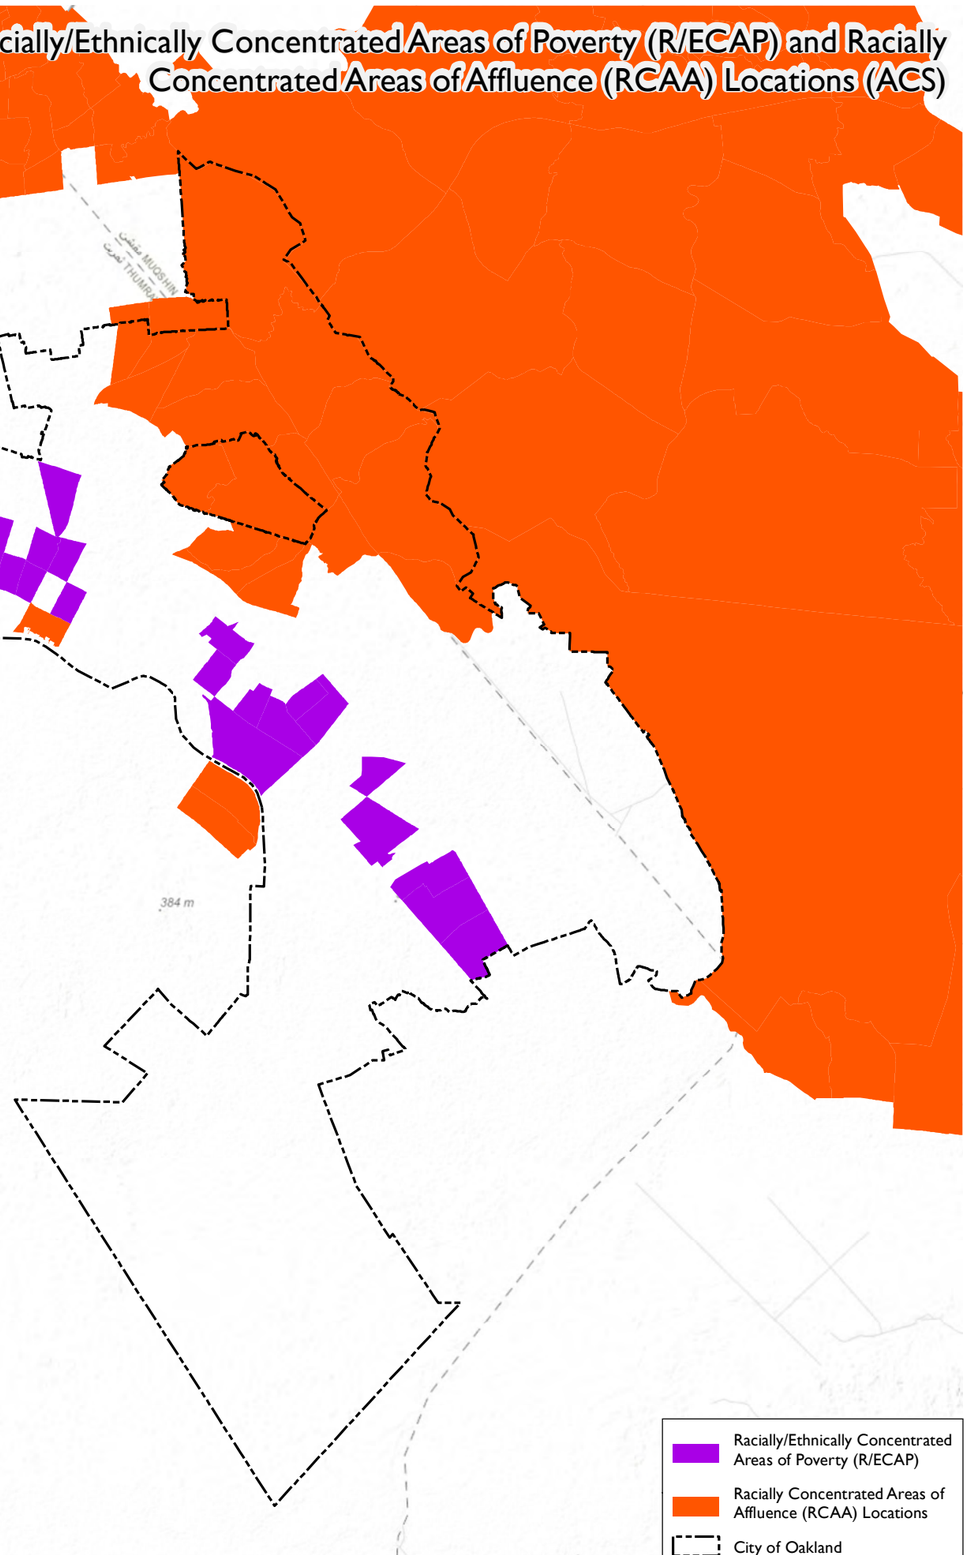


Racially~~/Ethnically~~ Concentrated Areas of Affluence (RCAAs) are not formally defined by HUD or State HCD but are generally considered to be areas with high concentrations of wealthy, white residents. State HCD's working RCAA metric reflects a Location Quotient (LQ), which represents the percentage of total white population (White Alone, Not Hispanic or Latino) compared to the average percentage of total white population for all census tracts in each COG region. Census tracts with an LQ of more than 1.25 and a median income 1.5 times higher than the COG AMI (or 1.5 times the State AMI, whichever is lower) were ~~assigned a numeric score of 1 (Is an RCAA).~~designated as RCAAs. Based on this methodology, RCAAs are present in Rockridge, Montclair, and the North Oakland hills; the Trestle Glen, Crocker Highlands, and Glenview neighborhoods; and the Jack London District. Appendix C and the Housing Action Plan~~, actions X, Y, and Z,~~ action 3.4.1 specifically addresses location of sites available to lower incomes and zoning changes in the Rockridge area to address this existing segregation. Housing Action Plan 3.4.2 directs further study of zoning changes citywide as part of the Land Use and Transportation Element (LUTE) update. As described in Appendix C, the entirety of the North Oakland hills is within a Very High Fire Hazard Severity Zone, and a majority of the land is sloped with grades above 30 percent.



Regionally, other Bay Area jurisdictions have RCAAs, including, but not limited to, many tracts in Marin and San Mateo Counties as well as some tracts in Santa Clara and San Francisco Counties. In Alameda County, there are RCAAs in the neighboring jurisdictions of Berkeley~~, Alameda, Dublin,~~ (adjacent to Rockridge and in North Berkeley), Alameda (the southeastern potion of the city across the tidal canal from Jingletown), and Piedmont (entirety), as well as in Pleasanton, Livermore, and ~~small~~smaller portions of Albany, Dublin and Fremont ~~in Alameda County.~~. There are no RCAAs in ~~the~~ neighboring ~~jurisdictions of~~ Emeryville and San Leandro. In Contra Costa County, the entirety of the Orinda, Moraga, and Lafayette city limits are ~~RCAA.~~

RCAAs. A significant portion of unincorporated Alameda and Contra Costa Counties adjacent to the Oakland border are also RCAAs.

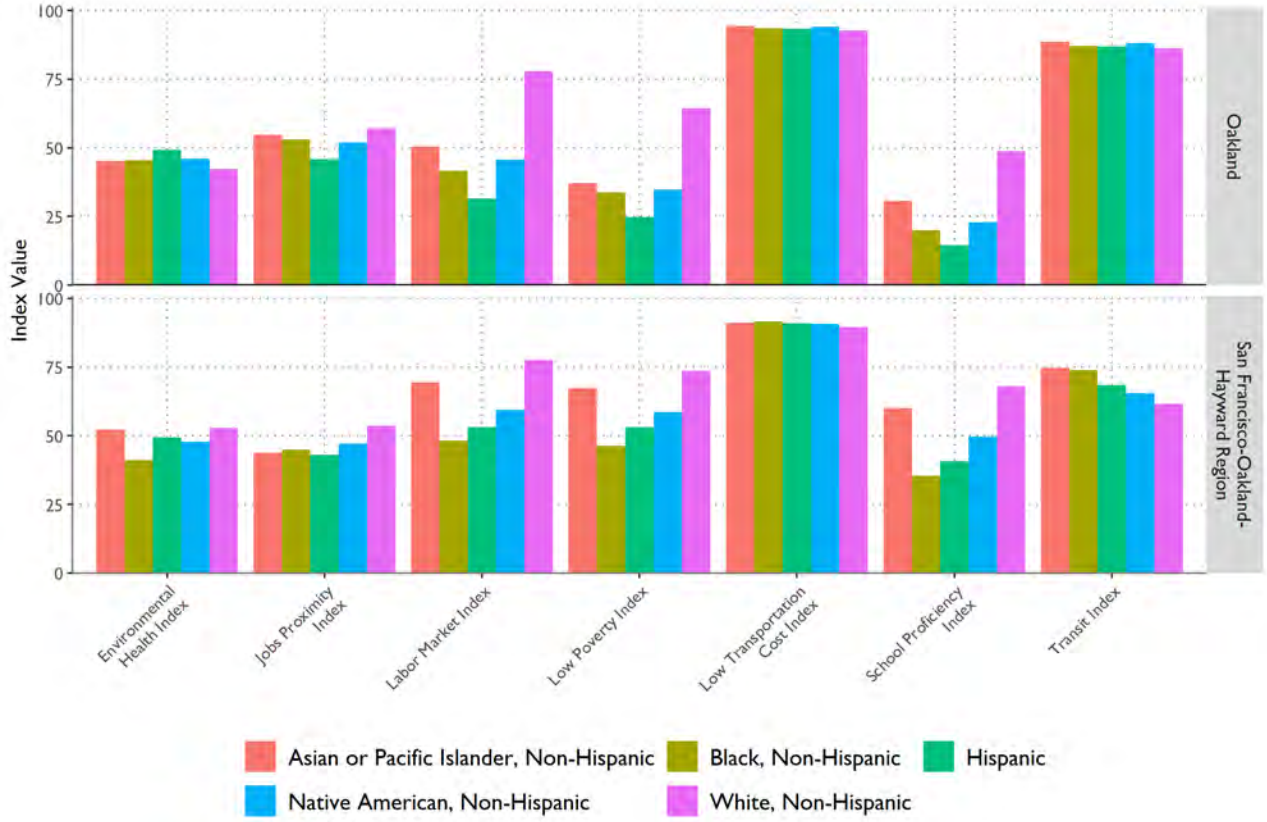
D.4 Disparities in Access to Opportunity

REGIONAL CONTEXT

Access to opportunity was assessed in both the regional and local context. In their July 2020 Assessment of Fair Housing data release, HUD provided a set of opportunity indices to quantify disparities in access to opportunity at the local and regional scale for seven categories: Environmental Health, Jobs Proximity, Labor Market, Low Poverty, Low Transportation Cost, School Proficiency, and Transit. The index score is first computed at the neighborhood level (which can vary from census tract to block group cluster, depending on the variable). The higher the index score, the better an area's access to opportunity. The index score then goes through a second computation that weights it based on the distribution of a given racial/ethnic group in that area. While these indices do not identify opportunity by tract or block group within the city, they can show the relative standing of Oakland compared to the San Francisco-Oakland-Hayward region. Chart D-3 shows the indices by race/ethnicity across the entire population of Oakland and the San Francisco-Oakland-Hayward region. Below are the descriptions for each opportunity index value, along with findings for the city and region:

- **Environmental Health** measures potential exposure to carcinogenic, respiratory, and neurological hazards as determined by the Environmental Protection Agency's (EPA) National Air Toxics Assessment. The higher the value, the less exposure to airborne toxins. The white and Asian/Pacific Islander populations at the regional level have the best environmental health scores and the Black population at the regional level has the worst score. Within Oakland, scores do not differ much across groups, though the score for the Hispanic population is slightly better than the other groups. It is difficult to draw conclusions from this within-city result. Similar to HCD/California Tax Credit Allocation Committee (TCAC) Opportunity Maps data, which appears later in this section, this index only accounts for exposure to toxins and does not account for other environmental justice factors, such as socioeconomic and health disparities across racial/ethnic groups. Additionally, the EPA notes that their assessment is not ideal for measuring differences across small areas; therefore, looking at within-city differences across racial/ethnic groups may not be an ~~ideal~~idea application for this tool. The State HCD/TCAC Opportunity Maps, featured later in this section, are a better tool for examining environmental differences across census tracts in Oakland.



- **Jobs Proximity** quantifies accessibility of a neighborhood to job locations, with major employment centers weighted more heavily. The higher the value, the better access to jobs. Proximity to jobs is slightly higher in Oakland than the region at large, except for the Hispanic population, for which it is roughly the same. While the index focuses on proximity, it does not consider job accessibility based on educational level. Further analysis on job access ~~are~~will be included in the Economic Trends and Prospects report~~,~~ released in ~~May~~June 2022~~.~~, available at https://cao-94612.s3.amazonaws.com/documents/FINAL-Economic_Trends_Prospects_EPS_2022.06.02.pdf

- **Labor Market** measures the intensity of labor market engagement and human capital (i.e. the economic value of a worker's experience and skills) in a neighborhood based on unemployment, labor force participation, and educational attainment. The higher the value, the higher the labor market engagement and human capital. Within Oakland, the labor market index is much higher for the white population than for other groups. Regionally, the Asian/Pacific Islander population has a notably higher index score than within Oakland, the white population has a similar index

score between the region and Oakland, and all other racial/ethnic groups have a slightly higher score at the regional level.

- **Low Poverty** measures poverty in a neighborhood. The higher the value, the less exposure to poverty. Exposure to poverty is lower for all groups regionally compared to Oakland. Asian/Pacific Islander and white groups have the least exposure to poverty regionally. Within Oakland, the white population has notably less exposure to poverty than all other groups.
- **Low Transportation Cost** quantifies transportation costs by neighborhood based on the estimated cost for a low-income, single-parent family of three. The estimate considers a host of variables, such as access to public transit and density of homes, services, and jobs in a neighborhood. The higher the value, the lower the cost of transportation in the neighborhood. Low transportation cost is almost equal for all groups at the city and regional level.
- **School Proficiency** measures access to elementary schools with higher academic proficiency based on the performance of 4th grade students on state exams. The higher the value, the higher the quality of the school system in a neighborhood. School proficiency is higher for all groups at the regional level than at the city level, and highest for white and Asian/Pacific Islander groups. Within Oakland, school proficiency is higher for the white population than other groups.
- **Transit** measures transit use in a neighborhood based on estimates of transit trips taken by low-income, single-parent families of three. The higher the value, the more likely residents in the neighborhood use public transit. The transit index is high in Oakland and about equal across all groups, while in the region it is slightly lower with slight discrepancies between groups.

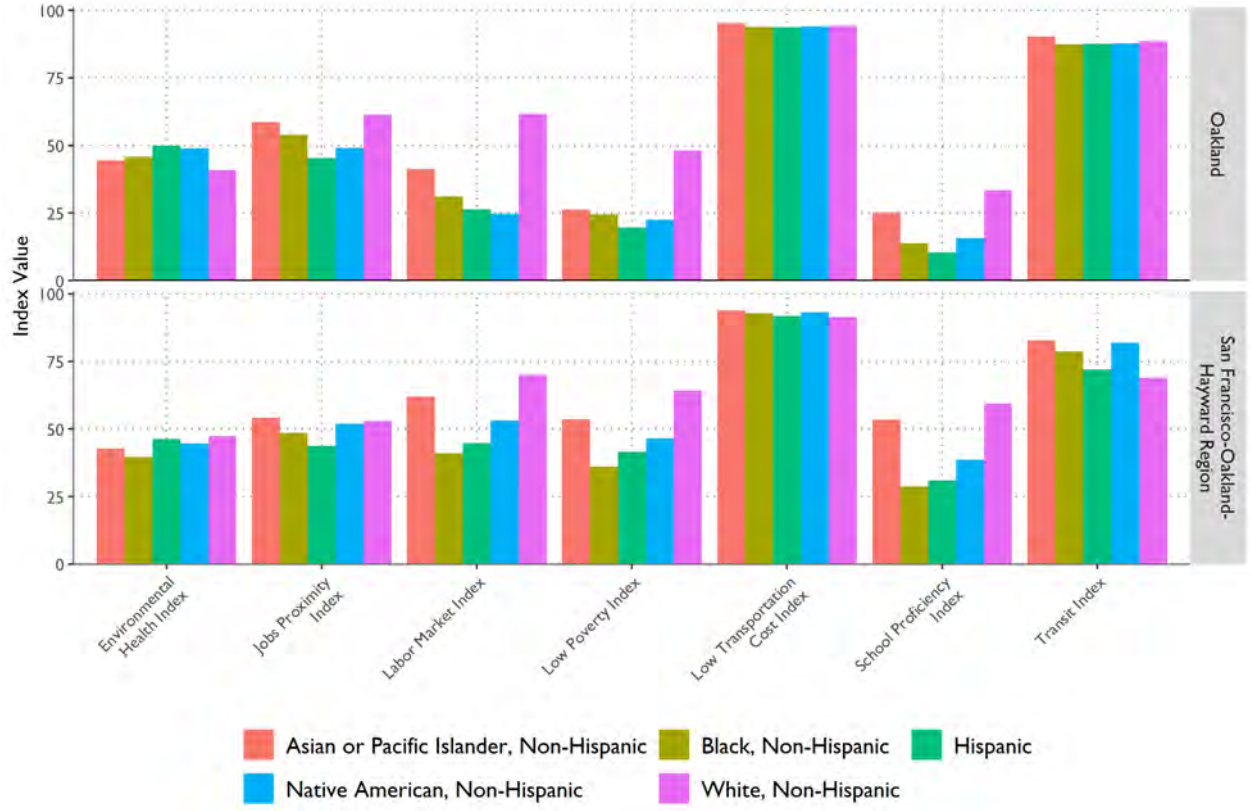


Chart D-3: Opportunity Indices for Total Population, 2020

Source: HUD, AFFHT0006 Table 12, July 2020

Chart D-4 examines these same indices but for the population living in poverty only. The city and regional scores for all groups are similar between the entire population and those living in poverty for environmental health, jobs proximity, low transportation cost and transit. For labor market, low poverty, and school proficiency, patterns are similar relative to racial/ethnic groups and to the geographic areas, but index scores are lower overall in these categories for those living in poverty.

Chart D-4: Opportunity Indices for Population Living Below the Federal Poverty

Line, 2020

Source: HUD, AFFHT0006 Table 12, July 2020

LOCAL CONTEXT

To quantify access to opportunity at the neighborhood level, State HCD and TCAC convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health. Table D-5 below outlines the domains of the Opportunity Maps. The economic, environmental and education domains were further aggregated to create a composite index.

While Opportunity Maps are used as an analytical tool in this Housing Element to best frame disparities in a context that statewide audiences would understand, the City has severe concerns about the current calculation of Opportunity Maps. The current scoring formula fails to adequately account for recent investments into community, cultural assets, or access to transit. The formula also includes several inputs- such as home value and educational attainment- that are legacies of racism and could lead to communities of color being systemically rated as lower-opportunity.

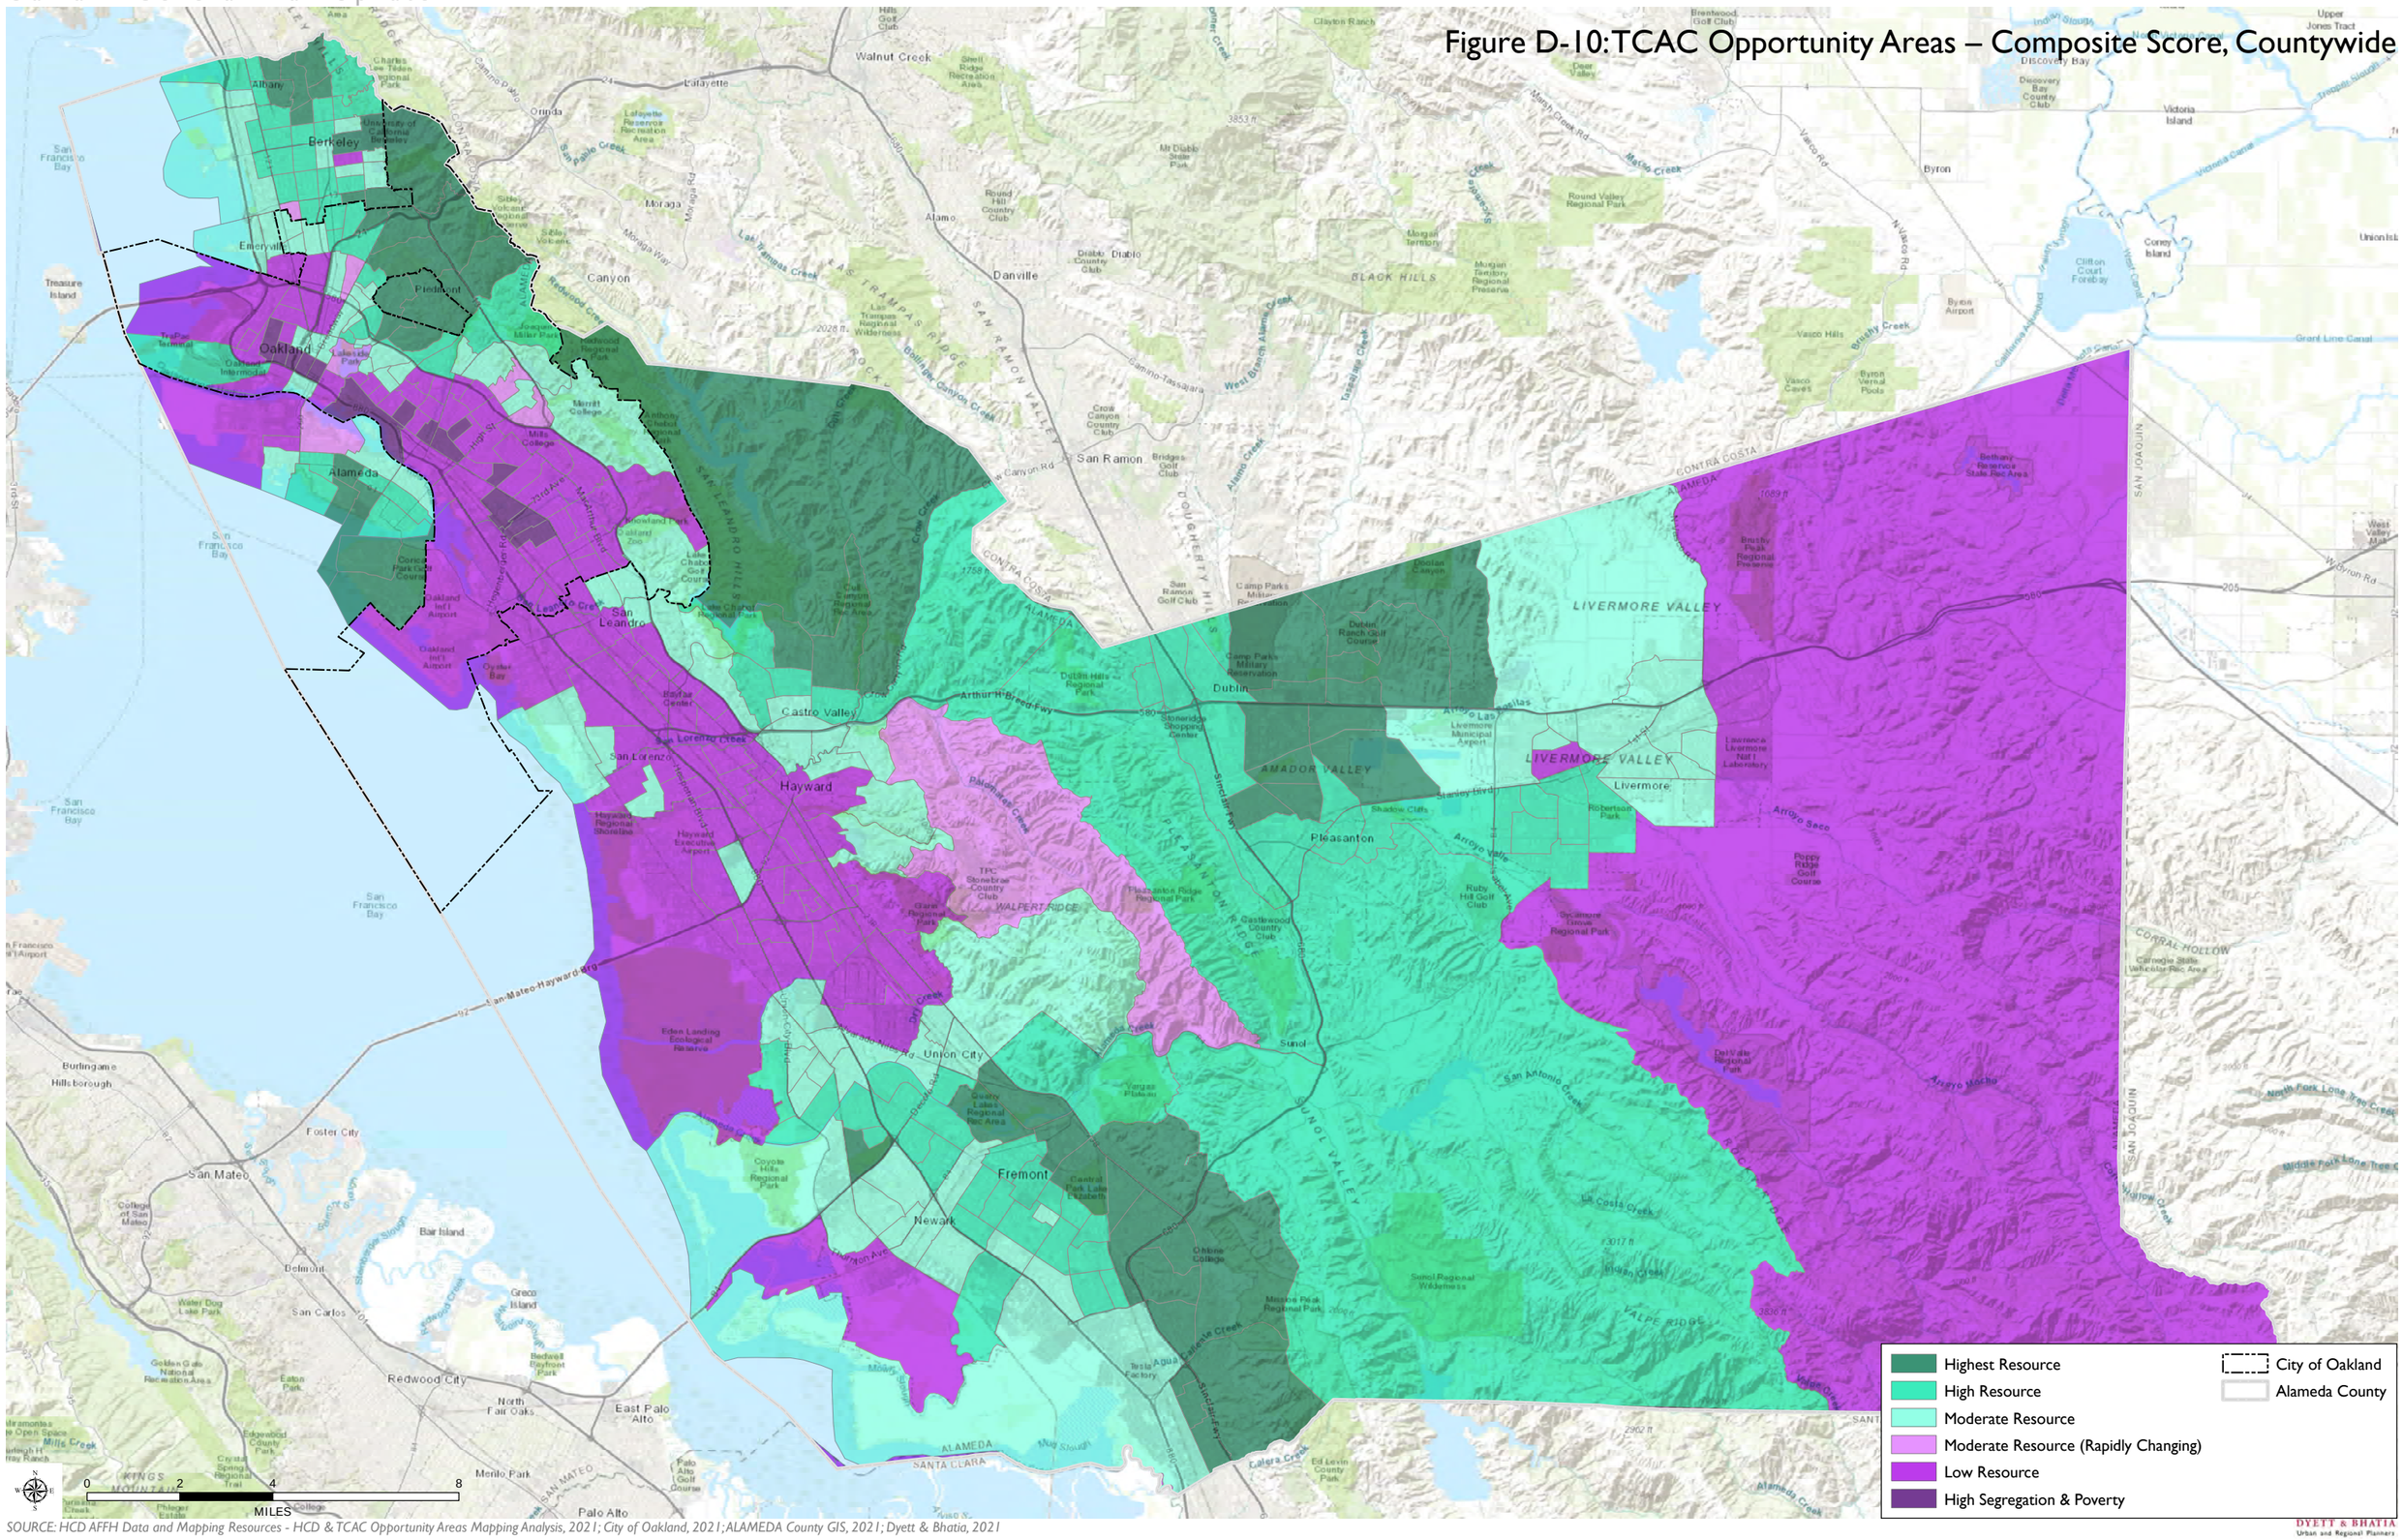

Table D-5: Domain and Indicators for State HCD/TCAC Opportunity Maps, 2020

Domain	*Indicator*
Economic	Poverty Adult Education Employment Job Proximity Median Home Value
Environmental	CalEnviroScreen 3.0 exposure and environmental effects indicators
Education	Math Proficiency Reading Proficiency High School Graduation Rates Student Poverty Rate
Filter	Poverty and Racial Segregation

~~Across~~ Alameda County (Figure D-10) ~~exists the full~~contains a variety of opportunity ~~spectrum~~areas, with the Highest Resource areas generally located farther away from urban centers – except in Berkeley, northeast Oakland, parts of Alameda, and Fremont, which also have High Resource areas located in/near urban centers. All of the census tracts in Alameda County that are designated High Segregation and Poverty are in Oakland. This is potentially due in part to Oakland's racial diversity- areas of high poverty that are primarily white are not designated as "High Segregation and Poverty"

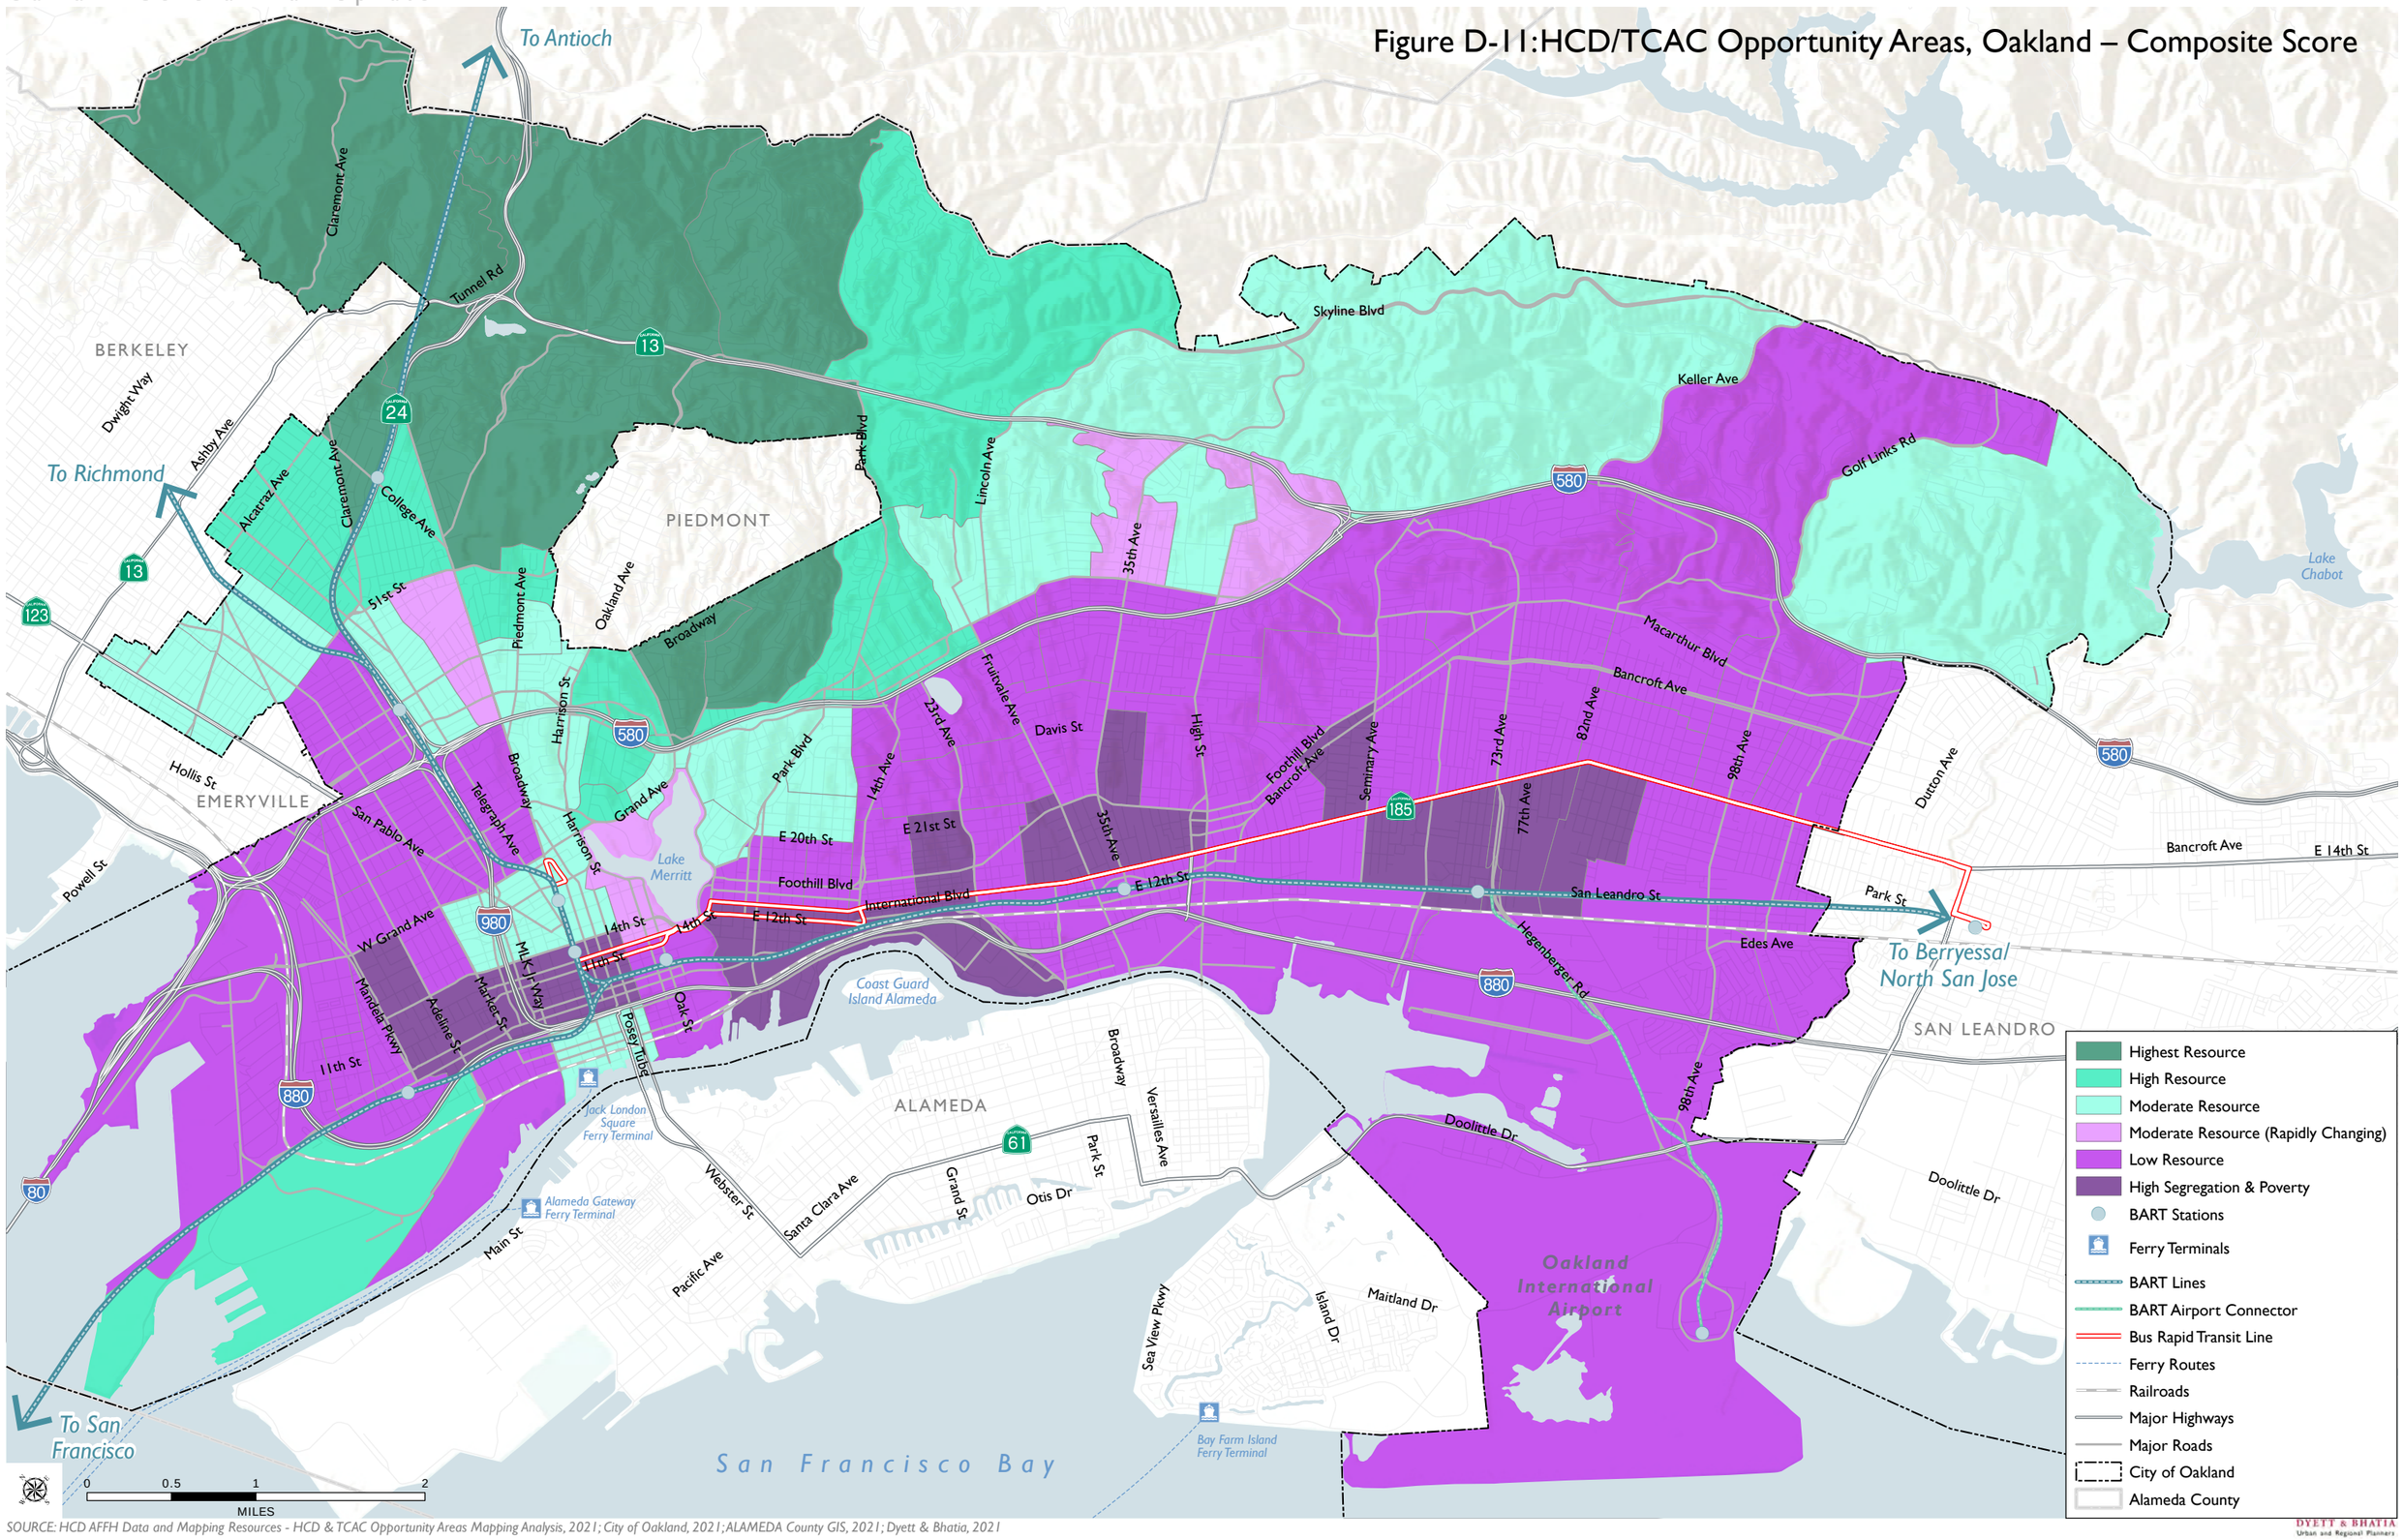
There is a confluence of varying resource levels (except for Highest Resource) in and surrounding Downtown Oakland and Lake Merritt (Figure D-11). Otherwise, most of Oakland's census tracts are considered Low Resource, and these areas surround the High Segregation and Poverty areas. These areas are primarily located in Downtown, West Oakland and East Oakland. As described in Section D2, these communities, which have been historic enclaves for communities of color, have faced a history of disinvestment, redlining, discriminatory policies, and predatory lending. The Highest Resource areas are clustered in the North Oakland Hills and adjacent to Piedmont and these are surrounded by High Resource areas. Census tracts with concentrations of protected groups are limited in access to resources as these tracts do not overlap with the High and Highest Resource Areas, as discussed below.



Those living in Oakland's R/ECAPs have less access to opportunity as these tracts greatly overlap with High Segregation and Poverty and Low Resource areas (Figures D-9 and D-11). These areas are primarily located in Downtown and West Oakland and various census tracts in East Oakland, particularly around Fruitvale and along International Boulevard.

Recalling Figure D-3, persons with disabilities may have varied access to opportunity depending on where they live. Persons with disabilities are most highly concentrated in tracts in Downtown Oakland, one tract in West Oakland, and one tract in North Oakland. These tracts overlap with High Segregation and Poverty Areas, Low Resource Areas, and Moderate Resource Areas.

~~Those living in~~In Oakland, female-headed households ~~also may~~ have ~~varied~~disproportionately less access to opportunity ~~depending on where they live~~. Census tracts with higher concentrations of female-headed households similarly overlap with High Segregation and Poverty Areas, Low Resource Areas, and Moderate Resource Areas in Downtown and West Oakland (Figures D-5 and D-11).

None of the census tracts with higher concentrations of protected groups are High Resource tracts.

Figure D-11:HCD/TCAC Opportunity Areas, Oakland – Composite Score

SOURCE: HCD AFFH Data and Mapping Resources - HCD & TCAC Opportunity Areas Mapping Analysis, 2021; City of Oakland, 2021; ALAMEDA County GIS, 2021; Dyett & Bhatia, 2021

Economic Opportunity

The Economic Score map is similar to the Composite Score map (Figure D-11) with more positive economic outcomes in the northeastern part of the city, the Port industrial area, immediately surrounding Lake Merritt, and one tract in the Jack London District (Figure D-12). Downtown and West Oakland contain a mix of economic outcomes, though none fall into the more positive category. East Oakland falls entirely into the lowest outcomes category. The findings from Figure D-12 align with the Gentrification and Displacement map (Figure D-19) shown later in this chapter. In general, there is more access to economic opportunity in tracts that are in advanced gentrification stages, stable, or exclusive/becoming exclusive and less access to economic opportunity in tracts that are not yet gentrified. Gentrification tends to bring substantial economic development and rising housing costs, which both factor into the economic score.

Those living in Oakland's R/ECAPs have less access to economic opportunity, particularly those living in East Oakland, where census tracts are associated with the least positive economic outcomes; those living in Downtown and West Oakland census tracts may be geographically near access to economic opportunity as some of these tracts have been recently gentrified, but that does not mean that BIPOC populations or people living in poverty can access the opportunities available in these areas (Figures D-9 and D-12).

Residents with disabilities may have more difficulty in finding employment. In Oakland, according to 2019 ACS estimates compiled by ABAG, approximately 14.2 percent of the civilian non-institutionalized population 18 years to 64 years in the labor force with a disability were unemployed, while only 5.6 percent of those with no disability were unemployed. So, while there are a greater proportion of persons with disabilities living in and adjacent to census tracts with varied access to economic opportunity (Downtown, near Piedmont Avenue, and West Oakland), that does not outweigh general employment challenges for those with disabilities (Figures D-3 and D-12).

Female-headed households with children typically have greater need for affordable housing and accessible day care, health care, and other supportive services. Therefore, these challenges might outweigh geographic access to economic opportunity. In fact, according to findings from Appendix B, 39.72 percent of female-headed households with children live below the poverty line. So, while there are a greater proportion of female-headed households with children living in and adjacent to census tracts in Downtown and West Oakland with varied access to economic opportunity, ranging from less positive to more positive outcomes, that does not outweigh other challenges, such as finding affordable childcare, that female-headed households must balance (Figures D-5 and D-12).

Transportation Opportunity

State HCD/TCAC does not map access to opportunity with regards to transportation, but All Transit explores metrics that reveal the social and economic impact of transit, specifically looking at connectivity, access to jobs, and frequency of service.[15] Oakland's All Transit Performance score of 8.3 (on a scale of 0 to 10) reflects a high number of transit trips taken per week combined with the number of jobs accessible to transit. On average, 15 transit lines (bus and rail) are accessible within a half mile of Oakland households, 388,553 jobs (96.7 percent of jobs in Oakland) are accessible in a 30-minute transit trip, and 22.82 percent of commuters use transit. This score is consistent with the HUD Opportunity Indices for Jobs Proximity and Transit. Oakland's score is highest in the flatlands, along the BART corridor, and decreases towards the Hills, where scores fall into the 4-6 range. This means that transit is accessible to those living in R/ECAPs, tracts with high concentrations of female-headed households, and tracts with high concentrations of

[15] AllTransit Metrics. https://alltransit.cnt.org/metrics/. Accessed April 2022.

persons with disabilities (Figures D-3, D-5, and D-9). 83.9 percent of households earning an annual salary of less than $50,000 live within a half-mile of high-frequency transit.

Education Opportunity

Disparities in access to quality education is a significant fair housing issue. As shown in Figure D-13, most census tracts in Oakland are associated with the lowest educational outcomes. The more positive educational outcomes are clustered in the northeastern part of Oakland, particularly the North Oakland Hills and tracts immediately south of Piedmont, which is also where predominantly non-Hispanic white tracts are located (Figures D-13 and D-1B). All R-ECAP tracts have lower educational outcomes, with slightly better (but still low) outcomes in Downtown tracts (Figures D-9 and D-13). Female-headed households with children and persons with disabilities are also concentrated in tracts with lower educational outcomes (Figures D-5, D-3, and D-13).

Table D-6 summarizes test score results from the 2018-2019 Smarter Balanced assessments of math and English language arts, which forms part of the State's California Assessment of Student Performance and Progress (CAASPP). These data reflect public schools; private schools are not mandated to take standardized tests. While Alameda County outperforms the state, Oakland's scores are notably lower than those of the state and county.

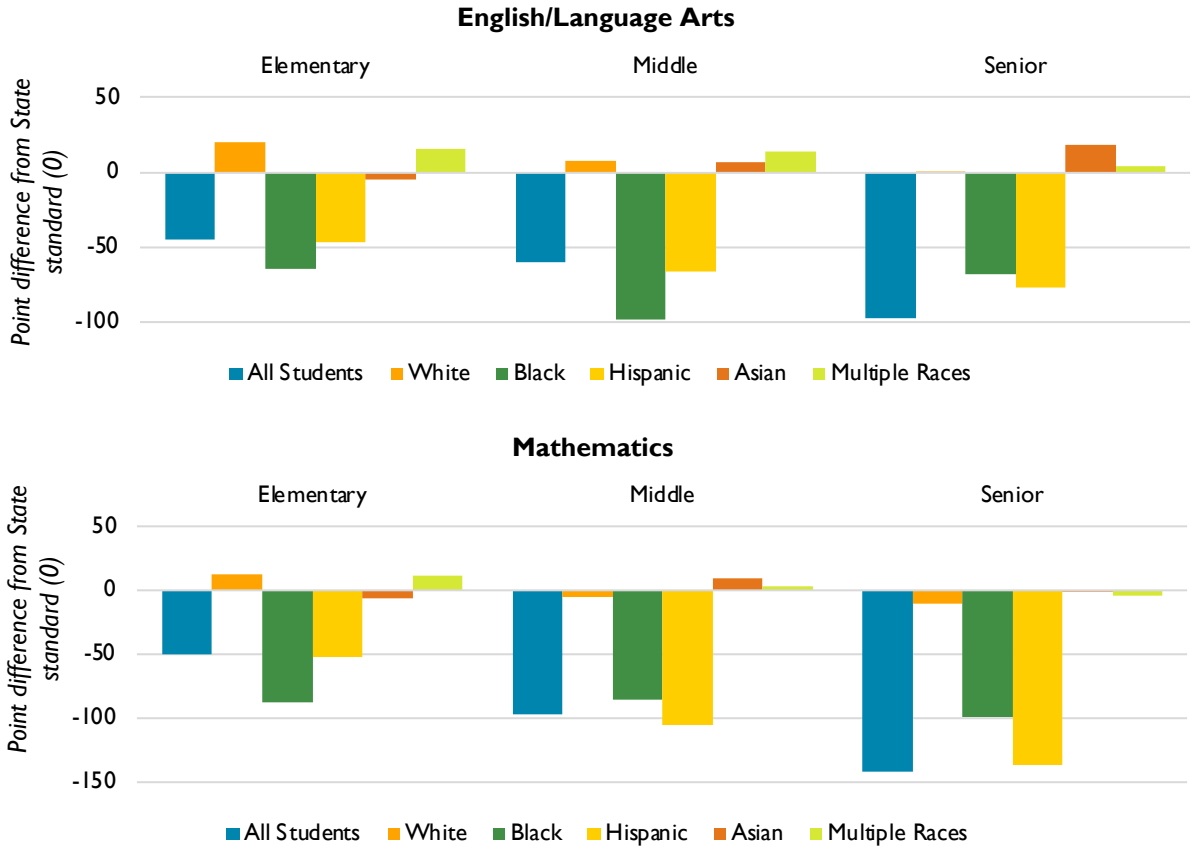


Table D-6: CAASPP Smarter Balanced Test Results, 2018-2019

District/Region	*Percent Met or Exceeded Standard*	
	English Language Arts	*Mathematics*
State of California	51.10%	39.73%
Alameda County	56.84%	48.98%
Oakland Unified School District	33.46%	27.00%

Source: California Department of Education, CAASPP, Smarter Balanced Summative Assessments, 2018-2019

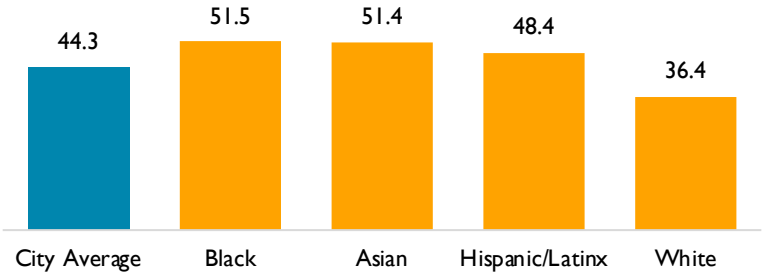
Chart D-5 illustrates how school performance among students for the 2018-2019 school year significantly differs by race. In the Oakland Unified School District (OUSD), Black and Hispanic/Latinx students' average scores are less than the State standards for the Smarter Balanced Summative Assessments and California Alternative Assessments as reported by the California Department of Education (CDE). Moreover, students of all races fall further behind as they progress in their education (i.e., senior/high school performance is worse than elementary school level performance). At a school level, Hillcrest Elementary has the overall highest achieving levels for both English/language arts and mathematics. Hillcrest Elementary is located in a Highest-Resource, predominantly white census tract, miles from any R/ECAPs, where less than 10 percent of the population lives in poverty and less than 20 percent of children live in female-headed households. The lowest-performing elementary school for both subjects is Markham Elementary. Markham Elementary is located in a Low Resource census tract, adjacent to a R/ECAP tract, where 20-30 percent of the population lives in poverty and 41-60 percent of children live in female-headed households. Notably, this school is located in the one Oakland census tract that has no racial/ethnic majority population, but adjacent to tracts with slim Hispanic/Latinx and Black/African American majorities. These outcomes are typical of patterns in race and income; schools in majority-white and more affluent areas (such as Hillcrest Elementary) tend to score higher and often are supported by Parent Teacher Associations (PTAs) with substantial budgets for enrichment activities than schools in lower income and/or majority-BIPOC neighborhoods (such as Markham Elementary).

Chart D-5: OUSD Student Performance by Race (2018-2019 School Year)

Notes: Other categories not shown due to insufficient data: Pacific Islander, Filipino, Native American/Alaskan. Elementary includes K-8; Middle includes 6-12; Senior includes Alternative. Charter schools and Independent Study not included.

Sources: California Department of Education, 2019; Oakland Unified School District, 2021; Dyett & Bhatia, 2022.

OUSD school enrollment is based on a lottery. This technically allows students and families access to more proficient schools. However, applications for students applying to schools in their own neighborhoods are prioritized. Additionally, students applying to Chabot Elementary, Edna Brewer Middle School, and Sequoia Elementary who live in Priority Census Blocks (based on the concentration of Latinx and Black/African American residents, median household income, and number of students participating in free and reduced-price lunch) are prioritized in the application process. Regardless, having to travel across the City to access a better resourced than one's neighborhood school is a deeply inequitable situation.



Environmental Opportunity

Environmental health is another key consideration in fair housing. Today's persistent environmental injustices result from not only recent action or inaction but from historical decisions that determined the city's land use patterns, industrial base, and transportation network. The racial inequities in levels of air pollution, ground contamination, noise, and other environmental problems reflect ineffectively or differential enforcement of environmental protection laws, as well as the siting of residential areas in proximity to noxious industrial uses and the routing of truck traffic through low-income, Port-adjacent

communities and on I-880 but not I-580. By recognizing the impacts of this history in Oakland, the City can better focus efforts on starting to address the negative impacts of past decisions.

As discussed in detail in the Environmental Justice and Equity Baseline March 2022 Report, The City of Oakland has an overall CalEnviroScreen 4.0 Pollution Burden percentile score of 44.3, meaning that it is less impacted by environmental effects and exposures than almost 56.7 percent of tracts in California. However, this relatively low citywide value hides the disproportionate pollution burden experienced by some Oakland census tracts. Although seven out of 113 census tracts in the city have a score of less than 10, four tracts are among the top 10th percentile in the entire state for pollution burden. Chart D-6, below, shows that there are higher concentrations of BIPOC communities living in tracts that have higher pollution burden scores, meaning that they are more at risk than white populations.

Chart D-6 CalEnviroScreen 4.0 Pollution Burden Scores by Race, 2021

Source: CalEnviroScreen 4.0, CalEPA, 2021

The State HCD/TCAC Opportunity Areas- Environmental Score map (Figure D-14) visualizes environmental health opportunity based on specific exposure and environmental effect indicators from CalEnviroScreen 3.0 (3.0 was the latest data when the 2021 State HCD/TCAC Opportunity Maps were created): ozone, PM2.5, diesel particulate matter, drinking water, pesticides, toxic release, traffic, cleanup sites, groundwater threats, hazardous waste, impaired water bodies, and solid waste sites. This methodology produces a distinctly different map than one composed of CalEnviroScreen scores, which additionally account for health and socioeconomic factors (e.g., Jack London Square has a lower, or better, CalEnviroScreen Score of 55 than the adjacent Chinatown census tract, which scores 91, because the latter tract's population experiences higher socioeconomic burdens, such as the lack of health care, which could lead to more emergency room visits for asthma). Therefore, the State HCD/TCAC Opportunity Areas - Environmental Score map purely reflects environmental exposure and is not weighted in any way; the Economic and Education HCD/TCAC Opportunity Maps account for many of the socioeconomic factors that CalEnviroScreen scores do. Therefore, the State HCD/TCAC Opportunity Areas - Composite Score map will appear more similar to a CalEnviroScreen score map than the Environmental Score map.

As shown in Figure D-14, the least positive outcomes are along the coastal edge of the city, adjacent to the industrial Port areas and I-880. Nearly all of West Oakland, which is bounded by freeways on all sides and includes and is adjacent to industrial areas, falls into the least positive environmental outcomes. Downtown tracts that include or are immediately adjacent to freeways are also among the least positive outcomes. The Hills, which include and abut regional parkland, and some adjacent census tracts, are associated with more positive environmental outcomes, but there are additional tracts scattered throughout the city, not adjacent to parkland, that also are among the more positive outcomes. Some of the tracts associated with the lowest economic and education outcomes, such as those in East Oakland adjacent to International Boulevard, are among the tracts with the best environmental outcomes. While this is surprising, this is where it is important to consider that this environmental score does not account for the socioeconomic and health factors that the CalEnviroScreen scores do. It should also be noted that CalEnviroScreen extrapolates and

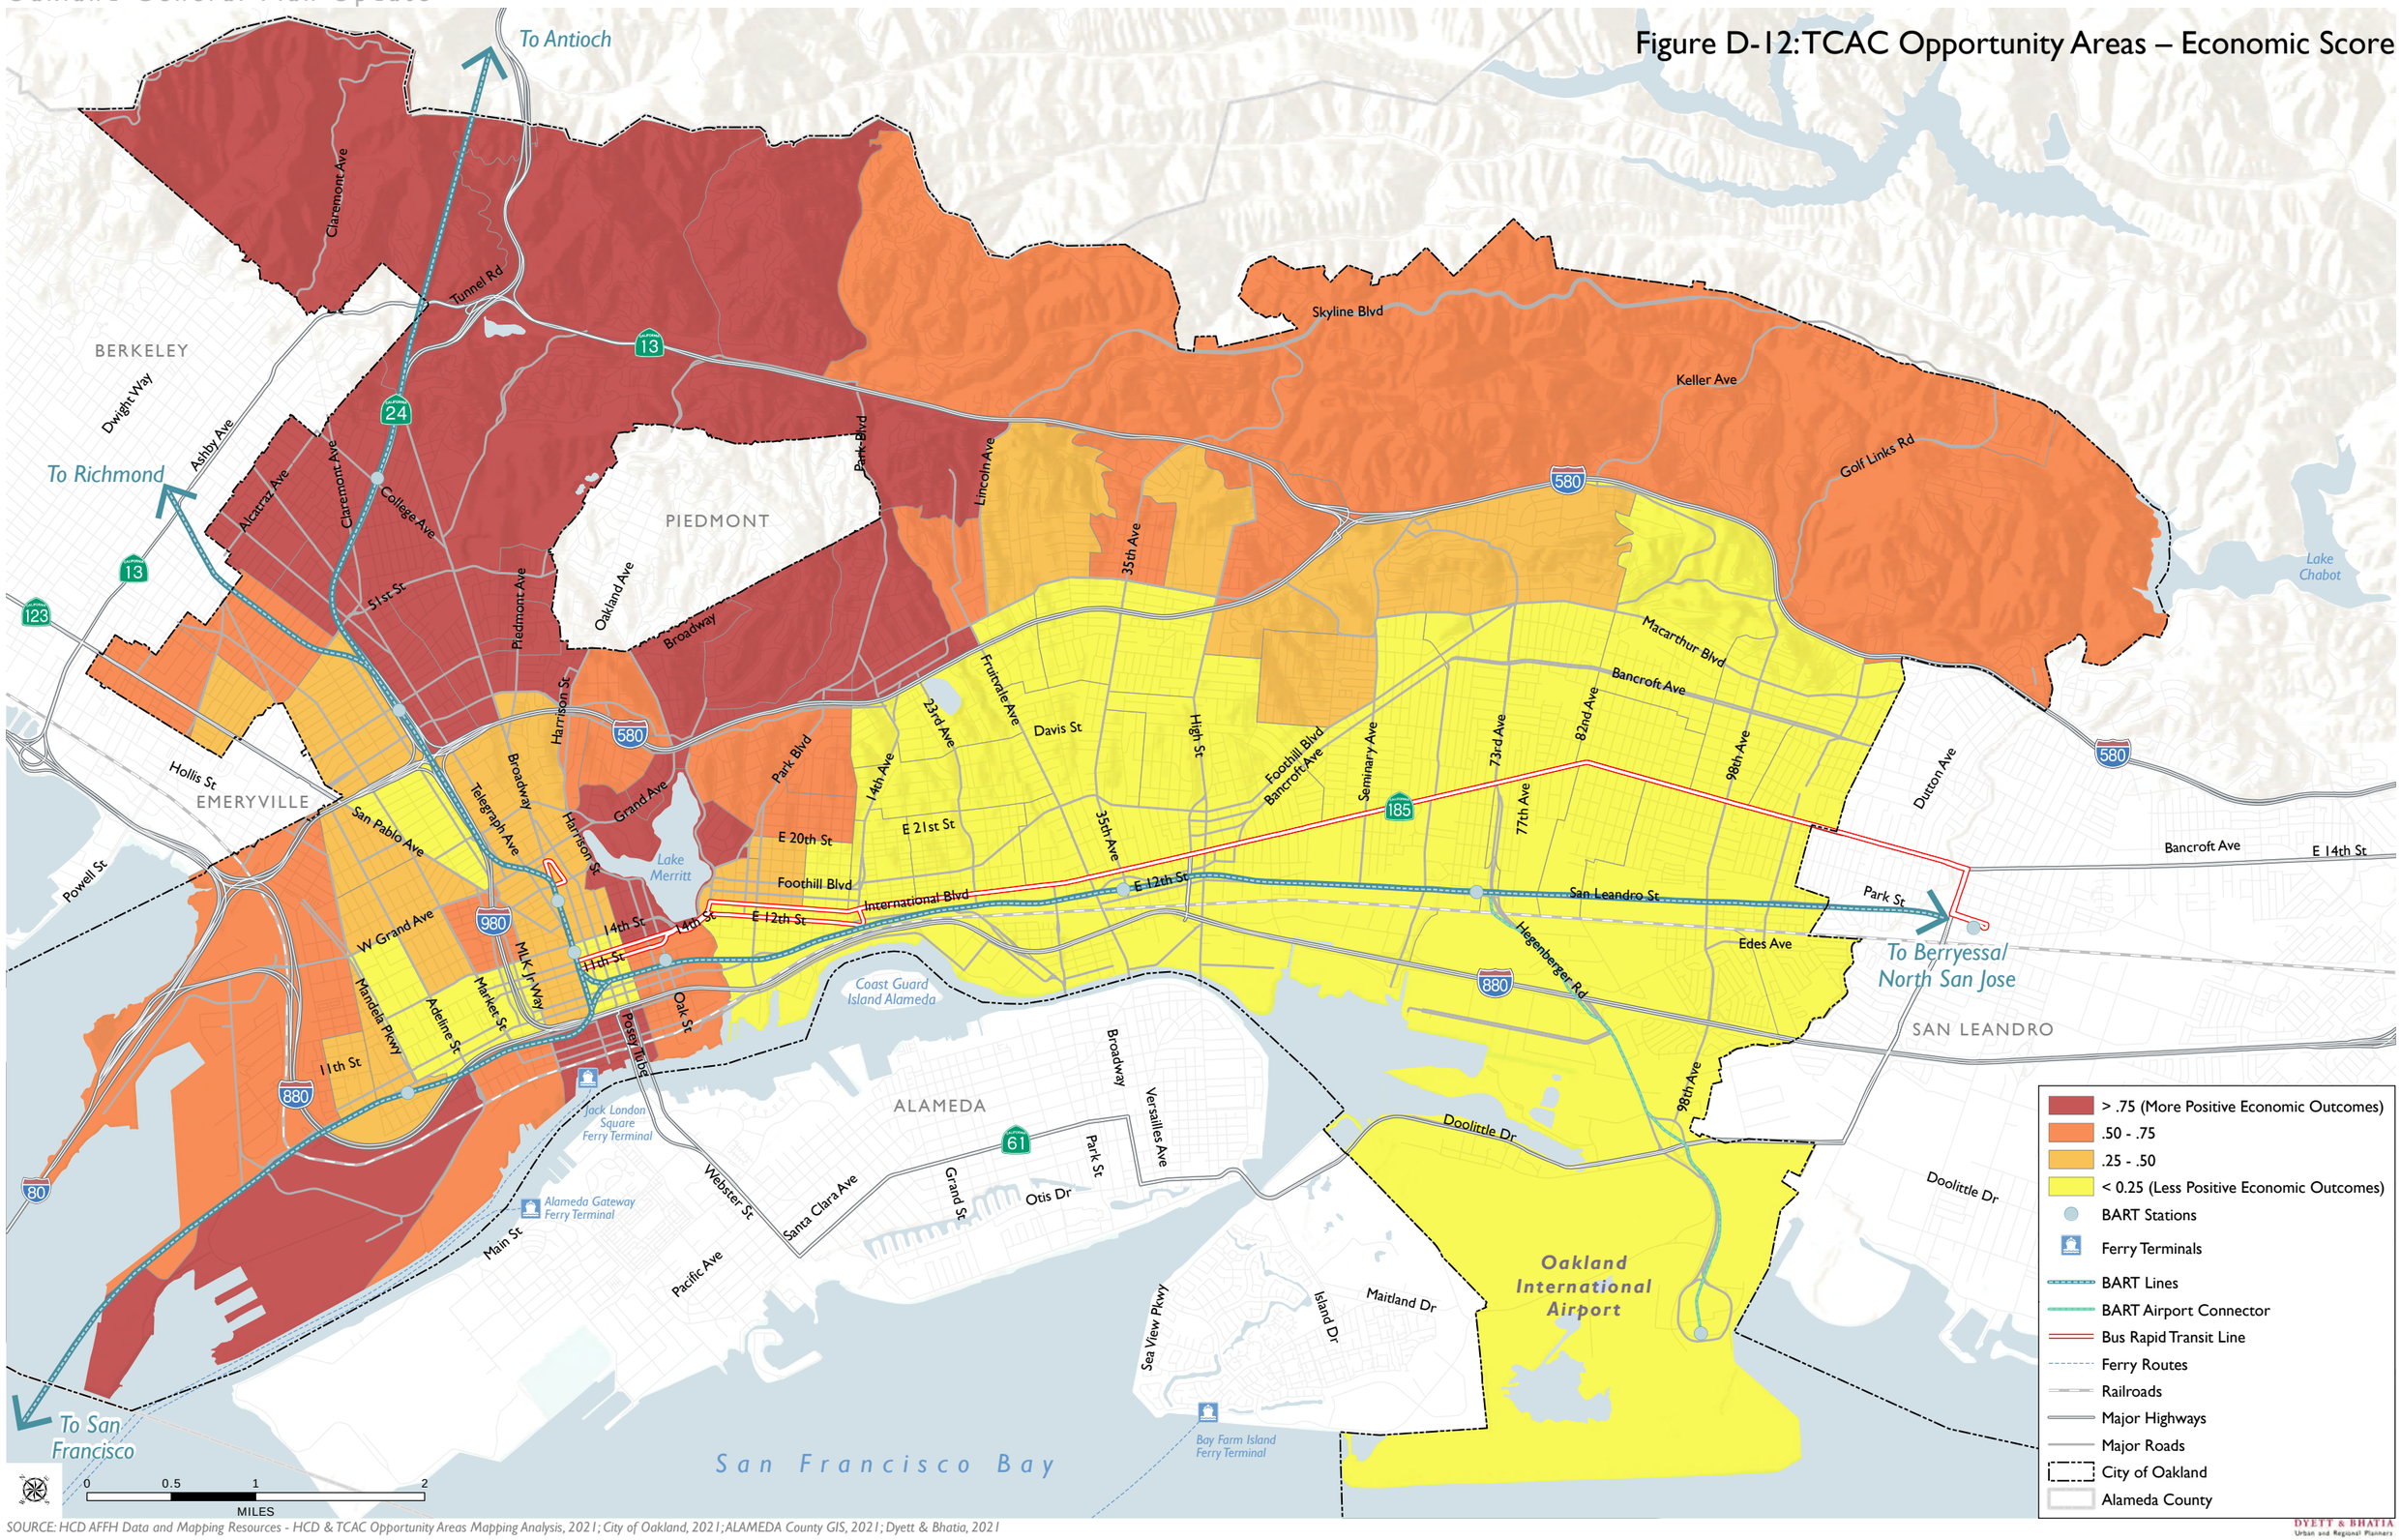
models much of their data – some low pollutant scores may be due to the lack of a nearby air monitoring system. Outside of the Hills tracts, which get an environmental score boost from including or being adjacent to parkland, scores for tracts that include or are adjacent to freeways appear to be ultimately more negatively impacted than tracts that do not include freeways, which is why some Deep East Oakland tracts that are not near freeways have better environmental scores than I-580-adjacent tracts in the Grand Lake area.

According to Figure D-14, those living in R/ECAPs have limited access to environmental opportunity; all West Oakland R/ECAPs are associated with the least positive environmental outcomes, and those in Downtown fall into the two lowest environmental outcome categories. East Oakland R/ECAPs have mixed access to environmental opportunity, ranging from the lowest to the highest outcomes. However, these results must be considered along with the race/ethnicity-based data presented earlier in this section (Chart D-6). Even if some East Oakland tracts are associated with more positive environmental outcomes, BIPOC individuals living in these communities still carry a larger pollution burden.

Persons with disabilities may have varied access to environmental opportunity, depending on where they live. Recalling the map showing which tracts have higher concentrations of persons with disabilities (Figure D-3), those who live in the Piedmont Avenue area are in tracts associated with more positive environmental outcomes, while those in West Oakland are in tracts associated with less positive environmental outcomes (Figure D-14). Those living in Downtown are in tracts that fare slightly better environmentally than the West Oakland tracts. Again, however, the environmental health disparities associated with race/ethnicity (Chart D-6) must be considered along with disability status.

Female-headed households with children may have varied access to environmental opportunity, depending on where they live. Recalling the map showing which tracts have higher concentrations of female-headed households with children (Figure D-5), tracts in West Oakland are associated with less positive environmental outcomes, while tracts in Downtown fare slightly better environmentally (Figure D-14).

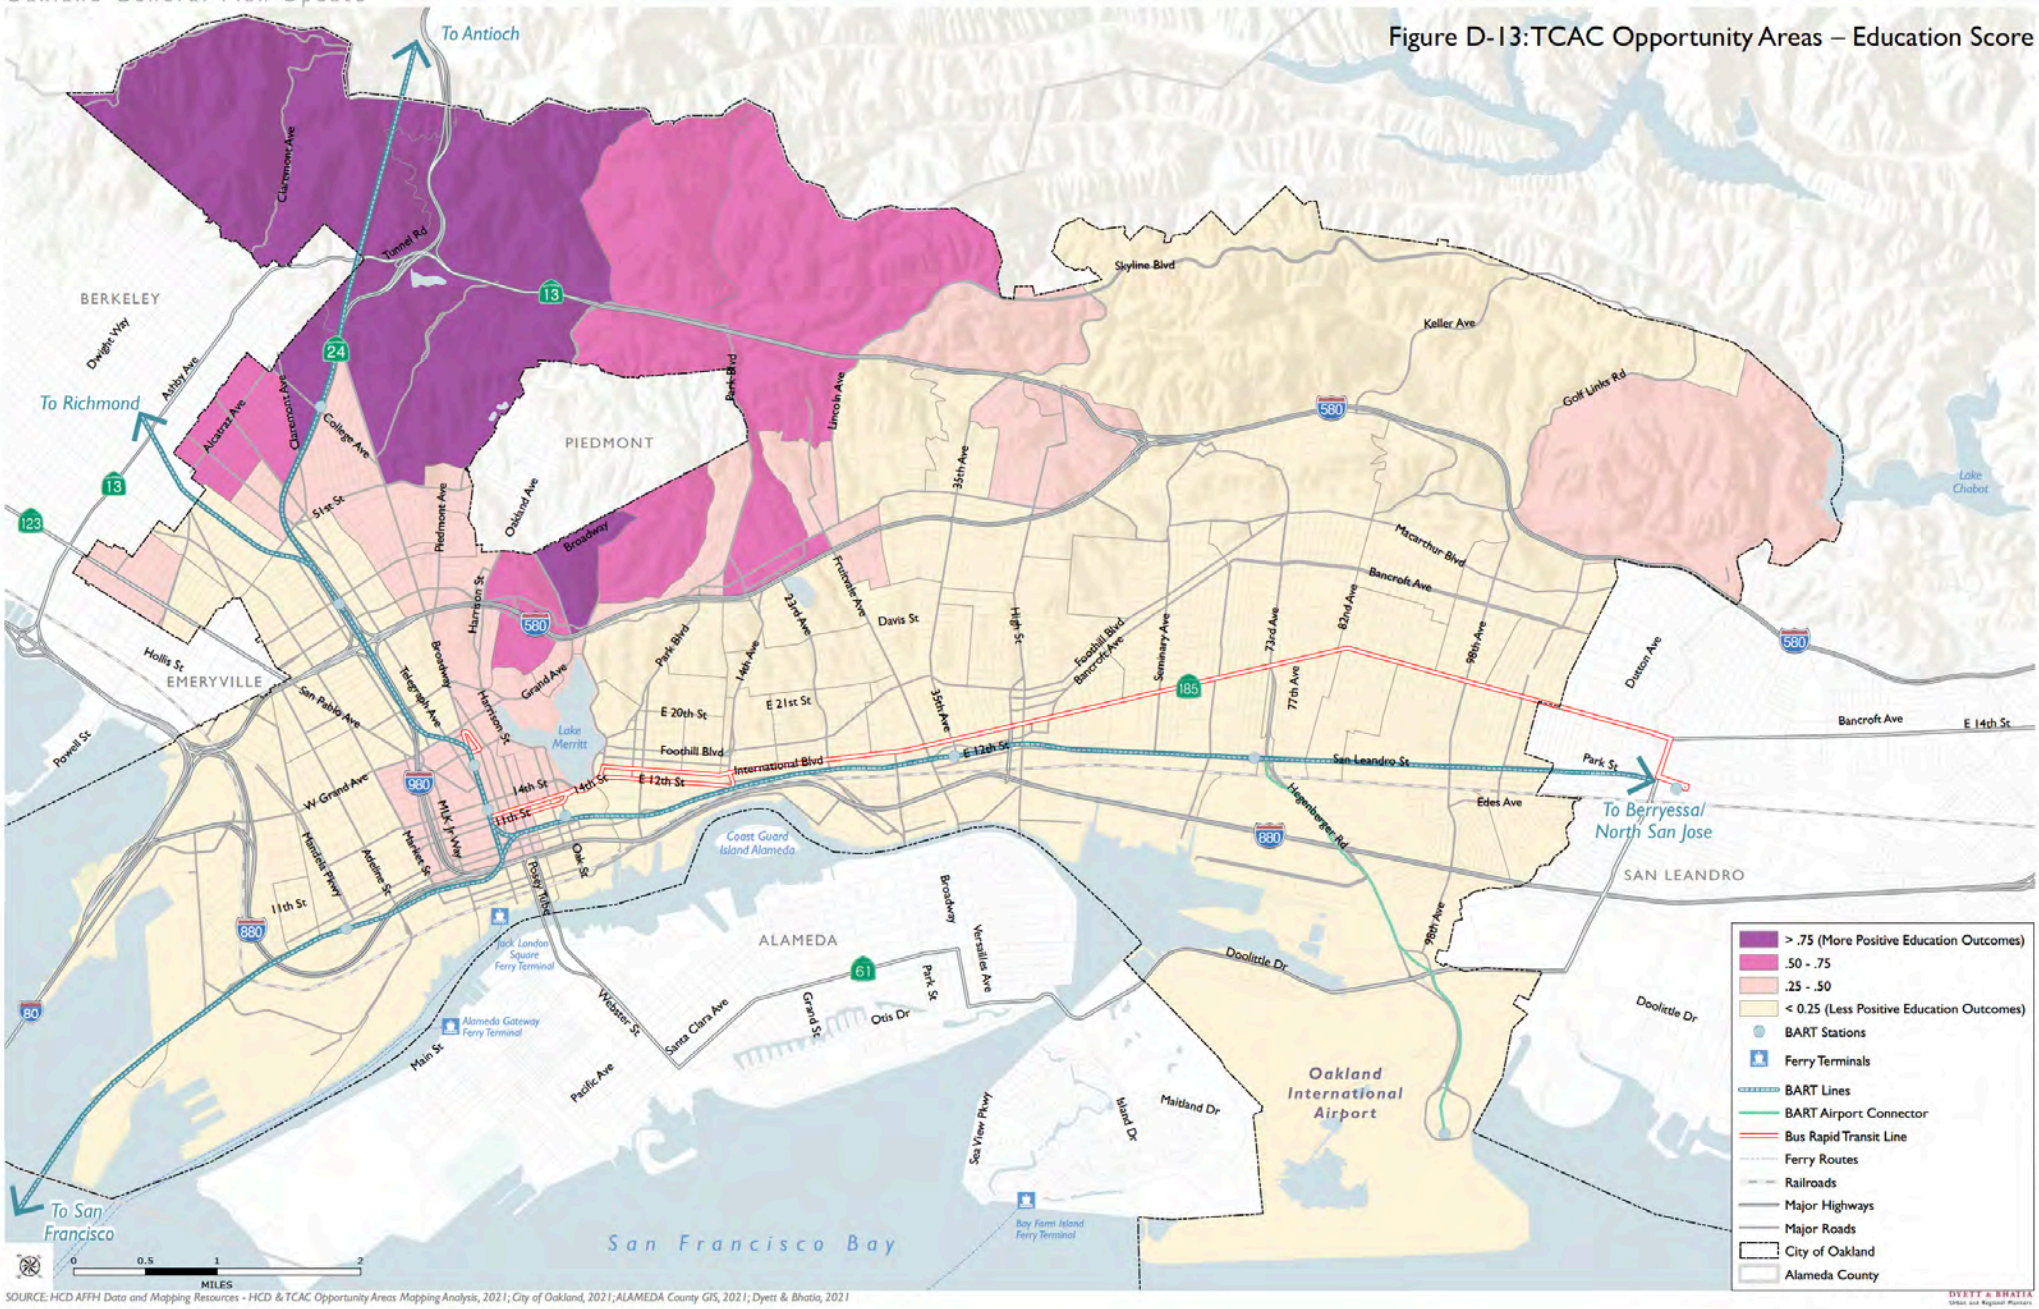
While more must be done to increase access to environmental opportunity for protected groups, some long-overdue actions have recently been taken to reduce disparities in exposure to air pollution. East and West Oakland are both identified as areas disproportionately impacted by air pollution under the Community Air Protection Program (Assembly Bill [AB] 617). California Air Resources Board (CARB) adopted the West Oakland Community Action Plan (WOCAP) action plan on December 5, 2019, which identified 89 potential community-level strategies and control measures intended to reduce criteria pollutant and TAC emissions and decrease West Oakland residents' exposure to these TAC emissions. Specifically, the plan sets forth equity-based targets for cancer risk, and DPM and $PM_{2.5}$ concentrations in seven "impact zones" with the highest pollution levels in the City.[16] On February 10, 2022, CARB designated East Oakland for the development of an AB 617 Community Emission Reduction Plan which will begin in the spring and summer of 2022 and continue for a year-long planning process followed by implementation.



In conjunction with this Housing Element Update, the General Plan Update will also include a new Environmental Justice Element, which will address Oakland's environmental justice issues in more detail.

As is evident in this section, there is limited utility in assessing access to opportunity using the State HCD/TCAC Opportunity Maps alone. The environmental map does not effectively underscore the environmental justice issues that BIPOC communities face in Oakland, and labeling census tracts as "Low Resource" or "High Segregation and Poverty" disregards the fact that many communities of color in

[16] Bay Area Air Quality Management District and West Oakland Environmental Indicators Project, 2019. Owning Our Air: The West Oakland Community Action Plan – Volume 1: The Plan, October. Available at http://www.baaqmd.gov/community-health/community-health-protection-program/west-oakland-community-action-plan, accessed January 2021.



Oakland are vibrant, ethnic enclaves that deserve the investment that higher resource areas have received and benefited from. It is not enough to shuttle children living in Low Resource/High Segregation and Poverty tracts to higher-performing elementary schools across the City or simply to build more affordable housing in higher resource areas; while the solution may include these strategies, place-based investments in BIPOC communities must be the priority so that existing residents who want to stay where they are have the ability to do so while being able to benefit from access to economic, educational and environmental opportunity.

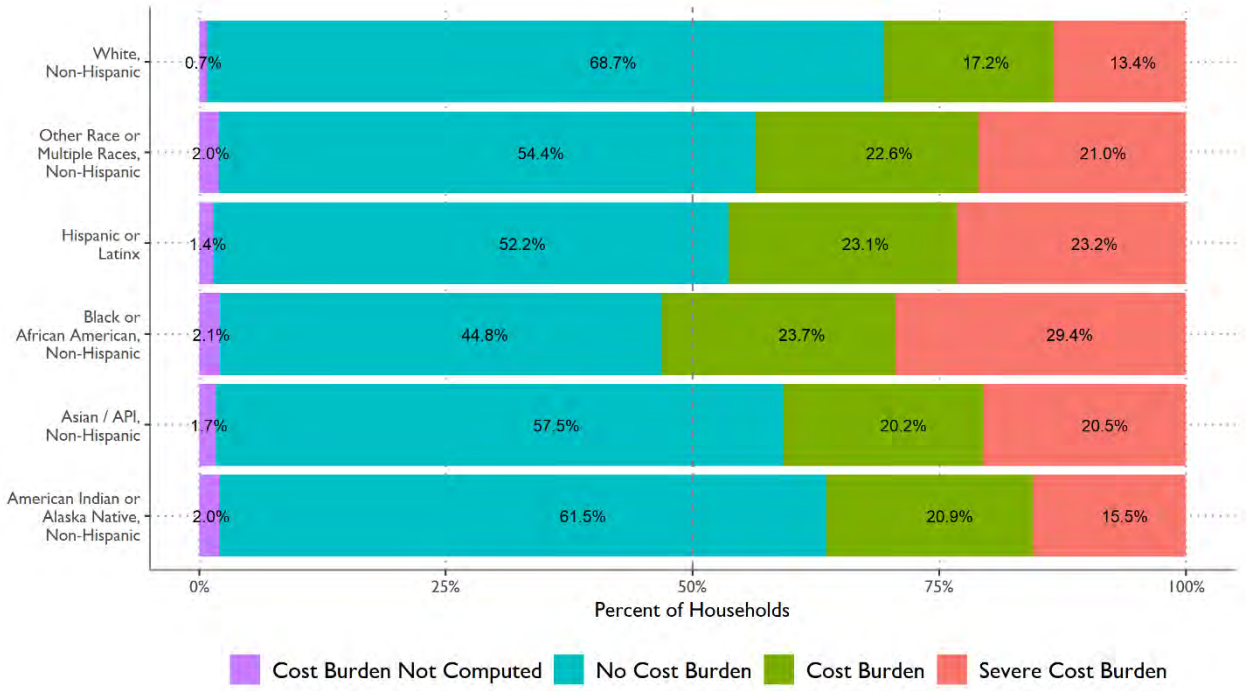
D.5 Disproportionate Housing Needs and Displacement Risk

According to State HCD's AFFH Guidance Memo, disproportionate housing needs "generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area." Consistent with State HCD guidance, this analysis evaluates disproportionate housing need through the assessment of cost burden, overcrowding, displacement risk, publicly assisted housing, substandard housing, and homelessness.

COST BURDEN

Households paying more than 30 percent of their income on housing costs are considered cost burdened, while those paying more than 50 percent are considered severely cost burdened. Cost burden among homeowners and rents in Oakland is discussed in depth in Appendix B, the Housing Needs Assessment. Here, cost burden is examined by race/ethnicity. Rates of cost burden, severe or otherwise, are highest for non-Hispanic Black or African American households, followed by Hispanic or Latinx households. Cost burden, severe or otherwise is lowest for non-Hispanic white households, followed by American Indian/Alaska Native households (Chart D-7). As described in Table B-31b in the Housing Needs Assessment, while cost burden in Alameda County and the Bay Area region are comparable, cost burden in Oakland is higher than in the County and region. In particular, more Oakland households are severely cost-burdened (20.9 percent) than in the County (17.1 percent) or region (16.8 percent)). Several factors result in Oakland experiencing higher cost burdened than the county and regional average, including a higher percentage of households that make less than the area median income, a higher share of very low income households, a higher percentage of single and two-person households, and, although comparatively lower in other cities and regions, a very high median renter costs. More information on these factors is available in Appendix B.



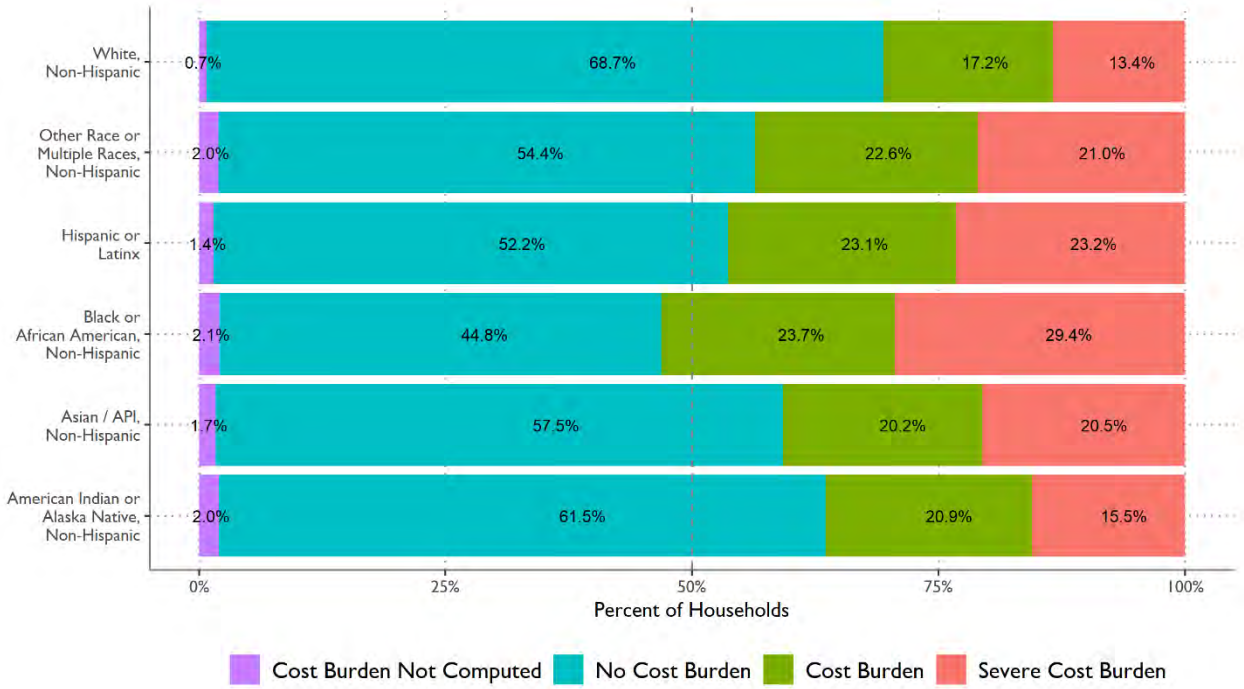


Chart D-7: Cost Burden by Race in Oakland, 2013-2017

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Figures D-15 and D-16 show the geographic distribution of cost burden in Oakland for owner- and renter-occupied households, respectively. Rates of households experiencing cost burden—among both renters and owners—do not exceed 80 percent in any one census tract.[17] The lowest levels of renter cost burden (less than 20 percent) are in Rockridge, the North Oakland Hills, and one tract south of Piedmont. The lowest levels of homeowner cost burden (less than 20 percent) are located in two North Oakland tracts and two West Oakland tracts. The highest rates (60-80 percent) of both homeowner and renter cost burden are located in East Oakland, plus a couple additional tracts experiencing high homeowner cost burden in the Jack London District and the Grand-Lake neighborhood. Renter cost burden skews higher than homeowner cost burden, with most tracts having over 40 percent cost burden for renters.

[17] The State HCD AFFH Data and Mapping Tool provides cost burden data in quintiles, with over 80 percent representing the highest concentration of cost burden possible. This should not be interpreted as a threshold, but rather a natural break in the data.

OVERCROWDING

~~The~~Appendix B, the Housing Needs Assessment ~~chapter,~~ discusses overcrowding in detail, but here the geographic component of overcrowding is examined. The highest tract-level rates of overcrowding were found in the East Oakland flatlands, notably in Fruitvale and other tracts along International Boulevard near the Coliseum (Figure D-17). All tracts experiencing some level of overcrowding higher than the statewide average are also tracts identified by State HCD/TCAC as Low Resource or High Segregation and Poverty areas. Recalling Figure D-1B, most tracts experiencing higher levels of overcrowding (more than 15 percent of households) have a predominant Hispanic or Latinx population, though a few tracts have a predominant Black or African-American population, one has a predominant Asian population, and one tract is the sole census tract in Oakland without a predominant race/ethnicity (in the Bancroft-Havenscourt neighborhood).

As noted in the Housing Needs Assessment, Oakland experiences slightly higher rates of overcrowding (8.41 percent) than the county (7.87 percent) or the region (6.9 percent). Overcrowding disproportionately impacts renters (11.5 percent), lower-income households (6.48 percent of extremely-low-income, 8.69 percent of very-low-income, and 7.3 percent of low-income), Hispanic or Latinx households (24.5 percent), and multiple or other race households of any ethnicity (22.0 percent).

Figure D-17: Overcrowded Households

DISPLACEMENT RISK

As housing costs increase, lower-income households may be displaced from their neighborhoods, whether this is due to landlord action or market changes. In Oakland, communities of color are particularly impacted by this dynamic.

The City's 2021 East Oakland Mobility Action Plan reported significant racial displacement of Black and Asian American populations from 2000 to 2018 in former ethnic enclaves. Black residents faced the largest decline and are no longer the majority population in the Black ethnic enclaves. For example, from 2000 to 2018, the Black population in Eastmont experienced a 53% decrease. During the same period these same neighborhoods experienced significant increases in higher income white population. There was an unprecedented rise in rent while median renter household income for Black, Asian, and Latinx households decreased. While East Oakland renters had previously maintained relative housing affordability, big spikes in housing unaffordability occurred from 2013 to 2018. By 2018, East Oakland renters making the median renter household income would have to pay 81% of their income to afford median rents in their neighborhoods, compared to 65% citywide. Current racialized displacement and housing unaffordability are directly linked to predatory sub-prime lending and foreclosures in the 2000s that removed the safety net of homeownership stability and equity. Many of the Black ethnic enclaves had Black homeownership rates higher than citywide rates until the foreclosure crisis which was concentrated in East and West Oakland flatland areas. Today, many of the East Oakland neighborhoods, especially the once Black ethnic enclaves, have higher homelessness risks than citywide, reflecting the lasting impact of the foreclosure crisis and ongoing displacement across East Oakland.

Stanford University's Changing Cities Research Lab performed an in-depth investigation of Oakland residential instability in 2021 and found that West and East Oakland were disproportionately affected.[18] Key findings include:

- Eviction filing rates in 2018-2019 were highest in the southern parts of West Oakland, as well as in pockets of East Oakland; however, eviction filing locations did not align fully with the spatial distribution of moves among lower-socioeconomic-status residents. Rather, eviction filings were likely being used as a tactic to collect rent. Residents are likely experiencing informal forms of displacement that instigate moves.
- Unregistered rentals as of July 2020 were highest in West and Deep East Oakland, two areas that were hit hard by the foreclosure crisis and underwent the most disinvestment during the Recession.
- Tax delinquent properties, owners of large numbers of properties, and code violations are most prevalent in Deep East and West Oakland.

These findings underscored a need for preservation and protection strategies in Deep East Oakland and pockets of West Oakland, which have majority BIPOC populations, long histories of disinvestment and are at high risk of renter vulnerability. These findings also highlighted a need to monitor vulnerable areas for disinvestment and residential instability, especially in the wake of the COVID-19 pandemic.

[18] Hwang, Jackelyn, and Vineet Gupta 2021. 'Residential and Neighborhood Instability in Oakland." Available at https://ccrl.stanford.edu/publications/residential-and-neighborhood-instability-in-oakland (accessed November 2022).

The State HCD AFFH Data and Mapping Tool also provides information related to neighborhood displacement risk. This includes "sensitive communities" typologies developed by UC Berkeley's Urban Displacement Project (UDP) to quantify the risk of displacement within a community.[19] Sensitive communities are those with populations vulnerable to displacement due to increased redevelopment and drastic shifts in housing cost. Figure D-18 shows that most of Oakland is vulnerable to displacement, except the Oakland Hills, Rockridge, Temescal, and neighborhoods surrounding the City of Piedmont. The 2020 AI noted that between 2010 and 2017, Black, Hispanic, and Asian or Pacific Islander residents were all being displaced in Oakland and replaced by white residents at a census tract level. Recalling racial/ethnic demographic data from Section D.2, the Black population was the only racial/ethnic group in Oakland to experience a net loss in population from 2010 to 2019. However, other racial/ethnic groups are also being displaced, but perhaps to other locations within the City. This data might also reflect that as lower-income residents of certain racial/ethnic groups are displaced from Oakland, higher-income residents of the same racial/ethnic groups are replacing them.

From the 2020 AI survey distributed to residents across Alameda County, 28 percent of Hispanic respondents say they have been displaced in the last five years and 25 percent of Black respondents say that they have been displaced in the same period. The primary reason for displacement, according to the survey results, is that rent became unaffordable (56 percent of those displaced). This experience is validated by a 2019 study by the UDP which found that census tracts in the region that experienced a 30 percent increase in the median rent also experienced a decrease of 28 percent of low-income households of color.

UDP provides useful information in examining displacement risk at the tract level. Table D-7 describes the criteria used to develop neighborhood typologies.[20] Table D-8 provides the number of households at displacement risk in 2018, broken down by owner-occupied vs renter-occupied. More renters than owners are living in tracts susceptible to or experiencing displacement and gentrification. Nearly half of all households in Oakland, regardless of tenure, live in tracts at risk of or experiencing gentrification, while almost a quarter live in tracts susceptible to or experiencing displacement. This is greater than the region as a whole—according to UDP, "As of 2018, over 10% or 161,343 low income households (households making below 80% of AMI) lived in areas at risk of or currently experiencing gentrification. Nearly half of these households live in either Alameda or San Francisco counties."

Figure D-19, the map that corresponds with Tables D-7 and D-8, illustrates where these neighborhoods are located by typology. Exclusive areas are all clustered in/around the North Oakland Hills, while most of the northwestern tracts of Oakland, including Downtown, are in varying stages of gentrification or at risk of gentrification, and most tracts in the East Oakland flatlands are either low income/susceptible to displacement or at risk of gentrification, with one tract experiencing ongoing displacement. Only a handful of tracts in Oakland are considered Stable Moderate/Mixed Income, which UDP defines as neighborhoods that are not experiencing housing market pressures characteristic of the rest of the country, so the displacement of low-income residents is rare.

Regionally, sensitive communities are concentrated in coastal census tracts in Contra Costa, Alameda, and San Francisco County. The cities of Vallejo, Richmond, Berkeley, San Leandro, Oakland, and San Francisco are shown to have the highest number of sensitive communities, meaning these communities are at the

[19] Urban Displacement Project, SF Bay Area – Gentrification and Displacement, 2021, available at https://www.urbandisplacement.org/maps/sf-bay-area-gentrification-and-displacement/.

[20] It should be noted that this data is several years old and does not capture all factors of neighborhood change – not all Oakland neighborhoods experiencing displacement may be captured in UDP's model.

highest risk of experiencing the displacement of existing established communities. UDP also identified that many parts of the Bay Area region, nearly 30% of all tracts, are either at risk or becoming exclusive to low income households. Exclusive tracts are concentrated in suburban counties, including Marin and San Mateo, but also include enclaves in Oakland, Berkeley, and San Francisco.

Table D-7: Gentrification and Displacement Census Tract Typologies, 2018

Typology	*Criteria*
Low-Income/Susceptible to Displacement	• Low- or mixed-income tract in 2018
Ongoing Displacement of Low-Income Households	• Low- or mixed-income tract in 2018 • Absolute loss of low-income households, 2000-2018
At Risk of Gentrification	• Low or mixed-income tract in 2018 • Housing affordable to low- or mixed-income households in 2018 • Did not gentrify 1990-2000 or 2000-2018 • Marginal Change in housing costs or Zillow home or rental value increases in the 90th percentile between 2012-2018 • Local and nearby increases in rent were greater than the regional median between 2012-2018 or the 2018 rent gap is greater than the regional median rent gap
Early/Ongoing Gentrification	• Low or mixed-income tract in 2018 • Housing affordable to low- or mixed-income households in 2018 • Increase or rapid increase in housing costs or above regional median change in Zillow home or rental values between 2012-2018 • Gentrified in 1990-2000 or 2000-2018
Advanced Gentrification	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Marginal change, increase, or rapid increase in housing costs • Gentrified in 1990-2000 or 2000-2018
Stable Moderate/Mixed Income	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018
At Risk of Becoming Exclusive	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Marginal change or increase in housing costs
Becoming Exclusive	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Rapid increase in housing costs • Absolute loss of low-income households, 2000-2018 • Declining low-income in-migration rate, 2012-2018 • Median income higher in 2018 than in 2000
Stable/Advanced Exclusive	• High-income tract in 2000 and 2018 • Affordable to high- or mixed-high-income households in 2018 • Marginal change, increase, or rapid increase in housing costs

Urban and Regional Planners

~~PUBLICY~~PUBLICLY ASSISTED HOUSING

The Oakland Housing Authority (OHA) provides publicly assisted housing to residents of Oakland. According to OHA's Draft Fiscal Year 2023 Making Transitions Work Annual Plan, OHA's housing inventory includes public housing (1,454 units), Project-Based Section 8 vouchers (4,973 allocated units), Housing Choice Vouchers and other HUD programs (15,168 units), and other local programs (1,910 units). According to Figure D-20, most public housing units are concentrated in Downtown, West Oakland, and the Coliseum area, primarily in tracts designated by TCAC as Low Resource or High Segregation and Poverty, though there are a few units located in Moderate and High Resource areas, with none in Highest Resource areas. Housing Choice Voucher use follows a similar pattern. Subsidized housing, such as Project-Based Section 8, is more distributed throughout Oakland, found in all opportunity areas except those designated Highest Resource, but most is clustered in Downtown and West Oakland (California Housing Partnership, 2021).[21] According to the 2020 AI, across Alameda County, BIPOC populations (excluding Hispanic and Latinx) are overrepresented in publicly assisted housing, with the Black and African American population composing the majority across all housing types.

[21] It should be noted that the State HCD AFFH Data and Mapping Tool does not provide the most current information on Project-Based Section 8 vouchers and Housing Choice Vouchers – existing patterns of geographic distribution may differ from data provided by the State.

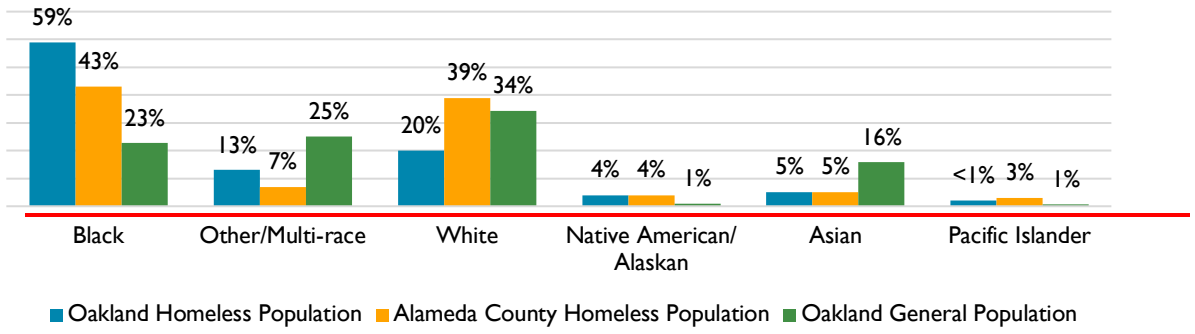
SUBSTANDARD HOUSING

The condition of the housing stock, including the age of buildings and units that may be in substandard condition, is also an important consideration in a community's housing needs. As summarized in the Housing Needs Assessment, about 80.4 percent of Oakland's housing stock was constructed prior to 1980 and is over 40 years old. About 8.0 percent of the housing stock has been constructed since 2000, with only 1.8 percent constructed since 2010.

A high proportion of older buildings, especially those built more than 30 years ago, may indicate that substantial housing conditions may be an issue. Housing is considered substandard when physical conditions are determined to be below the minimum standards of living, as defined by Government Code Section 17920.3. A building is considered substandard if any of the following conditions exist:

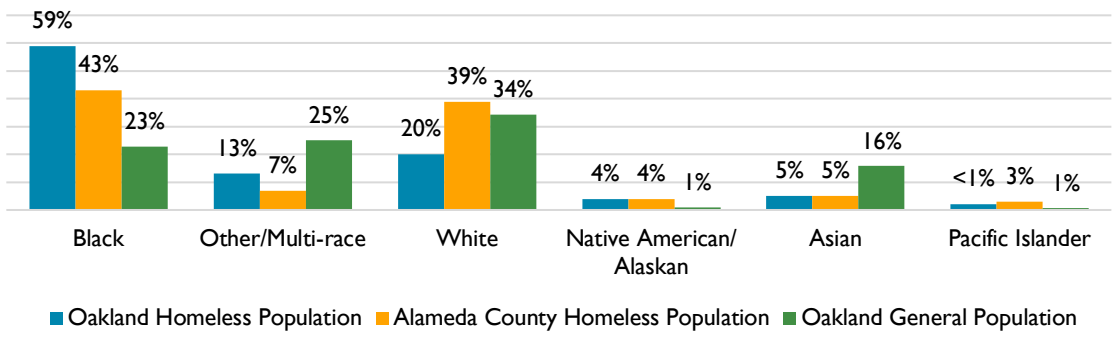
- Inadequate sanitation
- Structural hazards
- Nuisances
- Faulty weather protection
- Fire, safety, or health hazards
- Inadequate building materials
- Inadequate maintenance
- Inadequate exit facilities
- Hazardous wiring, plumbing or mechanical equipment
- Improper occupation for living, sleeping, cooking, or dining purposes
- Inadequate structural resistance to horizontal forces
- Any building not in compliance with Government Code Section 13143.2

Any household living in substandard conditions in considered in need of assistance, even if they are not actively seeking alternative housing arrangements. Estimating the number of substandard units can be difficult, but the lack of certain infrastructure and utilities can often be an indicator of substandard conditions. According to the 2018 Oakland Equity Indicators Report, 1.36 percent of housing units in zip codes that were more than 60 percent non-white reported housing habitability complaints, compared to 0.67 percent of housing units in zip codes that were more than 60 percent white. In addition, according to 2019 ACS estimates compiled by ABAG-MTC, about 0.28 percent of owners lack complete kitchen facilities while 1.91 percent of renters do. Further, approximately 0.2 percent of owners lack complete plumbing facilities while 1.02 percent of renters do. In total, there are 837 occupied housing units with incomplete plumbing facilities and 3,514 units with incomplete kitchen facilities. During outreach, lower income residents in West and East Oakland indicated that they face unhealthy housing conditions including lack of heat, electrical issues, faulty plumbing, and exposure to mold and lead.



Further, the City's Building Bureau's Code Enforcement division summarizes inspections for blight, housing, and zoning-related issues. During Fiscal Year 2020 – 2021, there were 5,575 blight and building maintenance complaints in Oakland. While the City has not carried out a census of substandard housing, based on known substandard housing issues from the Building Bureau's documented housing complaints, approximately 3.5 percent of the city's housing stock is likely substandard.

HOMELESSNESS



Homelessness is a significant issue in Oakland. Nearly four out of five (79 percent) of the people experiencing homelessness in Oakland are unsheltered and live outdoors or in tents or vehicles, often along the city's streets and in our parks.

Point-in-Time (PIT) Counts are a common way to assess the number of persons experiencing homelessness in a jurisdiction. The PIT Count is a biennial (every two years) census of sheltered and unsheltered persons within a Continuum of Care (CoC) area completed over a 24-hour period~~.~~ \.[22] On February 23, 2022 (the date of the last Alameda County Point-in-Time count), there were a total of 9,747 persons experiencing homelessness in the County, 5,055 of whom were in the City of Oakland. In Alameda County, this is an increase of 1,~~725~~275 people (22 percent) from the ~~8~~28,022 unhoused individuals who were counted in 2019. These numbers ~~also~~ represent ~~a~~an unprecedented 24 percent increase in total homelessness in Oakland and a four percent increase in unsheltered homelessness ~~in Oakland~~ since 2019. These numbers account for only a fraction of the people who become homeless over the course of a year. When disaggregated by race, as shown in Chart D-8, the ~~2022~~202 PIT Count shows that there is a disproportionate representation of Black individuals experiencing homelessness. Those who identify as Black or African American (Hispanic and non-Hispanic) represent 70 percent of Oakland's unhoused population, but only 23 percent of the overall population. Additionally, those identify as American Indian or Alaska Native (Hispanic and non-Hispanic) are also represented disproportionately among the unhoused population, as they make up 4 percent of homeless Oakland residents but less than one percent of its overall population. Asian/API, White, and those who identify as some other race or multiple races are all underrepresented among the homeless population compared to their share of the overall population. However, it is noted that data from HUD does not separately distinguish Hispanic/Latinx as a racial group, so those identifying as Hispanic/Latinx may be counted under any of the other racial groups. When considering ethnicity alone, Hispanic/Latinx individuals made up ~~16~~13 percent of Oakland's homeless population and ~~25~~17 percent of Alameda County's homeless population, while 27 percent of Oaklanders identify as Hispanic/Latinx (of any race).

Chart D-8: Point-in-Time Count of the Homeless Population in Oakland, ~~2022~~2019 by Race

[22] Due to this method, community advocates and local datasets often have a more comprehensive, better understanding of the unhoused population and describe higher numbers of unhoused people than what is reported in PIT Counts.

Note: Because Hispanic/Latinx origin is tracked as an ethnicity rather than a racial group, data shown above may include Hispanic/Latinx populations.

Source: City of Oakland Homeless Count & Survey Comprehensive Report Applied Survey Research Housing Instability Research Department, 2019; ACS 5-Year Estimates, 2019

The increase in homeless residents over the past five years has resulted in a significant rise in the number of homeless encampments; the City estimates that at least 140 encampments are scattered throughout the city.[23] In 2017, the City established the Encampment Management Team (EMT) to address the physical management of homeless encampments and establish criteria for determining the types of interventions to undertake at encampments. In April 2021, the City of Oakland Office of the City Auditor conducted a performance audit of the City's homeless encampment management interventions and activities, including activities by the EMT. This report highlighted the need to establish and fund a formal encampment management program to implement an effective management system for the City's new encampment policy passed in October 2020.

A substantial proportion of the homeless population in Oakland includes formerly incarcerated individuals. According to the City's updated Permanent Access to Housing (PATH) framework, systemic barriers often prevent residents who are returning home from incarceration from living with family members and/or accessing both public and private rental housing and employment opportunities. Additionally, the longer one is homeless the worse one's health becomes, the more likely family and friendship networks are frayed, and the harder it becomes to obtain, maintain, and sustain stable housing.

In addition to the barriers associated with returning home from incarceration, other main drivers of homelessness in Oakland include:

- Structural racism
- Insufficient controls on the rental housing market that create vulnerability and housing instability for tenants
- Insufficient housing units that are affordable to households with the lowest incomes, including particularly those whose incomes are below 20% of Area Median Income (AMI)
- Inadequate pay and benefits for many of the jobs that are available in the community, and insufficient access to quality employment opportunities that pay wages that meet the cost of housing

The PATH Framework organizes strategies to address homelessness under three major themes:

- Prevention strategies to keep people from becoming homeless;
- Emergency strategies to shelter and rehouse households and improve health and safety on the street and;
- Creation of affordable, extremely-low-income, and permanent supportive housing units prioritized for households experiencing homelessness.

Additional actions the City takes to provide shelter and permanent supportive housing for unhoused people, as well as potential constraints, are discussed in Appendix F. Further prioritization of permanent housing policies in the PATH Framework should be adopted to fully meet the needs of unhoused residents. These actions are described in the Housing Action Plan.

[23] City of Oakland, Homelessness Services Report, March 18, 2021, https://oakland.legistar.com/View.ashx?M=F&ID=9256071&GUID=9ED0688A-A876-4DEF-9EC1-F426269363F0.

~~D.6~~D.6 Housing Sites Inventory Analysis

Tables D-9 though D-15 provides a summary of analysis that includes the number of units per site by income group for each of the AFFH categories relative to the impacts on patterns of disproportionate housing needs.[24] The tables analyze the following categories:

Black, Indigenous, and People of Color Concentration: The analysis evaluates the number of units in the Site Inventory that are in areas where the average of tracts across the City are comprised of people of color. Conversely, this also measures how units are distributed in predominantly white census tracts. Averaged across all census tracts, the average percentage of people of color is approximately 69 percent. Tracts higher than this average have greater percentages of people of color; tracts below this average have greater percentages of white people. Overall, 41 percent of all units added in tracts with a greater white population than the Citywide average include lower and moderate-income housing. In tracts with higher percentages of people of color, lower and moderate income housing units are approximately 47 percent of all units in these tracts. Coupled with housing actions that protect Oakland residents from displacement (policies and actions under Goal 1) and promote opportunities for homeownership (actions under Policy 5), the sites inventory makes progress in addressing racial inequities related to housing.

Table D-9: Number of Units with Above or Below Citywide Average Concentrations of Black, Indigenous, and People of Color

	Lower Income Units	*Moderate Income Units*	*Above Moderate Income Units*
Tracts below citywide average = **50**	1,957	937	4,198
Tracts above citywide average = **63**	8,979	4,252	15,144

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

TCAC Opportunity Area: This analysis estimates the number of units in each TCAC opportunity area, including racially/ethnically concentrated areas of poverty. Generally, the sites inventory adds more housing in moderate and higher resource areas and avoids concentration of lower income units in high-segregation and poverty areas, consistent with direction to affirmatively further fair housing. As shown in Table D-10, the sites inventory adds most units to High Segregation/Poverty, Low, Moderate TCAC areas, which is consistent with the bulk of developable area in Oakland being classified as Low and Moderate opportunity (see Table C-22 in Appendix C for more information). The inventory avoids concentrating lower income units in areas of high segregation and poverty, while also providing additional homes affordable to these incomes. Approximately 47 percent of units added in the highest resource areas are affordable to lower and moderate incomes; however, about a third of units are affordable to lower and moderate incomes in high resource tracts. This is due to significant environmental constraints, including wildfire hazard, that limit siting of lower income sites in these areas. However, the Housing Action Plan also includes a number of policies and actions to increase housing in higher opportunity areas. In particular, the Affordable Housing Overlay Zone action would create much broader opportunities for the construction

[24] This analysis does not reflect the 90 percent capacity modifier on "other potential projects" as described in Appendix C as the modifier is not site-specific; however, the percentage remains proportional.

of affordable housing in high resource areas, even if the underlying zoning would impose density maximums that limit the feasibility of affordable housing development.

Table D-10: Number of Units in Each TCAC Opportunity Area

	Lower Income Units	*Moderate Income Units*	*Above Moderate Income Units*
High Segregation/Poverty (RE/CAPs)	2,457	1,206	3,651
Low	5,292	2608	8045
Moderate (rapidly changing)	114	144	402
Moderate	2,303	1,067	5,656
High	477	130	1,214
Highest	293	34	374

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Areas of Affluence: This analysis estimates the number of units in areas of affluence. There are 16 census tracts in Oakland that are designated as RCAAs. The sites inventory adds 3,080 housing units to these areas of affluence, as shown in Table D-11. Consistent with findings above, areas of affluence are primarily in very high fire hazard severity zones and in areas with steep slopes. As such, there are limited opportunities to add lower and moderate income housing to certain affluent areas of Oakland. However, the sites inventory makes a concerted effort to locate housing in the Rockridge area, which includes good access to transit, amenities, and opportunity, Adding approximately 1,089 lower and moderate income units to these areas.

Table D-11: Number of Units in Areas of Affluence

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
RCAA tracts	842	247	1,991

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Lower- or Moderate-Income population: The analysis evaluates number of units in census tracts based on percentage of lower- or moderate-income population. Averaged across all census tracts, the average percentage of lower or moderate-income populations in Oakland census tracts is approximately 57 percent. As shown in table D-12, the inventory locates more lower and moderate-income housing sites in these areas accordingly. This helps to alleviate cost. While a greater number of above moderate units are located in areas with higher rates of lower- or moderate-income people, a number of goals, policies, and actions in the Housing Action Plan, including actions 1.1.1 through 1.1.14 under Policy 1: Tenant Protections and Anti-Displacement, reduce displacement pressures that may be associated with these units.

Table D-12: Lower or Moderate Income Population

	Lower Income Units	Moderate Income Units	Above Moderate Income Units
Tracts below citywide average (lesser percentage of lower and moderate-income population) = 47	1,957	937	4,198
Tracts above citywide average (greater percentage of lower and moderate-income population) = 66	8,979	4,225	15,100

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Rent Burden: Also linked with lower or moderate-income populations is cost burden. Averaged across all census tracts, the average percentage of rent burdened populations is approximately 47 percent. Similar to table D-12, the inventory adds a greater proportion of lower and moderate-income sites in areas that experience greater rent burden, as shown in Table D-13. For tracts above the citywide average, approximately 49 percent of all units added in these areas are affordable to lower and moderate incomes.

Table D-13: Number of Units Where Tracts are Below or Above Citywide Rent Burden Rates

	Lower Income Units	Moderate Income Units	Above Moderate Income Units
Tracts below citywide average = **52**	3731	1,744	8,186
Tracts above citywide average = **61**	7,205	3,418	1,1112

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Overcrowding: As shown in Table D-14, the distribution of units in areas both above and below the citywide average for overcrowding is about equal, despite there being a greater number of census tracts that fall above the citywide average. Averaged across all census tracts, the average percentage of households experiencing overcrowding is approximately six percent. While the location of sites in the inventory will not likely move the needle on overcrowding, the inventory would help address two associated AFFH considerations, including housing needs of lower-income and moderate-income people, in addition to those who are cost burdened.

Table D-14: Number of units in areas where there are rates of overcrowding and/or severe overcrowding greater than the citywide average

	Lower Income Units	Moderate Income Units	Above Moderate Income Units

Tracts below citywide average = **44**	5,347	2,477	10,120
Tracts above citywide average = **69**	5,589	2,685	9,178

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Displacement: As described above, there are several tracts in Oakland that experience displacement pressure. As shown in Table D-15, the sites inventory adds a substantial number of lower and moderate-income units to areas that are susceptible to displacement, at risk of gentrification, and areas at risk of gentrification. While the inventory adds above-moderate income housing to tracts that are experiencing gentrification, Housing Action Plan policies 1.1.1-1.1.14 help to protect tenants and prevent displacement in these areas.

The inventory also adds an equal mix of lower and moderate-income housing to stable mixed income communities. While about 71 percent of lower and moderate income housing units added to "becoming exclusive" sites, indicating location of housing in more moderate- and higher-resourced areas, the inventory does not add a significant amount of lower and moderate-income units in advanced exclusive tracts. These tracts, as described above, are in high fire hazard severity zone areas.

Table D-15: Number of units added in areas as defined by the Urban Displacement Project.

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
Low-income/susceptible to displacement	4,065	1,570	2,744
Ongoing displacement of low-income households	0	0	7
At risk of gentrification	3,485	1,920	7,462
Early ongoing gentrification	1,506	1,003	5,190
Advanced gentrification	581	306	1,412
Stable moderate/mixed income	1,011	198	1,327
At risk of becoming exclusive	1	0	342
Becoming exclusive	134	61	79
Stable/advanced exclusive	48	7	348
Unavailable or Unreliable Data	106	124	415

D.7 Summary and Conclusions

State law requires that jurisdictions identify fair housing issues and their contributing factors and assign a priority level for each factor. Further, each jurisdiction must identify specific goals and actions it will take to reduce the severity of fair housing issues within it. Goals, actions, and priorities related to affirmatively furthering fair housing can be found in the Housing Plan of this Housing Element. Oakland will also continue to implement its 2015 goals described in the 2020 AI.

Based on the findings of this assessment and the 2020 AI, Table D-9 presents a summary of existing fair issues, their contributing factors, and their priority level, as well as actions to take. Contributing factors with a high priority level are those that the City can directly address, while medium factors are either those that are longer term problems the City is working on or otherwise has limited ability to address.

Table D-9: Fair Housing Issues, Contributing Factors and Proposed Actions, 2023-2031

Fair Housing Issue	*Contributing Factors*	*Priority Level*	*Goals and Actions*
Fair Housing Outreach and Enforcement	Lack of outreach and enforcement from both the private (nonprofit) and public sector	High	The City should continue to maintain adequate staffing levels to carry out the mandate to affirmatively further fair housing. The City should also increase residents' awareness of nonprofit fair housing service providers.
	Lack of resources for fair housing agencies and organizations	Medium	Continue to apply for grants to fund fair housing agencies and seek more grant opportunities if possible.
	Lack of federal, State, and local funding for affordable housing	Medium	Apply for more grants to fund affordable housing.
Segregation	Affordable housing is limited by location and housing type	High	Provide mobility counseling and recruit landlords to help Housing Choice Voucher holders find housing options in resource-rich neighborhoods. Increase voucher payment standards in resource-rich neighborhoods and enact source of income laws that prohibit owners from refusing to rent to Housing Choice Voucher holders. Increase affordable housing in high-resource areas where it is lacking. This may require the City to purchase land or partner with developers in order to develop mixed-income housing. Eliminate single family zoning to ensure there are no restrictions on housing type.
	Concentration of low-income households and presence of Racially and Ethnically Concentrated Areas of Poverty (R/ECAPs) and Racially and Ethnically Concentrated Areas of Affluence (RCAAs)	Medium	Lower-income households and individuals living below the poverty line are concentrated in specific parts of the city. Many of these same tracts have been identified as R/ECAPS. The City should invest in R/ECAPs and other historically disinvested communities using place-based strategies. The City should identify properties in resource-rich (including RCAAs) and gentrifying neighborhoods that could be preserved as affordable housing with project-based vouchers. Finally, the City should ensure publicly-assisted housing is well-distributed in transit-accessible locations throughout the City.
Housing Discrimination	Refusal to rent based on disability status or voucher use	Medium	Housing Choice Voucher holders and those with disabilities have reported difficulty in finding appropriate-sized units that will accept their voucher. Fair housing enforcement must

Table D-9: Fair Housing Issues, Contributing Factors and Proposed Actions, 2023-2031

Fair Housing Issue	*Contributing Factors*	*Priority Level*	*Goals and Actions*
			be increased. Unfortunately lack of funding for fair housing enforcement continues to perpetuate this problem. Another option would be to incentivize landlords to accept vouchers.
	Loan denial rates are generally higher for BIPOC individuals	Medium	While the City has limited control over the approval of home loans, it should continue and expand its workshop offerings with prospective low-income homebuyers and homebuyers of color.
Disability and Access	Difficult to find rental housing that is accessible	High	Review development standards for accessible housing and inclusionary policies for accessible housing units; recommend appropriate amendments. Encourage affordable accessible housing when reviewing development applications for new housing.
Limited Access to Opportunity	Racial/ethnic disparities in access to jobs, low-poverty neighborhoods and quality education exist and these disparities are compounded for those living in poverty	Medium	The City must focus investments in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps. These neighborhoods have high concentrations of BIPOC populations. Despite being considered "Low Resource", these neighborhoods are culturally rich with strong communities; investing in them will allow residents to remain in place while improving economic and educational outcomes. A lot of fair housing capacity is concentrated in these neighborhoods and the City should take advantage of its partnerships with fair housing providers who serve these neighborhoods.
	Lack of public and private investments in specific neighborhoods	Medium	Most tracts in Oakland are considered low resource, and most moderate and higher resource tracts are those that are in the stages of gentrification or exclusivity (i.e. have benefited from investment and working class people have been excluded or displaced). Disparities in access to economic and educational opportunity is most salient. OUSD should invest more strongly in historically underfunded schools, rather than solely relying on lottery-based placement strategies to fix educational imbalances. In tandem, the City must pursue place-based strategies to encourage community revitalization in lower income neighborhoods. These strategies should include production of new affordable housing, preservation of existing affordable housing, and stronger protection from displacement.

Table D-9: Fair Housing Issues, Contributing Factors and Proposed Actions, 2023-2031

Fair Housing Issue	*Contributing Factors*	*Priority Level*	*Goals and Actions*
			While making it possible to move to high-opportunity areas is one strategy, that must be complemented with strategies that enhance opportunity and housing security where lower income people already live, including neighborhoods that are under significant gentrification pressure.
Disproportionate Housing Needs and Displacement Risk	High rates of cost burden for renters and BIPOC individuals, especially Black and Hispanic/Latinx populations	Medium	Provide financial assistance for security deposit and prepaid rent, which can be obstacles for low-income households and people experiencing homelessness. This could be a grant paid directly to a landlord of a low-or no-interest loan funded by federal block grant programs like the Community Development Block Grant, HOME, or Emergency Solutions Grant program.
	Homelessness crisis	Medium	The City must implement the updated PATH framework and focus on securing permanent housing for residents who are currently unhoused. However, current resources are insufficient: the City needs to expand revenues dedicated to this issue and engage the government and the private sector at every level in this effort.
	Prevalence of sensitive communities	Medium	Most of Oakland is considered vulnerable to displacement pressures. The City should implement affordable housing preservation and renter protection strategies, especially in neighborhoods with majority BIPOC populations, long histories of disinvestment and a high risk of renter vulnerability. To reduce housing demand, which may in turn reduce displacement risk, the City should encourage the development of new affordable projects throughout the city.

Appendix D: Assessment of Fair Housing

This chapter contains an assessment of factors contributing to fair housing in Oakland and a program of goals and actions to further address fair housing needs. Among the topics covered are:

- Fair housing enforcement and outreach
- Segregation and integration
- Racially and ethnically concentrated areas of poverty and affluence
- Disparities in access to opportunity; and
- Disproportionate housing needs and displacement risk

Oakland is well-served by fair housing providers~~, but the City~~ and ~~Alameda County are limited by insufficient funding related~~is well-equipped to provide fair housing enforcement and outreach capacity. Oakland is incredibly diverse at the City level, but at the neighborhood level, geographic patterns of income segregation and racial/ethnic segregation are clear. Additionally, Oakland has racially and ethnically concentrated areas of poverty localized to four areas in the City. Neighborhoods across Oakland have received varying levels of investment, rendering varying levels of opportunity for protected classes. While access to transit may be enjoyed by all protected classes[1], access to economic, educational, and environmental opportunities vary greatly across the City. Comparing access to opportunity with displacement risk and gentrification across the City, areas that are exclusive, stable, or in the advanced stages of gentrification offer the best access to opportunity. Much of the City has gentrified in recent years, leaving residents in the few (predominantly Black, Indigenous, and people of color (BIPOC) neighborhoods that have not gentrified at risk of displacement. Oakland is further impacted by disproportionate housing needs: overcrowding rates are higher in the City than in the County/Bay Area Region, cost burden rates are high (highest for Black and African-American households and lowest for white households), and homelessness is a major public health crisis in the City. Individuals experiencing homelessness increased ~~47~~83 percent between 2017 and ~~2019 (the last time a point-in-time count was conducted)~~2022 and individuals identifying as Black or African American are disproportionately represented in the unhoused population.

The goals and actions concluding this appendix have a strong focus on investing in neighborhoods considered "Low Resource" and "High Segregation and Poverty" by the State HCD/TCAC Opportunity Maps (i.e. those neighborhoods with low access to opportunity). These neighborhoods have high concentrations of BIPOC populations.

[1] Fair housing laws aim to ensure that people have access to housing and the resources attached to place of residence regardless of their race, national origin, family status, religion, sex, or disability, often referred to as protected classes.

The purpose of this assessment is to identify fair housing issues and segregated living patterns in the City of Oakland and replace them with integrated, equitable living patterns to transform racially and ethnically concentrated areas of poverty into areas of opportunity. While Oakland is an incredibly diverse city centrally located within a region rich in opportunities and cultural, education, and natural resources, its residents do not enjoy equal access to these opportunities and resources. Recent research shows that the Oakland is the 14th most racially segregated major city in the United States.[2] Community amenities and access to opportunities are inherently spatial in nature and are not always readily accessible or attainable to all due to the different types of social, cultural, and economic barriers in our society. Ensuring that sites for housing, particularly lower income units, are not concentrated in areas of high segregation and poverty requires jurisdictions to invest in communities experiencing limited access to opportunity and plan for housing with regards to the accessibility of various opportunities including jobs, transportation, good education, and health services.

In recognition of the importance of addressing fair housing issues, California Assembly Bill (AB) 686, passed in 2018, amended California Government Code Section 65583 to require all public agencies to affirmatively further fair housing (AFFH). AB 686 defined "affirmatively further fair housing" to mean "taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity" for BIPOC individuals, persons with disabilities, and other protected classes. AB 686 requires an assessment of fair housing in the Housing Element which includes the following components: a summary of fair housing issues and assessment of the City's fair housing enforcement and outreach capacity; an analysis of segregation patterns and disparities in access to opportunities, an assessment of contributing factors, and an identification of fair housing goals and actions.

This appendix chapter relies on data from the U.S. Census American Community Survey (ACS) five-year Estimates, the California Department of Housing and Community Development (State HCD) AFFH Data and Mapping Tool, and the County of Alameda Regional Analysis of Impediments to Fair Housing Choice (AI) for fiscal years 2020/21-2024-25.

While in the past Oakland has produced its own AI, it joined the rest of the Alameda County starting in 2020. The 2020 Alameda County AI identified impediments to fair housing using a combination of data and community engagement. Community engagement consisted of three meetings and a seven-page survey, translated into multiple languages and distributed to priority populations (those most impacted by fair housing issues) via local organizations. Priority populations include Black, Indigenous, and People of Color (BIPOC), people experiencing homelessness, people with limited English proficiency, people with disabilities, and people residing in Racially or Ethnically Concentrated Areas of Poverty (R/ECAPs). The survey received 3,296 responses.

D.1 Fair Housing Enforcement and Capacity

FAIR HOUSING SERVICES

Fair housing services are essential to the AFFH mission. They ensure that housing options are accessible to protected groups, including those based on race, color, gender, religion, national origin, familial status, disability, age, marital status, ancestry, source of income, sexual orientation, genetic information, or other arbitrary factors. Fair housing services help Oakland residents understand and protect their right to access housing.

Oakland is well-equipped to provide fair housing enforcement and outreach capacity. The City allocates approximately $260,000 annually in CDBG funds to fair housing providers to support housing discrimination testing, housing counseling, information/referral services, legal representation, tenant/landlord mediation, counseling, and other services. A summary of the numerous local, regional, and statewide organizations that provide fair housing-related services in Oakland is provided below.

Local and Regional Fair Housing Providers

Bay Area Legal Aid provides low-income clients with free civil legal assistance, including legal advice and counsel, effective referrals, and legal representation. They serve seven counties: Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, and Santa Clara. While they offer assistance for a variety of issues, their housing assistance includes landlord-tenant matters, subsidized and public housing issues, unlawful evictions, foreclosures, habitability, enforcement of fair housing laws, and issues surrounding homelessness.

Centro Legal de la Raza assists Alameda County residents with issues surrounding immigrants' rights, tenant's rights, and workers' rights. Their tenants' rights services include eviction defense representation, "Know Your Rights" trainings for buildings, and affirmative housing litigation.

The East Bay Community Law Center (EBCLC) focuses on resolving legal challenges in the East Bay caused by poverty and racial injustice. Housing is one dimension of their work, with a focus on defending eviction lawsuits brought against low-income tenants, as well as enforcement of local rent and eviction control ordinances. Their attorneys and advocates can assist with:

- Defense of Eviction/Unlawful Detainer cases
- Section 8/Housing Authority termination hearings
- Rent board hearings
- General counseling on tenants' rights
- Assistance to individuals to represent themselves
- Public outreach/education trainings
- Rental Assistance program consultations and referrals

EBCLC additionally conducts one to three fair housing tests per year.

The Eden Council for Hope and Opportunity (ECHO) Housing provides fair housing services to residents of several cities in Alameda County, including Oakland. They also serve Contra Costa County and Monterey County. ECHO Housing provides counseling, investigation, mediation, enforcement, and education through their Fair Housing Program. They also conduct fair housing tests. They provide services and education in Spanish and have a live "language line" to assist users who speak languages other than English. They have also conducted outreach and advertised in Spanish. Instances of housing discrimination can be reported to any of ECHO's program offices or filed directly with the U.S. Department of Housing and Urban Development's (HUD) Region IX Office of Fair Housing and Equal Opportunity (FHEO) or California Department of Fair Employment and Housing (DFEH).

The Eviction Defense Center provides free and low-cost legal services to low-income Alameda County residents facing eviction.

The Family Violence Law Center (FVLC) provides free legal assistance to survivors in Alameda County with services including eviction prevention and defense, assistance with landlord/tenant disputes, fair housing advocacy, and information on tenants' rights.

Statewide Fair Housing Providers

Housing and Economic Rights Advocates (HERA) is a statewide non-profit legal service and advocacy organization that provides financial counseling to individuals and community education workshops, and trains service providers and other professionals. Issues they specialize in include abusive mortgage servicing, problems with homeowner associations, foreclosure, escrow, predatory lending, and discriminatory financial services and consumer transactions.

DFEH is the statewide agency charged with enforcing California's civil rights laws. In particular, DFEH is responsible for enforcing state fair housing laws that make it illegal to discriminate because of a protected characteristic in all aspects of the housing business, including renting or leasing, sales, mortgage lending and insurance, advertising, practices such as restrictive covenants, and new construction. Discrimination complaints are referred from the City to DFEH. DFEH then dual-files fair housing cases with FHEO, as part of the Fair Housing Assistance Program.

Oakland Housing Authority

The Oakland Housing Authority (OHA) has a series of policies and processes in place for both public housing developments as well as in its Section 8 program to affirmatively further fair housing and civil rights through all of its programs, including educating its residents on how to file a discrimination complaint, how to request for reasonable accommodations, and ensuring residents with limited English proficiency can access the help they need.

Through its orientation process, OHA ensures that all residents are fully aware of all applicable civil rights laws. If a resident believes they have suffered any form of discrimination, OHA will provide the resident with all necessary paperwork, offer to assist the resident in completing the form and refer the resident to both HUD FHEO and DFEH.

OHA actively encourages any resident to make a request for an exception, change or adjustment to a rule, policy, practice or service because of a disability. OHA will treat any such request as a request for a reasonable accommodation. OHA will provide forms and/or guidance to the requestor on the information necessary to make the request. OHA will review and assess requests for reasonable accommodations on a case-by-case basis, taking into all available factors.

OHA follows HUD's December 19, 2003 guidance designed to assist housing authorities comply with Title VI of the Civil Rights Act of 1964. OHA recognizes that for many applicants and residents, English is not their primary language and they have a limited ability to read, write, speak or understand English. Language for LEP Persons can be a barrier to accessing important benefits. OHA's automated phone service provides menu options in English, Cantonese, Spanish, and Vietnamese. To assist walk-in clients, OHA uses a telephone interpretation service enabling them to serve clients in over 150 languages. All vital documents (such as waitlist application and opening notices) are translated from English into Cantonese, Spanish and Vietnamese. Oral translation, where reasonable, will be provided for other LEP clients.

FAIR HOUSING LAWS AND REGULATIONS

Oakland complies with federal and State fair housing laws, and its City-specific rental housing laws help protect residents from being displaced or suffer from unfair rent increases. The City also allocates funding to fair housing service providers to assist residents with legal issues related to fair housing. OHA complies with these laws in their provision of subsidized housing by educating residents about and assisting them with discrimination issues, supporting requests for reasonable accommodation for persons with disabilities, and making efforts to assist those with limited English proficiency. Key federal, State, and local fair housing laws are summarized below.

Federal Fair Housing Act of 1968

The Fair Housing Act of 1968 prohibits discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex. The Act was subsequently amended to additionally prohibit such discrimination on the basis of familial status and disability. In 2015, HUD issued a rule to Affirmatively Further Fair Housing. While that rule was subsequently rescinded, California Assembly Bill 686 (2018) ensured that California jurisdictions would maintain an obligation to Affirmatively Further Fair Housing.

California Fair Employment and Housing Act (FEHA)

FEHA prohibits discrimination and harassment in all aspects of housing including sales and rentals, evictions, terms and conditions, mortgage loans and insurance, and land use and zoning. It also requires housing providers to make reasonable accommodations in rules and practices to permit persons with disabilities to use and enjoy a dwelling and to allow persons with disabilities to make reasonable modifications of the premises.

Americans with Disabilities Act (ADA)

The ADA requires all new or altered facilities subject to the ADA to be readily accessible to and usable by people with disabilities. Covered entities must comply with the Department's ADA regulations, including the ADA Standards for Accessible Design.

Oakland Rental Housing Laws

In 1980, the Oakland City Council passed its first rent control ordinance, which established the Housing, Residential Rent Arbitration and Relocation Board and the Rent Adjustment Program. Since then, the program has amended many times. The current ordinance, Oakland Municipal Code Section 8.22.010 *et seq.*, regulates most residential rent increases in Oakland. Additionally, in 2002, the Oakland voters passed the Just Cause for Eviction Ordinance, requiring a property owner to prove one of the eleven just causes before they could evict a tenant (See Oakland Municipal Code Section

8.22.300 *et seq.*) Together these laws are intended to maintain affordable housing, preserve community diversity, prevent illegal rent increases and evictions, and encourage investment in rental property in Oakland.

The Rent Adjustment Program Board is a quasi-judicial body, composed of seven members appointed by the Mayor and confirmed by the City Council. The Board hears appeals and enacts regulations and policies to further the administration of the Oakland Rent Ordinance and Just Cause for Eviction Ordinance.

Rent Adjustment Program staff provides information and counseling to property owners and tenants, conducts administrative hearings and mediations, collects eviction data, and administers the Ellis Act, the Tenant Protection Ordinance, and the Uniform Relocation Ordinance.

Under the Rent Adjustment Program, property owners of covered units must give every tenant a "Notice to Tenants of the Residential Rent Adjustment Program" form. When tenants move into a covered unit, the initial notice must be served in English, Spanish, and Chinese. Subsequent Rent Adjustment Program Notices must also be served with every rent increase. If a property owner fails to serve the notice at the beginning of the tenancy, they must wait at least six months after serving the notice to serve a rent increase notice. An owner can increase the rent on a covered unit only once in a 12-month period. The first increase cannot be effective any earlier than 12 months after the tenant moves into the unit. An owner may increase the rent based on the annual allowable consumer price index (CPI) without seeking approval from the Rent Adjustment Program. Every March, the Rent Adjustment Program publishes the allowable CPI increase for the next fiscal year. Any rent increase not based on the CPI, or banking increases based on the owner choosing not to increase rent in previous years, is void and unenforceable unless first approved by the Rent Adjustment Program. An owner can additionally petition to seek a rent increase based on capital improvements as a pass-through, uninsured repair costs, increased housing service costs, fair return, and additional occupants. A tenant may also file a petition to contest current and prior rent increases. The Rent Adjustment Ordinance prohibits any rent increase that would be greater than 10% in one year, or 30% over any five years of a tenancy.

The Just Cause for Eviction Ordinance imposes additional requirements beyond state law prior to the eviction of tenants. A property owner must follow state and local law to the letter to evict a tenant successfully. A property owner's failure to comply with state and local laws may entitle a tenant to substantial damages. Rent Adjustment Program staff are available to help parties understand their rights and responsibilities but do not provide legal advice to property owners or tenants.

The Just Cause for Eviction Ordinance applies to most rental units in Oakland, including single family residences, owner-occupied duplexes and triplexes, units owned and operated by another government agency, and new construction of units or buildings where a Certificate of Occupancy was issued before December 31, 1995. The Just Cause Ordinance adds the following requirement to state law procedures for evictions (Oakland Municipal Code Section 8.22.360 D):

In the Notice to Quit or Notice of Termination, and in the Summons and Complaint, the property owner must specify one or more of the just causes for eviction, and allege that the eviction is in good faith. The property owner must also send a copy of the notice to the Rent Adjustment Program. Neither the sale nor the foreclosure of property is a just cause listed in the Just Cause for Eviction Ordinance.

In November 2022, the City passed ballot Measure V, which extends just cause legal protections to more properties in Oakland. Measure V changes the cutoff date so that tenants who live in buildings built within the last 10 years (on a rolling cutoff) will have just cause protections. Measure V will also expand eviction protections to categories of housing legalized by the city last year: tiny homes on wheels and recreational vehicles, if those units are rented to a tenant by a landlord. Measure V also adds special eviction protections for school-age children or educators who are being evicted for "no-fault" reasons during the school year.

The Uniform Relocation Ordinance, Oakland Municipal Code Section 8.22.800, requires owners to provide tenants displaced by code compliance activities, owner or relative move-ins, Ellis Act, and condominium conversions with relocation payments. Except for temporary code compliance displacements, which require the payment of actual temporary housing expenses, the payment amount depends on the size of the unit and adjusts for inflation annually on July 1st. The base payment amounts until June 30, ~~2022~~2023, are:

- $7,~~443.23~~669.78 per studio/one-bedroom unit
- $9,~~165.82~~439.73 per two-bedroom unit
- $11,~~314.06~~652.17 per three- or more-bedroom unit.

Tenant households in rental units that include lower income, elderly, or disabled tenants, and/or minor children are entitled to a single additional relocation payment of $2,500 per unit from the owner.

On November 5, 2014, the Oakland City Council adopted the Tenant Protection Ordinance (TPO), which prohibits various harassing behaviors against tenants by owners and their agents (for example, property managers and contractors) – thereby bolstering existing laws and leases that protect tenants. The TPO creates remedies that can be enforced by private civil right of action. Among other things, the Tenant Protection Ordinance prohibits conduct that may coerce a tenant to vacate a rental unit involuntarily.

On July 21, 2020, the TPO was further amended to strengthen the protections of the existing TPO and expand its application to non-profit owned rental housing and rental units in newly constructed residential property. The TPO prohibits property owners and their agents from engaging in bad faith in any of the following conduct.

1. Disruption of services to the rental unit.
2. Failure to perform repairs and maintenance.
3. Failure to exercise due diligence when completing repairs or follow appropriate industry protocols.
4. Abuse the owner's right of access to the rental unit.
5. Remove personal property, furnishings, or any other items without the prior written consent of the tenant, except when authorized by law.
6. Threaten to report a tenant or their known associates to law enforcement based on their perceived or actual immigration status.

7. Influence a tenant to vacate through fraud, intimidation or coercion.
8. Offer payments to a tenant to vacate more than once in six (6) months if the tenant has stated in writing that they do not want to receive such offers.
9. Try to intimidate a tenant into accepting a buyout.
10. Threaten the tenant or their guests, by word or gesture, with physical harm.
11. Interfere with a tenant's right to quiet use and enjoyment of the rental unit.
12. Refuse to accept or acknowledge receipt of a tenant's lawful rent payment.
13. Refuse to cash a rent check or money order for over thirty (30) days unless a written receipt for payment has been provided to the tenant.
14. Interfere with a tenant's right to privacy, including unnecessarily inquiring into a tenant's immigration status.
15. Unilaterally imposing new material terms of tenancy.
16. Removing a housing service for purpose of causing the tenant to vacate.
17. Commit violations of certain state laws, including discrimination prohibited under the Unruh Civil Rights Act and illegal lockouts and utility shutoffs prohibited by other laws.
18. Misrepresent to a tenant that they are required to vacate their unit.
19. Force a tenant to vacate their rental unit and reregister in order to avoid classification as a tenant.
20. Other repeated acts or omissions of such significance as to substantially interfere with or disturb the comfort, repose, peace, or quiet of any person lawfully entitled to occupancy.

In November 2022, the City passed ballot Measure V, which extends just cause legal protections to more properties in Oakland. Measure V changes the cutoff date so that tenants who live in buildings built within the last 10 years (on a rolling cutoff) will have just cause protections. Measure V will also expand eviction protections to categories of housing legalized by the city last year: tiny homes on wheels and recreational vehicles, if those units are rented to a tenant by a landlord. Measure V also adds special eviction protections for school-age children or educators who are being evicted for "no-fault" reasons during the school year.

OAKLAND CITY ATTORNEY FAIR HOUSING ENFORCEMENT ACTIONS

Oakland City Attorney Barbara J. Parker and the members of the office recognize that housing is a human right. ~~We~~They therefore strive to protect and advance Oakland residents' right to safe, secure, and dignified housing. Within the City of Oakland government, the City Attorney is uniquely empowered to: (1) bring lawsuits to address housing rights violations on behalf of the People of the State of California and/or the City of Oakland; (2) secure court orders to improve living conditions; (3) stop harassment; and (4) craft new and amended city laws and policies for the Council's consideration to address gaps in local fair housing law and enforcement.

The Office of the City Attorney (OCA) often partners with civil society legal advocates to pursue justice for Oakland's historically and currently marginalized communities. OCA's housing enforcement actions can prevent the imminent displacement and potential homelessness of marginalized tenants and force landlords to provide the safe, secure, and dignified housing that tenants deserve and that the law requires. These tenants are disproportionately low-income Black, Latinx, Asian and Pacific Islander, and other residents of color.

Three affirmative litigation units in OCA contribute to the City's fair housing efforts: the Neighborhood Law Corps (NLC), the Community Lawyering and Civil Rights Unit (CLCR), and the Housing Justice Initiative Unit (HJI).

Since the City Attorney founded the NLC in 2002, it has engaged directly with Oakland communities to address some of the most challenging life, health, and safety problems that Oakland's neighborhoods face, including tenant harassment, and the NLC historically spearheaded OCA's efforts to secure justice for tenants.

Launched in 2016, the CLCR works to advance rights for historically and currently marginalized communities in Oakland to achieve racial, economic, and environmental justice by enforcing, strengthening, and drafting laws that are responsive to those communities' needs.

In October 2020, the City Attorney launched HJI,[3] a housing enforcement unit specifically dedicated to protecting marginalized Oakland tenants through enforcement of Oakland's Tenant Protection Ordinance (TPO) and other similar or related local and State laws.[4]

OCA prioritizes enforcing the rights of low-income communities and communities of color, especially Black and Latinx residents, who have suffered and continue to suffer disproportionate harms due to the ongoing housing crisis. OCA's housing justice goals include utilizing housing policy and enforcement as a means to further racial, economic, and environmental justice generally, and also to specifically prevent wrongful displacement of marginalized tenants from Oakland.

Community Lawyering and Civil Rights Enforcement (CLCR)

The City Attorney launched this unit to prioritize affirmative litigation and other actions and initiatives to secure justice and equity for all Oakland residents and workers, and to fight abuse, predation, and discrimination against historically or currently marginalized communities. CLCR's affirmative housing-related work has also included actions against or advocacy directed at the federal government where appropriate.

Many of CLCR's cases and initiatives have positively impacted housing justice. For instance, CLCR joined a coalition of close to a dozen other cities and counties statewide to litigate a multi-decade case against lead paint companies that had sold their harmful products for interior residential use for much of the 20th century. Interior lead paint disproportionately harmed and harms Black, Latinx, and low-income Oaklanders, who are more likely to live in older and more lead-burdened housing stock.

[3] www.housingjusticeoakland.org

[4] The Oakland City Attorney's Office received two generous grants from the San Francisco Foundation to advance racial equity through the development of HJI and expansion of City Attorney tenant protection enforcement. (See June 30, 2020 City Council Resolution #88186. Legistar File #20-0484. Available at https://bit.ly/3yy9VoD.)

CLCR also joined other local governments in a case against the pharmaceutical industry for its contributions to the opioid crisis; that crisis has been a significant driver of homelessness in Oakland, a status disproportionately experienced by Black Oaklanders, and opioids are a significant barrier to unhoused people becoming housed. CLCR also submitted regulatory and administrative feedback to protect housing rights, such as by advocating that HUD refrain from promulgating any rule that separates family members in Oakland-based HUD housing on the basis of immigration status.

CLCR also has pursued other litigation to address historical, present, and future impacts of redlining, restrictive covenants, predatory mortgage lending, fair housing, and livable land issues that impact Oakland's Black, Latinx and other residents of color. For example, in 2015 the City of Oakland sued Wells Fargo for its racially discriminatory mortgage lending practices that violated the Fair Housing Act and California's Fair Employment and Housing Act and preyed upon Black and Latinx Oaklanders, contributing to widespread foreclosures, loss of tax revenue, and other harms. While the City was disappointed that the Ninth Circuit en banc reversed the initial panel's decision, hindering our ability to ensure that the letter and spirit of the Fair Housing Act was upheld in that case, our work to advance fair housing and hold bad actors accountable for their racially discriminatory practices is not over; indeed, it has only begun.

OCA also recognizes more broadly that housing intersects with environmental, economic, and racial justice, and so CLCR's other work focused on those areas also supports fair housing efforts. For example, CLCR is working to improve climate change adaptation and address pollution in Oakland, which disproportionately impacts residents of color and the habitability of Oakland's flatlands.

Neighborhood Law Corps (NLC) and Housing Justice Initiative (HJI)

In addition to the extreme housing affordability crisis in Oakland, marginalized tenants are frequently displaced from their homes when their landlords illegally coerce them to leave. This is especially true for low-income, long-term tenants who live in rent-controlled units and single room occupancy hotels (SROs). Prices and supply incentivize some unscrupulous landlords to harass their tenants to pressure them to leave – for example, by forcing tenants to live without heat in winter. Once a landlord forces tenants to leave, they can sell properties or raise rents to market-rate for significant profit. This is particularly true in neighborhoods that have experienced or are experiencing dramatic gentrification and displacement.

The NLC and HJI have helped to preserve some naturally occurring affordable housing units where low-income tenants of color were at imminent risk of displacement due to unlawful landlord harassment. For example, in 2015, the NLC filed its first TPO lawsuit to vindicate the rights of the very low-income tenants of a 96-unit SRO in downtown Oakland. As a result of OCA's lawsuit, the property was sold to a nonprofit developer with a court order requiring preservation of the building as affordable housing for at least 55 years.[5]

And in 2016, the NLC filed a lawsuit to prevent the new owners of a 39-unit SRO in Oakland's Chinatown from wrongfully displacing the long-term, low-income, and predominantly monolingual Chinese tenants. The owners' declared purpose was to attract a new, market-rate demographic by renovating the building and displacing the existing tenants. The owners' campaign of harassment included failing to restore four of seven communal bathrooms for nine months. The case resulted in a $1,000,000 settlement and permanent injunction against the owners, a resounding victory for the

[5] "Federal Court Approves Sale of Notorious Oakland Residential Property to Improve Conditions and Maintain Long-Term Low-Income Housing." March 23, 2016. Available at https://www.oaklandcityattorney.org/News/Press%20releases/Empyrean%20trustee%20order.html

tenants who were able to stay in their homes.[6] The building is now owned by a nonprofit, and includes commercial space used by a locally-owned restaurant and incubator for immigrant and refugee food entrepreneurs.

Advancing Fair Housing During the COVID-19 Pandemic

Keeping people housed during the COVID-19 pandemic is essential to furthering fair housing. The City of Oakland recognizes that the same communities that are facing insecure housing are also disproportionately impacted by COVID-19, as evidenced by Oakland's declaration of a local health emergency for Black and Latinx residents, many of whom have not had a safe space to isolate or quarantine during the pandemic.[7]

Since the outbreak of COVID-19, OCA has filed multiple lawsuits and sent dozens of demand letters covering hundreds of units in response to landlords violating tenants' rights, including their rights to safe housing and to be free of harassment and discrimination. Almost all of these enforcement actions involved protecting the rights of low-income renters of color. For example, OCA successfully secured emergency restraining orders against landlords engaging in illegal self-help evictions such as lockouts that threatened their tenants' ability to safely shelter in place. The tenants in these cases included Latinx immigrants and elderly, disabled Black residents.

As another example, OCA prevailed in a lawsuit against the owners of a prominent local real estate business for systematically violating the rights of their tenants. The defendants rented units in severely substandard conditions, including units never intended or approved for residential use, to tenants who were predominantly low-income immigrants, among them tenants whose primary language is not English. This predatory business model allowed the owners to exploit tenants desperate to find affordable housing. After trial, the court ordered the defendants to pay millions of dollars in civil penalties and attorney's fees for their egregious violations of tenants' rights. The court also issued a citywide order prohibiting the owners from operating any of their Oakland residential properties in violation of local or State laws.[8] The court concluded that "there is no question that…[the judgment will deter defendants and] will likely have a broad effect in the city as whole as well as other communities. The case thus undoubtedly advanced the public interest."

FAIR HOUSING COMPLAINTS AND VIOLATIONS

Housing discrimination complaints are one source for evaluating fair housing issues in a community. FHEO and DFEH are charged with implementing and enforcing fair housing protections. Local fair housing cases may be forwarded to either agency, depending on the basis of discrimination. However, many cases are resolved on the local level.

In Alameda County, 20 FHEO complaints were filed in 2020, 75 percent were related to a disability bias, 10 percent were related to a racial bias, and 10 percent were related to a familial status bias

[8] Orenstein, Natalie. "Oakland Landlord Hit with $3.9 Million Penalty for Hazardous Housing Conditions." *The Oaklandside.* September 13, 2021. Available at https://oaklandside.org/2021/09/13/oakland-landlord-hit-with-3-9-million-penalty-for-hazardous-housing-conditions/

(HCD AFFH Data Viewer, 2020). The number of housing discrimination complaints has decreased since 2010, when 64 complaints were filed in Alameda County. As in 2020, most complaints in 2010 were related to disability bias (47 percent) while 20 percent were related to a racial bias, and 14 percent were related to a familial status bias. A report from ECHO and East Bay Community Law Center on complaints brought to them from 2015-2019 show that the largest share of complaints (more than 40 percent) in Alameda County are from the City of Oakland, yet Oakland only makes up 26 percent of the population of Alameda County. Consistent with HCD data, most complaints are related to a disability bias. Nearly 50 percent of cases brought to these local fair housing organizations were resolved with counseling.

ISSUES RELATED TO ENFORCEMENT AND OUTREACH CAPACITY

Impediments to addressing fair housing issues in Oakland specifically (and across Alameda County) include lack of local fair housing outreach and enforcement from both private (nonprofit) and public organizations, lack of resources for fair housing agencies and organizations, and lack of federal, State and local funding for affordable housing. The 2020 Analysis of Impediments to Fair Housing (AI) reports that State and federal funding for affordable housing in Alameda County has declined by 80 percent since 2008.

D.2 Segregation and Integration

Segregation can be defined as the separation across space of one or more groups of people from each other on the basis of their group identity such as race, color, religion, sex, income, familial status, national origin, or having a disability or a particular type of disability. Segregation can occur at the neighborhood level and can also occur between cities within the larger region. It can occur in various spaces, such as within workplaces, schools, or places of worship. This analysis is focused on residential segregation.

In contrast to segregation, integration can be generally defined as a condition in which there is not a high concentration of a particular group identity. While integration in some contexts shows a breaking from prior trends of exclusion, and thus a laudatory outcome, measures of integration may also be evidence of areas formerly segregated that have now become integrated as a result of gentrification and displacement. This section analyzes these patterns of segregation, as well as patterns of integration.

Oaklanders take great pride in the city's immense diversity. Compared to the nation and the diverse Bay Area, Oakland stands out as home to people of a wide variety of backgrounds. However, recent research shows that the Oakland is the 14th most racially segregated major city in the United States. Analyzing 2020 Census data, the Othering and Belonging Institute of Berkeley found that six of the ten most segregated Black neighborhoods in the Bay Area, and four of the of the five most segregated Latino neighborhoods, are located in Oakland. Overall, Oakland is the most racially segregated city in the Bay Area in terms of segregation of people between neighborhoods within the city.

Like many other U.S. cities, segregation is Oakland has been shaped by local, county, State and federal government policies and practices that created unfair conditions for BIPOC communities. As described in the Introduction and in Appendix F: Constraints, current disparities in access to opportunity, health, and wealth building are the result of centuries of intentional policies and practices designed to uphold systems, power, and wealth undergirded by racial discrimination. In

the 1930s, Oakland lenders adopted the federally sanctioned practice of refusing to insure mortgages in and near neighborhoods predominantly made up of communities of color. These areas were rated as "D", or "Hazardous," and color-coded as red on lending maps. Residents of these "redlined" neighborhoods, including West Oakland and East Oakland, were denied access to credit, resulting in a cycle of disinvestment and poverty. To prevent their own neighborhoods from being redlined, private developers, realtors, and homeowners were encouraged to write racially restrictive covenants into their deeds that further inhibited residents of color from moving into these areas. Redlined neighborhoods were further damaged by "urban renewal" projects led by ~~the~~ Oakland ~~Planning Commission~~decisionmakers in the 1960s and 1970s. Private properties, primarily in redlined areas, were deemed "blighted" and demolished to make way for freeways and new development. Communities in these areas, such as West Oakland and Chinatown, were displaced and those who remained found themselves next to freeways and other pollution-generating land uses. Zoning was used to designate some areas as residential, either with single-family homes or multi-family homes, and others as industrial.[9] This kept property values higher for white residents in more affluent areas. A segregation map published in 1960 by Sociologist Dr. Floyd Hunter showed that the three zones where Black people resided included zoning for industrial use around residential areas, while the six zones ~~were~~where they did not reside were mostly "A" or single-family zoned, with no industrial use. The racialized concentration of wealth and poverty in Oakland generated through these extractive, exclusionary tactics plays out spatially, with many communities of color having the least access to wealth- and health-building resources, and white communities having the most access.[10]

In the late 1990s, Oakland became an attractive target for real estate investment, spurred in part by the 10K Initiative that proposed scattered market-rate housing across downtown. In the years leading up to the 2008 housing crash and Great Recession, banks engaged in a process called "reverse redlining" where predatory lending practices and subprime loans were targeted in the same neighborhoods that were once marked as off-limits for borrowers in the 1950s.[11] These targeted practices resulted in enormous waves of foreclosures in East and West Oakland. Data from the Urban Strategies Council shows that 93 percent of foreclosed properties then acquired by investors were located in these neighborhoods.[12] At the same time, a strengthening Bay Area jobs market led to waves of residential and commercial gentrification, especially in North and West Oakland. The direct and indirect displacement of residents in these areas, driven by the heated and inequitable housing market, threatens not only households but the cultural identity and viability of these communities.

Despite policies aimed to eliminate racial bias and discrimination, economic and racial segregation continues to increase in the United States. According to data from the National Bureau of Economic Research, over the past 40 years, economic inequality in the United States has returned to levels last

seen in the 1920s.[13] Although explicit racial discrimination or legally recognized segregation is not practiced or condoned ~~in~~by the City of Oakland today, the consequences of this history remains~~,~~ and can be traced on today's maps of racial/ethnic population concentrations and concentrations of poverty.

~~Public and private~~Private housing discrimination (that continues to this day) also contributes to patterns of segregation within a community. Although racial and ethnic segregation is perhaps the most common and well-known form, other protected classes may also experience segregation. This section explores patterns and trends of segregation based on race and ethnicity, disability, familial status, and income level in Oakland. These groups are not mutually exclusive, and there may be considerable overlap across each protected class.

RACE AND ETHNICITY

Regional

Racial and ethnic patterns of segregation in Oakland should be understood within the context of both current regional segregation patterns as well as changing regional and local demographics. As shown in Table D-1, the population of Alameda County has increased by 10.2 percent between 2010 and 2020, with a projected increase of about 12.3 percent between 2020 and 2040, according to California Department of Finance. While the Hispanic group led county growth in numbers (representing an increase in 49,079 people from 2010 to 2020), non-Hispanic multiracial was the fastest-growing group. This group will continue to be the fastest-growing group through 2040, followed by American Indians and Alaska Natives. Over two-thirds of the Alameda County population is something other than non-Hispanic white; however, as of 2020, non-Hispanic whites represent the largest share of the population at about 33.5 percent, followed by non-Hispanic Asians (26.4 percent) and Hispanics of any race (23.4 percent).

Table D-1: Population Growth by Race/Ethnicity, Alameda County, 2010 - 2040

Race/Ethnicity	Population			Percent Change	
	2010	2020	2040 Forecast	2010-2020	2020-2040
White (NH)	519,672	559,571	616,233	7.7%	10.1%
Black (NH)	185,710	191,801	208,955	3.3%	8.9%
American Indian or Alaska Native (NH)	4,299	4,846	6,174	12.7%	27.4%
Asian (NH)	395,859	441,271	479,809	11.5%	8.7%
Native Hawaiian or Pacific Islander (NH)	12,421	13,465	13,879	8.4%	3.1%
Multiracial (NH)	57,199	70,261	96,567	22.8%	37.4%

Hispanic/Latinx (any race)	341,561	390,640	456,149	14.4%	16.8%
Total	**1,516,721**	**1,671,855**	**1,877,766**	**10.2%**	**12.3%**

Note: NH refers to non-Hispanic.

Source: California Department of Finance, Table P-2D County Population by Total Hispanic and Non-Hispanic Race (2010-2060)

Regionally, the San Francisco Bay Area experiences notable racial segregation patterns. ABAG-MTC's AFFH Segregation Report, prepared in collaboration with the UC Merced Urban Policy Lab, found that white residents in the region are significantly more segregated from other racial and income groups, though white isolation has decreased since 2010. The highest levels of racial segregation occur between Black and white populations. The Othering and Belonging Institute at UC Berkeley additionally found that seven of the nine Bay Area counties were more segregated in 2020 than they were in either 1980 or 1990, but also that racial residential segregation appears to have peaked around the year 2000 and has generally declined since. However, compared to cities in other parts of California, Bay Area jurisdictions have more neighborhood level segregation between residents from different racial groups, and there is more racial segregation between Bay Area cities compared to other regions in the state.

Local

Oakland has a majority-BIPOC population (71.7 percent) according to 2019 ACS five-year estimates (Table D-2), and Oakland's share of BIPOC individuals is greater than the region at large. However, population growth between 2010 and 2019, which was 8.8 percent overall, was largely driven by an increase in the non-Hispanic white population (with an increase of 18,917 people from 2010-2019), followed by the Hispanic/Latinx population (with an increase of 15,874 people). The fastest-growing group during that timeframe was some other race or two or more races (45.8 percent). While the non-Hispanic Black or African American population represented the largest share of the population in 2010, by 2019 it had declined 7.4 percent and was no longer the plurality. As described later in the Displacement Risk section of this chapter, this population decline was in part a result of the Black population being displaced as housing costs in the area increased. As of 2019, non-Hispanic whites were the plurality at 28.3 percent, followed by the Hispanic or Latinx population at 27 percent. Non-Hispanic Black or African Americans composed 23.2 percent of the population in 2019. Population projections by race and ethnicity are unavailable at the city level as they have not been prepared by the Department of Finance, the Association of Bay Area Governments-Metropolitan Transportation Commission (ABAG-MTC) or Alameda County.

Table D-2: Population Growth by Race/Ethnicity, Oakland, 2010 - 2019

Race/Ethnicity	Population		Percent Change
	2010	2019	2010-2019
White	101,308	120,225	18.7%
Black or African American	106,637	98,749	-7.4%
American Indian and Alaska Native	1,214	1,455	19.9%
Asian	65,127	65,195	0.1%
Native Hawaiian/Other Pacific Islander	2,081	2,237	7.5%
Some other race/Two or more races	15,289	22,294	45.8%
Hispanic or Latinx	99,068	114,942	16.0%

Total	**390,724**	**425,097**	8.8%

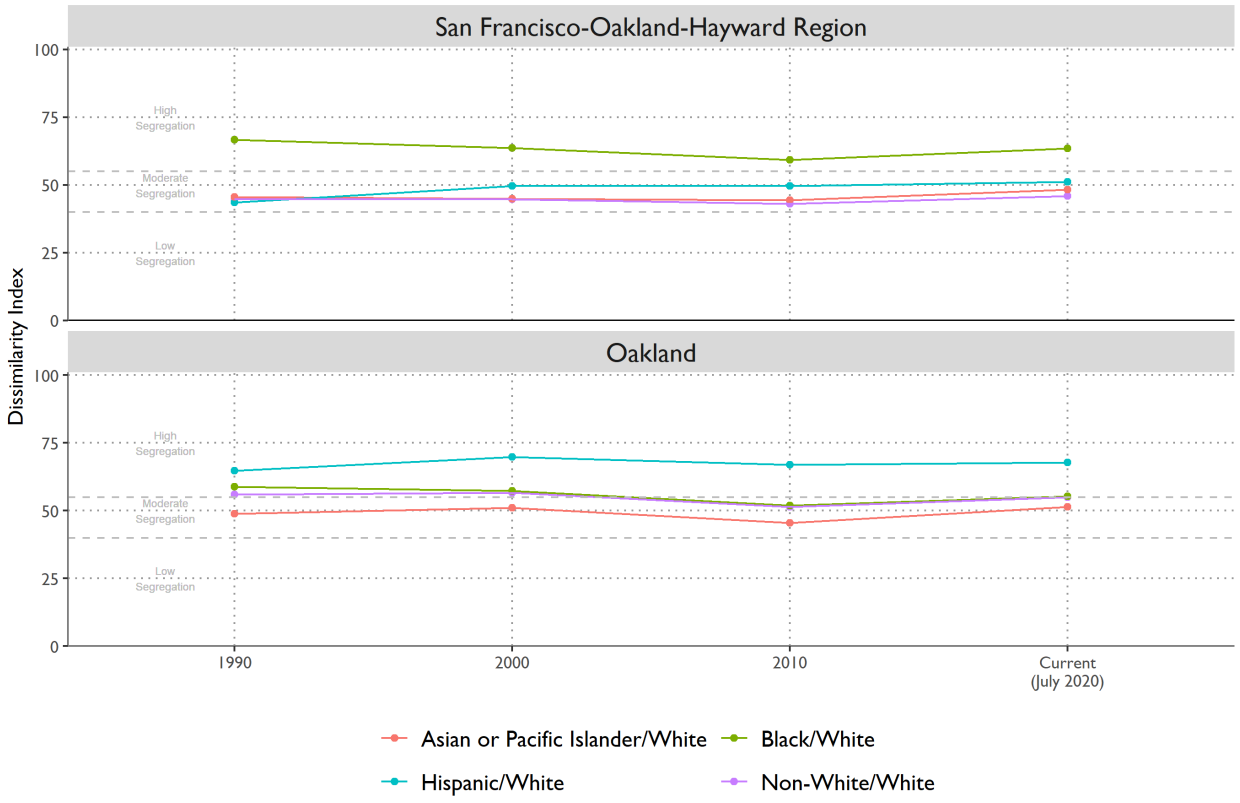
Dissimilarity and Isolation Indices by Race/Ethnicity

To examine the distribution of racial and ethnic groups in a jurisdiction, HUD developed the Dissimilarity Index. The Dissimilarity Index measures the degree to which two groups are evenly distributed across a geographic area and is commonly used for assessing residential segregation between two groups. The Dissimilarity Index uses values ranging from 0 to 100, where higher numbers indicate a higher degree of segregation among the two groups measured. Dissimilarity Index values between 0 and 39.99 generally indicate low segregation, values between 40 and 54.99 generally indicate moderate segregation, and values between 55 and 100 generally indicate a high level of segregation. Dissimilarity Index values compare racial and ethnic groups against the distribution of non-Hispanic white residents in a community and do not directly measure segregation between BIPOC groups. Chart D-1 provides the Dissimilarity Index trends from 1990 to 2020 for Oakland and the San Francisco-Oakland-Hayward Region.

Within Oakland, the dissimilarity index shows moderate or high segregation for all racial groups as compared to the non-Hispanic white population. All indices within the city are above 50 as of 2020. There is moderate segregation between the white and Asian/Pacific Islander population. Segregation between the Black and white populations is borderline moderate-high. In both comparisons, segregation decreased slightly from 2000 to 2010, then increased slightly from 2010 to 2020. Segregation between the Hispanic and white populations is high and has remained consistent for the last 20 years.

Within the San Francisco-Oakland-Hayward region, segregation between non-white and white groups is lower than within the city of Oakland, scoring less than 50 since 1990 (in Oakland, this number has remained consistently above 50). Since 1990, there has been moderate segregation between all groups in the region, except between the Black and white population, for which it has been consistently higher. Segregation between Hispanic and white groups is notably higher in Oakland than in the region at large, which typically scores 50 or lower. Within the last 10 years, segregation overall has increased slightly in Oakland and in the region, except between the white/Hispanic comparison group, for which it has remained consistent.



ABAG-MTC also produced a dissimilarity index comparing Oakland with the entire nine-county Bay Area. Segregation between white and non-white groups in the nine-county region is notably lower than in Oakland and the San Francisco-Oakland-Hayward region. Also, Oakland's dissimilarity index indicated a higher degree of segregation between Latinx and white populations than any of the 104 jurisdictions analyzed. Overall, Oakland's dissimilarity index indicated one of the highest levels of segregation between white populations and BIPOC populations in the entire Bay Area region.

The ABAG-MTC report also included an isolation index for Oakland and the nine-county Bay Area Region. An isolation index compares each neighborhood's composition to the city's demographics as a whole.

This index ranges from 0 to 1. Higher values indicate that a particular group is more isolated from other groups. Isolation indices indicate the potential for contact between different groups. The index

can be interpreted as the experience of the average member of that group. For example, if the isolation index is 0.65 for Latinx residents in a city, then the average Latinx resident in that city lives in a neighborhood that is 65 percent. Latinx residents are the most isolated racial group in the City, and they are less isolated in the region. The Black/African American population is also more isolated within the City than the region, and their isolation index has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020. The isolation index for white populations has fallen from 2000 to 2020 and is somewhat lower within the City than within the Bay Area.

Chart D-1: Racial Dissimilarity Index for the Region and Oakland

Source: HUD, AFFHT0006 Table 12, July 2020

The Dissimilarity Index may not capture the nuances in patterns of segregation between BIPOC communities. Further, the Dissimilarity Index is only available at the citywide level. The Urban Displacement Project (UDP) at UC Berkeley has created neighborhood segregation typologies that identify which racial/ethnic groups have more than 10 percent representation within a given census tract. The typologies consider five racial/ethnic groups, including Black, Latinx, White, Asian and Other. As seen in Figure D-1A, the majority of tracts in Oakland are identified as either 3 or 4 Group Mix. However, there's a cluster of tracts in the northeast section of the city are classified as Asian-white and a cluster of tracts in the southwest section classified as Black-Latinx. Across the city, only two tracts are considered Diverse according to this methodology. Figure D-1B more acutely visualizes segregation in Oakland, showing which census tracts are predominantly Asian, Hispanic, African American, and White (no tracts were predominantly Native American/American Indian). Predominant population is classified into three levels, noting where the census tract population for that group is at least 50 percent greater than the other groups (predominant), 10-50 percent greater (sizeable), and less than 10 percent greater (slim). The Asian population is predominant in the Chinatown area with decreasing margins in surrounding tracts in Downtown and east beyond Lake Merritt; the Hispanic population is predominant in Fruitvale with decreasing margins in adjacent tracts in East Oakland; the African American population is predominant in both West Oakland and the Oak Knolls area in East Oakland, with decreasing margins in surrounding tracts; and the white population is predominant in the North Oakland Hills, Rockridge, and immediately south of Piedmont with decreasing margins in surrounding tracts. Only one tract in East Oakland (Bancroft/Havenscourt) does not have a predominant population.

In contrast, the ESRI 2018 Diversity Index (Figure D-2) classifies many tracts as Higher Diversity and a handful of tracts as Lower Diversity. Most of the tracts on the higher end of the diversity index are consistent with those classified by UDP as Diverse or 3 or 4 Group Mix. Many tracts located in the northeast section of the city fall on the lower end of the diversity index, consistent with the UDP neighborhood segregation findings.

Other Relevant Factors: Loan Denial Rates by Race/Ethnicity

Chart D-2 below traces loan denial rates for home purchase and improvement loans between 2012 to 2020 for all census tracts in Oakland and Alameda County. Denial rates have remained relatively stable and generally lower than 25 percent in the County, with Asian and white applicants consistently on the lower end, and Black applicants consistently on the higher end. In 2018, denial rates increased for all groups in the County, but have since decreased. Despite the decrease, denial rates have remained higher for the Hispanic and American Indian/Alaska Native groups. Oakland-based denial rates are similar to the County's rates on average, but with more variability for the American Indian/Alaska Native and Native Hawaiian/Other Pacific Islander groups. Both groups comprise much smaller shares of the Oakland population than other racial/ethnic groups, which might mean fewer loan applications, and thus have a larger impact on the data. Denial rates are generally higher for the American Indian/Alaska Native population in Oakland compared to the County overall, while they are generally lower for the Native Hawaiian/Other Pacific Islander population in Oakland compared to the County overall. Denial rates are consistently lowest for the white population.

Chart D-2: HMDA Loan Denial Rates by Race/Ethnicity, 2012-2020

Source: Home Mortgage Disclosure Act Data, 2012-2020

PERSONS WITH DISABILITIES

According to the 2019 ACS five-year estimates, approximately 49,362 or 11.7 percent of Oakland residents were living with a disability. This is slightly higher than in Alameda County (9.2 percent) and in the Bay Area (9.6 percent).

Per 2019 ACS five-year estimates compiled by HCD, Figure D-3 indicates that there is a moderate concentration of people living with a disability (20-30 percent) in some tracts in Downtown Oakland, including Chinatown, plus a tract in West Oakland and a tract in the Piedmont Ave neighborhood. Otherwise, there is a dispersal of persons with disabilities throughout the city. According to the 2020 AI, persons with disabilities are overrepresented in publicly assisted housing (which, as indicated on upcoming Figure D-20, is concentrated in Downtown Oakland.)

Given the barriers faced by persons with disabilities, the provision of affordable and barrier-free housing is essential to meet their housing needs. There are two approaches to housing design for residents with disabilities: adaptability and accessibility. Adaptable housing is a design concept in which a dwelling unit contains design features that allow for accessibility and use by mobility-impaired individuals with only minor modifications. An accessible unit has the actual special features installed in the house (grab bars, special cabinetry). To address these needs, the State requires design or accessibility modifications, such as access ramps, wider doorways, assist bars in bathrooms, lower cabinets, elevators, and the acceptance of service animals. Appendix B, Housing Needs, further addresses details about the population with disabilities in Oakland as well as their housing needs.

Figure D-3: Population with a Disability, 2015-2019

Source: HCD AFFH Data and Mapping Resources (ACS, 2015-2019)

FAMILIAL STATUS

Discriminatory housing practices based on familial status, including discrimination against families with children, may influence where families are able to live and lead to geographic concentrations within a jurisdiction. Female householders with children may especially be targets of discrimination. Table D-3 indicates that more than half of all children in Oakland (60.8 percent) are living in married-couple family households. There are 25,112 children (29.8 percent) living in female-headed households.

Table D-3: Children Under 18 Years in Oakland Households, 2019

Household Type	Number	Percent
Married-Couple	51,201	60.8%
Male Householder, No Spouse Present	7,174	8.5%
Female Householder, No Spouse Present	25,112	29.8%
Other	707	0.8%
Total	**84,194**	**100.0%**

Note: All households with children are considered family households.

Source: U.S. Census Bureau, 2019 American Community Survey 5-Year Estimates (TableID: S0901)

Figures D-4 through D-6 below indicate there are patterns of geographic concentration based on familial status. Figure D-4 shows that the proportion of children in married-couple families tends to be higher in the eastern part of the city, adjacent to and in the hills, plus some scattered concentrations along the western edge of the city. Figure D-5, on the other hand, indicates that there is a higher proportion of children in female householder households in West Oakland and in one specific tract in the downtown area. There is a higher percentage of adults living alone (Figure D-6) in the downtown area, as well as in other mixed-use neighborhoods north and south of downtown, and surrounding Lake Merritt. Additionally, in one tract near Mills College more than 20 percent of adults live alone.

Figure D-6: Percent of Adults Living Alone, 2015-2019

Source: HCD AFFH Data and Mapping Resources (ACS, 2015-2019)

INCOME LEVEL

Geographic concentration by income, including concentration of poverty, is another type of segregation that exists in Oakland. HUD defines low income as 50-80 percent area median income (AMI), and moderate as 80-120 percent AMI. An LMI area (where low- or moderate-income individuals are concentrated) is a census tract or block group where over 51 percent of the population is LMI. Figure D-7 illustrates income segregation across Oakland with the distribution of LMI block groups in 2018. Except for the Port and the Laney College area, LMI block groups in Oakland formed almost a continuous spine through the flatlands. The North Hills and block groups immediately south of the City of Piedmont had the lowest concentrations of LMI individuals, and the South Hills had no tracts where over 50 percent of the population is LMI.

Compared to other Bay Area jurisdictions on average, Oakland in 2015 had a significantly higher rate of between-neighborhood segregation for very low-income individuals, while its segregation rates for other income groups (low, moderate, and above moderate) were similar compared to the region; also, when comparing lower-income individuals to higher-income individuals using a dissimilarity index, income segregation was higher in Oakland than the Bay Area region.[14]

Changing poverty rates over time can provide an insight into the economic wellbeing of households and individuals in Oakland. According to ACS five-year estimates, the poverty rate for individuals in Oakland decreased from 21 percent in 2014 to 16.7 percent in 2019. The poverty rate is higher for families with children in Oakland: 24.5 percent in 2014 and 19.9 percent in 2019. A decrease in the poverty rate during this timeframe was a trend in Alameda County, as well, with 12.9 percent living in poverty in 2014 and 9.9 percent in 2019. Figure 3-8 demonstrates the spatial decrease in poverty from 2014 to 2019, with higher poverty tracts reclassified into lower poverty categories. No tracts had more than 40 percent of the population living in poverty in 2019, while nine tracts did in 2014 (Eastmont, Fitchburg, East Peralta, one tract in San Antonio, one in Downtown, and four in West Oakland). In two cases, tracts with more than 40 percent living in poverty went down to as low as 10-20 percent living in poverty (one tract in West Oakland and the East Peralta tract), which prompts further investigation. While this might be partly a result of a rebounding economy post-Great Recession, it may also signify displacement, which is explored later in this chapter. It is also important to note that poverty disproportionately impacts Oakland residents by race and ethnicity. As shown in Table D-4, all racial and ethnic groups except for white and Native Hawaiian and Pacific Islander populations face higher than average poverty rates.

D.3 Racially/Ethnically Concentrated Areas of Poverty and Affluence

Racially or ethnically concentrated areas of poverty (R/ECAPs) are defined by HUD as census tracts with a non-white population of 50 percent or more, and a poverty rate that exceeds 40 percent or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever is lower. It serves as a measure of neighborhoods that are experiencing both high racial and ethnic concentration as well as high rates of poverty. The 2020 AI notes that displacement, lack of public and private investment in specific neighborhoods, and the type and location of affordable housing all contribute to R/ECAPs. In Oakland (Figure D-9), there are four clusters of R/ECAPs: in/around Downtown and West Oakland, in/around Fruitvale/Jingletown, and two along International Boulevard near the Coliseum.

Recalling Figure D-1B, which shows where predominant concentrations of various racial/ethnic groups live in Oakland, individual R/ECAPs can be linked to census tracts with predominant populations of each of the largest non-Hispanic white racial/ethnic groups in Oakland: Black/African American (West Oakland), Asian (Downtown-Chinatown), and Hispanic/Latinx (Fruitvale/East Oakland). In Oakland, 37 percent of R/ECAP residents are Hispanic, 37 percent are black, 15 percent are Asian or Pacific Islander, and 11 percent fall within other racial categories. According to the 2020 AI, about 13 percent of Oakland's population lives in R/ECAPs.

Figure D-9 also shows R/ECAPs throughout the region. R/ECAPs in nearby jurisdictions include, but are not limited to, five tracts in Berkeley surrounding the UC Berkeley campus (which, as noted in the 2020 AI, is likely skewed by no- or low-income students), and a few in San Francisco. There are none in the neighboring Cities of Alameda, Emeryville, or San Leandro. Oakland has more R/ECAPs than any of its neighboring jurisdictions, and the majority of R/ECAPs in Alameda County. In the Bay Area region, there is a more even distribution of races within R/ECAPs: 19 percent are white, 23 percent are black, 29 percent are Hispanic, and 26 percent are Asian or Pacific Islander.

Racially~~/Ethnically~~ Concentrated Areas of Affluence (RCAAs) are not formally defined by HUD or State HCD but are generally considered to be areas with high concentrations of wealthy, white residents. State HCD's working RCAA metric reflects a Location Quotient (LQ), which represents the percentage of total white population (White Alone, Not Hispanic or Latino) compared to the average percentage of total white population for all census tracts in each COG region. Census tracts with an LQ of more than 1.25 and a median income 1.5 times higher than the COG AMI (or 1.5 times the State AMI, whichever is lower) were ~~assigned a numeric score of 1 (Is an RCAA).~~designated as RCAAs. Based on this methodology, RCAAs are present in Rockridge, Montclair, and the North Oakland hills; the Trestle Glen, Crocker Highlands, and Glenview neighborhoods; and the Jack London District. Appendix C and the Housing Action Plan~~, actions X, Y, and Z,~~ action 3.4.1 specifically addresses location of sites available to lower incomes and zoning changes in the Rockridge area to address this existing segregation. Housing Action Plan 3.4.2 directs further study of zoning changes citywide as part of the Land Use and Transportation Element (LUTE) update. As described in Appendix C, the entirety of the North Oakland hills is within a Very High Fire Hazard Severity Zone, and a majority of the land is sloped with grades above 30 percent.

Regionally, other Bay Area jurisdictions have RCAAs, including, but not limited to, many tracts in Marin and San Mateo Counties as well as some tracts in Santa Clara and San Francisco Counties. In Alameda County, there are RCAAs in the neighboring jurisdictions of Berkeley~~, Alameda, Dublin,~~ (adjacent to Rockridge and in North Berkeley), Alameda (the southeastern potion of the city across the tidal canal from Jingletown), and Piedmont (entirety), as well as in Pleasanton, Livermore, and ~~small~~smaller portions of Albany, Dublin and Fremont ~~in Alameda County.~~. There are no RCAAs in ~~the~~ neighboring ~~jurisdictions of~~ Emeryville and San Leandro. In Contra Costa County, the entirety of the Orinda, Moraga, and Lafayette city limits are ~~RCAA.~~

RCAAs. A significant portion of unincorporated Alameda and Contra Costa Counties adjacent to the Oakland border are also RCAAs.

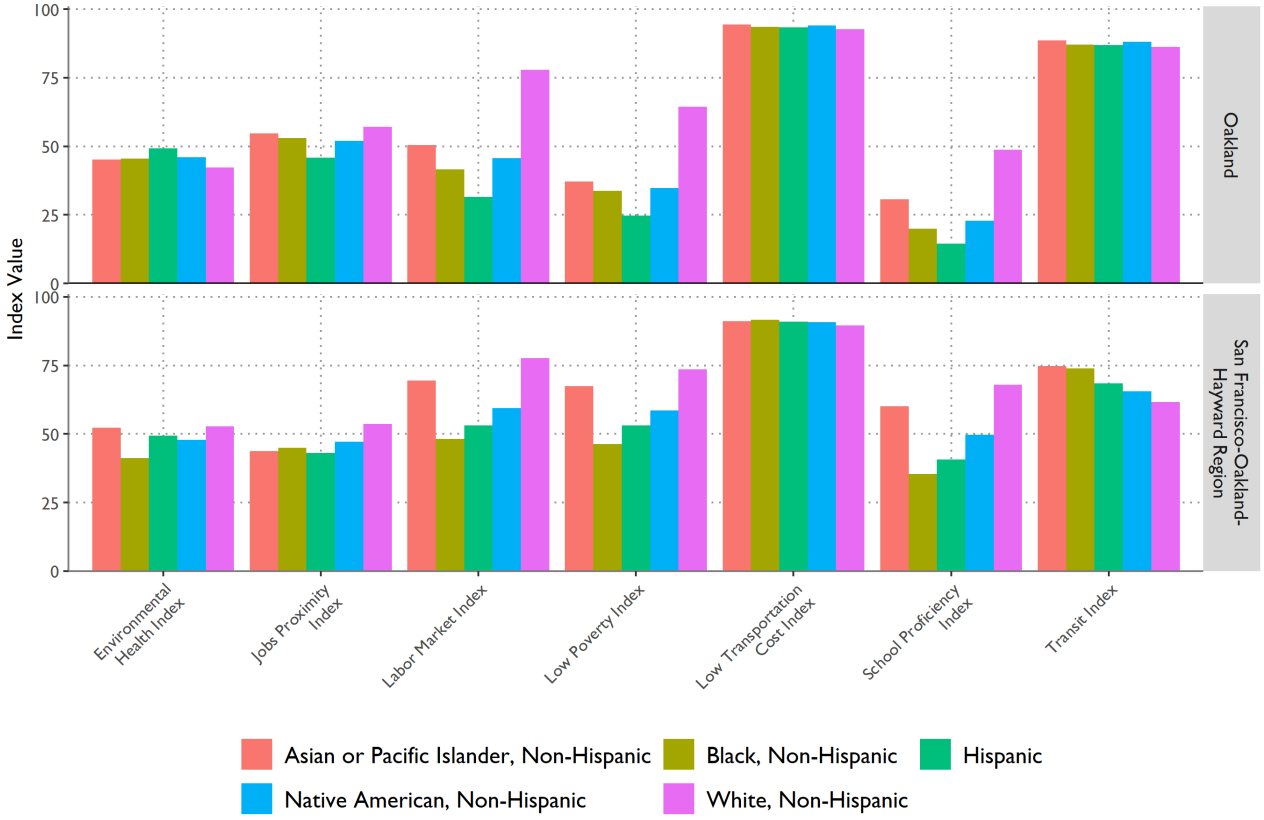
D.4 Disparities in Access to Opportunity

REGIONAL CONTEXT



Access to opportunity was assessed in both the regional and local context. In their July 2020 Assessment of Fair Housing data release, HUD provided a set of opportunity indices to quantify disparities in access to opportunity at the local and regional scale for seven categories: Environmental Health, Jobs Proximity, Labor Market, Low Poverty, Low Transportation Cost, School Proficiency, and Transit. The index score is first computed at the neighborhood level (which can vary from census tract to block group cluster, depending on the variable). The higher the index score, the better an area's access to opportunity. The index score then goes through a second computation that weights it based on the distribution of a given racial/ethnic group in that area. While these indices do not identify opportunity by tract or block group within the city, they can show the relative standing of Oakland compared to the San Francisco-Oakland-Hayward region. Chart D-3 shows the indices by race/ethnicity across the entire population of Oakland and the San Francisco-Oakland-Hayward region. Below are the descriptions for each opportunity index value, along with findings for the city and region:

- **Environmental Health** measures potential exposure to carcinogenic, respiratory, and neurological hazards as determined by the Environmental Protection Agency's (EPA) National Air Toxics Assessment. The higher the value, the less exposure to airborne toxins. The white and Asian/Pacific Islander populations at the regional level have the best environmental health scores and the Black population at the regional level has the worst score. Within Oakland, scores do not differ much across groups, though the score for the Hispanic population is slightly better than the other groups. It is difficult to draw conclusions from this within-city result. Similar to HCD/California Tax Credit Allocation Committee (TCAC) Opportunity Maps data, which appears later in this section, this index only accounts for exposure to toxins and does not account for other environmental justice factors, such as socioeconomic and health disparities across racial/ethnic groups. Additionally, the EPA notes that their assessment is not ideal for measuring differences across small areas; therefore, looking at within-city differences across racial/ethnic groups may not be an ~~ideal~~idea application for this tool. The State HCD/TCAC Opportunity Maps, featured later in this section, are a better tool for examining environmental differences across census tracts in Oakland.
- **Jobs Proximity** quantifies accessibility of a neighborhood to job locations, with major employment centers weighted more heavily. The higher the value, the better access to jobs. Proximity to jobs is slightly higher in Oakland than the region at large, except for the Hispanic population, for which it is roughly the same. While the index focuses on proximity, it does not consider job accessibility based on educational level. Further analysis on job access ~~are~~will be included in the Economic Trends and Prospects report~~,~~ released in ~~May~~June 2022~~.~~, available at https://cao-94612.s3.amazonaws.com/documents/FINAL-Economic_Trends_Prospects_EPS_2022.06.02.pdf
- **Labor Market** measures the intensity of labor market engagement and human capital (i.e. the economic value of a worker's experience and skills) in a neighborhood based on unemployment, labor force participation, and educational attainment. The higher the value, the higher the labor market engagement and human capital. Within Oakland, the labor

market index is much higher for the white population than for other groups. Regionally, the Asian/Pacific Islander population has a notably higher index score than within Oakland, the white population has a similar index score between the region and Oakland, and all other racial/ethnic groups have a slightly higher score at the regional level.

- **Low Poverty** measures poverty in a neighborhood. The higher the value, the less exposure to poverty. Exposure to poverty is lower for all groups regionally compared to Oakland. Asian/Pacific Islander and white groups have the least exposure to poverty regionally. Within Oakland, the white population has notably less exposure to poverty than all other groups.
- **Low Transportation Cost** quantifies transportation costs by neighborhood based on the estimated cost for a low-income, single-parent family of three. The estimate considers a host of variables, such as access to public transit and density of homes, services, and jobs in a neighborhood. The higher the value, the lower the cost of transportation in the neighborhood. Low transportation cost is almost equal for all groups at the city and regional level.
- **School Proficiency** measures access to elementary schools with higher academic proficiency based on the performance of 4th grade students on state exams. The higher the value, the higher the quality of the school system in a neighborhood. School proficiency is higher for all groups at the regional level than at the city level, and highest for white and Asian/Pacific Islander groups. Within Oakland, school proficiency is higher for the white population than other groups.
- **Transit** measures transit use in a neighborhood based on estimates of transit trips taken by low-income, single-parent families of three. The higher the value, the more likely residents in the neighborhood use public transit. The transit index is high in Oakland and about equal across all groups, while in the region it is slightly lower with slight discrepancies between groups.

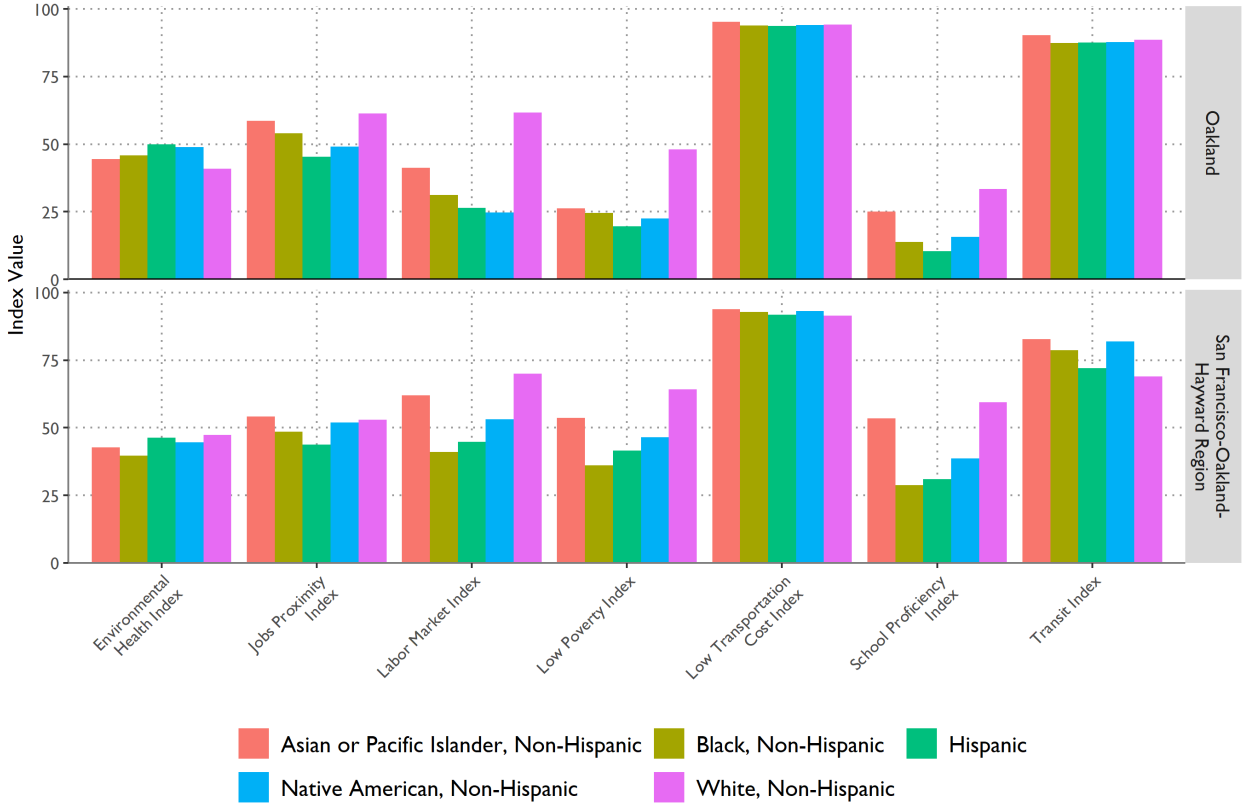


Chart D-3: Opportunity Indices for Total Population, 2020

Source: HUD, AFFHT0006 Table 12, July 2020

Chart D-4 examines these same indices but for the population living in poverty only. The city and regional scores for all groups are similar between the entire population and those living in poverty for environmental health, jobs proximity, low transportation cost and transit. For labor market, low poverty, and school proficiency, patterns are similar relative to racial/ethnic groups and to the geographic areas, but index scores are lower overall in these categories for those living in poverty.

Chart D-4: Opportunity Indices for Population Living Below the Federal Poverty Line, 2020

Source: HUD, AFFHT0006 Table 12, July 2020

LOCAL CONTEXT

To quantify access to opportunity at the neighborhood level, State HCD and TCAC convened to form the California Fair Housing Task Force to develop Opportunity Maps that visualize accessibility of low-income adults and children to resources within a jurisdiction. High Resource areas are those that offer low-income adults and children the best access to a high-quality education, economic advancement, and good physical and mental health. Table D-5 below outlines the domains of the Opportunity Maps. The economic, environmental and education domains were further aggregated to create a composite index.

While Opportunity Maps are used as an analytical tool in this Housing Element to best frame disparities in a context that statewide audiences would understand, the City has severe concerns about the current calculation of Opportunity Maps. The current scoring formula fails to adequately account for recent investments into community, cultural assets, or access to transit. The formula also includes several inputs- such as home value and educational attainment- that are legacies of racism and could lead to communities of color being systemically rated as lower-opportunity.

Table D-5: Domain and Indicators for State HCD/TCAC Opportunity Maps, 2020

Domain	*Indicator*
Economic	Poverty Adult Education Employment Job Proximity Median Home Value
Environmental	CalEnviroScreen 3.0 exposure and environmental effects indicators
Education	Math Proficiency Reading Proficiency High School Graduation Rates Student Poverty Rate
Filter	Poverty and Racial Segregation

Source: California Fair Housing Task Force, Methodology for the 2021 TCAC/HCD Opportunity Map, December 2020

~~Across~~ Alameda County (Figure D-10) ~~exists the full~~contains a variety of opportunity ~~spectrum~~areas, with the Highest Resource areas generally located farther away from urban centers – except in Berkeley, northeast Oakland, parts of Alameda, and Fremont, which also have High Resource areas located in/near urban centers. All of the census tracts in Alameda County that are designated High Segregation and Poverty are in Oakland. This is potentially due in part to Oakland's racial diversity- areas of high poverty that are primarily white are not designated as "High Segregation and Poverty"

Figure D-10: State HCD/TCAC Opportunity Areas, Composite Score: Alameda County, 2021

Source: HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021)

There is a confluence of varying resource levels (except for Highest Resource) in and surrounding Downtown Oakland and Lake Merritt (Figure D-11). Otherwise, most of Oakland's census tracts are considered Low Resource, and these areas surround the High Segregation and Poverty areas. These areas are primarily located in Downtown, West Oakland and East Oakland. As described in Section D2, these communities, which have been historic enclaves for communities of color, have faced a history of disinvestment, redlining, discriminatory policies, and predatory lending. The Highest Resource areas are clustered in the North Oakland Hills and adjacent to Piedmont and these are surrounded by High Resource areas. Census tracts with concentrations of protected groups are limited in access to resources as these tracts do not overlap with the High and Highest Resource Areas, as discussed below.

Those living in Oakland's R/ECAPs have less access to opportunity as these tracts greatly overlap with High Segregation and Poverty and Low Resource areas (Figures D-9 and D-11). These areas are primarily located in Downtown and West Oakland and various census tracts in East Oakland, particularly around Fruitvale and along International Boulevard.

Recalling Figure D-3, persons with disabilities may have varied access to opportunity depending on where they live. Persons with disabilities are most highly concentrated in tracts in Downtown Oakland, one tract in West Oakland, and one tract in North Oakland. These tracts overlap with High Segregation and Poverty Areas, Low Resource Areas, and Moderate Resource Areas.

~~Those living in~~In Oakland, female-headed households ~~also may~~ have ~~varied~~disproportionately less access to opportunity ~~depending on where they live~~. Census tracts with higher concentrations of female-headed households similarly overlap with High Segregation and Poverty Areas, Low Resource Areas, and Moderate Resource Areas in Downtown and West Oakland (Figures D-5 and D-11).

None of the census tracts with higher concentrations of protected groups are High Resource tracts.

Figure D-11: State HCD/TCAC Opportunity Areas, Composite Score: Oakland, 2021

Source: HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021)

Economic Opportunity

The Economic Score map is similar to the Composite Score map (Figure D-11) with more positive economic outcomes in the northeastern part of the city, the Port industrial area, immediately surrounding Lake Merritt, and one tract in the Jack London District (Figure D-12). Downtown and West Oakland contain a mix of economic outcomes, though none fall into the more positive category. East Oakland falls entirely into the lowest outcomes category. The findings from Figure D-12 align with the Gentrification and Displacement map (Figure D-19) shown later in this chapter. In general, there is more access to economic opportunity in tracts that are in advanced gentrification stages, stable, or exclusive/becoming exclusive and less access to economic opportunity in tracts that are not yet gentrified. Gentrification tends to bring substantial economic development and rising housing costs, which both factor into the economic score.

Those living in Oakland's R/ECAPs have less access to economic opportunity, particularly those living in East Oakland, where census tracts are associated with the least positive economic outcomes; those living in Downtown and West Oakland census tracts may be geographically near access to economic opportunity as some of these tracts have been recently gentrified, but that does not mean that BIPOC populations or people living in poverty can access the opportunities available in these areas (Figures D-9 and D-12).

Residents with disabilities may have more difficulty in finding employment. In Oakland, according to 2019 ACS estimates compiled by ABAG, approximately 14.2 percent of the civilian non-institutionalized population 18 years to 64 years in the labor force with a disability were unemployed, while only 5.6 percent of those with no disability were unemployed. So, while there are a greater proportion of persons with disabilities living in and adjacent to census tracts with varied access to economic opportunity (Downtown, near Piedmont Avenue, and West Oakland), that does not outweigh general employment challenges for those with disabilities (Figures D-3 and D-12).

Female-headed households with children typically have greater need for affordable housing and accessible day care, health care, and other supportive services. Therefore, these challenges might outweigh geographic access to economic opportunity. In fact, according to findings from Appendix B, 39.72 percent of female-headed households with children live below the poverty line. So, while there are a greater proportion of female-headed households with children living in and adjacent to census tracts in Downtown and West Oakland with varied access to economic opportunity, ranging from less positive to more positive outcomes, that does not outweigh other challenges, such as finding affordable childcare, that female-headed households must balance (Figures D-5 and D-12).

Transportation Opportunity

State HCD/TCAC does not map access to opportunity with regards to transportation, but All Transit explores metrics that reveal the social and economic impact of transit, specifically looking at connectivity, access to jobs, and frequency of service.[15] Oakland's All Transit Performance score of 8.3 (on a scale of 0 to 10) reflects a high number of transit trips taken per week combined with the number of jobs accessible to transit. On average, 15 transit lines (bus and rail) are accessible within a half mile of Oakland households, 388,553 jobs (96.7 percent of jobs in Oakland) are accessible in a 30-minute transit trip, and 22.82 percent of commuters use transit. This score is consistent with the HUD Opportunity Indices for Jobs Proximity and Transit. Oakland's score is highest in the flatlands, along the BART corridor, and decreases towards the Hills, where scores fall into the 4-6 range. This means that transit is accessible to those living in R/ECAPs, tracts with high concentrations of female-

[15] AllTransit Metrics. https://alltransit.cnt.org/metrics/. Accessed April 2022.

headed households, and tracts with high concentrations of persons with disabilities (Figures D-3, D-5, and D-9). 83.9 percent of households earning an annual salary of less than $50,000 live within a half-mile of high-frequency transit.

Education Opportunity

Disparities in access to quality education is a significant fair housing issue. As shown in Figure D-13, most census tracts in Oakland are associated with the lowest educational outcomes. The more positive educational outcomes are clustered in the northeastern part of Oakland, particularly the North Oakland Hills and tracts immediately south of Piedmont, which is also where predominantly non-Hispanic white tracts are located (Figures D-13 and D-1B). All R-ECAP tracts have lower educational outcomes, with slightly better (but still low) outcomes in Downtown tracts (Figures D-9 and D-13). Female-headed households with children and persons with disabilities are also concentrated in tracts with lower educational outcomes (Figures D-5, D-3, and D-13).

Table D-6 summarizes test score results from the 2018-2019 Smarter Balanced assessments of math and English language arts, which forms part of the State's California Assessment of Student Performance and Progress (CAASPP). These data reflect public schools; private schools are not mandated to take standardized tests. While Alameda County outperforms the state, Oakland's scores are notably lower than those of the state and county.

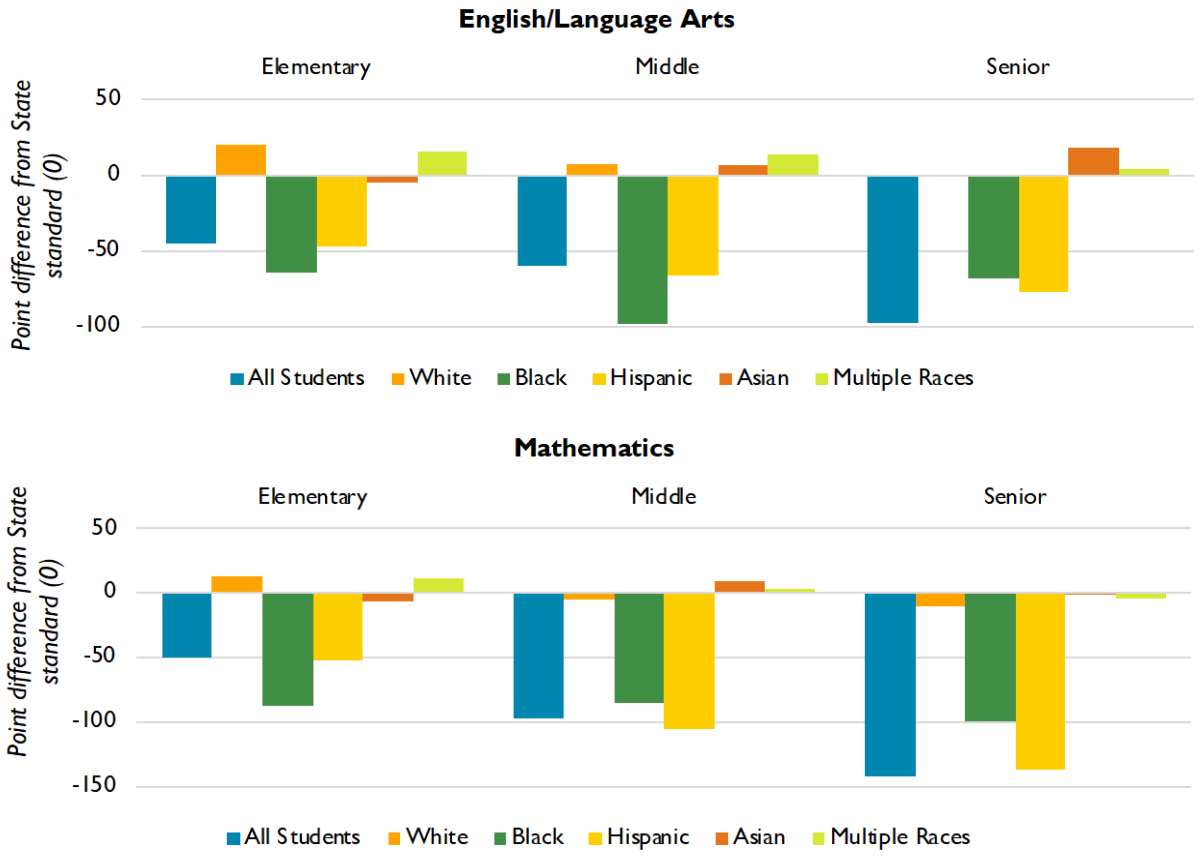

Table D-6: CAASPP Smarter Balanced Test Results, 2018-2019

District/Region	*Percent Met or Exceeded Standard*	
	English Language Arts	*Mathematics*
State of California	51.10%	39.73%
Alameda County	56.84%	48.98%
Oakland Unified School District	33.46%	27.00%

Source: California Department of Education, CAASPP, Smarter Balanced Summative Assessments, 2018-2019

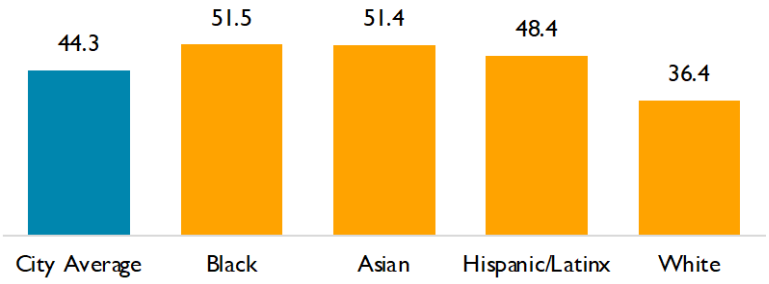
Chart D-5 illustrates how school performance among students for the 2018-2019 school year significantly differs by race. In the Oakland Unified School District (OUSD), Black and Hispanic/Latinx students' average scores are less than the State standards for the Smarter Balanced Summative Assessments and California Alternative Assessments as reported by the California Department of Education (CDE). Moreover, students of all races fall further behind as they progress in their education (i.e., senior/high school performance is worse than elementary school level performance). At a school level, Hillcrest Elementary has the overall highest achieving levels for both English/language arts and mathematics. Hillcrest Elementary is located in a Highest-Resource, predominantly white census tract, miles from any R/ECAPs, where less than 10 percent of the population lives in poverty and less than 20 percent of children live in female-headed households. The lowest-performing elementary school for both subjects is Markham Elementary. Markham Elementary is located in a Low Resource census tract, adjacent to a R/ECAP tract, where 20-30 percent of the population lives in poverty and 41-60 percent of children live in female-headed households. Notably, this school is located in the one Oakland census tract that has no racial/ethnic majority population, but adjacent to tracts with slim Hispanic/Latinx and Black/African American majorities. These outcomes are typical of patterns in race and income; schools in majority-white and more affluent areas (such as Hillcrest Elementary) tend to score higher and often are supported by Parent Teacher Associations (PTAs) with substantial budgets for enrichment activities than schools in lower income and/or majority-BIPOC neighborhoods (such as Markham Elementary).

Chart D-5: OUSD Student Performance by Race (2018-2019 School Year)

Notes: Other categories not shown due to insufficient data: Pacific Islander, Filipino, Native American/Alaskan. Elementary includes K-8; Middle includes 6-12; Senior includes Alternative. Charter schools and Independent Study not included.

Sources: California Department of Education, 2019; Oakland Unified School District, 2021; Dyett & Bhatia, 2022.

OUSD school enrollment is based on a lottery. This technically allows students and families access to more proficient schools. However, applications for students applying to schools in their own neighborhoods are prioritized. Additionally, students applying to Chabot Elementary, Edna Brewer Middle School, and Sequoia Elementary who live in Priority Census Blocks (based on the concentration of Latinx and Black/African American residents, median household income, and number of students participating in free and reduced-price lunch) are prioritized in the application process. Regardless, having to travel across the City to access a better resourced than one's neighborhood school is a deeply inequitable situation.



Environmental Opportunity

Environmental health is another key consideration in fair housing. Today's persistent environmental injustices result from not only recent action or inaction but from historical decisions that determined the city's land use patterns, industrial base, and transportation network. The racial inequities in levels of air pollution, ground contamination, noise, and other environmental problems reflect ineffectively or differential enforcement of environmental protection laws, as well as the siting of

residential areas in proximity to noxious industrial uses and the routing of truck traffic through low-income, Port-adjacent communities and on I-880 but not I-580. By recognizing the impacts of this history in Oakland, the City can better focus efforts on starting to address the negative impacts of past decisions.

As discussed in detail in the Environmental Justice and Equity Baseline March 2022 Report, The City of Oakland has an overall CalEnviroScreen 4.0 Pollution Burden percentile score of 44.3, meaning that it is less impacted by environmental effects and exposures than almost 56.7 percent of tracts in California. However, this relatively low citywide value hides the disproportionate pollution burden experienced by some Oakland census tracts. Although seven out of 113 census tracts in the city have a score of less than 10, four tracts are among the top 10th percentile in the entire state for pollution burden. Chart D-6, below, shows that there are higher concentrations of BIPOC communities living in tracts that have higher pollution burden scores, meaning that they are more at risk than white populations.

Chart D-6 CalEnviroScreen 4.0 Pollution Burden Scores by Race, 2021

Source: CalEnviroScreen 4.0, CalEPA, 2021

The State HCD/TCAC Opportunity Areas- Environmental Score map (Figure D-14) visualizes environmental health opportunity based on specific exposure and environmental effect indicators from CalEnviroScreen 3.0 (3.0 was the latest data when the 2021 State HCD/TCAC Opportunity Maps were created): ozone, PM2.5, diesel particulate matter, drinking water, pesticides, toxic release, traffic, cleanup sites, groundwater threats, hazardous waste, impaired water bodies, and solid waste sites. This methodology produces a distinctly different map than one composed of CalEnviroScreen scores, which additionally account for health and socioeconomic factors (e.g., Jack London Square has a lower, or better, CalEnviroScreen Score of 55 than the adjacent Chinatown census tract, which scores 91, because the latter tract's population experiences higher socioeconomic burdens, such as the lack of health care, which could lead to more emergency room visits for asthma). Therefore, the State HCD/TCAC Opportunity Areas - Environmental Score map purely reflects environmental exposure and is not weighted in any way; the Economic and Education HCD/TCAC Opportunity Maps account for many of the socioeconomic factors that CalEnviroScreen scores do. Therefore, the State HCD/TCAC Opportunity Areas - Composite Score map will appear more similar to a CalEnviroScreen score map than the Environmental Score map.

As shown in Figure D-14, the least positive outcomes are along the coastal edge of the city, adjacent to the industrial Port areas and I-880. Nearly all of West Oakland, which is bounded by freeways on all sides and includes and is adjacent to industrial areas, falls into the least positive environmental outcomes. Downtown tracts that include or are immediately adjacent to freeways are also among the least positive outcomes. The Hills, which include and abut regional parkland, and some adjacent census tracts, are associated with more positive environmental outcomes, but there are additional tracts scattered throughout the city, not adjacent to parkland, that also are among the more positive

outcomes. Some of the tracts associated with the lowest economic and education outcomes, such as those in East Oakland adjacent to International Boulevard, are among the tracts with the best environmental outcomes. While this is surprising, this is where it is important to consider that this environmental score does not account for the socioeconomic and health factors that the CalEnviroScreen scores do. It should also be noted that CalEnviroScreen extrapolates and models much of their data – some low pollutant scores may be due to the lack of a nearby air monitoring system. Outside of the Hills tracts, which get an environmental score boost from including or being adjacent to parkland, scores for tracts that include or are adjacent to freeways appear to be ultimately more negatively impacted than tracts that do not include freeways, which is why some Deep East Oakland tracts that are not near freeways have better environmental scores than I-580-adjacent tracts in the Grand Lake area.

According to Figure D-14, those living in R/ECAPs have limited access to environmental opportunity; all West Oakland R/ECAPs are associated with the least positive environmental outcomes, and those in Downtown fall into the two lowest environmental outcome categories. East Oakland R/ECAPs have mixed access to environmental opportunity, ranging from the lowest to the highest outcomes. However, these results must be considered along with the race/ethnicity-based data presented earlier in this section (Chart D-6). Even if some East Oakland tracts are associated with more positive environmental outcomes, BIPOC individuals living in these communities still carry a larger pollution burden.

Persons with disabilities may have varied access to environmental opportunity, depending on where they live. Recalling the map showing which tracts have higher concentrations of persons with disabilities (Figure D-3), those who live in the Piedmont Avenue area are in tracts associated with more positive environmental outcomes, while those in West Oakland are in tracts associated with less positive environmental outcomes (Figure D-14). Those living in Downtown are in tracts that fare slightly better environmentally than the West Oakland tracts. Again, however, the environmental health disparities associated with race/ethnicity (Chart D-6) must be considered along with disability status.

Female-headed households with children may have varied access to environmental opportunity, depending on where they live. Recalling the map showing which tracts have higher concentrations of female-headed households with children (Figure D-5), tracts in West Oakland are associated with less positive environmental outcomes, while tracts in Downtown fare slightly better environmentally (Figure D-14).

While more must be done to increase access to environmental opportunity for protected groups, some long-overdue actions have recently been taken to reduce disparities in exposure to air pollution. East and West Oakland are both identified as areas disproportionately impacted by air pollution under the Community Air Protection Program (Assembly Bill [AB] 617). California Air Resources Board (CARB) adopted the West Oakland Community Action Plan (WOCAP) action plan on December 5, 2019, which identified 89 potential community-level strategies and control measures intended to reduce criteria pollutant and TAC emissions and decrease West Oakland residents' exposure to these TAC emissions. Specifically, the plan sets forth equity-based targets for cancer risk, and DPM and $PM_{2.5}$ concentrations in seven "impact zones" with the highest pollution levels in the City.[16] On February 10, 2022, CARB designated East Oakland for the development of an AB 617

[16] Bay Area Air Quality Management District and West Oakland Environmental Indicators Project, 2019. Owning Our Air: The West Oakland Community Action Plan – Volume 1: The Plan, October. Available at http://www.baaqmd.gov/community-health/community-health-protection-program/west-oakland-community-action-plan, accessed January 2021.

Community Emission Reduction Plan which will begin in the spring and summer of 2022 and continue for a year-long planning process followed by implementation.

In conjunction with this Housing Element Update, the General Plan Update will also include a new Environmental Justice Element, which will address Oakland's environmental justice issues in more detail.

As is evident in this section, there is limited utility in assessing access to opportunity using the State HCD/TCAC Opportunity Maps alone. The environmental map does not effectively underscore the environmental justice issues that BIPOC communities face in Oakland, and labeling census tracts as "Low Resource" or "High Segregation and Poverty" disregards the fact that many communities of color in Oakland are vibrant, ethnic enclaves that deserve the investment that higher resource areas have received and benefited from. It is not enough to shuttle children living in Low Resource/High Segregation and Poverty tracts to higher-performing elementary schools across the City or simply to build more affordable housing in higher resource areas; while the solution may include these strategies, place-based investments in BIPOC communities must be the priority so that existing residents who want to stay where they are have the ability to do so while being able to benefit from access to economic, educational and environmental opportunity.

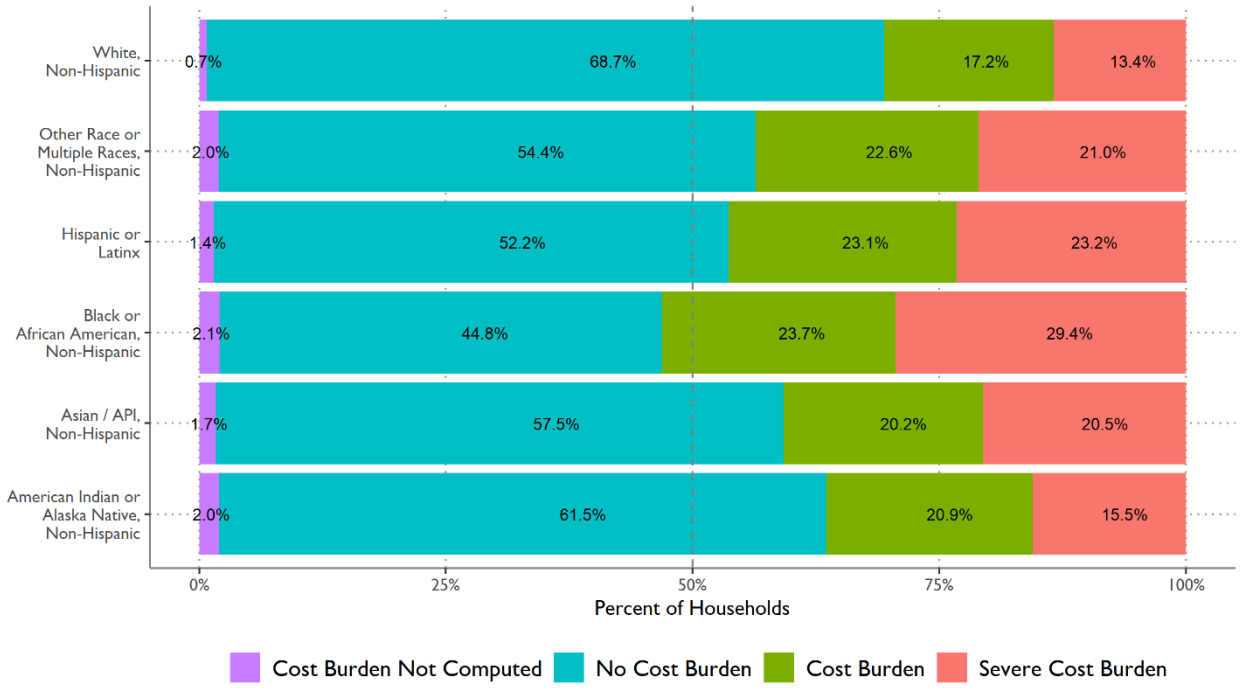
D.5 Disproportionate Housing Needs and Displacement Risk

According to State HCD's AFFH Guidance Memo, disproportionate housing needs "generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area." Consistent with State HCD guidance, this analysis evaluates disproportionate housing need through the assessment of cost burden, overcrowding, displacement risk, publicly assisted housing, substandard housing, and homelessness.

COST BURDEN

Households paying more than 30 percent of their income on housing costs are considered cost burdened, while those paying more than 50 percent are considered severely cost burdened. Cost burden among homeowners and rents in Oakland is discussed in depth in Appendix B, the Housing Needs Assessment. Here, cost burden is examined by race/ethnicity. Rates of cost burden, severe or otherwise, are highest for non-Hispanic Black or African American households, followed by Hispanic or Latinx households. Cost burden, severe or otherwise is lowest for non-Hispanic white households, followed by American Indian/Alaska Native households (Chart D-7). As described in Table B-31b in the Housing Needs Assessment, while cost burden in Alameda County and the Bay Area region are comparable, cost burden in Oakland is higher than in the County and region. In particular, more Oakland households are severely cost-burdened (20.9 percent) than in the County (17.1 percent) or region (16.8 percent). Several factors result in Oakland experiencing higher cost burdened than the county and regional average, including a higher percentage of households that make less than the area median income, a higher share of very low income households, a higher percentage of single and two-person households, and, although comparatively lower in other cities and regions, a very high median renter costs. More information on these factors is available in Appendix B.



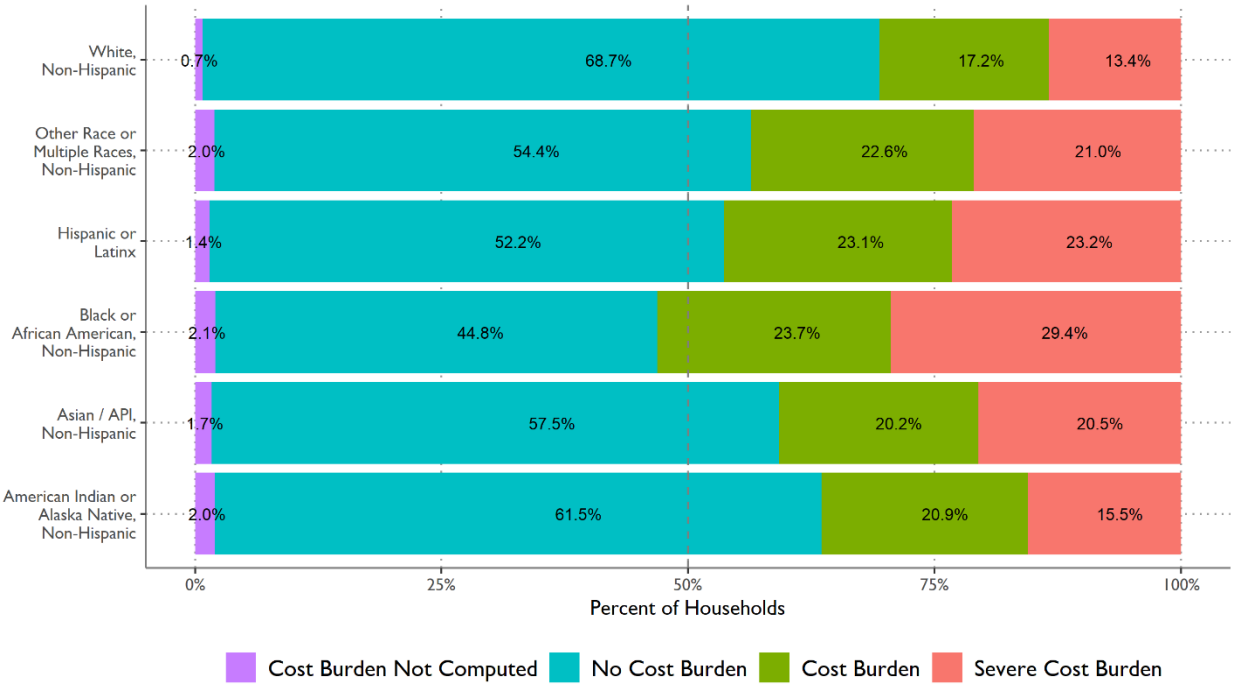


Chart D-7: Cost Burden by Race in Oakland, 2013-2017

Source: ABAG-MTC Housing Needs Data Workbook (U.S. Department of Housing and Urban Development (HUD). Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release)

Figures D-15 and D-16 show the geographic distribution of cost burden in Oakland for owner- and renter-occupied households, respectively. Rates of households experiencing cost burden—among both renters and owners—do not exceed 80 percent in any one census tract.[17] The lowest levels of renter cost burden (less than 20 percent) are in Rockridge, the North Oakland Hills, and one tract south of Piedmont. The lowest levels of homeowner cost burden (less than 20 percent) are located in two North Oakland tracts and two West Oakland tracts. The highest rates (60-80 percent) of both homeowner and renter cost burden are located in East Oakland, plus a couple additional tracts experiencing high homeowner cost burden in the Jack London District and the Grand-Lake neighborhood. Renter cost burden skews higher than homeowner cost burden, with most tracts having over 40 percent cost burden for renters.

[17] The State HCD AFFH Data and Mapping Tool provides cost burden data in quintiles, with over 80 percent representing the highest concentration of cost burden possible. This should not be interpreted as a threshold, but rather a natural break in the data.

OVERCROWDING

~~The~~Appendix B, the Housing Needs Assessment ~~chapter,~~ discusses overcrowding in detail, but here the geographic component of overcrowding is examined. The highest tract-level rates of overcrowding were found in the East Oakland flatlands, notably in Fruitvale and other tracts along International Boulevard near the Coliseum (Figure D-17). All tracts experiencing some level of overcrowding higher than the statewide average are also tracts identified by State HCD/TCAC as Low Resource or High Segregation and Poverty areas. Recalling Figure D-1B, most tracts experiencing higher levels of overcrowding (more than 15 percent of households) have a predominant Hispanic or Latinx population, though a few tracts have a predominant Black or African-American population, one has a predominant Asian population, and one tract is the sole census tract in Oakland without a predominant race/ethnicity (in the Bancroft-Havenscourt neighborhood).

As noted in the Housing Needs Assessment, Oakland experiences slightly higher rates of overcrowding (8.41 percent) than the county (7.87 percent) or the region (6.9 percent). Overcrowding disproportionately impacts renters (11.5 percent), lower-income households (6.48 percent of extremely-low-income, 8.69 percent of very-low-income, and 7.3 percent of low-income), Hispanic or Latinx households (24.5 percent), and multiple or other race households of any ethnicity (22.0 percent).

DISPLACEMENT RISK

As housing costs increase, lower-income households may be displaced from their neighborhoods, whether this is due to landlord action or market changes. In Oakland, communities of color are particularly impacted by this dynamic.

The City's 2021 East Oakland Mobility Action Plan reported significant racial displacement of Black and Asian American populations from 2000 to 2018 in former ethnic enclaves. Black residents faced the largest decline and are no longer the majority population in the Black ethnic enclaves. For example, from 2000 to 2018, the Black population in Eastmont experienced a 53% decrease. During the same period these same neighborhoods experienced significant increases in higher income white population. There was an unprecedented rise in rent while median renter household income for Black, Asian, and Latinx households decreased. While East Oakland renters had previously maintained relative housing affordability, big spikes in housing unaffordability occurred from 2013 to 2018. By 2018, East Oakland renters making the median renter household income would have to pay 81% of their income to afford median rents in their neighborhoods, compared to 65% citywide. Current racialized displacement and housing unaffordability are directly linked to predatory sub-prime lending and foreclosures in the 2000s that removed the safety net of homeownership stability and equity. Many of the Black ethnic enclaves had Black homeownership rates higher than citywide rates until the foreclosure crisis which was concentrated in East and West Oakland flatland areas. Today, many of the East Oakland neighborhoods, especially the once Black ethnic enclaves, have higher homelessness risks than citywide, reflecting the lasting impact of the foreclosure crisis and ongoing displacement across East Oakland.

Stanford University's Changing Cities Research Lab performed an in-depth investigation of Oakland residential instability in 2021 and found that West and East Oakland were disproportionately affected.[18] Key findings include:

- Eviction filing rates in 2018-2019 were highest in the southern parts of West Oakland, as well as in pockets of East Oakland; however, eviction filing locations did not align fully with the spatial distribution of moves among lower-socioeconomic-status residents. Rather, eviction filings were likely being used as a tactic to collect rent. Residents are likely experiencing informal forms of displacement that instigate moves.
- Unregistered rentals as of July 2020 were highest in West and Deep East Oakland, two areas that were hit hard by the foreclosure crisis and underwent the most disinvestment during the Recession.
- Tax delinquent properties, owners of large numbers of properties, and code violations are most prevalent in Deep East and West Oakland.

These findings underscored a need for preservation and protection strategies in Deep East Oakland and pockets of West Oakland, which have majority BIPOC populations, long histories of disinvestment and are at high risk of renter vulnerability. These findings also highlighted a need to

[18] Hwang, Jackelyn, and Vineet Gupta 2021. 'Residential and Neighborhood Instability in Oakland." Available at https://ccrl.stanford.edu/publications/residential-and-neighborhood-instability-in-oakland (accessed November 2022).

monitor vulnerable areas for disinvestment and residential instability, especially in the wake of the COVID-19 pandemic.

The State HCD AFFH Data and Mapping Tool also provides information related to neighborhood displacement risk. This includes "sensitive communities" typologies developed by UC Berkeley's Urban Displacement Project (UDP) to quantify the risk of displacement within a community.[19] Sensitive communities are those with populations vulnerable to displacement due to increased redevelopment and drastic shifts in housing cost. Figure D-18 shows that most of Oakland is vulnerable to displacement, except the Oakland Hills, Rockridge, Temescal, and neighborhoods surrounding the City of Piedmont. The 2020 AI noted that between 2010 and 2017, Black, Hispanic, and Asian or Pacific Islander residents were all being displaced in Oakland and replaced by white residents at a census tract level. Recalling racial/ethnic demographic data from Section D.2, the Black population was the only racial/ethnic group in Oakland to experience a net loss in population from 2010 to 2019. However, other racial/ethnic groups are also being displaced, but perhaps to other locations within the City. This data might also reflect that as lower-income residents of certain racial/ethnic groups are displaced from Oakland, higher-income residents of the same racial/ethnic groups are replacing them.

From the 2020 AI survey distributed to residents across Alameda County, 28 percent of Hispanic respondents say they have been displaced in the last five years and 25 percent of Black respondents say that they have been displaced in the same period. The primary reason for displacement, according to the survey results, is that rent became unaffordable (56 percent of those displaced). This experience is validated by a 2019 study by the UDP which found that census tracts in the region that experienced a 30 percent increase in the median rent also experienced a decrease of 28 percent of low-income households of color.

UDP provides useful information in examining displacement risk at the tract level. Table D-7 describes the criteria used to develop neighborhood typologies.[20] Table D-8 provides the number of households at displacement risk in 2018, broken down by owner-occupied vs renter-occupied. More renters than owners are living in tracts susceptible to or experiencing displacement and gentrification. Nearly half of all households in Oakland, regardless of tenure, live in tracts at risk of or experiencing gentrification, while almost a quarter live in tracts susceptible to or experiencing displacement. This is greater than the region as a whole—according to UDP, "As of 2018, over 10% or 161,343 low income households (households making below 80% of AMI) lived in areas at risk of or currently experiencing gentrification. Nearly half of these households live in either Alameda or San Francisco counties."

Figure D-19, the map that corresponds with Tables D-7 and D-8, illustrates where these neighborhoods are located by typology. Exclusive areas are all clustered in/around the North Oakland Hills, while most of the northwestern tracts of Oakland, including Downtown, are in varying stages of gentrification or at risk of gentrification, and most tracts in the East Oakland flatlands are either low income/susceptible to displacement or at risk of gentrification, with one tract experiencing ongoing displacement. Only a handful of tracts in Oakland are considered Stable Moderate/Mixed Income, which UDP defines as neighborhoods that are not experiencing housing

[19] Urban Displacement Project, SF Bay Area – Gentrification and Displacement, 2021, available at https://www.urbandisplacement.org/maps/sf-bay-area-gentrification-and-displacement/.

[20] It should be noted that this data is several years old and does not capture all factors of neighborhood change – not all Oakland neighborhoods experiencing displacement may be captured in UDP's model.

market pressures characteristic of the rest of the country, so the displacement of low-income residents is rare.

Regionally, sensitive communities are concentrated in coastal census tracts in Contra Costa, Alameda, and San Francisco County. The cities of Vallejo, Richmond, Berkeley, San Leandro, Oakland, and San Francisco are shown to have the highest number of sensitive communities, meaning these communities are at the highest risk of experiencing the displacement of existing established communities. UDP also identified that many parts of the Bay Area region, nearly 30% of all tracts, are either at risk or becoming exclusive to low income households. Exclusive tracts are concentrated in suburban counties, including Marin and San Mateo, but also include enclaves in Oakland, Berkeley, and San Francisco.

Table D-7: Gentrification and Displacement Census Tract Typologies, 2018

Typology	*Criteria*
Low-Income/Susceptible to Displacement	• Low- or mixed-income tract in 2018
Ongoing Displacement of Low-Income Households	• Low- or mixed-income tract in 2018 • Absolute loss of low-income households, 2000-2018
At Risk of Gentrification	• Low or mixed-income tract in 2018 • Housing affordable to low- or mixed-income households in 2018 • Did not gentrify 1990-2000 or 2000-2018 • Marginal Change in housing costs or Zillow home or rental value increases in the 90th percentile between 2012-2018 • Local and nearby increases in rent were greater than the regional median between 2012-2018 or the 2018 rent gap is greater than the regional median rent gap
Early/Ongoing Gentrification	• Low or mixed-income tract in 2018 • Housing affordable to low- or mixed-income households in 2018 • Increase or rapid increase in housing costs or above regional median change in Zillow home or rental values between 2012-2018 • Gentrified in 1990-2000 or 2000-2018
Advanced Gentrification	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Marginal change, increase, or rapid increase in housing costs • Gentrified in 1990-2000 or 2000-2018
Stable Moderate/Mixed Income	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018
At Risk of Becoming Exclusive	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Marginal change or increase in housing costs
Becoming Exclusive	• Moderate-, mixed-moderate-, mixed-high-, or high-income tract in 2018 • Housing affordable to middle-, high-, mixed-moderate-, and mixed-high-income households in 2018 • Rapid increase in housing costs • Absolute loss of low-income households, 2000-2018 • Declining low-income in-migration rate, 2012-2018 • Median income higher in 2018 than in 2000
Stable/Advanced Exclusive	• High-income tract in 2000 and 2018 • Affordable to high- or mixed-high-income households in 2018 • Marginal change, increase, or rapid increase in housing costs

~~PUBLICY~~PUBLICLY ASSISTED HOUSING

The Oakland Housing Authority (OHA) provides publicly assisted housing to residents of Oakland. According to OHA's Draft Fiscal Year 2023 Making Transitions Work Annual Plan, OHA's housing inventory includes public housing (1,454 units), Project-Based Section 8 vouchers (4,973 allocated units), Housing Choice Vouchers and other HUD programs (15,168 units), and other local programs (1,910 units). According to Figure D-20, most public housing units are concentrated in Downtown, West Oakland, and the Coliseum area, primarily in tracts designated by TCAC as Low Resource or High Segregation and Poverty, though there are a few units located in Moderate and High Resource areas, with none in Highest Resource areas. Housing Choice Voucher use follows a similar pattern. Subsidized housing, such as Project-Based Section 8, is more distributed throughout Oakland, found in all opportunity areas except those designated Highest Resource, but most is clustered in Downtown and West Oakland (California Housing Partnership, 2021).[21] According to the 2020 AI, across Alameda County, BIPOC populations (excluding Hispanic and Latinx) are overrepresented in publicly assisted housing, with the Black and African American population composing the majority across all housing types.

[21] It should be noted that the State HCD AFFH Data and Mapping Tool does not provide the most current information on Project-Based Section 8 vouchers and Housing Choice Vouchers – existing patterns of geographic distribution may differ from data provided by the State.

Figure D-20: Subsidized and Public Housing and Housing Choice Vouchers, 2021
Source: HCD AFFH Data and Mapping Resources, 2021

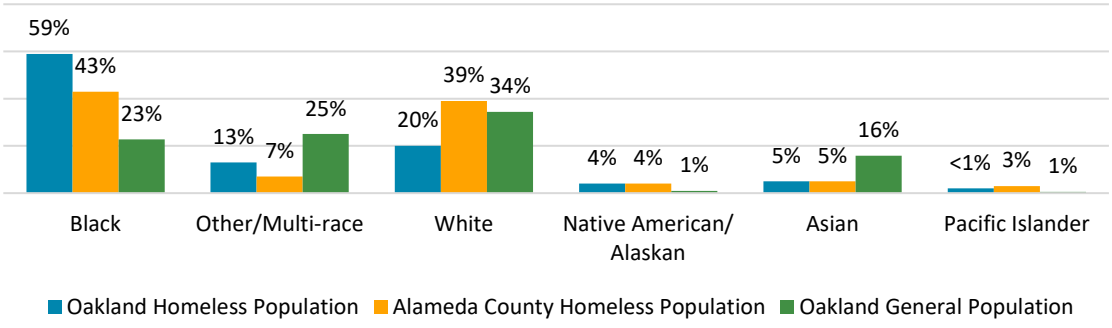
SUBSTANDARD HOUSING

The condition of the housing stock, including the age of buildings and units that may be in substandard condition, is also an important consideration in a community's housing needs. As summarized in the Housing Needs Assessment, about 80.4 percent of Oakland's housing stock was constructed prior to 1980 and is over 40 years old. About 8.0 percent of the housing stock has been constructed since 2000, with only 1.8 percent constructed since 2010.

A high proportion of older buildings, especially those built more than 30 years ago, may indicate that substantial housing conditions may be an issue. Housing is considered substandard when physical conditions are determined to be below the minimum standards of living, as defined by Government Code Section 17920.3. A building is considered substandard if any of the following conditions exist:

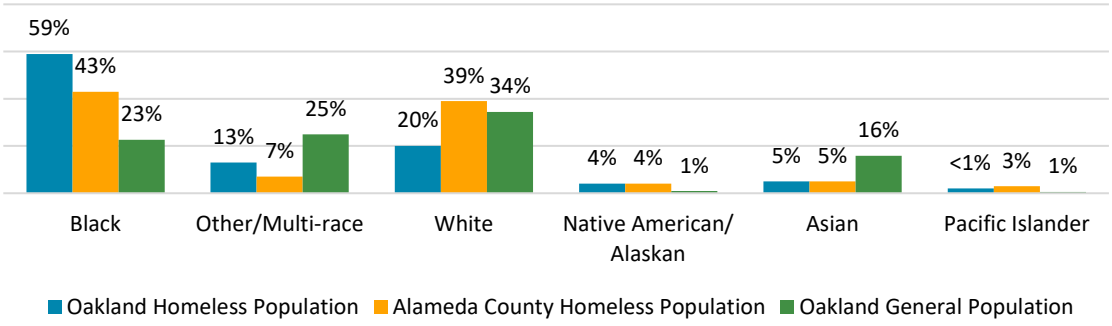
- Inadequate sanitation
- Structural hazards
- Nuisances
- Faulty weather protection
- Fire, safety, or health hazards
- Inadequate building materials
- Inadequate maintenance
- Inadequate exit facilities
- Hazardous wiring, plumbing or mechanical equipment
- Improper occupation for living, sleeping, cooking, or dining purposes
- Inadequate structural resistance to horizontal forces
- Any building not in compliance with Government Code Section 13143.2

Any household living in substandard conditions in considered in need of assistance, even if they are not actively seeking alternative housing arrangements. Estimating the number of substandard units can be difficult, but the lack of certain infrastructure and utilities can often be an indicator of substandard conditions. According to the 2018 Oakland Equity Indicators Report, 1.36 percent of housing units in zip codes that were more than 60 percent non-white reported housing habitability complaints, compared to 0.67 percent of housing units in zip codes that were more than 60 percent white. In addition, according to 2019 ACS estimates compiled by ABAG-MTC, about 0.28 percent of owners lack complete kitchen facilities while 1.91 percent of renters do. Further, approximately 0.2 percent of owners lack complete plumbing facilities while 1.02 percent of renters do. In total, there are 837 occupied housing units with incomplete plumbing facilities and 3,514 units with incomplete kitchen facilities. During outreach, lower income residents in West and East Oakland indicated that they face unhealthy housing conditions including lack of heat, electrical issues, faulty plumbing, and exposure to mold and lead.



Further, the City's Building Bureau's Code Enforcement division summarizes inspections for blight, housing, and zoning-related issues. During Fiscal Year 2020 – 2021, there were 5,575 blight and building maintenance complaints in Oakland. While the City has not carried out a census of substandard housing, based on known substandard housing issues from the Building Bureau's documented housing complaints, approximately 3.5 percent of the city's housing stock is likely substandard.

HOMELESSNESS



Homelessness is a significant issue in Oakland. Nearly four out of five (79 percent) of the people experiencing homelessness in Oakland are unsheltered and live outdoors or in tents or vehicles, often along the city's streets and in our parks.

Point-in-Time (PIT) Counts are a common way to assess the number of persons experiencing homelessness in a jurisdiction. The PIT Count is a biennial (every two years) census of sheltered and unsheltered persons within a Continuum of Care (CoC) area completed over a 24-hour period~~.~~\.[22] On February 23, 2022 (the date of the last Alameda County Point-in-Time count), there were a total of 9,747 persons experiencing homelessness in the County, 5,055 of whom were in the City of Oakland. In Alameda County, this is an increase of 1,~~725~~275 people (22 percent) from the ~~8~~28,022 unhoused individuals who were counted in 2019. These numbers ~~also~~ represent ~~a~~an unprecedented 24 percent increase in total homelessness in Oakland and a four percent increase in unsheltered homelessness ~~in Oakland~~ since 2019. These numbers account for only a fraction of the people who become homeless over the course of a year. When disaggregated by race, as shown in Chart D-8, the ~~2022~~202 PIT Count shows that there is a disproportionate representation of Black individuals experiencing homelessness. Those who identify as Black or African American (Hispanic and non-Hispanic) represent 70 percent of Oakland's unhoused population, but only 23 percent of the overall population. Additionally, those identify as American Indian or Alaska Native (Hispanic and non-Hispanic) are also represented disproportionately among the unhoused population, as they make up 4 percent of homeless Oakland residents but less than one percent of its overall population. Asian/API, White, and those who identify as some other race or multiple races are all underrepresented among the homeless population compared to their share of the overall population. However, it is noted that data from HUD does not separately distinguish Hispanic/Latinx as a racial group, so those identifying as Hispanic/Latinx may be counted under any of the other racial groups. When considering ethnicity alone, Hispanic/Latinx individuals made up ~~16~~13 percent of Oakland's homeless population and ~~25~~17 percent of Alameda County's homeless population, while 27 percent of Oaklanders identify as Hispanic/Latinx (of any race).

Chart D-8: Point-in-Time Count of the Homeless Population in Oakland, ~~2022~~2019 by Race

[22] Due to this method, community advocates and local datasets often have a more comprehensive, better understanding of the unhoused population and describe higher numbers of unhoused people than what is reported in PIT Counts.

Note: Because Hispanic/Latinx origin is tracked as an ethnicity rather than a racial group, data shown above may include Hispanic/Latinx populations.

Source: City of Oakland Homeless Count & Survey Comprehensive Report Applied Survey Research Housing Instability Research Department, 2019; ACS 5-Year Estimates, 2019

The increase in homeless residents over the past five years has resulted in a significant rise in the number of homeless encampments; the City estimates that at least 140 encampments are scattered throughout the city.[23] In 2017, the City established the Encampment Management Team (EMT) to address the physical management of homeless encampments and establish criteria for determining the types of interventions to undertake at encampments. In April 2021, the City of Oakland Office of the City Auditor conducted a performance audit of the City's homeless encampment management interventions and activities, including activities by the EMT. This report highlighted the need to establish and fund a formal encampment management program to implement an effective management system for the City's new encampment policy passed in October 2020.

A substantial proportion of the homeless population in Oakland includes formerly incarcerated individuals. According to the City's updated Permanent Access to Housing (PATH) framework, systemic barriers often prevent residents who are returning home from incarceration from living with family members and/or accessing both public and private rental housing and employment opportunities. Additionally, the longer one is homeless the worse one's health becomes, the more likely family and friendship networks are frayed, and the harder it becomes to obtain, maintain, and sustain stable housing.

In addition to the barriers associated with returning home from incarceration, other main drivers of homelessness in Oakland include:

- Structural racism
- Insufficient controls on the rental housing market that create vulnerability and housing instability for tenants
- Insufficient housing units that are affordable to households with the lowest incomes, including particularly those whose incomes are below 20% of Area Median Income (AMI)
- Inadequate pay and benefits for many of the jobs that are available in the community, and insufficient access to quality employment opportunities that pay wages that meet the cost of housing

The PATH Framework organizes strategies to address homelessness under three major themes:

- Prevention strategies to keep people from becoming homeless;
- Emergency strategies to shelter and rehouse households and improve health and safety on the street and;
- Creation of affordable, extremely-low-income, and permanent supportive housing units prioritized for households experiencing homelessness.

Additional actions the City takes to provide shelter and permanent supportive housing for unhoused people, as well as potential constraints, are discussed in Appendix F. Further prioritization of permanent housing policies in the PATH Framework should be adopted to fully meet the needs of unhoused residents. These actions are described in the Housing Action Plan.

~~D.6~~D.6 Housing Sites Inventory Analysis

Tables D-9 though D-15 provides a summary of analysis that includes the number of units per site by income group for each of the AFFH categories relative to the impacts on patterns of disproportionate housing needs.[24] The tables analyze the following categories:

Black, Indigenous, and People of Color Concentration: The analysis evaluates the number of units in the Site Inventory that are in areas where the average of tracts across the City are comprised of people of color. Conversely, this also measures how units are distributed in predominantly white census tracts. Averaged across all census tracts, the average percentage of people of color is approximately 69 percent. Tracts higher than this average have greater percentages of people of color; tracts below this average have greater percentages of white people. Overall, 41 percent of all units added in tracts with a greater white population than the Citywide average include lower and moderate-income housing. In tracts with higher percentages of people of color, lower and moderate income housing units are approximately 47 percent of all units in these tracts. Coupled with housing actions that protect Oakland residents from displacement (policies and actions under Goal 1) and promote opportunities for homeownership (actions under Policy 5), the sites inventory makes progress in addressing racial inequities related to housing.

Table D-9: Number of Units with Above or Below Citywide Average Concentrations of Black, Indigenous, and People of Color

	Lower Income Units	*Moderate Income Units*	*Above Moderate Income Units*
Tracts below citywide average = **50**	1,957	937	4,198
Tracts above citywide average = **63**	8,979	4,252	15,144

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

TCAC Opportunity Area: This analysis estimates the number of units in each TCAC opportunity area, including racially/ethnically concentrated areas of poverty. Generally, the sites inventory adds more housing in moderate and higher resource areas and avoids concentration of lower income units in high-segregation and poverty areas, consistent with direction to affirmatively further fair housing. As shown in Table D-10, the sites inventory adds most units to High Segregation/Poverty, Low, Moderate TCAC areas, which is consistent with the bulk of developable area in Oakland being classified as Low and Moderate opportunity (see Table C-22 in Appendix C for more information). The inventory avoids concentrating lower income units in areas of high segregation and poverty, while also providing additional homes affordable to these incomes. Approximately 47 percent of units added in the highest resource areas are affordable to lower and moderate incomes; however, about a third of units are affordable to lower and moderate incomes in high resource tracts. This is due to significant environmental constraints, including wildfire hazard, that limit siting of lower

[24] This analysis does not reflect the 90 percent capacity modifier on "other potential projects" as described in Appendix C as the modifier is not site-specific; however, the percentage remains proportional.

income sites in these areas. However, the Housing Action Plan also includes a number of policies and actions to increase housing in higher opportunity areas. In particular, the Affordable Housing Overlay Zone action would create much broader opportunities for the construction of affordable housing in high resource areas, even if the underlying zoning would impose density maximums that limit the feasibility of affordable housing development.

Table D-10: Number of Units in Each TCAC Opportunity Area

	Lower Income Units	*Moderate Income Units*	*Above Moderate Income Units*
High Segregation/Poverty (RE/CAPs)	2,457	1,206	3,651
Low	5,292	2608	8045
Moderate (rapidly changing)	114	144	402
Moderate	2,303	1,067	5,656
High	477	130	1,214
Highest	293	34	374

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Areas of Affluence: This analysis estimates the number of units in areas of affluence. There are 16 census tracts in Oakland that are designated as RCAAs. The sites inventory adds 3,080 housing units to these areas of affluence, as shown in Table D-11. Consistent with findings above, areas of affluence are primarily in very high fire hazard severity zones and in areas with steep slopes. As such, there are limited opportunities to add lower and moderate income housing to certain affluent areas of Oakland. However, the sites inventory makes a concerted effort to locate housing in the Rockridge area, which includes good access to transit, amenities, and opportunity, Adding approximately 1,089 lower and moderate income units to these areas.

Table D-11: Number of Units in Areas of Affluence

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
RCAA tracts	842	247	1,991

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Lower- or Moderate-Income population: The analysis evaluates number of units in census tracts based on percentage of lower- or moderate-income population. Averaged across all census tracts, the average percentage of lower or moderate-income populations in Oakland census tracts is approximately 57 percent. As shown in table D-12, the inventory locates more lower and moderate-income housing sites in these areas accordingly. This helps to alleviate cost. While a greater number of above moderate units are located in areas with higher rates of lower- or moderate-income people, a number of goals, policies, and actions in the Housing Action Plan, including actions 1.1.1 through

1.1.14 under Policy 1: Tenant Protections and Anti-Displacement, reduce displacement pressures that may be associated with these units.

Table D-12: Lower or Moderate Income Population

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
Tracts below citywide average (lesser percentage of lower and moderate-income population) = 47	1,957	937	4,198
Tracts above citywide average (greater percentage of lower and moderate-income population) = 66	8,979	4,225	15,100

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Rent Burden: Also linked with lower or moderate-income populations is cost burden. Averaged across all census tracts, the average percentage of rent burdened populations is approximately 47 percent. Similar to table D-12, the inventory adds a greater proportion of lower and moderate-income sites in areas that experience greater rent burden, as shown in Table D-13. For tracts above the citywide average, approximately 49 percent of all units added in these areas are affordable to lower and moderate incomes.

Table D-13: Number of Units Where Tracts are Below or Above Citywide Rent Burden Rates

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
Tracts below citywide average = **52**	3731	1,744	8,186
Tracts above citywide average = **61**	7,205	3,418	1,1112

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Overcrowding: As shown in Table D-14, the distribution of units in areas both above and below the citywide average for overcrowding is about equal, despite there being a greater number of census tracts that fall above the citywide average. Averaged across all census tracts, the average percentage of households experiencing overcrowding is approximately six percent. While the location of sites in the inventory will not likely move the needle on overcrowding, the inventory would help address two associated AFFH considerations, including housing needs of lower-income and moderate-income people, in addition to those who are cost burdened.

Table D-14: Number of units in areas where there are rates of overcrowding and/or severe overcrowding greater than the citywide average

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
Tracts below citywide average = **44**	5,347	2,477	10,120
Tracts above citywide average = **69**	5,589	2,685	9,178

Source; Source: City of Oakland, 2022; State HCD AFFH Data and Mapping Resources (HCD & TCAC Opportunity Areas Mapping Analysis, 2021); Dyett & Bhatia

Displacement: As described above, there are several tracts in Oakland that experience displacement pressure. As shown in Table D-15, the sites inventory adds a substantial number of lower and moderate-income units to areas that are susceptible to displacement, at risk of gentrification, and areas at risk of gentrification. While the inventory adds above-moderate income housing to tracts that are experiencing gentrification, Housing Action Plan policies 1.1.1-1.1.14 help to protect tenants and prevent displacement in these areas.

The inventory also adds an equal mix of lower and moderate-income housing to stable mixed income communities. While about 71 percent of lower and moderate income housing units added to "becoming exclusive" sites, indicating location of housing in more moderate- and higher-resourced areas, the inventory does not add a significant amount of lower and moderate-income units in advanced exclusive tracts. These tracts, as described above, are in high fire hazard severity zone areas.

Table D-15: Number of units added in areas as defined by the Urban Displacement Project.

-	*Lower Income Units*	*Moderate Income Units*	*Above Moderate Income Units*
Low-income/susceptible to displacement	4,065	1,570	2,744
Ongoing displacement of low-income households	0	0	7
At risk of gentrification	3,485	1,920	7,462
Early ongoing gentrification	1,506	1,003	5,190
Advanced gentrification	581	306	1,412
Stable moderate/mixed income	1,011	198	1,327
At risk of becoming exclusive	1	0	342
Becoming exclusive	134	61	79
Stable/advanced exclusive	48	7	348
Unavailable or Unreliable Data	106	124	415

D.7 Summary and Conclusions

State law requires that jurisdictions identify fair housing issues and their contributing factors and assign a priority level for each factor. Further, each jurisdiction must identify specific goals and actions it will take to reduce the severity of fair housing issues within it. Goals, actions, and priorities related to affirmatively furthering fair housing can be found in the Housing Plan of this Housing Element. Oakland will also continue to implement its 2015 goals described in the 2020 AI.

Based on the findings of this assessment and the 2020 AI, Table D-9 presents a summary of existing fair issues, their contributing factors, and their priority level, as well as actions to take. Contributing factors with a high priority level are those that the City can directly address, while medium factors are either those that are longer term problems the City is working on or otherwise has limited ability to address.

Table D-9: Fair Housing Issues, Contributing Factors and Proposed Actions, 2023-2031

Fair Housing Issue	*Contributing Factors*	*Priority Level*	*Goals and Actions*
Fair Housing Outreach and Enforcement	Lack of outreach and enforcement from both the private (nonprofit) and public sector	High	The City should continue to maintain adequate staffing levels to carry out the mandate to affirmatively further fair housing. The City should also increase residents' awareness of nonprofit fair housing service providers.
