### Narratives

#### **Disaster Damage:**

October 2017 Wildfires (DR-4344) - The October 2017 fires spanned from the north coast of the San Francisco Bay Area, to the northern Central Valley and Orange County. Fires included the Central Lake-Napa Unit (LNU) Complex (including the Pocket, Tubbs, Nuns, and Atlas fires) in Sonoma and Napa Counties, the Mendocino Lake Complex (including the Redwood Valley and Sulphur fires), and Wind Complex (Cascade and Laporte, Lobo, and McCourtney fires) in the Tri-County region including Butte, Nevada and Yuba Counties, as well as the Canyon fire in Orange County. The October 2017 wildfires burned over 200,000 acres combined and destroyed 8,922 structures, with the Central LNU Complex fire responsible for much of the damage. The areas affected sustained approximately \$8.6 billion in property damages and losses, as reported through insurance claims. During and after the disaster, cities and counties responded with services and shelters for those displaced to help begin the process of recovery. However, one year later a survey of households with insurance claims showed 53 percent had not completed the dwelling portion of their claim and 62 percent still planned to rebuild. December Wildfires, Mudflows, and Debris Flows (DR-4353) - The December 2017 fires, mudflows, and debris flows impacted counties across Southern California. Fires include the Thomas Fire, impacting Ventura and Santa Barbara Counties, the Rye Fire and Creek Fire in Los Angeles County, and Lilac fire in San Diego. Following the fires, debris and mudflows severelyimpacted the footprint of the Thomas Fire, devastating the Montecito area in Santa Barbara County.Across all the Southern California fires, a total of 308,383 acres were burned, with the Thomas Fire alone becoming the largest single fire in California history at 281,893 acres burned, until the Mendocino Fire Complex in 2018. The devastation created by the fires was exacerbated by heavy rains that followed, resulting in massive mud and debris flows. Electricity, gas, cellular telephone, internet,

Ongoing Threat - The State of California is experiencing a heightened risk of fire danger due to drought, tree mortality, and an increase of severe weather events. Starting in 2013, Governor Edmund G. Brown Jr. declared a State of Emergency to take precautions against severe drought conditions across the state.Drought severely impacted the heath of California's forests. In December 2017, the U.S. Forest Service and the California Department of Forestry and Fire Protection (CAL FIRE) announced that a total of 129 million trees died due to drought and bark beetles across 8,900,000 acres of the state. The ongoing drought conditions inhibited tree recovery, making forests vulnerable to bark beetles and increasing the wildfire risk for California communities. Although Governor Brown lifted the Drought State of Emergency in April 2017 following the substantial winter storms in 2017, the number of dead trees remains an ongoing threat.

#### **Recovery Needs:**

In Fall of 2018, using HUD's unmet recovery needs methodology as outlined in the August 14, 2018 Federal Register Notice, the total unmet recovery needs were determined to be over \$922 million. Given the data challenges presented in the housing unmet needs analysis, however, including the limited Federal Emergency Management Agency (FEMA) Individual Assistance (IA) and Small Business Administration (SBA) home loan registrations, HCD proposed an alternative methodology for a more holistic portrait of unmet recovery needs. The Housing category includes the alternative methodology of using the boots-on-the-ground damage assessment conducted by CAL FIRE across the disaster impacted communities, which HCD believes shows a more accurate portrait of total housing impacts from the disasters. Using the alterative methodology, the State of California faces over \$2.5 billion in unmet recovery needs. While the amount of unmet recovery needs decreased for FEMA HMGP projects by approximately \$400 million, the unmet recovery needs for FEMA PA projects and other local infrastructure projects increased by more than \$90 million.

MHP:

The 2020 DR-MHP program is still in the design phase. policy and procedures are under review by legal division for compliance, and standard agreement contract boilerplate templates have been routed for approval. Estimated launch has been pushed back to Q4 to allow for syncronization of release of the altered 2018 DR direct to developer NOFA targetting three jurisdictions who have relinquished their allocations.

the DR-MHP-MIT Program is still in development. Research is underway in best and highest uses of funding for resiliency and mitigation that will not trigger local building requirements to bring structure fully up to modern code.
