### Funding Sources

#### No Funding Sources Found

### Narratives

#### Disaster Damage:

The scope and severity of the damage from both the 2023 and 2024 severe winter storms is historically significant across the impacted counties across the state. The storms not only claimed lives but severely damaged several thousand structures, ranging from rural and agricultural areas to dense urban centers of California. This prompted dozens of disaster declarations and forced the evacuation and displacement of residents. All of these impacts further exacerbated the existing housing crisis in California. Communities impacted by the storms and subsequent flooding had near zero housing vacancies prior to disasters, limiting options for disaster survivors for either temporary or more long-term housing options. High housing costs resulted in rent-burdened households and many who live precariously close to homelessness. Given the profound destruction and disruption wrought by storms on the State of California, unmet needs in the state's Most Impacted and Distressed areas (MID) remain significant. HCD is committed to addressing these needs via pursuing additional resources and leveraging other resources to support the statewide recovery effort. In addition, HCD continues to coordinate closely with local, state, and federal partners to collect and analyze data, identify resources, and understand how jurisdictions' unmet needs evolve over time.

#### Recovery Needs:

The U.S. Department of Housing and Urban Development (HUD) announced that the State of California \$416,597,000 in funding to support long-term recovery efforts following the 2023 and 2024 Severe Winter Storms, Flooding, landslides and Mudslides (FEMA Disaster Numbers 4699, 4707, and 4758). The State of California will administer the funds through the California Department of Housing and Community Development (HCD). Community Development Block Grant-Disaster Recovery (CDBG-DR) funding is designed to address needs that remain after all other assistance has been exhausted. This plan details how funds will be used to address remaining unmet need in the State of California. To meet disaster recovery needs, the statutes making CDBG-DR funds available have imposed requirements and authorized HUD to modify the rules that apply to the annual CDBG program to enhance flexibility and facilitate a quicker recovery. HUD has allocated \$416,597,000 in CDBG-DR funds to the State of California in response to FEMA DR: 4699, 4707, and 4758, through the publication of the Federal Register (FR6512-N-01). This allocation was made available through the Disaster Relief Supplemental Appropriations Act, 2025 (Pub. L. 118-158). HCD is the lead and responsible agency for administering the CDBG-DR funds allocated to the State of California. HCD strives to ensure that every Californian has a safe, stable, and affordable home. However, California is in a housing crisis a half century in the making. After decades of underproduction, housing supply is far behind need leading to soaring housing prices and rents. Disaster exacerbates California's already unaffordable housing market. HCD intends to spend 100 Percent of the funds in Most Impacted Distressed areas identified for this allocation through housing, infrastructure and planning programs. Nearly 2/3 of disaster tieback funding is allocated to housing as the largest unmet recovery need for DRs 4699, 4707 and 4758. HCD's proposed housing, infrastructure and

planning programs will help meet CDBG-DR’s overall benefit requirement. The information provided in this action plan reflects a significant amount of outreach and engagement to all eligible counties, cities, and tribal governments, as well local nongovernmental organizations engaged in disaster response and recovery.

**Location Description:****Activity Description:**

The primary objectives of Home Buyers Assistance Program (HBA) are to assist communities recovering from the impacts of a disaster by providing decent housing and suitable living environments and to expand economic opportunities, principally for LMI persons. Additionally, the Program aims to increase the level of homeownership among impacted disaster survivors and contribute to the affordability of communities across the state.

The Program will provide downpayment and other assistance in the form of forgivable second loans to LMI disaster impacted renters whose primary residence at the time of the qualifying 2023 or 2024 disasters was in a HUD-designated MID area. The assistance is intended to cover the funding gap between the amount of the applicant's first mortgage and the purchase price of a new home.

**Location Description:****Activity Description:**

Housing and Community Development (HCD) will provide direct awards to eligible HUD-identified MID applicants using an allocation methodology based on unmet need as established by the unmet needs assessment. Through extensive outreach, HCD gathered project level infrastructure data from the DR 4699, DR 4758, and DR 4707 MIDs. The data was assessed for tie-back to the qualifying disasters and then relevant data was totaled and applied proportionally to the overall MID infrastructure unmet need. This proportion of unmet need was then applied to the total infrastructure program award to determine allocations. Upon action plan approval of these direct allocations, applicants will be able to submit eligible projects towards their allocations until all funds are obligated. HCD will review projects for the use of funds and provide technical assistance and oversight to ensure that local governments receiving funds execute their infrastructure recovery effectively.

**Location Description:**

**Activity Description:**

Disaster Recovery Multifamily Housing Program (DR-MHP) is designed to meet the unmet rental housing need, including the needs of individuals displaced from rental mobile homes, single family and multifamily rental units, as well as individuals made homeless as a result of the disaster. Multifamily projects include apartment complexes and mixed-use developments. These developments are also intended to help replace rental housing units available to Housing Choice Voucher holders that were lost. The objective of the CDBG-DR funds is to provide necessary gap financing for the development of rental housing units in the HUD MID areas from DR4699 and DR-4758. Furthermore, the Program will not only address disaster-related damages but also will mitigate potential future damage.

**Location Description:****Activity Description:**

The primary objective of Single Family Rehabilitation and Reconstruction (SFRR) is the provision of housing in the areas impacted by the DR-4707, DR-4699, and DR-4758 disasters. SFRR is designed to ensure that the housing needs of LMI households, including individuals that were made homeless as a result of the disaster, are addressed to the greatest extent feasible. The program will ensure all homes rehabilitated or reconstructed through SFRR meet resiliency standards to mitigate against future disaster impacts. Rehabilitation or reconstruction assistance will be provided to eligible applicants based on the extent of damage to their primary residences or single-family rental properties. Assistance may be in the form of program provided construction management of rehabilitation and reconstruction activities. SFRR may reimburse program approved eligible activities incurred by owner-occupied applicants.

**Location Description:**

**Activity Description:**

This program provides local jurisdictions with an expansive and hands-on role in driving local community infrastructure and planning needs that meet the definition of mitigation. The Resilient Infrastructure and Planning Program (MIT-RIPP) will assist local jurisdictions in addressing mitigation-related infrastructure and planning needs to support risk reduction from the three primary hazards (wildfire, flooding, and earthquake) as established within the Mitigation Needs Assessment. Projects may address risks to a variety of systems and structures to enable continuous operations of critical business and government functions during future disasters and improve responses for human health and safety or economic security. Housing and Community Development (HCD) anticipates that the program design will present projects that could overlap across different environments, enabling HCD to determine maximum impact within the MID and surrounding areas.

| Responsible Organization | Organization Type | Proposed Budget |
|--------------------------|-------------------|-----------------|
| State of California      | State             | \$ 7,500,000.00 |

### Location Description:

### Activity Description:

To assess this risk, Housing and Community Development (HCD) will partner with the State of California Department of Insurance as subject matter experts to design complete a planning project which focuses on the insurance gaps of the MID communities. This plan will look at the current insurance market in the MIDs, assess gaps and look at possible solutions for the communities to consider engagement. These solutions will focus on insurance products or solutions which can mitigate the future recovery particularly for at-risk communities and promote self-reliance. Solutions may include, but are not limited to, such products as community wide Resilience Insurance, NFIP subsidy vouchers for LMI homeowners, or Insurance for local governments. The goal is to understand the risks in the current MIDs and create a planning tool that can be scaled and scoped to utilize in other communities across the state.

### Proposed budgets for organizations carrying out Activity:

| Responsible Organization | Organization Type | Proposed Budget  |
|--------------------------|-------------------|------------------|
| State of California      | State             | \$ 22,576,000.00 |

### Location Description:

### Activity Description:

Planning efforts at the local, regional and state level are necessary to ensure the disaster impacted areas are rebuilt in a more resilient manner and can prepare for differences in funding cycles required to construct housing or infrastructure projects. In response to the impacts of the 2023 severe storms, the Hoopa Valley Tribe were declared a major disaster area by Congress. A major disaster declaration is indicative of disaster impacts exceeding local capacity to respond. HCD was able to identify some anecdotal information of continued recovery needs for Hoopa Valley tribe. When HCD contacted tribal leadership, they indicated need for additional time to gather data to formulate the full picture of Hoopa Valley tribe's disaster recovery needs. In addition, to Hoopa Valley tribe's impacts from March 2023 storms (DR 4707), HCD was able to gather information on DR 4699 disaster impacts from the Tule River Tribe, a federal recognized tribe located in Tulare County.
