

Homeless Housing, Assistance and Prevention Round 3 Application

Application Information

This Cognito platform is the submission portal for the Cal ICH HHAP-3 Application. You will be required to upload a full copy of the HHAP-3 Data Tables Template *and* enter information into the portal from specific parts of the HHAP-3 Local Homelessness Action Plan and Application Template as outlined below.

Please review the following HHAP-3 resources prior to beginning this application:

- HHAP-3 Notice of Funding Availability (NOFA)
- HHAP-3 Local Homelessness Action Plan & Application Template and
- HHAP-3 Data Tables Template

Application Submission for HHAP-3 Funding

Using the <u>HHAP-3 Local Homelessness Action Plan & Application Template</u> as a guide, applicants must provide the following information in the applicable form section (see *How to Navigate this Form*) to submit a complete application for HHAP-3 funding:

- 1. **Part I: Landscape Analysis of Needs, Demographics, And Funding**: the information required in this section will be provided in <u>Tables 1, 2, and 3 of the HHAP-3 Data Tables Template file</u> uploaded in the *Document Upload* section.
- 2. Part II: Outcome Goals and Strategies for Achieving Those Goals: the information required in this section will be provided in <u>Tables 4 and 5 of the HHAP-3 Data Tables Template file</u> uploaded in the *Document Upload* section, <u>AND</u> copy and pasted into the fields in the *Outcome Goals and Strategies* section of this application form.
- 3. **Part III: Narrative Responses:** the information required in this section will be provided by <u>entering</u> <u>the responses to the narrative questions</u> within the *Narrative Responses* section of this application form. Applicants are <u>NOT</u> required to upload a separate document with the responses to these narrative questions, though applicants may do so if they wish. The responses entered into this Cognito form will be considered the official responses to the required narrative questions.
- 4. Part IV: HHAP-3 Funding Plans: the information required in this section will be provided in Tables

<u>6, 7 (as applicable), and 8 of the HHAP-3 Data Tables Template file</u> uploaded in the *Document Upload* section.

5. Evidence of meeting the requirement to agendize the information in Parts I and II at a meeting of the governing board will be provided as <u>a file upload</u> in the *Document Upload* section.

How to Navigate this Form

This application form is divided into **five sections**. The actions you must take within each section are described below.

- **Applicant Information**: In this section, indicate (1) whether you will be submitting an individual or joint application, (2) list the eligible applicant jurisdiction(s), and (3) provide information about the Administrative Entity.
- **Document Upload**: In this section, upload (1) the completed HHAP-3 Data Tables Template as an Excel file, (2) evidence of meeting the requirement to agendize the local homelessness action plan and outcome goals at a regular meeting of the governing board where public comments may be received, and (3) any other supporting documentation you may wish to provide to support your application.
- **Outcome Goals and Strategies**: In this section, copy and paste your responses from Tables 4 and 5 of the completed HHAP-3 Data Tables Template.
- **Narrative Responses**: In this section, enter your responses from Part III of the HHAP-3 Local Homelessness Action Plan & Application Template.
- **Certification**: In this section, certify that the information is accurate and submit the application.

Prior to the submission deadline, you can save your progress in this application and come back to it later by clicking the save button. This will provide you with a link to the saved application, and there will be an option to email that link to the email address(es) of your choosing.

After submitting the application, you will not be able to make changes to your responses unless directed by Cal ICH staff.

I have reviewed the HHAP-3 NOFA and application template documents Yes

I am a representative from an eligble CoC, Large City, and/or County $\ensuremath{\mathsf{Yes}}$

Applicant Information

List the eligible applicant(s) submitting this application for HHAP-3 funding below and check the corresponding box to indicate whether the applicant(s) is/are applying individually or jointly.

Eligible Applicant(s) and Individual or Joint Designation

Joint

This application represents the joint application for HHAP-3 funding on behalf of the following eligible applicant jurisdictions:

Joint Applicants Selection

Eligible Jurisdiction 1

Eligible Applicant Name Humboldt County

Eligible Jurisdiction 2

Eligible Applicant Name CA-522 Humboldt County CoC

Click + Add Eligible Jurisdiction above to add additional joint applicants as needed.

Administrative Entity Information

Funds awarded based on this application will be administered by the following Administrative Entity:

Administrative Entity

County of Humboldt

Contact Person Robert Ward

Title rward@co.humboldt.ca.us

Contact Person Phone Number (707) 298-3499

Contact Person Email rward@co.humboldt.ca.us

Document Upload

Upload the completed <u>HHAP-3 Data Tables Template</u> (in .xlsx format), evidence of meeting the requirement to agendize the local homelessness action plan and outcome goals at a regular meeting of the governing body where public comments may be received (such as a Board agenda or meeting minutes), and any other supporting documentation.

HHAP-3 Data Tables

HHAP-3 Data Tables-Final 6.23.22.xlsx

Governing Body Meeting Agenda or Minutes

Humboldt County Board of Supervisors Agenda 6.14.22.pdf

Narrative Responses

Copy and paste your responses to Part III. Narrative Responses from the <u>HHAP-3 Local Homelessness</u> <u>Action Plan & Application Template</u> into the form below.

Question 1

A demonstration of how the jurisdiction has coordinated, and will continue to coordinate, with other jurisdictions, including the specific role of each applicant in relation to other applicants in the region.

Question 1 Response

The County of Humboldt has been designated by the CoC as the administrative entity for all Homeless Emergency Aid Program (HEAP) and Homeless Housing Assistance and Prevention (HHAP) allocations. All Homeless Coordinating & Financing Council (HCFC) funding allocated to the area is going to the County, which subcontracts with several nonprofit service providers as well as providing some HCFC-funded services itself. Due to the long distances between our population center around Humboldt Bay and any other population centers, Humboldt County is in its own region as far as the homeless response system is concerned. There are no other applicants in the region. However, the response below speaks to coordination between the

County of Humboldt and the CoC, and within the CoC.

Humboldt County has a robust network of coalitions and working groups that ensure and seek to further county-wide collaborative efforts. These groups are summarized in the below list and further description can be found in the narrative below:

- 1) Humboldt Housing and Homeless Coalition (HHHC) General meetings
- 2) HHHC Executive Committee meetings
- 3) Housing Trust Fund and Homeless Solutions Committee (HTFHSC)
- 4) City of Arcata Homelessness Services Leadership Working Group
- 5) City of Eureka Homeless Leadership Group

The Humboldt Housing and Homeless Coalition (HHHC) is the local name chosen for Humboldt County's federally designated Continuum of Care (CoC CA-522). The HHHC was formed in 2004. The HHHC is neither led nor operated by a single corporation, organization, or agency and does not have any staff. Instead, it utilizes a collaborative approach to ending homelessness. The HHHC has a general meeting every other month to share information, study contributing factors of homelessness, and discuss best practices with peer experts on how to ease homelessness in Humboldt County. The bi-monthly meetings usually also include representatives from local governments and Tribes, individual homeless activists and advocates, persons experiencing homelessness, local businesses, substance use treatment providers, health care providers, education, and the criminal justice system. Staff and logistical support are provided by the Humboldt County Department of Health & Human Services. These meetings are well-attended; there were over 70 individuals present at the May 2022 meeting.

In addition to the HHHC general meetings, held every other month, the HHHC Executive Committee (EC) meets every other week. The HHHC EC had a leadership role in the development of the HHAP-3 application and narrative; the team reviewed materials and advised on all sections required for the application.

Humboldt County has made numerous attempts to groundwork in evidence-based strategies and approaches. As detailed in Humboldt's 2019 Plan to End Homelessness, members of the HHHC organized a housing forum in 2006 that launched the development of a strategic plan to end homelessness in Humboldt County. In 2009, the HHHC adopted the first phase of that strategic plan. In 2011, the work of four subcommittees of the HHHC was consolidated and documented in Phase 2 of the strategic plan. The plan was then updated in 2013 and 2019. Also in 2013, the City of Eureka worked with Focus Strategies to

develop a homeless policy paper analyzing the extent of homelessness in the community, the effectiveness of existing homeless programs and

services, and recommended strategies to have a greater impact on the homeless problem in the community. The result of this work was the City of Eureka Homelessness Policy Paper (2014) and its overarching recommendation was that the community focus its efforts on solutions that will actually end homelessness, rather than attempting to better manage the problem.

The City of Eureka and the County of Humboldt then partnered to work with Focus Strategies to develop an implementation plan. In 2016, the County of Humboldt and the City of Eureka adopted a joint resolution to collaborate on reducing homelessness and support the Housing First Model. Community meetings convened by the HHHC in 2018 solicited public input to determine future priorities, information which was incorporated into the 2019 Plan to End Homelessness.

Goals and strategies identified in the aforementioned plans were source documents used to complete the data tables and narrative responses for the HHAP-3 homelessness action plan, along with key stakeholder interviews, review of point-in-time count and HMIS data (including baseline data provided by Cal-ICH), and policy recommendations related to homelessness from a variety of community partners.

In 2018, by Resolution No. 18-14, the Humboldt County Board of Supervisors established a Housing Trust Fund and Homelessness Solutions Committee (HTFHSC). The HTFHSC was established to "set criteria for 1) the receipt of funds into the Housing Trust Fund; and 2) the expenditure of funds derived from the Housing Trust Fund; and 3) to make recommendations for expenditures from the Affordable Housing Trust Fund; and 4) make recommendations on homelessness solutions."

The two largest cities in the county- Eureka and Arcata, both host monthly meetings focused on addressing the issue of homelessness. The City of Arcata hosts the Homelessness Services Working Group and the City of Eureka hosts the Eureka Homeless Leadership Workgroup. The Eureka Homeless Leadership Workgroup is an opportunity for elected officials, law enforcement, county departments, providers, non-profits and other community leaders working in the fields of housing and homelessness to share about current projects and initiatives. This allows for coordination of efforts and prevents duplication, and also ensures leaders can be knowledgeable about community-wide efforts when asked. The workgroup meetings are also a forum to begin or continue collaborative work on projects.

The Director of the Humboldt County Department of Health & Human Services (DHHS) participates in these meetings along with other community-based organizations working with the city. The purpose of these meetings is to support collaborative efforts between the county, the CoC, the cities, and community-based organizations that are working to end homelessness.

The County of Humboldt has successfully been awarded four Homekey grants, comprised of partners working collaboratively to expand housing for those experiencing homelessness or at risk for homelessness.

• Humboldt County / Providence Supportive Housing: 42 units (The Humboldt Inn, Eureka)

- Yurok Tribe / Arcata House Partnership: 18 units (Eureka)
- City of Arcata / Danco: 79 units (Red Roof Inn, Arcata)
- City of Arcata / Arcata House Partnership: 60 units (Days Inn, Arcata)

Question 2

A demonstration of the applicant's partnership with, or plans to use funding to increase partnership with:

• Local health care and managed care plans

- Public health systems
- Behavioral health
- Social services
- Justice entities
- People with lived experiences of homelessness
- Other (workforce system, services for older adults and people with disabilities, Child Welfare, education system)

Question 2 Response

The CoC Board (also referred to as the HHHC Executive Committee) is the steering committee that guides regional planning and spending decisions and includes representatives from the County, the Housing Authority, Tribal housing authorities, disability rights organizations, health care centers, the business community, rural service providers, youth service providers, veteran serving organizations, and nonprofit homeless service providers. The CoC Board includes two members with lived experience of homelessness, including one of the co-chairs. As mentioned above, the Executive Committee provided input and guidance to refine and articulate the outcome goals and associated strategies for the homelessness action plan.

In an effort to develop the homelessness action plan collaboratively with both key partners engaged in the HHHC and some of the traditionally less engaged partners such as those listed above, the County contracted with the California Center for Rural Policy (CCRP) at Cal Poly Humboldt to conduct one-on-one listening sessions to better understand partners' existing efforts as well as their perspective on gaps and unmet needs across the county. CCRP conducted 14 one-on-one conversations with representatives from behavioral health,

criminal justice and law enforcement entities, public health, social services, health providers, non-profit organizations, homeless advocates, organizations that serve individuals with disabilities, and representatives from the local education system. CCRP also spoke with representatives from the City of Arcata and the City of Eureka. The intention of these interviews was to enhance collaboration and gain insight into the various funding streams, priority areas, and the system gaps on the micro and macro level. CCRP will utilize elements of the HHAP-3 application and create an additional community report to disseminate the findings of these conversations.

Specifically, CCRP met one-on-one with the following partners referenced in Question #2:

- Humboldt County Probation Department
- Humboldt County Department of Health & Human Services, Behavioral Health Branch
- Partnership HealthPlan of California
- Providence St. Joseph Health System
- Humboldt County Office of Education
- Redwood Coast Regional Center
- Betty Kwan Chinn Homeless Foundation
- Arcata House Partnership
- City of Eureka
- City of Arcata
- Redwood Community Action Agency
- Affordable Homeless Housing Alternatives
- North Coast AIDS Project
- Dotti Russell, Advocate

CCRP also attended collaborative meetings with partners working on housing and homelessness

between March and May 2022. These meetings included:

• HHHC General Meetings (3/3/2022, 5/5/2022)

• HHHC Executive Committee Meetings (3/1/2022, 3/29/2022, 4/12/2022, 4/26/2022, 5/10/2022, 5/24/2022)

- Housing Trust Fund and Homelessness Solutions Committee (3/10/2022)
- City of Eureka Homeless Leadership Group (3/14/2022)
- City of Arcata Homelessness Services Leadership Working Group (3/16/2022)
- Humboldt Houseless Youth Support Collaborative (3/23/2022)
- Humboldt County Transitional Age Youth Collaborative- Youth Advisory Board (3/23/2022)
- Live Well Humboldt Housing & Homelessness Data Workgroup (4/7/2022)

The HHHC is coordinating with Partnership HealthPlan of California in the development of their Housing and Homelessness Incentive Program (HHIP) application. Representatives from Partnership HealthPlan of California are working collaboratively with the HHHC to align and integrate both plans so that HHIP funding will build off of the HHHC's existing plan to address unmet housing needs. Partnership has expressed the desire to take direction from the County and CoC for the use of the HHIP funds designated for Humboldt County. The County will share the grant narrative and data tables template with Partnership HealthPlan of California. The HHHC has also had representatives from Partnership attend two HHHC Executive Committee meetings

to share information and coordinate efforts.

Based on stakeholder interviews, input received at collaborative meetings, and a review of baseline data provided by Cal-ICH, additional plans to use funding to increase partnership with the entities listed in Question #2 include the following.

See response to Question #4 in the narrative for plans to support and expand partnerships to prevent exits to homelessness from institutional settings. Key partners in this effort will include criminal justice entities, behavioral health, medical providers, and non-profit organizations that provide supportive services and case management.

The county intends to use funding to support a co-located navigation center and day center in the City of Eureka.

A significant percentage of the CoC allocation will be used to fund permanent supportive housing and rapid rehousing, with a particular focus on linking underserved populations with housing and supportive services. Outreach funding will be used to strengthen coordination between street outreach efforts and pathways to permanent supportive housing.

See response to Question #3 for additional details about plans to partner with the Public Health Branch of the Humboldt County Department of Health & Human Services. The Community Health Improvement Plan (CHIP) identifies housing and homelessness as a key focus area and utilizes an equity lens to examine health disparities.

Based on input from stakeholders interviewed during the development of the application, the following populations were noted as underserved and/or as having needs that require specific accommodations:

- Individuals with significant medical and/or mental health needs
- Individuals experiencing substance use disorders
- Individuals who are criminal justice involved
- Individuals experiencing domestic violence
- LGBTQI+ youth and foster youth
- Individuals with physical mobility issues
- Individuals with a high degree of medical need or chronic health conditions

- Individuals with HIV/AIDS
- Seniors experiencing housing insecurity and/or homelessness
- Individuals with developmental disabilities

This should not be considered as an exhaustive or complete list of populations in the county experiencing homelessness that are underserved.

Across the board, stakeholders suggested that the current homeless response system does not have the capacity to adequately serve these populations, and that permanent supportive housing is very difficult to find for all individuals, but for these individuals in particular. These individuals need housing, and they need supportive services while they are trying to regain stability in their lives. This was one of the predominant themes in the stakeholder interviews, and solutions necessitate partners who can utilize funding to build the county's capacity to adequately serve these individuals. Support and collaboration from the partners who work with these individuals (i.e. law enforcement, Probation, hospitals, behavioral health, safe and sober living) will further those efforts. Data from the homeless point-in-time count also suggests that a significant percentage of the county's unsheltered population share one or more of these characteristics.

Question 3

A description of specific actions the applicant will take to ensure racial and gender equity in service delivery, housing placements, and housing retention and changes to procurement or other means of affirming racial and ethnic groups that are overrepresented among residents experiencing homelessness have equitable access to housing and services.

Note: These actions should be aligned with the equity-focused Outcome Goals and related strategies described in previous Parts, but should not need to be limited to those strategies.

Question 3 Response

The County includes an exhibit in all homeless assistance contracts that require all providers to abide by all fair housing laws, and the County has written policies requiring equal access and nondiscrimination in all programs it provides directly.

The HHHC will take the following specific actions to ensure racial and gender equity in service delivery:

1) Disaggregate existing data to examine service delivery, housing placement and housing retention by race and gender, and facilitate conversations with the CoC regarding strategies to reduce any identified disparities.

2) Analyze the prevalence of missing data related to race and gender in the point-in-time count data and HMIS data.

3) Work intentionally with the Department of Health and Human Services- Public Health Branch to implement strategies to reduce homelessness identified in the Humboldt County Community Health Improvement Plan (CHIP). HHHC members will support and collaborate with partners working on the housing and homelessness focus area to ensure equitable access to services for those experiencing homelessness. Housing and homelessness are one of four priority areas in the CHIP. Working with the CoC, a cross-agency housing data workgroup is currently diving deeper into data to examine populations that are disproportionately impacted by homelessness. A key focus of the CHIP is health equity and the examination of health disparities in Humboldt County.

4) Explore with the CoC the recruitment of people of color with lived experience of homelessness to the CoC Board. Increase the diversity of representation on the HHHC with regards to both race and gender.

5) Participate in training and technical assistance opportunities offered by CallCH, the California Racial Equity Action Lab (CA REAL) or other state agencies and organizations working to promote racial and gender equity, particularly in the area of housing and homelessness services and supports.

Question 4

A description of how the applicant will make progress in preventing exits to homelessness from institutional settings, including plans to leverage funding from mainstream systems for evidence-based housing and housing-based solutions to homelessness.

Note: Such mainstream systems could include:

- Physical and behavioral health care systems and managed care plan organizations
- Public health system
- Criminal legal system and system for supporting re-entry from incarceration
- Child welfare system
- Affordable housing funders and providers
- Income support programs
- Education system
- Workforce and employment systems
- Other social services and human services systems

Question 4 Response

Interviews conducted by CCRP surfaced a number of current efforts and collaboration to prevent exits to homelessness from institutional settings. The lack of available housing is one of the primary barriers for partners who work with individuals who need to exit an institutional setting and find housing.

Providence St. Joseph Health System, in partnership with the Betty Kwan Chinn Homeless Foundation, operates a Medical Respite Program that connects vulnerable populations with interim housing after they are discharged from the hospital. Providence's CARE Network, a team of registered nurses, social workers, and health care navigators, provides supportive services for participants of the programs. Efforts are being made to continue and expand upon this work utilizing community benefit funding from Providence St. Joseph, as well as Homekey funding.

The Humboldt County Probation Department offers support to individuals returning to the community after being released from state prison. In partnership with Arcata House Partnership, the county uses realignment funding (AB109) to fund beds for parolees as well as supportive services to prevent parolees from becoming homeless. The County is currently exploring strategies to expand the number of beds available to parolees utilizing public safety realignment funding and HHAP funding.

The Humboldt County Department of Health & Human Services- Behavioral Health Branch runs Sempervirens, a 24-hour psychiatric facility, and they have a policy on how they handle discharges with individuals who are experiencing homelessness. This includes gathering key documents from the client or a family member to determine their eligibility for specific services and/or programs.

Several stakeholders agreed that more work needs to be done to create pathways to permanent supportive housing for those exiting institutional settings. It is very difficult for individuals who have been in

institutional settings to navigate the transition to permanent housing and independent living. By creating a co-located navigation and day center in Eureka, individuals experiencing homelessness can access additional support to successfully navigate that transition. The HHHC will make specific efforts to collaborate with the partners working with those in institutional settings to create referral pathways to the navigation and day center.

In addition, the HHHC will work with the aforementioned partners to support their efforts to create, review, and/or update their policies on how discharges and/or case plans specifically address the needs of individuals experiencing homelessness and share this information widely to increase awareness of any community resources that this population can access. In addition, partners can share information with the HHHC regarding any resources or funding they have to support the transition of these individuals back into the community.

The HHHC will support and/or collaborate on efforts made by partners that work with individuals exiting from institutional settings to identify and/or apply for additional funding to support these efforts. This may take the form of a support letter from the HHHC to a collaborative proposal that includes funding for multiple partners to support the specific needs of this population.

Question 5

Specific and quantifiable systems improvements that the applicant will take to improve the delivery of housing and services to people experiencing homelessness or at risk of homelessness, including, but not limited to, the following:

(I) Capacity building and workforce development for service providers within the jurisdiction, including removing barriers to contracting with culturally specific service providers and building the capacity of providers to administer culturally specific services.

(II) Strengthening the data quality of the recipient's Homeless Management Information System.

(III) Increasing capacity for pooling and aligning housing and services funding from existing, mainstream, and new funding.

(IV) Improving homeless point-in-time counts.

(V) Improving coordinated entry systems to strengthen coordinated entry systems to eliminate racial bias, to create a youthspecific coordinated entry system or youth-specific coordinated entry access points, or to improve the coordinated entry assessment tool to ensure that it contemplates the specific needs of youth experiencing homelessness.

Question 5 Response

Capacity building and workforce development for service providers in Humboldt County is an important area of focus given widespread workforce shortages for many of the service providers that comprise the homeless response system in Humboldt County. A first step is making sure that the County receives and passes along any training and/or capacity building resources or opportunities that are made available by state and national partners working to reduce homelessness, and to continue to encourage information sharing between partners at all collaborative meetings.

Existing collaborative efforts with the local Tribal Housing Authorities will be shared with the HHHC and expanded upon. The RFP released by the county to distribute funds will be shared with the following eight local Tribes: Blue Lake Rancheria, Wiyot Tribe, Bear River Band of the Rohnerville Rancheria, Karuk Tribe, Hoopa Valley Tribe, Yurok Tribe, Big Lagoon Rancheria, and the Trinidad Rancheria.

Referral pathways for individuals experiencing homelessness can also be strengthened to ensure that people are linked to service providers with culturally specific services. The HHHC can tap into existing trainings offered in the county that build the knowledge and capacity of providers to link individuals with culturally specific services. There is already a wealth of local Tribes and Tribal-serving organizations actively working in Humboldt County; the HHHC will intentionally reach out to these existing assets and request information and opportunities to support and strengthen this work with the guidance and leadership of our local Tribes.

The Tribes are just one example; there are also service providers that specialize in working with the Spanish speaking population, again, the key strategy here will be to network with the existing leaders and groups that specialize in serving this particular population.

The County and the HHHC will continue to work collaboratively to determine how to strengthen the quality and quantity of HMIS data. The County, in its capacity as HMIS Lead, will continue to ensure that providers have access to all the support and tools they need to ensure a high level of data quality within the HMIS. The HHHC will monitor data quality, in conjunction with the HMIS Lead, and a number of encouragements and enforcements will ensure providers understand the importance of data quality within HMIS.

To strengthen the data quality of HMIS, the following steps will be taken:

• The HHHC Board will make data quality a meeting agenda item at regular intervals and will acknowledge providers that meet a high level of data quality in the meeting minutes which will be posted on the CoC's website.

• The CoC will acknowledge the work of providers meeting a high level of data quality every quarter during the CoC General Membership Meeting, via the CoC e-newsletter, or other public forums that acknowledge the work done to improve data quality in HMIS.

• The CoC will use data quality in HMIS during the annual rank and review process for CoC dollars. In order to be eligible for CoC dollars, projects will need to maintain a baseline threshold data quality requirement and will be awarded additional points for going above and beyond the baseline. Guidance on specifics of this process will be released each year with the local CoC NOFA competition process.

• The CoC will work with state and local funders to also use data quality metrics when making funding allocation decisions to providers/projects. The CoC will encourage state and local funders to use the same process the CoC uses during the annual rank and review process for CoC dollars.

• The CoC will work with providers who do not currently use HMIS and talk through the reasons why they do not use HMIS. Depending on the reasons, the CoC will work with the providers to make HMIS a realistic option.

Humboldt County worked collaboratively with the HHHC and the California Center for Rural Policy at Cal Poly Humboldt to inventory the variety of funding sources utilized by partners; this information can be found in the landscape analysis section of the data tables template. There is already existing capacity due to longstanding relationships for the pooling and alignment of funding. The Homekey projects awarded to Humboldt County are a good example of new funding sources where partners worked collaboratively to apply. Currently there is interest in further exploration of the alignment of services and funding streams. Funders need to continue to

encourage and support the pooling and alignment of multiple funding streams to support jurisdictions in these efforts.

Interviews conducted to prepare this application surfaced several key themes related to this topic:

1) Solving the issue of homelessness requires collaboration- no one jurisdiction, agency, or organization has the capacity to solve such a complex and multifaceted problem.

2) Solutions require the alignment of multiple funding streams; e.g. you can't just build housing without having a plan for supportive services.

3) Interviewees suggested that alignment and pooling of funding also can prevent duplication of services. If everyone's work is in alignment, agencies and organizations can focus on what they do best and gaps in the system are more easily identified.

Every other year, the HHHC conducts their point-in-time count of people living in places not meant for human habitation, emergency shelters and transitional housing. This data is important as it informs policy and planning decisions related to the county and the HHHC. However, limitations to this data exist as certain populations such as youth don't always meet the federal definition of homeless.

Humboldt County is a geographically large, very rural county, and this fact has always posed challenges for the homeless point-in-time counts. The county's geography includes vast sections of undeveloped land that are not reachable by roads or supported by any infrastructure, making it very challenging to count people who are "living in the hills" or "living in the forest." However, there is a great deal of community-wide interest in the results of the point-in-time count data.

For both Humboldt County and for the state as a whole, the reliance on this point-in-time count data as the primary source of information about the unsheltered population is of concern. Efforts to improve the homeless point-in-time counts should be supported at the jurisdictional level, but also at the state and national levels as well. Humboldt County is supportive of any efforts across the region, state, and nation to improve these counts, and will participate in any opportunities and efforts to improve the quality of this data.

In terms of county-specific efforts, the following steps will be taken:

1) Continue to refine and improve local count methodology based on best practices and innovative efforts in other rural counties across the state and nation.

2) Utilize the point-in-time count as an opportunity to engage partners that are not regular participants in the HHHC.

3) Explore more collaboration on the point-in-time count with the Eureka Police Department, who regularly survey and gather data from individuals experiencing homelessness independent of the point-in-time count.

4) Improve efforts to utilize the expertise of the CoC to identify the location of and work towards robust counts of people living in large and visible encampments around the county.

5) Clearly document methodology of the count, such as numbers of volunteers, where their efforts are focused, weather, and other factors, so that this information can be tracked over time and provide context for the actual count numbers.

For the purposes of improving data collection, the County will continue to gather information, summarize the information, and work closely with the HHHC to develop quantifiable goals to improve the quality of homeless point-in-time counts.

Several interviewees identified a need for a youth specific coordinated entry system. The County is aware of the conflicting requirements for youth to be prioritized in the coordinated entry system and are gathering input to develop strategies to address the need. The County has key partnerships with youth-related and youth-lead collaboratives such as the Humboldt Houseless Youth Support Collaboration (HHYSC) and the Humboldt County Transition-Age Youth Collaboration (HCTAYC). Both of these partnerships will be utilized to implement strategies that address the specific needs of youth experiencing homelessness.

Several stakeholders mentioned in interviews the complexities around youth experiencing homelessness and whether or not the existing coordinated entry system meets those needs. These concerns focus on eligibility to be included in the coordinated entry system and the prioritization of individuals in the system based on current vulnerability measurement tools.

One concern mentioned is that the coordinated entry system currently requires an individual be categorized as chronically homeless. The requirements for experiencing and documenting at least one year of homelessness can be a significant barrier to youth accessing coordinated entry system programs. Youth and youth-serving organizations also expressed concern about the usefulness of the VI-SPDAT in determining the actual vulnerability of youth experiencing homelessness. This tool does not address the fact that what makes an unaccompanied youth more vulnerable may be different than what makes a chronically homeless adult more vulnerable. Some programs that utilize coordinated entry system prioritization require proof of disability, which is a barrier for youth who may have unrecognized or undiagnosed disabilities. Another concern that came up multiple times during stakeholder interviews was the fact that most McKinney-Vento students don't meet the unsheltered definition of homelessness because they are either doubled up or tripled up in housing, i.e., couch surfing. Youth and youth serving organizations voiced that the form of homelessness someone experiences does not necessarily predict risk. An example given, youth sleeping in an abandoned building or homeless shelter may feel and be safer than youth staying in the home of someone who is dangerous.

2-1-1 Humboldt is a county-wide resource for linking community members to an array of services, including housing and linkage to the coordinated entry system. 2-1-1 Humboldt, DHHS, street outreach, Arcata House Partnership in the north and Southern Humboldt Housing Opportunities in the south enroll people in the coordinated entry system. Marketing and outreach efforts are designed to ensure people in different populations and subpopulations in the CoC's geographic area, including families with children as well as youth have fair and equal access to the coordinated entry system.

Question 6

Evidence of connection with the local homeless Coordinated Entry System.

Question 6 Response

Individuals experiencing homelessness in Humboldt County can access the coordinated entry system by dialing 2-1-1 and/or by visiting 211humboldt.org. Humboldt County uses HMIS as well as the Vulnerability Index-Service Prioritization Decision Assistance Tool (VI-SPDAT) for their Coordinated Entry System (CES). The VI-SPDAT serves as a screening tool to determine whether a client has high, moderate, or low acuity. The county has created a project in HMIS for the CES that collects all referrals and assessments and maintains a prioritization list for connecting individuals and families to available housing. Placement on the priority list is dependent upon a classification of being chronically homeless and a score of eight or higher on the VI-SPDAT. The Humboldt County CoC uses the universal system management process for project operators to match clients on the priority list to an available placement. For purposes of informing the community about the CES, DHHS and 2-1-1 Humboldt do street outreach, offering intake services and referrals to a local drop-in center.

Certification

I certify that all information included in this Application is true and accurate to the best of my knowledge.

Yes

Table 1. Landscape Analysis	of Needs and Demographics

Table 5. Strate	gies to Acl	hieve Outcome Goals
Strategy		Performance Measure to Be Impacted (Check all that apply)
Description	 ✓ 	1. Reducing the number of persons experiencing homelessness.
Expand permanent supportive housing utilizing Homekey & HHAP funding. Prioritize permanent supportive housing for underserved populations that are currently unsheltered.		2. Reducing the number of persons who become homeless for the first time.
Timeframe		3. Increasing the number of people exiting homelessness into permanent housing.
By June 2024		4. Reducing the length of time persons remain homeless.
Entities with Lead Responsibilities	\checkmark	5. Reducing the number of persons who return to homelessness after exiting homelessness to permanent housing.
Agencies awarded HomeKey funding and HHAP grantees		6. Increasing successful placements from street outreach.
Measurable Targets 1. The annual estimate of the number of people accessing services who are experiencing homelessness, as outlined by Cal ICH through HDIS CY2020 baseline data, will increase by 5-10 percent or 75-150 people. 2. The daily estimate of people experiencing unsheltered homelessness, as indicated by Humboldt County's 2019 point-in-time count, will decrease by 5 percent or 70 people. 3. The annual estimate of the number of people exiting the homeless system into permanent housing, as indicated by Cal ICH through HDIS data for CY2020, will increase by 5 percent or 14 people. 4. The annual percentage of people who return to homelessness after having exited homelessness to permanent housing as recorded in HMIS, will decrease by 2 to 3 percent from the CY2020 baseline.		Focused on equity goals related to underserved populations and populations disproportionately impacted by homelessness.

Strategy		Performance Measure to Be Impacted (Check all that apply)
Description		1. Reducing the number of persons experiencing homelessness.
Utilize HHAP funding for outreach and engagement costs of a day center.		2. Reducing the number of persons who become homeless for the first time.

Explanation of How the Proposed Use of Funds Will Complement Existing local, state, and federal funds and equitably close the gaps identified in the Local Landscape Analysis

The proposed HHAP funding will complement existing HomeKey funding, in which four projects are currently in development. Alignment of this funding is targeted towards disproportionately impacted and underserved populations throughout the county. Proposed HHAP funding will also complement current CDBG-CV funding through supporting outreach and engagement costs of the City of Eureka's navigation center that is being established. Funding through HHAP will also be aligned with other sources of funding currently being utilized in the county through contracting with organizations working to end homelessness in Humboldt County.
